Zoning Adjustments Board Staff Report

APP # ZP2024-0066

Sept 11, 2025

Use Permit for a Project at address 2109 Virginia Street

Project Facts

Applicant: Isaiah Stackhouse. Stackhouse, De La Pena, Trachtenberg Architects

Property Owner: American Commonwealth Associates

Project Address: 2109 Virginia Street/1685 Shattuck Avenue

GP Land Use:
Neighborhood Commercial (NC), Medium Density Residential (MDR), High Density Residential (HDR)

Zoning:
North Shattuck Commercial (C-NS), Restricted Multiple-Family Residential District (R-2A), Multi-Family Residential District (R-4)

Site Size: .51 acres

CEQA: Exempt pursuant to Section 15183.3 ("Streamlining for Infill Projects")

Vesting Date: December 27, 2023

Date Deemed Complete: July 23, 2024

Project Planner: Singeh Saliki

Project Description:

The applicant is seeking approval to demolish a 2-story commercial building (4,604 square feet) and surface parking lot, and construct an 8-story (89 feet and 4 inches) 112,969 square-foot mixed-use residential development with 110 dwelling units (including 9 Very Low-Income and 9 Moderate Income units), 690 square feet of ground floor commercial space, 109 off-street vehicle parking spaces and 64 bicycle parking spaces.

Zoning Permits Requested:

1. **Demolition.** Use Permit under BMC Section 23.326.070(A) **"Main Non-Residential Building"** to demolish a non-residential building
2. **New Construction.** Use Permit under BMC Section 23.202.020 (A) **"Allowed Land Uses"** to construct a new mixed-use development.
3. **New Construction.** Use Permit under BMC Section 23.204.020 (A) **"Allowed Land Uses"** to construct a new mixed-use development.
4. **New Floor Area.** Use Permit under BMC Section 23.204.030(A)(1) **"Floor Area Permit Requirements"** to create new floor area of 2,000 square feet or more.
5. **Building Height.** Administrative Use Permit under BMC Section 23.304.050(A) **"Projections Above Height Limits"** to exceed the allowed height limit with a rooftop projection.

Staff Recommendation:

Staff recommends that ZAB determine the project is exempt from CEQA, pursuant to Section 15183.3 of the CEQA Guidelines ("Streamlining for Infill Projects"), and approve ZP2024-0066 pursuant to BMC Section 23.406.040 (E) "Findings for Approval" and subject to the attached Findings and Conditions of Approval.

STREET ELEVATION

BACKGROUND

Subject Site

The site is a rectangular north-south-oriented corner lot that gently slopes downward to the southwest. It is located on the northeast corner of Shattuck Avenue and Virginia Street in the North Berkeley neighborhood. The site is one parcel (Accessor Parcel Number APN 058-2178-018) consisting of three previously merged lots, resulting in a split-zoned 22,513 square foot lot. Table 1 below shows a breakdown of the lot size by Zoning District.

2109 Virginia Street, Split-Zoned Lot Total Area: 22, 513 square feet	
North Shattuck Commercial District (C-NS)	~20,000 square feet
Restricted Multiple-Family Residential District (R-2A)	~600 square feet
Multi-Family Residential District (R-4)	~2,000 square feet

Table 1. Site Zoning

The area is characterized by residential and commercial buildings that are one to three stories tall. Housing types include single-family homes, duplexes, and small apartment buildings. There are existing on-street metered parking spaces along the frontages of Shattuck Avenue and Virginia Street. The property is served by Alameda County Transit buses and is less than one mile from the North Berkeley BART Station and half a mile from the Downtown Berkeley BART Station. There are various local shops, restaurants, services, public parks, and the University of California, Berkeley, all within a half-mile of the site.

Site History

The site is developed with a surface parking lot in the northern portion and a 4,604-square-foot, two-story commercial building in the southwest corner. The parking lot is accessed from a driveway at the northern end of the site on Shattuck Avenue. The original building was constructed in 1906 as a mixed-use building (commercial and residential) that was later expanded in footprint and used only for commercial uses. The building was occupied by a variety of commercial tenants over the years, including Virginia Cleaners as the largest and longest-standing tenant (1920-1967). The building suffered a number of fires during its history. A 1981 fire nearly destroyed the entire building; it was substantially rebuilt in 1983.

The building is built to the property line along Virginia Street and Shattuck Avenue. It has four ground-floor storefronts, two of which are vacant. It is recognizable most recently as home to the restaurant Poulet, which occupied the southwestern corner of the building from 1979-2023. A travel agency occupies the northwestern corner of the building and fronts Shattuck Avenue.

ANALYSIS

Project Scope

The proposed project would demolish the existing 2-story commercial building and surface parking lot to construct a new 112,969-square-foot mixed-use building. The project utilizes the State Density Bonus and includes the following primary components:

- 8 stories, 89 feet and 4 inches in height to the top of the roof parapet
- 110 dwelling units – 14 studios, 28 one-bedroom, 41 two-bedroom, and 27 three-bedroom (178 bedrooms total)
- 9 Very Low-Income (VLI) and 9 Moderate Income (MI) dwelling units
- 7,060 square feet of usable open space including:
    - 2,670 square feet podium deck
    - 320 square foot podium private patios
    - 1,030 square foot roof deck
    - 3,040 square feet unit balconies
- 690 square feet of ground-floor commercial space
- 109 vehicle parking spaces – for residential use
- 64 bicycle parking spaces – 59 residential long-term, 4 residential short-term, and 1 commercial

Findings

Draft findings for approval can be found in Attachment 2 to the staff report.

2023-2031 Housing Element

The 2023-2031 Housing Element adopted by the City Council on January 18, 2023, identifies the project site as an opportunity site. Opportunity Sites are vacant or underutilized sites with near-term potential for residential or mixed-use development. Due to the site size exceeding 0.5 acres, it was identified as a "High Potential" site for redevelopment of residential uses, with a capacity of 50 dwelling units per acre.

Environmental Review

The proposed project is exempt from the provisions of the California Environmental Quality Act (CEQA, Public Resources Code §21000, et seq. and California Code of Regulations, §15000, et seq.) pursuant to Section 15183.3 of the CEQA Guidelines ("Streamlining for Infill Projects").

An environmental checklist (Attachment 8) was prepared for the project in accordance with CEQA Sections 15183.3 and 15162, utilizing the Housing Element's Environmental Impact Report (EIR, SCH#2010032073) for a consistency analysis. This consistency analysis was prepared pursuant to *State CEQA Guidelines* Section 15183 ("Projects Consistent with a Community Plan, General Plan, or Zoning"), which provides that projects "consistent with the development density established by existing zoning, community plan, or general plan policies for which an EIR was certified shall not require additional environmental review, except as might be necessary to examine whether there are project-specific significant effects which are peculiar to the project or its site." This streamlines the review of such projects and reduces the need to prepare repetitive environmental studies. The analysis found no new information of substantial importance meeting the criteria listed in the *State CEQA Guidelines* Section 15183 ("Projects Consistent with a Community Plan, General Plan, or Zoning"). The analysis concluded that the proposed project would not result in any new impacts that would require additional mitigation measures beyond those required by the Housing Element EIR.

Base Project and Density Bonus

The applicant has requested a density bonus under the State Density Bonus Law (Govt. Code Section 65915). Under the City's density bonus procedures, the "base project[1]" is 55 units, as the maximum allowable density for the site. The 3-story base project and the resulting 8-story proposed project both have an average unit size of 1,032 square feet. By providing 9 Very Low-Income and 9 Moderate Income units on site (30 percent of the 55-unit base density), the project is eligible for a 100 percent density bonus, or 55 additional units. Therefore, the applicant proposes 55 additional units above the base density for a total of 110 dwelling units. The table below includes the Density Bonus calculations. The proposed density bonus project would provide double the number of residential units anticipated for a 0.51-acre site, as identified in the Housing Element.

[1] Per the City's Density Bonus Procedures (DBP), the base project is the largest project allowed on the site that is fully compliant with district development standards (i.e. height, setbacks, usable open space, parking, etc.), or, the *maximum allowable density* for the site. The City uses the DBP to calculate the maximum allowable density for a site where there is no density standard in the zoning district, and to determine the number of units in the proposed project, which is the number of base project units plus the number of density bonus units that can be added according to the percentage of BMR units proposed, per Government Code, Section 65915(f).

Base Project Units [a]	Qualifying Units	Percent Density Bonus	Number of Density Bonus Units [a]	Proposed Project Units [a]
55	9 VLI units (15% of BP) 9 MI units (15% of BP)	100%	55 (100% of BP)	110

Notes:

a. Pursuant to Government Code 65915(q), all unit calculations are rounded up to the next whole number.

Abbreviations: % = percent

Concession and Waivers Pursuant to State Density Bonus Law (CA Govt. Code Section 65915)

A **concession** is a modification of a development standard that reduces the cost of providing affordable housing. The City may only deny the concession if it finds that the concession would have a specific adverse impact upon public health and safety, or the physical environment, or on any real property listed in the California Register of Historical Resources, and there is no feasible method to satisfactorily mitigate or avoid the specific adverse impact without rendering the development unaffordable to low-income, very-low income, and moderate-income households, or if the concession would be contrary to State or Federal law. Staff believes such a finding cannot be made.

The project is entitled to 3 concessions (or incentives) under Government Code Section 65915(d), and an unlimited number of waivers under Section 65915(e). The applicant is requesting 2 concessions for the project:

- **Public Art In-lieu Fee.** A Concession from BMC Chapter 23.316 to allow an exemption from the Percentage for Public Art on Private Projects in-lieu fee; and
- **On-Grade Parking.** A Concession to relocate the underground parking in the base project to above grade in the proposed project.

A **waiver** is a modification of a development standard that would otherwise physically preclude the construction of the project with the permitted density bonus and concessions. The City may only deny the waivers if it finds that the waivers would have a specific adverse impact upon public health and safety, or the physical environment, or on any real property listed in the California Register of Historical Resources, and there is no feasible method to satisfactorily mitigate or avoid the specific adverse impact without rendering the development unaffordable to low-income, very-low income, and moderate-income households, or if the waiver would be contrary to State or Federal law. Staff believes such a finding cannot be made.

The applicant is requesting 11 waivers from the following development standards:

North Shattuck Commercial District (C-NS):

- **Main Building Height.** Waiver from BMC Section 23.204.090(D)(1) "Basic Development Standards" for a mixed-use project to exceed the 35-foot maximum height limit by adding 54 feet, 4 inches, for a total of 89 feet, 4 inches, and exceed the 3-story limit by adding 5 stories, for a total of 8 stories.
- **Residential Window Setback**. Waiver from BMC Section 23.204.090(D)(4) "Residential Window Setback" to reduce the setback for a Mixed-Use building, opposite a required window in any habitable room of a residential use, to 0 feet, 0 inches where 10 feet is required.
- **Interior Side Setback.** Waiver from BMC Section 23.304.030(C)(2) "Lots Adjacent to Residential Districts" to reduce the interior side setback to 0 feet, 0 inches for the interior side where 5 feet is required.
- **Parking.** Waiver from BMC Section 23.322.070(D)(1) **"Excess Off-Street Parking"** to exceed the maximum number of off-street residential parking.

Restricted Multiple Family Residential District (R-2A):

- **Main Building Height.** Waiver from BMC Section 23.202.090(D)(1) "Basic Development Standards" to exceed the 35-foot maximum by adding 54 feet, 4 inches for a total of 89 feet, 4 inches, and exceed the 3-story limit by adding 5 stories, for a total of 8 stories.
- **Lot Coverage.** Waiver from BMC Section 23.202.090(D)(2) "Supplemental Development Standards" to exceed the 40% lot coverage limit for a 3-story building on a corner lot by adding 60% for a total of 100% lot coverage.
- **Interior Side Setback**. Waiver from BMC Section 23.202.090(D)(1) "Basic Development Standards" to reduce the interior side setback to 0 feet, 0 inches on the first and second story where 4 feet is required.

Multi-Family Residential District (R-4):

- **Main Building Height.** Waiver from BMC Section 23.202.110(E)(1) "Basic Development Standards" to exceed the 65-foot maximum height by adding 24 feet, 4 inches for a total of 89 feet, 4 inches and exceed the 6-story limit by adding 2 stories, for a total of 8 stories.
- **Lot Coverage.** Waiver from BMC Section 23.202.110(E)(2) "Supplemental Development Standards" to exceed the 40% lot coverage limit for a 6-story building on a corner lot in by adding 60% for a total of 100% lot coverage.
- **Front Setback.** Waiver from BMC Section 23.202.110(E)(1) "Basic Development Standards" to reduce the front setback to 2 feet, 10 inches on the western side of the lot and 5 feet, 8 inches on the eastern side of the lot where 15 feet is required.

Multi-Family Residential District (R-4) cont'd:

- **Interior Side Setback.** Waiver from BMC Section 23.202.110(E)(1) "Basic Development Standards" to reduce the interior side setback to 0 feet, 0 inches for stories 1-2 where 4 feet is required, and provide a 9 foot, 8-inch setback for 3-8 stories, where:
    - 6 feet is required for the third story,
    - 8 feet is required for the fourth story,
    - 10 feet is required for the fifth story, and
    - 12 feet is required for the sixth story.

ADVISORY BODY REVIEW

Landmarks Preservation Commission Review: Demolition Referral

The project involves the demolition of a commercial building over 40 years old. A Historic Resources Evaluation (HRE) for the property was completed by Left Coast Architectural History on April 23, 2024. The HRE found that the original building was constructed in 1906 and had multiple subsequent additions; a 1981 fire destroyed most of the structure and was it was reconstructed in an entirely different architectural style in 1983. The HRE concluded that the building does not meet the criteria for listing in the California Register or a City of Berkeley Landmark or Structure of Merit. Pursuant to BMC Section 23.326.070(C) "Landmarks Preservation Commission Review", the proposed demolition was referred to the Landmarks Preservation Commission (LPC) for review prior to the Zoning Adjustment Board's consideration of the Use Permit. The LPC reviewed the demolition referral on October 7, 2024, took no action to designate the building as a City Landmark or Structure of Merit, and recommended the Zoning Adjustment Board consider a Condition of Approval to include an interpretive display regarding Le Poulet's role in the farm-to-table movement in Berkeley.

Design Review Committee Review: Preliminary Design Review

On May, 15, 2025, the Design Review Committee (DRC) reviewed the project design for 1685 Shattuck Avenue and 2103-09 Virginia Street, gave a favorable recommendation on the preliminary design as presented, and provided the following direction for Final Design Review: ***Motion: (Cameron Woo) Second (Janet Tam) VOTE (5-0-0-2) Gaffney and Muszynski - absent***

Recommendations:

Site Design / Neighborhood Context

- Recommend more active uses on Shattuck.
- Would prefer larger step back on east, even if less on North side.

Exterior Finishes

- Consider alternate colors and materials; take North Shattuck adjacent scale and structures into consideration.

Landscaping

- Recommend trees on the east podium edge for neighbor privacy; consider columnar trees.
- Consider alternate programming and landscape for the courtyard that doesn't need the pool feature, if stagnate.

Windows / Building Details

- Consider more privacy for windows on east side, with light spill in mind as well.
- Further develop ground floor storefronts for more pedestrian interest and detail.
- Consider a storefront design on the west side that could accommodate more ground floor retail in future phases.
- Provide sun control on the west and south sides.

Community Meeting

Prior to submitting this application to the city, the applicant installed a pre-application poster on site in May 2024 and invited interested neighborhood organizations as well as owners and tenants located within 300 feet of the project site to a project preview meeting. The meeting was held virtually on May 23, 2024, and attended by 7 individuals (meeting minutes are included as Attachment 6). Their concerns included the height of the building, remediation of environmental hazards on the site, parking, target residents and unit types. After the neighborhood meeting, staff received 2 letters (1 neighborhood organization and 1 citizen) which expressed concerns about the building height, size, remediation of environmental hazards on the site, number and type of units, parking, target residents, and local businesses rents.

Prior to and shortly after the May 15, 2025 DRC meeting, staff received 3 letters from citizens. Two letters inquired about the status of the project and the DRC meeting. The third letter expressed concerns about the building's height and size.

On July 10, 2025, the City mailed public hearing notices to property owners and tenants within 300 feet of the project site, and to interested neighborhood organizations. The City posted notices at three nearby locations within the neighborhood. The applicant requested to remove the project from the Action Calendar of the July 24, 2025, ZAB public hearing.[2] At that public hearing, staff received 3 letters from citizens expressing concerns about the building height and size, environmental impacts, parking, emergency response, community input, and local businesses.

On August 20, 2025, the City received 3 letters from citizens who attended the North Shattuck community workshop about the Corridors Zoning Update. Two letters were previously received at the July 24, 2025, ZAB public hearing. The third letter expressed concerns about the building scale and materials, traffic, and street frontage.

On August 28, 2025, the City mailed new public hearing notices. At the time of writing this report, staff has received no letters about the project.

See Attachment 7 for all neighborhood comment letters.

[2] The applicant asked for the project to be rescheduled to a new date in order to correct a mistake discovered in the CEQA analysis document.

POLICY CONSISTENCY

Housing Accountability Act

Pursuant to the Housing Accountability Act (HAA), California Government Code Section 65589.5(j), when a proposed housing development complies with the applicable, objective general plan and zoning standards, but a local agency proposes to deny the project or approve it only if the density is reduced, the agency must base its decision on written findings supported by substantial evidence that:

1. The development would have a specific adverse impact on public health or safety[3] unless disapproved, or approved at a lower density; and
2. There is no feasible method to satisfactorily mitigate or avoid the specific adverse impact, other than the disapproval, or approval at a lower density.

Evidence: The project is a "housing development project" consisting of a mixed-use building with at least two-thirds of the floor area in residential use. The Base Project includes Use Permits and/or Administrative Use Permits[4] to allow: demolition, new construction, new floor area, and complies with applicable, objective general plan and zoning standards. Government Code Section 65589.5(j)(3) provides that a request for a density bonus "shall not constitute a valid basis on which to find a proposed housing development project is inconsistent, not in compliance, or not in conformity, with an applicable plan, program, policy, ordinance, standard, requirement, or other similar provision specified in this subdivision." Therefore, the City may not deny the Base Project or density bonus request or reduce the density with respect to those units without basing its decision on the written findings under Section 65589.5(j), above.

The project complies with the zoning standards. Although the project includes Use Permits or Administrative Use Permits to modify standards not associated with the base project, there are no objective criteria in the findings. Therefore, the project still complies with the HAA. The ZAB has the discretion to approve, deny, or modify the request according to the zoning findings, provided the action does not reduce the project density or effectively deny the project by making it infeasible, unless the ZAB is also able to make the required findings for denial set forth under Section 65589.5(j), above.

Staff has not identified any adverse impacts that could occur with the construction of the project.

[3] A "specific, adverse impact" means "a significant, quantifiable, direct, and unavoidable impact, based on objective, identified written public health or safety standards, policies, or conditions as they existed on the date the application was deemed complete."

[4] The City has determined that the "protections afforded by the HAA and the definition of a base project for density bonus calculations apply to a housing development project up to and including the maximum development allowed with use permits and/or administrative use permits."

Housing Crisis Act of 2019 – Senate Bill (SB) 330

The Housing Crisis Act, also known as Senate Bill 330, seeks to boost homebuilding throughout the State with a focus on urbanized zones by expediting the approval process for and suspending or eliminating restrictions on housing development. A "housing development project" can include any of the following: residential units only; mixed use consisting of residential and nonresidential uses in which at least two-thirds of the square-footage is designated residential, and transitional or supportive housing. Sections of SB 330 that apply to the proposed project include the following:

Government Code Section 65905.5(a) states that if a proposed housing development project complies with the applicable, objective general plan and zoning standards in affect at the time an application is deemed complete, then the city shall not conduct more than five hearings in connection with the approval of that housing development project. This includes all public hearings in connection with the approval of the housing development project and any continuances of such public hearings. The city must consider and either approve or disapprove the project at any of the five hearings consistent with applicable timelines under the Permit Streamlining Act (Chapter 4.5 (commencing with Section 65920)).

> Evidence: The September 11, 2025 ZAB hearing represents the third public hearing for the proposed project since the project was deemed complete. The City can hold up to two additional public hearings on this project, if needed. One of those hearings must be reserved for any possible appeal to the City Council.

Government Code Section 65913.10(a) requires that the City determine whether the proposed development project site is a historic site at the time the application for the housing development project is deemed complete. The determination as to whether the parcel is a historic site must remain valid during the pendency of the housing development project, unless any archaeological, paleontological, or tribal cultural resources are encountered during any grading, site disturbance, or building alteration activities.

> **Evidence:** A Historic Resource Evaluation was prepared for the project on April 23, 2024 and determined that the property does not qualify for listing in the California Register or as a City of Berkeley Landmark or Structure of Merit. The LPC reviewed the demolition referral on October 7, 2024, and took no action.

General Plan Consistency

The 2002 General Plan contains several policies applicable to the project, including the following:

1. **Policy LU-3 Infill Development:** Encourage infill development that is architecturally and environmentally sensitive, embodies principles of sustainable planning and construction, and is compatible with neighboring land uses and architectural design and scale.

2. **Policy LU-7 Neighborhood Commercial Areas:** Require that new development be consistent with zoning standards and compatible with the scale, historic character, and surrounding uses in the area.

3. **Policy LU-26 Neighborhood Quality of Life:** Maintain and improve Neighborhood Commercial areas, such as Elmwood, Solano, and North Shattuck, as pedestrian-friendly, visually attractive areas and ensure that Neighborhood Commercial areas fully serve neighborhood needs.

   Evidence: The project repurposes an underutilized Housing Opportunity Site with a mixed-use

building and is consistent with surrounding land uses. It would improve the quality of the built environment by providing new housing and commercial opportunities. Active frontages on Shattuck Avenue contribute to the vitality of the street and would bring new residents and business patrons along a major commercial and transit corridor. The project also includes a corner bulb-out with seating and new street trees along Shattuck Avenue and Virginia Street, creating a more attractive and pedestrian-friendly streetscape.

4. **Policy LU-23 Transit-Oriented Development:** Encourage and maintain zoning that allows greater commercial and residential density and reduced residential parking requirements in areas with above-average transit service such as Downtown Berkeley.

5. **Policy H-17 Transit Oriented New Construction:** Encourage construction of new high-density housing on major transit corridors and in proximity to transit stations consistent with zoning, applicable area plans, design review guidelines and the Climate Action Plan.

   Evidence: The project would construct additional housing (110 dwelling units) and ground-floor commercial space in close proximity to transit, jobs, and neighborhood services. The site is served by Alameda County Transit buses and is less than one mile from the North Berkeley BART Station and half a mile from the Downtown Berkeley BART Station.

6. **Policy H-19 Regional Housing Needs:** Encourage adequate housing production to meet City needs and the City's share of regional housing needs.

   Evidence: The project would comply with the General Plan's Regional Housing Needs policy by providing affordable units (9 VLI and 9 MI) in addition to increasing the City's overall housing supply by adding 110 new dwelling units in close proximity to transit. The project implements the Housing Element by providing more units than identified for the site.

Table 1: Project Chronology

Date	Action
December 27, 2023 (vesting date)	SB 330 complete Preliminary Housing Development Project Application submitted
June 3, 2024	SB 330 Use Permit Application submitted
July 3, 2024	Application deemed complete
August 2, 2024	Processing Status Letter [a]
September 2024 – July 2025	Application processing
October 7, 2024	Landmarks Preservation Commission hearing (demo referral)
May 15, 2025	Design Review Committee meeting
July 10, 2025	Public hearing notices mailed/posted
July 24, 2025	ZAB hearing (Item removed to be rescheduled to a future meeting)
August 28, 2025	Public hearing notices mailed/posted
September 11, 2025	ZAB hearing

Notes:
a. Application processing reflects the project compliance review, including CEQA if applicable, after the application is deemed complete. Submittals are reviewed within 30 days of receipt, pursuant to the Permit Streamlining Act.

Table 2: Special Characteristics

Characteristic	Applicability	Explanation
Affordable Child Care Fee for qualifying non-residential projects (Per Resolution 66,618-N.S.)	No	This fee applies to net newly constructed nonresidential gross floor area over 7,500 square feet. The project would add 690 square feet of commercial space; therefore, the fee does not apply.
Affordable Housing Fee for qualifying non-residential projects (Per Resolution 66,617-N.S.)		
Affordable / Inclusionary Housing Requirements (BMC Chapter 23.328)	Yes	The project is a housing development project, as defined in BMC 23.328.020[a], and would provide at least 20 percent of residential units, pay an in-lieu fee based on the residential unit floor area of the project, or a combination. The project would provide 9 Below Market Rate (BMR) units (9 Very Low-Income (VLI) units) and would be required to pay an in-lieu fee to satisfy the remainder of the requirement.
Bird Safe Buildings (BMC Section 23.304.150)	Yes	The project is subject to these requirements and a Condition of Approval to demonstrate compliance at building permit is included.
Coast Live Oak Trees (BMC Chapter 6.52)	No	There are no Coast Live Oak (*Quercus agrifolia*) trees on the project site.
Creeks	No	No creek or culvert, as defined by BMC Chapter 17.08, exists on or within 30 feet of the project site.

Density Bonus	Yes	The project would provide 9 Very Low-Income units and 9 Moderate-Income units, or 30 percent of the Base Project units, and qualifies for a 100% percent density bonus, or 55 bonus units.
Hard Hats (BMC Chapter 13.107)	No	The project was vested under the Housing Crisis Act of 2019 prior to the January 1, 2024 effective date of the ordinance, and therefore these provisions do not apply.
Historic Resources	No	The existing building is more than 40 years old and was referred to the Landmarks Preservation Commission (LPC) for review (BMC Section 23.326.070(C)). On October 7, 2024 the LPC took no action to initiate a Landmark or Structure of Merit designation and recommended that the ZAB approve the demolition.
Housing Accountability Act (HAA) (Gov't Code Section 65589.5(j))	Yes	The project proposes a mixed-use residential building, and meets the definition of a "Housing Development Project" per Government Code Section 65589.5(h)(2)[b]. The base project complies with applicable, objective general plan and zoning standards, and thus section (j) of the Housing Accountability Act applies, and the project cannot be denied at the density proposed unless the findings for denial can be made. See Policy Consistency Section of this report for additional discussion on compliance with the Housing Accountability Act.
Housing Crisis Act of 2019 (SB 330)	Yes	The project meets the definition of a "Housing Development Project" per Government Code Section 65589.5(h)(2)[b]. See the Policy Consistency Section for additional discussion on the sections of SB 330 that apply to the project.
Housing Element Opportunity Sites	Yes	1685 Shattuck Avenue/2109 Virginia Street is a 0.52 acre lot currently developed with a 2-story 9,205 square-foot non-residential building and a vacant surface parking lot. It was identified as an opportunity site and is listed in Table C-10, "Opportunity Sites – No Rezone Required", in the Housing Element Update.
Rent Controlled Units	No	The project would involve the demolition of a non-residential structure and no rent-controlled units.
Residential Preferred Parking (RPP)	No	The site is located in an RPP zone. However, the project is not eligible for RPP permits per BMC Section 14.72.080(C)(1) "Issuance of Permits" as no permits shall be issued to residents in newly constructed residential units.
Seismic Hazards (SHMA)	No	The project site is not located within an area susceptible to landslide/liquefaction/fault rupture as shown on the State Seismic Hazard Zones map. [c]

Soil/Groundwater Contamination	Yes	The project site is on the Cortese List (listed under 1685 Shattuck Avenue), and within the City's Environmental Management Area. It was occupied by a dry cleaner from 1920 to 1970, and a 5,000-gallon underground storage tank was removed in July 1987. The site was remediated under the oversight of the DTSC in 1987 and assessed by the San Francisco Bay Regional Water Quality Control Board (RWQCB) in 1999. The applicant submitted Phase I and II reports, which were preliminarily reviewed by the City of Berkeley's Toxics Division and subsequently by LSA Consultants to prepare an environmental checklist in accordance with CEQA Section 15183.3 ("Streamlining for Infill Projects") and 15162 ("Subsequent EIRs and Negative Declarations"). The Phase I ESA identified a past contamination issue, so a Phase II ESA was subsequently prepared. The Phase II ESA found that any remaining soil or groundwater impacts are minimal and consistent with the conditions described in the case closure letters granted by the DTSC in 1987 and the San Francisco Bay RWQCB in 1999. Because no land use restrictions or continuing obligations were required by DTSC and the San Francisco Bay RWQCB, the Phase II ESA concluded that no further assessment or regulatory oversight is necessary. The CEQA analysis found that the project would not have significant environmental effects that have not already been analyzed in the Housing Element EIR or that are more significant than those previously analyzed. Standard Conditions of Approval related to hazardous materials would apply.
Transit	Yes	The project site is located within a half mile of the Downtown Berkeley Bay Area Rapid Transit (BART) Station, less than a mile from the North Berkeley BART Station, and is serviced by several Alameda County Transit lines.

Notes:

a. BMC 23.328.020(E) defines a "Housing Development Project" for purposes of inclusionary housing requirements as "a development project, including a Mixed-Use Residential project involving the new construction of at least one Residential Unit. Projects with one or more buildings or projects including multiple contiguous parcels under common ownership or control shall be considered as a sole Housing Development Project and not as individual projects.

[b]. Government Code Section 65589.5(h)(2) "Housing development project" means a use consisting of any of the following: (A) residential units only, (B) mixed-use developments consisting of residential and nonresidential uses in which at least two-thirds of the square footage is designated for residential use, and (C) transitional or supportive housing. Government Code Section 65905.5(b)(3)(C) "Housing development project" includes a proposal to construct a single dwelling unit. This subparagraph shall not affect the interpretation of the scope of paragraph (2) of subdivision (h) of Section 65589.5.

Zoning Adjustments Board Findings

App # ZP2024-0066

Use Permit for a Project at 2109 Virginia Street

Sept 11, 2025

Project Facts

Applicant: Isaiah Stackhouse. Stackhouse, De La Pena, Trachtenberg Architects

Property Owner: American Commonwealth Associates

Project Address: 2109 Virginia Street/1685 Shattuck Avenue

GP Land Use:
Neighborhood Commercial (NC),
Medium Density Residential (MDR),
High Density Residential (HDR)

Zoning:
North Shattuck Commercial (C-NS), Restricted Multiple-Family Residential District (R-2A), Multi-Family Residential District (R-4)

Site Size: .51 acres

CEQA: Exempt pursuant to Section 15183.3 ("Streamlining for Infill Projects")

Vesting Date: December 27, 2023

Date Deemed Complete: July 23, 2024

Project Planner: Singeh Saliki

Project Description:

The applicant is seeking approval to demolish a 2-story commercial building (4,604 square feet) and surface parking lot, and construct an 8-story (89 feet and 4 inches) 112,969 square-foot mixed-use residential development with 110 dwelling units (including 9 Very Low-Income and 9 Moderate Income units), 690 square feet of ground floor commercial space, 109 off-street vehicle parking spaces and 64 bicycle parking spaces.

Permits Requested:

1. **Demolition.** Use Permit under BMC Section 23.326.070(A) **"Main Non-Residential Building"** to demolish a non-residential building
2. **New Construction.** Use Permit under BMC Section 23.202.020 (A) **"Allowed Land Uses"** to construct a new mixed-use development.
3. **New Construction.** Use Permit under BMC Section 23.204.020 (A) **"Allowed Land Uses"** to construct a new mixed-use development.
4. **New Floor Area.** Use Permit under BMC Section 23.204.030(A)(1) **"Floor Area Permit Requirements"** to create new floor area of 2,000 square feet or more.
5. **Building Height.** Administrative Use Permit under BMC Section 23.304.050(A) **"Projections Above Height Limits"** to exceed the allowed height limit with a rooftop projection

Waivers	Concessions
1. Building Height	1. Public Art In-lieu Fee
2. Residential Window Setback	2. On-Grade Parking
3. Parking	
4. Lot Coverage	
5. Interior Side Setback	
6. Front Setback	

Staff Recommendation

Staff recommends that ZAB determine the project is exempt from CEQA, pursuant to Section 15183.3 of the CEQA Guidelines ("Streamlining for Infill Projects"), and approve ZP2024-0066 pursuant to BMC Section 23.406.040 (E) "Findings for Approval" and subject to the attached Findings and Conditions of Approval.

CEQA

Qualified Infill Checklist

The project is exempt from the requirements of CEQA pursuant to Section 15183.3 of the CEQA Guidelines ("Streamlining for Infill Projects").

Evidence: The project is located in an urban area on a previously developed site. It is consistent with the applicable General Plan designations and policies, and with the applicable zoning designations and regulations. An environmental checklist was prepared for the project in accordance with CEQA Sections 15183.3 and 15162, utilizing the Housing Element's Environmental Impact Report (EIR, SCH#2010032073) for a consistency analysis. The analysis concluded that the proposed project would not result in any new impacts that would require additional mitigation measures beyond those required by the Housing Element EIR.

FINDINGS FOR APPROVAL

As required by BMC Section 23.406.040 (E) (1-4) "Findings for Approval," the following findings shall be made:

1. To approve a Use Permit, the ZAB shall find that the proposed project or use:

   a) Will not be detrimental to the health, safety, peace, morals, comfort, or general welfare of persons residing or visiting in the area or neighborhood of the proposed use; and

   Evidence: The project will not be detrimental to the health safety, peace, morals, comfort or general welfare of person residing or visiting in the area because the project is consistent with all applicable C-NS, R-2A, and R-4 District standards, qualifies for concessions and waivers for the standards granted pursuant to State Density Bonus, Government Code, Section 65915, and will not unreasonably obstruct sunlight, air , or views.

   The increase in shadows would be limited to certain times of days during winter and summer, on adjacent properties. Specifically, in the summer, portions of buildings to the east would experience additional shade in the late afternoon, and the buildings to the west would experience additional shade in the morning. In the winter, additional shade would extend to buildings to the northwest in the morning, to the building in the north at noon, and to the buildings in the east in the late afternoon. The project site is on a major commercial corridor, significantly slopes down from east to west, and abuts R-4 lots to the east, which allow heights up to 65 feet with a Use Permit. Therefore, even though the project will create new shadow impacts on neighboring buildings, the projected impacts will be in line with what is expected within a built urban environment.

The reduction in setbacks is consistent with development patterns found in the neighborhood, where commercial and mixed-use buildings are built up to the property line, and is permissible under a density bonus waiver to allow the construction of dwelling units; the project would not be detrimental to air quality.

b) Will not be detrimental or injurious to property and improvements of the adjacent properties, the surrounding area or neighborhood, or to the general welfare of the City.

Evidence: The project will not be detrimental or injurious to property and improvements of the adjacent properties, the surrounding area or neighborhood, or the general welfare of the City because the project will benefit the immediate and surrounding neighborhoods by replacing an underutilized commercial building with 110 additional housing units, including 18 below-market-rate units, which contribute to the local and regional housing stock, and ground floor commercial space that may provide services conveniently accessible to the nearby neighborhoods, and accessible by public transit. The 110 units proposed for an opportunity site, as identified in the Housing Element, will be accompanied by a commensurate amount of parking intended to mitigate any potential strain on the current on-street parking supply that may result from the mixed-use project.

2. To approve the Use Permit, the ZAB must also make any other Use Permit findings specifically required by the Zoning Ordinance for the proposed project.

DEMOLITION

Pursuant to BMC Section 23.326.070(D) "Demolition of Non-Residential Buildings," the following findings shall be made: (1) the demolition will not be materially detrimental to the commercial needs and public interest of any affected neighborhood or the City, and (2) the demolition is required to allow a proposed new building or other proposed new use, will remove a building that is unusable for activities compatible with the purpose of the district or infeasible to modify for such uses, will remove a structure that is an uninhabitable attractive nuisance to the public, or is required for the furtherance of specific plans or projects sponsored by the City or other local district or authority.

Evidence: The proposed ground-floor commercial space is compatible with existing development patterns along Shattuck Avenue and Virginia Street and will accommodate neighborhood-serving commercial uses. The project aligns with the district's objectives to provide a mix of commercial and residential development that is compatible with the existing uses within the C-NS district. The project redevelops an underutilized lot with a mixed-use building that will provide more housing opportunities. The demolition of the existing 4,604-square-foot, two-story commercial building is necessary to allow the proposed new mixed-use building with 110 dwelling units, which cannot be accommodated in the existing building envelope. The project demolishes an

underutilized parking lot and commercial building with vacant ground-floor tenants to be replaced with a mixed-use building that contains active frontages on Shattuck Avenue. The project implements the goals of the Housing Element by providing twice the number of units identified for the site.

DENSITY BONUS

A. Pursuant to Government Code Section 65915, the Zoning Adjustments Board finds that:
   1. Under the City's methodology for implementing density bonuses, the base project consists of 55 units;
   2. The project will provide at least 9 Very Low Income and 9 Moderate Income qualifying units in the 55-unit base project, as more fully set forth in Condition 33;
   3. The project is entitled to a density increase of 100 percent over the otherwise maximum allowable residential density under the Zoning Ordinance and General Plan Land Use Element, under the requirements of Government Code Section 65915(b) and (f), plus three concessions or incentives. This equates to a density bonus of up to 55 units above the base project, for a total of up to 110 units.

B. In accordance with Government Code Section 65915(d) and (k), the Zoning Adjustments Board hereby grants the following concessions in order to provide for affordable housing costs:
   1. **Public Art In-lieu Fee**. A Concession from BMC Chapter 23.316 to allow an exemption from the Percentage for Public Art on Private Projects in-lieu fee; and
   2. **On-Grade Parking**. A Concession to relocate the underground parking in the base project to above grade in the proposed project.

C. In accordance with Government Code Section 65915(d), in order to allow construction of the proposed project with the density permitted under State law, the Zoning Adjustments Board finds that the approval of the concessions is required to provide for affordable rents, as provided in Government Code Section 65915(d)(1)(A) because 1) approval of the concession would result in identifiable and actual cost reduction; 2) approval of the concession would not have a specific adverse impact upon public health and safety, or the physical environment, or on any real property listed in the California Register of Historical Resources; and 3) would not be contrary to State or Federal law.

D. In accordance with Government Code Section 65915(e) the Zoning Adjustments Board hereby grants the following waivers to modify development standards as necessary to accommodate these density bonus units.

North Shattuck Commercial District (C-NS)

1. Waiver from BMC Section 23.204.090(D)(1) "Basic Development Standards" for a mixed-use project to exceed the 35-foot maximum height limit by adding 54 feet, 4 inches, for a total of 89 feet, 4 inches, and exceed the 3-story limit by adding 5 stories, for a total of 8 stories;
2. Waiver from BMC Section 23.204.090(D)(4) "Residential Window Setback" to reduce the setback for a Mixed-Use building, opposite a required window in any habitable room of a residential use to 0 feet, 0 inches where 10 feet is required;
3. Waiver from BMC Section 23.304.030(C)(2) "Lots Adjacent to Residential Districts" to reduce the interior side setback to 0 feet, 0 inches for the interior side where 5 feet is required;
4. Waiver from BMC Section 23.322.070(D)(1) "Excess Off-Street Parking" to exceed the maximum number of off-street residential parking;

Restricted Multiple Family Residential District (R-2A)

5. Waiver from BMC Section 23.202.090(D)(1) "Basic Development Standards" to exceed the 35-foot maximum by adding 54 feet, 4 inches for a total of 89 feet, 4 inches, and exceed the 3-story limit by adding 5 stories, for a total of 8 stories;
6. Waiver from BMC Section 23.202.090(D)(2) "Supplemental Development Standards" to exceed the 40% lot coverage limit for a 3-story building on a corner lot by adding 60% for a total of 100% lot coverage;
7. Waiver from BMC Section 23.202.090(D)(1) "Basic Development Standards" to reduce the interior side setback to 0 feet, 0 inches on the first and second story where 4 feet is required;

Multi-Family Residential District (R-4)

8. Waiver from BMC Section 23.202.110(E)(1) "Basic Development Standards" to exceed the 65-foot maximum height by adding 24 feet, 4 inches for a total of 89 feet, 4 inches and exceed the 6-story limit by adding 2 stories, for a total of 8 stories;
9. Waiver from BMC Section 23.202.110(E)(2) "Supplemental Development Standards" to exceed the 40% lot coverage limit for a 6-story building on a corner lot by adding 60% for a total of 100% lot coverage;
10. Waiver from BMC Section 23.202.110(E)(1) "Basic Development Standards" to reduce the front setback to 2 feet, 10 inches on the western side of the lot and 5 feet, 8 inches on the eastern side of the lot where 15 feet is required; and
11. Waiver from BMC Section 23.202.110(E)(1) "Basic Development Standards" to reduce the interior side setback to 0 feet, 0 inches for stories 1-2 where 4 feet is required, and provide a 9 foot, 8-inch setback for 3-8 stories.

E. In accordance with Government Code Section 65915(e), in order to allow construction of the proposed project with the density permitted under State law, the Zoning Adjustments Board finds that the approval of waivers is required 1) to construct the proposed project at the density permitted under State law; 2) approval of requested waivers will not have a specific adverse impact upon public health and safety, or the physical environment, or on any real property listed in the California Register of Historical Resources; and 3) approval of the requested waivers will not be contrary to State or Federal law.

HOUSING ACCOUNTABILITY ACT

The Housing Accountability Act, Government Code Section 65589.5(j) requires that when a proposed housing development complies with applicable, objective general plan and zoning standards, a local agency may not deny the project or approve it with reduced density unless the agency makes written findings supported by substantial evidence that: (1) the development would have a specific adverse impact on public health or safety unless disapproved or approved at a lower density; and (2) there is no feasible method to satisfactorily mitigate or avoid the specific adverse impact, other than the disapproval or approval at a lower density.

Evidence: The project includes construction of an 8-story (89 feet and 4 inches) 112,969 square-foot mixed-use residential development with 110 dwelling units (including 9 Very Low-Income and 9 Moderate Income units), 690 square feet of ground floor commercial space. Because the base project complies with applicable, objective general plan and zoning standards, Section 65589.5(j) does apply to this project. No significant, quantifiable, direct and unavoidable impacts, based on objective, identified written public health or safety standards, polices, or conditions, have been identified.

PERMIT FINDINGS FOR THE C-NS ZONING DISTRICT

As required by BMC Section 23.204.090 (E) "Permit Findings," the following findings shall be made: To approve an AUP or Use Permit for a project in the C-NS district, the review authority must make the findings in Section 23.406.040 (Use Permits) and find that the proposed use or structure:

1. Is compatible in design and character with the commercial district and the adjacent residential neighborhoods;

Evidence: The project is compatible in design and character to the commercial district and adjacent residential neighborhoods because it will construct a mixed-use building that offers both housing and commercial space, thereby contributing to the existing uses in the area and reinforcing compatibility with the C-NS neighborhood and adjacent residential neighborhoods.

2. Is compatible with the purposes and the existing character of the district.

Evidence: The project is compatible with the existing character and purposes of the district because it will construct a mixed-use building that provides housing and commercial space, contributing to the existing commercial and residential uses in the neighborhood and, therefore, compatible. It will provide commercial use on the ground level and provide off-street vehicle parking and bicycle parking, allowing the project to mitigate any potential intensification of available traffic capacity and potential parking supply that would result from the increased density.

3. Does not interfere with the continuity of retail or compatible service facilities at the ground level;

Evidence: The project does not interfere with the continuity of retail or compatible service facilities at the ground level because it will provide a commercial space on the ground floor, creating modern space and continuity to the existing ground-floor uses on Shattuck Avenue.

4. Does not exceed the amount and intensity of use that can be served by available traffic capacity and potential parking supply.

Evidence: The project does not exceed the amount and intensity of use that can be served by available traffic capacity and potential parking supply because it is accessible by public transportation, and will provide bicycle and vehicle parking spaces, thereby reducing the strain on the metered street parking supply in the area.

3. When taking action on a Use Permit, the ZAB shall consider in its findings:

(a) The proposed land use; and

Evidence: The proposed land use meets the findings for approval because the project's residential and commercial uses are allowed land uses and consistent with the General Plan Land Use Designation of Neighborhood Commercial and with the C-NS, R-2A and R-4 zoning of the property. The additional residential units provided will create new housing opportunities on a transit-served site, contributing to local and regional housing needs and consistent with the development standards, with the inclusion of applicable waivers and concessions allowed under the State Density Bonus law.

(b) The structure or addition that accommodates the use.

Evidence: The proposed construction of an 8-story multi-family building (89 feet and 4 inches in maximum height) is consistent with the zoning development standards, with the inclusion of waivers to modify height and setback limits, pursuant to Government Code Section 65915 "State Density Bonus Law."

4. Required findings shall be made based on the circumstances existing at the time a decision is made on the application.

   Evidence: The required findings are satisfied because the project has been determined to be fully compliant with all applicable local and state regulations based on the project plans submitted on July 9, 2025, included as analysis in this report, and evaluated based on the existing conditions of the subject site and surrounding neighborhood at the time of decision.

CITY OF BERKELEY
PLANNING AND DEVELOPMENT

USE PERMIT ZP2024-0066 CONDITIONS OF APPROVAL

September 11, 2025

2109 Virginia Street

Use Permit to demolish a 2-story commercial building (4,604 square feet) and surface parking lot, and construct an 8-story (89 feet and 4 inches) 112,969 square-foot mixed-use residential development with 110 dwelling units (including 9 Very Low-Income and 9 Moderate Income units), 690 square feet of ground floor commercial space, 109 off-street vehicle parking spaces and 64 bicycle parking spaces.

I. STANDARD CONDITIONS OF APPROVAL FOR ALL PROJECTS

Pursuant to Berkeley Municipal Code (BMC) Title 23 Zoning Ordinance and Title 13 Public Peace, Morals, and Welfare, the following conditions, as well as all other applicable provisions of the Zoning Ordinance, apply to this Permit:

1. **Conditions and Mitigation Monitoring and Reporting Program Shall be Printed on Plans.** The conditions of this Permit shall be printed on the *second* sheet of each plan set submitted for a building permit pursuant to this Use Permit, under the title 'Use Permit Conditions.' *Additional sheets* may also be used if the *second* sheet is not of sufficient size to list all of the conditions. The sheet(s) containing the conditions shall be of the same size as those sheets containing the construction drawings.
2. **Compliance Required (BMC Section 23.102.050).** All land uses and structures in Berkeley must comply with the Zoning Ordinance and all applicable City ordinances and regulations. Compliance with the Zoning Ordinance does not relieve an applicant from requirements to comply with other federal, state, and City regulations that also apply to the property.
3. **Approval Limited to Proposed Project and Replacement of Existing Uses (BMC Sections 23.404.060(B)(1) and (2)):**
   - **A.** This Permit authorizes only the proposed project described in the application. In no way does an approval authorize other uses, structures or activities not included in the project description.
   - **B.** When the City approves a new use that replaces an existing use, any prior approval of the existing use becomes null and void when permits for the new use are exercised (e.g., building permit or business license issued). To re-establish the previously existing use, an applicant must obtain all permits required by the Zoning Ordinance for the use.

4. **Conformance to Approved Plans (BMC Section 23.404.060(B)(4)).** All work performed under an approved permit shall comply with the approved plans and any conditions of approval.
5. **Exercise and Expiration of Permits (BMC Section 23.404.060(C)):**
   - **A.** A permit authorizing a land use is exercised when both a valid City business license is issued (if required) and the land use is established on the property.
   - **B.** A permit authorizing construction is exercised when both a valid City building permit (if required) is issued and construction has lawfully begun.
   - **C.** The Zoning Officer may declare a permit lapsed if it is not exercised within one year of its issuance, except if the applicant has applied for a building permit or has made a substantial good faith effort to obtain a building permit and begin construction. The Zoning Officer may declare a permit lapsed only after 14 days written notice to the applicant. A determination that a permit has lapsed may be appealed to the ZAB in accordance with BMC Chapter 23.410, Appeals and Certification.
   - **D.** A permit declared lapsed shall be void and of no further force and effect. To establish the use or structure authorized by the lapsed permit, an applicant must apply for and receive City approval of a new permit.
6. **Permit Remains Effective for Vacant Property (BMC Section 23.404.060(D)).** Once a Permit for a use is exercised and the use is established, the permit authorizing the use remains effective even if the property becomes vacant. The same use as allowed by the original permit may be re-established without obtaining a new permit, except as set forth in Standard Condition #5 above.
7. **Permit Modifications (BMC Section 23.404.070).** No change in the use or structure for which this Permit is issued is permitted unless the Permit is modified by the Board. The Zoning Officer may approve changes to plans approved by the Board, consistent with the Board's policy adopted on May 24, 1978, which reduce the size of the project.
8. **Permit Revocation (BMC Section 23.404.080).** The City may revoke or modify a discretionary permit for completed projects due to: 1) violations of permit requirements; 2) Changes to the approved project; and/or 3) Vacancy for one year or more. However, no lawful residential use can lapse, regardless of the length of time of the vacancy. Proceedings to revoke or modify a permit may be initiated by the Zoning Officer, Zoning Adjustments Board (ZAB), or City Council referral.
9. **Pay Transparency Acknowledgement (BMC Section 13.104.030).** Prior to the issuance of a building permit for any Project subject to this Chapter:
   - **A.** A Responsible Representative of the Permittee shall certify under penalty of perjury that the Permittee has reviewed Chapter 13.104 of the Berkeley Municipal Code, and will be responsible for demonstrating compliance with this Chapter.
   - **B.** The Permittee shall provide to the City a Contractor Pay Transparency Acknowledgment on a form approved by the City for this purpose. A Responsible Representative of the Permittee shall certify under penalty of perjury that the Contractor and all Qualifying Subcontractors performing work on the Project will comply with BMC Chapter 13.104 and with Labor Code sections 226(a) and 2810.5 for each employee who works on the Project.

10. **Pay Transparency Attestations following Project Completion (BMC Section 13.104.040).** Within 10 days of the approved final inspection of any Project subject to this Chapter, each Permittee shall provide to the City for each Contractor and Qualifying Subcontractor a Pay Transparency Attestation on a form approved by the City. On each Pay Transparency Attestation, a Responsible Representative of the Contractor or Qualifying Subcontractor shall attest under penalty of perjury that the Contractor or Qualifying Subcontractor complied with BMC Chapter 13.104 and Labor Code sections 226(a) and 2810.5 for each employee who performed work on the Project. The City will maintain Pay Transparency Attestation forms for period of at least three years after their date of receipt by the City
11. **Posting of Wage Theft Ordinance (BMC Section 13.104.050).** Each day work is performed on the Project, each Permittee shall post, and keep posted in a conspicuous location where it may be easily read by employees during the hours of the workday, a notice that: (A) contains the text of BMC Chapter 13.104; (B) explains that workers can report violations of Labor Code sections 226 and 2810.5 to the Labor Commissioner of the State of California; and (C) provides current contact information, including office address, telephone number, and email address of the Labor Commissioner of the State of California.
12. **Wage Theft Prevention Conditions of Approval (BMC Section 13.104.060).** The requirements of BMC Sections 13.104.030 through 13.104.050 shall be included as conditions of approval of any Use Permit or Zoning Certificate for any Project that is subject to this Chapter. Failure to comply with the requirements of any provision of this Chapter shall be grounds for issuance of an administrative citation under BMC Chapter 1.28 and/or the revocation or modification of any Use Permit issued for the Project under BMC Chapter 23.404.
13. **Hold Harmless.** The permittee agrees as a condition of approval of this application to indemnify, protect, defend with counsel selected by the City, and hold harmless, the City, and any agency or instrumentality thereof, and its elected and appointed officials, officers, employees and agents, from and against any and all liabilities, claims, actions, causes of action, proceedings, suits, damages, judgments, liens, levies, costs and expenses of whatever nature, including reasonable attorney's fees and disbursements (collectively, "Claims") arising out of or in any way relating to the approval of this application, any actions taken by the City related to this entitlement, or any environmental review conducted under the California Environmental Quality Act, Public Resources Code Section 210000 et seq., for this entitlement and related actions. The indemnification shall include any Claims that may be asserted by any person or entity, including the permittee, arising out of or in connection with the approval of this application, whether or not there is concurrent, passive or active negligence on the part of the City, and any agency or instrumentality thereof, and its elected and appointed officials, officers, employees and agents. The permittee's duty to defend the City shall not apply in those instances when the permittee has asserted the Claims, although the permittee shall still have a duty to indemnify, protect and hold harmless the City.

II. ADDITIONAL CONDITIONS IMPOSED BY THE ZONING ADJUSTMENTS BOARD

Pursuant to BMC Section 23.404.050(H) Conditions of Approval, the Zoning Adjustments Board attaches the following additional conditions to this Permit:

Prior to Submittal of Any Building Permit:

14. **Project Liaison.** The applicant shall include in all building permit plans and post onsite the name and telephone number of an individual empowered to manage construction-related complaints generated from the project. The individual's name, telephone number, and responsibility for the project shall be posted at the project site for the duration of the project in a location easily visible to the public. The individual shall record all complaints received and actions taken in response, and submit written reports of such complaints and actions to the project planner on a weekly basis. Please designate the name of this individual below:

    ☐ **Project Liaison** _____

    Name Phone #

15. **Address Assignment.** The applicant shall file an "Address Assignment Request Application" with the Permit Service Center (1947 Center Street) for any address change or new address associated with this Use Permit. The new address(es) shall be assigned in accordance with BMC Section 16.28.030 Assignment and Installation of Numbers, and, except for new buildings on vacant lots, entered into the City's database after the building permit is issued but prior to final inspection.

16. **Bird Safe Buildings.** Prior to submittal of the building permit, the applicant shall demonstrate compliance with the applicable bird safe building provisions in BMC Section 23.304.150, Bird Safe Buildings.

17. **Construction Noise Reduction Program.** The applicant shall develop a site-specific noise reduction program prepared by a qualified acoustical consultant to reduce construction noise impacts to the maximum extent feasible, subject to review and approval of the Zoning Officer. The noise reduction program shall include the time limits for construction listed above, as measures needed to ensure that construction complies with BMC Section 13.40.070, Prohibited Acts. The noise reduction program should include, but shall not be limited to, the following available controls to reduce construction noise levels as low as practical:

    A. Construction equipment should be well maintained and used judiciously to be as quiet as practical.

    B. Equip all internal combustion engine-driven equipment with mufflers, which are in good condition and appropriate for the equipment.

    C. Utilize "quiet" models of air compressors and other stationary noise sources where technology exists. Select hydraulically or electrically powered equipment and avoid pneumatically powered equipment where feasible.

    D. Locate stationary noise-generating equipment as far as possible from sensitive receptors when adjoining construction sites. Construct temporary noise barriers or partial enclosures to acoustically shield such equipment where feasible.

E. Prohibit unnecessary idling of internal combustion engines.

F. If impact pile driving is required, pre-drill foundation pile holes to minimize the number of impacts required to seat the pile.

G. Construct solid plywood fences around construction sites adjacent to operational business, residences or other noise-sensitive land uses where the noise control plan analysis determines that a barrier would be effective at reducing noise.

H. Erect temporary noise control blanket barriers, if necessary, along building facades facing construction sites. This mitigation would only be necessary if conflicts occurred which were irresolvable by proper scheduling. Noise control blanket barriers can be rented and quickly erected.

I. Route construction related traffic along major roadways and away from sensitive receptors where feasible.

18. **Damage Due to Construction Vibration.** The project applicant shall submit screening level analysis prior to, or concurrent with demolition building permit. If a screening level analysis shows that the project has the potential to result in damage to structures, a structural engineer or other appropriate professional shall be retained to prepare a vibration impact assessment (assessment). The assessment shall consider project specific information such as the composition of the structures, location of the various types of equipment used during each phase of the project, as well as the soil characteristics in the project area, in order to determine whether project construction may cause damage to any of the structures identified as potentially impacted in the screening level analysis. If the assessment finds that the project may cause damage to nearby structures, the structural engineer or other appropriate professional shall recommend design means and methods of construction that to avoid the potential damage, if feasible. The assessment and its recommendations shall be reviewed and approved by the Building and Safety Division and the Zoning Officer. If there are no feasible design means or methods to eliminate the potential for damage, the structural engineer or other appropriate professional shall undertake study of existing conditions (study) of any structures (or, in case of large buildings, of the portions of the structures) that may experience damage.

    This study shall establish the baseline condition of these structures, including, but not limited to, the location and extent of any visible cracks or spalls; and include written descriptions and photographs.

    The study shall be reviewed and approved by the Building and Safety Division and the Zoning Officer prior to issuance of a grading permit. Upon completion of the project, the structures (or, in case of large buildings, of the portions of the structures) previously inspected will be resurveyed, and any new cracks or other changes shall be compared to pre-construction conditions and a determination shall be made as to whether the proposed project caused the damage. The findings shall be submitted to the Building and Safety Division and the Zoning Officer for review. If it is determined that project construction has resulted in damage to the structure, the damage shall be repaired to the pre-existing condition by the project sponsor, provided that the property owner approves of the repair.

19. **Compliance with Conditions of Approval and Environmental Mitigations.** The building permit application is subject to verification of compliance of these Conditions of Approval. The applicant shall be responsible for demonstrating compliance with all conditions of approval and mitigation measures per the timeline set forth by this use permit. The applicant shall deposit $10,000 with the City, or less with the approval of the Zoning Officer, to pay for the cost of monitoring compliance with these Conditions of Approval and other applicable conditions and regulations. Should compliance-monitoring expenses exceed the initial deposit, the applicant shall deposit additional funds to cover such additional expenses upon the request of the Zoning Officer; any unused deposit will be refunded to the applicant.

Prior to Issuance of Any Building & Safety Permit (Demolition or Construction)

20. **Demolition.** Demolition of the existing building cannot commence until a complete application is submitted for the replacement building. In addition, all plans presented to the City to obtain a permit to allow the demolition are subject to these conditions.
21. **Construction Noise Management -** Public Notice Required. At least two weeks prior to initiating any construction activities at the site, the applicant shall provide notice to businesses and residents within 500 feet of the project site. This notice shall at a minimum provide the following: (1) project description, (2) description of construction activities during extended work hours and reason for extended hours, (3) daily construction schedule (i.e., time of day) and expected duration (number of months), (4) the name and phone number of the Project Liaison for the project that is responsible for responding to any local complaints, and (5) that construction work is about to commence. The liaison would determine the cause of all construction-related complaints (e.g., starting too early, bad muffler, worker parking, etc.) and institute reasonable measures to correct the problem. A copy of such notice and methodology for distributing the notice shall be provided in advance to the City for review and approval.
22. **Construction Phases.** The applicant shall provide the Zoning Officer with a schedule of major construction phases with start dates and expected duration, a description of the activities and anticipated noise levels of each phase, and the name(s) and phone number(s) of the individual(s) directly supervising each phase. The Zoning Officer or his/her designee shall have the authority to require an on-site meeting with these individuals as necessary to ensure compliance with these conditions. The applicant shall notify the Zoning Officer of any changes to this schedule as soon as possible.
23. **Construction and Demolition Diversion.** Applicant shall submit a Construction Waste Management Plan that meets the requirements of BMC Chapter 19.37 including 100 percent diversion of asphalt, concrete, excavated soil and land-clearing debris and a minimum of 65 percent diversion of other nonhazardous construction and demolition waste.
24. **Toxics.** The applicant shall contact the Toxics Management Division (TMD) at 1947 Center Street or (510) 981-7470 to determine which of the following documents are required and timing for their submittal:

A. **Phase I and Phase II Environmental Site Assessment (ESA) (per ASTM 1527).** A recent Phase I ESA (less than 2 years old) shall be submitted to the Toxics Management Division for developments for: all new commercial, industrial and mixed-use developments and all improvement projects that require work 5 or more feet below grade, and all new residential buildings with more than four dwelling units located in the Environmental Management Area (or EMA). The EMA can be viewed at: City of Berkeley Community GIS Portal (arcgis.com)

B. Depending on the findings in the Phase I, a Phase II or additional investigation may be necessary. Any available soils and groundwater analytical data available for projects listed in this section must also be submitted to TMD.

C. **Environmental Site Clearance.** The applicant shall provide environmental screening clearance from either the San Francisco Bay Regional Water Quality Control Board (RWQCB), Department of Toxic Substances Control (DTSC), or the Alameda County Department of Environmental Health's Local Oversight Program (LOP). Clearance from one of these regulatory agencies will ensure that the property meets development investigation and cleanup standards for the specific use proposed on the property. Environmental screening clearance shall be submitted to the City of Berkeley's Toxics Management Division prior to issuance of any building permits.

D. **Soil and Groundwater Management Plan.** A site-specific Soil and Groundwater Management Plan (SGMP) shall be submitted to Toxics Management Division (TMD) for all non-residential projects, and residential or mixed-use projects with more than four dwelling units, that: (1) are in the Environmental Management Area (EMA), as shown on the most recent City of Berkeley EMA map, and (2) propose any excavations deeper than 5 feet below grade or if significant soils removal is anticipated. The SGMP shall be submitted to the TMD with the project's building permit application and shall be approved by TMD prior to issuance of the building permit.

The SGMP shall comply with the hazardous materials and waste management standards required by BMC Section 15.12.100, the stormwater pollution prevention requirements of San Francisco Bay Regional Water Quality Control Board's Order No. R2-2009-0074, California hazardous waste generator regulations (Title 22 California Code of Regulations (CCR) 66260 et seq.), and the East Bay Municipal Utility District's Ordinance 311, and shall include the following:

i. procedures for soil and groundwater management including identification of pollutants and disposal methods;

ii. procedures to manage odors, dust and other potential nuisance conditions expected during development;

iii. notification to TMD within 24 hours of the discovery of any previously undiscovered contamination; and

iv. the name and phone number of the individual responsible for implementing the SGMP and who will respond to community questions or complaints.

TMD may require additional information or impose additional conditions as deemed necessary to protect human health and the environment. All requirements of the approved SGMP shall be deemed conditions of approval.

E. **Demolitions & Renovations – Building Materials Survey.** A hazardous materials survey for building materials and plans on hazardous materials and hazardous waste removal and disposal is required and must be prepared by qualified professionals, and submitted to the Toxics Management Division (TMD) prior to issuance of the building permit.

i. The survey shall include the identification of all materials to be disturbed for lead-based paints, PCB containing equipment and caulking, hydraulic fluids, refrigerants, treated wood, and mercury containing devices (including fluorescent light bulbs and mercury switches), asbestos and other hazardous materials and chemicals.

ii. If asbestos is identified, Bay Area Air Quality Management District Regulation 11-2-401.3 a notification must be made and the J number must be made available to the City of Berkeley Permit Service Center. Contractors must follow state regulations where there is asbestos-related work involving 100 square feet or more of asbestos containing material (8 Cal. Code Regs. §1529, §341.6 et seq.)

iii. The report to the TMD shall include, in addition to the survey, plans on hazardous materials and hazardous waste removal and disposal that comply with State and Federal codes including California Code of Regulations (CCR) 66260 et seq.

iv. Documentation evidencing disposal of hazardous waste in compliance with the survey shall be submitted to TMD within 30 days of the completion of the demolition.

Please note, the PCB Screening Form required by Public Works, Engineering, is a separate requirement and does not address the PCB identification requirement of the Toxics Management Division.

F. **Hazardous Materials Business Plan.** A Hazardous Materials Business Plan (HMBP) in compliance with BMC Section 15.12.040 and California Health & Safety Code, Chapter 6.95 Div. 20, shall be submitted to the Toxics Management Division through the California Environmental Reporting System: http://cers.calepa.ca.gov/ for chemicals used or stored on site during construction that exceed reporting thresholds. The reporting is required if your facility stores or handles hazardous materials in aggregate quantities equal to or greater than 55 gallons for liquids, 500 pounds for solids, or 200 cubic feet of compressed gases, or generates any quantity of hazardous waste. This includes welding gases, emergency generator fuel, paints, etc.

Additionally, the business occupant must submit an HMBP within 30 days of starting operations.

G. **Petroleum Storage.** An (SPCC) Plan is required to be prepared and implemented for facilities with any one of the following:

i. aggregate aboveground petroleum storage capacities of 1,320 gallons or more stored in aboveground storage containers, tanks, oil-filled equipment, or

ii. one or more tank(s) in an underground area (TIUGA) with petroleum storage capacities of 55 gallons or greater. More information on TIUGAs can be found here: https://osfm.fire.ca.gov/divisions/pipeline-safety-and-cupa/certified-unified-program-agency-cupa/aboveground-petroleum-storage-act/tank-in-an-underground-area-tiuga/

The SPCC plan must be prepared prior to beginning operations and you must submit facility information to Toxics Management Division (TMD) through the California Environmental Reporting System: http://cers.calepa.ca.gov/. The SPCC plan will be reviewed during the site inspection and shall not be submitted in CERS or to the TMD.

Prior to Issuance of Any Building (Construction) Permit

25. **Parcel Merger/Lot Line Adjustment.** The applicant shall secure approval of any parcel merger and/or lot line adjustment associated with this Use Permit.
26. **Final Design Review.** The Project requires approval of a Final Design Review application by the Design Review Committee.
27. **HVAC Noise Reduction.** Prior to the issuance of building permits, the project applicant shall submit plans that show the location, type, and design of proposed heating, ventilation, and cooling (HVAC) equipment. In addition, the applicant shall provide product specification sheets or a report from a qualified acoustical consultant showing that operation of the proposed HVAC equipment will meet the City's exterior noise requirements in BMC Section 13.40.050. The City's Planning and Development Department shall review the submitted plans, including the selected HVAC equipment, to verify compliance with exterior noise standards.
28. **Interior Noise Levels.** Prior to issuance of a building permit, the applicant shall submit a report to the Building and Safety Division and the Zoning Officer by a qualified acoustic engineer certifying that the interior residential portions of the project will achieve interior noise levels of no more than 45 Ldn (Average Day-Night Levels). If the adopted Building Code imposes a more restrictive standard for interior noise levels, the report shall certify compliance with this standard.
29. **Solar Photovoltaic (Solar PV) and Battery Energy Storage Systems (ESS).** A solar PV system shall be installed, subject to specific limited exceptions, as specified by the Berkeley Energy Code (BMC Chapter 19.36). Energy storage system (ESS) readiness (new single-family, duplex, and townhouse homes) or ESS installation (new multifamily and most nonresidential buildings) shall be completed as specified by BMC Chapter 19.36. Location of the solar PV system and the ESS, if applicable, shall be noted on the construction plans. (Project required to meet applicable code at time of building permit application, if different from above.)

30. **Electric Vehicle (EV) Charging.** At least 10 percent of the project parking spaces for residential parking shall have installed Level 2 (40 amp) electric vehicle (EV) charging stations~~,~~ and at least 40 percent shall have installed low power Level 2 EV charging receptacles (20 amp), or any more stringent EV charging requirements as specified by the Berkeley Green Code (BMC Chapter 19.37). Required Level 2 charging stations and low power Level 2 EV charging receptacles shall be installed, maintained, and made available for building resident use. EV charging station installations, EV charging receptacles, and EV Capable spaces shall be noted on the construction plans. Public access parking spaces shall provide any applicable mandatory accessibility provisions. (Project required to meet applicable code at time of building permit application, if different from above.)

31. **Water Efficient Landscaping.** Landscaping, totaling 500 square feet of more of new landscaping or 2,500 square feet or more of renovated irrigated area, shall comply with the State's Model Water Efficient Landscape Ordinance (MWELO). MWELO-compliant landscape documentation including a planting, grading, and irrigation plan shall be included in site plans. Water budget calculations are also required for landscapes of 2,500 square feet or more and shall be included in site plans. The reference evapotranspiration rate (ETo) for Berkeley is 41.8.

32. **Recycling and Organics Collection.** Applicant shall provide recycling and organics collection areas for occupants, clearly marked on plans, which comply with the Alameda County Organics Reduction and Recycling Ordinance (2021-02). Contact the Zero Waste Division at RecyclingProgram@berkeleyca.gov.

33. **Public Works ADA.** Plans submitted for building permit shall include replacement of sidewalk, curb, gutter, and other streetscape improvements, as necessary to comply with current City of Berkeley standards for accessibility.

AFFORDABLE HOUSING REQUIREMENTS – RESIDENTIAL PROJECTS

34. **Affordable Housing Compliance Plan.** The final Affordable Housing Compliance Plan ("AHCP") must be certified by the Zoning Officer and the Department of Health, Housing, and Community Services prior to the issuance of Building Permit. Projects that receive approval from the Building Official for multiple phase construction permits must have the final AHCP certified prior to the issuance of the phase one building permit.

35. **Below Market Rate Units.** Nine Very-Low Income and nine Moderate Income Below Market Rate rental dwelling units (BMR Units) shall be provided in the project. All affordable units provided pursuant to Density Bonus Section of the permit findings shall be designated as BMR Units. All BMR units are required to comply with the stricter of the State Density Bonus Law (Government Code Section 65915) and BMC Section 23.328.030(A) Affordable Housing Requirements.

Summary table of project BMR units				
Code Section	**Extremely-Low Income (30% AMI)**	**Very-Low Income (50% AMI)**	**Low Income (80% AMI)**	**Moderate Income (30% x 110% AMI)**
BMC Chapter 23.328 (Inclusionary Housing)	0	9	0	0
State Density Bonus Law (Gov. Code Section 65915)	0	9	0	9
Total	0	9	0	9

36. **Regulatory Agreement.** If BMR units are provided, the owner shall enter into a Regulatory Agreement that implements Government Code Section 65915, BMC Section 23.328.030, and other provisions for BMR units included in this Use Permit. The Regulatory Agreement may include any terms and affordability standards determined by the City to be necessary to ensure such compliance. The Regulatory Agreement will secure the property's obligation to comply with the requirements for providing BMR units as defined by BMC Chapter 23.328 and State Density Bonus Law (Government Code Section 65915). The applicant shall submit the Regulatory Agreement to the Department of Health, Housing, and Community Services for review and approval. All BMR units are required to comply with the Regulatory Agreement and the BMR Administrative Guidelines. Regulatory Agreements must be executed prior to the issuance of Building Permit, or, in the case of projects that receive approval from the Building Official for multiple phase construction permits, prior to the issuance of the phase one building permit.

37. **Payment of Affordable Housing In-Lieu Fee.** The Affordable Housing In-Lieu Fee shall be paid as required by BMC Section 23.328.030(B) and Resolution 70,698 N.S. The fee for this project is $462,855, subject to proration to reflect affordable units provided. Any adjustments to the fee and the final fee amount will be determined prior to building permit issuance as part of the Affordable Housing Compliance Plan approval. The In-Lieu Fee shall be paid prior to the issuance of the first Certificate of Occupancy, or if no Certificate of Occupancy is required, prior to the final inspection of the Project. Nothing in these conditions shall be interpreted to prohibit, or to require modification of the Use Permit or Regulatory Agreement to allow, the provision of additional BMR units, or additional affordability, then are required in the foregoing provisions.

Prior to Demolition or Start of Construction:

38. **Construction Meeting.** The applicant shall request of the Zoning Officer an on-site meeting with City staff and key parties involved in the early phases of construction (e.g., applicant, general contractor, foundation subcontractors) to review these conditions and the construction schedule. The general contractor or applicant shall ensure that all subcontractors involved in subsequent phases of construction aware of the conditions of approval.
39. **Transportation Construction Plan.** The applicant and all persons associated with the project are hereby notified that a Transportation Construction Plan (TCP) may be required, particularly for the following activities:

    A. Alterations, closures, or blockages to sidewalks, pedestrian paths or vehicle travel lanes (including bicycle lanes);

    B. Storage of building materials, equipment, dumpsters, debris anywhere in the public ROW;

    C. Provision of exclusive contractor parking on-street; or

    D. Significant truck activity.

    Please contact the Office of Transportation at (510) 981-7010, or 1947 Center Street, and ask to speak to a traffic engineer. In addition to other requirements of the Traffic Engineer, this plan shall include the locations of material and equipment storage, trailers, worker parking, a schedule of site operations that may block traffic, and provisions for traffic control. The TCP shall be stamped and signed by a registered engineer prior to submittal. The TCP shall be consistent with any other requirements of the construction phase. A current copy of this Plan shall be available at all times at the construction site for review by City Staff.
40. **Construction/No Parking Permits.** Contact the Permit Service Center (PSC) at 1947 Center Street or 981-7500 for details on obtaining Construction/No Parking Permits (and associated signs and accompanying dashboard permits). Please note that the Zoning Officer and/or Traffic Engineer may limit off-site parking of construction-related vehicles if necessary to protect the health, safety or convenience of the surrounding neighborhood.

During Construction:

41. **Construction Hours.** Construction activity shall be limited to between the hours of 7:00 AM and 6:00 PM on Monday through Friday, and between 9:00 AM and 4:00 PM on Saturday. No construction-related activity shall occur on Sunday or any Federal Holiday.

42. **Construction Hours- Exceptions.** It is recognized that certain construction activities, such as the placement of concrete, must be performed in a continuous manner and may require an extension of these work hours. Prior to initiating any activity that might require a longer period, the developer must notify the Zoning Officer and request an exception for a finite period of time. If the Zoning Officer approves the request, then two weeks prior to the expanded schedule, the developer shall notify businesses and residents within 500 feet of the project site describing the expanded construction hours. A copy of such notice and methodology for distributing the notice shall be provided in advance to the City for review and approval. The project shall not be allowed more than 15 extended working days.

43. **Project Construction Website.** The applicant shall establish a project construction website with the following information clearly accessible and updated monthly or more frequently as changes warrant.

    A. Contact information (i.e. “hotline” phone number, and email address) for the project construction manager

    B. Calendar and schedule of daily/weekly/monthly construction activities

    C. The final Conditions of Approval, Mitigation Monitoring and Reporting Program, Transportation Construction Plan, Construction Noise Reduction Program, and any other reports or programs related to construction noise, air quality, and traffic.

44. **Public Works - Implement Bay Area Air District (BAAD)-**Recommended Measures during Construction. For all proposed projects, BAAD recommends implementing all the Basic Construction Mitigation Measures, listed below to meet the best management practices threshold for fugitive dust:

    A. All exposed surfaces (e.g., parking areas, staging areas, soil piles, graded areas, and unpaved access roads) shall be watered two times per day.

    B. All haul trucks transporting soil, sand, or other loose material off-site shall be covered.

    C. All visible mud or dirt track-out onto adjacent public roads shall be removed using wet power vacuum street sweepers at least once per day. The use of dry power sweeping is prohibited.

    D. All vehicle speeds on unpaved roads shall be limited to 15 mph.

    E. All roadways, driveways, and sidewalks to be paved shall be completed as soon as possible. Building pads shall be laid as soon as possible after grading unless seeding or soil binders are used.

    F. Idling times shall be minimized either by shutting equipment off when not in use or reducing the maximum idling time to 5 minutes (as required by the California airborne toxics control measure Title 13, Section 2485 of California Code of Regulations [CCR]). Clear signage shall be provided for construction workers at all access points.

    G. All construction equipment shall be maintained and properly tuned in accordance with manufacturer specifications. All equipment shall be checked by a certified visible emissions evaluator.

H. Post a publicly visible sign with the telephone number and person to contact at the lead agency regarding dust complaints. This person shall respond and take corrective action within 48 hours. The Air District's phone number shall also be visible to ensure compliance with applicable regulations.

45. Air Quality - Diesel Particulate Matter Controls during Construction. All off-road construction equipment used for projects with construction lasting more than 2 months shall comply with one of the following measures:

A. The project applicant shall prepare a health risk assessment that demonstrates the project's on-site emissions of diesel particulate matter during construction will not exceed health risk screening criteria after a screening-level health risk assessment is conducted in accordance with current guidance from BAAD and OEHHA. The health risk assessment shall be submitted to the Land Use Planning Division for review and approval prior to the issuance of building permits; or

B. All construction equipment shall be equipped with Tier 2 or higher engines and the most effective Verified Diesel Emission Control Strategies (VDECS) available for the engine type (Tier 4 engines automatically meet this requirement) as certified by the California Air Resources Board (CARB). The equipment shall be properly maintained and tuned in accordance with manufacturer specifications.

C. In addition, a Construction Emissions Minimization Plan (Emissions Plan) shall be prepared that includes the following:

i. An equipment inventory summarizing the type of off-road equipment required for each phase of construction, including the equipment manufacturer, equipment identification number, engine model year, engine certification (tier rating), horsepower, and engine serial number. For all VDECS, the equipment inventory shall also include the technology type, serial number, make, model, manufacturer, CARB verification number level, and installation date.

ii. A Certification Statement that the Contractor agrees to comply fully with the Emissions Plan and acknowledges that a significant violation of the Emissions Plan shall constitute a material breach of contract. The Emissions Plan shall be submitted to the Public Works Department for review and approval prior to the issuance of building permits.

46. Construction and Demolition Diversion. Divert debris according to your plan and collect required documentation. Get construction debris receipts from sorting facilities in order to verify diversion requirements. Upload recycling and disposal receipts if using Green Halo and submit online for City review and approval prior to final inspection. Alternatively, complete the Construction Waste Management Plan and present it, along with your construction debris receipts, to the Building Inspector by the final inspection to demonstrate diversion rate compliance. The Zoning Officer may request summary reports at more frequent intervals, as necessary to ensure compliance with this requirement.

47. **Low-Carbon Concrete.** The project shall maintain compliance with the Berkeley Green Code (BMC Chapter 19.37) including use of concrete mix design with a cement reduction of at least 25 percent. Documentation on concrete mix design shall be available at all times at the construction site for review by City Staff. (Project required to meet applicable code at time of building permit application, if different from above.)

48. **Avoid Disturbance of Nesting Birds.** Initial site disturbance activities, including vegetation and concrete removal, shall be prohibited during the general avian nesting season (February 1 to August 30), if feasible. If nesting season avoidance is not feasible, the applicant shall retain a qualified biologist to conduct a preconstruction nesting bird survey to determine the presence/absence, location, and activity status of any active nests on or adjacent to the project site. The extent of the survey buffer area surrounding the site shall be established by the qualified biologist to ensure that direct and indirect effects to nesting birds are avoided. To avoid the destruction of active nests and to protect the reproductive success of birds protected by the MBTA and CFGC, nesting bird surveys shall be performed not more than 14 days prior to scheduled vegetation and concrete removal. In the event that active nests are discovered, a suitable buffer (typically a minimum buffer of 50 feet for passerines and a minimum buffer of 250 feet for raptors) shall be established around such active nests and no construction shall be allowed inside the buffer areas until a qualified biologist has determined that the nest is no longer active (e.g., the nestlings have fledged and are no longer reliant on the nest). No ground-disturbing activities shall occur within this buffer until the qualified biologist has confirmed that breeding/nesting is completed and the young have fledged the nest. Nesting bird surveys are not required for construction activities occurring between August 31 and January 31.

49. **Archaeological Resources (*Ongoing throughout demolition, grading, and/or construction*).** Pursuant to CEQA Guidelines section 15064.5(f), "provisions for historical or unique archaeological resources accidentally discovered during construction" should be instituted. Therefore:

    A. In the event that any prehistoric or historic subsurface cultural resources are discovered during ground disturbing activities, all work within 50 feet of the resources shall be halted and the project applicant and/or lead agency shall consult with a qualified archaeologist, historian or paleontologist to assess the significance of the find.

    B. If any find is determined to be significant, representatives of the project proponent and/or lead agency and the qualified professional would meet to determine the appropriate avoidance measures or other appropriate measure, with the ultimate determination to be made by the City of Berkeley. All significant cultural materials recovered shall be subject to scientific analysis, professional museum curation, and/or a report prepared by the qualified professional according to current professional standards.

    C. In considering any suggested measure proposed by the qualified professional, the project applicant shall determine whether avoidance is necessary or feasible in light of factors such as the uniqueness of the find, project design, costs, and other considerations.

    D. If avoidance is unnecessary or infeasible, other appropriate measures (e.g., data recovery) shall be instituted. Work may proceed on other parts of the project site while mitigation measures for cultural resources is carried out.

E. If significant materials are recovered, the qualified professional shall prepare a report on the findings for submittal to the Northwest Information Center.

50. Human Remains (*Ongoing throughout demolition, grading, and/or construction*). In the event that human skeletal remains are uncovered at the project site during ground-disturbing activities, all work shall immediately halt and the Alameda County Coroner shall be contacted to evaluate the remains, and following the procedures and protocols pursuant to Section 15064.5 (e)(1) of the CEQA Guidelines. If the County Coroner determines that the remains are Native American, the City shall contact the California Native American Heritage Commission (NAHC), pursuant to subdivision (c) of Section 7050.5 of the Health and Safety Code, and all excavation and site preparation activities shall cease within a 50-foot radius of the find until appropriate arrangements are made. If the agencies determine that avoidance is not feasible, then an alternative plan shall be prepared with specific steps and timeframe required to resume construction activities. Monitoring, data recovery, determination of significance and avoidance measures (if applicable) shall be completed expeditiously.

51. Paleontological Resources (*Ongoing throughout demolition, grading, and/or construction*). In the event of an unanticipated discovery of a paleontological resource during construction, excavations within 50 feet of the find shall be temporarily halted or diverted until the discovery is examined by a qualified paleontologist (per Society of Vertebrate Paleontology standards [SVP 1995,1996]). The qualified paleontologist shall document the discovery as needed, evaluate the potential resource, and assess the significance of the find. The paleontologist shall notify the appropriate agencies to determine procedures that would be followed before construction is allowed to resume at the location of the find. If the City determines that avoidance is not feasible, the paleontologist shall prepare an excavation plan for mitigating the effect of the project on the qualities that make the resource important, and such plan shall be implemented. The plan shall be submitted to the City for review and approval.

52. Halt Work/Unanticipated Discovery of Tribal Cultural Resources. In the event that cultural resources of Native American origin are identified during construction, all work within 50 feet of the discovery shall be redirected. The project applicant and project construction contractor shall notify the City Planning Department within 24 hours. The City will again contact any tribes who have requested consultation under AB 52, as well as contact a qualified archaeologist, to evaluate the resources and situation and provide recommendations. If it is determined that the resource is a tribal cultural resource and thus significant under CEQA, a mitigation plan shall be prepared and implemented in accordance with State guidelines and in consultation with Native American groups. If the resource cannot be avoided, additional measures to avoid or reduce impacts to the resource and to address tribal concerns may be required.

53. Stormwater Requirements. The applicant shall demonstrate compliance with the requirements of the City's National Pollution Discharge Elimination System (NPDES) permit as described in BMC Section 17.20. The following conditions apply:

A. The project plans shall identify and show site-specific Best Management Practices (BMPs) appropriate to activities conducted on-site to limit to the maximum extent practicable the discharge of pollutants to the City's storm drainage system, regardless of season or weather conditions.

B. Trash enclosures and/or recycling area(s) shall be covered; no other area shall drain onto this area. Drains in any wash or process area shall not discharge to the storm drain system; these drains should connect to the sanitary sewer. Applicant shall contact the City of Berkeley and EBMUD for specific connection and discharge requirements. Discharges to the sanitary sewer are subject to the review, approval and conditions of the City of Berkeley and EBMUD.

C. Landscaping shall be designed with efficient irrigation to reduce runoff, promote surface infiltration and minimize the use of fertilizers and pesticides that contribute to stormwater pollution. Where feasible, landscaping should be designed and operated to treat runoff. When and where possible, xeriscape and drought tolerant plants shall be incorporated into new development plans.

D. Design, location and maintenance requirements and schedules for any stormwater quality treatment structural controls shall be submitted to the Department of Public Works for review with respect to reasonable adequacy of the controls. The review does not relieve the property owner of the responsibility for complying with BMC Chapter 17.20 and future revisions to the City's overall stormwater quality ordinances. This review shall be shall be conducted prior to the issuance of a Building Permit.

E. All paved outdoor storage areas must be designed to reduce/limit the potential for runoff to contact pollutants.

F. All on-site storm drain inlets/catch basins must be cleaned at least once a year immediately prior to the rainy season. The property owner shall be responsible for all costs associated with proper operation and maintenance of all storm drainage facilities (pipelines, inlets, catch basins, outlets, etc.) associated with the project, unless the City accepts such facilities by Council action. Additional cleaning may be required by City of Berkeley Public Works Engineering Dept.

G. All private or public projects that create and/or replace 5,000 square feet or more of impervious surface must comply with Provision C.3 of the Alameda County NPDES permit and must incorporate stormwater controls to enhance water quality. Permit submittals shall include a Stormwater Requirement Checklist and detailed information showing how the proposed project will meet Provision C.3 stormwater requirements, including a) Site design measures to reduce impervious surfaces, promote infiltration, and reduce water quality impacts; b) Source Control Measures to keep pollutants out of stormwater runoff; c) Stormwater treatment measures that are hydraulically sized to remove pollutants from stormwater; d) an O & M (Operations and Maintenance) agreement for all stormwater treatment devices and installations; and e) Engineering calculations for all stormwater devices (both mechanical and biological). (Project required to meet applicable code at time of building permit application, if different from above.)

H. All on-site storm drain inlets must be labeled “No Dumping – Drains to Bay” or equivalent using methods approved by the City.

I. Most washing and/or steam cleaning must be done at an appropriately equipped facility that drains to the sanitary sewer. Any outdoor washing or pressure washing must be managed in such a way that there is no discharge or soaps or other pollutants to the storm drain. Sanitary connections are subject to the review, approval and conditions of the sanitary district with jurisdiction for receiving the discharge.

J. All loading areas must be designated to minimize "run-on" or runoff from the area. Accumulated waste water that may contribute to the pollution of stormwater must be drained to the sanitary sewer or intercepted and pretreated prior to discharge to the storm drain system. The property owner shall ensure that BMPs are implemented to prevent potential stormwater pollution. These BMPs shall include, but are not limited to, a regular program of sweeping, litter control and spill cleanup.

K. Sidewalks and parking lots shall be swept regularly to prevent the accumulation of litter and debris. If pressure washed, debris must be trapped and collected to prevent entry to the storm drain system. If any cleaning agent or degreaser is used, wash water shall not discharge to the storm drains; wash waters should be collected and discharged to the sanitary sewer. Discharges to the sanitary sewer are subject to the review, approval and conditions of the sanitary district with jurisdiction for receiving the discharge.

L. The applicant is responsible for ensuring that all contractors and sub-contractors are aware of and implement all stormwater quality control measures. Failure to comply with the approved construction BMPs shall result in the issuance of correction notices, citations, or a project stop work order.

54. **Public Works.** Subject to approval of the Public Works Department, the applicant shall repair any damage to public streets and/or sidewalks by construction vehicles traveling to or from the project site.

55. **Public Works.** All piles of debris, soil, sand, or other loose materials shall be covered at night and during rainy weather with plastic at least one-eighth millimeter thick and secured to the ground.

56. **Public Works.** The applicant shall ensure that all excavation accounts for surface and subsurface waters and underground streams so as not to adversely affect adjacent properties and rights-of-way.

57. **Public Works.** The project sponsor shall maintain sandbags or other devices around the site perimeter during the rainy season to prevent on-site soils from being washed off-site and into the storm drain system. The project sponsor shall comply with all City ordinances regarding construction and grading.

58. **Public Works.** Prior to any excavation, grading, clearing, or other activities involving soil disturbance during the rainy season the applicant shall obtain approval of an erosion prevention plan by the Building and Safety Division and the Public Works Department. The applicant shall be responsible for following these and any other measures required by the Building and Safety Division and the Public Works Department.

59. **Public Works.** The removal or obstruction of any fire hydrant shall require the submission of a plan to the City's Public Works Department for the relocation of the fire hydrant during construction.

60. **Public Works / Building and Safety.** If underground utilities leading to adjacent properties are uncovered and/or broken, the contractor involved shall immediately notify the Public Works Department and the Building & Safety Division, and carry out any necessary corrective action to their satisfaction.

Prior to Final Inspection or Issuance of Occupancy Permit:

61. **Compliance with Conditions.** The project shall conform to the plans and statements in the Use Permit. The developer is responsible for providing sufficient evidence to demonstrate compliance with the requirements throughout the implementation of this Use Permit.

62. All landscape, site and architectural improvements shall be completed per the attached approved drawings received July 9, 2025.

63. **Transportation Demand Management.** Prior to issuance of a Certificate of Occupancy, the property owner shall facilitate a site inspection by Land Use Division staff to confirm that the physical improvements required in BMC Sections 23.334.030(C) and 23.322.090 (bike parking) have been installed. A Parking and Transportation Demand Management (PTDM) compliance report documenting that the programmatic measures required in BMC Sections 23.334.030(C) and 23.322.090 are implemented shall be submitted to the Land Use Division prior to occupancy, and on an annual basis thereafter, which demonstrates that the project is compliant with the applicable requirements in these sections.

    A. Consistent with BMC Section 23.334.030(A), all parking spaces provided for residents be leased or sold separate from the rental or purchase of dwelling units for the life of the dwelling units. The property owner shall notify all residents of this restriction in leases and/or contracts, and shall provide sample leases and/or contracts including such notification to the project planner prior to issuance of Certificate of Occupancy or final inspection.

    B. Consistent with BMC Section 23.334.030(B), at least one of the following transit benefits shall be offered, at no cost to the resident, for a period of ten years after the issuance of a Certificate of Occupancy. A notice describing these transportation benefits shall be posted in a location or locations visible to all residents.

        i. One monthly pass for unlimited local bus transit service for every bedroom in each dwelling unit.

        ii. Subject to the review and approval of the Zoning Officer in consultation with the Transportation Division Manager, a functionally equivalent transit benefit in an amount at least equal to the price of a non-discounted unlimited adult monthly pass for unlimited local bus transit service monthly local bus pass.

    C. Consistent with BMC Section 23.334.030(C), publicly-available, real-time transportation information in a common area, such as a lobby or elevator bay, on televisions, computer monitors or other displays readily visible to residents and/or visitors, shall be provided. Transportation information shall include, but is not limited to, transit arrivals and departures for nearby transit routes.

    D. Property owners may be required to pay administrative fees associated with compliance with this Condition.

At All Times:

64. **Compliance with Approved Plan.** The project shall conform to the plans and statements in the Use Permit.
65. **Transportation Demand Management Compliance.** A Transportation Demand Management compliance report shall be submitted to the Zoning Officer, on a form acceptable to the City, prior to occupancy, and on an annual basis for ten years thereafter, which demonstrates that the project complies with the applicable requirements. After three years of timely compliant submittals, staff has the option to accept less frequent submittals (minimum one every three years). Property owners may be required to pay administrative fees associated with compliance with this Condition, pursuant to BMC Section 23.334.040(B).
66. **Exterior Lighting.** All exterior lighting shall be energy efficient where feasible; and shielded and directed downward and away from property lines to prevent excessive glare beyond the subject property.
67. **Rooftop Projections.** No additional rooftop or elevator equipment shall be added to exceed the approved maximum roof height without submission of an application for a Use Permit Modification, subject to Board review and approval.
68. **Design Review.** Signage and any other exterior modifications, including but not limited to landscaping and lighting, shall be subject to Design Review approval.
69. **Drainage Patterns.** The applicant shall establish and maintain drainage patterns that do not adversely affect adjacent properties and rights-of-way. Drainage plans shall be submitted for approval of the Building & Safety Division and Public Works Department, if required.
70. **Electrical Meter.** Only one electrical meter fixture may be installed per dwelling unit.
71. **Loading.** All loading/unloading activities associated with deliveries to all uses shall be restricted to the hours of 7:00 a.m. to 10:00 p.m. daily.
72. **Residential Permit Parking.** No Residential Permit Parking (RPP) permits shall be issued to project residents, nor shall commercial placards be issued to non-residential occupants and/or users of the site. The Finance Department, Customer Service Center shall add these addresses to the list of addresses ineligible for RPP permits. The property owner shall notify all tenants of rental units, and/or buyers of condominium units, of this restriction in leases and/or contracts.
73. **Required Bike Parking.** Secure and on-site bike parking for at least 64 bicycles (59 residential long-term, 4 residential short-term, and 1 commercial) shall be provided for the life of the building.
74. **Residential Electric Vehicle (EV) Charging.** Required Level 2 charging stations and low power Level 2 EV charging receptacles, as specified by the Berkeley Green Code (BMC Chapter 19.37) shall be maintained in good working condition and made available for building resident use. (Project required to meet applicable code at time of building permit application, if different from above.)

75. **Nonresidential Electric Vehicle (EV) Charging.** Required Level 2 charging stations and DC Fast Charge stations, as specified by the Berkeley Green Code (BMC Chapter 19.37) shall be maintained in *good working condition and made available for building occupant and/or visitor* use. (Project required to **meet applicable code at time of building permit application, if different from above.)**

76. **Tenant Notification.** The developer shall provide tenant notification, via a lease rider or deed covenant, that each dwelling unit is located in a mixed-use area that includes commercial, food service, and entertainment uses, and that each occupant shall not seek to impede their lawful operation.

PROJECT DESCRIPTION

PROJECT ADDRESS: 2109 Virginia Street
Berkeley, CA 94709 (APN: 058 217801800)

SCOPE OF WORK:

THE PROJECT IS THE CONSTRUCTION OF A NEW 8-STORY(89'-4" TALL), 110-UNIT MIXED-USE HOUSING DEVELOPMENT WITH 112,969SF OF NEW RESIDENTIAL USE, PARKING GARAGE FOR UP TO 109 SPOTS, AND 690SF NEW COMMERCIAL SPACE. PROJECT INCLUDES REMOVAL OF EXISTING NON-LANDMARKED 2-STORY COMMERCIAL STRUCTURE AND SURFACE PARKING. 15% (9 UNITS) OF THE BASE PROJECT'S UNITS WILL BE AFFORDABLE TO VERY-LOW-INCOME HOUSEHOLDS, AND 15% (9 UNITS) WILL BE MODERATE INCOME HOUSEHOLDS, ENTITLING IT TO A 100% DENSITY BONUS, WAIVERS, AND UP TO 3 CONCESSIONS UNDER THE STATE DENSITY BONUS LAW.

TITLE REPORT

THE TITLE REPORT USED IN THIS SURVEY WAS ISSUED BY FIDELITY NATIONAL TITLE COMPANY, PRELIMINARY REPORT ORDER NO. 013-30110437-A-KDO, EFFECTIVE DATE JANUARY 17, 2024 AT 7:30 A.M. AMENDED: FEBRUARY 26, 2024, AMENDMENT NO. A, REFERRED TO HEREON AS THE "PTR"

TITLE TO SAID ESTATE IS VESTED IN:

AMERICAN COMMONWEALTH ASSOCIATES, A LIMITED PARTNERSHIP

THE ESTATE OR INTEREST IN THE LAND IS:

A FEE

EXCEPTIONS TO TITLE

1. WATER RIGHTS, CLAIMS OR TITLE TO WATER, WHETHER OR NOT DISCLOSED BY THE PUBLIC RECORDS (PTR EXC. 3 – NOT PLOTTABLE).

NOTES

1. DATE OF FIELD SURVEY: APRIL 15 AND 23, 2024 AS TO THE BOUNDARY AND TOPOGRAPHIC SURVEY OF THE SUBJECT PROPERTY.
2. THE UTILITIES SHOWN HEREON ARE BY SURFACE OBSERVATION AND RECORD INFORMATION ONLY AND NO WARRANTY IS GIVEN HEREIN AS TO THEIR EXACT LOCATION. IT IS THE RESPONSIBILITY OF THE DEVELOPER AND/OR CONTRACTOR TO VERIFY THE EXACT LOCATION OF THE UTILITIES WITH THE APPROPRIATE UTILITY COMPANY OR AGENCY.
3. UTILITY JURISDICTIONS / PROVIDERS ARE AS FOLLOWS:
   STORM DRAINS: CITY OF BERKELEY
   SANITARY SEWER: CITY OF BERKELEY
   WATER: EAST BAY MUNICIPAL UTILITY DISTRICT (EBMUD)
   ELECTRICITY: PACIFIC GAS & ELECTRIC CO.
   NATURAL GAS: PACIFIC GAS & ELECTRIC CO.
   TELEPHONE: AT&T
4. THERE ARE NO CEMETERIES ON OR WITHIN 100 FEET OF THE SUBJECT PROPERTY.
5. THE LEGAL DESCRIPTION OF THE SUBJECT PROPERTY IS THE SAME AS THE PROPERTY DESCRIBED IN THE PRELIMINARY TITLE REPORT.
6. THE LEGAL DESCRIPTION AS SHOWN IN THE TITLE REPORT MATHEMATICALLY CLOSES.
7. THERE IS NO OBSERVED EVIDENCE OF SITE USE AS A SOLID WASTE DUMP, SUMP OR SANITARY LANDFILL
8. THERE ARE NO WETLAND AREAS IN THE SUBJECT PROPERTY
9. THE SUBJECT PROPERTY HAS DIRECT ACCESS TO AND FROM SHATTUCK AVENUE, A PUBLIC RIGHT OF WAY AND VIRGINIA STREET, A PUBLIC RIGHT OF WAY.

LEGAL DESCRIPTION

LAND REFERRED TO HEREIN BELOW IS SITUATED IN THE CITY OF BERKELEY IN THE COUNTY OF ALAMEDA, STATE OF CALIFORNIA, AND IS DESCRIBED AS FOLLOWS:

PARCEL 1:

BEGINNING AT A POINT ON THE EASTERN LINE OF SHATTUCK AVENUE, AS THE LINE OF SAID AVENUE NOW EXISTS, 50 FEET NORTHERLY FROM THE NORTHERN LINE OF VIRGINIA STREET; RUNNING THENCE NORTHERLY ALONG SAID EASTERN LINE OF SHATTUCK AVENUE TO THE SOUTHERN LINE OF LOT NO. 6 IN BLOCK "C", AS SAID LOT AND BLOCK ARE SHOWN ON THE MAP HEREINAFTER REFERRED TO; THENCE AT RIGHT ANGLES EASTERLY TO THE WESTERN LINE OF LAND CONVEYED TO M. S. CARNALL BY DEED OF RECORD IN BOOK 860 OF DEEDS, PAGE 116; THENCE SOUTHERLY ALONG SAID LAST NAMED LINE AND ALONG THE WESTERN BOUNDARY LINE OF LAND CONVEYED TO E. N. PROUTY BY DEED OF RECORD IN BOOK 826 OF DEEDS, PAGE 362, TO A LINE DRAWN EASTERLY AT RIGHT ANGLES TO SHATTUCK AVENUE THROUGH THE POINT OF BEGINNING; THENCE WESTERLY ALONG SAID LAST NAMED LINE TO THE POINT OF BEGINNING.

BEING A PORTION OF LOTS NOS. 1, 2, AND 3, IN BLOCK "C", AS SAID LOTS AND BLOCK ARE DELINEATED AND SO DESIGNATED UPON THAT CERTAIN MAP ENTITLED, PLAT OF THE PERCY TRACT, FILED APRIL 27, 1882, IN BOOK 7 OF MAPS, PAGE 52, ALAMEDA COUNTY RECORDS.

PARCEL 2:

BEGINNING AT THE POINT OF INTERSECTION OF THE NORTHERN LINE OF VIRGINIA STREET WITH THE EASTERN LINE OF SHATTUCK AVENUE, AS THE LINE OF SAID AVENUE NOW EXISTS; AND RUNNING THENCE NORTHERLY ALONG SAID LINE OF SHATTUCK AVENUE 50 FEET; THENCE AT RIGHT ANGLES EASTERLY 115 FEET, MORE OR LESS, TO THE WESTERN LINE OF LAND CONVEYED BY YORK AND WHITWORTH TO E. N. PROUTY BY DEED DATED APRIL 15, 1902 AND RECORDED IN BOOK 826 OF DEEDS, PAGE 362; THENCE SOUTHERLY ALONG SAID LAST NAMED LINE TO THE NORTHERN LINE OF VIRGINIA STREET; THENCE WESTERLY ALONG SAID LAST NAMED LINE TO THE POINT OF BEGINNING.

BEING A PORTION OF LOTS NOS. 1, 2, AND 3 IN BLOCK "C", AS SAID LOTS AND BLOCK ARE DELINEATED AND SO DESIGNATED UPON THAT CERTAIN MAP ENTITLED, PLAT OF THE PERCY TRACT, FILED APRIL 27, 1882, IN BOOK 7 OF MAPS, PAGE 52, ALAMEDA COUNTY RECORDS.

PARCEL 3:

LOT 6 IN BLOCK "C", AS SAID LOT AND BLOCK ARE SHOWN ON THE PLAT OF THE PERCY TRACT, FILED APR. 27, 1882 IN BOOK 7 OF MAPS, PAGE 52, ALAMEDA COUNTY RECORDS. EXCEPTING THEREFROM, THE WESTERN 30 FEET THEREOF WHICH LIES WITHIN THE LINES OF SHATTUCK AVENUE, AS THE SAME NOW EXISTS, AS DESCRIBED IN THE DEED FROM WALDO M. YORK TO THE TOWN OF BERKELEY, DATED OCTOBER 27, 1884, RECORDED JULY 13, 1885 IN BOOK 286 OF DEEDS, AT PAGE 418, ALAMEDA COUNTY RECORDS.

APN 058-2178-018-00

BASIS OF BEARINGS

THE BASIS OF BEARINGS OF THIS SURVEY IS TAKEN BETWEEN FOUND CITY MONUMENT #644 AND FOUND CITY MONUMENT # 603 ALONG WALNUT STREET BETWEEN CEDAR STREET AND VIRGINIA STREET AS SHOWN ON TRACT 7257, FILED NOVEMBER 29, 2001 IN BOOK 261 OF PARCEL MAPS, AT PAGES 95 TO 96, IN THE OFFICE OF THE COUNTY RECORDER OF ALAMEDA COUNTY, STATE OF CALIFORNIA. TAKEN AS SOUTH 5°29'42" EAST.

STREET TREE COORDINATION NOTES:

a) PROPOSED STREET TREE SPECIES, LOCATION, AND CONDITIONS SUBJECT TO ONGOING REVIEW AND APPROVAL BY THE CITY OF BERKELEY'S MANAGING CONSULTING URBAN FORESTER AND ARBORIST. ~~PROPOSED STREET TREES ARE CURRENT WITH EXISTING UTILITIES AS OF xx.xx.2024 AND~~ WILL BE SUBJECT TO ADDITIONAL REVIEW AFTER PROPOSED UTILITIES ARE FINALIZED.

b) TREE PROTECTION FENCING LOCATIONS AND DETAILS TO BE ADDED TO THE DEMOLITION PLAN IN BUILDING PERMIT SET.

c) CLEARANCE PRUNING REQUIRES PRIOR APPROVAL OF THE CITY. APPROVED CLEARANCE PRUNING SHALL BE COMPLETED IN ACCORDANCE WITH THE LATEST EDITIONS OF THE BEST MANAGEMENT PRACTICES FOR PRUNING (INTERNATIONAL SOCIETY OF ARBORICULTURE) AND THE AMERICAN NATIONAL STANDARD FOR TREE CARE OPERATIONS (Z133.1) AND PRUNING (A300, PART 1). TREES SHALL NOT BE TOPPED OR HEADED BACK. TREE PRUNING SHALL BE COMPLETED TO REDUCE LIMBS FOR CLEARANCE WHILE MAKING THE SMALLEST CUTS POSSIBLE. TREE PRUNING SHOULD BE LIMITED TO MINOR BRANCHES. BRANCH REMOVAL OR REDUCTION CUTS (THINNING CUTS) ARE TO BE EMPLOYED RATHER THAN HEADING CUTS.

d) ALL EXISTING STREET TREES (INCLUDING ANY OF THEIR BRANCHES) ADJACENT TO PLANNED CONSTRUCTION SCAFFOLDING MUST BE PROTECTED FROM MECHANICAL INJURY.

e) ROOT PRUNING REQUIRES PRIOR APPROVAL OF THE CITY AND SHALL BE SUPERVISED BY THE PROJECT ARBORIST. SEE NOTES BELOW FOR MORE INFORMATION.

STREET TREE PROTECTION DURING CONSTRUCTION NOTES:

a) ALL TREE PROTECTION REQUIREMENTS AND RESTRICTIONS SHALL BE INCLUDED IN THE CONSTRUCTION NOTES AND PRINTED ON ALL COPIES OF THE PLANS. INCLUDE THE NAME AND PHONE NUMBER OF THE PARTY THAT WILL MONITOR THE SITE AND ENSURE THE TREE PROTECTION MEASURES ARE BEING FOLLOWED; AND WHAT THE MONITORING SCHEDULE WILL BE: **NAME / PHONE / SCHEDULE**

b) TREE PROTECTION ZONES: THE CALCULATED TREE PROTECTION ZONE IS THE ENTIRE DRIPLINE OF THE TREES.**THE SPECIFIED TREE PROTECTION ZONE IS THE ENTIRE PARKWAY (TREE WELL).** NO GRADING, EXCAVATION, CONSTRUCTION OR STORAGE OF MATERIALS SHALL OCCUR WITHIN THE SPECIFIED TREE PROTECTION ZONE. NO UNDERGROUND SERVICES INCLUDING UTILITIES, SUB-DRAINS, WATER OR SEWER SHALL BE PLACED IN THE TREE PROTECTION ZONE.

c) TREE PROTECTIONS: ADD TREE PROTECTION FENCING TO PROTECT THE EXPOSED DRIPLINE WITHIN THE PARKWAY (FIGURE 2). INSTALL 6 FOOT CHAIN-LINK OR WOOD FENCING TO PROTECT THE AREA WITHIN THE TREE WELL OF ANY PROTECTED TREE IN THE DEVELOPMENT AREA. FENCING SHALL BE MOUNTED TO POSTS THAT ARE DRIVEN INTO THE GROUND (SEE FIGURES 2 AND 3). ALL STREET TREE PROTECTION FENCING MUST PROTECT ENTIRE EXPOSED SOIL AREA WITHIN EACH TREE WELL. ~~WHERE THIS IS NOT POSSIBLE BECAUSE OF EXISTING STRUCTURES, TREE ROOTS, OR OTHER OBSTACLES, CHAIN-LINK PANELS MOUNTED TO STANCHIONS AND CONNECTED TO EACH OTHER MAY BE APPROVED. IN AREAS WHERE DIFFICULT TERRAIN MAKES THIS IMPRACTICAL, ORANGE CONSTRUCTION FENCING MAY BE APPROVED.~~

d) ALL FENCING SHALL HAVE SIGNAGE STATING THE REQUIREMENTS AND RESTRICTIONS, AND THE CONTACT INFORMATION FOR THE PROJECT ARBORIST.

e) ~~WHEN ANY APPROVED CONSTRUCTION ACTIVITY WILL OCCUR WITHIN THE DRIP LINE OF A PROTECTED TREE THAT IS NOT SURROUNDED BY PROTECTIVE FENCING, THE TRUNK SHALL BE PROTECTED BY WRAPPING IT WITH STRAW TUBES (WATTLE) OR VERTICAL WOOD SLATS (EX. 2X4), UP TO A MINIMUM OF 8 FEET FROM GRADE (SEE FIGURE 1, PAGE 6). SLATS SHALL BE ANGLED TO PROTECT THE ROOT FLARE AT THE BASE OF THE TREE, AND CLOSED CELL FOAM OR EQUIVALENT MATERIAL SHALL BE USED TO PROTECT THE TRUNK OF THE TREE WHERE IT CONTACTS THE SLATS. LATERAL BRANCHES BELOW 8 FEET SHALL ALSO BE PROTECTED. IN ADDITION, THE AREA SHALL BE COVERED WITH A 6 INCH LAYER OF MULCH TOPPED WITH 3/4 INCH PLYWOOD THAT IS FASTENED TOGETHER. IF ANY LARGE OR MOTORIZED EQUIPMENT (MINI EXCAVATOR, BOBCAT®, POWERED WHEELBARROW) WILL TRAVEL OVER THIS AREA, THE PLYWOOD MUST BE A MINIMUM OF 1 INCH AND ADEQUATE FOR THE WEIGHT OF THE EQUIPMENT THAT WILL TRAVEL OVER IT. IF LARGER EQUIPMENT (BACKHOE, TRACTOR) WILL BE USED, CONSULT THE CITY ARBORIST.~~ ***CONSTRUCTION ACTIVITY REFERS TO ANY MOVEMENT OF PEOPLE, TOOLS, OR EQUIPMENT; OR STORAGE OF ANY TOOLS, EQUIPMENT, OR SUPPLIES.***

f) IRRIGATION: ADD IRRIGATION TO WET THE SOIL IN THE PARKWAY TO A DEPTH OF 12 INCHES. ONCE SOIL IS AT FIELD CAPACITY, IRRIGATION CAN BE SCALED BACK TO REPLACE THE WATER LOST THROUGH EVAPOTRANSPIRATION (ET).

g) MULCH: ADD 4 - 6 INCHES OF COURSE ORGANIC MULCH. THE MULCH SHOULD NOT COME IN CONTACT WITH THE TRUNK BUT SHOULD BE 24 INCHES AWAY FROM THE TRUNK.

h) LOCATE AND EXPOSE ANY ROOTS 2 INCHES IN DIAMETER OR GREATER THAT MAY NEED TO BE PRUNED TO FACILITATE THE PROJECT. THIS INCLUDES ANY TRENCHING THAT WILL BE DONE AS PART OF FOUNDATION OR UTILITY INSTALLATION. CONTACT THE CITY ARBORIST IN ADVANCE TO LESSEN THE AMOUNT OF TIME THAT THE ROOTS WILL BE EXPOSED. IF ROOTS MUST BE LEFT EXPOSED FOR MORE THAN THREE DAYS, CONSULT THE CITY ARBORIST. **NOTE:** THE 2 INCH DIAMETER THRESHOLD FOR ROOTS IS A GUIDELINE THAT MAY BE ADJUSTED BY THE CITY ARBORIST DEPENDING ON THE SIZE AND CONDITION OF THE TREE, AND THE LOCATION OF THE ROOTS. THE CITY ARBORIST MAY INCREASE THE TPZ, OR IMPOSE OTHER RESTRICTIONS, WHEN THE DRIPLINE OF A TREE HAS BEEN ALTERED BY PRUNING OR UNUSUAL GROWTH PATTERNS. ANY ROOT PRUNING THAT WILL OCCUR WITHIN THE PARKWAY: ALL WORK IN THE AREA WILL REQUIRE PRIOR APPROVAL AND SHALL BE SUPERVISED BY THE PROJECT ARBORIST. ROOTS SHOULD BE CUT WITH A SAW TO PROVIDE A FLAT AND SMOOTH CUT. REMOVAL OF ROOTS LARGER THAN 2 INCHES IN DIAMETER SHOULD BE AVOIDED.

i) NO STORAGE OF BUILDING MATERIALS, REFUSE, EXCAVATED SPOILS, OR DUMPING OF POISONOUS MATERIALS, IS PERMITTED WITHIN THE DRIP LINE OF ANY PROTECTED TREE. POISONOUS MATERIALS INCLUDE, BUT ARE NOT LIMITED TO, PAINT, PETROLEUM PRODUCTS, CONCRETE OR STUCCO MIX, DIRTY WATER, OR ANY OTHER MATERIAL WHICH MAY BE DELETERIOUS TO TREE HEALTH.

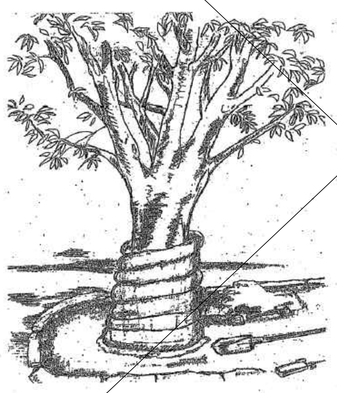
STREET TREE PLANTING NOTES:

1. FOR NEW PLANTING:
   a. THE CITY ARBORIST SHALL BE NOTIFIED, BY CALLING (510) 981-6660, PRIOR TO THE DELIVERY OF THE TREES FOR INSPECTION OF THEIR SIZE AND STRUCTURE.
   b. EACH TREE SHALL BE PROPERLY PLANTED AT OR JUST BELOW GRADE (<1"). SOIL AMENDMENT IS NOT RECOMMENDED. NO CONSTRUCTION RUBBLE OR NON-ORGANIC MATERIAL SHALL BE WITHIN THE TREE WELL. NATIVE SOIL IS PREFERRED.
   c. THE SURROUNDING SOIL OUTSIDE THE CONTAINER (ROOT BALL) SHOULD BE LIGHTLY COMPACTED TO ABOUT 4 INCHES BELOW GRADE WITH THE ROOT BALL HIGHER THAN THAT.
   d. 2 TO 2.5 INCHES OF BASE ROCK SHOULD BE APPLIED AROUND THE ROOT BALL LEAVING 1.5 TO 2 INCHES LEFT FOR THE MATERIAL.
   e. 15G CONTAINERS ARE APPROXIMATELY 15-16 INCHES IN DIAMETER AND THE MATERIAL SHOULD BE APPLIED TO THE APPROXIMATE EDGE OF THE ROOT BALL WITH THE TOP GRADE OF THE ROOT BALL UP TO 1 INCH BELOW THE TOP OF THE MATERIAL THAT WILL BE APPLIED.
   f. EACH NEW TREE SHALL HAVE AUTOMATIC DRIP IRRIGATION (NETAFIM PREFERRED) AND PROVIDE A MINIMUM OF 20 GALLONS PER WEEK BETWEEN MARCH 15 AND OCTOBER 15 FOR THE FIRST THREE YEARS. LARGER TREES MAY REQUIRE ADDITIONAL ~~BUBBLER5~~ DRIP LINES AND/OR EMITTERS. ~~BUBBLER5~~ DRIP EMITTERS SHOULD BE LOCATED ON TOP OF THE ROOT BALL WITHIN THIS 15-16 INCH CIRCLE AND NOT BE COVERED WITH MATERIAL. WHERE POSSIBLE, DRIP LINES AND EMITTERS ARE TO BE INSTALLED IN CONCENTRIC CIRCLES, STARTING 24" AWAY FROM THE TRUNK, SPACED AT 18" APART, COVERING THE ENTIRE TREE WELL.
   g. EACH EXISTING TREE TO REMAIN SHALL HAVE AUTOMATIC DRIP IRRIGATION (NETAFIM PREFERRED) AND PROVIDE A MINIMUM OF 20 GALLONS PER WEEK BETWEEN MARCH 15 AND OCTOBER 15 FOR THE FIRST THREE YEARS AFTER IT WAS PLANTED (PLANTING DATES AVAILABLE AT "CITY TREES" FROM CITY OF BERKELEY OPEN DATA, https://data.cityofberkeley.info/Natural-Resources/ City-Trees/9t35-jmin.) LARGER TREES MAY REQUIRE ADDITIONAL DRIP LINES AND/OR EMITTERS. DRIP EMITTERS SHOULD BE LOCATED AS FAR FROM THE TRUNKS OF MATURE TREES AS POSSIBLE. WHERE POSSIBLE, DRIP LINES AND EMITTERS ARE TO BE INSTALLED IN CONCENTRIC CIRCLES, STARTING 24" AWAY FROM THE TRUNK, SPACED AT 18" APART, COVERING THE ENTIRE TREE WELL.
   h. TREES THAT DIE WITHIN THE FIRST THREE YEARS MUST BE REPLACED AT THE PROPERTY OWNER'S EXPENSE.

Figure 1: Examples of Tree Trunk Protection

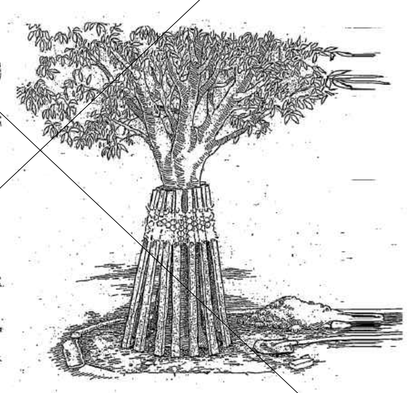
The following illustrations are examples of tree trunk protection measures. One of these examples shall be used when any approved construction activity takes place within the dripline of a protected tree that is not surrounded by protective fencing.

Example A – Straw tubing (wattle)



Example A. Illustration by Dwayne Walters

Example B – Wooden slats



Example B. Illustration from ISA Managing Trees During Construction, BMP

FIGURE 1 — TREE TRUNK PROTECTION EXAMPLES
(via City of Berkeley)

NOTE: As of 9.11.24, no construction activities are approved within the tree wells of any existing trees to remain. See Figures 2 and 3 for examples of acceptable tree protection. All TPF to protect entire exposed soil area within each tree well.

FIGURE 3 — TREE PROTECTION FENCE EXAMPLE

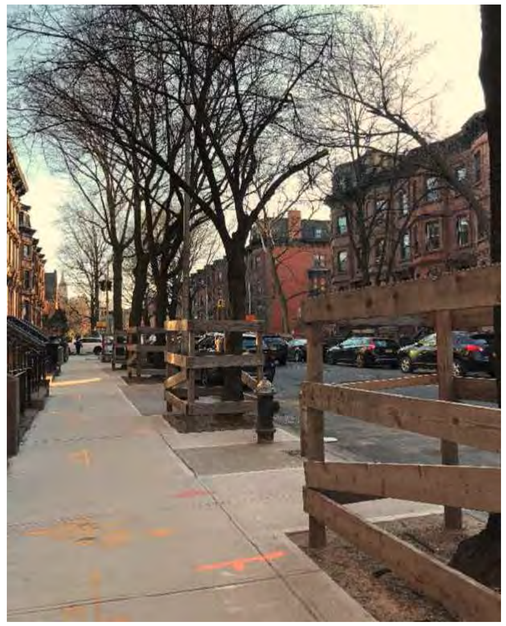


FIGURE 2 — TREE PROTECTION FENCE EXAMPLE
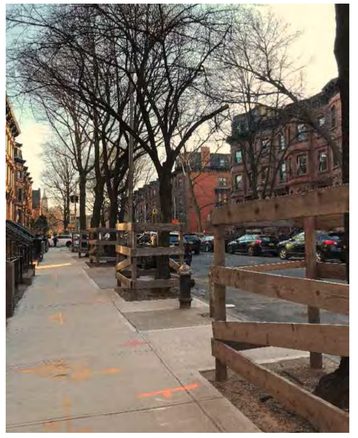
(via City of Berkeley - SEE DETAIL TP2 FOR NOTES)

SCALE FACTOR = 1



NOTES:
1. DRIVE 4X4 POSTS 24" INTO GRADE AT CORNERS OF TREE WELL; SPACE POSTS NO FURTHER THAN 5' ON CENTER.
2. SET HEIGHT OF FENCING AT 4'-6"
3. SECURE 2X6 OR 2X8 CROSS BOARDS TO FORM BARRIER TO ENTRY
4. AFFIX LAMINATED SIGN TO CROSS BOARDS THAT READS "DO NOT ENTER, ADJUST, OR REMOVE FENCING. CONTACT CITY ARBORIST TO ADJUST OR MODIFY FENCING: (510) 981-6660 OR TREES@BERKELEYCA.GOV"

ZONING ADJUSTMENTS BOARD

NOTICE OF PUBLIC HEARING

2109 Virginia Street

Use Permit #ZP2024-0066 to demolish a 2-story commercial building (4,604 square feet) and surface parking lot, and construct an 8-story (89 feet and 4 inches) 112,969 square-foot mixed-use residential development with 110 dwelling units (including 9 Very Low-Income and 9 Moderate Income units), 690 square feet of ground floor commercial space, 109 off-street vehicle parking spaces and 64 bicycle parking spaces.

The Zoning Adjustments Board of the City of Berkeley will hold a public hearing on the above matter, pursuant to Zoning Ordinance, Section 23.404.050 (Public Hearings and Decisions)

When: Thursday, September 11, 2025, 7:00 pm
Where: Berkeley Unified School District meeting room, 1231 Addison Street, (wheelchair accessible) with remote/hybrid option (via Zoom).

Please visit: https://berkeleyca.gov/your-government/boards-commissions/zoning-adjustments-board and click on the hearing date to access the most up-to-date meeting information, or call the Land Use Planning division (510) 981-7410.

PUBLIC ADVISORY*: *THIS MEETING WILL BE CONDUCTED IN A HYBRID MODEL WITH BOTH IN-PERSON ATTENDANCE AND VIRTUAL PARTICIPATION AVAILABLE FOR MEMBERS OF THE PUBLIC.

For in-person attendees, face coverings or masks that cover both the nose and mouth are encouraged. If you're feeling sick, please do not attend the meeting in-person as a public health precaution.

Currently, there are no physical distancing requirements in place by the State of California or the Local Health Officer for an indoor event similar to a Commission meeting. However, all attendees are requested to be respectful of the personal space of other attendees. An area of the public seating area will be designated as "distanced seating" to accommodate persons that need to distance for personal health reasons.

Land Use Planning Division
1947 Center Street, Second Floor, Berkeley, CA 94704 Tel: 510.981.7410 TDD: 510.981.7474 Fax: 510.981.7420
E-mail: zab@berkeleyca.gov

A. Land Use Designations:

- General Plan: Neighborhood Commercial (NC), Medium Density Residential (MDR), High Density Residential (HDR)
- Zoning: North Shattuck Commercial District (C-NS), Restricted Multiple-Family Residential District (R-2A), Multi-Family Residential District (R-4)

B. Zoning Permits Required:

- **Demolition.** Use Permit under BMC Section 23.326.070(A) **"Main Non-Residential Building"** to demolish a non-residential building
- **New Construction.** Use Permit under BMC Section 23.202.020 (A) **"Allowed Land Uses"** to construct a new mixed-use development.
- **New Construction.** Use Permit under BMC Section 23.204.020 (A) **"Allowed Land Uses"** to construct a new mixed-use development.
- **New Floor Area.** Use Permit under BMC Section 23.204.030(A)(1) **"Floor Area Permit Requirements"** to create new floor area of 2,000 square feet or more.
- **Parking.** Administrative Use Permit under BMC Section 23.322.070(D)(1) **"Excess Off-Street Parking"** to exceed the maximum number of off-street residential parking.
- **Building Height.** Administrative Use Permit under BMC Section 23.304.050(A) **"Projections Above Height Limits"** to exceed the allowed height limit with a rooftop projection.

C. Concessions and Waivers Requested Pursuant to State Density Bonus Law (California Government Code Section 65915):

- **Public Art In-lieu Fee.** Concession from BMC Chapter 23.316 to allow an exemption from the Percentage for Public Art on Private Projects in-lieu fee; and
- **Parking.** Concession to relocate the proposed underground parking in the base project to above grade in the proposed project.

North Shattuck Commercial District (C-NS):

- **Main Building Height**. Waiver from BMC Section 23.204.090(D)(1) "Basic Development Standards" for a mixed-use project to exceed the 35-foot maximum height limit by adding 54 feet, 4 inches, for a total of 89 feet, 4 inches, and exceed the 3-story limit by adding 5 stories, for a total of 8 stories**.**
- **Residential Window Setback**. Waiver from BMC Section 23.204.090(D)(4) "Residential Window Setback" to reduce the setback for a Mixed-Use building, opposite a required window in any habitable room of a residential use, to 0 feet, 0 inches where 10 feet is required.
- **Interior Side Setback.** Waiver from BMC Section 23.304.030(C)(2) "Lots Adjacent to Residential Districts" to reduce the interior side setback to 0 feet, 0 inches for the interior side where 5 feet is required.

Restricted Multiple Family Residential District (R-2A):

- **Main Building Height.** Waiver from BMC Section 23.202.090(D)(1) "Basic Development Standards" to exceed the 35-foot maximum by adding 54 feet, 4 inches for a total of 89 feet, 4 inches, and exceed the 3-story limit by adding 5 stories, for a total of 8 stories.
- **Lot Coverage.** Waiver from BMC Section 23.202.090(D)(2) "Supplemental Development Standards" to exceed the 40% lot coverage limit for a 3-story building on a corner lot by adding 60% for a total of 100% lot coverage.
- **Interior Side Setback**. Waiver from BMC Section 23.202.090(D)(1) "Basic Development Standards" to reduce the interior side setback to 0 feet, 0 inches on the first and second story where 4 feet is required.

Multi-Family Residential District (R-4):

- **Main Building Height.** Waiver from BMC Section 23.202.110(E)(1) "Basic Development Standards" to exceed the 65-foot maximum height by adding 24 feet, 4 inches for a total of 89 feet, 4 inches and exceed the 6-story limit by adding 2 stories, for a total of 8 stories.
- **Lot Coverage.** Waiver from BMC Section 23.202.110(E)(2) "Supplemental Development Standards" to exceed the 40% lot coverage limit for a 6-story building on a corner lot in by adding 60% for a total of 100% lot coverage.
- **Front Setback.** Waiver from BMC Section 23.202.110(E)(1) "Basic Development Standards" to reduce the front setback to 2 feet, 10 inches on the western side of the lot and 5 feet, 8 inches on the eastern side of the lot where 15 feet is required.
- **Interior Side Setback.** Waiver from BMC Section 23.202.110(E)(1) "Basic Development Standards" to reduce the interior side setback to 0 feet, 0 inches for stories 1-2 where 4 feet is required, and provide a 9 foot, 8-inch setback for 3-8 stories, where:
  - 6 feet is required for the third story,
  - 8 feet is required for the fourth story,
  - 10 feet is required for the fifth story, and
  - 12 feet is required for the sixth story

D. CEQA Exemption Recommendation: It is staff's recommendation to the Zoning Adjustments Board that the project is exempt from the provisions of the California Environmental Quality Act (CEQA, Public Resources Code §21000, et seq. and California Code of Regulations, §15000, et seq.) pursuant to Section 15183.3 of the CEQA Guidelines ("Streamlining for Infill Projects").

E. **Project Recommendation:** Approve Use Permit #ZP2024-0066, pursuant to BMC Section 23.406.040(D)

F. Parties Involved:

- Applicant — Isaiah Stackhouse, 2421 Fourth St., Berkeley, CA 94710
- Property Owner — American Commonwealth Associates, 1683 Shattuck Avenue, Berkeley, CA 94709

Further Information:
All application materials are available online at:
https://aca.cityofberkeley.info/CitizenAccess/Welcome.aspx.

The Zoning Adjustments Board final agenda and staff reports will be available online 6 days prior to this meeting at: https://berkeleyca.gov/your-government/boards-commissions/zoning-adjustments-board.

Questions about the project should be directed to the project planner, Cecelia Mariscal, at (510) 981-7439 or cmariscal@berkeleyca.gov.

Written comments or a request for a Notice of Decision should be directed to the Zoning Adjustments Board Secretary at zab@berkeleyca.gov.

Communication Disclaimer:
Communications to Berkeley boards, commissions or committees are public record and will become part of the City's electronic records, which are accessible through the City's website. **Please note: e-mail addresses, names, addresses, and other contact information are not required, but if included in any communication to a City board, commission or committee, will become part of the public record.** If you do not want your e-mail address or any other contact information to be made public, you may deliver communications via U.S. Postal Service or in person to the secretary of the relevant board, commission or committee. If you do not want your contact information included in the public record, please do not include that information in your communication. Please contact the secretary to the relevant board, commission or committee for further information.

Written Comments, Communications, and Reports:
Written comments must be directed to the ZAB Secretary at the Land Use Planning Division (Attn: ZAB Secretary), or via e-mail to: zab@berkeleyca.gov. All materials will be made available via the Zoning Adjustments Board Agenda page online at this address: https://berkeleyca.gov/your-government/boards-commissions/zoning-adjustments-board

All persons are welcome to attend the hearing and will be given an opportunity to address the Board. Comments may be made verbally at the public hearing and/or in writing before the hearing. The Board may limit the time granted to each speaker.

Correspondence received by 5:00 PM, eight days before this public hearing, will be provided with the agenda materials provided to the Board. Note that if you submit a hard copy document of more than 10 pages, or in color, or with photos, you must provide 15 copies. Correspondence received after this deadline will be conveyed to the Board in the following manner:

- **Correspondence received by 5:00 PM, two days before** this public hearing, will be conveyed to the Board in a Supplemental Communications and Reports #1, which is released around noon one day before the public hearing.
- **Correspondence received by 12:00 PM, the day of** this public hearing, will be conveyed to the Board in a Supplemental Communications and Reports #2, which is released around noon the day of the public hearing.
- **Correspondence received after 12:00 PM, the day of** this public hearing will be saved in the project administrative record.

Accessibility Information / ADA Disclaimer:
To request a disability-related accommodation(s) to participate in the meeting, including auxiliary aids or services, please contact the Disability Services specialist at 981-6342 (V) or 981-6345 (TDD) at least three business days before the meeting date.

SB 343 Disclaimer:
Any writings or documents provided to a majority of the Commission regarding any item on this agenda will be made available to the public. Please contact the Land Use Planning Division (zab@berkeleyca.gov) to request hard-copies or electronic copies.

Notice Concerning Your Legal Rights:
If you object to a decision by the Zoning Adjustments Board regarding a land use permit project, the following requirements and restrictions apply:

1. If you challenge the decision of the City in court, you may be limited to raising only those issues you or someone else raised at the public hearing described in this notice.
2. You must appeal to the City Council within 14 days after the Notice of Decision of the action of the Zoning Adjustments Board is mailed. It is your obligation to notify the Land Use Planning Division in writing of your desire to receive a Notice of Decision when it is completed.
3. Pursuant to Code of Civil Procedure Section 1094.6(b) and Government Code Section 65009(c)(1), no lawsuit challenging a City Council decision, as defined by Code of Civil Procedure Section 1094.6(e), regarding a use permit, variance or other permit may be filed more than 90 days after the date the decision becomes final, as defined in Code of Civil Procedure Section 1094.6(b). Any lawsuit not filed within that 90-day period will be barred.
4. Pursuant to Government Code Section 66020(d)(1), notice is hereby given to the applicant that the 90-day protest period for any fees, dedications, reservations, or other exactions included in any permit approval begins upon final action by the City, and that any challenge must be filed within this 90-day period.
5. If you believe that this decision or any condition attached to it denies you any reasonable economic use of the subject property, was not sufficiently related to a legitimate public purpose, was not sufficiently proportional to any impact of the project, or for any other reason constitutes a “taking” of property for public use without just compensation under the California or United States Constitutions, the following requirements apply:
    a. That this belief is a basis of your appeal.
    b. Why you believe that the decision or condition constitutes a "taking" of property as set forth above.
    c. All evidence and argument in support of your belief that the decision or condition constitutes a “taking” as set forth above. If you do not do so, you will waive any legal right to claim that your property has been taken, both before the City Council and in court.

Neighborhood Meeting Attendance and Notes Sheet (Online)

1685 Shattuck Ave
Berkeley, CA 94709
May 23, 2024

NAME	ADDRESS	EMAIL	NOTES
Karen Streets			Project much higher and we have been here since 1972. It will be a large impact for the immediate neighborhood. How tall are the new projects down on Shattuck and University? IS – 12 stories and 8 stories built prior to state laws to combat housing crisis. Even though it's out of place and create impact resources, such as water supply? Does it have to be 8 stories? IS – We will be working with the city and the state/city zoning is what is intended here. And this is where this type of density go, to be able to house everyone in Berkeley and targeted commercial strips like this one. How about the toxics from Virginia Cleaners? IS – Lots of ways to take care of the toxics with all the regulations and Berkeley has a very robust toxics department and can help deal with issue.
Sally Sommer		s_sommer@sbcglobal.net	Community members? Students? IS – Housing for all. Units can serve families and students due to mix of unit types from studios to 3 bedrooms. Providing more parking than required? IS – This project wants to provide for families who may have cars
Suzanne Perkins			For 120 units, how many people are estimated to be living there? Is there a formula, for example 1 and 1/2 times the number of uits = 180 people. IS – There is no straight formular for this but this sounds good Are there laundry facilities planned to be sufficient? Increase use of services, concerned for making the current residents harder to use the neighborhood services. IS – Laundry room on each floor to be sufficient.
Bert Gordon			Regarding toxic issue, nothing on the record about the toxic. IS – Gets reviewed by the city during planning and construction permitting. Lots of ways for the site to be resolved with experts. We don't know the details but sites can be remediated with expert guidelines and confident this can be done. What can happen to make the project smaller? IS – The project's 131 units will provide what the state

			wants to create housing and helps the project to get build due to construction cost and financing and lending cost are also high. The 131 units help will help pay for the parking, land, and city costs. The density makes the project feasible and also of these future 131 families who are we going to tell that their units will not be built.
James Hendry			How does the building get 8 stories in the zone? IS – 7 stories of housing over ground floor lobby and commercial space, parking. It's a density bonus project which provides up to 100% bonus to projects that provide affordable housing. The city staff will review the bonus calculations. Are you planning setbacks and are any open spaces available for the public? IS- setbacks on the sidewalk and also 10' setback from the east. The sidewalk seating will be public use, but the other open spaces are only for residents Where would delivery be made? IS – Determine by Public Works Dept. They will paint out a loading zone during construction permit process Submitting in 3 weeks, so this is just a dog and pony show? IS – Still working on the design, this is an opportunity to hear the neighbors' voices. Yellow signs with city's notices and the public can attend hearings Are you intending to keep the parking spaces IS – Yes, we are. We do have to ask the city for permission this amount of parking spots. City council requires 0 but can approve ½ of the amount. 7' deep parking for the triple stack Address the toxic under the cleaners? IS – The city will issue conditions of approval of how the site gets treated. The city has a regulated agency to see if it gets exemption or regulated.
Lindsey Quock			Are these market rate units? What are the rent range? IS - Apartments for our community. We don't know the rent range. Minimum 11 LVI based on preliminary calculations to qualify for density bonus units. The project will also provide in lieu fee and may provide more units. This is something to be determined later with the city review process. When is the ground break? - It takes another year after 1.5 year of review time. The likely path would be 2- 2.5 years that this project will break ground and roughly take 18months to construct. What benefits are to the neighbors when light and views will be blocked on Virginia neighbors IS - The real benefit is providing housing and residents to help local business thrive and affordable housing fees. We did pull the project towards the boulevard with setback towards the east Has there been a shadow and light study? IS – There will be shadow study in the submittal and we are still working on those drawings and will be

			available to everyone How do we get those drawing submittals? IS – Once the project is submitted, the city planner will be sending out info and the city website will have the project application info
Melinda Lopez			Earth sinking concern? IS – Project will have a soil report. The city will have a peer review of the soil as well. They can calculate how much the land will settle over time. The soil should be quite good here. Standard mat slab foundation here. San Francisco has a lot of fill and those locations don't have stable soil

(IS = Isaiah Stackhouse)

Notes:

A yellow poster will be installed on site after project submission.

3-6 months of staff review before zoning and design review board meeting. The list of addresses from tonight was given from the city and this same list will be used from the city to send out notifications regarding the project.

Hi Elizabeth,

Constructing a multi-family building in the Commercial North Shattuck building requires a Use Permit and public hearing pursuant to Berkeley Municipal Code (BMC) 23.204.020(A). the project must meet the findings in BMC 23.406.040(E)(1)and BMC Section 23.204.090(E), as well as any other findings related to deviations from other development standards and Design Review as required by the Municipal Code. However, the project sponsor has applied for a density bonus request, which allows projects to waive development standards and build beyond the density permissible in what a Zoning District allows if providing very low-income (VLI), Low-income (LI), or Middle-income (MI) units allowed under §65915.

I hope this helps. Please let me know if you have additional questions.

Best,
Cecelia

Hello, Elizabeth: Thank you for your email. I'll include this as late correspondence to the DRC so that they are also aware of your questions and concerns. I'm also copying our Use Permit Planner, Cecelia Mariscal, as she will be taking this project to ZAB after it has come to the DRC. ZAB will include building height in their review, instead of the DRC, as a waiver to the height standards is being requested under the State's Density Bonus laws. I am happy to include this in DRC correspondence as there are design recommendations that can lessen the visual impact of a design – such as color, material, window details and patterns, landscape. Again, thank you for your email - Anne

Thank you, Anne, for reaching out. I am fine with new construction and building downtown but I wish that the City would maintain a more consistent height for the buildings
in the Gourmet area on Shattuck from Hearst to Rose Street to maintain the charm of the Gourmet Ghetto. Three stories would be more in line with what is there now.
And the fact that the building is taking away the views, the air, the sunlight from residential properties and residents who have lived in this neighborhood on Walnut Street
for over 40 years and more is unfortunate and distressing. Can something be done to limit building heights?
Elizabeth Scherer

> Hi Melinda,
>
> Thank you for your message. The proposed project is currently under review; however, there are missing items that are still required for a complete submittal. Members of the public can track a project's progress through the City's Citizen Portal Access, linked here. I've attached a screenshot guide to this email to help you navigate the portal more easily. As noted in your email communication, the project includes the former "Virginia Cleaners" which includes contaminants of concern (Hydrocarbon solvents) and requires remedial/clean-up action by the California Department of Toxic Substances. Please note that although the site is contaminated, it has not been identified as a "Superfund" site. For more information on Superfund sites, please visit the EPA's website, which is linked here. Due to the site's existing contamination, the City required a Phase I assessment report, which can be viewed along with the other Zoning Project Submittal Requirements through the Citizen Access Portal.
>
> The timeline for review by the Zoning Adjustments Board Due is indeterminate at the moment. The applicant must first submit the additionally required application contents for review and then staff will work to determine the appropriate CEQA review. The project review is paused until the additional contents are submitted by the applicant. You can track the project through our Online Portal or reach out to me periodically. Additionally, I regularly work the walk-in Zoning Counter, on the 3rd floor at 1947 Center Street every Monday from 12:30–2:30 p.m. (last check-in at 2 p.m.) where anyone can drop by to inquire about the project's status.
>
> Once the project is deemed complete, the CEQA status is determined, and the analysis is complete, the project will be put on the calendar for the Zoning Adjustments Board, where anyone from the public can comment on the project. If the project were to be approved, there is a 14-day appeal period that begins once the notice is posted, and anyone from the public can appeal the project. Please see the information on our website regarding the appeal

process linked here.

Lastly, the proposed development has an SB330 State Density. State Bill No. 330, also known as the Housing Crisis Act, was enacted in 2019 to address the housing shortage. The bill aims to achieve this through streamlined permit approval, allowing projects to build units beyond what local development standards allow when offering low-income and middle-income units, and constraining the power of the land use decision-making body to deny a project a housing project or deny a housing development project at a lesser density than what is being proposed unless it could be proven that it would have an adverse impact on public health and safety. There is currently no case law that establishes a threshold.

I hope this information has answered your questions. Please feel free to reach out with any additional queries or visit the zoning counter on Monday from 12:30 to 2:30 p.m. We are here to support you and ensure you are fully informed about the project.

Best,
Cecelia

Subject: 2109 Virginia - Proposed development inquiry

WARNING: This is not a City of Berkeley email. Do not click links or attachments unless you trust the sender and know the content is safe.

Hello Cecilia:

I was born in Berkeley and a long time resident of our properties in North Berkeley of over 60 years.

We are all concerned about the pending proposed development in our single-family homes residential properties of which we have enjoyed over the years the privacy, charm and safety.

We have a few questions:

1. How do we comment on the project?

2. Are there any hearings on the project coming up?

3. Are there any deadlines for comments?

4. Has any toxic studies been done on this former Superfund site which had a fire caused by Virginia Cleaners (now moved across the street to Shattuck/Cedar street)?

5. we are pro-housing in our backyard but inquiring on why the City approves an 8-story building of 132 units/93 parking spaces?

6. Also, if the City approved all the potential ADUS, our survey indicates several thousand units would be added, well distributed through single-family home areas. Is this large-scale intrusive development really needed at this time in our small scale community?

Hope to hear from you soon on our concerns.

Thank you for your time and consideration.

Sincerely,

Melinda E. Lopez

North Shattuck Alliance

Subject: RE: Memorandum in Support of Reconsideration of the proposed 8-Story Building at 2109 Virginia, Adjacent to Two-Story Single-Multi-Family Homes, No. ZP-2018-0172.
Date: Thursday, October 3, 2024 3:40:56 PM

Members of the North Shattuck Alliance,

Thank you for your message. As you have pointed out, the project site was inhabited by the Virginia Cleaners from approximately 1920-1967, which rendered the site contaminated due to its use of an underground storage tank for Stoddard solvent. The presence of hydrocarbon solvents was the confirmed chemical of concern at the site, and it was added to the Cortese List as a result. The project was remediated/cleaned up in 1987 and granted case closure by the Department of Toxic Substances and Chemicals (DTSC) in 1987 and the San Francisco Regional Water Quality Control Board (RFRWQCB) in 1999. However, due to the absence of documentation of post-excavation soil confirmation sampling, vapor concentrations below permissible thresholds for residential use could not be confirmed, resulting in a Phase II assessment and subsequent report published on August 14, 2024. The Phase II report concluded that subsurface impacts were consistent with historical site use and the subsurface conditions described in the closure letter. No recommended land use restrictions or continuing obligations were associated with the initial case closure, and since the Phase II assessment results were consistent with the findings in the case closure letter, no further assessment or regulatory oversight is recommended. An Initial Study pursuant to the California Environmental Quality Act Guidelines (CEQA) will be required to determine the project's potential environmental impacts. The Phase I and Phase II assessment reports can be viewed along with the other Zoning Project Submittal Requirements through the Citizen Access Portal.

Constructing a multi-family building in the Commercial North Shattuck building requires a Use Permit and public hearing pursuant to Berkeley Municipal Code (BMC) 23.204.020(A). the project must meet the findings in BMC 23.406.040(E)(1)and BMC Section 23.204.090(E), as well as any other findings related to deviations from other development standards and Design Review as required by the Municipal Code. The project sponsor has applied for a density bonus request, which allows projects to waive development standards and build beyond the density permissible in what a Zoning District allows if providing very low-income (VLI), Low-income (LI), or Middle-income (MI) units allowed under §65915.

This is also a housing development project allowed under State Bill No 330, also known as the Housing Crisis Act, enacted in 2019. The law locks in development standards from the date of application filing and limits the authority of the land use decision-making body to deny a project a housing project or reduce density unless findings are made demonstrating that there is an adverse impact on public health and safety.

Yellow project information signs are posted on the property, and a community outreach meeting, required by the Zoning Project Submittal Requirements for large projects, was held virtually on May 23, 2024. The records show that Melinda Lopez, who was copied on your email as a North Shattuck Alliance affiliate, was in attendance. I recommend reaching out to her to get more details on what was discussed in this meeting and to review the notes from the community outreach meeting, which can be viewed along with other submittal items in the

Citizen Access Portal linked here.

If you are interested, the Housing Community Development website, linked here, allows you to track the addition of housing units by jurisdiction.

I hope this information is helpful. Please let me know if you have additional questions.

Best,
Cecelia

ZAB Board
2180 Milvia Street
Berkeley, CA. 94704
cmariscal@berkeleyca.gov

CC: Council Member District 4, Mayor of Berkeley, Rep. California Senate District 9 Nancy Skinner

RE: Memorandum in Support of Reconsideration of the proposed 8-Story Building at 2109 Virginia, Adjacent to Two-Story Single-Multi-Family Homes, No. ZP-2018-0172.

Dear ZAB, Cecelia Mariscal,

We are the neighbors adjacent to the proposed 8-story building at 2109 Virginia St. We are very supportive of adding housing and many of us have restored properties, provided housing and proposed smart fill-in housing in our neighborhood.

We have several concerns regarding the 2109 Virginia Street project:

- There appears to have been outdated cleanup and measurement protocols, dating back over 30 years, were utilized to assess and manage the toxic waste generated by the historical commercial operations of Virginia Cleaners on the proposed development site. These protocols may have been inappropriately applied to classify the site as safe for construction

- There appears to have been environmental, safety, and intrusion of privacy posed by the project to existing two-story single and multi-unit homes adjacent to the proposed large disparity of size and volume of the 8-story building that has yet to be researched and evaluated before the permit approval is granted

- There appears to have been concerns around significant duress to quality of life and safety of current residents, many of them elderly, living in the immediate city block of the proposed building, due to deficiency in parking, police, utilities, and other public needs demanded by the introduction of almost 100+ additional units which has not been researched and evaluated before the permit approval is granted

- There appears to have been inconsistent use of design and zoning requirements such as gradual story/height step-down rules and other design rules approved to be applied to high-density parts of Berkeley being applied to low density parts of the proposed site without proper research and evaluation before the design should be considered ready for review.

- There appears to have been no consideration of the concrete urban heat island effects being created by this project without removal of open space with virtually no offsets being researched and evaluated as part of the proposed design being considered for permitting

- There appears to have been no consideration of the smart infill housing that has already occurred in Berkeley, which has added more such units that most other cities in California and specifically District 4 which has added more such units than any other Districts in Berkeley. In fact, residents along Walnut Street in District 4 have added smart infill housing (6 out of 9 residents on this petition on walnut street have added infill housing) and hence request the housing density per city block be used as a measure of equity and fairness to be researched and assessed factoring in the existing smart infill housing provisioned in district 4 and more specifically in the proposed city block to ensure balance of density of housing distribution per city block in Berkeley

- There appears to be no consideration of the advantages of smart infill into single family home areas, which would provide to lower income residents the numerous positive characteristics of single-family home areas (lower crime, lower pollution, higher income, more greenery, less concrete and better health and hence must be part of the evaluation of proposed housing plan to incorporate the societal and economic enablement assessments factoring existing smart infill housing vs. proposed 8 story complex.[1]

We, Berkeley residents of North Shattuck Alliance , oppose this proposed project in its form as submitted and request the ZAB and city council to enforce judgment and good common sense to guide the approval of this project. Without appropriate action from the city, we would [will?] have no recourse left but to pursue legal action against the approval of the [a] permit.

Detailed points of residents of North Shattuck Alliance Memorandum

1. **SB 330 Housing Crisis Act of 2019**
   As long-term residents of Berkeley, tenants and homeowners, we have all first-hand experience and witnessed the significant economic and emotional pressure the housing crisis in the Bay Area and the state of California. The historic act that was passed by the state, is a testament to the courage of Sacramento to change the course of housing shortfalls in our community

2. **Accessory Dwelling Unit Ordinance in the City of Berkeley**
   City of Berkeley has been at the forefront of encouraging innovative approaches and formats to put a dent in the housing crisis, such as supportive ADU ordinance passed by the city. ADUs

[1] Single-Family Zoning in California: A Statewide Analysis, A California Zoning Atlas Report, Stephen Menendian, Shahan Shahid Nawaz & Samir Gambhir, Othering & Belonging Institute, May 22, 2024, https://belonging.berkeley.edu/single-family-zoning-california-statewide-analysis.

according to innumerable policy experts are affordable, low cost to develop, environmentally friendly, safe and smart in infilling neighborhoods with housing density. According to certain estimates, continued supportive policies for ADUs that protect homeowner and rental rights can yield close to 5000 new housing units in Berkeley – which is roughly 60% of the city's goals set through 2030. Several residents in our community, provide ADUs, even sometimes overcoming adversities from the planning department. 6 out of 9 residents in this petition have provided in-fill housing in their properties.

However, the SB 330 act has also resulted in unintended consequences, which are untenable for our community and if faced, probably untenable for residents and even lawmakers across the city, county and state.

3. **Minimal regulatory requirements for property size expansion**
   Height step-down between the proposed 8 story apartments and one and two-story single-family and muti-unit homes in our neighborhood is essential to ensure a balanced transition between differing building scales. Studies show that abrupt height differences can cause significant overshadowing, leading to a reduction in sunlight by up to 50% for adjacent properties, negatively affecting residents' quality of life[2]. In addition, step-down designs help maintain neighborhood privacy by limiting direct sightlines from taller buildings into single-family yards and homes. Research from urban design studies also suggests that transitioning heights can reduce wind tunnel effects common in densely built areas, improving pedestrian comfort by lowering wind speeds by 15-20%[3]. Overall, this approach fosters a visually harmonious streetscape and protects the character and property values of residential neighborhoods. Especially in a neighborhood, where there is a significant portion of elderly residents who are aging-in-place, the proposed construction puts a threat and likely force many of us to be displaced from our homes due to safety and quality of life impairment.
   Ask– the city must request analysis and evaluation of sunlight and wind effects on quality of life and safety of residents in the immediate vicinity of proposed structure and/or reduce proposed building size to mitigate risks

4. **Inadequate and incoherent design decisions**
   The design choices for the proposed apartment project raises significant concerns. For instance, the inclusion of a car park for 93 vehicles directly contradicts Berkeley's push for walkable, transit-oriented housing, as exemplified by the University Avenue project. Prioritizing such extensive parking will only encourage more car ownership and traffic, which runs counter to Berkeley's goals for sustainable, pedestrian-friendly development. Additionally, the elimination of setbacks, justified solely by the inclusion of low-income housing, introduces serious risks for resident safety by restricting accessibility for fire and emergency personnel. Given the likely price point of these units, it's highly likely that many residents will be families and higher-income individuals who per studies have shown to own two cars, further increasing the parking burden on nearby streets. This will lead to more cars circling for parking, especially in this locale where elderly citizens and schoolchildren from Berkeley Arts Magnet Elementary School inhabit posing significant safety concerns.

[2] https://www.mdpi.com/1660-4601/17/14/5014
[3] https://windtechconsult.com/20-seriously-effective-wind-mitigation-strategies-for-your-next-project/

Ask – the city must request analysis and evaluation of realistic demands of likely residents and family structure, their car ownership, proposed parking slots and the impact on nearby street parking availability to ensure the right balance of transit-orientated housing goals are met without endangering current residents safety in walkability and convenience to accessible street parking in the vicinity and/or reduce proposed building size to mitigate risks

5. **Lack of congruence with the community**
   The current design proposal along Shattuck lacks the thoughtful integration needed to complement the unique, small-business-friendly nature of North Berkeley. Iconic places like the Cheeseboard Collective, which embodies Berkeley's values of independence, employee ownership, and prioritizing community over profit, are vital to the area's cultural and historical significance. A large-scale, developer-driven project with ground floor commercial storefronts risks disrupting this community-centric character. These new high-rises that are appearing in Berkeley, have not been able to attract local community-based businesses due to their high rent demands and therefore being leased by large national chains Adding commercial storefronts on Virginia Street—a completely residential area—raises concerns about maintaining the neighborhood's tranquility and balance. Just as it would be illogical to place a large-scale housing development in the heart of a commercial district like 4th Street, introducing commercial activity on a quiet residential street would disrupt the established character of the area. And with the likely rent burden, such a storefront being occupied by a national chain like a pizza hut or a seven-eleven or a clothing store is incongruent. Thoughtful design choices that align with community values are essential for maintaining safety, accessibility, and the neighborhood's integrity.
   Ask – the city must require re-layout of the proposed commercial storefronts away from Virginia street and include analysis and evaluation of the rent burden on such an establishment and ensure the rent is controlled to make the storefronts affordable to local businesses (representative businesses such as Poulet, GoingPlaces) versus national chains

6. **Urban heat islands and their environmental impact**
   High-density clusters of tall apartment buildings exacerbate the urban heat island (UHI) effect, disproportionately impacting marginalized communities and worsening climate change. These towering structures, often made of heat-absorbing materials like concrete and steel, trap heat in urban areas, making cities significantly warmer—by as much as 12°F compared to lower density regions.[4] The urban heat island effects already existing in Berkeley can be viewed using the hot stop mapping available on Climate Central's website[5,6]. This not only increases energy consumption through higher demand for air conditioning, but also leads to more greenhouse gas emissions, fueling the climate crisis. What's more, these heat islands disproportionately affect low-income and working-class communities, where green spaces and cooling infrastructure are often lacking. By prioritizing sustainable, human-centered urban planning -

[4] https://journalism.columbia.edu/news/urban-heat-island-effect-making-new-yorkers-hotter-study-finds

[5] https://journalism.columbia.edu/news/urban-heat-island-effect-making-new-yorkers-hotter-study-finds.

[6] https://climatecentral.observablehq.cloud/urban-heat-hot-spots/conus-map

such as reducing building density, integrating renewable energy solutions, and expanding green spaces—we can fight back against climate injustice and create healthier, more equitable cities for all.
Ask – the city must require a heat island effect analysis of the proposed structure and its environmental impact including the overall impact on environmental burden to the community and its residents health and quality of life and/or reduce proposed building size to mitigate risks

7. **Developer friendly policies at the disregard of residents**
While Berkeley housing code allows flexibility in how affordable units are distributed within a development, this approach is fundamentally unenforceable. Developers can easily prioritize profit by placing all affordable units on the less desirable lower floors while reserving the more valuable upper floors for high-paying buyers. There's no effective mechanism in place to ensure a fair distribution of affordable units, and without stricter regulations, developers are likely to exploit this loophole. This leads to a situation where promises of affordability are undermined by market-driven interests, and the concerns of existing neighborhoods about towering eight-story buildings next to single-family homes are completely disregarded. Ultimately, this approach benefits developers, not the broader community, and leaves too much room for manipulation.
Ask – the city must amend its design requirement policy around affordable housing allotment to within a building to pre-set and stipulate how many unites on which floor and of what design type (ex. 1, 2, 3 bedrooms) to ensure developers cannot game the system and/or reduce proposed building size to mitigate risks

8. **Opaque permitting, review and approval process**
The opaque zoning process for developers compared to everyday citizens creates significant issues for the community. When developers propose projects, there is often minimal communication, with only a notice posted on the proposed site providing an email and phone number for contact. In contrast, when residents want to make even a small addition to their property, they must go through multiple rounds of notifications, obtain signatures from neighbors, and follow several bureaucratic steps. This inconsistency in the process is problematic, especially for the diverse community that lives in the neighborhood, including elderly residents aging in place, working families, single parents, and those who are not tech-savvy. The lack of clear, accessible communication in zoning matters makes the process exclusionary and ableist, effectively undermining due process. Major projects that can disrupt the neighborhood should not be sprung upon residents without proper, transparent engagement. Lastly, the City is not being transparent in terms of the housing it has provided compared to other Cites and how the new housing has been distributed throughout the City.
Ask – the city must provide density increase analysis and evaluation for proposed building factoring in how the proposed building affects the fair and equitable increase in density versus other similar neighborhoods in District 4 and other districts within the city

Conclusion:

Berkeley has an average vacancy rate of 9-13%, meaning around 5,000 rental units are currently unoccupied out of 50,000 total. Despite the introduction of a vacancy tax in 2024, it is unclear whether this will effectively incentivize landlords to release these units into the market. Current incentives encourage property owners to keep units off the market, and simply building more housing—particularly under the banner of affordable housing—won't guarantee these units are

made available at low-income rates. Large developers, especially those who sell the finished housing to commercial property management firms, often exploit legal loopholes due to their significant financial and legal resources, making it difficult to achieve true affordability. Claims that state law and Berkeley's middle housing policy will empower small developers to build small multi-unit projects or duplexes that align with the ethos of the city are largely inaccurate. As a detailed analysis highlights, 25 developers are responsible for building 25% of all housing units in the U.S., even though there are 60,000 developers nationwide[7]. This trend is driven by large developers' access to public markets and capital, enabling them to undertake giant projects—far from what Berkeley envisions with its housing goals. Experts, including the Berkeley Rental Board Chair, remain skeptical that building large market-rate units will significantly improve affordability[8]. In summary, we believe un-fettered development with disregard to the community is not the answer to fixing current distorted housing policies and perverse incentives.

We, the community of North Shattuck Alliance, should not be at the receiving end of well-meaning housing policies that create unintended consequences. We sincerely request the city and state government to help us preserve our rights and our homes by addressing the requested asks at the earliest. We are willing to work closely with the city and the developer to achieve an amicable resolution that addresses our concerns.

From: John Lopez 1618 Walnut Street

Re: July 24, 2025 Agenda Item 7. A.

Project:2109 Virginia St. ZZP2024-0066

Request the ZAB to consider more study of the size and scope of this proposed project. **The current zoning for the C-NS North Shattuck Commercial District sets a maximum height of 35 feet and 3 stories for non-residential and mixed-use projects, and 28 feet and 2 stories for residential-only projects**

To avoid irreversible mistakes to the surrounding neighborhoods please consider some of these points:

1. The view study must include streets and views or estimated views from houses and apartment buildings. The views from their windows and yards that will be obstructed must be included.
2. Study noise pollution from open windows, HVAC, and Commercial use needs more study.
3. Study underground parking exhaust on air quality at location and neighborhood.
4. Study impact of Guest / Customer parking in residential neighborhoods and associated air and noise pollution.
5. Study the alternative of a lower height of 3-6 stories. 89 feet is too high for the character of the surrounding neighborhood.
6. Study if there are Aquifers under any section of the proposed project.
7. Maybe outside of this discussion but study Hospitals and First responder staffing and medical response. Police, Fire, and Paramedics will remain the same or is there a plan to increase? I hope more studies for all the large increases in Berkeley's population with the large projects being proposed and approved.

Date: July 24, 2025

To: The Zoning Adjustments Board (ZAB) - July 24 Meeting

From: Melinda E. Lopez, North Shattuck Alliance of concerned neighbors on Walnut Street, Berkeley, California 94709

Subject: Concerns Regarding 2109 Virginia Development Proposal of an 8-Story Building (110 units, 109 Parking) Adjacent to Two-Story Single-Multi-Family Homes – Use Permit for a Project at 2109 Virginia Street - ZAB App # ZP2024-0066

Dear Members of the Zoning Adjustments Board,

We, the undersigned neighbors and residents of the surrounding North Berkeley community, are writing to express our significant concerns regarding the proposed 8-story, 110-unit development at 2109 Virginia Street, which also includes 109 parking spaces. We understand that our submission is past the formal deadline, but we respectfully request that this letter and any accompanying documentation be entered into the record for the July 24th ZAB meeting.

Primary Concerns:

1. **Geotechnical and Soil Stability:**
    - The area surrounding 2109 Virginia, including the adjacent streets of Cedar, Walnut, and Shattuck, has not been thoroughly evaluated in recent public geotechnical studies.
    - We are concerned about potential risks of soil instability, settlement, or lateral movement affecting neighboring historic and residential properties, particularly those on Walnut Street.
2. **Scale and Massing Incompatibility:**
    - An 8-story building is significantly out of scale with the immediate neighborhood, which primarily consists of 1-3 story buildings.
    - The visual impact and shadowing effects on nearby residences and community spaces must be more carefully reviewed.
3. **Traffic and Parking Impact:**
    - The proposed 109 parking spaces raise concerns about increased vehicular traffic and congestion on nearby narrow streets.
    - We request a thorough and publicly accessible traffic impact analysis.

4. **Environmental and CEQA Review:**
    - It is unclear whether all CEQA-required assessments have been completed and made available for public review.
    - We request the full publication of CEQA-related findings and mitigation measures, including potential impacts on local air quality, noise, and water runoff.
5. **Community Process and Transparency:**
    - We respectfully request greater transparency and opportunities for community input throughout the development review process.
    - Consideration should be given to alternative designs that better reflect the character and infrastructure capacity of the neighborhood.

We appreciate your service and the opportunity to express our concerns, and we urge you to delay any final decision until a more comprehensive review—including soil studies, CEQA documentation, and additional community input—is completed.

Sincerely,

Melinda E. Lopez

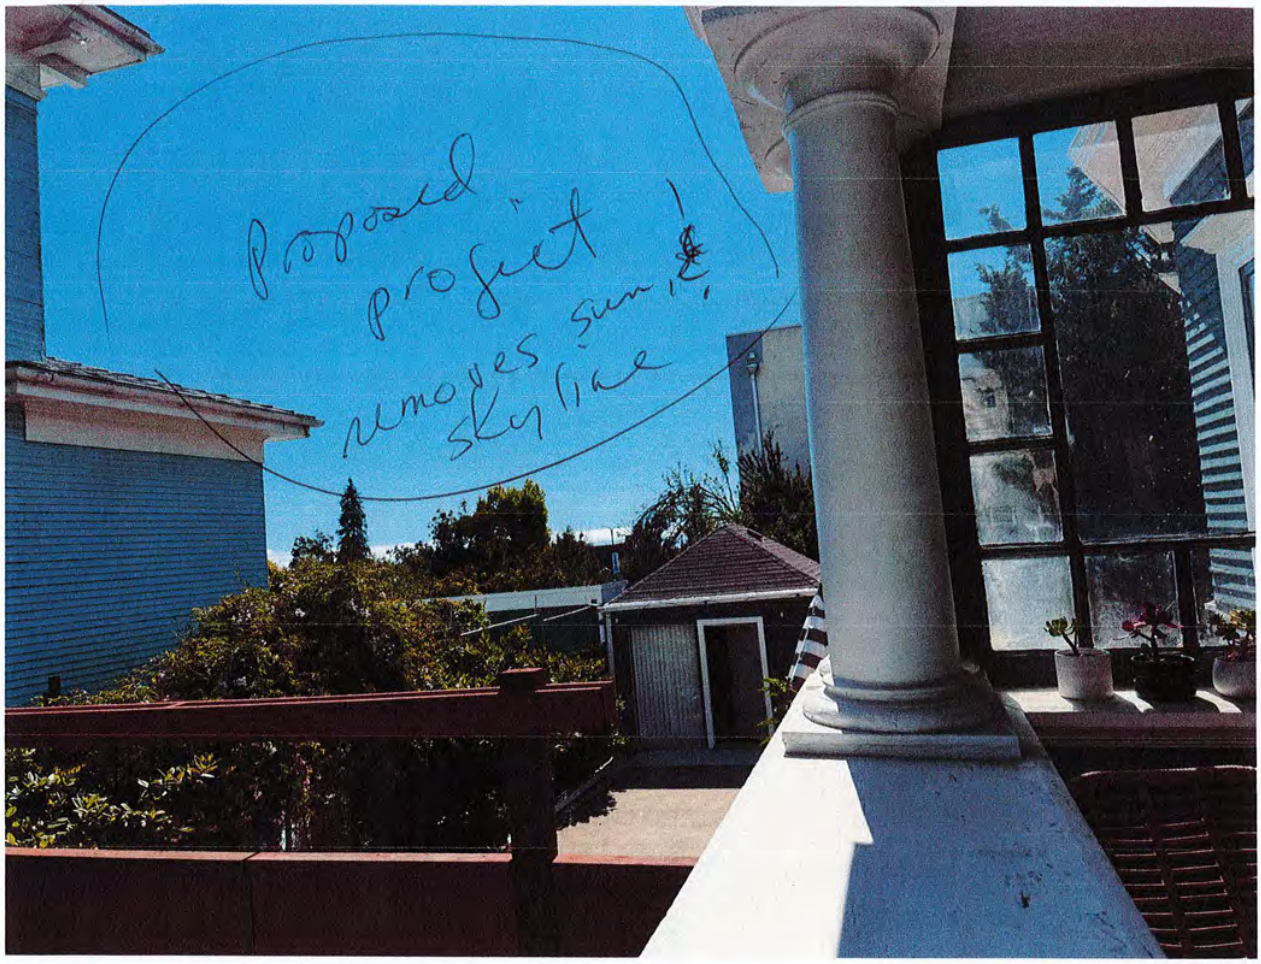
Walnut Street
2 story dwellings

Walnut Street



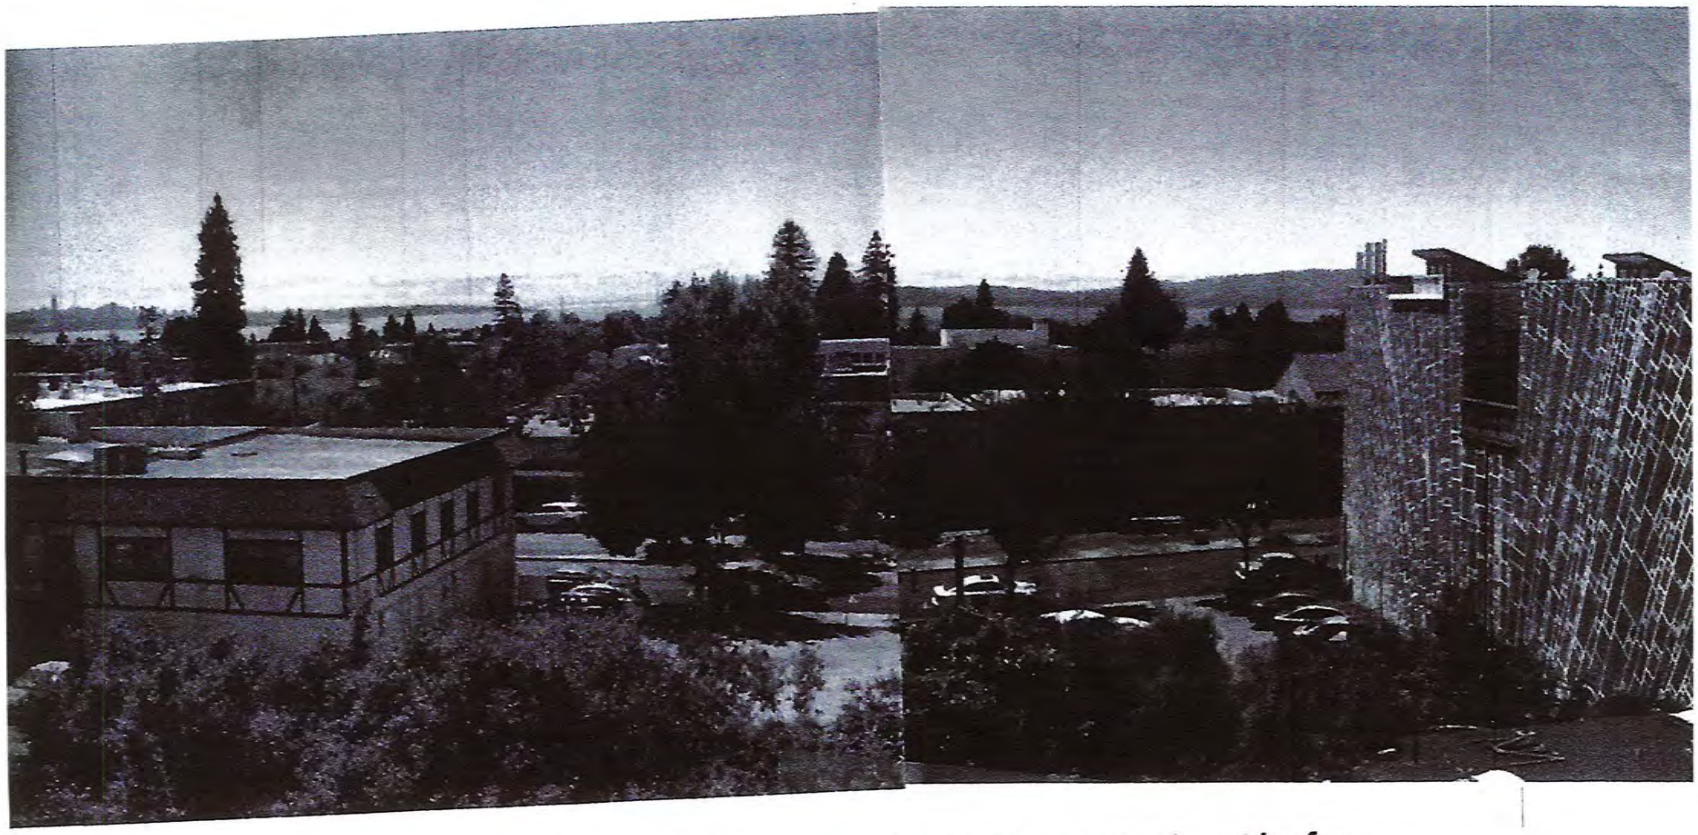
Wd Lant St
Residence

July 25, 2025

Elizabeth Scherer, 1636 Walnut Street, near Virginia Street
Resident for 46 years in this neighborhood, and former Commissioner

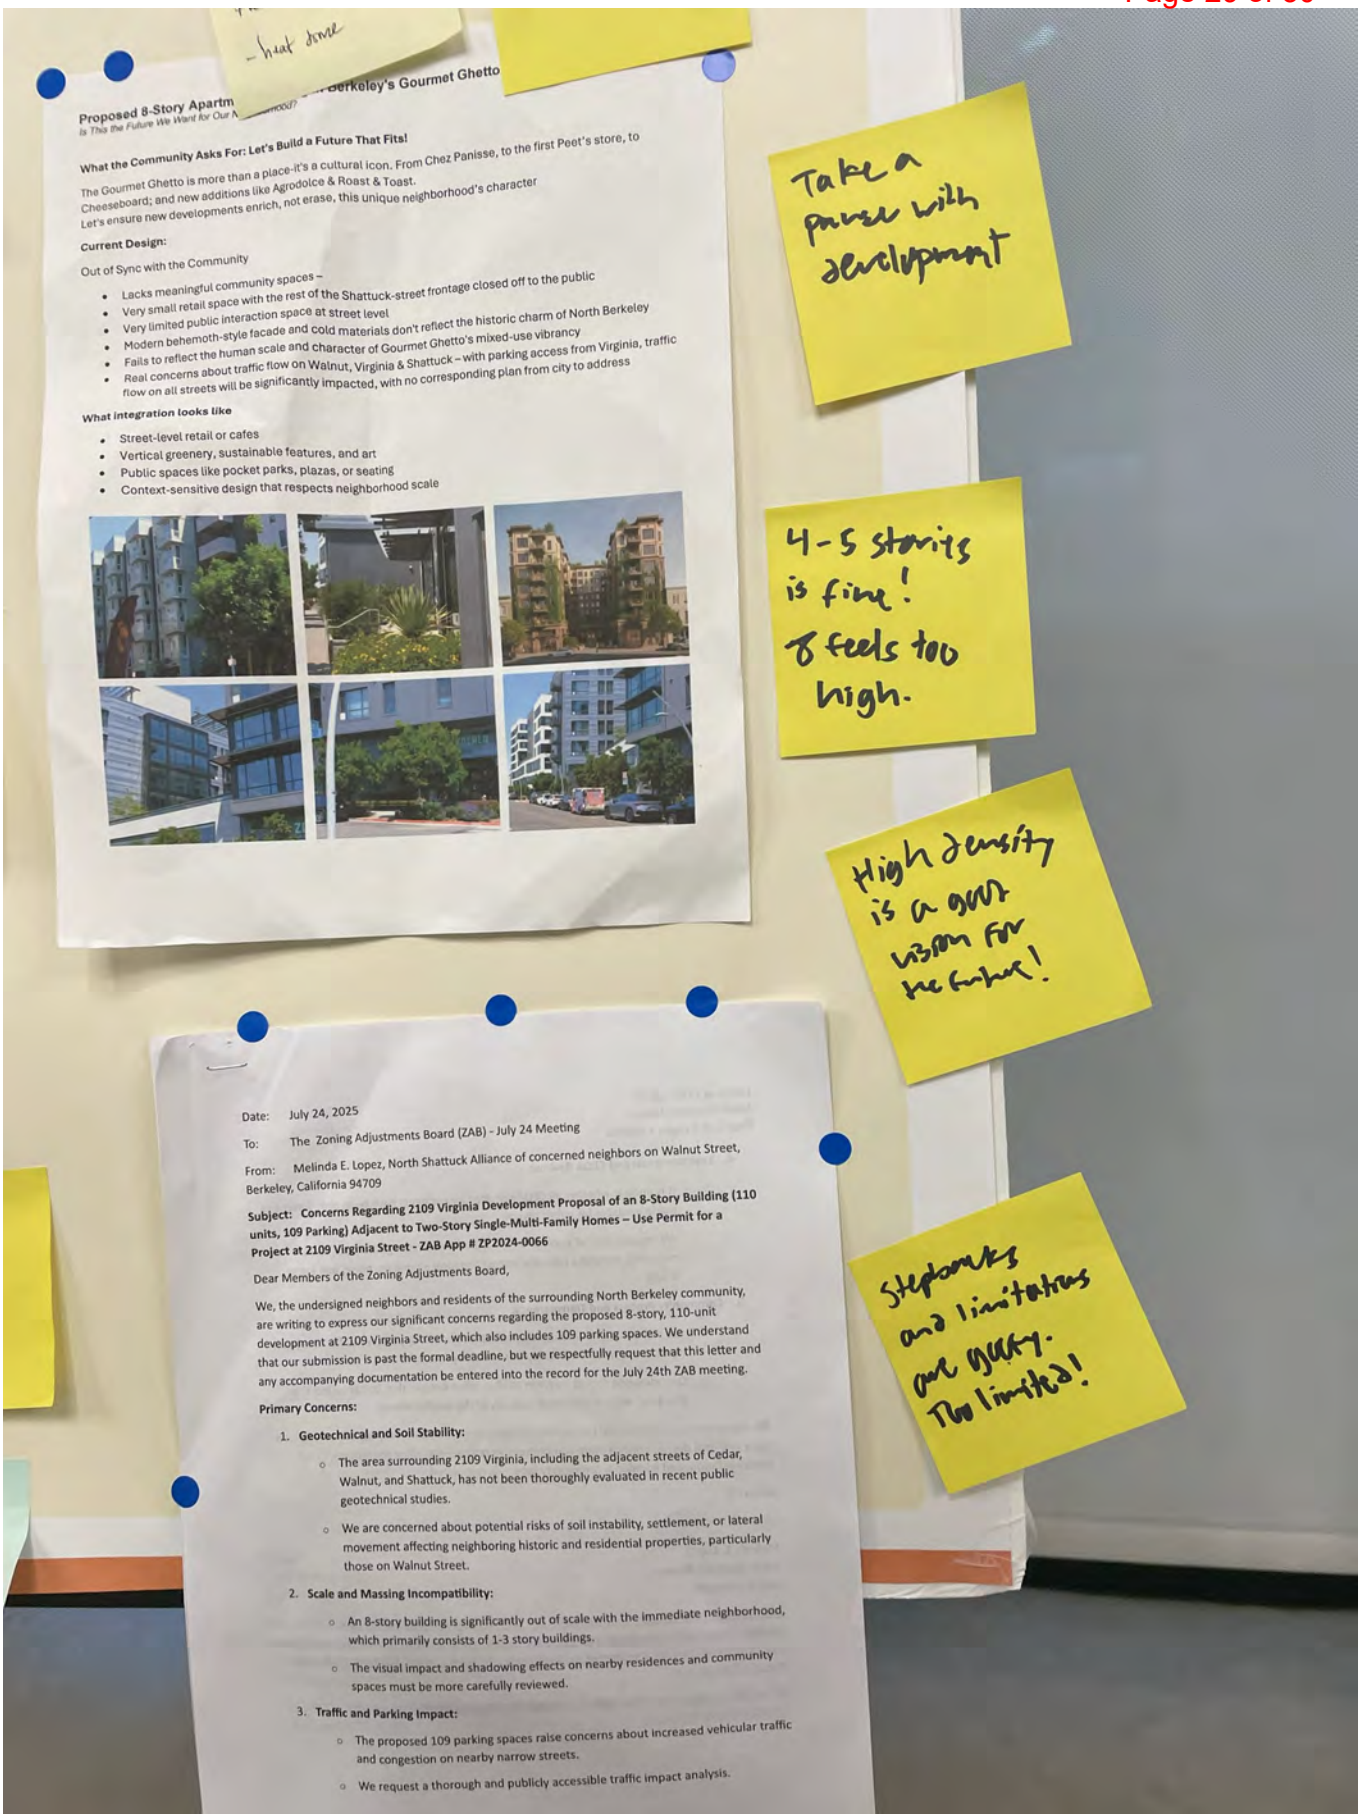
Many single-family homes in this area will be impacted. We are not downtown. We have mostly two to three story buildings. The blocking of the view will not only impact the residents close by with homes, but all homes on the north side. The Hills will see a large unattractive cement building sticking out like a tooth cutting their views. Those looking up will now have their views of the hills blocked as well.

We know that this new building will benefit from being in the attractive Gourmet Ghetto, but they will contribute nothing. It is a take, take, take situation. Let's not allow that to happen! Instead let's wait for a developer who comes in with plans for a beautiful 2 to 3-story building, adding shops, restaurants, and beautiful architecture like the historic Peets building. The developers boast they will have a coffee shop for the residents. That's it! No shops, restaurants, nothing to add. Who benefits from that? We already have two fabulous coffee shops on the block, the French café and the Guerilla Café and one block away is a big new coffee shop. What makes us bent on building these inappropriate complexes? The cities which have held out are now so happy they did. We should avoid any money transfer schemes coming at the expense of current residents. Living in the Gourmet Ghetto area is highly valued. Don't take away the beauty and specialness of the community. A seven or eight story is too high for any residential area and it is a travesty if it is right next to your home. It will reduce property values. Remember that often the initially presented plan is much different from the finalized project as the developers will continually take any advantage possible. There is potential for increased noise and shadows. Temperatures (global warming) will rise with more cement and a huge ugly high block of cement.



When we build, let us think that we build forever. Let it not be for present delight nor for present use alone. Let it be such work as our descendants will thank us for; and let us think, as we lay stone on stone, that a time is to come when those stones will be held sacred because our hands have touched them, and that men will say, as they look upon the labor and wrought substance of them, 'See! This our fathers did for us.

John Ruskin



Proposed 8-Story Apartm
Is This the Future We Want for Our N
Berkeley's Gourmet Ghetto
What the Community Asks For: Let's Build a Future That Fits!
The Gourmet Ghetto is more than a place-it's a cultural icon. From Chez Panisse, to the first Peet's store, to Cheeseboard; and new additions like Agrodolce & Roast & Toast.
Let's ensure new developments enrich, not erase, this unique neighborhood's character
Current Design:
Out of Sync with the Community
Lacks meaningful community spaces –
Very small retail space with the rest of the Shattuck-street frontage closed off to the public
Very limited public interaction space at street level
Modern behemoth-style facade and cold materials don't reflect the historic charm of North Berkeley
Fails to reflect the human scale and character of Gourmet Ghetto's mixed-use vibrancy
Real concerns about traffic flow on Walnut, Virginia & Shattuck – with parking access from Virginia, traffic flow on all streets will be significantly impacted, with no corresponding plan from city to address
What integration looks like
Street-level retail or cafes
Vertical greenery, sustainable features, and art
Public spaces like pocket parks, plazas, or seating
Context-sensitive design that respects neighborhood scale
Take a pause with development
4-5 stories is fine! 8 feels too high.
High density is a good vision for the future!
Stepbacks and limitations are good. Too limited!

Elizabeth Scherer, 1636 Walnut Street, Resident for 46 years in this neighborhood

Many single-family homes in this area will be impacted. We are not downtown. We have mostly two to three story buildings. The blocking of the view will not only impact the residents close by with homes, but all homes on the north side. Many will see a large unattractive cement building sticking out like a tooth cutting out their views. Those looking up from the flats or from the city will now have their views of the hills blocked as well.

We know this new building will benefit from being in the attractive Gourmet Ghetto, but what will they contribute? Nothing! It will detract! It's a take, take situation. Let's not allow that to happen! Instead, let's wait for a developer with plans for a beautiful 2 to 3-story building, adding shops, restaurants, and beautiful architecture like the historic Peets building. The developers boast a coffee shop for the residents. That's it! No shops, restaurants, nothing to add. Who benefits from that? We already have two fabulous coffee shops on the block, the French café and the Guerilla Café and one block away is a big new coffee shop. What makes us bent on building these inappropriate complexes? The cities which have held out are now so happy they did. We should avoid any money transfer schemes coming at the expense of current residents. Living in the Gourmet Ghetto area is highly valued. Don't take away the beauty and specialness of the community. A seven or eight story is too high for any residential area and it is a travesty if it is right next to your home. It will reduce property values. Remember that often the initially presented plan is much different from the finalized project as the developers will continually take any advantage possible. There is potential for increased noise and shadows. Temperatures (global warming) will rise with more cement and a huge ugly high block of cement.

Neighborhood Character: A 7-story or 8-story building can significantly alter the visual landscape and character of a neighborhood, potentially clashing with the existing scale and aesthetic of smaller buildings.

Infrastructure Strain: Increased density can strain existing infrastructure like water, sewer, and electrical systems. Traffic congestion and parking availability may also worsen.

Property Values: While some properties may benefit from increased demand, others, particularly those with views obstructed by the taller building, may see a decrease in value.

Shadows and Light: The taller building could cast long shadows, impacting sunlight access for surrounding properties and potentially affecting landscaping or solar panel efficiency.

Noise Pollution: Construction and occupancy of a larger building can lead to increase noise levels.

1.0 PROJECT INFORMATION

1. **Project Title:**

   2109 Virginia Street Project

2. **Lead Agency Name and Address:**

   City of Berkeley
   Planning and Development Department
   Land Use Planning Division
   1947 Center Street, 2nd Floor
   Berkeley, California 94704

3. **Contact Person and Phone Number:**

   Cecelia Mariscal, Associate Planner
   Email: cmariscal@berkeleyca.gov
   Phone: (510) 981-7439

4. **Project Location:**

   The project site is located at 2109 Virginia Street (Assessor's Parcel Number [APN] 058-2178-18) in Berkeley, Alameda County, California.

5. **Project Sponsor's Name and Address:**

   Trachtenberg Architects
   2421 Fourth Street
   Berkeley, California 94710
   Phone: (510) 649-1414

6. **General Plan Designation:**

   Neighborhood Commercial

7. **Zoning:**

   North Shattuck Commercial (C-NS)
   Multiple-Family Residential (R-4)
   Restricted Multiple-Family Residential (R-2A)

8. **Project Description:**

   The proposed project would include the demolition of the existing approximately 4,604-square-foot, two-story commercial building on the project site, and construction of a new eight-story mixed-use residential building consisting of 112,969 square feet of residential space and 690 square feet of commercial space in the southwest corner of the ground floor. The new mixed-use residential building would consist of a total of 110 dwelling units, including 9 very low-income units and 9 middle-income units. In addition, each unit would include a private balcony, providing a total of 3,240 square feet of private outdoor space. The proposed project also

includes a shared 4,912-square-foot courtyard area on the second floor for use by residents containing: 1,965 square feet of landscaped area; a shared 1,030-square-foot roof deck on the eighth floor, containing 412 square feet of landscaped area; a solar array on the roof; and 109 vehicle and 97 bicycle parking spaces. The ground floor would also include the residential lobby, the leasing office, the mail room, and a storage area. Landscaping would also be provided along the project site frontages on Shattuck Avenue and Virginia Street. Overall, the proposed project would provide a total of 9,182 square feet of usable open space and landscaped area. Refer to Section 3.0 for a complete description of the project.

9. Surrounding Land Uses and Setting:

The project site is generally surrounded by existing development, including single- and multi-family residential and commercial uses.

10. Other Public Agencies Whose Approval is Required (e.g., permits, financial approval, or participation agreements):

East Bay Municipal Utility District (EBMUD) regarding proposed utility connections.

b

2.0 INTRODUCTION

This consistency evaluation compares the potential environmental effects of the proposed 2109 Virginia Street Project (proposed project) with the scope of analysis and identified environmental impacts in the program-level Final Environmental Impact Report (EIR) for the 2023-2031 Housing Element Update (Housing Element),[1,2] certified on January 18, 2023 (Housing Element EIR) by the City of Berkeley (City). The purpose of this analysis is to determine whether the proposed project: (a) falls within the scope of the Housing Element EIR; (b) is consistent with the findings of the Housing Element EIR; and (c) would result in any potential impacts during project construction or operation that were not previously analyzed in the Housing Element EIR or that are unique or peculiar to the project site. This evaluation has been prepared pursuant to *State CEQA Guidelines* Sections 15183 and 15162. As discussed in Section 4.0 of this document and further explained in Sections 5.0 and 6.0, the proposed project is consistent with the Housing Element EIR and no new or more severe impacts would result. Therefore, a Notice of Determination (NOD) may be filed for the project.

2.1 PURPOSE OF STATE CEQA GUIDELINES SECTIONS 15183 AND 15162 CONSISTENCY ANALYSIS

This consistency analysis is prepared pursuant to *State CEQA Guidelines* Section 15183 (Projects Consistent with a Community Plan, General Plan, or Zoning), which provides that projects "consistent with the development density established by existing zoning, community plan, or general plan policies for which an EIR was certified shall not require additional environmental review, except as might be necessary to examine whether there are project-specific significant effects which are peculiar to the project or its site." These provisions streamline the review of such projects and reduce the need to prepare repetitive environmental studies.

Pursuant to *State CEQA Guidelines* Section 15183, the public agency shall limit its examination of environmental effects to those which the agency determines, in an Initial Study or other analysis:

1. Are peculiar to the project or the parcel on which the project would be located;
2. Were not analyzed as significant effects in a prior EIR on the zoning action, general plan, or community plan with which the project is consistent;
3. Are potentially significant off-site impacts and cumulative impacts which were not discussed in the prior EIR prepared for the general plan, community plan or zoning action; or
4. Are previously identified significant effects which, as a result of substantial new information not known at the time of EIR certification, are determined to have a more severe adverse impact than discussed in the prior EIR.

---

1 Berkeley, City of. 2022. *City of Berkeley 2023-2031 Housing Element Update Draft Environmental Impact Report, SCH No. 2022010331*. August.

2 Berkeley, City of. 2023. *City of Berkeley Housing Element Update 2023-2031*. January. Amended February 17, 2023.

In addition, in accordance with the California Environmental Quality Act (CEQA), as set forth in Public Resources Code (PRC) Section 21166 and *State CEQA Guidelines* Section 15162, no subsequent or supplemental EIR or other environmental analysis shall be required unless the lead agency determines, on the basis of substantial evidence in light of the whole record, one or more of the following:

1. Substantial changes are proposed in the project which will require major revisions of the previous EIR due to the involvement of new significant environmental effects or a substantial increase in the severity of previously identified significant effects;

2. Substantial changes occur with respect to the circumstances under which the project is undertaken which will require major revisions of the previous EIR due to the involvement of new significant environmental effects or a substantial increase in the severity of previously identified significant effects; or

3. New information of substantial importance, which was not known and could not have been known with the exercise of reasonable diligence at the time the previous EIR was adopted, shows any of the following:

    a. The project will have one or more significant effects not discussed in the previous EIR;

    b. Significant effects previously examined will be substantially more severe than shown in the previous EIR;

    c. Mitigation measures or alternatives previously found not to be feasible would in fact be feasible and would substantially reduce one or more significant effects of the project, but the project proponents decline to adopt the mitigation measure or alternative; or

    d. Mitigation measures or alternatives that are considerably different from those analyzed in the previous EIR would substantially reduce one or more significant effects on the environment, but the project proponents decline to adopt the mitigation measure or alternative (see *State CEQA Guidelines* Section 15162(a) and also PRC Section 21166).

2.2 PROJECT CONSISTENCY WITH A COMMUNITY PLAN, GENERAL PLAN, OR ZONING

On January 18, 2023, the City of Berkeley City Council approved the City's 2023-2031 Housing Element Update following certification of the Housing Element EIR. The Housing Element identifies the City's housing needs and outlines the specific goals, policies, and programs to address them. Importantly, the Housing Element quantifies how many new housing units the City needs to accommodate growth in the region as part of the Regional Housing Needs Assessment (RHNA). As part of the Housing Element, the City identified adequate land with appropriate zoning and development standards to accommodate the City's RHNA allocation (i.e., Opportunity Sites). The Opportunity Sites identified in the Housing Element include vacant or underutilized sites with near-term potential for residential or mixed-use development. The project site was identified as an Opportunity Site for residential development in the Housing Element. Refer to Section 3.3 of this document for additional information regarding the relationship between the proposed project and the City's General Plan.

3.0 PROJECT DESCRIPTION

The following section describes the proposed 2109 Virginia Street Project (proposed project) that is the subject of this consistency evaluation, which has been prepared pursuant to *State CEQA Guidelines* Section 15183 (Projects Consistent with a Community Plan or Zoning) and Section 15162 (Subsequent EIRs and Negative Declarations). The proposed project involves the construction of a new mixed-use residential building on a site that was identified as an Opportunity Site for residential development in the City of Berkeley (City) 2023-2031 Housing Element Update and in the City's 2023-2031 Housing Element Update Draft Environmental Impact Report (Housing Element EIR). The City of Berkeley is the lead agency for review of the proposed project under the California Environmental Quality Act (CEQA).

3.1 PROJECT SITE

The following section describes the project location, existing conditions, surrounding land uses, and the regulatory setting.

3.1.1 Project Location

The approximately 0.51-acre project site is located at 2109 Virginia Street (Assessor's Parcel Number [APN] 058-2178-18) in Berkeley, Alameda County, California. The project site is bounded by commercial uses to the north, single-family residential uses to the east, Virginia Street to the south, and Shattuck Avenue to the west.

Regional vehicular access to the project site is provided by Interstate 80 (I-80) and Interstate 580 (I-580) via University Avenue. Local access is provided primarily via Shattuck Avenue and Virginia Street. Shattuck Avenue is designated as a Major Street[3] in the City's General Plan. Transit in the project vicinity includes the extensive bus transit service provided by Alameda-Contra Costa County (AC) Transit, including Lines 7, 18, and FS, which provide service along Shattuck Avenue.[4] The closest bus stop is at Virginia Street and Shattuck Avenue, approximately 70 feet south of the project site.

Figure 3-1 shows the regional and local context of the project site.

3.1.2 Existing Conditions

The southwestern portion of the project site is currently developed with an approximately 4,604-square-foot, two-story commercial building. The remainder of the project site consists of a paved surface parking lot. Vegetation on the project site is limited to street trees along Shattuck Avenue.

Figure 3-2 depicts an aerial photograph of the project site and surrounding land uses.

[3] Major Streets serve the movement of automobiles, trucks, buses, pedestrians, and bicycles across the city, connecting to the regional transportation network, and to other jurisdictions.

This page intentionally left blank

3.1.3 Surrounding Land Uses

As shown on Figure 3-2, the project site is surrounded by existing development, including single- and multi-family residential and commercial uses. Virginia Street bounds the project site to the south, followed by the University Park Apartments complex, and Shattuck Avenue bounds the project site to the west. The Student Organic Garden is located approximately 0.04 mile southeast of the project site, across Virginia Street, and the Berkeley Arts Magnet School is located 0.04 mile west of the project site, across Shattuck Avenue.

3.1.4 Regulatory Setting

The City's General Plan designates the project site as Neighborhood Commercial. Areas designated as Neighborhood Commercial in the city are generally characterized by pedestrian-oriented, neighborhood-serving commercial development and multi-family residential structures. These areas are typically located on two-lane streets with on-street parking and transit, and the appropriate uses for these areas include local-serving commercial, residential, office, community service, and institutional.[5]

The project site is located within three zoning districts: (1) 19,788 square feet of the project site are in the North Shattuck Commercial (C-NS) zone; (2) 1,970 square feet are in the Multiple-Family Residential (R-4) zone; and (3) 584 square feet are in the Restricted Multiple-Family Residential (R-2A) zone. As outlined in Section 23.204.090 of the Berkeley Municipal Code (BMC), the purpose of the C-NS zone is to encourage the maintenance and establishment of retail and service activities that provide goods and services to serve the residents of the adjacent and outlying neighborhoods, provide locations for other activities compatible with these commercial activities, promote compatibility between such commercial areas and adjacent residential neighborhoods, and encourage an adequate commercial and residential mix along Shattuck Avenue.[6] As outlined in Sections 23.202.110 and 23.202.090 of the BMC, respectively, the purpose of the R-4 zone is to make available housing for persons who desire both convenience of location and a reasonable amount of usable open space. The purpose of the R-2A zone is to make available housing for persons who desire apartment-type accommodations with a maximum of open space.[7,8]

The project site has also been identified as an Opportunity Site for residential development in the City's 2023-2031 Housing Element Update.

3.2 PROPOSED PROJECT

The proposed project would demolish the existing 4,604-square-foot, two-story commercial building on site and would construct an eight-story mixed-use residential building consisting of 112,969 square feet of residential space and 690 square feet of commercial space in the southwest corner of

5 Berkeley, City of. 2001b. General Plan, Land Use Element. December 18.

7 Berkeley, City of. n.d. Berkeley Municipal Code, Chapter 23.202, Residential Districts, Section 23.202.110, R-4 Multi-Family Residential District.

8 Berkeley, City of. n.d. Berkeley Municipal Code, Chapter 23.202, Residential Districts, Section 23.202.090, R-2A Restricted Multiple-Family Residential District.

the ground floor. The proposed project is utilizing a 100 percent density bonus pursuant to the State Density Bonus Law and would include 110 dwelling units with a mix of 9 very low-income units and 9 middle-income units. As shown in Table 3.A, overall, the proposed project would include 14 studio units, 28 one-bedroom units, and 68 two-bedroom units. In addition, each unit would include a private balcony, providing a total of 3,240 square feet of private balcony space.

Table 3.A: Summary of Proposed Units

Floor	Studio	1-Bedroom	2-Bedroom	2-Bedroom + Office	Total Units
Ground Level	-	-	-	-	0

Eighth Floor	2	4	5	3	14
Total	**14**	**28**	**41**	**27**	**110**

Source: Trachtenberg Architects (2025)

In addition, the proposed project would include a shared 4,912-square-foot courtyard area on the second floor for use by residents, a shared 1,030-square-foot roof deck on the eighth floor, a solar array on the roof, and vehicle and bicycle parking spaces. The ground floor would also include the residential lobby, the leasing office, the mail room, and a storage area.

Figure 3-3 depicts the proposed floor plans for the proposed project, including for the ground level, second through seventh floors, eight floor, and the proposed roof plan.

3.2.1 Access and Parking

As shown on Figure 3-3, the proposed project would be accessed via a driveway from Shattuck Avenue that would provide access to the proposed garage on the ground floor. The proposed garage would provide up to 109 vehicle parking spaces for residents. The proposed project would also provide 97 bicycle parking spaces, including 59 secure bicycle parking spaces located in a bike room in the northeast corner of the project site.

In addition, a new curb ramp and crossing is proposed for the corner of Virginia Street and Shattuck Avenue. The proposed curb ramp and crossing would be constructed pursuant to City standards.

3.2.2 Open Space and Landscaping

As discussed above, the proposed project would include a shared 4,912-square-foot courtyard area on the second floor for use by residents, containing 1,965 square feet of landscaped area, and a shared 1,030-square-foot roof deck on the eighth floor, containing 412 square feet of landscaped area. The proposed courtyard area on the second floor would feature a variety of trees and other ornamental plan species and a central sitting nook. The roof deck on the eighth floor would feature landscaped vegetation, a gathering area, and a fire pit.

This page intentionally left blank

Landscaping would also be provided along the project site frontages on Shattuck Avenue and Virginia Street, as depicted on Figure 3-4. As shown on Figure 3-4, all but one of the existing street trees along Shattuck Avenue would be protected in place, and two new street trees would be planted along Virginia Street.

Overall, the proposed project would provide a total of 9,182 square feet of usable open space and landscaped area.

3.2.3 Utilities and Infrastructure

The project site is located in an urban area that is currently served by existing utilities, including water, sanitary sewer, storm drainage, electricity, gas, and telecommunications infrastructure. The proposed project would connect to the existing utility infrastructure in the surrounding area, including existing water and wastewater lines in Virginia Street and Shattuck Avenue.

Under existing conditions, stormwater from the project site is collected on site and discharged to stormwater infrastructure in the surrounding area. Upon construction of the proposed project, stormwater from the project site would be directed to the proposed vegetated areas and treated by flow-through planters (biotreatment) before being discharged to the existing stormwater infrastructure in the surrounding area, similar to existing conditions.

The proposed project would also include connections to the existing electricity and natural gas infrastructure in the surrounding area.

3.2.4 Demolition and Construction

Proposed project construction would include site preparation, installation of utilities, paving, building construction, landscaping, and architectural coating activities. The proposed project would be constructed over approximately 21 months, with construction anticipated to begin in March 2026. Construction of the proposed project is anticipated to require excavation to a maximum depth of 6 feet for construction of utilities, drainage facilities, and parking facilities. The entire 0.51-acre project site is anticipated to be disturbed during construction activities, and project construction would result in approximately 4,343 cubic yards of exported soil.

3.2.5 Project Approvals

The proposed project is subject to action by the City of Berkeley's Zoning Adjustments Board (ZAB). The proposed project would require the following discretionary entitlements from the City of Berkeley, per the BMC:

- Administrative Use Permit, pursuant to BMC 23.322.070(D)(1), for exceeding the parking maximum
- Administrative Use Permit, pursuant to BMC Section 23.326.070, to demolish a non-residential building
- Use Permit, pursuant to BMC 23.326.070(A), for demolition of a non-residential main building

This page intentionally left blank

FIGURE 3-4

NO SCALE

SOURCE: Trachtenberg Architects

I:\C\CBE1906.18\G\Proposed_Landscape_Plan.ai (5/14/2025)

2109 Virginia Street

Proposed Landscape Plan

This page intentionally left blank

- Use Permit, pursuant to BMC 23.204.020(A), for construction of a multi-family building
- Use Permit, pursuant to BMC 23.204.304(A), for construction of 2,000 square feet of new floor area

In addition, the project sponsor is requesting a waiver/modification of the height limit, building stories, lot coverage, building footprint, and setback development standards under the State Density Bonus Law (Government Code Section 65915(e)). This will be processed by the City in conjunction with the permits described above.

Proposed project development, if approved, would also be subject to the City of Berkeley's standard Conditions of Approval (COA), pursuant to BMC 23B.32.040.D and consistent with the findings made by ZAB for approval of the project and issuance of the requested Administrative Use Permit. Applicable COAs related to the protection of the environment are identified in Table 7.B in Section 7.0, Applicable Housing Element EIR Mitigation Measures and Regulatory Compliance Measures, and are summarized in the appropriate topical sections. Each COA is titled pursuant to the subject area it addresses.

While the City is the CEQA Lead Agency for the proposed project, other agencies also have discretionary authority related to the project or serve as a responsible and/or trustee agency in connection to the proposed project. The proposed project may also require approval from the East Bay Municipal Utility District (EBMUD) regarding proposed utility connections.

3.3 RELATIONSHIP TO CITY OF BERKELEY GENERAL PLAN

On January 18, 2023, the City of Berkeley City Council approved the City of Berkeley 2023-2031 Housing Element Update (Housing Element). The Housing Element identifies the City's housing needs and outlines the specific goals, policies, and programs to address them. Importantly, the Housing Element quantifies how many new housing units the City needs to accommodate growth in the region as part of the Regional Housing Needs Assessment (RHNA). As shown in Table 3.B below, the City of Berkeley must construct 8,934 new housing units by 2031 to meet its housing allocation. The proposed project represents approximately 1.2 percent of the total housing units.

Table 3.B: City of Berkeley RHNA for 2023-2031

	Extremely/Very Low Income	Low Income	Moderate Income	Above Moderate Income	Total
RHNA	2,446	1,408	1,416	3,664	8,934
Percent Total (%)	27.4	15.8	15.8	41.0	100.0

Source: 2023-2031 Housing Element Update (City of Berkeley 2023).
RHNA = Regional Housing Needs Assessment

As part of the Housing Element, the City identified adequate land with appropriate zoning and development standards to accommodate the City's RHNA allocation (i.e., Opportunity Sites). The Opportunity Sites identified in the Housing Element include vacant or underutilized sites with near-term potential for residential or mixed-use development.

The Housing Element was determined by the City Council to be in substantial compliance with State Housing Element Law on January 18, 2023. On February 28, 2023, the California Department of Housing and Community Development (HCD) also found the City's 2023-2031 Housing Element Update to be in substantial compliance with State Housing Element Law. An EIR was prepared for the Housing Element Update in August 2022 (SCH No. 2022010331), which was certified by the City Council on January 18, 2023 (Resolution No. 70,669-N.S).

4.0 CEQA ENVIRONMENTAL CHECKLIST

4.1 AESTHETICS

	Significant Impact Identified in Housing Element EIR	Project Contributes to Identified Housing Element EIR Impact	New or More Severe Significant Impact Peculiar to the Project	No Impact
Except as provided in Public Resources Code Section 21099, would the project:				
a. Have a substantial adverse effect on a scenic vista?	☐	☐	☐	☒
b. Substantially damage scenic resources, including, but not limited to, trees, rock outcroppings, and historic buildings within a state scenic highway?	☐	☐	☐	☒
c. In non-urbanized areas, substantially degrade the existing visual character or quality of public views of the site and its surroundings? (Public views are those that are experienced from a publicly accessible vantage point.) If the project is in an urbanized area, would the project conflict with applicable zoning and other regulations governing scenic quality?	☐	☐	☐	☒
d. Create a new source of substantial light or glare which would adversely affect day or nighttime views in the area?	☐	☐	☐	☒

4.1.1 Housing Element EIR Analysis

Section 4.1 of the 2023-2031 Housing Element Update Draft Environmental Impact Report (Housing Element EIR) analyzed potential impacts related to aesthetics. The Housing Element EIR determined that all impacts related to aesthetics would be less than significant, and no mitigation was prescribed. Although implementation of the Housing Element would alter the development pattern of the city such that scenic views of and from public viewpoints could be adversely affected, development pursuant to the 2023-2031 Housing Element Update (Housing Element) would occur on individual sites and would be limited.

In addition, the Housing Element EIR determined that most of the sites in the Housing Element that were identified for future development are located within a transit priority area (TPA), and aesthetic impacts in those areas cannot be considered to be significant impacts, pursuant to Senate Bill (SB) 743 (Public Resources Code [PRC] Section 21099). There are also no designated or eligible Scenic Highways in the city or with significant views of the city, and the Housing Element EIR determined that with compliance with existing regulations, including Berkeley Municipal Code (BMC) Sections 23.304.100 and 23.304.130, future development under the Housing Element would not conflict with applicable zoning and other regulations governing scenic quality or substantially add to existing light and glare in the city.

4.1.2 Project Impacts

PRC Section 21099(d) provides that, among other items, “aesthetics… impacts of a residential, mixed-use residential, or employment center project on an infill site within a transit priority area

shall not be considered significant impacts on the environment." Accordingly, aesthetics is no longer to be considered in determining if a project has the potential to result in significant environmental effects for projects that meet all of the following three criteria:

1. The project is residential, mixed-use residential, or an employment center.
2. The project is on an infill site.[9]
3. The project is in a transit priority area.[10]

The proposed project would result in the development of a new eight-story, mixed-use residential building containing a total of 110 dwelling units and approximately 690 square feet of commercial space on an infill site. Transit in the project vicinity includes the extensive bus transit service provided by Alameda-Contra Costa County Transit (AC Transit). The project site is located within a transit priority area because it is within 0.5 mile of several intersecting major bus routes, including Lines 7, 18, and FS. Line 7 provides bus service from the El Cerrito del Norte Bay Area Rapid Transit (BART) Transit Center to Downtown Berkeley, Line 18 provides bus service from University Village in Albany to the Lake Merritt BART Transit Center, and Line FS provides bus service from Solano Avenue and Colusa Street to the Salesforce Transit Center in San Francisco.[11] These lines provide service at a frequency of less than 15 minutes during the morning and afternoon peak commute periods. In addition, as shown on the Household VMT Per Capita and Home-Work VMT Per Worker maps in the *City of Berkeley Transportation VMT Criteria and Thresholds*,[12] the project site is located within a TPA.

Because the proposed project meets each of the above three criteria, aesthetic impacts are not required to be considered in determining the significance of project impacts under the California Environmental Quality Act (CEQA). Project elements that relate to changes to aesthetic conditions at the site and vicinity, such as proposed building heights, architecture, effects of new light and glare, etc., will be considered as part of the planning approval process, including through design review. In addition, the proposed project would be required to adhere to the City of Berkeley (City) standard Condition of Approval (COA) for Exterior Lighting, below, which requires all exterior lighting to be energy efficient where feasible, and shielded and directed downward and away from property lines to prevent excessive glare beyond the subject property.

> ***COA: Exterior Lighting*.** All exterior lighting shall be energy efficient where feasible; and shielded and directed downward and away from property lines to prevent excessive glare beyond the subject property.

---

9 PRC Section 21099(a) defines an "infill site" as a lot located within an urban area that has been previously developed, or a vacant site where at least 75 percent of the perimeter of the site adjoins, or is separated only by an improved public right-of-way from, parcels that are developed with qualified urban uses.

10 PRC Section 21099(a) defines a "transit priority area" as an area within 0.5 mile of an existing or planned major transit stop. A "major transit stop" is defined in Section 21064.3 of the California Public Resources Code as a rail transit station, a ferry terminal served by either a bus or rail transit service, or the intersection of two or more major bus routes with a frequency or service interval of 15 minutes or less during the morning and afternoon peak commute periods.

11 Alameda-Contra Costa County Transit (AC Transit). 2024. *Maps & Schedules.* Website: https://www.actransit.org/maps-schedules (accessed March 2025).

12 Berkeley, City of. 2020. *City of Berkeley Transportation VMT Criteria and Thresholds*. June 29.

The proposed project would have no impact, either individually or cumulatively, on aesthetics.

4.1.3 Conclusion

Given the above analysis, development of the proposed project would not change the conclusions of the Housing Element EIR, and there would be **no impact** peculiar to the proposed project or the project site related to aesthetics. Impacts related to aesthetics would remain less than significant as identified in the Housing Element EIR. No further environmental analysis related to this topic is required pursuant to Sections 15183 and 15162 of the *State CEQA Guidelines*.

4.2 AGRICULTURE AND FORESTRY RESOURCES

	Significant Impact Identified in Housing Element EIR	Project Contributes to Identified Housing Element EIR Impact	New or More Severe Significant Impact Peculiar to the Project	No Impact
In determining whether impacts to agricultural resources are significant environmental effects, lead agencies may refer to the California Agricultural Land Evaluation and Site Assessment Model (1997) prepared by the California Dept. of Conservation as an optional model to use in assessing impacts on agriculture and farmland. In determining whether impacts to forest resources, including timberland, are significant environmental effects, lead agencies may refer to information compiled by the California Department of Forestry and Fire Protection regarding the state's inventory of forest land, including the Forest and Range Assessment Project and the Forest Legacy Assessment project; and forest carbon measurement methodology provided in Forest Protocols adopted by the California Air Resources Board.				
Would the project:				
a. Convert Prime Farmland, Unique Farmland, or Farmland of Statewide Importance (Farmland), as shown on the maps prepared pursuant to the Farmland Mapping and Monitoring Program of the California Resources Agency, to non-agricultural use?	☐	☐	☐	☒
b. Conflict with existing zoning for agricultural use, or a Williamson Act contract?	☐	☐	☐	☒
c. Conflict with existing zoning for, or cause rezoning of, forest land (as defined in Public Resources Code Section 12220(g)), timberland (as defined by Public Resources Code Section 4526), or timberland zoned Timberland Production (as defined by Government Code Section 51104(g))?	☐	☐	☐	☒
d. Result in the loss of forest land or conversion of forest land to non-forest use?	☐	☐	☐	☒
e. Involve other changes in the existing environment which, due to their location or nature, could result in conversion of Farmland, to non-agricultural use or conversion of forest land to non-forest use?	☐	☐	☐	☒

4.2.1 Housing Element EIR Analysis

Section 1.6 of the Housing Element EIR discussed issues determined to have a less than significant impact due to the unique conditions of the city and were therefore not analyzed in further detail in the Housing Element EIR, including agricultural and forestry resources. The Housing Element EIR states that the city does not have agricultural or forest lands, and the City's General Plan and Zoning Map do not contain agricultural or forestry land designations. In addition, the Housing Element EIR determined that the city is classified as urban and built-up land under the California Department of Conservation's (DOC) Farmland Mapping and Monitoring Program (FMMP) and there is no Williamson Act contract land within the city.

4.2.2 Project Impacts

The project site and vicinity are located within an urban area of the city that does not contain prime farmland, unique farmland, or farmland of Statewide importance;[13] forest land; or land under a Williamson Act contract.[14] In addition, the area is not zoned for any agricultural uses. The proposed project would have no impact, either individually or cumulatively, on agricultural or forest resources.

4.2.3 Conclusion

Given the above analysis, development of the proposed project would not change the conclusions of the Housing Element EIR, and there would be **no impact** peculiar to the proposed project or the project site related to agricultural or forestry resources. Impacts on agricultural and forestry resources would remain less than significant as identified in the Housing Element EIR. No further environmental analysis related to this topic is required pursuant to Sections 15183 and 15162 of the *State CEQA Guidelines*.

4.3 AIR QUALITY

Where available, the significance criteria established by the applicable air quality management district or air pollution control district may be relied upon to make the following determinations.

	Significant Impact Identified in Housing Element EIR	Project Contributes to Identified Housing Element EIR Impact	New or More Severe Significant Impact Peculiar to the Project	No Impact
Would the project:				
a. Conflict with or obstruct implementation of the applicable air quality plan?	☐	☐	☐	☒
b. Result in a cumulatively considerable net increase of any criteria pollutant for which the project region is non-attainment under an applicable federal or state ambient air quality standard?	☐	☐	☐	☒
c. Expose sensitive receptors to substantial pollutant concentrations?	☐	☐	☐	☒
d. Result in other emissions (such as those leading to odors) adversely affecting a substantial number of people?	☐	☐	☐	☒

4.3.1 Housing Element EIR Analysis

Section 4.2 of the Housing Element EIR analyzed potential impacts related to air quality. The Housing Element EIR determined that all impacts related to air quality would either be less than significant or less than significant with incorporation of prescribed mitigation measures. The Housing Element EIR determined that implementation of the Housing Element would not conflict with the control measures within the 2017 Clean Air Plan, and the vehicle miles traveled (VMT) increase from implementation of the Housing Element would be less than the projected population increase. In addition, development facilitated by the Housing Element would not create objectionable odors that could affect a substantial number of people. Therefore, implementation of the Housing Element would not conflict with or obstruct implementation of applicable air quality plans or result in objectionable odors, and no mitigation was prescribed.

The Housing Element EIR also determined that construction facilitated by the Housing Element would temporarily increase air pollutant emissions, which would affect local air quality. However, implementation of Mitigation Measure AQ-1, which requires compliance with the current Bay Area Air District (Air District) basic control measures for reducing construction emissions of PM_{10}, and adherence to the City's COAs would reduce construction emissions such that impacts would be less than significant.

In addition, the Housing Element EIR determined that construction activities for individual projects facilitated by the Housing Element lasting longer than 2 months or located within 1,000 feet of sensitive receptors could expose sensitive receptors to substantial pollutant concentrations. Additionally, development facilitated by the Housing Element would site new sensitive land uses near Interstate 580/Interstate 80 (I-580/I-80), which may expose them to substantial pollutant concentrations. However, implementation of Mitigation Measure AQ-2, which requires construction

health risk assessments for projects where construction activities would occur within 1,000 feet of sensitive receptors, would last longer than 2 months and would not utilize Tier 4 and/or alternative fuel construction equipment. Mitigation Measure AQ-3, which details design features for residential development located within 1,000 feet of I-580/I-80 or on a lot that fronts on a section of roadway with 10,000 vehicles per day or more, would reduce this impact to less than significant.

4.3.2 Project Impacts

The information and analysis in this section is based on the Air Quality Analysis Technical Memorandum[15] prepared for the proposed project. This report is provided as Appendix A.

a) Would the project conflict with or obstruct implementation of the applicable air quality plan?

The applicable air quality plan is the Air District's 2017 Clean Air Plan, which defines control strategies to reduce emissions and ambient concentrations of air pollutants, safeguard public health by reducing exposure to air pollutants that pose the greatest heath risk (with an emphasis on protecting the communities most heavily affected by air pollution), and reduce greenhouse gas (GHG) emissions to protect the climate. Consistency with the 2017 Clean Air Plan can be determined if the project (1) supports the goals of the Clean Air Plan, (2) includes applicable control measures from the Clean Air Plan, and (3) would not disrupt or hinder implementation of any control measures from the Clean Air Plan.

Clean Air Plan Goals. The primary goals of the Air District's 2017 Clean Air Plan are to attain air quality standards, reduce population exposure and protect public health in the Bay Area, and reduce GHG emissions and protect the climate.

The Air District has established significance thresholds for project construction and operational impacts at a level at which the cumulative impact of exceeding these thresholds would have an adverse impact on the region's attainment of air quality standards. The health and hazards thresholds were established to help protect public health. As discussed below, construction and operation of the proposed project would not result in the generation of criteria air pollutants that would exceed Air District thresholds of significance after the implementation of mitigation. Therefore, the proposed project would not conflict with the 2017 Clean Air Plan goals.

Clean Air Plan Control Measures. The control strategies of the 2017 Clean Air Plan include measures in the following categories: Stationary Source Measures, Transportation Measures, Energy Measures, Building Measures, Agriculture Measures, Natural and Working Lands Measures, Waste Management Measures, Water Measures, and Super-GHG Pollutants Measures. The proposed project's compliance with each of these control measures is discussed below:

- **Stationary Source Control Measures:** The Stationary Source Control Measures, which are designed to reduce emissions from stationary sources such as metal melting facilities, cement kilns, refineries, and glass furnaces, are incorporated into rules adopted by the Air District and then enforced by the Air District Permit and Inspection programs. Since the proposed project

[15] LSA Associates, Inc. 2025. Air Quality Analysis Technical Memorandum for the 2109 Virginia Street Project. August 15.

would not include any of these stationary sources, the Stationary Source Control Measures of the 2017 Clean Air Plan are not applicable to the proposed project.

- **Transportation Control Measures:** The Air District identifies Transportation Control Measures as part of the 2017 Clean Air Plan to decrease emissions of criteria pollutants, toxic air contaminants (TACs), and GHGs by reducing demand for motor vehicle travel, promoting efficient vehicles and transit service, decarbonizing transportation fuels, and electrifying motor vehicles and equipment. The proposed project would construct a mixed-use residential building consisting of 110 dwelling units and 690 square feet of commercial space. The proposed project would locate residential uses within walking or bicycling distance to surrounding commercial shopping areas, thereby reducing the demand for travel by single-occupancy vehicles. The proposed project would also provide paved pedestrian pathways that would circle around the perimeter of the proposed development and that would provide access to Virginia Street and Shattuck Avenue, which would increase connectivity with the surrounding areas. In addition, existing bus stations and other high-quality transit services are within 0.5 mile of the project site along Shattuck Avenue (refer to Section 4.1.2). Therefore, the proposed project would support the ability to use alternative modes of transportation, would promote initiatives to reduce vehicle trips and vehicle miles traveled, and would increase the use of alternate means of transportation. Therefore, the proposed project would not conflict with the identified Transportation Control Measures of the 2017 Clean Air Plan.**Energy Control Measures:** The 2017 Clean Air Plan also includes Energy Control Measures, which are designed to reduce emissions of criteria air pollutants, TACs, and GHGs by decreasing the amount of electricity consumed in the Bay Area and decreasing the carbon intensity of the electricity used by switching to less GHG-intensive fuel sources for electricity generation. Since these measures apply to electrical utility providers and local government agencies (and not individual projects), the Energy Control Measures of the 2017 Clean Air Plan are not applicable to the proposed project.

- **Building Control Measures:** The Air District has authority to regulate emissions from certain sources in buildings such as boilers and water heaters but has limited authority to regulate buildings themselves. Therefore, the strategies in the Building Control Measures for this sector focus on working with local governments that do have authority over local building codes so as to facilitate adoption of best GHG control practices and policies. The proposed project would be required to comply with the latest Title 24 standards of the California Code of Regulations (CCR) regarding energy conservation and green building standards. Therefore, the proposed project would not conflict with any of the Building Control Measures.

- **Agriculture Control Measures:** The Agriculture Control Measures are designed to primarily reduce emissions of methane. Since the project does not include any agricultural activities, the Agriculture Control Measures of the 2017 Clean Air Plan do not apply to the proposed project.

- **Natural and Working Lands Control Measures:** The Natural and Working Lands Control Measures focus on increasing carbon sequestration on rangelands and wetlands and encouraging local governments to adopt ordinances that promote urban tree plantings. Since the proposed project does not include the disturbance of any rangelands or wetlands, the

Natural and Working Lands Control Measures of the Clean Air Plan do not apply to the proposed project.

- **Waste Management Control Measures:** The Waste Management Control Measures focus on reducing or capturing methane emissions from landfills and composting facilities, diverting organic materials away from landfills, and increasing waste diversion rates through efforts to reduce, reuse, and recycle. The proposed project would comply with local requirements for waste management (e.g., recycling and composting services). Therefore, the proposed project would be consistent with the Waste Management Control Measures of the 2017 Clean Air Plan.

- **Water Control Measures:** The Water Control Measures focus on reducing emissions of criteria pollutants, TACs, and GHGs by encouraging water conservation, limiting GHG emissions from publicly owned treatment works (POTW), and promoting the use of biogas recovery systems. Since these measures apply to POTWs and local government agencies (and not individual projects), the Water Control Measures are not applicable to the proposed project.

- **Super GHG Control Measures:** The Super-GHG Control Measures are designed to facilitate the adoption of best GHG control practices and policies through the Air District and local government agencies. Since these measures do not apply to individual projects, the Super-GHG Control Measures do not apply to the proposed project.

Clean Air Plan Implementation. As discussed above, the proposed project would generally implement the applicable measures outlined in the 2017 Clean Air Plan, including Transportation Control Measures. Therefore, the proposed project would not conflict with or obstruct implementation of the applicable air quality plan.

b) Would the project violate any air quality standard or contribute substantially to an existing or projected air quality violation?

The Air District is currently designated as a nonattainment area for State and federal ozone standards and federal particulate matter (PM) ambient air quality standards (AAQS). The Air District's nonattainment status is attributed to the region's development history. Past, present, and future development projects contribute to the region's adverse air quality impacts on a cumulative basis. By its very nature, air pollution is largely a cumulative impact. No single project is sufficient in size to, by itself, result in nonattainment of AAQS. Instead, a project's individual emissions contribute to existing cumulatively significant adverse air quality impacts. If a project's contribution to the cumulative impact is considerable, then the project's impact on air quality would be considered significant.

In developing thresholds of significance for air pollutants, the Air District considered the emission levels for which a project's individual emissions would be cumulatively considerable. If a project exceeds the identified significance thresholds, its emissions would be cumulatively considerable, resulting in significant adverse air quality impacts to the region's existing air quality conditions. Therefore, additional analysis to assess cumulative impacts is unnecessary. The following analysis assesses the potential project-level construction- and operation-related air quality impacts.

Construction Emissions. During construction, short-term degradation of air quality may occur due to the release of particulate emissions generated by demolition, grading, building, paving, and other activities. Emissions from construction equipment are also anticipated and would include carbon monoxide (CO), nitrogen oxides (NO_X), reactive organic gases (ROGs), directly emitted particulate matter (particulate matter less than 2.5 microns and 10 microns in size [$PM_{2.5}$ and PM_{10}, respectively]), and toxic air contaminants (TACs) (e.g., diesel exhaust particulate matter [DPM]).

Project construction activities would include demolition, site preparation, grading, building, paving, and architectural coating (painting). Construction-related effects on air quality from the proposed project would be greatest during demolition, grading, and site preparation phases due to the disturbance of soils. If not properly controlled, these activities would temporarily generate particulate emissions. Sources of fugitive dust would include disturbed soils at the construction site. Unless properly controlled, vehicles leaving the site would deposit dirt and mud on local streets, which could be an additional source of airborne dust after it dries. PM_{10} emissions would vary from day to day, depending on the nature and magnitude of construction activity and local weather conditions. PM_{10} emissions would depend on soil moisture, silt content of soil, wind speed, and the amount of operating equipment. Larger dust particles would settle near the source, while fine particles would disperse over greater distances from the construction site.

Water or other soil stabilizers can be used to control dust, resulting in emission reductions of 50 percent or more. The Air District has established standard measures for reducing fugitive dust emissions (PM_{10}). With the implementation of these basic best management practices (BMPs), fugitive dust emissions from construction activities would not result in adverse air quality impacts. In addition, the City of Berkeley has established *COA: Public Works – Implement Air District-Recommended Measures During Construction*, which requires the implementation of the Air District's basic BMPs.

In addition to dust-related PM_{10} emissions, heavy trucks and construction equipment powered by gasoline and diesel engines would generate CO, NO_X, ROGs, and some soot particulate ($PM_{2.5}$ and PM_{10}) in exhaust emissions. If construction activities were to increase traffic congestion in the area, CO and other emissions from traffic would increase slightly while those vehicles idle in traffic. These emissions would be temporary in nature and limited to the immediate area surrounding the construction site.

The California Emissions Estimator Model (CalEEMod) was used to calculate emissions from on-site construction equipment and emissions from worker and vehicle trips to the site. Construction-related emissions are presented in Table 4.3.A, below.

Table 4.3.A: Project Construction Emissions

Project Construction	Average Daily Pollutant Emissions (lbs/day)					
	ROGs	NO_X	Exhaust PM_{10}	Fugitive Dust PM_{10}	Exhaust $PM_{2.5}$	Fugitive Dust $PM_{2.5}$
2026	0.3	6.4	0.2	0.6	0.2	0.2
2027	4.8	7.3	0.3	0.6	0.2	0.1
Maximum Average Daily Emissions	**4.8**	**7.3**	**0.3**	**0.6**	**0.2**	**0.2**
Air District Thresholds	**54.0**	**54.0**	**82.0**	**BMP**	**54.0**	**BMP**
Exceeds Threshold?	**No**	**No**	**No**	**No**	**No**	**No**

Source: Compiled by LSA (August 2025).
Air District = Bay Area Air District
BMP = best management practice
lbs/day = pounds per day
NO_X = nitrogen oxides
$PM_{2.5}$ = particulate matter 2.5 microns or less in size
PM_{10} = particulate matter 10 microns or less in size
ROGs = reactive organic gases

As shown in Table 4.3.A, construction emissions associated with the project would not exceed the Air District's thresholds for ROGs, NO_X, CO, exhaust PM_{10}, and exhaust $PM_{2.5}$ emissions. In addition to the Air District regulations, the City requires the implementation of *COA: Public Works – Implement Air District-Recommended Measures During Construction*, which are consistent with the Air District's requirements for fugitive dust impacts. The City also requires the implementation of *COA: Air Quality – Diesel Particulate Matter Controls During Construction* to require cleaner construction equipment for projects with construction lasting more than 2 months. With implementation of these COAs, which are outlined below, construction impacts would be less than significant.

> ***COA: Public Works – Implement Air District-Recommended Measures During Construction.*** For all proposed projects, Air District recommends implementing all the Basic Best Management Practices, listed below to meet the best management practices threshold for fugitive dust:
>
> - All exposed surfaces (e.g., parking areas, staging areas, soil piles, graded areas, and unpaved access roads) shall be watered two times per day.
> - All haul trucks transporting soil, sand, or other loose material off site shall be covered.
> - All visible mud or dirt tracked-out onto adjacent public roads shall be removed using wet power vacuum street sweepers at least once per day. The use of dry power sweeping is prohibited.
> - All vehicle speeds on unpaved roads shall be limited to 15 mph.
> - All roadways, driveways, and sidewalks to be paved shall be completed as soon as possible. Building pads shall be laid as soon as possible after grading unless seeding or soil binders are used.
> - Idling times shall be minimized either by shutting equipment off when not in use or reducing the maximum idling time to 5 minutes (as required by the California airborne

toxics control measure Title 13, Section 2485 of California Code of Regulations [CCR]). Clear signage shall be provided for construction workers at all access points.

- All construction equipment shall be maintained and properly tuned in accordance with manufacturer's specifications. All equipment shall be checked by a certified mechanic and determined to be running in proper condition prior to operation.
- A publicly-visible sign shall be posted with the telephone number and person to contact at the City of Berkeley regarding dust complaints. This person shall respond and take corrective action within 48 hours. The Air District's phone number shall also be visible to ensure compliance with applicable regulations.

COA: Air Quality – Diesel Particulate Matter Controls During Construction. All off-road construction equipment used for projects with construction lasting more than 2 months shall comply with one of the following measures:

a. The project applicant shall prepare a health risk assessment that demonstrates the project's on-site emissions of diesel particulate matter during construction will not exceed health risk screening criteria after a screening-level health risk assessment is conducted in accordance with current guidance from Air District and Office of Environmental Health Hazard Assessment (OEHHA). The health risk assessment shall be submitted to the Land Use Planning Division for review and approval prior to the issuance of building permits; or

b. All construction equipment shall be equipped with Tier 2 or higher engines and the most effective Verified Diesel Emission Control Strategies (VDECS) available for the engine type (Tier 4 engines automatically meet this requirement) as certified by the California Air Resources Board (CARB). The equipment shall be properly maintained and tuned in accordance with manufacturer specifications.

   In addition, a Construction Emissions Minimization Plan (Emissions Plan) shall be prepared that includes the following:

   - An equipment inventory summarizing the type of off-road equipment required for each phase of construction, including the equipment manufacturer, equipment identification number, engine model year, engine certification (tier rating), horsepower, and engine serial number. For all VDECS, the equipment inventory shall also include the technology type, serial number, make, model, manufacturer, CARB verification number level, and installation date.
   - A Certification Statement that the Contractor agrees to comply fully with the Emissions Plan and acknowledges that a significant violation of the Emissions Plan shall constitute a material breach of contract. The Emissions Plan shall be submitted to the Public Works Department for review and approval prior to the issuance of building permits.

The proposed project would be required to comply with the above City-required COAs, which are consistent with Housing Element EIR Mitigation Measure AQ-1, requiring compliance with the Air District's basic control measures for reducing construction emissions of PM_{10}. The Air District's Basic BMPs would be implemented during the construction period through compliance with the City's COA.

Also refer to Section 4.3.2.c, below, which discusses potential health risk impacts to sensitive receptors during project construction. In compliance with *COA: Air Quality – Diesel Particulate Matter Controls During Construction*, the proposed project would use at least Tier 2 equipment in conjunction with the most effective Verified Diesel Emission Control Strategies (VDECS) available for the engine type during project construction and will prepare a Construction Emission Minimization Plan. The City has determined that implementation of these measures reduce emissions to such an extent that sensitive receptors would not be exposed to substantial pollutant concentrations during project construction. As such, construction of the proposed project would not result in a cumulatively considerable net increase of any criteria pollutant for which the project region is in non-attainment under an applicable federal or State AAQS, and impacts would be less than significant.

Operational Emissions. Long-term air pollutant emission impacts are those associated with mobile sources (e.g., vehicle trips), energy sources (e.g., natural gas), and area sources (e.g., architectural coatings and the use of landscape maintenance equipment) related to the proposed project. Mobile source emissions include ROG and NO_X emissions that contribute to the formation of ozone. Additionally, PM_{10} emissions result from running exhaust, tire and brake wear, and the entrainment of dust into the atmosphere from vehicles traveling on paved roadways. Energy source emissions would generally result from activities in buildings for which natural gas is used. Typically, area source emissions consist of direct sources of air emissions located at the project site, including architectural coatings, consumer products, and the use of landscape maintenance equipment.

As discussed above, the Air District has developed screening criteria to provide lead agencies with a conservative indication of whether a proposed project would result in potentially significant air quality impacts. If all of the screening criteria are met by a proposed project, then the lead agency would not need to perform a detailed air quality assessment of the proposed project's emissions. These screening levels are generally representative without any form of mitigation measures taken into consideration. In addition, the screening criteria do not account for project design features, attributes, or local development requirements that could also result in lower emissions.

For operational criteria pollutants, the Air District screening size for Apartment Housing land uses is 638 units and for Strip Mall land uses is 204,000 square feet. The proposed project would construct a mixed-use residential building consisting of 110 dwelling units and 690 square feet of commercial space. Based on the Air District's screening criteria, operational activities associated with the proposed project are not anticipated to exceed established thresholds; therefore, operation of the proposed project would not result in a cumulatively considerable net increase of any criteria pollutant for which the project is in non-attainment under applicable federal or State AAQS. Impacts would be less than significant, and no mitigation is required.

Long-Term Microscale (CO Hot Spot) Analysis. Emissions and ambient concentrations of CO have decreased dramatically in the Bay Area with the introduction of the catalytic converter in 1975. No exceedances of the State or federal CO standards have been recorded at Bay Area monitoring stations since 1991. The Air District's CEQA Guidelines include recommended methodologies for quantifying concentrations of localized CO levels for proposed transportation projects. A screening level analysis using guidance from the Air District CEQA Guidelines was performed to determine the impacts of the proposed project. The screening methodology provides a conservative indication for

whether the implementation of a proposed project would result in significant CO emissions. According to the Air District's CEQA Guidelines, a proposed project would result in a less than significant impact to localized CO concentrations if the following screening criteria are met:

- The project is consistent with an applicable congestion management program established by the county congestion management agency for designated roads or highways, and the regional transportation plan and local congestion management agency plans.
- Project traffic would not increase traffic volumes at affected intersections to more than 44,000 vehicles per hour.
- The project would not increase traffic volumes at affected intersections to more than 24,000 vehicles per hour where vertical and/or horizontal mixing is substantially limited (e.g., tunnel, parking garage, bridge underpass, natural or urban street canyon, or below-grade roadway).

Implementation of the proposed project would not conflict with the policies or programs of the Alameda County Transportation Commission. Based on the size of the project, the proposed project did not meet the criteria for an evaluation of study area intersection or roadway segment level of service (LOS). The proposed project includes the construction of a parking garage; therefore, the applicable screening threshold would be 24,000 vehicles per hour (vph). The proposed project would generate 561 average daily trips, including 37 AM peak-hour trips and 36 PM peak-hour trips. Therefore, based on the average daily trips generated by the proposed project, it is anticipated that the project's contribution to peak-hour traffic volumes at intersections in the vicinity of the project site and within the parking garage would be well below 24,000 vph. As such, the CO concentrations are not expected to significantly increase as a result of the project, and the proposed project would not result in localized CO concentrations that exceed State or federal standards.

c) Would the project result in a cumulatively considerable net increase of any criteria pollutant for which the project region is non-attainment under an applicable federal or state ambient air quality standard (including releasing emissions which exceed quantitative thresholds for ozone precursors)?

Sensitive receptors are defined as people that have an increased sensitivity to air pollution or environmental contaminants. Sensitive receptor locations include schools, parks and playgrounds, daycare centers, nursing homes, hospitals, and residential dwelling units. The closest sensitive receptor to the project site includes a single-family home located immediately east of the project site at approximately 40 feet measured from the project eastern boundary to the residential building façade.

Construction Emissions. Construction activities can expose sensitive receptors to airborne particulates and fugitive dust as well as a small quantity of construction equipment pollutants (i.e., diesel-fueled vehicles and equipment). Construction contractors would be required to implement *COA: Public Works – Implement Air District-Recommended Measures During Construction*. Additionally, given the proximity of the nearby receptors, the City would also require implementation of *COA: Air Quality – Diesel Particulate Matter Controls During Construction* to

ensure the proposed project would not result in a significant health risk impact to nearby sensitive receptors.

As provided above, the Housing Element EIR prescribed Mitigation Measure AQ-2, which requires construction health risk assessments for projects where construction activities would occur within 1,000 feet of sensitive receptors, would last longer than 2 months, and would not utilize Tier 4 and/or alternative fuel construction equipment. The project sponsor has not prepared a health risk assessment; however, consistent with *COA: Air Quality – Diesel Particulate Matter Controls During Construction*, the proposed project would use at least Tier 2 equipment in conjunction with the most effective VDECS available for the engine type during project construction and will prepare a Construction Emission Minimization Plan. The City has determined that implementation of these measures reduce emissions to such an extent that sensitive receptors would not be exposed to substantial pollutant concentrations during project construction. Therefore, with implementation of *COA: Air Quality – Diesel Particulate Matter Controls During Construction*, project construction health risk impacts would be less than significant, and Housing Element EIR Mitigation Measure AQ-2 would not be applicable to the proposed project.

Operational Emissions. Land uses that have the potential to expose sensitive receptors to TACs include distribution centers, rail yards, ports, refineries, chrome plating facilities, dry cleaners, and large gas dispensing facilities. In addition, various commercial and industrial processes have the potential to emit TACs associated with the use of diesel-fueled trucks or equipment. The proposed project would construct a mixed-use residential building consisting of 110 dwelling units and 690 square feet of commercial space. The proposed project does not include any uses that would generate a substantial amount of DPM emissions from off-road equipment use or truck idling that would result in the generation of a substantial amount of TACs. In addition, as identified above, operational activities associated with the proposed project are not anticipated to exceed the Air District's established thresholds; thus, operation of the proposed project is not expected to have a significant impact on sensitive receptors. As such, once operational, the proposed project would not be a source of substantial emissions. The proposed project would not expose sensitive receptors to substantial levels of TACs.

In addition, because the project site is within 1,000 feet of a roadway with more than 10,000 vehicles per day (vpd) (i.e., Shattuck Avenue)[16], the proposed project would be required to implement Housing Element EIR Mitigation Measure AQ-3, which details design features for residential development located within 1,000 feet of I-580/I-80 or on a lot that fronts on a section of roadway with 10,000 vpd or more. Project design features would include installing a HVAC system with high efficiency particulate filters (HEPA), weatherproofed windows, and ongoing maintenance of the HVAC and infiltration systems. With implementation of Housing Element EIR Mitigation Measure AQ-3, impacts associated with exposing sensitive land uses to substantial pollutant concentrations would be less than significant.

16 City of Berkeley. 2001. Berkeley General Plan, Transportation Element. December 18.

d) Would the project result in other emissions (such as those leading to odors) adversely affecting a substantial number of people?

During construction, the various diesel-powered vehicles and equipment in use on site would create localized odors. These odors would be temporary and are not likely to be noticeable for extended periods of time beyond the project site.

Odor-generating land uses typically include wastewater treatment plants, landfills, and food manufacturing facilities. The proposed project would construct a mixed-use residential building consisting of 110 dwelling units and 690 square feet of commercial space. Therefore, the proposed land uses would not be considered potential generators of odor that could affect a substantial number of people. Additionally, the proposed uses that would be developed within the project site are not expected to produce any offensive odors that would result in frequent odor complaints. The proposed project would also include trash enclosures, which would reduce any potential for odors from project-related waste. Therefore, the proposed project would not result in other emissions (such as those leading to odors) adversely affecting a substantial number of people.

4.3.3 Conclusion

Given the above analysis, development of the proposed project would not change the conclusions of the Housing Element EIR, and there would be **no impact** peculiar to the proposed project or the project site related to air quality. Impacts related to air quality would remain less than significant with the incorporation of mitigation, as identified in the Housing Element EIR. No further environmental analysis related to this topic is required pursuant to Sections 15183 and 15162 of the *State CEQA Guidelines*.

f. Conflict with the provisions of an adopted Habitat Conservation Plan, Natural Community Conservation Plan, or other approved local, regional, or state habitat conservation plan?	☐	☐	☐	☒

4.4.1 Housing Element EIR Analysis

Section 4.3 of the Housing Element EIR analyzed potential impacts related to biological resources. The Housing Element EIR determined that all impacts on biological resources would either be less than significant or no impact would occur. No mitigation measures were prescribed because future development would be subject to the policies contained in the City's General Plan, including Policies EM-1, EM-3, and EM-5, which encourage the City to adopt and implement environmental management programs, promote the City's environmental management and sustainability policies and programs and encourage other cities in the region to establish similar or better policies and programs, and promote and encourage compliance with "green" building standards, as well as the City's *COA: Nesting Birds*, which prohibits vegetation removal during the general avian nesting season (February 1 to August 31) and requires that preconstruction nesting bird surveys be performed.

In addition, future development projects would also be subject to State and federal laws, regulations, and management policies regarding biological resources (e.g., federal Endangered

Species Act [FESA]) and would be reviewed to determine whether their impacts fall within the scope of the Housing Element EIR, or if additional site-specific environmental review will be required. Therefore, the Housing Element EIR determined that potential impacts on special-status species would be less than significant. In addition, the Housing Element EIR indicated that although some riparian areas may occur within or adjacent to the city, the specific development areas identified in the Housing Element are in already developed urban areas and no impacts to riparian areas are anticipated. The Housing Element EIR determined that the majority of the housing opportunity sites are located on infill sites that are already developed with structures and/or parking and are not proximate to wetlands or waterways. For development that would occur in these areas, Berkeley's creek protection ordinance (BMC Chapter 17.08) and permitting pursuant to Section 404/401 of the Clean Water Act (CWA), Section 1600 *et seq.* of the California Fish and Game Code, and the Porter-Cologne Water Quality Control Act would be required. Therefore, the Housing Element EIR determined that compliance with these existing regulations would ensure impacts to wetlands would be less than significant.

In addition, the Housing Element EIR determined that impacts related to migratory corridors and inconsistency with local policies or ordinances protecting biological resources would be less than significant with adherence to existing regulations, including General Plan Policies EM-28, EM-29, and EM-30, BMC Chapter 17.08, the City's bird safety requirements, and the City's Tree Ordinance (BMC No. 6,509-N-S).

4.4.2 Project Impacts

The 0.51-acre site is located in a highly urbanized area of Berkeley and situated among existing commercial and residential uses. Due to previous disturbance of the project site and the surrounding urban area, use of the project site by wildlife is expected to be limited. Vegetation on the project site is limited to street trees along Shattuck Avenue.

To establish existing conditions related to biological resources, the California Department of Fish and Wildlife (CDFW) California Natural Diversity Database (CNDDB)[17] was reviewed for lists of special-status species that have occurred or could occur within 0.5 mile of the project site.

Special-Status Plants and Wildlife. A total of six special-status wildlife species and two special-status plant species have CNDDB occurrences within 0.5 mile of the project site, as provided in Table 4.4.A.

Table 4.4.A: Special-Status Species Within 0.5 Mile of the Project Site

Species	Taxonomic Group	Status[1]
Animals		
Pallid bat (*Antrozous pallidus*)	Mammal	-/CSC
Hoary bat (*Lasiurus cinereus*)	Mammal	None[2]
Big free-tailed bat (*Nyctinomops macrotis*)	Mammal	-/CSC
Crotch's bumble bee (*Bombus crotchii)*	Insect	-/CE
Bridges' coast range shoulderband (*Helminthoglypta nickliniana bridgesi*)	Mollusk	None[2]

[17] California Department of Fish and Wildlife (CDFW). 2022. California Natural Diversity Database, commercial version dated April 30, 2022. Biogeographic Data Branch, Sacramento.

Table 4.4.A: Special-Status Species Within 0.5 Mile of the Project Site

Species	Taxonomic Group	Status[1]
Pacific walker (*Pomotiopsis californica*)	Mollusk	None[2]
Plants		
Dark eyed gilia (*Gilia millefoliata)*	Dicot	1B.2
Marin knotweed (*Polygonum marinense*)	Dicot	3.1

Source: Compiled by LSA (2025).

[1] Federal/State
CE = Candidate Endangered
CSC = California Species of Special Concern
1B.2 = Plants rare, threatened, or endangered in California and elsewhere; fairly threatened in California
3.1 = Plants moderately rare, threatened, or endangered in California

[2] This species is not listed on the Federal or State Endangered/Threatened Species list but is included on the State of California Natural Resources Agency Department of Fish and Wildlife CNDDB Special Animals List (April 2024).

CNDDB = California Natural Diversity Database

Riparian Habitat or Other Sensitive Natural Communities. The CNDDB contains no occurrences for sensitive natural communities within 0.5 mile of the project site. In addition, there are no sensitive natural communities or riparian habitat on the project site.

a) Would the project have a substantial adverse effect, either directly or through habitat modifications, on any species identified as a candidate, sensitive, or special-status species in local or regional plans, policies, or regulations, or by the California Department of Fish and Wildlife or U.S. Fish and Wildlife Service?

The proposed project would result in redevelopment of the project site with commercial and residential uses. The project site has negligible value as habitat for any species listed as endangered or threatened by the FESA or California Endangered Species Act (CESA). The site is entirely paved and developed with the on site building; therefore, none of the special-status plant species are expected to occur on the site. Similarly, no suitable habitat (e.g., streams, marshes, or chaparral) for most of the special-status wildlife in the area occurs on the site.

The existing building on the project site is not expected to provide habitat or roosting sites for bats due to the highly urbanized surrounding area and because it is not abandoned or vacant, which is usually where bats roost. Therefore, the demolition of the existing structure would not result in impacts on bat species.

The proposed project would develop the project site with a new eight-story building, which could increase the potential for bird strikes. However, the proposed project would be required to adhere to BMC Section 23.304.150, which details the City's bird safe building requirements. As stated in BMC Section 23.304.150, transparent or reflective material (e.g., windows) associated with future development of the project site would be required to either have an American Bird Conservancy Threat Factor Rating of 30 or less or undergo pattern glazing treatment. In addition, all panes with exterior screens, shutters, or shading devices would be required to be installed permanently over windows, structures, and building features such that there is no gap larger than 9 inches in any single dimension.

In addition, all native birds and their nests, regardless of their regulatory status, are protected by the California Fish and Game Code. If conducted during the breeding season (February through August), vegetation removal and other demolition or construction activities could directly impact nesting birds by removing trees and/or vegetation or structures that support active nests. Implementation of *COA: Avoid Disturbance of Nesting Birds* would ensure that potential impacts to special-status species would be less than significant.

> ***COA: Avoid Disturbance of Nesting Birds*.** Initial site disturbance activities, including vegetation and concrete removal, shall be prohibited during the general avian nesting season (February 1 to August 31), if feasible. If nesting season avoidance is not feasible, the applicant shall retain a qualified biologist to conduct a preconstruction nesting bird survey to determine the presence/absence, location, and activity status of any active nests on or adjacent to the project site. The extent of the survey buffer area surrounding the site shall be established by the qualified biologist to ensure that direct and indirect effects to nesting birds are avoided. To avoid the destruction of active nests and to protect the reproductive success of birds protected by the Migratory Bird Treaty Act and the California Fish and Game Code, nesting bird surveys shall be performed not more than 14 days prior to scheduled vegetation and concrete removal. In the event that active nests are discovered, a suitable buffer (typically a minimum buffer of 50 feet for passerines 250 feet for raptors) shall be established around such active nests and no construction shall be allowed inside the buffer areas until a qualified biologist has determined that the nest is no longer active (e.g., the nestlings have fledged and are no longer reliant on the nest). No ground-disturbing activities shall occur within this buffer until the qualified biologist has confirmed that breeding/ nesting is completed and the young have fledged the nest. Nesting bird surveys are not required for construction activities occurring between August 31 and January 31.

With adherence to all applicable City requirements, including BMC Section 23.304.150 and *COA: Avoid Disturbance of Nesting Birds*, potential impacts associated with special-status species would not occur.

b) Would the project have a substantial adverse effect on any riparian habitat or other sensitive natural community identified in local or regional plans, policies, regulations, or by the California Department of Fish and Wildlife or U.S. Fish and Wildlife Service?

The proposed project would not adversely affect any sensitive natural communities or riparian habitat, which is absent from the project site. There would be no impact to riparian habitats or sensitive natural communities.

c) Would the project have a substantial adverse effect on state or federally protected wetlands as defined by Section 404 of the Clean Water Act (including, but not limited to, marsh, vernal pool, coastal, etc.) through direct removal, filling, hydrological interruption, or other means?

According to the United States Fish and Wildlife Service (USFWS) National Wetlands Inventory,[18] no protected wetlands are present on the project site. The proposed project would have no impact related to State or federally protected wetlands.

d) Would the project interfere substantially with the movement of any native resident or migratory fish or wildlife species or with established native resident or migratory wildlife corridors, or impede the use of native wildlife nursery sites?

The project site is not located within a migratory wildlife movement corridor. Most of the species that likely use the site are "generalists" that are adept at moving through urban landscapes. However, trees, shrubs, other vegetation, and structures have the potential to support nests of many common native bird species. All native birds and their nests, regardless of their regulatory status, are protected by the California Fish and Game Code. If conducted during the breeding season (February through August), vegetation removal and other demolition or construction activities could directly impact nesting birds by removing trees and/or vegetation, or structures that support active nests. As discussed above under Section 4.4.a, implementation of *COA: Avoid Disturbance of Nesting Birds* would ensure that there would be no impacts to nesting birds.

e) Would the project conflict with any local policies or ordinances protecting biological resources, such as a tree preservation policy or ordinance?

BMC Section 12.44.020[19] protects certain trees, including street trees, within the city. As discussed above, street trees are present along Shattuck Avenue. The trees are considered protected trees under BMC Section 12.44.020. As shown on Figure 3-4, all but one of the existing street trees along Shattuck Avenue would be protected in place and two new trees would be planted along Virginia Street.

Construction of the proposed project would comply with the City's Tree Preservation Guidelines, including the establishment of a tree protection zone, tree protection fencing, adding irrigation and

[18] United States Fish and Wildlife Service (USFWS). *National Wetlands Inventory*. Website: https://fws primary.wim.usgs.gov/wetlands/apps/wetlands-mapper/ (accessed March 2025).

[19] BMC Section 12.44.020: It unlawful for any person to cut, trim, remove, mutilate, injure or in any way impair the growth of any tree, shrub or plant being or growing in or on any public property within the City, or to cause or permit the same to be done. Provided, however, that in the event that any person desires permission to cut, trim, remove or in any way impair the natural growth of any such tree, shrub or plant, application shall first be made to the Director of Recreation and Parks for a permit therefor. Upon receipt of such application, the Director of Recreation and Parks may cause an inspection to be made and may thereafter issue or refuse to issue a permit for such work. Provided, further, that whenever it is deemed necessary by the Director of Recreation and Parks, he may require the work specified in said application, or any part thereof, to be done under his supervision, and the cost of such supervision shall be borne by the project sponsor if so determined by the Director of Recreation and Parks.

mulch, and specifications for if any root pruning occurs. Further, the proposed project would replace the one removed street tree in accordance with the City's Tree Planting Location Standards.[20]

The proposed project would not conflict with any local policies or ordinances protecting biological resources, and no potential impacts to protected trees would occur.

f) Would the project conflict with the provisions of an adopted Habitat Conservation Plan, Natural Community Conservation Plan, or other approved local, regional, or state habitat conservation plan?

The project area is not subject to any adopted habitat conservation plan or natural community conservation plan. As such, the proposed project would not conflict with the provisions of an adopted Habitat Conservation Plan, Natural Community Plan, or other approved local, regional, or State habitat conservation plan, and no impact would occur.

4.4.3 Conclusion

Given the above analysis, development of the proposed project would not change the conclusions of the Housing Element EIR, and there would be **no impact** peculiar to the proposed project or the project site related to biological resources. Impacts on biological resources would remain less than significant as identified in the Housing Element EIR. No further environmental analysis related to this topic is required pursuant to Sections 15183 and 15162 of the *State CEQA Guidelines*.

[20] Berkeley, City of. 2022b. *Tree Planting Location Standards.* February.

4.5 CULTURAL RESOURCES

	Significant Impact Identified in Housing Element EIR	Project Contributes to Identified Housing Element EIR Impact	New or More Severe Significant Impact Peculiar to the Project	No Impact
Would the project:				
a. Cause a substantial adverse change in the significance of a historical resource pursuant to §15064.5?	☒	☐	☐	☐
b. Cause a substantial adverse change in the significance of an archeological resource pursuant to §15064.5?	☐	☐	☐	☒
c. Disturb any human remains, including those interred outside of formal cemeteries?	☐	☐	☐	☒

4.5.1 Housing Element EIR Analysis

Section 4.4 of the Housing Element EIR analyzed potential impacts related to cultural resources. The Housing Element EIR determined that potential impacts on archeological resources, including human remains, would be less than significant; however, impacts to historical resources were determined to be significant and unavoidable even with implementation of mitigation measures. The Housing Element EIR also identified a cumulatively considerable impact related to historical resources.

The Housing Element EIR determined that although development facilitated by the Housing Element could adversely affect identified and previously unidentified archeological resources, including human remains, adherence to the City's *COA: Archeological Resources* and *COA: Human Remains* would ensure impacts would be less than significant.

The Housing Element EIR also determined that future development facilitated by the Housing Element could result in the material impairment of a historical resource if demolition of a historical structure occurs as part of that future development. The City has adopted regulations that would apply to future development facilitated by the Housing Element, including the City's Landmarks Preservation Commission ordinance, which provides procedures for the local designation of historical resources. The ordinance also includes a provision for a permit review, which allows the Landmarks Preservation Commission to review and approve any construction, alteration, or demolition of a designated landmark, buildings in designated historic districts, and structures of merit. In addition, the Housing Element EIR prescribed Mitigation Measure CUL-1, which requires the City to conduct a citywide historic context statement and a cultural resource survey to identify historic resources, and Mitigation Measure CUL-2, which requires a historical resources assessment be prepared for projects that are subject to discretionary review when a historical-age building or structure that has not been previously evaluated is present. However, even with implementation of the prescribed mitigation measures, the Housing Element EIR determined that existing and eligible historical resources could still be materially impaired by future development because specific actions intended for the reduction of impacts to historical resources could be deemed infeasible. Therefore, the Housing Element EIR determined that impacts to historical resources would be significant and unavoidable.

4.5.2 Project Impacts

a) Would the project cause a substantial adverse change in the significance of a historical resource as defined in §15064.5?

The records search of the Northwest Information Center (NWIC) database indicates there is one potentially historic resource (i.e., the existing commercial building) located on the project site and one historic resource (i.e., a historic building located at 1540 Shattuck Avenue) within 0.25 mile of the project site. In addition, the NWIC record search results identified 10 cultural reports that have been previously conducted within the 0.25-mile study area and 18 previously conducted cultural reports have included a portion of the project site within their search radius.

Pursuant to Housing Element EIR Mitigation Measure CUL-2, a Historical Resources Evaluation (HRE) was prepared [21] to evaluate the existing structure's eligibility for listing in the California Register of Historical Resources (California Register) and whether the existing structure meets the criteria for designation as a City of Berkeley Landmark and/or Structure of Merit. This report was peer reviewed by LSA.

The HRE found that the existing structure, which was initially built in 1906, was remodeled several times, and various parts of the building are incongruous in form. As such, the building represents various architectural styles. In addition, the structure suffered a number of fires during its history, the last of which (in 1981) destroyed almost the entire building. Only the portion of the building fronting Shattuck Avenue was repaired/reconstructed, and it was given an entirely different architectural treatment than it previously had. The HRE did not find a significant connection to historically significant events or people. Therefore, the HRE concluded that the existing building does not appear eligible for listing in the California Register, or as a candidate Berkeley Landmark, or as a Structure of Merit due to a general lack of historical significance relating to events or people, which is exacerbated by its substantial loss of integrity and subsequent inability to represent any of its history prior to 1981.

Because no historical resources as defined by *State CEQA Guidelines* Section 15064.5(b)(2)(A)(B) are present at the project site, implementation of the proposed project would not cause a substantial adverse change in the significance of a historical resource.

b) Would the project cause a substantial adverse change in the significance of an archeological resource pursuant to §15064.5?

The search of the NWIC database indicates there are no previously recorded archeological cultural resources at the project site. Therefore, no archeological resources are currently known to exist on the project site. However, the proposed project would include excavation to a depth of approximately 6 feet below the ground surface. Ground-disturbing activities could have a substantial adverse change on unrecorded buried archeological deposits that qualify as historical resources, as defined in *State CEQA Guidelines* Section 15064.5, and could materially impair pre-

[21] Left Coast Architectural History. 2024. *Historical Resources Evaluation*. April 23.

contact archeological deposits. However, the proposed project would be required to comply with the City's *COA: Archeological Resources,* which addresses this potential impact.

> ***COA: Archeological Resources.*** *(Ongoing throughout demolition, grading, and/or construction).* Pursuant to CEQA Guidelines section 15064.5(f), "provisions for historical or unique archeological resources accidentally discovered during construction" should be instituted. Therefore:
>
> A. In the event that any prehistoric or historic subsurface cultural resources are discovered during ground disturbing activities, all work within 50 feet of the resources shall be halted and the project applicant and/or lead agency shall consult with a qualified archeologist, historian or paleontologist to assess the significance of the find.
>
> B. If any find is determined to be significant, representatives of the project proponent and/or lead agency and the qualified professional would meet to determine the appropriate avoidance measures or other appropriate measure, with the ultimate determination to be made by the City of Berkeley. All significant cultural materials recovered shall be subject to scientific analysis, professional museum curation, and/or a report prepared by the qualified professional according to current professional standards.
>
> C. In considering any suggested measure proposed by the qualified professional, the project applicant shall determine whether avoidance is necessary or feasible in light of factors such as the uniqueness of the find, project design, costs, and other considerations.
>
> D. If avoidance is unnecessary or infeasible, other appropriate measures (e.g., data recovery) shall be instituted. Work may proceed on other parts of the project site while mitigation measures for cultural resources is carried out.
>
> E. If significant materials are recovered, the qualified professional shall prepare a report on the findings for submittal to the Northwest Information Center.

Implementation of the appropriate procedures required by *COA: Archeological Resources* for the treatment of archeological resources and deposits would ensure that these resources are protected if encountered at the project site during construction by including stop work procedures in the event of a find as well as handling procedures. With this COA in place, the project would have no impact on archeological resources.

c) Would the project disturb any humans remains, including those interred outside of formal cemeteries?

No human remains have been identified at the project site; however, the proposed project would require excavation to a depth of approximately 5 feet below the ground surface. Ground-disturbing activities could disturb, and in turn have a substantial adverse change on, unrecorded human remains. However, the proposed project would be required to comply with the City's *COA: Human Remains*, which addresses this potential impact.

> ***COA: Human Remains.*** (*Ongoing throughout demolition, grading, and/or construction*). In the event that human skeletal remains are uncovered at the project site during ground-disturbing activities, all work shall immediately halt, and the Alameda County Coroner shall be contacted to evaluate the remains, and following the procedures and protocols pursuant to Section 15064.5 (e)(1) of the CEQA Guidelines. If the County Coroner determines that the remains are Native American, the City shall contact the California Native American Heritage Commission (NAHC), pursuant to subdivision (c) of Section 7050.5 of the Health and Safety Code, and all excavation and site preparation activities shall cease within a 50-foot radius of the find until appropriate arrangements are made. If the agencies determine that avoidance is not feasible, then an alternative plan shall be prepared with specific steps and timeframe required to resume construction activities. Monitoring, data recovery, determination of significance and avoidance measures (if applicable) shall be completed expeditiously.

Implementation of the appropriate procedures required under State law and by *COA: Human Remains* for the treatment of Native American remains would ensure that descendant communities have significant input in the treatment and final disposition of human remains, if encountered at the project site during construction. With these regulations and conditions of approval in place, the project would have no impact on human remains, including those interred outside of formal cemeteries.

4.5.3 Conclusion

Given the above analysis, development of the proposed project would not change the conclusions of the Housing Element EIR, and there would be **no impact** peculiar to the proposed project or the project site related to cultural resources, including historical resources. Impacts on archeological resources would remain less than significant, and impacts on historical resources would remain significant and unavoidable as identified in the Housing Element EIR. Because the proposed project would result in no impact on historic resources, the proposed project would not contribute to, exacerbate, or increase the significant unavoidable impact identified in the Housing Element EIR. No further environmental analysis related to this topic is required pursuant to Sections 15183 and 15162 of the *State CEQA Guidelines*.

4.6 ENERGY

	Significant Impact Identified in Housing Element EIR	Project Contributes to Identified Housing Element EIR Impact	New or More Severe Significant Impact Peculiar to the Project	No Impact
Would the project:				
a. Result in a potentially significant environmental impact due to wasteful, inefficient, or unnecessary consumption of energy resources during project construction or operation?	☐	☐	☐	☒
b. Conflict with or obstruct a state or local plan for renewable energy or energy efficiency?	☐	☐	☐	☒

4.6.1 Housing Element EIR Analysis

Section 4.5 of the Housing Element EIR analyzed potential impacts related to energy. The Housing Element EIR determined that all impacts related to energy would be less than significant, and no mitigation was prescribed. The Housing Element EIR determined that although construction and operation of future development facilitated by the Housing Element would require temporary and long-term consumption of energy resources, future development would not result in the wasteful, inefficient, or unnecessary consumption of energy resources with adherence to State and local regulations. In addition, the Housing Element EIR determined that the Housing Element would be consistent with the State plans and General Plan policies related to energy efficiency and utilizing renewable energy.

4.6.2 Project Impacts

a) Would the project result in a potentially significant environmental impact due to wasteful, inefficient, or unnecessary consumption of energy resources during project construction or operation?

Construction Energy Use. The anticipated construction schedule assumes that construction of the proposed project would begin in March 2026 and last for approximately 21 months. The proposed project would require demolition, grading, site preparation, and building activities during construction.

Proposed project construction would require energy for the manufacture and transportation of building materials, preparation of the site for grading activities, and building construction. Petroleum fuels (e.g., diesel and gasoline) would be the primary sources of energy for these activities. To increase energy efficiency on the site during project construction, idling times would be restricted to 5 minutes or less and construction workers would be required to shut off idle equipment, as required by *COA: Public Works – Implement Air District-Recommended Measures During Construction*. Energy usage on the project site during construction would be temporary in nature and would be relatively small in comparison to the State's available energy sources.

Operational Energy Use. Typically, energy consumption is associated with fuel used for vehicle trips and electricity and natural gas use.

The proposed project would be required to comply with the latest California Energy Code and California Green Building Standards Code (CALGreen Code) standards, including any locally adopted amendments, and would include solar panels, which would help to reduce energy consumption. In 2018, SB 100 was passed, which committed California to generating all electricity from carbon-free sources by 2045. While the proposed project would include natural gas, the project would be required to comply with State building code requirements as Title 24 advances to implement the building decarbonization goals. In addition, the proposed project also would use new modern appliances and equipment, in accordance with the Appliance Efficiency Regulations (Title 20, CCR Sections 1601 through 1608). The expected energy consumption during operation of the proposed project would be consistent with typical usage rates for residential uses; however, energy consumption is largely a function of personal choice and the physical structure and layout of buildings. It can be assumed that implementation of the proposed project would result in additional energy demand in the project area; however, as the proposed project would be located in a primarily developed urban area, the proposed project is not expected to result in wasteful, inefficient, or unnecessary consumption of electricity or natural gas resources.

The proposed project would also result in energy usage associated with gasoline for project-related trips. The proposed project would generate a net increase of 436 average daily trips. Based on fuel consumption obtained from the California Air Resources Board (CARB) Emission Factor model (EMFAC2021), approximately 540.5 million gallons of gasoline and approximately 156.2 million gallons of diesel fuel will be consumed from vehicle trips in Alameda County in 2024. Therefore, based on the total fuel usage in Alameda County and the minimal increase in average daily trips, vehicle trips associated with the proposed project would negligibly increase the annual fuel use in Alameda County. Additionally, the project site is served by existing sidewalks along Shattuck Avenue and Virginia Street and is located within 0.5 mile of several intersecting major bus routes, including AC Transit Lines 7, 18, and FS. The proposed project would also provide 97 secure bicycle parking spaces for the proposed residential uses in a covered bike storage area. Therefore, the project would support the ability of residents and employees to use alternative modes of transportation. As such, fuel consumption associated with vehicle trips generated by project operations would not be considered inefficient, wasteful, or unnecessary in comparison to other similar developments in the region.

Given the location of the project and proposed improvements, implementation of the proposed project would not result in a substantial increase in electricity, natural gas, or transportation-related energy, such that it would result in a wasteful, inefficient, or unnecessary consumption of energy resources and there would be no impact.

b) Would the project conflict with or obstruct a state or local plan for renewable energy or energy efficiency?

In 2002, the State Legislature passed SB 1389, which required the California Energy Commission (CEC) to develop an integrated energy plan every 2 years for electricity, natural gas, and transportation fuels for the California Energy Policy Report. The plan calls for the State to assist in the transformation of the transportation system to improve air quality, reduce congestion, and increase the efficient use of fuel supplies with the least environmental and energy costs. To further this policy, the plan identifies a number of strategies, including assistance to public agencies and

fleet operators, in implementing incentive programs for zero-emission vehicles and their infrastructure needs, as well as encouragement of urban designs that reduce VMT and accommodate pedestrian and bicycle access.

The most recently adopted CEC energy report is the 2024 Integrated Energy Policy Report Update.[22] The 2024 Integrated Energy Policy Report Update provides the results of the CEC's assessments of a variety of energy issues facing California. Many of these issues will require action if the State is to meet its climate, energy, air quality, and other environmental goals while maintaining energy reliability and controlling costs. The 2024 Integrated Energy Policy Report Update covers a broad range of topics, including implementation of SB 350, integrated resource planning, distributed energy resources, transportation electrification, solutions to increase resiliency in the electricity sector, energy efficiency barriers faced by disadvantaged communities, demand response, transmission and landscape-scale planning, the California Energy Demand Preliminary Forecast, the preliminary transportation energy demand forecast, renewable gas (in response to SB 1383), updates on Northern California electricity reliability, natural gas outlook, and climate adaptation and resiliency.

Locally, the Berkeley City Council adopted a Climate Action Plan (CAP) in 2009 and has made additional commitments regarding renewable energy and energy efficiency including:

- 100 percent renewable electricity by 2035;
- Net-Zero Carbon Emissions by 2045 in alignment with Governor Brown's Executive Order B-55-18;
- Declaring a Climate Emergency and resolving to become a Fossil Fuel Free City; and the
- Cities Race to Zero Campaign: Committed to reducing emissions 60.5 percent from 2018 levels by 2030, an emission reduction target that reflects Berkeley's fair share of the 50 percent global reduction in carbon dioxide equivalent (CO_2e).

As indicated above, energy usage on the project site during construction would be temporary in nature. In addition, energy usage associated with operation of the proposed project would be negligible in comparison to the State's available energy sources, and energy impacts would be minimal at the regional level. Because California's energy conservation planning actions are conducted at a regional level and the project's total impact to regional energy supplies would be minor, the proposed project would not conflict with California's energy conservation plans as described in the CEC 2024 Integrated Energy Policy Report Update. As discussed above, while the proposed project would include natural gas, the proposed project would be required to comply with State building code requirements as Title 24 advances to implement building decarbonization goals. As such, the proposed project would not conflict with or obstruct a State or local plan for renewable energy or energy efficiency, and there would be no impact.

[22] California Energy Commission. 2024. *2024 Integrated Energy Policy Report Update.* Docket Number 24-IEPR-01.

4.6.3 Conclusion

Given the above analysis, development of the proposed project would not change the conclusions of the Housing Element EIR, and there would be **no impact** peculiar to the proposed project or the project site related to energy. Impacts related to energy would remain less than significant as identified in the Housing Element EIR. No further environmental analysis related to this topic is required pursuant to Sections 15183 and 15162 of the *State CEQA Guidelines*.

4.7.1 Housing Element EIR Analysis

Section 4.6 of the Housing Element EIR analyzed potential impacts related to geology and soils. The Housing Element EIR determined that all impacts related to geology and soils would either be less than significant or less than significant with incorporation of prescribed mitigation measures. The Housing Element EIR indicated that portions of the city are located within the Hayward Fault Zone and determined that development facilitated by the Housing Element would be subject to seismically induced ground shaking and other seismic hazards, including liquefaction and landslides, which could damage structures and result in loss of property and risk to human health and safety. However, the Housing Element EIR determined that implementation of State-mandated building standards and compliance with the Alquist-Priolo Act Earthquake Fault Act, the California Building Code (CBC), and the City's General Plan policies and actions (including Policies S-13A, S-13B, and S-14B) and BMC would ensure that impacts would be less than significant. The Housing Element EIR also determined that with adherence to existing laws and regulations and standard engineering practices, impacts related to soil erosion, the loss of soil, and expansive soils would also be less than significant. In addition, because the Housing Element would not include septic tanks or alternative

wastewater disposal systems, the Housing Element EIR determined that no impact related to septic tanks would occur.

The Housing Element EIR also determined that future development facilitated by the Housing Element could impact paleontological resources during construction ground-disturbing activities and prescribed Mitigation Measure GEO-1. Mitigation Measure GEO-1 details requirements for projects where ground disturbance below the level of prior disturbance and into native soils is proposed to occur in areas mapped as Pleistocene alluvial fan and fluvial deposits (Qpaf), Orinda Formation (Tor), or Knoxville Formation (Kjk). With implementation of Mitigation Measure GEO-1, the Housing Element EIR determined that potential impacts to paleontological resources would be less than significant.

4.7.2 Project Impacts

The California Geological Survey (CGS) mapped Seismic Hazard Zones that delineate areas susceptible to geologic hazards (including earthquakes, liquefaction, and landslides) that require additional investigation to determine the extent and magnitude of potential ground failure. According to the CGS, the project site is not located within any Seismic Hazard Zone.[23] However, as provided in the Housing Element EIR, the project site is underlain by soils classified as Urban land-Tierra complex, 2-5 percent slopes, which have a high potential for expansiveness. Therefore, as required by the CBC and the City's General Plan Action S-14B, a project-specific geotechnical evaluation would be required for the proposed project in order to provide geotechnical recommendations for development of proposed building foundations.

The City has adopted the 2022 CBC (CCR Title 24), with local amendments, which provides for stringent construction requirements on projects in areas of high seismic risk. The design and construction of the proposed project is required to conform with, or exceed, current best standards for earthquake resistant construction in accordance with the 2022 CBC (or more recent applicable code) and with the generally accepted standards of geotechnical practice for seismic design in Northern California.

a) Would the project expose people or structures to potential substantial adverse effects, including the risk of loss, injury, or death involving: (i) Rupture of a known earthquake fault, as delineated on the most recent Alquist-Priolo Earthquake Fault Zoning Map issued by the State Geologist for the area or based on other substantial evidence of a known fault? Refer to Division of Mines and Geology Special Publication 42. (ii) Strong seismic ground shaking? (iii) Seismic-related ground failure, including liquefaction? (iv) Landslides?

The California Supreme Court concluded in its *CBIA v. Air District* decision that "CEQA generally does not require an analysis of how existing environmental conditions will affect a project's future users or residents." With this ruling, CEQA no longer considers the impact of the environment on a project (e.g., the impact of existing seismic hazards on new project occupants) to be an environmental impact unless the project could exacerbate an existing environmental hazard. The proposed project

[23] California Geological Survey (CGS). 2021. *Earthquake Zones of Required Investigation*. September 23. Website: https://maps.conservation.ca.gov/cgs/EQZApp/app/. (accessed March 2025).

would not change existing seismic hazards and therefore would not exacerbate existing hazards related to surface fault rupture and seismic ground shaking. As such, the following discussions of seismic hazards are provided for informational purposes only.

Fault Rupture. Fault-rupture hazard results in ground breakage and displacement along fault traces during earthquakes. Fault rupture is generally expected to occur along active fault traces. Areas susceptible to fault rupture are delineated by the CGS Alquist-Priolo Earthquake Fault Zones and require specific geological investigations prior to development to reduce the threat to public health and safety and to minimize the loss of life and property posed by earthquake-induced ground failure. The project site is not located within or adjacent to an Alquist-Priolo Earthquake Fault Zone.[24] The closest fault zone to the project site is the Hayward Fault Zone, located approximately 0.7 mile east of the project site. As such, it is unlikely that active traces of the Hayward Fault are present within the project site, and the risk for a fault-rupture hazard to exist on the site is low. Therefore, the proposed project would not expose people or structures to potential substantial adverse effects, including the risk of loss, injury, or death involving rupture of a known earthquake fault.

Ground Shaking. Seismic ground shaking generally refers to all aspects of motion of the Earth's surface resulting from an earthquake and is normally the major cause of damage in seismic events. As previously discussed, the closest fault zone to the project site is the Hayward Fault Zone, located approximately 0.7 mile east of the project site. The extent of ground shaking is controlled by the magnitude and intensity of the earthquake, distance from the epicenter, and local geologic conditions. It is likely that the project site would experience strong ground shaking during the lifetime of the proposed project. The Association of Bay Area Governments (ABAG) published maps predicting ground-shaking intensities for various earthquake scenarios in the Bay Area. Three different scenarios were modeled for the Hayward Fault: (1) a moment-magnitude 7.1 earthquake on the northern segment, (2) a moment-magnitude 7.0 earthquake on the southern segment, and (3) a moment-magnitude 7.3 earthquake on the entire length of the Hayward Fault. Each of these models predicts extreme ground shaking in the vicinity of the site. The probability of a large earthquake on the Hayward Fault is believed to be high during the life of the proposed project.

The risk of ground shaking impacts is reduced through adherence to the design and materials standards set forth in the 2022 CBC. Therefore, compliance with the existing building codes, as described above, would ensure that potential impacts related to seismic ground shaking would be reduced to the extent feasible.

It is acknowledged that seismic hazards cannot be completely eliminated, even with site-specific geotechnical design and advanced building practices. However, the seismic design standards of the 2022 CBC are intended to prevent catastrophic building failure in the most severe earthquakes currently anticipated. Therefore, compliance with the existing building codes, described above, would ensure that people or structures would not be adversely affected by earthquake-induced ground shaking.

[24] California Department of Conservation (DOC). *DOC Maps: Geologic Hazards, Seismic Hazards Program: Alquist-Priolo Fault Hazard Zones*. Website: https://www.conservation.ca.gov/cgs/maps-data (accessed March 2025).

Seismic-Related Ground Failure and Liquefaction. Soil liquefaction is a phenomenon primarily associated with saturated soil layers located close to the ground surface. During ground shaking, these soils lose strength and acquire a "mobility" sufficient to permit both horizontal and vertical movements. Soils that are most susceptible to liquefaction are clean, loose, uniformly graded, saturated, fine-grained sands that lie relatively close to the ground surface. However, loose sands that contain a significant amount of fines (silt and clay) may also liquefy. According to the CGS, the project site is not located within a Seismic Hazard Zone for seismically-induced liquefaction.[25] In addition, final grading, foundation, and building plans must be designed in accordance with the 2022 CBC. These designs would include measures that would address, as necessary, the potential for differential settlement related to liquefaction. Therefore, compliance with the existing regulations would ensure that people or structures would not be adversely affected by liquefaction associated with ground shaking.

Landslides. Seismically-induced landslides occur as the rapid movement of large masses of soil on unstable slopes during an earthquake. According to the CGS, the project site is not located within a Seismic Hazard Zone for seismically-induced landslides.[26] Therefore, the proposed project would not expose people or structures to potential substantial adverse effects, including the risk of loss, injury, or death involving landslides.

Based on the analysis presented above, the proposed project would not expose people or structures to potential substantial adverse effects, including the risk of loss, injury, or death involving rupture of a known earthquake fault, strong seismic ground shaking, seismic-related ground failure, including liquefaction, or landslides.

b) Would the project result in substantial soil erosion or the loss of topsoil?

Soil erosion, which is discussed in detail in Section 4.10, Hydrology and Water Quality, could occur during project grading and construction. As discussed in Section 4.10, compliance with the City's *COA: Stormwater Requirements* and *COA: Public Works*, including implementation of BMPs that address soil erosion during construction, would ensure that potential impacts related to erosion of topsoil during construction would not occur.

The proposed project would replace all existing impervious surface area, resulting in no net change in the total impervious surface area at the project site. The remaining portion of the site would consist of pervious surface area, which would contain landscaping that would minimize on-site erosion by stabilizing the soil. Therefore, on-site erosion impacts would be minimal. Additionally, compliance with Municipal Regional Permit (MRP) requirements and standard conditions of approval require applicants to establish and maintain drainage patterns so as to not adversely affect adjacent properties and rights-of-way. For these reasons, potential on- and off-site erosion impacts during project operation would not occur.

[25] *Earthquake Zones of Required Investigation*. September 23. Website: https://maps.conservation.ca.gov/cgs/EQZApp/app/. (accessed March 2025).
[26] Ibid.

c) Would the project be located on a geologic unit or soil that is unstable, or that would become unstable as a result of the project, and potentially result in on- or off-site landslide, lateral spreading, subsidence, liquefaction or collapse?

As discussed above, the proposed project would not be susceptible to landslide or liquefaction because the project site is not located within a mapped landslide or liquefaction zone. In addition, the proposed project's required compliance with existing regulations, including the 2022 CBC, would reduce the potential risks to people and structures. Final grading, foundation, and building plans would be designed in accordance with the 2022 CBC (or more recent applicable code). Therefore, compliance with the existing regulations would ensure that the potential impacts associated with potential landslide, liquefaction, or lateral spreading would be less than significant.

Subsidence or collapse can result from the removal of subsurface water resulting in either catastrophic or gradual depression of the surface elevation of the project site. According to the Phase I Environmental Site Assessment (Phase I ESA)[27] prepared for the proposed project, the depth to groundwater at the project site is approximately 17 feet below ground surface (bgs). Construction of the proposed project is anticipated to require excavation to a maximum depth of 6 feet for construction of utilities, drainage facilities, and parking facilities. Based on the depth to groundwater at the project site and the maximum depth of excavation, groundwater dewatering is not anticipated to be required during construction. Potential impacts related to subsidence or soil collapse would not occur.

d) Would the project be located on expansive soil, as defined in Table 18-1-B of the Uniform Building Code (1994), creating substantial risks to life or property?

Expansive soils are characterized by the potential for shrinking and swelling as the moisture content of the soil decreases and increases, respectively. Shrink-swell potential is influenced by the amount and type of clay minerals present and can be measured by the percent change of the soil volume. Plasticity indexes greater than 15 usually indicate that a swelling problem may exist, and the swell percentage generally increases with the plasticity indexes.[28] In general, clays have a higher plasticity index, silts have a lower plasticity index, and soils with a plasticity index of 0 typically have little or no silt or clay.

According to the United States Department of Agriculture Natural Resource Conversation Service Web Soil Survey and the Housing Element EIR, the project site is entirely underlain by the Urban land-Tierra complex, 20 to 5 percent slopes.[29,30] The Urban land-Tierra complex typically consists of

---

27 ACC Environmental Consultants. 2024. *Phase I Environmental Site Assessment Report, 1685 Shattuck Avenue/2109 Virginia Street, ACC Project Number: 10230-001.00.* February 9.

28 Federal Highway Administration (FHWA). 1977. *An evaluation of expedient methodology for identification of potentially expansive soils.* Report No. FHWA-RD-77-94. June.

29 United States Department of Agriculture Natural Resource Conversation Service. 2023a. *Web Soil Survey.* Website: https://websoilsurvey.nrcs.usda.gov/app/WebSoilSurvey.aspx (accessed March 2025).

30 A "complex" consists of two or more soils or miscellaneous areas in such an intricate pattern or in such small areas that they cannot be shown separately on the maps. The pattern and proportion of the soils or miscellaneous areas are somewhat similar in all areas. Alpha-Beta complex, 0 to 6 percent slopes, is an example.

loam in the first 12 inches, clay between 12 to 32 inches bgs, and sandy clay loam between 32 and 60 inches bgs.[31] This complex is well to moderately drained, and the depth to restrictive feature (i.e., bedrock) is more than 80 inches.[32]

As discussed above, the project site is underlain by the Urban land-Tierra complex, which is considered to have a high potential for expansiveness, as provided in the Housing Element EIR. However, the proposed project would be required to comply with the 2022 CBC and the City's General Plan Action S-14B, which would require a project-specific geotechnical evaluation to ensure that impacts from development associated with implementation of the proposed project on expansive soil are minimized. In addition, final grading, foundation, and building plans would be designed in accordance with the 2022 CBC and would include measures to either: (1) excavate the existing fill materials susceptible to expansion and replace the materials with engineered fill or further evaluate the possible reuse of the materials as engineered fill; or (2) design foundations and other improvements to withstand the shrinking and swelling cycles of the soils without causing significant damage. These measures would be incorporated into the proposed project as conditions of approval. Compliance with the existing 2022 CBC would ensure that the potential impacts associated with expansive soils would not occur.

e) Would the project have soils incapable of adequately supporting the use of septic tanks or alternative wastewater disposal systems where sewers are not available for the disposal of waste water?

The project site would be served by a wastewater conveyance system maintained by the City and would not involve the use of septic tanks or alternative wastewater disposal systems. As such, the proposed project would have no impact related to septic tanks or alternative wastewater disposal systems.

f) Would the project directly or indirectly destroy a unique paleontological resource or site or unique geologic feature?

There are no identified paleontological resources or unique geologic features or sites within, or in the vicinity of, the project site. However, as provided in the Housing Element EIR, the project site is underlain by Pleistocene alluvial fan and fluvial deposits (Qpaf). As such, implementation of Housing Element EIR Mitigation Measure GEO-1 would be applicable to the proposed project.

Demolition, site preparation, and construction activities associated with the proposed project could adversely impact previously unidentified fossils. Such fossils, if present, could be identified during deep excavation. However, the proposed project would be required to implement Housing Element EIR Mitigation Measure GEO-1, which would require a qualified paleontologist to determine the project's potential to significantly impact paleontological resources, conduct a paleontological Worker Environmental Awareness Program (WEAP) training for construction personnel regarding

31 United States Department of Agriculture Natural Resource Conversation Service. 2023b. *Web Soil Survey, Report - Map Unit Description: 150 – Urban land-Tierra complex, 2 to 5 percent slopes.* Website: https://websoilsurvey.nrcs.usda.gov/app/WebSoilSurvey.aspx (accessed March 2025).

32 Ibid.

the appearance of fossils and procedures for notifying paleontological staff should fossils be discovered by construction staff, and monitor ground-disturbing construction activities. In addition, development projects that require a use permit are required to comply with the City's *COA: Paleontological Resources*, which requires that work be stopped in the event of an unanticipated discovery of a paleontological resource during construction. Implementation of Housing Element EIR Mitigation Measure GEO-1 and compliance with *COA: Paleontological Resources* would ensure that this impact would be less than significant because paleontological resources would be properly documented and protected if encountered during project construction.

> ***COA: Paleontological Resources.*** (Ongoing throughout demolition, grading, and/or construction). In the event of an unanticipated discovery of a paleontological resource during construction, excavations within 50 feet of the find shall be temporarily halted or diverted until the discovery is examined by a qualified paleontologist (per Society of Vertebrate Paleontology standards [SVP 1995,1996]). The qualified paleontologist shall document the discovery as needed, evaluate the potential resource, and assess the significance of the find. The paleontologist shall notify the appropriate agencies to determine procedures that would be followed before construction is allowed to resume at the location of the find. If the City determines that avoidance is not feasible, the paleontologist shall prepare an excavation plan for mitigating the effect of the project on the qualities that make the resource important, and such plan shall be implemented. The plan shall be submitted to the City for review and approval.

Implementation of the appropriate procedures required by Housing Element EIR Mitigation Measure GEO-1 and *COA: Paleontological Resources* for the treatment of paleontological resources would ensure that these resources are protected if encountered at the project site during construction by including stop work procedures in the event of a find as well as handling procedures.

4.7.3 Conclusion

Given the above analysis, development of the proposed project would not change the conclusions of the Housing Element EIR, and there would be **no impact** peculiar to the proposed project or the project site related to geology and soils. Impacts related to geology and soils would remain less than significant with incorporation of mitigation, as identified in the Housing Element EIR. No further environmental analysis related to this topic is required pursuant to Sections 15183 and 15162 of the *State CEQA Guidelines*.

4.8 GREENHOUSE GAS EMISSIONS

	Significant Impact Identified in Housing Element EIR	Project Contributes to Identified Housing Element EIR Impact	New or More Severe Significant Impact Peculiar to the Project	No Impact
Would the project:				
a. Generate greenhouse gas emissions, either directly or indirectly, that may have a significant impact on the environment?	☐	☐	☐	☒
b. Conflict with an applicable plan, policy or regulation adopted for the purpose of reducing the emissions of greenhouse gases?	☐	☐	☐	☒

4.8.1 Housing Element EIR Analysis

Section 4.7 of the Housing Element EIR analyzed potential impacts related to GHG emissions. The Housing Element EIR determined that all impacts related to GHG emissions would be less than significant, and no mitigation was prescribed. The Housing Element EIR determined that because GHG emissions from future development facilitated by the proposed project would not exceed the Air District's interpolated 2031 targets for annual emissions, future development would not directly or indirectly generate GHG emissions that would have a significant effect on the environment. In addition, the Housing Element EIR determined that implementation of the Housing Element would not conflict with GHG reduction goals and policies in the CARB 2017 Scoping Plan, Plan Bay Area 2050, the City's General Plan, or the City's CAP.

4.8.2 Project Impacts

GHGs are present in the atmosphere naturally, are released by natural sources, or are formed from secondary reactions taking place in the atmosphere. The gases that are widely seen as the principal contributors to human-induced global climate change are:

- Carbon dioxide (CO_2);
- Methane (CH_4);
- Nitrous oxide (N_2O);
- Hydrofluorocarbons (HFCs);
- Perfluorocarbons (PFCs); and
- Sulfur hexafluoride (SF_6).

Over the last 200 years, humans have caused substantial quantities of GHGs to be released into the atmosphere. These extra emissions are increasing GHG concentrations in the atmosphere and enhancing the natural greenhouse effect, which is believed to be causing global warming. While manmade GHGs include naturally occurring GHGs such as CO_2, CH_4, and N_2O, some gases, like HFCs, PFCs, and SF_6 are completely new to the atmosphere.

Certain gases, such as water vapor, are short-lived in the atmosphere. Others remain in the atmosphere for significant periods of time, contributing to climate change in the long term. Water

vapor is excluded from the list of GHGs above because it is short-lived in the atmosphere, and its atmospheric concentrations are largely determined by natural processes such as oceanic evaporation.

These gases vary considerably in terms of Global Warming Potential (GWP), a concept developed to compare the ability of each GHG to trap heat in the atmosphere relative to another gas. The GWP is based on several factors, including the relative effectiveness of a gas to absorb infrared radiation and length of time that the gas remains in the atmosphere ("atmospheric lifetime"). The GWP of each gas is measured relative to CO_2, the most abundant GHG. The definition of GWP for a particular GHG is the ratio of heat trapped by 1 unit mass of the GHG to the ratio of heat trapped by 1 unit mass of CO_2 over a specified time period. GHG emissions are typically measured in terms of pounds or tons of CO_2e.

a) Would the project generate greenhouse gas emissions, either directly or indirectly, that may have a significant impact on the environment?

This section describes the proposed project's construction- and operation-related GHG emissions and contribution to global climate change. The Air District did not address emission thresholds for construction in their CEQA Guidelines; however, the Air District encourages quantification and disclosure. The Housing Element EIR included a quantitative analysis of GHG emissions associated with development of residential units under the Housing Element. As the project site was identified as an Opportunity Site for residential development in the City's Housing Element, the proposed project's anticipated GHG emissions associated with project construction and operation were included in the GHG emissions analysis contained in the Housing EIR. Project specific construction and operational emissions for the proposed project are discussed in this section.

Construction Activities. Construction activities associated with the proposed project would produce combustion emissions from various sources. During construction, GHGs would be emitted through the operation of construction equipment and from worker and builder supply vendor vehicles, each of which typically use fossil-based fuels to operate. The combustion of fossil-based fuels creates GHGs such as CO_2, CH_4, and N_2O. Furthermore, CH_4 is emitted during the fueling of heavy equipment. Exhaust emissions from on-site construction activities would vary daily as construction activity levels change.

Implementation of the City's *COA: Public Works – Implement Air District-Recommended Measures During Construction*, as identified under Section 4.3.b, Air Quality, would reduce GHG emissions by reducing the amount of construction vehicle idling and by requiring the use of properly maintained equipment. This measure is implemented by the City and the Air District to ensure that GHG emissions would be less than significant. In addition, construction activities would be minimal, and GHG emissions generated during construction of the proposed project would be short term in nature, lasting only for the duration of the construction period. Since GHG emissions associated with construction activities would not represent a long-term source of GHG emissions and would cease once construction is completed, project construction impacts associated with GHG emissions would not occur.

Operational Emissions. Long-term GHG emissions associated with the proposed project would typically be generated from mobile sources (e.g., vehicle trips), area sources (e.g., maintenance activities and landscaping), indirect emissions from sources associated with energy consumption, waste sources (land filling and waste disposal), and water sources (water supply and conveyance, treatment, and distribution). Mobile-source GHG emissions would include project-generated vehicle trips to and from the project site. Area-source emissions would be associated with activities such as landscaping and maintenance on the project site. Energy source emissions would be generated at off-site utility providers from increased electricity demand generated by the proposed project. Waste source emissions generated by the proposed project include energy generated by transporting and managing project generated waste. In addition, water source emissions associated with the proposed project are generated by water supply and conveyance, water treatment, water distribution, and wastewater treatment.

The Housing Element EIR found that operational GHG emissions associated with development facilitated by the Housing Element would result in an increase of 1.7 MT of CO_2e per service population per year, below the interpolated Air District 2031 target of 3.7 MT of CO2e per service population per year. As such, for the purpose of this analysis, the proposed project will be compared to the GHG efficiency of 1.7 MT CO_2e per service population.

Consistent with the Housing Element EIR, GHG emissions were estimated using CalEEMod. Table 4.8.A shows the calculated GHG emissions for the proposed project. CalEEMod output sheets are included in Appendix A.

Table 4.8.A: Project Greenhouse Gas Emissions

Emissions Source Category	Operational Emissions (metric tons per year)			
	CO_2	CH_4	N_2O	CO_2e
Mobile	236.8	<0.1	<0.1	241.1
Area	7.6	<0.1	<0.1	7.6
Energy	101.0	<0.1	<0.1	101.6
Water	3.7	0.1	<0.1	7.8
Waste	7.3	0.7	0.0	25.6
Total Operational Emissions				**383.7**
Total Annual Service Population Emissions (Metric Tons/Year/Service Population)				**1.4**

Source: Compiled by LSA (July 2025).
CH_4 = methane
CO_2 = carbon dioxide
CO_2e = carbon dioxide equivalents
N_2O = nitrous oxide

As shown in Table 4.8.A, the proposed project would generate approximately 383.7 metric tons of CO_2e. As discussed in Section 4.14, Population and Housing, the proposed project would result in approximately three new employees and 261 residents on the project site. Therefore, the total service population (residents plus employees) would be 264 people. As such, the project's GHG emissions would result in a GHG efficiency of 1.4 metric tons CO_2e per service population, which would be below the GHG efficiency of 1.7 MT CO_2e per service population identified in the Housing Element EIR and also below the interpolated 2031 Air District targets for annual emissions. As such,

the proposed project would not generate GHG emissions that would have a significant effect on the environment, and there would be no impact.

b) Would the project conflict with an applicable plan, policy or regulation adopted for the purpose of reducing the emissions of greenhouse gases?

The City adopted a CAP[33] in 2009 with the goal of reducing communitywide GHG emissions by 80 percent below 2000 levels by 2050. The core recommendation strategies and actions of the CAP are based on the following topics:

- Sustainable Transportation and Land Use
- Building Energy Use
- Waste Reduction and Recycling
- Community Outreach and Empowerment
- Preparing for Climate Change Impacts

While the CAP is not considered a "qualified greenhouse gas reduction plan" for the purposes of streamlining GHG emissions analysis under CEQA, the City actively uses it for guiding GHG emission reduction efforts. Since publication of the CAP, the City added additional climate goals to support implementation of the CAP:[34]

- 100 percent renewable electricity by 2035
- Net-Zero Carbon Emissions by 2045, in alignment with Governor Brown's Executive Order B-55-18
- Declared a Climate Emergency and resolved to become a Fossil Fuel Free City
- Cities Race to Zero Campaign: Committed to reducing emissions 60.5 percent from 2018 levels by 2030, an emission reduction target that reflects Berkeley's fair share of the 50 percent global reduction in CO_2e

The proposed project would result in the development of a new eight-story mixed-use residential building containing a total of 110 dwelling units and approximately 690 square feet of commercial space on an infill site that would locate residents and employees near existing residential and commercial uses. The project site is served by existing sidewalks along Shattuck Avenue and Virginia Street and is located within 0.5 miles of several intersecting major bus routes, including AC Transit Lines 7, 18, and FS. The proposed project would provide 97 secure bicycle parking spaces for the proposed residential uses in a covered bike storage area. Therefore, the project would support the ability of residents and employees to use alternative modes of transportation. Additionally, as further discussed in Section 4.16, Transportation, given the location of the proposed project and proposed improvements, the proposed project would result in a less than significant VMT impact.

33 Berkeley, City of. 2009. *City of Berkeley Climate Action Plan*. June.

34 Berkeley, City of. 2022a. *City of Berkeley 2023–2031 Housing Element Update Environmental Impact Report, SCH No. 2022010331*. August.

Therefore, the proposed project would not conflict with sustainable transportation and land use measures identified in the CAP.

As discussed previously in Section 4.6, Energy, the proposed project would be required to comply with the latest California Energy Code and CALGreen Code standards (including any locally adopted amendments) and would include solar panels, which would help to reduce energy consumption and GHG emissions. In addition, while the proposed project would include natural gas, the proposed project would be required to comply with State building code requirements as Title 24 advances to implement the building decarbonization goals. The proposed project would also include low-flow plumbing fixtures and landscape irrigation. The proposed project would be consistent with the California Department of Resources Recycling and Recovery (CalRecycle) Waste Diversion and Recycling Mandate, which would reduce solid waste production by 75 percent, and the Berkeley Green Code, which also requires 100 percent of concrete, asphalt, and land clearing debris to be reused and recycled. Therefore, the proposed project would not conflict with any of the building energy use or waste and recycling measures identified in the CAP. In addition, the City's *COA: Construction and Demolition Diversion* and *COA: Low-Carbon Concrete* (provided below) would require implementation of a Construction Waste Management Plan and compliance with the Berkeley Green Code.

> ***COA: Construction and Demolition Diversion.*** Applicant shall submit a Construction Waste Management Plan that meets the requirements of BMC Chapter 19.37 including 100 percent diversion of asphalt, concrete, excavated soil and land-clearing debris and a minimum of 65 percent diversion of other nonhazardous construction and demolition waste.
>
> ***COA: Low-Carbon Concrete.*** The project shall verify compliance with the Berkeley Green Code (BMC Chapter 19.37) including use of concrete mix design with a cement reduction of at least 25 percent.

Given the above, the proposed project would be consistent the City's CAP, commitment to carbon neutrality by 2045, and the Climate Emergency declaration and would implement measures designed to reduce GHG emissions. The proposed project would not conflict with plans, policies, or regulations adopted for the purpose of reducing GHG emissions.

4.8.3 Conclusion

Given the above analysis, development of the proposed project would not change the conclusions of the Housing Element EIR, and there would be **no impact** peculiar to the proposed project or the project site related to GHG emissions. Impacts related to GHG would remain less than significant as identified in the Housing Element EIR. No further environmental analysis related to this topic is required pursuant to Sections 15183 and 15162 of the *State CEQA Guidelines*.

4.9 HAZARDS AND HAZARDOUS MATERIALS

	Significant Impact Identified in Housing Element EIR	Project Contributes to Identified Housing Element EIR Impact	New or More Severe Significant Impact Peculiar to the Project	No Impact
Would the project:				
a. Create a significant hazard to the public or the environment through the routine transport, use, or disposal of hazardous materials?	☐	☐	☐	☒
b. Create a significant hazard to the public or the environment through reasonably foreseeable upset and accident conditions involving the release of hazardous materials into the environment?	☐	☐	☐	☒

g. Expose people or structures, either directly or indirectly, to a significant risk of loss, injury or death involving wildland fires?	☐	☐	☐	☒

4.9.1 Housing Element EIR Analysis

Section 4.8 of the Housing Element EIR analyzed potential impacts related to hazards and hazardous materials. The Housing Element EIR determined that all impacts related to hazards and hazardous materials would be less than significant, and no mitigation was prescribed. The Housing Element EIR indicated that implementation of the Housing Element would facilitate the development of new residential uses in the city that would not involve the routine transportation, use, or disposal of hazardous materials. Construction of new residences could result in an increase in the overall routine, transport, use, and disposal of hazardous materials in the city for construction activities, including within 0.25 mile of a school. However, required compliance with applicable regulations related to hazardous materials and compliance with General Plan policies and City COAs, including *COA: Toxics*, would minimize the risk of releases and exposure to these materials to less than significant. In addition, the Housing Element EIR determined that implementation of the Housing Element would accommodate development on or near hazardous materials sites; however, compliance with applicable regulations and *COA: Toxics* (which requires site characterization and cleanup, if necessary) would ensure less than significant impacts.

The Housing Element EIR also indicated there are no airports within 2 miles of the city, the city is not within the influence area of any airport, and implementation of the Housing Element would not result in physical changes that could interfere with or impair emergency response or evacuation. Therefore, these impacts were determined to be less than significant.

4.9.2 Project Impacts

The analysis in this section is based, in part, on the Phase I ESA[35] and Phase II Environmental Site Assessment (Phase II ESA)[36] prepared for the proposed project. These reports are provided herein as Appendix B and Appendix C, respectively.

a) Would the project create a significant hazard to the public or the environment through the routine transport, use, or disposal of hazardous materials?

The proposed project would result in the demolition of the existing approximately 4,604-square-foot, two-story commercial building, and the construction of a new eight-story, mixed-use residential building consisting of 112,969 square feet of residential space and 690 square feet of commercial space in the southwest corner of the ground floor and associated improvements. Based on the Phase I ESA findings, the project site has a history of subsurface contamination. The project site is located in an Environmental Management Area (EMA) (i.e., areas in the city known or suspected to have groundwater contamination).[37]

Hazardous materials (e.g., oil, grease, fuels, paint) would be transported and used on site for proposed construction activities. The operational phase of the proposed project may also include storage and use of small amounts of hazardous materials associated with commercial uses (e.g., cleaning products) on the project site. The routine transport, use, or disposal of these hazardous materials could pose a potential hazard to construction workers and future employees working at the project site because they would be handling the hazardous materials and could therefore be exposed through inhalation of vapors, direct contact with skin, or accidental ingestion. The routine transport, use, or disposal of these hazardous materials would not pose a significant hazard to the public or environment unless the hazardous materials were accidentally spilled or released into the environment, as discussed In Section 4.9.b, below.

Worker health and safety is regulated at the federal level by the United States Department of Labor, Occupational Safety and Health Administration (OSHA). OSHA regulations include training requirements for construction workers and a requirement that hazardous materials are accompanied by the manufacturer's Safety Data Sheets (SDSs). The Federal Occupational Safety and Health Act of 1970 authorizes states to establish their own safety and health programs with OSHA approval. Worker health and safety protections in California are regulated by the California

35 ACC Environmental Consultants. 2024. *Phase I Environmental Site Assessment Report, 1685 Shattuck Avenue/2109 Virginia Street, ACC Project Number: 10230-001.00.* February 9.

36 ACC Environmental Consultants. 2024. *Phase II Environmental Site Assessment Report, 1685 Shattuck Avenue, Berkeley, California 94709.* August 14.

37 Berkeley, City of. n.d. *Community GIS Portal.* Website: https://berkeley.maps.arcgis.com/apps/webappviewer/index.html?id=2c7dfafbb1f64e159f4fdf28a52f51c6&showLayers=Berkeley%20Parcels;Environment (accessed March 2025).

Department of Industrial Relations (DIR). The DIR includes the Division of Occupational Safety and Health (DOSH), which acts to protect workers from safety hazards through its California Occupational Safety and Health (Cal/OSHA) program. Cal/OSHA regulations include requirements for protective clothing, training, and limits on exposure to hazardous materials. California standards for workers dealing with hazardous materials are contained in CCR Title 8 and include practices for all industries (General Industrial Safety Orders), and specific practices for construction and other industries. The routine transport, use, and disposal of hazardous materials at the project site during construction activities would be required to comply with a project Health and Safety Plan (HASP) prepared in accordance with CCR Title 8, which would reduce potential health hazards for construction workers from the routine transport, use, or disposal of hazardous materials.

In 1990 and 1994, the federal Hazardous Material Transportation Act was amended to improve the protection of life, property, and the environment from the inherent risks of transporting hazardous material in all major modes of commerce. The United States Department of Transportation (USDOT) developed hazardous materials regulations that govern the classification, packaging, communication, transportation, and handling of hazardous materials, as well as employee training and incident reporting. The transportation of hazardous materials is subject to USDOT, the Resource Conservation and Recovery Act (RCRA), and State regulations. The California Highway Patrol, the California Department of Transportation (Caltrans), and the California Environmental Protection Agency (Cal/EPA) Department of Toxic Substances Control (DTSC) are responsible for enforcing federal and State regulations pertaining to the transportation of hazardous materials.

Construction of the proposed project would result in the generation of various waste materials that would require recycling and/or disposal, including some waste materials that may be classified as hazardous waste. Hazardous wastes would be required to be transported by a licensed hazardous waste hauler and disposed of at facilities that are permitted to accept such materials as required by the USDOT, RCRA, and State regulations.

In addition, the proposed project would be required to comply with the City's *COA: Toxics*, including preparation of a site-specific Soil and Groundwater Management Plan (SGMP) (*COA: Toxics[D]*), preparation of a hazardous materials survey prior to demolition (*COA: Toxics[E]*), and a Hazardous Materials Business Plan (HMBP) in compliance with BMC Section 15.12.040 and California Health and Safety Code, Chapter 6.95, Div. 20, if the proposed project stores or handles hazardous materials during construction in aggregate quantities equal to or greater than 55 gallons for liquids, 500 pounds for solids, or 200 cubic feet of compressed gases, or generates any quantity of hazardous waste (*COA: Toxics[F]*).

> ***COA: Toxics.*** The applicant shall contact the Toxics Management Division (TMD) at 1947 Center Street or (510) 981-7470 to determine which of the following documents are required and timing for their submittal:
>
> A. Phase I and Phase II Environmental Site Assessment (ESA) (per ASTM 1527). A recent Phase I ESA (less than 2 years old) shall be submitted to the Toxics Management Division for developments for: all new commercial, industrial and mixed-use developments and all improvement projects that require work 5 or more feet below grade, and all new residential buildings with more than four dwelling units located in the Environmental

Management Area (or EMA). The EMA can be viewed at: City of Berkeley Community GIS Portal (arcgis.com)

B. Depending on the findings in the Phase I, a Phase II or additional investigation may be necessary. Any available soils and groundwater analytical data available for projects listed in this section must also be submitted to TMD.

C. Environmental Site Clearance. The applicant shall provide environmental screening clearance from either the San Francisco Bay Regional Water Quality Control Board (RWQCB), Department of Toxic Substances Control (DTSC), or the Alameda County Department of Environmental Health's Local Oversight Program (LOP). Clearance from one of these regulatory agencies will ensure that the property meets development investigation and cleanup standards for the specific use proposed on the property. Environmental screening clearance shall be submitted to the City of Berkeley's Toxics Management Division prior to issuance of any building permits.

D. Soil and Groundwater Management Plan. A site-specific Soil and Groundwater Management Plan (SGMP) shall be submitted to Toxics Management Division (TMD) for all non-residential projects, and residential or mixed-use projects with more than four dwelling units, that: (1) are in the Environmental Management Area (EMA), as shown on the most recent City of Berkeley EMA map, and (2) propose any excavations deeper than 5 feet below grade or if significant soils removal is anticipated. The SGMP shall be submitted to the TMD with the project's building permit application and shall be approved by TMD prior to issuance of the building permit.

   The SGMP shall comply with the hazardous materials and waste management standards required by BMC Section 15.12.100, the stormwater pollution prevention requirements of San Francisco Bay Regional Water Quality Control Board's Order No. R2-2009-0074, California hazardous waste generator regulations (Title 22 California Code of Regulations (CCR) 66260 et seq.), and the East Bay Municipal Utility District's Ordinance 311, and shall include the following:

   i. procedures for soil and groundwater management including identification of pollutants and disposal methods;

   ii. procedures to manage odors, dust and other potential nuisance conditions expected during development;

   iii. notification to TMD within 24 hours of the discovery of any previously undiscovered contamination; and

   iv. the name and phone number of the individual responsible for implementing the SGMP and who will respond to community questions or complaints.

   TMD may require additional information or impose additional conditions as deemed necessary to protect human health and the environment. All requirements of the approved SGMP shall be deemed conditions of approval.

E. Demolitions & Renovations – Building Materials Survey. A hazardous materials survey for building materials and plans on hazardous materials and hazardous waste removal and disposal is required and must be prepared by qualified professionals, and submitted to the Toxics Management Division (TMD) prior to issuance of the building permit.

   i. The survey shall include the identification of all materials to be disturbed for lead-based paints, PCB containing equipment and caulking, hydraulic fluids, refrigerants,

treated wood, and mercury containing devices (including fluorescent light bulbs and mercury switches), asbestos and other hazardous materials and chemicals.

ii. If asbestos is identified, Bay Area Air Quality Management District Regulation 11-2-401.3 a notification must be made and the J number must be made available to the City of Berkeley Permit Service Center. Contractors must follow state regulations where there is asbestos-related work involving 100 square feet or more of asbestos containing material (8 Cal. Code Regs. §1529, §341.6 et seq.)

iii. The report to the TMD shall include, in addition to the survey, plans on hazardous materials and hazardous waste removal and disposal that comply with State and Federal codes including California Code of Regulations (CCR) 66260 et seq.

iv. Documentation evidencing disposal of hazardous waste in compliance with the survey shall be submitted to TMD within 30 days of the completion of the demolition.

Please note, the PCB Screening Form required by Public Works, Engineering, is a separate requirement and does not address the PCB identification requirement of the Toxics Management Division.

F. Hazardous Materials Business Plan. A Hazardous Materials Business Plan (HMBP) in compliance with BMC Section 15.12.040 and California Health & Safety Code, Chapter 6.95 Div. 20, shall be submitted to the Toxics Management Division through the California Environmental Reporting System: http://cers.calepa.ca.gov/ for chemicals used or stored on site during construction that exceed reporting thresholds. The reporting is required if your facility stores or handles hazardous materials in aggregate quantities equal to or greater than 55 gallons for liquids, 500 pounds for solids, or 200 cubic feet of compressed gases, or generates any quantity of hazardous waste. This includes welding gases, emergency generator fuel, paints, etc.

Additionally, the business occupant must submit an HMBP within 30 days of starting operations.

G. Petroleum Storage. A Spill Prevention, Control, and Countermeasure (SPCC) Plan is required to be prepared and implemented for facilities with any one of the following:

i. Aggregate aboveground petroleum storage capacities of 1,320 gallons or more stored in aboveground storage containers, tanks, oil-filled equipment, or

ii. One or more tank(s) in an underground area (TIUGA) with petroleum storage capacities of 55 gallons or greater. More information on TIUGAs can be found here: https://osfm.fire.ca.gov/divisions/pipeline-safety-and-cupa/certified-unified-program-agency-cupa/aboveground-petroleum-storage-act/tank-in-an-underground-area-tiuga/

The SPCC plan must be prepared prior to beginning operations and you must submit facility information to Toxics Management Division (TMD) through the California Environmental Reporting System: http://cers.calepa.ca.gov/. The SPCC plan will be reviewed during the site inspection and shall not be submitted in CERS or to the TMD.

Compliance with *COA: Toxics* and the regulations described above (including OSHA and Cal/OSHA regulations, CCR Title 8, and USDOT, RCRA, and State regulations) would ensure that the proposed project would not create a significant hazard to the public or the environment associated with the

routine transport, use, or disposal of hazardous materials by ensuring that these materials are properly handled during construction of the proposed project.

Occupation of the proposed commercial and residential uses is expected to utilize relatively small amounts of hazardous materials (e.g., chemicals associated with fuel for landscape maintenance equipment, solvents, cleaning products, pesticides/fertilizers, and other similar chemicals). These materials are substantially similar to household chemicals and solvents already in general and wide use throughout the city and in the vicinity of the project site. Compliance with all applicable federal, State, and local regulations would ensure the project would not create a significant hazard to the public or environment from the routine transportation, use, and disposal of hazardous materials during operation of the proposed project.

b) Would the project create a significant hazard to the public or the environment through reasonably foreseeable upset and accident conditions involving the release of hazardous materials into the environment?

The public and/or the environment could be affected by the release of hazardous materials from the proposed project into the environment by: (1) exposing workers and/or the public to potentially contaminated soil and groundwater during construction and/or operation of the project, or (2) exposing workers and/or the public to hazardous building materials (e.g., polychlorinated biphenyls [PCBs], lead paint, asbestos) during demolition of the existing commercial structures. However, development projects that require a use permit are required to comply with *COA: Toxics,* which addresses each of these potential impacts (see Section 4.9.a, above).

On-Site Hazardous Building Materials. According to the Phase I ESA, the project site appeared to be undeveloped land in 1894. By 1911, the project site was developed with five dwellings to the north and east, two storefronts to the southwest, and an office building to the south. The existing structure was initially built in 1906 and was remodeled several times. By 1929, the project site was redeveloped as a drugstore to the southwest, four storefronts to the west, two multi-family dwellings to the north, and a dry-cleaning facility with an associated office to the east. In addition, the structure suffered a number of fires during its history, the last of which (in 1981) destroyed almost the entire building. Only the portion of the building fronting Shattuck Avenue was repaired/reconstructed. Due to the age of the building on the project site, asbestos-containing materials (ACMs) and/or lead-based paints (LBP) may be present in the buildings.[38] Demolition activities could cause the release of asbestos and lead into the environment if ACMs and LBPs are present in the buildings.

The City's *COA: Toxics(E)*, as outlined above, requires that prior to issuance of a building permit, a hazardous materials survey for building materials and plans on hazardous materials and hazardous waste removal and disposal is required and must be prepared by qualified professionals. The survey shall include, but not be limited to, the identification of all materials to be disturbed for LBPs, PCB-containing equipment, and devices containing caulking, hydraulic fluids, refrigerants, treated wood, and mercury (including fluorescent light bulbs and mercury switches), asbestos, and other

[38] ACC Environmental Consultants. 2024. *Phase I Environmental Site Assessment Report, 1685 Shattuck Avenue/2109 Virginia Street, ACC Project Number: 10230-001.00.* February 9.

hazardous materials and chemicals. The survey shall include plans on hazardous waste or hazardous materials removal, reuse or disposal procedures to be implemented that fully comply with State hazardous waste generator requirements (22 CCR 66260 et seq.). The survey becomes a condition of any building or demolition permit for the proposed project. Documentation evidencing disposal of hazardous waste in compliance with the survey shall be submitted to the Toxics Management Division (TMD) within 30 days of the completion of the demolition. If asbestos is identified, Air District Regulation 11-2-401.3 notification must be made, and the Air District Job Number (or "J Number") must be made available to the City of Berkeley Permit Service Center. Compliance with the requirements described above and outlined in *COA: Toxics(E)* would ensure that potential impacts related to hazardous building materials would not occur.

Hazardous Soil and Groundwater Conditions. Based on the findings of the most recent environmental investigations, the project site has a history of subsurface contamination. The project site is also listed on the Envirostore website/list and Geotracker database as a leaking underground storage tank (LUST) cleanup site, and is identified as being located in an EMA, which are areas in the city known or suspected to have groundwater contamination.[39] The project site was occupied by an on-site dry cleaner from 1920 to 1970, and a 5,000-gallon underground tank utilized to store Stoddard solvent was removed in July 1987. Although the project site was remediated under the oversight of the DTSC in 1987 and assessed by the San Francisco Bay Regional Water Quality Control Board (RWQCB) in 1989, the unit of measurement used to establish the residential soil vapor intrusion initial threshold changed and rendered benzene and chloroform concentrations above residential Environmental Screening Levels (ESLs). A Phase I ESA was subsequently prepared.

The Phase I ESA identified a Controlled Recognized Environmental Condition (CREC) associated with the project site related to the Stoddard solvent release, and that a vapor intrusion condition (VEC) at the project site could not be ruled out, particularly with regard to redevelopment of the project site with residential uses. As such, a Phase II ESA was subsequently prepared.

The Phase II ESA included nine exploratory soil borings and five soil vapor borings in the vicinity of the Stoddard solvent underground tank in order to obtain soils, soil vapor, and groundwater samples. The samples were then analyzed and compared to ESLs for commercial uses.[40] The Phase II ESA determined that the soil vapor at the project site is currently impacted by Stoddard solvent, benzene, and perchloroethylene (PCE), which was attributed to the project site's former dry-cleaning use. However, only the benzene concentrations exceeded the San Francisco Bay RWQCB's ESLs for vapor intrusion at commercial properties. In addition, total petroleum hydrocarbons (TPH), benzene, and chloroform concentrations in the soil vapor generally exceed residential ESLs but not commercial ESLs. Because the highest detected benzene concentration in the soil vapor slightly exceeds the corresponding commercial ESL for benzene, the Phase II ESA identified benzene as the primary chemical of concern. The Phase II ESA also determined that current groundwater and soil impacts associated with the former use of the project site are negligible. Overall, the Phase II ESA concluded that the subsurface conditions at the project site are consistent with the former use of

39 Berkeley, City of. n.d. *Community GIS Portal.* Website: https://berkeley.maps.arcgis.com/apps/webappviewer/index.html?id=2c7dfafbb1f64e159f4fdf28a52f51c6&showLayers=Berkeley%20Parcels; Environment (accessed March 2025).

40 Based on the proposed building design, commercial screening levels for soil vapor are applicable.

the project site and with subsurface conditions described in the case closure letters granted by the DTSC in 1987 and the San Francisco Bay RWQCB in 1999. Because no land use restrictions or continuing obligations were required by DTSC and the San Francisco Bay RWQCB, the Phase II ESA concluded that no further assessment or regulatory oversight is necessary. Further, the Phase II ESA indicated that proposed building design, which locates parking and commercial uses on the ground floor and would be constructed on a mat slab, is sufficient to mitigate residual soil vapor impacts. In addition, the proposed project would include a chemically-resistant vapor membrane product designed to mitigate the chemicals of concern at the project site, including a permeable gravel layer beneath the membrane and foundation slab. As such, potential vapor intrusion concerns would be effectively addressed by the proposed project's design, and no impact would occur.

As discussed above, the project site is located in an EMA, which are areas in the city known or suspected to have groundwater contamination.[41] *COA: Toxics(D)* requires that an SGMP be prepared for all residential or mixed-use projects with four or more units that (1) are located within the EMA, and (2) propose any excavations deeper than 5 feet below grade. The proposed project is a mixed-use development within the EMA and would require excavation around approximately 5 feet below grade for construction of utilities and foundations; therefore, preparation of an SGMP would be required for the proposed project. The TMD may impose additional conditions as deemed necessary. All requirements of the approved SGMP would be conditions of approval of the requested Use Permits. Preparation and implementation of an SGMP in accordance with the requirements of *COA: Toxics(D)* would ensure that potential impacts associated with disturbance and excavation of potentially contaminated soil and groundwater at the project site would not occur.

Preparation and implementation of an SGMP for excavation and potential dewatering activities (as required by the TMD and described above) would ensure that the proposed project would not result in impacts to the public or the environment related to reasonably foreseeable upset and accident conditions involving the release of hazardous materials into the environment.

c) Would the project emit hazardous emissions or handle hazardous or acutely hazardous materials, substances, or waste within one-quarter mile of an existing or proposed school?

Berkwood Hedge Middle School (a public school located at 1798 Scenic Avenue), Bayhill High School (a public school located at 1940 Virginia Street), and the New School of Berkeley (a preschool located at 1606 Bonita Avenue) are all less than 0.25 mile from the project site. However, compliance with federal, State, and local regulations for the management of hazardous materials, as discussed in Sections 4.9.a and 4.9.b, above, would ensure that potential impacts to nearby schools associated with hazardous materials emissions and use at the project site would not occur.

[41] Berkeley, City of. n.d. *Community GIS Portal.* Website: https://berkeley.maps.arcgis.com/apps/webappviewer/index.html?id=2c7dfafbb1f64e159f4fdf28a52f51c6&showLayers=Berkeley%20Parcels; Environment (accessed March 2025).

d) Would the project be located on a site which is included on a list of hazardous materials sites compiled pursuant to Government Code Section 65962.5 and, as a result, would it create a significant hazard to the public or the environment?

The provisions of Government Code Section 65962.5 require the DTSC, the State Water Resources Control Board (SWRCB), the California Department of Health Services, and CalRecycle (formerly the California Integrated Waste Management Board) to submit information pertaining to sites associated with solid waste disposal, hazardous waste disposal, LUST sites, and/or hazardous materials releases to the Secretary of Cal/EPA.

The project site is listed on the SWRCB's Geotracker database as a LUST cleanup site.[42] The project site is therefore included on lists of hazardous materials release sites compiled pursuant to Government Code Section 65962.5. As discussed in Sections 4.9.a and 4.9.b above, the project site has been the subject of several environmental investigations and remediation activities performed under the oversight of regulatory agencies. Preparation and implementation of an SGMP for excavation and potential dewatering activities (i.e., *COA:Toxics[D]*) and the chemically-resistant vapor membrane product designed to mitigate the chemicals of concern at the project site (including a permeable gravel layer beneath the membrane and foundation slab, which has been incorporated into the proposed project's design) would ensure that impacts to construction workers, the surrounding public, future site occupants, and the environment related to past releases of hazardous materials into the environment would not occur.

e) For a project located within an airport land use plan or, where such a plan has not been adopted, within 2 miles of a public airport or public use airport, would the project result in a safety hazard or excessive noise for people residing or working in the project area?

The project site is located over 10 miles north of the Oakland International Airport. The project site is not located within a public airport land use plan or within 2 miles of a public use airport. The proposed project is not within the vicinity of a private airstrip. As such, the proposed project would not result in a safety hazard to people working or residing in the area due to the proximity of an airport.

f) Would the project impair implementation of or physically interfere with an adopted emergency response plan or emergency evacuation plan?

The proposed project would be consistent with the policies outlined in the City of Berkeley General Plan's Disaster Preparedness and Safety Element and would not obstruct emergency evacuation routes. Shattuck Avenue and Virginia Street are the designated emergency access and evacuation routes in the project area.[43] Because the proposed project would not include any modifications to the existing roadways in the vicinity of the project site, implementation of the proposed project would not result in any impacts related to emergency access or an adopted emergency response

42 State Water Resources Control Board (SWRCB). 1999. *Berkeley Village (T0600100187).* Website: https://geotracker.waterboards.ca.gov/profile_report.asp?global_id=T0600100187 (accessed March 2025).

43 Berkeley, City of. 2001. Op. cit.

plan. As such, the proposed project would have no impact on implementation of an adopted emergency response plan or emergency evacuation plan.

g) Would the project expose people or structures to a significant risk of loss, injury or death involving wildland fires, including where wildlands are adjacent to urbanized areas or where residences are intermixed with wildlands?

The project site is in an urban area and is not within or adjacent to a wildland fire hazard area. As such, the proposed project would not expose people or structures to a significant loss, injury, or death involving wildland fires.

4.9.3 Conclusion

Given the above analysis, development of the proposed project would not change the conclusions of the Housing Element EIR, and there would be **no impact** peculiar to the proposed project or the project site related to hazards and hazardous materials. Impacts related to hazards and hazardous materials would remain less than significant, as identified in the Housing Element EIR. No further environmental analysis related to this topic is required pursuant to Sections 15183 and 15162 of the *State CEQA Guidelines*.

4.10.1 Housing Element EIR Analysis

Section 4.9 of the Housing Element EIR analyzed potential impacts related to hydrology and water quality. The Housing Element EIR determined that all impacts related to hydrology and water quality would be less than significant, and no mitigation was prescribed. The Housing Element EIR indicated that future development facilitated by the Housing Element would involve ground-disturbing activities and the use of heavy machinery that could release materials (including sediments and fuels) that could adversely affect water quality during construction. The operations of future development could also result in discharges to storm drains that could adversely affect water quality. However, the Housing Element EIR determined that compliance with required permits and existing regulations, including applicable National Pollutant Discharge Elimination System (NPDES) permits and the implementation of BMPs contained therein, would ensure that water quality impacts would be less than significant. The Housing Element EIR also determined that implementation of the Housing Element would not substantially deplete groundwater supplies or interfere substantially with groundwater recharge such that there would be a net deficit in aquifer volume or a lowering of the local groundwater table through implementation of low impact development measures and on-site infiltration required by the C.3 provisions of the San Francisco

Bay RWQCB's Municipal Regional Stormwater (MRP) NPDES Permit, and compliance with the BMC would increase the potential for groundwater recharge.

The Housing Element EIR also found that with required compliance with existing regulations, including applicable NPDES permits, future development facilitated by the Housing Element would not substantially alter the existing drainage pattern of future development sites, including through the alteration of the course of a stream or river, in a manner which would result in substantial erosion or siltation on- or off-site. In addition, with required compliance with existing regulation the Housing Element EIR determined that future development would not substantially increase the rate or amount of surface runoff in a manner which would result in flooding or exceed the capacity of stormwater drainage systems. In addition, although future development would place housing and other structures within Federal Emergency Management Agency (FEMA) designated Flood Hazard Areas and tsunami zones, the Housing Element EIR determined that compliance with the City's General Plan, BMC, and the California Health and Safety Code would reduce potential effects associated with flood events to less than significant.

4.10.2 Project Impacts

The analysis in this section is based in part on the *City of Berkeley C.3 Stormwater Requirements Checklist, Municipal Regional Stormwater Permit (MRP 3), Stormwater Controls for Development Project Checklist* prepared for the proposed project (Stormwater Requirements Checklist).[44] This report is provided as Appendix D.

a) Would the project violate any water quality standards or waste discharge requirements or otherwise substantially degrade surface or groundwater quality?

Regional Drainage. The project site is located within an urban and built-up area of Berkeley, and no major hydrologic features are in the vicinity of the project site. The project site is located within the Strawberry Creek Watershed, which includes Strawberry Creek and several unnamed tributaries. Although portions of Strawberry Creek have been replaced by underground pipelines and culverts as part of the City's storm drainage system, Strawberry Creek remains one of the few waterways in the urbanized East Bay that retains its natural character along most of its course.[45] The Strawberry Creek Watershed drains to the University Avenue storm drain network, which discharges into San Francisco Bay at the terminus of University Avenue.[46] The nearest existing storm drain pipes and inlets to the project site are located along Shattuck Avenue and Virginia Street.

Regulatory Framework. The SWRCB and nine RWQCBs regulate water quality of surface water and groundwater bodies throughout California. In Berkeley, the San Francisco Bay RWQCB is responsible for implementation of the Water Quality Control Plan (Basin Plan). The Basin Plan establishes beneficial water uses for waterways and water bodies in the region. Section 303(d) of the federal CWA requires that states identify water bodies including bays, rivers, streams, creeks, and coastal

44 Trachtenberg Architecture. *City of Berkeley C.3 Stormwater Requirements Checklist, Municipal Regional Stormwater Permit (MRP 3), Stormwater Controls for Development Project Checklist*.

45 Berkeley, City of. 2022a. *City of Berkeley 2023-2031 Housing Element Update Environmental Impact Report, SCH No. 2022010331*. August.

46 Berkeley, City of. 2011. *2011 Watershed Management Plan*. October.

areas that do not meet water quality standards and the pollutants that are causing the impairment. Total Maximum Daily Loads (TMDLs) describe the maximum amount of a pollutant that a water body can receive while still meeting established water quality standards. A TMDL establishes limits for pollutant discharges into impaired water bodies. Central San Francisco Bay is listed as an impaired water body for several pollutants, including chlordane, dichlorodiphenyltrichloroethane (DDT), dieldrin, dioxin compounds (including 2, 3, 7, 8-tetrachloro-dibenzodioxin [2, 3, 7, 8-TCDD]), furan compounds, invasive species, trash, mercury, PCBs, and selenium.[47]

Runoff water quality is regulated by the NPDES program (established through the federal CWA). The NPDES program objective is to control and reduce pollutant discharges to surface water bodies. Compliance with NPDES permits is mandated by State and federal statutes and regulations. Locally, the NPDES program is administered by the San Francisco Bay RWQCB. NPDES requirements that would apply to both the construction phase and the operations phase of the project are described below.

Construction. The proposed project includes demolition of the existing on-site structure and surface pavements and construction of the mixed-use residential building. Pollutants of concern during construction include sediments, trash, petroleum products, concrete waste (dry and wet), sanitary waste, and chemicals. Each of these pollutants on its own or in combination with other pollutants can have a detrimental effect on water quality. During construction activities, excavated soil would be exposed, and there would be an increased potential for soil erosion and sedimentation compared to existing conditions. In addition, chemicals, liquid products, petroleum products (e.g., paints, solvents, and fuels), and concrete-related waste may be spilled or leaked and have the potential to be transported via stormwater runoff into receiving waters (i.e., Central San Francisco Bay).

Many areas in the city are known or suspected to have soil or groundwater contamination and are known as EMAs. The project site is located within an EMA.[48] In addition, the proposed project would include the demolition of a structure subject to the TMD Building Demolition requirements due to the potential for ACMs and LBP to be present in the existing commercial building. As part of the TMD's standard conditions for a site in the EMA and as required by City's *COA: Toxics(E)*, a hazardous materials survey would be prepared for the proposed project prior to demolition activities.

During construction, the entire 0.51-acre project site would be disturbed. Because construction of the proposed project would disturb less than 1 acre of soil, the proposed project is not subject to the requirements of the SWRCB's NPDES General Permit for Storm Water Discharges Associated with Construction and Land Disturbance Activities (Order No. 2022-0057-DWQ, NPDES No. CAS000002) (Construction General Permit). However, the proposed project would be required to

comply with the City's COAs outlined below, including *COA: Stormwater Requirements* and *COAs: Public Works*.

> ***COA: Stormwater Requirements.*** The applicant shall demonstrate compliance with the requirements of the City's National Pollution Discharge Elimination System (NPDES) permit as described in BMC Section 17.20. The following conditions apply:
>
> A. The project plans shall identify and show site-specific Best Management Practices (BMPs) appropriate to activities conducted on-site to limit to the maximum extent practicable the discharge of pollutants to the City's storm drainage system, regardless of season or weather conditions.
>
> B. Trash enclosures and/or recycling area(s) shall be covered; no other area shall drain onto this area. Drains in any wash or process area shall not discharge to the storm drain system; these drains should connect to the sanitary sewer. Applicant shall contact the City of Berkeley and EBMUD for specific connection and discharge requirements. Discharges to the sanitary sewer are subject to the review, approval and conditions of the City of Berkeley and EBMUD.
>
> C. Landscaping shall be designed with efficient irrigation to reduce runoff, promote surface infiltration and minimize the use of fertilizers and pesticides that contribute to stormwater pollution. Where feasible, landscaping should be designed and operated to treat runoff. When and where possible, xeriscape and drought tolerant plants shall be incorporated into new development plans.
>
> D. Design, location and maintenance requirements and schedules for any stormwater quality treatment structural controls shall be submitted to the Department of Public Works for review with respect to reasonable adequacy of the controls. The review does not relieve the property owner of the responsibility for complying with BMC Chapter 17.20 and future revisions to the City's overall stormwater quality ordinances. This review shall be conducted prior to the issuance of a Building Permit.
>
> E. All paved outdoor storage areas must be designed to reduce/limit the potential for runoff to contact pollutants.
>
> F. All on-site storm drain inlets/catch basins must be cleaned at least once a year immediately prior to the rainy season. The property owner shall be responsible for all costs associated with proper operation and maintenance of all storm drainage facilities (pipelines, inlets, catch basins, outlets, etc.) associated with the project, unless the City accepts such facilities by Council action. Additional cleaning may be required by City of Berkeley Public Works Engineering Dept.
>
> G. All on-site storm drain inlets must be labeled "No Dumping – Drains to Bay" or equivalent using methods approved by the City.
>
> H. Most washing and/or steam cleaning must be done at an appropriately equipped facility that drains to the sanitary sewer. Any outdoor washing or pressure washing must be managed in such a way that there is no discharge or soaps or other pollutants to the storm drain. Sanitary connections are subject to the review, approval and conditions of the sanitary district with jurisdiction for receiving the discharge.

I. All loading areas must be designated to minimize "run-on" or runoff from the area. Accumulated waste water that may contribute to the pollution of stormwater must be drained to the sanitary sewer or intercepted and pretreated prior to discharge to the storm drain system. The property owner shall ensure that BMPs are implemented to prevent potential stormwater pollution. These BMPs shall include, but are not limited to, a regular program of sweeping, litter control and spill cleanup.

J. Restaurants, where deemed appropriate, must be designed with a contained area for cleaning mats, equipment and containers. This contained wash area shall be covered or designed to prevent run-on or run-off from the area. The area shall not discharge to the storm drains; wash waters should drain to the sanitary sewer, or collected for ultimate disposal to the sanitary sewer. Employees shall be instructed and signs posted indicating that all washing activities shall be conducted in this area. Sanitary connections are subject to the review, approval and conditions of the waste water treatment plant receiving the discharge.

K. Sidewalks and parking lots shall be swept regularly to prevent the accumulation of litter and debris. If pressure washed, debris must be trapped and collected to prevent entry to the storm drain system. If any cleaning agent or degreaser is used, wash water shall not discharge to the storm drains; wash waters should be collected and discharged to the sanitary sewer. Discharges to the sanitary sewer are subject to the review, approval and conditions of the sanitary district with jurisdiction for receiving the discharge.

L. The applicant is responsible for ensuring that all contractors and sub-contractors are aware of and implement all stormwater quality control measures. Failure to comply with the approved construction BMPs shall result in the issuance of correction notices, citations, or a project stop work order.

COA: Public Works. All piles of debris, soil, sand, or other loose materials shall be covered at night and during rainy weather with plastic at least one-eighth millimeter thick and secured to the ground.

COA: Public Works. The applicant shall ensure that all excavation takes into account surface and subsurface waters and underground streams so as not to adversely affect adjacent properties and rights-of-way.

COA: Public Works. The project sponsor shall maintain sandbags or other devices around the site perimeter during the rainy season to prevent on-site soils from being washed off-site and into the storm drain system. The project sponsor shall comply with all City ordinances regarding construction and grading.

COA: Public Works. Prior to any excavation, grading, clearing, or other activities involving soil disturbance during the rainy season the applicant shall obtain approval of an erosion prevention plan by the Building and Safety Division and the Public Works Department. The applicant shall be responsible for following these and any other measures required by the Building and Safety Division and the Public Works Department.

In addition, the proposed project would implement construction BMPs including, but not be limited to, Erosion Control and Sediment Control BMPs designed to minimize erosion and retain sediment on site and Good Housekeeping BMPs to prevent spills, leaks, and discharge of construction debris and waste into receiving waters. Construction BMPs applicable to the proposed project are detailed in the

Stormwater Requirements Checklist completed for the proposed project.[49] In addition, provision C.6 of the San Francisco Bay RWQCB's MRP[50] requires the City to implement a construction site inspection and control program at all construction sites, with follow-up and enforcement to prevent construction site discharges of pollutants and impacts on beneficial uses of receiving waters. Inspections must confirm implementation of appropriate and effective erosion and other construction pollutant controls by construction site operators/developers, and reporting must demonstrate the effectiveness of this inspection and problem solution. Compliance with COAs, as outlined above, including the incorporation of construction BMPs to target and reduce pollutants of concern in stormwater runoff, would ensure that construction impacts related to violation of waste discharge requirements and water quality standards and degradation of water quality would not occur.

According to the Phase 1 ESA[51] prepared for the proposed project, the depth to groundwater at the project site is approximately 17 feet bgs. Construction of the proposed project is anticipated to require excavation to a maximum depth of 6 feet for construction of utilities, drainage facilities, and parking facilities. Based on the depth to groundwater at the project site and the maximum depth of excavation, groundwater dewatering is not anticipated to be required during construction. If groundwater is encountered during excavation and groundwater dewatering is required, the improper management and discharge of dewatering effluent into the storm drainage system or receiving waters could adversely affect water quality because contaminants and sediment may be present in the dewatering effluent.

For development projects within the EMA where dewatering is anticipated, the City's TMD has adopted specific requirements. Since dewatering activities can draw in contamination from outside areas, monitoring of the groundwater discharges may be required. The TMD may require dewatering and monitoring plans to ensure the discharge of clean water and the protection of the community from vapors or other health hazards. Additionally, where there is sufficient information indicating soil contamination is present, the TMD could require testing of excavation spoils and documentation of proper disposal. The specific requirements for the proposed project would be specified by the City as standard conditions of approval, as outlined in *COA: Toxics* (refer to Section 4.9, Hazards and Hazardous Materials). Additionally, as part the TMD's standard conditions for a site in the EMA, an SGMP would be prepared for the proposed project that would establish the appropriate management practices for handling, treatment, and disposal of contaminated groundwater if encountered during construction. Compliance with City requirements and implementation of an SGMP would be required as part of the conditions of approval for the proposed project and would ensure that contaminated groundwater is not discharged to surface water. Therefore, groundwater dewatering impacts related to violation of waste discharge requirements and water quality standards and degradation of water quality would not occur.

---

50 San Francisco Bay Regional Water Quality Control Board (RWQCB). 2022. San Francisco Bay Region Municipal Regional Stormwater NPDES Permit, Order No. R2-2022-0018, NPDES Permit No. CAS612008. May 11.

51 ACC Environmental Consultants. 2024. *Phase I Environmental Site Assessment Report, 1685 Shattuck Avenue/2109 Virginia Street, ACC Project Number: 10230-001.00.* February 9.

Infiltration of stormwater has the potential to affect groundwater quality in areas of shallow groundwater. As stated previously, the depth to groundwater at the project site is approximately 17 feet bgs. Therefore, due to the relatively shallow groundwater table, stormwater may infiltrate during project construction, potentially affecting groundwater quality given the direct path for pollutants to reach the groundwater table. Proposed construction BMPs, as required by *COA: Stormwater Requirements*, would reduce infiltration of pollutants to groundwater during construction. Therefore, project construction would not substantially degrade groundwater quality.

Operation. The proposed project would result in the development of a new eight-story, mixed-use residential building containing a total of 110 dwelling units and approximately 690 square feet of commercial space on an infill site. According to the Stormwater Requirements Checklist prepared for the proposed project, the proposed project would replace all existing impervious surface area, resulting in no net change in the total impervious surface area at the project site. In addition, the proposed uses would intensify uses on the project site compared to existing conditions, which would increase the potential for pollutants of concern to be generated on the project site and discharged to surface waters during storm events. Increased vehicle trips to and from the project site could result in a greater potential for leaks of fuels and lubricants, tire wear particulates, brake dust, and fallout from exhaust emissions to convey petroleum hydrocarbons, heavy metals, and sediment off site during storm events. The proposed landscaping could contain residual pesticides and nutrients used for landscape maintenance. The intensification of land uses could result in increased trash generation over existing conditions.

Project operation and maintenance would be subject to the San Francisco Bay RWQCB's MRP, Order No. R2-2022-0018, as amended by Order No. R2-2023-0019, NPDES Permit No. CAS612008. Provision C.3 of the MRP sets forth appropriate and site-specific source control, site design, and stormwater treatment measures for new and redevelopment projects to address both soluble and insoluble stormwater runoff pollutant discharges and prevent increases in runoff flows from new projects. According to the Stormwater Requirements Checklist, the proposed project is considered a regulated project because it is a redevelopment project that would create and/or replace more than 5,000 square feet of impervious surface (collectively over the entire project site). Regulated projects are required to implement LID source control, site design, and stormwater treatment BMPs. Source control BMPs are preventative measures that are implemented to prevent the introduction of pollutants into stormwater. Site design BMPs are stormwater management strategies that emphasize conservation and use of existing site features to reduce the amount of runoff and pollutant loading generated from a project site. Source control BMPs and site design BMPs applicable to the proposed project are detailed in the Stormwater Requirements Checklist completed for the proposed project, which is provided as Appendix D. Stormwater treatment BMPs are structural BMPs designed to treat and reduce pollutants in stormwater runoff prior to releasing it to receiving waters. Pursuant to Provision C.3 of the MRP, stormwater from the project site would be directed to the proposed vegetated areas and would be treated by flow-through planters (biotreatment) before being discharged to the existing stormwater infrastructure in the surrounding area, similar to existing conditions.

As previously discussed, infiltration of stormwater could affect groundwater quality in areas of shallow groundwater. The proposed project would be required to implement operational BMPs

(including source control, site design, and Low Impact Development BMPs) to treat stormwater before it could reach groundwater. These proposed BMPs would treat stormwater runoff on site, and would reduce the volume of stormwater and the infiltration of pollutants into groundwater during operation. Furthermore, when stormwater is infiltrated, soil and plants absorb and filter pollutants and reduce the potential for pollutants of concern to reach groundwater. Therefore, infiltration of stormwater at the project site during operation would not substantially degrade groundwater quality.

In conclusion, compliance with the requirements of the MRP and *COA: Stormwater Requirements*, including incorporation of operational BMPs to target pollutants of concern, would ensure that impacts related to violation of waste discharge requirements and water quality standards and degradation of water quality would not occur.

b) Would the project substantially decrease groundwater supplies or interfere substantially with groundwater recharge such that the project may impede sustainable groundwater management of the basin?

The City of Berkeley is located within the Santa Clara Valley Groundwater Basin, East Bay Plain Subbasin, which encompasses approximately 122 square miles in Alameda and Contra Costa counties. The East Bay Plain Subbasin generally extends north to south from the San Pablo Bay to the Niles Cone Groundwater Basin near Hayward. A substantial amount of artificial fill (thicknesses ranging from 1 to 50 feet) has been placed within the basin, with the thickest deposits found nearer San Francisco Bay. Historical groundwater levels in the East Bay Plain Subbasin have varied between 10 to 140 feet below mean sea level; however, levels have been rising continuously since the 1950s.[52]

As previously discussed, according to the Phase 1 ESA[53] prepared for the proposed project, the depth to groundwater at the project site is approximately 17 feet bgs. Construction of the proposed project is anticipated to require excavation to a maximum depth of 6 feet for construction of utilities, drainage facilities, and parking facilities. Based on the depth to groundwater at the project site and the maximum depth of excavation, groundwater dewatering is not anticipated to be required during construction. If groundwater is encountered during excavation and groundwater dewatering is required, dewatering would be temporary and would not result in long-term lowering of the groundwater levels.

In addition, as provided above, the proposed project would replace all existing impervious surface area, resulting in no net change in the total impervious surface area at the project site. Therefore, implementation of the proposed project would not result in a change in the potential for infiltration to occur at the project site from existing conditions. Further, any change in infiltration at the project

[52] California Department of Water Resources (DWR). 2004. *California's Groundwater Bulletin 118 – Santa Clara Valley Groundwater Basin, East Bay Plain Subbasin*. February 27. Website: water.ca.gov/Programs/Groundwater-Management/Bulletin-118 (accessed March 2025).

[53] ACC Environmental Consultants. 2024. *Phase I Environmental Site Assessment Report, 1685 Shattuck Avenue/2109 Virginia Street, ACC Project Number: 10230-001.00.* February 9.

site would be minimal compared to the size of the groundwater basin and would not be anticipated to result in a net decrease in groundwater and aquifer levels.

Water supply to the proposed project would be provided by the EBMUD water system, which is supplied from the Mokelumne River.[54] Because EBMUD does not use groundwater from the East Bay Plain Subbasin for municipal water supply, water use during operation of the proposed project would not affect groundwater. Additionally, on-site groundwater extraction during operation would not occur. Therefore, no depletion of the underlying aquifer would occur during the operational phase of the proposed project. For the reasons listed above, impacts related to the decrease of groundwater supplies or interference with groundwater recharge would not occur.

c) Would the project substantially alter the existing drainage pattern of the site or area, including through the alteration of the course of a stream or river or through the addition of impervious surfaces, in a manner which would: (i) result in substantial erosion or siltation on- or off-site; (ii) substantially increase the rate or amount of surface runoff in a manner which would result in flooding on or off site; (iii) create or contribute runoff water which would exceed the capacity of existing or planned stormwater drainage systems or provide substantial additional sources of polluted runoff; or (iv) impede or redirect flood flows?

Erosion or Siltation. The proposed project would not alter the course of a stream or a river. Site preparation and grading/excavation activities may slightly and temporarily alter on-site drainage; however, the existing drainage patterns would generally be maintained and would not be substantially altered or modified. During construction, excavated soil would be exposed, and there would be an increased potential for soil erosion and sedimentation compared to existing conditions. Compliance with *COA: Stormwater Requirements* and implementation of Erosion Control and Sediment Control BMPs would reduce impacts related to erosion and siltation.

The proposed project would replace all existing impervious surface area, resulting in no net change in the total impervious surface area at the project site. The impervious surfaces would not be prone to on-site erosion or siltation because no soil would be included in these areas. The remaining portion of the site would consist of pervious surface area, which would contain landscaping that would minimize on-site erosion and siltation by stabilizing the soil. Therefore, on-site erosion and siltation impacts would be minimal. Additionally, compliance with MRP requirements and standard conditions of approval require applicants to establish and maintain drainage patterns so as to not adversely affect adjacent properties and rights-of-way. For these reasons, potential on- and off-site erosion and siltation impacts would not occur.

Flooding. As indicated above, the proposed project would not alter the course of a stream or river. However, the project would increase the amount of impervious surface area on the project site, which, without compliance with regulatory requirements, has the potential to increase the volume and rate of stormwater runoff discharged from the project site. The proposed project would convey stormwater runoff to proposed vegetated areas on the project site and would be treated by flow-through planters (biotreatment) before connecting off site to the City's existing off-site storm drain

[54] East Bay Municipal Utility District. 2021. Water Supply. Website: www.ebmud.com/water/about-your-water/water-supply (accessed March 2025).

system within Shattuck Avenue and Virginia Street. The City of Berkeley Public Works Department would review the drainage plans to ensure they comply with City standards and to verify that the project would not increase downstream flooding.

Storm Drain Capacity. As described above, stormwater runoff from the project site would discharge to existing storm drain infrastructure in the vicinity of the project site. Coordination with the Berkeley Public Works Department in review of the project drainage plans and compliance with existing requirements would ensure that impacts related to exceedance of storm drain capacity would not occur.

As described above in Section 4.10.a, the proposed project would comply with all applicable NPDES regulations and City COAs, including the MRP. Construction and operational BMPs would be implemented to reduce pollutants of concern in stormwater runoff from the project site. Additionally, groundwater dewatering, if required, would comply with the requirements of the City's TMD to ensure that dewatering activities do not introduce pollutants into surface waters. Compliance with existing regulations would ensure that potential impacts related to additional sources of polluted runoff would not occur.

Flood Flows. According to FEMA Flood Insurance Rate Map (FIRM) No. 06001C0019G,[55] the project site is within Zone X, Areas of Minimal Flood Hazard, and is not located within a 100-year floodplain.

Project construction would comply with the requirements of *COA: Stormwater Requirements* and would include the implementation of construction BMPs, including site design and source control measures to control the rate and amount of on-site surface runoff and to direct flows to ensure that stormwater runoff from the construction site does not result in on- or off-site flooding. Compliance with *COA: Stormwater Requirements* would ensure that construction impacts related to a substantial increase in the rate or amount of surface runoff that would result in flooding and impede or redirect flood waters would not occur.

As previously discussed, development of the proposed project would not result in a net increase in impervious surface area at the project site, which would not alter the rate and volume of stormwater runoff at the project site from existing conditions. In addition, as discussed above, the project site is not mapped within a 100-year floodplain and therefore would not impede or redirect flood flows. Additionally, compliance with the MRP would ensure that operational activities would not result in a substantial increase in the rate or amount of surface runoff or impede or redirect flood flows in a manner that would result in on- or off-site flooding, and impacts would not occur.

d) In flood hazard, tsunami, or seiche zones, would the project risk release of pollutants due to project inundation?

As discussed above, the project site is not within a 100-year flood zone; therefore, there is no risk of pollutants from the project site due to project inundation.

[55] Federal Emergency Management Agency (FEMA). 2009. Flood Insurance Rate Map (FIRM) No. 06001C0019G. August 3. Website: https://msc.fema.gov/portal/search?AddressQuery=2942%20college%20avenue%2C%20berkeley (accessed March 2025).

The project site is approximately 2.2 miles east of San Francisco Bay and approximately 14 miles east of the Pacific Ocean. Based on the distance from the San Francisco Bay and Pacific Ocean, the project site would not be susceptible to inundation from a tsunami.

Seiches are oscillations in enclosed bodies of water that are caused by a number of factors, most often wind or seismic activity. The nearest major water feature is Aquatic Park, which is located approximately 2 miles southwest of the project site. Given the distance of the nearest large standing body of water from the project site, there is a minimal risk of a release of pollutants from the project site due to seiche-related flooding.

Because the project site is not located within a 100-year flood zone and is located a substantial distance from the San Francisco Bay, Pacific Ocean, and nearest body of water, implementation of the proposed project would not result in a flood hazard, tsunami, or seiche risking release of pollutants due to project site inundation.

e) Would the project conflict with or obstruct implementation of a water quality control plan or sustainable groundwater management plan?

The project site is within the jurisdiction of the San Francisco Bay RWQCB. The RWQCB adopted a Basin Plan[56] that designates beneficial uses for all surface and groundwater within its jurisdiction and establishes the water quality objectives and standards necessary to protect those beneficial uses. As discussed in detail above in Section 4.10.a, the proposed project would comply with existing NPDES requirements and would implement construction and operational BMPs to reduce pollutants of concern in stormwater runoff. Additionally, during construction, any dewatered groundwater would comply with the requirements of the TMD. Compliance with these regulatory requirements would ensure that the proposed project would not degrade or alter water quality, cause the receiving waters to exceed the water quality objectives, or impair the beneficial use of receiving waters. As such, the proposed project would not result in water quality impacts that would conflict with the RWQCB Basin Plan. Construction and operational impacts related to a conflict with the Basin Plan would not occur.

The SGMA, which was enacted in September 2014, requires governments and water agencies of high- and medium-priority basins to halt overdraft of groundwater basins. The SGMA requires the formation of local groundwater sustainability agencies, which are required to adopt Groundwater Sustainability Plans to manage the sustainability of the groundwater basins. The project site is located within the Santa Clara Valley Groundwater Basin, East Bay Plain Subbasin, which is managed by EBMUD. The East Bay Plain Subbasin is identified by the California Department of Water

[56] San Francisco Bay Regional Water Quality Control Board (RWQCB). 2023. Water Quality Control Plan (Basin Plan) for the San Francisco Bay Basin, amendments adopted up through March 7, 2023.

Resources (DWR) as a medium priority basin[57] and is therefore subject to the requirements of SGMA, and has prepared a Groundwater Sustainability Plan (GSP).[58]

As previously discussed, required compliance with existing regulations (including the NPDES permit requirements, the MRP, and City COAs) would ensure the protection of groundwater and surface water quality during construction and operation of the project and that the proposed project would not result in impacts to surface water and groundwater quality that could result in conflicts with the GSP for the East Bay Plain Subbasin.

In addition, as described above, operation of the proposed project would not involve the use of groundwater for water supply, and groundwater dewatering activities and alteration of impervious surfaces under the project would result in no impacts related to groundwater recharge or groundwater supplies. Therefore, the proposed project would not conflict with or obstruct implementation of the Basin Plan or the GSP for the East Bay Plain Subbasin.

4.10.3 Conclusion

Given the above analysis, development of the proposed project would not change the conclusions of the Housing Element EIR, and there would be **no impact** peculiar to the proposed project or the project site related to hydrology and water quality. Impacts related to hydrology and water quality would remain less than significant, as identified in the Housing Element EIR. No further environmental analysis related to this topic is required pursuant to Sections 15183 and 15162 of the *State CEQA Guidelines*.

[57] California Department of Water Resources (DWR). n.d. *SGMA Basin Prioritization Dashboard*. Website: gis.water.ca.gov/app/bp-dashboard/final (accessed March 2025).

[58] East Bay Municipal Utility District GSA and City of Hayward GSA. 2022. East Bay Plan Subbasin, Groundwater Sustainability Plan. January.

4.11 LAND USE AND PLANNING

	Significant Impact Identified in Housing Element EIR	Project Contributes to Identified Housing Element EIR Impact	New or More Severe Significant Impact Peculiar to the Project	No Impact
Would the project:				
a. Physically divide an established community?	☐	☐	☐	☒
b. Cause a significant environmental impact due to a conflict with any land use plan, policy, or regulation adopted for the purpose of avoiding or mitigating an environmental effect?	☐	☐	☐	☒

4.11.1 Housing Element EIR Analysis

Section 4.10 of the Housing Element EIR analyzed potential impacts related to land use and planning. The Housing Element EIR determined that all impacts related to land use and planning would either be less than significant, or no impact would occur. No mitigation was prescribed. The Housing Element EIR determined that because the Housing Element includes policies and programs to encourage housing development on underutilized and vacant sites and along established commercial corridors and neighborhoods, development facilitated by the Housing Element would not physically divide an established community. In addition, the Housing Element EIR determined that implementation of the Housing Element would be consistent with the goals and policies of Plan Bay Area 2050, the City's General Plan, and the BMC.

4.11.2 Project Impacts

a) Would the project physically divide an established community?

The project site is located in an urbanized area of the city and is generally surrounded by existing development, including single- and multi-family residential and commercial uses. Virginia Street bounds the project site to the south, followed by the University Park Apartments complex, and Shattuck Avenue bounds the project site to the west. Redevelopment of the project site with the proposed mixed-use residential building would represent a general continuation of the type, scale, and intensity of development within the vicinity of the project site. In addition, the proposed project would not include any modifications to the existing roadways in the vicinity of the project site. As such, the proposed project would not physically divide an established community.

b) Would the project cause a significant environmental impact due to a conflict with any land use plan, policy, or regulation adopted for the purpose of avoiding or mitigating an environmental effect?

The project site has a General Plan designation of Neighborhood Commercial and is located within three zoning districts. Approximately 19,788 square feet of the project site is in the North Shattuck Commercial (C-NS) zone, approximately 1,970 square feet is in the Multiple-Family Residential (R-4) zone, and approximately 584 square feet is in the Restricted Multiple-Family Residential (R-2A) zone. The project site has also been identified as an Opportunity Site for residential development in the City's Housing Element.

The proposed project would be consistent with applicable General Plan policies and the Neighborhood Commercial General Plan land use designation for the project site, which provides for pedestrian-oriented, neighborhood-serving commercial development, and multi-family residential structures similar to the proposed project. Development standards for the C-E zoning district are specified in the BMC. The purpose of the C-NS zone is to encourage the maintenance and establishment of retail and service activities that provide goods and services to serve the residents of the adjacent and outlying neighborhoods, provide locations for other activities compatible with these commercial activities, promote compatibility between such commercial areas and adjacent residential neighborhoods, and encourage an adequate commercial and residential mix along Shattuck Avenue. The purpose of the R-4 zone is to make available housing for persons who desire both convenience of location and a reasonable amount of usable open space. The purpose of the R-2A zone is to make available housing for persons who desire apartment-type accommodations with a maximum of open space. The proposed project would be consistent with the purposes of these zoning districts and, pursuant to the BMC, would be consistent with the development standards of these zoning districts with approval of the following permits:

- Administrative Use Permit, pursuant to BMC 23.322.070(D)(1), for exceeding the parking maximum
- Administrative Use Permit, pursuant to BMC Section 23.326.070 to demolish a non-residential building
- Use Permit, pursuant to BMC 23.326.070(A), for demolition of a non-residential main building
- Use Permit, pursuant to BMC 23.204.020(A), for construction of a multi-family building
- Use Permit, pursuant to BMC 23.204.304(A), for construction of 2,000 square feet of new floor area

These permits would allow an increase in building height, lot coverage, and building footprint, as well as setback waivers in order to accommodate the density bonus units. The City's Zoning Adjustments Board would consider granting the requested Administrative Use Permits, Use Permits, and other permits as it reviews the proposed project. With approval of the above permits, the proposed project would be consistent with the BMC.

Although the proposed project would develop the project site with a greater residential density than detailed in the C-NS, R-4, and R-2A zoning districts, the proposed project would be consistent with the criteria of the State Density Bonus Law by providing nine affordable to very low-income units (15 percent) and nine affordable to moderate income units (15 percent), as defined by Section 50105 of the Health and Safety Code.

In addition, because the proposed project would develop residential uses on the project site, the proposed project would be consistent with the City's Housing Element, which identifies the project site as an Opportunity Site.

The proposed project would not cause a significant environmental impact due to a conflict with any land use plan, policy, or regulation adopted for the purpose of avoiding or mitigating an

environmental effect, and the proposed project would have no impact, either individually or cumulatively, related to land use and planning.

4.11.3 Conclusion

Given the above analysis, development of the proposed project would not change the conclusions of the Housing Element EIR, and there would be **no impact** peculiar to the proposed project or the project site related to land use and planning. Impacts related to land use and planning would remain less than significant, as identified in the Housing Element EIR. No further environmental analysis related to this topic is required pursuant to Sections 15183 and 15162 of the *State CEQA Guidelines*.

4.12 MINERAL RESOURCES

	Significant Impact Identified in Housing Element EIR	Project Contributes to Identified Housing Element EIR Impact	New or More Severe Significant Impact Peculiar to the Project	No Impact
Would the project:				
a. Result in the loss of availability of a known mineral resource that would be of value to the region and the residents of the state?	☐	☐	☐	☒
b. Result in the loss of availability of a locally-important mineral resource recovery site delineated on a local general plan, specific plan or other land use plan?	☐	☐	☐	☒

4.12.1 Housing Element EIR Analysis

Section 1.6 of the Housing Element EIR discussed issues determined to have a less than significant impact due to the unique conditions of the city and therefore were not analyzed in further detail in the Housing Element EIR, including mineral resources. The Housing Element EIR states that the city does not have any significant mineral resources or active mining sites within its boundaries, and that implementation of the Housing Element only applies to an urban area that is not compatible with, identified for, or used for mineral extraction. Therefore, the Housing Element EIR determined that development facilitated by the Housing Element would not result in the loss of availability of a known mineral resource that would be of value to the region and residents of the State or result in the loss of availability of a locally important mineral resource recovery site delineated on a local general plan or other land use plan.

4.12.2 Project Impacts

The project site is located within an urban area on an infill site. There are no known mineral resources within or in the vicinity of the project site.[59] As such, the proposed project would not result in the loss of availability of a known mineral resource of value to the region or residents of the State or any locally important mineral resource recovery site, and no impact, either individually or cumulatively, related to the loss of mineral resources would occur.

4.12.3 Conclusion

Given the above analysis, development of the proposed project would not change the conclusions of the Housing Element EIR, and there would be **no impact** peculiar to the proposed project or the project site related to mineral resources. Impacts on mineral resources would remain less than significant as identified in the Housing Element EIR. No further environmental analysis related to this topic is required pursuant to Sections 15183 and 15162 of the *State CEQA Guidelines*.

4.13 NOISE

	Significant Impact Identified in Housing Element EIR	Project Contributes to Identified Housing Element EIR Impact	New or More Severe Significant Impact Peculiar to the Project	No Impact
Would the project result in:				
a. Generation of a substantial temporary or permanent increase in ambient noise levels in the vicinity of the project in excess of standards established in the local general plan or noise ordinance, or applicable standards of other agencies?	☒	☐	☐	☒
b. Generation of excessive groundborne vibration or groundborne noise levels?	☐	☐	☐	☒
c. For a project located within the vicinity of a private airstrip or an airport land use plan or, where such a plan has not been adopted, within 2 miles of a public airport or public use airport, would the project expose people residing or working in the project area to excessive noise levels?	☐	☐	☐	☒

4.13.1 Housing Element EIR Analysis

Section 4.11 of the Housing Element EIR analyzed potential impacts related to noise. The Housing Element EIR determined that potential impacts related to operation noise, vibration, and airport noise would be less than significant; however, impacts related to construction noise were determined to be significant and unavoidable. No feasible mitigation was identified or prescribed. The Housing Element EIR also identified a cumulatively considerable impact related to construction noise.

The Housing Element EIR determined that although future housing development accommodated by the Housing Element could include mechanical equipment (i.e., heating, ventilation, and air conditioning [HVAC]), delivery and trash trucks, and other noise-generating activities, these activities would be similar to the existing noise environment. In addition, the Housing Element EIR determined that the increase in mobile noise would not result in a perceptible (3 A-weighted decibels [dBA] or greater) increase, and on-site activities would be required to comply with applicable noise standards in the BMC. Further, the Housing Element EIR determined that future development accommodated by the Housing Element would not involve operational activities that would result in substantial vibration levels (e.g., use of heavy equipment or machinery) and construction activities would be required to implement City COAs that address vibration. The Housing Element EIR also indicated that future development would not be located in the vicinity of an airport and would therefore not expose people residing or working in the project area to excessive noise levels.

However, the Housing Element EIR determined that while construction associated with future development facilitated by the Housing Element would be required to comply with the allowed daytime construction hours as set forth in the BMC and therefore would not occur during nighttime hours when people are more sensitive to noise, larger developments could involve construction with lengthy durations, substantial soil movement, use of large, heavy-duty equipment, and/or pile

driving near noise-sensitive land uses that would exceed the applicable Federal Transit Authority (FTA) daytime noise limits. Although implementation of City COAs for construction noise would reduce construction noise levels, the Housing Element EIR concluded that implementation of City COAs may not reduce such noise levels to below significance thresholds for every project. Therefore, impacts generated by temporary construction noise were determined to be significant and unavoidable.

4.13.2 Project Impacts

Noise is usually defined as unwanted sound and consists of any sound that may produce physiological or psychological damage and/or interfere with communication, work, rest, recreation, or sleep. Several noise measurement scales exist that are used to describe noise in a particular location. A decibel (dB) is a unit of measurement that indicates the relative intensity of a sound. Sound levels measured in decibels are calculated on a logarithmic basis. An increase of 10 dB represents a 10-fold increase in acoustic energy, while 20 dB is 100 times more intense, and 30 dB is 1,000 times more intense. Each 10 dB increase in sound level is perceived as approximately a doubling of loudness; similarly, each 10 dB decrease in sound level is perceived as half as loud. Sound intensity is normally measured through the A-weighted decibel sound level. This scale gives greater weight to the frequencies of sound to which the human ear is most sensitive. The A-weighted sound level is the basis for 24-hour sound measurements that better represent human sensitivity to sound at night.

As noise spreads from a source, it loses energy so that the farther away the noise receiver is from the noise source, the lower the perceived noise level would be. Geometric spreading causes the sound level to attenuate or be reduced, resulting in a 6 dB reduction in the noise level for each doubling of distance from a single point source of noise to the noise sensitive receptor of concern.

There are many ways to rate noise for various time periods, but an appropriate rating of ambient noise affecting humans also accounts for the annoying effects of sound. Equivalent continuous sound level (L_{eq}) is the total sound energy of time-varying noise over a sample period. However, the predominant rating scales for human communities in the State of California are the L_{eq}, the Community Noise Equivalent Level (CNEL), and the day-night average noise level (L_{dn}) based on dBA. CNEL is the time-varying noise over a 24-hour period, with a 5 dBA weighting factor applied to the hourly L_{eq} for noises occurring from 7:00 p.m. to 10:00 p.m. (defined as relaxation hours) and a 10 dBA weighting factor applied to noise occurring from 10:00 p.m. to 7:00 a.m. (defined as sleeping hours). L_{dn} is similar to the CNEL scale, but without the adjustment for events occurring during the evening relaxation hours. CNEL and L_{dn} are within 1 dBA of each other and are normally exchangeable. The noise adjustments are added to the noise events occurring during the more sensitive hours.

A project would have a significant noise effect if it would substantially increase the ambient noise levels for adjoining areas or conflict with adopted environmental plans and goals of applicable regulatory agencies, including, as appropriate, the City of Berkeley.

Certain land uses are considered more sensitive to noise than others. Examples of these land uses include residential areas, educational facilities, hospitals, childcare facilities, and senior housing. The

project site is surrounded by a mix of uses within an urban area of the city. The project site is located within the Elmwood neighborhood within the city, which is characterized by a mix of commercial and residential uses. The project site is less than 10 feet from the closest noise-sensitive receptors (residential uses) located west of the project boundary.

The City of Berkeley General Plan addresses excessive noise in the Environmental Management Element.[60] Major noise sources in Berkeley include transportation, industrial plant noise, and activities associated with neighborhoods. The General Plan includes a map of the existing noise levels throughout the City. According to the General Plan, the project site is exposed to noise levels reaching 70 dBA L_{dn}. The General Plan also provides policies and actions to protect the community from excessive noise levels. Policies and actions applicable to the proposed project include the following:

- **Policy EM-43: Noise Reduction.** Reduce significant noise levels and minimize sources of noise.
- **Policy EM-44: Noise Prevention and Elimination.** Protect public health and welfare by eliminating existing noise problems where feasible and by preventing significant future degradation of the acoustic environment.
- **Policy EM-45: Traffic Noise.** Work with local and regional agencies to reduce local and regional traffic, which is the single largest source of unacceptable noise in the city.
- **Policy EM-46: Noise Mitigation.** Require operational limitations and all feasible noise buffering for new uses that generate significant noise impacts near residential, institutional, or recreational uses.
- **Policy EM-47: Land Use Compatibility.** Ensure that noise-sensitive uses, including, but not limited to, residents, child-care centers, hospitals, and nursing homes, are protected from detrimental noise levels.
    - **Action EM-47-A:** Noise-sensitive development proposals should be reviewed with respect to the Land Use Compatibility Guidelines below (see Table 4.13.A).

If the noise level is within the “normally acceptable” level, noise exposure would be acceptable for the intended land use. Development may occur without requiring an evaluation of the noise environment unless the use could generate noise impacts on adjacent uses.

If the noise level is within the “conditionally acceptable” level, noise exposure would be conditionally acceptable; a specified land use may be permitted only after a detailed analysis of the noise environment and the project characteristics is conducted to determine whether noise insulation or protection features are required. Such noise insulation features may include measures to protect noise-sensitive outdoor activity areas (e.g., at residences, schools, or parks) or may include building sound insulation treatments such as sound-rated windows to protect interior spaces in sensitive receptors.

60 Berkeley, City of. 2001a. *City of Berkeley General Plan*.

Table 4.13.A: General Plan Noise and Land Use Compatibility Guidelines

Land Use Category	Exterior Noise Exposure (L_{dn})					
	55	60	65	70	75	80
Residential, Hotels, and Motels						
Outdoor Sports and Recreation, Neighborhood Parks and Playgrounds						
Schools, Libraries, Museums, Hospitals, Personal Care, Meeting Halls, Churches						
Office Buildings, Business Commercial and Professional						
Auditoriums, Concert Halls, Amphitheaters						

NORMALLY ACCEPTABLE: Specified land use is satisfactory, based upon the assumption that any buildings involved are of normal conventional construction, without any special noise insulation requirements.
CONDITIONALLY ACCEPTABLE: Specific land use may be permitted only after detailed analysis of the noise reduction requirements and needed noise insulation features have been incorporated.
UNACCEPTABLE: New construction or development should generally not be undertaken unless all feasible noise mitigation options have been analyzed and appropriate mitigations incorporated into the project to reduce exposure of people to unacceptable noise levels.

Source: General Plan (City of Berkeley 2001b).

If the noise level is within the "normally unacceptable" level, analysis and mitigation are required. Development should generally not be undertaken unless adequate noise mitigation options have been analyzed and appropriate mitigations incorporated into the project to reduce the exposure of people to unacceptable noise levels.

If the noise level is within the "clearly unacceptable" level, new construction or development should not be undertaken unless all feasible noise mitigation options have been analyzed and appropriate mitigations incorporated into the project to reduce exposure of people to unacceptable noise levels.

The City has also established standard COAs for all development projects, which are provided in Section 7.0 of this document and are identified below, as applicable.

BMC Title 13: Public Peace, Morals and Welfare, Chapter 13.40 (Community Noise) addresses noise impacts. The ordinance establishes exterior and interior noise standards at receiving land uses and construction activity noise regulations as included below in Table 4.13.B.

The City's exterior and interior noise limits are shown in Table 4.13.B. The hourly noise level standards vary based on the receiving land use type and the time period. In order to assess intermittent or maximum noise levels, the time-weighted noise level additions presented in BMC Section 13.40.050 and described in further detail below, should be applied.

The maximum noise levels vary based on the receiving land use type and the time period. The ordinance also limits noise generated by construction. The ordinance restricts construction activities to weekdays between the hours of 7:00 a.m. and 7:00 p.m., and on weekdays and holidays between 9:00 a.m. and 8:00 p.m., except for emergency work.

Table 4.13.B: Exterior and Interior Noise Limits, BMC Section 13.40.050

Zoning District[1]	Time Period	Noise Level (dBA)
Exterior Noise Limits		
R-1, R-2, R-1A, R-2A, and ES-R	7:00 AM–10:00 PM 10:00 PM–7:00 AM	55 45
R-3 and above	7:00 AM–10:00 PM 10:00 PM–7:00 AM	60 55
Commercial	7:00 AM–10:00 PM 10:00 PM–7:00 AM	65 60
Industry	Anytime	70
Interior Noise Limits		
All	7:00 AM–10:00 PM 10:00 PM–7:00 AM	45 40

Source: Municipal Code Tables 13.40-1 and 13.40-2 (City of Berkeley 2014).

[1] R-1 = Single-Family Residential
R-2 = Restricted Two-Family Residential
R-1A = Limited Two-Family Residential
R-2A = Restricted Multiple-Family Residential
ES-R = Environmental Safety-Residential
R-3 = Multiple-Family Residential

dBA = A-weighted decibels

The following noise standards are outlined in BMC Chapter 13.40.050:

A. Maximum permissible sound levels shall be determined by the zoning district of the property subject to the noise, not the property from which the noise originates.

1. The noise standards for the various categories of land use in Table 6 *[of BMC Chapter 13.40.050 and shown in Table 4.13.B of the Initial Study Checklist*] shall, unless otherwise specifically indicated in other codes, apply to all such property within a designated zone.

2. No person shall operate or cause to be operated any source of sound at any location within the incorporated City or allow the creation of any noise on property owned, leased, occupied or otherwise controlled by such person, which causes the sound level when measured on any other property to exceed:

a. The noise standard for that land use as specified in Table 6 [*Table 4.13.B of the Initial Study*] for a cumulative period of more than 30 minutes in any hour; or

b. The noise standard for that land use as specified in Table 6 [*Table 4.13.B of the Initial Study*] plus 5 dBA for a cumulative period of more than 15 minutes in any hour; or

c. The noise standard for that land use as specified in Table 6 [*Table 4.13.B of the Initial Study*] plus 10 dBA for a cumulative period of more than 5 minutes in any hour; or

d. The noise standard for that land use as specified in Table 6 [*Table 4.13.B of the Initial Study*] plus 15 dBA for a cumulative period of more than 1 minute in any hour; or

e. The noise standard for that land use as specified in Table 6 [*Table 4.13.B of the Initial Study*] plus 20 dBA for any period of time.

The following interior noise standards are outlined in BMC Section 13.40.060:

1) No person shall operate or cause to be operated within a multi-family dwelling unit any source of sound or allow the creation of any noise which causes the sound level when measured inside a neighboring dwelling unit to exceed:

   a. The noise standard as specified in Table 6 [*Table 4.13.B of the Initial Study*] for a cumulative period of more than 5 minutes in any hour; or

   b. The noise standard as specified in Table 6 [*Table 4.13.B of the Initial Study*] plus 5 dBA for a cumulative period of more than one minute in any hour; or

   c. The noise standard as specified in Table 6 [*Table 4.13.B of the Initial Study*] plus 10 dBA for any period of time.

Section 13.40.070 of the BMC restricts construction activities to weekdays between the hours of 7:00 a.m. and 7:00 p.m. and on weekends and holidays between 9:00 a.m. and 8:00 p.m., except for emergency work. Construction activities are divided into two categories: mobile equipment and stationary equipment. Mobile equipment, as defined by BMC Section 13.40.070, includes sound levels for the nonscheduled, intermittent, short-term operation for less than 10 days of jackhammers, drills, saws, sander grinder, and similar tools. Stationary equipment, according to BMC Section 13.40.070, would be repetitively scheduled and in relatively long-term operation for longer than 10 days. Equipment used during construction of the proposed project would be considered stationary because construction would last longer than 10 days. Where technically and economically feasible, construction activities shall be conducted in such a manner that maximum sound levels at affected properties will not exceed those listed in Table 4.13.C below.

Table 4.13.C: Maximum Stationary Equipment Construction Noise Levels (dBA), Berkeley Municipal Code Section 13.40.070

	R-1, R-2 Residential	R-3 and above Multi-Family Residential	Commercial/ Industrial
Weekdays 7:00 AM to 7:00 PM	60	65	70
Weekends 9:00 AM to 8:00 PM and legal holidays	50	55	60

Source: Municipal Code Table 13.40-4 (City of Berkeley 2014).
R-1 = Single-Family Residential
R-2 = Restricted Two-Family Residential
R-3 = Multiple-Family Residential

a) Would the project result in generation of a substantial temporary or permanent increase in ambient noise levels in the vicinity of the project in excess of standards established in the local general plan or noise ordinance, or applicable standards of other agencies?

The following describes how the short-term construction and long-term operational noise impacts of the proposed project would not exceed established thresholds, according to the standards set forth above.

Short-Term (Construction) Noise Impacts. The closest sensitive receptors are the single-family residences adjacent to the eastern boundary of the project site (approximately 40 feet). Project construction would result in short-term noise that could affect these receptors. Maximum construction noise would be short-term, generally intermittent depending on the construction phase, and variable depending on receiver distance from the active construction zone. The duration of noise impacts generally would be from 1 day to several days depending on the phase of construction. The entire construction duration is expected to occur over approximately 21 months. The level and types of noise that would occur during construction are described below.

Short-term noise would occur during demolition, site preparation, grading, building construction, paving, and architectural coating activities. Table 4.13.D lists typical construction equipment noise levels (L_{max} or maximum instantaneous sound level) recommended for noise impact assessments, based on a distance of 50 feet between the equipment and a noise receptor (obtained from the Federal Highway Administration [FHWA] Roadway Construction Noise Model). Construction-related short-term noise levels would be higher than existing ambient noise levels currently in the project area but would no longer occur once construction of the project is completed.

Table 4.13.D: Typical Construction Equipment Noise Levels

Equipment Description	Acoustical Usage Factor (%)	Maximum Noise Level (L_{max}) at 50 Feet[1]
Backhoes	40	80
Compactor (ground)	20	80
Compressor	40	80
Cranes	16	85
Dozers	40	85
Dump Trucks	40	84
Excavators	40	85
Flat Bed Trucks	40	84
Forklift	20	85
Front-end Loaders	40	80
Graders	40	85
Impact Pile Drivers	20	95
Jackhammers	20	85
Pick-up Truck	40	55
Pneumatic Tools	50	85
Pumps	50	77
Rock Drills	20	85
Rollers	20	85
Scrapers	40	85
Tractors	40	84
Welder	40	73

Source: Roadway Construction Noise Model (FHWA 2006).
Note: Noise levels reported in this table are rounded to the nearest whole number.
[1] Maximum noise levels were developed based on Spec 721.560 from the Central Artery/Tunnel (CA/T) program to be consistent with the City of Boston's Noise Code for the "Big Dig" project.
L_{max} = maximum instantaneous sound level

Two types of short-term noise could occur during construction of the proposed project. The first type involves construction crew commutes and the transport of construction equipment and

materials to the site, which would incrementally increase noise levels on roads leading to the site. As shown in Table 4.13.D, there would be a relatively high single-event noise exposure potential at a maximum level of 84 dBA L_{max} with trucks passing at 50 feet.

The second type of short-term noise is related to noise generated during excavation, grading, and construction on the project site. Construction is performed in discrete steps, or phases, each with its own mix of equipment and, consequently, its own noise characteristics. These various sequential phases would change the character of the noise generated on site. Therefore, the noise levels vary as construction progresses. Despite the variety in the type and size of construction equipment, similarities in the dominant noise sources and patterns of operation allow construction-related noise ranges to be categorized by work phase.

Table 4.13.D lists maximum noise levels recommended for noise impact assessments for typical construction equipment, based on a distance of 50 feet between the equipment and a noise receptor. Typical maximum noise levels range up to 87 dBA L_{max} of 85 dBA L_{eq} at 50 feet during the noisiest construction phases. The site preparation phase, including excavation and grading of the site, tends to generate the highest noise levels because earthmoving machinery is the noisiest construction equipment. Earthmoving equipment includes excavating machinery such as backfillers, bulldozers, draglines, and front loaders. Earthmoving and compacting equipment includes compactors, scrapers, and graders. Typical operating cycles for these types of construction equipment may involve 1 or 2 minutes of full-power operation followed by 3 or 4 minutes at lower power settings.

As identified above, the project site is approximately 40 feet from the closest noise-sensitive receptors (residential uses) located east of the project site boundary. The 40-foot distance would increase the noise level by a minimal amount compared to the noise level measured at 50 feet from the construction activity. Therefore, the closest off-site residences may be subject to short-term construction noise levels of approximately 85 dBA L_{eq} when construction is occurring at the eastern project site boundary.

According to the City's Noise Ordinance (BMC Section 13.40.070), noise from construction activities is permitted to exceed the established maximum allowable noise performance standards, provided the activities occur during the permissible hours for construction and all technically and economically feasible noise reduction measures are incorporated. Construction impacts at residential land uses, although permitted and exempted during the construction hours specified by the City, would exceed the suggested maximum noise levels for stationary sources as established by the City.

Implementation of *COA: Construction Noise Reduction Program* would reduce construction noise impacts on the off-site nearby sensitive receptors and would require the project sponsor to implement all technically and economically feasible measures to reduce construction noise, consistent with the requirements of BMC Section 13.40.070.

> COA: Construction Noise Reduction Program.The applicant shall develop a site-specific noise reduction program prepared by a qualified acoustical consultant to reduce construction noise impacts to the maximum extent feasible, subject to review and approval of the Zoning

Officer. The noise reduction program shall include the time limits for construction listed above, as measures needed to ensure that construction complies with BMC Section 13.40.070. The noise reduction program should include, but shall not be limited to, the following available controls to reduce construction noise levels as low as practical:

- Construction equipment should be well maintained and used judiciously to be as quiet as practical.
- Equip all internal combustion engine-driven equipment with mufflers, which are in good condition and appropriate for the equipment.
- Utilize "quiet" models of air compressors and other stationary noise sources where technology exists. Select hydraulically or electrically powered equipment and avoid pneumatically powered equipment where feasible.
- Locate stationary noise-generating equipment as far as possible from sensitive receptors when adjoining construction sites. Construct temporary noise barriers or partial enclosures to acoustically shield such equipment where feasible.
- Prohibit unnecessary idling of internal combustion engines.
- If impact pile driving is required, pre-drill foundation pile holes to minimize the number of impacts required to seat the pile.
- Construct solid plywood fences around construction sites adjacent to operational business, residences or other noise-sensitive land uses where the noise control plan analysis determines that a barrier would be effective at reducing noise.
- Erect temporary noise control blanket barriers, if necessary, along building facades facing construction sites. This mitigation would only be necessary if conflicts occurred which were irresolvable by proper scheduling. Noise control blanket barriers can be rented and quickly erected.
- Route construction related traffic along major roadways and away from sensitive receptors where feasible.

COA: Construction Noise Management – Public Notice Required.At least two weeks prior to initiating any construction activities at the site, the applicant shall provide notice to businesses and residents within 500 feet of the project site. This notice shall at a minimum provide the following: (1) project description, (2) description of construction activities during extended work hours and reason for extended hours, (3) daily construction schedule (i.e., time of day) and expected duration (number of months), (4) the name and phone number of the Project Liaison for the project that is responsible for responding to any local complaints, and (5) that construction work is about to commence. The liaison would determine the cause of all construction-related complaints (e.g., starting too early, bad muffler, worker parking, etc.) and institute reasonable measures to correct the problem. A copy of such notice and methodology for distributing the notice shall be provided in advance to the City for review and approval.

COA: Construction Phases.The applicant shall provide the Zoning Officer with a schedule of major construction phases with start dates and expected duration, a description of the activities and anticipated noise levels of each phase, and the name(s) and phone number(s) of the individual(s) directly supervising each phase. The Zoning Officer or his/her designee shall have the authority to require an onsite meeting with these individuals as necessary to

ensure compliance with these conditions. The applicant shall notify the Zoning Officer of any changes to this schedule as soon as possible.

COA: Construction Hours. Construction activity shall be limited to between the hours of 7:00 a.m. and 6:00 p.m. on Monday through Friday, and between 9:00 a.m. and 4:00 p.m. on Saturday. No construction-related activity shall occur on Sunday or any Federal Holiday.

COA: Construction Hours – Exceptions. It is recognized that certain construction activities, such as the placement of concrete, must be performed in a continuous manner and may require an extension of these work hours. Prior to initiating any activity that might require a longer period, the developer must notify the Zoning Officer and request an exception for a finite period of time. If the Zoning Officer approves the request, then two weeks prior to the expanded schedule, the developer shall notify businesses and residents within 500 feet of the project site describing the expanded construction hours. A copy of such notice and methodology for distributing the notice shall be provided in advance to the City for review and approval. The project shall not be allowed more than 15 extended working days.

COA: Project Construction Website. The applicant shall establish a project construction website with the following information clearly accessible and updated monthly or more frequently as changes warrant:

- Contact information (i.e., "hotline" phone number, and email address) for the project construction manager.
- Calendar and schedule of daily/weekly/monthly construction activities.
- The final Conditions of Approval, Mitigation Monitoring and Reporting Program, Transportation Construction Plan, Construction Noise Reduction Program, and any other reports or programs related to construction noise, air quality, and traffic.

Implementation of the City's standard COAs would reduce construction noise impacts to the extent feasible, as required by BMC Section 13.40.070. With implementation of the City's standard COAs, construction noise impacts would be reduced and no impact would occur.

Operational Noise Impacts. The proposed project would result in no impacts related to both traffic and stationary noise sources, as discussed below.

- Traffic Noise Impacts: Off-site traffic noise impacts would result in a significant impact if traffic noise levels increase by 4 dBA or more over ambient noise levels without the project. As discussed in Section 4.16, Transportation, the proposed project would generate a net increase of 436 daily trips. According to the City's General Plan, the current traffic volume of Shattuck Avenue over a 24-hour period is between 22,300 and 36,400 vehicles. A net increase of 436 daily trips would increase traffic noise by less than 1 dBA. This is below 4 dBA; therefore, there would be no impact.

- Stationary Source Noise Impacts: Stationary noise sources associated with the proposed project could include HVAC mechanical equipment and typical motor vehicle/parking area activities. As described above, the City establishes the acceptable daytime and nighttime maximum noise levels at receiving land uses. Daytime is considered to be between the hours of 7:00 a.m. and

10:00 p.m., and nighttime hours are between 10:00 p.m. and 7:00 a.m. BMC Section 13.40 establishes interior and exterior noise level standards (as measured at receiving sensitive land uses) not to be exceeded for more than 30 minutes any hour on commercial land uses as 60 dBA during nighttime hours and 65 dBA during daytime hours, and on residential land uses as 45 dBA during nighttime hours and 55 dBA during daytime hours. It is not expected that the proposed project would substantially increase noise levels over existing conditions and there would be no impact.

Based on the analysis above, the proposed project would not result in the generation of a substantial temporary or permanent increase in ambient noise levels in the vicinity of the project in excess of standards established in the local general plan or noise ordinance, or applicable standards of other agencies.

b) Would the project result in exposure of persons to or generation of excessive groundborne vibration or groundborne noise levels?

Vibrating objects in contact with the ground radiate vibration waves through various soil and rock strata to the foundations of nearby buildings. As the vibration propagates from the foundation throughout the remainder of the building, the vibration of floors and walls may cause perceptible vibration from the rattling of windows or a rumbling noise. The rumbling sound caused by the vibration of room surfaces is called groundborne noise. When assessing annoyance from groundborne noise, vibration is typically expressed as root-mean-square (RMS) velocity in units of decibels of 1 micro-inch per second. To distinguish vibration velocity levels from noise levels, the unit is written as "VdB." Human perception to vibration in indoor environments starts at levels as low as 67 VdB and sometimes lower. Annoyance due to vibration in residential settings starts at 70 VdB. Groundborne vibration is almost never annoying to people who are outdoors. Although the motion of the ground may be perceived, without the effects associated with the shaking of the building, the motion does not provoke the same adverse human reaction.

In extreme cases, excessive groundborne vibration has the potential to cause structural damage to buildings. Common sources of groundborne vibration include trains and construction activities such as blasting, pile driving, and operating heavy earthmoving equipment.

Construction and operation of the proposed project could expose sensitive structures and residential receptors to excessive groundborne vibration, as discussed below.

Construction Vibration. Construction activities that would occur at the project site have the potential to generate low levels of groundborne vibration or groundborne noise levels. The project would require demolition of the existing structures on the project site, as well as site clearing and grading activities. These activities would occur approximately 40 feet from existing sensitive residential uses. No impact pile driving would occur as part of the proposed project.

For all other equipment associated with the proposed construction activities, vibration impacts would approach 0.089 inch per second at a distance of 25 feet. This level would not exceed the 0.12 inch per second threshold at which there is virtually no risk resulting in architectural damage to buildings extremely susceptible to vibration damage. It would be structurally safe from

the construction activity and equipment operation for these adjacent buildings, and no structural damages would occur as a result of on-site construction. In addition, the following COA requires an analysis of potential damage due to construction prior to, or concurrent with, a demolition building permit.

> ***COA: Damage Due to Construction Vibration.*** The project applicant shall submit screening level analysis prior to, or concurrent with demolition building permit. If a screening level analysis shows that the project has the potential to result in damage to structures, a structural engineer or other appropriate professional shall be retained to prepare a vibration impact assessment (assessment). The assessment shall take into account project specific information such as the composition of the structures, location of the various types of equipment used during each phase of the project, as well as the soil characteristics in the project area, in order to determine whether project construction may cause damage to any of the structures identified as potentially impacted in the screening level analysis. If the assessment finds that the project may cause damage to nearby structures, the structural engineer or other appropriate professional shall recommend design means and methods of construction that to avoid the potential damage, if feasible. The assessment and its recommendations shall be reviewed and approved by the Building and Safety Division and the Zoning Officer. If there are no feasible design means or methods to eliminate the potential for damage, the structural engineer or other appropriate professional shall undertake an existing conditions study (study) of any structures (or, in case of large buildings, of the portions of the structures) that may experience damage. This study shall:
>
> - Establish the baseline condition of these structures, including, but not limited to, the location and extent of any visible cracks or spalls; and
> - Include written descriptions and photographs.

With implementation of *COA: Damage Due to Construction Vibration*, construction of the proposed project would not result in substantial groundborne vibration on properties adjacent to the project site.

Operational Vibration. No permanent noise sources that would expose persons to excessive groundborne vibration or noise levels would be located within the project site. In addition, long-term operational activities associated with the proposed project would not involve the use of any equipment or processes that would result in potentially significant levels of ground vibration.

Based on the analysis above, the proposed project would not result in exposure of persons to or generation of excessive groundborne vibration or groundborne noise levels.

c) For a project located within the vicinity of a private airstrip or an airport land use plan or, where such a plan has not been adopted, within 2 miles of a public airport or public use airport, would the project expose people residing or working in the project area to excessive noise levels?

The airport nearest to the project site is the Oakland International Airport (over 10 miles southwest of the project site). The nearest private airport, Buchanan Field Airport, is located over 14 miles northeast of the site. Although aircraft-related noise is occasionally audible on the project site, the project site does not lie within an airport land use plan area or within the 60 dBA L_{dn} noise contours of any of these public airports or private airfields. The proposed project would not expose people

residing or working in the project area to excessive noise levels due to the proximity of a public airport.

4.13.3 Conclusion

Given the above analysis, development of the proposed project would not change the conclusions of the Housing Element EIR, and there would be **no impact** peculiar to the proposed project or the project site related to noise. Impacts related to operational noise would remain less than significant, and impacts related to construction noise would remain significant and unavoidable as identified in the Housing Element EIR. Because the proposed project would result in less than significant noise impacts, the proposed project would not contribute to, exacerbate, or increase the significant unavoidable construction noise impacts identified in the Housing Element EIR. No further environmental analysis related to this topic is required pursuant to Sections 15183 and 15162 of the *State CEQA Guidelines*.

4.14 POPULATION AND HOUSING

	Significant Impact Identified in Housing Element EIR	Project Contributes to Identified Housing Element EIR Impact	New or More Severe Significant Impact Peculiar to the Project	No Impact
Would the project:				
a. Induce substantial unplanned population growth in an area, either directly (for example, by proposing new homes and businesses) or indirectly (for example, through extension of roads or other infrastructure)?	☐	☐	☐	☒
b. Displace substantial numbers of existing people or housing, necessitating the construction of replacement housing elsewhere?	☐	☐	☐	☒

4.14.1 Housing Element EIR Analysis

Section 4.12 of the Housing Element EIR analyzed potential impacts related to population and housing. The Housing Element EIR determined that all impacts related to population and housing would be less than significant, and no mitigation was prescribed. The Housing Element EIR analyzed the full buildout of 19,098 residential units in the city through 2031, which would result in a population increase of 47,443 residents compared to the existing population. However, the Housing Element EIR concluded that the growth resulting from implementation of the Housing Element is anticipated and would not constitute substantial unplanned population growth. In addition, the Housing Element EIR determined that implementation of the Housing Element would not result in the displacement of substantial numbers of people or housing because future development under the Housing Element would facilitate the development of new housing in accordance with State and local housing requirements, while preserving existing residential neighborhoods.

4.14.2 Project Impacts

a) Would the project induce substantial population growth in an area, either directly (for example, by proposing new homes and businesses) or indirectly (for example, through extension of roads or other infrastructure)?

The project site is currently developed with a two-story commercial building and does not contain any residential units. The proposed project would result in the development of an eight-story, mixed-use residential building containing approximately 690 square feet of commercial space and a total of 110 dwelling units on the project site. As such, implementation of the proposed project would result in an increase in employees and residents at the project site.

Based on the average employment density for retail uses of 250 square feet per worker,[61,62] the proposed approximately 690 square feet of commercial space would result in approximately three new employees. Based on a 2.37 persons per household estimate for the City of Berkeley obtained from the United States Census Bureau, development of the 110 new residential units is estimated to result in a total population of up to approximately 261 residents on the project site.[63]

Because the Housing Element EIR identified the project site as an Opportunity Site for residential development, the population increase at the project site has already been considered and analyzed in the Housing Element EIR. As of July 1, 2023, the population in the city was estimated at 118,962.[64] Therefore, implementation of the proposed project represents approximately 0.2 percent of the City's total population.[65] In addition, the Housing Element EIR determined that buildout under the House Element would result in an increase in approximately 47,443 residents. Therefore, implementation of the proposed project represents approximately 0.5 percent of the population increase anticipated by the Housing Element EIR. Overall, implementation of the proposed project would not directly induce substantial population growth in the area, and the project is anticipated to serve the City's need for more housing units.

The proposed project is located on an infill site in a mixed-use area and therefore is an appropriate location for new housing. The project does not include construction of additional public infrastructure (e.g., wastewater treatment facilities); therefore, implementation of the proposed project would not indirectly induce substantial population growth in the area.

The three future employees associated with the proposed commercial space represent a minimal increase and are expected to come from the surrounding area. Therefore, the proposed project would not directly or indirectly induce substantial population growth on the site or in the surrounding area through the increase in employment on the site.

As such, the proposed project would not induce substantial population growth in an area, either directly or indirectly, beyond what was anticipated in the Housing Element and no impact would occur.

61 The number of employees associated with the proposed project was determined based on data available from *Envision 2040, 4-Year Review, Market Overview and Employment Lands Analysis* prepared for the City of San Jose and dated January 28, 2016. Based on the available data, an employment density factor for retail land uses is between 250 and 650 square feet per employee. In order to provide a conservative analysis, the employment density factor of 250 square feet per employee was used to estimate employment generated from the proposed project.

62 Strategic Economics. 2016. *Envision 2040, 4-Year Review, Market Overview and Employment Lands Analysis.* January 28.

63 United States Census Bureau. City of Berkeley, QuickFacts, Persons per household, 2018-2022. Website: https://www.census.gov/quickfacts/fact/table/berkeleycitycalifornia/PST045222 (accessed March 2025). 2.37 persons per household * 110 units = 260.7 (rounded to 261).

64 Ibid.

65 261 residents / 118,962 total population = 0.00219.

b) Would the project displace substantial numbers of existing people or housing, necessitating the construction of replacement housing elsewhere?

The project site is currently developed with a two-story commercial building and does not contain any residential units. As such, demolition of existing structures and construction of the proposed project would not displace any people or housing, and there would be no impact.

4.14.3 Conclusion

Given the above analysis, development of the proposed project would not change the conclusions of the Housing Element EIR, and there would be **no impact** peculiar to the proposed project or the project site related to population and housing. Impacts related to population and housing would remain less than significant, as identified in the Housing Element EIR. No further environmental analysis related to this topic is required pursuant to Sections 15183 and 15162 of the *State CEQA Guidelines*.

4.15 PUBLIC SERVICES AND RECREATION

	Significant Impact Identified in Housing Element EIR	Project Contributes to Identified Housing Element EIR Impact	New or More Severe Significant Impact Peculiar to the Project	No Impact
Would the project:				
a. Result in substantial adverse physical impacts associated with the provision of new or physically altered governmental facilities, need for new or physically altered governmental facilities, the construction of which could cause significant environmental impacts, in order to maintain acceptable service ratios, response times or other performance objectives for any of the public services:				
i. Fire protection?	☐	☐	☐	☒
ii. Police protection?	☐	☐	☐	☒
iii. Schools?	☐	☐	☐	☒
iv. Parks?	☐	☐	☐	☒
v. Other public facilities?	☐	☐	☐	☒
b. Increase the use of existing neighborhood and regional parks or other recreational facilities such that substantial physical deterioration of the facility would occur or be accelerated?	☐	☐	☐	☒
c. Include recreational facilities or require the construction or expansion of recreational facilities that might have an adverse physical effect on the environment?	☐	☐	☐	☒

4.15.1 Housing Element EIR Analysis

Section 4.13 of the Housing Element EIR analyzed potential impacts related to public services and recreation. The Housing Element EIR determined that all impacts related to public services and recreation would be less than significant, and no mitigation was prescribed. The Housing Element determined that future development facilitated by the Housing Element would increase demand on fire protection services, police protection services, schools, and parks and recreational facilities. However, compliance with General Plan policies related to fire and police service facilities, compliance with Government Code 65995 (b), which requires funding for the provision or expansion of new school facilities to offset impacts from new residential development, and the donation of parkland pursuant to the Quimby Act would reduce impacts to less than significant.

4.15.2 Project Impacts

a) Would the project result in substantial adverse physical impacts associated with the provision of new or physically altered governmental facilities, need for new or physically altered governmental facilities, the construction of which could cause significant environmental impacts, in order to maintain acceptable service ratios, response times or other performance objectives for any of the public services: (i) fire protection; (ii) police protection; (iii) schools; (iv) parks; or (v) other public facilities?

Development of the proposed project would result in an increase in the population on the project site (approximately 261 new residents and three new employees as discussed in Section 4.14,

Population and Housing), which would increase the demand on emergency fire services, police protection services, schools, parks, and other public facilities. However, because the increase in population at the project site would be consistent with the population growth anticipated as part of the City's Housing Element and future residents/employees are expected to come from the surrounding Berkeley area, the proposed project itself would not result in the need for new or physically altered governmental facilities or a substantial adverse physical impact associated with the provision of additional public services.

In addition, the proposed project would be required to comply with all applicable codes for fire safety and emergency access, including the Uniform Fire Code and applicable sections of the California Health and Safety Code, California Administrative Codes, Title 19, Public Safety and Title 24, Building Standards, and additional review by the Berkeley Fire Department to ensure that appropriate measures are implemented to reduce hazardous conditions at the site and provide for adequate emergency access. Further, the proposed project would be required to pay the Berkeley Unified School District's required school impact fees for new commercial and residential development prior to issuance of a certificate of occupancy, the funds from which would be directed towards maintaining adequate service levels.

b) Would the project increase the use of existing neighborhood and regional parks or other recreational facilities such that substantial physical deterioration of the facility would occur or be accelerated?

As discussed above, development of the proposed project would result in an increase in the population on the project site (approximately 261 new residents and three new employees as discussed in Section 4.14, Population and Housing), which would increase the demand on existing parks in the vicinity of the project site. However, because the increase in population at the project site would be consistent with the population growth anticipated as part of the City's Housing Element and future residents/employees are expected to come from the surrounding Berkeley area, the proposed project itself would not result in substantial physical deterioration of existing parks.

c) Would the project include recreational facilities or require the construction or expansion of recreational facilities that might have an adverse physical effect on the environment?

The proposed project does not include the construction of new recreational facilities. In addition, as discussed above, because the increase in population at the project site would be consistent with the population growth anticipated as part of the City's Housing Element and future residents/employees are expected to come from the surrounding Berkeley area, the proposed project itself would not require the construction or expansion of existing recreational facilities in the city.

4.15.3 Conclusion

Given the above analysis, development of the proposed project would not change the conclusions of the Housing Element EIR, and there would be **no impact** peculiar to the proposed project or the project site related to public services and recreation. Impacts related to public services and recreation would remain less than significant as identified in the Housing Element EIR. No further

environmental analysis related to this topic is required pursuant to Sections 15183 and 15162 of the *State CEQA Guidelines*.

4.16 TRANSPORTATION

	Significant Impact Identified in Housing Element EIR	Project Contributes to Identified Housing Element EIR Impact	New or More Severe Significant Impact Peculiar to the Project	No Impact
Would the project:				
a. Conflict with a program, plan, ordinance or policy addressing the circulation system, including transit, roadway, bicycle and pedestrian facilities?	☐	☐	☐	☒
b. Conflict or be inconsistent with CEQA Guidelines §15064.3, subdivision (b)?	☐	☐	☐	☒
c. Substantially increase hazards due to a geometric design feature (e.g., sharp curves or dangerous intersections) or incompatible uses (e.g., farm equipment)?	☐	☐	☐	☒
d. Result in inadequate emergency access?	☐	☐	☐	☒

4.16.1 Housing Element EIR Analysis

Section 4.14 of the Housing Element EIR analyzed potential impacts related to transportation. The Housing Element EIR determined that all impacts related to transportation would be less than significant, and no mitigation was prescribed. The Housing Element EIR determined that the Housing Element would not conflict with a program, plan, ordinance, or policy addressing the circulation system, including transit, roadway, bicycle, and pedestrian facilities because individual projects facilitated by the Housing Element would be designed to be consistent with applicable programs, plans, and policies related to the circulation system, including the City's General Plan, Bicycle Master Plan, Complete Streets Policy, and Pedestrian Plan. In addition, the Housing Element determined that future development under the Housing Element would not conflict or be inconsistent with *State CEQA Guidelines* Section 15064.3, subdivision (b) because implementation of the Housing Element would result in an overall decrease in VMT per capita in comparison to the baseline condition.

The Housing Element EIR also determined that future development facilitated by the Housing Element would not substantially increase hazards because of a geometric design feature (e.g., sharp curves or dangerous intersections) or incompatible uses (e.g., farm equipment) and would not result in inadequate emergency access because circulation components and geometric design features of individual projects facilitated by the Housing Element would be reviewed by the City's Engineering Division and would be designed to be in accordance with all applicable City standards and the building plan check process to minimize design hazards.

4.16.2 Project Impacts

a) Would the project conflict with a program, plan, ordinance or policy addressing the circulation system, including transit, roadway, bicycle and pedestrian facilities?

The following includes an evaluation of the proposed project's potential to conflict with applicable programs, plans, ordinances, and policies addressing the circulation system, including the City's

Transportation Strategic Plan.[66] The section begins with a description of the proposed project's trip generating potential, compared to existing conditions, followed by an analysis of potential impacts to transit, bicycle, pedestrian, and roadway facilities.

Trip Generation. Trip generation is the process of estimating the number of vehicles that would likely access the project site. Trip generation data for the proposed project was estimated using the data and methodology published by the Institute of Transportation Engineers (ITE) in the Trip Generation Manual, 11th Edition for Multifamily Housing (Mid-Rise) and Strip Retail Plaza.

Table 4.16.A summarizes the trip generation for the proposed project based on the ITE methodology. As shown in Table 4.16.A, it is estimated that the proposed project would generate a net increase of approximately 310 daily trips, including 26 AM peak-hour and 6 PM peak-hour trips.

Table 4.16.A: Project Trip Generation

Land Use	Size	Unit	Daily	AM Peak Hour			PM Peak Hour		
				In	Out	Total	In	Out	Total
Trip Rates[1]									
Multi-family Housing		du	4.75	0.12	0.20	0.32	0.19	0.10	0.29
Strip Retail Plaza		tsf	54.45	1.42	0.94	2.36	3.30	3.29	6.59
Project Trip Generation									
Multi-family Housing	110	du	523	13	22	35	21	11	32
Strip Retail Plaza	0.690	tsf	38	1	1	2	2	2	4
Total			**561**	**14**	**23**	**37**	**23**	**13**	**36**
Existing Trip Generation									
Strip Retail Plaza	4.604	tsf	251	7	4	11	15	15	30
Net Trips (Project – Existing)			**310**	**7**	**19**	**26**	**8**	**(2)**	**6**

Source: Compiled by LSA (2025).
[1] Trip rates from the Institute of Transportation Engineers *Trip Generation* Manual, 11th Edition (ITE 2021).
Land Use 220 – Multifamily Housing (Mid-Rise) – Between 4 and 10 Levels – Close to Rail Transit
Land Use 822 – Strip Retail Plaza (<40k) – Less than 40,000 square feet of gross leasable area
du = dwelling unit
tsf = thousand square feet

Transit Facilities. The proposed project would have a significant impact related to transit facilities if it would conflict with the goals and policies related to transit use in the Berkeley Strategic Transportation Plan, which was adopted in 2016.[67] In particular, the proposed project would result in a conflict if it would discourage people from using transit or decrease transit efficiency.

Transit in the project vicinity includes the extensive bus transit service provided by AC Transit. The proposed project is located within close proximity to a variety of transit services, which would encourage the use of these services. The project site is located within 0.5 mile of several intersecting major bus routes, including Lines 7, 18, and FS. Line 7 provides bus service from the El Cerrito del Norte BART Transit Center to Downtown Berkeley, Line 18 provides bus service from University Village in Albany to the Lake Merritt BART Transit Center, and Line FS provides bus service from

66 Berkeley, City of. 2016a. *Berkeley Strategic Transportation Plan.* June.
67 Ibid.

Solano Avenue and Colusa Street to the Salesforce Transit Center in San Francisco.[68] These lines provide service at a frequency of less than 15 minutes during the morning and afternoon peak commute periods. In addition, the Downtown Berkeley BART station is located approximately 0.45 mile south of the project site. Implementation of the proposed project is expected to increase the use of transit services in the project area. However, future residents and employees at the project site are expected to come from the surrounding Berkeley area and likely already utilize transit service. Therefore, this minimal increase would not have a substantial effect on the efficiency of the AC Transit bus service.

Bicycle Facilities. The proposed project would have a significant impact to bicycle facilities if it conflicted with the goals and policies related to bicycle use in the Berkeley Strategic Transportation Plan. In particular, the proposed project would result in a conflict if it would impair the implementation of any planned bicycle boulevards, result in street design that would be unsafe for bicyclists, or discourage bicycle use in the vicinity of the project site.

Bicycle access to the proposed project is provided through the City's bicycle network. The City's Bicycle Plan identifies Shattuck Avenue as a planned cycletrack (Class 4 bike path) and Virginia Street as a bicycle boulevard. The proposed project would provide a total of 97 secure bicycle parking spaces for the proposed residential uses, 59 of which would be in a covered bike storage area in the northeast corner of the project site. The proposed project would not modify any surrounding roadways and would not prevent the implementation of the planned cycletrack along Shattuck Avenue or other bicycle boulevards in the city. Therefore, the proposed project would have a less than significant impact related to bicycle facilities.

Pedestrian Facilities. The proposed project would have a significant impact to pedestrian facilities if it would conflict with the goals and policies related to bicycle use in the Berkeley Strategic Transportation Plan. In particular, the proposed project would result in a conflict if it would discourage walking in commercial districts, result in street design that would be unsafe for pedestrians, or discourage walking in the vicinity of the project site.

The project site is served by existing sidewalks along Shattuck Avenue and Virginia Street. Pedestrians would access the project site from both Shattuck Avenue and Virginia Street, and the anticipated new pedestrian trips generated by the proposed project would be accommodated on the existing facilities serving the project site. In addition, the existing pedestrian facilities would be maintained, and the proposed curb ramp and crossing would be constructed pursuant to City standards.[69] Therefore, the proposed project would have a less than significant impact related to pedestrian safety or facilities.

Roadways. Pursuant to SB 743, described in Section 4.16.b, LOS or other measures of automobile delay can no longer be used to identify significant impacts under CEQA. Therefore, the following summary of the proposed project's effects on roadway operations is provided for informational purposes only.

---

68 Alameda-Contra Costa County Transit. 2024. *Maps & Schedules.* Website: https://www.actransit.org/maps-schedules (accessed March 2025).

69 Berkeley, City of. 2024. City of Berkeley Standard Details, Streets and Sidewalks. May 10.

Regional vehicular access to the project site is provided by I-80 and I-580 via University Avenue. Local access is provided primarily via Shattuck Avenue and Virginia Street. Shattuck Avenue is designated as a Major Street[70] in the City's General Plan. There are no proposed changes to existing public roadways or transportation-related infrastructure. Therefore, and due to the relatively small nature of the proposed project and the minimal increase in trips to and from the project site with implementation of the proposed project, the proposed project is not anticipated to result in significant impacts on surrounding roadway facilities.

Based on the analysis above, the proposed project would not conflict with a program, plan, ordinance, or policy addressing the circulation system, including transit, roadway, bicycle, and pedestrian facilities.

b) Would the project conflict or be inconsistent with CEQA Guidelines §15064.3, subdivision (b)?

On September 27, 2013, California Governor Jerry Brown signed SB 743 into law and started a process that changed the way transportation impact analysis is conducted as part of CEQA compliance. These changes included elimination of automobile delay, LOS, and other similar measures of vehicular capacity or traffic congestion as a basis for determining significant impacts under CEQA. According to SB 743, these changes are intended to "more appropriately balance the needs of congestion management with Statewide goals related to infill development, promotion of public health through active transportation, and reduction of greenhouse gas emissions."

In December 2018, the Governor's Office of Planning and Research, now called the Office of Land Use and Climate Innovation (LCI), completed an update to the *State CEQA Guidelines* to implement the requirements of SB 743. The *State CEQA Guidelines* state that VMT must be the metric used to determine significant transportation impacts and require all lead agencies in California to use VMT-based thresholds of significance in CEQA documents published after July 1, 2020.

The OPR Guidelines recommend developing screening criteria for development projects that meet certain criteria that can readily lead to the conclusion that they would not cause a significant impact on VMT. The OPR Guidelines also recommend evaluating VMT impacts using an efficiency-based version of the metric, such as VMT per resident for residential developments and/or VMT per worker for office or other employment-based developments. The City of Berkeley uses the metric of home-work VMT per worker for evaluating the impacts of employment-based uses such as the proposed project. The home-work VMT per worker measures all of the driving commute trips between homes and workplaces and divides that total distance by the number of workers at the site. Based on the City of Berkeley's guidelines, an employment-generating project's VMT impact is considered less than significant if its home-work VMT per worker is at least 15 percent below the regional average home-work VMT per worker.

VMT Assessment. According to the City of Berkeley Transportation VMT Criteria and Thresholds,[71] projects in a TPA (within a 0.5 mile walkshed of major transit stops or within a 0.25 mile walkshed

[70] Major Streets serve the movement of automobiles, trucks, buses, pedestrians, and bicycles across the city, connecting to the regional transportation network, and to other jurisdictions.

[71] Berkeley, City of. 2020. *City of Berkeley Transportation VMT Criteria and Thresholds*. June 29.

around high-quality transit corridors), small projects (equating to 20 units of residential use or up to 10,000 square feet of non-residential use), and projects in low VMT areas are screened out from a VMT analysis and are presumed to have a less than significant transportation impact.

As shown on the Household VMT Per Capita and Home-Work VMT Per Worker maps in the City of Berkeley Transportation VMT Criteria and Thresholds, the project site is located within a TPA and in a low VMT area (VMT per resident is at least 15 percent below the Bay Area average). As such, the proposed project meets the City's VMT screening criteria. Based on its location and size, the proposed project is presumed to have no VMT impact.

c) Would the project substantially increase hazards due to a design feature (e.g., sharp curves or dangerous intersections) or incompatible uses (e.g., farm equipment)?

There are no proposed changes to existing public roadways or transportation-related infrastructure, nor are there any proposed roads internal to the project site. As such, the proposed project would have no impact on hazards due to a design feature or incompatible use.

d) Would the project result in inadequate emergency access?

There are no proposed changes to existing public roadways or transportation-related infrastructure, and project construction would not require the closure of roads or redirection of traffic. In addition, during project construction, emergency access would be maintained. As such, the proposed project would have no impact on emergency access.

4.16.3 Conclusion

Given the above analysis, development of the proposed project would not change the conclusions of the Housing Element EIR, and there would be **no impact** peculiar to the proposed project or the project site related to transportation. Impacts related to transportation would remain less than significant, as identified in the Housing Element EIR. No further environmental analysis related to this topic is required pursuant to Sections 15183 and 15162 of the *State CEQA Guidelines*.

4.17 TRIBAL CULTURAL RESOURCES

	Significant Impact Identified in Housing Element EIR	Project Contributes to Identified Housing Element EIR Impact	New or More Severe Significant Impact Peculiar to the Project	No Impact
Would the project:				
a. Cause a substantial adverse change in the significance of a tribal cultural resource, defined in Public Resources Code Section 21074 as either a site, feature, place, cultural landscape that is geographically defined in terms of the size and scope of the landscape, sacred place, or object with cultural value to a California Native American tribe, and that is:				
i. Listed or eligible for listing in the California Register of Historical Resources, or in a local register of historical resources as defined in Public Resources Code Section 5020.1(k)? Or	☐	☐	☐	☒
ii. A resource determined by the lead agency, in its discretion and supported by substantial evidence, to be significant pursuant to criteria set forth in subdivision (c) of Public Resources Code Section 5024.1? In applying the criteria set forth in subdivision (c) of Public Resource Code Section 5024.1, the lead agency shall consider the significance of the resource to a California Native American tribe.	☐	☐	☐	☒

4.17.1 Housing Element EIR Analysis

Section 4.15 of the Housing Element EIR analyzed potential impacts related to tribal cultural resources. The Housing Element EIR determined that all impacts related to tribal cultural resources would be less than significant with implementation of prescribed mitigation. The Housing Element EIR indicated that future development facilitated by the Housing Element could adversely impact tribal cultural resources due to ground-disturbing activity during construction. As such, the Housing Element EIR prescribed Mitigation Measure TCR-1, which requires tribal cultural monitors to monitor work done in areas of tribal concern for future projects that are determined through tribal consultation to potentially affect tribal cultural resources in order to reduce impacts to less than significant.

4.17.2 Project Impacts

a) Would the project cause a substantial adverse change in the significance of a tribal cultural resource, defined in Public Resources Code Section 21074 as either a site, feature, place, cultural landscape that is geographically defined in terms of the size and scope of the landscape, sacred place, or object with cultural value to a California Native American tribe, and that is:

i. Listed or eligible for listing in the California Register of Historical Resources, or in a local register of historical resources as defined in Public Resources Code Section 5020.1(k)? Or

ii. A resource determined by the lead agency, in its discretion and supported by substantial evidence, to be significant pursuant to criteria set forth in subdivision (c) of Public Resources Code Section 5024.1? In applying the criteria set forth in subdivision (c) of Public Resource Code Section 5024.1, the lead agency shall consider the significance of the resource to a California Native American tribe

Assembly Bill (AB) 52, which was signed into law in 2014, established specific requirements for tribal consultation on projects that may impact tribal cultural resources. AB 52 applies to projects if the Lead Agency prepares an EIR or a Negative/Mitigated Negative Declaration (ND/MND) or if the project has the potential to affect tribal cultural resources. The City participated in tribal consultation pursuant to AB 52 as part of the Housing Element EIR, and as such, no further tribal consultation is required for the proposed project and Mitigation Measure TCR-1, which prescribes measures for monitoring if requested through the consultation process, is not applicable.

As described in Section 4.5, Cultural Resources, no archeological resources have been identified at the project site. As such, implementation of the proposed project is not anticipated to impact tribal cultural resources. However, if significant archeological deposits were unearthed during project construction, a substantial adverse change in the significance of a historical resource would occur from its demolition, destruction, relocation, or alteration such that the significance of the resource would be materially impaired (*State CEQA Guidelines* Section 15064.5(b)(1)). However, the proposed project would be required to comply with *COA: Archeological Resources* and *COA: Human Remains*, as detailed in Section 4.5, Cultural Resources, that addresses potential impacts to archeological resources and human remains. In addition, the proposed project would be required to comply with *COA: Halt Work/Unanticipated Discovery of Tribal Cultural Resources*, which would address potential impacts to tribal cultural resources.

> ***COA: Halt Work/Unanticipated Discovery of Tribal Cultural Resources.*** In the event that cultural resources of Native American origin are identified during construction, all work within 50 feet of the discovery shall be redirected. The project applicant and project construction contractor shall notify the City Planning Department within 24 hours. The City will again contact any tribes who have requested consultation under AB 52, as well as contact a qualified archeologist, to evaluate the resources and situation and provide recommendations. If it is determined that the resource is a tribal cultural resource and thus significant under CEQA, a mitigation plan shall be prepared and implemented in accordance with State guidelines and in consultation with Native American groups. If the resource cannot be avoided, additional measures to avoid or reduce impacts to the resource and to address tribal concerns may be required.

With implementation of the City's standard COAs identified in Section 4.5, Cultural Resources, as well as *COA: Halt Work/Unanticipated Discovery of Tribal Cultural Resources*, impacts to archeological deposits and human remains that may qualify as tribal cultural resources would not occur.

4.17.3 Conclusion

Given the above analysis, development of the proposed project would not change the conclusions of the Housing Element EIR, and there would be **no impact** peculiar to the proposed project or the

project site related to tribal cultural resources. Impacts related to tribal cultural resources would remain less than significant as identified in the Housing Element EIR. No further environmental analysis related to this topic is required pursuant to Sections 15183 and 15162 of the *State CEQA Guidelines*.

4.18 UTILITIES AND SERVICE SYSTEMS

	Significant Impact Identified in Housing Element EIR	Project Contributes to Identified Housing Element EIR Impact	New or More Severe Significant Impact Peculiar to the Project	No Impact

4.18.1 Housing Element EIR Analysis

Section 4.16 of the Housing Element EIR analyzed potential impacts related to utilities and service systems. The Housing Element EIR determined that all impacts to utilities and service systems would be less than significant, and no mitigation was prescribed. The Housing Element EIR indicated that future development under the Housing Element would require utility service and connections for water supply, wastewater conveyance, and stormwater conveyance, as well as telecommunications, electricity, and natural gas, and determined that existing utility systems for water, wastewater, stormwater, electric power, natural gas, and telecommunications facilities in the city have sufficient capacity to serve future development. Further, the Housing Element EIR determined that relocation or construction of new or expanded facilities resulting in significant environmental impacts would not occur, and adequate wastewater capacity exists to serve the project's projected demand in addition to the provider's existing commitments.

The Housing Element EIR also determined that although future development under the Housing Element would result in an increase in water demand, the increase in demand could be served by EBMUD with implementation of demand management measures required by EBMUD. Further, development facilitated by the Housing Element was determined to not generate solid waste in excess of State or local standards, or in excess of the capacity of local infrastructure. In addition, the Housing Element EIR determined that implementation of the Housing Element would not impair the attainment of solid waste reduction goals and would comply with federal, State, and local statutes and regulations related to solid waste.

4.18.2 Project Impacts

a) Would the project require or result in the relocation or construction of new or expanded water, wastewater treatment or stormwater drainage, electric power, natural gas, or telecommunications facilities, the construction or relocation of which could cause significant environmental effects?

Because the Housing Element EIR identified the project site as an Opportunity Site for residential development, development at the project site and the associated increase in demand on utility infrastructure at the project site has already been considered and analyzed in the Housing Element EIR. The proposed project would connect to existing water delivery and sanitary sewer systems within the vicinity of the project site, and it is anticipated that the existing infrastructure would have sufficient capacity to support project water and wastewater flows. In addition, as a condition of project approval, the project sponsor would be required to coordinate with EBMUD, the Berkeley Fire Department, and the City's Public Works Department to assess water and wastewater flow and ensure the proposed project would comply with the applicable requirements.

As discussed in Section 4.10, Hydrology and Water Quality, the proposed project would replace all existing impervious surface area, resulting in no net change in the total impervious surface area at the project site. In addition, pursuant to Provision C.3 of the MRP, stormwater from the project site would be directed to the proposed vegetated areas and would be treated by flow-through planters (biotreatment) before being discharged to the existing stormwater infrastructure in the surrounding area, similar to existing conditions. Because the discharge of stormwater to the existing stormwater infrastructure in the surrounding area would not be greater than pre-project conditions, as required by Provision C.3 of the MRP, no new or expanded stormwater infrastructure would be required.

The project site is currently served by electrical and telecommunications facilities. Therefore, because the proposed project would consist of infill development on a previously developed site that is currently served by utilities, the expansion of electrical or telecommunications facilities would not be required. In addition, the proposed building would be designed to be all electric, and therefore would not include the use of any traditional gas systems or facilities.

Based on the analysis above, the proposed project would not require or result in the relocation or construction of new or expanded water, wastewater treatment or stormwater drainage, electric power, natural gas, or telecommunications facilities, the construction or relocation of which could cause significant environmental effects.

b) Would the project have sufficient water supplies available to serve the project and reasonably foreseeable future development during normal, dry and multiple dry years?

Because the Housing Element EIR identified the project site as an Opportunity Site for residential development, development at the project site and the associated increase in water demand at the project site has already been considered and analyzed in the Housing Element EIR. Water service at the project site and in the project area is provided by EBMUD. According to the 2020 Urban Water Management Plan, EBMUD obtains approximately 90 percent of its water from the Mokelumne River watershed and transports it through pipe aqueducts to temporary storage reservoirs in the

East Bay hills. EBMUD has water rights and facilities to divert up to a daily maximum of 325 million gallons per day (mgd) from the Mokelumne River.[72] Average daily water demand within the entire EBMUD service area is projected to be 245 mgd in 2025, 254 mgd in 2030, 277 mgd in 2040, and 297 mgd in 2050.[73]

The proposed project would develop the project site with a new eight-story, mixed-use residential building consisting of approximately 690 square feet of commercial space and 110 residential units. As discussed in Section 4.14, Population and Housing, the proposed project would result in approximately 261 new residents and three employees at the project site. According to the United States Environmental Protection Agency (EPA), a single person uses approximately 82 gallons per day (gpd) of water at home,[74] and retail uses use approximately 5 gallons of water per square foot per year.[75] Therefore, implementation of the proposed project is anticipated to require approximately 21,411 gpd of water (approximately 21,402 gpd associated with the residential uses and 9 gpd associated with the commercial uses). This accounts for less than 0.1 percent of EBMUD's projected service-wide daily water demand for 2025. Furthermore, EBMUD's projected water demand accounts for projected growth within the region as identified by ABAG. Because the proposed project would be consistent with the General Plan and Zoning designations for the project site, water demand associated with the project site has been accommodated in EBMUD's supply and demand projections. Therefore, EBMUD would not require new or expanded water entitlements to serve the proposed project.

EBMUD completed development of a revised Water Supply Management Program (WSMP) 2040 Plan in April of 2012, which is the District's plan for providing water to its customers for a span of 30 years.[76] According to the WSMP 2040 Plan, EBMUD's water supplies are estimated to be sufficient during the planning period (2010–2040) in normal and single dry years. Therefore, EBMUD would have adequate water supply to provide water service to the proposed project.

The WSMP 2040 Plan emphasizes maximum conservation and recycling strategies, with a total of 50 mgd of future supply to be provided from those two component categories. However, looking toward 2040, EBMUD's current supply is insufficient to meet customer needs during multi-year droughts despite EBMUD's aggressive water conservation and recycled water programs.[77] According to the WSMP 2040 Plan, the combination of rationing, conservation, and raw and recycled water will satisfy increased customer demand through 2040.[78] Supplemental supply will also be needed to keep rationing at a lower level and to meet the need for water in drought years.

---

77 East Bay Municipal Utility District (EBMUD). 2012. Op. cit.

78 East Bay Municipal Utility District (EBMUD). 2016. Op. cit.

Future users of the project site (and all EBMUD customers) would be required to comply with Policy EM-26 in the City of Berkeley General Plan that promotes water conservation through City programs and requirements, including cooperation with EBMUD to make recycled water available for irrigation and other uses. Policy EM-26 of the City's General Plan, as described below, provides direction for incorporating water conservation measures into the project design.

> **Policy EM-26:** Water Conservation. Promote water conservation through City programs and requirements.
>
> a. **Action EM-26 A:** Encourage drought-tolerant landscaping and low-flow irrigation systems.
>
> b. **Action EM-26 B:** Consider participation in the East Bay Municipal Utility District's East Bay-shore Recycled Water Project to make recycled water available for irrigation and other non-potable uses.

Compliance with Policy EM-26 by incorporating water conservation measures such as drought-tolerant landscaping into the proposed project's design would ensure efficient use of water at the project site and minimize the project's potential water demand.

EBMUD also imposes a system capacity charge on new developments to fund system maintenance and the development of new water sources. The project sponsor would be required to pay this fee and undertake water conservation measures to conserve water (e.g., the installation of low-flow toilets). In addition, the project sponsor would also be required to comply with the following condition of approval related to water efficient landscaping:

> ***COA: Water Efficient Landscaping*** *(prior to the issuance of any building [construction] permit)*. Landscaping, totaling 500 square feet of more of new landscaping or 2,500 square feet or more of renovated irrigated area, shall comply with the State's Model Water Efficient Landscape Ordinance (MWELO). MWELO-compliant landscape documentation including a planting, grading, and irrigation plan shall be included in site plans. Water budget calculations are also required for landscapes of 2,500 square feet or more and shall be included in site plans. The reference evapotranspiration rate for Berkeley is 41.8.

As required by the City, the project sponsor would also be required to provide a Bay-Friendly Basics Landscape Checklist that includes detailed notes of any measures that would not be fully met by the project (if any).[79] Landscape improvements are required to be consistent with the current versions of the State's Water Efficient Landscape Ordinance and Section 31 of EBMUD's Water Service Regulations (Water Efficiency Requirements), which require that applicable water-efficiency measures be installed on water-using equipment at the project sponsor's expense. The project sponsor would also be required to coordinate with EBMUD and the Berkeley Fire Department to assess fire flow requirements and comply with them as part of the project. With compliance with policies contained in the City's General Plan, COAs, and other applicable City requirements, impacts associated with project demand and water supply would not occur.

[79] Berkeley, City of. 2016b. *Stormwater Requirements Overview*. June 6.

c) Would the project result in a determination by the wastewater treatment provider which serves or may serve the project that it has adequate capacity to serve the project's projected demand in addition to the provider's existing commitments?

Because the Housing Element EIR identified the project site as an Opportunity Site for residential development, development at the project site and the associated increase in demand on wastewater service at the project site has already been considered and analyzed in the Housing Element EIR. In the city, sanitary sewage flows through the City's collection system to the EBMUD's North Interceptor, which then directly flows to EBMUD's Main Wastewater Treatment Plant (MWWTP) in the City of Oakland for treatment and disposal. The City's collection system consists of lower laterals and sewer mains. Buildings connect to the City's collection system through the upper laterals, which are privately owned and maintained. Within the city, there are approximately 260 miles of sanitary sewer mains, with an estimated 28,000 lateral connections. The sewer mains vary from 1 to 100 years old, and vary in size from 6 to 48 inches in diameter.[80] The City, EBMUD, and the MWWTP serve the project site and the surrounding area.

The City operates the sanitary sewer infrastructure located in the surrounding streets and sidewalks. Facilities typically range in size from 8 inches to 18 inches in diameter. The proposed project would connect to existing sanitary sewer systems within the vicinity of the project site and would be required to conduct sewer capacity analysis to determine if the existing sewer infrastructure would be able to accommodate wastewater flows from the project and identify impacts to flow capacity, pipeline alignments, need for easements, and chemical and physical character of wastewater. If the sewer capacity analysis determines that there is insufficient capacity, the project developer will be required to improve the infrastructure in order to accommodate increased wastewater flows. In addition, the project sponsor would be required to coordinate with EBMUD, the Berkeley Fire Department, and the City's Public Works Department to assess water and wastewater flow and ensure the proposed project would comply with the applicable requirements.

The City's sewer system is connected to trunk lines that convey flows to the MWWTP. The MWWTP has a primary treatment capacity of 320 mgd and a secondary treatment capacity of 168 mgd.[81] Storage basins provide plant capacity for a short-term hydraulic peak of 415 mgd. The average annual daily flow into the MWWTP is approximately 63 mgd, representing approximately 37.5 percent of the plant's secondary treatment capacity. Treated effluent is disinfected, dechlorinated, and discharged through a deep-water outfall 1 mile off the East Bay shoreline into San Francisco Bay.

In compliance with the July 28, 2014, Consent Decree, the City has implemented a long-term mandated Sanitary Sewer Capital Improvement Program to eliminate Sanitary Sewer Overflows and reduce stormwater Infiltration and Inflow (I/I) into the sanitary sewer system. Under this program, the City utilizes a comprehensive asset management approach based on complex and evolving hydrologic and hydraulic modeling and condition assessments to repair, replace, or upgrade the

[80] East Bay Municipal Utility District (EBMUD). 2021a. *2020 Urban Water Management Plan*. June.

[81] East Bay Municipal Utility District (EBMUD). 2016. Wastewater Treatment. Website: https://www.ebmud.com/wastewater/collection-treatment/wastewater-treatment (accessed June 13, 2024).

City's portion of the sanitary sewer system, ultimately to aid EBMUD in eliminating discharges from their Wet Weather Facilities (which provide additional treatment capacity during storm events) by the end of 2035.

The proposed project would generate wastewater to be treated by the EBMUD treatment facilities. EBMUD is required to meet applicable RWQCB treatment requirements in compliance with NPDES requirements. In addition, the proposed project must not use any of EBMUD's wet weather treatment capacity, and the property owners will be responsible for maintaining their private sewer lateral and site plumbing to ensure no inflow/infiltration enters the sewer system pursuant to BMC Sections 17.24.030(A)(2), 17.24.030(A)(3), and 17.06.020. In the absence of an official wastewater generation estimate, wastewater generated by full buildout associated with the zoning and General Plan amendments is assumed to be 90 percent of water demand, or 22,966 gpd (refer to Section 4.19.b, above), which comprises less than 1 percent of the remaining capacity of the MWWTP. Therefore, the proposed project would not generate wastewater exceeding the wastewater treatment requirements of the RWQCB.

Wastewater discharges that may occur at the project site would be required to comply with the terms of the applicable MRP and may be subject to monitoring by EBMUD to ensure that the development's sewage discharge does not impair the ability of the MWWTP to meet wastewater treatment objectives and requirements. As such, no impacts to wastewater treatment requirements would occur.

d) Would the project generate solid waste in excess of State or local standards, or in excess of the capacity of local infrastructure, or otherwise impair the attainment of solid waste reduction goals?

The City operates its own refuse collection system. The City provides curbside recycling and refuse collection services to the project site. There are two permitted landfills in Alameda County with the capacity to accommodate solid waste generated in Berkeley: Altamont Landfill and the Vasco Road Sanitary Landfill. The combined permitted capacity of waste for these two landfills is 95 million cubic yards, which the proposed project would not exceed. Solid waste from the site would be transported to the Berkeley Transfer Station, located at 1021 Second Street, and then on to the Altamont Landfill and Resource Recovery Facility, located near the Altamont Pass, northeast of Livermore. The proposed project would be served by a landfill with sufficient capacity to accommodate the project's waste disposal needs.

The project site is currently developed with a two-story commercial building. Implementation of the proposed project would include the demolition of the existing structure, thereby generating demolition waste. The proposed project would be subject to the Waste Diversion and Universal Waste disposal requirements of BMC Chapter 19.37, and all demolition and construction waste would be recycled consistent with State and City requirements. The State requires a 65 percent diversion (recycling and reuse) of construction waste, and the City requires 100 percent of concrete, asphalt, and land clearing debris to be diverted from landfills. The project sponsor would be required to prepare and submit to the City a Construction Demolition Recycling Plan prior to issuance of a Demolition Permit for the proposed project. The purpose of the Construction

Demolition Recycling Plan is to divert as much debris as possible from the waste stream consistent with, and in addition to, State and City requirements.

Prior to approval of large development projects, the City's Solid Waste Management Division staff reviews proposed plans for the adequate design of trash and recycling facilities. Alameda County Waste Management Authority Ordinance 2008-01 requires businesses in Alameda County that generate 4 or more cubic yards of garbage per week to separate all plant debris from garbage and recyclable materials. Additionally, development projects that require a use permit are required to comply with the following COA that addresses these potential impacts:

> ***COA: Recycling and Organics Collection.*** Applicant shall provide recycling and organics collection areas for occupants, clearly marked on plans, which comply with the Alameda County Organics Reduction and Recycling Ordinance (2021-02). Contact the Zero Waste Division's Recycling Program Manager, Julia A. Heath, at jheath@berkeleyca.gov.

The proposed project would also be required to provide trash enclosure space (inside or outside for large dumpsters) and trash, compost, fiber recycling, and container recycling collection bins that would be co-located in tenant-facing trash rooms.

According to the EPA, a single person generates approximately 4.9 pounds of solid waste per day (residential),[82] and commercial uses generate approximately 10.53 pounds of solid waste per employee per day.[83] As discussed in Section 4.14, Population and Housing, implementation of the proposed project would result in approximately 261 residents and three new employees at the project site. Therefore, the proposed project would generate approximately 1,578 pounds of solid waste per day (approximately 1,524 pounds per day associated with the residential uses and 52.6 pounds per day associated with the commercial uses). This represents a negligible increase in solid waste generated in the city and would not exceed the combined permitted capacity of waste for the two permitted landfills in Alameda County.

As such, the proposed project would not generate solid waste in excess of local standards.

e) Would the project comply with federal, state, and local management and reduction statutes and regulations related to solid waste?

Refer to Section 4.18.d, above. The proposed project would comply with all federal, State, and local solid waste statutes and/or regulations related to project solid waste.

---

83 California Department of Resources Recycling and Recovery (CalRecycle). 2019. *Estimated Solid Waste Generation Rates.* Website: https://www2.calrecycle.ca.gov/WasteCharacterization/General/Rates (accessed August 30, 2024).

4.18.3 Conclusion

Given the above analysis, development of the proposed project would not change the conclusions of the Housing Element EIR, and there would be **no impact** peculiar to the proposed project or the project site related to utilities and service systems. Impacts on utilities and service systems would remain less than significant, as identified in the Housing Element EIR. No further environmental analysis related to this topic is required pursuant to Sections 15183 and 15162 of the *State CEQA Guidelines*.

4.19 WILDFIRE

	Significant Impact Identified in Housing Element EIR	Project Contributes to Identified Housing Element EIR Impact	New or More Severe Significant Impact Peculiar to the Project	No Impact
If located in or near state responsibility areas or lands classified as very high fire hazard severity zones, would the project:				
a. Substantially impair an adopted emergency response plan or emergency evacuation plan?	☒	☐	☐	☒
b. Due to slope, prevailing winds, and other factors, exacerbate wildfire risks, and thereby expose project occupants to pollutant concentrations from a wildfire or the uncontrolled spread of a wildfire?	☒	☐	☐	☒
c. Require the installation or maintenance of associated infrastructure (such as roads, fuel breaks, emergency water sources, power lines or other utilities) that may exacerbate fire risk or that may result in temporary or ongoing impacts to the environment?	☒	☐	☐	☒
d. Expose people or structures to significant risks, including downslope or downstream flooding or landslides, as a result of runoff, post-fire slope instability, or drainage changes?	☒	☐	☐	☒

4.19.1 Housing Element EIR Analysis

Section 4.17 of the Housing Element EIR analyzed potential impacts related to wildfire. The Housing Element EIR determined that all impacts related to wildfire would be significant and unavoidable, even with implementation of identified mitigation. The Housing Element EIR determined that because future development facilitated by the proposed project would occur in hillside areas located near a State Responsibility Area (SRA) and in a Very High Fire Hazard Severity Zone (VHFHSZ), impacts related to emergency response and evacuation that would expose project occupants to pollutant concentrations from a wildfire or the uncontrolled spread of a wildfire, and expose people or structures to significant risks due to the terrain and slope in the Berkeley hills would be significant and unavoidable even with adherence to existing regulations and fire safety provisions in the BMC, including the Fire Code. The Housing Element EIR also prescribed Mitigation Measure W-1, which requires new or upgraded power drops located in the VHFHSZ to be installed underground if additional maintenance or construction of such infrastructure would occur at the Opportunity Sites within Residential zoning districts R, R-2, and R-2a, which are located near an SRA and in a VHFHSZ.

4.19.2 Project Impacts

The project site is on an infill site surrounded by development in an urban area of Berkeley. The site is not within a VHFHSZ or an SRA for fire service[84] and, as described in Section 4.9, Hazards and

[84] California Department of Forestry and Fire Protection (CAL FIRE). 2023. Fire Hazard Severity Zones in State Responsibility Area. September 29. Effective April 1, 2024. Website: https://calfire-forestry.maps.arcgis.com/apps/webappviewer/index.html?id=988d431a42b242b29d89597ab693d008 (accessed June 21, 2024).

Hazardous Materials, would not impair the implementation of, or physically interfere with, an adopted emergency response plan. The proposed project would not exacerbate wildfire risks and therefore would not expose project occupants to pollutant concentrations from a wildfire or the uncontrolled spread of a wildfire. In addition, the proposed project would not require the installation or maintenance of associated infrastructure and would not expose people or structures to significant risks as a result of post-fire slope instability or drainage and runoff changes. As such, no impact either individually or cumulatively related to wildfire would occur. In addition, because the proposed project is not located within the R, R-2, and R-2a zoning districts, located near an SRA, and is not within a VHFHSZ, Housing Element EIR Mitigation Measure W-1 would not be applicable to the proposed project.

4.19.3 Conclusion

Given the above analysis, development of the proposed project would not change the conclusions of the Housing Element EIR, and there would be **no impact** peculiar to the proposed project or the project site related to wildfire. Impacts related to wildfire would remain significant and unavoidable, as identified in the Housing Element EIR. Because the proposed project would result in no impacts related to wildfire, the proposed project would not contribute to, exacerbate, or increase the significant unavoidable impacts identified in the Housing Element EIR. No further environmental analysis related to this topic is required pursuant to Sections 15183 and 15162 of the *State CEQA Guidelines*.

5.0 CEQA GUIDELINES SECTION 15183 ANALYSIS

5.1 CEQA GUIDELINES SECTION 15183 (PROJECTS CONSISTENT WITH A COMMUNITY PLAN, GENERAL PLAN, OR ZONING)

The discussion in this section confirms that the proposed project has been evaluated for significant impacts pursuant to the California Environmental Quality Act (CEQA) and no new information of substantial importance meeting the criteria listed in *State CEQA Guidelines* Section 15183 has been identified. Under *State CEQA Guidelines* Section 15183, the determination is that the proposed project's impacts have been considered in the 2023-2031 Housing Element Update Draft Environmental Impact Report (Housing Element EIR) that was reviewed and certified by the City of Berkeley (City), and that the Housing Element EIR provides a sufficient and adequate analysis of the environmental impacts of the proposed project.

A. The project would be consistent with the land uses, densities, and other zoning and development standards set forth in the Housing Element EIR.

The City's General Plan designates the project site as Neighborhood Commercial and is located within three zoning districts. Approximately 19,788 square feet of the project site is in the North Shattuck Commercial (C-NS) zone, approximately 1,970 square feet is in the Multiple-Family Residential (R-4) zone, and approximately 584 square feet is in the Restricted Multiple-Family Residential (R-2A) zone. The project site has also been identified as an Opportunity Site for residential development in the City's Housing Element.

As discussed in Section 4.11, Land Use and Planning, the proposed project would be consistent with applicable General Plan policies and the Neighborhood Commercial General Plan land use designation for the project site, and would be consistent with the purposes of the C-NS, R-4, and R-2A zoning districts. In addition, the proposed project would be consistent with the development standards of these zoning districts with approval of various Administrative Use and Use Permits pursuant to the Berkeley Municipal Code (BMC), which would be considered by the City's Zoning Adjustments Board. These permits would allow an increase in building height, lot coverage, and building footprint, as well as setback waivers in order to accommodate the density bonus units.

Although the proposed project would develop the project site with a greater residential density than detailed in the C-NS, R-4, and R-2A zoning districts, the proposed project would be consistent with the criteria of the State Density Bonus Law by providing nine affordable to very low-income units (15 percent) and nine affordable to moderate income units (15 percent) as defined by Section 50105 of the Health and Safety Code. As such, pursuant to the State Density Bonus Law, the proposed project would be consistent with the land uses, densities, and other zoning and development standards for the project site.

The Housing Element EIR analyzed impacts at a programmatic level and does not consist of specific projects. The overall use and intent of the proposed project would be consistent with the vision and intent of the Housing Element, which was evaluated in the Housing Element EIR. The proposed project would not require major revisions to the Housing Element EIR, and the

proposed project would not result in any new impacts that would require additional mitigation measures beyond those required in the Housing Element EIR.

B. There are no peculiar impacts associated with the project or the project site.

Pursuant to *State CEQA Guidelines* Section 15183(b)(1), this section presents a summary of the examination included in Section 4.0, demonstrating that the project would not result in environmental effects that are peculiar to the project or the project site. If no additional mitigation measures are required to reduce project-specific impacts to a less than significant level other than those required in the prior EIR, then a *State CEQA Guidelines* Section 15183 exemption applies.

Construction and operational impacts of the proposed project would be the same as or similar to those impacts identified in the Housing Element EIR for all resource topics discussed in Section 4.0. For resource topics with significant and unavoidable impact conclusions in the Housing Element EIR (e.g., historical resources, noise, and wildfire), the proposed project would result in reduced impact conclusions. The proposed project would be required to implement mitigation measures from the Housing Element EIR including Mitigation Measures AIR-3, CUL-2, and GEO-1.

The proposed project would not result in any new impacts that would require additional mitigation measures beyond those required by the Housing Element EIR. Therefore, the proposed project would not change the conclusions of the Housing Element EIR, and there would be no impacts peculiar to the project or the project site.

C. The proposed project would not result in any environmental effects that were not in a prior EIR.

Pursuant to *State CEQA Guidelines* Section 15183(b)(2), this section presents a summary of the examination included in Section 4.0, demonstrating that the proposed project would not result in any environmental effects that were not analyzed as significant effects in the Housing Element EIR.

The Housing Element EIR determined that growth and development under the Housing Element would result in either no impact, less than significant impacts, or impacts that could be reduced to less than significant with implementation of prescribed mitigation for all issue areas except for impacts related to historical resources, construction noise, and wildfire. As discussed in Section 4.0, the proposed project would not contribute any different or more severe impacts related to any of these issue areas than those identified in the Housing Element EIR.

D. The proposed project would not result in any new environmental effects due to potentially significant off-site impacts and cumulative impacts which were not discussed in the prior EIR.

Pursuant to *State CEQA Guidelines* Section 15183(b)(3), this section presents a summary of the examination included in Section 4.0, demonstrating that the project would not result in any environmental effects that are potentially significant off-site impacts and cumulative impacts that were not discussed in the Housing Element EIR.

The proposed project would not increase significant off-site or cumulative impacts. The proposed project would not contribute significantly to public utility demand, traffic, air quality, greenhouse gas (GHG) emissions, given that the appropriate mitigation measures discussed in the Housing Element EIR and outlined in Section 7.0 would be implemented during construction and operation of the proposed project. In addition, as identified in Section 4.0, the proposed project would not contribute any more severe impacts for any environmental resource category than those analyzed in the Housing Element EIR.

E. The proposed project would not result in any new environmental effects as a result of substantial new information which was not known at the time the Housing Element EIR was certified, which would result in more severe adverse impacts than discussed in the Housing Element EIR.

Pursuant to *State CEQA Guidelines* Section 15183(b)(4), this section demonstrates that the proposed project would not result in any new environmental effects as a result of substantial new information that was not known at the time the Housing Element EIR was certified.

The Housing Element EIR was certified on January 18, 2025. Updated planning documents, including ordinances, that were adopted by the City after Housing Element EIR certification do not provide substantial new information that was not known at the time the EIR was certified. Additionally, the proposed project would comply with all updated regulations, such as building codes, zoning amendments, and any other updates to the zoning code, as required by the City. Since no substantial new information not known at the time of the Housing Element EIR is available, no updated analyses or other studies are required for the proposed project.

This page intentionally left blank

6.0 CEQA GUIDELINES SECTION 15162 ANALYSIS

6.1 CEQA GUIDELINES SECTION 15162 (SUBSEQUENT OR SUPPLEMENTAL EIR)

The discussion in this section confirms that the proposed project has been evaluated for significant impacts pursuant to the California Environmental Quality Act (CEQA) and no new information of substantial importance meeting the criteria listed in *State CEQA Guidelines* Section 15162 has been identified. Under *State CEQA Guidelines* Section 15162, the determination is that the proposed project's impacts have been considered in the 2023-2031 Housing Element Update Final Environmental Impact Report (Housing Element EIR) that was reviewed and certified by the City of Berkeley (City), and that the Housing Element EIR provides a sufficient and adequate analysis of the environmental impacts of the proposed project.

A. "Substantial Changes in the Project" Standard

Pursuant to *State CEQA Guidelines* Section 15162(a)(1), this section presents a discussion of whether the proposed project constitutes a substantial change in the project analyzed in the Housing Element EIR that would require major revisions to the Housing Element EIR due to the involvement of new significant environmental effects or a substantial increase in the severity of previously identified significant effects.

As discussed in Section 4.11, Land Use and Planning, the proposed project would be consistent with applicable General Plan policies and the General Plan land use designation for the project site, and would be consistent with the purposes of the project site's zoning districts. In addition, the proposed project would be consistent with the development standards of those zoning districts with approval of various Administrative Use and Use Permits pursuant to the Berkeley Municipal Code (BMC), which would be considered by the City's Zoning Adjustments Board. These permits would allow an increase in building height, lot coverage, and building footprint, as well as setback waivers in order to accommodate the density bonus units. Although the proposed project would develop the project site with a greater residential density than detailed in the C-NS, R-4, and R-2A zoning districts, the proposed project would be consistent with the criteria of the State Density Bonus Law by providing 11 affordable to very low-income units (15 percent) and nine affordable to moderate income units (15 percent), as defined by Section 50105 of the Health and Safety Code. As such, pursuant to the State Density Bonus Law, the proposed project would be consistent with the land uses, densities, and other zoning and development standards for the project site.

The Housing Element EIR analyzed impacts at a programmatic level and does not consist of specific projects. The overall use and intent of the proposed project would be consistent with the vision and intent of the Housing Element, which was evaluated in the Housing Element EIR. The proposed project would not require major revisions to the Housing Element EIR, and the proposed project would not result in any new impacts that would require additional mitigation measures beyond those required in the Housing Element EIR.

B. "Substantial Changes in the Circumstances" Standard

Pursuant to *State CEQA Guidelines* Section 15162(a)(2), this section presents a discussion of whether changes to the project site or the vicinity (environmental setting) have occurred after certification of the Housing Element EIR that would result in new significant impacts or a substantial increase in the severity of a previously identified significant impact that were not evaluated and mitigated by the Housing Element EIR.

As shown on Figure 3-2, the project site is located in an urbanized area of the city and is generally surrounded by existing development, including single- and multi-family residential and commercial uses. This area of the city is substantially developed, and has been in this developed state since preparation of the Housing Element EIR in 2023. As such, no changes to the project site or the vicinity (environmental setting) have occurred since certification of the Housing Element EIR that would result in new significant impacts or a substantial increase in the severity of a previously identified significant impact that were not evaluated and mitigated by the Housing Element EIR. In addition, the project site was identified as an Opportunity Site in the City's Housing Element, which indicates that the City assumes the project site would be developed with residential uses.

In addition, one of the requirements of CEQA is the examination of whether a proposed project would conflict with existing plans and regulations, including the General Plan, zoning regulations, and other planning documents. Inconsistencies may suggest that a project would have environmental effects that have not been identified in advance and for which planning or analysis has not occurred. As discussed above, the proposed project would be consistent with the City's General Plan and zoning designations for the site pursuant to the State Density Bonus Law. No amendments to the General Plan or zoning designations would be required.

Based on the above, no substantial change in circumstances at the project site or in the surrounding area has occurred that would result in new significant impacts or substantially more severe impacts from what has been anticipated for the project site in the Housing Element EIR.

C. "New Information of Substantial Importance" Standard

Pursuant to *State CEQA Guidelines* Section 15162(a)(3), this section includes a discussion of whether there is new information of substantial importance that was not known and could not have been known with the exercise of reasonable diligence at the time the Housing Element EIR was certified. New information of substantial importance includes: (1) one or more significant effects not discussed in the Housing Element EIR; (2) significant effects previously examined that are substantially more severe than shown in the Housing Element EIR; (3) mitigation measures or alternatives previously found not to be feasible would in fact be feasible, and would substantially reduce one or more significant effects of the project, but the project proponents decline to adopt the mitigation measure or alternative; or (4) mitigation measures or alternatives that are considerably different from those analyzed in the Housing Element EIR would substantially reduce one or more significant effects on the environment, but the project proponents decline to adopt the mitigation measure or alternative.

The Housing Element EIR was certified on January 18, 2025. Updated planning documents, including ordinances, that were adopted by the City after Housing Element EIR certification do not provide substantial new information that was not known at the time the EIR was certified. Additionally, the proposed project would comply with all updated regulations, such as building codes, zoning amendments, and any other updates to the zoning code, as required by the City. Since no substantial new information not known at the time of the Housing Element EIR is available, no updated analyses or other studies are required for the proposed project.

This page intentionally left blank

7.0 APPLICABLE HOUSING ELEMENT EIR MITIGATION MEASURES AND REGULATORY COMPLIANCE MEASURES

Applicable 2023-2031 Housing Element Update Final Environmental Impact Report (Housing Element EIR) mitigation measures and City conditions of approvals are identified in Tables 7.A and 7.B, respectively.

Table 7.A: Applicable Housing Element EIR Mitigation Measures

Housing Element Mitigation Measure	Timing for Mitigation Measure	Responsible Party / Approving Agency
Air Quality		
AQ-3: TAC Exposure Reduction Building Measures. The following design features shall be incorporated for residential development located within 1,000 feet of I-580/80 or on a lot that fronts on a section of roadway with 10,000 vehicles per day or more in order to reduce exposure of proposed residences to TACs from vehicles and stationary combustion engines (i.e., generators): 1. If the proposed buildings would use operable windows or other sources of infiltration of ambient air, the development shall install a central HVAC system that includes high efficiency particulate filters (HEPA). These types of filters are capable of removing approximately 99.97 percent of the DPM emissions from air introduced into the HVAC system (U.S. EPA 2022). The system may also include a carbon filter to remove other chemical matter. Filtration systems must operate to maintain positive pressure within the building interior to prevent entrainment of outdoor air indoors. 2. If the development limits infiltration through non-operable windows, a suitable ventilation system shall include a ventilation system with filtration specifications equivalent to or better than the following: (1) American Society of Heating, Refrigerating and Air- Conditioning Engineers MERV-13 supply air filters, (2) greater than or equal to one air exchanges per hour of fresh outside filtered air, (3) greater than or equal to four air exchanges per hour recirculation, and (4) less than or equal to 0.25 air exchanges per hour in unfiltered infiltration. These types of filtration methods are capable of removing approximately 90 percent of the DPM emissions from air introduced into the HVAC system. 3. Windows and doors shall be fully weatherproofed with caulking and weather-stripping that is rated to last at least 20 years. Weatherproof should be maintained and replaced by the property owner, as necessary, to ensure functionality for the lifetime of the project. 4. Where appropriate, install passive (drop-in) electrostatic filtering systems, especially those with low air velocities (i.e., 1 mph). 5. Prepare an ongoing maintenance plan for the HVAC and filtration systems, consistent with manufacturers' recommendations. The applicant shall inform occupants regarding the proper use of any installed air filtration system replaced by the property owner, as necessary, to ensure functionality for the lifetime of the project.	Prior to the issuance of any building permit.	Applicant / City of Berkeley Planning and Development Department

Table 7.A: Applicable Housing Element EIR Mitigation Measures

Housing Element Mitigation Measure	Timing for Mitigation Measure	Responsible Party / Approving Agency
Cultural Resources		
CUL-2 Historical Resources Discretionary Review. For projects that are subject to discretionary review that occur during the Housing Element period where a historical-age building or structure that has not been previously evaluated is present, a historical resources assessment shall be performed by an architectural historian or historian who meets the Secretary of the Interior Professional Qualification Standards (PQS) in architectural history or history. The qualified architectural historian or historian shall conduct an intensive-level survey in accordance with the California Office of Historic Preservation guidelines to determine if the property qualifies for federal, state, or local historical resources designation. All age eligible properties shall be evaluated within their historic context and documented in a technical memorandum with Department of Parks and Recreation Series 523 Forms. Should a property be found to be a qualifying historical resource, the project shall be subject to the City's regulations for permit review, including by the Preservation Landmarks Commission pursuant to Chapter 3.24.260, and/or by the Zoning Adjustments Board pursuant to Chapter 23.326 of the City of Berkeley Municipal Code. Efforts shall be made to the extent feasible to ensure that impacts are mitigated. Application of mitigation shall generally be overseen by a qualified architectural historian or historic architect meeting the PQS, unless unnecessary in the circumstances (e.g., preservation in place). In conjunction with a development application that may affect the historical resource, the historical resources built environment assessment shall also identify and specify the treatment of character-defining features and construction activities. Efforts shall be made to the greatest extent feasible to ensure that the relocation, rehabilitation, or alteration of the resource is consistent with the Secretary of the Interior's Standards for the Treatments of Historic Properties (Standards). In accordance with CEQA, a project that has been determined to conform with the Standards generally would not cause a significant adverse direct or indirect impact to historical resources (14 CCR § 15126.4(b)(1)). Application of the Standards shall be overseen by a qualified architectural historian or historic architect meeting the PQS. In conjunction with any development application that may affect the historical resource, a report identifying and specifying the treatment of character-defining features and construction activities shall be provided to the City for review and concurrence. As applicable, the report shall demonstrate how the project complies with the Standards and be submitted to the City for review and approval prior to the issuance of permits. If significant historical resources are identified on a development site and compliance with the Standards and or avoidance is not possible, appropriate site-specific mitigation measures shall be established and undertaken. These may include documentation of the resource in a manner consistent with the standards of the Historic American Building Survey (HABS). Documentation should include full descriptive and historical narrative, measured drawings, and medium format photographs, all in archivally stable format.	Prior to the issuance of any building permit.	Qualified Architectural Historian / City of Berkeley Planning and Development Department

Table 7.A: Applicable Housing Element EIR Mitigation Measures

Housing Element Mitigation Measure	Timing for Mitigation Measure	Responsible Party / Approving Agency
Geology and Soils		
GEO-1 Protection of Paleontological Resources. If ground disturbance below the level of prior disturbance and into native soils is proposed to occur in areas mapped as Pleistocene alluvial fan and fluvial deposits (Qpaf), Orinda Formation (Tor), or Knoxville Formation (Kjk), then the City shall require the following to be implemented: **Retention of Qualified Professional Paleontologist.** Prior to initial ground disturbance, the project applicant shall retain a Qualified Professional Paleontologist, as defined by Society of Vertebrate Paleontology (SVP) (2010), to determine the project's potential to significantly impact paleontological resources according to SVP (2010) standards. If underlying formations are found to have a high potential for paleontological resources, the Qualified Professional Paleontologist shall create a Paleontological Mitigation and Monitoring Program, which will be approved by the City and contain the following elements: If underlying formations are found to have a high potential for paleontological resources, the Qualified Paleontologist shall create a Paleontological Mitigation and Monitoring Program, which will be approved by the City and contain the following elements: **Paleontological Worker Environmental Awareness Program (WEAP).** Prior to the start of construction, the Qualified Professional Paleontologist or their designee shall conduct a paleontological Worker Environmental Awareness Program (WEAP) training for construction personnel regarding the appearance of fossils and procedures for notifying paleontological staff should fossils be discovered by construction staff. **Paleontological Monitoring.** Full-time paleontological monitoring shall be conducted during ground disturbing construction activities (i.e., grading, trenching, foundation work) in sediments assigned a high paleontological sensitivity. Paleontological monitoring shall be conducted by a qualified Paleontological Resources Monitor, as defined by the SVP (2010). The duration and timing of the monitoring will be determined by the Qualified Professional Paleontologist based on the observation of the geologic setting from initial ground disturbance, and subject to the review and approval by the City. If the Qualified Professional Paleontologist determines that full-time monitoring is no longer warranted, based on the specific geologic conditions once the full depth of excavations has been reached, they may	Prior to the issuance of any building permit.	Qualified Paleontologist / City of Berkeley Planning and Development Department

Source: Housing Element (2023)

Table 7.B: Applicable City Conditions of Approval

Issue Area	City COA
Aesthetics	**Exterior Lighting.** All exterior lighting shall be energy efficient where feasible; and shielded and directed downward and away from property lines to prevent excessive glare beyond the subject property.
Air Quality	**Public Works – Implement Air District-Recommended Measures During Construction**. For all proposed projects, Air District recommends implementing all the Basic Construction Mitigation Measures, listed below to meet the best management practices threshold for fugitive dust: • All exposed surfaces (e.g., parking areas, staging areas, soil piles, graded areas, and unpaved access roads) shall be watered two times per day. • All haul trucks transporting soil, sand, or other loose material off site shall be covered. • All visible mud or dirt tracked-out onto adjacent public roads shall be removed using wet power vacuum street sweepers at least once per day. The use of dry power sweeping is prohibited. • All vehicle speeds on unpaved roads shall be limited to 15 mph. • All roadways, driveways, and sidewalks to be paved shall be completed as soon as possible. Building pads shall be laid as soon as possible after grading unless seeding or soil binders are used. • Idling times shall be minimized either by shutting equipment off when not in use or reducing the maximum idling time to 5 minutes (as required by the California airborne toxics control measure Title 13, Section 2485 of California Code of Regulations [CCR]). Clear signage shall be provided for construction workers at all access points. • All construction equipment shall be maintained and properly tuned in accordance with manufacturer's specifications. All equipment shall be checked by a certified mechanic and determined to be running in proper condition prior to operation. • Post a publicly visible sign with the telephone number and person to contact at the lead agency regarding dust complaints. This person shall respond and take corrective action within 48 hours. The Air District's phone number shall also be visible to ensure compliance with applicable regulations.
	Air Quality – Diesel Particulate Matter Controls During Construction. All off-road construction equipment used for projects with construction lasting more than 2 months shall comply with one of the following measures: a. The project applicant shall prepare a health risk assessment that demonstrates the project's on-site emissions of diesel particulate matter during construction will not exceed health risk screening criteria after a screening-level health risk assessment is conducted in accordance with current guidance from Air District and Office of Environmental Health Hazard Assessment (OEHHA). The health risk assessment shall be submitted to the Land Use Planning Division for review and approval prior to the issuance of building permits; or b. All construction equipment shall be equipped with Tier 2 or higher engines and the most effective Verified Diesel Emission Control Strategies (VDECS) available for the engine type (Tier 4 engines automatically meet this requirement) as certified by the California Air Resources Board (CARB). The equipment shall be properly maintained and tuned in accordance with manufacturer specifications. In addition, a Construction Emissions Minimization Plan (Emissions Plan) shall be prepared that includes the following: ● An equipment inventory summarizing the type of off-road equipment required for each phase of construction, including the equipment manufacturer, equipment identification number, engine model year, engine certification (tier rating), horsepower, and engine serial number. For all VDECS, the equipment inventory shall also include the technology type, serial number, make, model, manufacturer, CARB verification number level, and installation date.

Table 7.B: Applicable City Conditions of Approval

Issue Area	City COA
	● A Certification Statement that the Contractor agrees to comply fully with the Emissions Plan and acknowledges that a significant violation of the Emissions Plan shall constitute a material breach of contract. The Emissions Plan shall be submitted to the Public Works Department for review and approval prior to the issuance of building permits.
Biological Resources	**Avoid Disturbance of Nesting Birds.** Initial site disturbance activities, including vegetation and concrete removal, shall be prohibited during the general avian nesting season (February 1 to August 31), if feasible. If nesting season avoidance is not feasible, the applicant shall retain a qualified biologist to conduct a preconstruction nesting bird survey to determine the presence/absence, location, and activity status of any active nests on or adjacent to the project site. The extent of the survey buffer area surrounding the site shall be established by the qualified biologist to ensure that direct and indirect effects to nesting birds are avoided. To avoid the destruction of active nests and to protect the reproductive success of birds protected by the Migratory Bird Treaty Act and the California Fish and Game Code, nesting bird surveys shall be performed not more than 14 days prior to scheduled vegetation and concrete removal. In the event that active nests are discovered, a suitable buffer (typically a minimum buffer of 50 feet for passerines 250 feet for raptors) shall be established around such active nests and no construction shall be allowed inside the buffer areas until a qualified biologist has determined that the nest is no longer active (e.g., the nestlings have fledged and are no longer reliant on the nest). No ground-disturbing activities shall occur within this buffer until the qualified biologist has confirmed that breeding/nesting is completed, and the young have fledged the nest. Nesting bird surveys are not required for construction activities occurring between August 31 and January 31.
Cultural Resources	**Archeological Resources.** (Ongoing throughout demolition, grading, and/or construction). Pursuant to CEQA Guidelines section 15064.5(f), "provisions for historical or unique archeological resources accidentally discovered during construction" should be instituted. Therefore: A. In the event that any prehistoric or historic subsurface cultural resources are discovered during ground disturbing activities, all work within 50 feet of the resources shall be halted and the project applicant and/or lead agency shall consult with a qualified archeologist, historian or paleontologist to assess the significance of the find. B. If any find is determined to be significant, representatives of the project proponent and/or lead agency and the qualified professional would meet to determine the appropriate avoidance measures or other appropriate measure, with the ultimate determination to be made by the City of Berkeley. All significant cultural materials recovered shall be subject to scientific analysis, professional museum curation, and/or a report prepared by the qualified professional according to current professional standards. C. In considering any suggested measure proposed by the qualified professional, the project applicant shall determine whether avoidance is necessary or feasible in light of factors such as the uniqueness of the find, project design, costs, and other considerations. D. If avoidance is unnecessary or infeasible, other appropriate measures (e.g., data recovery) shall be instituted. Work may proceed on other parts of the Project site while mitigation measures for cultural resources is carried out. E. If significant materials are recovered, the qualified professional shall prepare a report on the findings for submittal to the Northwest Information Center.
	Human Remains. (Ongoing throughout demolition, grading, and/or construction). In the event that human skeletal remains are uncovered at the project site during ground-disturbing activities, all work shall immediately halt, and the Alameda County Coroner shall be contacted to evaluate the remains, and following the procedures and protocols pursuant to Section 15064.5 (e)(1) of the CEQA Guidelines. If the County Coroner determines that the remains are Native American, the City shall contact the California Native American Heritage Commission (NAHC), pursuant to subdivision (c) of Section 7050.5 of the Health and Safety Code, and all excavation and site preparation activities shall cease within a 50-foot radius of the find until appropriate

Table 7.B: Applicable City Conditions of Approval

Issue Area	City COA
	arrangements are made. If the agencies determine that avoidance is not feasible, then an alternative plan shall be prepared with specific steps and timeframe required to resume construction activities. Monitoring, data recovery, determination of significance and avoidance measures (if applicable) shall be completed expeditiously.
Geology and Soils	**Paleontological Resources.** (Ongoing throughout demolition, grading, and/or construction). In the event of an unanticipated discovery of a paleontological resource during construction, excavations within 50 feet of the find shall be temporarily halted or diverted until the discovery is examined by a qualified paleontologist (per Society of Vertebrate Paleontology standards [SVP 1995,1996]). The qualified paleontologist shall document the discovery as needed, evaluate the potential resource, and assess the significance of the find. The paleontologist shall notify the appropriate agencies to determine procedures that would be followed before construction is allowed to resume at the location of the find. If the City determines that avoidance is not feasible, the paleontologist shall prepare an excavation plan for mitigating the effect of the project on the qualities that make the resource important, and such plan shall be implemented. The plan shall be submitted to the City for review and approval.
Greenhouse Gas Emissions	**Construction and Demolition Diversion.** Applicant shall submit a Construction Waste Management Plan that meets the requirements of BMC Chapter 19.37 including 100 percent diversion of asphalt, concrete, excavated soil and land-clearing debris and a minimum of 65 percent diversion of other nonhazardous construction and demolition waste.
	Low-Carbon Concrete. The project shall verify compliance with the Berkeley Green Code (BMC Chapter 19.37) including use of concrete mix design with a cement reduction of at least 25 percent.
Hazards and Hazardous Materials	**Toxics.** The applicant shall contact the Toxics Management Division (TMD) at 1947 Center Street or (510) 981-7470 to determine which of the following documents are required and timing for their submittal: A. Phase I and Phase II Environmental Site Assessment (ESA) (per ASTM 1527). A recent Phase I ESA (less than 2 years old) shall be submitted to the Toxics Management Division for developments for: all new commercial, industrial and mixed-use developments and all improvement projects that require work 5 or more feet below grade, and all new residential buildings with more than four dwelling units located in the Environmental Management Area (or EMA). The EMA can be viewed at: City of Berkeley Community GIS Portal (arcgis.com) B. Depending on the findings in the Phase I, a Phase II or additional investigation may be necessary. Any available soils and groundwater analytical data available for projects listed in this section must also be submitted to TMD. C. Environmental Site Clearance. The applicant shall provide environmental screening clearance from either the San Francisco Bay Regional Water Quality Control Board (RWQCB), Department of Toxic Substances Control (DTSC), or the Alameda County Department of Environmental Health's Local Oversight Program (LOP). Clearance from one of these regulatory agencies will ensure that the property meets development investigation and cleanup standards for the specific use proposed on the property. Environmental screening clearance shall be submitted to the City of Berkeley's Toxics Management Division prior to issuance of any building permits. D. Soil and Groundwater Management Plan. A site-specific Soil and Groundwater Management Plan (SGMP) shall be submitted to Toxics Management Division (TMD) for all non-residential projects, and residential or mixed-use projects with more than four dwelling units, that: (1) are in the Environmental Management Area (EMA), as shown on the most recent City of Berkeley EMA map, and (2) propose any excavations deeper than 5 feet below grade or if significant soils removal is anticipated. The SGMP shall be submitted to the TMD with the project's building permit application and shall be approved by TMD prior to issuance of the building permit. The SGMP shall comply with the hazardous materials and waste management standards

Table 7.B: Applicable City Conditions of Approval

Issue Area	City COA
	required by BMC Section 15.12.100, the stormwater pollution prevention requirements of San Francisco Bay Regional Water Quality Control Board's Order No. R2-2009-0074, California hazardous waste generator regulations (Title 22 California Code of Regulations (CCR) 66260 et seq.), and the East Bay Municipal Utility District's Ordinance 311, and shall include the following: i. procedures for soil and groundwater management including identification of pollutants and disposal methods; ii. procedures to manage odors, dust and other potential nuisance conditions expected during development; iii. notification to TMD within 24 hours of the discovery of any previously undiscovered contamination; and iv. the name and phone number of the individual responsible for implementing the SGMP and who will respond to community questions or complaints. TMD may require additional information or impose additional conditions as deemed necessary to protect human health and the environment. All requirements of the approved SGMP shall be deemed conditions of approval. E. Demolitions & Renovations – Building Materials Survey. A hazardous materials survey for building materials and plans on hazardous materials and hazardous waste removal and disposal is required and must be prepared by qualified professionals, and submitted to the Toxics Management Division (TMD) prior to issuance of the building permit. i. The survey shall include the identification of all materials to be disturbed for lead-based paints, PCB containing equipment and caulking, hydraulic fluids, refrigerants, treated wood, and mercury containing devices (including fluorescent light bulbs and mercury switches), asbestos and other hazardous materials and chemicals. ii. If asbestos is identified, Bay Area Air Quality Management District Regulation 11-2-401.3 a notification must be made and the J number must be made available to the City of Berkeley Permit Service Center. Contractors must follow state regulations where there is asbestos-related work involving 100 square feet or more of asbestos containing material (8 Cal. Code Regs. §1529, §341.6 et seq.) iii. The report to the TMD shall include, in addition to the survey, plans on hazardous materials and hazardous waste removal and disposal that comply with State and Federal codes including California Code of Regulations (CCR) 66260 et seq. iv. Documentation evidencing disposal of hazardous waste in compliance with the survey shall be submitted to TMD within 30 days of the completion of the demolition. Please note, the PCB Screening Form required by Public Works, Engineering, is a separate requirement and does not address the PCB identification requirement of the Toxics Management Division. F. Hazardous Materials Business Plan. A Hazardous Materials Business Plan (HMBP) in compliance with BMC Section 15.12.040 and California Health & Safety Code, Chapter 6.95 Div. 20, shall be submitted to the Toxics Management Division through the California Environmental Reporting System: http://cers.calepa.ca.gov/ for chemicals used or stored on site during construction that exceed reporting thresholds. The reporting is required if your facility stores or handles hazardous materials in aggregate quantities equal to or greater than 55 gallons for liquids, 500 pounds for solids, or 200 cubic feet of compressed gases, or generates any quantity of hazardous waste. This includes welding gases, emergency generator fuel, paints, etc. Additionally, the business occupant must submit an HMBP within 30 days of starting operations. G. Petroleum Storage. A Spill Prevention, Control, and Countermeasure (SPCC) Plan is required

Table 7.B: Applicable City Conditions of Approval

Issue Area	City COA
	to be prepared and implemented for facilities with any one of the following: i. Aggregate aboveground petroleum storage capacities of 1,320 gallons or more stored in aboveground storage containers, tanks, oil-filled equipment, or ii. One or more tank(s) in an underground area (TIUGA) with petroleum storage capacities of 55 gallons or greater. More information on TIUGAs can be found here: https://osfm.fire.ca.gov/divisions/pipeline-safety-and-cupa/certified-unified-program-agency-cupa/aboveground-petroleum-storage-act/tank-in-an-underground-area-tiuga/ The SPCC plan must be prepared prior to beginning operations and you must submit facility information to Toxics Management Division (TMD) through the California Environmental Reporting System: http://cers.calepa.ca.gov/. The SPCC plan will be reviewed during the site inspection and shall not be submitted in CERS or to the TMD.
Hydrology and Water Quality	**Stormwater Requirements.** The applicant shall demonstrate compliance with the requirements of the City's National Pollution Discharge Elimination System (NPDES) permit as described in BMC Section 17.20. The following conditions apply:A. The project plans shall identify and show site-specific Best Management Practices (BMPs) appropriate to activities conducted on-site to limit to the maximum extent practicable the discharge of pollutants to the City's storm drainage system, regardless of season or weather conditions. B. Trash enclosures and/or recycling area(s) shall be covered; no other area shall drain onto this area. Drains in any wash or process area shall not discharge to the storm drain system; these drains should connect to the sanitary sewer. Applicant shall contact the City of Berkeley and EBMUD for specific connection and discharge requirements. Discharges to the sanitary sewer are subject to the review, approval and conditions of the City of Berkeley and EBMUD. C. Landscaping shall be designed with efficient irrigation to reduce runoff, promote surface infiltration and minimize the use of fertilizers and pesticides that contribute to stormwater pollution. Where feasible, landscaping should be designed and operated to treat runoff. When and where possible, xeriscape and drought tolerant plants shall be incorporated into new development plans. D. Design, location and maintenance requirements and schedules for any stormwater quality treatment structural controls shall be submitted to the Department of Public Works for review with respect to reasonable adequacy of the controls. The review does not relieve the property owner of the responsibility for complying with BMC Chapter 17.20 and future revisions to the City's overall stormwater quality ordinances. This review shall be conducted prior to the issuance of a Building Permit. E. All paved outdoor storage areas must be designed to reduce/limit the potential for runoff to contact pollutants. F. All on-site storm drain inlets/catch basins must be cleaned at least once a year immediately prior to the rainy season. The property owner shall be responsible for all costs associated with proper operation and maintenance of all storm drainage facilities (pipelines, inlets, catch basins, outlets, etc.) associated with the project, unless the City accepts such facilities by Council action. Additional cleaning may be required by City of Berkeley Public Works Engineering Dept. G. All on-site storm drain inlets must be labeled "No Dumping – Drains to Bay" or equivalent using methods approved by the City. H. Most washing and/or steam cleaning must be done at an appropriately equipped facility that drains to the sanitary sewer. Any outdoor washing or pressure washing must be managed in such a way that there is no discharge or soaps or other pollutants to the storm drain. Sanitary connections are subject to the review, approval and conditions of the

Table 7.B: Applicable City Conditions of Approval

Issue Area	City COA
	sanitary district with jurisdiction for receiving the discharge. I. All loading areas must be designated to minimize "run-on" or runoff from the area. Accumulated waste water that may contribute to the pollution of stormwater must be drained to the sanitary sewer or intercepted and pretreated prior to discharge to the storm drain system. The property owner shall ensure that BMPs are implemented to prevent potential stormwater pollution. These BMPs shall include, but are not limited to, a regular program of sweeping, litter control and spill cleanup. J. Restaurants, where deemed appropriate, must be designed with a contained area for cleaning mats, equipment and containers. This contained wash area shall be covered or designed to prevent run-on or run-off from the area. The area shall not discharge to the storm drains; wash waters should drain to the sanitary sewer, or collected for ultimate disposal to the sanitary sewer. Employees shall be instructed and signs posted indicating that all washing activities shall be conducted in this area. Sanitary connections are subject to the review, approval and conditions of the waste water treatment plant receiving the discharge. K. Sidewalks and parking lots shall be swept regularly to prevent the accumulation of litter and debris. If pressure washed, debris must be trapped and collected to prevent entry to the storm drain system. If any cleaning agent or degreaser is used, wash water shall not discharge to the storm drains; wash waters should be collected and discharged to the sanitary sewer. Discharges to the sanitary sewer are subject to the review, approval and conditions of the sanitary district with jurisdiction for receiving the discharge. L. The applicant is responsible for ensuring that all contractors and sub-contractors are aware of and implement all stormwater quality control measures. Failure to comply with the approved construction BMPs shall result in the issuance of correction notices, citations, or a project stop work order.
	Public Works. All piles of debris, soil, sand, or other loose materials shall be covered at night and during rainy weather with plastic at least one-eighth millimeter thick and secured to the ground.
	Public Works. The applicant shall ensure that all excavation takes into account surface and subsurface waters and underground streams so as not to adversely affect adjacent properties and rights-of-way.
	Public Works. The project sponsor shall maintain sandbags or other devices around the site perimeter during the rainy season to prevent on-site soils from being washed off-site and into the storm drain system. The project sponsor shall comply with all City ordinances regarding construction and grading.
	Public Works. Prior to any excavation, grading, clearing, or other activities involving soil disturbance during the rainy season the applicant shall obtain approval of an erosion prevention plan by the Building and Safety Division and the Public Works Department. The applicant shall be responsible for following these and any other measures required by the Building and Safety Division and the Public Works Department.
Noise	**Construction Noise Reduction Program**.The applicant shall develop a site-specific noise reduction program prepared by a qualified acoustical consultant to reduce construction noise impacts to the maximum extent feasible, subject to review and approval of the Zoning Officer. The noise reduction program shall include the time limits for construction listed above, as measures needed to ensure that construction complies with BMC Section 13.40.070. The noise reduction program should include, but shall not be limited to, the following available controls to reduce construction noise levels as low as practical: ● Construction equipment should be well maintained and used judiciously to be as quiet as practical. ● Equip all internal combustion engine-driven equipment with mufflers, which are in good

Table 7.B: Applicable City Conditions of Approval

Issue Area	City COA
	condition and appropriate for the equipment. ● Utilize "quiet" models of air compressors and other stationary noise sources where technology exists. Select hydraulically or electrically powered equipment and avoid pneumatically powered equipment where feasible. ● Locate stationary noise-generating equipment as far as possible from sensitive receptors when adjoining construction sites. Construct temporary noise barriers or partial enclosures to acoustically shield such equipment where feasible. ● Prohibit unnecessary idling of internal combustion engines. ● If impact pile driving is required, pre-drill foundation pile holes to minimize the number of impacts required to seat the pile. ● Construct solid plywood fences around construction sites adjacent to operational business, residences or other noise-sensitive land uses where the noise control plan analysis determines that a barrier would be effective at reducing noise. ● Erect temporary noise control blanket barriers, if necessary, along building facades facing construction sites. This mitigation would only be necessary if conflicts occurred which were irresolvable by proper scheduling. Noise control blanket barriers can be rented and quickly erected. ● Route construction related traffic along major roadways and away from sensitive receptors where feasible.
	Construction Noise Management – Public Notice Required.At least two weeks prior to initiating any construction activities at the site, the applicant shall provide notice to businesses and residents within 500 feet of the Project site. This notice shall at a minimum provide the following: (1) project description, (2) description of construction activities during extended work hours and reason for extended hours, (3) daily construction schedule (i.e., time of day) and expected duration (number of months), (4) the name and phone number of the Project Liaison for the Project that is responsible for responding to any local complaints, and (5) that construction work is about to commence. The liaison would determine the cause of all construction-related complaints (e.g., starting too early, bad muffler, worker parking, etc.) and institute reasonable measures to correct the problem. A copy of such notice and methodology for distributing the notice shall be provided in advance to the City for review and approval.
	Construction Phases.The applicant shall provide the Zoning Officer with a schedule of major construction phases with start dates and expected duration, a description of the activities and anticipated noise levels of each phase, and the name(s) and phone number(s) of the individual(s) directly supervising each phase. The Zoning Officer or his/her designee shall have the authority to require an onsite meeting with these individuals as necessary to ensure compliance with these conditions. The applicant shall notify the Zoning Officer of any changes to this schedule as soon as possible.
	Construction Hours.Construction activity shall be limited to between the hours of 7:00 a.m. and 6:00 p.m. on Monday through Friday, and between 9:00 a.m. and 4:00 p.m. on Saturday. No construction-related activity shall occur on Sunday or any Federal Holiday.
	Construction Hours – Exceptions. It is recognized that certain construction activities, such as the placement of concrete, must be performed in a continuous manner and may require an extension of these work hours. Prior to initiating any activity that might require a longer period, the developer must notify the Zoning Officer and request an exception for a finite period of time. If the Zoning Officer approves the request, then two weeks prior to the expanded schedule, the developer shall notify businesses and residents within 500 feet of the Project site describing the expanded construction hours. A copy of such notice and methodology for distributing the notice shall be provided in advance to the City for review and approval. The Project shall not be allowed more than 15 extended working days.
	Project Construction Website.The applicant shall establish a Project construction website with the following information clearly accessible and updated monthly or more frequently as changes

Table 7.B: Applicable City Conditions of Approval

Issue Area	City COA
	warrant: ● Contact information (i.e., "hotline" phone number, and email address) for the Project construction manager ● Calendar and schedule of daily/weekly/monthly construction activities ● The final Conditions of Approval, Mitigation Monitoring and Reporting Program, Transportation Construction Plan, Construction Noise Reduction Program, and any other reports or programs related to construction noise, air quality, and traffic.
	Damage Due to Construction Vibration.The project applicant shall submit screening level analysis prior to, or concurrent with demolition building permit. If a screening level analysis shows that the Project has the potential to result in damage to structures, a structural engineer or other appropriate professional shall be retained to prepare a vibration impact assessment (assessment). The assessment shall take into account project specific information such as the composition of the structures, location of the various types of equipment used during each phase of the project, as well as the soil characteristics in the project area, in order to determine whether project construction may cause damage to any of the structures identified as potentially impacted in the screening level analysis. If the assessment finds that the Project may cause damage to nearby structures, the structural engineer or other appropriate professional shall recommend design means and methods of construction that to avoid the potential damage, if feasible. The assessment and its recommendations shall be reviewed and approved by the Building and Safety Division and the Zoning Officer. If there are no feasible design means or methods to eliminate the potential for damage, the structural engineer or other appropriate professional shall undertake an existing conditions study (study) of any structures (or, in case of large buildings, of the portions of the structures) that may experience damage. This study shall: ● Establish the baseline condition of these structures, including, but not limited to, the location and extent of any visible cracks or spalls; and ● Include written descriptions and photographs.
Tribal Cultural Resources	**COA: Archeological Resources** and **COA: Human Remains**.
	Halt Work/Unanticipated Discovery of Tribal Cultural Resources. In the event that cultural resources of Native American origin are identified during construction, all work within 50 feet of the discovery shall be redirected. The project applicant and project construction contractor shall notify the City Planning Department within 24 hours. The City will again contact any tribes who have requested consultation under AB 52, as well as contact a qualified archeologist, to evaluate the resources and situation and provide recommendations. If it is determined that the resource is a tribal cultural resource and thus significant under CEQA, a mitigation plan shall be prepared and implemented in accordance with State guidelines and in consultation with Native American groups. If the resource cannot be avoided, additional measures to avoid or reduce impacts to the resource and to address tribal concerns may be required.
Utilities and Service Systems	**Water Efficient Landscaping** *(prior to the issuance of any building [construction] permit)*. Landscaping, totaling 500 square feet of more of new landscaping or 2,500 square feet or more of renovated irrigated area, shall comply with the State's Model Water Efficient Landscape Ordinance (MWELO). MWELO-compliant landscape documentation including a planting, grading, and irrigation plan shall be included in site plans. Water budget calculations are also required for landscapes of 2,500 square feet or more and shall be included in site plans. The reference evapotranspiration rate for Berkeley is 41.8
	Recycling and Organics Collection. Applicant shall provide recycling and organics collection areas for occupants, clearly marked on plans, which comply with the Alameda County Organics Reduction and Recycling Ordinance (2021-02). Contact the Zero Waste Division's Recycling Program Manager, Julia A. Heath, at jheath@berkeleyca.gov.

From: Zoning Adjustments Board (ZAB)
Subject: FW: 2109 Virginia St.

From: agol@aol.com <agol@aol.com>
Sent: Wednesday, September 10, 2025 10:32 PM
To: Zoning Adjustments Board (ZAB) <Planningzab@berkeleyca.gov>
Subject: 2109 Virginia St.

WARNING: This is not a City of Berkeley email. Do not click links or attachments unless you trust the sender and know the content is safe.

To Zab, I strongly oppose the project. It is far too high at 8 stories. The buildings immediately south of Virginia St. are 3-4 stories. This North Shattuck neighborhood has repeatedly made it clear that we do not want tall buildings in our area.

Most of the110 units will not be affordable to the people who need housing the most. The 18 units set aside for low or moderate income people will not stay affordable for very long, unless specific language is written in to any agreement, as vacancy decontrol will soon see them at market rate.

Furthermore, this is a highly toxic site that has remained vacant for about 25 years because remediation will be so complicated. Remediation will lead to hundreds of truckloads of highly toxic dirt being hauled through our neighborhood.

In my view, and in the view of many of my neighbors, the highest and best use of this property would be as a public parking lot of which there is great need on North Shattuck. We don't need 8 story highrises.

CITY OF BERKELEY

BERKELEY ZAB - ZONING ADJUSTMENTS BOARD MEETING

SEPTEMBER 11, 2025

>> CHAIR GAFFNEY: ALL RIGHT. THANK YOU. ALL RIGHT, YOU WILL HAVE YOUR USE PERMIT ABOUT 14 DAYS AFTER THE NOTICE OF DECISION IS MAILED, UNLESS APPEALED TO COUNCIL. SO THANK YOU SO MUCH. THAT WAS VERY GOOD DISCUSSIONS, EVERYONE. I'M GLAD WE MADE IT THROUGH THAT. WE DO HAVE ONE MORE PROJECT THEN. WE WILL THEN MOVE RIGHT ALONG SINCE IT IS A LATE EVENING ALREADY. TO 2109 VIRGINIA. WE WILL START WITH STAFF PRESENTATION, PER USUAL. AND ACTUALLY, WE WILL HAVE, WE HAVEN'T DONE THIS IN A WHILE, WE WILL HAVE A CAPTIONER'S BREAK IN ABOUT 26 MINUTES. I WILL LET YOU KNOW WHEN THAT COMES ABOUT. WE HAVEN'T GONE OVER 9:00, YEAH.

>> CAN YOU GUYS HEAR ME? GOOD EVENING, MY NAME IS SINGEH SALIKI, I AM THE PROJECT PLANNER FOR THE PROPOSED 2109 VIRGINIA STREET.

USE PERMIT APPLICATION #ZP2024-0066. TONIGHT I WILL PROVIDE AN OVERVIEW OF THE PROJECT AND THEN HAND IT OVER TO THE CONSULTANTS FOR THE ENVIRONMENTAL REVIEW AND THEN I WILL WRAP UP WITH CONCLUSIONS. THE APPLICANT IS SEEKING APPROVAL TO DEMOLISH A BUILDING AND SURFACE PARKING LOT TO CONSTRUCT AN 8-STORY, APPROXIMATELY 113,000 SQUARE FOOT MIXED USE BUILDING, WITH 110 DWELLING UNITS, INCLUDING 9 VERY LOW INCOME AND 9 MODERATE INCOME UNITS. IT INCLUDES APPROXIMATELY 7,000 SQUARE FEET OF USABLE OPEN SPACE. 690 SQUARE FEET OF GROUND FLOOR COMMERCIAL SPACE. 109 OFF STREET VEHICLE PARKING SPACES. AND 64 BICYCLE PARKING SPACES. THE SITE IS LOCATED ON THE NORTHEAST CORNER OF SHATTUCK AVENUE AND VIRGINIA STREET IN THE NORTH BERKELEY NEIGHBORHOOD. THE HALF ACRE LOT IS SPLIT ZONE AND CONTAINS ONE COMMERCIAL DISTRICT, THE NORTH SHATTUCK COMMERCIAL ON APPROXIMATELY 90% OF THE LOT. AND TWO RESIDENTIAL DISTRICTS, R2A AND R4 ON THE REMAINING 10% OF THE LOT. THE SITE IS SURROUNDED BY PROPERTIES IN THE SAME ZONING DISTRICTS, EXCEPT TO THE SOUTH ACROSS VIRGINIA STREET WHERE THE ZONING IS CORRIDOR COMMERCIAL. THE SITE IS DEVELOPED WITH THE SURFACE PARKING LOT IN THE NORTHERN PORTION AND A TWO-STORY COMMERCIAL BUILDING IN THE SOUTHWEST CORNER, AS SHOWN ON THIS SLIDE. THE BUILDING WAS ORIGINALLY CONSTRUCTED AS A MIXED USE AND LATER USED ONLY FOR COMMERCIAL USES. IT'S RECOGNIZABLE MOST RECENTLY AS HOME TO THE LA POULET RESTAURANT WHICH OCCUPIED THE SOUTHWESTERN CORNER. THE

AREA IS CHARACTERIZED BY RESIDENTIAL AND COMMERCIAL BUILDINGS THAT ARE 1-3 STORIES TALL, WITH COMMERCIAL USES PRIMARILY FRONTING ON SHATTUCK AVENUE. SURROUNDING USES INCLUDE COMMERCIAL USES TO THE NORTH AND WEST, AND A MULTI-FAMILY BUILDING TO THE SOUTH. TO THE EAST IS A COMMERCIAL USE AND RESIDENCES. THE PROPERTY IS ACCESSIBLE BY ALAMEDA TRANSIT BUS SERVICE AND IT'S LESS THAN A MILE FROM NORTH BERKELEY B.A.R.T. STATION AND HALF MILE FROM THE DOWNTOWN BERKELEY B.A.R.T. STATION. THE HOUSING ELEMENT IDENTIFIES THE PROJECT SITE AS AN OPPORTUNITY SITE WITH THE POTENTIAL AVERAGE DENSITY OF 50 DWELLING UNITS PER ACRE. THE APPLICANT HAS REQUESTED A DENSITY BONUS UNDER THE STATE DENSITY BONUS LAW. UNDER THE CITY'S DENSITY BONUS PROCEDURES, THE BASE PROJECT IS 55 UNITS. BY PROVIDING NINE VERY LOW INCOME AND NINE MODERATE INCOME UNITS ON SITE, THE PROJECT IS ELIGIBLE FOR 100% DENSITY BONUS OR 55 ADDITIONAL UNITS. THE APPLICANT PROPOSES 55 ADDITIONAL UNITS ABOVE THE BASE DENSITY FOR A TOTAL OF 110 DWELLING UNITS. THIS IS MORE THAN TWICE THE POTENTIAL CAPACITY OF UNITS ANTICIPATED IN THE HOUSING ELEMENT. TWO CONCESSIONS ARE REQUESTED TO EXEMPT THE PUBLIC ART IN LIEU FEE AND RELOCATE UNDERGROUND PARKING IN THE BASE PROJECT. THE APPLICANT ALSO REQUESTS WAIVER FOR HEIGHT, SETBACK, LOT COVERAGE AND PARKING TO ACCOMMODATE THE PROPOSED PROJECT ON THE SITE. THE PROJECT IS VESTED UNDER SB 330 AS OF DECEMBER 2023. THE FULL USE PERMIT APPLICATION WAS SUBMITTED IN JUNE OF 2024 AND DEEMED COMPLETE IN

JULY OF 2024. THE PROJECT'S DEMOLITION REFERRAL WAS REVIEWED BY THE LANDMARKS PRESERVATION COMMISSION IN OCTOBER 2024. THE COMMISSION TOOK NO ACTION TO DESIGNATE LANDMARKING AND RECOMMENDED THE ZAB CONSIDER A CONDITION OF APPROVAL TO INCLUDE A DISPLAY ABOUT LA POULET'S ROLE IN THE FARM-TO-TABLE MOVEMENT IN BERKELEY. THE DESIGN REVIEW COMMITTEE HELD A PRELIMINARY DESIGN REVIEW MEETING IN MAY THIS YEAR AND FORWARDED A FAVORABLE RECOMMENDATION TO THE ZAB WITH DIRECTION FOR REVISIONS AT FINAL DESIGN REVIEW AS DETAILED IN THE STAFF REPORT. THE PROJECT PROPOSES RESIDENTIAL UNITS ARRANGED IN A U-SHAPED BUILDING ON A PODIUM LEVEL WITH A COURTYARD FACING EAST. THE UNITS CONSIST OF STUDIOS, ONE BEDROOM, TWO BEDROOM AND THREE BEDROOM UNITS FOR A TOTAL OF 178 BEDROOMS. ABOVE THE GROUND FLOOR PODIUM THE BUILDING MASSING IS STEPPED BACK FROM THE PROPERTY LINES ON THE NORTH, EAST, AND SOUTH SIDES OF THE LOT. ON THE SOUTHWEST CORNER AT THE INTERSECTION OF SHATTUCK AND VIRGINIA, THE PROJECT PROPOSES A COMMERCIAL SPACE ON THE GROUND FLOOR AND A ROOF DECK ON THE EIGHTH FLOOR. THE MAIN RESIDENTIAL LOBBY IS ACCESSED FROM SHATTUCK AVENUE IS THE PARKING FROM AN EXISTING CURB CUT. I WILL NOW HAND IT OVER TO FLORENTINA TO DESCRIBE THE PROJECT'S ENVIRONMENTAL REVIEW.

>> HELLO, COMMISSIONERS. MY NAME IS FLORENTINA; I'M A SENIOR ENVIRONMENTAL PLANNER WHERE LSA. WE CONDUCTED THE ENVIRONMENTAL ANALYSIS FOR THIS PROJECT. AS MANY OF YOU ALREADY KNOW, THE

PURPOSE OF THE CALIFORNIA ENVIRONMENTAL QUALITY ACT IS REALLY TO INFORM DECISION MAKERS AND THE PUBLIC. CEQA DOCUMENTS DO NOT ADVOCATE FOR OR AGAINST A PROJECT. THEY ARE MEANT TO ANALYZE A PROJECT'S POTENTIAL IMPACT ON THE ENVIRONMENT. AND AS WELL AS PROPOSE ANY ADDITIONAL MEASURES TO LOWER THOSE IMPACTS IN THE FORM OF MITIGATION MEASURES. FOR THIS PARTICULAR PROJECT, WE FOUND THAT THE PROJECT QUALIFIED FOR STREAMLINE REVIEWED UNDER SECTION 15183, WHICH PROVIDES FOR STREAMLINE REVIEW FOR PROJECTS THAT ARE CONSISTENT WITH THE COMMUNITY PLAN, GENERAL PLAN OR ZONING. AS WELL AS FOR SECTION 15162, WHICH ALLOWS FOR THE LEAD AGENCY TO DECIDE THAT A SUBSEQUENT OR SUPPLEMENTAL E.I.R. IS NOT NECESSARY TO BE PREPARED AS THE PROJECT FITS WITHIN THE PREVIOUSLY DONE ANALYSIS. FOR THIS PARTICULAR PROJECT, WE LOOKED AT THE HOUSING ELEMENT CEQA DOCUMENTS AS WELL AS THE GENERAL PLAN AND ANY OTHER DOCUMENTS AIMED AT MITIGATING ENVIRONMENTAL IMPACTS IN THE CITY OF BERKELEY. THE CEQA DOCUMENT FOUND THAT THE PROJECT IS COMPLIANT WITH THE MITIGATION MEASURES INCLUDED IN THE HOUSING ELEMENT E.I.R., AND THAT IT WOULD NOT RESULT IN ANY ADDITIONAL ENVIRONMENTAL IMPACTS ABOVE AND BEYOND WHAT WAS ALREADY LOOKED AT IN THE HOUSING ELEMENT E.I.R. MITIGATION MEASURES FROM THE HOUSING ELEMENT E.I.R. THAT WERE APPLIED FOR THIS PROJECT INCLUDING AN AIR QUALITY ANALYSIS, WHERE WE RAN BOTH CONSTRUCTION AND OPERATION MODELING, A CULTURAL RESOURCES ANALYSIS WHERE WE PEER REVIEWED THE HISTORIC RESOURCES

EVALUATION, AS WELL AS OTHER MITIGATION MEASURES RELATED TO GEOLOGY AND SOILS LIKE THE REQUIREMENT FOR A PROJECT-SPECIFIC GEOTECHNICAL REPORT. NEXT, PLEASE. I'M GOING TO GIVE IT BACK TO SINGEH.

>> THANK YOU. THANK YOU. AT THIS TIME I WOULD LIKE TO MAKE A CORRECTION TO CONDITION #19 IN THE CONDITIONS OF APPROVAL AND RECOMMEND ZAB ADD THE HIGHLIGHTED TEXT REFERENCING THE HOUSING ELEMENT MITIGATION MONITORING AND REPORTING PROGRAM WHICH WILL BE INCLUDED AS AN ATTACHMENT TO THE FINAL CONDITIONS OF APPROVAL. TO CONCLUDE, THE PROJECT IS ELIGIBLE FOR APPROVAL ACCORDING TO THE STATE HOUSING ACCOUNTABILITY ACT. BECAUSE THE PROJECT IS COMPLIANT WITH ALL OBJECTIVE PLAN AND ZONING STANDARDS IT COULD NOT BE DENIED NOR CAN THE DENSITY BE REDUCED UNLESS FINDINGS COULD BE MADE THE PROJECT WOULD CREATE SPECIFIC ADVERSE IMPACTS THAT CANNOT BE MITIGATED. STAFF HASN'T FOUND ANY. THE PROJECT IS ALSO ELIGIBLE FOR SB330 STREAMLINED REVIEW. THIS HEARING IS THE THIRD OUT OF FIVE PUBLIC MEETINGS THAT THE CITY CAN HOLD FOR REVIEW AND DECISION ON THE PROJECT. THE CITY CAN HOLD UP TO TWO ADDITIONAL PUBLIC HEARINGS ON THIS PROJECT, IF NEEDED. ONE OF THOSE HEARINGS MUST BE RESERVED FOR ANY POSSIBLE APPEAL TO CITY COUNCIL. STAFF RECOMMENDS THAT ZAB FIND THE PROJECT EXEMPT FROM CEQA AND APPROVE THE USE PERMIT SUBJECT TO THE FINDINGS AND CONDITIONS AS DETAILED IN THE ZAB PACKET. THIS CONCLUDES STAFF'S PRESENTATION AND WE COULD ANSWER ANY

QUESTIONS ABOUT THE PROJECT.

>> CHAIR GAFFNEY: WONDERFUL. THANK YOU SO MUCH. WE WILL START WITH QUESTIONS FROM THE COMMISSION. ANYONE GOT ANY QUESTIONS TO START OFF WITH? COMMISSIONER PALMATIER?

>> S. PALMATIER: I DON'T KNOW IF THIS IS A QUESTION FOR YOU ALL, MAYBE FOR MY FELLOW ARCHITECTS. WHAT DOES PODIUM LEVEL MEAN? BUILDING?

>> COMMISSIONER CHOI: BASICALLY THE BASE. SO LIKE THE GROUND FLOOR, IF YOU LOOK AT THE DRAWINGS. I THINK THE EAST SIDE OF THE PROPERTY, ESPECIALLY IN THE COURTYARD, THERE'S LIKE A TERRACE. WHICH IS ABOVE THE STREET LEVEL. SO YOU WOULD CONSIDER THAT A PODIUM. YEAH.

>> CHAIR GAFFNEY: GOOD CLARIFICATION. ANY OTHER QUESTIONS FOR STAFF SPECIFICALLY?

>> D. SANDERSON: I HAVE ONE.

>> CHAIR GAFFNEY: YEAH, COMMISSIONER SANDERSON?

>> D. SANDERSON: I NOTICED THAT THERE'S ABOUT 7,000 SQUARE FEET OF USABLE OPEN SPACE. CAN YOU, I HAVEN'T FOUND THE DRAWING THAT SHOWS ME WHERE THAT OPEN SPACE IS. CAN YOU POINT ME TO THAT?

>> THE USABLE OPEN SPACE IS DISTRIBUTED THROUGHOUT THE BUILDING. IT INCLUDES THE PODIUM DECK AND THEN ALSO INCLUDES PRIVATE PATIOS, THE ROOF DECK ON THE EIGHTH FLOOR AS WELL AS PRIVATE BALCONIES ATTACHED TO INDIVIDUAL UNITS.

>> CHAIR GAFFNEY: ALL RIGHT, THANK YOU. COMMISSIONER PALMATIER?

>> S. PALMATIER: I DON'T KNOW IF THIS IS FOR YOU STAFF, CAN YOU REMIND ME THE A.M.I. REQUIREMENTS FOR MODERATE INCOME APARTMENTS? WE HAVE VERY LOW AND MODERATE. THIS IS JUST CLARITY.
>> CHAIR GAFFNEY: GOOD DISTINCTIONS AND IMPORTANT FOR DENSITY BONUS PROJECTS SINCE THAT'S HOW THEY GET MORE DENSITY.
>> MODERATE INCOME IS BETWEEN 80%-120% A.M.I.
>> S. PALMATIER: AND VERY LOW INCOME IS? UP TO 80% A.M.I.
>> I BELIEVE VERY LOW INCOME IS 30-50.
>> S. PALMATIER: 30-50? OKAY.
>> LET ME JUST VERIFY THAT.
>> CHAIR GAFFNEY: STAFF IS JUST VERIFYING THAT.
>> YEAH, HOUSEHOLDS EARNING 50% OR LESS OF A.M.I. THERE'S ALSO AN EXTREMELY LOW IN THE STATE, OR FEDERAL.
>> S. PALMATIER: OKAY, THANK YOU, STAFF.
>> CHAIR GAFFNEY: THANK YOU.
>> D. SANDERSON: QUESTION OF STAFF. COULD YOU REMIND ME WHAT THE DEFINITION OF USABLE OPEN SPACE? YEARS AGO IT HAD A PERCENTAGE THAT HAD TO BE IRRIGATED BUT I DON'T KNOW IF THAT IS STILL THERE.
>> IT IS STILL THERE. 40% OF USABLE OPEN SPACE MUST BE LANDSCAPED, IRRIGATED LANDSCAPE.
>> D. SANDERSON: 40%. OKAY, THANK YOU.
>> CHAIR GAFFNEY: ANY OTHER QUESTIONS FOR STAFF BEFORE WE GO TO THE APPLICANT. WE COULD ALWAYS CONSULT STAFF AGAIN. WE ARE GOING

TO MOVE ON WITH THE APPLICANT NOW. THANK YOU, STAFF. WE WILL POSSIBLY CALL ON YOU IN A BIT. BUT APPLICANT COME ON UP AND GET YOUR PRESENTATION READY.

>> EVERYONE SEEING THIS? NICE TO BE HERE WITH YOU ALL TONIGHT. I'M ISIAH STACKHOUSE, WITH TRACHTENBERG ARCHITECTS. WITH ME IS MICHAEL THOMAS OF PANORAMIC INTERESTS. THANK YOU FOR THE EXCELLENT STAFF REPORT. WE WILL DO A VERY BRIEF PRESENTATION, GIVEN THAT IT IS GETTING LATE. SO PROJECT OVERVIEW. IT'S A HOUSING OPPORTUNITY SITE WHERE WE ARE PROPOSING 110 UNITS, AS DISCUSSED, 18 B.M.R. UNITS. THE MIX OF THE BUILDING IS 13% STUDIOS, 25% ONE-BEDROOMS AND OVER HALF OF THE BUILDING IS LARGER TWO BEDROOMS AND TWO BEDROOM PLUS OFFICES AND A CORNER COMMERCIAL, 7,000 SQUARE FEET OF OPEN SPACE SPREAD THROUGHOUT THE BUILDING AND PARKING FOR 109 CARS. HERE IS THE PROJECT SITE. I'M SURE EVERYONE IS FAMILIAR WITH. IT'S A FANTASTIC SITE CLOSE TO CAMPUS, CLOSE TO DOWNTOWN. REALLY A WALKER'S PARADISE. HERE IS THE SITE IN 3D TO HELP UNDERSTAND THE CONTEXT. HERE IS THE GROUND LEVEL, OR THE SITE PLAN, RATHER. PROPOSED THAT TO ORIENT EVERYONE, SHATTUCK ALONG THE BOTTOM OF THE PAGE AND VIRGINIA TO THE RIGHT. WE ARE PROPOSING NEW SIDEWALKS, TREES AND LANDSCAPING AND PROPOSING A BULB OUT AND PARKLET AT THE CORNER AND LARGE SETBACKS, 10-12 FOOT SETBACKS AT THE SIDE AND REAR YARDS. HERE IS THE GROUND LEVEL PLAN, AGAIN WITH A CORNER CAFE AND THE PROPOSED SIDEWALK BULB OUT AND PARKLET ON SHATTUCK TO CREATE AN

ACTIVE STREETSCAPE AND HELP SUPPORT THE CAFE USE. THE LOBBY IS CENTRAL ALONG WITH SHATTUCK ALONG WITH AN ATTACHED LOUNGE AND FITNESS WITH THE PARKING OUT AWAY FROM THE STREET TOWARDS THE BACK OF THE PROJECT. HERE IS THE LEVEL II PLAN, WITH OUTDOOR PODIUM GARDEN. PROVIDES OPEN SPACE FOR RESIDENTS. AND THAT IS ABOVE THE PARKING LEVEL AND WRAPS AROUND THE SIDE OF THE BUILDING AS WELL. HERE IS THE TYPICAL PLANS AT LEVELS 3-7. AGAIN, A MIX OF STUDIOS, ONE'S, TWO'S AND TWO PLUS OFFICES. THE MAJORITY OF THE UNITS IN THE PROJECT HAVE ATTACHED PRIVATE BALCONIES. AT THE LEVEL EIGHT PLAN, WE REMOVED A COUPLE OF UNITS TO CREATE A CORNER RESIDENTIAL LOUNGE AND AN OUTDOOR ROOF DECK THAT WILL HAVE FANTASTIC VIEWS TO THE BAY, CAMPUS, AND THE DOWNTOWN. HERE ARE TYPICAL UNIT PLANS. AGAIN, A BROAD RANGE OF UNIT TYPES. THESE ARE ALL VERY CAREFULLY DESIGNED, VERY FURNISHABLE UNITS, ALL WITH GREAT LIGHT AND AIR. MOST WITH INTEGRATED DECKS. AGAIN, THE PROJECT INCLUDES 18 BELOW MARKET RATE UNITS THAT WILL BE EQUALLY SPREAD ACROSS THIS WONDERFUL RANGE OF UNIT TYPES. HERE IS A VIEW LOOKING NORTHEAST SHATTUCK AT VIRGINIA, SHOWING THE CORNER RETAIL IN THE FOREGROUND HERE. CORNER RETAIL. YOU COULD SEE THE ROOF DECK AND LOUNGE AT THE ROOF LEVEL. WE ARE PROPOSING WHAT WE THINK ARE VERY RICHLY DETAILED FACADES WITH BRICK WORK, METAL WORK, WARM ACCENTS. VERY STRONG CORNISH LINES AND BALCONIES AND AWNINGS THAT PROVIDE A LOT OF ARTICULATION AND SHADOW PLAY. HERE IS A VIEW LOOKING

SOUTH ALONG SHATTUCK. A VIEW LOOKING WEST ALONG VIRGINIA. HERE IS THE PEDESTRIAN VIEW LOOKING NORTHEAST AT THE CORNER RETAIL. YOU COULD SEE THE PARKLET AND WIDENED SIDEWALK. AND RESIDENTIAL ENTRANCE HERE TO THE LEFT AT THE CENTER OF THE SIDEWALK, SHATTUCK FACADE. HERE IS PEDESTRIAN VIEW LOOKING NORTH AT THE CORNER RETAIL. WITH A RICH EARTHY PALETTE OF MATERIALS, METAL AWNINGS, AND WITH THESE HIGHLY ARTICULATED FACADES WE ARE TRYING TO CREATE A HIGH QUALITY, CAREFULLY CRAFTED BUILDING WE THINK WILL WITHSTAND THE TEST OF TIME. WITH THAT, WE WILL CONCLUDE OUR PRESENTATION AND WE ARE HERE FOR YOUR QUESTIONS.

>> CHAIR GAFFNEY: WONDERFUL. THANK YOU. YEP, COMMISSIONER PALMATIER?

>> S. PALMATIER: COULD YOU PLEASE GO BACK TO THE GROUND FLOOR FLOOR PLAN TO SHOW THE PARKING AND ENTRANCE AND EXITS?

>> YES, HERE IS THE GROUND LEVEL PLAN. VIRGINIA IS HERE. SHATTUCK IS HERE. CORNER COMMERCIAL HAS DOORS TO ENGAGE BOTH STREETS. CENTRAL RESIDENTIAL LOBBY HERE AND GARAGE ENTRY ON SHATTUCK. PART OF THE REASON FOR THAT, THERE'S ACTUALLY A VERY, SURPRISINGLY STEEP SLOPE UP VIRGINIA. AND YOU KNOW, WE DID LOOK AT A DRIVEWAY THERE, AND YOU ARE JUST WAY UP ABOVE THE LEVEL. IN FACT, YEAH, THE NEIGHBORING PROPERTIES ARE ALMOST A FULL STORY UP BY THE TIME YOU GET UP THERE. SO THIS IS REALLY THE ONLY LOCATION FOR THE DRIVEWAY.

>> S. PALMATIER: THANK YOU.

>> CHAIR GAFFNEY: THANK YOU. COMMISSIONER THOMPSON?

>> M. THOMPSON: ON THE PLAN THAT HAS THE PLANTINGS, THE TREES BETWEEN THE NEIGHBORING PROPERTY TO THE EAST, HOW -- WHAT SIZE -- WELL, I DON'T KNOW IF THIS IS THE TIME TO DISCUSS THAT. BUT THERE WAS A LOT OF QUESTIONS IN D.R.C. ABOUT THE PRIVACY BETWEEN THOSE HOMES AND THIS PROPERTY?

>> YEAH, THAT'S A GREAT QUESTION. THE HOMES ARE ALL APPROXIMATELY 70 FEET OR MORE AWAY. IT'S REALLY QUITE AN INCREDIBLE BUFFER FOR A PROJECT THAT'S ALONG THE CORRIDOR. AND ACTUALLY HALF OF THE AREA HERE IS ACTUALLY A COMMERCIAL PARKING LOT THAT WE ABUT. YOU COULD SEE THE HOMES ARE VERY FAR APART. AND THEY ALSO HAVE THEIR OWN TREE SCREENING. THAT SAID, WE DID GO BACK AND MODIFY OUR PLAN HERE. THERE IS A 10-FOOT SETBACK HERE THAT WE ARE PROPOSING, WHICH IS ACTUALLY PRETTY MUCH THE SAME SETBACK THAT YOU GET ON ANY SIDEWALK IN ANY STREET IN BERKELEY. SO IT'S A SETBACK THAT'S BIG ENOUGH TO PROVIDE FOR A DECENT SIZED TREES. THAT'S SOMETHING WE WILL LOOK AT FOR FINAL DESIGN REVIEW, THE ACTUAL SPECIES THERE.

>> CHAIR GAFFNEY: THANK YOU. ANY MORE QUESTIONS? I THINK WE ARE ALL GOOD ON QUESTIONS, I THINK IT WAS A PRETTY THOROUGH PRESENTATION. THANK YOU. WE WILL GO TO PUBLIC COMMENT, AT LEAST. RIGHT NOW I DO NOT HAVE ANY COMMENTS IN PERSON. BUT NOW, ALL RIGHT, LOOKS LIKE WE'VE GOT AT LEAST ONE ONLINE. ONLINE, NOW IS THE TIME TO RAISE YOUR HANDS. JAMES HENDTY HAS ONE.

>> Y. DUFFY: I JUST WANT TO MENTION IN THREE MINUTES IT'S 9:00.

>> CHAIR GAFFNEY: YES, IN THREE MINUTES, LOOKS LIKE WE WILL DO ONE PUBLIC COMMENT, WE WILL CLOSE THE PUBLIC COMMENT PERIOD AND TAKE OUR CAPTIONER'S BREAK. SO JAMES, HENDTY, YOU SHOULD BE ABLE TO SPEAK. LET'S SEE. NOW YOU CAN TRY. JAMES, TAKE IT AWAY. CAN'T HEAR YOU YET, IF YOU ARE TALKING. YOU SHOULD BE ALLOWED TO NOW. LOOKS LIKE YOU ARE UNMUTED.

>> GOOD EVENING. CAN YOU HEAR ME NOW?

>> CHAIR GAFFNEY: YEP, YOU CAN HEAR ME NOW. YOU HAVE TWO MINUTES. WE WILL START THE CLOCK. PERFECT.

>> I'M CONCERNED OVER THE ENVIRONMENTAL REVIEW FOR THIS PROJECT AND IT'S DECIDED TO BE CATEGORICALLY EXEMPT. IT COULD BE IF NOT SITE-SPECIFIC UNIQUE CIRCUMSTANCES, WHICH IS A REQUIREMENT FOR CLASS 32 CATEGORICAL EXEMPTION . IT'S BEING BUILT ON TOP OF A FORMER TOXIC DUMP SITE, THOUGH IT'S BEEN REMEDIATED, IT'S ONLY BEING REMEDIATED TO THE LEVEL OF COMMERCIAL USE. INSTEAD WE ARE PROPOSING FOR 110 UNITS, POTENTIALLY 300 PEOPLE'S HEALTH AT RISK, FOR A SITE THAT HAS ONLY BEEN REMEDIATED TO COMMERCIAL NOT RESIDENTIAL LEVELS. THE PROPONENTS CLAIM, THE BARRIER AT THE TOXIC WEBSITE AT THE ASTRAZENECA SITE HAS FAILED AND NEEDS TO BE REBUILT. A STUDY IN 2022 BY THE DEPARTMENT OF TOXIC SUBSTANCE CONTROL NOTED THE POTENTIAL FOR CHRONIC HEALTH ISSUES IN SURROUNDING COMMUNITIES CAN POTENTIALLY -- BY USE OF BARRIER DOING FULL AND COMPLETE REMEDIATION. THERE'S A DISTINCTION

BETWEEN PUTTING RESIDENTS AT RISK BY NOT REMEDIATING THE SITE TO RESIDENTIAL LEVELS AND TRYING TO COVER IT UP FROM A BARRIER. AND FROM LEGAL PERSPECTIVE THIS IS NOT, UNIQUE SITE-SPECIFIC EXAMPLES AND THIS IS UNUSUAL CIRCUMSTANCES WHICH TRIGGERS A FULL CEQA REVIEW AND NOT THE CATEGORICAL EXEMPTION THAT STAFF IS PROPOSING. AND SO GIVEN THOSE CONCERNS I THINK WE NEED TO GO THROUGH THE ENVIRONMENTAL ISSUES AND HAVE STAFF PERFORM THE NECESSARY CEQA REQUIREMENTS WHICH THEY DID NOT DO IN THIS CASE. AND FINALLY, I AM CONCERNED ALSO THAT DURING UNDERGROUND PARKING THEY WILL BE DIGGING UP THIS DIRT, WHICH HAS ONLY BEEN REMEDIATED TO COMMERCIAL STANDARDS AND POTENTIALLY HAVING TO TRANSPORT ACROSS PUBLIC STREETS.

>> CHAIR GAFFNEY: WRAP IT UP, THANK YOU.

>> THANK YOU.

>> CHAIR GAFFNEY: THANK YOU SO MUCH. THAT IS ALL INCREDIBLY IMPORTANT. THANK YOU FOR YOUR COMMENTS. WE DO HAVE ONE MORE PERSON BUT IT IS EXACTLY 9:00 P.M. SO WE ARE GOING TO TAKE A QUICK CAPTIONER'S BREAK. AVIVA YOU ARE NEXT. WE WILL BE BACK AT 9:10 BUT WE NEED TO TAKE A CAPTIONER'S BREAK AT 9:00. SO EVERYONE, SEE YOU BACK AT 9:10. [CAPTIONER'S BREAK FOR 10 MINUTES] [BREAK]

>> CHAIR GAFFNEY: HELLO. ALL RIGHT. WE ARE BACK. WELCOME. WELCOME, WELCOME, EVERYONE. WE ARE GETTING SO CLOSE. OKAY. WE STILL HAVE PUBLIC COMMENT. THERE'S TWO MORE. NO, THERE IS JUST

ONE MORE. SO AVIVA, THANK YOU SO MUCH FOR WAITING FOR OUR TEN MINUTE CAPTIONER'S BREAK, I KNOW THAT WAS UNFORTUNATE TIMING. WE ARE REFRESHED AND READY TO HEAR YOUR COMMENT. YOU HAVE TWO MINUTES AND I WILL ALLOW YOU TO TALK NOW.

>> CAN YOU HEAR ME?

>> CHAIR GAFFNEY: WE CAN.

>> I APOLOGIZE FOR MY IGNORANCE; THIS IS MY FIRST TIME DOING THIS. I HAD A QUESTION AS I WAS LISTENING, I KNOW THIS BUILDING IS REALLY TALL. I LIVE AT A BUILDING, 16 WILLAMETTE (?) [INDISCERNIBLE] OUR VIEW WILL NOW BE EVERYBODY LIVING IN THE APARTMENT BUILDING. I AM CURIOUS TO KNOW. I DID HEAR THERE WAS SOMETHING GIVEN SPECIAL BECAUSE PEOPLE WERE ABLE TO MOVE IN WITH LOWER OR MID INCOME --

>> CHAIR GAFFNEY: SORRY, HOLD ON. THAT LAST SENTENCE GOT, I THINK TRY TO SPEAK A LITTLE FARTHER FROM YOUR MICROPHONE. DID HEAR MOST, BUT JUST THAT LAST SENTENCE. JUST TO CLARIFY, I'M SORRY, WE WILL PAUSE YOUR TIME. YOU ARE ONE OF THE NEIGHBORS, CORRECT?

>> I OWN AND LIVE IN THE UPSTAIRS UNIT OF 1640 WALNUT STREET. DIRECTLY TO THE EAST OF THE BUILDING.

>> CHAIR GAFFNEY: WONDERFUL. WE CAN HEAR YOU BETTER. GO AHEAD.

>> CURRENTLY WE HAVE A VIEW OF THE BAY. THAT WILL OBVIOUSLY NOT BE THE CASE. MY QUESTION, IS THE REASON THIS BUILDING WAS ALLOWED TO BE SO TALL BECAUSE THERE WAS A GUARANTY OF MEDIUM AND

LOW INCOME UNITS?

>> CHAIR GAFFNEY: INDEED, YES. THIS IS A DENSITY BONUS PROJECT, THEY ARE PROVIDING A CERTAIN AMOUNT OF AFFORDABLE UNITS THAT IS IN THE PACKET. WE CAN TELL YOU THAT EXACT AMOUNT IN A SECOND. YES, THAT IS WHY THEY ARE ABLE TO REQUEST WAIVERS TO BE ABLE TO GO HIGHER.

>> OKAY, MY QUESTION TO THAT IS, WHO MONITORS WHETHER OR NOT THOSE UNITS ARE ACTUALLY BEING GIVEN TO PEOPLE WHO ARE LOW AND MEDIUM INCOME? IS THAT GOING TO BE FOR THE NEXT 5, 10, 15, FOREVER, TO MAKE SURE THAT THE REASON THEY WERE GIVEN THIS ACCOMMODATION IS ACTUALLY BEING HONORED?

>> CHAIR GAFFNEY: THAT'S A WONDERFUL QUESTION. AND CITY STAFF WILL BE SURE TO CLARIFY THAT RIGHT NOW.

>> YES, SURE. SO WHEN DENSITY BONUS PROJECTS PROPOSE BELOW MARKET RATE UNITS, CONDITION OF APPROVAL IS ATTACHED TO THE PERMIT THAT REQUIRES THE APPLICANTS TO ENTER INTO AGREEMENT WITH A REGULATORY AGREEMENT WITH THE CITY. AND THAT DOCUMENT REGULATES THE AFFORDABILITY LEVELS AND THE TERM, THE DURATION OF THOSE UNITS. AND THE TERM DEPENDS ON WHETHER THE UNITS ARE BEING, ARE SATISFIED JUST THE DENSITY BONUS STATE LAW, OR ALSO SATISFYING INCLUSIONARY. THE LOCAL INCLUSIONARY ORDINANCE REQUIRES THE B.M.R. UNITS TO BE AFFORDABLE IN PERPETUITY. AND SO IF THE UNITS ARE MEANT TO SATISFY THE INCLUSIONARY ORDINANCE AS WELL AS DENSITY BONUS, THEN THOSE UNITS NEED TO BE AFFORDABLE IN

PERPETUITY, WHEREAS STATE DENSITY BONUS LAW ONLY REQUIRES 55 YEARS OF AFFORDABILITY.

>> THANK YOU VERY MUCH. I APPRECIATE THAT.

>> CHAIR GAFFNEY: ALL RIGHT. THANK YOU. THAT IS ALL GREAT QUESTIONS. APPRECIATE YOU, STAFF, FOR HAVING GOOD ANSWERS. IT LOOKS LIKE WE ARE GOOD ON PUBLIC COMMENT. LOOKS LIKE EVERYONE IS GOOD THERE. SO I WILL MAKE A MOTION TO CLOSE THE PUBLIC HEARING. ALL THOSE IN FAVOR SAY YES. ALL THOSE OPPOSED SAY NAY. THE PUBLIC HEARING IS CLOSED. THAT MEANS WE CAN BEGIN OUR DELIBERATIONS. WHO WANTS TO KICK US OFF? COMMISSIONER DUFFY?

>> Y. DUFFY: I JUST HAVE A QUESTION ABOUT, WHEN STAFF PRESENTED, YOU HAD BROUGHT UP CONDITION OF APPROVAL #19. I WOULD JUST LIKE SOME CLARIFICATION, IS THERE SOME ACTION REQUESTED ON OUR PART OUTSIDE OF THE DOCUMENT IN FRONT OF US?

>> WHEN YOU MOVE TO APPROVE THE PROJECT, PLEASE INCLUDE THE AMENDMENT TO CONDITION OF APPROVAL #19 TO INCLUDE THE REFERENCE TO THE LINK TO THE HOUSING ELEMENT M.M.R.P., THE MITIGATION MONITORING PROGRAM.

>> Y. DUFFY: IT'S JUST TO INCLUDE THE LINK. IT'S JUST ACCESS TO THAT RESOURCE?

>> CORRECT.

>> Y. DUFFY: I KNOW, BECAUSE IT'S A VERY LENGTHY RESOURCE SO IT'S NOT PRINTED OR PUBLISHED IN THIS WAY. OKAY, PERFECT. THANK YOU.

>> CHAIR GAFFNEY: OKAY, THAT'S GREAT CLARITY. ANYONE ELSE HAVE ANY OTHER COMMENTS ON THAT? COMMISSIONER ALLEN?

>> S. ALLEN: I GET EXCITED WHEN THERE'S A CEQA QUESTION. SO I CAN'T LET THIS GREAT OPPORTUNITY GO BY. I WOULD LIKE TO HEAR FROM FLORENTINA FROM LSA TO TALK ABOUT THE HAZARDOUS MATERIALS KNOWN ON THE SITE. MY ASSUMPTION IS THEY ARE VERY STANDARD. WE HAVE MANY OLD DRY-CLEANERS AND GAS STATIONS AND LEGACY BUSINESSES THAT RESULT IN HAZARDOUS MATERIALS THAT REQUIRE CLEAN UP THAT ARE NOT UNIQUE. AND THE CONDITIONS LOOK VERY STANDARD. BUT FLORENTINA, IF YOU WOULD SPEAK TO THAT.

>> THANK YOU SO MUCH, COMMISSIONER ALLEN. IN RESPONSE TO COMMENT, FIRST CLARIFICATION IS THIS PROJECT WAS NOT FOUND TO BE CATEGORICALLY EXEMPT UNDER CLASS 32, IT WAS UNDER 15183 A PROJECT CONSISTENT WITH GENERAL PLAN AND ZONING. THEREFORE THE EXCEPTIONS TO THE EXEMPTION THE GENTLEMAN MENTIONED DO NOT APPLY TO THIS PROJECT. A SECOND POINT ABOUT THE POTENTIAL CONTAMINATION, A FEW THINGS. ONE IS THE CITY OF BERKELEY HAS A CONDITION OF APPROVAL ON THE BOOKS FOR TOXICS WHICH REQUIRE THE PREPARATION OF A PHASE ONE AND PHASE TWO, DEPENDING ON THE RESULTS OF THOSE TWO STUDIES THE APPLICANT HAS TO IMPLEMENT ANY ADDITIONAL REMEDIATION ACTIONS AS REQUIRED BY THE DEPARTMENT OF PUBLIC HEALTH, OR THE REGULATORY AGENCY. IN ADDITION FOR THIS PROJECT, THE APPLICANT ALREADY CONDUCTED A PHASE ONE, WHICH DETERMINED THAT A PHASE TWO IS NECESSARY. AND THE PHASE TWO WAS

CONDUCTED AS WELL. THERE WERE SOME TRACES OF CONTAMINATION ON SITE. HOWEVER, THOSE TRACES WERE FOUND TO BE WITHIN THE REGULATORY LIMITS. AND IN RESPONSE TO THE POTENTIAL, TO THE REMNANTS OF THAT CONTAMINATION, COMMISSIONER ALLEN IT IS FROM PREVIOUS USES LIKE THE DRY-CLEANERS AND ALL THAT STUFF. PHASE TWO CONCLUDED THAT THERE ARE NO LAND USE RESTRICTIONS ON THE DEED. AND PROPOSED, WHICH IS SOMETHING THAT THE PROJECT IS DOING, THAT THE BUILDING DESIGN LOCATES THE PARKING AND COMMERCIAL USES ON THE GROUND FLOOR AND BE CONSTRUCTED ON A MAT SLAB WHICH WAS FOUND TO BE SUFFICIENT TO MITIGATE THE RESIDUAL SOIL VAPOR IMPACTS. IN ADDITION, THE PROJECT ALSO INCLUDES A CHEMICALLY-RESISTANT VAPOR MEMBRANE WHICH IS PROVEN TO SHOW MITIGATION THAT WOULD MITIGATE THE CHEMICALS OF CONCERN AT THE PROJECT SITE. INCLUDING A PERMEABLE GRAVEL LAYER BENEATH THE MEMBRANE AND FOUNDATION SLABS. SO BASED ON THE PHASE ONE RESULTS, THE PHASE TWO RESULTS, AND THE PROPOSED DESIGN, LSA FOUND THAT POTENTIAL CONCERNS FROM PREVIOUS HAZARDOUS MATERIALS CONTAMINATION WOULD BE LESS THAN SIGNIFICANT. YEAH.

>> CHAIR GAFFNEY: THANK YOU. APPRECIATE THAT CLARITY. ALL GOOD QUESTIONS. I THINK, ARE WE GETTING READY TO ENTERTAIN A MOTION? DOES ANYBODY HAVE ANY FURTHER COMMENTS? NO?

>> Y. DUFFY: I WOULD LIKE TO MAKE A MOTION TO APPROVE THE PROJECT WITH THE AMENDING CONDITION OF APPROVAL #19 TO INCLUDE THE LINKS TO THE M.M.R.P. AND THE RELATED OTHER DOCUMENT.

>> CHAIR GAFFNEY: AS PROPOSED BY STAFF. WE COULD READ THAT OFF.

>> WAS THERE A SECOND TO THAT?

>> CHAIR GAFFNEY: I'LL SECOND THAT.

>> CLERK: GREAT, THANK YOU. SO WE HAVE A MOTION FROM COMMISSIONER DUFFY AND A SECOND FROM CHAIR GAFFNEY TO APPROVE THE PROJECT AS PRESENTED, WITH THE ADDITION, OR AMENDMENT TO CONDITION OF APPROVAL #19 TO ADD A LINK TO THE HOUSING ELEMENT M.M.R.P. TO THE PERMIT. WHEN I CALL YOUR NAME PLEASE STATE YOUR VOTE. COMMISSIONER DUFFY?

>> Y. DUFFY: YES.

>> CLERK: CHAIR GAFFNEY?

>> CHAIR GAFFNEY: YES.

>> CLERK: COMMISSIONER THOMPSON?

>> M. THOMPSON: YES.

>> CLERK: COMMISSIONER PALMATIER?

>> S. PALMATIER: YES.

>> CLERK: COMMISSIONER ALLEN?

>> S. ALLEN: YES.

>> CLERK: COMMISSIONER CHOI?

>> COMMISSIONER CHOI: YES.

>> CLERK: COMMISSIONER SANDERSON?

>> D. SANDERSON: YES.

BERKELEY, CA 94704

FILE COPY

December 18, 1987

Art Kapoor
Art Kapoor Realty
1683 Shattuck Avenue
Berkeley, CA 94709

Dear Mr. Kapoor:

The Department of Health Services has received a letter from Vincent Spencer of the City of Berkeley dated November 30, 1987 which documents that the Berkeley Village site (formerly known as Virginia Cleaners and Dye) located at 1663-1667 Shattuck Avenue and 2103-2109 Virginia Street in Berkeley, has been remediated to the satisfaction of the City.

Based upon the City's conclusions and reports dated September 20, 1987 and November 14, 1987, prepared by Aqua Science Engineers, Inc., staff of the Department have concluded that this site has been adequately mitigated. No further action is required by the Department to satisfy the conditions of the Order Specifying Schedule for Compliance or Correction and Remedial Action dated June 16, 1987 (docket No. HSA 86187-043). It is our understanding, however, that the San Francisco Regional Water Quality Control Board requires that monitoring wells MW-2, MW-3, and KW-1 be monitored once this winter and once this summer to verify that groundwater quality is not impaired. The following remedial measures have been implemented under the direction of the City of Berkeley and the Department:

1) Concentrations of Stoddard Solvent in soil have been reduced to non-detectable levels as a result of the disposal of highly contaminated soils and treatment of soils with lower levels of contamination by soil aeration.

2) Excavation of an abandoned underground storage tank and removal of underlying contaminated soil.

3) Installation of a downgradient ground water monitoring wells. Results do not indicate a threat the ground water or surface water quality.

Please contact Susan Solarz at (415) 540-3401 if there are any questions regarding this letter or the Berkeley Village site.

Sincerely,

Dwight R. Hoenig, Chief
North Coast California Section
Toxic Substances Control Division

23 April 2024

To Whom It May Concern:

Left Coast Architectural History has completed a Historic Resource Evaluation of the property at 1685 Shattuck Avenue, Berkeley. The attached California Department of Parks & Recreation (DPR) 523 series forms present a physical description of the property, a record of its history, and evaluation according to California Register of Historical Resources significance and integrity criteria, and City of Berkeley Landmark and Structure of Merit criteria.

The study found that 1685 Shattuck Avenue was initially built, in part, around 1906. Originally mixed-use, it eventually became strictly commercial and was occupied by various businesses throughout its history, with the Virginia Cleaners being its longest and most dominant occupant. The building was expanded extensively to serve the cleaning plant, eventually growing to about six times its original size. The various parts of the building were incongruous in form and architectural style and were also subsequently remodeled at various times. The building suffered a number of fires during its history, the last of which, in 1981, destroyed almost the entire building, save the southern ground floor shop spaces. Only the portion of the building fronting on Shattuck Avenue was repaired/reconstructed and was given an entirely different architectural treatment than it had previously. In effect, the building present today dates to 1983.

Due to a general lack of historical significance relating to events or people, and exacerbated by the substantial loss of integrity and subsequent inability to represent any of its history prior to 1981, the evaluation determines that the property has no historic significance or integrity, and therefore does not qualify as a historic resource for the purposes of the California Environmental Quality Act. These points are elaborated upon in detail on the attached forms.

Left Coast Architectural History is available to answer questions or provide additional assistance, as needed.

Sincerely,

Caitlin Hibma
Principal/Architectural Historian

Site
The property at 1685 Shattuck Avenue (used herein as the primary address, but referring to the entire building and all assigned address numbers) consists sits on Assessor's parcel 58-2178-18, which is a large rectangular lot at the northeast corner of Shattuck Avenue and Virginia Street. Topography in the area is flat and the parcel is bordered by a public sidewalk on the west and south sides. A two-story commercial building sits at the southwest corner of the parcel with no setback from the sidewalks, while a parking area fills more than half of the northern half of the parcel and extends along the east side of the parcel at the rear of the building. The parking area is bordered by a building on the north and the rear yards and parking lots of properties to the east.

Building
The commercial building is two-stories, has a rectangular plan, and is capped by a flat roof. The exterior walls are clad with textured stucco and adorned with false half-timbering, except for the left side of the first story of the rear (east) facade, (Continued)

Summary
The building at 1685 Sattuck Avenue was initially built, in part, around 1906. Originally mixed-use, it eventually became strictly commercial and was occupied by various businesses throughout its history, with the Virginia Cleaners being its longest and most dominant occupant. The building was expanded extensively to serve the cleaning plant, eventually growing to about six times its original size. The various parts of the building were incongruous in form and architectural style and were also subsequently remodeled at various times. The building suffered a number of fires during its history, the last of which, in 1981, destroyed almost the entire building, save the southern ground floor shop spaces. Only the portion of the building fronting on Shattuck Avenue was repaired/reconstructed and was given an entirely different architectural treatment than it had previously. In effect, the building present today dates to 1983.

Neighborhood Context
The building at 1685 Shattuck Avenue is located in North Berkeley, which as its name denotes, is located north of Downtown Berkeley. The neighborhood is generally bounded by Hearst Avenue on the south, Sacramento Street on the west, Hopkins and Eunice streets on the north, and Euclid Avenue and Arch Street on the east. The neighborhood's southeastern corner abuts the U.C. Berkeley campus, which the subject property is located about one diagonal block away from.

North Berkeley owes its initial development in large part to Henry Berryman. As Downtown Berkeley developed, the area to the north was used primarily as farmland. Berryman purchased a large farm in the area in 1870 and subdivided the land, which kicked off development. In 1878, the neighborhood's growth was encouraged by the extension of the Southern Pacific branch rail line from Downtown, up Shattuck Avenue, to Vine Street. A new depot was built on Shattuck Avenue between Rose and Vine and named Berryman Station. (Continued)

P3a. Description: (continued)

which is partially clad with cast stone and scored smooth stucco. First story fenestration consists of storefronts with wood and aluminum framed plate glass windows. The primary window type on the second story is an aluminum sliding sash with faux muntins. These two- and three-part windows are located in punched rectangular openings with a horizontal orientation. The half-timbering creates flat wood frames around the window openings.

The primary facade faces west onto Shattuck Avenue. The first story features four storefronts; two on each side of a narrow centered stairwell. The two storefronts on the left have faux adobe brick dados under plate glass storefront windows. The leftmost storefront has an aluminum frame window and door assembly, while the second storefront has a set of fully-glazed aluminum-frame double doors at the center and storefront windows in wood frames. The two storefronts on the right side of the facade have stucco-clad dados under wood framed storefront windows that have very wide mullions. The entries are generally centered on each storefront and are located within canted recessed vestibules. They feature partially-glazed paneled wood doors; one a Dutch door. The storefronts on the right have multi-lite wood clerestory sashes at the top. All of the storefronts are topped by fabric awnings. The stairwell at the center of the facade has a narrow round arch opened enclosed by a metal security gate. Terrazzo stairs ascend internally to the second story, where there appear to be doors on either side of the landing, accessing the north and south second floor spaces.

The second story of the primary facade is adorned with false half-timbering in a regular pattern and has a single angled bay window at the center, above the first story stairwell opening. Windows of the primary type are located across the facade, at generally regular intervals (with some variation), and on the bay window. The facade is capped by a pent roof with deep eaves that are adorned with shaped false beam ends. A small gable end is located over the bay window at the center of the facade and at the far right side of the facade, where the pent roof is slightly higher. Both gable ends are clad with stucco and adorned with false half-timbering.

The south facade faces Virginia Street. The corner storefront wraps the southwest corner of the building, so that there is a stucco dado, plate glass windows, clerestory, and a fabric awning at the far left side of the south facade. The center of the facade features a few panels of faux half-timbering, while a single storefront is located at the far right side of the facade. This storefront has very low stucco dados, large plate glass display windows in wood and aluminum frames, an entry door covered by a metal security gate at the center, and a fabric awning above. The second story of the south facade is adorned with false half-timbering and features four regularly spaced windows of the primary type. The facade is capped by a pent roof with deep eaves that are adorned with shaped false beam ends. A small gable end is located at the far left side of the facade, where the pent roof is slightly higher. It is clad with stucco and adorned with false half-timbering.

The east facade faces a surface parking area. The first story is unfenestrated. The left side is clad with cast stone and scored smooth stucco, while the right with textured stucco. A secondary entry door covered by a metal security gate is located at the center below an exterior wood staircase that parallels the facade and provides access to a partially glazed, paneled wood door near the center of the second story. The second story is adorned with false half-timbering and features windows of the primary type in two-part configuration that are arranged in groupings and singly across the facade. The facade is capped by a pent roof with deep eaves that are adorned with shaped false beam ends.

The north facade also faces a surface parking area. The first story is unfenestrated and clad with stucco. A rough concrete surface (possibly where a concrete ramp abutting the wall was demolished) covers the lower wall, while engaged concrete structural piers extend upward, projecting from the wall surface, to a slightly overhanging lip at the second story. The second story is adorned with false half-timbering and features five windows of the primary type in two-part configuration that are regularly spaced across the facade. The pent roof with deep eaves and shaped false beam ends that is found on the other facades wraps the corners of this facade; however, the majority of the roofline features no eaves and only vertical board cladding that meets a flat unadorned roofline.

B10. Significance: (continued)

A number of businesses were established immediately around the station, but for the most part the area began to be characterized as a neighborhood of modest single-family dwellings, continuing that way into the 20th century. Even as late as the publication of the 1903 Sanborn Fire Insurance map, the subject property remained vacant, while the surrounding block featured a number of single-family dwellings. (Wollenberg, Charles; *Berkeley: A City in History;* U.C. Press, 2008. Berkeley Architectural Heritage Assn., “41 Berkeley Walking Tours,” 2015. Sanborn Fire Insurance Maps.)

Property-Specific History
The subject building appears to have been built, in part, around 1906, when Virginia Cleaners was located in the building (according to a 25 May 1982 *Berkeley Daily Gazette* (BDG) article, which stated the business had been at 2109 Virginia Street for 76 years) and when it was first mentioned in newspapers that listed 1683 Shattuck Avenue as a contact address in an advertisement for two rooms for rent. (BDG, 29 Dec. 1906) At that time, the building consisted of only the southern half of the current building. A photograph from 1952 shows that it was a two-story, Edwardian style building. B10. Significance: (continued)

There were three storefronts with recessed entrances, plate glass display windows, and clerestory windows on the ground floor (two on Shattuck Ave, one on Virginia Street). The second story was clad with novelty (varied width) horizontal wood siding and featured three square bay windows on each facade that had wall panels at their base, double-hung windows, and dentiled and modillioned cornices. The building, itself, was capped by an ornate entablature with a wide plain frieze, and dentiled and modillioned cornice.

The 1911 Sanborn Fire Insurance map confirms that only the southern half of the current building existed originally. Based on the 1906 advertisement for residential rental space and numerous later newspaper mentions (also mostly ads for rooms for rent), it appears that the second floor of the building (addressed 1683) had a residential use for a number of years. The two ground floor shops facing Shattuck Avenue were addressed 1685 and 1687, and appear in newspapers as early as 1911, when 1685 Shattuck Avenue was occupied by The Ideal Market. The space at 1687 Shattuck Avenue is mentioned in newspapers as early as 1913, when it housed the Mattson Pharmacy. The rear storefront was 2103-2105 Virginia Street and is mentioned in newspapers as early as 1907, with another room-for-rent ad, perhaps connected to the residential uses on the second floor; however, it housed the Virginia Cleaners, the original and long-time tenant and owning entity of the property. (BDG, 27 Nov. 1981)

A short history of the Virginia Cleaners, written by one of the then-owners of the business and reported by the *Berkeley Daily Gazette* on 2 February 1983, stated that the business was started by two Frenchmen in 1907 at the corner of Shattuck and Virginia Street. The business changed ownership a number of times, but by the 1920s was owned by George and Ethel Durant, who employed Herman Mathis as a delivery driver. Mathis was joined by his brother and in 1934 they bought out the Durants. Eventually, Virginia Cleaners had eight branch shops locally. In 1961, David Mathis, one of the Mathis brothers' sons, joined the family business as co-owner.

The northern addition to the building was added around 1914 or 1915. Addresses associated with the northern half of the building (1675 and 1677 Shattuck Avenue) appear in newspapers as early as 1915, when the Ideal Market was shown to have moved to the space at 1677 Shattuck Avenue. At the same time, a new grocery store was listed in the Ideal Market's old space at 1685 Shattuck.

The 1929 Sanborn Fire Insurance map illustrates the northern addition, including a stairwell that was incorporated between the two halves, giving access to the second story. Further, it shows that the building had also been extended to the east (to the current eastern lot line) with a series of one-story shop spaces fronting on Virginia Street; addressed 2105, 2107, 2109 Virginia Street. A circa 1928 photograph indicates that the storefronts echoed the Edwardian architecture of the original building, with traditional recessed storefronts that included plate glass windows, dedicated entry doors, and clerestory windows above. Behind (to the north of) these added shops were two additional structural extensions, their spaces labeled cleaning and dry cleaning. With these additions, Virginia Cleaners dominated the eastern portion of the property. Two seemingly unrelated, two-unit residential flats buildings were located within the bounds of the current parcel, to the north of the current building, and within the interior angle formed by the extent of the building as it was in 1929. (They remained into the 1980s, but are no longer extant).

The 1950 Sanborn Fire Insurance map shows the conditions of 1929 still largely the same, although a 1952 photograph shows that the northern half of the building and the Virginia Street additions had been stylistically remodeled in the Art Moderne style, including boxy forms, flat stucco wall planes, large multi-part windows with thick steel-sash frames, stack bond brick veneer, flat projecting canopies, and unadorned flat rooflines. These Modernistic sections of facade bracketed the original portion of the building, which still exhibited its original Edwardian style. The aesthetic improvements were made on behalf of Virginia Cleaners, which had also come to occupy the northernmost shop space fronting on Shattuck, where “ironing” was performed, and the second floor of the northern half of the building, which was used for “spotting and ironing.” Shop spaces along Virginia Street were more specifically labeled as “office” and “pressing.” A drug store, then Moore's Pharmacy, was still located in the corner storefront and may have extended into the space to the north, while the Ideal Market still occupied the right-hand shop space in the northern half of the building.

A 1957 Property Card notation states “stucco front after removing gingerbread.” This indicates that the Edwardian style original portion of the building was stripped of any ornamentation and stuccoed to look more homogeneous with the newer portions of the building. Indeed, photographs from 1981 show that even the bay windows and projecting cornice were removed, creating a totally flat wall plane, and wide three-part steel sash windows were installed. Aerial photographs dated 1958 and 1965 show the same extent of the building as on the 1950 Sanborn map; the latter particularly illustrating a sawtooth roof over the eastern and northeastern extensions, which would have brought light into the voluminous interior of the cleaning plant. (U.C. Santa Barbara Library)

In 1976, Art Kapoor, a local realtor, purchased the building from Virginia Cleaners. (BDG, 27 Nov. 1981) He owned the property until recently and, in later years, maintained his real estate agency in the northern second floor space. In 1979, Poulet restaurant took over the corner space, formerly a drug store, and remained until recently. Aerial photographs indicate that the property remained intact until 1980. B10. Significance: (continued)

The building was threatened by fire a number of times during its history. It narrowly escaped the 1923 wildfire that swept down from the Berkeley Hills and burned a large swath of the city to the immediate northeast and east of the subject property. The fire's southwestern spread was stopped only about one block east and a half-block southeast of the property. A fire in 1949 is documented in building permit records, and in 1961, a display spotlight in a front window sparked a two-alarm fire. That fire did about $6,500 worth of damage to the Virginia Cleaners curtain finishing room on the second floor of the northern side of the building. Newspapers described the heat exploding the large second floor plate glass window, and flames coming through the roof. Water damage was sustained by the ground floor shirt finishing department at 1675 Shattuck Avenue and the Ideal Meat Market at 1677 Shattuck Avenue. Finally, in 1981, a catastrophic fire destroyed the majority of the building and changed its character entirely.

In the early morning hours of 17 November 1981, an electrical problem sparked a three-alarm blaze in the eastern portion of the building, occupied by Virginia Cleaners. Flames spread into the western portion of the building where the Ideal Meat Market, a flower shop, and Poulet restaurant were storefront tenants. The fire burned for over two hours before being extinguished. A firefighter fell down the central stairwell and was injured during the emergency, which caused an estimated $1.2 million in damages. After the fire, the deputy fire marshal stated that “the building look[ed] like a Hollywood false front... all the walls and floors fell into the center.” (BDG, 27 Nov. 1981)

The day after the fire, Virginia Cleaners brought in a mobile building to serve as an office, primarily to process claims from customers who had lost belongings. Ultimately, the business relocated to 1650 Shattuck Avenue, and operated from that location, a cleaning plant in Oakland, and their other branch locations. The Ideal Market never reopened and the Orchids Etc. flower shop moved to a new location. Only Poulet restaurant, which was located in the least damaged space, was able to reopen. It remained in the building, occupying the two southern storefronts and (in 1983) expanding into the rear storefront at 2109 Virginia Street. It was in business until July 2023.

Owner Art Kapoor, had only partial insurance coverage on the property at the time of the fire. Coupled with a moratorium on commercial construction in North Berkeley that was in place at the time the building burned appears to be the reason it was never fully rebuilt. (BDG, 27 Nov. 1981) The building that exists currently appears to have simply been the result of the salvage, repair/reconstruction, and remodeling of the most intact and portions of the building that remained (the southernmost ground floor storefront) and as much additional new structure as would constitute a viable commercial property. The earlier architectural character and features of the building were discarded in favor of the current Neo-Tudor aesthetic. By 1983, the building in its current extent and appearance was in place. In 1987, the clean up of soil polluted by toxic dry cleaning chemicals was undertaken and the parking lot area surrounding the building was excavated of 300 cubic yards of material and a chemical storage tank. Kapoor had plans for a mixed-use development project with an underground garage on the site, but they were never realized. (*Oakland Tribune*, 17 April 1987)

A list of tenant businesses, organized by current storefront address (historical address number noted in brackets), is provided below. Where chronological gaps are present, no tenant information was available:

1677 Shattuck Avenue [first floor, north side – historically 1675, 1677 Shattuck Avenue]

Dates	**Tenant**	
	1675	**1677**
1915		The Ideal Market/The Ideal Meat Market
1916	St. John's Bakery	
1923 - 1924	Ideal Delicatessen & Bakery	
1948	The Gloveatorium, leather cleaning and finishing	
1961	Virginia Cleaners, shirt finishing department	
1973 - 1980	Northwestern Title Company of Alameda County	
1981	Orchids Et Cetera, flower shop	
1981 FIRE: This portion of building heavily damaged. Repaired/reconstructed.		
2004 - 2008	Going Places Travel agency	La Leche League/Waddle & Swaddle, parenting and breast feeding support groups
2009 - 2019		Lobelia, women's clothing
2020 – recent	Going Places Travel agency (Storefront units merged, 1675 address number no longer used)

2109 Virginia Street [Virginia St. storefront and eastern addition - historically 2103, 2105, 2109 Virginia Street]

Dates	**Tenant**		
	2103	**2105**	**2109**
1906			Virginia Cleaners & Dyers/ Virginia Cleaners, main plant and office
1914-1917 (East addition built ca.1914)		Virginia Cleaners & Dyers/ Virginia Cleaners	
1921 -1953			
1923-1924		Used furniture shop	
1925	Used furniture shop		
1925-1927	Ye Olde Walnut Furniture Shop/Robie's Antique Shop, R.W. Robie prop.		
1928	The Exclusive Bed House, beds and mattresses	Virginia Cleaners & Dyers/ Virginia Cleaners	
1950 - 1981	Virginia Cleaners & Dyers/ Virginia Cleaners		
1981 FIRE: This portion of building destroyed, not reconstructed (except 2109 Virginia St. at rear of current building)			
post-1981 - Recent	[Portion of building demolished, 2103 and 2105 address numbers no longer used]		Unknown – possibly used by Poulet restaurant.

Architect or Builder

Research did not determine the identity of an architect or builder responsible for the design or construction of the original building or subsequent additions/remodeling. Because of the 1981 fire, which destroyed the majority of the building and resulted in reconstruction with an entirely different architectural character, their work is no longer extant or evident. No information about the designer or builder of the building in its current post-1981 iteration was found.

Architectural Type & Style

The building at 1685 Shattuck Avenue began as, and is currently, a two-part commercial block, as defined by Richard Longstreth in his book *The Buildings of Main Street* (Alta Mira Press, 2000). It represents this type in that it is two-stories, with the first story representing public uses like retail stores, while the second story represents more private uses such as offices. Originally, the building was mixed-use with residential space on the upper floor, but over time evolved to house offices, workshop space, and storage on the second floor. In all cases, however, this generally upheld the two-part commercial block model. Typology ascribed to the architectural treatment of two-part commercial blocks is moot in this case, as the building's current architectural style is a recent application.

The building at 1685 Shattuck Avenue began as an Edwardian style mixed-use building and was expanded and remodeled extensively throughout its history. It took on light-industrial uses and portions of the property were eventually remodeled in the Art Moderne style. By the early 1950s, the property exhibited a mixture of incongruous architectural styles relating to various portions of the building. In the late 1950s, even the original Edwardian style portion was stripped of all ornamentation, including bay windows, and stuccoed in a modernizing remodel. During the late 20th century, the building's original appearance was not evident, and then in 1981, a massive fire destroyed the majority of the building. The small portion that was salvaged and rebuilt was given yet another aesthetic overhaul in the Neo-Tudor style, which referenced none of the earlier styles. Other than the basic form and spatial organization of the building, none of the elements, materials, or decorative features that were indicative of its original architectural style remain (possibly with the exception of some wood-sash clerestory windows above the altered storefronts at the southern corner of the building).

The Neo-Tudor style that the building exhibits today is a late-20th century iteration of the Tudor Revival style that was popular in the 1920s and 1930s, which in turn was a revival of the Tudor style of Medieval England. The Neo-Tudor style was popular from 1965 into the 1990s and was characterized most strongly by false half-timbering and prominent front-gable roof forms. Prominent chimneys and irregularly placed windows of varying sizes, sometimes with diamond-pane sashes, attempted to evoke the Tudor aesthetic. Unlike earlier Tudor-derived buildings, Neo-Tudor style buildings are almost never built of stone or brick, but might sometimes incorporate veneers of these materials. (continued)

B10. Significance: (continued)

Typically, they are standard wood-frame structures with applied features that seem to almost deliberately evoke a sense of superficiality. (John Milnes Baker, *American House Styles*, New York: W.W. Norton & Co., 1994.)

In the case of 1685 Shattuck Avenue, faux half-timbering is present, but consists of narrow-dimension boards that are a cursory suggestion of authentic structural timber-work. Gable forms are present but take the form of three small gables that are tacked to the pent roof and do not relate to the building's actual roof form or structure. The pent roof itself, as well as the undersized and non-integral gables, do not illustrate the Neo-Tudor style, although an impression of superficiality is made. Windows, though accurately framed by half-timbering, are not typical of the style in either their size, arrangement, type, or material. Storefronts are also relatively simple, modernized, and exhibit alterations specific to each unit and do not speak to the Neo-Tudor aesthetic. The angled bay window and tall, narrow, arched stairwell entryway on the primary facade are also not characteristic of the Neo-Tudor style, while the projecting beam ends under the eaves are somewhat Tudor-referential, though their decorative shaping is not. In general, the building is a weak representation of the style, which was likely a result of prohibitive cost and construction restrictions in place when hurried post-fire rebuilding occurred.

Alterations

Building permits and land use planning records provide some documentation of the property's development over time. Permits and records documenting substantial exterior work include:

Date/Range	Source	Description of Work
1921	Property Card	Assessor's note to use 1921 as year for depreciation: many major additions, alterations, modernization undertaken
1928	Property Card	Unspecified alteration
1929	Property Card	Unspecified alteration
1944	Property Card	Unspecified addition
1945	Property Card	Unspecified addition
1946	Property Card	Unspecified addition
1949	Property Card	Repair fire damage [unknown location]
1951	Property Card	Take out second partition, install truss with 2'-1” rods and turnbuckles.
1957	Property Card	Stucco front after removing gingerbread.
1961	Property Card	Fire repair. [Second story, north side]
1981	Property Card	Demo, fire related. Also demo second floor on Shattuck. [Fire destroyed most of building and resulted in demolition of entire eastern portion of building, second floor of current building, and major repairs to first floor, north side, of current building.]
1983	Property Card	Repair fire damage. Add second floor. [Resulted in current, two story building. Eastern portion not rebuilt. Stylistic remodeling undertaken, resulting in current half-timbered Neo-Tudor appearance.]
1996	Inspection History Report	New concrete window wall support – 20 linear feet.

In addition to building permits and land use planning records, sources such as Sanborn Fire Insurance maps, aerial photographs, newspaper articles, and historical images provide additional information on how the building evolved over time:

- 1911 Sanborn Map:
  Subject building consists of only the south half of the current building; two storefronts wide along Shattuck, with a storefront at the rear facing Virginia Street. It was two-stories high. A later photograph indicates it was an Edwardian style building clad with stucco (first story) and horizontal wood siding (second story), with storefronts on the first floor, and three square bay windows each on the second stories of the Shattuck and Virginia Street facades. It had a flat roof. Four small dwellings and some outbuildings occupied the rest of the property.

B10. Significance: (continued)

- Circa 1928 Photograph/1929 and 1950 Sanborn Maps/1939 and 1947 Aerial Photos:
  The 1929 Sanborn map illustrates the northern addition to the building, housing two additional shop spaces on the ground floor and another second floor space. A stairwell was incorporated between the two halves, giving access to the second story. The building had also been extended to the east (to the current eastern lot line) with a series of one-story shop spaces fronting on Virginia Street. A circa 1928 photograph indicates that the storefronts echoed the Edwardian architecture of the original building, with traditional recessed storefronts that included plate glass windows, dedicated entry doors, and clerestory windows above. According to the 1929 Sanborn map, behind/to the north of these added shops were two additional light-industrial spaces. Two residential flats buildings were located within the bounds of the current parcel, to the north of the current building, and within the interior angle formed by the extent of the building. 1939 and 1947 aerial photos show the same conditions.

- 1950 Sanborn map:
  Map indicates the eastern extension had gained a second story. A sawtooth roof is noted over this portion of the building, reproducing the roof that was present when the building was one story (as seen in a 1947 aerial photo).

- 1952, 1970, and 1981 Photographs/1958 and 1965 Aerial Photos:
  The photograph shows that the north half of the current building and the eastern extension on Virginia Street had been remodeled in the Streamline Moderne style. (The earlier circa 1928 photograph of the Virginia Street extension showed Edwardian aesthetics and it is assumed this portion and the northern half of the Shattuck Avenue facade were remodeled.) The original portion of the building remained in the Edwardian style until a 1957 property card notation (above) indicates it, too, was remodeled in a more modern aesthetic. 1958 and 1965 aerial photos show the same conditions.

- 1981 Photograph, Newspaper Articles, and Property Records:
  The building was damaged by a major fire, which destroyed the entire eastern extension and second floor of the current building, while heavily damaging the northern half of the first floor. The shop spaces on the southern half of the first floor were relatively unharmed, but damage resulted in the demolition of most of the existing structure. The building was rebuilt by 1983 in its current extent and architectural character (Neo-Tudor style), which is entirely different from its original appearance and the appearance it had taken on over time with subsequent alterations, additions, and remodeling efforts.

California Register Evaluation

The California Register of Historical Resources (California Register) is an inventory of significant architectural, archaeological, and historical resources in the State of California. In order for a property to be eligible for listing in the California Register, it must be found significant under one or more criteria relating to historically significant events, people, architects or architectural merit, or information potential. The following provides an evaluation of the historic significance of 1685 Shattuck Avenue:

Criterion 1 (Event): *Resources that are associated with events that have made a significant contribution to the broad patterns of California's history and cultural heritage.*

No specific events of historical importance are known to have occurred at the property. It has served a number of common commercial and light-industrial functions throughout its history and into the present day. Built in 1906, the building corresponds to the early period of North Berkeley history, when transportation lines were extended north from Downtown, spurring development. However, it was somewhat late to that initial period of primarily residential development and appears to have been an organic element of growth as commercial uses filled in along Shattuck Avenue between Downtown and Berryman Station around the turn of the 20th century. Its construction fits organic patterns of local development, which echoed patterns that occurred throughout the Bay Area. It does not strongly represent development patterns related to important events and, thus, does not stand out as noteworthy within the development or continuing history of Berkeley's Downtown or commerce.

The property does not appear to be eligible for listing in the California Register under Criterion 1.

Criterion 2 (Persons): Resources associated with the lives of persons important in our past.

Early in the building's history there was some residential use on the second floor. The residential space seems to have been primarily a rooms-for-rent situation and only a few names of renters were found, none of whom appear to be historically significant individuals. Originally, and as time progressed, numerous businesses occupied the shop, office, and workshop spaces in the building. They tend not to have specific names associated with them. For those that have known proprietors, those individuals all appear to be small business owners, without the influence or accomplishments that would raise them to a level of historical significance.

The property does not appear to be eligible for listing in the California Register under Criterion 2. (continued)

State of California — The Resources Agency **Primary #**
DEPARTMENT OF PARKS AND RECREATION **HRI#**
CONTINUATION SHEET **Trinomial**

Page 10 **of** 26 ***Resource Name or #** (Assigned by recorder) 1685 Shattuck Avenue, Berkeley, CA
*Recorded by: Caitlin Hibma/Left Coast Architectural History *Date: April 2024 ☒ Continuation ☐ Update

B10. Significance: (continued)

Criterion 3 (Architecture): *Resources that embody the distinctive characteristics of a type, period, region, or method of construction, or represents the work of an important creative individual, or possesses high artistic values.*

The building at 1685 Shattuck Avenue was designed as a two-part commercial block in the Edwardian style. As such, it was typical in execution, with facade organization, features, and finishes that are found on countless commercial buildings of the same age locally and throughout the state. Since its construction it underwent a number of expansions and remodels that changed its configuration and architectural character drastically. Ultimately, the building was burned to such in an extent by a 1981 fire that only a portion of the current building is original fabric (southern ground floor), while the rest is reconstructed. Upon reconstruction, the building was given an entirely different appearance and architectural character than it had previously. The building does not appear to have been architect designed, originally, and does not have a known builder. Likewise, the architects/builders of later additions and remodels are unknown. Such professionals' work was lost in the 1981 fire, anyway, meaning the current building would not be a valid representation of their work. The identity of any architect/builder associated with the current iteration of the building is not known and would likely be too recent to be considered significant.

The property does not appear to be eligible for listing in the California Register under Criterion 3.

Criterion 4 (Information Potential): *Resources that have yielded, or may be likely to yield, information important in prehistory or history*

Criterion 4 is typically concerned with archaeological investigation. Where buildings or architectural elements are concerned, Criterion 4 typically relates to rare construction types, of which 1685 Shattuck Avenue is not an example.

The property does not appear to be eligible for individual listing in the California Register under Criterion 4.

Berkeley Landmark Evaluation

Berkeley Landmarks are designated historical resources within the City of Berkeley. Resources may be designated as Landmarks if they meet one or more of five criteria similar to those used for the California Register, but which elaborate on areas of significance. The following provides an evaluation of the historic significance of 1685 Shattuck Avenue according to local significance criteria:

1. Architectural Merit:
a-c. Property that is the first, last, only or most significant architectural property of its type in the region; Properties that are prototypes of or outstanding examples of periods, styles, architectural movements or construction, or examples of the more notable works of the best surviving work in a region of an architect, designer or master builder; Architectural examples worth preserving for the exceptional values they add as part of the neighborhood fabric.

The property, as originally designed, was typical in execution, with facade organization, features, and finishes that are found on countless Edwardian-era commercial buildings locally and regionally. It was altered extensively and repetitively throughout its history, until it burned almost completely in 1981 and now demonstrates an entirely different architectural character than it did previously. Therefore, it does not represent a first last, only, most significant, or outstanding example of historic architecture. Its original architects and/or builders are unknown. Ultimately, the building's destruction by fire and reconstruction in the early 1980s means that none of the property's early appearance, nor the workmanship of its architect/builder is conveyed by the building in its current guise. Therefore, it does not appear to have the high architectural merit that would qualify it as a Berkeley Landmark under this criterion.

2. Cultural value: Structures, sites and areas associated with the movement or evolution of religious, cultural, governmental, social and economic developments of the City.

Neither the construction of the building at 1685 Shattuck Avenue, nor its subsequent ownership, occupancy, and use history, were influenced by religious, cultural, governmental, or social events or developments in the area. Although economic activity would appear to be the building's most obvious cultural association, since it was built and used for commercial purposes and housed small, primarily local businesses, it played a standard role in the organic growth of commercial uses northward on Shattuck Avenue into North Berkeley and was not elemental or influence to that growth pattern. It does not appear to have been associated with any significant movements or events within Berkeley's economic history. Ultimately, the building's destruction by fire and reconstruction in the early 1980s means that none of the property's early history is conveyed by the building in its current guise. Therefore, it does not appear to have the high cultural value that would qualify it as a Berkeley Landmark under this criterion.

3. Educational value: Structures worth preserving for their usefulness as an educational force

The property at 1685 Shattuck Avenue does not appear to have any use as an educational tool. The building is a (continued)

B10. Significance: (continued)

modest commercial structure that does not embody any relationships to important aspects of neighborhood or city history. The property does not have any potential to convey lessons on history, as it is not associated with any important events, nor is it physically illustrative of any significant work or activities of its owners/tenants. It therefore does not appear to have the high educational value that would qualify it as a Berkeley Landmark under this criterion. Ultimately, the building's destruction by fire and reconstruction in the early 1980s means that none of the property's early history is conveyed by the building in its current guise. Therefore, it does not appear to have the high educational value that would qualify it as a Berkeley Landmark under this criterion.

4. Historic value: Preservation and enhancement of structures, sites and areas that embody and express the history of Berkeley/Alameda County/California/United States. History may be social, cultural, economic, political, religious or military.

The property at 1685 Shattuck Avenue very broadly reflects the organic commercial growth in North Berkeley, but does not stand out within that context for any important contributions to economic history, as it was simply a modest commercial building housing numerous small, primarily local businesses. It does not have any strong associations beyond general development trends in the neighborhood. Ultimately, the building's destruction by fire and reconstruction in the early 1980s means that none of the property's early history is conveyed by the building in its current guise. Therefore, it does not appear to have the high historic value that would qualify it as a Berkeley Landmark under this criterion.

5. Any property which is listed on the National Register described in Section 470A of Title 16 of the United States Code.

The property at 1685 Shattuck Avenue is not listed in the National Register of Historic Places and therefore does not qualify as a Berkeley Landmark under this criterion.

Berkeley Structure of Merit Evaluation

Berkeley Structures of Merit are designated historical resources within the City of Berkeley. Resources may be designated as Structures of Merit if they meet general and/or specific criteria. An evaluation follows:

1. General criteria shall be architectural merit and/or cultural, educational, or historic interest or value. If upon assessment of a structure, the commission finds that the structure does not currently meet the criteria as set out for a landmark, but it is worthy of preservation as part of a neighborhood, a block or a street frontage, or as part of a group of buildings which includes landmarks, that structure may be designated a structure of merit.

As assessed under Berkeley Landmark criteria, the property at 1685 Shattuck Avenue does not possess high architectural merit or cultural, educational, or historic value. Visual observation of buildings around the property identifies many newer buildings and does not indicate any historically significant cohesive or thematically representative grouping within which the building at 1685 Shattuck Avenue would play a meaningful role. The building's destruction by fire and reconstruction in the early 1980s means that none of the property's early history is conveyed by the building in its current guise and it is an anomaly within the surrounding built environment. Therefore, the property does not appear to be worthy of preservation as a part of a group of buildings that includes a Landmark and does not qualify as a Structure of Merit under the General Criteria.

Specific Criteria

a. The age of the structure is contemporary with (1) a designated landmark within its neighborhood, block, street frontage, or group of buildings, or (2) an historic period or event of significance to the City, or to the structure's neighborhood, block, street frontage, or group of buildings.

There are two Berkeley Landmarks within a roughly one block radius of 1685 Shattuck Avenue: the Whittier School (1939, Moderne) and Grace North Church (1913, Arts and Crafts). Neither are closely contemporaneous with 1685 Shattuck Avenue and the subject building's destruction by fire and reconstruction in the early 1980s means that none of the property's early history is conveyed by the building in its current guise, so it is unable to make proper reference to any contemporaneous properties or local events, in any case.

b. The structure is compatible in size, scale, style, materials or design with a designated landmark structure within its neighborhood, block, street frontage, or group of buildings.

The building's original two-part commercial block, wood-clad, Edwardian style appearance bore few similarities to the two nearby Craftsman and Moderne style Landmarks in size, scale, style, materials, or design. It no longer exhibits that appearance and its current half-timbered, stucco clad, Neo-Tudor character is also incompatible with the two Landmarks.

c. The structure is a good example of architectural design. (continued)

CONTINUATION SHEET **Trinomial**

Page 12 **of** 26 ***Resource Name or #** (Assigned by recorder) 1685 Shattuck Avenue, Berkeley, CA
*Recorded by: Caitlin Hibma/Left Coast Architectural History *Date: April 2024 ☒ Continuation ☐ Update

B10. Significance: (continued)

The building was originally a modest and common example of a two-part commercial block designed in the Edwardian style. It was extensively altered and remodeled a number of times, and ultimately burned in 1981. It was reconstructed under a tight budget and zoning restrictions that resulted in an even more modest building of completely different architectural character than it had previously. It has no historic integrity and is not a good example of architectural design.

d. The structure has historical significance to the City and/or to the structure's neighborhood, block, street frontage, or group of buildings.

The property at 1685 Shattuck Avenue generally reflects commercial growth north of Downtown Berkeley in the early-20th century, but does not stand out within that context for any important contributions to local history, as it was simply a modest commercial building housing numerous small, primarily local businesses. Neither the construction of the building nor its later history, was significantly influenced by noteworthy social, cultural, economic, political, religious, or military events or developments in the area. Ultimately, the building's destruction by fire and reconstruction in the early 1980s means that none of the property's early history is conveyed by the building in its current guise.

Integrity

In order to qualify for historic designation, a property must possess significance under the aforementioned criteria *and* have historic integrity. The property at 1685 Shattuck Avenue does not appear to possess the historic significance necessary to qualify for designation; therefore, an analysis of its integrity is not required.

It may be noted, however, that the building, as it exists today, essentially dates to the early 1980s, after it was destroyed by fire and reconstructed. Aside from its basic massing and organization of interior space – which was substantially pared down from the sprawling structure the building had become over its 75 year history – the building retains none of its earlier architectural character or features. If the building had any historic significance, it would be completely unable to convey that significance in its current guise and is considered to have lost all integrity.

Conclusion

Based on the above analysis, the property at 1685 Shattuck Avenue does not appear to be eligible for listing the California Register of Historical Resources or as a City of Berkeley Landmark or Structure of Merit. Therefore, it does not qualify as a historic resource for the purposes of the California Environmental Quality Act (CEQA).

DRAWINGS PROTECTED BY COPYRIGHT STATEMENT

Effective January 1, 2023, (State Government Code, Section 65103.5 (e), SB 1214), if an official copy of architectural drawings are submitted to the Land Use Division of the Planning and Development Department as part of a zoning permit application, the design professional (or the owner of the copyright if different from the design professional) may submit a separate "site plan" or "massing diagram" for posting online or for distribution to the public.

If a separate "site plan" or "massing diagram" is not submitted in addition to the official architectural plans, permission is deemed granted to the Land Use Division to post online or to provide to the public copies of the architectural drawings without the restrictions that would otherwise apply.

A massing diagram and a site plan are defined as follows per Government Code Section 65103.5 (f): "Massing diagram" means a document that displays the three-dimensional form of a building and describes the general profile, bulk, setbacks, and size of the building, but does not contain specific architectural detail.

"Site plan" means a document for a project that is drawn to scale and displays all of the following: property lines, setback lines, topographic lines, easements, drainage, utilities, lighting, driveways, surrounding streets and traffic flow, parking lots and parking spaces, landscaped areas, setback distance between buildings and property lines, outline of existing and proposed buildings and structures, distance between buildings, and ground sign location.

PLEASE CHECK ONE OF THE FOLLOWING (required):

❑ **My application includes a separate "site plan" or "massing diagram," defined in Government Code Section 65103.5(f), for posting online or for distribution to the public.**

☑ **Permission is granted to make publicly available the submitted architectural drawings without restriction to posting online or distribution to the public.**

Under penalty of perjury, I certify that:

(1) the application materials are true and complete to the best of my knowledge; and
(2) if provided, the attached paper and electronic copies of this application are the same; and
(3) I agree to pay all expenses associated with this application

INFORMATION & SUBMITTAL CHECKLIST CITY OF BERKELEY **LAND USE PLANNING**

ZONING PROJECT APPLICATION SUBMITTAL REQUIREMENTS

The Zoning Project Submittal Requirements packet describes all of the materials required to submit a complete Zoning Project Application to the Planning and Development Department, Land Use Division. Section 1 is a checklist of materials required for all projects. Sections 2-7 is a checklist of materials that may be required based on the project type or location.

Each submittal requirement on the checklist is described further in this packet, starting on page 3. Each description identifies whether an item is required, and indicates how to prepare each document, drawing, material, and/or report. Hyperlinked forms and instructions are also online under Land Use at **https://berkeleyca.gov/construction-development/permits-design-parameters/permit-types/permit-forms**.

Pages 1—2 of this packet must be completed and submitted with the Application. Staff will verify that the minimum submittal requirements have been included with your package during the application screening and submittal. Applications that are missing the materials will not be accepted for review.

All documents, reports and plans must be provided in digital format, unless requested in hard copy. See the **Guide to Submitting a Zoning Project Application** for digital plans and document standards.

SECTION 1 - REQUIRED FOR ALL PROJECTS

- ❑ **A. Completed Application**
  - ❑ **1. Zoning Project Application Form**
  - ❑ **2. Completed Copy of This Zoning Project Submittal Requirements Checklist (Pages 1-2)**
- ❑ **B. Applicant Statement/Waiver Request**
- ❑ **C. Payment of Application Fees**
- ❑ **D. Hazardous Waste and Substance Statement**
- ❑ **E. Tabulation Form**
- ❑ **F. Pre-Application Yellow Poster**
- ❑ **G. Pre-Application Neighborhood Contact**

SECTION 2 - PLANS REQUIRED FOR ALL DEVELOPMENT PROJECTS INVOLVING NEW STRUCTURES, ADDITIONS, DEMOLITIONS, OR EXTERIOR ALTERATIONS

PLAN SET (I.E. ARCHITECTURAL DRAWINGS)

- ❑ **A. Site Plan**
- ❑ **B. Landscape and Usable Open Space Plan**
- ❑ **C. Lot Coverage Diagram**
- ❑ **D. Floor Plans**
- ❑ **E. Building Elevations**
- ❑ **F. Street Strip Elevation**
- ❑ **G. Section Drawings**
- ❑ **H. Boundary and/or Topographic Survey**
- ❑ **I. Grading Plan**

SECTION 3 - SUPPORTING DOCUMENTS, STUDIES, GRAPHICS, AND DEPICTIONS

- ❑ **A. Site Photographs**
- ❑ **B. Shadow Study**
- ❑ **C. Story Pole Plan**
- ❑ **D. Arborist Report**
- ❑ **E. Structural Evaluation**
- ❑ **F. Parking Survey**
- ❑ **G. Transportation Demand Management**
- ❑ **H. Photo Simulations**
- ❑ **I. Public Art Declaration**
- ☑ **J. Bird Safe Requirements**

ZONING PROJECT APPLICATION SUBMITTAL REQUIREMENTS

SECTION 4 - ENVIRONMENTAL REVIEW

- ❑ **A. Creek Protection Documentation**
- ❑ **B. Historic Resource Evaluation**
- ❑ **D. Geotechnical and Seismic Hazard Investigation**
- ❑ **C. Phase I or Phase II Site Assessment**
- ❑ **E. Transportation Impact Study**
- ❑ **F. State General Construction Permit**
- ❑ **G. Stormwater Requirements Checklist**

SECTION 5 - REQUIRED FOR HOUSING DEVELOPMENT PROJECTS SUBJECT TO AFFORDABLE HOUSING REQUIREMENTS

- ❑ **A. Affordable Housing Compliance Plan (Preliminary)**
- ❑ **B. Anti-Discrimination Housing Policies**
- ❑ **C. Density Bonus Eligibility Statement**
- ❑ **D. Area of Potential Effects (APE) Statement**

SECTION 6 - LANDSCAPE AND GREEN BUILDING REQUIREMENTS

- ❑ **A. WELO Landscape Requirements**
- ❑ **B. Natural Gas Prohibition, Berkeley Energy Code and Berkeley Green Code**
- ❑ **C. Green Building Requirements**

SECTION 7 - RELATED LAND USE PLANNING DIVISION APPLICATIONS

- ❑ **A. Design Review**
- ❑ **B. Structural Alteration Permit**
- ❑ **C. Zoning Use Questionnaire**
- ❑ **D. Home Occupation Questionnaire - Class II and III**

INFORMATION & SUBMITTAL CHECKLIST CITY OF BERKELEY **LAND USE PLANNING**

ZONING PROJECT APPLICATION SUBMITTAL REQUIREMENTS

SECTION 1 - REQUIRED FOR ALL PROJECTS	
	A. **ZONING PROJECT APPLICATION PACKET** 1. **Zoning Project Application Form** 2. **Zoning Project Submittal Requirements** (Checklist on pages 1 and 2)
	B. **APPLICANT STATEMENT/REQUEST TO WAIVE A SUBMITTAL REQUIREMENT** **Submit** a written statement (in a separate document) that briefly describes the proposed project and how it satisfies the findings required by the Zoning Ordinance, as well as any request to waive a submittal requirement. For applications to modify a prior permit, **submit** the following information 1. Describe the proposed changes from the approved project 2. Clearly list and describe all changes from the approved project and the basis for the change
	C. **PAYMENT OF LAND USE PLANNING APPLICATION FEES** **Submit** required fees to the cashier in the Permit Service Center or pay through the Online Permit Portal. Review of your application will not begin until the fees are paid in full. **If supplemental technical studies are required, a Peer Review deposit will be required (e.**g., Traffic Impact Analysis, Geotechnical Report, Arborist Report).
	D. **HAZARDOUS WASTE AND SUBSTANCES STATEMENT** — **Required for all projects,** pursuant to Government Code Section 65928.
	E. **TABULATION FORM** **Required for all projects.** **Submit** the form as a separate document, completely filling out each column, using the applicable development standards of the Zoning Ordinance as a guide.
	F. **PRE-APPLICATION YELLOW POSTER** **Required for all Projects** **Install** the poster prior to submittal, and submit color photos that clearly show the poster installed at the front of the site and that clearly show the sign content. Yellow Poster Instructions Small Project Sample Poster and fillable PDF template Large Project Sample Poster and fillable PDF template (Large poster required for projects that include four or more stories, State Density Bonus, Floor Area Ratio greater than 2.0, or more than 10,000 square feet gross floor area.)

ZONING PROJECT APPLICATION SUBMITTAL REQUIREMENTS

SECTION 1 - REQUIRED FOR ALL PROJECTS

G. PRE-APPLICATION NEIGHBORHOOD CONTACT AND OUTREACH INSTRUCTIONS

Required for the following projects:

- **All projects located in a Residential District, and all non-residential projects that abut a Residential District are required to contact all abutting and confronting residential occupants and residential property owners to advise them of the proposed development prior to submitting a zoning project application.**
- **All projects of community or neighborhood interest, which consist of the following:**
  i. Any project in a Residential District that would create 6 or more bedrooms on a parcel within ½ mile of the UC Campus (or the area confined by Grant Avenue on the west, Derby Street on the south, and Rose Street on the north), or
  ii. Any project in a Non-Residential District that includes three or more stories, State Density Bonus, Floor Area Ratio greater than 2.0, or more than 10,000 square feet gross floor area.
  iii. Are required to contact all property owners, residents, and neighborhood organizations within 300 feet of the project site to advise them of the proposed development.
- **All residential projects that propose to alter an existing dwelling unit or eliminate a dwelling unit that is subject to the Rent Ordinance (BMC Chapter 13.76) through demolition, including elimination of a dwelling unit through** conversion, are required to provide all sitting tenants notice of the application no later than the date the application is submitted to the City.

SECTION 2 - PLANS REQUIRED FOR ALL DEVELOPMENT PROJECTS INVOLVING NEW STRUCTURES, ADDITIONS, DEMOLITIONS, OR EXTERIOR ALTERATIONS

PLAN SET (I.E. ARCHITECTURAL DRAWINGS) **– GENERAL REQUIREMENTS**

1. **All plans (items A – I) must be included in a single plan set, fully dimensioned, and include:**

— Name of person preparing plans (licensed architect required for certain projects, see Item 3 below)

— Dates of preparation and revision

— Project address

— Graphic scale (see Item 2 below for minimum scales)

— North arrow

— Legend describing all symbols and notations

— Building Code construction and occupancy types

Notes: For applications to modify a prior permit, the plans must clearly show the approved and modified project, and you must "cloud" all changes from the approved project.

For plan resubmittals during review, provide the date of revision on all sheets and "cloud" all changes to previous information. Plan resubmittals must include the full plan set, not individual plan sheets. Staff cannot collate or update your plans for you.

2. **Electronic Plans Requirements:**

See the **Zoning Project Application Guide to Submitting** for digital plans and document standards.

Note that these plans are often released to the public on paper no larger than 8½" x 11", and that you must format your plans so that all images and text are legible at this size.

Hard copy plan sets may be required by the project planner, if necessary to facilitate project review.

Design Review Committee, Landmarks Preservation Commission, and Use Permit applications only, 12 copies of 11" x 17" or 12" x 18" plan sets must be submitted at least two weeks prior to the public meeting or hearing.

3. **Architect or Engineer Required for Certain Projects**

Plans that require preparation by a licensed California architect or engineer under the California Architects Practice Act (Business and Professions Code Sections 5537 and 6737) shall bear the architect or engineer's stamp and signature on each sheet. **This requirement may be waived for projects involving only minor alterations or repairs; consult with a planner. For further information, visit www.cab.ca.gov**

4. **Change of Use**

Applications that ***only*** propose to **change the type of activity or use** occurring within the building must submit the following site-related information:

— **Site Plan** showing the following:

a. Property lines and lot dimensions

b. Existing and proposed building footprint(s), dimensions, setbacks (required, existing and proposed), and projections such as eaves, balconies and bays. Show all buildings , including garages, sheds, etc.

c. Driveways and parking spaces with dimensions, location of handicapped parking spaces, bicycle racks, and security gates.

— **Floor Plans** showing the following:

d. All floors, including mezzanines, basements, and attics

e. Use of all rooms (existing and proposed), per the California Building Code

f. For buildings with multiple commercial tenant spaces, label the use of each tenant space within the subject building

Note: *For changes to existing buildings, provide separate plans for existing and proposed conditions, or if changes are limited, used dashed lines for demolished features and solid lines for new features.*

SECTION 2 - PLANS REQUIRED FOR ALL DEVELOPMENT PROJECTS INVOLVING NEW STRUCTURES, ADDITIONS, DEMOLITIONS, OR EXTERIOR ALTERATIONS

A. SITE PLAN

Required for all projects.
The Site Plan must show the following:

- — Property lines and lot dimensions
- — Existing and proposed building footprint(s) (dimensioned), setbacks (required, existing and proposed), and projections such as eaves, balconies, and bays. Show all accessory structures, such as garages, sheds, etc.
- — Delineation of proposed additions, if any, with shading, hatching or another appropriate method
- — Any portions of neighboring buildings within 20 feet of property lines, including the building-to-building separation (measured in feet)
- — Pathway(s) from the residential structure to the public right of way
- — Driveways and parking spaces with dimensions, location of ADA spaces, and security gates
- — Trash/solid waste storage area
- — Bicycle racks (short-term bicycle parking) subject to the Berkeley Bicycle Plan – Appendix F – Facility Design Toolbox
- — Utility meters / boxes / equipment for all wet and dry utilities – including above-ground and under-ground, in conformance with utility company standards, including on the site and in the public right of way (subject to approval by the Public Works Department).
- — Decks, patios, hot tubs, and all unenclosed accessory structures

Note: The City of Berkeley Community GIS Portal is an online resource indicating site features and characteristics listed above, which are required to be shown on the Site Plan

B. LANDSCAPE AND USABLE OPEN SPACE PLAN

Required for all projects
The Landscape Plan must show the following:

- — Fully dimension all areas that qualify as existing and proposed Usable Open Space, in compliance with the applicable zoning district development standard and BMC Section 23.304.090; and
- — Any existing landscaping to remain and to be removed
- — All proposed landscaping, including all existing and proposed trees, including street trees (indicate species, trunk diameter, drip line), hedge rows, and ground cover
- — All paved areas and surface treatments
- — Fences and retaining walls (materials and height)
- — Significant natural features such as creeks (indicate banks or culvert outline), and prominent landforms.

C. LOT COVERAGE DIAGRAM AND CALCULATIONS

Required for all residential Projects (or the residential portion of a mixed-use project).

- — **Submit** the Lot Coverage Diagram and calculations, using the Site Plan as a base map, which must show the fully dimensioned diagrams to depict existing and proposed lot coverage in compliance with the applicable zoning district development standard and BMC Section 23.106.020.

D. FLOOR PLANS

Required for all projects
The Floor Plan (s) must show the following

- — All floors, including mezzanines, basements, and attics
- — Trash room pursuant to Public Works Department requirements
- — Long-Term Bicycle parking, showing location of lockers or racks suitable for secure locks and subject to the Berkeley Bicycle Plan – Appendix F – Facility Design Toolbox
- — Use of all rooms (existing and proposed), per the California Building Code
- — For changes to existing buildings, provide separate plans for existing and proposed conditions, or if changes are limited, use dashed lines for demolished features and solid lines for new features.

ZONING PROJECT APPLICATION SUBMITTAL REQUIREMENTS

SECTION 2 - REQUIRED FOR ALL DEVELOPMENT PROJECTS INVOLVING NEW STRUCTURES, ADDITIONS, DEMOLITIONS, OR EXTERIOR ALTERATIONS

E. BUILDING ELEVATIONS

Required for all projects.

The Elevations must show the following:

— All exterior features and openings, including finishes and materials

— Existing and proposed building height (as defined in BMC Sections 23.106.090), see Instructions linked below), finished floor elevations, and existing and finished grades (within five feet of the building).

— Adjacent features such as fences, landscaping, and other buildings and property lines.

— For changes to existing buildings, provide separate elevations for existing and proposed conditions, or if changes are limited, used dashed lines for demolished features and solid lines for new features.

Height Instructions –Average Building Height*

(Residential districts, except R-S, R-SMU, and R-BMU)

Height Instructions –Maximum Building Height*

(Hillside Overlay, R-S, R-SMU, and R-BMU, Commercial, and Manufacturing districts)

*In the Hillside Overlay ("H"), both average and maximum building height apply.

F. STREET STRIP ELEVATION

Required for any new main buildings.

Submit a street elevation exhibit showing existing conditions on the parcel and the proposed project in elevation view; include at least two (2) parcels on either side of the subject parcel on a single sheet. Minimum scale is 1/8" = 1'.

G. SECTION DRAWINGS

Required for the following projects:

— **New main buildings in the "H" District.**

— **Additions exceeding 14 feet in average height in the "H" District.**

Submit drawings that show adjacent uphill or downhill buildings where views may be affected. Minimum scale is 1/8" = 1'. Show existing and proposed finished grades.

H. BOUNDARY AND/OR TOPOGRAPHIC SURVEY

Required for the following projects:

— **Any new main building.**

— **Expansions of a building footprint or the creation of accessory building/structures less than two feet from, or within, a required setback.**

Submit a survey meeting the following requirements:

1. Wet-stamped, signed by a licensed CA surveyor or appropriately licensed civil engineer
2. Minimum scale of 1/10" = 1'
3. All property lines, curb and sidewalk, spot elevations, existing structures, building dimensions, and setbacks to all property lines
4. For projects in the "H" District, survey must be no more than five years old and must show contour lines with minimum 5-foot intervals.

I. CONCEPTUAL GRADING PLAN

Required for projects with more than 50 cubic yards of cut and/or fill.

Submit a survey meeting the following requirements:

1. Prepared by a licensed surveyor, architect or engineer
2. Estimated quantities and locations of cut and fill
3. Existing and final elevations

ZONING PROJECT APPLICATION SUBMITTAL REQUIREMENTS

SECTION 3 - SUPPORTING DOCUMENTS, STUDIES, GRAPHICS, AND DEPICTIONS

A. SITE PHOTOGRAPHS

Required for all projects.

Submit one set of exterior photos, that meet the following requirements:

1. Use captions or a key indicating the location (perspective) of each photo.
2. Provide an adequate number of photos to show entire project site and all adjacent buildings for context. Where possible, take wide-angle shots showing project site and adjacent buildings together.

B. SHADOW STUDY

Required for the following projects:

- **Buildings exceeding 14 feet in average height, located in or adjacent to a residential (R) district (excluding ADUs)**
- **Additions exceeding 14 feet in average height on sites adjacent to a residential use**
- **Projects in either the C-T or C-DMU District, requiring a Use Permit to increase the maximum building height/number of stories**

Shadow Study Instructions

C. STORY POLE PLAN

Required for the following projects:

- **New main buildings exceeding 14 feet in average height in the "H" District (excluding ADUs)**
- **Additions exceeding 14 feet in average height in the "H" District**

Story Pole Instructions

D. ARBORIST REPORT

Required for projects involving any construction activity (including excavation, trenching, demolition, paving, storage of materials, and parking of vehicles) within the drip line of a Coast Live Oak (quercus agrifolia) tree with a circumference of at least 18 inches at 4 feet above the ground (or at least 26 inches aggregate circumference for a multi-stemmed tree).
Submit

1. A report by a certified arborist assessing the project's impacts on the affected tree(s) (tree may be located either on- or off-site) and recommending preservation measures both during and after construction, as applicable.
2. Deposit of $460 for the first two hours of peer review of report (additional funds may be required for more complicated projects or site visits)

Tree Protection Instructions

Coast Live Oak Tree Ordinance

E. STRUCTURAL EVALUATION

Required for any project that is not a demolition, but is removing between 25 and 49 percent of a main building's exterior wall and between 25 and 49 percent of a main building's roof framing (including in-kind replacement of existing framing), in order to confirm the feasibility of retaining the remaining portions of any wall and roof.

A Structural Evaluation is not required for projects requesting a Use Permit for demolition.

Submit a demolition diagram that indicates the percentage of each wall and roof that is proposed to be replaced or removed, as well as a report by an independent, fully credentialed structural engineer that evaluates whether, in the operator's opinion, retention of structural elements not proposed for removal is actually feasible.

F. PARKING SURVEY

Required for projects requesting a waiver of any required off-street vehicular parking spaces pursuant to the Zoning Ordinance, located in a Commercial or Manufacturing District (C, M, MM, or MU) .

Parking Survey Instructions

ZONING PROJECT APPLICATION SUBMITTAL REQUIREMENTS

SECTION 3 - SUPPORTING DOCUMENTS, STUDIES, GRAPHICS, AND DEPICTIONS

G. TRANSPORTATION DEMAND MANAGEMENT (TDM) AND BICYCLE PARKING SUPPLEMENTAL APPLICATION

Required projects creating five or more new dwelling units or Group Living Accommodation rooms

TDM required for projects creating 10 or more dwelling units outside of the C-DMU. (Not required for projects where 50 percent of total units are affordable, ADUs, projects located in ES-R, or projects on properties in the Hillside overlay on narrow streets 26-feet wide or less.)

Bicycle parking required for projects creating five or more new dwelling units and/or Group Living Accommodation rooms.

TDM Program and Bicycle Parking Supplemental Application

H. PHOTO SIMULATIONS

Required for a project creating any of the following:

- **Wireless telecommunications projects**
- **A "Large Scale Development Project," which consists of project located in a non-residential district that proposes any of the following:**
  - Density Bonus under Section 65919 of California State Law,
  - Three or more stories in height,
  - Floor Area Ratio more than 2.00, or
  - 10,000 square feet or more of gross floor area.

Photo Simulation Instructions

I. PUBLIC ART DECLARATION

Required for any of the following projects:

- **A new commercial or industrial building**
- **A project that creates five or more dwelling units**
- **An addition of more than 10,000 square feet to any commercial or industrial building**

Public Art Allocation Declaration form

J. BIRD SAFE REQUIREMENTS

Required for any of the following projects:[1]

Nonresidential projects: New construction/addition

Nonresidential Projects: New or replacement windows on existing buildings, unless all facades are Lower Hazard Facades

Residential and Mixed-Use Projects: New construction/addition of 10,000 sq. ft. or more AND more than 35 feet average height

Residential Mixed-Use Projects: New or replacement windows on existing buildings of 10,000 sq. ft. or more AND more than 35 ft. average height unless all facades are Lower Hazard Facades

- **Complete Bird Safe Building Requirements Attestation**
- **For projects that include Lower Hazard Facades, diagrams and calculations that show the percentage of façade area consisting of transparent or reflective material, such as windows or High-Risk Features (as defined in BMC Section 23.304.150)**

[1] Certain projects are exempt. See **BMC 23.304.150**

See Bird Safe Building Requirements Information and Submittal Checklist.

SECTION 4 - ENVIRONMENTAL REVIEW

A. CREEK PROTECTION DOCUMENTATION

Required for any project within 40 feet of the centerline of an open creek, and/or within 25 feet of a culverted creek, that is protected by the Creeks Ordinance

Creek Protection Instructions

Note: Applies even if a protected creek or culvert has not yet been identified by the City.

B. HISTORIC RESOURCE EVALUATION

Required for:

- **Demolition of a non-residential building 40 or more years old, subject to referral to the Landmarks Preservation Commission in accordance with BMC Section 23.326**
- **Demolition/Substantial Change of any building 40 or more years old subject to environmental review pursuant to CEQA**

Submit: State of California Department of Parks and Recreation (DPR) 523 forms. Evaluation(s) to include references to development history documentation (including but not limited to photographs, building permits, Sanborn maps, and directory listings); completed by a qualified historian, architectural historian or historic architect. Provide supplemental information in accordance with the Landmarks Preservation Ordinance criteria (BMC Section 3.24.110).

The Environmental Review Officer may waive this requirement for residential addition and alteration proposals after determining that the project complies with preservation standards and environmental practices OR that qualified sources other than an HRE can provide the relevant information.

California guidelines (Instructions for Recording Historical Features)

C. GEOTECHNICAL AND SEISMIC HAZARD INVESTIGATIONN

Required for all development projects intended for human occupancy located in a State-designated Seismic Hazard Zone, as defined by the California Seismic Hazards Mapping Act and Alquist-Priolo Earthquake Fault Zoning Act, as shown on the State's Environmental Constraints Map.

Exemptions:

For projects located in any State-designated Seismic Hazard Zone (PRC 2693, i.e. liquefaction, landslide, and earthquake shaking):

- **Single-family wood-frame or steel-frame dwellings to be built on parcels of land for which geologic reports have been approved pursuant to an approved subdivision map;**
- **A single-family wood-frame or steel-frame dwelling not exceeding two stories when that dwelling is not part of a development of four or more dwellings; or**
- **Alterations or additions to any structure within a seismic hazard zone which do not exceed either 50 percent of the value of the structure or 50 percent of the existing floor area of the structure.**

If located in the Alquist-Priolo Fault Zone (PRC 2621.6 and 2621.7):

- **Single-family wood-frame or steel-frame dwellings to be built on parcels of land for which geologic reports have been approved pursuant to an approved subdivision map;**
- **A single-family wood-frame or steel-frame dwelling not exceeding two stories when that dwelling is not part of a development of four or more dwellings; and**
- **Alterations or additions to any structure if the value of the alteration or addition does not exceed 50 percent of the value of the structure; or**
- **Conversion of an existing apartment complex into a condominium**

Submit the following:

1. Geotechnical report satisfying the California Building Code and requirements of Special Publication 117A (for landslide and liquefaction zones) and/or California Geological Survey Note 49 (for fault zones); and
2. Deposit of $1,500 for peer review of report (additional funds may be required for more complicated projects.

ZONING PROJECT APPLICATION SUBMITTAL REQUIREMENTS

SECTION 4 - ENVIRONMENTAL REVIEW

D. PHASE I OR II SITE ASSESSMENT

Required for any project that includes the following:

- **Substantial excavation in non-residential zoning districts**
- **A site with a history of soil and/or groundwater contamination (see the Hazardous Waste and Substances Statement)**
- **A site within an Environmental Management Area (see Community GIS Portal)**

Contact the Toxics Management Division (510) 981-7460 for more information.

E. TRANSPORTATION IMPACT STUDY

Required for projects that do not meet at least one of the City's screening criteria for determining if detailed VMT or vehicular parking analysis is necessary.

Consult with the Transportation Division for a copy of the screening criteria and thresholds at (510) 981-7010

F. STATE GENERAL CONSTRUCTION PERMIT

Required for projects disturbing one acre or more of soil (or less than one acre if part of a larger development plan that disturbs one acre or more).

Submit a copy of the Notice of Intent (NOI) submitted for the State General Construction Permit, and Storm Water Pollution Prevention Plan (SWPPP) prior to building permit issuance.

Construction Stormwater General Permits

G. STORMWATER REQUIREMENTS CHECKLIST

Required for projects creating or replacing 2,500 square feet or more of impervious surface, including single-family dwellings. Includes new buildings, additions, and alterations to existing roofs that affect drainage; does not include maintenance/re-surfacing of existing impervious surfaces.

ZONING PROJECT APPLICATION SUBMITTAL REQUIREMENTS

SECTION 5 - REQUIRED FOR PROJECTS SUBJECT TO AFFORDABLE HOUSING REQUIREMENTS

A. AFFORDABLE HOUSING COMPLIANCE PLAN (PRELIMINARY)

Required for Housing Development Projects with more than 5,000 square feet of residential unit floor area

Submit following:

1. Completed Affordable Housing Compliance Plan

2. Affordable Housing Compliance Plan Sheet(s) (in the plan set)

- Residential Unit Floor Area Diagrams (BMC Section 23.328.020 Definitions)
- On-site Below Market Rate unit calculations
- In-Lieu Fee calculations

See BMC 23.328 Inclusionary Housing and the Affordable Housing Compliance Plan Application for additional information.

B. ANTI-DISCRIMINATION HOUSING POLICIES

Required for a project creating any of the following:

- **Five or more new dwelling units and/or five or more live/work units**
- **New dwelling units and/or live/work units on lots whose size and zoning designation is such to allow construction of five or more dwelling units**
- **One to four (new dwelling units and/or five or more live/work units, which are added to an existing one to four-unit property developed after August 14, 1986, and the resulting number of units totals five or more**
- **Additional condominium units, resulting in five or more condominium units converted and/or created after August 14, 1986 on the site**

Submit a written statement answering the following questions and provide the requested documentation, if applicable:

– Does the applicant or sponsor, including the applicant or sponsor's parent company, subsidiary, or any other business or entity with an ownership share of at least 30 percent of the applicant's company, engage in the business of developing real estate, owning properties, or leasing or selling individual dwelling units in states or jurisdictions outside of California?

– If the answer to (1) is yes, which?

– If the answer to (1) is yes, does the applicant or sponsor, as defined in (1), have policies in individual states that prohibit discrimination based on sexual orientation, gender identity, and/or gender expression in the sale, lease, or financing of any dwelling units enforced on every property in the state or states where the applicant or sponsor has an ownership or financial interest?

– If the answer to (1) is yes, does the applicant or sponsor, as defined in (1), have a national policy that prohibits discrimination based on sexual orientation and gender identity in the sale, lease, or financing of any dwelling units enforced on every property in the United States where the applicant or sponsor has an ownership or financial interest in property?

– If the answer to (3) or (4) is yes, please provide a copy of that policy or policies as part of this application.

The Land Use Division will not accept an application as complete unless the applicant provides a response to this section. The processing of and recommendations or determinations made by the Land Use Division regarding an application will be unaffected by the applicant's response to this section.

ZONING PROJECT APPLICATION SUBMITTAL REQUIREMENTS

SECTION 5 - REQUIRED FOR PROJECTS SUBJECT TO AFFORDABLE HOUSING REQUIREMENTS

C. DENSITY BONUS ELIGIBILITY STATEMENT

Required for projects requesting a density bonus pursuant to Government Code Section 65915

Submit the following information:

1. A written statement that includes the following information:

a. Number of "base project" units

b. Number and percent of affordable units and level of affordability

c. Percent density bonus requested and allowed pursuant to Government Code Section 65915

d. Waivers or modifications of development standards necessary to physically accommodate "density bonus" units (e.g., increased height or FAR, reduced setbacks or parking, etc.)

e. Explanation of why each waiver or modification is needed to accommodate "density bonus" units

f. If the project is requesting an incentive or concession, describe each incentive or concession being requested in addition to (or instead of) waivers or modifications necessary to accommodate density bonus

2. Plans showing a "base project" that complies with all applicable Zoning Ordinance requirements. For staff to effectively review your density bonus project, a combination of diagrams, compliance tables and calculation tables must be included in the project plan set:

a. Base Project and Proposed Project diagrams, per floor

b. Base Project and Proposed Project development standards compliance tables

c. Residential floor area calculations and diagrams (per floor; can be combined with Base Project and Proposed Project diagrams)

d. Maximum allowable residential density calculation table

e. Usable open space and lot coverage diagrams and calculations

f. Base Project, Density Bonus, and Proposed Project residential floor area table

Your project planner can provide examples of preferred diagram and table formats.

State Density Bonus - Procedures

D. AREA OF POTENTIAL EFFECTS (APE) STATEMENT

Required for projects seeking federal funds (either directly or through the City of Berkeley Housing Trust Fund).

Submit a statement identifying the project's "Area of Potential Effects" as defined in federal regulations (36 CFR Part 800). Contact the Housing Department at (510) 981-5400 for more information and requirements.

SECTION 6 - LANDSCAPE AND GREEN BUILDING REQUIREMENTS

A. WELO LANDSCAPE REQUIREMENTS

Required for projects with either:

- **500 square feet or more of new, or**
- **2,500 square feet or more of renovated irrigated area.**

These projects must comply with water efficient landscaping as specified in the Model Water Efficient Landscape Ordinance (MWELO) and East Bay Municipal Utility District (EBMUD) Water Efficiency Review: Section 31 Regulations and MWELO Compliance, and all applicable measures in the Bay Friendly Basics checklist.

Submit WELO-compliant landscape documentation including a planting, grading, and irrigation plan. Water budget calculations are also required for landscapes of 2,500 square feet or more. The reference evapotranspiration rate (ETo) for Berkeley is 41.8.

See Green Building requirements.

B. NATURAL GAS PROHIBITION, BERKELEY ENERGY CODE, AND BERKELEY GREEN CODE

Required for newly constructed buildings (buildings that have never before been used or occupied for any purpose).

Submit the following:

1. A statement that the building will not include any natural gas infrastructure in compliance with BMC Chapter 12.80, or documentation to support an application for an exception or public interest exemption to the Natural Gas Prohibition if the conditions of BMC Section 12.80.040A.1 or 12.80.050 are met. The Land Use drawing set submittal and the building permit plan set submittal shall both include a cover sheet declaration: 'Natural Gas-free Design as required by BMC Chapter 12.80.

2. A statement, and corresponding features on plans, that the proposed project is designed to comply with the Berkeley Energy Code (BMC Chapter 19.36) and Berkeley Green Code (BMC Chapter 19.37) including solar PV system, battery energy storage, electric vehicle charging, and low-carbon concrete requirements. Note that for building permit submittal, quantitative values for appliance fuel efficiency must be included in relevant building permit architectural sheets, and window and door schedules, and on architectural, plumbing, and mechanical sheets, matching those values stipulated in prescriptive or performance energy compliance documents.

Note: Carefully consider the Building Code prior to submitting a Use Permit application. Per the standard Conditions of Approval for all development projects, only the Zoning Adjustments Board may approve a modification to the use or structure for which the Permit is issued, except that the Zoning Officer may approve changes that do not expand, intensify, or substantially change the use or building.

The California Energy Design Assistance (CEDA) Program provides free energy design assistance, financial incentives, and operational energy savings to new commercial, public, multifamily (4 stories or more), industrial, and agricultural buildings. CEDA application must occur while a project is in early design phases.

See Green Building requirements.

C. GREEN BUILDING REQUIREMENTS

Required for newly constructed buildings and additions of more than 20,000 square feet for projects located in the Commercial-Downtown Mixed-Use District (C-DMU).

Submit a completed LEED Checklist / Scorecard (typically for commercial projects), showing that the proposed project is on track for LEED Gold certification or above, or a completed GreenPoint Rated (GPR) Checklist (for residential and most mixed-use projects), showing that the proposed project is on track for GPR Silver certification or above.

See Green Building requirements.

ZONING PROJECT APPLICATION SUBMITTAL REQUIREMENTS

SECTION 7 - RELATED LAND USE PLANNING DIVISION APPLICATIONS	
	A. DESIGN REVIEW **Required** for: — **Projects with new construction and/or exterior changes in non-residential districts** — **Mixed use, and community and institutional projects in R-3 within the Southside Plan Area** — **Commercial, mixed-use, and community and institutional projects in R-4, R-S and R-SMU Districts** — **Other projects as required by the Zoning Officer** **Submit** separate Design Review application form per the Design Review Submittal Requirements.
	B. STRUCTURAL ALTERATIONS SUBMITTAL **Required** for exterior alterations to designated City Landmarks, Structures of Merit, and structures within a Historic District (and interior alterations to such structures if publicly owned). **Submit** separate Structural Alteration Permit application, per the Structural Alteration Permit & Design Review Submittal Requirements.
	C. ZONING USE QUESTIONNAIRE **Required** for projects that establish a new business or create a new commercial space with the tenant/operator already selected.
	D. HOME OCCUPATION QUESTIONNAIRE – CLASS II AND III **Required** for Class II or Class III Home Occupations that establish a new home-based business. **Submit** a Zoning Permit Application (Section 1.A, above), and fill out the Class II and III Home Occupation Questionnaire.

phone: 510.649.1414
www.TrachtenbergArch.com

2109 Virginia Street Mixed Use **31 May 2024**
Applicant's Statement

Dear Sir/Madam:

We propose to construct a new 8-story mixed-use building at 2109 Virginia Street in Berkeley. The project, as generally described in our "Zoning Submittal" drawings dated May 31st, 2024, consists of 131 residential apartments over a 1,200square foot commercial space. The project seeks to utilize a State of California Density Bonus and to provide Below Market Rate units. Please refer to the attached *Statement Regarding the Use of the California Density Bonus*

Zoning
The lot is in 3 zones. 19,788sf is in the C-NS Zone, 1,970sf is in the R-4 zone, and 584sf is in the R-2A zone.

Parking
No automobile parking is required for both residential portion of the project. We are requesting an AUP to include up to 103 parking spots for the project. The project will provide 96 bicycle parking spaces.

Building Height
The base project height allowed in the C-NS Zone is 35', in the R-4 zone is 35' (up to 65' with Use Permit), and in the R-2A zone is 28'(up to 35' with Use Permit). As a State Density Bonus project with an increase in density of 92.5% above the maximum density allowed under the zoning code, this project proposes a height waiver for 88'-5" in order to physically accommodate the additional density bonus units.

Setbacks/Yards
Setbacks are as follows in the C-NS Zone:

SETBACK - FRONT (VIRGINIA) 1ST - 6TH STORY	15'	15'	2'-10" TO 10'-3"	COMPLIES W/WAIVER
SETBACK - REAR 1ST - 3RD STORY	15'	15'	0'	COMPLIES W/WAIVER
SETBACK - REAR 3RD - 6TH STORY	17', 19', 21'	17', 19', 21'	7'	COMPLIES W/WAIVER
SETBACK - INTERIOR SIDE 1ST - 2ND STORY	4'	4'	0"	COMPLIES W/WAIVER
SETBACK - INTERIOR SIDE 3RD - 6TH STORY	6', 8', 10', 12'	6', 8', 10', 12'	0 TO 43'-9"	COMPLIES W/WAIVER
SETBACK - STREET SIDE (SHATTUCK) 1ST STORY	6'	6'	2'	COMPLIES W/WAIVER
SETBACK - STREET SIDE (SHATTUCK) 2ND STOR	8'	8'	2'	COMPLIES W/WAIVER
SETBACK - STREET SIDE (SHATTUCK) 3RD STORY	10'	10'	2'	COMPLIES W/WAIVER
SETBACK - STREET SIDE (SHATTUCK) 4-6TH STOI	12', 14', 15'	12', 14', 15'	0 TO 2'	COMPLIES W/WAIVER

Project Benefits
The proposed project is sited, massed and articulated so as to continue the urban building fabric along Shattuck Ave. at Virginia Street. The project is ideally located for a high-density development as it is located at the intersection of a major arterial street and walkable to UC Berkeley campus, transit, groceries and services. The project will create needed housing, especially additional affordable housing and will benefit Berkeley by providing a high-quality infill development.

Thank you for your consideration of this application.

Sincerely,

Isaiah Stackhouse, Principal

COMMUNITY MEETING
5/23/2024

TRACHTENBERG ARCHITECTS
2421 Fourth Street
Berkeley, CA 94710

2109 Virginia Street
Neighborhood Meeting

You are invited to the discussion
Thursday, May 23rd, 2024 from 5:00 PM - 6:00 PM

Join us for a virtual meeting

To join by computer, visit https://us02web.zoom.us/j/85308082094

To join by phone, dial **(1) 669 444 9171** and enter the meeting ID below.

Meeting ID: 853 0808 2094

Dear Neighbors,
You are cordially invited to preview plans for a new multi-family building proposed for 2109 Virginia Street.

The project has not yet been submitted or reviewed by the City of Berkeley.

The project is a development of Panoramic Interest and is in the process of being designed by Trachtenberg Architects.

Please join us on Zoom on Thursday May 23rd, from 5pm to 6pm by computer or by phone.

We look forward to meeting with you.

TRACHTENBERG ARCHITECTS

Neighborhood Meeting Attendance and Notes Sheet (Online)

1685 Shattuck Ave
Berkeley, CA 94709
May 23, 2024

NAME	ADDRESS	EMAIL	NOTES
Karen Streets			Project much higher and we have been here since 1972. It will be a large impact for the immediate neighborhood. How tall are the new projects down on Shattuck and University? IS – 12 stories and 8 stories built prior to state laws to combat housing crisis. Even though it's out of place and create impact resources, such as water supply? Does it have to be 8 stories? IS – We will be working with the city and the state/city zoning is what is intended here. And this is where this type of density go, to be able to house everyone in Berkeley and targeted commercial strips like this one. How about the toxics from Virginia Cleaners? IS – Lots of ways to take care of the toxics with all the regulations and Berkeley has a very robust toxics department and can help deal with issue.
Sally Sommer		s_sommer@sbcglobal.net	Community members? Students? IS – Housing for all. Units can serve families and students due to mix of unit types from studios to 3 bedrooms. Providing more parking than required? IS – This project wants to provide for families who may have cars
Suzanne Perkins			For 120 units, how many people are estimated to be living there? Is there a formula, for example 1 and 1/2 times the number of uits = 180 people. IS – There is no straight formular for this but this sounds good Are there laundry facilities planned to be sufficient? Increase use of services, concerned for making the current residents harder to use the neighborhood services. IS – Laundry room on each floor to be sufficient.
Bert Gordon			Regarding toxic issue, nothing on the record about the toxic. IS – Gets reviewed by the city during planning and construction permitting. Lots of ways for the site to be resolved with experts. We don't know the details but sites can be remediated with expert guidelines and confident this can be done. What can happen to make the project smaller? IS – The project's 131 units will provide what the state

			wants to create housing and helps the project to get build due to construction cost and financing and lending cost are also high. The 131 units help will help pay for the parking, land, and city costs. The density makes the project feasible and also of these future 131 families who are we going to tell that their units will not be built.
James Hendry			How does the building get 8 stories in the zone? IS – 7 stories of housing over ground floor lobby and commercial space, parking. It's a density bonus project which provides up to 100% bonus to projects that provide affordable housing. The city staff will review the bonus calculations. Are you planning setbacks and are any open spaces available for the public? IS- setbacks on the sidewalk and also 10' setback from the east. The sidewalk seating will be public use, but the other open spaces are only for residents Where would delivery be made? IS – Determine by Public Works Dept. They will paint out a loading zone during construction permit process Submitting in 3 weeks, so this is just a dog and pony show? IS – Still working on the design, this is an opportunity to hear the neighbors' voices. Yellow signs with city's notices and the public can attend hearings Are you intending to keep the parking spaces IS – Yes, we are. We do have to ask the city for permission this amount of parking spots. City council requires 0 but can approve ½ of the amount. 7' deep parking for the triple stack Address the toxic under the cleaners? IS – The city will issue conditions of approval of how the site gets treated. The city has a regulated agency to see if it gets exemption or regulated.
Lindsey Quock			Are these market rate units? What are the rent range? IS - Apartments for our community. We don't know the rent range. Minimum 11 LVI based on preliminary calculations to qualify for density bonus units. The project will also provide in lieu fee and may provide more units. This is something to be determined later with the city review process. When is the ground break? - It takes another year after 1.5 year of review time. The likely path would be 2- 2.5 years that this project will break ground and roughly take 18months to construct. What benefits are to the neighbors when light and views will be blocked on Virginia neighbors IS - The real benefit is providing housing and residents to help local business thrive and affordable housing fees. We did pull the project towards the boulevard with setback towards the east Has there been a shadow and light study? IS – There will be shadow study in the submittal and we are still working on those drawings and will be

			available to everyone How do we get those drawing submittals? IS – Once the project is submitted, the city planner will be sending out info and the city website will have the project application info
Melinda Lopez			Earth sinking concern? IS – Project will have a soil report. The city will have a peer review of the soil as well. They can calculate how much the land will settle over time. The soil should be quite good here. Standard mat slab foundation here. San Francisco has a lot of fill and those locations don't have stable soil

(IS = Isaiah Stackhouse)

Notes:

A yellow poster will be installed on site after project submission.

3-6 months of staff review before zoning and design review board meeting. The list of addresses from tonight was given from the city and this same list will be used from the city to send out notifications regarding the project.

ATTESTATION FORM

BIRD SAFE BUILDING REQUIREMENTS

planning@berkeleyca.gov • Phone **(510) 981-7410,** TDD **(510) 981-7450**
Planning and Development, 1947 Center St, 2nd Floor, Berkeley, CA 94704

GENERAL INFORMATION

The City Council adopted new requirements for Bird Safe Buildings, effective July 27, 2023, to reduce bird mortality from collisions with windows and other transparent or reflective buildings or building features.

Bird Safe Requirements apply to *building permits* that include new or replaced windows or contain transparent or reflective materials.

MORE INFORMATION

Berkeley Municipal Code (BMC) Section 23.304.150

BIRD SAFE BUILDING REQUIREMENTS

All regulated transparent or reflective materials located between the ground and 75 feet above grade must meet Bird Safe Building requirements.

With the exception of exempt projects, any High-Risk Feature, as defined in BMC Section 23.304.150 shall meet Bird Safe Building Requirements, regardless of distance from grade.

☒ I acknowledge this requirement (or N/A) _____

BIRD SAFE BUILDING COMPLIANCE OPTION

Pursuant to BMC Section 23.304.150, any regulated transparent or reflective material must meet at least one of the following compliance options. Construction plans must provide confirmation of compliance with applicable requirements at the time of application for the building permit. Details on each compliance path can be found on *Bird Safe Building Requirements Information and Submittal Checklist:*

Option 1: American Bird Conservancy Threat Factor Rating of 30 or less;

Option 2: Patterned Glazing Treatment that meets the specifications included in BMC Section 23.304.150; or

Option 3: External Screen, Shutter or Shading Device permanently installed on the exterior of the building that meets the specifications included in BMC Section 23.304.150.

☒ I acknowledge these requirements (or N/A) _____

INFORMATION & SUBMITTAL CHECKLIST

BIRD SAFE BUILDING REQUIREMENTS

planning@berkeleyca.gov • Phone **(510) 981-7410,** TDD **(510) 981-7450**
Planning and Development, 1947 Center St, 2nd Floor, Berkeley, CA 94704

GENERAL INFORMATION

The City Council adopted Berkeley Municipal Code Section (BMC) 23.304.150 for Bird Safe Buildings, effective July 27, 2023, to reduce bird mortality from collisions with windows and other transportation or reflective buildings or building features.

Bird Safe Requirements apply to *building permits* that include new or replaced windows or contain certain transparent or reflective materials.

DEFINITIONS
BMC 23.304.150(B)

High-Risk Features are transparent or reflective railings, awnings, windbreak or windscreen panels, acoustic barriers, skywalks, greenhouses, glass walls, rooftop appurtenances, balconies and exterior decorative panels, or signage.

Lower Hazard Facades. Facades where less than 30 percent of the façade area consists of transparent or reflective material.

WHAT PROJECTS REQUIRE BIRD SAFE MATERIALS?

Non-Residential Projects

- ❑ **New Construction or Addition.** All transparent or reflective material located in the first 75 feet above grade.
- ❑ **Existing Building.** New or replacement transparent or reflective material located in the first 75 feet above grade.
- ❑ High-Risk Features at any grade.

Residential or Mixed-Use Projects

- ❑ **New Construction or Addition.** New or replacement transparent or reflective material located in the first 75 feet above grade on buildings with both 10,000 square feet or more of gross floor area **and** an average building height greater than 35 feet.
- ❑ **Existing Building.** New or replacement transparent or reflective material located in the first 75 feet above grade on buildings with both 10,000 square feet or more of gross floor area **and** an average building height greater than 35 feet.
- ❑ High-Risk Features at any grade.

WHAT PROJECTS ARE *EXEMPT* FROM BIRD SAFEREQUIREMENTS?

- ❑ **Existing windows or transparent or reflective materials**, including repairs.
- ❑ **Projects that have vested under SB 330** prior to July 27, 2023, unless required by a Condition of Approval.
- ❑ **Affordable Housing.** Residential and mixed-use projects where more than 50 percent of the residential floor area is subject to recorded affordability restrictions. The exemption also applies to associated High-Risk Features and non-residential portions of a mixed-use building.
- ❑ **Historic Resources.** Designated landmarks or structures of merit (see BMC Ch. 3.24), including associated High-Risk Features.
- ❑ **Existing Non-Residential Buildings where each façade is a Lower Hazard Façade**. High-Risk Features must still meet requirements.
- ❑ **Existing Residential or Mixed-Use Buildings where each façade is a Lower Hazard Façade.** High-Risk Features must still meet requirements.

INFORMATION & SUBMITTAL CHECKLIST

BIRD SAFE BUILDING REQUIREMENTS

planning@berkeleyca.gov • Phone **(510) 981-7410,** TDD **(510) 981-7450**
Planning and Development, 1947 Center St, 2nd Floor, Berkeley, CA 94704

WHAT QUALIFIES AS A BIRD SAFE MATERIAL? Compliance paths are:

Option 1: Threat Factor. A product listed in the American Bird Conservancy's Database with a Threat Factor of 30 or less; **OR**

Option 2: Patterned Glazing Treatment. Material that has all of the following:
- **Permanent patterning** that meets the specifications in BMC 23.304.150(C)(2)(a).
- **Visible light reflectance** of less than or equal to 15 percent.
- **Low-E coatings** located behind the pattern; **OR**

Option 3: External screen, shutter, or shading device, with no gap larger than 9 inches in any dimension.

ZONING PROJECT SUBMITTAL REQUIREMENTS (LAND USE ENTITLEMENTS)	
☒	**Bird Safe Building Requirements Attestation**: For projects subject to Bird Safe Requirements, a completed and signed Bird Safe Requirement Attestation Form.
☐	**Building Elevations:** For projects that include existing buildings, provide diagrams that show the percentage of façade area consisting of transparent or reflective material, such as windows, and High-Risk Features to document whether Bird Safe Requirements apply (see Example-Lower Hazard Façade Diagram, below).
BUILDING PERMIT SUBMITTAL REQUIREMENTS	
☐	**Bird Safe Building Requirements Attestation**: For projects subject to Bird Safe Requirements, a copy of completed and signed Bird Safe Requirement Attestation Form.
☐	**Bird Safe Product/Material Compliance:** Where bird safe materials are required, please indicate the compliance option(s) selected and the product name(s), including threat factor rating where applicable. Please label materials on plans and refer to Bird Safe Compliance Table (see Example – Bird Safe Compliance Table, below)
☐	**Building Elevations:** For projects that include existing buildings, provide diagrams that show the percentage of façade area consisting of transparent or reflective material, such as windows and High-Risk Features to document whether Bird Safe Requirements apply (see Example: Lower-Hazard Façade Diagram, below).

Example – Bird Safe Compliance Table

Label	Compliance Path	Type/Product Name	Threat Factor Rating (if known)
WIN-1	3	External insect screen	1
WIN-2 to WIN-7	1	Solyx SX-BSFH Bird Safety Film	10
WIN-3 to WIN-10	1	ORNILUX Mikado Adv N34	23
HRF-1	1	Natureholic Bird Tape 4	10

P.O. Box 70415, Richmond, CA. 94807 • (415) 745-1906 • caitlin@leftcoastarchitecturalhistory.com

23 April 2024

To Whom It May Concern:

Left Coast Architectural History has completed a Historic Resource Evaluation of the property at 1685 Shattuck Avenue, Berkeley. The attached California Department of Parks & Recreation (DPR) 523 series forms present a physical description of the property, a record of its history, and evaluation according to California Register of Historical Resources significance and integrity criteria, and City of Berkeley Landmark and Structure of Merit criteria.

The study found that 1685 Shattuck Avenue was initially built, in part, around 1906. Originally mixed-use, it eventually became strictly commercial and was occupied by various businesses throughout its history, with the Virginia Cleaners being its longest and most dominant occupant. The building was expanded extensively to serve the cleaning plant, eventually growing to about six times its original size. The various parts of the building were incongruous in form and architectural style and were also subsequently remodeled at various times. The building suffered a number of fires during its history, the last of which, in 1981, destroyed almost the entire building, save the southern ground floor shop spaces. Only the portion of the building fronting on Shattuck Avenue was repaired/reconstructed and was given an entirely different architectural treatment than it had previously. In effect, the building present today dates to 1983.

Due to a general lack of historical significance relating to events or people, and exacerbated by the substantial loss of integrity and subsequent inability to represent any of its history prior to 1981, the evaluation determines that the property has no historic significance or integrity, and therefore does not qualify as a historic resource for the purposes of the California Environmental Quality Act. These points are elaborated upon in detail on the attached forms.

Left Coast Architectural History is available to answer questions or provide additional assistance, as needed.

Sincerely,

Caitlin Paige Hibma

Site
The property at 1685 Shattuck Avenue (used herein as the primary address, but referring to the entire building and all assigned address numbers) consists sits on Assessor's parcel 58-2178-18, which is a large rectangular lot at the northeast corner of Shattuck Avenue and Virginia Street. Topography in the area is flat and the parcel is bordered by a public sidewalk on the west and south sides. A two-story commercial building sits at the southwest corner of the parcel with no setback from the sidewalks, while a parking area fills more than half of the northern half of the parcel and extends along the east side of the parcel at the rear of the building. The parking area is bordered by a building on the north and the rear yards and parking lots of properties to the east.

Building
The commercial building is two-stories, has a rectangular plan, and is capped by a flat roof. The exterior walls are clad with textured stucco and adorned with false half-timbering, except for the left side of the first story of the rear (east) facade, (Continued)

Summary
The building at 1685 Sattuck Avenue was initially built, in part, around 1906. Originally mixed-use, it eventually became strictly commercial and was occupied by various businesses throughout its history, with the Virginia Cleaners being its longest and most dominant occupant. The building was expanded extensively to serve the cleaning plant, eventually growing to about six times its original size. The various parts of the building were incongruous in form and architectural style and were also subsequently remodeled at various times. The building suffered a number of fires during its history, the last of which, in 1981, destroyed almost the entire building, save the southern ground floor shop spaces. Only the portion of the building fronting on Shattuck Avenue was repaired/reconstructed and was given an entirely different architectural treatment than it had previously. In effect, the building present today dates to 1983.

Neighborhood Context
The building at 1685 Shattuck Avenue is located in North Berkeley, which as its name denotes, is located north of Downtown Berkeley. The neighborhood is generally bounded by Hearst Avenue on the south, Sacramento Street on the west, Hopkins and Eunice streets on the north, and Euclid Avenue and Arch Street on the east. The neighborhood's southeastern corner abuts the U.C. Berkeley campus, which the subject property is located about one diagonal block away from.

North Berkeley owes its initial development in large part to Henry Berryman. As Downtown Berkeley developed, the area to the north was used primarily as farmland. Berryman purchased a large farm in the area in 1870 and subdivided the land, which kicked off development. In 1878, the neighborhood's growth was encouraged by the extension of the Southern Pacific branch rail line from Downtown, up Shattuck Avenue, to Vine Street. A new depot was built on Shattuck Avenue between Rose and Vine and named Berryman Station. (Continued)

P3a. Description: (continued)

which is partially clad with cast stone and scored smooth stucco. First story fenestration consists of storefronts with wood and aluminum framed plate glass windows. The primary window type on the second story is an aluminum sliding sash with faux muntins. These two- and three-part windows are located in punched rectangular openings with a horizontal orientation. The half-timbering creates flat wood frames around the window openings.

The primary facade faces west onto Shattuck Avenue. The first story features four storefronts; two on each side of a narrow centered stairwell. The two storefronts on the left have faux adobe brick dados under plate glass storefront windows. The leftmost storefront has an aluminum frame window and door assembly, while the second storefront has a set of fully-glazed aluminum-frame double doors at the center and storefront windows in wood frames. The two storefronts on the right side of the facade have stucco-clad dados under wood framed storefront windows that have very wide mullions. The entries are generally centered on each storefront and are located within canted recessed vestibules. They feature partially-glazed paneled wood doors; one a Dutch door. The storefronts on the right have multi-lite wood clerestory sashes at the top. All of the storefronts are topped by fabric awnings. The stairwell at the center of the facade has a narrow round arch opened enclosed by a metal security gate. Terrazzo stairs ascend internally to the second story, where there appear to be doors on either side of the landing, accessing the north and south second floor spaces.

The second story of the primary facade is adorned with false half-timbering in a regular pattern and has a single angled bay window at the center, above the first story stairwell opening. Windows of the primary type are located across the facade, at generally regular intervals (with some variation), and on the bay window. The facade is capped by a pent roof with deep eaves that are adorned with shaped false beam ends. A small gable end is located over the bay window at the center of the facade and at the far right side of the facade, where the pent roof is slightly higher. Both gable ends are clad with stucco and adorned with false half-timbering.

The south facade faces Virginia Street. The corner storefront wraps the southwest corner of the building, so that there is a stucco dado, plate glass windows, clerestory, and a fabric awning at the far left side of the south facade. The center of the facade features a few panels of faux half-timbering, while a single storefront is located at the far right side of the facade. This storefront has very low stucco dados, large plate glass display windows in wood and aluminum frames, an entry door covered by a metal security gate at the center, and a fabric awning above. The second story of the south facade is adorned with false half-timbering and features four regularly spaced windows of the primary type. The facade is capped by a pent roof with deep eaves that are adorned with shaped false beam ends. A small gable end is located at the far left side of the facade, where the pent roof is slightly higher. It is clad with stucco and adorned with false half-timbering.

The east facade faces a surface parking area. The first story is unfenestrated. The left side is clad with cast stone and scored smooth stucco, while the right with textured stucco. A secondary entry door covered by a metal security gate is located at the center below an exterior wood staircase that parallels the facade and provides access to a partially glazed, paneled wood door near the center of the second story. The second story is adorned with false half-timbering and features windows of the primary type in two-part configuration that are arranged in groupings and singly across the facade. The facade is capped by a pent roof with deep eaves that are adorned with shaped false beam ends.

The north facade also faces a surface parking area. The first story is unfenestrated and clad with stucco. A rough concrete surface (possibly where a concrete ramp abutting the wall was demolished) covers the lower wall, while engaged concrete structural piers extend upward, projecting from the wall surface, to a slightly overhanging lip at the second story. The second story is adorned with false half-timbering and features five windows of the primary type in two-part configuration that are regularly spaced across the facade. The pent roof with deep eaves and shaped false beam ends that is found on the other facades wraps the corners of this facade; however, the majority of the roofline features no eaves and only vertical board cladding that meets a flat unadorned roofline.

B10. Significance: (continued)

A number of businesses were established immediately around the station, but for the most part the area began to be characterized as a neighborhood of modest single-family dwellings, continuing that way into the 20th century. Even as late as the publication of the 1903 Sanborn Fire Insurance map, the subject property remained vacant, while the surrounding block featured a number of single-family dwellings. (Wollenberg, Charles; *Berkeley: A City in History;* U.C. Press, 2008. Berkeley Architectural Heritage Assn., “41 Berkeley Walking Tours,” 2015. Sanborn Fire Insurance Maps.)

Property-Specific History
The subject building appears to have been built, in part, around 1906, when Virginia Cleaners was located in the building (according to a 25 May 1982 *Berkeley Daily Gazette* (BDG) article, which stated the business had been at 2109 Virginia Street for 76 years) and when it was first mentioned in newspapers that listed 1683 Shattuck Avenue as a contact address in an advertisement for two rooms for rent. (BDG, 29 Dec. 1906) At that time, the building consisted of only the southern half of the current building. A photograph from 1952 shows that it was a two-story, Edwardian style building. B10. Significance: (continued)

There were three storefronts with recessed entrances, plate glass display windows, and clerestory windows on the ground floor (two on Shattuck Ave, one on Virginia Street). The second story was clad with novelty (varied width) horizontal wood siding and featured three square bay windows on each facade that had wall panels at their base, double-hung windows, and dentiled and modillioned cornices. The building, itself, was capped by an ornate entablature with a wide plain frieze, and dentiled and modillioned cornice.

The 1911 Sanborn Fire Insurance map confirms that only the southern half of the current building existed originally. Based on the 1906 advertisement for residential rental space and numerous later newspaper mentions (also mostly ads for rooms for rent), it appears that the second floor of the building (addressed 1683) had a residential use for a number of years. The two ground floor shops facing Shattuck Avenue were addressed 1685 and 1687, and appear in newspapers as early as 1911, when 1685 Shattuck Avenue was occupied by The Ideal Market. The space at 1687 Shattuck Avenue is mentioned in newspapers as early as 1913, when it housed the Mattson Pharmacy. The rear storefront was 2103-2105 Virginia Street and is mentioned in newspapers as early as 1907, with another room-for-rent ad, perhaps connected to the residential uses on the second floor; however, it housed the Virginia Cleaners, the original and long-time tenant and owning entity of the property. (BDG, 27 Nov. 1981)

A short history of the Virginia Cleaners, written by one of the then-owners of the business and reported by the *Berkeley Daily Gazette* on 2 February 1983, stated that the business was started by two Frenchmen in 1907 at the corner of Shattuck and Virginia Street. The business changed ownership a number of times, but by the 1920s was owned by George and Ethel Durant, who employed Herman Mathis as a delivery driver. Mathis was joined by his brother and in 1934 they bought out the Durants. Eventually, Virginia Cleaners had eight branch shops locally. In 1961, David Mathis, one of the Mathis brothers' sons, joined the family business as co-owner.

The northern addition to the building was added around 1914 or 1915. Addresses associated with the northern half of the building (1675 and 1677 Shattuck Avenue) appear in newspapers as early as 1915, when the Ideal Market was shown to have moved to the space at 1677 Shattuck Avenue. At the same time, a new grocery store was listed in the Ideal Market's old space at 1685 Shattuck.

The 1929 Sanborn Fire Insurance map illustrates the northern addition, including a stairwell that was incorporated between the two halves, giving access to the second story. Further, it shows that the building had also been extended to the east (to the current eastern lot line) with a series of one-story shop spaces fronting on Virginia Street; addressed 2105, 2107, 2109 Virginia Street. A circa 1928 photograph indicates that the storefronts echoed the Edwardian architecture of the original building, with traditional recessed storefronts that included plate glass windows, dedicated entry doors, and clerestory windows above. Behind (to the north of) these added shops were two additional structural extensions, their spaces labeled cleaning and dry cleaning. With these additions, Virginia Cleaners dominated the eastern portion of the property. Two seemingly unrelated, two-unit residential flats buildings were located within the bounds of the current parcel, to the north of the current building, and within the interior angle formed by the extent of the building as it was in 1929. (They remained into the 1980s, but are no longer extant).

The 1950 Sanborn Fire Insurance map shows the conditions of 1929 still largely the same, although a 1952 photograph shows that the northern half of the building and the Virginia Street additions had been stylistically remodeled in the Art Moderne style, including boxy forms, flat stucco wall planes, large multi-part windows with thick steel-sash frames, stack bond brick veneer, flat projecting canopies, and unadorned flat rooflines. These Modernistic sections of facade bracketed the original portion of the building, which still exhibited its original Edwardian style. The aesthetic improvements were made on behalf of Virginia Cleaners, which had also come to occupy the northernmost shop space fronting on Shattuck, where “ironing” was performed, and the second floor of the northern half of the building, which was used for “spotting and ironing.” Shop spaces along Virginia Street were more specifically labeled as “office” and “pressing.” A drug store, then Moore's Pharmacy, was still located in the corner storefront and may have extended into the space to the north, while the Ideal Market still occupied the right-hand shop space in the northern half of the building.

A 1957 Property Card notation states “stucco front after removing gingerbread.” This indicates that the Edwardian style original portion of the building was stripped of any ornamentation and stuccoed to look more homogeneous with the newer portions of the building. Indeed, photographs from 1981 show that even the bay windows and projecting cornice were removed, creating a totally flat wall plane, and wide three-part steel sash windows were installed. Aerial photographs dated 1958 and 1965 show the same extent of the building as on the 1950 Sanborn map; the latter particularly illustrating a sawtooth roof over the eastern and northeastern extensions, which would have brought light into the voluminous interior of the cleaning plant. (U.C. Santa Barbara Library)

In 1976, Art Kapoor, a local realtor, purchased the building from Virginia Cleaners. (BDG, 27 Nov. 1981) He owned the property until recently and, in later years, maintained his real estate agency in the northern second floor space. In 1979, Poulet restaurant took over the corner space, formerly a drug store, and remained until recently. Aerial photographs indicate that the property remained intact until 1980. B10. Significance: (continued)

The building was threatened by fire a number of times during its history. It narrowly escaped the 1923 wildfire that swept down from the Berkeley Hills and burned a large swath of the city to the immediate northeast and east of the subject property. The fire's southwestern spread was stopped only about one block east and a half-block southeast of the property. A fire in 1949 is documented in building permit records, and in 1961, a display spotlight in a front window sparked a two-alarm fire. That fire did about $6,500 worth of damage to the Virginia Cleaners curtain finishing room on the second floor of the northern side of the building. Newspapers described the heat exploding the large second floor plate glass window, and flames coming through the roof. Water damage was sustained by the ground floor shirt finishing department at 1675 Shattuck Avenue and the Ideal Meat Market at 1677 Shattuck Avenue. Finally, in 1981, a catastrophic fire destroyed the majority of the building and changed its character entirely.

In the early morning hours of 17 November 1981, an electrical problem sparked a three-alarm blaze in the eastern portion of the building, occupied by Virginia Cleaners. Flames spread into the western portion of the building where the Ideal Meat Market, a flower shop, and Poulet restaurant were storefront tenants. The fire burned for over two hours before being extinguished. A firefighter fell down the central stairwell and was injured during the emergency, which caused an estimated $1.2 million in damages. After the fire, the deputy fire marshal stated that “the building look[ed] like a Hollywood false front... all the walls and floors fell into the center.” (BDG, 27 Nov. 1981)

The day after the fire, Virginia Cleaners brought in a mobile building to serve as an office, primarily to process claims from customers who had lost belongings. Ultimately, the business relocated to 1650 Shattuck Avenue, and operated from that location, a cleaning plant in Oakland, and their other branch locations. The Ideal Market never reopened and the Orchids Etc. flower shop moved to a new location. Only Poulet restaurant, which was located in the least damaged space, was able to reopen. It remained in the building, occupying the two southern storefronts and (in 1983) expanding into the rear storefront at 2109 Virginia Street. It was in business until July 2023.

Owner Art Kapoor, had only partial insurance coverage on the property at the time of the fire. Coupled with a moratorium on commercial construction in North Berkeley that was in place at the time the building burned appears to be the reason it was never fully rebuilt. (BDG, 27 Nov. 1981) The building that exists currently appears to have simply been the result of the salvage, repair/reconstruction, and remodeling of the most intact and portions of the building that remained (the southernmost ground floor storefront) and as much additional new structure as would constitute a viable commercial property. The earlier architectural character and features of the building were discarded in favor of the current Neo-Tudor aesthetic. By 1983, the building in its current extent and appearance was in place. In 1987, the clean up of soil polluted by toxic dry cleaning chemicals was undertaken and the parking lot area surrounding the building was excavated of 300 cubic yards of material and a chemical storage tank. Kapoor had plans for a mixed-use development project with an underground garage on the site, but they were never realized. (*Oakland Tribune*, 17 April 1987)

A list of tenant businesses, organized by current storefront address (historical address number noted in brackets), is provided below. Where chronological gaps are present, no tenant information was available:

1677 Shattuck Avenue [first floor, north side – historically 1675, 1677 Shattuck Avenue]

Dates	**Tenant**	
	1675	**1677**
1915		The Ideal Market/The Ideal Meat Market
1916	St. John's Bakery	
1923 - 1924	Ideal Delicatessen & Bakery	
1948	The Gloveatorium, leather cleaning and finishing	
1961	Virginia Cleaners, shirt finishing department	
1973 - 1980	Northwestern Title Company of Alameda County	
1981	Orchids Et Cetera, flower shop	
1981 FIRE: This portion of building heavily damaged. Repaired/reconstructed.		
2004 - 2008	Going Places Travel agency	La Leche League/Waddle & Swaddle, parenting and breast feeding support groups
2009 - 2019		Lobelia, women's clothing

2109 Virginia Street [Virginia St. storefront and eastern addition - historically 2103, 2105, 2109 Virginia Street]

Dates	**Tenant**		
	2103	**2105**	**2109**
1906			Virginia Cleaners & Dyers/ Virginia Cleaners, main plant and office
1914-1917 (East addition built ca.1914)		Virginia Cleaners & Dyers/ Virginia Cleaners	
1921 -1953			
1923-1924		Used furniture shop	
1925	Used furniture shop		
1925-1927	Ye Olde Walnut Furniture Shop/Robie's Antique Shop, R.W. Robie prop.		
1928	The Exclusive Bed House, beds and mattresses	Virginia Cleaners & Dyers/ Virginia Cleaners	
1950 - 1981	Virginia Cleaners & Dyers/ Virginia Cleaners		
1981 FIRE: This portion of building destroyed, not reconstructed (except 2109 Virginia St. at rear of current building)			
post-1981 - Recent	[Portion of building demolished, 2103 and 2105 address numbers no longer used]		Unknown – possibly used by Poulet restaurant.

Architect or Builder

Research did not determine the identity of an architect or builder responsible for the design or construction of the original building or subsequent additions/remodeling. Because of the 1981 fire, which destroyed the majority of the building and resulted in reconstruction with an entirely different architectural character, their work is no longer extant or evident. No information about the designer or builder of the building in its current post-1981 iteration was found.

Architectural Type & Style

The building at 1685 Shattuck Avenue began as, and is currently, a two-part commercial block, as defined by Richard Longstreth in his book *The Buildings of Main Street* (Alta Mira Press, 2000). It represents this type in that it is two-stories, with the first story representing public uses like retail stores, while the second story represents more private uses such as offices. Originally, the building was mixed-use with residential space on the upper floor, but over time evolved to house offices, workshop space, and storage on the second floor. In all cases, however, this generally upheld the two-part commercial block model. Typology ascribed to the architectural treatment of two-part commercial blocks is moot in this case, as the building's current architectural style is a recent application.

The building at 1685 Shattuck Avenue began as an Edwardian style mixed-use building and was expanded and remodeled extensively throughout its history. It took on light-industrial uses and portions of the property were eventually remodeled in the Art Moderne style. By the early 1950s, the property exhibited a mixture of incongruous architectural styles relating to various portions of the building. In the late 1950s, even the original Edwardian style portion was stripped of all ornamentation, including bay windows, and stuccoed in a modernizing remodel. During the late 20th century, the building's original appearance was not evident, and then in 1981, a massive fire destroyed the majority of the building. The small portion that was salvaged and rebuilt was given yet another aesthetic overhaul in the Neo-Tudor style, which referenced none of the earlier styles. Other than the basic form and spatial organization of the building, none of the elements, materials, or decorative features that were indicative of its original architectural style remain (possibly with the exception of some wood-sash clerestory windows above the altered storefronts at the southern corner of the building).

The Neo-Tudor style that the building exhibits today is a late-20th century iteration of the Tudor Revival style that was popular in the 1920s and 1930s, which in turn was a revival of the Tudor style of Medieval England. The Neo-Tudor style was popular from 1965 into the 1990s and was characterized most strongly by false half-timbering and prominent front-gable roof forms. Prominent chimneys and irregularly placed windows of varying sizes, sometimes with diamond-pane sashes, attempted to evoke the Tudor aesthetic. Unlike earlier Tudor-derived buildings, Neo-Tudor style buildings are almost never built of stone or brick, but might sometimes incorporate veneers of these materials. (continued)

B10. Significance: (continued)

Typically, they are standard wood-frame structures with applied features that seem to almost deliberately evoke a sense of superficiality. (John Milnes Baker, *American House Styles*, New York: W.W. Norton & Co., 1994.)

In the case of 1685 Shattuck Avenue, faux half-timbering is present, but consists of narrow-dimension boards that are a cursory suggestion of authentic structural timber-work. Gable forms are present but take the form of three small gables that are tacked to the pent roof and do not relate to the building's actual roof form or structure. The pent roof itself, as well as the undersized and non-integral gables, do not illustrate the Neo-Tudor style, although an impression of superficiality is made. Windows, though accurately framed by half-timbering, are not typical of the style in either their size, arrangement, type, or material. Storefronts are also relatively simple, modernized, and exhibit alterations specific to each unit and do not speak to the Neo-Tudor aesthetic. The angled bay window and tall, narrow, arched stairwell entryway on the primary facade are also not characteristic of the Neo-Tudor style, while the projecting beam ends under the eaves are somewhat Tudor-referential, though their decorative shaping is not. In general, the building is a weak representation of the style, which was likely a result of prohibitive cost and construction restrictions in place when hurried post-fire rebuilding occurred.

Alterations

Building permits and land use planning records provide some documentation of the property's development over time. Permits and records documenting substantial exterior work include:

Date/Range	Source	Description of Work
1921	Property Card	Assessor's note to use 1921 as year for depreciation: many major additions, alterations, modernization undertaken
1928	Property Card	Unspecified alteration
1929	Property Card	Unspecified alteration
1944	Property Card	Unspecified addition
1945	Property Card	Unspecified addition
1946	Property Card	Unspecified addition
1949	Property Card	Repair fire damage [unknown location]
1951	Property Card	Take out second partition, install truss with 2'-1” rods and turnbuckles.
1957	Property Card	Stucco front after removing gingerbread.
1961	Property Card	Fire repair. [Second story, north side]
1981	Property Card	Demo, fire related. Also demo second floor on Shattuck. [Fire destroyed most of building and resulted in demolition of entire eastern portion of building, second floor of current building, and major repairs to first floor, north side, of current building.]
1983	Property Card	Repair fire damage. Add second floor. [Resulted in current, two story building. Eastern portion not rebuilt. Stylistic remodeling undertaken, resulting in current half-timbered Neo-Tudor appearance.]
1996	Inspection History Report	New concrete window wall support – 20 linear feet.

In addition to building permits and land use planning records, sources such as Sanborn Fire Insurance maps, aerial photographs, newspaper articles, and historical images provide additional information on how the building evolved over time:

- 1911 Sanborn Map:
  Subject building consists of only the south half of the current building; two storefronts wide along Shattuck, with a storefront at the rear facing Virginia Street. It was two-stories high. A later photograph indicates it was an Edwardian style building clad with stucco (first story) and horizontal wood siding (second story), with storefronts on the first floor, and three square bay windows each on the second stories of the Shattuck and Virginia Street facades. It had a flat roof. Four small dwellings and some outbuildings occupied the rest of the property.

B10. Significance: (continued)

- Circa 1928 Photograph/1929 and 1950 Sanborn Maps/1939 and 1947 Aerial Photos:
  The 1929 Sanborn map illustrates the northern addition to the building, housing two additional shop spaces on the ground floor and another second floor space. A stairwell was incorporated between the two halves, giving access to the second story. The building had also been extended to the east (to the current eastern lot line) with a series of one-story shop spaces fronting on Virginia Street. A circa 1928 photograph indicates that the storefronts echoed the Edwardian architecture of the original building, with traditional recessed storefronts that included plate glass windows, dedicated entry doors, and clerestory windows above. According to the 1929 Sanborn map, behind/to the north of these added shops were two additional light-industrial spaces. Two residential flats buildings were located within the bounds of the current parcel, to the north of the current building, and within the interior angle formed by the extent of the building. 1939 and 1947 aerial photos show the same conditions.

- 1950 Sanborn map:
  Map indicates the eastern extension had gained a second story. A sawtooth roof is noted over this portion of the building, reproducing the roof that was present when the building was one story (as seen in a 1947 aerial photo).

- 1952, 1970, and 1981 Photographs/1958 and 1965 Aerial Photos:
  The photograph shows that the north half of the current building and the eastern extension on Virginia Street had been remodeled in the Streamline Moderne style. (The earlier circa 1928 photograph of the Virginia Street extension showed Edwardian aesthetics and it is assumed this portion and the northern half of the Shattuck Avenue facade were remodeled.) The original portion of the building remained in the Edwardian style until a 1957 property card notation (above) indicates it, too, was remodeled in a more modern aesthetic. 1958 and 1965 aerial photos show the same conditions.

- 1981 Photograph, Newspaper Articles, and Property Records:
  The building was damaged by a major fire, which destroyed the entire eastern extension and second floor of the current building, while heavily damaging the northern half of the first floor. The shop spaces on the southern half of the first floor were relatively unharmed, but damage resulted in the demolition of most of the existing structure. The building was rebuilt by 1983 in its current extent and architectural character (Neo-Tudor style), which is entirely different from its original appearance and the appearance it had taken on over time with subsequent alterations, additions, and remodeling efforts.

California Register Evaluation

The California Register of Historical Resources (California Register) is an inventory of significant architectural, archaeological, and historical resources in the State of California. In order for a property to be eligible for listing in the California Register, it must be found significant under one or more criteria relating to historically significant events, people, architects or architectural merit, or information potential. The following provides an evaluation of the historic significance of 1685 Shattuck Avenue:

Criterion 1 (Event): *Resources that are associated with events that have made a significant contribution to the broad patterns of California's history and cultural heritage.*

No specific events of historical importance are known to have occurred at the property. It has served a number of common commercial and light-industrial functions throughout its history and into the present day. Built in 1906, the building corresponds to the early period of North Berkeley history, when transportation lines were extended north from Downtown, spurring development. However, it was somewhat late to that initial period of primarily residential development and appears to have been an organic element of growth as commercial uses filled in along Shattuck Avenue between Downtown and Berryman Station around the turn of the 20th century. Its construction fits organic patterns of local development, which echoed patterns that occurred throughout the Bay Area. It does not strongly represent development patterns related to important events and, thus, does not stand out as noteworthy within the development or continuing history of Berkeley's Downtown or commerce.

The property does not appear to be eligible for listing in the California Register under Criterion 1.

Criterion 2 (Persons): Resources associated with the lives of persons important in our past.

Early in the building's history there was some residential use on the second floor. The residential space seems to have been primarily a rooms-for-rent situation and only a few names of renters were found, none of whom appear to be historically significant individuals. Originally, and as time progressed, numerous businesses occupied the shop, office, and workshop spaces in the building. They tend not to have specific names associated with them. For those that have known proprietors, those individuals all appear to be small business owners, without the influence or accomplishments that would raise them to a level of historical significance.

The property does not appear to be eligible for listing in the California Register under Criterion 2. (continued)

State of California — The Resources Agency **Primary #**
DEPARTMENT OF PARKS AND RECREATION **HRI#**
CONTINUATION SHEET **Trinomial**

Page 10 **of** 26 ***Resource Name or #** (Assigned by recorder) 1685 Shattuck Avenue, Berkeley, CA
*Recorded by: Caitlin Hibma/Left Coast Architectural History *Date: April 2024 ☒ Continuation ☐ Update

B10. Significance: (continued)

Criterion 3 (Architecture): *Resources that embody the distinctive characteristics of a type, period, region, or method of construction, or represents the work of an important creative individual, or possesses high artistic values.*

The building at 1685 Shattuck Avenue was designed as a two-part commercial block in the Edwardian style. As such, it was typical in execution, with facade organization, features, and finishes that are found on countless commercial buildings of the same age locally and throughout the state. Since its construction it underwent a number of expansions and remodels that changed its configuration and architectural character drastically. Ultimately, the building was burned to such in an extent by a 1981 fire that only a portion of the current building is original fabric (southern ground floor), while the rest is reconstructed. Upon reconstruction, the building was given an entirely different appearance and architectural character than it had previously. The building does not appear to have been architect designed, originally, and does not have a known builder. Likewise, the architects/builders of later additions and remodels are unknown. Such professionals' work was lost in the 1981 fire, anyway, meaning the current building would not be a valid representation of their work. The identity of any architect/builder associated with the current iteration of the building is not known and would likely be too recent to be considered significant.

The property does not appear to be eligible for listing in the California Register under Criterion 3.

Criterion 4 (Information Potential): *Resources that have yielded, or may be likely to yield, information important in prehistory or history*

Criterion 4 is typically concerned with archaeological investigation. Where buildings or architectural elements are concerned, Criterion 4 typically relates to rare construction types, of which 1685 Shattuck Avenue is not an example.

The property does not appear to be eligible for individual listing in the California Register under Criterion 4.

Berkeley Landmark Evaluation

Berkeley Landmarks are designated historical resources within the City of Berkeley. Resources may be designated as Landmarks if they meet one or more of five criteria similar to those used for the California Register, but which elaborate on areas of significance. The following provides an evaluation of the historic significance of 1685 Shattuck Avenue according to local significance criteria:

1. Architectural Merit:
a-c. Property that is the first, last, only or most significant architectural property of its type in the region; Properties that are prototypes of or outstanding examples of periods, styles, architectural movements or construction, or examples of the more notable works of the best surviving work in a region of an architect, designer or master builder; Architectural examples worth preserving for the exceptional values they add as part of the neighborhood fabric.

The property, as originally designed, was typical in execution, with facade organization, features, and finishes that are found on countless Edwardian-era commercial buildings locally and regionally. It was altered extensively and repetitively throughout its history, until it burned almost completely in 1981 and now demonstrates an entirely different architectural character than it did previously. Therefore, it does not represent a first last, only, most significant, or outstanding example of historic architecture. Its original architects and/or builders are unknown. Ultimately, the building's destruction by fire and reconstruction in the early 1980s means that none of the property's early appearance, nor the workmanship of its architect/builder is conveyed by the building in its current guise. Therefore, it does not appear to have the high architectural merit that would qualify it as a Berkeley Landmark under this criterion.

2. Cultural value: Structures, sites and areas associated with the movement or evolution of religious, cultural, governmental, social and economic developments of the City.

Neither the construction of the building at 1685 Shattuck Avenue, nor its subsequent ownership, occupancy, and use history, were influenced by religious, cultural, governmental, or social events or developments in the area. Although economic activity would appear to be the building's most obvious cultural association, since it was built and used for commercial purposes and housed small, primarily local businesses, it played a standard role in the organic growth of commercial uses northward on Shattuck Avenue into North Berkeley and was not elemental or influence to that growth pattern. It does not appear to have been associated with any significant movements or events within Berkeley's economic history. Ultimately, the building's destruction by fire and reconstruction in the early 1980s means that none of the property's early history is conveyed by the building in its current guise. Therefore, it does not appear to have the high cultural value that would qualify it as a Berkeley Landmark under this criterion.

3. Educational value: Structures worth preserving for their usefulness as an educational force

The property at 1685 Shattuck Avenue does not appear to have any use as an educational tool. The building is a (continued)

B10. Significance: (continued)

modest commercial structure that does not embody any relationships to important aspects of neighborhood or city history. The property does not have any potential to convey lessons on history, as it is not associated with any important events, nor is it physically illustrative of any significant work or activities of its owners/tenants. It therefore does not appear to have the high educational value that would qualify it as a Berkeley Landmark under this criterion. Ultimately, the building's destruction by fire and reconstruction in the early 1980s means that none of the property's early history is conveyed by the building in its current guise. Therefore, it does not appear to have the high educational value that would qualify it as a Berkeley Landmark under this criterion.

4. Historic value: Preservation and enhancement of structures, sites and areas that embody and express the history of Berkeley/Alameda County/California/United States. History may be social, cultural, economic, political, religious or military.

The property at 1685 Shattuck Avenue very broadly reflects the organic commercial growth in North Berkeley, but does not stand out within that context for any important contributions to economic history, as it was simply a modest commercial building housing numerous small, primarily local businesses. It does not have any strong associations beyond general development trends in the neighborhood. Ultimately, the building's destruction by fire and reconstruction in the early 1980s means that none of the property's early history is conveyed by the building in its current guise. Therefore, it does not appear to have the high historic value that would qualify it as a Berkeley Landmark under this criterion.

5. Any property which is listed on the National Register described in Section 470A of Title 16 of the United States Code.

The property at 1685 Shattuck Avenue is not listed in the National Register of Historic Places and therefore does not qualify as a Berkeley Landmark under this criterion.

Berkeley Structure of Merit Evaluation

Berkeley Structures of Merit are designated historical resources within the City of Berkeley. Resources may be designated as Structures of Merit if they meet general and/or specific criteria. An evaluation follows:

1. General criteria shall be architectural merit and/or cultural, educational, or historic interest or value. If upon assessment of a structure, the commission finds that the structure does not currently meet the criteria as set out for a landmark, but it is worthy of preservation as part of a neighborhood, a block or a street frontage, or as part of a group of buildings which includes landmarks, that structure may be designated a structure of merit.

As assessed under Berkeley Landmark criteria, the property at 1685 Shattuck Avenue does not possess high architectural merit or cultural, educational, or historic value. Visual observation of buildings around the property identifies many newer buildings and does not indicate any historically significant cohesive or thematically representative grouping within which the building at 1685 Shattuck Avenue would play a meaningful role. The building's destruction by fire and reconstruction in the early 1980s means that none of the property's early history is conveyed by the building in its current guise and it is an anomaly within the surrounding built environment. Therefore, the property does not appear to be worthy of preservation as a part of a group of buildings that includes a Landmark and does not qualify as a Structure of Merit under the General Criteria.

Specific Criteria

a. The age of the structure is contemporary with (1) a designated landmark within its neighborhood, block, street frontage, or group of buildings, or (2) an historic period or event of significance to the City, or to the structure's neighborhood, block, street frontage, or group of buildings.

There are two Berkeley Landmarks within a roughly one block radius of 1685 Shattuck Avenue: the Whittier School (1939, Moderne) and Grace North Church (1913, Arts and Crafts). Neither are closely contemporaneous with 1685 Shattuck Avenue and the subject building's destruction by fire and reconstruction in the early 1980s means that none of the property's early history is conveyed by the building in its current guise, so it is unable to make proper reference to any contemporaneous properties or local events, in any case.

b. The structure is compatible in size, scale, style, materials or design with a designated landmark structure within its neighborhood, block, street frontage, or group of buildings.

The building's original two-part commercial block, wood-clad, Edwardian style appearance bore few similarities to the two nearby Craftsman and Moderne style Landmarks in size, scale, style, materials, or design. It no longer exhibits that appearance and its current half-timbered, stucco clad, Neo-Tudor character is also incompatible with the two Landmarks.

c. The structure is a good example of architectural design. (continued)

State of California — The Resources Agency **Primary #**
DEPARTMENT OF PARKS AND RECREATION **HRI#**
CONTINUATION SHEET **Trinomial**

Page 12 **of** 26 ***Resource Name or #** (Assigned by recorder) 1685 Shattuck Avenue, Berkeley, CA
*Recorded by: Caitlin Hibma/Left Coast Architectural History *Date: April 2024 ☒ Continuation ☐ Update

B10. Significance: (continued)

The building was originally a modest and common example of a two-part commercial block designed in the Edwardian style. It was extensively altered and remodeled a number of times, and ultimately burned in 1981. It was reconstructed under a tight budget and zoning restrictions that resulted in an even more modest building of completely different architectural character than it had previously. It has no historic integrity and is not a good example of architectural design.

d. The structure has historical significance to the City and/or to the structure's neighborhood, block, street frontage, or group of buildings.

The property at 1685 Shattuck Avenue generally reflects commercial growth north of Downtown Berkeley in the early-20th century, but does not stand out within that context for any important contributions to local history, as it was simply a modest commercial building housing numerous small, primarily local businesses. Neither the construction of the building nor its later history, was significantly influenced by noteworthy social, cultural, economic, political, religious, or military events or developments in the area. Ultimately, the building's destruction by fire and reconstruction in the early 1980s means that none of the property's early history is conveyed by the building in its current guise.

Integrity

In order to qualify for historic designation, a property must possess significance under the aforementioned criteria *and* have historic integrity. The property at 1685 Shattuck Avenue does not appear to possess the historic significance necessary to qualify for designation; therefore, an analysis of its integrity is not required.

It may be noted, however, that the building, as it exists today, essentially dates to the early 1980s, after it was destroyed by fire and reconstructed. Aside from its basic massing and organization of interior space – which was substantially pared down from the sprawling structure the building had become over its 75 year history – the building retains none of its earlier architectural character or features. If the building had any historic significance, it would be completely unable to convey that significance in its current guise and is considered to have lost all integrity.

Conclusion

Based on the above analysis, the property at 1685 Shattuck Avenue does not appear to be eligible for listing the California Register of Historical Resources or as a City of Berkeley Landmark or Structure of Merit. Therefore, it does not qualify as a historic resource for the purposes of the California Environmental Quality Act (CEQA).

RE: Phase I Environmental Site Assessment Report
1685 Shattuck Avenue/2109 Virginia Street
ACC Project Number: 10230-001.00

Dear Mr. Kapoor,

ACC has performed a Phase I Environmental Site Assessment (ESA) in general conformance with the scope and limitations of the ASTM E1527-21 Standard and the All Appropriate Inquiry Final Rule 40 CFR Part 312 for the property identified as 1685 Shattuck Avenue/2109 Virginia Street (Subject Property). This Phase I ESA was requested by the AKR Company (Client). The purpose of this Phase I ESA was to assess the Subject Property for Recognized Environmental Conditions as defined by the ASTM E1527-21 Standard.

This Phase I ESA has identified evidence of a Controlled Recognized Environmental Condition (CREC), as discussed in the Executive Summary and the report narrative.

Thank you for choosing ACC to perform this Phase I ESA. If you have any questions regarding this report please contact (510) 773-0752 or isutherland@accenv.com.

Sincerely,

Ian Sutherland, PG
Project Manager

EXECUTIVE SUMMARY

ACC has performed a Phase I ESA in general conformance with the scope and limitations of the ASTM E1527-21 Standard and the All Appropriate Inquiry Final Rule 40 CFR Part 312 for the property identified as 1685 Shattuck Avenue/2109 Virginia Street (Subject Property). Exceptions to, or deletions from, this practice are described in Section 1.4.

The Subject Property consists of three parcels of land totaling approximately 0.52-acres and located on the northeast intersection of Shattuck Avenue and Virginia Street in the City of Berkeley, California. The Subject Property is currently developed with a two-story commercial building and currently occupied by Going Places Travel Services.

The earliest record reviewed during this assessment was a 1894 historical Sanborn map depicting the Subject Property as undeveloped land.

By 1911, the Subject Property appears developed with five dwellings to the north and east, two storefronts to the southwest, and an office building to the south.

By 1929, the Subject Property appears developed as a drugstore to the southwest, four storefronts to the west, two multi-family dwellings to the north, and a dry cleaning facility with associated office to the east. Dry cleaning machinery appears to be located to the center and northeast of the Subject Property.

Circa 1982 all former structures were demolished and the current two-story commercial building with parking lot was constructed.

Historical Subject Property occupants include: Albany Dry Cleaners (1920), Virginia Grocery and Fruit Market (1925 to 1945), Cooley Lawrence Grocery (1933), Blanchard Aug D Eva M clo CLNR (1943), Grocery (1943), Spronken Realty (1962), Virginia Dry Cleaners (1920 to 1970), Craft Collage (1975), Art Kapoor Realty Co (1975 to 1980), Main Plant (1980), Shoes (1986), Zazu & Violets (1995), Camps and Cottages (2000), Quilt and Textile Repair (2006), private residences (1920 to 2000), AAA Liberty Lock & Door Check (2014), and Poulet (1980 to 2020).

This assessment has revealed evidence of a Controlled Recognized Environmental Condition (CREC) at the Subject Property.

CREC - Stoddard Solvent Release: The Site was developed as a dry cleaning facility from approximately 1920 to 1970 that utilized Stoddard solvent. A 5,000-gallon underground storage tank used to store Stoddard solvent was removed during July 1987. Impacts to soil, groundwater, and soil vapor were documented and remediated under the oversight of the California Department of Toxic Substances Control (DTSC). Case closure was granted by the DTSC during 1987 and by the San Francisco Regional Water Quality Control Board (SFRWQCB) during 1999.

Although case closure was granted, ACC considers the case to be a CREC since there is no documentation that the release was cleaned up to regulatory standards for residential properties. There is a high potential that Berkeley Toxics Division and the Alameda County Department of Environmental Health will require additional assessment prior to redevelopment of the Subject Property as residential.

Historical data indicate that Stoddard solvent utilized by the historic on-site dry cleaner contained volatile organic compounds (VOCs) including benzene, toluene, ethylbenzene, and xylenes (BTEX). BTEX was reportedly detected in soil vapor at the Site at respective concentrations of 6.3, 8.9, 14, and 43 parts per million (ppm). When converted to micrograms per cubic meter, the concentration for benzene significantly exceeds the current SF RWQCB screening levels for vapor intrusion (Appendix H).

Based on available data ACC concludes that post-excavation soil vapor confirmation sampling was not conducted, and that potential residual soil vapor concentrations cannot be compared to current regulatory screening levels. It is ACC's opinion that a vapor intrusion condition (VEC) at the Subject Property cannot be ruled out at this time, particularly with regard to redevelopment of the Site as residential.

Non-Scope Considerations: Based on the age of the buildings, ACC recommends an asbestos-containing building materials (ACBM) survey and a lead-based paint (LBP) survey if building materials are to be demolished or disturbed.

Common ACBMs include flooring and associated adhesive; baseboard and baseboard adhesive; carpet adhesive; leveling compound; drywall, joint and/or texturing compounds; ceiling tiles; roofing felts; roof patching compounds; and mechanical/boiler system insulation. Federal regulations require that potential ACBMs be sampled and analyzed for the presence of asbestos prior to any renovation or demolition activities that disturb such materials (40 CFR Part 61).

The Subject Property buildings may have been constructed prior to 1978 and should be assumed to contain lead-based paint (LBP) based on current regulations. A lead-based paint survey performed by a state-certified Lead Inspector is recommended if painted surfaces are to be disturbed.

1.0 INTRODUCTION

On behalf of the AKR Company (Client), ACC Environmental Consultants, Inc. (ACC) performed a Phase I Environmental Site Assessment (ESA) of the property identified as 1685 Shattuck Avenue/2109 Virginia Street (Subject Property).

1.1 Purpose

The purpose of this Phase I ESA was to assess the Subject Property for recognized environmental conditions (RECs), which are defined by the ASTM E1527-21 Standard as (1) the presence of hazardous substances or petroleum products in, on, or at the Subject Property due to a release to the environment; (2) the likely presence of hazardous substances or petroleum products in, on, or at the Subject Property due to a release or likely release to the environment; (3) the presence of hazardous substances or petroleum products in, on, or at the Subject Property under conditions that pose a material threat of a future release to the environment.

1.2 Scope of Services

ACC conducted the following:

- A search of regulatory records and files for the Subject Property, neighboring properties, and nearby sites of environmental concern to assess whether any adverse environmental conditions have impacted, or has the potential to impact the Subject Property.
- A review of historical sources including historical aerial photographs, historical topographic maps, historic city directories and historical fire insurance maps.
- A review of physical setting sources including the USGS 7.5 minute topographic maps, as well as geology, hydrogeology, and soil maps of the Subject Property and vicinity, as deemed appropriate.
- A review of the current title report for the Subject Property (if provided by the Client), and copies of all previous environmental site investigations performed at the property (if applicable and available).
- A site reconnaissance to visually assess the potential for RECs in connection with the Subject Property.
- Interviews of regulatory agencies and available persons familiar with the Subject Property.

1.3 Limitations

A Phase I ESA cannot wholly eliminate uncertainty regarding the potential for RECs in connection with a property. Performance of this Phase I ESA is intended to reduce uncertainty regarding the potential for RECs in connection with the Subject Property within reasonable limitations of time and

cost. There is a point at which the cost of information obtained or the time frame required to gather it outweighs the usefulness of the information and, in fact, may be a material detriment to the orderly completion of real estate transactions.

Conducting a Phase I ESA alone does not provide a landowner with CERCLA liability protection. Landowners who want to qualify as bona fide prospective purchasers or contiguous property owner must comply with all of the statutory requirements identified in CERCLA Section 107(r) and 107(q). Continuing obligations must be satisfied to maintain liability protection under CERCLA for innocent landowners, bona fide prospective purchasers, and contiguous property owners. Continuing obligations start on the date that a landowner acquires title to a property. The landowner must: 1) comply with land use restrictions and institutional controls; 2) take "reasonable" steps with respect to hazardous substances releases; 3) provide full cooperation, assistance and access to persons that are authorized to conduct response actions or natural resource restoration; 4) comply with information requests and administrative subpoenas; and 5) provide all legally required notices.

The site reconnaissance was limited to a visual observation of the Subject Property. ACC shall not be responsible for areas covered by parked vehicles, overgrown vegetation, and/or other obstacles (heavy furniture, trash bins, miscellaneous stored items, etc.) preventing access or visual observation at the time of the site reconnaissance. Per the ASTM E1527-21 Standard it is not necessary to look under floors, above ceilings or behind walls.

As is the case with any investigation of limited scope, site conditions may vary from those observed and witnessed on the date of the site reconnaissance. The possibility of the discovery of the presence of hazardous substances that are not anticipated and/or were neither witnessed nor identified on the date of the site reconnaissance cannot be completely eliminated. ACC cannot offer any form of warranty and/or guarantee that the Subject Property does not contain hazardous substances and/or conditions per the results of performing this Phase I ESA. Because regulatory criteria change over time, potential concentrations of contaminants presently considered not significant may in the future fall under more stringent regulatory standards that require remediation.

Based on the ASTM E2600-22 *Standard Guide for Vapor Encroachment Screening on Property Involved in Real Estate Transactions*, the minimum search distance for potential vapor intrusion by a release of petroleum products is 528 feet (1/10 mile) and the minimum search distance for potential vapor intrusion by other chemicals is 1,760 feet (1/3 mile).

1.4 Project-Specific Limitations and/or Deviations

This assessment did not include any testing or sampling of materials, including soil, water, soil vapor, air or building materials. No limiting conditions or deviations were encountered during this assessment.

1.5 Significant Assumptions

No significant assumptions were made during this Phase I ESA. ACC assumes that verbal and written information provided to ACC during this Phase I ESA process, and included in this report, is factual.

1.6 User Reliance

This report may be relied upon by American Commonwealth Associates, LP. Reliance upon this report by additional parties is unauthorized unless expressed written consent is obtained from the Client and ACC.

2.0 SITE DESCRIPTION

The Subject Property consists of a portion of three parcels of land located on the northeast intersection of Shattuck Avenue and Virginia Street in the City of Berkeley, California. The total area of the Subject Property is approximately 0.52 acres per the Alameda County Assessor. The following addresses have been found to be associated with the Subject Property: 2109 Virginia Street, 1685 Shattuck Avenue, 1663 Shattuck Avenue, and 1667 Shattuck Avenue.

The Subject Property, Assessor Parcel Number (APN) 58-2178-18, is accessible from Shattuck Avenue to the west. The Subject Property is currently developed with a two-story commercial building and currently occupied by Going Places Travel Services. The surrounding area is developed for commercial and residential use.

Electricity and gas are provided by PG&E Water and sewer service is provided by East Bay Municipal Utility District.

3.0 USER PROVIDED INFORMATION AND INTERVIEWS

ACC provided Arthur Kapoor a User questionnaire which requests information as described in ASTM E1527-21 Section 6. The environmental questionnaire was completed by Arthur Kapoor and dated November 16, 2023. A copy of the user questionnaire is included in Appendix A.

The User is completing the Phase I ESA in preparation for redevelopment of the Site as a multi-family residential structure.

3.1 Interviews

3.1.1 Interview with Owner, Key Site Manager or Representative/Operator

Mr. Kapoor revealed that he has been associated with the Subject Property since 1991. Mr. Kapoor is aware that the site was formerly a dry cleaning facility that utilized Stoddard solvent; that the Stoddard solvent underground storage tank (UST) leaked; and that the UST removal AND environmental cleanup was conducted under the oversite of the California Department of Toxic Substances Control (DTSC). Mr. Kapoor is not aware of any additional USTs at the site and noted that one groundwater monitoring well may exist at the Site.

3.1.2 Interviews with Occupants

Interviews with the occupants was not warranted.

3.1.3 Interviews with Local Government Officials

See Section 4.5.

3.1.4 Interviews with Others

No additional interviews were conducted.

3.2 Environmental Liens or Activity and Use Limitations (AULs)

The User did not identify any environmental liens or AULs in connection with the Subject Property.

3.3 Title Report

A Title Report was provided to ACC (Appendix B). The Title Report provided to ACC does not indicate environmental deed restrictions at the Subject Property.

3.4 Specialized Knowledge

Specialized knowledge provided by the user is consistent with available regulatory information.

3.5 Commonly Known or Reasonably Ascertainable Information

Any commonly known or reasonably ascertainable information available to ACC has been incorporated into this report.

3.6 Valuation Reduction for Environmental Issues

The User currently owns the Subject Property.

3.7 Owner and Key Site Property Manager Information

The current owner of the Subject Property is Mr. Kapoor. No key property manager information was provided.

3.8 Previous Environmental Reports

No previous environmental reports were provided by the User.

4.0 RECORDS REVIEW

ACC contracted Environmental Data Resources, Inc. (EDR) to research available environmental records and historical data for the Subject Property based on the ASTM E1527-21 Standard. A complete list of searched records and databases, as well as search distances, is attached as Appendix C. The search distances provided by EDR are in accordance with the ASTM E1527-21 Standard and AAI guidelines.

The database search by EDR revealed 54 mapped sites within a one-eighth mile radius of the Subject Property. The Subject Property and nearby properties of potential concern are discussed below.

4.1 Summary of EDR Records for Subject Property

Site Name: Berkeley Village
Site Address: 2109 Virginia Street

The Subject Property is listed on the EDR Hist Cleaner, Response, Envirostor, and CERS databases. According to the listing, Virginia Cleaners & Dryers and Durant G E operated a dry-cleaning plant, and cleaners dryers and pressers from at least 1925, 1933, and 1985 to 1969. Addresses listed for Virginia Cleaners and Dryers include 2109 Virginia Street, and 1667 Shattuck Avenue. According to the RESPONSE database, the Subject Property was a State Response site as of December 1987 managed by the Cleanup Berkeley Division Branch. Hydrocarbon Solvents was listed as the confirmed chemical of concern as a past use of dry cleaning. No further action status was issued at the Subject Property as of December 1987.

Site Name: Berkeley Village
Site Address: 1663 Shattuck Avenue

The Subject Property is listed is listed on the LUST, Cortese, HIST Coretese, and CERS databases. According to the LUST database and geotracker listing, a leak was reported at the site in September 1986. Soil sampling that year indicated contamination of petroleum hydrocarbons with concentrations up to 30,000 ppm in areas nearest to the UST located to the northeast of the existing

building. Based on figures reviewed, contamination is migrating to the southwest.

An Interim Remedial Action Plan was created in 1987 as well as various monitoring reports following. According to the Interim Remediation Plan at the Virginia Cleaners report, approximately 200 cubic yards of soil was off hauled from the site. The Monitoring Well Sampling report dated June 25, 1988 showed detections of benzene and xylenes at respective concentrations of 0.6 and 0.3 µg/L. Gasoline and diesel were not detected. Motor oil was detected up to 19.7 mg/L. Closure was achieved as of June 25, 1999. According to reports reviewed from the Department of Toxic Substances Control, groundwater monitoring was conducted and the contamination boundary appeared to be limited to the parking lot areas of the Subject Property with few aromatic compounds and no benzene.

4.2 Adjacent Properties of Potential Concern

Site Name: Lee Charlie
Site Address: 1686 Shattuck Avenue
Gradient Direction: Down Gradient

Discussion: This west-adjacent property located approximately 60 feet west and is listed on the EDR Hist Cleaner database. According to the listing, Lee Charlie operated a laundries facility in at least 1943. Based on the down-gradient location this listing is not expected to represent a significant environmental concern to the Subject Property.

Site Name: Berkeley Pediatrics Medical Group
Site Address: 1650 Walnut Street
Gradient Direction: Up/Cross Gradient

Discussion: The east-adjacent property located approximately 86 feet east is listed on the RCRA NonGen/NLR database. According to the listing, the site is a freestanding ambulatory surgical and emergency center. Based on the lack of evidence regarding a documented release, this listing is not expected to represent a significant environmental concern to the Subject Property.

4.3 Nearby Properties of Potential Concern

Site Name: 9th Street Opus
Site Address: 1666 Shattuck Avenue
Gradient Direction: Cross/Down Gradient

Discussion: The site located approximately 109 feet to the northwest is listed on the EDR Hist Auto database. According to the listing, 9th Street Opus operated as a gasoline service station from at least 2011 to 2012. Based on the cross/down gradient location this listing is not expected to represent a significant environmental concern to the Subject Property.

Site Name: Sew Clean Cleaners
Site Address: 1664 Shattuck Avenue
Gradient Direction: Cross/Down Gradient

Discussion: This site located approximately 110 feet to the northwest is listed on the EDR Hist Cleaner database. According to the listing, Sew Clean Cleaners and Dry Clean Time of America operated a dry cleaning plant from at least 1996 to 2009. Based on the down-gradient setting, this listing is not expected to represent a significant environmental concern to the Subject Property.

Site Name: Lannes Laurent
Site Address: 1652 Shattuck Avenue
Gradient Direction: Down/Cross Gradient

Discussion: The site located approximately 114 feet to the northwest is listed on the EDR Hist Cleaner database. According to the listing, Lannes Laurent operated a dry cleaning plant in at least 1943. Based on the down/cross gradient setting, this listing is not expected to represent a significant environmental concern to the Subject Property.

Site Name: Ogle A M
Site Address: 1650 Shattuck Avenue
Gradient Direction: Down/Cross Gradient

Discussion: This property is located approximately 167 feet to the northwest and is listed on the EDR Hist Auto database. According to the listing, Ogle A M operated as a gasoline service station in at least 1943. Based on the down/cross gradient setting, this listing is not expected to represent a significant environmental concern to the Subject Property.

Site Name: Samjung Corp DBA Virginia Cleaners
Site Address: 1650 Shattuck Avenue
Gradient Direction: Down/Cross Gradient

Discussion: This property is located approximately 215 feet to the northwest and is listed on the CERS HAZ waste, CERS, Envirostor, VCP, HWTS, Drycleaners, EMI, HAZNET, Non-Case Info and RCRA NonGen/NLR databases. According to these listings, this property is listed as a hazardous waste generator and chemical storage facility. Inspection reports list various violations regarding failures to document inspections of hazardous waste tank systems, properly close hazardous waste containers when not in active use, ensuring employees are properly trained for facility operations and emergencies, and electronically submit emergency response plan and procedures. All violations returned to compliance promptly. According to a Toxics Management Division routine site visit on March 15, 2022, the operator reported that dry cleaning is no longer done at this location. A 55-gallon drum was observed on site with miscellaneous cleaning products.

According to the Envirostor listing, PCE, TCE, cis/trans DCE and xylenes are listed as confirmed chemicals of concern for the site. An Initial Site Investigation Report was prepared that includes soil, soil vapor, and indoor air data. According to the report, six soil vapor probes were installed throughout the site. Soil samples were collected in addition to 12 soil vapor samples. PCE was detected in 11 of the 12 samples at concentrations ranging from 300 to 14,000,000 µg/m^3. TCE was detected in 6 of the 12 samples at concentrations ranging from 250 to 100,000 µg/m^3. Cis-1,2-DCE was detected up to 14,000 µg/m^3. Trans-1,2-DCE was detected up to 3,100 µg/m^3. Additional VOCs were detected below the respective ESLs. The highest detection of PCE in soil vapor was located near the dry cleaning machine. The report concluded that PCE appears to be naturally degrading, as evidenced by TCE and cis-1,2-DCE.

Additional and ongoing monitoring including groundwater monitoring was recommended by the consultant. The Geotracker listing notes that this is a DTSC lead case as of February 28, 2020 and is currently listed as review complete as of that date. Based on the down/cross gradient setting and available subsurface data this property does not constitute a significant environmental concern to the Subject Property.

In our opinion, none of the other sites listed on the regulatory database report pose a significant environmental threat to the Subject Property.

4.4 California Geologic Energy Management Division

The California Geologic Energy Management Division (CalGEM) Online Mapping System was reviewed for information pertaining to oil and gas exploration on or nearby the Subject Property. No oil wells were identified within 500 feet of the Subject Property.

4.5 Additional Environmental Record Sources

In addition, ACC submitted file review request letters, emails and/or phone calls to the following agencies for the Subject Property:

4.5.1. California EPA – Department of Toxic Substance Control (DTSC)

ACC reviewed available records at the DTSC office on December 8, 2023. Files available included:

- Reports discussing the disposal of soils at the Altamont Landfill in 1986 with BTEX ranges from 0.004 to 3.4 percent.
- Soil vapor sampling records with concentrations of BTEX detected at respective concentrations of 6.3, 8.9, 14, and 43 parts per million (ppm).
- A map of soil sampling locations with total hydrocarbon detections throughout excavation area.
- Maximum hydrocarbon detections in groundwater at location MW-6 (nearest to former UST) of 78,000 mg/kg.

- A DTSC letter summarizing hydrocarbon impacts to groundwater. The letter states hydrocarbons in groundwater are restricted to the NE corner of the Subject Property with few aromatic compounds and no benzene. Hydrocarbons were not detected in down-gradient monitoring wells with detection limits of 1 parts per billion (ppb) for BTX and 50 ppb for hydrocarbons.
- Evidence of additional soil up to 75 cubic yards removed in December, 1986.
- A Site Investigation and Haz Waste Abatement Program dated September, 1987. The program summarizes all findings from previous environmental investigations. According to the program, the 5,000-gallon former-UST was removed in July, 1987. Groundwater was not encountered during the removal. On-site aeration was conducted with BAAQMD guidelines, and approximately 60 cubic yards of soil was aerated on site.
- A correspondence letter stating the DTSC concludes the Site was adequately mitigated and no further action was recommended on December 18, 1987. The letter discusses the removal of stoddard solvents to non-detectable levels, the UST was excavated with underlying soil, and groundwater monitoring wells show migration has not occurred.

4.5.2. Regional Water Quality Control Board (RWQCB)

ACC received a response from the RWQCB on November 21, 2023. The RWQCB informed ACC that all available files are listed on the online RWQCB Geotracker database.

4.5.3. Berkeley Toxics Management Division (BTMD)

A request was sent to BTMD on November 15, 2023. ACC did not receive a response prior to issuance of this report.

4.5.4. Bay Area Air Quality Management District (BAAQMD)

A request was sent to AQCD on [Date] OR ACC received a response from the AQCD on [Date]. No files were available for the Subject Property.

4.5.5. Berkeley Fire Department (FPD)

ACC received a response from the BFD on November 29, 2023. Files available included:

- A Fire incident report dated July 30, 2021. The report discusses a gasoline or other flammable liquid spill that was controlled and cleared on July 30, 2021.
- A correspondence from The Berkeley Assistant Chief/Fire Marshall for the 2109 Virginia Street (former Virginia Cleaners Site). The correspondence states that BFD has no information about UST removals at the Subject Property. A fire event is mentioned in 1982.

4.5.6. Berkeley Building and Planning Department (BD)

ACC received a response from BBPD on November 28, 2023. Files available included:

- An electrical permit for a Christmas tree lot dated November 25, 1997.
- An electrical permit for branch circuits & festoon lighting dated November 27, 1996.
- Several plumbing and electrical permits to construct accessible restroom in the existing restaurant dated March to May, 2011.

- A building permit to replace 10 linear feet of sewer dated April 7, 2000.
- Several electrical permits to replace wiring inside ceiling dated June to July, 1996.
- Several building permits to install a new concrete window wall dated June to August, 1996.

4.6 Historical Use Information

Information pertaining to historical uses of the Subject Property, adjoining properties, and surrounding area was obtained from the following sources: aerial photographs, historical topographic maps, historical Sanborn Maps and city directories. These resources were obtained from Environmental Data Resources (EDR).

ACC reviewed historical aerial photographs dated 1939, 1946, 1950, 1958, 1974, 1982, 1993, 1998, 2005, 2009, 2012, 2016, and 2020. A copy of the Historical Aerial Photographs is provided in Appendix D.

ACC reviewed historical topographic maps dated 1959, 1968, 1973, 1980, 1995, 1996, 1997, 2012, 2015, 2018, and 2021. A copy of the Historical Topographic Maps is provided in Appendix E.

Historical Sanborn Maps (fire insurance maps) are detailed scaled drawings that show the location and use of building structures that have occupied a given area from as early as the late 1800s. These maps can provide information that is unavailable from other sources regarding the development and use of a given property. ACC reviewed historical Sanborn maps dated 1894, 1903, 1911, 1929, 1950, and 1980. Historical Sanborn Maps are provided in Appendix F.

Historical city directories were provided by Cole Information Systems, P.L. Polk & Co, Pacific Telephone, Pacific Bell, and Haines Company, Inc. Directories were reviewed for available data from the years 1920 to 2020. The Subject Property address reviewed included [Addresses]. A copy of the Historical City Directories is provided in Appendix G.

4.6.1 Historical Use Information on the Subject Property and Adjacent Properties

Pertinent observations from the historical resources in relation to the Subject Property and the immediately adjacent properties is as follows:

<u>Subject Property</u>

Circa 1894 to 1903	According to historical references reviewed, the Subject Property appears undeveloped.
Circa 1911	According to historical references reviewed, the Subject Property appears developed with five dwellings to the north and east, two storefronts to the southwest, and an office building to the south.

Circa 1929 to 1982	According to historical references reviewed, the Subject Property appears developed as a drugstore to the southwest, four storefronts to the west, two multi-family dwellings to the north, and a dry cleaning facility with associated office to the east. Dry cleaning machinery appears to be located to the center and northeast of the Subject Property.
1998 to 2020	According to historical references reviewed, the former structures were demolished and the existing commercial and office building to the southwest and parking lot to the north and east was constructed. Occupants during this time include: Albany Dry Cleaners (1920), Virginia Grocery and Fruit Market (1925 to 1945), Cooley Lawrence Grocery (1933), Blanchard Aug D Eva M clo CLNR (1943), Grocery (1943), Spronken Realty (1962), Virginia Dry Cleaners (1920 to 1970), Craft Collage (1975), Art Kapoor Realty Co (1975 to 1980), Main Plant (1980), Shoes (1986), Zazu & Violets (1995), Camps and Cottages (2000), Quilt and Textile Repair (2006), private residences (1920 to 2000), AAA Liberty Lock & Door Check (2014), and Poulet (1980 to 2020).

1600-1625 Shattuck Avenue, Adjacent Property to the North

Circa 1894 to 1958	According to historical references reviewed, the area to the north of the Subject Property appears developed with two dwellings to the north and undeveloped land to the south.
Circa 1963 to 2020	According to historical references reviewed, the area to the north of the Subject Property appears developed with the existing commercial office building. Occupants during this time include: private residences (1920 to 1955), Busk House For Men Students (1950), Health Training Center (1980), Brown S K Construction Co (1980), Cal-OSHA (1984 to 1986), Human Populations Laboratory (2005), California Department of Health Services (2005), Licensing & Certification OFC State (2005), Solar Millennium (2010), Charles Weitzer & Associates Inc (2010), Linda Moodbell Learning Prcsss (2005 to 2014), Pacific Union (2010 to 2014), Design Community & Environment (2010 to 2017), Shazmad Group (2017), Econ One (2017), Quilt & Textile Repair (2010 to 2020), Vitality Bowls (2020), Placeworks (2020), Compass Real Estate (2020), and berkeleyhomes.com (2020).

Virginia Street followed by 1709 Shattuck Avenue, Adjacent Property to the South

Circa 1894 to 1911	According to historical references reviewed, the area to the south of the Subject Property is undeveloped.
Circa 1929 to 1950	According to historical references reviewed, the area to the south of the Subject Property appears developed as multiple dwellings to the east and west with a central driveway.
Circa 1980 to 2020	According to historical references reviewed, the area to the south of the Subject Property appears developed with the existing 84-unit apartment complex. Occupants during this time include: private residences (1970 to 2020).

1640-1650 Walnut Street, Adjacent Properties to the East

Circa 1894	According to historical references reviewed, the area to the east of the Subject Property is undeveloped.
Circa 1903	According to historical references reviewed, the area to the east of the Subject Property appears developed as three dwellings with undeveloped land to the north.
Circa 1911 to 1980	According to historical references reviewed, the area to the east of the Subject Property appears developed with the existing two dwellings, one of which operates as a doctor's office, to the east and a single dwelling to the west.
Circa 2005 to 2020	According to historical references reviewed, the area to the east of the Subject Property is developed the existing doctor's office and dwelling to the east and parking lot to the west. Occupants during this time include: Rogerson Aleg G Berkeley Pediatric Group Bereley, Payne Jeannette A MD Berkeley Pediatric Group, Ornduff WM W MD Berkeley Pediatric Group, Jennings Percy Hall MD Pediatric Group, Bruyn Henry B MD Berkeley Pediatric Group Berkeley (1955), Boynton Ragina C MD Berkeley Pediatric Medical Group, and Berkeley Pediatric Medical Group (1986).

1668, 1680, 1688, 1690 Shattuck Avenue, Adjacent Properties to the West

Circa 1894 to 1911	According to historical references reviewed, the area to the west of the Subject Property is undeveloped.

Circa 1929	According to historical references reviewed, the area to the west of Subject Property appears developed with at least three storefront buildings to the south, undeveloped land to the center, and a printing shop to the north.
Circa 1950 to 1982	According to historical references reviewed, the area to the west of the Subject Property appears developed with a commercial building to the south, and several commercial storefronts to the north with a central driveway providing access to parking to the west.
Circa 1993 to 2020	According to historical references reviewed, the area to the west of the Subject Property appears developed with the existing commercial storefront buildings with parking to the west. Occupants during this time include: Barber Berkeley (1933 to 1943), New York Fur Co (1950 to 1955), Toombs Byron Farmers Insurance (1970 to 1975), Little Gallery Berkeley (1970 to 1975) Yangtze River Restaurant (1980 to 2000), private residences (1962 to 2006), Berkeley Florist (1991 to 2010), Midland Productions (1996 to 2014), Kochan & Stephenson (2014 to 2020). Occupants for 1690 Shattuck include: Bakery (1928 to 1943), Virginia Bakery (1962 to 2017), Virginia Cleaners (1980 to 1991), and Cupcakin Bake Shop (2020).

4.7 Historical Summary for Subject Property

The earliest record reviewed during this assessment was a 1894 historical Sanborn map depicting the Subject Property as undeveloped land.

By 1911, the Subject Property appears developed with five dwellings to the north and east, two storefronts to the southwest, and an office building to the south.

By 1929, the Subject Property appears developed as a drugstore to the southwest, four storefronts to the west, two multi-family dwellings to the north, and a dry cleaning facility with associated office to the east. Dry cleaning machinery appears to be located to the center and northeast of the Subject Property.

Circa 1982 all former structures were demolished and the current two-story commercial building with parking lot was constructed.

Historical Subject Property occupants include: Albany Dry Cleaners (1920), Virginia Grocery and Fruit Market (1925 to 1945), Cooley Lawrence Grocery (1933), Blanchard Aug D Eva M clo CLNR (1943), Grocery (1943), Spronken Realty (1962), Virginia Dry Cleaners (1920 to 1970), Craft Collage (1975), Art Kapoor Realty Co (1975 to 1980), Main Plant (1980), Shoes (1986), Zazu & Violets (1995), Camps and Cottages (2000), Quilt and Textile Repair (2006), private residences (1920 to 2000), AAA Liberty Lock & Door Check (2014), and Poulet (1980 to 2020).

4.8 Historical Summary for Adjacent and Surrounding Properties

Based on historical records reviewed, the adjacent and surrounding area was developed land dating back to the early 1900s. By 1929, the area was mixed-use with residential and commercial land. Current/former dry cleaning facilities and historic auto repair shops existed to the west, across Shattuck Avenue, and are not considered an environmental concern based on the down and cross/down gradient settings. Surrounding properties to the north, east, and south are not indicative of RECs.

4.9 Vapor Intrusion

In accordance with the ASTM E2600 Standard, ACC assessed the Subject Property for a potential vapor encroachment condition (VEC). A vapor encroachment condition is defined by ASTM E 2600 as "the presence or likely presence of chemical(s) of concern (COC) vapors in the vadose zone of the Target Property caused by the release of vapors from contaminated soil and/or groundwater either on or near the Target Property."

Historical data indicate that Stoddard solvent utilized by the historic on-site dry cleaner contained volatile organic compounds (VOCs) including benzene, toluene, ethylbenzene, and xylenes (BTEX). BTEX was reportedly detected in soil vapor at the Site at respective concentrations of 6.3, 8.9, 14, and 43 parts per million (ppm). When converted to micrograms per cubic meter, the concentration for benzene significantly exceeds the current San Francisco Regional Water Quality Control Board (SF RWQCB) screening levels for vapor intrusion (Appendix H).

Based on available data ACC concludes that post-excavation soil vapor confirmation sampling was not conducted, and that potential residual soil vapor concentrations cannot be compared to current regulatory screening levels. It is ACC's opinion that a VEC at the Subject Property cannot be ruled out at this time, particularly with regard to redevelopment of the Site as residential.

4.10 Radon

The Subject Property is located in an area designated as having a moderate potential for indoor radon measurements above the USEPA recommended action level of 4 picocuries per liter of air (pCi/L).

5.0 PHYSICAL SETTINGS

The Subject Property is approximately 241 feet above mean sea level according to the U.S. Geological Survey (USGS) Richmond 7.5 Minute Quadrangle topographic map, 2021. The topography at the Subject Property is relatively flat with surrounding topography generally sloping towards the southwest.

Based on the Subsurface Investigation Report for the Subsurface Investigation Report located approximately 500 feet southwest of the Subject Property 1752 Shattuck Avenue and dated February 20, 2023, soils at the site consist of silty sand and gravel in various forms to a maximum depth of 13 ft bgs.

Groundwater was encountered between approximately 9.5 to 10 feet bgs. Based on topographic gradient, groundwater was presumed to flow in the southwest direction toward the San Francisco Bay. Subsurface conditions are anticipated to be similar at the Subject Property but may vary.

6.0 SITE RECONNAISSANCE

On November 29, 2023 ACC representative Davis Leach conducted a site reconnaissance at the Subject Property. Mr. Art Kapoor, Subject Property Owner, provided site access.

6.1 Methodology

The Subject Property was viewed from all adjacent public thoroughfares and was observed to the extent not obstructed by bodies of water, adjacent buildings, and/or other obstacles such as overgrown vegetation. Accessible interior and exterior common areas were viewed. Special attention was given to hazardous materials storage/use areas and potential conduits to the subsurface such as drains and sumps.

6.2 General Site Setting

The Subject Property is developed with a two-story multi-unit commercial building to the southwest, an unpaved parking lot to the north and east of the building, and the additional paved parking lot to the north. The main entrances to the building are located along the southern and western portions of the building. Additional entrances are located along the eastern portion. Exterior staircases are located along the eastern and western portions of the building and provide access to the upstairs office spaces. Access to the Subject Property is along Shattuck Avenue to the west.

6.3 General description of Vicinity, Adjacent Properties and Observed Current/Past Usage

The vicinity of the Subject Property consists of commercial and residential properties. The

adjacent properties as viewed during the site reconnaissance are as follows:

North - Commercial Building, 1600-1625 Shattuck Avenue
South - Multi-unit Residential Building, 1709 Shattuck Avenue
East - Medical Office, 1640-1650 Walnut Street
West - Commercial Buildings, 1668-1690 Shattuck Avenue

6.4 Summary of Site Visit Observations

The Subject Property is currently occupied by Going Places Travel Agency and used as an office space. Additional units throughout the Subject Property are vacant or storage areas.

The second floor of the Subject Property consists of office spaces, storage areas, restroom, and meeting rooms.

The first floor of the Subject Property consists of a former restaurant, a travel agency office, and a storage space for after school programs. The travel agency office was inaccessible during the site reconnaissance. The former restaurant consisted of a service area, kitchen, walk-in cooler, and an grease-water separator. A floor drain was identified in the back areas of the kitchen to the east. The storage area to the north consisted of shelving and various supplies for after school programs for children.

The parking lot to the north and east consisted of unpaved gravel and parking. A groundwater monitoring well was identified in the parking lot to the north of the building. Conversations with Mr. Art Kapoor informed ACC that previous excavation occurred to the northeast of the parking lot.

No visual evidence of environmentally concerning conditions was observed on the Subject Property or adjoining properties during the site reconnaissance.

No evidence of current underground/aboveground storage tanks, significant hazardous materials storage, PCB use, or environmental violations associated with the Subject Property were observed during the site reconnaissance that are considered indicative of RECs. A checklist describing Subject Property observations is attached in Appendix H.

7.0 FINDINGS & OPINIONS

ACC has performed a Phase I ESA in general conformance with the scope and limitations of the ASTM E1527-21 Standard and the All Appropriate Inquiry Final Rule 40 CFR Part 312 for the property identified as [Address], California (Subject Property). Exceptions to, or deletions from, this practice are described in Section 1.4.

This assessment has revealed evidence of a Controlled Recognized Environmental Condition (CREC) at the Subject Property.

CREC - Stoddard Solvent Release: The Site was developed as a dry cleaning facility from approximately 1920 to 1970 that utilized Stoddard solvent. A 5,000-gallon underground storage tank used to store Stoddard solvent was removed during July 1987. Impacts to soil, groundwater, and soil vapor were documented and remediated under the oversight of the California Department of Toxic Substances Control (DTSC). Case closure was granted by the DTSC during 1987 and by the San Francisco Regional Water Quality Control Board (SFRWQCB) during 1999.

Although case closure was granted, ACC considers the case to be a CREC since there is no documentation that the release was cleaned up to regulatory standards for residential properties. There is a high potential that Berkeley Toxics Division and the Alameda County Department of Environmental Health will require additional assessment prior to redevelopment of the Subject Property as residential.

Historical data indicate that Stoddard solvent utilized by the historic on-site dry cleaner contained volatile organic compounds (VOCs) including benzene, toluene, ethylbenzene, and xylenes (BTEX). BTEX was reportedly detected in soil vapor at the Site at respective concentrations of 6.3, 8.9, 14, and 43 parts per million (ppm). When converted to micrograms per cubic meter, the concentration for benzene significantly exceeds the current SF RWQCB screening levels for vapor intrusion (Appendix H).

Based on available data ACC concludes that post-excavation soil vapor confirmation sampling was not conducted, and that potential residual soil vapor concentrations cannot be compared to current regulatory screening levels. It is ACC's opinion that a vapor intrusion condition (VEC) at the Subject Property cannot be ruled out at this time, particularly with regard to redevelopment of the Site as residential.

8.0 SIGNATURE OF ENVIRONMENTAL PROFESSIONAL

The site reconnaissance and interviews were conducted by ACC's technical staff, who was also responsible for obtaining and reviewing historical use documentation, interpreting data, identifying RECs, HRECs, CRECs, BERs, and preparation of this Phase I ESA Report. All of the activities were performed in conjunction with and under the supervision or responsible charge of, Ms. Kimberly Bunting, the environmental professional assigned to this project.

I certify that I possess sufficient education, training, and relevant experience necessary to conduct the investigative and interpretive activities presented in the paragraph above in accordance with the ASTM E1527-21 Standard and possess the ability to identify issues relevant to RECs in connection with the Subject Property.

Prepared by: _____

ACC Environmental Consultants, Inc.
Davis Leach
Environmental Technician

I declare that to the best of my professional knowledge and belief, I meet the definition of an Environmental Professional as defined in §312.10 of 40 CFR Part 312 and I have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the Subject Property. I have developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

User Questionnaire

Phase I Environmental Site Assessment User Questionnaire

Please answer the following questions to the extent possible and return via email to isutherland@accenv.com.
Please provide a copy of the Title Report.

Name:	ARTHUR KAPOOR
Title:	PROPERTY MANAGER/OWNER'S REPRESENTATIVE
Phone Number:	510 604 0271
Email Address:	accadev1653@gmail.com
Signature:	
Date:	11/16/2023

How long have you been associated with the property:

SINCE 1991

Please list all current and known historical address(s) and Assessor Parcel Number(s) for which this Phase I ESA is being performed (attach maps or documentations if available):

2100 VIRGINIA AND 1675 - 1685 SHATTUCK

Please list the acreage of the parcel(s), square footage and age(s) of on-site structures:

APPROX LOT SIZE 22000 SF

CURRENT BUILDING, APPROX 5000 SF

Purpose for which Phase I ESA is being performed, if for a real estate transaction, please list type of transaction (sale, purchase, lease, etc.)

DEVELOPMENT OF SITE

Please list all parties who will rely on the Phase I ESA:

#HIGHLAND COMMONWEALTH ASSOCIATES, LP

How do you intend to use the property (if you plan to redevelop please discuss development plans and whether on-site soils will be disturbed/excavated):

APPROX 100 + UNIT APARTMENT BUILDINGS
SOILS WILL BE EXCAVATED / DISTURBED AS NEEDED

Please provide the property owner or owner representative, including telephone number and/or email address (the owner will be identified in the Phase I ESA and may be interviewed by ACC as warranted and if available):

ARTHUR KAPOOR
510 604 0271
accadevilss@gmail.com

Please provide the lender, and any lender-specific requirements:

N/A

Please provide a site contact, including telephone number and/or email address for purposed of scheduling the site visit:

Please list the current tenant(s), site use(s), and years of occupancy:

EDUCATION UNLIMITED - OFFICES
CALIF PUBLIC HEALTH FOUNDATION - OFFICES
GOING PLACES TRAVEL

Who provides gas, electric, water, and sewer services:

Did a search of recorded land titles identify (or are you aware of) any environmental liens filed or recorded against the property under federal, tribal, state, or local law? If yes, please explain.

NO SEARCH PERFORMED BUT I AM NOT
AWARE OF ANY ENVIRONMENTAL LIENS

Did a search of recorded land titles identify (or are you aware of) any Activity and Use Limitations [AULs], such as engineering controls, land use restrictions, or institutional controls that are in place at the property and/or have been filed or recorded against the proeprty under federal, tribal, state, or local law? If yes, please explain.

NONE THAT I KNOW OF

Do you have any specialized knowledge or experience related to the property or nearby properties?

YES

Does the purchase price being paid for this property (if applicable) reflect fair market value of the property? If you conclude that there is a difference have you considered whether the lower purchase price is because contamination is known or blieved to be present at the property?

FMV

Are you aware of commonly known or reasonably ascertainable information about the property that would help the environmental professional to identify conditions indicative of release or threatened releases, for example:

Do you know the past uses of the property?

SOMEWHAT. FORMER SITE OF VIRGINIA CLEANERS

Do you know of specific chemicals that are present or once were present at the property? If yes, are Safety Data Sheets (SDS) available? PRIOR TO 1981 (EARLY SC'S) I WAS TOLD THE PROPERTY HAD A TANK WITH STODDARD'S SOLVENT

Do you know of spills or other chemical releases that have taken place at the property?

I WAS TOLD TANK DESCRIBED ABOVE WAS LEAKING

Do you know of any environmental clean ups that have taken place at the property? I WAS TOLD TANK AND ASSOCIATED SOIL WAS REMOVED

Other?

Based on your knowledge and experience related to the property, are there any obvious indicators that point to the presence or likely presence of contamination at the property?

NOT KNOWN

Are you aware of any of the following documents prepared for the property:	Yes	No	Date(s)
Environmental Site Assessment		X	
Subsurface Soil/Groundwater Investigation		X

PRELIMINARY REPORT

In response to the application for a policy of title insurance referenced herein, ***Fidelity National Title Company*** *hereby reports that it is prepared to issue, or cause to be issued, as of the date hereof, a policy or policies of title insurance describing the land and the estate or interest therein hereinafter set forth, insuring against loss which may be sustained by reason of any defect, lien or encumbrance not shown or referred to as an exception herein or not excluded from coverage pursuant to the printed Schedules, Conditions and Stipulations or Conditions of said policy forms.*

The printed Exceptions and Exclusions from the coverage and Limitations on Covered Risks of said policy or policies are set forth in Attachment One. The policy to be issued may contain an arbitration clause. When the Amount of Insurance is less than that set forth in the arbitration clause, all arbitrable matters shall be arbitrated at the option of either the Company or the Insured as the exclusive remedy of the parties. Limitations on Covered Risks applicable to the CLTA and ALTA Homeowner's Policies of Title Insurance which establish a Deductible Amount and a Maximum Dollar Limit of Liability for certain coverages are also set forth in Attachment One. Copies of the policy forms should be read. They are available from the office which issued this report.

This report (and any supplements or amendments hereto) is issued solely for the purpose of facilitating the issuance of a policy of title insurance and no liability is assumed hereby. If it is desired that liability be assumed prior to the issuance of a policy of title insurance, a Binder or Commitment should be requested.

The policy(s) of title insurance to be issued hereunder will be policy(s) of Fidelity National Title Insurance Company, a Florida Corporation.

Please read the exceptions shown or referred to herein and the exceptions and exclusions set forth in Attachment One of this report carefully. The exceptions and exclusions are meant to provide you with notice of matters which are not covered under the terms of the title insurance policy and should be carefully considered.

It is important to note that this preliminary report is not a written representation as to the condition of title and may not list all liens, defects and encumbrances affecting title to the land.

PRELIMINARY REPORT

EFFECTIVE DATE: **October 18, 2023 at 7:30 a.m.**

ORDER NO.: 013-30110437-KD0

The form of policy or policies of title insurance contemplated by this report is:

ALTA Extended Owner's Policy (7-1-21)
ALTA Extended Loan Policy (7-1-21)

1. THE ESTATE OR INTEREST IN THE LAND HEREINAFTER DESCRIBED OR REFERRED TO COVERED BY THIS REPORT IS:

   A Fee

2. TITLE TO SAID ESTATE OR INTEREST AT THE DATE HEREOF IS VESTED IN:

   American Commonwealth Associates, a limited partnership

3. THE LAND REFERRED TO IN THIS REPORT IS DESCRIBED AS FOLLOWS:

   See Exhibit A attached hereto and made a part hereof.

EXHIBIT A

LEGAL DESCRIPTION

THE LAND REFERRED TO HEREIN BELOW IS SITUATED IN THE CITY OF BERKELEY IN THE COUNTY OF ALAMEDA, STATE OF CALIFORNIA, AND IS DESCRIBED AS FOLLOWS:

PARCEL 1:

Beginning at a point on the Eastern line of Shattuck Avenue, as the line of said avenue now exists, 50 feet Northerly from the Northern line of Virginia Street; running thence Northerly along said Eastern line of Shattuck Avenue to the Southern line of Lot No. 6 in Block "C", as said lot and block are shown on the map hereinafter referred to; thence at right angles Easterly to the Western line of land conveyed to M. S. Carnall by deed of record in Book 860 of Deeds, Page 116; thence Southerly along said last named line and along the Western boundary line of land conveyed to E. N. Prouty by deed of record in Book 826 of Deeds, Page 362, to a line drawn Easterly at right angles to Shattuck Avenue through the point of beginning; thence Westerly along said last named line to the point of beginning.

Being a portion of Lots Nos. 1, 2, and 3, in Block "C", as said lots and block are delineated and so designated upon that certain map entitled, Plat of the Percy Tract, filed April 27, 1882, in Book 7 of Maps, Page 52, Alameda County Records.

PARCEL 2:

Beginning at the point of intersection of the Northern line of Virginia Street with the Eastern line of Shattuck Avenue, as the line of said avenue now exists; and running thence Northerly along said line of Shattuck Avenue 50 feet; thence at right angles Easterly 115 feet, more or less, to the Western line of land conveyed by York and Whitworth to E. N. Prouty by deed dated April 15, 1902 and recorded in Book 826 of Deeds, Page 362; thence Southerly along said last named line to the Northern line of Virginia Street; thence Westerly along said last named line to the point of beginning.

Being a portion of Lots Nos. 1, 2, and 3 in Block "C", as said lots and block are delineated and so designated upon that certain map entitled, Plat of the Percy Tract, filed April 27, 1882, in Book 7 of Maps, Page 52, Alameda County Records.

PARCEL 3:

Lot 6 in Block "C", as said lot and block are shown on the Plat of the Percy Tract, filed April 27, 1882 in Book 7 of Maps, Page 52, Alameda County Records.

Excepting therefrom, the Western 30 feet thereof which lies within the lines of Shattuck Avenue, as the same now exists, as described in the deed from Waldo M. York to the Town of Berkeley, dated October 27, 1884, recorded July 13, 1885 in Book 286 of Deeds, at Page 418, Alameda County Records.

APN: **058-2178-018-00**

EXCEPTIONS

AT THE DATE HEREOF, ITEMS TO BE CONSIDERED AND EXCEPTIONS TO COVERAGE IN ADDITION TO THE PRINTED EXCEPTIONS AND EXCLUSIONS IN SAID POLICY FORM WOULD BE AS FOLLOWS:

1. Property taxes, which are a lien not yet due and payable, including any assessments collected with taxes to be levied for the fiscal year 2024-2025.

   Prior to close of escrow, please contact the Tax Collector's Office to confirm all amounts owing, including current fiscal year taxes, supplemental taxes, escaped assessments and any delinquencies.

2. The lien of supplemental or escaped assessments of property taxes, if any, made pursuant to the provisions of Chapter 3.5 (commencing with Section 75) or Part 2, Chapter 3, Articles 3 and 4, respectively, of the Revenue and Taxation Code of the State of California as a result of the transfer of title to the vestee named in Schedule A or as a result of changes in ownership or new construction occurring prior to Date of Policy.

3. Water rights, claims or title to water, whether or not disclosed by the public records.

4. The search did not disclose any open mortgages or deeds of trust of record, therefore the Company reserves the right to require further evidence to confirm that the property is unencumbered, and further reserves the right to make additional requirements or add additional items or exceptions upon receipt of the requested evidence.

5. Any rights of the parties in possession of a portion of, or all of, said Land, which rights are not disclosed by the public records.

   The Company will require, for review, a full and complete copy of any unrecorded agreement, contract, license and/or lease, together with all supplements, assignments and amendments thereto, before issuing any policy of title insurance without excepting this item from coverage.

   The Company reserves the right to except additional items and/or make additional requirements after reviewing said documents.

6. Matters which may be disclosed by an inspection and/or by a correct ALTA/NSPS Land Title Survey of said Land that is satisfactory to the Company, and/or by inquiry of the parties in possession thereof.

7. The Company will require the following documents for review prior to the issuance of any title insurance predicated upon a conveyance or encumbrance from the limited partnership named below:

   Name: American Commonwealth Associates, a limited partnership

   a) A complete copy of the limited partnership agreement and all amendments thereto.

   b) Satisfactory evidence that the partnership was validly formed and is in good standing.

   The Company reserves the right to add additional items or make further requirements after review of the requested documentation.

8. The Company will require that an Owner’s Affidavit be completed by the party(s) named below before the issuance of any policy of title insurance.

   Party(s): American Commonwealth Associates, a limited partnership

   The Company reserves the right to add additional items or make further requirements after review of the requested Affidavit.

EXCEPTIONS
(Continued)

9. The transaction contemplated in connection with this Report is subject to the review and approval of the Company's Corporate Underwriting Department. The Company reserves the right to add additional items or make further requirements after such review.

END OF EXCEPTIONS

NOTES

1. Note: The Company is not aware of any matters which would cause it to decline to attach CLTA Endorsement Form 116 indicating that there is located on said Land a Commercial Property, known as 2109 Virginia Street, Berkeley, CA, to an Extended Coverage Loan Policy.

2. Note: The name(s) of the proposed insured(s) furnished with this application for title insurance is/are:

   Name(s) furnished: Panoramic Interests

   If these name(s) are incorrect, incomplete or misspelled, please notify the Company.

3. Note: There are NO conveyances affecting said Land recorded within 24 months of the date of this report.

4. Note: Property taxes for the fiscal year shown below are PAID. For proration purposes the amounts were:

Tax Identification No.:	058-2178-018-00
Fiscal Year:	2023-2024
1st Installment:	$14,701.97
2nd Installment:	$14,701.97
Land:	$362,137.00
Improvements:	$123,837.00
Code Area:	13-000
Bill No.:	14716200

5. Effective January 1, 2023, as mandated through local ordinance, the transfer tax rates are as follows:

Full Value of Real Property Conveyed	Transfer Tax Rate
$1,800,000 and less	1.5%
$1,800,001 and above	2.5%

   NOTE: These rates are for documents recorded on or after January 1, 2023, regardless of when the instrument was executed.

6. Note: The charge for a policy of title insurance, when issued through this title order, will be based on the Basic Title Insurance Rate.

7. Notice: Please be aware that due to the conflict between federal and state laws concerning the cultivation, distribution, manufacture or sale of marijuana, the Company is not able to close or insure any transaction involving Land that is associated with these activities.

8. The application for title insurance was placed by reference to only a street address or tax identification number. The proposed Insured must confirm that the legal description in this report covers the parcel(s) of Land requested to be insured. If the legal description is incorrect, the proposed Insured must notify the Company and/or the settlement company in order to prevent errors and to be certain that the legal description for the intended parcel(s) of Land will appear on any documents to be recorded in connection with this transaction and on the policy of title insurance.

9. Note: If a county recorder, title insurance company, escrow company, real estate broker, real estate agent or association provides a copy of a declaration, governing document or deed to any person, California law requires that the document provided shall include a statement regarding any unlawful restrictions. Said statement is to be in at least 14-point bold face type and may be stamped on the first page of any document provided or included as a cover page attached to the requested document. Should a party to this transaction request a copy of any document reported herein that fits this category, the statement is to be included in the manner described.

NOTES
(Continued)

10. Note: Any documents being executed in conjunction with this transaction must be signed in the presence of an authorized Company employee, an authorized employee of a Company agent, an authorized employee of the insured lender, or by using Bancserv or other Company-approved third-party service. If the above requirement cannot be met, please call the Company at the number provided in this report.

11. Pursuant to Government Code Section 27388.1, as amended and effective as of 1-1-2018, a Documentary Transfer Tax (DTT) Affidavit may be required to be completed and submitted with each document when DTT is being paid or when an exemption is being claimed from paying the tax. If a governmental agency is a party to the document, the form will not be required. DTT Affidavits may be available at a Tax Assessor-County Clerk-Recorder.

12. Note: The policy of title insurance will include an arbitration provision. The Company or the insured may demand arbitration. Arbitrable matters may include, but are not limited to, any controversy or claim between the Company and the insured arising out of or relating to this policy, any service of the Company in connection with its issuance or the breach of a policy provision or other obligation. Please ask your escrow or title officer for a sample copy of the policy to be issued if you wish to review the arbitration provisions and any other provisions pertaining to your Title Insurance coverage.

13. Due to the special requirements of SB 50 (California Public Resources Code Section 8560 et seq.), any transaction that includes the conveyance of title by an agency of the United States must be approved in advance by the Company's State Counsel, Regional Counsel, or one of their designees.

END OF NOTES

Kevin Davis/667

WIRE SAFE™ | Inquire before you wire!

Wire Fraud Alert

This Notice is not intended to provide legal or professional advice. If you have any questions, please consult with a lawyer.

All parties to a real estate transaction are targets for wire fraud and many have lost hundreds of thousands of dollars because they simply relied on the wire instructions received via email, without further verification. **If funds are to be wired in conjunction with this real estate transaction, we strongly recommend verbal verification of wire instructions through a known, trusted phone number prior to sending funds.**

In addition, the following non-exclusive self-protection strategies are recommended to minimize exposure to possible wire fraud.

- **NEVER RELY** on emails purporting to change wire instructions. Parties to a transaction rarely change wire instructions in the course of a transaction.
- **ALWAYS VERIFY** wire instructions, specifically the ABA routing number and account number, by calling the party who sent the instructions to you. DO NOT use the phone number provided in the email containing the instructions, use phone numbers you have called before or can otherwise verify. **Obtain the phone number of relevant parties to the transaction as soon as an escrow account is opened**. DO NOT send an email to verify as the email address may be incorrect or the email may be intercepted by the fraudster.
- **USE COMPLEX EMAIL PASSWORDS** that employ a combination of mixed case, numbers, and symbols. Make your passwords greater than eight (8) characters. Also, change your password often and do NOT reuse the same password for other online accounts.
- **USE MULTI-FACTOR AUTHENTICATION** for email accounts. Your email provider or IT staff may have specific instructions on how to implement this feature.

For more information on wire-fraud scams or to report an incident, please refer to the following links:

Notice of Available Discounts

Pursuant to Section 2355.3 in Title 10 of the California Code of Regulations Fidelity National Financial, Inc. and its subsidiaries ("FNF") must deliver a notice of each discount available under our current rate filing along with the delivery of escrow instructions, a preliminary report or commitment. Please be aware that the provision of this notice does not constitute a waiver of the consumer's right to be charged the filed rate. As such, your transaction may not qualify for the below discounts.

You are encouraged to discuss the applicability of one or more of the below discounts with a Company representative. These discounts are generally described below; consult the rate manual for a full description of the terms, conditions and requirements for such discount. These discounts only apply to transactions involving services rendered by the FNF Family of Companies. This notice only applies to transactions involving property improved with a one-to-four family residential dwelling.

Not all discounts are offered by every FNF Company. The discount will only be applicable to the FNF Company as indicated by the named discount.

STANDARD COVERAGE POLICY – 1990 (11-09-18)

EXCLUSIONS FROM COVERAGE

The following matters are expressly excluded from the coverage of this policy and the Company will not pay loss or damage, costs, attorneys' fees or expenses which arise by reason of:

1. (a) Any law, ordinance or governmental regulation (including but not limited to building or zoning laws, ordinances, or regulations) restricting, regulating, prohibiting or relating (i) the occupancy, use, or enjoyment of the land; (ii) the character, dimensions or location of any improvement now or hereafter erected on the land; (iii) a separation in ownership or a change in the dimensions or area of the land or any parcel of which the land is or was a part; or (iv) environmental protection, or the effect of any violation of these laws, ordinances or governmental regulations, except to the extent that a notice of the enforcement thereof or a notice of a defect, lien, or encumbrance resulting from a violation or alleged violation affecting the land has been recorded in the public records at Date of Policy.
   (b) Any governmental police power not excluded by (a) above, except to the extent that a notice of the exercise thereof or notice of a defect, lien or encumbrance resulting from a violation or alleged violation affecting the land has been recorded in the public records at Date of Policy.
2. Rights of eminent domain unless notice of the exercise thereof has been recorded in the public records at Date of Policy, but not excluding from coverage any taking which has occurred prior to Date of Policy which would be binding on the rights of a purchaser for value without knowledge.
3. Defects, liens, encumbrances, adverse claims or other matters:
   (a) whether or not recorded in the public records at Date of Policy, but created, suffered, assumed or agreed to by the insured claimant;
   (b) not known to the Company, not recorded in the public records at Date of Policy, but known to the insured claimant and not disclosed in writing to the Company by the insured claimant prior to the date the insured claimant became an insured under this policy;
   (c) resulting in no loss or damage to the insured claimant;
   (d) attaching or created subsequent to Date of Policy; or
   (e) resulting in loss or damage which would not have been sustained if the insured claimant had paid value for the insured mortgage or for the estate or interest insured by this policy.
4. Unenforceability of the lien of the insured mortgage because of the inability or failure of the insured at Date of Policy, or the inability or failure of any subsequent owner of the indebtedness, to comply with the applicable doing business laws of the state in which the land is situated.
5. Invalidity or unenforceability of the lien of the insured mortgage, or claim thereof, which arises out of the transaction evidenced by the insured mortgage and is based upon usury or any consumer credit protection or truth in lending law.
6. Any claim, which arises out of the transaction vesting in the insured the estate of interest insured by this policy or the transaction creating the interest of the insured lender, by reason of the operation of federal bankruptcy, state insolvency or similar creditors' rights laws.

EXCEPTIONS FROM COVERAGE - SCHEDULE B, PART I

This policy does not insure against loss or damage (and the Company will not pay costs, attorneys' fees or expenses) which arise by reason of:

1. Taxes or assessments which are not shown as existing liens by the records of any taxing authority that levies taxes or assessments on real property or by the public records.
   Proceedings by a public agency which may result in taxes or assessments, or notices of such proceedings, whether or not shown by the records of such agency or by the public records.
2. Any facts, rights, interests, or claims which are not shown by the public records but which could be ascertained by an inspection of the land or which may be asserted by persons in possession thereof.
3. Easements, liens or encumbrances, or claims thereof, not shown by the public records.
4. Discrepancies, conflicts in boundary lines, shortage in area, encroachments, or any other facts which a correct survey would disclose, and which are not shown by the public records.
5. (a) Unpatented mining claims; (b) reservations or exceptions in patents or in Acts authorizing the issuance thereof; (c) water rights, claims or title to water, whether or not the matters excepted under (a), (b) or (c) are shown by the public records.
6. Any lien or right to a lien for services, labor or material unless such lien is shown by the public records at Date of Policy.

EXCEPTIONS FROM COVERAGE - SCHEDULE B, PART II
(Variable exceptions such as taxes, easements, CC&R's, etc., are inserted here)

CALIFORNIA LAND TITLE ASSOCIATION
STANDARD COVERAGE OWNER'S POLICY (02-04-22)

EXCLUSIONS FROM COVERAGE

The following matters are excluded from the coverage of this policy, and the Company will not pay loss or damage, costs, attorneys' fees, or expenses that arise by reason of:

1. a. any law, ordinance, permit, or governmental regulation (including those relating to building and zoning) that restricts, regulates, prohibits, or relates to:
      i. the occupancy, use, or enjoyment of the Land;
      ii. the character, dimensions, or location of any improvement on the Land;
      iii. the subdivision of land; or
      iv. environmental remediation or protection.
   b. any governmental forfeiture, police, regulatory, or national security power.
   c. the effect of a violation or enforcement of any matter excluded under Exclusion 1.a. or 1.b. Exclusion 1 does not modify or limit the coverage provided under Covered Risk 5 or 6.
2. Any power of eminent domain. Exclusion 2 does not modify or limit the coverage provided under Covered Risk 7.
3. Any defect, lien, encumbrance, adverse claim, or other matter:
   a. created, suffered, assumed, or agreed to by the Insured Claimant;

   b. not Known to the Company, not recorded in the Public Records at the Date of Policy, but Known to the Insured Claimant and not disclosed in writing to the Company by the Insured Claimant prior to the date the Insured Claimant became an Insured under this policy;
   c. resulting in no loss or damage to the Insured Claimant;
   d. attaching or created subsequent to the Date of Policy (Exclusion 3.d. does not modify or limit the coverage provided under Covered Risk 9 or 10); or
   e. resulting in loss or damage that would not have been sustained if consideration sufficient to qualify the Insured named in Schedule A as a bona fide purchaser had been given for the Title at the Date of Policy.
4. Any claim, by reason of the operation of federal bankruptcy, state insolvency, or similar creditors' rights law, that the transaction vesting the Title as shown in Schedule A is a:
   a. fraudulent conveyance or fraudulent transfer;
   b. voidable transfer under the Uniform Voidable Transactions Act; or
   c. preferential transfer:
      i. to the extent the instrument of transfer vesting the Title as shown in Schedule A is not a transfer made as a contemporaneous exchange for new value; or
      ii. for any other reason not stated in Covered Risk 9.b.
5. Any claim of a PACA-PSA Trust. Exclusion 5 does not modify or limit the coverage provided under Covered Risk 8.
6. Any lien on the Title for real estate taxes or assessments imposed or collected by a governmental authority that becomes due and payable after the Date of Policy. Exclusion 6 does not modify or limit the coverage provided under Covered Risk 2.b.
7. Any discrepancy in the quantity of the area, square footage, or acreage of the Land or of any improvement to the Land.

EXCEPTIONS FROM COVERAGE

Some historical land records contain Discriminatory Covenants that are illegal and unenforceable by law. This policy treats any Discriminatory Covenant in a document referenced in Schedule B as if each Discriminatory Covenant is redacted, repudiated, removed, and not republished or recirculated. Only the remaining provisions of the document are excepted from coverage.

This policy does not insure against loss or damage and the Company will not pay costs, attorneys' fees, or expenses resulting from the terms and conditions of any lease or easement identified in Schedule A, and the following matters:

PART I

1. (a) Taxes or assessments that are not shown as existing liens by the records of any taxing authority that levies taxes or assessments on real property or by the Public Records; (b) proceedings by a public agency that may result in taxes or assessments, or notices of such proceedings, whether or not shown by the records of such agency or by the Public Records.
2. Any facts, rights, interests, or claims that are not shown by the Public Records at Date of Policy but that could be (a) ascertained by an inspection of the Land, or (b) asserted by persons or parties in possession of the Land.
3. Easements, liens or encumbrances, or claims thereof, not shown by the Public Records at Date of Policy.
4. Any encroachment, encumbrance, violation, variation, easement, or adverse circumstance affecting the Title that would be disclosed by an accurate and complete land survey of the Land and not shown by the Public Records at Date of Policy.
5. (a) Unpatented mining claims; (b) reservations or exceptions in patents or in Acts authorizing the issuance thereof; (c) water rights, claims or title to water, whether or not the matters excepted under (a), (b), or (c) are shown by the Public Records.
6. Any lien or right to a lien for services, labor, material or equipment unless such lien is shown by the Public Records at Date of Policy.
7. Any claim to (a) ownership of or rights to minerals and similar substances, including but not limited to ores, metals, coal, lignite, oil, gas, uranium, clay, rock, sand, and gravel located in, on, or under the Land or produced from the Land, whether such ownership or rights arise by lease, grant, exception, conveyance, reservation, or otherwise; and (b) any rights, privileges, immunities, rights of way, and easements associated therewith or appurtenant thereto, whether or not the interests or rights excepted in (a) or (b) appear in the Public Records or are shown in Schedule B.

PART II

(Variable exceptions such as taxes, easements, CC&R's, etc., are inserted here)

CLTA/ALTA HOMEOWNER'S POLICY OF TITLE INSURANCE (07-01-2021)

EXCLUSIONS FROM COVERAGE

The following matters are excluded from the coverage of this policy and We will not pay loss or damage, costs, attorneys' fees, or expenses that arise by reason of:

1. a. any law, ordinance, permit, or governmental regulation (including those relating to building and zoning) that restricts, regulates, prohibits, or relates to:
      i. the occupancy, use, or enjoyment of the Land;
      ii. the character, dimensions, or location of any improvement on the Land;
      iii. the subdivision of land; or
      iv. environmental remediation or protection.
   b. any governmental forfeiture, police, or regulatory, or national security power.
   c. the effect of a violation or enforcement of any matter excluded under Exclusion 1.a. or 1.b. Exclusion 1 does not modify or limit the coverage provided under Covered Risk 8.a., 14, 15, 16, 18, 19, 20, 23, or 27.
2. Any power to take the Land by condemnation. Exclusion 2 does not modify or limit the coverage provided under Covered Risk 17.
3. Any defect, lien, encumbrance, adverse claim, or other matter:
   a. created, suffered, assumed, or agreed to by You;
   b. not Known to Us, not recorded in the Public Records at the Date of Policy, but Known to You and not disclosed in writing to Us by You prior to the date You became an Insured under this policy;
   c. resulting in no loss or damage to You;
   d. attaching or created subsequent to the Date of Policy (Exclusion 3.d. does not modify or limit the coverage provided under Covered Risk 5, 8.f., 25, 26, 27, 28, or 32); or

e. resulting in loss or damage that would not have been sustained if You paid consideration sufficient to qualify You as a bona fide purchaser of the Title at the Date of Policy.

4. Lack of a right:
   a. to any land outside the area specifically described and referred to in Item 3 of Schedule A; and
   b. in any street, road, avenue, alley, lane, right-of-way, body of water, or waterway that abut the Land.

   Exclusion 4 does not modify or limit the coverage provided under Covered Risk 11 or 21.
5. The failure of Your existing structures, or any portion of Your existing structures, to have been constructed before, on, or after the Date of Policy in accordance with applicable building codes. Exclusion 5 does not modify or limit the coverage provided under Covered Risk 14 or 15.
6. Any claim, by reason of the operation of federal bankruptcy, state insolvency, or similar creditors' rights law, that the transfer of the Title to You is a:
   a. fraudulent conveyance or fraudulent transfer;
   b. voidable transfer under the Uniform Voidable Transactions Act; or
   c. preferential transfer:
      i. to the extent the instrument of transfer vesting the Title as shown in Schedule A is not a transfer made as a contemporaneous exchange for new value; or
      ii. for any other reason not stated in Covered Risk 30.
7. Contamination, explosion, fire, flooding, vibration, fracturing, earthquake, or subsidence.
8. Negligence by a person or an entity exercising a right to extract or develop oil, gas, minerals, groundwater, or any other subsurface substance.
9. Any lien on Your Title for real estate taxes or assessments imposed or collected by a governmental authority that becomes due and payable after the Date of Policy. Exclusion 9 does not modify or limit the coverage provided under Covered Risk 8.a. or 27.
10. Any discrepancy in the quantity of the area, square footage, or acreage of the Land or of any improvement to the Land.

LIMITATIONS ON COVERED RISKS

Your insurance for the following Covered Risks is limited on the Owner's Coverage Statement as follows:

- For Covered Risk 16, 18, 19, and 21 Your Deductible Amount and Our Maximum Dollar Limit of Liability shown in Schedule A.

The deductible amounts and maximum dollar limits shown on Schedule A are as follows:

	Your Deductible Amount	Our Maximum Dollar Limit of Liability
Covered Risk 16:	1.00% of Policy Amount Shown in Schedule A or $2,500.00 (whichever is less)	$10,000.00
Covered Risk 18:	1.00% of Policy Amount Shown in Schedule A or $5,000.00 (whichever is less)	$25,000.00
Covered Risk 19:	1.00% of Policy Amount Shown in Schedule A or $5,000.00 (whichever is less)	$25,000.00
Covered Risk 21:	1.00% of Policy Amount Shown in Schedule A or $2,500.00 (whichever is less)	$5,000.00

CLTA/ALTA HOMEOWNER'S POLICY OF TITLE INSURANCE (12-02-13)

EXCLUSIONS

In addition to the Exceptions in Schedule B, You are not insured against loss, costs, attorneys' fees, and expenses resulting from:

1. Governmental police power, and the existence or violation of those portions of any law or government regulation concerning:
   a. building;
   b. zoning;
   c. land use;
   d. improvements on the Land;
   e. land division; and
   f. environmental protection.

   This Exclusion does not limit the coverage described in Covered Risk 8.a., 14, 15, 16, 18, 19, 20, 23 or 27.
2. The failure of Your existing structures, or any part of them, to be constructed in accordance with applicable building codes. This Exclusion does not limit the coverage described in Covered Risk 14 or 15.
3. The right to take the Land by condemning it. This Exclusion does not limit the coverage described in Covered Risk 17.
4. Risks:
   a. that are created, allowed, or agreed to by You, whether or not they are recorded in the Public Records;
   b. that are Known to You at the Policy Date, but not to Us, unless they are recorded in the Public Records at the Policy Date;
   c. that result in no loss to You; or
   d. that first occur after the Policy Date - this does not limit the coverage described in Covered Risk 7, 8.e., 25, 26, 27 or 28.
5. Failure to pay value for Your Title.
6. Lack of a right:
   a. to any land outside the area specifically described and referred to in paragraph 3 of Schedule A; and
   b. in streets, alleys, or waterways that touch the Land.

   This Exclusion does not limit the coverage described in Covered Risk 11 or 21.
7. The transfer of the Title to You is invalid as a preferential transfer or as a fraudulent transfer or conveyance under federal bankruptcy, state insolvency, or similar creditors' rights laws.
8. Contamination, explosion, fire, flooding, vibration, fracturing, earthquake, or subsidence.
9. Negligence by a person or an Entity exercising a right to extract or develop minerals, water, or any other substances.

LIMITATIONS ON COVERED RISKS

Your insurance for the following Covered Risks is limited on the Owner's Coverage Statement as follows:

- For Covered Risk 16, 18, 19, and 21 Your Deductible Amount and Our Maximum Dollar Limit of Liability shown in Schedule A.

The deductible amounts and maximum dollar limits shown on Schedule A are as follows:

	Your Deductible Amount	Our Maximum Dollar Limit of Liability
Covered Risk 16:	1.00% of Policy Amount Shown in Schedule A or $2,500.00 (whichever is less)	$10,000.00

Covered Risk 18:	1.00% of Policy Amount Shown in Schedule A or $5,000.00 (whichever is less)	$25,000.00
Covered Risk 19:	1.00% of Policy Amount Shown in Schedule A or $5,000.00 (whichever is less)	$25,000.00
Covered Risk 21:	1.00% of Policy Amount Shown in Schedule A or $2,500.00 (whichever is less)	$5,000.00

ALTA OWNER'S POLICY (07-01-2021)

EXCLUSIONS FROM COVERAGE

The following matters are excluded from the coverage of this policy, and the Company will not pay loss or damage, costs, attorneys' fees, or expenses that arise by reason of:

1. a. any law, ordinance, permit, or governmental regulation (including those relating to building and zoning) that restricts, regulates, prohibits, or relates to:
   i. the occupancy, use, or enjoyment of the Land;
   ii. the character, dimensions, or location of any improvement on the Land;
   iii. the subdivision of land; or
   iv. environmental remediation or protection.
   b. any governmental forfeiture, police, regulatory, or national security power.
   c. the effect of a violation or enforcement of any matter excluded under Exclusion 1.a. or 1.b. Exclusion 1 does not modify or limit the coverage provided under Covered Risk 5 or 6.
2. Any power of eminent domain. Exclusion 2 does not modify or limit the coverage provided under Covered Risk 7.
3. Any defect, lien, encumbrance, adverse claim, or other matter:
   a. created, suffered, assumed, or agreed to by the Insured Claimant;
   b. not Known to the Company, not recorded in the Public Records at the Date of Policy, but Known to the Insured Claimant and not disclosed in writing to the Company by the Insured Claimant prior to the date the Insured Claimant became an Insured under this policy;
   c. resulting in no loss or damage to the Insured Claimant;
   d. attaching or created subsequent to the Date of Policy (Exclusion 3.d. does not modify or limit the coverage provided under Covered Risk 9 or 10); or
   e. resulting in loss or damage that would not have been sustained if consideration sufficient to qualify the Insured named in Schedule A as a bona fide purchaser had been given for the Title at the Date of Policy.
4. Any claim, by reason of the operation of federal bankruptcy, state insolvency, or similar creditors' rights law, that the transaction vesting the Title as shown in Schedule A is a:
   a. fraudulent conveyance or fraudulent transfer;
   b. voidable transfer under the Uniform Voidable Transactions Act; or
   c. preferential transfer:
      i. to the extent the instrument of transfer vesting the Title as shown in Schedule A is not a transfer made as a contemporaneous exchange for new value; or
      ii. for any other reason not stated in Covered Risk 9.b.
   5. Any claim of a PACA-PSA Trust. Exclusion 5 does not modify or limit the coverage provided under Covered Risk 8.
   6. Any lien on the Title for real estate taxes or assessments imposed or collected by a governmental authority that becomes due and payable after the Date of Policy. Exclusion 6 does not modify or limit the coverage provided under Covered Risk 2.b.
   7. Any discrepancy in the quantity of the area, square footage, or acreage of the Land or of any improvement to the Land.

EXCEPTIONS FROM COVERAGE

Some historical land records contain Discriminatory Covenants that are illegal and unenforceable by law. This policy treats any Discriminatory Covenant in a document referenced in Schedule B as if each Discriminatory Covenant is redacted, repudiated, removed, and not republished or recirculated. Only the remaining provisions of the document are excepted from coverage.

This policy does not insure against loss or damage and the Company will not pay costs, attorneys' fees, or expenses resulting from the terms and conditions of any lease or easement identified in Schedule A, and the following matters:

NOTE: The 2021 ALTA Owner's Policy may be issued to afford either Standard Coverage or Extended Coverage. In addition to variable exceptions such as taxes, easements, CC&R's, etc., the Exceptions from Coverage in a Standard Coverage policy will also include the Western Regional Standard Coverage Exceptions listed as 1 through 7 below:

1. (a) Taxes or assessments that are not shown as existing liens by the records of any taxing authority that levies taxes or assessments on real property or by the Public Records; (b) proceedings by a public agency that may result in taxes or assessments, or notices of such proceedings, whether or not shown by the records of such agency or by the Public Records.
2. Any facts, rights, interests, or claims that are not shown by the Public Records at Date of Policy but that could be (a) ascertained by an inspection of the Land or (b) asserted by persons or parties in possession of the Land.
3. Easements, liens or encumbrances, or claims thereof, not shown by the Public Records at Date of Policy.
4. Any encroachment, encumbrance, violation, variation, easement, or adverse circumstance affecting the Title that would be disclosed by an accurate and complete land survey of the Land and not shown by the Public Records at Date of Policy.
5. (a) Unpatented mining claims; (b) reservations or exceptions in patents or in Acts authorizing the issuance thereof; (c) water rights, claims or title to water, whether or not the matters excepted under (a), (b), or (c) are shown by the Public Records.
6. Any lien or right to a lien for services, labor, material or equipment unless such lien is shown by the Public Records at Date of Policy.
7. Any claim to (a) ownership of or rights to minerals and similar substances, including but not limited to ores, metals, coal, lignite, oil, gas, uranium, clay, rock, sand, and gravel located in, on, or under the Land or produced from the Land, whether such ownership or rights arise by lease, grant, exception, conveyance, reservation, or otherwise; and (b) any rights, privileges, immunities, rights of way, and easements associated therewith or appurtenant thereto, whether or not the interests or rights excepted in (a) or (b) appear in the Public Records or are shown in Schedule B

2006 ALTA OWNER'S POLICY (06-17-06)

EXCLUSIONS FROM COVERAGE

The following matters are expressly excluded from the coverage of this policy, and the Company will not pay loss or damage, costs, attorneys' fees, or expenses that arise by reason of:

1. (a) Any law, ordinance, permit, or governmental regulation (including those relating to building and zoning) restricting, regulating, prohibiting, or relating to
   (i) the occupancy, use, or enjoyment of the Land;
   (ii) the character, dimensions, or location of any improvement erected on the Land;
   (iii) the subdivision of land; or
   (iv) environmental protection;
   or the effect of any violation of these laws, ordinances, or governmental regulations. This Exclusion 1(a) does not modify or limit the coverage provided under Covered Risk 5.
   (b) Any governmental police power. This Exclusion 1(b) does not modify or limit the coverage provided under Covered Risk 6.
2. Rights of eminent domain. This Exclusion does not modify or limit the coverage provided under Covered Risk 7 or 8.
3. Defects, liens, encumbrances, adverse claims, or other matters
   (a) created, suffered, assumed, or agreed to by the Insured Claimant;
   (b) not Known to the Company, not recorded in the Public Records at Date of Policy, but Known to the Insured Claimant and not disclosed in writing to the Company by the Insured Claimant prior to the date the Insured Claimant became an Insured under this policy;
   (c) resulting in no loss or damage to the Insured Claimant;
   (d) attaching or created subsequent to Date of Policy (however, this does not modify or limit the coverage provided under Covered Risk 9 and 10); or
   (e) resulting in loss or damage that would not have been sustained if the Insured Claimant had paid value for the Title.
4. Any claim, by reason of the operation of federal bankruptcy, state insolvency, or similar creditors' rights laws, that the transaction vesting the Title as shown in Schedule A, is
   (a) a fraudulent conveyance or fraudulent transfer; or
   (b) a preferential transfer for any reason not stated in Covered Risk 9 of this policy.
5. Any lien on the Title for real estate taxes or assessments imposed by governmental authority and created or attaching between Date of Policy and the date of recording of the deed or other instrument of transfer in the Public Records that vests Title as shown in Schedule A.

EXCEPTIONS FROM COVERAGE

This policy does not insure against loss or damage, and the Company will not pay costs, attorneys' fees or expenses, that arise by reason of:

NOTE: The 2006 ALTA Owner's Policy may be issued to afford either Standard Coverage or Extended Coverage. In addition to variable exceptions such as taxes, easements, CC&R's, etc., the Exceptions from Coverage in a Standard Coverage policy will also include the Western Regional Standard Coverage Exceptions listed below as 1 through 7 below:

1. (a) Taxes or assessments that are not shown as existing liens by the records of any taxing authority that levies taxes or assessments on real property or by the Public Records; (b) proceedings by a public agency that may result in taxes or assessments, or notices of such proceedings, whether or not shown by the records of such agency or by the Public Records.
2. Any facts, rights, interests, or claims that are not shown by the Public Records at Date of Policy but that could be (a) ascertained by an inspection of the Land, or (b) asserted by persons or parties in possession of the Land.
3. Easements, liens or encumbrances, or claims thereof, not shown by the Public Records at Date of Policy.
4. Any encroachment, encumbrance, violation, variation, easement, or adverse circumstance affecting the Title that would be disclosed by an accurate and complete land survey of the Land and not shown by the Public Records at Date of Policy.
5. (a) Unpatented mining claims; (b) reservations or exceptions in patents or in Acts authorizing the issuance thereof; (c) water rights, claims or title to water, whether or not the matters excepted under (a), (b), or (c) are shown by the Public Records.
6. Any lien or right to a lien for services, labor, material or equipment unless such lien is shown by the Public Records at Date of Policy.
7. Any claim to (a) ownership of or rights to minerals and similar substances, including but not limited to ores, metals, coal, lignite, oil, gas, uranium, clay, rock, sand, and gravel located in, on, or under the Land or produced from the Land, whether such ownership or rights arise by lease, grant, exception, conveyance, reservation, or otherwise; and (b) any rights, privileges, immunities, rights of way, and easements associated therewith or appurtenant thereto, whether or not the interests or rights excepted in (a) or (b) appear in the Public Records or are shown in Schedule B.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E1527 - 21), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E2247 - 16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E1528 - 22) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

EXECUTIVE SUMMARY

TARGET PROPERTY SEARCH RESULTS

The target property was not listed in any of the databases searched by EDR.

DATABASES WITH NO MAPPED SITES

No mapped sites were found in EDR's search of available ("reasonably ascertainable ") government records either on the target property or within the search radius around the target property for the following databases:

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal NPL (Superfund) sites

NPL ---------- National Priority List
Proposed NPL ---------- Proposed National Priority List Sites
NPL LIENS ---------- Federal Superfund Liens

Lists of Federal Delisted NPL sites

Delisted NPL ---------- National Priority List Deletions

Lists of Federal sites subject to CERCLA removals and CERCLA orders

FEDERAL FACILITY ---------- Federal Facility Site Information listing
SEMS ---------- Superfund Enterprise Management System

Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE ---------- Superfund Enterprise Management System Archive

Lists of Federal RCRA TSD facilities

RCRA-TSDF ---------- RCRA - Treatment, Storage and Disposal

Lists of Federal RCRA generators

RCRA-LQG ---------- RCRA - Large Quantity Generators

Federal institutional controls / engineering controls registries

LUCIS ---------- Land Use Control Information System
US ENG CONTROLS ---------- Engineering Controls Sites List
US INST CONTROLS ---------- Institutional Controls Sites List

Federal ERNS list

ERNS ---------- Emergency Response Notification System

Lists of state and tribal landfills and solid waste disposal facilities

SWF/LF ---------- Solid Waste Information System

EXECUTIVE SUMMARY

Lists of state and tribal leaking storage tanks

INDIAN LUST ---- Leaking Underground Storage Tanks on Indian Land
Alameda County CS ---- Contaminated Sites

Lists of state and tribal registered storage tanks

FEMA UST ---- Underground Storage Tank Listing
UST ---- Active UST Facilities
INDIAN UST ---- Underground Storage Tanks on Indian Land

Lists of state and tribal voluntary cleanup sites

INDIAN VCP ---- Voluntary Cleanup Priority Listing

Lists of state and tribal brownfield sites

BROWNFIELDS ---- Considered Brownfieds Sites Listing

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS ---- A Listing of Brownfields Sites

Local Lists of Landfill / Solid Waste Disposal Sites

WMUDS/SWAT ---- Waste Management Unit Database
SWRCY ---- Recycler Database
HAULERS ---- Registered Waste Tire Haulers Listing
INDIAN ODI ---- Report on the Status of Open Dumps on Indian Lands
DEBRIS REGION 9 ---- Torres Martinez Reservation Illegal Dump Site Locations
ODI ---- Open Dump Inventory
IHS OPEN DUMPS ---- Open Dumps on Indian Land

Local Lists of Hazardous waste / Contaminated Sites

US HIST CDL ---- Delisted National Clandestine Laboratory Register
HIST Cal-Sites ---- Historical Calsites Database
SCH ---- School Property Evaluation Program
CDL ---- Clandestine Drug Labs
Toxic Pits ---- Toxic Pits Cleanup Act Sites
US CDL ---- National Clandestine Laboratory Register

Local Land Records

LIENS ---- Environmental Liens Listing
LIENS 2 ---- CERCLA Lien Information
DEED ---- Deed Restriction Listing

Records of Emergency Release Reports

HMIRS ---- Hazardous Materials Information Reporting System

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

EXECUTIVE SUMMARY

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal RCRA facilities undergoing Corrective Action

CORRACTS: CORRACTS is a list of handlers with RCRA Corrective Action Activity. This report shows which nationally-defined corrective action core events have occurred for every handler that has had corrective action activity.

A review of the CORRACTS list, as provided by EDR, and dated 07/24/2023 has revealed that there is 1 CORRACTS site within approximately 1 mile of the target property.

Lists of Federal RCRA generators

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 07/24/2023 has revealed that there are 2 RCRA-SQG sites within approximately 0.25 miles of the target property.

RCRA-VSQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

A review of the RCRA-VSQG list, as provided by EDR, and dated 07/24/2023 has revealed that there is 1

Lists of state- and tribal (Superfund) equivalent sites

RESPONSE: Identifies confirmed release sites where DTSC is involved in remediation, either in a lead or oversight capacity. These confirmed release sites are generally high-priority and high potential risk.

A review of the RESPONSE list, as provided by EDR, has revealed that there is 1 RESPONSE site within approximately 1 mile of the target property.

Lists of state- and tribal hazardous waste facilities

ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the ENVIROSTOR list, as provided by EDR, and dated 07/24/2023 has revealed that there are 3 ENVIROSTOR sites within approximately 1 mile of the target property.

EXECUTIVE SUMMARY

Local Lists of Registered Storage Tanks

SWEEPS UST: Statewide Environmental Evaluation and Planning System. This underground storage tank listing was updated and maintained by a company contacted by the SWRCB in the early 1990's. The listing is no longer updated or maintained. The local agency is the contact for more information on a site on the SWEEPS list.

A review of the SWEEPS UST list, as provided by EDR, and dated 06/01/1994 has revealed that there are 4 SWEEPS UST sites within approximately 0.25 miles of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 07/24/2023 has revealed that there are 59 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

FUSRAP: DOE established the Formerly Utilized Sites Remedial Action Program (FUSRAP) in 1974 to remediate sites where radioactive contamination remained from Manhattan Project and early U.S. Atomic Energy Commission (AEC) operations.

A review of the FUSRAP list, as provided by EDR, and dated 03/03/2023 has revealed that there is 1 FUSRAP site within approximately 1 mile of the target property.

Equal/Higher Elevation	Address	Direction / Distance	Map ID	Page
UNIVERSITY OF CALIFO	1 CYCLOTRON ROAD	E 1/2 - 1 (0.843 mi.)	AC140	1113
Site Status: Eliminated from consideration under FUSRAP. The locations where AEC work was performed are now part of Lawrence Berkeley National Laboratory (Berkeley Lab). Site ID: CA 05				

Cortese: The sites for the list are designated by the State Water Resource Control Board (LUST), the Integrated Waste Board (SWF/LS), and the Department of Toxic Substances Control (Cal-Sites).

A review of the Cortese list, as provided by EDR, and dated 06/14/2023 has revealed that there are 33 Cortese sites within approximately 0.5 miles of the target property.

DRYCLEANERS: A list of drycleaner related facilities that have EPA ID numbers. These are facilities with certain SIC codes: power laundries, family and commercial; garment pressing and cleaners' agents; linen supply; coin-operated laundries and cleaning; drycleaning plants except rugs; carpet and upholster cleaning; industrial launderers; laundry and garment services.

A review of the DRYCLEANERS list, as provided by EDR, has revealed that there is 1 DRYCLEANERS site within approximately 0.25 miles of the target property.

EXECUTIVE SUMMARY

HWP: Detailed information on permitted hazardous waste facilities and corrective action ("cleanups") tracked in EnviroStor.

A review of the HWP list, as provided by EDR, and dated 08/14/2023 has revealed that there is 1 HWP site within approximately 1 mile of the target property.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there are 5 EDR Hist Auto sites within approximately 0.125 miles of the target property.

EXECUTIVE SUMMARY

EDR Hist Cleaner: EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Cleaner list, as provided by EDR, has revealed that there are 11 EDR Hist Cleaner sites within approximately 0.125 miles of the target property.

Citation:	22 CCR 15 66265.195(c) - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.195(c)
Violation Description:	Failure to conduct and document inspections of hazardous waste tank systems each operating day and retain records of those inspections at the facility.
Violation Notes:	Returned to compliance on 05/23/2017. The emergency response plan indicates the facility has spill absorbent. There is a possibility of a spill of the detergents, dry cleaning solution, or the waste dry cleaning material. The facility should have absorbent material onsite to block and clean up spills. Corrective action: Obtain spill absorbent and place in areas where spills may occur, including near dry cleaning machine and in boiler room.

Violation Date: 04-19-2017
Citation: 40 CFR 1 262.34(d)(5)(iii) - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 262.34(d)(5)(iii)
Violation Description: Failure to ensure that all employees are thoroughly familiar with proper waste handling and emergency procedures, relevant to their responsibilities during normal facility operations and emergencies.
Violation Notes: Returned to compliance on 04/24/2017. Mr. Kim indicates one employee is responsible for transferring the hazardous waste to the boiler room for accumulation. The hazardous waste drum was not closed and the label was illegible. Corrective action: Provided review of hazardous waste management standards with employee on 4/24/2017.

Violation Date:	04-19-2017
Citation:	22 CCR 15 66265.31 - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.31
Violation Description:	Failure to maintain and operate the facility to minimize the possibility of a fire, explosion, or any unplanned sudden or non-sudden release of hazardous waste or hazardous waste constituents to air, soil, or surface water which could threaten human health or the environment.
Violation Notes:	Returned to compliance on 05/18/2017. Fire extinguishers were last checked in 2013. All fire protection equipment must be tested and maintained as necessary to assure its proper operation, including fire extinguishers, which must undergo an annual maintenance check. Corrective action: Have your fire extinguishers checked.

inventory information for all reportable hazardous materials on site at or above reportable quantities.

Violation Notes: Returned to compliance on 06/01/2017. The inventory does not include the spot cleaners (acetone, RustGo with HFl, and flammable aerosols) that were observed at the site. In addition, the inventory is inaccurate in that the hydrocarbon for dry cleaning machine is listed as Ecosolve and Mr. Kim indicates it is DF2000, and non-RCRA hazardous waste liquid is listed as a mixture and the c10-c13 isoalkanes is listed as waste. Corrective action: update the inventory to include the spot cleaners, and correct the inventory listed to reflect actual site storage.

SAMJUNG CORP. DBA VIRGINIA CLEANERS (Continued) **S121746367**

Eval Type: Routine done by local agency
Eval Notes: Toxics Management Division (TMD) was on site for a routine hazardous materials and Hazardous Materials Business Plan (HMBP), Hazardous Waste (HW), and Stormwater (SW) inspections. Consent to enter and conduct inspection activities was provided by Samil Kim. Per operator, dry cleaning is no longer done at this location. Clothes are driven to San Jose location and driven back instead of being dry cleaned on-site. TMD observed - 55gal drum hazardous waste, unlabeled, about 1/3 full. Per operator, this is DF-2000 waste. - 50 lb~ starch - 2x 5gal detergent - 25gal + 20gal =45gal DF-2000 in machines - 15gal~ misc. cleaning products

Eval Type: Routine done by local agency
Eval Notes: Toxics Management Division (TMD) was on site for a routine hazardous materials and Hazardous Materials Business Plan (HMBP), Hazardous Waste (HW), and Stormwater (SW) inspections. Consent to enter and conduct inspection activities was provided by Samil Kim, Operator. Hazardous waste manifests, employee training records, and hazardous materials business plan were not available on site for review by inspector. Facility was missing emergency response posting. Hazardous waste manifest was submitted via email on 03/20/2022. Per operator, the accumulation start date for the hazardous waste should be after the last pick-up, which is 01/09/2022 per the manifest provided. EPA ID# CAL000317109 was active at time of inspection. Facility is currently involved in a remediation case with DTSC for contamination from dry cleaning chemicals. Per operator, he bought the building and did not continue use of "perc" chemical but instead uses DF-2000. TMD observed - 55gal drum [Truncated]

Eval General Type: Compliance Evaluation Inspection
Eval Date: 04-19-2017
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: Facility uses a Bowe M30 dry cleaning machine, has a spot treatment area which uses steam from the boiler, laundry equipment, boiler, and pressing stations. Hazardous waste is generated near the dry cleaning machine and removed to the boiler room and accumulated in a 55 gallon drum. The lid on the drum was not secured and no one was adding or removing hazardous waste, and the label on the drum was illegible. During the review of the DTSC HWTS, TMD noted a manifest associated with this facility's EPA ID number. The manifest is for the disposal of asbestos at a location in Stockton. TMD will notify DTSC of the incorrect use of the EPA ID number.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Correspondence
Completed Date: 10/21/2020
Comments: Call with Water Board (Chani Hutto) and proponent (Greg McIver, RMD) to discuss the possible SCAP Grant for Virginia Cleaners. The Water Board says that the most likely date for Virginia Cleaners to receive the funding is February 2022. Following the meeting, the DTSC PM reviewed the proponent's draft SCAP Grant Scope of Work and sent comments on it to the proponent on October 21, 2020.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Site Inspections/Visit (Non LUR)
Completed Date: 10/30/2020
Comments: Visited dry cleaner site and talked with one of the owners. Visited residence directly to the west of the dry cleaner during indoor air sampling and soil vapor probe installation. Noted the likely presence/absence of basements for other residences along Lincoln.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Annual Oversight Cost Estimate
Completed Date: 09/09/2021
Comments: DTSC cost estimate for fiscal year 2020-2021.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Correspondence
Completed Date: 12/21/2021
Comments: The requestor came into the office to view hard copy files. DTSC had a phone call with the requestor on 12/21/2021 to clarify what additional types of documents they would like to receive. The requestor said that they did not need any further documents at this time, so DTSC has closed the request.

UCB OXFORD TRACT (Continued) **1001023042**

Administrator at least once every two years. The data collected is used to create the National Biennial Resource Conservation and Recovery Act (RCRA) Hazardous Waste Report. This data is processed within the RCRA Information (RCRAInfo) database
The Integrated Compliance Information System (ICIS) provides a database that, when complete, will contain integrated enforcement and compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions and a subset of the Permit Compliance System (PCS), which supports the National Pollutant Discharge Elimination System (NPDES). This information is maintained in ICIS by EPA in the Regional offices and it at Headquarters. A future release of ICIS will completely replace PCS and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities that support compliance and enforcement programs, including incident tracking, compliance assistance, and compliance monitoring.
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.
California's Hazardous Waste Tracking System Data Mart (HWTS-DATAMART) provides information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

CERS Description: Chemical Storage Facilities

Violations:
Site ID: 356586
Site Name: UC Berkeley - Oxford Tract/Warren Hall
Violation Date: 02-21-2014
Citation: HSC 6.95 25504(c) - California Health and Safety Code, Chapter 6.95, Section(s) 25504(c)
Violation Description: Failure to include provisions in the business plan to ensure that appropriate personnel receive initial and annual training.
Violation Notes: Returned to compliance on 03/21/2014. John Hutchins of the insectory last had training on 3/23/11.
Violation Division: Berkeley City Toxics Management Division
Violation Program: HMRRP
Violation Source: CERS,

Site ID: 356586
Site Name: UC Berkeley - Oxford Tract/Warren Hall
Violation Date: 01-27-2021
Citation: 22 CCR 23 66273.35 - California Code of Regulations, Title 22, Chapter 23, Section(s) 66273.35
Violation Description: Failure to accumulate universal waste for one year or less and to demonstrate the length of time that the universal waste has been accumulated from the date it became a waste or was received.
Violation Notes: Returned to compliance on 04/23/2021. There is a container of UW batteries labeled with an accumulation start date of 9/18. UW may only be stored on-site for one year. Please dispose of these properly by April 23.
Violation Division: Berkeley City Toxics Management Division
Violation Program: HW
Violation Source: CERS,

Site ID: 356586
Site Name: UC Berkeley - Oxford Tract/Warren Hall
Violation Date: 03-29-2017
Citation: HSC 6.95 25508(a)(1) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(1)
Violation Description: Failure to complete and electronically submit hazardous material inventory information for all reportable hazardous materials on site at or above reportable quantities.
Violation Notes: Returned to compliance on 07/24/2017. Batteries for the Warren Hall generators need to be added to the chemical inventory. 7/3 Materials were added previously, but inventory needs to be resubmitted to CERS. Extended deadline to 7/22/17.
Violation Division: Berkeley City Toxics Management Division
Violation Program: HMRRP
Violation Source: CERS,

Site ID: 356586
Site Name: UC Berkeley - Oxford Tract/Warren Hall
Violation Date: 01-28-2021
Citation: HSC 6.67 Multiple - California Health and Safety Code, Chapter 6.67, Section(s) Multiple
Violation Description: APSA Program - Administration/Documentation - General
Violation Notes: Returned to compliance on 06/30/2021. The CERS APSA section for this facility incorrectly states that this is a farm facility that is

be labeled as such. Please determine the disposition of this waste and ensure that the labeling and handling matches the waste determination.
Violation Division: Berkeley City Toxics Management Division
Violation Program: HW
Violation Source: CERS,

Site ID: 356586
Site Name: UC Berkeley - Oxford Tract/Warren Hall
Violation Date: 03-29-2017
Citation: HSC 6.5 Multiple - California Health and Safety Code, Chapter 6.5, Section(s) Multiple
Violation Description: Hazardous Waste Generator Program - Operations/Maintenance - General
Violation Notes: Returned to compliance on 04/28/2017. Oxford Tract Research soil storage area: 2 UWED light fixtures not properly stored. Insectory Rm 16: UW bulbs not properly stored in boxes.
Violation Division: Berkeley City Toxics Management Division
Violation Program: HW
Violation Source: CERS,

Evaluation:
Eval General Type: Compliance Evaluation Inspection
Eval Date: 03-29-2017
Violations Found: No
Eval Type: Routine done by local agency
Eval Notes: Met with Tim Pine, EH&S; John Franklin, Natural Resources Lab; and Eddie Cazares, Insectory; and Johnny Dunn for Warren Hall to conduct the routine HMBP, HW and APSA inspections of the Oxford Tract and Warren Hall. Facility has 2 X 3,000 gallon generators. Observed these and record keeping. Batteries need to be added to the HMBP inventory.
Eval Division: Berkeley City Toxics Management Division
Eval Program: APSA
Eval Source: CERS,

Eval General Type: Compliance Evaluation Inspection
Eval Date: 01-27-2021
Violations Found: No
Eval Type: Routine done by local agency
Eval Notes: This was a multi-day inspection. The HBMP inspection of the Oxford Tract occurred on 1/27/21 and was an in-person inspection with Tim Pine and Tina Wistrom of UC Berkeley, and Viviana Garcia and Meridith Lear of Toxics Management Division (TMD). The inspection of Warren Hall was conducted by video inspection on 1/28/21 and included Tim Pine and Ray Sanders of UC Berkeley, and Viviana Garcia and Meridith Lear of TMD. Report was delayed due to the length of time it took the UC to provide required information. Hazardous materials inventory was reviewed and appeared accurate. Training records were reviewed and appeared current.
Eval Division: Berkeley City Toxics Management Division
Eval Program: HMRRP
Eval Source: CERS,

Eval General Type: Compliance Evaluation Inspection
Eval Date: 01-27-2021
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: Inspection was of the Oxford Tract with the exception of the Insectory. Access was not granted to the Insectory. Report was delayed

due to the length of time it took the UC to provide required information. Training records for Tina Wistrom, the Oxford Tract contact, were reviewed and were current. Manifests average about one per year through the Hazardous Waste Tracking System. Please ensure that waste is going out within 90 days of a total of 27 gallons (or 100 kg) of hazardous waste being accumulated on-site. Please ensure waste is removed directly from this facility, and is not illegally transported to the main campus Hazardous Materials Facility.

Eval Division: Berkeley City Toxics Management Division
Eval Program: HW
Eval Source: CERS,

Eval General Type: Compliance Evaluation Inspection
Eval Date: 01-28-2021
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: APSA inspection of the generator at Warren Hall was conducted by video due to Covid. Tim Pine walked the camera around for Toxics Management Division (TMD) to conduct the inspection. Viviana Garcia and Meridith Lear of TMD conducted the inspection. Ray Sanders of UC Berkeley also participated in the inspection. Report was delayed due to the length of time it took the UC to provide required information. SPCC was reviewed. Inspection logs for the AGT were provided and reviewed. All appeared current and accurate. Recommendations: The SPCC includes checklists for the 5-year SPCC review and for the triennial tank integrity inspections. These checklists contain good guidance information, however the UC does not use them. These checklists should be used.

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal NPL (Superfund) sites

NPL: National Priority List
National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites
A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 09/19/2023

NPL LIENS: Federal Superfund Liens
Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Lists of Federal Delisted NPL sites

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

Lists of Federal RCRA TSD facilities

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Lists of state- and tribal hazardous waste facilities

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites
Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs
A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing
A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

PFAS NPDES: Clean Water Act Discharge Monitoring Information

Any discharger of pollutants to waters of the United States from a point source must have a National Pollutant Discharge Elimination System (NPDES) permit. The process for obtaining limits involves the regulated entity (permittee) disclosing releases in a NPDES permit application and the permitting authority (typically the state but sometimes EPA) deciding whether to require monitoring or monitoring with limits. Caveats and Limitations: Less than half of states have required PFAS monitoring for at least one of their permittees and fewer states have established PFAS effluent limits for permittees. New rulemakings have been initiated that may increase the number of facilities monitoring for PFAS in the future.

PFAS PART 139 AIRPORT: All Certified Part 139 Airports PFAS Information Listing

Since July 1, 2006, all certified part 139 airports are required to have fire-fighting foam onsite that meet military specifications (MIL-F-24385) (14 CFR 139.317). To date, these military specification fire-fighting foams are fluorinated and have been historically used for training and extinguishing. The 2018 FAA Reauthorization Act has a provision stating that no later than October 2021, FAA shall not require the use of fluorinated AFFF. This provision does not prohibit the use of fluorinated AFFF at Part 139 civilian airports; it only prohibits FAA from mandating its use. The Federal Aviation Administration?s document AC 150/5210-6D - Aircraft Fire Extinguishing Agents provides guidance on Aircraft Fire Extinguishing Agents, which includes Aqueous Film Forming Foam (AFFF).

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

CHROME PLATING: Chrome Plating Facilities Listing

This listing represents chrome plating facilities the California State Water Resources Control Board staff identified as possibly being a source of Per- and polyfluoroalkyl substance (PFAS) contamination. Sites and locations were identified by staff with the Division of Water Quality in the California State Water Board. Data was collected from the CA Air Resources Board 2013 and 2018 - Cr VI emission survey, CA Emission Inventory, CA HAZ Waste discharge database and by reviewing storm water permits. Former chrome plating sites are also included that are open site investigation or remediation cases with the Regional Water Quality Control Boards and the Department of Toxic Substances Control.

HWT: Registered Hazardous Waste Transporter Database
A listing of hazardous waste transporters. In California, unless specifically exempted, it is unlawful for any person to transport hazardous wastes unless the person holds a valid registration issued by DTSC. A hazardous waste transporter registration is valid for one year and is assigned a unique registration number.

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

WASTEWATER PITS: Oil Wastewater Pits Listing
Water officials discovered that oil producers have been dumping chemical-laden wastewater into hundreds of unlined pits that are operating without proper permits. Inspections completed by the Central Valley Regional Water Quality Control Board revealed the existence of previously unidentified waste sites. The water boards review found that more than one-third of the region’s active disposal pits are operating without permission.

WDR: Waste Discharge Requirements Listing
In general, the Waste Discharge Requirements (WDRs) Program (sometimes also referred to as the "Non Chapter 15 (Non 15) Program") regulates point discharges that are exempt pursuant to Subsection 20090 of Title 27 and not subject to the Federal Water Pollution Control Act. Exemptions from Title 27 may be granted for nine categories of discharges (e.g., sewage, wastewater, etc.) that meet, and continue to meet, the preconditions listed for each specific exemption. The scope of the WDRs Program also includes the discharge of wastes classified as inert, pursuant to section 20230 of Title 27.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

LOS ANGELES CO LF METHANE: Methane Producing Landfills

This data was created on April 30, 2012 to represent known disposal sites in Los Angeles County that may produce and emanate methane gas. The shapefile contains disposal sites within Los Angeles County that once accepted degradable refuse material. Information used to create this data was extracted from a landfill survey performed by County Engineers (Major Waste System Map, 1973) as well as historical records from CalRecycle, Regional Water Quality Control Board, and Los Angeles County Department of Public Health

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data
Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:
Source: American Hospital Association, Inc.
Telephone: 312-280-5991
The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing
Source: Centers for Medicare & Medicaid Services
Telephone: 410-786-3000
A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes

Southwest Map:	50005378 OAKLAND WEST, CA
Version Date:	2021

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

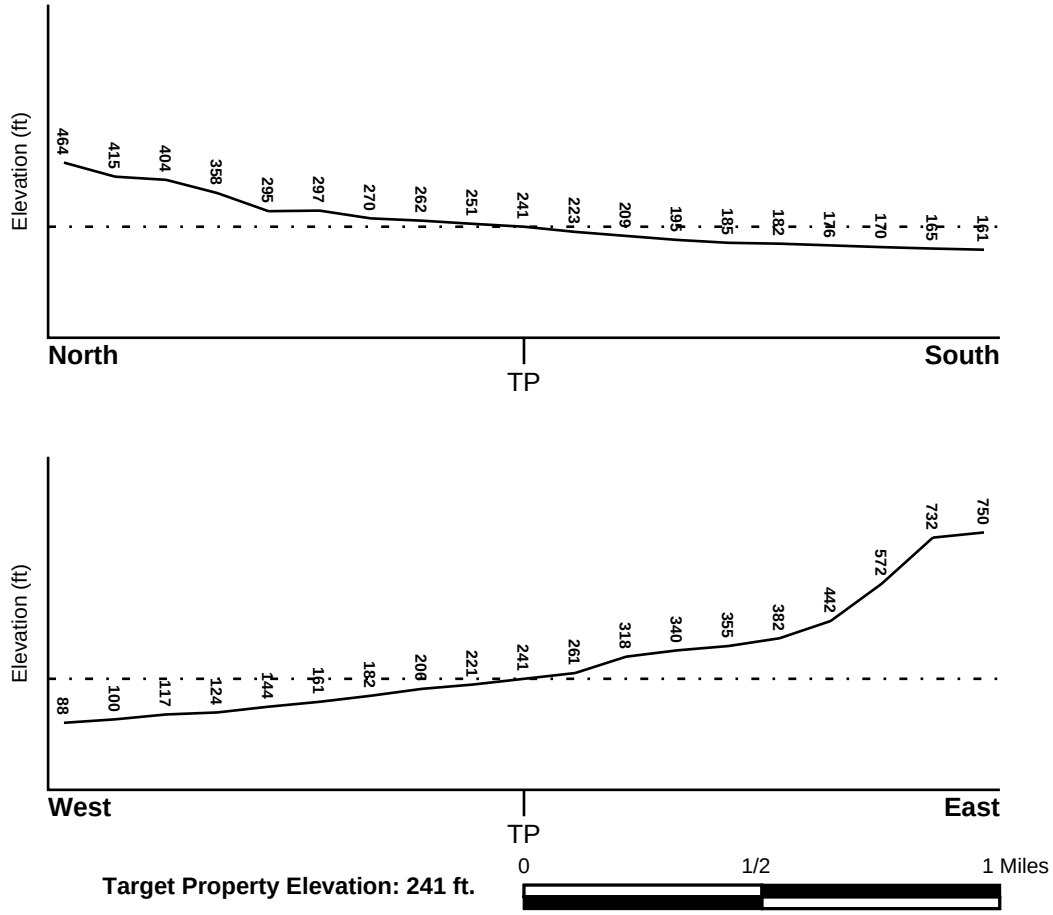
TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General WSW

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES



Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

Flood Plain Panel at Target Property	FEMA Source Type
06001C0019G	FEMA FIRM Flood data

Additional Panels in search area:	FEMA Source Type
06013C0243G	FEMA FIRM Flood data

06001C0056G	FEMA FIRM Flood data

NATIONAL WETLAND INVENTORY

NWI Quad at Target Property	NWI Electronic Data Coverage
RICHMOND	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Status:	Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

MAP ID	LOCATION FROM TP	GENERAL DIRECTION GROUNDWATER FLOW
7	1/8 - 1/4 Mile East	WSW
17	1/4 - 1/2 Mile SSW	SW
18	1/4 - 1/2 Mile NW	Not Reported
E36	1/2 - 1 Mile South	SW

8G	1/2 - 1 Mile South	Not Reported

For additional site information, refer to Physical Setting Source Map Findings.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

ROCK STRATIGRAPHIC UNIT

Era:	Mesozoic
System:	Cretaceous
Series:	Upper Mesozoic
Code:	uMze*(decoded above as Era, System & Series)*

GEOLOGIC AGE IDENTIFICATION

Category: Eugeosynclinal Deposits

Geologic Age and Rock Stratigraphic Unit Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - a digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name: Tierra

Soil Surface Texture: loam

Hydrologic Group: Class D - Very slow infiltration rates. Soils are clayey, have a high water table, or are shallow to an impervious layer.

Soil Drainage Class: Moderately well drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0 inches	11 inches	loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay	Max: 1.4 Min: 0.42	Max: 8.4 Min: 5.6
2	11 inches	31 inches	clay	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay	Max: 1.4 Min: 0.42	Max: 8.4 Min: 5.6
3	31 inches	59 inches	sandy clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay	Max: 1.4 Min: 0.42	Max: 8.4 Min: 5.6

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Map ID: 2

Soil Component Name: Urban land

Soil Surface Texture: loam

Hydrologic Group: Class D - Very slow infiltration rates. Soils are clayey, have a high water table, or are shallow to an impervious layer.

Soil Drainage Class:
Hydric Status: Partially hydric

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

No Layer Information available.

Soil Map ID: 3

Soil Component Name: Los Osos

Soil Surface Texture: silty clay loam

Hydrologic Group: Class C - Slow infiltration rates. Soils with layers impeding downward movement of water, or soils with moderately fine or fine textures.

Soil Drainage Class: Well drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Moderate

Depth to Bedrock Min: > 51 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information

	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0 inches	7 inches	silty clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	Not reported	Max: 0 Min: 0	Max: Min:

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
2	7 inches	29 inches	silty clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	Not reported	Max: 0 Min: 0	Max: Min:
3	29 inches	33 inches	weathered bedrock	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	Not reported	Max: 0 Min: 0	Max: Min:

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)
Source: United States Geologic Survey
EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map
Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.
Source: FEMA
Telephone: 877-336-2627
Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005, 2010 and 2015 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetland Inventory
Source: Department of Fish and Wildlife
Telephone: 916-445-0411

HYDROGEOLOGIC INFORMATION

AQUIFLOW^{R} Information System
Source: EDR proprietary database of groundwater flow information
EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit
Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
Telephone: 800-672-5559
SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)
This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

OTHER STATE DATABASE INFORMATION

Groundwater Ambient Monitoring & Assessment Program
State Water Resources Control Board
Telephone: 916-341-5577
The GAMA Program is Californias comprehensive groundwater quality monitoring program. GAMA collects data by testing the untreated, raw water in different types of wells for naturally-occurring and man-made chemicals. The GAMA data includes Domestic, Monitoring and Municipal well types from the following sources, Department of Water Resources, Department of Heath Services, EDF, Agricultural Lands, Lawrence Livermore National Laboratory, Department of Pesticide Regulation, United States Geological Survey, Groundwater Ambient Monitoring and Assessment Program and Local Groundwater Projects.

Water Well Database
Source: Department of Water Resources
Telephone: 916-651-9648

California Drinking Water Quality Database
Source: Department of Public Health
Telephone: 916-324-2319
The database includes all drinking water compliance and special studies monitoring for the state of California since 1984. It consists of over 3,200,000 individual analyses along with well and water system information.

California Oil and Gas Well Locations
Source: Dept of Conservation, Geologic Energy Management Division
Telephone: 916-323-1779
Oil and Gas well locations in the state.

California Earthquake Fault Lines
Source: California Division of Mines and Geology
The fault lines displayed on EDR's Topographic map are digitized quaternary fault lines prepared in 1975 by the United State Geological Survey. Additional information (also from 1975) regarding activity at specific fault lines comes from California's Preliminary Fault Activity Map prepared by the California Division of Mines and Geology.

RADON

State Database: CA Radon
Source: Department of Public Health
Telephone: 916-210-8558
Radon Database for California

PHYSICAL SETTING SOURCE RECORDS SEARCHED

Area Radon Information
Source: USGS
Telephone: 703-356-4020
The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

EPA Radon Zones
Source: EPA
Telephone: 703-356-4020
Sections 307 & 309 of IRAA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.

OTHER

Airport Landing Facilities: Private and public use landing facilities
Source: Federal Aviation Administration, 800-457-6656

Epicenters: World earthquake epicenters, Richter 5 or greater
Source: Department of Commerce, National Oceanic and Atmospheric Administration

California Earthquake Fault Lines: The fault lines displayed on EDR's Topographic map are digitized quaternary fault lines, prepared in 1975 by the United State Geological Survey. Additional information (also from 1975) regarding activity at specific fault lines comes from California's Preliminary Fault Activity Map prepared by the California Division of Mines and Geology.

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

EDR Topographic Map Library has been searched by EDR and maps covering the target property location as provided by ACC Environmental Cons. were identified for the years listed below. EDR's Historical Topo Map Report is designed to assist professionals in evaluating potential liability on a target property resulting from past activities. EDRs Historical Topo Map Report includes a search of a collection of public and private color historical topographic maps, dating back to the late 1800s.

Oakland, CA 94621
Contact: Davis Leach

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by ACC Environmental Cons. were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at approximately five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1920 through current. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 660 feet of the target property.

Summary information obtained is provided in the text of this report.

RECORD SOURCES

The EDR City Directory Report accesses a variety of business directory sources, including Haines, InfoUSA, Polk, Cole, Bresser, and Stewart. Listings marked as EDR Digital Archive access Cole and InfoUSA records. The various directory sources enhance and complement each other to provide a more thorough and accurate report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer.
