Zoning Adjustments Board Staff Report

APP # ZP2024-0126 **October 30, 2025**

Use Permit for a Project at 2298 Durant Avenue and 2360 Ellsworth Street

Quick Facts	Project Description:
Applicant: Austin Springer, Studio KDA **Project Address:** 2298 Durant Avenue **Site Size:** 12,220 sq. ft. **GP Land Use:** Residential Mixed Use (RMU) **Zoning:** Residential Southside Mixed Use (R-SMU) **CEQA:** Section 15332 "In-Fill Development Projects" **Date Submitted:** September 5, 2024 **SB 330 Vesting Date:** August 6, 2024 **Date Deemed Complete:** October 21, 2024 **Project Planner:** Allison Riemer	The applicant is seeking approval to demolish a commercial building, a residential building with 7 dwelling units, and associated parking; merge two lots; and build an eight-story (92 foot), 80,000 square-foot residential building, with 65 units (5 Very-Low Income, 2 Low-Income), utilizing a State Density Bonus. **Zoning Permits Requested:** A Use Permit Public Hearing is required for the following permits: 1. **Demolition.** BMC Section 23.326.020(B) **"General Requirements"** to demolish a dwelling. * 2. **Demolition.** BMC Section 23.326.030(A)(3) **"Eliminating Dwelling Units through Demolition"** to demolish a building constructed before June 1980 on a property containing two or more dwelling units. * 3. **Demolition.** BMC Section 23.326.070(A) **"Main Non-Residential Building"** to demolish a non-residential building. * 4. **New Construction.** BMC Section 23.202.020 (A) **"Allowed Land Uses"** to construct a multi-family use. 5. **Height Projection** BMC Section 23.304.050 (A) "**Projections Above Height Limits"** exceed height limit with a rooftop projection. 6. **Fence** BMC Section 23.304.080(A) "**Permits Required**" *Denotes required findings. **Density Bonus:** **Waivers** • Provide 1,579 sq. ft. of Useable Open Space where 3,159 sq. ft. is required. • Provide no landscaped Useable Open Space. • Exceed the 85-foot height limit and permit a 92-foot building. • Provide no long-term bicycle parking. • Remove camphor tree on Durant Avenue. **Concessions** • Healthcare coverage for construction workers (BMC Section 13.107.050) • Prevailing wage for construction workers (BMC Section 13.108.030) **Staff Recommendation:** Staff recommends that ZAB determine the project is exempt from CEQA pursuant to Section 15332 of the CEQA Guidelines ("In-Fill Development Projects") and approve ZP2024-0126 pursuant to Section 23.406.040(E) "**Findings for Approval**" and subject to the attached Findings and Conditions of Approval.

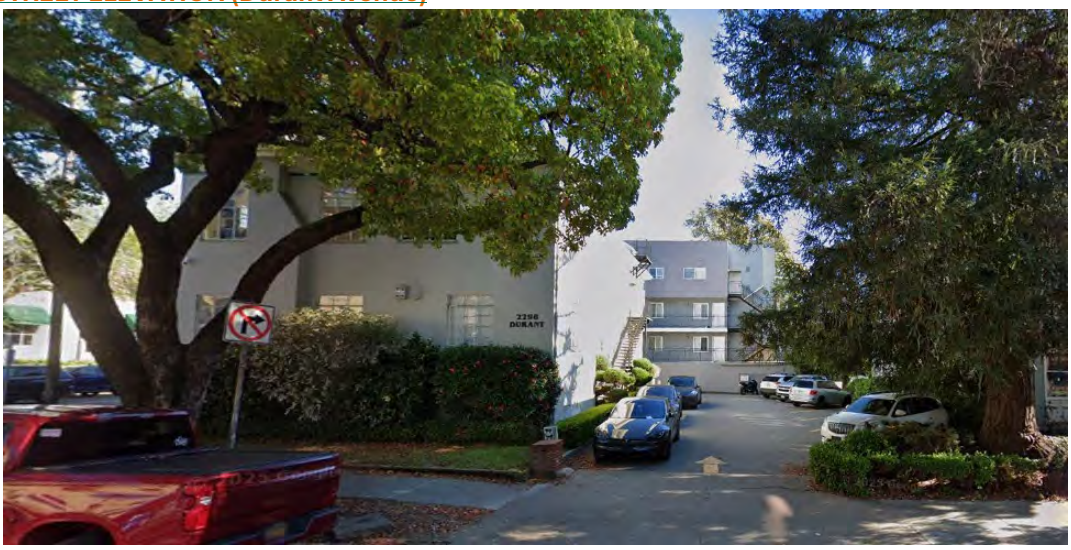
Figure 1: Vicinity and Zoning Districts Map

Comparison of Adjacent Properties			
Vicinity	**GP Land Use**	**Zoning**	**Current Use**
North	Residential Mixed Use (RMU)	Residential Southside Mixed Use (R-SMU)	Multi-family residential
South			Medical office, multi-family residential
East			Medical office
West			Multi-family residential

AERIAL

STREET ELEVATION (Durant Avenue)



STREET ELEVATION (Ellsworth Street)

BACKGROUND

Subject Site

The project site is a parcel on the southwest corner of Durant Avenue and Ellsworth Street (2298 Durant Avenue), and the parcel directly south on Ellsworth Street (2360 Ellsworth Street). The surrounding area consists of a mix of both commercial and residential uses ranging from one-story commercial buildings to five-story residential buildings. The UC Berkeley campus is one block to the north, and downtown Berkeley is one block to the west. The Downtown Berkeley BART station is 0.4 miles to the northwest. In addition, bus service is available via AC Transit routes 6, 7, 18, 22, 27, 36 and 51B at stops along Durant Avenue, Bancroft Way, and Shattuck Avenue.

2298 Durant Avenue is 8,460 square feet, and 2360 Ellsworth Street is 3,760 square feet. Both are relatively flat lots; 2298 Durant Avenue is currently a commercial office, and 2360 Ellsworth Street is a multi-family residential building with seven units. A surface parking lot is located along the western portion of 2298 Durant Avenue, and a garage is located underneath 2360 Ellsworth Street.

Site History

2298 Durant Avenue was originally built as a single-family home in 1903 and was converted to offices in 1946. 2360 Ellsworth Street was built in 1963 as a multi-family building, and its use has not changed.

ANALYSIS

Project Scope

The proposed project would:

1. Demolish the commercial building at 2298 Durant Avenue, the residential building with 7 dwelling units at 2360 Ellsworth Street, and the associated parking.
2. Merge the two lots.

3. Remove the street tree (camphor) on Durant Avenue.
4. Construct an eight-story (91 feet 6 inches), 80,046 square-foot residential building, with 65 units (5 Very-Low Income, 2 Low-Income), utilizing a State Density Bonus.
5. No secure bicycle parking, outdoor Useable Open Space, or car parking would be provided.

Findings

Draft findings for approval can be found in Attachment 2 to the staff report.

Base Project and Density Bonus

The applicant has requested a Density Bonus under the State Density Bonus Law (Govt. Code Section 65915). Under the City's Density Bonus procedures, the "base project[1]" is 49 units, as the maximum allowable density for the site. The base project and the resulting eight-story proposed project both have an average unit size of 1,215 square feet. By providing 5 Very Low-Income (VLI) units on site (10 percent of the 49-unit base density), the project is eligible for a 32.5 percent density bonus, or 16 additional units. Therefore, the applicant proposes 16 additional units above the base density for a total of 65 dwelling units.

Base Project Units [a]	Qualifying Units	Percent Density Bonus	Number of Density Bonus Units [a]	Proposed Project Units [a]
49	5 VLI (10% of 49)	32.5	16 (32.5% of 49)	65
Notes: a. Pursuant to Government Code 65915(q), all unit calculations are rounded up to the next whole number.				

Concession and Waivers Pursuant to State Density Bonus Law (CA Govt. Code Section 65915)

A **concession** is a modification of a development standard that reduces the cost of providing affordable housing. The City may only deny the concession if it finds that the concession would have a specific adverse impact upon public health and safety, or the physical environment, or on any real property listed in the California Register of Historical Resources, and there is no feasible method to satisfactorily mitigate or avoid the specific adverse impact without rendering the development unaffordable to low-income, very-low income, and moderate-income households, or if the concession would be contrary to State or Federal law.

The project is entitled to two concessions (or incentives) under Government Code Section

[1] Per the City's Density Bonus Procedures (DBP), the base project is the largest project allowed on the site that is fully compliant with district development standards (i.e. height, setbacks, usable open space, parking, etc.), or, the *maximum allowable density* for the site. The City uses the DBP to calculate the maximum allowable density for a site where there is no density standard in the zoning district, and to determine the number of units in the proposed project, which is the number of base project units plus the number of density bonus units that can be added according to the percentage of BMR units proposed, per Government Code, Section 65915(f).

65915(d), and an unlimited number of waivers under Section 65915(e).

- **Healthcare coverage for construction workers (BMC Section 13.107.050)** The applicant is requesting a concession from the healthcare requirement of the "HARD HATS" ordinance.
- **Prevailing wage for construction workers (BMC Section 13.108.030).** The applicant is requesting a concession from the prevailing wage requirements of the Southside Plan Area.

A **waiver** is a modification of a development standard that would otherwise physically preclude the construction of the project with the permitted density bonus and concessions. The City may only deny the waivers if it finds that the waivers would have a specific adverse impact upon public health and safety, or the physical environment, or on any real property listed in the California Register of Historical Resources, and there is no feasible method to satisfactorily mitigate or avoid the specific adverse impact without rendering the development unaffordable to low-income, very-low income, and moderate-income households, or if the waiver would be contrary to State or Federal law. Staff believes such a finding cannot be made.[2]

The applicant is requesting five waivers from the following development standards:

1. Provide 1,579 sq. ft. of Useable Open Space where 3,159 sq. ft. is required, and it will only consist of indoor amenity space (BMC Section 23.304.090(D) "**Southside Plan Area Shared Indoor Residential Amenities**").
2. Provide no landscaped Useable Open Space, where 40 percent of required outdoor Useable Open Space must be landscaped.
3. Exceed the 85-foot height limit and permit a 92-foot building.
4. Provide no long-term bicycle parking, where 99 long-term spaces are required.
5. Remove the camphor street tree on Durant Avenue; where street tree removal requires the City Arborist's approval.

Environmental Review

The project qualifies for a Class 32 Categorical Exemption pursuant to CEQA Guidelines Section 15332 ("In-Fill Development Projects") because:

- The project is consistent with the applicable general plan designation and all applicable general plan policies as well as with applicable zoning designation and regulations.
- The project site is within city limits on a project site of fewer than five acres that is substantially surrounded by urban uses.
- The project site has no value as habitat for endangered, rare or threatened species.
- Approval of the project would not result in any significant effects relating to traffic, noise, air quality, or water quality.
- The site can be adequately served by all required utilities and public services.

Additionally, none of the exceptions to eligibility for a categorical exemption as listed in Section 15300.2 of the CEQA Guidelines applies. The cumulative impact of successive projects of the same type in the same place, over time would not be significant; there are no "unusual circumstances" at the project site that would result in significant environmental effects; the project site is not in

[2] A "specific, adverse impact" means "a significant, quantifiable, direct, and unavoidable impact, based on objective, identified written public health or safety standards, policies, or conditions as they existed on the date the application was deemed complete".

view of a state scenic highway; the site is not included on a list compiled pursuant to Section 65962.5 of the Government Code; and the project would not result in a substantial adverse change in the significance of a historical resource.

ADVISORY BODY REVIEW

Landmarks Preservation Commission Review

The project involves demolition of one commercial building over 40 years in age. Pursuant to BMC Section 23.326.070(C)(1) "Demolition of Nonresidential Buildings", the proposed demolition was brought before the Landmarks Preservation Commission (LPC) for review. A historic resources evaluation for the property was completed by Preservation Architecture on August 22, 2023 and found that the original building was constructed in 1903. The LPC reviewed the demolition referral on July 7, 2025, and took no action.

Design Review Committee Review

This project is all residential and is located in the R-SMU District, and is not subject to Design Review pursuant to BMC Section 23.406.070(B)(1) "**When Required**."

Community Meeting

Prior to submitting this application to the city, the applicant installed a pre-application poster on site in 2024 and invited interested neighborhood organizations as well as owners and tenants located within 300 feet of the project site to a project preview meeting. The meeting was held virtually on September 4, 2024, and attended by one member of the public (meeting minutes are included as Attachment 4). Their concerns included the construction timeline, the height of the building, and the lack of setbacks from the sidewalk. On October 16, 2025, the City mailed public hearing notices to property owners and occupants within 300 feet of the project site, and to interested neighborhood organizations. The City also posted notices within the neighborhood at three nearby locations.

At the time of writing this report, staff has not received letters in opposition to the project.

POLICY CONSISTENCY

Housing Accountability Act

Pursuant to the Housing Accountability Act (HAA), California Government Code Section 65589.5(j), when a proposed housing development complies with the applicable, objective general plan and zoning standards, but a local agency proposes to deny the project or approve it only if the density is reduced, the agency must base its decision on written findings supported by substantial evidence that:

1. The development would have a specific adverse impact on public health or safety[3] unless disapproved, or approved at a lower density; and

[3] A "specific, adverse impact" means "a significant, quantifiable, direct, and unavoidable impact, based on objective, identified written public health or safety standards, policies, or conditions as they existed on the date the application was deemed complete."

2. There is no feasible method to satisfactorily mitigate or avoid the specific adverse impact, other than the disapproval, or approval at a lower density.

The project is a "housing development project" consisting of an all-residential building. The Base Project includes Use Permits and/or Administrative Use Permits to allow demolition and new construction, and complies with applicable, objective general plan and zoning standards. Government Code Section 65589.5(j)(3) provides that a request for a density bonus "shall not constitute a valid basis on which to find a proposed housing development project is inconsistent, not in compliance, or not in conformity, with an applicable plan, program, policy, ordinance, standard, requirement, or other similar provision specified in this subdivision." Therefore, the City may not deny the Base Project or density bonus request or reduce the density with respect to those units without basing its decision on the written findings under Section 65589.5(j), above.

While the project may include other Use Permits or Administrative Use Permits to modify standards not associated with the base project, there are no objective criteria in the findings. Therefore, the project still complies with the HAA. The ZAB has the discretion to approve, deny, or modify the request according to the zoning findings, provided the action does not reduce the project density or effectively deny the project by making it infeasible, unless the ZAB is also able to make the required findings for denial set forth under Section 65589.5(j), above.

Staff has not identified any adverse impacts that could occur with the construction of the project.

Housing Crisis Act of 2019 – Senate Bill (SB) 330

The Housing Crisis Act, also known as Senate Bill 330, seeks to boost homebuilding throughout the State with a focus on urbanized zones by expediting the approval process for and suspending or eliminating restrictions on housing development. A "housing development project" can include any of the following: residential units only; mixed use consisting of residential and nonresidential uses in which at least two-thirds of the square-footage is designated residential, and transitional or supportive housing. Sections of SB 330 that apply to the proposed project include the following:

> **Government Code Section 65905.5(a)** states that if a proposed housing development project complies with the applicable, objective general plan and zoning standards in affect at the time an application is deemed complete, then the city shall not conduct more than five hearings in connection with the approval of that housing development project. This includes all public hearings in connection with the approval of the housing development project and any continuances of such public hearings. The city must consider and either approve or disapprove the project at any of the five hearings consistent with applicable timelines under the Permit Streamlining Act (Chapter 4.5 (commencing with Section 65920)).
>
> Evidence: The October 30, 2025, ZAB hearing represents the second public hearing on the proposed project since the project was deemed complete. The City can hold up to three additional public hearings on this project, if needed. One of those hearings must be reserved for any possible appeal to the City Council.
>
> **Government Code Section 65913.10(a)** requires that the City determine whether the proposed development project site is a historic site at the time the application for the

housing development project is deemed complete. The determination as to whether the parcel is a historic site must remain valid during the pendency of the housing development project, unless any archaeological, paleontological, or tribal cultural resources are encountered during any grading, site disturbance, or building alteration activities.

Evidence: A historic resource evaluation prepared for the project in August 2023 determined that the property does not appear to be historically significant and therefore is not eligible for listing on the California Register of Historical Resources or as a City of Berkeley Landmark or Structure of Merit.

Replacement of Demolished Units:

The Housing Crisis Act of 2019 (Government Code Sections 66300-66301) prohibits the demolition of residential dwelling units unless the project will create at least as many residential units as the greatest number of residential dwelling units that existed on the project site within the last five years; prohibits the demolition of occupied or vacant protected units (i.e. rent-controlled or affordable units), unless replaced according to replacement provisions therein; and does not supersede any local ordinance that reserves greater protections/provisions for lower income households or displaced households. The project proposes replacing seven demolished dwelling units with 65 new dwelling units.

Evidence: The existing unit(s) are considered "protected" units as defined in Section 66300.5(h) because they were rent-controlled within the last five years. Government Code Section 65915 (Density Bonus) and Government Code Section 66300-66301 (SB 330) prohibit the demolition of occupied or vacant protected units (i.e. rent-controlled or affordable units, or units occupied by lower income households) unless the project will create at least as many residential units as will be demolished and will replace them with at least as many residential dwelling units as the greatest number of units that existed on the project site within the last five years. Further, pursuant to Government Code Section 65915(c)(3)(C)(i), since the seven units were subject to rent control, and are or were occupied by persons above lower income, the replacement units must be made available at affordable rent or affordable housing costs to and occupied by low-income persons or families. The project proposes replacement units according to the following distribution: 5 Very Low Income (VLI), and 2 Low Income (LI).

Demolition of Residential Units

1. Pursuant to BMC Section 23.326.030(A)(3) "Findings" (previous Demolition and Dwelling Unit Control Ordinance, Attachment 5) the ZAB may approve a Use Permit to demolish a building constructed before June 1980 on a property containing two or more dwelling units if any of the following is true:

   (a) The building containing the units is hazardous or unusable and is infeasible to repair.

   (b) The building containing the units will be moved to a different location within Berkeley with no net loss of units and no change in the rent levels of the units.

   (c) The demolition is necessary to permit construction of special housing needs facilities such as, but not limited to, childcare centers and affordable housing developments that serve the greater good of the entire community.

(d) The demolition is necessary to permit construction approved pursuant to this chapter of at least the same number of dwelling units.

Evidence: The project vested on August 6, 2024, and the new demolition ordinance was effective on August 10, 2024, so the prior demolition ordinance applies. ZAB may approve a Use Permit to demolish the building at 2360 Ellsworth Street because the seven-unit residential building was built in 1963, Rent Board staff have confirmed that the building has not been removed from the rental market under the Ellis Act during the preceding five years (Attachment 6), and demolition is necessary to permit construction of a new building with 65 units, including seven replacement units.

2. Replacement units shall be provided pursuant to BMC Section 23.326.030(A)(4)(c) "In Lieu of a Fee."

   Evidence: Since a fee for each demolished unit was never set by City Council, the seven Below Market Rate (BMR) replacement units will remain BMR in perpetuity, and the applicant will enter into a Regulatory Agreement with the City to provide the in-lieu units.

3. Tenant protections shall be provided pursuant to BMC Section 23.326.030(A)(5) "Occupied Units."

   Evidence: Tenant protections apply if the units to be demolished are occupied, but do not apply to tenants who move in after the application for demolition is submitted to the City if the owner informs each prospective tenant about the proposed demolition and that demolition constitutes good cause for eviction. Notices were provided to tenants in August 2024, prior to submittal of this Use Permit application, and copies of the notices were included with the SB 330 Preliminary Application. Conditions of Approval 21 to 23 address the required tenant protections and the applicant will be required to demonstrate compliance or demonstrate how they do not apply prior to demolition permit approval.

Demolition of Non-Residential Buildings

Pursuant to BMC Section 23.326.070(D) "Findings" (previous Demolition and Dwelling Unit Control Ordinance, Attachment 5) a Use Permit to demolish a non-residential building may be approved if ZAB finds that:

1. The demolition will not be materially detrimental to the commercial needs and public interest of any affected neighborhood or the City of Berkeley; and
2. The demolition:

   (a) Is required to allow a proposed new building or other proposed new use;

   (b) Will remove a building which is unusable for activities which are compatible with the purposes of the district in which it is located or which is infeasible to modify for such uses;

   (c) Will remove a structure which represents an uninhabitable attractive nuisance to the public; or

   (d) Is required for the furtherance of specific plans or projects sponsored by the City of Berkeley or other local district or authority upon a demonstration by the applicant that it would be infeasible to obtain prior or concurrent approval for the new construction or new use which

is contemplated by such specific plans or projects and that adhering to such a requirement would threaten the viability of the plan or project.

Evidence: The demolition will not be materially detrimental to the commercial needs and public interest of any affected neighborhood or the City of Berkeley because the demolition will replace a two-story commercial building and a four-story residential building with an eight-story residential building. The demolition is required to allow a proposed new building.

General Plan Consistency

The 2002 General Plan contains several policies applicable to the project, including the following:

1. Policy LU-3–Infill Development: Encourage infill development that is architecturally and environmentally sensitive, embodies principles of sustainable planning and construction, and is compatible with neighboring land uses and architectural design and scale.
2. Policy LU-7–Neighborhood Quality of Life, Action A: Require that new development be consistent with zoning standards and compatible with the scale, historic character, and surrounding uses in the area.
3. Policy H-12 – Transit-Oriented New Construction: Encourage construction of new medium- and high-density housing on major transit corridors and in proximity to transit stations consistent with zoning, applicable area plans, design review guidelines, and the Climate Action Plan.
4. Policy H-33 – Regional Housing Needs: Encourage housing production adequate to meet City needs and the City's share of regional housing needs.
5. Policy T-16 – Access by Proximity, Action B: Encourage higher density housing and commercial infill development that is consistent with General Plan and zoning standards in areas adjacent to existing public transportation services.

Staff Analysis: The project would add density to lots developed with a two-story commercial building and a three-story residential building. In addition, the project would be consistent with R-SMU District zoning standards, such as lot coverage, Floor Area Ratio and setbacks, and would modify the required height and useable open space with waivers that are allowed with a State Density Bonus. The project would be consistent with the Residential Mixed Use General Plan designation because it would add an eight-story residential building with a Floor Area Ratio less than 7. The project site is served by multiple bus lines that operate along Durant Avenue, Bancroft Way, and Shattuck Avenue, and a nearby BART Station. The project would help Berkeley meet its regional housing needs by adding 65 new units, including 5 Very Low-Income units, and 2 Low-Income units.

Notes:
a. Application processing reflects the project compliance review, including CEQA if applicable, after the application is deemed complete. Submittals are reviewed within 30 days of receipt, pursuant to the Permit Streamlining Act.

Table 2: Special Characteristics

Characteristic	Applicability	Explanation
Affordable Child Care Fee for qualifying non-residential projects (Per Resolution 66,618-N.S.)	No	These fees apply to net newly constructed nonresidential gross floor area over 7,500 square feet. The proposed net new non-residential floor area is less than 7,500 square feet; therefore, the fees do not apply to the project.
Affordable Housing Fee for qualifying non-residential projects (Per Resolution 66,617-N.S.)		
Affordable / Inclusionary Housing Requirements (BMC Chapter 23.328)	Yes	The modified project is a housing development project, as defined in BMC 23.328.020[a], and would provide at least 20 percent of residential units, pay an in-lieu fee based on the residential unit floor area of the project, or a combination. The project would provide 5 VLI units and 2 LI units, and would be required to pay an in-lieu fee to satisfy the remainder of the requirement.
Bird Safe Buildings (BMC Section 23.304.150)	Yes	The project was vested under the Housing Crisis Act of 2019 after the July 27, 2023 effective date of the ordinance, and therefore these provisions do apply.
Coast Live Oak Trees (BMC Chapter 6.52)	No	There are no Coast Live Oak (*Quercus agrifolia*) trees on the project site.
Creeks	No	No creek or culvert, as defined by BMC Chapter 17.08, exists on or within 30 feet of the project site.
Density Bonus	Yes	The project would provide 5 Very Low-Income units, or 10 percent of the Base Project units, and qualifies for a 32.5 percent density bonus, or 16 bonus units.
Hard Hats (BMC Chapter 13.107)	Yes	The project was vested under the Housing Crisis Act of 2019 after the January 1, 2024 effective date of the ordinance, and therefore these provisions do apply.
Historic Resources	No	The existing building is more than 40 years old and was forwarded to the Landmarks Preservation Commission (LPC) for review on July 7, 2025. The LPC took no action to initiate a Landmark or Structure of Merit designation.
Housing Accountability Act (HAA) (Gov't Code Section 65589.5(j))	Yes	The project meets the definition of a "Housing Development Project" per Government Code Section 65589.5(h)(2)b. The project complies with applicable, objective general plan and zoning standards, and thus section (j) of the Housing Accountability Act does apply, and the project cannot be denied at the density proposed unless the findings for denial can be made.
Housing Crisis Act of 2019 (SB 330)	Yes	The project meets the definition of a "Housing Development Project" per Government Code Section 65589.5(h)(2)[b].
Rent Controlled Units	Yes	The project would involve the demolition of seven rent-controlled units, though they would be replaced in the proposed project with BMR units.
Residential Preferred Parking (RPP)	No	The site is not located in an RPP zone. The project is not eligible for RPP permits per BMC Section 14.72.080(C)(1) as no permits shall be issued to residents in newly constructed residential units.

Characteristic	Applicability	Explanation
Seismic Hazards (SHMA)	No	The project site is not located within an area susceptible to landslide/liquefaction/fault rupture as shown on the State Seismic Hazard Zones map.[c]
Soil/Groundwater Contamination	No	The project site is not on the Cortese List.[d] The project site is within the City's Environmental Management Area. The applicant has submitted a Phase I report. No further investigation is recommended for the project. Standard Conditions of Approval related to hazardous materials would apply.
Transit	Yes	The project area is served by AC Transit lines that operate along Durant Avenue, Bancroft Way, and Shattuck Avenue, and is 0.4 miles southeast from the Downtown Berkley BART Station.

Notes:

a. BMC 23.328.020(E) defines a "Housing Development Project" for purposes of inclusionary housing requirements as "a development project, including a Mixed-Use Residential project involving the new construction of at least one Residential Unit. Projects with one or more buildings or projects including multiple contiguous parcels under common ownership or control shall be considered as a sole Housing Development Project and not as individual projects.

b. Government Code Section 65589.5(h)(2) "Housing development project" means a use consisting of any of the following: (A) residential units only, (B) mixed-use developments consisting of residential and nonresidential uses in which at least two-thirds of the square footage is designated for residential use, and (C) transitional or supportive housing.

c. California Department of Conservation. DOC Maps: Geologic Hazards. Available: https://maps.conservation.ca.gov/geologichazards/

d. Cortese List is an annually updated list of hazardous materials sites complied pursuant Government Code Section 65962.5.

Zoning Adjustments Board Findings

APP # ZP2024-0126

October 30, 2025

Use Permit for a Project at 2298 Durant Avenue and 2360 Ellsworth Street

Quick Facts	Project Description:
Applicant: Austin Springer, Studio KDA **Project Address:** 2298 Durant Avenue **Site Size:** 12,220 sq. ft. **GP Land Use:** Residential Mixed Use (RMU) **Zoning:** Residential Southside Mixed Use (R-SMU **CEQA:** Section 15332 "In-Fill Development Projects" **Date Submitted:** September 5, 2024 **SB 330 Vesting Date:** August 6, 2024 **Date Deemed Complete:** October 21, 2024 **Project Planner:** Allison Riemer	The applicant is seeking approval to demolish a commercial building, a residential building with 7 dwelling units, and associated parking; merge two lots; and build an eight-story (92 foot), 80,000 square-foot residential building, with 65 units (5 Very-Low Income, 2 Low-Income), utilizing a State Density Bonus. **Permits Requested:** A Use Permit Public Hearing is required for the following permits: 1. **Demolition.** BMC Section 23.326.020(B) **"General Requirements"** to demolish a dwelling. * 2. **Demolition.** BMC Section 23.326.030(A)(3) **"Eliminating Dwelling Units through Demolition"** to demolish a building constructed before June 1980 on a property containing two or more dwelling units. * 3. **Demolition.** BMC Section 23.326.070(A) **"Main Non-Residential Building"** to demolish a non-residential building. * 4. **New Construction.** BMC Section 23.202.020 (A) **"Allowed Land Uses"** to construct a multi-family use. 5. **Height Projection** BMC Section 23.304.050 (A) "**Projections Above Height Limits"** exceed height limit with a rooftop projection. 6. **Fence** BMC Section 23.304.080(A) "**Permits Required**" *Denotes required findings. **Density Bonus:** **Waivers** • Provide 1,579 sq. ft. of Useable Open Space where 3,159 sq. ft. is required. • Provide no landscaped Useable Open Space. • Exceed the 85-foot height limit and permit a 92-foot building. • Provide no long-term bicycle parking. • Remove camphor tree on Durant Avenue. **Concessions** • Healthcare coverage for construction workers (BMC Section 13.107.050) • Prevailing wage for construction workers (BMC Section 13.108.030) **Staff Recommendation:** Staff recommends that ZAB determine the project is exempt from CEQA pursuant to Section 15332 of the CEQA Guidelines ("In-Fill Development Projects") and approve ZP2024-0126 pursuant to Section 23.406.040(E) "**Findings for Approval**" and subject to the attached Findings and Conditions of Approval.

I. CEQA

The project is categorically exempt from the requirements of CEQA pursuant to CEQA Guidelines Section 15332 ("In-Fill Development Projects").

Evidence: The project is consistent with the applicable general plan designation and all applicable general plan policies as well as with the applicable zoning designation and regulations. The project site is within city limits on a project site of fewer than five acres that is substantially surrounded by urban uses. The project site has no value as habitat for endangered, rare or threatened species. Approval of the project would not result in any significant effects relating to traffic, noise, air quality, or water quality. The site can be adequately served by all required utilities and public services.

Furthermore, none of the exceptions in CEQA Guidelines Section 15300.2 apply, as follows: (a) the site is not located in an environmentally sensitive area, (b) there are no significant cumulative impacts, (c) there are no significant effects due to unusual circumstances, (d) the project is not located near a scenic highway, (e) the project site is not located on a hazardous waste site pursuant to Government Code Section 65962.5, and (f) the project will not affect an historical resource.

II. FINDINGS FOR APPROVAL

1. As required by BMC Section 23.406.040(E)(1) "**Findings for Approval**," to approve a Use Permit, the ZAB shall find that the proposed project or use:

(a) Will not be detrimental to the health, safety, peace, morals, comfort, or general welfare of persons residing or visiting in the area or neighborhood of the proposed use; and

Evidence: The project will not be detrimental to the health safety, peace, morals, comfort or general welfare of persons residing or visiting in the area because the project will replace a commercial building and a residential building with seven units with a new residential building with 65 units, which is a use that already exists in the area. The setbacks will exceed what is required, the proposed Floor Area Ration (FAR) is 6.54 where 7 is the maximum, and the proposed lot coverage is 84.4 percent, where 100 percent is allowed. Waivers for an increased height, reduced useable open space, and no interior (long-term) bike parking are permissible pursuant to State Density Bonus Law.

(b) Will not be detrimental or injurious to property and improvements of the adjacent properties, the surrounding area or neighborhood, or to the general welfare of the City.

Evidence: Findings can be made for adding a residential building with 65 units in the R-SMU District, where multi-family residential buildings are allowed:

Sunlight: According to the shadow studies submitted for the project, new shadows will affect dwellings in the existing single and multi-family buildings west, north, northeast, and southeast of the site, casting new shadows on the winter and summer solstice two hours after sunrise, at noon, and two hours before sunset.

Shadow impacts on adjacent dwellings are to be expected, because the subject site is in the R-SMU district, which allows heights of up to 85 feet by right. A waiver is allowed for a height beyond 85 feet to accommodate the density bonus units.

Based on the shadow analysis provided by the applicant, shadow impacts to neighboring residences will be limited to certain times of year, and during certain hours of the day, and shadow impacts will not be detrimental. Therefore, though the project will create new shadow impacts on neighboring residences, the projected impacts will be in line with what is expected within a built urban environment.

2. As required by BMC Section 23.406.040(E)(2) "**Findings for Approval**," to approve the Use Permit, the ZAB must also make any other Use Permit findings specifically required by the Zoning Ordinance for the proposed project.

   Density Bonus

   A. Pursuant to Government Code Section 65915, the Zoning Adjustments Board finds that:
      1. Under the City's methodology for implementing density bonuses, the base project consists of 49 units;
      2. The project will provide at least 5 qualifying units in the 49-unit base project, as more fully set forth in Condition 35;
      3. The project is entitled to a density increase of 32.5 percent over the otherwise maximum allowable residential density under the Zoning Ordinance and General Plan Land Use Element, under the requirements of Government Code Section 65915(b) and (f), plus two concessions or incentives. This equates to a density bonus of up to 16 units above the base project, for a total of up to 65 units.
   B. In accordance with Government Code Section 65915(d) and (k), the Zoning Adjustments Board hereby grants the following concessions in order to provide for affordable housing costs:

1. Healthcare coverage for construction workers (BMC Section 13.107.050); and
2. Prevailing wage for construction workers (BMC Section 13.108.030).

C. In accordance with Government Code Section 65915(d), in order to allow construction of the proposed project with the density permitted under State law, the Zoning Adjustments Board finds that the approval of the concessions is required to provide for affordable housing costs, as provided in Government Code Section 65915(d)(1)(A) because 1) approval of the concession would result in identifiable and actual cost reduction; 2) approval of the concession would not have a specific adverse impact upon public health and safety, or the physical environment, or on any real property listed in the California Register of Historical Resources; and 3) would not be contrary to State or Federal law.

D. In accordance with Government Code Section 65915(e) the Zoning Adjustments Board hereby grants the following waivers to modify development standards as necessary to accommodate these density bonus units.

1. Provide 1,579 sq. ft. of Useable Open Space where 3,159 sq. ft. is required.
2. Provide no landscaped Useable Open Space.
3. Exceed the 85-foot height limit and permit a 92-foot building.
4. Provide no long-term bicycle parking.
5. Remove the camphor tree on Durant Avenue.

E. In accordance with Government Code Section 65915(e), in order to allow construction of the proposed project with the density permitted under State law, the Zoning Adjustments Board finds that the approval of waivers is required 1) to construct the proposed project at the density permitted under State law; 2) approval of requested waivers will not have a specific adverse impact upon public health and safety, or the physical environment, or on any real property listed in the California Register of Historical Resources; and 3) approval of the requested waivers will not be contrary to State or Federal law.

Housing Accountability Act

The Housing Accountability Act, Government Code Section 65589.5(j) requires that when a proposed housing development complies with applicable, objective general plan and zoning standards, a local agency may not deny the project or approve it with reduced density unless the agency makes written findings

supported by substantial evidence that: (1) the development would have a specific adverse impact on public health or safety unless disapproved or approved at a lower density; and (2) there is no feasible method to satisfactorily mitigate or avoid the specific adverse impact, other than the disapproval or approval at a lower density.

Evidence: The project includes construction of 65 units. Because the base project complies with applicable, objective general plan and zoning standards, Section 65589.5(j) does apply to this project. No significant, quantifiable, direct and unavoidable impacts, based on objective, identified written public health or safety standards, polices, or conditions, have been identified.

3. As required by BMC Section 23.406.040(E)(3) "**Findings for Approval**," when taking action on a Use Permit, the ZAB shall consider in its findings:

   (a) The proposed land use;

   Evidence: The proposed land use meets the findings for approval because the proposed multi-family residential use is consistent with the R-SMU District purposes. One of the purposes of the R-SMU District is to "implement General Plan and Southside Plan policy by encouraging high-density, multi-story residential development close to major shopping, transportation, and employment centers." The project provides a high-density multi-story residential development near the UC Berkeley campus, Downtown Berkeley, and the Downtown Berkeley BART station.

   (b) and the structure or addition that accommodates the use.

   Evidence: The proposed eight-story residential building meets the findings for approval because it meets the R-SMU District development standards, with waivers to allow for a State Density Bonus.

4. As required by BMC Section 23.406.040(E)(4) "**Findings for Approval**," required findings shall be made based on the circumstances existing at the time a decision is made on the application.

   Evidence: This finding is met because the application has been reviewed based on the current zoning standards, general plan policies, environmental conditions, site context, and plans received September 11, 2025.

5. As required by BMC Section 23.406.040(E)(5) "**Findings for Approval**," the ZAB shall deny a Use Permit application if it determines that it is unable to make any of the required findings.

   Evidence: This finding does not apply because all required findings for approval can be made based on the submitted documents.

CITY OF BERKELEY
PLANNING AND DEVELOPMENT

USE PERMIT ZP2024-0126 CONDITIONS OF APPROVAL

October 30, 2025

2298 Durant Avenue and 2360 Ellsworth Street

Use Permit #ZP2024-0126 to demolish a commercial building, a residential building with 7 dwelling units, and associated parking; merge two lots; and build an eight-story (92 foot), 80,000 square-foot residential building, with 65 units (5 Very-Low Income, 2 Low-Income), utilizing a State Density Bonus.

I. STANDARD CONDITIONS OF APPROVAL FOR ALL PROJECTS

Pursuant to Berkeley Municipal Code (BMC) Title 23 Zoning Ordinance and Title 13 Public Peace, Morals, and Welfare, the following conditions, as well as all other applicable provisions of the Zoning Ordinance, apply to this Permit:

1. **Conditions Shall be Printed on Plans.** The conditions of this Permit shall be printed on the *second* sheet of each plan set submitted for a building permit pursuant to this Use Permit, under the title 'Use Permit Conditions.' *Additional sheets* may also be used if the *second* sheet is not of sufficient size to list all of the conditions. The sheet(s) containing the conditions shall be of the same size as those sheets containing the construction drawings.
2. **Compliance Required (BMC Section 23.102.050).** All land uses and structures in Berkeley must comply with the Zoning Ordinance and all applicable City ordinances and regulations. Compliance with the Zoning Ordinance does not relieve an applicant from requirements to comply with other federal, state, and City regulations that also apply to the property.
3. **Approval Limited to Proposed Project and Replacement of Existing Uses (BMC Sections 23.404.060(B)(1) and (2)):**
   - **A.** This Permit authorizes only the proposed project described in the application. In no way does an approval authorize other uses, structures or activities not included in the project description.
   - **B.** When the City approves a new use that replaces an existing use, any prior approval of the existing use becomes null and void when permits for the new use are exercised (e.g., building permit or business license issued). To re-establish the previously existing use, an applicant must obtain all permits required by the Zoning Ordinance for the use.
4. **Conformance to Approved Plans (BMC Section 23.404.060(B)(4)).** All work performed under an approved permit shall comply with the approved plans and any conditions of approval.
5. **Exercise and Expiration of Permits (BMC Section 23.404.060(C)):**

A. A permit authorizing a land use is exercised when both a valid City business license is issued (if required) and the land use is established on the property.

B. A permit authorizing construction is exercised when both a valid City building permit (if required) is issued and construction has lawfully begun.

C. The Zoning Officer may declare a permit lapsed if it is not exercised within one year of its issuance, except if the applicant has applied for a building permit or has made a substantial good faith effort to obtain a building permit and begin construction. The Zoning Officer may declare a permit lapsed only after 14 days written notice to the applicant. A determination that a permit has lapsed may be appealed to the ZAB in accordance with BMC Chapter 23.410, Appeals and Certification.

D. A permit declared lapsed shall be void and of no further force and effect. To establish the use or structure authorized by the lapsed permit, an applicant must apply for and receive City approval of a new permit.

6. **Permit Remains Effective for Vacant Property (BMC Section 23.404.060(D)).** Once a Permit for a use is exercised and the use is established, the permit authorizing the use remains effective even if the property becomes vacant. The same use as allowed by the original permit may be re-established without obtaining a new permit, except as set forth in Standard Condition #5 above.

7. **Permit Modifications (BMC Section 23.404.070).** No change in the use or structure for which this Permit is issued is permitted unless the Permit is modified by the Board. The Zoning Officer may approve changes to plans approved by the Board, consistent with the Board's policy adopted on May 24, 1978, which reduce the size of the project.

8. **Permit Revocation (BMC Section 23.404.080).** The City may revoke or modify a discretionary permit for completed projects due to: 1) violations of permit requirements; 2) Changes to the approved project; and/or 3) Vacancy for one year or more. However, no lawful residential use can lapse, regardless of the length of time of the vacancy. Proceedings to revoke or modify a permit may be initiated by the Zoning Officer, Zoning Adjustments Board (ZAB), or City Council referral.

9. **HARD HATS (BMC Section 13.107).** Pursuant to BMC Chapter 13.107 "Establishing Healthcare and Apprenticeship Standards for Private Development" projects within City limits consisting of construction of either a new building, addition to an existing building, alteration of existing floor area, or demolition of 50,000 square feet or more of floor area shall be subject to the requirements of this Chapter. The combination of alterations, additions and/or demolition that impacts 50,000 square feet or more of floor area shall be subject to the requirements of this Chapter. This includes compliance with the requirements contained in BMC Sections 13.107.040 - 13.107.090.

   A. Prior to Building Permit issuance and during project construction, the applicant shall comply with the following sections and submit the required document(s):

      i. BMC Section 13.107.040(a)-(d), Apprenticeship Requirements

      ~~ii. BMC Section 13.107.050(a)-(e), Health Care Expenditures~~

iii. Submit: Contractor Prequalification Questionnaire

B. At the time Building Permit Issuance, the applicant shall comply with the following section and submit the required document(s):
i. BMC Section 13.107.060, Required Applicant and Contractor Statements
ii. Submit: Applicant Declaration
iii. Submit: Statement of Compliance seven days before contractor starts work

C. Within 30 Days of completing each contractor's respective work
i. BMC Section 13.107.060, Required Applicant and Contractor Statements
ii. Submit: Contractor Satisfaction Statement

D. Prior to Issuance of Certificate of Occupancy, or prior to approved final inspection for alterations, additions, or demolition projects that do not change the occupancy class of the structure or space:
i. BMC Section 13.107.060, Required Applicant and Contractor Statements
ii. Submit: Applicant Certification of Compliance

E. During Project Construction, the applicant shall comply with the following sections:
i. BMC Section 13.107.070(a)-(b), Notice and Posting
ii. BMC Section 13.107.080, Retaliation Prohibited

F. On-Going and at least three years after receiving approved Final Inspection, the applicant shall comply with the following section:
i. BMC Section 13.107.090, Retention of Records

10. **Pay Transparency Acknowledgement (BMC Section 13.104.030).** Prior to the issuance of a building permit for any Project subject to this Chapter:

A. A Responsible Representative of the Permittee shall certify under penalty of perjury that the Permittee has reviewed Chapter 13.104 of the Berkeley Municipal Code, and will be responsible for demonstrating compliance with this Chapter.

B. The Permittee shall provide to the City a Contractor Pay Transparency Acknowledgment on a form approved by the City for this purpose. A Responsible Representative of the Permittee shall certify under penalty of perjury that the Contractor and all Qualifying Subcontractors performing work on the Project will comply with BMC Chapter 13.104 and with Labor Code sections 226(a) and 2810.5 for each employee who works on the Project.

11. **Pay Transparency Attestations following Project Completion (BMC Section 13.104.040).** Within 10 days of the approved final inspection of any Project subject to this Chapter, each Permittee shall provide to the City for each Contractor and Qualifying Subcontractor a Pay Transparency Attestation on a form approved by the City. On each Pay Transparency Attestation, a Responsible Representative of the Contractor or Qualifying Subcontractor shall attest under penalty of perjury that the Contractor or Qualifying Subcontractor complied with BMC Chapter 13.104 and Labor Code sections 226(a) and 2810.5 for each employee who performed work on the Project. The City will maintain Pay Transparency Attestation forms for period of at least three years after their date of receipt by the City
12. **Posting of Wage Theft Ordinance (BMC Section 13.104.050).** Each day work is performed on the Project, each Permittee shall post, and keep posted in a conspicuous location where it may be easily read by employees during the hours of the workday, a notice that: (A) contains the text of BMC Chapter 13.104; (B) explains that workers can report violations of Labor Code sections 226 and 2810.5 to the Labor Commissioner of the State of California; and (C) provides current contact information, including office address, telephone number, and email address of the Labor Commissioner of the State of California.
13. **Wage Theft Prevention Conditions of Approval (BMC Section 13.104.060).** The requirements of BMC Sections 13.104.030 through 13.104.050 shall be included as conditions of approval of any Use Permit or Zoning Certificate for any Project that is subject to this Chapter. Failure to comply with the requirements of any provision of this Chapter shall be grounds for issuance of an administrative citation under BMC Chapter 1.28 and/or the revocation or modification of any Use Permit issued for the Project under BMC Chapter 23.404.
14. **Hold Harmless.** The permittee agrees as a condition of approval of this application to indemnify, protect, defend with counsel selected by the City, and hold harmless, the City, and any agency or instrumentality thereof, and its elected and appointed officials, officers, employees and agents, from and against any and all liabilities, claims, actions, causes of action, proceedings, suits, damages, judgments, liens, levies, costs and expenses of whatever nature, including reasonable attorney's fees and disbursements (collectively, "Claims") arising out of or in any way relating to the approval of this application, any actions taken by the City related to this entitlement, or any environmental review conducted under the California Environmental Quality Act, Public Resources Code Section 210000 et seq., for this entitlement and related actions. The indemnification shall include any Claims that may be asserted by any person or entity, including the permittee, arising out of or in connection with the approval of this application, whether or not there is concurrent, passive or active negligence on the part of the City, and any agency or instrumentality thereof, and its elected and appointed officials, officers, employees and agents. The permittee's duty to defend the City shall not apply in those instances when the permittee has asserted the Claims, although the permittee shall still have a duty to indemnify, protect and hold harmless the City.

II. ADDITIONAL CONDITIONS IMPOSED BY THE ZONING ADJUSTMENTS BOARD

Pursuant to BMC Section 23.404.050(H) Conditions of Approval, the Zoning Adjustments Board attaches the following additional conditions to this Permit:

Prior to Submittal of Any Building Permit:

15. **Project Liaison.** The applicant shall include in all building permit plans and post onsite the name and telephone number of an individual empowered to manage construction-related complaints generated from the project. The individual's name, telephone number, and responsibility for the project shall be posted at the project site for the duration of the project in a location easily visible to the public. The individual shall record all complaints received and actions taken in response, and submit written reports of such complaints and actions to the project planner on a weekly basis. Please designate the name of this individual below:

    ☐ **Project Liaison** _____

    Name Phone #

16. **Address Assignment.** The applicant shall file an "Address Assignment Request Application" with the Permit Service Center (1947 Center Street) for any address change or new address associated with this Use Permit. The new address(es) shall be assigned in accordance with BMC Section 16.28.030 Assignment and Installation of Numbers, and, except for new buildings on vacant lots, entered into the City's database after the building permit is issued but prior to final inspection.

17. **Bird Safe Buildings.** Prior to submittal of the building permit, the applicant shall demonstrate compliance with the applicable bird safe building provisions in BMC Section 23.304.150, Bird Safe Buildings.

18. **Construction Noise Reduction Program.** The applicant shall develop a site-specific noise reduction program prepared by a qualified acoustical consultant to reduce construction noise impacts to the maximum extent feasible, subject to review and approval of the Zoning Officer. The noise reduction program shall include the time limits for construction listed above, as measures needed to ensure that construction complies with BMC Section 13.40.070, Prohibited Acts. The noise reduction program should include, but shall not be limited to, the following available controls to reduce construction noise levels as low as practical:

    A. Construction equipment should be well maintained and used judiciously to be as quiet as practical.

    B. Equip all internal combustion engine-driven equipment with mufflers, which are in good condition and appropriate for the equipment.

    C. Utilize "quiet" models of air compressors and other stationary noise sources where technology exists. Select hydraulically or electrically powered equipment and avoid pneumatically powered equipment where feasible.

    D. Locate stationary noise-generating equipment as far as possible from sensitive receptors when adjoining construction sites. Construct temporary noise barriers or partial enclosures to acoustically shield such equipment where feasible.

E. Prohibit unnecessary idling of internal combustion engines.

F. If impact pile driving is required, pre-drill foundation pile holes to minimize the number of impacts required to seat the pile.

G. Construct solid plywood fences around construction sites adjacent to operational business, residences or other noise-sensitive land uses where the noise control plan analysis determines that a barrier would be effective at reducing noise.

H. Erect temporary noise control blanket barriers, if necessary, along building facades facing construction sites. This mitigation would only be necessary if conflicts occurred which were irresolvable by proper scheduling. Noise control blanket barriers can be rented and quickly erected.

I. Route construction related traffic along major roadways and away from sensitive receptors where feasible.

19. **Damage Due to Construction Vibration.** The project applicant shall submit screening level analysis prior to, or concurrent with demolition building permit. If a screening level analysis shows that the project has the potential to result in damage to structures, a structural engineer or other appropriate professional shall be retained to prepare a vibration impact assessment (assessment). The assessment shall consider project specific information such as the composition of the structures, location of the various types of equipment used during each phase of the project, as well as the soil characteristics in the project area, in order to determine whether project construction may cause damage to any of the structures identified as potentially impacted in the screening level analysis. If the assessment finds that the project may cause damage to nearby structures, the structural engineer or other appropriate professional shall recommend design means and methods of construction that to avoid the potential damage, if feasible. The assessment and its recommendations shall be reviewed and approved by the Building and Safety Division and the Zoning Officer. If there are no feasible design means or methods to eliminate the potential for damage, the structural engineer or other appropriate professional shall undertake study of existing conditions (study) of any structures (or, in case of large buildings, of the portions of the structures) that may experience damage.

    This study shall establish the baseline condition of these structures, including, but not limited to, the location and extent of any visible cracks or spalls; and include written descriptions and photographs.

    The study shall be reviewed and approved by the Building and Safety Division and the Zoning Officer prior to issuance of a grading permit. Upon completion of the project, the structures (or, in case of large buildings, of the portions of the structures) previously inspected will be resurveyed, and any new cracks or other changes shall be compared to pre-construction conditions and a determination shall be made as to whether the proposed project caused the damage. The findings shall be submitted to the Building and Safety Division and the Zoning Officer for review. If it is determined that project construction has resulted in damage to the structure, the damage shall be repaired to the pre-existing condition by the project sponsor, provided that the property owner approves of the repair

20. **Compliance with Conditions of Approval and Environmental Mitigations.** The building permit application is subject to verification of compliance of these Conditions of Approval. The applicant shall be responsible for demonstrating compliance with all conditions of approval and mitigation measures per the timeline set forth by this use permit. The applicant shall deposit $10,000 with the City, or less with the approval of the Zoning Officer, to pay for the cost of monitoring compliance with these Conditions of Approval and other applicable conditions and regulations. Should compliance-monitoring expenses exceed the initial deposit, the applicant shall deposit additional funds to cover such additional expenses upon the request of the Zoning Officer; any unused deposit will be refunded to the applicant.

Prior to Issuance of Any Building & Safety Permit (Demolition or Construction)

21. **Prior Rental Rate.** Pursuant to Government Code Section 66300.6(b)(3), any existing residents will be allowed to occupy their units until six months before the start of construction activities with proper notice and, if asked to leave, shall be allowed to return at their prior rental rate if the demolition does not proceed and the property is returned to the rental market.

22. **Occupied Units- Requirement for Relocation Expenses.** Pursuant to BMC Section 23.326.030(A)(5)(c) (prior demolition ordinance):

    (i) The applicant shall provide qualified tenants assistance with moving expenses equivalent to those in Chapter 13.84 (Relocation Services and Payments for Residential Tenant Households), and

    (ii) Shall subsidize the rent differential for a comparable replacement unit, in the same neighborhood if feasible, until new units are ready for occupancy. Funding for the rent differential shall be guaranteed in a manner approved by the City. The applicant shall submit proof of implementation that includes an overall building tenant relocation plan and relocation agreements all applicable tenant households prior to submittal for building permits.

23. **Sitting Tenants Rights.** Pursuant to BMC Section 23.326.030(A)(5)(d) (prior demolition ordinance):

    (i) Sitting tenants who are displaced as a result of demolition shall be provided the right of first refusal to move into the new building, and

    (ii) Tenants of units that are demolished shall have the right of first refusal to rent new below market rate units designated to replace the units that were demolished, at the rent that would have applied if they had remained in place, as long as their tenancy continues.

    (iii) Income restrictions do not apply to displaced tenants.

24. **Demolition.** Demolition of the existing building cannot commence until a complete application is submitted for the replacement building. In addition, all plans presented to the City to obtain a permit to allow the demolition are subject to these conditions.

25. **Construction Noise Management -** Public Notice Required. At least two weeks prior to initiating any construction activities at the site, the applicant shall provide notice to businesses and residents within 500 feet of the project site. This notice shall at a minimum provide the following: (1) project description, (2) description of construction activities during extended work hours and reason for extended hours, (3) daily construction schedule (i.e., time of day) and expected duration (number of months), (4) the name and phone number of the Project Liaison for the project that is responsible for responding to any local complaints, and (5) that construction work is about to commence. The liaison would determine the cause of all construction-related complaints (e.g., starting too early, bad muffler, worker parking, etc.) and institute reasonable measures to correct the problem. A copy of such notice and methodology for distributing the notice shall be provided in advance to the City for review and approval.

26. **Construction Phases.** The applicant shall provide the Zoning Officer with a schedule of major construction phases with start dates and expected duration, a description of the activities and anticipated noise levels of each phase, and the name(s) and phone number(s) of the individual(s) directly supervising each phase. The Zoning Officer or his/her designee shall have the authority to require an on-site meeting with these individuals as necessary to ensure compliance with these conditions. The applicant shall notify the Zoning Officer of any changes to this schedule as soon as possible.

27. **Construction and Demolition Diversion.** Applicant shall submit a Construction Waste Management Plan that meets the requirements of BMC Chapter 19.37 including 100 percent diversion of asphalt, concrete, excavated soil and land-clearing debris and a minimum of 65 percent diversion of other nonhazardous construction and demolition waste.

28. **Toxics.** The applicant shall contact the Toxics Management Division (TMD) at 1947 Center Street or (510) 981-7470 to determine which of the following documents are required and timing for their submittal:

    A. Phase I and Phase II Environmental Site Assessment (ESA) (per ASTM 1527). A recent Phase I ESA (less than 2 years old) shall be submitted to the Toxics Management Division for developments for: all new commercial, industrial and mixed-use developments and all improvement projects that require work 5 or more feet below grade, and all new residential buildings with more than four dwelling units located in the Environmental Management Area (or EMA). The EMA can be viewed at: City of Berkeley Community GIS Portal (arcgis.com)

    B. Depending on the findings in the Phase I, a Phase II or additional investigation may be necessary. Any available soils and groundwater analytical data available for projects listed in this section must also be submitted to TMD.

C. Environmental Site Clearance. The applicant shall provide environmental screening clearance from either the San Francisco Bay Regional Water Quality Control Board (RWQCB), Department of Toxic Substances Control (DTSC), or the Alameda County Department of Environmental Health's Local Oversight Program (LOP). Clearance from one of these regulatory agencies will ensure that the property meets development investigation and cleanup standards for the specific use proposed on the property. Environmental screening clearance shall be submitted to the City of Berkeley's Toxics Management Division prior to issuance of any building permits.

D. Soil and Groundwater Management Plan. A site-specific Soil and Groundwater Management Plan (SGMP) shall be submitted to Toxics Management Division (TMD) for all non-residential projects, and residential or mixed-use projects with more than four dwelling units, that: (1) are in the Environmental Management Area (EMA), as shown on the most recent City of Berkeley EMA map, and (2) propose any excavations deeper than 5 feet below grade or if significant soils removal is anticipated. The SGMP shall be submitted to the TMD with the project's building permit application and shall be approved by TMD prior to issuance of the building permit.

The SGMP shall comply with the hazardous materials and waste management standards required by BMC Section 15.12.100, the stormwater pollution prevention requirements of San Francisco Bay Regional Water Quality Control Board's Order No. R2-2009-0074, California hazardous waste generator regulations (Title 22 California Code of Regulations (CCR) 66260 et seq.), and the East Bay Municipal Utility District's Ordinance 311, and shall include the following:

- **i.** procedures for soil and groundwater management including identification of pollutants and disposal methods;
- **ii.** procedures to manage odors, dust and other potential nuisance conditions expected during development;
- **iii.** notification to TMD within 24 hours of the discovery of any previously undiscovered contamination; and
- **iv.** the name and phone number of the individual responsible for implementing the SGMP and who will respond to community questions or complaints.

TMD may require additional information or impose additional conditions as deemed necessary to protect human health and the environment. All requirements of the approved SGMP shall be deemed conditions of approval.

E. Demolitions & Renovations – Building Materials Survey. A hazardous materials survey for building materials and plans on hazardous materials and hazardous waste removal and disposal is required and must be prepared by qualified professionals, and submitted to the Toxics Management Division (TMD) prior to issuance of the building permit.

i. The survey shall include the identification of all materials to be disturbed for lead-based paints, PCB containing equipment and caulking, hydraulic fluids, refrigerants, treated wood, and mercury containing devices (including fluorescent light bulbs and mercury switches), asbestos and other hazardous materials and chemicals.

ii. If asbestos is identified, Bay Area Air Quality Management District Regulation 11-2-401.3 a notification must be made and the J number must be made available to the City of Berkeley Permit Service Center. Contractors must follow state regulations where there is asbestos-related work involving 100 square feet or more of asbestos containing material (8 Cal. Code Regs. §1529, §341.6 et seq.)

iii. The report to the TMD shall include, in addition to the survey, plans on hazardous materials and hazardous waste removal and disposal that comply with State and Federal codes including California Code of Regulations (CCR) 66260 et seq.

iv. Documentation evidencing disposal of hazardous waste in compliance with the survey shall be submitted to TMD within 30 days of the completion of the demolition.

Please note, the PCB Screening Form required by Public Works, Engineering, is a separate requirement and does not address the PCB identification requirement of the Toxics Management Division.

F. Hazardous Materials Business Plan. A Hazardous Materials Business Plan (HMBP) in compliance with BMC Section 15.12.040 and California Health & Safety Code, Chapter 6.95 Div. 20, shall be submitted to the Toxics Management Division through the California Environmental Reporting System: http://cers.calepa.ca.gov/ for chemicals used or stored on site during construction that exceed reporting thresholds. The reporting is required if your facility stores or handles hazardous materials in aggregate quantities equal to or greater than 55 gallons for liquids, 500 pounds for solids, or 200 cubic feet of compressed gases, or generates any quantity of hazardous waste. This includes welding gases, emergency generator fuel, paints, etc.

Additionally, the business occupant must submit an HMBP within 30 days of starting operations.

G. Petroleum Storage. An (SPCC) Plan is required to be prepared and implemented for facilities with any one of the following:

i. aggregate aboveground petroleum storage capacities of 1,320 gallons or more stored in aboveground storage containers, tanks, oil-filled equipment, or

ii. one or more tank(s) in an underground area (TIUGA) with petroleum storage capacities of 55 gallons or greater. More information on TIUGAs can be found here: https://osfm.fire.ca.gov/divisions/pipeline-safety-and-cupa/certified-unified-program-agency-cupa/aboveground-petroleum-storage-act/tank-in-an-underground-area-tiuga/

The SPCC plan must be prepared prior to beginning operations and you must submit facility information to Toxics Management Division (TMD) through the California Environmental Reporting System: http://cers.calepa.ca.gov/. The SPCC plan will be reviewed during the site inspection and shall not be submitted in CERS or to the TMD.

Prior to Issuance of Any Building (Construction) Permit

29. **Parcel Merger/Lot Line Adjustment.** The applicant shall secure approval of any parcel merger and/or lot line adjustment associated with this Use Permit.

30. **HVAC Noise Reduction.** Prior to the issuance of building permits, the project applicant shall submit plans that show the location, type, and design of proposed heating, ventilation, and cooling (HVAC) equipment. In addition, the applicant shall provide product specification sheets or a report from a qualified acoustical consultant showing that operation of the proposed HVAC equipment will meet the City's exterior noise requirements in BMC Section 13.40.050. The City's Planning and Development Department shall review the submitted plans, including the selected HVAC equipment, to verify compliance with exterior noise standards.

31. **Solar Photovoltaic (Solar PV) and Battery Energy Storage Systems (ESS).** A solar PV system shall be installed, subject to specific limited exceptions, as specified by the Berkeley Energy Code (BMC Chapter 19.36). Energy storage system (ESS) readiness (new single-family, duplex, and townhouse homes) or ESS installation (new multifamily and most nonresidential buildings) shall be completed as specified by BMC Chapter 19.36. Location of the solar PV system and the ESS, if applicable, shall be noted on the construction plans. (Project required to meet applicable code at time of building permit application, if different from above.)

32. **Recycling and Organics Collection.** Applicant shall provide recycling and organics collection areas for occupants, clearly marked on plans, which comply with the Alameda County Organics Reduction and Recycling Ordinance (2021-02). Contact the Zero Waste Division at RecyclingProgram@berkeleyca.gov.

33. **Public Works ADA.** Plans submitted for building permit shall include replacement of sidewalk, curb, gutter, and other streetscape improvements, as necessary to comply with current City of Berkeley standards for accessibility.

AFFORDABLE HOUSING REQUIREMENTS – RESIDENTIAL PROJECTS

34. **Affordable Housing Compliance Plan.** The final Affordable Housing Compliance Plan ("AHCP") must be certified by the Zoning Officer and the Department of Health, Housing, and Community Services prior to the issuance of Building Permit. Projects that receive approval from the Building Official for multiple phase construction permits must have the final AHCP certified prior to the issuance of the phase one building permit.

35. **Below Market Rate Units. Five** Very-Low Income, and **two** Low Income Below Market Rate rental dwelling units (BMR Units) shall be provided in the project. All affordable units provided pursuant to Section II, Density Bonus, of the permit Findings shall be designated as BMR Units. All BMR units are required to comply with the stricter of the State Density Bonus Law (Government Code Section 65915)**,** BMC Section 23.328.030(A) Affordable Housing Requirements**,** and BMC Section 23.326.030 Eliminating Dwelling Units through Demolition **(previous ordinance).** All affordable units provided as replacement units pursuant to the Staff Report shall be designated as BMR Units. Any Extremely-Low Income replacement units provided shall be classified as Very-Low Income units to fulfill State Density Bonus Law.

Summary table of project BMR units			
Code Section	**Extremely-Low Income (30% AMI)**	**Very-Low Income (50% AMI)**	**Low Income (80% AMI)**
BMC Chapter 23.328 (Inclusionary Housing)		5	2
State Density Bonus Law (Gov. Code Section 65915)		5	
BMC Chapter 23.326 (Demolition, prior version)		5	2
Total		5	2

36. **Regulatory Agreement.** If BMR units are provided, the owner shall enter into a Regulatory Agreement that implements Government Code Section 65915, BMC Section 23.328.030, and other provisions for BMR units included in this Use Permit. The Regulatory Agreement may include any terms and affordability standards determined by the City to be necessary to ensure such compliance. The Regulatory Agreement will secure the property's obligation to comply with the requirements for providing BMR units as defined by BMC Chapter 23.328 and State Density Bonus Law (Government Code Section 65915). The applicant shall submit the Regulatory Agreement to the Department of Health, Housing, and Community Services for review and approval. All BMR units are required to comply with the Regulatory Agreement and the BMR Administrative Guidelines. Regulatory Agreements must be executed prior to the issuance of Building Permit, or, in the case of projects that receive approval from the Building Official for multiple phase construction permits, prior to the issuance of the phase one building permit.

37. **Payment of Affordable Housing In-Lieu Fee.** The Affordable Housing In-Lieu Fee shall be paid as required by BMC Section 23.328.030(B) and Resolution 70,698 N.S. The fee for this project is $844,321,39. Any adjustments to the fee and the final fee amount will be determined prior to building permit issuance as part of the Affordable Housing Compliance Plan approval. The In-Lieu Fee shall be paid prior to the issuance of the first Certificate of Occupancy, or if no Certificate of Occupancy is required, prior to the final inspection of the Project. Nothing in these conditions shall be interpreted to prohibit, or to require modification of the Use Permit or Regulatory Agreement to allow, the provision of additional BMR units, or additional affordability, then are required in the foregoing provisions.

Prior to Demolition or Start of Construction:

38. **Construction Meeting.** The applicant shall request of the Zoning Officer an on-site meeting with City staff and key parties involved in the early phases of construction (e.g., applicant, general contractor, foundation subcontractors) to review these conditions and the construction schedule. The general contractor or applicant shall ensure that all subcontractors involved in subsequent phases of construction aware of the conditions of approval.

39. **Transportation Construction Plan.** The applicant and all persons associated with the project are hereby notified that a Transportation Construction Plan (TCP) may be required, particularly for the following activities:

    A. Alterations, closures, or blockages to sidewalks, pedestrian paths or vehicle travel lanes (including bicycle lanes);

    B. Storage of building materials, equipment, dumpsters, debris anywhere in the public ROW;

    C. Provision of exclusive contractor parking on-street; or

    D. Significant truck activity.

Please contact the Office of Transportation at (510) 981-7010, or 1947 Center Street, and ask to speak to a traffic engineer. In addition to other requirements of the Traffic Engineer, this plan shall include the locations of material and equipment storage, trailers, worker parking, a schedule of site operations that may block traffic, and provisions for traffic control. The TCP shall be stamped and signed by a registered engineer prior to submittal. The TCP shall be consistent with any other requirements of the construction phase. A current copy of this Plan shall be available at all times at the construction site for review by City Staff.

40. **Construction/No Parking Permits.** Contact the Permit Service Center (PSC) at 1947 Center Street or 981-7500 for details on obtaining Construction/No Parking Permits (and associated signs and accompanying dashboard permits). Please note that the Zoning Officer and/or Traffic Engineer may limit off-site parking of construction-related vehicles if necessary to protect the health, safety or convenience of the surrounding neighborhood.

During Construction:

41. **Construction Hours.** Construction activity shall be limited to between the hours of 8:00 AM and 6:00 PM on Monday through Friday, and between 9:00 AM and Noon on Saturday. No construction-related activity shall occur on Sunday or any Federal Holiday.

42. **Construction Hours- Exceptions.** It is recognized that certain construction activities, such as the placement of concrete, must be performed in a continuous manner and may require an extension of these work hours. Prior to initiating any activity that might require a longer period, the developer must notify the Zoning Officer and request an exception for a finite period of time. If the Zoning Officer approves the request, then two weeks prior to the expanded schedule, the developer shall notify businesses and residents within 500 feet of the project site describing the expanded construction hours. A copy of such notice and methodology for distributing the notice shall be provided in advance to the City for review and approval. The project shall not be allowed more than 15 extended working days.

43. **Project Construction Website.** The applicant shall establish a project construction website with the following information clearly accessible and updated monthly or more frequently as changes warrant.

    A. Contact information (i.e. “hotline” phone number, and email address) for the project construction manager

    B. Calendar and schedule of daily/weekly/monthly construction activities

    C. The final Conditions of Approval, Mitigation Monitoring and Reporting Program, Transportation Construction Plan, Construction Noise Reduction Program, and any other reports or programs related to construction noise, air quality, and traffic.

44. **Public Works - Implement Bay Area Air District (BAAD)-**Recommended Measures during Construction. For all proposed projects, BAAD recommends implementing all the Basic Construction Mitigation Measures, listed below to meet the best management practices threshold for fugitive dust:

    A. All exposed surfaces (e.g., parking areas, staging areas, soil piles, graded areas, and unpaved access roads) shall be watered two times per day.

B. All haul trucks transporting soil, sand, or other loose material off-site shall be covered.

C. All visible mud or dirt track-out onto adjacent public roads shall be removed using wet power vacuum street sweepers at least once per day. The use of dry power sweeping is prohibited.

D. All vehicle speeds on unpaved roads shall be limited to 15 mph.

E. All roadways, driveways, and sidewalks to be paved shall be completed as soon as possible. Building pads shall be laid as soon as possible after grading unless seeding or soil binders are used.

F. Idling times shall be minimized either by shutting equipment off when not in use or reducing the maximum idling time to 5 minutes (as required by the California airborne toxics control measure Title 13, Section 2485 of California Code of Regulations [CCR]). Clear signage shall be provided for construction workers at all access points.

G. All construction equipment shall be maintained and properly tuned in accordance with manufacturer specifications. All equipment shall be checked by a certified visible emissions evaluator.

H. Post a publicly visible sign with the telephone number and person to contact at the lead agency regarding dust complaints. This person shall respond and take corrective action within 48 hours. The Air District's phone number shall also be visible to ensure compliance with applicable regulations.

45. Air Quality - Diesel Particulate Matter Controls during Construction. All off-road construction equipment used for projects with construction lasting more than 2 months shall comply with one of the following measures:

A. The project applicant shall prepare a health risk assessment that demonstrates the project's on-site emissions of diesel particulate matter during construction will not exceed health risk screening criteria after a screening-level health risk assessment is conducted in accordance with current guidance from BAAD and OEHHA. The health risk assessment shall be submitted to the Land Use Planning Division for review and approval prior to the issuance of building permits; or

B. All construction equipment shall be equipped with Tier 2 or higher engines and the most effective Verified Diesel Emission Control Strategies (VDECS) available for the engine type (Tier 4 engines automatically meet this requirement) as certified by the California Air Resources Board (CARB). The equipment shall be properly maintained and tuned in accordance with manufacturer specifications.

C. In addition, a Construction Emissions Minimization Plan (Emissions Plan) shall be prepared that includes the following:

i. An equipment inventory summarizing the type of off-road equipment required for each phase of construction, including the equipment manufacturer, equipment identification number, engine model year, engine certification (tier rating), horsepower, and engine serial number. For all VDECS, the equipment inventory shall also include the technology type, serial number, make, model, manufacturer, CARB verification number level, and installation date.

ii. A Certification Statement that the Contractor agrees to comply fully with the Emissions Plan and acknowledges that a significant violation of the Emissions Plan shall constitute a material breach of contract. The Emissions Plan shall be submitted to the Public Works Department for review and approval prior to the issuance of building permits.

46. **Construction and Demolition Diversion.** Divert debris according to your plan and collect required documentation. Get construction debris receipts from sorting facilities in order to verify diversion requirements. Upload recycling and disposal receipts if using Green Halo and submit online for City review and approval prior to final inspection. Alternatively, complete the Construction Waste Management Plan and present it, along with your construction debris receipts, to the Building Inspector by the final inspection to demonstrate diversion rate compliance. The Zoning Officer may request summary reports at more frequent intervals, as necessary to ensure compliance with this requirement.

47. **Low-Carbon Concrete.** The project shall maintain compliance with the Berkeley Green Code (BMC Chapter 19.37) including use of concrete mix design with a cement reduction of at least 25 percent. Documentation on concrete mix design shall be available at all times at the construction site for review by City Staff. (Project required to meet applicable code at time of building permit application, if different from above.)

48. **Avoid Disturbance of Nesting Birds.** Initial site disturbance activities, including vegetation and concrete removal, shall be prohibited during the general avian nesting season (February 1 to August 30), if feasible. If nesting season avoidance is not feasible, the applicant shall retain a qualified biologist to conduct a preconstruction nesting bird survey to determine the presence/absence, location, and activity status of any active nests on or adjacent to the project site. The extent of the survey buffer area surrounding the site shall be established by the qualified biologist to ensure that direct and indirect effects to nesting birds are avoided. To avoid the destruction of active nests and to protect the reproductive success of birds protected by the MBTA and CFGC, nesting bird surveys shall be performed not more than 14 days prior to scheduled vegetation and concrete removal. In the event that active nests are discovered, a suitable buffer (typically a minimum buffer of 50 feet for passerines and a minimum buffer of 250 feet for raptors) shall be established around such active nests and no construction shall be allowed inside the buffer areas until a qualified biologist has determined that the nest is no longer active (e.g., the nestlings have fledged and are no longer reliant on the nest). No ground-disturbing activities shall occur within this buffer until the qualified biologist has confirmed that breeding/nesting is completed and the young have fledged the nest. Nesting bird surveys are not required for construction activities occurring between August 31 and January 31.

49. Archaeological Resources (*Ongoing throughout demolition, grading, and/or construction*). Pursuant to CEQA Guidelines section 15064.5(f), "provisions for historical or unique archaeological resources accidentally discovered during construction" should be instituted. Therefore:

A. In the event that any prehistoric or historic subsurface cultural resources are discovered during ground disturbing activities, all work within 50 feet of the resources shall be halted and the project applicant and/or lead agency shall consult with a qualified archaeologist, historian or paleontologist to assess the significance of the find.

B. If any find is determined to be significant, representatives of the project proponent and/or lead agency and the qualified professional would meet to determine the appropriate avoidance measures or other appropriate measure, with the ultimate determination to be made by the City of Berkeley. All significant cultural materials recovered shall be subject to scientific analysis, professional museum curation, and/or a report prepared by the qualified professional according to current professional standards.

C. In considering any suggested measure proposed by the qualified professional, the project applicant shall determine whether avoidance is necessary or feasible in light of factors such as the uniqueness of the find, project design, costs, and other considerations.

D. If avoidance is unnecessary or infeasible, other appropriate measures (e.g., data recovery) shall be instituted. Work may proceed on other parts of the project site while mitigation measures for cultural resources is carried out.

E. If significant materials are recovered, the qualified professional shall prepare a report on the findings for submittal to the Northwest Information Center.

50. Human Remains (*Ongoing throughout demolition, grading, and/or construction*). In the event that human skeletal remains are uncovered at the project site during ground-disturbing activities, all work shall immediately halt and the Alameda County Coroner shall be contacted to evaluate the remains, and following the procedures and protocols pursuant to Section 15064.5 (e)(1) of the CEQA Guidelines. If the County Coroner determines that the remains are Native American, the City shall contact the California Native American Heritage Commission (NAHC), pursuant to subdivision (c) of Section 7050.5 of the Health and Safety Code, and all excavation and site preparation activities shall cease within a 50-foot radius of the find until appropriate arrangements are made. If the agencies determine that avoidance is not feasible, then an alternative plan shall be prepared with specific steps and timeframe required to resume construction activities. Monitoring, data recovery, determination of significance and avoidance measures (if applicable) shall be completed expeditiously.

51. **Paleontological Resources (*Ongoing throughout demolition, grading, and/or construction*).** In the event of an unanticipated discovery of a paleontological resource during construction, excavations within 50 feet of the find shall be temporarily halted or diverted until the discovery is examined by a qualified paleontologist (per Society of Vertebrate Paleontology standards [SVP 1995,1996]). The qualified paleontologist shall document the discovery as needed, evaluate the potential resource, and assess the significance of the find. The paleontologist shall notify the appropriate agencies to determine procedures that would be followed before construction is allowed to resume at the location of the find. If the City determines that avoidance is not feasible, the paleontologist shall prepare an excavation plan for mitigating the effect of the project on the qualities that make the resource important, and such plan shall be implemented. The plan shall be submitted to the City for review and approval.

52. **Halt Work/Unanticipated Discovery of Tribal Cultural Resources.** In the event that cultural resources of Native American origin are identified during construction, all work within 50 feet of the discovery shall be redirected. The project applicant and project construction contractor shall notify the City Planning Department within 24 hours. The City will again contact any tribes who have requested consultation under AB 52, as well as contact a qualified archaeologist, to evaluate the resources and situation and provide recommendations. If it is determined that the resource is a tribal cultural resource and thus significant under CEQA, a mitigation plan shall be prepared and implemented in accordance with State guidelines and in consultation with Native American groups. If the resource cannot be avoided, additional measures to avoid or reduce impacts to the resource and to address tribal concerns may be required.

53. **Stormwater Requirements.** The applicant shall demonstrate compliance with the requirements of the City's National Pollution Discharge Elimination System (NPDES) permit as described in BMC Section 17.20. The following conditions apply:

    A. The project plans shall identify and show site-specific Best Management Practices (BMPs) appropriate to activities conducted on-site to limit to the maximum extent practicable the discharge of pollutants to the City's storm drainage system, regardless of season or weather conditions.

    B. Trash enclosures and/or recycling area(s) shall be covered; no other area shall drain onto this area. Drains in any wash or process area shall not discharge to the storm drain system; these drains should connect to the sanitary sewer. Applicant shall contact the City of Berkeley and EBMUD for specific connection and discharge requirements. Discharges to the sanitary sewer are subject to the review, approval and conditions of the City of Berkeley and EBMUD.

    C. Landscaping shall be designed with efficient irrigation to reduce runoff, promote surface infiltration and minimize the use of fertilizers and pesticides that contribute to stormwater pollution. Where feasible, landscaping should be designed and operated to treat runoff. When and where possible, xeriscape and drought tolerant plants shall be incorporated into new development plans.

D. Design, location and maintenance requirements and schedules for any stormwater quality treatment structural controls shall be submitted to the Department of Public Works for review with respect to reasonable adequacy of the controls. The review does not relieve the property owner of the responsibility for complying with BMC Chapter 17.20 and future revisions to the City's overall stormwater quality ordinances. This review shall be shall be conducted prior to the issuance of a Building Permit.

E. All paved outdoor storage areas must be designed to reduce/limit the potential for runoff to contact pollutants.

F. All on-site storm drain inlets/catch basins must be cleaned at least once a year immediately prior to the rainy season. The property owner shall be responsible for all costs associated with proper operation and maintenance of all storm drainage facilities (pipelines, inlets, catch basins, outlets, etc.) associated with the project, unless the City accepts such facilities by Council action. Additional cleaning may be required by City of Berkeley Public Works Engineering Dept.

G. All private or public projects that create and/or replace 5,000 square feet or more of impervious surface must comply with Provision C.3 of the Alameda County NPDES permit and must incorporate stormwater controls to enhance water quality. Permit submittals shall include a Stormwater Requirement Checklist and detailed information showing how the proposed project will meet Provision C.3 stormwater requirements, including a) Site design measures to reduce impervious surfaces, promote infiltration, and reduce water quality impacts; b) Source Control Measures to keep pollutants out of stormwater runoff; c) Stormwater treatment measures that are hydraulically sized to remove pollutants from stormwater; d) an O & M (Operations and Maintenance) agreement for all stormwater treatment devices and installations; and e) Engineering calculations for all stormwater devices (both mechanical and biological). (Project required to meet applicable code at time of building permit application, if different from above.)

H. All on-site storm drain inlets must be labeled “No Dumping – Drains to Bay” or equivalent using methods approved by the City.

I. Most washing and/or steam cleaning must be done at an appropriately equipped facility that drains to the sanitary sewer. Any outdoor washing or pressure washing must be managed in such a way that there is no discharge or soaps or other pollutants to the storm drain. Sanitary connections are subject to the review, approval and conditions of the sanitary district with jurisdiction for receiving the discharge.

J. All loading areas must be designated to minimize “run-on” or runoff from the area. Accumulated waste water that may contribute to the pollution of stormwater must be drained to the sanitary sewer or intercepted and pretreated prior to discharge to the storm drain system. The property owner shall ensure that BMPs are implemented to prevent potential stormwater pollution. These BMPs shall include, but are not limited to, a regular program of sweeping, litter control and spill cleanup.

K. Restaurants, where deemed appropriate, must be designed with a contained area for cleaning mats, equipment and containers. This contained wash area shall be covered or designed to prevent run-on or run-off from the area. The area shall not discharge to the storm drains; wash waters should drain to the sanitary sewer, or collected for ultimate disposal to the sanitary sewer. Employees shall be instructed and signs posted indicating that all washing activities shall be conducted in this area. Sanitary connections are subject to the review, approval and conditions of the waste water treatment plant receiving the discharge.

L. Sidewalks and parking lots shall be swept regularly to prevent the accumulation of litter and debris. If pressure washed, debris must be trapped and collected to prevent entry to the storm drain system. If any cleaning agent or degreaser is used, wash water shall not discharge to the storm drains; wash waters should be collected and discharged to the sanitary sewer. Discharges to the sanitary sewer are subject to the review, approval and conditions of the sanitary district with jurisdiction for receiving the discharge.

M. The applicant is responsible for ensuring that all contractors and sub-contractors are aware of and implement all stormwater quality control measures. Failure to comply with the approved construction BMPs shall result in the issuance of correction notices, citations, or a project stop work order.

54. **Public Works.** Subject to approval of the Public Works Department, the applicant shall repair any damage to public streets and/or sidewalks by construction vehicles traveling to or from the project site.

55. **Public Works.** All piles of debris, soil, sand, or other loose materials shall be covered at night and during rainy weather with plastic at least one-eighth millimeter thick and secured to the ground.

56. **Public Works.** The applicant shall ensure that all excavation accounts for surface and subsurface waters and underground streams so as not to adversely affect adjacent properties and rights-of-way.

57. **Public Works.** The project sponsor shall maintain sandbags or other devices around the site perimeter during the rainy season to prevent on-site soils from being washed off-site and into the storm drain system. The project sponsor shall comply with all City ordinances regarding construction and grading.

58. **Public Works.** Prior to any excavation, grading, clearing, or other activities involving soil disturbance during the rainy season the applicant shall obtain approval of an erosion prevention plan by the Building and Safety Division and the Public Works Department. The applicant shall be responsible for following these and any other measures required by the Building and Safety Division and the Public Works Department.

59. **Public Works.** The removal or obstruction of any fire hydrant shall require the submission of a plan to the City's Public Works Department for the relocation of the fire hydrant during construction.

60. **Public Works / Building and Safety.** If underground utilities leading to adjacent properties are uncovered and/or broken, the contractor involved shall immediately notify the Public Works Department and the Building & Safety Division, and carry out any necessary corrective action to their satisfaction.

Prior to Final Inspection or Issuance of Occupancy Permit:

61. **Percent for Public Art.** Consistent with BMC Section 23.316, the applicant shall either pay the required in-lieu fee or provide the equivalent amount in a financial guarantee to be released after installation of the On-Site Publicly Accessible Art .

62. **Compliance with Conditions.** The project shall conform to the plans and statements in the Use Permit. The developer is responsible for providing sufficient evidence to demonstrate compliance with the requirements throughout the implementation of this Use Permit.

63. All landscape, site and architectural improvements shall be completed per the attached approved drawings received October 22, 2025.

64. **Transportation Demand Management.** Prior to issuance of a Certificate of Occupancy, the property owner shall facilitate a site inspection by Land Use Division staff to confirm that the physical improvements required in BMC Sections 23.334.030(C) and 23.322.090 (bike parking) have been installed. A Parking and Transportation Demand Management (PTDM) compliance report documenting that the programmatic measures required in BMC Sections 23.334.030(C) and 23.322.090 are implemented shall be submitted to the Land Use Division prior to occupancy, and on an annual basis thereafter, which demonstrates that the project is compliant with the applicable requirements in these sections.

    A. Consistent with BMC Section 23.334.030(A), all parking spaces provided for residents be leased or sold separate from the rental or purchase of dwelling units for the life of the dwelling units. The property owner shall notify all residents of this restriction in leases and/or contracts, and shall provide sample leases and/or contracts including such notification to the project planner prior to issuance of Certificate of Occupancy or final inspection.

    B. Consistent with BMC Section 23.334.030(C), publicly-available, real-time transportation information in a common area, such as a lobby or elevator bay, on televisions, computer monitors or other displays readily visible to residents and/or visitors, shall be provided. Transportation information shall include, but is not limited to, transit arrivals and departures for nearby transit routes.

    C. Property owners may be required to pay administrative fees associated with compliance with this Condition.

At All Times:

65. **Compliance with Approved Plan.** The project shall conform to the plans and statements in the Use Permit.

66. **Transportation Demand Management Compliance.** A Transportation Demand Management compliance report shall be submitted to the Zoning Officer, on a form acceptable to the City, prior to occupancy, and on an annual basis for ten years thereafter, which demonstrates that the project complies with the applicable requirements. After three years of timely compliant submittals, staff has the option to accept less frequent submittals (minimum one every three years). Property owners may be required to pay administrative fees associated with compliance with this Condition, pursuant to BMC Section 23.334.040(B).
67. **Exterior Lighting.** All exterior lighting shall be energy efficient where feasible; and shielded and directed downward and away from property lines to prevent excessive glare beyond the subject property.
68. **Rooftop Projections.** No additional rooftop or elevator equipment shall be added to exceed the approved maximum roof height without submission of an application for a Use Permit Modification, subject to Board review and approval.
69. **Drainage Patterns.** The applicant shall establish and maintain drainage patterns that do not adversely affect adjacent properties and rights-of-way. Drainage plans shall be submitted for approval of the Building & Safety Division and Public Works Department, if required.
70. **Electrical Meter.** Only one electrical meter fixture may be installed per dwelling unit.
71. **Loading.** All loading/unloading activities associated with deliveries to all uses shall be restricted to the hours of 7:00 a.m. to 10:00 p.m. daily.
72. **Residential Permit Parking.** No Residential Permit Parking (RPP) permits shall be issued to project residents, nor shall commercial placards be issued to non-residential occupants and/or users of the site. The Finance Department, Customer Service Center shall add these addresses to the list of addresses ineligible for RPP permits. The property owner shall notify all tenants of rental units, and/or buyers of condominium units, of this restriction in leases and/or contracts.
73. **Required Bike Parking.** Secure and on-site bike parking for at least 7 bicycles (exterior/short-term) shall be provided for the life of the building.

2298 Durant Ave. Neighborhood Meeting Report:

The neighborhood meeting was held via Zoom at 12 Noon on 09/04/2024. Flyers advertising the meeting were sent to the list of Residents, Owners, and Neighborhood Groups within 300' of the project site.

Attendance:

- Kim N: Neighbor
- Austin Springer: Studio KDA (Architect) (Host)
- Darshan Amrit: Studio KDA (Architect)
- Pepe: Valiance Capital (Development Team)
- Nhan Nguyen Le: Valiance Capital (Development Team)

The presentation started at 12:05 and briefly covered the project, including site history/location, new building statistics, affordability, landscaping, amenities, façade, and anticipated approval and construction timelines. Pages from the project application as well as a short video rendering of the building were shown before opening the floor to questions/concerns from the public.

Feedback:

Kim N raised the following questions/concerns and Austin from Studio KDA made the following responses (in **Red**)

- *What is the anticipated construction timeline? Specifically, when is demolition going to start?*

  We are hoping to break ground on the project sometime in Summer of 2025 so that we can complete the ~20-24 Month construction in time for the Fall 2027 school year.

- *It is really big.*

  While the project is indeed significantly larger than the existing surroundings, it is perfectly in line with the vision that the City of Berkeley has in mind for this neighborhood. The City passed a new Southside Zoning Plan earlier this year that allows for buildings up to 85' and 8 stories in this zone and others in the Southside. There are a few buildings of this scale under construction now, and more in the pipeline, including some that are significantly taller (note a 21-Story proposal just up the street that was recently submitted).

- *It seems that you are proposing to bring the building all the way out to the sidewalk.*

  Yes, the building is proposed to abut the sidewalk on this project. While at other projects in the past we have strategically set the building back, this site is lucky enough to have very generous sidewalks (12' on the Ellsworth side and 16' on Durant) such that we didn't feel that it was necessary to step the building back from the street any further than the property line.

The meeting concluded at 12:19 pm

Chapter 23.326
DEMOLITION AND DWELLING UNIT CONTROL

Sections:

23.326.010 Chapter Purpose.
23.326.020 General Requirements.
23.326.030 Eliminating Dwelling Units through Demolition.
23.326.040 Eliminating Dwelling Units through Conversion and Change of Use.
23.326.050 Private Right of Action.
23.326.060 Elimination of Residential Hotel Rooms.
23.326.070 Demolitions of Non-Residential Buildings.
23.326.080 Building Relocations.
23.326.090 Limitations.

23.326.010 Chapter Purpose.

This chapter establishes demolition and dwelling unit control standards that promote the affordable housing, aesthetic, and safety goals of the City.

23.326.020 General Requirements.

A. *Applicability.* No dwelling unit or units may be eliminated or demolished except as authorized by this chapter.

B. *Findings.* In addition to the requirements below, the Zoning Adjustments Board (ZAB) may approve a Use Permit to eliminate or demolish a dwelling unit only upon finding that eliminating the dwelling unit would not be materially detrimental to the housing needs and public interest of the affected neighborhood and Berkeley.

23.326.030 Eliminating Dwelling Units through Demolition.

A. *Buildings with Two or More Units Constructed Before June 1980.*

1. *Applicability.* This subsection only applies to building with two or more units constructed before June 1980.

2. *Limitation.*

(a) Demolition is not allowed if:

i. The building was removed from the rental market under the Ellis Act during the preceding five years; or

ii. There have been verified cases of harassment or threatened or actual illegal eviction during the immediately preceding three years.

(b) Where allegations of harassment or threatened or actual illegal eviction are in dispute, either party may request a hearing before a Rent Board Hearing Examiner. The Rent Board Hearing Examiner will provide an assessment of the evidence and all available documentation to the ZAB. The ZAB shall determine whether harassment or threatened or actual illegal eviction occurred.

3. *Findings.* The ZAB may approve a Use Permit to demolish a building constructed before June 1980 on a property containing two or more dwelling units if any of the following are true:

(a) The building containing the units is hazardous or unusable and is infeasible to repair.

(b) The building containing the units will be moved to a different location within Berkeley with no net loss of units and no change in the affordability levels of the units.

(c) The demolition is necessary to permit construction of special housing needs facilities such as, but not limited to, childcare centers and affordable housing developments that serve the greater good of the entire community.

(d) The demolition is necessary to permit construction approved pursuant to this chapter of at least the same number of dwelling units.

4. *Fee Required.*

(a) The applicant shall pay a fee for each unit demolished to mitigate the impact of the loss of affordable housing in Berkeley.

(b) The amount of the fee shall be set by resolution of the City Council.

(c) *In Lieu of a Fee.*

i. In lieu of paying the impact fee, the applicant may provide a designated unit in the new project at a below market rate to a qualifying household in perpetuity.

ii. The affordability level of the below market rent and the income level of the qualifying household shall be set by resolution of the City Council.

iii. The applicant shall enter into a regulatory agreement with the City of Berkeley to provide the in lieu units.

5. *Occupied Units.*

(a) *Applicability.*

i. The requirements in this subsection apply if units to be demolished are occupied.

ii. These requirements do not apply to tenants who move in after the application for demolition is submitted to the City if the owner informs each prospective tenant about the proposed demolition and that demolition constitutes good cause for eviction.

(b) *Notice.* The applicant shall provide all sitting tenants notice of the application to demolish the building no later than the date it is submitted to the City, including notice of their rights under Municipal Code Section 13.76 (Rent Stabilization and Eviction for Good Cause Program).

(c) *General Requirements.*

i. The applicant shall provide assistance with moving expenses equivalent to in Chapter 13.84 (Relocation Services and Payments for Residential Tenant Households).

ii. The applicant shall subsidize the rent differential for a comparable replacement unit, in the same neighborhood if feasible, until new units are ready for occupancy. Funding for the rent differential shall be guaranteed in a manner approved by the City.

iii. *Exception.* An applicant who proposes to construct a 100 percent affordable housing project is not required to comply with this subsection but must comply with the Uniform Relocation Assistance and Real Property Acquisition Policies Act of 1970 as amended and the California Relocation Act (Government Code sections 7260 et seq.).

(d) *Sitting Tenants Rights.*

i. Sitting tenants who are displaced as a result of demolition shall be provided the right of first refusal to move into the new building.

ii. Tenants of units that are demolished shall have the right of first refusal to rent new below-market rate units designated to replace the units that were demolished, at the rent that would have applied if they had remained in place, as long as their tenancy continues.

iii. Income restrictions do not apply to displaced tenants.

iv. *Exception.*

(1) An applicant who proposes to construct a 100 percent affordable housing project is not required to comply with 23.326.030.A.5.a, b, and c, but must comply with the following requirement.

(2) Sitting tenants who are displaced as a result of demolition and who desire to return to the newly constructed building will be granted a right of first refusal subject to their ability to meet income qualifications and other applicable eligibility requirements when the new units are ready for occupancy.

B. *Buildings with a Single Dwelling Unit.*

1. *Applicability.* This subsection only applies to buildings with a single dwelling unit.

2. *Limitation.*

(a) Demolition is not allowed if:

i. The building was removed from the rental market under the Ellis Act during the preceding five years; or

ii. There have been verified cases of harassment or threatened or actual illegal eviction during the immediately preceding three years.

(b) Where allegations of harassment or threatened or actual illegal eviction are in dispute, either party may request a hearing before a Rent Board Hearing Examiner. The Rent Board Hearing Examiner will provide an assessment of the evidence and all available documentation to the ZAB. The ZAB shall determine whether harassment or threatened or actual illegal eviction occurred.

C. *Accessory Buildings.* Notwithstanding anything in Municipal Code Title 23 (Zoning Ordinance) to the contrary, but subject to any applicable requirements in Municipal Code Section 3.24 (Landmarks Preservation Ordinance), accessory buildings of any size, including, but not limited to, garages, carports, and sheds, but not including any structure containing a lawfully established dwelling unit, which serves and is located on the same lot as a lawful residential use, may be demolished by right.

23.326.040 Eliminating Dwelling Units through Conversion and Change of Use.

A. *General.* The ZAB may approve a Use Permit for the elimination of a dwelling unit in combination with another dwelling unit used for occupancy by a single household if it finds that:

1. The existing number of dwelling units exceeds maximum residential density in the district where the building is located; and

2. One of the following is true:

(a) One of the affected dwelling units has been occupied by the applicant's household as its principal place of residence for no less than two years before the date of the application and none of the affected units are currently occupied by a tenant.

(b) All of the affected dwelling units are being sold by an estate and the decedent occupied the units as their principal residence for no less than two years before the date of their death.

B. *Limitations.*

1. Demolition is not allowed if:

(a) The building was removed from the rental market under the Ellis Act during the preceding five years; or

(b) There have been verified cases of harassment or threatened or actual illegal eviction during the immediately preceding three years.

2. Where allegations of harassment or threatened or actual illegal eviction are in dispute, either party may request a hearing before a Rent Board Hearing Examiner. The Rent Board Hearing Examiner will provide an assessment of the evidence and all available documentation to the ZAB. The ZAB shall determine whether harassment or threatened or actual illegal eviction occurred.

C. *Effect of Noncompliance with the Two-Year Requirement.*

1. If a unit eliminated under Subsection A (General) is not occupied by the applicant's household for at least two consecutive years from the date of elimination, the affected unit must be restored to separate status.

2. This requirement shall be implemented by a condition of approval and a notice of limitation on the property, acceptable to the City of Berkeley.

3. The condition and notice will provide that if the owner's household does not occupy the unit for at least two years from the date of elimination the affected units must either be restored as separate dwelling units and the vacant unit(s) offered for rent within six months or the owner must pay a fee of $75,000 in 2013 dollars, adjusted in May of each year according to the Consumer Price Index for the San Francisco Bay Area. The fee shall be deposited into the City of Berkeley's Housing Trust Fund.

4. The City of Berkeley may exempt an applicant from the two-year residency requirement if of an unforeseeable life change that requires relocation.

D. *Effect of Eliminating a Dwelling Unit.*

1. If eliminating a dwelling unit reduces the number of units in a building to four, the applicant shall record a notice of limitation against the subject property that the limitation on eviction of tenants under Chapter 13 (Public Peace, Morals and Welfare) shall continue to apply until:

(a) The building is demolished; or

(b) Sufficient units are added or restored such that the building contains at least five units.

2. The Zoning Officer may issue an AUP for a building conversion which eliminates a dwelling unit upon finding that the conversion will restore or bring the building closer to the original number of dwelling units that was present at the time it was first constructed, provided the conversion meets the requirements 23.326.040.A.1 and 2 and 23.326.040.B and C.

E. *Exceptions.*

1. The ZAB may approve a Use Permit for a change of use to a community care or a child care facility which eliminates a dwelling unit if it finds that such use is in conformance with the regulations of the district in which it is located.

2. The ZAB may approve a Use Permit to eliminate a dwelling unit through combination with another dwelling unit for the purpose of providing private bathrooms, kitchenettes, accessibility upgrades, and/or seismic safety upgrades to single-residential occupancy rooms in residential developments undergoing a publicly-funded rehabilitation.

3. Notwithstanding the general Use Permit requirement under 23.326.020 (General Requirements), a lawfully established accessory dwelling unit that is not a controlled rental unit may be eliminated with a Zoning Certificate if:

(a) The re-conversion restores the original single-family use of the main building or lot; and

(b) No tenant is evicted.

23.326.050 Private Right of Action.

Any affected tenant may bring a private action for injunctive and/or compensatory relief against any applicant and/or owner to prevent or remedy a violation of Sections 23.326.030 (Eliminating Dwelling Units through Demolition) and 23.326.040 (Eliminating Dwelling Units through Conversion and Change of Use). In any such action a prevailing plaintiff may recover reasonable attorney's fees.

23.326.060 Elimination of Residential Hotel Rooms.

A. *General Requirements.* Before removal, the following requirements must be met for the ZAB to approve a Use Permit for the elimination of residential hotel rooms:

1. The residential hotel owner shall provide or cause to be provided standard housing of at least comparable size and quality, at comparable rents and total monthly or weekly charges to each affected tenant.

2. One of the following three requirements shall be met:

(a) The residential hotel rooms being removed are replaced by a common use facility, including, but not limited to, a shared kitchen, lounge, or recreation room, that will be available to and primarily of benefit to the existing residents of the residential hotel and that a majority of existing residents give their consent to the removal of the rooms.

(b) Before the date on which the residential hotel rooms are removed, one-for-one replacement of each room to be removed is made, with a comparable room, in one of the methods set forth in this section.

(c) Residential hotel rooms are removed because of building alterations related to seismic upgrade to the building or to improve access to meet the requirements of the American Disabilities Act (ADA).

B. *Criteria for Replacement Rooms.* For purposes of this section, replacement rooms must be:

1. Substantially comparable in size, location, quality, and amenities;

2. Subject to rent and eviction controls substantially equivalent to those provided by the Rent Stabilization Ordinance or those that applied to the original rooms which are being replaced; and

3. Available at comparable rents and total monthly or weekly charges to those being removed. Comparable rooms may be provided by:

(a) Offering the existing tenants of the affected rooms the right of first refusal to occupy the replacement rooms;

(b) Making available comparable rooms, which are not already classified as residential hotel rooms to replace each of the rooms to be removed; or

(c) Paying to the City of Berkeley's Housing Trust Fund an amount sufficient to provide replacement rooms.

i. The amount to be paid to the City of Berkeley shall be the difference between the replacement cost, including land cost, for the rooms and the amount which the City of Berkeley can obtain by getting a mortgage on the anticipated rents from the newly constructed rooms.

ii. The calculations shall assume that rents in the newly constructed rooms shall not exceed the greater of either a level comparable to the weekly or monthly charges for the replaced rooms or the level which would be charged if no current tenant paid more than 30 percent of such tenant's gross income for rent.

C. *Exception for Non-Profit Ownership.* In a residential hotel owned and operated by a non-profit organization, recognized as tax-exempt by either the Franchise Tax Board and/or the Internal Revenue Service, residential hotel rooms may be changed to non-residential hotel room uses if the average number of residential hotel rooms per day in each calendar year is at least 95 percent of residential hotel rooms established for that particular residential hotel.

23.326.070 Demolitions of Non-Residential Buildings.

A. *Main Non-Residential Buildings.* A main building used for non-residential purposes may be demolished with a Use Permit.

B. *Accessory Buildings.*

1. Demolishing an accessory building with less than 300 square feet of floor area is permitted as of right.

2. An accessory building with 300 square feet or more of floor area may be demolished with an AUP.

C. *Landmarks Preservation Commission Review.*

1. Any application for a Use Permit or AUP to demolish a non-residential building or structure which is 40 or more years old shall be forwarded to the Landmarks Preservation Commission (LPC) for review before consideration of the Use Permit or AUP.

2. The LPC may initiate a landmark or structure-of-merit designation or may choose solely to forward to the ZAB its comments on the application.

3. The ZAB shall consider the recommendations of the LPC in when acting on the application.

D. *Findings.* A Use Permit or an AUP for demolition of a non-residential building or structure may be approved only if the ZAB or the Zoning Officer finds that:

1. The demolition will not be materially detrimental to the commercial needs and public interest of any affected neighborhood or the City of Berkeley; and

2. The demolition:

(a) Is required to allow a proposed new building or other proposed new use;

(b) Will remove a building which is unusable for activities which are compatible with the purposes of the district in which it is located or which is infeasible to modify for such uses;

(c) Will remove a structure which represents an inhabitable attractive nuisance to the public; or

(d) Is required for the furtherance of specific plans or projects sponsored by the City of Berkeley or other local district or authority upon a demonstration that it is infeasible to obtain prior or concurrent approval for the new construction or new use which is contemplated by such specific plans or projects and that adhering to such a requirement would threaten the viability of the plan or project.

23.326.080 Building Relocations.

A. *Treatment of Building Relocation.*

1. Relocating a building from a lot is considered a demolition for purposes of this chapter.

2. Relocating a building to a lot is considered new construction and is subject to all requirements applicable to new construction.

3. When a building is relocated to a different lot within in Berkeley, the lot from which the building is removed shall be known as the source lot and the lot on which the building is to be sited shall be known as the receiving lot. In such cases all notification requirements apply to both the source and receiving lots.

B. *Findings.* The ZAB may approve a Use Permit to relocate a building upon finding that:

1. The building to be relocated is not in conflict with the architectural character, or the building scale of the neighborhood or area to which it will be relocated; and

2. The receiving lot provides adequate separation of buildings, privacy, yards, and usable open space.

23.326.090 Limitations.

A. *Unsafe, Hazard, or Danger.*

1. Notwithstanding anything to the contrary, if a building or structure is unsafe, presents a public hazard, and is not securable and/or is in imminent danger of collapse so as to endanger persons or property, as determined by the city's building official, it may be demolished without a Use Permit.

2. The Building Official's determination in this matter shall be governed by the standards and criteria in the most recent edition of the California Building Code that is in effect in the City of Berkeley.

B. *Ellis Act.* This chapter shall be applied only to the extent permitted by state law as to buildings which have been entirely withdrawn from the rental market pursuant to the Ellis Act (California Government Code Chapter 12.75).

Rent Stabilization Board

January 14, 2025

To: Allison Riemer, Planner, Planning & Development Department

From: Matt Brown, General Counsel
By: Katrina Lapira, Associate Planner

Subject: **2298 Durant Avenue (2360 Ellsworth Street)**

On December 2, 2024, a message was shared with Lief Bursell informing him of a new development application that would require the demolition of an existing building with seven units at 2360 Ellsworth Street. The project would create a new 8-story residential building with 66 new dwelling units, five of which are identified as below-market rate (BMR) units on the lots addressed as 2298 Durant Avenue and 2360 Ellsworth Street. You requested that we provide information related to the property's rental history and status under the Rent Stabilization and Eviction for Good Cause Ordinance ("Ordinance") that are relevant to Berkeley Municipal Code (BMC) Chapter 23.326 ("Demolition Ordinance").

Property History

Alameda County records show that 2360 Ellsworth is owned by Cascade Capital -BMF I, LLC as of April 1, 2013. Consistent with Rent Stabilization Board Records, City of Berkeley records indicate that the property includes a seven-unit, three-story multifamily dwelling building.

Rental History and Rent Control Status

Rent Stabilization Board records show that all seven units are currently rented and registered with the Rent Board. All tenancies began in 2024. All tenancies are rent-controlled and are fully subject to the Ordinance.

Current Tenancies (as of January 6, 2025):

Unit Address	Occupancy Status	Current Tenancy Start Date
2360 Ellsworth #A	Rented	08/01/2024
2360 Ellsworth #B	Rented	08/01/2024
2360 Ellsworth #C	Rented	08/01/2024
2360 Ellsworth #D	Rented	08/01/2024
2360 Ellsworth #E	Rented	06/01/2024
2360 Ellsworth #F	Rented	06/01/2024
2360 Ellsworth #PH	Rented	09/02/2024

Ellis Act

The building at 2360 Ellsworth has not been removed from the rental market under the Ellis Act at any time during the preceding five (5) years.

Harassment or Illegal Eviction

The Rent Stabilization Board has no record of any verified cases of harassment or threatened or actual illegal evicting occurring for the rental units at 2360 Ellsworth.

BMC 23.326 and SB 330

On August 6, 2024, a complete Housing Crisis Act of 2019 Senate Bill (SB) 330 pre-application was submitted for the subject development project and is therefore vested in the ordinances in effective at the time of application. Since a complete preliminary application was received prior to August 10, 2024 the effective date of the updated Berkeley Municipal Code (BMC) Chapter 23.326 (Demolition Ordinance), the application is subject to the provisions of the Demolition Ordinance that became effective in 2016.

Both Berkeley Municipal Code (BMC) Chapter 23.326 and Housing Crisis Act of 2019 Senate Bill (SB) 330 apply to this project. Both regulations require certain tenant protections, such as the right of first refusal and relocation assistance. However, SB 330 does not supersede local ordinances with greater restrictions on the demolition of residential dwelling units or local ordinances that require greater relocation assistance to displaced households (Cal. Gov. Code 66300.6(c). For instance, tenant relocation protections in BMC 23.326 are greater than those provided by SB 330, but they only apply to sitting tenants at the time the application for demolition is submitted to the City. Tenants who move in after the application is submitted would qualify for the less protective relocation requirements in SB 330 if the owner informed them about the proposed demolition and that demolition constitutes good cause for eviction.

Under Berkeley's Demolition Ordinance, returning tenants have the right to rent the new replacement unit at the rent level that would have applied if they remained in their former unit. Landlords may petition the Board for a rent adjustment on the new unit pursuant to the rules associated with the addition of space/services.

Mitigating the Loss of Rent-Controlled Units

The development application proposes to create five BMR units, but the application does not indicate that the proposed BMR units would be considered as the replacement of the rent-controlled units to be demolished.

On December 21, 2023, the Berkeley Rent Board passed Resolution 23-43, which authorizes the Rent Board's Executive Director or the Rent Board Chairperson to appeal decisions of the Zoning Adjustment Board that allow for the elimination of rent-controlled residential units without adequately mitigating their loss with at least an equal number of permanently affordable replacement units.

The Rent Board has worked closely with the City Council, through the 4x4 Joint Task Force Committee on Housing, to put forth a policy that requires one-for-one replacement of rent-controlled units with at least an equal number of below-market-rate

replacement units. This policy is reflected in both the Demolition Ordinance that applies to this project and the replacement provisions in the newly amended Demolition Ordinance that was passed by City Council on June 25, 2024.

2360 Ellsworth contains seven rent-controlled units, and their loss would only be mitigated by the creation of an equal number of BMR replacement units. The applicant proposes only five BMR replacement units. **This proposal does not adequately mitigate the loss of the existing rent-controlled units. The Rent Board strongly recommends the application be amended to include one-for-one replacement of all existing dwelling units with at least the same number of permanently affordable below-market-rate replacement units.**

Recommendation

Rent Stabilization Board staff recommends the following:

1. That the applicant increase the number of below-market-rate replacement units to at least seven to properly mitigate the loss of affordable rent-controlled housing units according to the replacement provisions in the previous of the Demolition Ordinance that apply to this project and the newly amended Demolition Ordinance.

2. That the applicant includes in their application the number, size (bedroom), and affordability rate of units to be considered replacement units.

3. That the ZAB adopt the following Use Permit conditions to fulfill the requirements of Berkeley's Demolition Ordinance and state law:

    a. **Prior Rental Rate.** Pursuant to Government Code Section 66300.6(b)(3), any existing residents will be allowed to occupy their units until six months before the start of construction activities with proper notice and, if asked to leave, shall be allowed to return at their prior rental rate if the demolition does not proceed and the property is returned to the rental market.

    b. **Requirement for Relocation Expenses.** Pursuant to BMC 23.326.030(A)(5)(c),
    (i) the applicant shall provide qualified tenants assistance with moving expenses equivalent to those in Chapter 13.84 (Relocation Services and Payments for Residential Tenant Households), and
    (ii) shall subsidize the rent differential for a comparable replacement unit, in the same neighborhood if feasible, until new units are ready for occupancy. Funding for the rent differential shall be guaranteed in a manner approved by the City. The applicant shall submit proof of implementation that includes an overall building tenant relocation plan and relocation agreements all applicable tenant households prior to submittal for building permits.

    c. **Siting Tenants Rights.** Pursuant to BMC 23.326.030(A)(5)(d),
    (i) sitting tenants who are displaced as a result of demolition shall be provided the right of first refusal to move into the new building, and
    (ii) tenants of units that are demolished shall have the right of first refusal to rent new below market rate units designated to replace the units that

were demolished, at the rent that would have applied if they had remained in place, as long as their tenancy continues.
(iii) Income restrictions do not apply to displaced tenants.

Please to contact Katrina Lapira with any further questions regarding this matter.

Sincerely,

Matt Brown
General Counsel

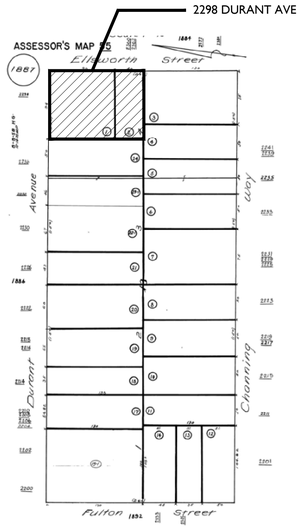
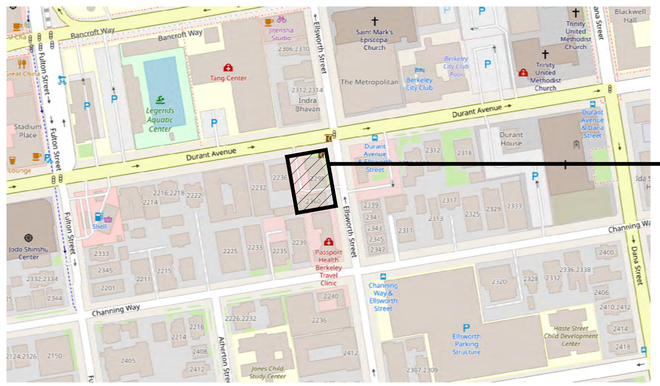
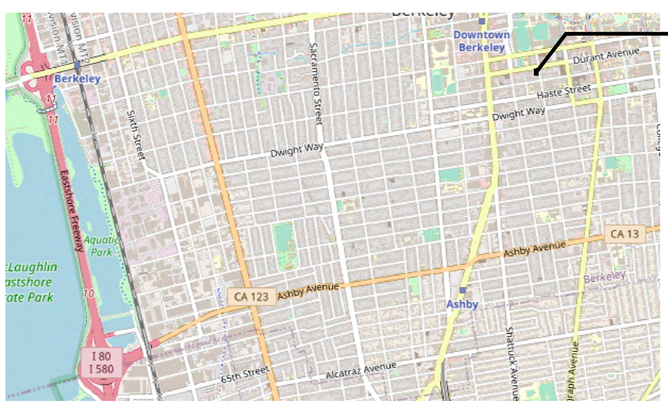
7 PROJECT TEAM



3 ASSESSORS PARCEL MAP



5 LOCATION MAP
N.T.S.



4 VICINITY MAP
N.T.S.

THE SITE'S REDEVELOPMENT WILL INCLUDE THE DEMOLITION OF BOTH EXISTING BUILDINGS AT 2298 DURANT AVE (A 2-STORY COMMERCIAL BUILDING) AND AT 2360 ELLSWORTH STREET (A 3-STORY RESIDENTIAL BUILDING OVER A 1-STORY PARTIALLY SUBTERRANEAN PARKING GARAGE). THE TWO EXISTING LOTS WILL BE MERGED INTO ONE CONTIGUOUS LOT WHOSE FRONT IS ALONG DURANT AVE AND WILL TAKE THE ADDRESS OF 2298 DURANT AVE.

PROPOSED IS AN 8-STORY RESIDENTIAL BUILDING, CONSISTING OF 65 UNITS AND 80,046 GSF OF BUILDING AREA. UNITS INCLUDE 2, 5, & 6 BEDROOM UNITS - ALL WITH IN-UNIT LAUNDRY. THE GROUND FLOOR INCLUDES A GENEROUS LOBBY, TENANT AMENITY SPACES, AND BUILDING UTILITY SPACES FOR ELECTRICAL AND TRASH THAT EXIT DIRECTLY TO ELLSWORTH STREET. OTHER COMMON SPACES INCLUDE AN INDOOR AMENITY AT THE GROUND FLOOR AND A ROOF DECK AT THE 8TH FLOOR.

IMPROVEMENT PLANS
2298 DURANT AVE BERKELEY, CA
APN: 055-1887-001 & 055-1887-002

VICINITY MAP

BASIS OF BEARINGS:

THE LINE IN DURANT AVENUE BETWEEN THE STANDARD CITY FOR BERKELEY MONUMENT FOUND AT ELLSWORTH STREET AND THE INTERSECTION OF THE REFERENCE POINTS AT FULTON STREET WAS TAKEN AS N83°00'00"E, PROJECTED AS SHOWN ON PARCEL MAP NO. 10100, FILED IN BOOK 320 OF MAPS, AT PAGES 96 THROUGH 100, ALAMEDA COUNTY RECORDS.

VERTICAL DATUM / BENCHMARK:

ELEVATIONS FOR THIS SURVEY ESTABLISHED BY HOLDING THE ELEVATION OF 211.60' ON THE TOP OF A 3/8^{ths} INCH BRASS PIN IN A MONUMENT WELL FOUND AT THE INTERSECTION OF ELLSWORTH STREET AND DURANT AVENUE AS SHOWN ON THIS MAP. THIS MONUMENT WAS TAKEN AS CITY OF BERKELEY MONUMENT B0401, HELD PER CORNER RECORD 7052 AND CITY SURVEYOR'S NOTES AS CITY OF BERKELEY DATUM.
ELEVATION = 211.60' COB DATUM

TITLE REPORT NOTE:

THE INFORMATION REGARDING EXISTING EASEMENTS OR OTHER ENCUMBRANCES SHOWN ON THIS SURVEY IS BASED ON FIRST AMERICAN TITLE INSURANCE COMPANY PRELIMINARY TITLE REPORTS PROVIDED TO THE SURVEYOR, THE FIRST HAVING ORDER NUMBER NCS-1183023-CC, DATED MAY 31, 2023, AND THE SECOND HAVING ORDER NUMBER NCS-1177686, AMENDED, DATED APRIL 11, 2023. THERE MAY BE EASEMENTS OR OTHER ENCUMBRANCES OF RECORD THAT EXIST BUT ARE NOT DELINEATED HEREON.

UTILITIES NOTE:

INFORMATION SHOWN ON THIS SURVEY REGARDING EXISTING UTILITIES IS APPROXIMATE ONLY, IS BASED ON VISUAL OBSERVATIONS AND/OR UTILITY COMPANY RECORDS, AND HAS NOT BEEN VERIFIED AS BEING COMPLETE OR CORRECT. THE ENGINEER ASSUMES NO RESPONSIBILITY FOR THE ACCURACY OR COMPLETENESS OF THE EXISTING UTILITY INFORMATION SHOWN HEREON, NOR FOR THE PRESENCE OF OTHER UTILITIES WHICH MAY EXIST BUT ARE NOT SHOWN ON THIS SURVEY.

PHASE NO.: XX
SHEET NO.: C0.1

ALL IDEAS, DESIGNS, ARRANGEMENTS AND PLANS INDICATED BY THIS DRAWING ARE OWNED BY, AND THE PROPERTY OF THIS OFFICE AND WERE CREATED, EVOLVED AND DEVELOPED FOR USE ON , AND IN CONNECTION WITH THE SPECIFIED PROJECT. NONE OF SUCH IDEAS, DESIGNS, ARRANGEMENTS OR PLANS SHALL BE USED BY OR DISCLOSED TO ANY PERSON, FIRM OR CORPORATION FOR ANY PURPOSE WHATSOEVER WITHOUT THE WRITTEN PERMISSION OF GREENWOOD & MOORE, INC. VISUAL CONTACT WITH THESE DRAWINGS SHALL CONSTITUTE PRIMA FACIE EVIDENCE OF THE ACCEPTANCE OF THESE RESTRICTIONS.
THE CONTRACTOR SHALL VERIFY AND BE RESPONSIBLE FOR ALL DIMENSIONS AND CONDITIONS, SHOP DETAILS OF ADEQUATE SCALE MUST BE SUBMITTED TO THIS OFFICE FOR APPROVAL BEFORE PROCEEDING WITH FABRICATION. DO NOT SCALE DRAWINGS. ANY DISCREPANCIES FOUND BETWEEN THESE DRAWINGS AND EXISTING CONDITIONS OR DATA FROM THE DIMENSIONS AND CONDITIONS SHOWN BY THESE DRAWINGS, SHOP DETAILS OF ADEQUATE SCALE MUST BE SUBMITTED TO THIS OFFICE FOR APPROVAL BEFORE PROCEEDING WITH FABRICATION ON THE ITEM SO NOTED.

GENERAL NOTES:

1. THESE PLANS AND SPECIFICATIONS ARE SUBJECT TO MODIFICATION DURING CONSTRUCTION WHEN CONDITIONS DEVELOP THAT WERE NOT APPARENT DURING THE DESIGN AND PREPARATION OF THESE PLANS. ALL MODIFICATIONS MUST BE APPROVED BY THE CITY ENGINEER PRIOR TO CONSTRUCTION AND/OR IMPLEMENTATION.
2. ALL IMPROVEMENTS SHALL BE CONSTRUCTED IN ACCORDANCE WITH THE CITY OF BERKELEY STANDARD SPECIFICATIONS AND DETAILS SUBJECT TO THE INSPECTION AND APPROVAL OF THE ENGINEERING DIVISION OF THE PUBLIC WORKS DEPARTMENT. ALL REVISIONS MUST BE APPROVED BY THE CITY PRIOR TO CONSTRUCTION.
3. PRIOR TO COMMENCEMENT OF CONSTRUCTION, A PRE-JOB CONFERENCE SHALL BE REQUESTED BY THE DEVELOPER THROUGH THE CITY ENGINEER,
4. BEFORE COMMENCEMENT OF WORK, THE CONTRACTOR SHALL REVIEW ALL PLANS AND SPECIFICATIONS AND THE JOB SITE. THE CONTRACTOR WILL NOTIFY THE OWNER, THE ENGINEER WHO PREPARED THE PLANS, AND THE CITY ENGINEER OF ANY DISCREPANCIES THAT MAY REQUIRE MODIFICATION TO THESE PLANS OR OF ANY FIELD CONFLICTS.
5. APPROVAL OF THESE PLANS BY THE CITY ENGINEER SHALL NOT RELIEVE THE DEVELOPER OR THE ENGINEER FROM THE RESPONSIBILITY FOR THE DESIGN OF THE IMPROVEMENTS AND FOR ANY DEFICIENCIES RESULTING FROM THE DESIGN THEREOF.
7. ALL LANDSCAPING IS SUBJECT TO CITY INSPECTION. ANY CHANGE IN THE APPROVED LANDSCAPE PLAN MUST BE APPROVED BY THE CITY'S DESIGN REVIEW STAFF.
8. SHOULD IT APPEAR THAT THE WORK TO BE DONE OR ANY MATTER RELATIVE THERETO IS NOT SUFFICIENTLY DETAILED OR EXPLAINED ON THESE PLANS, THE CONTRACTOR SHALL CONTACT THE PROJECT ENGINEER FOR SUCH FURTHER EXPLANATIONS AS MAY BE NECESSARY.
9. IN ACCORDANCE WITH GENERALLY ACCEPTED CONSTRUCTION PRACTICES, THE CONTRACTOR WILL BE REQUIRED TO ASSUME SOLE AND COMPLETE RESPONSIBILITY FOR JOB SITE CONDITIONS DURING THE COURSE OF CONSTRUCTION OF THE PROJECT, INCLUDING SAFETY OF ALL PERSONS AND PROPERTY. THIS REQUIREMENT SHALL BE MADE TO APPLY CONTINUOUSLY AND NOT BE LIMITED TO NORMAL WORKING HOURS. THE CONTRACTOR FURTHER AGREES TO DEFEND, INDEMNIFY, AND HOLD THE CITY, THE OWNER, AND DESIGN PROFESSIONAL HARMLESS FROM ANY AND ALL LIABILITY, REAL OR ALLEGED, IN CONNECTION WITH THE PERFORMANCE OF WORK ON THIS PROJECT, EXCEPT FOR LIABILITY ARISING FROM THE SOLE NEGLIGENCE OF THE OWNER OR DESIGN PROFESSIONAL.
10. THE CONTRACTOR'S ATTENTION IS DIRECTED TO THE REQUIREMENTS OF THE DIVISION OF INDUSTRIAL SAFETY PERTAINING TO "CONFINED SPACES". ANY MANHOLE, CULVERT, DROP INLET OR TRENCH WHICH COULD CONTAIN AIR WHICH IS NOT READILY VENTILATED MAY BE CONSIDERED A "CONFINED SPACE". THE CONTRACTOR SHALL PROVIDE THE NECESSARY SAFETY OR TESTING EQUIPMENT AND PERSONNEL.
11. THE CONTRACTOR SHALL BE HELD RESPONSIBLE FOR ANY AND ALL DAMAGE TO EXISTING STRUCTURES AND/OR UTILITIES DURING CONSTRUCTION, PROPER REPAIR SHOULD BE DONE TO THE SATISFACTION OF THE REPRESENTATIVE OF THE CITY ENGINEER.
12. TO THE EXTENT FEASIBLE, SCHEDULE THE NOISIEST CONSTRUCTION ACTIVITIES DURING TIMES THAT WOULD HAVE THE LEAST IMPACT ON ADJACENT PROPERTIES. THIS WOULD INCLUDE RESTRICTING TYPICAL DEMOLITION AND EXTERIOR CONSTRUCTION ACTIVITIES TO STANDARD HOURS OF 7:00 AM TO 5:30 PM MONDAY THROUGH FRIDAY AND 8:00 AM TO 4:30 PM ON SATURDAY. THE CONTRACTOR SHALL ENSURE THAT ALL EQUIPMENT POWERED BY INTERNAL COMBUSTION ENGINES ARE FITTED EFFECTIVELY WITH MUFFLERS IN GOOD OPERATING CONDITION. WHERE FEASIBLE, NOISE GENERATING EQUIPMENT SHOULD BE STAGED AS FAR AWAY FROM EXISTING RESIDENCES, AND MOBILE EQUIPMENT SHOULD NOT BE ALLOWED TO IDLE UNNECESSARILY NEAR THE RESIDENTIAL OR CHILD CARE USES. THE CONTRACTOR SHALL COORDINATE CONSTRUCTION ACTIVITIES THAT GENERATE NOISE WITH THE OWNER.
13. CONTRACTOR SHALL OBTAIN ENCROACHMENT PERMITS FROM THE CITY OF BERKELEY PUBLIC WORKS PRIOR TO COMMENCING CONSTRUCTION INVOLVING THEIR RIGHT-OF-WAY, AND FOR THE CONSTRUCTION, MODIFICATION, OR CONNECTION TO DEPARTMENT OR DISTRICT-MAINTAINED FACILITIES. ALL WORKMANSHIP, EQUIPMENT AND MATERIALS SHALL CONFORM TO DEPARTMENT STANDARDS AND SPECIFICATIONS.
14. THE FORMS FOR CONCRETE SIDEWALKS, CURBS, GUTTERS AND DRIVEWAYS THAT ARE TO BE CONSTRUCTED TO CONFORM TO EXISTING ROADS SHALL BE INSTALLED TO THE GRADES SHOWN UPON THESE PLANS. PRIOR TO PLACING CONCRETE, THE FORMS SHALL BE INSPECTED AND APPROVED BY THE CITY ENGINEER FOR CONFORMANCE TO EXISTING ROAD IMPROVEMENTS. GRADES OF NEW IMPROVEMENTS ARE SUBJECT TO FIELD ADJUSTMENT TO FIT CONDITIONS.
15. THE PROPOSED STREET STRUCTURAL SECTION IS TO BE DESIGNED BY A REGISTERED CIVIL ENGINEER AND APPROVED BY THE CITY ENGINEER.
16. IN CONFORM AREAS, IF FULL STRUCTURAL SECTION IS NOT FOUND AT THE APPARENT EDGE OF PAVEMENT, FURTHER STREET EXCAVATION WILL BE REQUIRED UNTIL THE FULL SECTION IS ENCOUNTERED.
17. TEMPORARY REPAIRS TO ALL TRENCHES WITHIN THE TRAVELED WAY ON EXISTING ROADS SHALL BE MADE WITHIN TWENTY-FOUR (24) HOURS OF TRENCH OPENING. MINIMUM TEMPORARY REPAIRS SHALL CONSIST OF BACKFILLING AND COMPACTING 6" OF AGGREGATE BASE AND 1" OF TEMPORARY ASPHALTIC SURFACING. PERMANENT REPAIRS, INCLUDING RESTORATION OF THE EXISTING STRUCTURAL SECTION SHALL BE MADE WITHIN FIFTEEN (15) DAYS OF TRENCH OPENING.
18. IN THE EVENT OF ANY DISCREPANCY BETWEEN ANY DRAWING AND THE FIGURES WRITTEN THEREON, THE FIGURES SHALL BE TAKEN AS CORRECT.
19. THE CONTRACTOR SHALL POST EMERGENCY TELEPHONE NUMBERS AT THE JOB SITE FOR THE CONTRACTOR AND PUBLIC WORKS AGENCY.
20. THE CONTRACTOR SHALL PROVIDE FOR INGRESS AND EGRESS TO PRIVATE PROPERTY ADJACENT TO THE WORK THROUGHOUT THE PERIOD OF CONSTRUCTION.
21. THE CONTRACTOR SHALL NOT DISTURB ANY PERMANENT SURVEY POINTS WITHOUT THE CONSENT OF THE CITY ENGINEER. ANY POINTS DESTROYED SHALL BE REPLACED BY A LICENSED SURVEYOR AT THE CONTRACTOR'S EXPENSE.
22. THE CONTRACTOR IS RESPONSIBLE FOR MATCHING EXISTING FACILITIES TO AVOID ANY ABRUPT OR APPARENT CHANGES IN GRADES OR CROSS SLOPES, LOW SPOTS, OR HAZARDOUS CONDITIONS.
23. CONTRACTOR SHALL SALVAGE AND RELOCATE EXISTING STREET SIGNS AND INSTALL NEW SIGNS PER CITY OF BERKELEY SPECIFICATIONS AS REQUIRED.
24. WHERE UNSTABLE OR UNSUITABLE MATERIALS ARE ENCOUNTERED DURING SUB-GRADE PREPARATION, THE AREA IN QUESTION SHALL BE OVER EXCAVATED AND REPLACED BY SELECT BACKFILL MATERIAL AS DIRECTED IN THE FIELD BY THE ENGINEER.
25. ALL TRENCH EXCAVATION AND BACKFILL SHALL BE IN ACCORDANCE WITH THE TRENCH BACKFILL DETAIL, SHOWN ON THESE PLANS.
26. ALL TREES LOCATED WITHIN THE ROADWAY PRISM OR SHOWN TO BE REMOVED IN THE STREET RIGHT-OF-WAY OR EASEMENTS SHALL BE REMOVED COMPLETELY, INCLUDING ROOTS, AND HAULED AWAY.
27. THE CONTRACTOR SHALL NOT REMOVE, DISTURB, OR HARM, IN ANY WAY, ANY TREE NOT SPECIFICALLY DESIGNATED AND APPROVED BY THE INSPECTOR FOR REMOVAL.
28. COMPACTION TESTS SHALL BE PERFORMED ON ALL TRENCHES AND STREET WORK TO VERIFY THAT COMPACTION CONFORMS TO CITY STANDARDS. ALL TESTING WILL BE AT THE DEVELOPER OR CONTRACTOR'S EXPENSE.
29. THE DUTIES OF THE CITY ENGINEER AND PROJECT ENGINEER DO NOT INCLUDE THE ADEQUACY OF THE CONTRACTOR'S SAFETY IN, ON, OR NEAR THE CONSTRUCTION SITE.
30. THE CONTRACTOR SHALL COMPLY WITH THE RULES AND REGULATIONS OF THE STATE CONSTRUCTION SAFETY ORDERS. ALL TRENCHES OVER FIVE FEET IN DEPTH SHALL BE SHORED IN ACCORDANCE WITH CAL-OSHA "CONSTRUCTION SAFETY ORDERS" CURRENT EDITION. CONTRACTOR MUST HAVE VALID TRENCH SHORING PERMIT ISSUED BY CAL-OSHA.
31. TRAFFIC CONTROL SHALL BE PROVIDED IN ACCORDANCE WITH CALTRANS "MANUAL OF TRAFFIC CONTROLS FOR CONSTRUCTION AND MAINTENANCE WORK ZONES" CURRENT EDITION AND THESE PLANS. A TRAFFIC CONTROL PLAN WILL BE REQUIRED AND A PERMIT WILL BE REQUIRED TO IMPLEMENT IT. CONTRACTOR SHALL MEET WITH TRAFFIC AND PUBLIC WORKS TO DISCUSS PROJECT NEEDS AND PREPARE TRAFFIC CONTROL PLANS.
32. THE CONTRACTOR SHALL PROVIDE ALL LIGHTS, SIGNS, BARRICADES, FLAGMEN, OR OTHER DEVICES NECESSARY TO PROVIDE FOR PUBLIC SAFETY. SUBMIT LANE CLOSURE AND TRAFFIC CONTROL PLANS PRIOR TO BEGINNING WORK TO THE CITY ENGINEER FOR APPROVAL.
33. ALL UNDERGROUND UTILITIES WITHIN THE RIGHT-OF-WAY OR ACCESS EASEMENT, INCLUDING MAINS AND LATERALS, SHALL BE INSTALLED AND BACKFILL COMPLETED PRIOR TO THE START OF CURB, SIDEWALK AND PAVING CONSTRUCTION.
34. ALL TRENCH BACKFILL WITHIN THE RIGHT-OF-WAY SHALL BE COMPACTED AS SHOWN IN CITY'S STANDARD PLANS OR AS RECOMMENDED BY THE ENGINEER. IF TESTS SHOW THAT THE ACTUAL COMPACTION HAS NOT EQUALED OR SURPASSED THAT WHICH IS RECOMMENDED, THE ENGINEER SHALL PROVIDE THE PROPOSED ACTION TO BE TAKEN.
35. ALL NEW STORM DRAIN INLETS SHALL BE STENCILED OR STAMPED WITH CITY'S CLEAN WATER PROGRAM STANDARD LOGO, "NO DUMPING — DRAINS TO BAY," PRIOR TO THE ACCEPTANCE OF THE SITE IMPROVEMENTS OR THE FINAL BUILDING INSPECTION, WHICHEVER OCCURS FIRST.
36. CONTRACTOR SHALL NOTIFY UNDERGROUND SERVICE ALERT (USA) AT LEAST TWO WORKING DAYS PRIOR TO ANY EXCAVATION.
37. AN ENGINEERING PERMIT WILL BE REQUIRED FOR ANY WORK IN THE PUBLIC RIGHT-OF-WAY, INCLUDING BUT NOT LIMITED TO CONSTRUCTION STAGING, CONSTRUCTION PARKING, SIDEWALK, DRAINAGE, OR SEWER WORK. THE ENGINEERING PERMIT CAN BE ISSUED AFTER THE BUILDING PERMIT IS APPROVED AND ISSUED. APPROVAL OF THIS BUILDING PERMIT DOES NOT AUTHORIZE WORK IN THE PUBLIC RIGHT-OF-WAY.

DEMOLITION NOTES:

1. THE EXTENT OF DEMOLITION WORK IS TO BE AS SHOWN ON THIS PLAN. DEMOLITION INCLUDES COMPLETE WRECKING, REMOVAL AND DISPOSAL OF STRUCTURES, BURIED DEBRIS, FOUNDATIONS, PAVEMENT, CURBS, TREES & SHRUBS (INCLUDING ROOT SYSTEMS), DRAINAGE STRUCTURES, UTILITIES, SIGNAGE, LANDSCAPING AND/OR IRRIGATION SYSTEM, UNLESS OTHERWISE INDICATED ON THIS PLAN OR OTHERWISE DIRECTED BY THE OWNER OR HIS REPRESENTATIVE. EXISTING PERIMETER FENCES ARE TO REMAIN UNLESS OTHERWISE DIRECTED BY THE OWNER OR HIS REPRESENTATIVE
2. THIS DEMOLITION PLAN IS NOT INTENDED TO DETERMINE THE METHOD, DETAILS AND/OR MEANS OF PERFORMING THE DEMOLITION WORK. THIS PLAN MAKES NO INQUIRY OR DETERMINATION AS TO THE EXISTENCE OF HAZARDOUS OR TOXIC MATERIALS EXISTING ON SITE. IT IS RECOMMENDED THAT AN INDEPENDENT INQUIRY BE PERFORMED PRIOR TO DEMOLITION WORK TO DETERMINE THE EXISTENCE OF ANY POTENTIAL HAZARDOUS OR TOXIC RISK.
3. THE CONTRACTOR SHALL BE RESPONSIBLE FOR LOCATING ALL EXISTING UNDERGROUND UTILITIES, WHETHER SHOWN ON THESE PLANS OR NOT, PRIOR TO THE COMMENCEMENT OF ANY DEMOLITION WORK.
4. ALL EXISTING UTILITIES AND APPURTENANCES THERETO SERVING ANY EXISTING STRUCTURE OR BUILDINGS AND THOSE IN THE PUBLIC RIGHT OF WAY SERVING PUBLIC UTILITIES ARE TO REMAIN AND SHALL BE PROTECTED IN PLACE UNLESS DIRECTED TO BE REMOVED AND REPLACED ELSEWHERE ON THESE PLANS.
5. THE CONTRACTOR SHALL CONTACT ALL ASSOCIATED UTILITY SUPPLIERS PRIOR TO DEMOLITION TO COORDINATE THE DISCONNECTION AND REMOVAL OR ABANDONMENT OF UTILITIES (I.E. TELEPHONE, ELECTRICAL, WATER, SEWER, ETC.) SERVING THE STRUCTURE TO BE DEMOLISHED.
6. THE CONTRACTOR SHALL OBTAIN A LIST OF ITEMS TO BE SALVAGED FROM THE OWNER PRIOR TO COMMENCING THE DEMOLITION WORK.
7. THE FINISHED GROUND SURFACE SHALL BE LEFT IN A SMOOTH, UNIFORM GRADED CONDITION.
8. DEMOLITION OPERATIONS AND REMOVAL OF DEBRIS SHALL BE CONDUCTED IN A MANNER TO INSURE MINIMUM INTERFERENCE WITH STREETS, SIDEWALKS AND OTHER ADJACENT OCCUPIED OR UTILIZED FACILITIES.
9. THE CONTRACTOR SHALL INSURE THE SAFE PASSAGE OF PERSONS AROUND THE DEMOLITION AREA. CONDUCT OPERATIONS TO PREVENT DAMAGE TO ADJACENT BUILDINGS, STRUCTURES AND OTHER FACILITIES.
10. THE CONTRACTOR SHALL PROMPTLY REPAIR ANY DAMAGE CAUSED TO ADJACENT FACILITIES BY DEMOLITION OPERATIONS AT NO COST TO THE OWNER.
11. USE WATER SPRINKLING, TEMPORARY ENCLOSURES AND OTHER SUITABLE METHODS TO LIMIT DUST AND DIRT SCATTERING AND RISING IN AIR TO LOWEST PRACTICAL LEVEL. COMPLY WITH GOVERNING REGULATIONS PERTAINING TO ENVIRONMENTAL PROTECTION. CONTRACTOR IS RESPONSIBLE FOR CLEANLINESS OF ADJACENT STRUCTURES AND IMPROVEMENTS. SUCH IMPROVEMENTS SHALL BE KEPT FREE OF DUST, DIRT AND DEBRIS CAUSED BY DEMOLITION OPERATIONS. RETURN ADJACENT AREAS TO CONDITIONS EXISTING PRIOR TO START OF WORK.
12. DUST CONTROLS SHALL BE IMPLEMENTED DURING ALL DEMOLITION AND GRADING OPERATIONS. PUBLIC STREETS SHALL BE SWEPT CLEAN AS NECESSARY.
13. THE GENERAL CONTRACTOR SHALL BE RESPONSIBLE FOR ALL REQUIRED TRAFFIC CONTROL AND SAFETY ISSUES.
14. THE GENERAL CONTRACTOR SHALL BE RESPONSIBLE FOR ALL CONSTRUCTION COORDINATION WITH ALL ADJACENT PROPERTY OWNERS FOR WORK TO BE PERFORMED ON THEIR PROPERTIES.
15. THE GENERAL CONTRACTOR SHALL BE RESPONSIBLE FOR THE DESIGN AND INSTALLATION OF ALL REQUIRED TEMPORARY ACCESS DEVICES (TRENCH PLATES, FENCES, ETC) AS REQUIRED TO ALLOW ACCESS DURING THE COURSE OF CONSTRUCTION.
16. ALL DEMOLITION WORK SHALL BE IN ACCORDANCE WITH CITY SPECIFICATIONS AND STANDARDS.
17. FIELD VERIFY ALL UTILITY TERMINATION POINTS, SIZES AND LOCATIONS PRIOR TO CONSTRUCTION. ALL UTILITIES TO BE CAPPED, ABANDONED OR MODIFIED SHOULD BE "POTHOLED" TO CONFIRM THEIR SIZE, LOCATION AND CONFIGURATION PRIOR TO CONSTRUCTION.
18. GENERAL CONTRACTOR SHALL PROVIDE A UTILITY REMOVAL/RELOCATION PLAN FOR CLIENT'S REVIEW PRIOR TO CONSTRUCTION.

GRADING NOTES:

1. THE DEVELOPER SHALL, AT HIS SOLE EXPENSE, MAKE TESTS OVER THE SOIL ON WHICH THE ROAD SURFACING AND BASE IS TO BE CONSTRUCTED.
2. A REPRESENTATIVE OF THE SOILS ENGINEER SHALL BE ON THE SITE DURING GRADING OPERATIONS AND SHALL OBSERVE THE GRADING AND IDENTIFY ANY CONDITIONS THAT SHOULD BE CORRECTED AND RECOMMEND CORRECTIVE MEASURES TO THE CONTRACTOR AND THE CITY ENGINEER.
3. GRADING AT THE BOUNDARIES OF THIS PROJECT SHALL BE DONE SO AS NOT TO OBSTRUCT THE RUNOFF OF STORM WATERS FROM ADJACENT PROPERTIES. ALL GRADING SHALL BE DONE TO PROVIDE STABLE SLOPES WHICH SHALL DRAIN ONTO THIS PROJECT, WHICH IN TURN SHALL BE GRADED TO STREETS OR DRAINAGE DITCHES OR ACROSS LAND WITHIN THIS PROJECT, WHICH IN TURN SHALL BE GRADED TO STREETS OR TO DRAINAGE FACILITIES SHOWN ON THESE PLANS. GRADING SHALL BE DONE IN SUCH A MANNER THAT ALL NEW SLOPES SHALL DIRECT STORM WATER TO THE STREETS OR INTERCEPTION DITCHES OR ACROSS LAND WITHIN THIS PROJECT AND SHALL NOT DIVERT OR CREATE A MEANS FOR STORM WATER TO FLOW ONTO ADJACENT PROPERTIES, EXCEPT AS INDICATED ON THE PLANS.
4. GRADING SHALL NOT BE PERMITTED ON THE SITE UNTIL A GRADING PERMIT IS ISSUED IN ACCORDANCE WITH THE CITY OF BERKELEY GENERAL ORDINANCE AND CODES FOR GRADING, EROSION AND SEDIMENT CONTROLS.
5. ALL GRADING, EROSION AND SEDIMENTATION CONTROL AND RELATED WORK UNDERTAKEN ON THIS SITE IS SUBJECT TO ALL TERMS AND CONDITIONS OF THE GRADING ORDINANCE AND APPLICATION FOR GRADING.
6. IF GRADING ON THE SITE IS STARTED, CONTINUED OR ABANDONED BETWEEN OCTOBER FIRST AND APRIL FIFTEENTH OF ANY YEAR OF CONSTRUCTION, ALL EROSION AND SEDIMENT CONTROL IMPROVEMENTS AND PLANTING SHALL BE COMPLETED PRIOR TO OCTOBER FIRST.
7. CONTRACTOR SHALL KEEP EXISTING STREETS FREE FROM DIRT AND DEBRIS DURING ALL PHASES OF CONSTRUCTION TO THE SATISFACTION OF THE CITY ENGINEER. ALL TRASH, CONSTRUCTION DEBRIS, AND MATERIALS WILL BE CONTAINED ON SITE UNTIL DISPOSAL OFF-SITE CAN BE ARRANGED.
8. DUST CONTROL MEASURES AS APPROVED BY THE CITY ENGINEER SHALL BE FOLLOWED IN ALL AREAS UNDERGOING GRADING AND OTHER CONSTRUCTION ACTIVITIES.

THE GRADING WORK DEPICTED HEREON SHALL CONFORM TO THE RECOMMENDATIONS CONTAINED IN THE SOIL INVESTIGATION TITLED "GEOTECHNICAL INVESTIGATION PROPOSED RESIDENTIAL BUILDING 2298 DURANT AVENUE BERKELEY, CALIFORNIA."

PREPARED BY:
ROCKRIDGE GEOTECHNICAL
1350 OCEAN AVE.
EMERYVILLE, CA 94608
(510) 420-5738

9. WHERE SOIL OR GEOLOGIC CONDITIONS ENCOUNTERED IN GRADING OPERATIONS ARE DIFFERENT FROM THOSE ANTICIPATED IN THE SOIL AND GEOLOGIC INVESTIGATION REPORT, OR WHERE CONDITIONS WARRANT CHANGES TO THE RECOMMENDATIONS CONTAINED THEREIN, A REVISED SOIL OR GEOLOGIC REPORT SHALL BE SUBMITTED FOR APPROVAL AND SHALL BE ACCOMPANIED BY AN ENGINEERS OPINION AS TO THE SAFETY OF THE SITE FROM THE POSSIBILITY OF LAND SLIPPAGE, SETTLEMENT AND SEISMIC ACTIVITY.
10. THE PROJECT ENGINEER AND GEOLOGIST SHALL PROVIDE A DECLARATION STATING THAT ALL WORK WAS DONE IN ACCORDANCE WITH THE APPROVED PLANS AND SPECIFICATIONS AND THE RECOMMENDATIONS CONTAINED IN THE SOIL AND GEOLOGIC REPORT.
11. THE SOILS ENGINEER SHALL BE NOTIFIED AT LEAST TWO (2) WORKING DAYS PRIOR TO PLACEMENT OF FILL SO THAT ARRANGEMENTS FOR INSPECTION CAN BE MADE.
12. THE CONTRACTOR SHALL ARRANGE A PRE-CONSTRUCTION MEETING WITH THE CITY ENGINEER BEFORE THE START OF CONSTRUCTION. THE CONTRACTOR SHALL CONTACT THE REVIEW ENGINEER AT (510) 581-2772 TO ARRANGE A TIME FOR THE MEETING.
13. OPERATIONS SHALL CEASE IN THE VICINITY OF ANY SUSPECTED ARCHAEOLOGICAL RESOURCE UNTIL AN ARCHAEOLOGIST IS CONSULTED AND HIS OR HER RECOMMENDATIONS FOLLOWED, SUBJECT TO APPROVAL BY THE PLANNING DIRECTOR. IF EVIDENCE OF HUMAN REMAINS IS DISCOVERED ON THE SITE, THE COUNTY CORONER SHALL BE NOTIFIED IMMEDIATELY.
14. ANY WATER WELL, CATHODIC PROTECTION WELL OR EXPLORATORY BORING THAT IS SHOWN ON THESE PLANS, IS KNOWN TO EXIST, IS PROPOSED OR IS LOCATED DURING THE COURSE OF FIELD OPERATIONS MUST BE PROPERLY DESTROYED, BACKFILLED OR MAINTAINED IN ACCORDANCE WITH THECITY OF BERKELEY REGULATIONS.
15. EXISTING UNDERGROUND FACILITIES AS SHOWN ARE APPROXIMATE ONLY AND WERE OBTAINED FROM AVAILABLE UTILITY RECORDS. THE PROJECT ENGINEER ASSUMES NO RESPONSIBILITY FOR THE ACCURACY OR COMPLETENESS OF EXISTING UTILITY INFORMATION. IT SHALL BE THE CONTRACTOR'S RESPONSIBILITY TO CONTACT ALL LOCAL UTILITIES AND TO HAVE ALL FACILITIES LOCATED AND EXPOSED TO VERIFY THE CLEARANCE AT NEW PIPE CROSSINGS PRIOR TO THE START OF NEW PIPELINE CONSTRUCTION.

FIRE PROTECTION AND DOMESTIC WATER NOTES:

1. ALL DOMESTIC WATER LINES 4" AND LARGER SHALL BE C900, CLASS 200 PIPE. DOMESTIC WATER LINES SMALLER THAN 4" SHALL BE PVC SCHEDULE 80.
2. EBMUD SPECIFICATIONS AND STANDARDS ARE INCORPORATED HEREON BY REFERENCE. ALL DOMESTIC AND FIRE WATER LINE CONSTRUCTION FROM THE CONNECTION TO THE MAIN TO THE BACKFLOW/DOUBLE DETECTOR CHECK VALVE SHALL BE INSTALLED PER EBMUD STANDARDS AND SPECIFICATIONS.
3. AN EBMUD PERMIT IS REQUIRED FOR CONNECTIONS TO EBMUD FACILITIES.
4. ALL EXISTING WATER SERVICES TO BE ABANDONED SHALL BE DONE PER EBMUD STANDARDS AND SPECIFICATIONS.
5. INSTALL LOCATOR WIRE DIRECTLY ON TOP OF THE PIPE AND MAGNETIC TAPE WITHIN 12" ABOVE ALL PLASTIC WATER PIPES.
6. THE FIRE SYSTEM DESIGN SHOWN ON THESE PLANS ARE FOR GENERAL PURPOSES ONLY. REFER TO FIRE SYSTEM SHOP DRAWINGS AND SPECIFICATIONS, BY GENERAL CONTRACTOR, FOR ADDITIONAL INFORMATION.

UTILITY NOTES:

1. FIELD VERIFY ALL UTILITY TERMINATION POINTS, SIZES AND LOCATIONS PRIOR TO CONSTRUCTION. ALL UTILITIES TO BE CAPPED, ABANDONED OR MODIFIED SHOULD BE "POTHOLED" TO CONFIRM THEIR SIZE, LOCATION AND CONFIGURATION PRIOR TO CONSTRUCTION.
2. GENERAL CONTRACTOR SHALL PROVIDE A UTILITY REMOVAL/RELOCATION PLAN FOR CLIENT'S REVIEW PRIOR TO CONSTRUCTION.
3. IT IS RECOMMENDED THAT ALL EXISTING UTILITIES THAT ARE TO BE REMOVED, RELOCATED, MODIFIED OR IMPACTED BY THE PROPOSED CONSTRUCTION BE FIELD LOCATED BY THE GENERAL CONTRACTOR PRIOR TO THE START OF CONSTRUCTION. THE INTENT OF THE UTILITY DESIGN IS TO CONTINUE TO USE THE MAJORITY OF THE EXISTING UTILITIES. THE LOCATION OF MOST OF THE UTILITIES ARE UNKNOWN OR UNVERIFIED. IF THE EXISTING UTILITIES ARE NOT LOCATED AS INDICATED ON THE PLAN, SUBSTANTIAL REDESIGN WORK MAY BE REQUIRED. THE GENERAL CONTRACTOR SHALL NOTIFY THE ENGINEER OF ANY DISCREPANCIES IN THE PLANS.
4. DEMOLISH AND REMOVE ALL EXISTING UTILITIES AND SUPPORT STRUCTURES AT BUILDINGS TO BE REMOVED.
5. ALL EXISTING UTILITY BOXES, LIDS, VALVE COVERS, VAULTS, ETC. THAT ARE TO REMAIN SHALL BE ADJUSTED TO MEET THE NEW FINISHED GRADES (AS REQUIRED). RE-USE EXISTING BOXES, LIDS, VALVE COVERS, VAULTS (IF POSSIBLE), OR INSTALL NEW PER COUNTY REQUIREMENTS. REPLACE ALL DAMAGED ITEMS. MATCH EXISTING SIZES. INSTALL/REPLACE TRAFFIC RATED BOXES WHERE REQUIRED. FIELD VERIFY THE EXTENT OF WORK.
6. REMOVE OR ABANDON ALL UNUSED SITE UTILITIES PER LOCAL REQUIREMENTS. FIELD VERIFY EXTENT OF REMOVAL.
7. THE CONTRACTOR IS RESPONSIBLE TO NOTIFY ALL UTILITIES AND UNDERGROUND SERVICE ALERT AT (800) 227-2600 48 HOURS PRIOR TO ANY EXCAVATION SO THAT THEIR LINES CAN BE MARKED.
8. ABANDONED UNDERGROUND STRUCTURES ENCOUNTERED IN THE STREET AREAS SHALL BE REMOVED TO SUFFICIENT DEPTH TO ALLOW UNDERGROUND LINES TO CROSS. EXCAVATED AREAS SHALL BE FILLED AND COMPACTED DURING ROUGH GRADING. THE COUNTY INSPECTOR MAY REQUIRE ADDITIONAL WORK BE DONE IF VISUAL INSPECTION INDICATES IT IS NECESSARY.
9. EXISTING UNDERGROUND FACILITIES AS SHOWN ARE APPROXIMATE ONLY AND WERE OBTAINED FROM AVAILABLE UTILITY RECORDS. THE PROJECT ENGINEER ASSUMES NO RESPONSIBILITY FOR THE ACCURACY OR COMPLETENESS OF EXISTING UTILITY INFORMATION. IT SHALL BE THE CONTRACTOR'S RESPONSIBILITY TO CONTACT ALL LOCAL UTILITIES AND TO HAVE ALL FACILITIES LOCATED AND EXPOSED TO VERIFY THE CLEARANCE AT NEW PIPE CROSSINGS PRIOR TO THE START OF NEW PIPELINE CONSTRUCTION.
10. ANY RELOCATION OF THE PUBLIC UTILITIES SHALL BE DONE IN ACCORDANCE WITH ANY AND ALL REQUIREMENTS OF THE UTILITY COMPANY AND WITH REGARD TO THE REQUIRED FEES, BONDS, PERMITS, WORKING CONDITIONS, ETC. OF SAID COMPANY. THIS WORK SHALL BE DONE AT NO EXPENSE TO THE COUNTY OF ALAMEDA. THE SUBDIVIDER SHALL PAY THE COST OF ALL SAID FEES. BONDS, PERMITS, ETC.
11. MINIMUM COVER FOR CONDUITS SHALL BE 36" UNLESS OTHERWISE SHOWN OR NOTED ON THESE PLANS OR ON UTILITY PLANS (BY OTHERS).

SANITARY SEWER NOTES:

1. CITY OF BERKELEY SPECIFICATIONS ARE INCORPORATED HEREON BY REFERENCE. SANITARY SEWER MAINS AND LATERALS SHALL BE INSTALLED AT THE LOCATIONS SHOWN HEREIN OR AS SPECIFIED IN THE FIELD BY DEVELOPER.
2. ALL SANITARY SEWER MAINS AND LATERALS SHALL BE CONSTRUCTED USING HDPE SDR-17 UNLESS OTHERWISE NOTED ON THE PLANS.

STORM DRAIN NOTES:

1. ALL STORM DRAIN PIPES SHALL BE HDPE SDR-17 OR BETTER, UNLESS OTHERWISE NOTED ON THE PLANS.
2. ALL ONSITE STORM DRAIN INLETS SHALL BE CLEARLY MARKED WITH THE WORDS "NO DUMPING! FLOWS TO BAY." OR EQUIVALENT.

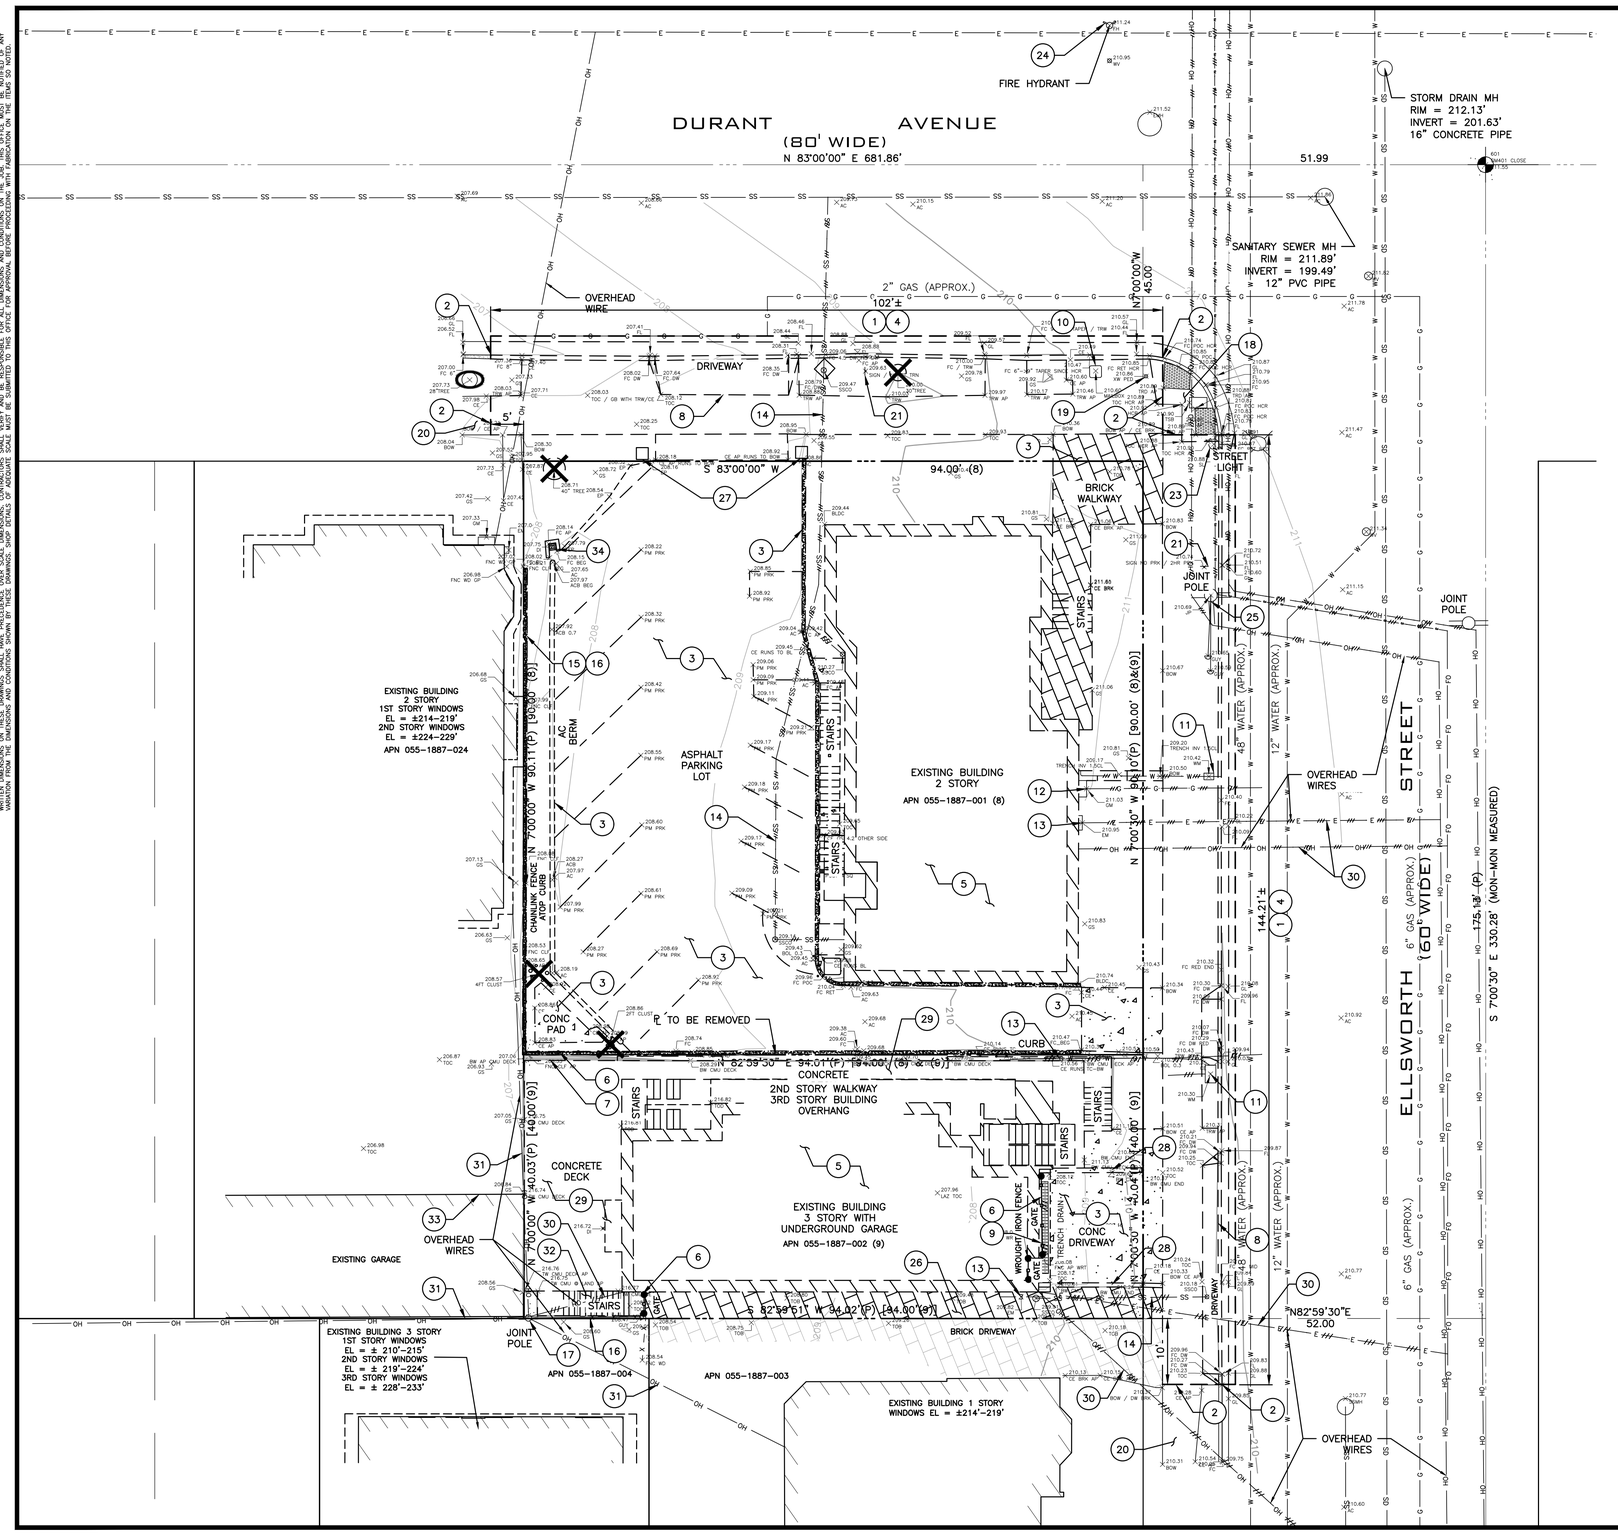
TREE PRESERVATION NOTES:

1. ALL TRENCHING WITHIN 5' OF AN EXISTING TREE MUST BE DONE USING AN AIRSPADE PNEUMATIC EXCAVATION TOOL BY A TREE SERVICES CONTRACTOR WITH A D-49 STATE CONTRACTORS LICENSE. THE CITY'S ARBORIST SHALL INSPECT EXCAVATION PRIOR TO ANY ROOTS BEING CUT. CALL (510) 981-6660 TO SCHEDULE AN INSPECTION. ROOTS OVER 2" IN DIAMETER MAY REQUIRE PRESERVATION. ONLY A LICENSED AND INSURED TREE SERVICES CONTRACTOR MAY PRUNE THE TREE ROOTS. ROOTS ARE TO BE CUT WITH A SHARP AXE OF SAW. THE EXCAVATION SHALL NOT BE LEFT OPEN AND ROOTS EXPOSED TO AIR FOR MORE THAN 24 HOURS.

DEMOLITION NOTES:
SEE SHEET C2.0 FOR ADDITIONAL INFORMATION NOT SHOWN

1. THE CONTRACTOR SHALL BE RESPONSIBLE FOR LOCATING ALL EXISTING UNDERGROUND UTILITIES, WHETHER SHOWN ON THESE PLANS OR NOT, PRIOR TO THE COMMENCEMENT OF ANY DEMOLITION WORK.
2. ALL EXISTING UTILITIES AND APPURTENANCES THERETO SERVING ANY EXISTING STRUCTURE OR BUILDINGS AND THOSE IN THE PUBLIC RIGHT OF WAY SERVING PUBLIC UTILITIES ARE TO REMAIN AND SHALL BE PROTECTED IN PLACE. THE CONTRAC

ALL IDEAS, DESIGNS, ARRANGEMENTS AND PLANS INDICATED BY THIS DRAWING ARE OWNED BY, AND THE PROPERTY OF THIS OFFICE AND WERE CREATED, EVOLVED AND DEVELOPED FOR USE ON , AND IN CONNECTION WITH THE SPECIFIED PROJECT. NONE OF SUCH IDEAS, DESIGNS, ARRANGEMENTS OR PLANS SHALL BE USED BY OR DISCLOSED TO ANY PERSON, FIRM OR CORPORATION FOR ANY PURPOSE WHATSOEVER WITHOUT THE WRITTEN PERMISSION OF GREENWOOD & MOORE, INC.
VERIFICATION OF ALL DIMENSIONS AND CONDITIONS SHOWN BY THESE DRAWINGS, SHOP DETAILS OF ADEQUATE SCALE MUST BE SUBMITTED TO THIS OFFICE FOR APPROVAL BEFORE PROCEEDING WITH FABRICATION ON THE ITEMS SO NOTED. VARIATION FROM THE DIMENSIONS AND CONDITIONS SHOWN BY THESE DRAWINGS MUST BE REPORTED TO THIS OFFICE FOR APPROVAL BEFORE PROCEEDING WITH FABRICATION ON THE ITEMS SO NOTED. ANY



KEYNOTES:

1. SAWCUT
2. LIMIT OF REMOVAL
3. REMOVE (E) CONCRETE/ASPHALT/BRICK
4. REMOVE (E) SIDEWALK, CURB, & GUTTER
5. (E) BUILDING & FOUNDATION TO BE DEMOLISHED, REMOVE (E) ASSOCIATED RETAINING WALLS AND FOUNDATION. PG&E TO DISCONNECT ELECTRIC AND GAS SERVICE PRIOR TO DEMOLITION OF THE (E) BUILDING.
6. REMOVE (E) FENCE AND/OR GATE
7. REMOVE (E) RETAINING WALL
8. REMOVE (E) DRIVEWAY
9. REMOVE (E) TRENCH DRAIN
10. REMOVE & REINSTALL (E) MAILBOX. COORDINATE REMOVAL & REINSTALLATION WITH UNITED STATES POSTAL SERVICE.
11. REMOVE (E) WATER METER. CAP AND ABANDON (E) WATER LATERAL PER EBMUD STANDARDS (BY EBMUD)
12. PG&E TO REMOVE (E) GAS METER AND GAS LATERAL PRIOR TO DEMOLITION OF THE BUILDING. CONTRACTOR TO VERIFY LOCATION IN FIELD. CAP & ABANDON PER PG&E STANDARDS & REQUIREMENTS.
13. PG&E TO REMOVE (E) ELECTRIC METERS AND ASSOCIATED ELECTRIC LINE PRIOR TO DEMOLITION OF THE BUILDING. COORDINATE REMOVAL WITH OWNER AND PG&E.
14. ABANDON (E) SEWER LATERAL PER CITY OF BERKELEY REQUIREMENTS. FOR BUILDING DEMOLITION AND LATERAL ABANDONMENT: WHEN A BUILDING IS TO BE DEMOLISHED AND THE EXISTING LATERAL IS NOT TO BE RE–USED, THE LATERAL SEWER SHALL BE DUG AND EXPOSED WHERE IT ENTERS THE MAIN.
    A. IF THE LATERAL ENTERS THE MAIN BY MEANS OF A FACTORY MANUFACTURED WYE OR TEE BRANCH, AND IF THE MAIN AND WYE OR TEE BRANCH ARE ALL IN GOOD, UNDAMAGED CONDITION, THE LATERAL SHALL BE DISCONNECTED AND THE BRANCH SHALL BE PLUGGED WITH AN EXPANDABLE NEOPRENE RUBBER PLUG AT THE MAIN. THE BRANCH PLUG SHALL BE SHALL BE ENCLOSED WITH A MINIMUM THICKNESS OF 6 INCHES OF 6 SACK, ¾" SIZE AGGREGATE. PORTLAND CEMENT CONCRETE. THE WYE BRANCH WITH RUBBER PLUG MUST BE INSPECTED AND APPROVED BY AN ENGINEERING INSPECTOR PRIOR TO ENCLOSURE WITH CONCRETE AND BACKFILL OF THE TRENCH.
    B. IF THE LATERAL ENTERS THE MAIN BY ANY METHOD OTHER THAN BY A FACTORY WYE OR TEE BRANCH, OR IF THE EXISTING MAIN, WYE OR TEE BRANCH IS DAMAGED IN ANY WAY, THE SECTION OF MAIN CONTAINING THE LATERAL ENTRY OPENING SHALL BE REMOVED AND REPLACED WITH A NEW SECTION OF PIPE OF THE SAME DIAMETER AS THE EXISTING MAIN. AN ENGINEERING INSPECTOR MUST INSPECT THE NEW MAIN SECTION BEFORE BACKFILL.
    C. THE ABANDONED LATERAL PIPE SHALL BE FILLED WITH SAND AND JETTED TO PREVENT THE PIPE FROM BECOMING A HOME FOR RODENTS OR OTHER DISEASE VECTORS.
    D. REMOVE (E) CLEANOUT FRAME & COVER.
15. REMOVE (E) CONCRETE WALL. COORDINATE REMOVAL WITH ADJACENT PROPERTY OWNER.
16. REMOVE (E) FENCE. COORDINATE REMOVAL WITH ADJACENT PROPERTY OWNER.
17. (E) JOINT POLE WITH GUY WIRE TO REMAIN
18. (E) ACCESSIBLE RAMP TO REMAIN
19. (E) CROSSWALK BUTTON/BOLLARD TO REMAIN
20. (E) CONCRETE TO REMAIN
21. (E) SIGN TO REMAIN
22. (E) CURB & GUTTER TO REMAIN
23. (E) LIGHT POLE TO REMAIN
24. (E) FIRE HYDRANT TO REMAIN
25. REMOVE (E) JOINT POLE & UNDERGROUND (E) OVERHEAD UTILITIES (BY OTHERS)
26. REMOVE (E) BRICK PAVERS TO PROPERTY LINE
27. REMOVE (E) BRICK POST
28. REMOVE (E) RETAINING WALL AND FOUNDATION.
29. REMOVED (E) CONCRETE DECK, WALLS AND FOUNDATION.
30. REMOVE (E) OVERHEAD UTILITY LINE TO BUILDING. COORDINATE REMOVAL WITH APPROPRIATE UTILITY MUNICIPALITY.
31. (E) OVERHEAD UTILITY LINE TO REMAIN.
32. REMOVE (E) CONCRETE STEPS.
33. PROTECT (E) BUILDING ON ADJACENT PROPERTY DURING DEMOLITION.
34. (E) DRAIN INLET AND STORM DRAIN TO REMAIN DURING DEMOLITION. REMOVE (E) DRAIN INLET AND STORM DRAIN PRIOR TO CONSTRUCTION OF (N) BUILDING FOUNDATION.

X REMOVE (E) TREE AND/OR (E) STUMP

O (E) TREE TO REMAIN. PROTECT TREE DURING CONSTRUCTION

STORM DRAINAGE KEYNOTES D#

1. FLOW THROUGH PLANTER
2. DRAIN INLET. GRATE TO BE 6" ABOVE FLOW THROUGH PLANTER FINISH GRADE. DRAIN INLET TO BE CP2424 PER DETAIL 1/C7.1 & 2/C7.1
3. STORM DRAIN MANHOLE PER CITY OF BERKELEY STANDARD DETAIL 7895. VERIFY EXISTING SEWER SIZE AND INVERT ELEVATION IN FIELD. SEE 4/C7.4.
4. APPROXIMATE LOCATION OF RAIN WATER DOWNSPOUT TO OUTFALL INTO BIORETENTION AREA AT COBBLE DISSIPATOR
5. BELOW GROUND CONTECH CARTRIDGE CATCH BASIN STORMFILTER TO TREAT ROOFTOP. CONNECT 6" STORM DRAIN OUTLET TO DRAIN INLET. SEE DETAIL 4/C7.1.
6. STORM DRAIN THROUGH BUILDING. COORDINATE WITH PLUMBING CONSULTANT.
7. CONNECT DOWNSPOUT TO STORM DRAIN THAT IS CONNECTED TO FILTER VAULT.

SEWER KEYNOTES S#

1. SSMH PER CITY OF BERKELEY STANDARD DETAIL 7895. VERIFY EXISTING SEWER SIZE AND INVERT ELEVATION IN FIELD. SEE 4/C7.4.
2. ABANDON (E) SEWER LATERAL. FOR BUILDING DEMOLITION AND LATERAL ABANDONMENT: WHEN A BUILDING IS TO BE DEMOLISHED AND THE EXISTING LATERAL IS NOT TO BE RE-USED, THE LATERAL SEWER SHALL BE DUG AND EXPOSED WHERE IT ENTERS THE MAIN.

A. IF THE LATERAL ENTERS THE MAIN BY MEANS OF A FACTORY MANUFACTURED WYE OR TEE BRANCH, AND IF THE MAIN AND WYE OR TEE BRANCH ARE ALL IN GOOD, UNDAMAGED CONDITION, THE LATERAL SHALL BE DISCONNECTED AND THE BRANCH SHALL BE PLUGGED WITH AN EXPANDABLE NEOPRENE RUBBER PLUG AT THE MAIN. THE BRANCH PLUG SHALL BE SHALL BE ENCLOSED WITH A MINIMUM THICKNESS OF 6 INCHES OF 6 SACK, ¾" SIZE AGGREGATE. PORTLAND CEMENT CONCRETE. THE WYE BRANCH WITH RUBBER PLUG MUST BE INSPECTED AND APPROVED BY AN ENGINEERING INSPECTOR PRIOR TO ENCLOSURE WITH CONCRETE AND BACKFILL OF THE TRENCH.

B. IF THE LATERAL ENTERS THE MAIN BY ANY METHOD OTHER THAN BY A FACTORY WYE OR TEE BRANCH, OR IF THE EXISTING MAIN, WYE OR TEE BRANCH IS DAMAGED IN ANY WAY, THE SECTION OF MAIN CONTAINING THE LATERAL ENTRY OPENING SHALL BE REMOVED AND REPLACED WITH A NEW SECTION OF PIPE OF THE SAME DIAMETER AS THE EXISTING MAIN. AN ENGINEERING INSPECTOR MUST INSPECT THE NEW MAIN SECTION BEFORE BACKFILL.

C. THE ABANDONED LATERAL PIPE SHALL BE FILLED WITH SAND AND JETTED TO PREVENT THE PIPE FROM BECOMING A HOME FOR RODENTS OR OTHER DISEASE VECTORS.

D. REMOVE (E) CLEANOUT FRAME & COVER.

3. 8" HDPE SDR 17
4. 2 WAY SEWER CLEANOUT WITH CAST IRON TRAFFIC RATED COVER. COORDINATE SEWER CONNECTION TO BUILDING LOCATION AND ELEVATION WITH PLUMBING PLANS.

WATER KEYNOTES W#

1. CONNECT TO EXISTING WATER LINE PER EBMUD STANDARDS AND REQUIREMENTS
2. RESIDENTIAL APARTMENT DOMESTIC WATER METER PER EBMUD STANDARDS AND REQUIREMENTS. VERIFY METER SIZE WITH EBMUD AND PLUMBING PLANS.
3. WATER METER AND CHECK VALVE FOR FIRE SERVICE PER EBMUD STANDARDS AND REQUIREMENTS.
4. 2" WATER SERVICE TO APARTMENT BUILDING. VERIFY SIZE AND LOCATION WITH PLUMBING PLANS. PROVIDE BACKFLOW DEVICE AT BUILDING PER EBMUD STANDARDS AND REQUIREMENTS.
5. X" FIRE SERVICE TO BUILDING. SEE FIRE SERVICE PLANS BY OTHERS FOR MORE INFORMATION. PROVIDE BACKFLOW DEVICE AT BUILDING PER EBMUD STANDARDS AND REQUIREMENTS.
6. (E) FIRE HYDRANT
7. FIRE DEPARTMENT CONNECTION. SEE PLANS BY OTHERS.
   7.1. THE FDC SHALL BE INSTALLED NO HIGHER THAN 3-FEET FROM FINISHED GRADE, AND SHALL BE LOCATED SO THAT FIRE APPARATUS AND HOSE CONNECTED TO SUPPLY THE SYSTEM WILL NOT OBSTRUCT ACCESS TO THE BUILDINGS FOR OTHER FIRE APPARATUS.
   7.2. THE FDC SUPPLYING WATER TO THE STANDPIPE SYSTEM MUST CONSIST OF A THREE (3) 2-1/2-INCH INLET CONNECTION AND ONE (1) 5-INCH STORZ CONNECTION WITH A BUILT-IN DEBRIS SCREEN.
8. REMOVE (E) WATER METER. CAP AND ABANDON (E) WATER LATERAL PER EBMUD STANDARDS (BY EBMUD)
9. (N) FIRE HYDRANT PER EBMUD AND CITY OF BERKELEY STANDARDS, REQUIREMENTS AND SPECIFICATIONS.

UTILITY KEYNOTES U#

1. CONTRACTOR FIELD LOCATE (E) UTILITIES. NOTIFY ENGINEER OF ANY CONFLICTS WITH (E) UTILITIES.
2. JOINT TRENCH BY OTHERS. SEE JOINT TRENCH PLANS
3. (N) ABOVE GROUND TRANSFORMER (BY OTHERS)
4. ALL TRENCHING IN THE CITY RIGHT OF WAY TO BE PER CITY OF BERKELEY STANDARD DETAIL 8136.
5. PROVIDE 1' MINIMUM CLEARANCE AT UTILITY CROSSING. VIF
6. REMOVE (E) JOINT POLE AND UNDERGROUND EXISTING OVERHEAD UTILITIES (BY OTHERS)
7. REMOVE (E) OVERHEAD LINES
8. PG&E TO REMOVE (E) GAS METER AND GAS LATERAL PRIOR TO DEMOLITION OF THE BUILDING. CONTRACTOR TO VERIFY LOCATION IN FIELD. CAP & ABANDON PER PG&E STANDARDS & REQUIREMENTS.
9. PG&E TO REMOVE (E) ELECTRIC METERS AND ASSOCIATED ELECTRIC LINE PRIOR TO DEMOLITION OF THE BUILDING. COORDINATE REMOVAL WITH OWNER AND PG&E.
10. REMOVE (E) TRENCH DRAIN. ABANDON EXISTING STORM DRAIN LINE.
11. (E) JOINT POLE TO REMAIN.

Worksheet for Calculating the Combination Flow and Volume Method

These calculations are based on the combination flow and volume hydraulic sizing method provided in the Alameda, San Mateo, and Santa Clara County C.3 Technical Guidance Manuals. The steps presented below are explained in Chapter 5, Section 5.1 of the gui

1.0 Project Information

1-1	Project Name:	2298 DURANT AVE	
1-2	City application ID:	BERKELEY	
1-3	Site Address or APN:	0	
1-4	Tract or Parcel Map No:	0	
1-5	Site Mean Annual Precip. (MAP)[1]	23.0	Inches
	Refer to the Mean Annual Precipitation Map in Appendix D of the C.3 Technical Guidance to determine the MAP, in inches, for the site.		Click here for map
1-6	Applicable Rain Gauge[2]	Oakland Airport (CWPAC)	
	MAP adjustment factor is automatically calculated as:	1.25	
	(The "Site Mean Annual Precipitation (MAP)" is divided by the MAP for the applicable rain gauge, shown in Table 5.2, below.)		

2.0 Calculate Percentage of Impervious Surface for Drainage Management Area (DMA)

2-1	Name of DMA:	DMA-2

For items 2-2 and 2-3, enter the areas in square feet for each type of surface within the DMA.

	Type of Surface	Area of surface type within DMA (Sq. Ft)	Adjust Pervious Surface	Effective Impervious Area
2-2	Impervious Surface	5,312	1.0	5,312
2-3	Pervious Surface	165	0.1	17
	Total DMA Area (square feet) =	5,477		
2-4		***Total Effective Impervious Area (EIA)***		5,329 Square feet

3.0 Calculate Unit Basin Storage Volume in Inches

Table 5-2: Unit Basin Storage Volumes (in inches) for 80 Percent Capture Using 48-Hour Drawdowns

Applicable Rain Gauge	Mean Annual Precipitation (in)	Unit Basin Storage Volume (in) for Applicable Runoff Coefficients (Calculated for 100% Imperviousness)
San Jose Airport (SCVURPH)	13.9	0.58
Palo Alto (SCVURPP)	13.7	0.62
Palo Alto (SMCWPPP)	14.6	0.64
Gilroy (SCVURPP)	18.2	1.00
Morgan Hill (SCVURPP)	19.5	1.00
Boulder Creek (SMCWPPP)	55.9	2.04
La Honda (SMCWPPP)	24.4	0.86
Half Moon Bay (SMCWPPP)	25.92	0.82
San Francisco (SMCWPPP)	21	0.73
San Francisco Airport (SMCWPPP)	20.1	0.85
San Francisco Oceanside (SMCWPPP)	19.3	0.72
Oakland Airport (CWPAC)	18.35	1.00

3-1	***Unit basin storage volume from Table 5.2:***	1.00 Inches
	(The coefficient for this method is 1.00, due to the conversion of any landscaping to effective impervious area)	
3-2	***Adjusted unit basin storage volume:***	1.25 Inches
	(The unit basin storage volume is adjusted by applying the MAP adjustment factor.)	
3-3	***Required Capture Volume (in cubic feet):***	557 Cubic feet
	(The adjusted unit basin sizing volume [inches] is multiplied by the size of the DMA and converted to feet)	

4.0 Calculate the Duration of the Rain Event

4-1	Rainfall intensity	0.2 Inches per hour
4-2	Divide Item 3-2 by Item 4-1	6.27 Hours of Rain Event Duration

5.0 Preliminary Estimate of Surface Area of Treatment Measure

5-1	4% of DMA impervious surface	213 Square feet
5-2	Area 25% smaller than item 5-1	160 Square feet
5-3	Volume of treated runoff for area in Item 5-2	417 Cubic feet (Item 5-2 * 5 inches per hour * 1/12 * Item 4-2)

6.0 Initial Adjustment of Depth of Surface Ponding Area

6-1	Subtract Item 5-3 from Item 3-3	139 Cubic feet (Amount of runoff to be stored in ponding area)
6-2	Divide Item 6-1 by Item 5-2	0.9 Feet (Depth of stored runoff in surface ponding area)
6-3	Convert Item 6-2 from ft to inches	10.4 Inches (Depth of stored runoff in surface ponding area)
6-4	If ponding depth in Item 6-3 meets your target depth of 6"-12", then Item 7-1 is equal to Item 5-2. If not, continue to Step 7-1.	

7.0 Optimize Size of Treatment Me 25

7-1	Enter an area larger or smaller than Item 5-2	165 Sq.ft. (enter larger area if you need less ponding depth; smaller for more depth.)
7-2	Volume of treated runoff for area in Item 7-1	431 Cubic feet (Item 7-1 * 5 inches per hour * 1/12 * Item 4-2)
7-3	Subtract Item 7-2 from Item 3-3	126 Cubic feet (Amount of runoff to be stored in ponding area)
7-4	Divide Item 7-3 by Item 7-1	0.76 Feet (Depth of stored runoff in surface ponding area)
7-5	Convert Item 7-4 from feet to inches	9.14 Inches (Depth of stored runoff in surface ponding area)
7-6	If the ponding depth in Item 7-5 meets target, stop here. If not, repeat Steps 7-1 through 7-5 until you obtain target depth. If the slope of the drainage area > 1%, then 11" will be the max ponding depth (slopes >1% will increase the ponding depth by 0.

BIORETENTION TREATMENT SOIL SPECIFICATIONS

1. BIORETENTION TREATMENT SOIL SHALL ACHIEVE A LONG TERM, IN-PLACE INFILTRATION RATE BETWEEN 5 IN/HR AND 10 IN/HR, CAPABLE OF SUPPORTING VIGOROUS PLAN GROWTH AND CONSIST OF 60%-70% SAND AND 30%-40% COMPOST.

1.1. THE APPLICANT TO SUBMIT TO THE MUNICIPALITY FOR APPROVAL:

1.1.a. A SAMPLE OF MIXED BIORETENTION SOIL.

1.1.b. CERTIFICATION FROM THE SOIL SUPPLIER OR AN ACCREDITED LABORATORY THAT THE BIORETENTION SOIL MEETS THE REQUIREMENTS OF THIS GUIDELINE SPECIFICATION.

1.1.c. GRAIN SIZE ANALYSIS RESULTS OF THE FINE SAND COMPONENT PERFORMED IN ACCORDANCE WITH ASTM D 422, STANDARD TEST METHOD FOR PARTICLE SIZE ANALYSIS OF SOILS.

1.1.d. QUALITY ANALYSIS RESULTS FOR COMPOST PERFORMED IN ACCORDANCE WITH SEAL OF TESTING ASSURANCE (STA) STANDARDS, AS SPECIFIED SECTION 1.4.

1.1.e. ORGANIC CONTENT TEST RESULTS OF MIXED BIORETENTION SOIL. ORGANIC CONTENT TEST SHALL BE PERFORMED IN ACCORDANCE WITH TESTING METHODS FOR EXAMINATION OF COMPOST AND COMPOSTING (TMECC) 05.07A, "LOSS-ON-IGNITION ORGANIC MATTER METHOD.

1.1.f. GRAIN SIZE ANALYSIS RESULTS OF THE COMPOST COMPONENT IN ACCORDANCE WITH ASTM D422, STANDARD TEST METHOD FOR PARTICLE SIZE ANALYSIS OF SOILS.

1.1.g. A DESCRIPTION OF THE EQUIPMENT AND METHODS USED TO MIX THE SAND AND COMPOST TO PRODUCE BIORETENTION SOIL.

1.1.h. PROVIDE THE FOLLOWING INFORMATION ABOUT THE TESTING LABORATORY(IES): CONTACT PERSON(S), ADDRESS(ES), PHONE CONTACTS(S), EMAIL ADDRESS(ES) AND QUALIFICATIONS OF LABORATORY(IES) AND PERSONNEL INCLUDING DATE OF CURRENT CERTIFICATION BY STA, ASTM, OR APPROVED EQUAL.

1.2. SAND FOR BIORETENTION SOIL:

1.2.a. SAND SHALL BE FREE OF WOOD, WASTE COATING SUCH AS CLAY, STONE, DUST, CARBONATE, ETC., OR ANY OTHER DELETERIOUS MATERIAL. ALL AGGREGATE PASSING THE NO. 200 SIEVE SHALL BE NON-PLASTIC.

1.2.b. SAND FOR BIORETENTION AREA SHALL BE ANALYZED BY AN ACCREDITED LAB USING #200, #100, #40, #30 #8, #4, AND 3/8" SIEVES (ASTM D 422 OR AS APPROVED BY MUNICIPALITY), AND MEET THE FOLLOWING GRADATION.

SIEVE SIZE	PERCENT PASSING (BY WEIGHT) MIN	MAX.
3/8"	100	100
NO. 4	90	100
NO. 8	70	100
NO. 16	40	95
NO. 30	15	70
NO. 40	5	55
NO. 100	0	15
NO. 200	0	5

NOTE: ALL SANDS COMPLYING WITH ASTM C33 FOR FINE AGGREGATE COMPLY WITH THE ABOVE GRADATION REQUIREMENTS.

1.3 COMPOSTED MATERIAL

COMPOST SHALL BE A WELL DECOMPOSED, STABLE, WEED FREE ORGANIC MATTER SOURCE DERIVED FROM WASTE MATERIALS INCLUDING YARD DEBRIS, WOOD WASTES OR OTHER ORGANIC MATERIALS NOT INCLUDING MANURE OR BIOSOLIDS MEETING THE STANDARDS DEVELOPED BY THE US COMPOSTING COUNCIL (USCC). THE PRODUCT SHALL BE CERTIFIED THROUGH THE USCC SEAL OF TESTING ASSURANCE (STA) PROGRAM (A COMPOST TESTING AND INFORMATION DISCLOSURE PROGRAM).

A. COMPOST QUALITY ANALYSIS: BEFORE DELIVERY OF THE SOIL, THE SUPPLIER SHALL SUBMIT A COPY OF LAB ANALYSIS PERFORMED BY A LABORATORY THAT IS ENROLLED IN THE US COMPOSTING COUNCIL'S COMPOST ANALYSIS PROFICIENCY (CAP) PROGRAM USING APPROVED TEST METHODS FOR THE EVALUATION OF COMPOSTING AND COMPOST (TMECC). THE LAB REPORT SHALL VERIFY:

1. FEEDSTOCK MATERIALS SHALL BE SPECIFIED AND INCLUDE ONE OF THE FOLLOWING: LANDSCAPE/YARD TRIMMINGS, GRASS CLIPPINGS, FOOD SCRAPS AND AGRICULTURE CROP RESIDUES.
2. ORGANIC MATTER CONTENT: 35%-75% BY DRY WEIGHT.
3. CARBON AND NITROGEN RATIO: C:N < 25:1 AND C:N > 15:1
4. MATURITY AND STABILITY SHALL HAVE A DARK BROWN COLOR AND A SOIL LIKE ODOR. COMPOST EXHIBITING A SOUR OR PUTRID SMELL, CONTAINING RECOGNIZABLE GRASS OR LEAVES, OR IS HOT (120F) UPON DELIVERY IS NOT ACCEPTABLE. IN ADDITION ANY ONE OF THE FOLLOWING IS REQUIRED TO INDICATE STABILITY:
   - 4.a. OXYGEN TEST < 1.3 O2/UNIT TS/HR
   - 4.b. SPECIFIC OXY. TEST < 1.5 O2/UNIT BVS/
   - 4.c. RESPIRATION TEST < 8 C/UNIT VS/DAY
   - 4.d. DEWAR TEST < 20 TEMP. RISE (DEGREES C) E.
   - 4.e. SOLVITA > 5 INDEX VALUE
5. TOXICITY: ANY OF THE FOLLOWING MEASURES IS SUFFICIENT TO INDICATE NON-TOXICITY:
   - 5.a. NH4- :NO3 < 3
   - 5.b. AMMONIUM < 500PPM, DRY BASIS
   - 5.c. SEED GERMINATION > 80% OF CONTROL
   - 5.d. PLANT TRIALS > 80% OF CONTROL
   - 5.e. SOLVITA > 5 INDEX VALUE
6. NUTRIENT CONTENT: PROVIDE ANALYSIS DETAILING NUTRIENT CONTENT INCLUDING N-P-K, CA, NA, MG AND B.
   - 6.a. TOTAL NITROGEN CONTENT 0.9% OR ABOVE PREFERRED
   - 6.b. BORON: TOTAL SHALL BE < 80PPM: SOLUBLE SHALL BE < 2.5 PPM
7. SALINITY: MUST BE REPORTED: < 6.0 MMHOS/CM
8. PH SHALL BE BETWEEN 6.5 AND 8. MAY VARY WITH PLANT SPECIES.

B. COMPOST FOR BIORETENTION SOIL TEXTURE

COMPOST FOR BIORETENTION SOILS SHALL BE ANALYZED BY AN ACCREDITED LAB USING #200, 1/4", 1/2" AND 1" SIEVES (ASTM D422 OR AS APPROVED BY MUNICIPALITY), AND MEET THE FOLLOWING GRADATION.

SIEVE SIZE	PERCENT PASSING (BY WEIGHT) MIN	MAX.
1"	99	100
1/2"	90	100
1/4"	40	90
NO. 200	2	10

C. BULK DENSITY SHALL BE BETWEEN 500 AND 1100 DRY LBS/CUBIC YARD

D. MOISTURE CONTENT SHALL BE BETWEEN 30%-55% OF DRY SOLIDS.

E. INERTS: COMPOST SHALL BE RELATIVELY FREE OF INERT INGREDIENTS, INCLUDING GLASS, PLASTIC AND PAPER, <1% BY WEIGHT OR VOLUME.

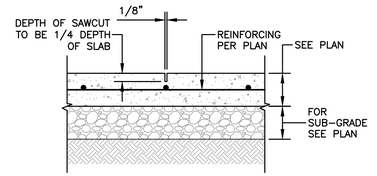
F. WEED SEED/PATHOGEN DESTRUCTION: PROVIDE PROOF OF PROCESS TO FURTHER REDUCE PATHOGENS (PFRP). FOR EXAMPLE, TURNED WINDROWS MUCH REACH MIN. 55C FOR 15 DAYS WITH AT LEAST 5 TURNINGS DURING THAT PERIOD.

G. SELECT PATHOGENS: SALMONELLA < 3 MPN/4 GRAMS OF TS, OR COLIFORM BACTERIA < 1000MPN/GRAM

H. TRACE CONTAMINANTS METALS (LEAD, MERCURY, ETC.) PRODUCT MUST MEET US EPA, 40 CFR 503 REGULATIONS.

I. COMPOST TESTING: THE COMPOST SUPPLIER WILL TEST ALL COMPOST PRODUCTS WITHIN 120 CALENDAR DAYS PRIOR TO APPLICATION. SAMPLES WILL BE TAKEN USING THE STA SAMPLE COLLECTION PROCESS PROTOCOL. (THE SAMPLE COLLECTION PROTOCOL CAN BE OBTAINED FROM THE U.S. COMPOSTING COUNCIL, 4250 VETERANS MEMORIAL HIGHWAY, SUITE 275, HOLBROOK, NY 11741 PHONE: 631-737-4931, (WWW.COMPOSTINGCOUNCIL.ORG) THE SAMPLE SHALL BE SENT TO AN INDEPENDENT STA PROGRAM APPROVED LAB. THE COMPOST SUPPLIER WILL PAY FOF THE TEST.

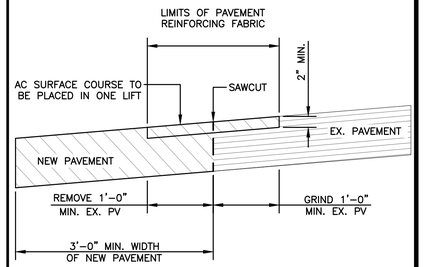
14 TREATMENT SOIL NOTES



NOTES
1. WEAKENED PLANE JOINTS ARE FOR USE IN NON-STRESSED SLABS SUPPORTED BY THE GRADE BELOW.
2. 5'-0" MAXIMUM SPACING RECOMMENDED (U.N.O. ON PLANS).
3. SEE SHOP DRAWINGS, BY OTHERS, FOR ALL CRACK CONTROL JOINTS AND CONSTRUCTION JOINTS IN DECORATIVE CONCRETE
4. SAWCUT JOINTS WITHIN 24 HOURS OF THE CONCRETE PLACEMENT.

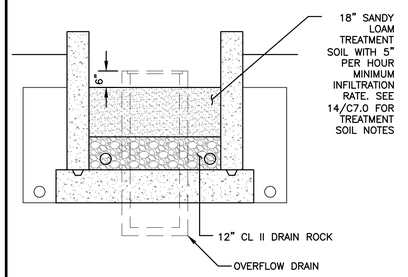
1 1/2"=1'-0"

11 CRACK CONTROL



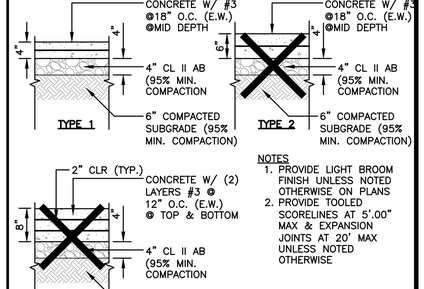
1"=1'-0"

8 SAWCUT



1/2"=1'-0"

12 FLOWTHROUGH PLANTER

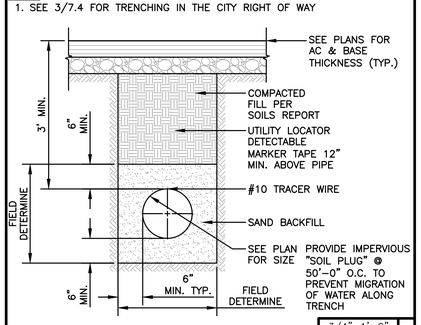


NOTES
1. PROVIDE LIGHT BROOM FINISH UNLESS NOTED OTHERWISE ON PLANS
2. PROVIDE TOOLED SCORELINES AT 5'.00" MAX & EXPANSION JOINTS AT 20' MAX UNLESS NOTED OTHERWISE

3/4"=1'-0"

9 CONCRETE SLAB

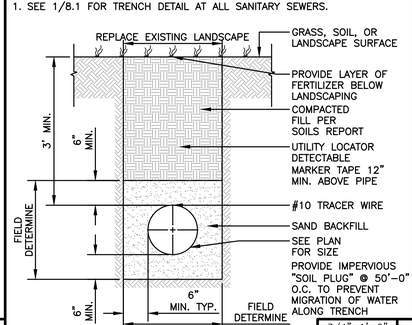
NOTES
1. SEE 3/7.4 FOR TRENCHING IN THE CITY RIGHT OF WAY



3/4"=1'-0"

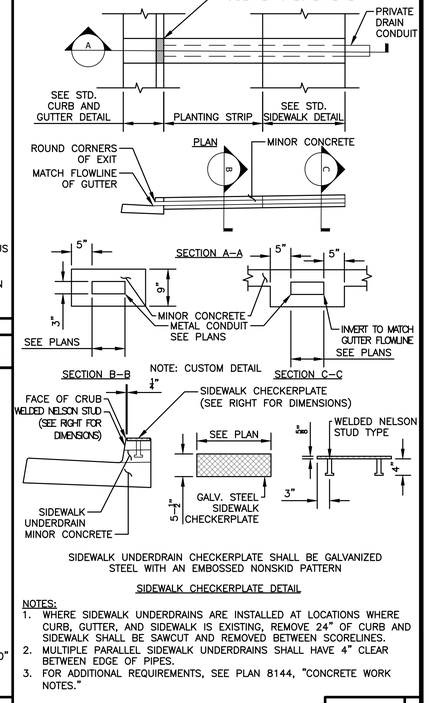
13 ASPHALT TRENCH

NOTES
1. SEE 1/8.1 FOR TRENCH DETAIL AT ALL SANITARY SEWERS.



3/4"=1'-0"

10 TRENCH & LANDSCAPE



SIDEWALK UNDERDRAIN CHECKERPLATE SHALL BE GALVANIZED STEEL WITH AN EMBOSSED NONSKID PATTERN

SIDEWALK CHECKERPLATE DETAIL

NOTES:
1. WHERE SIDEWALK UNDERDRAINS ARE INSTALLED AT LOCATIONS WHERE CURB, GUTTER, AND SIDEWALK IS EXISTING, REMOVE 24" OF CURB AND SIDEWALK SHALL BE SAWCUT AND REMOVED BETWEEN SCORELINES.
2. MULTIPLE PARALLEL SIDEWALK UNDERDRAINS SHALL HAVE 4" CLEAR BETWEEN EDGE OF PIPES.
3. FOR ADDITIONAL REQUIREMENTS, SEE PLAN 8144, "CONCRETE WORK NOTES."

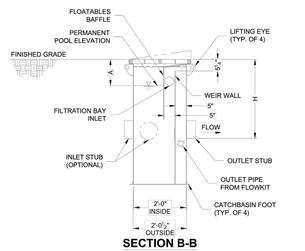
SECTION A-A



SECTION B-B

STORMFILTER STEEL CATCHBASIN DESIGN NOTES

STORMFILTER TREATMENT CAPACITY IS A FUNCTION OF THE CARTRIDGE SELECTION AND THE NUMBER OF CARTRIDGES. 1 CARTRIDGE CATCHBASIN HAS A MAXIMUM OF ONE CARTRIDGE. SYSTEM IS SHOWN WITH A 27" CARTRIDGE, AND IS ALSO AVAILABLE WITH AN 18" CARTRIDGE. STORMFILTER CATCHBASIN CONFIGURATIONS ARE AVAILABLE WITH A DRY INLET BAY FOR VECTOR CONTROL. PEAK HYDRAULIC CAPACITY PER TABLE BELOW. IF THE SITE CONDITIONS EXCEED PEAK HYDRAULIC CAPACITY, AN UPSTREAM BYPASS STRUCTURE IS REQUIRED.

CARTRIDGE SELECTION

CARTRIDGE HEIGHT	27"			18"			18" DEEP		
RECOMMENDED HYDRAULIC DROP (H)	3.05'			2.3'			3.3'		
SPECIFIC FLOW RATE (gpm/sf)	2 gpm/sf	1.67* gpm/sf	1 gpm/sf	2 gpm/sf	1.67* gpm/sf	1 gpm/sf	2 gpm/sf	1.67* gpm/sf	1 gpm/sf
CARTRIDGE FLOW RATE (gpm)	22.5	18.79	11.25	15	12.53	7.5	15	12.53	7.5
PEAK HYDRAULIC CAPACITY		1.0			1.0			2.25	
INLET PERMANENT POOL LEVEL (A)		1'-0"			1'-0"			2'-0"	
OVERALL STRUCTURE HEIGHT (B)		4'-9"			3'-9"			4'-9"	

* 1.67 gpm/sf SPECIFIC FLOW RATE IS APPROVED WITH PHOSPHOSORB® (PSORB) MEDIA ONLY

GENERAL NOTES
1. CONTECH TO PROVIDE ALL MATERIALS UNLESS NOTED OTHERWISE.
2. FOR SITE SPECIFIC DRAWINGS WITH DETAILED STORMFILTER CATCHBASIN STRUCTURE DIMENSIONS AND WEIGHTS, PLEASE CONTACT YOUR CONTECH ENGINEERED SOLUTIONS LLC REPRESENTATIVE. www.contechES.com
3. STORMFILTER CATCHBASIN WATER QUALITY STRUCTURE SHALL BE IN ACCORDANCE WITH ALL DESIGN DATA AND INFORMATION CONTAINED IN THIS DRAWING.
4. INLET SHOULD NOT BE LOWER THAN OUTLET. INLET (IF APPLICABLE) AND OUTLET PIPING TO BE SPECIFIED BY ENGINEER AND PROVIDED BY CONTRACTOR.
5. MANUFACTURER TO APPLY A SURFACE BEAD WELD IN THE SHAPE OF THE LETTER "O" ABOVE THE OUTLET PIPE STUB ON THE EXTERIOR SURFACE OF THE STEEL SFCB.
6. STORMFILTER CATCHBASIN EQUIPPED WITH 4 INCH (APPROXIMATE) LONG STUBS FOR INLET (IF APPLICABLE) AND OUTLET PIPING. STANDARD OUTLET STUB IS 8 INCHES IN DIAMETER. MAXIMUM OUTLET STUB IS 15 INCHES IN DIAMETER. CONNECTION TO COLLECTION PIPING CAN BE MADE USING FLEXIBLE COUPLING BY CONTRACTOR.
7. STEEL STRUCTURE TO BE MANUFACTURED OF 1/4 INCH STEEL PLATE. CASTINGS SHALL MEET AASHTO M306 LOAD RATING. TO MEET HS20 LOAD RATING ON STRUCTURE, A CONCRETE COLLAR IS REQUIRED. WHEN REQUIRED, CONCRETE COLLAR WITH #4 REINFORCING BARS TO BE PROVIDED BY CONTRACTOR.
8. FILTER CARTRIDGES SHALL BE MEDIA-FILLED, PASSIVE, SIPHON ACTUATED, RADIAL FLOW, AND SELF CLEANING. RADIAL MEDIA DEPTH SHALL BE 7-INCHES. FILTER MEDIA CONTACT TIME SHALL BE AT LEAST 38 SECONDS.
9. SPECIFIC FLOW RATE IS EQUAL TO THE FILTER TREATMENT CAPACITY (gpm) DIVIDED BY THE FILTER CONTACT SURFACE AREA (sq ft).

INSTALLATION NOTES
A. ANY SUB-BASE, BACKFILL DEPTH, AND/OR ANTI-FLOTATION PROVISIONS ARE SITE-SPECIFIC DESIGN CONSIDERATIONS AND SHALL BE SPECIFIED BY ENGINEER OF RECORD.
B. CONTRACTOR TO PROVIDE EQUIPMENT WITH SUFFICIENT LIFTING AND REACH CAPACITY TO LIFT AND SET THE CATCHBASIN (LIFTING CLUTCHES PROVIDED).
C. CONTRACTOR TO TAKE APPROPRIATE MEASURES TO PROTECT CARTRIDGES FROM CONSTRUCTION-RELATED EROSION RUNOFF.

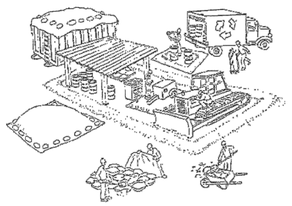
City of Berkeley's Pollution Prevention - It's Part of the Plan



Make sure your crews and subs do the job right!

Runoff from streets and other paved areas is a major source of pollution and damage to creeks and the San Francisco Bay. Construction activities can directly affect the health of creeks and the Bay unless contractors and crews plan ahead to keep dirt, debris, and other construction waste away from storm drains and local creeks. Following these guidelines and the project specifications will ensure your compliance with City of Berkeley requirements.

Materials storage & spill cleanup

Non-hazardous materials management

- Sand, dirt, and similar materials must be stored at least 10 feet (3 meters) from catch basins. All construction material must be covered with a tarp and contained with a perimeter control during wet weather or when rain is forecasted or when not actively being used within 14 days.
- Use (but don't overuse) reclaimed water for dust control as needed.
- Sweep or vacuum streets and other paved areas daily. Do not wash down streets or work areas with water!
- Recycle all asphalt, concrete, and aggregate base material from demolition activities. Comply with City of Berkeley Ordinances for recycling construction materials, wood, gyp board, pipe, etc.
- Check dumpsters regularly for leaks and to make sure they are not overfilled. Repair or replace leaking dumpsters promptly.
- Cover all dumpsters with a tarp at the end of every work day or during wet weather.

Hazardous materials management

- Label all hazardous materials and hazardous wastes (such as pesticides, paints, thinners, solvents, fuel, oil, and antifreeze) in accordance with city, county, state, and federal regulations.
- Store hazardous materials and wastes in water tight containers, store in appropriate secondary containment, and cover them at the end of every work day or during wet weather or when rain is forecasted.
- Follow manufacturer's application instructions for hazardous materials and be careful not to use more than necessary. Do not apply chemicals outdoors when rain is forecasted within 24 hours.
- Be sure to arrange for appropriate disposal of all hazardous wastes.

Spill prevention and control

- Keep a stockpile of spill cleanup materials (rags, absorbents, etc.) available at the construction site at all times.
- When spills or leaks occur, contain them immediately and be particularly careful to prevent leaks and spills from reaching the gutter, street, or storm drain. Never wash spilled material into a gutter, street, storm drain, or creek!
- Dispose of all containment and cleanup materials properly.
- Report any hazardous materials spills immediately! Dial 911 or the City of Berkeley's Public Works Department by dialing 311

Construction Entrances and Perimeter

- Establish and maintain effective perimeter controls and stabilize all construction entrances and exits to sufficiently control erosion and sediment discharges from site and tracking off site.
- Sweep or vacuum any street tracking immediately and secure sediment source to prevent further tracking.

Vehicle and equipment maintenance & cleaning

- Inspect vehicles and equipment for leaks frequently. Use drip pans to catch leaks until repairs are made; repair leaks promptly.
- Fuel and maintain vehicles on site only in a bermed area or over a drip pan that is big enough to prevent runoff.
- If you must clean vehicles or equipment on site, clean with water only in a bermed area that will not allow rinse water to run into gutters, streets, storm drains, or creeks.
- Do not clean vehicles or equipment on-site using soaps, solvents, degreasers, steam cleaning equipment, etc.

Earthwork & contaminated soils

- Keep excavated soil on the site where it will not collect in the street.
- Transfer to dump trucks should take place on the site, not in the street.
- Use fiber rolls, silt fences, or other control measures to minimize the flow of silt off the site.

- Earth moving activities are only allowed during dry weather by permit and as approved by the City Inspector in the Field.
- Mature vegetation is the best form of erosion control. Minimize disturbance to existing vegetation whenever possible.
- If you disturb a slope during construction, prevent erosion by securing the soil with erosion control fabric, or seed with fast-growing grasses as soon as possible. Place fiber rolls down-slope until soil is secure.
- If you suspect contamination (from site history, discoloration, odor, texture, abandoned underground tanks or pipes, or buried debris), call the Engineer for help in determining what should be done, and manage disposal of cntaminated soil according to their instructions.

Dewatering operations

- Effectively manage all run-on, all runoff within the site, and all runoff that discharges from the site. Run-on from off site shall be directed away from all disturbed areas or shall collectively be in compliance.
- Reuse water for dust control, irrigation, or another on-site purpose to the greatest extent possible.

- Be sure to notify and obtain approval from the Engineer before discharging water to a street, gutter, or storm drain. Filtration or diversion through a basin, tank, or sediment trap may be required.
- In areas of known contamination, testing is required prior to reuse or discharge of groundwater. Consult with the Engineer to determine what testing is required and how to interpret results. Contaminated groundwater must be treated or hauled off-site for proper disposal.

Saw cutting

- Always completely cover or barricade storm drain inlets when saw cutting. Use filter fabric, catch basin inlet filters, or sand/gravel bags to keep slurry out of the storm drain system.
- Shovel, absorb, or vacuum saw-cut slurry and pick up all waste as soon as you are finished in one location or at the end of each work day (whichever is sooner!).
- If saw cut slurry enters a catch basin, clean it up immediately.

Paving/asphalt work

- Always cover storm drain inlets and manholes when paving or applying seal coat, tack coat, slurry seal, or fog seal.
- Protect gutters, ditches, and drainage courses with sand/gravel bags, or earthen berms.
- Do not sweep or wash down excess sand from sand sealing into gutters, storm drains, or creeks. Collect sand and return it to the stockpile, or dispose of it as trash.
- Do not use water to wash down fresh asphalt concrete pavement.

Concrete, grout, and mortar storage & waste disposal

- Store concrete, grout, and mortar under cover, on pallets, and away from drainage areas. These materials must never reach a storm drain.
- Wash out concrete equipment/trucks off-site or into contained washout areas that will not allow discharge of wash water onto the underlying soil or onto the surrounding areas.

- Collect the wash water from washing exposed aggregate concrete and remove it for appropriate disposal off site.

Painting

- Never rinse paint brushes or materials in a gutter or street!
- Paint out excess water-based paint before rinsing brushes, rollers, or containers in a sink.
- Paint out excess oil-based paint before cleaning brushes in thinner.
- Filter paint thinners and solvents for reuse whenever possible. Dispose of oil-based paint sludge and unusable thinner as hazardous waste.

Landscape Materials

- Contain, cover, and store on pallets all stockpiled landscape materials (mulch, compost, fertilizers, etc.) during wet weather or when rain is forecasted or when not actively being used within 14 days.
- Discontinue the application of any erodible landscape material within 2 days of forecasted rain and during wet weather.

Storm drain polluters may be liable for fines of $10,000 or more per day!

PHASE NO.	XX
SHEET NO.	C7.2

ALL IDEAS, DESIGNS, ARRANGEMENTS AND PLANS INDICATED BY THIS DRAWING ARE OWNED BY AND THE PROPERTY OF THIS OFFICE AND WERE CREATED, EVOLVED AND DEVELOPED FOR USE ON - AND IN CONNECTION WITH THE SPECIFIED PROJECT. NONE OF SUCH IDEAS, DESIGNS, ARRANGEMENTS OR PLANS SHALL BE USED BY OR DISCLOSED TO ANY PERSON, FIRM OR CORPORATION FOR ANY PURPOSE WHATSOEVER WITHOUT THE WRITTEN PERMISSION OF GREENWOOD & MOORE, INC. VISUAL CONTACT WITH THESE DRAWINGS SHALL CONSTITUTE PRIMA FACIE EVIDENCE OF ACCEPTANCE OF THESE RESTRICTIONS. ALL DIMENSIONS AND CONDITIONS SHOWN BY THESE DRAWINGS SHOP DETAILS OF ADEQUATE SCALE MUST BE SUBMITTED TO THIS OFFICE FOR APPROVAL BEFORE PROCEEDING WITH FABRICATION ON THE ITEMS SO NOTED. WRITTEN DIMENSIONS SHALL GOVERN. DO NOT SCALE DRAWINGS. CONTRACTOR SHALL VERIFY AND BE RESPONSIBLE FOR ALL DIMENSIONS AND CONDITIONS ON THE JOB AND THE SAME SHALL REPORT ANY VARIATION FROM THE DIMENSIONS AND CONDITIONS SHOWN BY THESE DRAWINGS.

EROSION CONTROL NOTES

TEMPORARY EROSION CONTROL MEASURES EFFECTIVE DURING RAINY SEASON — OCTOBER 1 TO APRIL 30

1. TEMPORARY EROSION CONTROL DEVICES SHOWN ON GRADING PLAN WHICH INTERFERE WITH THE WORK SHALL BE RELOCATED OR MODIFIED WHEN THE INSPECTOR SO DIRECTS AS THE WORK PROGRESSES.
2. EXCEPT AS OTHERWISE DIRECTED BY THE INSPECTOR, ALL DEVICES SHOWN ON THE EROSION CONTROL PLAN SHALL BE IN PLACE AT THE END OF EACH WORKING DAY. ALL EROSION CONTROL FACILITIES MUST BE INSPECTED AND REPAIRED AT THE END OF EACH WORKING DAY DURING THE RAINY SEASON AND MAINTAINED DURING THE RAINY SEASON (OCTOBER 1 TO APRIL 30).
3. ALL EROSION AND SEDIMENT CONTROL MEASURES SHALL BE CONSTRUCTED AND MAINTAINED IN ACCORDANCE WITH THE PROVISIONS OF THE ASSOCIATION OF BAY AREA GOVERNMENTS (ABAG) "MANUAL OF STANDARDS FOR EROSION AND SEDIMENT CONTROL MEASURES" UNLESS OTHERWISE STATED WITHIN THESE GENERAL NOTES. CONTROL MEASURES ARE SUBJECT TO THE INSPECTION AND APPROVAL OF THE ENGINEERING DIVISION OF THE PUBLIC SERVICES DEPARTMENT. SCHEDULE AN ENGINEERING INSPECTION AT LEAST 48 HOURS PRIOR TO THE START OF ANY WORK.
4. ALL LOOSE SOIL AND DEBRIS SHALL BE REMOVED FROM THE STREET AREAS UPON STARTING OPERATIONS AND PERIODICALLY THEREAFTER AS DIRECTED BY THE INSPECTOR. THE SITE SHALL BE MAINTAINED SO AS TO MINIMIZE SEDIMENT LADEN RUNOFF TO ANY STORM DRAIN SYSTEM.
5. THE CONTRACTOR SHALL PLACE 3"–4" FRACTURED STONE AGGREGATE AS A GRAVEL ROADWAY (6" MINIMUM THICKNESS FOR THE FULL WIDTH AND 50 FEET LONG) AT EACH ROAD ENTRANCE TO THE SITE. ANY MUD THAT IS TRACKED ONTO PUBLIC STREETS SHALL BE REMOVED THE SAME DAY AS REQUIRED BY THE COUNTY ENGINEER. MINIMUM WIDTH OF GRAVEL ROADWAY IS 10 FEET.
6. A CONCRETE WASHOUT IS REQUIRED FOR ALL CONCRETE WORK. THE WASHOUT SHALL CONSIST OF A CONTAINMENT AREA ENCLOSED BY AN EARTHEN DIKE. PLASTIC TARP, COVERING THE CONTAINMENT AREA AND EARTHEN DIKE, SHALL BE STAKED IN AT OUTSIDE EDGE OF EARTHEN DIKE.
7. ADDITIONAL CONTAINMENT METHODS MUST BE PROVIDED FOR ANY WASTE STORAGE AREA, STOCKPILE/MATERIAL STORAGE AREA AND/OR CONSTRUCTION TOILET AREA.
8. THE PERSON RESPONSIBLE IMPLEMENTING, INSPECTING AND MAINTAINING THE EROSION AND SEDIMENT CONTROL MEASURES IS:

   CONTACT PERSON'S NAME: XXXX
   TELEPHONE NUMBER: XXXX

9. STAND–BY CREWS SHALL BE ALERTED BY THE PERMITTEE OR CONTRACTOR FOR EMERGENCY WORK DURING RAINSTORMS.
10. AFTER OCTOBER 1, ALL EROSION CONTROL MEASURES WILL BE INSPECTED DAILY AND AFTER EACH STORM. AFTER OCTOBER 1, BREACHES IN DIKES AND SWALES WILL BE REPAIRED AT THE CLOSE OF EACH DAY AND WHENEVER RAIN IS FORECAST.
11. AS A PART OF THE EROSION CONTROL MEASURES, UNDERGROUND STORM DRAIN FACILITIES AND CONCRETE SHALL BE INSTALLED COMPLETE AS SHOWN ON THE IMPROVEMENT PLANS.
12. ALL STORM DRAIN INLET STRUCTURES GREATER THAN FOUR FEET IN DEPTH SHALL HAVE STEPS INSTALLED PER THE LATEST ACCEPTED SAFETY STANDARDS. A 6" CONCRETE COVER SLAB SHALL BE INSTALLED OVER PIPE WITH LESS THAN 2.5 FEET OF COVER TO SUBGRADE. ALL PIPE TO BE CLASS III UNLESS OTHERWISE NOTED.
13. ALL GRADED AREAS, INCLUDING, BUT NOT LIMITED TO, CUT AND FILL SLOPES, STREETS, PARKING AREAS, AND BUILDING PADS SHALL BE HYDROSEEDED PER ABAG. IN ADDITION TO HYDROSEEDING, APPLICATION OF STRAW WITH A TACKIFIER OR MULCH MAY BE REQUIRED BY THE COUNTY ENGINEER.
14. IF ANY GRADING OPERATIONS, OTHER THAN LOT FINISH GRADING, ARE TO BE PERFORMED DURING THE RAINY SEASON, OCTOBER 1 THROUGH APRIL 30, AN EROSION CONTROL PLAN MUST BE SUBMITTED BY SEPTEMBER 1 AND THE PLAN MUST BE APPROVED BY THE COUNTY OF ALAMEDA PRIOR TO THE COMMENCEMENT OF ANY SUCH GRADING OPERATIONS.
15. TO MINIMIZE EROSION OF GRADED BANKS, ALL GRADED BANKS STEEPER THAN 2% AND HIGHER THAN 3 FEET, SHALL BE HYDROSEEDED, LANDSCAPED, OR SEALED. IN ADDITION TO HYDROSEEDING, APPLICATION OF STRAW WITH A TACKIFIER OR MULCH MAY BE REQUIRED BY THE COUNTY ENGINEER. IF THE PERMANENT STORM DRAIN SYSTEM IS NOT INSTALLED BY OCTOBER 1, TEMPORARY DITCHES SHALL BE CONSTRUCTED TO CONTAIN THE STORM WATER AND DIRECT IT, IN A MANNER THAT AVOIDS EROSION OF THE BANKS, TO THE EROSION AND SEDIMENT CONTROL FACILITIES.
16. ALL CUT AND FILL SLOPES ARE TO BE PROTECTED TO PREVENT OVERBANK FLOW USING 4" EARTH BERMS OR SILT FENCES.
17. ALL GRADED AREAS, INCLUDING, BUT NOT LIMITED TO, CUT AND FILL SLOPES, STREETS, PARKING AREAS, AND BUILDING PADS SHALL BE HYDROSEEDED PER COUNTY'S REQUIREMENT. SUGGESTED MIX DESIGN FOLLOWS:

'BLANDO' BROME	40 LBS/ACRE
ZORRO FESCUE	10 LBS/ACRE
HYKON ROSE CLOVER	9 LBS/ACRE
SUB CLOVER	5 LBS/ACRE
CALIFORNIA NATIVE WILDFLOWER	8 LBS/ACRE
FERTILIZER	300 LBS/ACRE
ORGANIC BINDER	100 LBS/ACRE
STRAW MULCH	4000 LBS/ACRE

18. BORROW AREAS AND TEMPORARY STOCKPILES SHALL BE PROTECTED WITH APPROPRIATE EROSION CONTROL MEASURES TO THE SATISFACTION OF THE COUNTY ENGINEER.
19. SANDBAGS, STRAW WATTLES AND/OR STRAW BALES SHALL BE STOCKPILED ON SITE AND PLACED AT INTERVALS SHOWN ON EROSION CONTROL PLANS, WHEN THE RAIN FORECAST IS 40% OR GREATER, OR WHEN DIRECTED BY THE INSPECTOR.
20. SANDBAGS REFERRED TO IN THE PRECEDING ITEMS MUST BE FULL. APPROVED SANDBAG FILL MATERIALS ARE DECOMPOSED GRANITE AND/OR GRAVEL, OR OTHER MATERIALS APPROVED BY THE INSPECTOR.
21. WHEN DIRECTED BY THE INSPECTOR, A 12–INCH BERM SHALL BE MAINTAINED ALONG THE TOP OF THE SLOPE OF THOSE FILLS ON WHICH GRADING IS NOT IN PROGRESS.
22. WHEN PAD ELEVATIONS OF ADJACENT LOTS OR ELEVATIONS BETWEEN THE STREET AND THE LOT ARE SEPARATED BY MORE THAN 6 FEET, A MINIMUM 12" BERM SHALL BE MAINTAINED ALONG THE PROPERTY LINE SEPARATING THE LOTS, AND THE BERM SHALL DIRECT THE WATER TO THE OUTLET. VELOCITY CHECK DAMS SHALL BE INSTALLED BETWEEN THE OUTLET ON THE LOT AND THE STREET.
23. PROVIDE VELOCITY CHECK DAMS IN ALL UNPAVED STREETS AT THE INTERVALS INDICATED BELOW IN NOTE #24. VELOCITY CHECK DAMS MAY BE CONSTRUCTED OF STRAW BALES, SANDBAGS OR OTHER EROSION RESISTANT MATERIALS APPROVED BY THE INSPECTOR, AND SHALL EXTEND COMPLETELY ACROSS THE STREET OR CHANNEL AT RIGHT ANGLES TO THE CENTERLINE. EARTH DIKES MAY NOT BE USED AS VELOCITY CHECK DAMS.
24. PROVIDE VELOCITY CHECK DAMS IN ALL UNPAVED GRADED CHANNELS AT THE INTERVALS INDICATED BELOW:

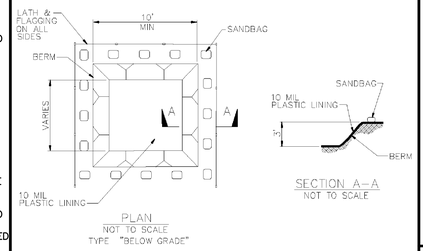
GRADE OF CHANNEL	INTERVAL
LESS THAN 3%	100 FEET
3% TO 6%	50 FEET
OVER 6%	25 FEET

25. SEWER OR STORM DRAIN TRENCHES THAT ARE OUT THROUGH BASIN DIKES OR BASIN INLET DIKES, SHALL BE PLUGGED WITH SANDBAGS FROM TOP OF PIPE TO TOP OF DIKE. SEWER LINES SHALL FIRST BE ENCASED IN CONCRETE BEFORE SANDBAGS ARE PLACED.
26. ALL OPEN UTILITY TRENCHES SHALL BE BLOCKED AT THE PRESCRIBED INTERVALS FROM THE BOTTOM TO TOP WITH A DOUBLE ROW OF SANDBAGS PRIOR TO BACKFILL. SEWER TRENCHES SHALL BE BLOCKED AT THE PRESCRIBED INTERVALS WITH A DOUBLE ROW OF SANDBAGS EXTENDING DOWNWARD, TWO SANDBAGS FROM THE GRADED SURFACE OF THE STREET. SANDBAGS ARE TO BE PLACED WITH ALTERNATE HEADER AND STRETCHER COURSES. THE INTERVALS PRESCRIBED BETWEEN SANDBAG LOCKING SHALL DEPEND ON THE SLOPE OF THE GROUND SURFACE, BUT NOT EXCEED THE FOLLOWING:

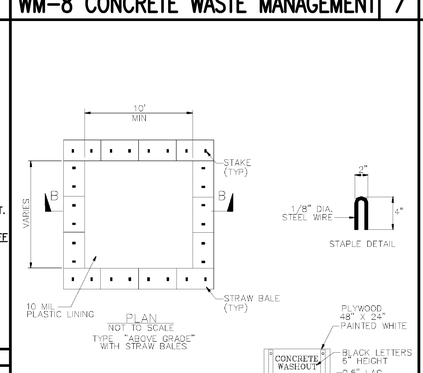
GRADE OF THE STREET	INTERVAL
LESS THAN 2%	AS REQUIRED
2% TO 4%	100 FEET
4% TO 10%	50 FEET
OVER 10%	25 FEET

27. AFTER STORM DRAIN, SANITARY SEWER AND UTILITY TRENCHES ARE BACKFILLED AND COMPACTED, THE SURFACES OVER SUCH TRENCHES SHALL BE MOUNDED SLIGHTLY TO PREVENT CHANNELING OF WATER IN THE TRENCH AREA. CARE SHOULD BE EXERCISED TO PROVIDE FOR CROSS FLOW AT FREQUENT INTERVALS WHERE TRENCHES ARE NOT ON THE CENTER LINE OF A CROWNED STREET.
28. SEDIMENT TRAPS SHALL BE CLEANED OUT PER INSPECTOR'S DIRECTION. IT IS THE CONTRACTOR'S RESPONSIBILITY TO CLEAN THE DESILTING BASINS AND THE SEDIMENT TRAPS.
29. THIS PLAN MAY NOT COVER ALL THE SITUATIONS THAT ARISE DURING CONSTRUCTION DUE TO UNANTICIPATED FIELD CONDITIONS. VARIATIONS MAY BE MADE TO THESE PLANS IN THE FIELD, SUBJECT TO APPROVAL OF THE COUNTY ENGINEER.
30. EROSION CONTROL STRUCTURES SHALL BE ADJUSTED BY THE CONTRACTOR TO REFLECT ALL CHANGES IN DRAINAGE AS STREETS AND BUILDING PADS ARE BEING INSTALLED.
31. INSTALL EXCELSIOR CURLEX II EROSION CONTROL BLANKET OR APPROVED EQUAL ON GRADED SLOPES STEEPER THAN 3:1. INSTALL PER MANUFACTURER'S RECOMMENDATIONS AND SPECIFICATIONS.

EROSION CONTROL NOTES | 10

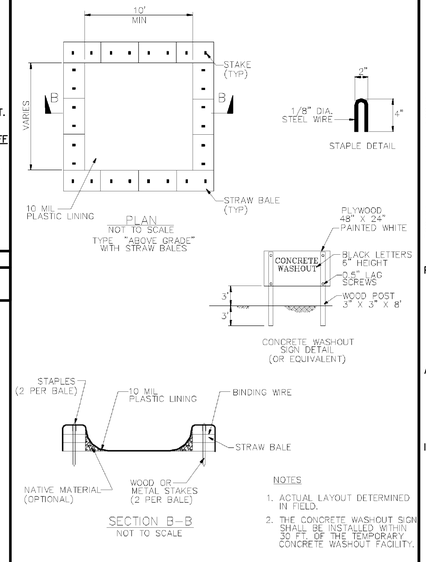


WM–8 CONCRETE WASTE MANAGEMENT | 7

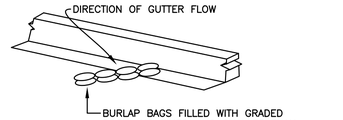


1/2"=1'–0"

SILT FENCE | 9



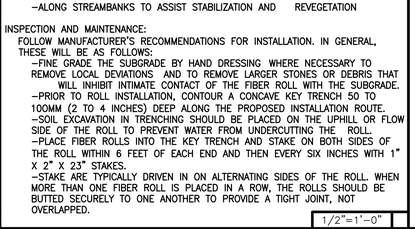
CONCRETE WASTE MANAGEMENT WM–8 | 8



NOTES
1. THICKNESS OF FILLED BAGS WHEN LAID FLAT SHALL NOT EXCEED 4".
2. ENSURE THERE ARE NO GAPS BETWEEN THE BAGS AND THE FACE OF CURB.
3. REMOVE ACCUMULATED SILT, DIRT, AND DEBRIS BEFORE IT EXCEEDS A THICKNESS OF 2" IN THE GUTTER.
4. INSPECT INLET PROTECTION DAILY DURING EXTENDED RAINFALL PERIODS AND BEFORE AND AFTER EACH RAIN EVENT.

1/2"=1'–0"

GRAVEL BAG CHECK DAM | 4

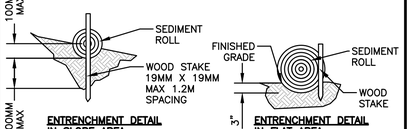


1/2"=1'–0"

INLET PROTECTION (UNPAVED AREAS) | 5

LIMITATIONS:
–DESIGNED FOR LOW SURFACE FLOWS NOT TO EXCEED 1 CFS FOR SMALL AREAS.
–DESIGNED FOR SHORT SLOPED OR SLOPES FLATTER THAN 3:1
– PRIMARY PURPOSE IS NOT SEDIMENT CONTROL, ALTHOUGH DO PROVIDE SOME SEDIMENT REMOVAL.

INSPECTION AND MAINTENANCE:
– REPAIR OR REPLACE SPLIT, TORN, UNRAVELING, OR SLUMPING FIBER ROLLS.
–INSPECT FIBER ROLLS WHEN RAIN IS FORECAST, FOLLOWING RAIN EVENTS AND AT LEAST DAILY DURING PROLONGED RAINFALL. PERFORM REQUIRED MAINTENANCE.
–IN MOST CASES, FIBER ROLLS DO NOT REQUIRE REMOVAL AND CAN BE ABANDONED IN PLACE. IF NOTE EXCESSIVELY SOILED, ROLLS MAY BE REMOVED. REPLACED AND REUSED.



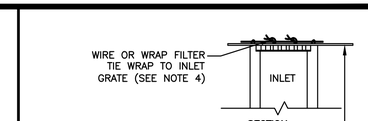
PURPOSE:
FIBER ROLLS (SEDIMENT LOGS OR WATTLES), COMPOSED OF BIO–DEGRADABLE FIBERS STUFFED IN A PHOTO–DEGRADEABLE OPEN WEAVE NETTING, ARE DESIGNED TO REDUCE SEDIMENT RUNOFF FROM DISTURBED SOILS INTO THE STORM DRAIN SYSTEM OR WATER–COURSES. FIBER ROLLS ARE POROUS AND ALLOW WATER TO FILTER THROUGH FIBERS AND TRAP SEDIMENT, INCREASE FILTRATION RATES, SLOW RUNOFF AND REDUCE SHEET AND HILL EROSION. WATTLES ALSO CREATE A FAVORABLE ENVIRONMENT FOR PLANT ESTABLISHMENT.

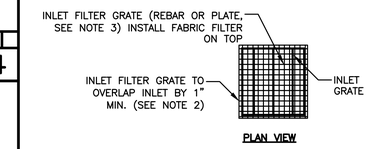
APPLICATION:
–ALONG THE FACE OF EXPOSED AND ERODIBLE SLOPES TO SHORTEN SLOPE LENGTH.
–AT GRADE BREAKS WHERE SLOPES TRANSITION TO A STEEPER SLOPE
–IN DRAINAGE SWALES TO SLOW FLOWS
–ALONG STREAMBANKS TO ASSIST STABILIZATION AND REVEGETATION

INSPECTION AND MAINTENANCE:
FOLLOW MANUFACTURER'S RECOMMENDATIONS FOR INSTALLATION. IN GENERAL, THESE WILL BE AS FOLLOWS:
–FINE GRADE THE SUBGRADE BY HAND DRESSING WHERE NECESSARY TO REMOVE LOCAL DEVIATIONS AND TO REMOVE LARGER STONES OR DEBRIS THAT WILL INHIBIT INTIMATE CONTACT OF THE FIBER ROLL WITH THE SUBGRADE.
–PRIOR TO ROLL INSTALLATION, CONTOUR A CONCAVE KEY TRENCH 50 TO 100MM (2 TO 4 INCHES) DEEP ALONG THE PROPOSED INSTALLATION ROUTE.
–SOIL EXCAVATION IN TRENCHING SHOULD BE PLACED ON THE UPHILL OR FLOW SIDE OF THE ROLL TO PREVENT WATER FROM UNDERCUTTING THE ROLL.
–PLACE FIBER ROLLS INTO THE KEY TRENCH AND STAKE ON BOTH SIDES OF THE ROLL WITHIN 6 FEET OF EACH END AND THEN EVERY SIX INCHES WITH 1" X 2" X 23" STAKES.
–STAKE ARE TYPICALLY DRIVEN IN ON ALTERNATING SIDES OF THE ROLL. WHEN MORE THAN ONE FIBER ROLL IS PLACED IN A ROW, THE ROLLS SHOULD BE BUTTED SECURELY TO ONE ANOTHER TO PROVIDE A TIGHT JOINT, NOT OVERLAPPED.

1/2"=1'–0"

STRAW WATTLE | 6

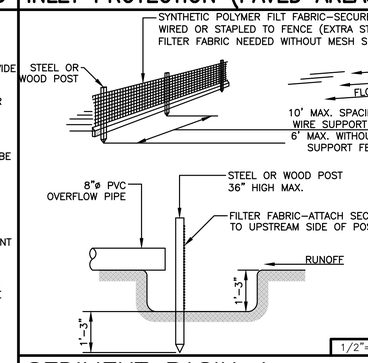




NOTES:
1. FILTER FABRIC SHALL MEET CAL–TRANS OR HAY BAG SPECIFICATIONS.
2. FILTER MATERIAL AND GRATE SHALL OVERLAP INLET ON ALL SIDES BY A MINIMUM OF 1"
3. INLET FILTER GRATE SHALL BE MADE OF RE–BARS, CRISS CROSSED AT 6" (WELDED NUMBERED 3 OR TIED TOGETHER WITH WIRE) OR A PLATE WITH MINIMUM OF 75% OPEN AREA, BOTH OF SUFFICIENT STRENGTH TO PREVENT BENDING WHEN DRIVEN OVER BY A VEHICLE.
4. INLET FILTER GRATE SHALL BE SECURELY ATTACHED TO DRAIN INLET BY WIRE OR TIE–WRAPS (BEND OVER).
5. FILTERS SHALL BE INSPECTED WEEKLY AND AFTER EACH RAINFALL. REPAIRS, SEDIMENT/ DEBRIS REMOVAL SHALL BE MADE TO ASSURE EFFICIENCY OF FILTER SYSTEM.

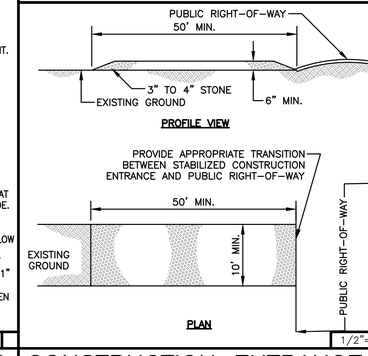
1/2"=1'–0"

INLET PROTECTION (PAVED AREAS) | 1



1/2"=1'–0"

SEDIMENT BASIN 1 | 2



1/2"=1'–0"

CONSTRUCTION ENTRANCE | 3

TITLE DESCRIPTION

REAL PROPERTY IN THE CITY OF BERKELEY, COUNTY OF ALAMEDA, STATE OF CALIFORNIA, DESCRIBED AS FOLLOWS:

PORTION OF LOT 4, BLOCK 13, "MAP OF THE PROPERTY OF COLLEGE HOMESTEAD ASSOCIATION", RECORDED MAY 15, 1866, MAP BOOK "T" OF DEEDS, PAGE 799, ALAMEDA COUNTY RECORDS.

BEGINNING AT A POINT OF THE INTERSECTION OF THE WESTERN LINE OF ELLSWORTH STREET WITH THE SOUTHERN LINE OF DURANT AVENUE, AND RUNNING THENCE WESTERLY ALONG SAID LINE OF DURANT AVENUE, 94 FEET; THENCE AT RIGHT ANGLES SOUTHERLY 90 FEET; THENCE EASTERLY PARALLEL WITH SAID LINE OF DURANT AVENUE, 94 FEET TO THE WESTERN LINE OF ELLSWORTH STREET; THENCE NORTHERLY ALONG SAID LAST NAMED LINE, 90 FEET TO THE POINT OF BEGINNING.

EXCEPTING THEREFROM THE EXCLUSIVE RIGHT TO PROSPECT FOR, DRILL FOR, PRODUCE AND TAKE ANY OIL, GAS OR OTHER HYDROCARBON SUBSTANCES OR MINERAL SUBSTANCES AND ACCOMPANYING FLUIDS INCLUDING ALL GEOTHERMAL RESOURCES, FROM THE REAL PROPERTY GRANTED HEREIN, FROM THE DEPTH OF FIVE HUNDRED FEET FROM THE SAID REAL PROPERTY, INCLUDING THE RIGHT TO SLANT DRILL FROM ADJACENT PROPERTY, THE RIGHT TO UTILIZE SUBSURFACE STORAGE FOR NATURAL SUBSTANCES, AND THE RIGHT TO MAINTAIN SUBSURFACE PRESSURES.
GRANTOR COVENANTS AND EGRESS THAT THE ABOVE RESERVED RIGHTS WILL NOT BE EXERCISED IN DEROGATION OF GRANTEE'S USED AND PURPOSES OF THE SURFACE OF REAL PROPERTY, AS RESERVED IN THE DEED EXECUTED BY THE REGENTS OF THE UNIVERSITY OF CALIFORNIA, A CALIFORNIA CORPORATION, RECORDED SEPTEMBER 2, 1983, SERIES NO 83-163400, ALAMEDA COUNTY RECORDS.

APN: 055-1887-001

THE PROPERTY SURVEYED IS THE SAME AS DESCRIBED ABOVE AND SHOWN IN THE TITLE COMMITMENT FROM FIRST AMERICAN TITLE INSURANCE COMPANY, COMMITMENT NO. NCS-1177686-CC AND AN EFFECTIVE DATE OF SEPTEMBER 18, 2023, UPDATED OCTOBER 06, 2023.

TITLE COMMITMENT INFORMATION

The Title Description and Schedule 'B' items are the same as shown on the title commitment provided by First American Title Insurance Company, Commitment No. NCS-1177686-CC, issued with an effective date of September 18, 2023, updated October 06, 2023.

SURVEYOR'S NOTES

1. ALL STATEMENTS WITHIN THE CERTIFICATION, AND OTHER REFERENCES LOCATED ELSEWHERE HEREON, RELATED TO UTILITIES, IMPROVEMENTS, STRUCTURES, BUILDINGS, PARTY WALLS, EASEMENTS, SERVITUDES, FOUNDATIONS AND POSSIBLE ENCROACHMENTS ARE BASED SOLELY ON ABOVE GROUND, VISIBLE EVIDENCE, UNLESS ANOTHER SOURCE OF INFORMATION IS SPECIFICALLY REFERENCED HEREON.

2. SUBJECT TRACT HAS DIRECT PHYSICAL DRIVEWAY ACCESS TO ELLSWORTH STREET AND DURANT AVENUE, BOTH DEDICATED PUBLIC RIGHTS-OF-WAY.

3. THE DIMENSIONS AND AREA OF THE BUILDING(S) SHOWN ARE BASED ON THE BUILDING'S EXTERIOR FOOTPRINT AT GROUND LEVEL.

4. THE POINT OF HEIGHT MEASUREMENT IS IDENTIFIED ON THE SURVEY AND WAS TAKEN FROM THE NEAREST ADJACENT GRADE AT SAID POINT. THIS POINT REPRESENTS THE HEIGHT OF THE STRUCTURE AS OBSERVED FROM GROUND LEVEL.

5. UNDERGROUND UTILITIES HAVE BEEN LOCATED AND/OR SHOWN ON THIS SURVEY, ONLY VISIBLE AND/OR MARKED UTILITY APPURTENANCES ARE SHOWN.

6. THERE IS NO OBSERVABLE EVIDENCE OF EARTH MOVING WORK, OR BUILDING CONSTRUCTION ON THE SURVEYED PROPERTY.

7. THERE ARE NO OBSERVABLE EVIDENCE OF ANY CHANGES IN STREET RIGHT-OF-WAYS OR RECENT STREET OR SIDEWALK CONSTRUCTION OR REPAIR.

8. THERE IS NO OBSERVABLE EVIDENCE OF CEMETERIES ON THE SURVEYED PROPERTY.

9. ALL RECIPROCAL EASEMENT AGREEMENTS ("REAS") THAT HAVE BEEN REPORTED BY THE TITLE REPORT PROVIDED HAVE BEEN DENOTED ON THE SURVEY AND ARE SHOWN HEREON. THE LIMITS OF ANY OFFSITE APPURTENANT EASEMENTS THAT HAVE BEEN REPORTED BY THE TITLE REPORT PROVIDED HAVE BEEN DENOTED ON THE SURVEY AND ARE SHOWN HEREON.

10. THIS SURVEY DOES NOT PROVIDE A DETERMINATION OR OPINION CONCERNING THE LOCATION OR EXISTENCE OF WETLANDS, FAULT LINES, TOXIC OR HAZARDOUS WASTE AREAS, SUBSIDENCE, SUBSURFACE AND ENVIRONMENTAL CONDITIONS OR GEOLOGICAL ISSUES. NO STATEMENT IS MADE CONCERNING THE SUITABILITY OF THE SUBJECT TRACT FOR ANY INTENDED USE, PURPOSE OR DEVELOPMENT.

11. THE SURVEYED BOUNDARY SHOWN HEREON ARE CONTIGUOUS WITH ADJOINING PROPERTIES AND/OR RIGHTS OF WAY WITHOUT ANY GAPS, GORES OR OVERLAPS.

12. NO VISIBLE EVIDENCE OF SUBSTANTIAL AREAS OF REFUSE WERE OBSERVED AT THE TIME THE FIELDWORK WAS PERFORMED.

13. THE BOUNDARY LINE DIMENSIONS AS SHOWN ON THIS SURVEY MAP FORM A MATHEMATICALLY CLOSED FIGURE.

SURVEYOR'S CERTIFICATE

TO: 2298 DURANT LP, A CALIFORNIA LIMITED PARTNERSHIP; FIRST AMERICAN TITLE INSURANCE COMPANY;

THIS IS TO CERTIFY THAT THIS MAP OR PLAT AND THE SURVEY ON WHICH IT IS BASED WERE MADE IN ACCORDANCE WITH THE 2021 MINIMUM STANDARD DETAIL REQUIREMENTS FOR ALTA/NSPS LAND TITLE SURVEYS, JOINTLY ESTABLISHED AND ADOPTED BY ALTA AND NSPS, AND INCLUDES ITEMS 2, 3, 4, 5, 6(A), 6(B), 7(A), 7(B)(1), 7(C), 8, 9, 11(B), 13, 14, 16, 17 AND 19 OF TABLE A THEREOF. THE FIELDWORK WAS COMPLETED ON JUNE 29, 2023.

TITLE DESCRIPTION

THE LAND REFERRED TO IS SITUATED IN THE COUNTY OF ALAMEDA, CITY OF BERKELEY, STATE OF CALIFORNIA, AND IS DESCRIBED AS FOLLOWS:

THAT PARCEL OF LAND IN THE CITY OF BERKELEY, COUNTY OF ALAMEDA, STATE OF CALIFORNIA, DESCRIBED AS FOLLOWS:

A PORTION OF LOT 4, BLOCK 13, "PROPERTY OF THE COLLEGE HOMESTEAD ASSOCIATION", FILED MAY 15, 1866, BOOK T OF DEEDS, PAGE 799, ALAMEDA COUNTY RECORDS, DESCRIBED AS FOLLOWS:

BEGINNING AT A POINT ON THE WESTERLY LINE OF ELLSWORTH STREET, DISTANT 90 FEET SOUTH OF THE INTERSECTION OF THE WESTERLY LINE OF ELLSWORTH STREET AND THE SOUTHERLY LINE OF DURANT AVENUE; THENCE SOUTHERLY ALONG THE WESTERLY LINE OF ELLSWORTH STREET 40 FEET; THENCE AT A RIGHT ANGLE WESTERLY PARALLEL TO THE SOUTHERLY LINE OF DURANT AVENUE 94 FEET; THENCE NORTHERLY AT A RIGHT ANGLE PARALLEL TO THE WESTERLY LINE OF ELLSWORTH STREET, 40 FEET; THENCE AT A RIGHT ANGLE EASTERLY 94 FEET TO THE POINT OF BEGINNING.

APN: 055-1887-002

THE PROPERTY SURVEYED IS THE SAME AS DESCRIBED ABOVE AND SHOWN IN THE TITLE COMMITMENT FROM FIRST AMERICAN TITLE INSURANCE COMPANY, COMMITMENT NO. NCS-1183023-CC AND AN EFFECTIVE DATE OF MAY 31, 2023.

TITLE COMMITMENT INFORMATION

The Title Description and Schedule 'B' items are the same as shown on the title commitment provided by First American Title Insurance Company, Commitment No. NCS-1183023-CC, issued with an effective date of May 31, 2023.

SURVEYOR'S NOTES

1. ALL STATEMENTS WITHIN THE CERTIFICATION, AND OTHER REFERENCES LOCATED ELSEWHERE HEREON, RELATED TO UTILITIES, IMPROVEMENTS, STRUCTURES, BUILDINGS, PARTY WALLS, EASEMENTS, SERVITUDES, FOUNDATIONS AND POSSIBLE ENCROACHMENTS ARE BASED SOLELY ON ABOVE GROUND, VISIBLE EVIDENCE, UNLESS ANOTHER SOURCE OF INFORMATION IS SPECIFICALLY REFERENCED HEREON.
2. SUBJECT TRACT HAS DIRECT PHYSICAL DRIVEWAY ACCESS TO ELLSWORTH STREET AND DURANT AVENUE, BOTH DEDICATED PUBLIC RIGHTS-OF-WAY.
3. THE DIMENSIONS AND AREA OF THE BUILDING(S) SHOWN ARE BASED ON THE BUILDING'S EXTERIOR FOOTPRINT AT GROUND LEVEL.
4. THE POINT OF HEIGHT MEASUREMENT IS IDENTIFIED ON THE SURVEY AND WAS TAKEN FROM THE NEAREST ADJACENT GRADE AT SAID POINT. THIS POINT REPRESENTS THE HEIGHT OF THE STRUCTURE AS OBSERVED FROM GROUND LEVEL.
5. UNDERGROUND UTILITIES HAVE BEEN LOCATED AND/OR SHOWN ON THIS SURVEY, ONLY VISIBLE AND/OR MARKED UTILITY APPURTENANCES ARE SHOWN.
6. THERE IS NO OBSERVABLE EVIDENCE OF EARTH MOVING WORK, OR BUILDING CONSTRUCTION ON THE SURVEYED PROPERTY.
7. THERE ARE NO OBSERVABLE EVIDENCE OF ANY CHANGES IN STREET RIGHT-OF-WAYS OR RECENT STREET OR SIDEWALK CONSTRUCTION OR REPAIR.
8. THERE IS NO OBSERVABLE EVIDENCE OF CEMETERIES ON THE SURVEYED PROPERTY.
9. ALL RECIPROCAL EASEMENT AGREEMENTS ("REAS") THAT HAVE BEEN REPORTED BY THE TITLE REPORT PROVIDED HAVE BEEN DENOTED ON THE SURVEY AND ARE SHOWN HEREON. THE LIMITS OF ANY OFFSITE APPURTENANT EASEMENTS THAT HAVE BEEN REPORTED BY THE TITLE REPORT PROVIDED HAVE BEEN DENOTED ON THE SURVEY AND ARE SHOWN HEREON.
10. THIS SURVEY DOES NOT PROVIDE A DETERMINATION OR OPINION CONCERNING THE LOCATION OR EXISTENCE OF WETLANDS, FAULT LINES, TOXIC OR HAZARDOUS WASTE AREAS, SUBSIDENCE, SUBSURFACE AND ENVIRONMENTAL CONDITIONS OR GEOLOGICAL ISSUES. NO STATEMENT IS MADE CONCERNING THE SUITABILITY OF THE SUBJECT TRACT FOR ANY INTENDED USE, PURPOSE OR DEVELOPMENT.
11. THE SURVEYED BOUNDARY SHOWN HEREON ARE CONTIGUOUS WITH ADJOINING PROPERTIES AND/OR RIGHTS OF WAY WITHOUT ANY GAPS, GORES OR OVERLAPS.
12. NO VISIBLE EVIDENCE OF SUBSTANTIAL AREAS OF REFUSE WERE OBSERVED AT THE TIME THE FIELDWORK WAS PERFORMED.
13. THE BOUNDARY LINE DIMENSIONS AS SHOWN ON THIS SURVEY MAP FORM A MATHEMATICALLY CLOSED FIGURE.
14. RECORD AND MEASURED DISTANCES ARE THE SAME.

IRRIGATION NOTES

1. **POINT-SOURCE DRIP** IRRIGATED AREAS USE 1/2" MAINLINE FOR DISTRIBUTION TO 1/4" IN-LINE DRIP TUBING WITH EMITTERS SPACED 6", WRAPPED AROUND INDIVIDUAL PLANTS. MAINLINE TO BE ROUTED SO THAT IT IS AS CLOSE TO EACH INDIVIDUAL PLANT AS POSSIBLE. IF PLANT IS OVER 24" AWAY FROM THE MAINLINE, USE A 1/4" SOLID LATERAL LINE TO CONNECT THE 1/4" IN-LINE DRIP TUBING TO THE 1/2" MAINLINE. WRAP PLANT ONCE WITH IN-LINE DRIP TUBING AROUND ROOTBALL PER THE FOLLOWING:
2. **IN-LINE DRIP** IRRIGATED AREAS USE 1/2" MAINLINE FOR DISTRIBUTION TO 1/4" IN-LINE DRIP TUBING WITH EMITTERS SPACED 6", TO COMPLETELY COVER THE DESIGNATED PLANTING AREA. SPACE DRIP TUBING TO COVER ENTIRE PLANTING AREA AS SHOWN IN THE STANDARD IN-LINE DRIP LAYOUT DETAIL.
3. **MP ROTATORS** IRRIGATED AREAS USE 1/2" MAINLINE FOR DISTRIBUTION TO HIGH-EFFICIENCY POP-UP ROTATING JET STREAM EMITTERS, SPACED TO ENSURE HEAD-TO-HEAD COVERAGE WITHIN DESIGNATED PLANTING AREAS. ALL EMITTERS TO BE 6" AWAY FROM HARDSCAPE EDGE TO AVOID OVER-SPRAY.

CONTAINER SIZE	**IN-LINE DRIP TUBING PLACEMENT** (FROM CENTER OF PLANT)
#1	3"
#5	4"
#15	5"
24" BOX	5" AND 10" (2 LOOPS)

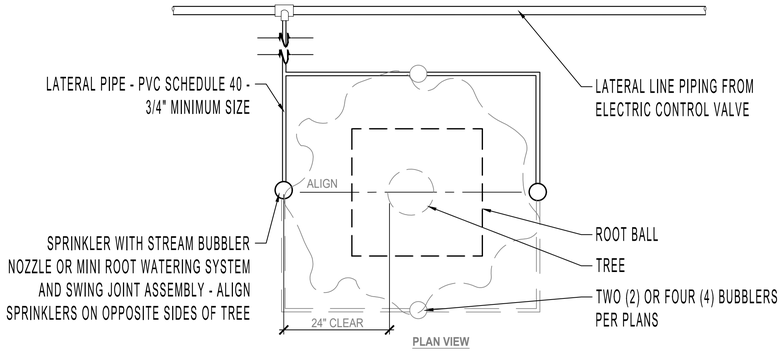
NOTES

1. REFER TO EQUIPMENT LEGEND FOR DRIPLINE AND PLANT MATERIAL ASSIGNMENT.
2. REFER TO STATION CALLOUTS ON PLAN SHEETS FOR SPECIFIC VALVE PERFORMANCE REQUIREMENTS AND CONFIGURATION OF DRIPLINE.
3. PROVIDE COUPLING FITTING (UNIVERSAL NUT LOCK) - WHERE REQUIRED.
4. REFER TO MANUFACTURER FOR DRIPLINE MAXIMUM LATERAL LENGTHS.

DRIPLINE SYSTEM LAYOUT - TYPICAL | 5

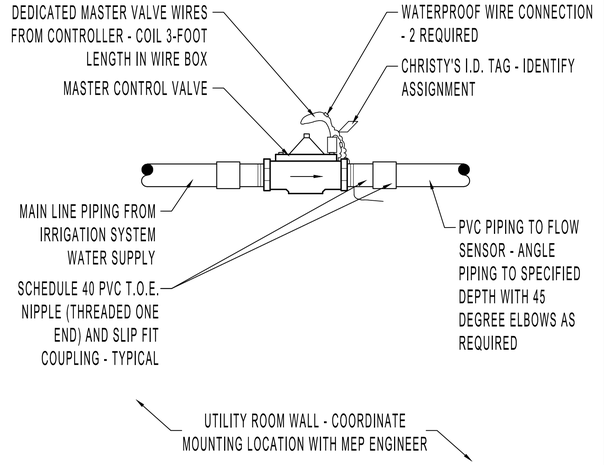


PLAN VIEW

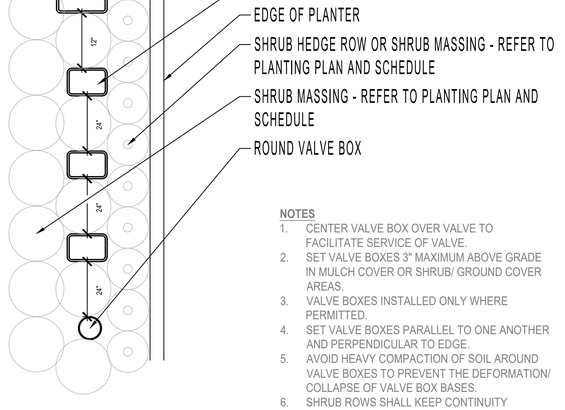
NOTES

1. ALIGN SPRINKLER HEADS FACING VINES ON PALM WHERE INSTALLED.
2. INSTALL FOUR (4) SPRINKLERS PER PALM AND INSTALL TWO (2) SPRINKLERS PER NON-PALM TREE.

TREE SPRINKLER LAYOUT | 3



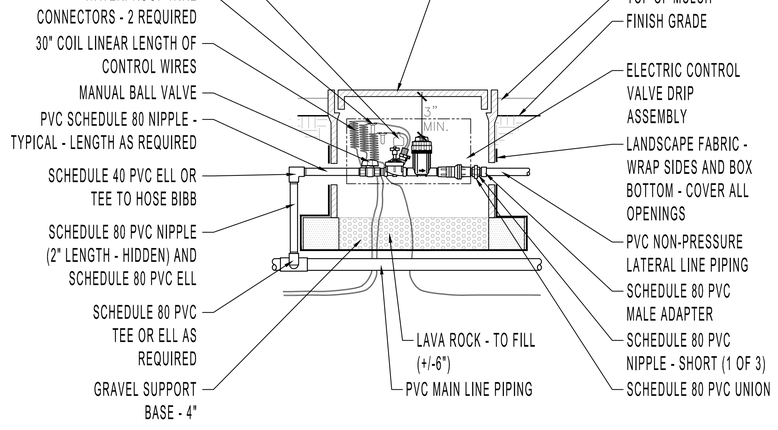
MASTER CONTROL VALVE | 1



NOTES

1. CENTER VALVE BOX OVER VALVE TO FACILITATE SERVICE OF VALVE.
2. SET VALVE BOXES 3" MAXIMUM ABOVE GRADE IN MULCH COVER OR SHRUB/ GROUND COVER AREAS.
3. VALVE BOXES INSTALLED ONLY WHERE PERMITTED.
4. SET VALVE BOXES PARALLEL TO ONE ANOTHER AND PERPENDICULAR TO EDGE.
5. AVOID HEAVY COMPACTION OF SOIL AROUND VALVE BOXES TO PREVENT THE DEFORMATION/ COLLAPSE OF VALVE BOX BASES.
6. SHRUB ROWS SHALL KEEP CONTINUITY WHEREVER PLANTED.

VALVE BOX LAYOUT (AT GRADE PLANTING) | 6



DRIP VALVE STATION | 4

ZONING ADJUSTMENTS BOARD

NOTICE OF PUBLIC HEARING

2298 Durant Avenue and 2360 Ellsworth Street

Use Permit #ZP2024-0126 to demolish a commercial building, a residential building with 7 dwelling units, and associated parking; merge two lots; and build an eight-story (92 foot), 80,000 square-foot residential building, with 65 units (5 Very-Low Income, 2 Low-Income), utilizing a State Density Bonus.

The Zoning Adjustments Board of the City of Berkeley will hold a public hearing on the above matter, pursuant to Zoning Ordinance, Section 23.404.050 (Public Hearings and Decisions)

When: Thursday, October 30, 2025, 7:00 pm
Where: Berkeley Unified School District meeting room, 1231 Addison Street, (wheelchair accessible) with remote/hybrid option (via Zoom).

Please visit: https://berkeleyca.gov/your-government/boards-commissions/zoning-adjustments-board and click on the hearing date to access the most up-to-date meeting information, or call the Land Use Planning division (510) 981-7410.

PUBLIC ADVISORY: THIS MEETING WILL BE CONDUCTED IN A HYBRID MODEL WITH BOTH IN-PERSON ATTENDANCE AND VIRTUAL PARTICIPATION AVAILABLE FOR MEMBERS OF THE PUBLIC.

For in-person attendees, face coverings or masks that cover both the nose and mouth are encouraged. If you're feeling sick, please do not attend the meeting in-person as a public health precaution.

Currently, there are no physical distancing requirements in place by the State of California or the Local Health Officer for an indoor event similar to a Commission meeting. However, all attendees are requested to be respectful of the personal space of other attendees. An area of the public seating area will be designated as "distanced seating" to accommodate persons that need to distance for personal health reasons.

Land Use Planning Division
1947 Center Street, Second Floor, Berkeley, CA 94704 Tel: 510.981.7410 TDD: 510.981.7474 Fax: 510.981.7420
E-mail: zab@berkeleyca.gov

A. Land Use Designations:

- General Plan: Residential Mixed Use (RMU)
- Zoning: Residential Southside Mixed Use (R-SMU)

B. Zoning Permits Required:

- **Demolition.** BMC Section 23.326.020(B) **"General Requirements"** to demolish a dwelling.
- **Demolition.** BMC Section 23.326.030(A)(3) **"Eliminating Dwelling Units through Demolition"** to demolish a building constructed before June 1980 on a property containing two or more dwelling units.
- **Demolition.** BMC Section 23.326.070(A) **"Main Non-Residential Building"** to demolish a non-residential building.
- **New Construction.** BMC Section 23.202.020 (A) **"Allowed Land Uses"** to construct a multi-family use.
- **Height Projection** BMC Section 23.304.050 (A) "**Projections Above Height Limits"** exceed height limit with a rooftop projection.
- **Fence** BMC Section 23.304.080(A) "**Permits Required**"

C. Concessions and Waivers Requested Pursuant to State Density Bonus Law (California Government Code Section 65915):

- Concession from the healthcare requirement of the "HARD HATS" ordinance (BMC Section 13.107.050).
- Concession from the prevailing wage requirements of the Southside Plan Area (BMC Section 13.108.030).
- Waiver to provide 1,579 sq. ft. of Useable Open Space where 3,159 sq. ft. is required, and it will only consist of indoor amenity space (BMC Section 23.304.090(D) "**Southside Plan Area Shared Indoor Residential Amenities**").
- Waiver to provide no landscaped Useable Open Space, where 40 percent of required outdoor Useable Open Space must be landscaped.
- Waiver to exceed the 85-foot height limit and permit a 92-foot building.
- Waiver to provide no long-term bicycle parking, where 99 long-term spaces are required.
- Waiver to remove the camphor street tree on Durant Avenue; where street tree removal requires the City Arborist's approval.

D. CEQA Exemption Determination: Categorically exempt pursuant to Section 15332 of the CEQA Guidelines ("In-Fill Development Projects").

E. Project Recommendation: Approve Use Permit #ZP2024-0126, pursuant to BMC Section 23.406.040(E) "**Findings for Approval**."

F. Parties Involved:

- Applicant Austin Springer, Studio KDA
- Property Owner Valiance Capital, LLC

Further Information:
All application materials are available online at:
https://aca.cityofberkeley.info/CitizenAccess/Welcome.aspx.

The Zoning Adjustments Board final agenda and staff reports will be available online 6 days prior to this meeting at: https://berkeleyca.gov/your-government/boards-commissions/zoning-adjustments-board.

Questions about the project should be directed to the project planner, Allison Riemer, at (510) 981-7433 or ariemer@berkeleyca.gov.

Written comments or a request for a Notice of Decision should be directed to the Zoning Adjustments Board Secretary at zab@berkeleyca.gov.

Communication Disclaimer:
Communications to Berkeley boards, commissions or committees are public record and will become part of the City's electronic records, which are accessible through the City's website. **Please note: e-mail addresses, names, addresses, and other contact information are not required, but if included in any communication to a City board, commission or committee, will become part of the public record.** If you do not want your e-mail address or any other contact information to be made public, you may deliver communications via U.S. Postal Service or in person to the secretary of the relevant board, commission or committee. If you do not want your contact information included in the public record, please do not include that information in your communication. Please contact the secretary to the relevant board, commission or committee for further information.

Written Comments, Communications, and Reports:
Written comments must be directed to the ZAB Secretary at the Land Use Planning Division (Attn: ZAB Secretary), or via e-mail to: zab@berkeleyca.gov. All materials will be made available via the Zoning Adjustments Board Agenda page online at this address: https://berkeleyca.gov/your-government/boards-commissions/zoning-adjustments-board

All persons are welcome to attend the hearing and will be given an opportunity to address the Board. Comments may be made verbally at the public hearing and/or in writing before the hearing. The Board may limit the time granted to each speaker.

Correspondence received by 5:00 PM, eight days before this public hearing, will be provided with the agenda materials provided to the Board. Note that if you submit a hard copy document of more than 10 pages, or in color, or with photos, you must provide 15 copies. Correspondence received after this deadline will be conveyed to the Board in the following manner:

- **Correspondence received by 5:00 PM, two days before** this public hearing, will be conveyed to the Board in a Supplemental Communications and Reports #1, which is released around noon one day before the public hearing.
- **Correspondence received by 12:00 PM, the day of** this public hearing, will be conveyed to the Board in a Supplemental Communications and Reports #2, which is released around noon the day of the public hearing.
- **Correspondence received after 12:00 PM, the day of** this public hearing will be saved in the project administrative record.

Accessibility Information / ADA Disclaimer:
To request a disability-related accommodation(s) to participate in the meeting, including auxiliary aids or services, please contact the Disability Services specialist at 981-6342 (V) or 981-6345 (TDD) at least three business days before the meeting date.

SB 343 Disclaimer:
Any writings or documents provided to a majority of the Commission regarding any item on this agenda will be made available to the public. Please contact the Land Use Planning Division (zab@berkeleyca.gov) to request hard-copies or electronic copies.

Notice Concerning Your Legal Rights:
If you object to a decision by the Zoning Adjustments Board regarding a land use permit project, the following requirements and restrictions apply:

1. If you challenge the decision of the City in court, you may be limited to raising only those issues you or someone else raised at the public hearing described in this notice.
2. You must appeal to the City Council within 14 days after the Notice of Decision of the action of the Zoning Adjustments Board is mailed. It is your obligation to notify the Land Use Planning Division in writing of your desire to receive a Notice of Decision when it is completed.
3. Pursuant to Code of Civil Procedure Section 1094.6(b) and Government Code Section 65009(c)(1), no lawsuit challenging a City Council decision, as defined by Code of Civil Procedure Section 1094.6(e), regarding a use permit, variance or other permit may be filed more than 90 days after the date the decision becomes final, as defined in Code of Civil Procedure Section 1094.6(b). Any lawsuit not filed within that 90-day period will be barred.
4. Pursuant to Government Code Section 66020(d)(1), notice is hereby given to the applicant that the 90-day protest period for any fees, dedications, reservations, or other exactions included in any permit approval begins upon final action by the City, and that any challenge must be filed within this 90-day period.
5. If you believe that this decision or any condition attached to it denies you any reasonable economic use of the subject property, was not sufficiently related to a legitimate public purpose, was not sufficiently proportional to any impact of the project, or for any other reason constitutes a “taking” of property for public use without just compensation under the California or United States Constitutions, the following requirements apply:
    a. That this belief is a basis of your appeal.
    b. Why you believe that the decision or condition constitutes a "taking" of property as set forth above.
    c. All evidence and argument in support of your belief that the decision or condition constitutes a “taking” as set forth above. If you do not do so, you will waive any legal right to claim that your property has been taken, both before the City Council and in court.

CITY OF BERKELEY

BERKELEY ZAB - ZONING ADJUSTMENTS BOARD MEETING

OCTOBER 30, 2025

LET ME SEE, YOU ARE SPEAKING ON 2298 DURANT IS WHAT YOU ARE SPEAKING ON, CORRECT?

>> HELLO. TWO ITEMS, I WANT TO SPEAK ONCE. AGENDA ITEM 6B, PLEASE.

>> CHAIR GAFFNEY: OKAY. YES. WONDERFUL. THANK YOU.

>> SO WILL THE TIMER YOU MENTIONED APPEAR?

>> CHAIR GAFFNEY: I THINK CITY STAFF IS PUTTING IT UP RIGHT NOW.

>> MY NAME IS PHILLIP LIM, MY FIRST NAME IS SPELLED WITH ONE "L." MY LAST NAME IS SPELLED LIM, "M" LIKE MARTINEZ. I EXPRESS MY OPPOSITION TO BOTH PROJECTS WHOSE USE PERMIT LETTERS NUMBERS ARE ZP2024-0154 AND ZP2024-0169. I SPOKE WITH THE ZONING ADJUSTMENT BOARD SECRETARY BEFORE THE MEETING AND THE PERSON INFORMED ME THAT THE USE PERMIT FOR ZP2024-0154 SHOWS UP AS ZP2024-0126. IF THAT IS

THE ACTUAL USE PERMIT LETTER, COMBINATION THEN I OPPOSE THAT. THE TWO STRUCTURES ARE SEEMINGLY CAPABLE BUILDS THAT DO NOT NEED TO BE ERASED. BOTH ARE FAIRLY LARGE, 2298 IS TWO AND A HALF STORIES. I REGARD THE BASEMENT THAT COMES UP PARTIALLY ABOVE THE GROUND TO BE HALF A STORY. AND 2360 IS AT LEAST THREE STORIES. WHAT I GENERALLY OBSERVED IN BERKELEY, BOTH ARE SELECTED FOR REDEVELOPMENT. AN EXAMPLE IS THE ONE STORY COMMERCIAL BUILDING OFF THE NORTHEAST CORNER OF DWIGHT AND FULTON. 0126 IS A DEPARTURE FROM THIS. 2298 IS AN OFFICE BUILDING, 2360 IS AN APARTMENT BUILDING. BOTH ARE OCCUPIED. DO NOT LOOK DILAPIDATED OR BLIGHTED. AND 2298 IS ARCHITECTURALLY PLEASING TO LOOK AT. I HAVE NEVER SPOKEN AT A BERKELEY MEETING BEFORE MUCH LESS ATTENDED ONE. THE PRIMARY WINDOW OF MY APARTMENT DIRECTLY FACES THE PROPOSED CONSTRUCTION SITE. I CALCULATED ABOUT 22 YARDS AWAY. I FEEL CONCERNED FOR MY HEALTH WITH THE CONSTRUCTION DUST. ONE OF THE DRIVING LANES OF DURANT AND BEFORE I CONTINUE, HOW MUCH TIME DO I HAVE? I WOULD LIKE TO SAY EVERYTHING I WANTED.

>> CHAIR GAFFNEY: SINCE YOU ARE SPEAKING ON BOTH, WE'LL GIVE YOU ANOTHER THREE MINUTES AFTER THIS.

>> THEN I WON'T HAVE TO TALK SO FAST. ALL RIGHT. EARLIER THIS YEAR, ONE OF THE DRIVING LANES OF DURANT WAS PAINTED OVER SOLIDLY WITH RED AND WHITE PAINT TO SIGNIFY A BUS ONLY LANE, IT PERMEATED INTO MY APARTMENT, EVEN THOUGH THE WINDOWS WERE SHUT. THIS WORK WAS PERFORMED AT NIGHT AND THE SMELL WAS NOXIOUS. I ASSUMED I BREATHED

IN THAT AIR WHILE I SLEPT LATER. AND THE ODOR LASTED OUT ON DURANT FOR FAR LONGER THAN UPON COMPLETION OF THE WORK. I HAVE BEEN HARASSED MUCH IN BERKELEY OVER THE COURSE OF MY MORE THAN 25 YEARS OF LIVING HERE. I CONCLUDED MOST OF THE HARASSMENT IS INSTITUTIONAL AND NOT HAPPENING TO BE IN THE WRONG PLACE AT THE WRONG TIME. THE SUCCESSION OF APARTMENT TENANTS ABOVE ME IN THE UNIT ABOVE ME WHO ALL HAPPEN TO KEEP OFF HOURS SUCH AS THE LOUD STOMPING AND CRASHING ON THE FLOOR ADJACENT TO MY CEILING HAPPENS FREQUENTLY. THE INDIVIDUALS WHO UNCANNILY MATERIALIZE IN FRONT OF THE APARTMENT BUILDING COMPLEX I RESIDE IN WHO HOLD THEIR CIGARETTES SPIT AS I WALK PAST. THE POLICE VEHICLES THAT SUDDENLY APPEAR WHEN I WALK LATE AT NIGHT ON A DESOLATE BERKELEY STREET. THESE ARE A FEW EXAMPLES OF MANY I'VE EXPERIENCED. AND SUCH CONTEXT, HAVING SUCH A MAJOR CONSTRUCTION PROJECT UNDERGONE SO CLOSE TO WHERE I LIVE AROUSES MY SUSPICION. I REQUEST THE ZONING ADJUSTMENTS BOARD COLLECT STAFF TO CONDUCT A STUDY, TAKE THE SQUARE FOOTAGE OF 2360 AND DIVIDE BY THE SQUARE FOOTAGE OF LAND. WHEN I SAY THE SQUARE FOOTAGE OF 2360, THAT'S THE PROPERTY. AND DIVIDE BY THE SQUARE FOOTAGE OF LAND THAT THE PROPERTIES SQUARE FOOTAGE IS BUILT UPON AND DO THE SAME FOR 2298. THIS RATIO IS THE AMOUNT OF SQUARE FEET OF FLOOR SPACE PER SQUARE FOOTAGE OF LAND THESE TWO STRUCTURES TAKE UP. DO THE SAME CALCULATION FOR MAJOR REDEVELOPMENT IN BERKELEY FOR THE LAST 15 YEARS, EXCLUDING THOSE DONE BY THE UNIVERSITY. I THINK THAT ZONING ADJUSTMENTS BOARD MAY FIND THAT

USE PERMIT 0154 WILL BE THE DENSEST PROPERTIES BY FAR TO BE DEMOLISHED. IF THAT IS THE CASE, YOUR APPROVAL WILL BE PRECEDENT SETTING FOR FUTURE REDEVELOPMENT PROJECTS THAT ARE CONTROVERSIAL. STAFF CAN REFER BACK TO HAVING DONE THIS PROJECT PRECEDENCE. CONSIDER RESOURCES. ALSO, ELLSWORTH HAPPENS TO BE A RELATIVELY NARROW STREET WITH PARKING ON EACH SIDE AND IT'S ONE WAY. THESE DIRECT THE STUDY.

>> CHAIR GAFFNEY: THANK YOU FOR YOUR COMMENTS, PHILLIP, WE APPRECIATE IT.

>> THANK YOU.

>> CHAIR GAFFNEY: AWESOME. THAT IS ALL WE HAVE IN PERSON. DO WE HAVE ANYONE ONLINE?

>> ONE PERSON.

>> CHAIR GAFFNEY: IT LOOKS LIKE WE HAVE KELLY HAMMERGREN. WE'LL ALLOW YOU TO TALK WHEN YOU ARE READY, YOU HAVE THREE MINUTES.

>> CALLER: OKAY, THANK YOU. CAN YOU HEAR ME?

>> CHAIR GAFFNEY: YES. I CAN HEAR YOU GREAT.

>> CALLER: I DO APPRECIATE IT LOOKS LIKE BOTH OF THESE PROJECTS WILL BE INSTALLING BIRD-SAFE GLASS. AND I LEARNED AT THE BIRD FAIR, THE BIRD FESTIVAL THAT LAURA BUSH IN TEXAS IS A BIG PROPONENT OF BIRD-SAFE GLASS, IF ANYONE HAS TROUBLE FINDING BIRD-SAFE GLASS, CONTACT TEXAS. I THOUGHT THAT WAS A BIT OF INTERESTING INFORMATION. I AM DISAPPOINTED THE CONCESSIONS ARE ON PREVAILING WAGE AND HEALTHCARE. I THINK HEALTHCARE IS SO MUCH ON OUR MINDS THESE DAYS

WITH THE GOVERNMENT SHUTDOWN AND PEOPLE POISED TO BE LOSING THEIR HEALTHCARE COVERAGE. SO I REALLY WISH THAT WAS PART OF THE DURANT PROJECT 2298 DURANT. THAT'S THE EXTENT OF MY COMMENTS. I KNOW YOU CAN'T DO ANYTHING ABOUT IT BUT IT'S A DISAPPOINTMENT. THANK YOU.

>> CHAIR GAFFNEY: THANK YOU FOR YOUR COMMENTS, KELLY. I KNOW WE'RE FEELING SIMILARLY. BUT THAT'S WHAT WE'RE GOING TO HAVE DISCUSSIONS NOW. SO I BELIEVE WE'RE ALL DONE WITH PUBLIC COMMENT. OKAY, WE'RE ALL DONE WITH PUBLIC COMMENT. NOW IT'S TIME TO MOVE TO THE COMMISSION. THIS IS SIMILAR TO A PROJECT WE HAD A COUPLE OF WEEKS AGO IF ANYONE WANTS TO SPEAK ON THIS. DOES ANYONE ON THE COMMISSION HAVE ANYONE THEY WOULD -- ANYTHING THEY WOULD LIKE TO SAY ABOUT ANY OF THIS? COMMISSIONER ALLEN.

>> S. ALLEN: SURE, JUST A GENERAL COMMENT FOR ANYONE WHO LIVES IN PROXIMITY TO THE PROJECT. THERE ARE CONDITIONS OF APPROVAL THAT FOR THE DUST AND THE CONSTRUCTION MANAGER IS AVAILABLE, THERE SHOULD BE A PHONE NUMBER IF THERE ARE ISSUES DURING CONSTRUCTION THEY CAN BE CONTACTED. IT IS, YES, IT IS AN INCONVENIENCE, BUT THAT IS PART OF CITY LIVING. AND HOPEFULLY THESE FOLKS WILL FOLLOW THE CONDITIONS OF APPROVAL AND A CONTACT PERSON IF THERE ARE QUESTIONS OR ISSUES AS THE PROJECT IS UNDER CONSTRUCTION. THAT'S THE ONLY INFORMATION TO SHARE AT THIS TIME.

>> CHAIR GAFFNEY: WONDERFUL, THANK YOU. COMMISSIONER YUNG OR VICE CHAIR YUNG.

>> VICE CHAIR YUNG: I WOULD LIKE TO GIVE INFORMATION TO THE MEMBER

OF THE PUBLIC WHO WAS REFERENCING, SUGGESTING STAFF CONDUCT A STUDY. SO WHAT YOU DESCRIBED IS ACTUALLY A METRIC CALLED FLOOR AREA RATIO. THAT WAS STUDIED AND IS ACTUALLY IS STANDARD IN PLACE FOR THIS PIECE OF LAND, THIS ZONING DISTRICT. AND TO SUMMARIZE A LONG STORY, RECENTLY THE CITY OF BERKELEY REDID THE ZONING OR LAWS APPLICABLE TO WHAT CAN AND CANNOT BE BUILT TO THAT PIECE OF LAND. AS PART OF THE UPDATE THEY IMPOSED A NEW FLOOR AREA RATIO OR THE RATIO OF BUILT INTERIOR SQUARE FOOTAGE TO THE SIZE OF THE PARCEL OF LAND, AND THAT IS 7.0. THIS BUILDING IS PROPOSING A FLOOR AREA RATIO OF 6.54. I WANTED TO SHARE THAT. HOPEFULLY, YOU FIND IT HELPFUL THAT WAS STUDIED.

>> CHAIR GAFFNEY: THANK YOU, VICE CHAIR YUNG. IF NO ONE ELSE HAS ANYTHING ELSE THEY WOULD LIKE TO SAY, SINCE I WASN'T HERE LAST MEETING, I SAID I WAS VERY HARD TO SEE LABOR WAS PART OF THE CONCESSIONS. AFTER READING ALL OF THE INFORMATION WE WERE GIVEN, I HAVE -- I UNDERSTAND WHERE THE DENSITY BONUS CONCESSIONS HOW THEY ARE DEALT WITH. AND INDEED, OUR HANDS ARE TIED ON THIS, AND WITHOUT THE CONCESSIONS THE PROJECT WOULD NOT BE FEASIBLE. I FEEL COMFORTABLE WITH MAKING A MOTION TO APPROVE THE CONSENT CALENDAR AS PROPOSED. UNLESS ANYONE ELSE HAS ANYTHING ELSE THEY WOULD LIKE TO ADD.

>> NO, BUT I WOULD LIKE TO SECOND THE MOTION.

>> CHAIR GAFFNEY: WONDERFUL. I THINK WE'RE ALL GOOD TO MAKE A ROLL CALL VOTE.

>> FOR APPROVAL OF THE CONSENT CALENDAR, JUST A REMINDER INCLUDES THE MINUTES OF OCTOBER 9, AND THE USE PERMIT FOR 2372 ELLSWORTH STREET AS WELL AS THE USE PERMIT FOR 2298 DURANT AVENUE. AND I WILL TAKE THE ROLL CALL VOTE NOW. MOTION BY GAFFNEY AND SECOND BY SANDERSON. SORRY, ALLEN. I'LL TAKE THE VOTE NOW.

>> Y. DUFFY: YES, I NEED TO ABSTAIN FROM "A" APPROVAL OF MEETING MINUTES FROM THE LAST MEETING. THANK YOU.

>> CHAIR GAFFNEY.

>> CHAIR GAFFNEY: YES.

>> COMMISSIONER THOMPSON.

>> M. THOMPSON: YES.

>> COMMISSIONER PALMATIER.

>> S. PALMATIER: YES.

>> COMMISSIONER ALLEN.

>> S. ALLEN: YES.

>> COMMISSIONER RUTH.

>> YES, I WOULD LIKE TO ABSTAIN FROM APPROVAL OF MEETING MINUTES.

>> THANK YOU. AND VICE CHAIR YUNG.

>> VICE CHAIR YUNG: YES.

>> THANK YOU.

>> CHAIR GAFFNEY: WONDERFUL. THE MOTION PASSES. YOU WILL HAVE YOUR USE PERMIT 14 DAYS AFTER THE NOTICE OF DECISION IS MAILED UNLESS APPEALED TO COUNCIL DURING THOSE 14 DAYS. SO THANK YOU ALL FOR THAT AND YOUR HARD WORK LAST MEETING. WE HAVE NEXT SUBCOMMITTEE

REPORTS. COMMISSIONER THOMPSON, I'M HOPING YOU CAN TAKE AWAY SINCE I WAS NOT AT THE LAST DESIGN REVIEW COMMITTEE. I WOULD LOVE TO HEAR WHAT YOU DISCUSSED.

>> M. THOMPSON: AT THE LAST DRC MEETING OCTOBER 16TH, THERE WERE TWO PROJECTS. ONE WAS 1890 ALCATRAZ, BETWEEN ADELINE AND DOVER. SO ON THE SOUTH SIDE OF THE STREET. THERE IS A 1-STORY COMMERCIAL BUILDING WITH 4000 SQUARE FEET THEY WANT TO DEMOLISH AND CONSTRUCT A THREE STORY, SIX THOUSAND SQUARE FOOT COMMUNITY CENTER, WITH THREE OFF-STREET PARKING SPACES. THE DESIGN LOOKED FANTASTIC. IT HAD A LOT OF COMMUNITY SUPPORT. THIS WAS THE LARGEST DRC MEETING I'VE BEEN TO. THERE WAS PEOPLE EVERYWHERE. AND IT WAS A LOT OF ENERGY. THEY HAD BEEN RAISING MONEY FOR THE PROJECT FOR YEARS AND THEY HAD -- IT WAS REALLY ENTHUSIASTIC. I THOUGHT THE BOARD, THE ARCHITECTS ON THE BOARD HAD GOOD TOUCHES TO ADD TO MAKE IT JUST REALLY JUST WORK. SO IT WAS RECOMMENDED TO GO TO FINAL DESIGN REVIEW. DOES THAT MEAN WE'LL SEE IT HERE NEXT OR IT'S COMING BACK?

>> CHAIR GAFFNEY: WE RECOMMENDED IT TO ZAB, SO IT WILL COME HERE AND FINE DESIGN REVIEW AFTER WE GIVE IT A USE PERMIT IF IT DESERVES.

>> 2029 UNIVERSITY AVENUE, NORTH SIDE BETWEEN SHATTUCK AND MILVIA. THERE IS A TWO STORY COMMERCIAL BUILDING NOW WITH 10 SPACE GARAGES. AND THEY WANT TO DEMOLISH THAT AND CONSTRUCT A 23-STORY MULTI-UNIT, OF COURSE. THEY SHOWED TWO OPTIONS. AND ONE WAS A VARIATION OF STUDENT HOUSING AND THE OTHER VERY VARIATION WAS MULTIFAMILY. FROM THE OUTSIDE IT LOOKED SIMILAR, THERE WERE CHANGES IN THE WAY

IT KIND OF, THE WINDOWS AND THE COLOR SEEMS WENT BUT A LOT OF DISCUSSION ABOUT IT. THERE WAS, IT HAD ISSUES WITH THE CONCESSIONS, I BELIEVE, WITH BIRD SAFE. SO WE SHALL SEE. WE DON'T KNOW WHERE THE FINAL IS GOING TO BE ON THAT BUT IT'S COMING OUR WAY.

>> CHAIR GAFFNEY: WONDERFUL. THANK YOU SO MUCH, COMMISSIONER THOMPSON. APPRECIATE YOU AND YOUR KNOWLEDGE. WE'RE GOOD ON SUBCOMMITTEE REPORTS FOR DESIGN REVIEW. ANY CORRESPONDS FROM STAFF? ANY CORRESPONDENCE FROM THE COMMISSION? THEN I WOULD LIKE TO MAKE A MOTION TO ADJOURN. I DO NEED A SECOND.

>> I'M HAPPY TO SECOND THAT MOTION.

>> CHAIR GAFFNEY: PERFECT. COMMISSIONER ALLEN SECOND. AND WE'LL TAKE A ROLL CALL VOTE.

>> COMMISSIONER DUFFY.

>> Y. DUFFY: YES.

>> CHAIR GAFFNEY.

>> CHAIR GAFFNEY: YES.

>> COMMISSIONER THOMPSON.

>> M. THOMPSON: YES.

>> COMMISSIONER PALMATIER.

>> S. PALMATIER: YES.

>> COMMISSIONER ALLEN.

>> S. ALLEN: YES.

>> COMMISSIONER RUTH.

>> YES.

>> AND VICE CHAIR YUNG.

>> VICE CHAIR YUNG: YES.

>> CHAIR GAFFNEY: I WILL SEE YOU AT THE NOVEMBER MEETING. WE ONLY HAVE ONE ZAB MEETING IN THE NEXT MONTH. I FORGOT ABOUT THAT. FOREVER. WE'LL SEE YOU NEXT TIME.

DRAWINGS PROTECTED BY COPYRIGHT STATEMENT

Effective January 1, 2023, (State Government Code, Section 65103.5 (e), SB 1214), if an official copy of architectural drawings are submitted to the Land Use Division of the Planning and Development Department as part of a zoning permit application, the design professional (or the owner of the copyright if different from the design professional) may submit a separate "site plan" or "massing diagram" for posting online or for distribution to the public.

If a separate "site plan" or "massing diagram" is not submitted in addition to the official architectural plans, permission is deemed granted to the Land Use Division to post online or to provide to the public copies of the architectural drawings without the restrictions that would otherwise apply.

A massing diagram and a site plan are defined as follows per Government Code Section 65103.5 (f): "Massing diagram" means a document that displays the three-dimensional form of a building and describes the general profile, bulk, setbacks, and size of the building, but does not contain specific architectural detail.

"Site plan" means a document for a project that is drawn to scale and displays all of the following: property lines, setback lines, topographic lines, easements, drainage, utilities, lighting, driveways, surrounding streets and traffic flow, parking lots and parking spaces, landscaped areas, setback distance between buildings and property lines, outline of existing and proposed buildings and structures, distance between buildings, and ground sign location.

PLEASE CHECK ONE OF THE FOLLOWING (required):

☐ **My application includes a separate "site plan" or "massing diagram," defined in Government Code Section 65103.5(f), for posting online or for distribution to the public.**

☑ **Permission is granted to make publicly available the submitted architectural drawings without restriction to posting online or distribution to the public.**

Under penalty of perjury, I certify that:

(1) the application materials are true and complete to the best of my knowledge; and
(2) if provided, the attached paper and electronic copies of this application are the same; and
(3) I agree to pay all expenses associated with this application

2298 DURANT AVENUE

APPLICATION FOR A HOUSING DEVELOPMENT PROJECT

APPLICANT STATEMENT

September 5, 2024

Figure 1. Proposed Project at 2298 Durant Ave.

The applicant team is pleased to submit this use permit application for a 65-unit multifamily apartment project at 2298 Durant Avenue & 2360 Ellsworth Street in Berkeley, California.

This applicant statement includes:

1. Project Description
2. Compliance with City Policies
3. Legislative Context
4. CEQA Overview
5. Required Findings
6. Project Team Contact Information

1. PROJECT DESCRIPTION

Property Information

APN:	055-1887-001, 055-1887-002
Total Lot Area:	12,220 sq. ft. / 0.28 acres
General Plan Designation:	Residential Mixed Use (RMU)
Zoning District:	Residential – Southside Mixed Use (R-SMU)
Area Plan:	Southside Area Plan (Residential High Density Subarea)

Project Overview

The proposed project is an application to demolish two existing buildings: a law office building and 8-unit apartment building, and construct a multifamily housing development project with 65 dwelling units in a new 81,213 gross square foot building. The project includes five affordable units for rent to Very-Low Income households. The two existing parcels will be merged into one parcel as part of the project.

The proposed project is subject to several statutory elements, including Housing Accountability Act (HAA), Senate Bill 330 (SB 330), and State Density Bonus Law (SDBL). While the project does not seek additional density, it does use SDBL for waivers and concessions to comply with applicable objective design standards.

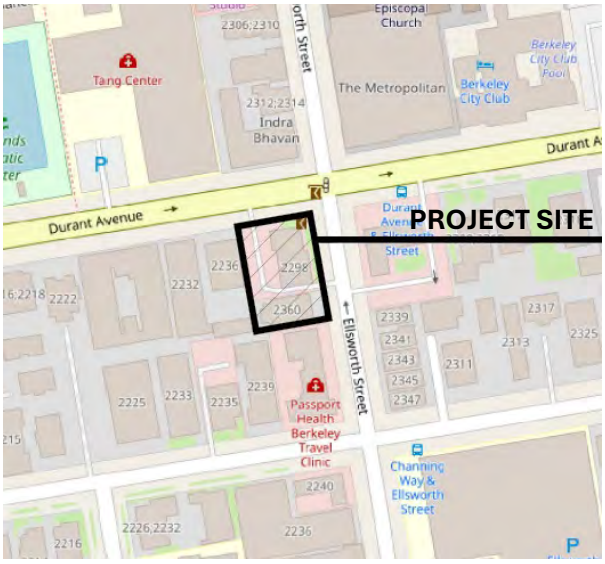

Figure 2. Project Site Location

The project site is on the south side of Bancroft Way and at the south west intersection of Durant Avenue and Ellsworth Street. The project site is conveniently located one block away from the UC Berkeley Campus. Additionally, the project site is located two blocks west of Telegraph Avenue, which is a transit and commercial corridor that provides a wide range of urban amenities and services. The location of this project will provide future residents with convenient access to the campus, the Southside neighborhood, and the Downtown area.

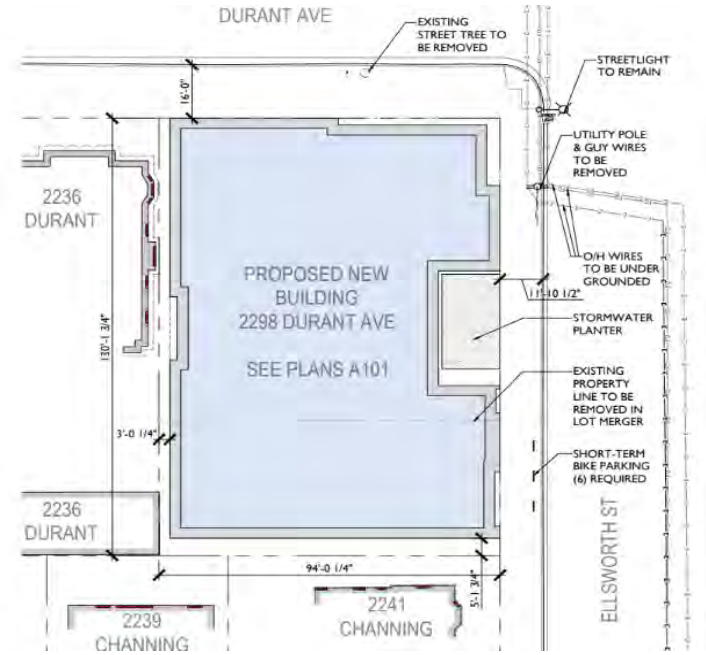

Figure 3. Project Site Plan

The site is highly accessible via public transit or active transportation. It is located 0.5 miles from the Downtown Berkeley BART station and is well served by multiple bus routes (Lines 6 – Downtown Oakland, 7 – Emeryville Amtrack, 36 – U.C. Campus, 51B – Rockridge BART, and 79 – Rockridge BART). The City of Berkeley does not require any residential parking to be provided for this project because it is a 100% residential project, and the project does not include any vehicle parking because the site is so well served by public transit.

The proposed project will satisfy some of its open space requirements with a roof deck on Level 8 that will have beautiful views of the Bay.

Replacement Units

There are 7 existing dwelling units in the apartment building located on the 2360 Ellsworth Street parcel. The project proposes to replace all 7 units with no net loss in dwelling units. All replacement units will be provided at least the same number of units of equivalent size as existed (containing at least the same number of bedrooms as the units being replaced), and occupied by persons or families in the same or lower income category as the persons or families in occupancy at that time, per Govt. Code § 65915(c)(3)(B). Income verifications can be provided, upon request.

EXISTING AT 2360 ELLSWORTH STREET	
# Existing Units	**# Units Demolished**
7	7
PROPOSED AT 2298 DURANT AVENUE	
Total Unit Count	**Replacement Units in Project**
65	7
= NO NET LOSS IN DWELLING UNITS *(compliant with SB 330)*	

Architectural Design

The building's design aligns with the guidelines in the Southside Design Guidelines. The building massing has been broken up along its long sides (East and West) to present as two towers with an "ABA" symmetry scheme present in many of the neighborhood buildings. The use of bays and insets provides a visually appealing façade articulation and modulation, which reinforce the proportions and rhythm in the Residential High Density Subarea. New building materials, especially those at the ground floor, have been selected for their resiliency and high quality. Materials such as porcelain tile and cement plaster are consistently applied on the façades throughout the building to create a consistent and continuous look. Aluminum profile and panels create accent moments on the façade to create visual interest.

Figure 4. Rendering of Proposed Project

The building entrance is identified with a welcoming transparent ground floor along with building signage that engages the streetscape. The residential entrance is oriented to the sidewalk and street at the intersection of Durant Avenue and Ellsworth Street, which makes it clearly identifiable and inviting. The streetscape will see a dramatic upgrade with many planters proposed adjacent to the building, as well as several new street trees along both Durant and Ellsworth.

Sustainability

The proposed project aligns with several of the City's General Plan Environmental Management and Land Use sustainability policies:

- **Environmental Management Policy #5 – "Green" Buildings**
  Promote and encourage compliance with "green" building standards.

- **Environmental Management Policy #35 – Energy-Efficient Design**
  Promote high-efficiency design and technologies that provide cost-effective methods to conserve energy and use renewable energy sources.

- **Land Use Policy #3 – Infill Development**
  Encourage infill development that is architecturally and environmentally sensitive, embodies principles of sustainable planning and construction, and is compatible with neighboring land uses and architectural design and scale.

This project proposes efficiently sized dwelling units outfitted with water & energy efficient appliances in a transit-oriented development. These factors, in addition to meeting the City of Berkeley's Green Building requirements, make the proposed project a sustainable housing development. The building will be LEED Gold certified or equivalent, all-electric, and equipped with solar panels to power the building

with clean energy. The dwelling units will have low-flow fixtures, and the proposed landscaping will all be drought-tolerant and largely comprised of native vegetation. This proposed project is environmentally and architecturally sensitive and incorporates many principles of sustainable development.

This is a true infill development project, which will re-develop an underutilized parcel. The proposed project at 2298 Durant Avenue will transform this site into a vibrant residential address and attractive pedestrian atmosphere. This infill project is especially sustainable in its provision of housing in close proximity to the UC Berkeley Campus and Telegraph Avenue, which has excellent access to goods and services as well as public transportation.

Bird Safe Glass

The proposed project will be subject to the Bird Safe Glass ordinance under Berkeley Municipal Code § 23.304.150, which was recently passed in June 25, 2024. For a building construction with 10,000 sq. ft. or more of gross floor area and an average building height greater than 35 ft, all transparent or reflective materials located between the ground and 75 feet above grade would be subject to bird safe requirements. In order to satisfy bird safe requirements, any regulated transparent or reflective material must either comply with a compliant threat factor rating or use patterned glazing treatments.

Landscaping

The landscape design for the proposed project consists of new streetscape, a stormwater treatment area, and planting at the building base at the ground floor. A landscaped terrace with views to the Bay will be located on Level 8, the uppermost floor of the project.

A Coast Redwood that is 40 inches in diameter exists just inside the northwest corner of the project footprint, and a 30-inch diameter Camphor tree is located at the Durant right of way approximately 50 feet from Ellsworth Street. Both trees will be removed to allow site access, construction of the new concrete slab foundation, and erection of scaffolding.

The existing concrete sidewalk paving in the right of way will be replaced with a new concrete surface per City standard details. Concrete control joints designate the pedestrian, and frontage zones within the right of way; and different concrete finishes demarcate the shift from public to private space. Ten new bicycle racks provide 20 temporary parking spaces for cyclists visiting the building.

Six new street trees are proposed: two on Durant Avenue and four on Ellsworth Street. The installed trees will be in 24-inch box containers. The tree wells will be surfaced with the new flexi-pave detail that Miller Company has coordinated with the Forestry Department, allowing water and oxygen into the tree root zones while maintaining accessible path of travel. Selection of the tree species is pending input from Forestry.

Metal planters fit in between the building's structure providing a punctuated scrim of greenery at the building base. A bioretention planter is located adjacent to the egress discharge within the building's cutout on Ellsworth Street where two more trees are proposed.

The Level 8 roof terrace consists of two program areas articulated by raised metal planters with integrated bench seating and an accessible unit paving surface. The counter and furnishings at the south

area will function as a kitchen/dining area with an overhead trellis that vines will grow into, maximizing the landscape character of the space. The planters in the north area also have integrated seating and contain three native trees. A bar height counter at the parapet overlooks the Bay. This area will be a more open and sunny area to have smaller gatherings or breakout sessions. A cable trellis will allow vines to cover the north wall of the terrace.

The project will provide 795 square feet of new landscape area and 11 new trees. Except for the vines designated for the terrace and pending final selection of street tree species, all plant material originates from within California so that the project will also provide ecosystem services for local insect populations while minimizing water use. All landscape areas will be irrigated by a WELO-compliant, high efficiency system.

Project Benefits

The proposed project will offer the following in-lieu and mitigation fees, and community benefits to the City of Berkeley:

- Redevelop an underutilized parcel in the Southside area.
- Provide 65 dwelling units of high density and transit-oriented housing.
- Provide 5 affordable dwelling units for Very Low-Income Households at 50% AMI.
- Encourage alternative modes of transportation – 0 vehicular spaces.
- Units will be equipped with energy efficient appliances and low flow fixtures, and the site will be planted with drought tolerant landscaping that supports the project's stormwater management plan.
- Compliant with Bird Safe Glass requirements as per BMC 23.304.150.
- Pay in-lieu fees, mitigation fees, and impact fees such as the Affordable Housing Mitigation fee of $1,639,181, Berkeley Unified School fee of $241,592, Art Mitigation fee of $142,732, and Transit Pass fee of $45,951 (annually).

Community Meeting

On September 4, 2024, the project team held a community meeting to provide information about the project and request feedback from community members. The team invited all owners and occupants within 300 feet of the project site, as well as neighborhood groups, based on a list provided by City staff. The meeting was held at 12 pm virtually over Zoom.

Apart from the project team, one neighbor attended the meeting. The main topics discussed included the anticipated construction timeline, size of the building, and the placement of the building on the project site. Please see attached *2298 Durant Ave. Neighborhood Meeting Report* for full length responses by the project team.

Statement Regarding Berkeley Energy Code and Berkeley Green Code

The proposed project is designed to comply with the Berkeley Energy Code (BMC Chapter 19.36) and Berkeley Green Code (BMC Chapter 19.37), adopted by the City Council on December 3, 2019, including a solar PV system as well as energy and water efficiency measures. The building will be solar ready and accommodate solar PV as is physically and financially feasible for the project.

2. PROJECT COMPLIANCE WITH CITY POLICIES

General Plan

The City of Berkeley General Plan designates this project site as Residential Mixed Use (RMU). The Residential Mixed-Use designation is characterized by a diverse mixture of residential, commercial and institutional structures near job centers, shopping districts, and transit hubs.

Southside Area Plan

This site is located within the Southside Area Plan, which was adopted in 2011, with updated zoning regulations adopted in 2023. The site is within the Residential High Density Subarea designation which encourages higher density residential uses close to campus and Telegraph Avenue. The Southside Design Guidelines (2011) acknowledge the eclectic nature of the architecture within the Southside residential neighborhoods and emphasize compatibility of new construction with the scale, massing, quality, and detail evident in older buildings.

Zoning Ordinance

The proposed project site is zoned Residential Southside Mixed Use (R-SMU) which seeks to encourage "high-density, multi-story residential development close to major shopping, transportation, and employment centers" (BMC § 23.202.140(A)(1)). Zoning district standards are designed to promote the provision of dense multi-family housing and dense goods and services to serve the campus population that lives in the Southside Area neighborhood. The proposed project submitted a complete SB 330 preliminary application on August 6, 2024.

Figure 5. Zoning Map: Southside Residential – R-SMU

As shown in Table 1, the proposed project meets all the applicable objective zoning development standards, as modified pursuant to State Density Bonus Law (SDBL) and use permits allowed by the R-SMU zoning regulations.

Table 1: Major Development Standards

Municipal Code Standards	R-SMU Standard	Proposed	Compliance
Building Height, Maximum	85 feet + 5 foot parapet	91 feet 6 inches	Compliant through SDBL waiver
Residential Density, Minimum	150 DU / Acre	232 DU / Acre	Compliant

FAR, Maximum		7.0	6.6	Compliant
Lot Line Setbacks, Minimum	Front (Durant Ave.)	None	0 feet	Compliant
	Rear	4 feet	5 feet 1 ¾ inches	Compliant
	Street Side (Ellsworth St.)	None	0 feet	Compliant
	Interior Side	None	3 feet 0 ¼ inches	Compliant
Useable Open Space 40 sq. ft. per 1,000 sq. ft. residential floor area. (D) Max. 50% of UOS may be indoor amenities. /2		3,181 sq. ft. required (40 SF/ 1000 SF) x 79,522 SF = 3,181, SF required.	2,146 sq. ft. (outdoor: rooftop deck, 1,078 SF) (indoor amenities: 2,144 SF) *but only 1,072 SF qualify*.	Compliant with SDBL waiver
Landscaped Useable Open Space 40% of required sq. ft. (except balconies)		40% of 3,181 SF = 1,273 SF required	795 SF	Compliant with SDBL waiver
Parking	Automobile Parking	None	0	Compliant
	Long Term Bicycle Parking	1 space per 3 bedrooms	0	Compliant with SDBL waiver
	Short Term Bicycle Parking	1 space per 40 bedrooms (6 spaces)	6	Compliant

3. LEGISLATIVE CONTEXT

The housing crisis continues to have a significant impact on Californians across the state. The Government Code sections discussed below are state legislative efforts that recognize the severity of California's housing crisis, and the difficulties associated with developing new housing at appropriately zoned, transit-oriented, and urbanized locations. The proposed housing development project is submitted pursuant to Senate Bill 330 and subject to the modifications and protections of State Density Bonus Law (Gov. Code § 65915) and the Housing Accountability Act (Gov. Code § 65589.5). The project also satisfies the City of Berkeley's inclusionary housing requirement under Berkeley Municipal Code § 22.238.

Housing Accountability Act

The Housing Accountability Act (Gov. Code § 65589.5) requires the City of Berkeley to approve the project because it is consistent with all objective standards. Under the Housing Accountability Act, the

City is only permitted to reject a project if it can make findings based on a *preponderance* of evidence that the project would have a significant, unavoidable, and quantifiable impact on "objective, identified written public health or safety standards, policies, or conditions." (Gov. Code §65589.5(j)).

SB 330/Housing Crisis Act

The Housing Crisis Act (Gov. Code § 66300) prohibits a local agency from disapproving, or conditioning approval in a manner that renders infeasible, a housing development project that provides affordable housing. The act also requires that a development project must comply with all applicable, objective general plan and zoning standards and criteria that were in effect at the time the application was deemed to be complete. On August 6, 2024, the project team submitted a complete SB 330 Preliminary Application to the City of Berkeley, effectively freezing fees and regulations as of that date. The law also requires the city or county to consider and either approve or disapprove the housing development project within the five allowable public hearings under the HCA, and consistent with the applicable timelines under the Permit Streamlining Act.

AB 2097 Parking Requirements

AB 2097 (Gov Code § 65585) prohibits a public agency from imposing any minimum automobile parking requirement on most development projects within ½ mile of public transit unless the city makes written findings, within 30 days of the receipt of a completed application, that not imposing or enforcing minimum automobile parking requirements on the project development would have a substantially negative impact, supported by a preponderance of the evidence in the record.

Since the proposed project site is located within ½ mile of public transit (Downtown Berkeley BART Station and intersecting AC Transit services), the project is not subject to minimum parking requirements. Introducing parking in the proposed project will physically preclude the housing development project with the proposed number of units.

State Density Bonus Law Eligibility

The proposed project is eligible for the State Density Bonus (Gov. Code § 65915) because it meets all objective development standards, and provides a sufficient number of units as affordable housing. The project proposes five units housing units affordable to Very-Low Income households, which represents 10% of the base project.

The proposed base project that meets all objective standards includes 50 dwelling units, five of which are affordable for very low-income households (less than 50% AMI). These five affordable units comprise 10% of the proposed base project. Per State Density Bonus Law, that makes this project eligible for a 32.5% density bonus. The level of affordability provided entitles the project to unlimited waivers and two concessions, per Govt. Code § 65915(d)(2)(B). The average unit size for both the base project and density bonus project is 1,223 square feet.

Table 2: Density Bonus

Project Proposals	Market Rate Units	Below Market Rate Units	Total Units
Base Project	45	5	50
Density Bonus Project	60	5 *(10% Very Low Income)*	65 *(32.5% SDBL)*

With this density bonus, the project is entitled to use an unlimited number of waivers and up to two concessions for development standards that impede the project's ability to utilize the density bonus or increase feasibility. Tables 3 and 4 below show the five waivers and two concessions that are requested to be granted to accommodate the project. Without these waivers and concessions being granted, the proposed project would not be fiscally viable and could not physically be built as designed.

Table 3: Waivers Requested to Accommodate Density Bonus

If the project were to comply with any of the standards listed below, it would physically preclude the construction of the project as designed and would eliminate the number of proposed residential units.

Standard	Required	Proposed
Allowed Building Height (per BMC § 23.202.140(E)(3))	85 ft. maximum + 5 foot parapet	91 feet 6 inches
Residential Useable Open Space (per BMC Table 23.202-23)	40 sq. ft. per 1,000 sq. ft. residential floor area. (40 SF / 1000 SF) x 79,522 SF = 3,181, SF required.	2,146 sq. ft.
Landscaped Usable Open Space (per BMC 23.304.090(7)(a))	40% of 3,181 SF = 1,273 SF required	795 SF
Long-Term Bicycle Parking (per BMC 23.322.090(A)(2))	1 space per 3 bedrooms = 239 / 3 = 80 spaces	0 spaces
Tree Removal (per BMC 12.44.020)	- per BMC 12.44.020	Removal of Camphor Tree within public right of way, which conflicts with underground utilities and the building massing.

Table 4: Concessions Requested to Accommodate Density Bonus

As per Govt. Code § 65915(d)(1)(A), a project may seek concession requests if identifiable and actual cost reductions to provide for affordable housing costs are provided. The level of affordability provided in the proposed project (at least 10% for very low income households), entitles the project to two concessions, per Govt. Code § 65915(d)(2)(B). Compliance with the regulations below would render the project financially infeasible.

Regulation	Required	Proposed
BMC § 13.107 HARD HATS Ordinance	Participate in industry-proven apprenticeship programs and provide healthcare coverage.	Exemption from BMC 13.107
BMC § 13.108 Southside Plan Prevailing Wage Requirement	Pay general prevailing rate set forth in the California Labor Code.	Exemption from BMC 13.107

City of Berkeley Inclusionary Housing Regulations

This project is also subject to the City of Berkeley's inclusionary housing requirement under Berkeley Municipal Code § 22.238 that requires the project to provide at least 20% of the base project dwelling

units as inclusionary units at 80% AMI with the option of paying an in-lieu fee instead of providing the units on-site per Berkeley Municipal Code Section 22.238.030(B).

Alternatively, in lieu of providing affordable units, the proposed project may provide affordable units that comprise at least 20% of residential unit floor area of the project to achieve a mix of affordable units, including two-bedroom or three-bedroom units per Berkeley Municipal Code 23.328.030(A)(2).

This project proposes to provide 10% of the base project units onsite, 5 units, for very low-income households and meet the remainder of the inclusionary requirement through the in-lieu option of providing affordable units that comprise at least 20% of base project dwelling units as inclusionary units at 80% AMI. The project will enter in a regulatory agreement with the City of Berkeley that ensures that these proposed affordable dwelling units remain deed-restricted for the life of the project

4. CEQA OVERVIEW

The proposed project is eligible for a Class 32 Exemption from the CEQA Guidelines, as justified by the findings below. Further, AB 1633, which went into effect on January 1, 2024, establishes that if certain sites qualify for a Categorical Exemption under CEQA, and a local agency does not make an Exempt determination, it constitutes a violation under the Housing Accountability Act.

California Environmental Quality Act Class 32 Categorial Exemption for Infill Developments (CEQA Guideline § 15332):

a) **The project is consistent with the applicable general plan designation and all applicable general plan policies as well as with applicable zoning designation and regulations.**
The proposed project is a mixed-use project, which is an allowed use in the R-SMU zone, permitted with a Use Permit (and Public Hearing). The proposed project, with the density bonus, waivers, and concessions requested as part of this application, is consistent with all applicable, objective general plan policies and zoning regulations.

b) **The proposed development occurs within city limits on a project site of no more than five acres substantially surrounded by urban uses.**
The project is within the City Limits of Berkeley, south of the University of California Berkeley campus. The total lot area of the proposed project site is 0.28 acres, which is less than five acres. The project site is 100% surrounded by urbanized uses and development.

c) **The project site has no value as habitat for endangered, rare or threatened species.**
The existing condition of the project site is a 3 ½ story apartment building and a 2-story office building. There is no habitat value of any kind for any species (except humans), and the project site certainly does not contain any endangered, rare, or threatened species. The existing apartment was built in 1963, and the medical office was built in 1903. The project site is located in the rapidly developing Southside Area of Berkeley. The site does not contain, nor is it adjacent to, any habitat for rare, endangered, or threatened species.

d) **Approval of the project would not result in any significant effects relating to traffic, noise, air quality, or water quality.**

The project will not have any significant effects relating to traffic, noise, air quality, or water quality. There will be no vehicle parking onsite, and the site is located in the City of Berkeley's "low-VMT areas". The majority of trips are expected to be pedestrian, bicycle, or public transit trips, so the project will not result in significant effects relating to traffic or air quality.

The proposed project is not located near a stream or other body of water. It has direct access to storm and wastewater sewer connections. The proposed project will not include any sources of air or water pollution. A Stormwater Treatment Control Plan is included in the proposed project to remediate any stormwater runoff.

The proposed project is an allowed multi-family residential use in the R-SMU zoning district. Multi-family residential projects are typical in this location and the neighborhood context adjacent to the University campus. As a multi-family residential project, no significant noise sources will be generated by the project, with the exception of the construction period. The City of Berkeley's generally applicable conditions for construction and noise management will ensure that construction noise is mitigated.

e) **The site can be adequately served by all required utilities and public services.**
The project site is within the service boundaries of all necessary utilities, none of which have declared a moratorium, or pending moratorium, on new services.

The proposed project does not trigger any of the following exceptions that would disqualify the project from CEQA's Categorical Exemptions:

"(a) Location. Classes 3, 4, 5, 6, and 11 are qualified by consideration of where the project is to be located – a project that is ordinarily insignificant in its impact on the environment may in a particularly sensitive environment be significant. Therefore, these classes are considered to apply all instances, except where the project may impact on an environmental resource of hazardous or critical concern where designated, precisely mapped, and officially adopted pursuant to law by federal, state, or local agencies.

(b) Cumulative Impact. All exemptions for these classes are inapplicable when the cumulative impact of successive projects of the same type in the same place, over time is significant.

(c) Significant Effect. A categorical exemption shall not be used for an activity where there is a reasonable possibility that the activity will have a significant effect on the environment due to unusual circumstances.

(d) Scenic Highways. A categorical exemption shall not be used for a project which may result in damage to scenic resources, including but not limited to, trees, historic buildings, rock outcroppings, or similar resources, within a highway officially designated mitigation by an adopted negative declaration or certified EIR.

(e) Hazardous Waste Sites. A categorical exemption shall not be used for a project located on a site which is included on any list compiled pursuant to Section 65962.5 of the Government Code.

> **(f) Historical Resources.** A categorical exemption shall not be used for a project which may cause a substantial adverse change in the significance of a historical resource." Based on the Historical Evaluation provided by Preservation Architecture, the two subject properties of the proposed project have not been previously considered or evaluated for historical potential. Additionally, per the City of Berkeley's *Landmarks Preservation Ordinance (LPO),* the adjoined properties and buildings located at 2298 Durant Avenue and 2360 Ellsworth Street are not eligible for designation as a City of Berkeley Landmark or Structure of Merit. See DPR Forms and Historic Resource Evaluation attached with this application package.

None of the exceptions listed above apply to the proposed project, so it is still eligible for Categorical Exemptions under CEQA. Exception (a) is not applicable to the proposed project because it is seeking a Class 32 Categorical Exemption. The proposed impact will not contribute to any cumulative impacts on the environment. This is an infill development project that will not have a significant effect on any CEQA issues. The proposed project is at the intersection of Durant Avenue and Ellsworth Street, which both are not a Scenic Highway. The proposed project is not on a hazardous waste site, as attested to in the "Hazardous Waste & Substances Statement" and detailed in the Phase I Environmental Site Assessment Report. These supportive documents are included as attachments in this application package. The proposed project does not contain a historic resource.

Assembly Bill 1633 (AB 1633), which went into effect on January 1, 2024, establishes that if certain sites qualify for a Categorical Exemption under CEQA, and a local agency does not make an Exempt determination, it constitutes a violation under the Housing Accountability Act (HAA). To be eligible for the protections of AB 1633:

I. The Project cannot be on an environmentally sensitive site or a site subject to certain environmental hazards;
II. The Project must be on a legal parcel, within an urbanized area, and provide certain green benefits;
III. The density of the housing development project meets or exceeds 15 dwelling units per acre; and
IV. There is substantial evidence in the record that the Project qualifies for an exemption, and that it is not subject to any exception to the exemption."

The proposed project meets each of these requirements. The subject site is an urban infill lot that has been developed for over 100 years and is not an environmentally sensitive or hazardous site. The proposed project is on two legal parcels within an urbanized area.

The project will provide green benefits by increasing the supply of housing and offices near public transit, Downtown and Southside services and the University. The new building will be constructed according to the Berkeley Green Code and Energy Code. The proposed project has a residential density of 232 units per acre.

The project materials provided in this application package provide substantial evidence that the project qualifies for a Class 32 Categorical Exemption. As detailed above, the proposed project is not subject to

any exceptions to the exemption criteria. By satisfying each of these eligibility requirements, the proposed project is subject to the protections and provisions of AB 1633.

5. REQUIRED FINDINGS

This section outlines the proposed project's compliance with the required findings for approval of the requested Use Permits for this project.

1. Use Permit, under BMC § 23.202.020(A), to allow a Multi-family Residential Building
2. Administrative Use Permit, under BMC § 23.304.050 to allow rooftop equipment projections.

Use Permit Findings
The project is designed as a housing development project and is only subject to objective general plan and zoning standards and criteria, as per Gov Code § 65589.5(4). To the extent that required findings are objective, they are specified below. Use Permit findings that include subjective regulations cannot be enforced, according to the City's August 2, 2021 *Memo re: Housing Accountability Act & Density Bonus – Objective Standards*.[1]

1. Use Permit, under BMC § 23.204.020(A), to allow a residential building

Table 23.202-1: Allowed Uses in the Residential Districts.
Multi-Family Residential: UP(PH)

Response: Because this Use Permit does not have any objective standards in the required findings, the density bonus project assumes the Use Permit for new construction of a residential building. The construction, establishment, maintenance, and operation of the proposed project will not be detrimental to the health, safety, peace, morals, comfort, or general welfare of the neighborhood or the City as a whole. Multi-family residential projects are a permitted use in the R-SMU district, and the proposed structure is appropriate for the district in that it makes housing available in a convenient location proximate to downtown Berkeley and the UC Berkeley campus.

The proposed project is not anticipated to generate significant traffic or parking demand because it is located in the City of Berkeley's Low Vehicle-Miles Traveled (VMT) Area. This Low VMT area includes the Southside Area because the VMTs per resident are an average of 15% less than the rest of the Bay Area. In addition, the proposed project will have a Transportation Demand Management Program that includes secure bicycle parking and real-time transit information display monitors. Future residents will not be eligible for Residential Parking Permits (RPP). The proposed project will comply with all objective standards in the Southside

[1] As noted in the City's August 2, 2021 Memo re: Housing Accountability Act & Density Bonus – Objective Standards: "the Zoning Officer, ZAB, DRC and LPC should refrain from applying subjective findings (e.g., nondetrimental) to any application to construct a qualifying housing development project (including remodeling or reconfiguration of housing) if that project satisfies objective standards for permit issuance, unless specific findings or denial under the Housing Accountability Act can be made. While decision-makers retain discretion in the overall land use and design review process, i.e., whether the use is properly located or the building and site improvements are compatibly designed, the ultimate decision on density and development intensity is protected by the HAA."

Plan's adopted Mitigation Monitoring Program (MMP). As a result, the project would not be materially detrimental to the housing needs or public interest of the affected neighborhood and the City of Berkeley.

The project is designed as a Housing Development Project and is only subject to objective zoning standards and findings. Use Permit findings that include subjective regulations cannot be enforced, according to the City's August 2, 2021, Memo re: Housing Accountability Act & Density Bonus – Objective Standards. This finding is not an objective requirement.

2. **Administrative Use Permit, under BMC § 23.304.050 to construct rooftop projections which exceed the maximum height.**

   Table 23.304-5: Allowed Projections Above Height Limit.
   Residential Districts

   Response: Because this Administrative Use Permit does not have any objective standards in the required findings, the proposed project assumes the Administrative Use Permit to allow rooftop projections to exceed the district's height limit. Because the proposed building height exceeds the district's height limit, the rooftop projections will also exceed that limit.

INFORMATION CITY OF BERKELEY **LAND USE PLANNING**

ZONING PROJECT APPLICATION SUBMITTAL REQUIREMENTS

PROJECT INFORMATION

Project Address(es):

Unit(s)/Suite(s) #:

Assessor Parcel Number(s):

The Zoning Project Submittal Requirements packet describes all of the materials required to submit a complete Zoning Project Application to the Land Use Division of the Planning and Development Department.

The checklist on pages 1-2 of this packet must be completed, signed, and submitted with the Application. You must initial each Section and check each box that corresponds to an item submitted for review.

Staff will verify that the minimum submittal requirements have been included within 30 days of receiving an application submittal, per Government Code Section 65943 (30-Day Review Period). Applications that are missing the materials will be deemed incomplete and not accepted for permit processing review. During the permit processing review, you may be required to clarify, amplify, correct, or supplement the information listed in the submittal requirements per Government Code Section 65944 (Agency Acceptance of Applications).

Section 1 is a checklist of materials required for all projects. Sections 2-7 are checklists of materials that may be required based on the project type or location.

Each submittal requirement on the checklist is described further in this packet, starting on page 3. Each description identifies whether an item is required, and indicates how to prepare each document, drawing, material, and/or report. Hyperlinked forms and instructions are also online under Land Use at **https://berkeleyca.gov/construction-development/permits-design-parameters/permit-types/permit-forms**.

All documents, reports and plans must be provided in digital format, unless requested in hard copy. Printed plans are required prior to public meetings and/or hearings. See the **Guide to Submitting a Zoning Project Application** for details on how to submit, review timing, and digital plans and document.

HAZARDOUS WASTE AND SUBSTANCES STATEMENT

Pursuant to the Permit Streamlining Act (PSA), a development permit application may not be accepted as complete unless and until the applicant has submitted a signed statement indicating whether the proposed project site or any alternative site(s) is on the lists of hazardous waste sites compiled pursuant to Government Code Section 65962.5 by the California Secretary for Environmental Protection.

Data lists / maps are available at the following websites (check multiple lists and categories):

http://www.calepa.ca.gov/SiteCleanup/CorteseList/

https://www.envirostor.dtsc.ca.gov/public/

Applicant's Information:

Name: **Studio KDA**

Street Address: **1810 Sixth Street, Berkeley, CA 94710**

City, State, Zip Code: _____

Phone Number: **(510) 841-3555** Email: **Austin@StudioKDA.com**

Project Information:

Address: **2298 Durant Ave, 2360 Ellsworth St**

City, State, Zip Code: **Berkeley, CA 94704**

Assessor's book, page, and parcel number: **55-1887-001 & 55-1887-002**

Specify any list that the site appears on: **None**

Regulatory identification number: _____

Date of list: _____

Site Use (if known):

Past: **Commercial & Residential** Present: **Commercial & Residential**

Proposed: **Residential**

Submittals (check all that are available):

x __Phase I Report __Phase II Report __Closure Letter __Other:_____

Applicant's verification:

Signature: *Austin Springer* Date: **08/12/24**

TABULATION FORM

Project Address: _____ Date: _____

Applicant's Name: _____

Zoning District: _____

Please print in ink the following numerical information for your Administrative Use Permit, Use Permit, or Variance application:

	Existing	Proposed	Permitted/ Required[1]
Units, Parking Spaces & Bedrooms			
Number of Dwelling Units (#)			
Number of Parking Spaces (#)			
Number of Bedrooms (#) (R-1, R-1A, R-2, R-2A, and R-3 only)			
Yards and Height			
Front Yard Setback (Feet)			
Side Yard Setbacks: (facing property) Left: (Feet)			
Right: (Feet)			
Rear Yard Setback (Feet)			
Building Height* (# Stories)			
Average* (Feet)			
Maximum* (Feet)			
Areas			
Lot Area (Square-Feet)			
Gross Floor Area* (Square-Feet) Total Area Covered by All Floors			
Building Footprint* (Square-Feet) Total of All Structures			
Lot Coverage* (%) Residential districts only (Building Footprint/Lot Area)			
Useable Open Space* (Square-Feet)			
Floor Area Ratio* Non-Residential districts only (Except ES-R)			

*See Glossary – BMC Chapter 23.502.

Revised: 12/21

[1] See development standards for the Zoning District, per the Berkeley Municipal Code, Chapters 23.202 and 23.204

Report Generated on : August 27, 2024

2298 Durant Ave. Neighborhood Meeting Report:

The neighborhood meeting was held via Zoom at 12 Noon on 09/04/2024. Flyers advertising the meeting were sent to the list of Residents, Owners, and Neighborhood Groups within 300' of the project site.

Attendance:

- Kim N: Neighbor
- Austin Springer: Studio KDA (Architect) (Host)
- Darshan Amrit: Studio KDA (Architect)
- Pepe: Valiance Capital (Development Team)
- Nhan Nguyen Le: Valiance Capital (Development Team)

The presentation started at 12:05 and briefly covered the project, including site history/location, new building statistics, affordability, landscaping, amenities, façade, and anticipated approval and construction timelines. Pages from the project application as well as a short video rendering of the building were shown before opening the floor to questions/concerns from the public.

Feedback:

Kim N raised the following questions/concerns and Austin from Studio KDA made the following responses (in **Red**)

- *What is the anticipated construction timeline? Specifically, when is demolition going to start?*

  We are hoping to break ground on the project sometime in Summer of 2025 so that we can complete the ~20-24 Month construction in time for the Fall 2027 school year.

- *It is really big.*

  While the project is indeed significantly larger than the existing surroundings, it is perfectly in line with the vision that the City of Berkeley has in mind for this neighborhood. The City passed a new Southside Zoning Plan earlier this year that allows for buildings up to 85' and 8 stories in this zone and others in the Southside. There are a few buildings of this scale under construction now, and more in the pipeline, including some that are significantly taller (note a 21-Story proposal just up the street that was recently submitted).

- *It seems that you are proposing to bring the building all the way out to the sidewalk.*

  Yes, the building is proposed to abut the sidewalk on this project. While at other projects in the past we have strategically set the building back, this site is lucky enough to have very generous sidewalks (12' on the Ellsworth side and 16' on Durant) such that we didn't feel that it was necessary to step the building back from the street any further than the property line.

The meeting concluded at 12:19 pm

Neighborhood Meeting

Proposed Development:
2298 Durant Ave

Date:
Wednesday, Sept. 4th; 12:00 Noon

Location: Zoom
Meeting ID: 841 1726 4458
Passcode: 724659
Link: https://tinyurl.com/7arb885c

Host:
Studio KDA: (510) 841-3555
www.studioKDA.com

You are invited to an open house to hear about the proposed development of a new 8-Story, ~80,000 S.F. Multi-Family Residential Building at 2298 Durant Ave. The project consists of 65 units (~8% affordable) ranging from 2-Bedrooms to 6-Bedrooms. The building will have high-quality, resilient exterior finishes and provide a vibrant new streetscape with added street trees, planters, and bike racks.

We look forward to responding to any feedback and questions from the community on this development.

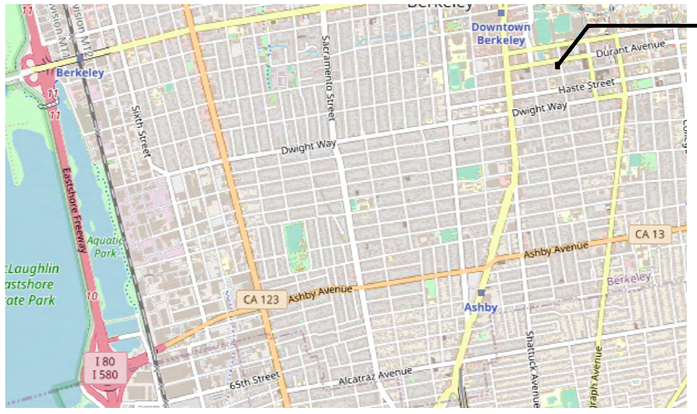
5 LOCATION MAP
N.T.S.



4 VICINITY MAP
N.T.S.

THE SITE'S REDEVELOPMENT WILL INCLUDE THE DEMOLITION OF BOTH EXISTING BUILDINGS AT 2298 DURANT AVE (A 2-STORY COMMERCIAL BUILDING) AND AT 2360 ELLSWORTH STREET (A 3-STORY RESIDENTIAL BUILDING OVER A 1-STORY PARTIALLY SUBTERRANEAN PARKING GARAGE). THE TWO EXISTING LOTS WILL BE MERGED INTO ONE CONTIGUOUS LOT WHOSE FRONT IS ALONG DURANT AVE AND WILL TAKE THE ADDRESS OF 2298 DURANT AVE.

PROPOSED IS AN 8-STORY RESIDENTIAL BUILDING, CONSISTING OF 65 UNITS AND 81,213 GSF OF BUILDING AREA. UNITS INCLUDE 2,3,4, & 6 BEDROOM UNITS - ALL WITH IN-UNIT LAUNDRY. EACH FLOOR INCLUDES TRASH SERVICE. THE GROUND FLOOR INCLUDES A GENEROUS LOBBY, TENANT AMENITY SPACES, AND BUILDING UTILITY SPACES FOR ELECTRICAL AND TRASH THAT EXIT DIRECTLY TO ELLSWORTH STREET. OTHER COMMON SPACES INCLUDE AN INDOOR AMENITY WITH A BALCONY AT THE 4TH FLOOR AND A ROOF DECK AT THE 8TH FLOOR.

ALL IDEAS, DESIGNS, ARRANGEMENTS, AND PLANS INDICATED BY THIS DRAWING ARE OWNED BY, AND THE PROPERTY OF THIS OFFICE AND WERE CREATED, EVOLVED AND DEVELOPED FOR USE ON, AND IN CONNECTION WITH THE SPECIFIED PROJECT. NONE OF SUCH IDEAS, DESIGNS, ARRANGEMENTS OR PLANS SHALL BE USED BY OR DISCLOSED TO ANY PERSON, FIRM OR CORPORATION FOR ANY PURPOSE WHATSOEVER WITHOUT THE WRITTEN PERMISSION OF GREENWOOD & MOORE, INC. WRITTEN DIMENSIONS ON THESE DRAWINGS SHALL HAVE PRECEDENCE OVER SCALE DIMENSIONS. CONTRACTORS SHALL VERIFY AND BE RESPONSIBLE FOR ALL DIMENSIONS AND CONDITIONS ON THE JOB. THIS OFFICE MUST BE NOTIFIED OF ANY VARIATION FROM THE DIMENSIONS AND CONDITIONS SHOWN BY THESE DRAWINGS. SHOP DETAILS OF ACCURATE SCALE MUST BE SUBMITTED TO THIS OFFICE FOR APPROVAL BEFORE PROCEEDING WITH FABRICATION ON THE ITEMS SO NOTED.

PRELIMINARY IMPROVEMENT PLANS
2298 DURANT AVE BERKELEY, CA
APN: 055-1887-001 & 055-1887-002

VICINITY MAP

BASIS OF BEARINGS:

THE LINE IN DURANT AVENUE BETWEEN THE STANDARD CITY FOR BERKELEY MONUMENT FOUND AT ELLSWORTH STREET AND THE INTERSECTION OF THE REFERENCE POINTS AT FULTON STREET WAS TAKEN AS N83°00'00"E, PROJECTED AS SHOWN ON PARCEL MAP NO. 10100, FILED IN BOOK 320 OF MAPS, AT PAGES 96 THROUGH 100, ALAMEDA COUNTY RECORDS.

VERTICAL DATUM / BENCHMARK:

ELEVATIONS FOR THIS SURVEY ESTABLISHED BY HOLDING THE ELEVATION OF 211.60' ON THE TOP OF A 3/8^{ths} INCH BRASS PIN IN A MONUMENT WELL FOUND AT THE INTERSECTION OF ELLSWORTH STREET AND DURANT AVENUE, AS SHOWN ON THIS MAP. THIS MONUMENT WAS TAKEN AS CITY OF BERKELEY MONUMENT B0401, HELD PER CORNER RECORD 7052 AND CITY SURVEYOR'S NOTES AS CITY OF BERKELEY DATUM.
ELEVATION = 211.60' COB DATUM

TITLE REPORT NOTE:

THE INFORMATION REGARDING EXISTING EASEMENTS OR OTHER ENCUMBRANCES SHOWN ON THIS SURVEY IS BASED ON FIRST AMERICAN TITLE INSURANCE COMPANY PRELIMINARY TITLE REPORTS PROVIDED TO THE SURVEYOR, THE FIRST HAVING ORDER NUMBER NCS-1183023-CC, DATED MAY 31, 2023, AND THE SECOND HAVING ORDER NUMBER NCS-1177686, AMENDED, DATED APRIL 11, 2023. THERE MAY BE EASEMENTS OR OTHER ENCUMBRANCES OF RECORD THAT EXIST BUT ARE NOT DELINEATED HEREON.

UTILITIES NOTE:

INFORMATION SHOWN ON THIS SURVEY REGARDING EXISTING UTILITIES IS APPROXIMATE ONLY, IS BASED ON VISUAL OBSERVATIONS AND/OR UTILITY COMPANY RECORDS, AND HAS NOT BEEN VERIFIED AS BEING COMPLETE OR CORRECT. THE ENGINEER ASSUMES NO RESPONSIBILITY FOR THE ACCURACY OR COMPLETENESS OF THE EXISTING UTILITY INFORMATION SHOWN HEREON, NOR FOR THE PRESENCE OF OTHER UTILITIES WHICH MAY EXIST BUT ARE NOT SHOWN ON THIS SURVEY.

KEYNOTES:

1. SAWCUT
2. LIMIT OF REMOVAL
3. REMOVE (E) CONCRETE/ASPHALT/BRICK
4. REMOVE (E) SIDEWALK, CURB, & GUTTER
5. (E) BUILDING & FOUNDATION TO BE DEMOLISHED, REFER TO ARCHITECTURAL AND STRUCTURAL DRAWINGS. PG&E TO DISCONNECT ELECTRIC AND GAS SERVICE PRIOR TO DEMOLITION OF THE (E) BUILDING.
6. REMOVE (E) FENCE AND/OR GATE
7. REMOVE (E) RETAINING WALL
8. REMOVE (E) DRIVEWAY
9. REMOVE (E) TRENCH DRAIN
10. REMOVE & REINSTALL (E) MAILBOX
11. REMOVE (E) WATER METER. CAP AND ABANDON (E) WATER LATERAL PER EBMUD STANDARDS (BY EBMUD)
12. PG&E TO REMOVE (E) GAS METER AND GAS LATERAL PRIOR TO DEMOLITION OF THE BUILDING. CONTRACTOR TO VERIFY LOCATION IN FIELD. CAP & ABANDON PER PG&E STANDARDS & REQUIREMENTS.
13. PG&E TO REMOVE (E) ELECTRIC METERS AND ASSOCIATED ELECTRIC LINE PRIOR TO DEMOLITION OF THE BUILDING. COORDINATE REMOVAL WITH OWNER AND PG&E.
14. ABANDON (E) SEWER LATERAL PER CITY OF BERKELEY REQUIREMENTS. FOR BUILDING DEMOLITION AND LATERAL ABANDONMENT: WHEN A BUILDING IS TO BE DEMOLISHED AND THE EXISTING LATERAL IS NOT TO BE RE–USED, THE LATERAL SEWER SHALL BE DUG AND EXPOSED WHERE IT ENTERS THE MAIN.
    A. IF THE LATERAL ENTERS THE MAIN BY MEANS OF A FACTORY MANUFACTURED WYE OR TEE BRANCH, AND IF THE MAIN AND WYE OR TEE BRANCH ARE ALL IN GOOD, UNDAMAGED CONDITION, THE LATERAL SHALL BE DISCONNECTED AND THE BRANCH SHALL BE PLUGGED WITH AN EXPANDABLE NEOPRENE RUBBER PLUG AT THE MAIN. THE BRANCH PLUG SHALL BE SHALL BE ENCLOSED WITH A MINIMUM THICKNESS OF 6 INCHES OF 6 SACK, ¾" SIZE AGGREGATE. PORTLAND CEMENT CONCRETE. THE WYE BRANCH WITH RUBBER PLUG MUST BE INSPECTED AND APPROVED BY AN ENGINEERING INSPECTOR PRIOR TO ENCLOSURE WITH CONCRETE AND BACKFILL OF THE TRENCH.
    B. IF THE LATERAL ENTERS THE MAIN BY ANY METHOD OTHER THAN BY A FACTORY WYE OR TEE BRANCH, OR IF THE EXISTING MAIN, WYE OR TEE BRANCH IS DAMAGED IN ANY WAY, THE SECTION OF MAIN CONTAINING THE LATERAL ENTRY OPENING SHALL BE REMOVED AND REPLACED WITH A NEW SECTION OF PIPE OF THE SAME DIAMETER AS THE EXISTING MAIN. AN ENGINEERING INSPECTOR MUST INSPECT THE NEW MAIN SECTION BEFORE BACKFILL.
    C. THE ABANDONED LATERAL PIPE SHALL BE FILLED WITH SAND AND JETTED TO PREVENT THE PIPE FROM BECOMING A HOME FOR RODENTS OR OTHER DISEASE VECTORS.
    D. REMOVE (E) CLEANOUT FRAME & COVER.
15. (E) WALL TO REMAIN
16. (E) FENCE TO REMAIN
17. (E) JOINT POLE TO REMAIN
18. (E) ACCESSIBLE RAMP TO REMAIN

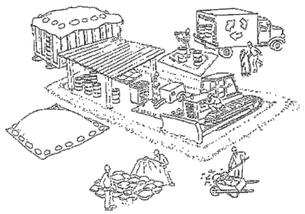
City of Berkeley's Pollution Prevention - It's Part of the Plan



Make sure your crews and subs do the job right!

Runoff from streets and other paved areas is a major source of pollution and damage to creeks and the San Francisco Bay. Construction activities can directly affect the health of creeks and the Bay unless contractors and crews plan ahead to keep dirt, debris, and other construction waste away from storm drains and local creeks. Following these guidelines and the project specifications will ensure your compliance with City of Berkeley requirements.

Materials storage & spill cleanup

Non-hazardous materials management

- Sand, dirt, and similar materials must be stored at least 10 feet (3 meters) from catch basins. All construction material must be covered with a tarp and contained with a perimeter control during wet weather or when rain is forecasted or when not actively being used within 14 days.
- Use (but don't overuse) reclaimed water for dust control as needed.
- Sweep or vacuum streets and other paved areas daily. Do not wash down streets or work areas with water!
- Recycle all asphalt, concrete, and aggregate base material from demolition activities. Comply with City of Berkeley Ordinances for recycling construction materials, wood, gyp board, pipe, etc.
- Check dumpsters regularly for leaks and to make sure they are not overfilled. Repair or replace leaking dumpsters promptly.
- Cover all dumpsters with a tarp at the end of every work day or during wet weather.

Hazardous materials management

- Label all hazardous materials and hazardous wastes (such as pesticides, paints, thinners, solvents, fuel, oil, and antifreeze) in accordance with city, county, state, and federal regulations.
- Store hazardous materials and wastes in water tight containers, store in appropriate secondary containment, and cover them at the end of every work day or during wet weather or when rain is forecasted.
- Follow manufacturer's application instructions for hazardous materials and be careful not to use more than necessary. Do not apply chemicals outdoors when rain is forecasted within 24 hours.
- Be sure to arrange for appropriate disposal of all hazardous wastes.

Spill prevention and control

- Keep a stockpile of spill cleanup materials (rags, absorbents, etc.) available at the construction site at all times.
- When spills or leaks occur, contain them immediately and be particularly careful to prevent leaks and spills from reaching the gutter, street, or storm drain. Never wash spilled material into a gutter, street, storm drain, or creek!
- Dispose of all containment and cleanup materials properly.
- Report any hazardous materials spills immediately! Dial 911 or the City of Berkeley's Public Works Department by dialing 311

Construction Entrances and Perimeter

- Establish and maintain effective perimeter controls and stabilize all construction entrances and exits to sufficiently control erosion and sediment discharges from site and tracking off site.
- Sweep or vacuum any street tracking immediately and secure sediment source to prevent further tracking.

Vehicle and equipment maintenance & cleaning

- Inspect vehicles and equipment for leaks frequently. Use drip pans to catch leaks until repairs are made; repair leaks promptly.
- Fuel and maintain vehicles on site only in a bermed area or over a drip pan that is big enough to prevent runoff.
- If you must clean vehicles or equipment on site, clean with water only in a bermed area that will not allow rinse water to run into gutters, streets, storm drains, or creeks.
- Do not clean vehicles or equipment on-site using soaps, solvents, degreasers, steam cleaning equipment, etc.

Earthwork & contaminated soils

- Keep excavated soil on the site where it will not collect in the street.
- Transfer to dump trucks should take place on the site, not in the street.
- Use fiber rolls, silt fences, or other control measures to minimize the flow of silt off the site.

- Earth moving activities are only allowed during dry weather by permit and as approved by the City Inspector in the Field.
- Mature vegetation is the best form of erosion control. Minimize disturbance to existing vegetation whenever possible.
- If you disturb a slope during construction, prevent erosion by securing the soil with erosion control fabric, or seed with fast-growing grasses as soon as possible. Place fiber rolls down-slope until soil is secure.
- If you suspect contamination (from site history, discoloration, odor, texture, abandoned underground tanks or pipes, or buried debris), call the Engineer for help in determining what should be done, and manage disposal of contaminated soil according to their instructions.

Dewatering operations

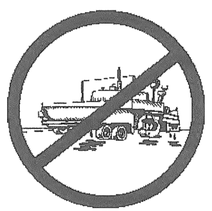
- Effectively manage all run-on, all runoff within the site, and all runoff that discharges from the site. Run-on from off site shall be directed away from all disturbed areas or shall collectively be in compliance.
- Reuse water for dust control, irrigation, or another on-site purpose to the greatest extent possible.

- Be sure to notify and obtain approval from the Engineer before discharging water to a street, gutter, or storm drain. Filtration or diversion through a basin, tank, or sediment trap may be required.
- In areas of known contamination, testing is required prior to reuse or discharge of groundwater. Consult with the Engineer to determine what testing is required and how to interpret results. Contaminated groundwater must be treated or hauled off-site for proper disposal.

Saw cutting

- Always completely cover or barricade storm drain inlets when saw cutting. Use filter fabric, catch basin inlet filters, or sand/gravel bags to keep slurry out of the storm drain system.
- Shovel, absorb, or vacuum saw-cut slurry and pick up all waste as soon as you are finished in one location or at the end of each work day (whichever is sooner!).
- If saw cut slurry enters a catch basin, clean it up immediately.

Paving/asphalt work



- Always cover storm drain inlets and manholes when paving or applying seal coat, tack coat, slurry seal, or fog seal.
- Protect gutters, ditches, and drainage courses with sand/gravel bags, or earthen berms.
- Do not sweep or wash down excess sand from sand sealing into gutters, storm drains, or creeks. Collect sand and return it to the stockpile, or dispose of it as trash.
- Do not use water to wash down fresh asphalt concrete pavement.

Concrete, grout, and mortar storage & waste disposal

- Store concrete, grout, and mortar under cover, on pallets, and away from drainage areas. These materials must never reach a storm drain.
- Wash out concrete equipment/trucks off-site or into contained washout areas that will not allow discharge of wash water onto the underlying soil or onto the surrounding areas.

- Collect the wash water from washing exposed aggregate concrete and remove it for appropriate disposal off site.

Painting

- Never rinse paint brushes or materials in a gutter or street!
- Paint out excess water-based paint before rinsing brushes, rollers, or containers in a sink.
- Paint out excess oil-based paint before cleaning brushes in thinner.
- Filter paint thinners and solvents for reuse whenever possible. Dispose of oil-based paint sludge and unusable thinner as hazardous waste.

Landscape Materials

- Contain, cover, and store on pallets all stockpiled landscape materials (mulch, compost, fertilizers, etc.) during wet weather or when rain is forecasted or when not actively being used within 14 days.
- Discontinue the application of any erodible landscape material within 2 days of forecasted rain and during wet weather.

Storm drain polluters may be liable for fines of $10,000 or more per day!

TITLE DESCRIPTION

REAL PROPERTY IN THE CITY OF BERKELEY, COUNTY OF ALAMEDA, STATE OF CALIFORNIA, DESCRIBED AS FOLLOWS;

PORTION OF LOT 4, BLOCK 13, "MAP OF THE PROPERTY OF COLLEGE HOMESTEAD ASSOCIATION", RECORDED MAY 15, 1866, MAP BOOK "T" OF DEEDS, PAGE 799, ALAMEDA COUNTY RECORDS.

BEGINNING AT A POINT OF THE INTERSECTION OF THE WESTERN LINE OF ELLSWORTH STREET WITH THE SOUTHERN LINE OF DURANT AVENUE, AND RUNNING THENCE WESTERLY ALONG SAID LINE OF DURANT AVENUE, 94 FEET; THENCE AT RIGHT ANGLES SOUTHERLY 90 FEET; THENCE EASTERLY PARALLEL WITH SAID LINE OF DURANT AVENUE, 94 FEET TO THE WESTERN LINE OF ELLSWORTH STREET; THENCE NORTHERLY ALONG SAID LAST NAMED LINE, 90 FEET TO THE POINT OF BEGINNING.

EXCEPTING THEREFROM THE EXCLUSIVE RIGHT TO PROSPECT FOR, DRILL FOR, PRODUCE AND TAKE ANY OIL, GAS OR OTHER HYDROCARBON SUBSTANCES OR MINERAL SUBSTANCES AND ACCOMPANYING FLUIDS INCLUDING ALL GEOTHERMAL RESOURCES, FROM THE REAL PROPERTY GRANTED HEREIN, FROM THE DEPTH OF FIVE HUNDRED FEET FROM THE SAID REAL PROPERTY, INCLUDING THE RIGHT TO SLANT DRILL FROM ADJACENT PROPERTY, THE RIGHT TO UTILIZE SUBSURFACE STORAGE FOR NATURAL SUBSTANCES, AND THE RIGHT TO MAINTAIN SUBSURFACE PRESSURES.
GRANTOR COVENANTS AND EGRESS THAT THE ABOVE RESERVED RIGHTS WILL NOT BE EXERCISED IN DEROGATION OF GRANTEE'S USED AND PURPOSES OF THE SURFACE OF REAL PROPERTY. AS RESERVED IN THE DEED EXECUTED BY THE REGENTS OF THE UNIVERSITY OF CALIFORNIA, A CALIFORNIA CORPORATION, RECORDED SEPTEMBER 2, 1983, SERIES NO 83-163400, ALAMEDA COUNTY RECORDS.

APN: 055-1887-001

THE PROPERTY SURVEYED IS THE SAME AS DESCRIBED ABOVE AND SHOWN IN THE TITLE COMMITMENT FROM FIRST AMERICAN TITLE INSURANCE COMPANY, COMMITMENT NO. NCS-1177686-CC AND AN EFFECTIVE DATE OF SEPTEMBER 18, 2023, UPDATED OCTOBER 06, 2023.

TITLE COMMITMENT INFORMATION

The Title Description and Schedule 'B' items are the same as shown on the title commitment provided by First American Title Insurance Company, Commitment No. NCS-1177686-CC, issued with an effective date of September 18, 2023, updated October 06, 2023.

SURVEYOR'S NOTES

1. ALL STATEMENTS WITHIN THE CERTIFICATION, AND OTHER REFERENCES LOCATED ELSEWHERE HEREON, RELATED TO UTILITIES, IMPROVEMENTS, STRUCTURES, BUILDINGS, PARTY WALLS, EASEMENTS, SERVITUDES, FOUNDATIONS AND POSSIBLE ENCROACHMENTS ARE BASED SOLELY ON ABOVE GROUND, VISIBLE EVIDENCE, UNLESS ANOTHER SOURCE OF INFORMATION IS SPECIFICALLY REFERENCED HEREON.

2. SUBJECT TRACT HAS DIRECT PHYSICAL DRIVEWAY ACCESS TO ELLSWORTH STREET AND DURANT AVENUE, BOTH DEDICATED PUBLIC RIGHTS-OF-WAY.

3. THE DIMENSIONS AND AREA OF THE BUILDING(S) SHOWN ARE BASED ON THE BUILDING'S EXTERIOR FOOTPRINT AT GROUND LEVEL.

4. THE POINT OF HEIGHT MEASUREMENT IS IDENTIFIED ON THE SURVEY AND WAS TAKEN FROM THE NEAREST ADJACENT GRADE AT SAID POINT, THIS POINT REPRESENTS THE HEIGHT OF THE STRUCTURE AS OBSERVED FROM GROUND LEVEL.

5. UNDERGROUND UTILITIES HAVE BEEN LOCATED AND/OR SHOWN ON THIS SURVEY, ONLY VISIBLE AND/OR MARKED UTILITY APPURTENANCES ARE SHOWN.

6. THERE IS NO OBSERVABLE EVIDENCE OF EARTH MOVING WORK, OR BUILDING CONSTRUCTION ON THE SURVEYED PROPERTY.

7. THERE ARE NO OBSERVABLE EVIDENCE OF ANY CHANGES IN STREET RIGHT-OF-WAYS OR RECENT STREET OR SIDEWALK CONSTRUCTION OR REPAIR.

8. THERE IS NO OBSERVABLE EVIDENCE OF CEMETERIES ON THE SURVEYED PROPERTY.

9. ALL RECIPROCAL EASEMENT AGREEMENTS ("REAS") THAT HAVE BEEN REPORTED BY THE TITLE REPORT PROVIDED HAVE BEEN DENOTED ON THE SURVEY AND ARE SHOWN HEREON. THE LIMITS OF ANY OFFSITE APPURTENANT EASEMENTS THAT HAVE BEEN REPORTED BY THE TITLE REPORT PROVIDED HAVE BEEN DENOTED ON THE SURVEY AND ARE SHOWN HEREON.

10. THIS SURVEY DOES NOT PROVIDE A DETERMINATION OR OPINION CONCERNING THE LOCATION OR EXISTENCE OF WETLANDS, FAULT LINES, TOXIC OR HAZARDOUS WASTE AREAS, SUBSIDENCE, SUBSURFACE AND ENVIRONMENTAL CONDITIONS OR GEOLOGICAL ISSUES. NO STATEMENT IS MADE CONCERNING THE SUITABILITY OF THE SUBJECT TRACT FOR ANY INTENDED USE, PURPOSE OR DEVELOPMENT.

11. THE SURVEYED BOUNDARY SHOWN HEREON ARE CONTIGUOUS WITH ADJOINING PROPERTIES AND/OR RIGHTS OF WAY WITHOUT ANY GAPS, GORES OR OVERLAPS.

12. NO VISIBLE EVIDENCE OF SUBSTANTIAL AREAS OF REFUSE WERE OBSERVED AT THE TIME THE FIELDWORK WAS PERFORMED.

13. THE BOUNDARY LINE DIMENSIONS AS SHOWN ON THIS SURVEY MAP FORM A MATHEMATICALLY CLOSED FIGURE.

SURVEYOR'S CERTIFICATE

TO: 2298 DURANT LP, A CALIFORNIA LIMITED PARTNERSHIP; FIRST AMERICAN TITLE INSURANCE COMPANY:

THIS IS TO CERTIFY THAT THIS MAP OR PLAT AND THE SURVEY ON WHICH IT IS BASED WERE MADE IN ACCORDANCE WITH THE 2021 MINIMUM STANDARD DETAIL REQUIREMENTS FOR ALTA/NSPS LAND TITLE SURVEYS, JOINTLY ESTABLISHED AND ADOPTED BY ALTA AND NSPS, AND INCLUDES ITEMS 2, 3, 4, 5, 6(A), 6(B), 7(A), 7(B)(1), 7(C), 8, 9, 11(B), 13, 14, 16, 17 AND 19 OF TABLE A THEREOF. THE FIELDWORK WAS COMPLETED ON JUNE 29, 2023.

4. THE POINT OF HEIGHT MEASUREMENT IS IDENTIFIED ON THE SURVEY AND WAS TAKEN FROM THE NEAREST ADJACENT GRADE AT SAID POINT, THIS POINT REPRESENTS THE HEIGHT OF THE STRUCTURE AS OBSERVED FROM GROUND LEVEL.

5. UNDERGROUND UTILITIES HAVE BEEN LOCATED AND/OR SHOWN ON THIS SURVEY, ONLY VISIBLE AND/OR MARKED UTILITY APPURTENANCES ARE SHOWN.

6. THERE IS NO OBSERVABLE EVIDENCE OF EARTH MOVING WORK, OR BUILDING CONSTRUCTION ON THE SURVEYED PROPERTY.

7. THERE ARE NO OBSERVABLE EVIDENCE OF ANY CHANGES IN STREET RIGHT-OF-WAYS OR RECENT STREET OR SIDEWALK CONSTRUCTION OR REPAIR.

8. THERE IS NO OBSERVABLE EVIDENCE OF CEMETERIES ON THE SURVEYED PROPERTY.

9. ALL RECIPROCAL EASEMENT AGREEMENTS ("REAS") THAT HAVE BEEN REPORTED BY THE TITLE REPORT PROVIDED HAVE BEEN DENOTED ON THE SURVEY AND ARE SHOWN HEREON. THE LIMITS OF ANY OFFSITE APPURTENANT EASEMENTS THAT HAVE BEEN REPORTED BY THE TITLE REPORT PROVIDED HAVE BEEN DENOTED ON THE SURVEY AND ARE SHOWN HEREON.

10. THIS SURVEY DOES NOT PROVIDE A DETERMINATION OR OPINION CONCERNING THE LOCATION OR EXISTENCE OF WETLANDS, FAULT LINES, TOXIC OR HAZARDOUS WASTE AREAS, SUBSIDENCE, SUBSURFACE AND ENVIRONMENTAL CONDITIONS OR GEOLOGICAL ISSUES. NO STATEMENT IS MADE CONCERNING THE SUITABILITY OF THE SUBJECT TRACT FOR ANY INTENDED USE, PURPOSE OR DEVELOPMENT.

11. THE SURVEYED BOUNDARY SHOWN HEREON ARE CONTIGUOUS WITH ADJOINING PROPERTIES AND/OR RIGHTS OF WAY WITHOUT ANY GAPS, GORES OR OVERLAPS.

12. NO VISIBLE EVIDENCE OF SUBSTANTIAL AREAS OF REFUSE WERE OBSERVED AT THE TIME THE FIELDWORK WAS PERFORMED.

13. THE BOUNDARY LINE DIMENSIONS AS SHOWN ON THIS SURVEY MAP FORM A MATHEMATICALLY CLOSED FIGURE.

14. RECORD AND MEASURED DISTANCES ARE THE SAME.

SURVEYOR'S CERTIFICATE

TO: ELLSWORTH, CASCADE CAPITAL- BERKELEY MULTI-FAMILY I, LLC, A CALIFORNIA LIMITED LIABILITY COMPANY; FIRST AMERICAN TITLE INSURANCE COMPANY;

THIS IS TO CERTIFY THAT THIS MAP OR PLAT AND THE SURVEY ON WHICH IT IS BASED WERE MADE IN ACCORDANCE WITH THE 2021 MINIMUM STANDARD DETAIL REQUIREMENTS FOR ALTA/NSPS LAND TITLE SURVEYS, JOINTLY ESTABLISHED AND ADOPTED BY ALTA AND NSPS, AND INCLUDES ITEMS 2, 3, 4, 5, 6(A), 6(B), 7(A), 7(B)(1), 7(C), 8, 9, 11(B), 13, 14, 16, 17 AND 19 OF TABLE A THEREOF. THE FIELDWORK WAS COMPLETED ON JUNE 29, 2023.

POLLINATOR NOTES:

1. BERBERIS: BRIGHT YELLOW SPRING FLOWERS ATTRACT BEES AND BUTTERFLIES, AND DEEP BLUE BERRIES ARE MUCH LOVED BY SONG BIRDS.
2. HEUCHERA: ATTRACTS HUMMINGBIRDS, BEES, AND BUTTERFLIES.
3. JUNCUS: FOOD SOURCE FOR CATTERPILLARS AND BUTTERFLIES.
4. IRIS: FLOWERS DRAW BUTTERFLIES, BEES, HUMMINGBIRDS. BIRDS FIND NESTING AND FEEDING OPPORTUNITIES AMONG FOLIAGE.
5. MIMULUS: LARVAL FOOD SOURCE FOR THE COMMON CHECKERSPOT AND BUCKEY BUTTERFLIES. FLOWERS PROVIDE NECTAR FOR HUMMINGBIRDS.
6. POLYSTICHUM: SUPPORTS CATERPILLARS AND BUTTERFLIES.
7. VACCINIUM: ATTRACTS BIRDS, BEES, BUTTERFLIES, MOTHS, AND PROVIDES EDIBLE FRUIT.
8. AESCULUS: FRAGRANT FLOWERS ATTRACT AND PROVIDE FOOD AND NECTAR FOR CATERPILLARS, MOTHS, AND BUTTERFLIES.
9. ARBUTUS: ATTRACTS BEES, BIRDS, AND BUTTERFLIES, AND PROVIDES EDIBLE FRUIT.
10. CINNAMOMUM: SMALL FRAGRANT FLOWERS ARE FOLLOWED BY SMALL BLACK FRUIT, ATTRACTING BIRDS, BUTTERFLIES, AND BEES.

	6.7	CCF per year

IRRIGATION NOTES

1. THE IRRIGATION SYSTEM WILL BE DESIGNED BY A CERTIFIED IRRIGATION DESIGNER.
2. A DEDICATED EBMUD METER OR SUBMETER WILL BE PROVIDED FOR THE IRRIGATION SYSTEM DESIGN WITH LOCATION AND POINT OF CONNECTION NOTED.
3. A MANUAL SHUTOFF VALVE, REDUCED PRESSURE BACKFLOW PREVENTER AND FLOW SENSOR WITH MASTER SHUT OFF VALVE WILL BE PROVIDED AFTER THE POINT OF CONNECTION.
4. WATER PRESSURE AND FLOW RATES AT POINT OF CONNECTION AND ALL REMOTE CONTROL VALVES WILL BE INDICATED ON IRRIGATION PLANS.
5. IRRIGATION PLANS WILL SHOW SCHEMATIC LOCATION FOR ALL MAINLINES, LATERALS, SLEEVES AND REMOTE CONTROL VALVES.
6. REMOTE CONTROL VALVES WILL BE OPERATED BY A SMART, WEATHER-BASED IRRIGATION CONTROLLER WITH RAIN SENSOR MOUNTED IN AN APPROPRIATE LOCATION.
7. ALL PLANTED AREAS WILL BE WATERED USING HIGH-EFFICIENCY IRRIGATION TECHNOLOGY, SUCH AS DRIP LINES AND BUBBLERS WITH FLUSH AND AIR RELIEF VALVES WHERE REQUIRED. ALL COMPONENTS SHALL HAVE FIXED FLOW RATES.
8. IRRIGATION ZONES WILL BE GROUPED BY WATER DEMAND AND THE OVERALL PLANTING PLAN WILL COMPLY WITH WATER USE LIMITATIONS OUTLINED IN THE LATEST WATER EFFICIENT LANDSCAPE ORDINANCE.

PLANTING NOTES

1. **PLANTING AND IRRIGATION WORK SHALL COMPLY WITH ALL CURRENT ELEMENTS OF THE CALIFORNIA MODEL WATER EFFICIENT LANDSCAPE ORDINANCE (MWELO).**
2. **AT LEAST 80% OF ALL PLANT MATERIAL SHALL ORIGINATE FROM WITHIN THE CALIFORNIA FLORISTIC PROVENCE. (“NATIVE” PLANTS WILL BE SELECTED.)**
3. PLANT SPECIES SHALL BE SELECTED FOR DROUGHT TOLERANCE, ECOLOGICAL BENEFIT AND SITE SUITABILITY IN TERMS OF SIZE, SHADE/SUN-TOLERANCE, AND MAINTENANCE NEEDS.
4. BAY-FRIENDLY BEST PRACTICES REGARDING MULCHING AND SOIL HEALTH WILL BE IMPLEMENTED TO FACILITATE PLANT GROWTH, INCLUDING SPECIFICATION OF ORGANIC SOIL AMENDMENTS AND COMPOST.
5. THE PLANTING DESIGN WILL GROUP PLANTS WITH SIMILAR EVAPOTRANSPIRATION FACTORS WITHIN LEGIBLE ZONES. EVAPOTRANSPIRATION WILL BE ASSIGNED PER WUCOLS VERSION IV OR CALSCAPE.ORG.
6. THE LANDSCAPE ARCHITECT WILL PROVIDE PLANT AND SOIL MAINTENANCE RECOMMENDATIONS AS PART OF THE PROJECT SPECIFICATIONS.
7. LAWN AND TURF AREAS WILL NOT BE INCLUDED IN THE PROJECT.

APPLICATION CITY OF BERKELEY **LAND USE PLANNING**

AFFORDABLE HOUSING COMPLIANCE PLAN

Affordable Housing Compliance Plan Form

You are required to submit an Affordable Housing Compliance Plan (AHCP) for Housing Development Projects[4] that are subject to the affordable housing requirements of BMC Chapter 23.328, Inclusionary Housing. The AHCP is an enforceable commitment that identifies the number and type of affordable, or Below Market rate (BMR) units, the amount of In-Lieu Fees, and/or the parcels of land (or portions thereof) that will be provided and/or paid by the applicant to comply with those requirements.

The Department of Planning and Development's Land Use Division and the Department of Health, Housing, and Community Services use the information from this form and the related sheets to confirm which provisions of the City's affordable housing requirements apply to your project, and if the project complies.

Please complete the entire form. If a section doesn't apply, enter "n/a." If selecting the option to provide an alternative unit size mix or option to dedicate land, please complete the entire AHCP form and staff will contact you to discuss approval for these discretionary options.

You may be asked to revise this form to reflect the approved project during the permit review process and/or required plan sheets.

The Preliminary AHCP is required with a Zoning Permit or Zoning Certificate application. It is intended to provide estimates to the Applicant and City, and inform conditions of approval on discretionary zoning permits. See the **applicable pre-application and/or zoning submittal requirements** to determine if a Preliminary AHCP is needed for your project.

The Final AHCP is required with the first building permit application for construction, and will include the total fee amount due for projects electing to pay an In-Lieu Fee. The In-Lieu Fee can be paid any time prior to the issuance of the project's Certificate of Occupancy or Temporary Certificate of Occupancy (as applicable).

INDICATE AFFORDABLE HOUSING COMPLIANCE PLAN (AHCP) TYPE (CHECK ONE)

Preliminary Affordable Housing Requirements (Land Use Entitlement)

Final Affordable Housing Requirements (Building Permit)

Applicant Name:

Applicant Email:

NOTES

[4] **HOUSING DEVELOPMENT PROJECT** means a development project, including a Mixed-Use Residential project **(as defined in 23.502.020(M)(13)**, involving the new construction of at least one Residential Unit. Projects with one or more buildings or projects including multiple contiguous parcels under common ownership or control shall be considered as a sole Housing Development Project and not as individual projects **(BMC 23.328.020(E))**.

APPLICATION CITY OF BERKELEY **LAND USE PLANNING**

AFFORDABLE HOUSING COMPLIANCE PLAN

2. PROJECT SUMMARY INFORMATION –
THIS INFORMATION IS USED TO ESTIMATE THE TOTAL NUMBER OF REQUIRED BMR UNITS

Does the project use Density Bonus?

YES **NO**

Total Density Bonus Units

Does the Demolition Ordinance (BMC 23.326) apply to the project?

YES **NO**

Total units to be demolished

Total affordable replacement units required

(separate calculation required, Gov. Code §65589.5)

Total units replaced (affordable and market-rate)

A **Total Residential Unit Floor Area[5] (square feet)**
(Entire proposed project)

B **Total Residential Units**
(Base Project only for density bonus projects)

C **Total BMR Units required (20% of B)**

D **Total BMR Units Proposed**

50% AMI (Very-Low Income)

80% AMI (Lower Income)

TOTAL BMR Units

E **Other Compliance Option**
(alternative unit size mix or option to dedicate land)

YES **NO**

Indicate Project Type (Check One) **Ownership** **Rental**

3. PLEASE INDICATE HOW THE PROJECT WILL FULFILL THE AFFORDABLE HOUSING REQUIREMENTS

3.A. PROVISION OF ON-SITE

The following provisions apply:

- BMR units cannot exceed three bedrooms
- At least 50 percent of the required Affordable Units in the Housing Development Project must be designated as affordable to Very-Low Income Households (round up for fractional numbers).
    - Up to a maximum requirement of 10 percent of the total units in the Housing Development Project if the project provides more Affordable Units than are required by BMC Chapter 23.328

Please complete the table by noting the number of units in each category.

PROJECT UNIT TYPES AND AFFORDABILITY LEVELS

Unit Type	Market Rate	Very-Low Income Affordable (50% AMI)	Low-Income Affordable (80% AMI)	TOTAL
Studio				
One Bedroom				
Two Bedroom				
Three Bedroom				
Four Bedroom				
Six Bedroom				
TOTAL				

[5] See BMC 23.328.020 Definitions

APPLICATION CITY OF BERKELEY **LAND USE PLANNING**

AFFORDABLE HOUSING COMPLIANCE PLAN

3.B. OPTION TO PAY AN IN-LIEU FEE

Housing Development Projects may provide less than the required number of on-site BMR units and pay a proportionately reduced In-Lieu Fee, calculated as follows:

The Fee Per Square Foot
multiplied by
the **Total Residential Unit Floor Area**
of a Housing Development Project,
multiplied by
the **Percentage of the Applicable Requirement Remaining** after accounting for any on-site Affordable Units provided.

Projects that do not provide any Affordable Units on-site will have an applicable requirement multiplier of one.

The in-lieu fee for Density Bonus Projects is calculated using the base project residential unit floor area only:

The Base Project Residential Unit Floor Area (BP RUFA)
is equal to:
the Final Residential Unit Floor Area (FP RUFA)
divided by
One plus the Density Bonus percentage taken (DB %)

BP RUFA = FP RUFA / (1+DB%)

AFFORDABLE HOUSING FEE DUE

Per Square Foot Fee
based on Total Residential Unit Floor Area, see Fee Schedule on Page 1) (Base Project only for density bonus projects)

X

Total Residential Unit Floor Area (square feet)
(Base Project only for density bonus projects)

X

In Lieu Fee percentage calculation*:
(Affordable Units required – affordable units provided) / Affordable Units required)

(*projects that provide no on-site Affordable Units have a multiplier of 1)

TOTAL FEE DUE

EXAMPLE CALCULATIONS:
50,000 square foot 100-unit project providing 15 Affordable Units

A **Total Residential Unit Floor Area[5] (square feet)**
RUFA (Base Project RUFA only for density projects)
50,000 square feet

B **Total Residential Units**
(Base Project only for density bonus projects)
100

C **Total BMR Units required (20% of B)**
20

D **Total BMR Units Proposed**

50% AMI (Very-Low Income)	**8**
80% AMI (Lower Income)	**7**
TOTAL BMR Units	**15**

Per Square Foot Fee
based on Total Residential Unit Floor Area
(Base Project only for density bonus projects)
$56.25

X

Total Residential Unit Floor Area (square feet)
(Base Project only for density bonus projects)
50,000 square feet

X

In Lieu Fee percentage calculation*:
(Affordable Units required – affordable units provided) / Affordable Units required)

(*projects that provide no on-site Affordable Units have a multiplier of 1)	**25%** ((20-15)/20 = 0.25)

TOTAL FEE DUE
$703,125

[5] See BMC 23.328.020 Definitions

APPLICATION CITY OF BERKELEY **LAND USE PLANNING**

AFFORDABLE HOUSING COMPLIANCE PLAN

SECTION 4 REQUIRED PLAN SHEETS (LAND USE ENTITLEMENT PLANS AND BUILDING PERMIT PLANS)

REQUIRED AHCP PLAN SHEETS

In addition to completing this form, the land use entitlement and building permit plans for your housing development project must demonstrate compliance with the applicable affordable housing provisions. If your project includes a discretionary zoning permit, the entitlement plans must include a Preliminary AHCP plan sheet(s), and all building permits for construction must include a Final AHCP plan sheet(s).

What needs to be in the plans to demonstrate compliance with the City's affordable housing regulations?

The applicable AHCP plan sheets with the applicable information (listed below) must be in sequential pages near the beginning of your plan set and labeled as "Preliminary or Final Affordable Housing Compliance Plan Sheet." Having this information together in the plans will make locating the information easier during project and plan review, and provide transparency to the public. A sample plan set page is attached for reference (see Exhibit A). You will receive corrections from your zoning reviewer if information is not displayed properly in the plan set.

ALL PROJECTS: APPLICABILITY AND REQUIREMENTS OF BMC CHAPTER 23.328 INCLUSIONARY HOUSING

- Residential unit floor area diagrams* showing the floor area that is included and excluded from calculation. Diagrams must be consistent with and separate from the architectural floor plans and include:
  - Schematic diagrams of each floor or level, including mezzanines
  - Indicate floor area by use with shading, color, and/or callouts
  - Dimension all areas of the project that qualify as residential unit floor area, and provide the square footage of each area
  - Tabulation of the total residential unit floor area according to the diagrams
- Calculation of the number of required and proposed BMR units (Base Project only for density bonus)
- Calculation of 100% In-Lieu fee (provide even if on-site units are proposed)

* Diagrams should reflect the whole project (base and bonus), and provide a calculation of the Base Project Residential Unit Floor Area (RUFA) for projects that utilize state density bonus. *(See page 5)*

ON-SITE BELOW MARKET RATE (BMR) UNITS (ALL OR COMBINATION)

Any on-site BMR units
(BMC 23.328.030(A) Requirement to Construct Affordable Units

- Unit summary table by floor of BMR and market-rate units, with bedroom counts
- Alternate mix of unit types, if applicable
  - Calculations for 20 percent of residential unit floor area (must be a mix of affordable units that are either two- or three-bedrooms)

IN-LIEU FEE (ALL OR COMBINATION)

Payment in-lieu of providing some or all required affordable units on-site (BMC Section 23.328.030(B) Option to Pay In-Lieu)

In-Lieu Fee per Resolution No. 70,698-N.S. calculated as follows: the fee per square foot multiplied by the total Residential Unit Floor Area of a Housing Development Project, multiplied by the percentage of the applicable requirement remaining after accounting for any on-site Affordable Units provided. Projects that do not provide any Affordable Units on-site will have an applicable requirement multiplier of one. *(See page 5)*

The In-Lieu Fee per square foot is based on the residential unit floor area of the project (base project only if utilizing State Density Bonus provisions). *(See page 5)*

STAFF ADMINISTRATION USE ONLY

This Affordable Housing Compliance Plan (AHCP) is certified in compliance with BMC Chapter 23.328, Inclusionary Housing.

PROJECT:
VLC09

TITLE:
AFFORDABLE HOUSING IN-LIUE DIAGRAMS & FEE

SHEET:
A-111

5B: Anti-Discrimination Housing Policies

Required for a project creating any of the following:

- Five (5) or more new dwelling units and/or five (5) or more live/work units
- New dwelling units and/or live/work units on lots whose size and zoning designation is such to allow construction of five or more dwelling units (R-2, R-2A, and MU-R Districts)
- One (1) to four (4) new dwelling units and/or five (5) or more live/work units, which are added to an existing one (1) to four (4) unit property developed after August 14, 1986, and the resulting number of units totals five (5) or more
- Additional condominium units, resulting in five (5) or more condominium units converted and/or created after August 14, 1986 on the site

Submit a written statement answering the following questions and **provide** the requested documentation, if applicable:

- Does the applicant or sponsor, including the applicant or sponsor's parent company, subsidiary, or any other business or entity with an ownership share of at least 30% of the applicant's company, engage in the business of developing real estate, owning properties, or leasing or selling individual dwelling units in states or jurisdictions outside of California?
- If the answer to (1) is yes, which?
- If the answer to (1) is yes, does the applicant or sponsor, as defined in (1), have policies in individual states that prohibit discrimination based on sexual orientation, gender identity, and/or gender expression in the sale, lease, or financing of any dwelling units enforced on every property in the state or states where the applicant or sponsor has an ownership or financial interest?

This project is subject to Anti-Discrimination Housing Policies as it provides more than 5 dwelling units.

The answer to (1) is no.

VMT Metrics

VMT can be measured in several ways. For the purposes of VMT analysis in Berkeley, the City will use the metrics of Household VMT per Capita (which will apply to residential uses), and Home-Work VMT per Worker (which will apply to employment-generating uses). These VMT metrics are consistent with those recommended in the OPR *Technical Advisory* and are the metrics that the Alameda CTC model directly produces. The Household VMT per Capita measures all of the trips associated with a residential use and divides that distance by the number of residents in the study area. The Home-Work VMT per Worker measures all of the commute trips between homes and workplaces and divides that distance by the number of workers in the study area.

Both metrics described above are "efficiency" metrics, in which the level of VMT is expressed in "per person" terms. This form of the metric speaks to how efficiently the people at a given location travel. A project that contributes to a more efficient use of the transportation system would reduce the VMT per person as compared to a no-project scenario. Some amount of overall VMT growth is always expected to occur when there is overall growth in population and economic activity; many development projects will cause an increase in total VMT, but the VMT per person can decrease if the new residents travel in more efficient ways.

VMT Screening

Analysis of smaller, less complex projects can be simplified by using a screening process. OPR suggests that screening criteria may be applied to identify when land use projects can be expected to cause a less-than-significant impact, without needing to conduct a detailed study. Screening is an option but is not mandatory. Because it requires limited evidence to support its use on a project, screening benefits project applicants and agencies wanting to streamline development review, with the trade-off of the potential for somewhat more legal risk if the screening process is challenged.

In the City of Berkeley, land use projects that meet at least one of the following screening criteria are presumed to cause a less-than-significant VMT impact and would not require VMT analysis in order to address the question on the Appendix G CEQA checklist: "Would the project conflict or be inconsistent with CEQA Guidelines section 15064.3, subdivision (b)?" The other CEQA checklist items related to transportation impacts should still be reviewed and evaluated. Although calculation of VMT may not be required to evaluate transportation impacts, preparation of VMT estimates may still be needed for other environmental analysis topics, such as energy and greenhouse gas emissions, if such are necessary for the project being studied. City staff will review the screening conclusions for each project and may request additional transportation analysis at their discretion.

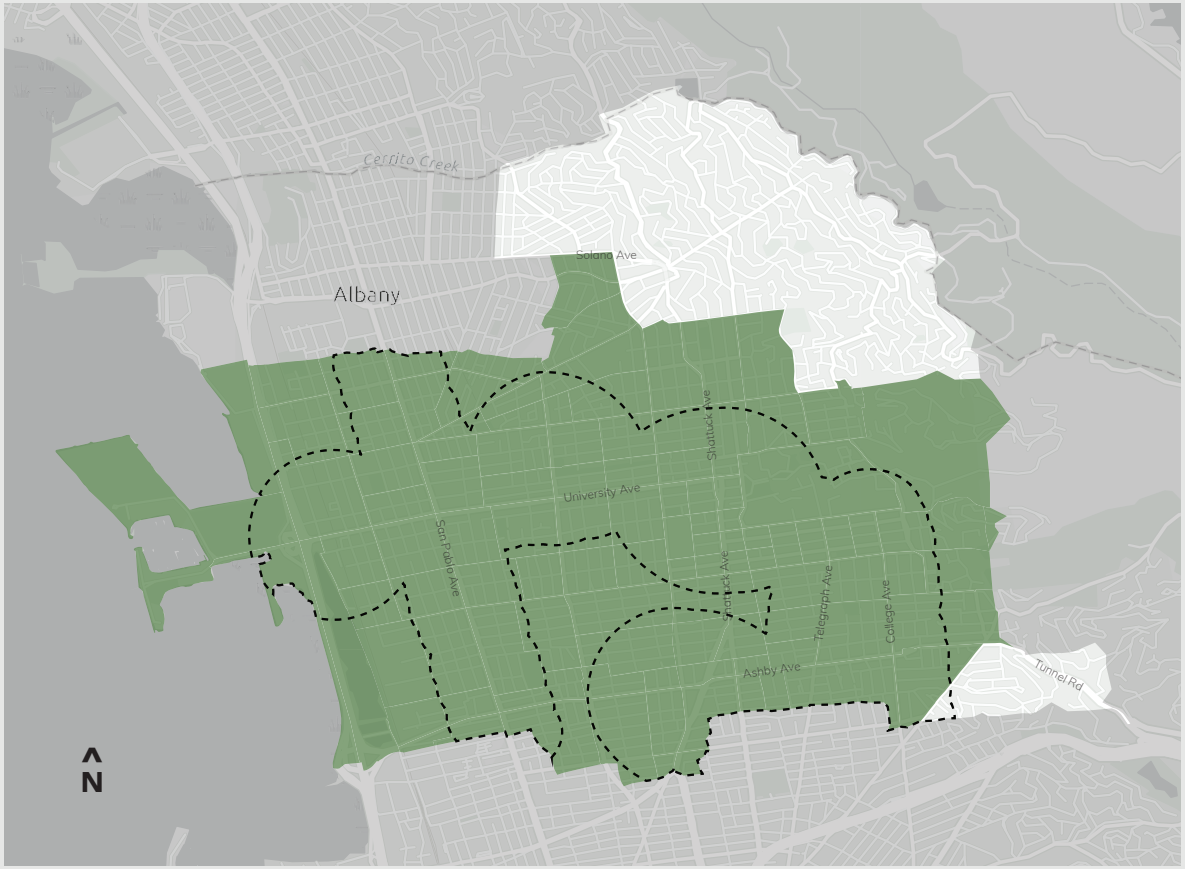
- **Transit Priority Areas (TPA)**: Projects located within a ½-mile walkshed around major transit stops[1] (i.e., the BART stations and the Amtrak station) or within a ¼-mile walkshed around high-quality transit corridors[2]. Maps that show the TPAs within Berkeley are attached to this report. This TPA screening would not apply if the project has any of the following characteristics:
    - Has a Floor Area Ratio (FAR) of less than 0.75 for office uses; or
    - Includes more than 200,000 square feet of office or commercial space; or
    - Includes more parking supply than the project's estimated demand; or
    - Is inconsistent with the City's *General Plan*, an applicable Specific Plan, or an applicable Sustainable Communities Strategy (as determined by the City, with input from MTC); or
    - Replaces affordable residential units with market-rate residential units; or
    - Has project-specific or location-specific information that indicates that the project will generate significant levels of VMT.
- **Low-Income Housing**: Low-income housing units typically generate less VMT than market-rate units of similar sizes and can contribute to improving jobs-housing balance. As such, projects that contain 100% restricted units affordable to Low-Income Households and Very Low-Income Households, as defined in Berkeley Municipal Code 22.20.065, are presumed not to require transportation VMT analysis for CEQA, as long as the projects do not include more parking supply than the project's estimated demand.
- **Small Projects**: Projects defined as generating 836 daily VMT or less. Based on recent data from the California Household Travel Survey, this level of VMT would equate to 20 units of residential use or up to 10,000 square feet of non-residential use[3].
- **Locally Serving Public Facility**: Locally serving public facilities generally encompass government, civic, cultural, health, and infrastructure uses which contribute to and support community needs and mostly generate trips within the local area. Locally serving public facilities include, but are not

[1] "Major transit stop" is defined in Public Resources Code 21064.3 as a site containing an existing rail transit station, a ferry terminal served by either a bus or rail transit service, or the intersection of two or more major bus routes with a frequency of service interval of 15 minutes or less during the morning and afternoon peak commute periods.

[2] "High-quality transit corridor" is defined in Public Resources Code 21155 as a corridor with fixed-route bus service with service intervals no longer than 15 minutes during peak commute hours. For purposes of this section, the service intervals must be no longer than 15 minutes during peak commute times for at least one individual transit route.

[3] This threshold ties directly to the OPR Technical Advisory which notes that CEQA provides a categorical exemption for existing facilities, including additions to existing structures of up to 10,000 square feet, so long as the project is in an area where public infrastructure is available to allow for maximum planned development and the project is not in an environmentally sensitive area. (CEQA Guidelines, § 15301, subd. (e)(2).) Using statewide average data from the California Household Travel Survey (CHTS), the amount of daily VMT associated with 10,000 square feet of non-residential space is 836 VMT. Also using statewide average CHTS data, this level of VMT is associated with 20 housing units. Therefore, absent substantial evidence otherwise, it is reasonable to conclude that the addition of 20 housing units or 10,000 square feet of non-residential space could be considered not to lead to a significant impact.

Household VMT Per Capita, 2020



VMT per Resident:

at least 15% below Bay Area average

Transit Priority Areas:

½ mi from rail stations or ¼ mi from bus stops with service at least every 15min

Stormwater Requirements Checklist
Municipal Regional Stormwater Permit (MRP 3)
Stormwater Controls for Development Projects

I. Applicability C.3 Stormwater Requirements

All projects must complete Section I.

I.A. Enter Project Data *(Data for "C.3 Regulated Projects," will be reported in the municipality's stormwater Annual Report.)*

I.A.1 Project Name:	New Multi-Family Building at 2298 Durant Avenue		
I.A.2 Project Address (include cross street)	2298 Durant Avenue, Berkeley, CA		
I.A.3 Project APN(s)	055-1887-001 & 055-1887-002		
I.A.4 Project Watershed[1]	Potter and Derby Creeks		
I.A.5 Applicant Name	Jeffrey Moore		
I.A.6 Date Submitted	09-05-2024		
I.A.7 Applicant Address	3111 Castro Valley Blvd, Suite 200 , Castro Valley, CA 94546		
I.A.8 Applicant Phone	510-581-2772	I.A.9 Applicant E-mail Address	jrmoore@greenwoodmoore.com
I.A.10 Development Type (check all that apply)	☑ Residential ☐ Commercial ☐ Industrial ☐ Mixed-Use ☐ Streets, Roads, etc. ☐ Detached Single Family Home ☐ Redevelopment[2]		
I.A.11 Project Description (Include any past or future phase of the project)	This project is demolishing (2) existing buildings on the project site & constructing an 8-story residential building.		
I.A.12 Total Project Area	12,235 SQ. FT.	I.A.13 % Slope on Site	1%
I.A.14 Total Land Disturbance Area (Include all areas to be cleared, excavated, graded, and borrow and stockpile areas)	12,235 SQ. FT.		

I.B. Is the project a "C.3 Regulated Project" per MRP Provision C.3.b or a Small Project per MRP Provision C.3.i No

I.B.1 Complete the *Impervious and Pervious Surfaces Table*

Type of Impervious Surface[3]	a Pre-Project Impervious Area (sq ft)	b Existing Impervious Area to be Replaced (sq ft[4])	c New Impervious Area to be Created (sq ft)	d Post-Project Pervious Area (sq ft)
a. Impervious roof area(s)[5]	4,091	4,091	57	NA
b. Impervious sidewalks, patios, paths, driveways[6]	2,738	2,738	0	
c. Uncovered impervious parking[7]	3,775	3,775	0	
d. Streets (public)	0	0	0	
e. Streets (private)	0	0	0	
Totals		10,604	57	1,574

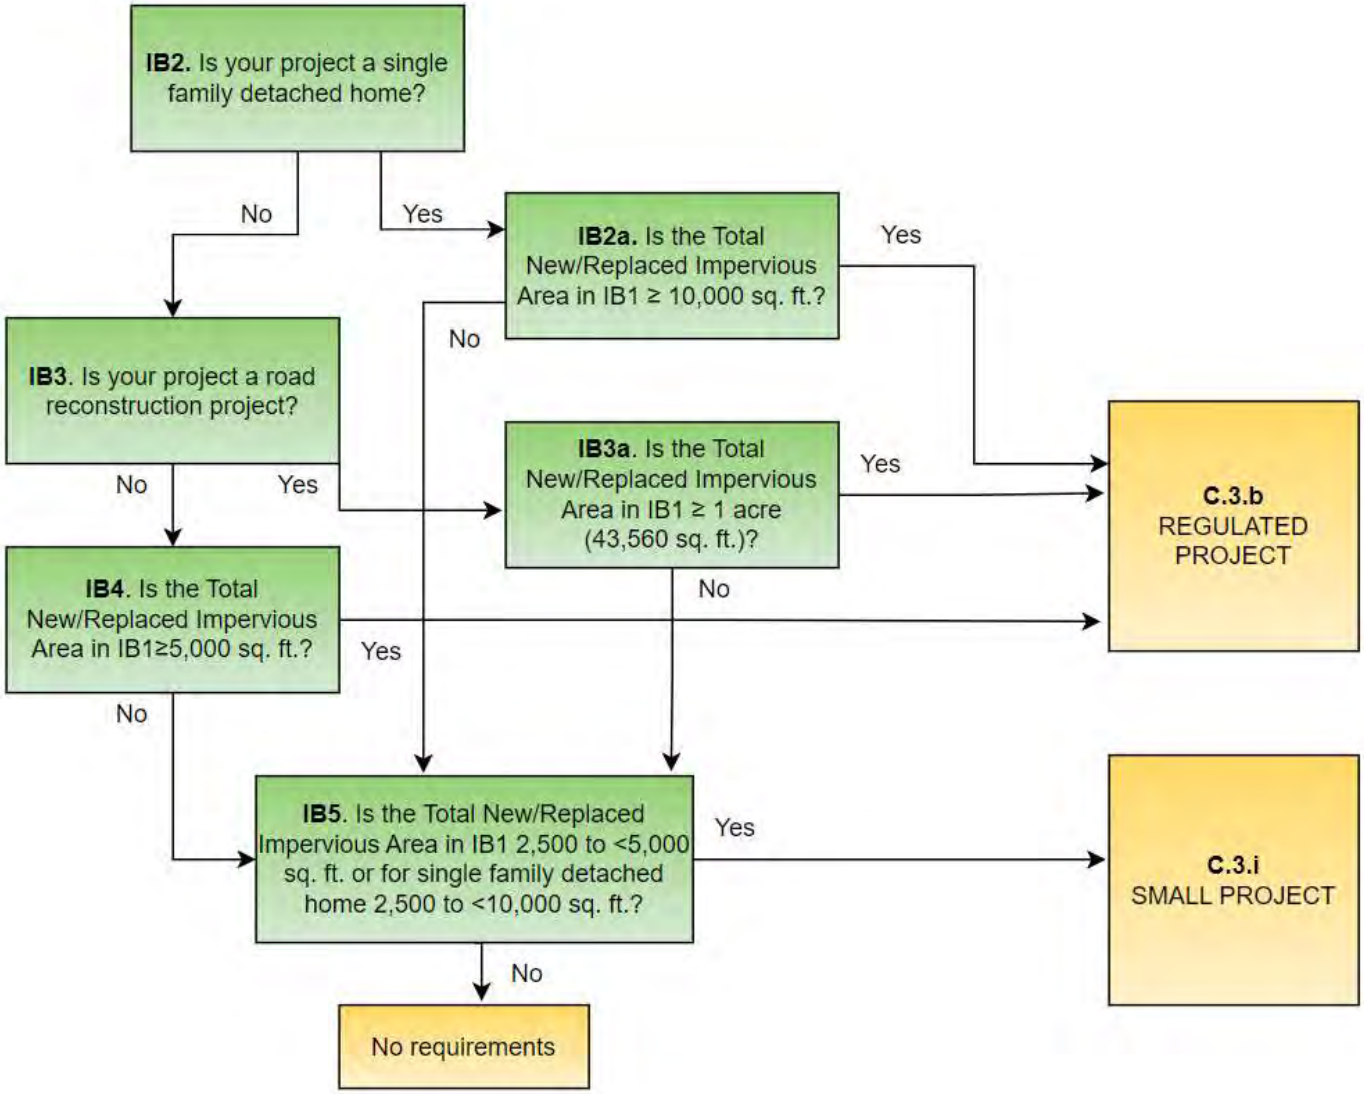
[1] Watershed is defined by the maps from the Alameda County Flood Control District at http://acfloodcontrol.org/resources/explore-watersheds
[2] As defined by MRP: creating, adding and/or replacing exterior existing impervious surface on a site where past development has occurred.
[3] A surface covering or pavement of a developed parcel of land that prevents the land's natural ability to absorb and infiltrate rainfall/stormwater.
[4] Replaced impervious area means any impervious area that is removed and replaced in kind or upgraded. See Chapter 2 of the *C.3 Technical Guidance.*
[5] Exclude green roofs.
[6] A gravel surface is an impervious surface, except when it is constructed as part of appropriately designed pervious pavement system.
[7] Uncovered parking includes top level of a parking structure unless drainage from the uncovered portion is connected to the sanitary sewer along with the covered portions of the parking structure.

Stormwater Requirements Checklist
Municipal Regional Stormwater Permit (MRP 3)
Stormwater Controls for Development Projects

Existing Impervious Area to remain in place	0	**NA**
Total New/Replaced Impervious Area *(sum columns b and c)*	10,661	

I.B. Is the project a "C.3 Regulated Project per MRP Provision C.3.b or a Small Project per MRP Provision C.3.i (cont'd)

	Yes	No	NA
I.B.2 Is your project a single family detached home? If Yes go to I.B.2.a; if NO go to I.B.3	☐	☑	☐
I.B.2.a Is the Total New/Replaced Impervious Area in I.B.1 ≥10,000 sq ft? If YES, your project is a C.3.b Regulated Project. (See I.D). If NO go to I.B.5.	☐	☐	☑
I.B.3 Is your project a road reconstruction project? If YES go to I.B.3.a; if NO go to I.B.4	☐	☑	☐
I.B.3.a Is the Total New/Replaced Impervious Area in I.B.1 ≥1 acre (43,560 sq ft)? If YES, your project is a C.3.b Regulated Project. (See I.D)	☐	☐	☑
I.B.4 Is the Total New/Replaced Impervious Area in I.B.1 ≥5,000 sq ft? If YES, your project is a C.3.b Regulated Project. If NO go to I.B.5	☑	☐	☐
I.B.5 Is the Total New/Replaced Impervious Area in I.B.1 2,500 to <5,000 sq ft or for single family detached home 2,500 to <10,000 sq ft? If Yes, your project is a C.3.i Small Project.	☐	☐	☑



Stormwater Requirements Checklist
Municipal Regional Stormwater Permit (MRP 3)
Stormwater Controls for Development Projects

I.C. Pervious Pavement Systems			
I.C.1 Will your project install 3,000 sq ft or more of pervious pavement systems (not including private-use patios at residences)? If **YES, stormwater treatment system inspection requirements (C.3.h) apply.** (Municipal staff – add this site to your list of sites needing a final inspection at the end of construction and on-going O&M inspections.)	☐	☑	☐
I.D. Projects not regulated by C.3 If your project is not regulated by C.3.b or C.3.i you are not subject to stormwater treatment requirements, however you are encouraged to incorporate site design and source control measures. The municipality may determine that source controls and site design measures are required for your project, if so, you must complete Section II and if required by the municipality, complete Sections III.A and III.B.			
I.E. C.3.i Small Projects If your project is regulated by C.3.i you are considered a "Small Project" and must implement site design (See III.A) and source control requirements (See III.B). You are not required to implement stormwater treatment requirements. You must complete Sections II, III.A, and III.B.			
I.F. C.3.b Regulated Projects If your project is a C.3.b regulated project, the project must include appropriate site design measures and source controls AND hydraulically-sized stormwater treatment measures. Hydromodification management may also be required. Complete Sections II, III, and V.			
II. Applicability C.6 Stormwater Requirements *All projects must complete Section II.*			
	Yes	No	
II.A Does the project disturb one acre or more of land? If YES you are required to obtain coverage under the State Construction Stormwater Permit, see https://www.waterboards.ca.gov/water_issues/programs/stormwater/construction.html. You must submit your WDID number and Stormwater Pollution Prevention Plan to the municipality before a building or grading permit will be issued. You do not need to complete Section IV.	☐	☑	
II.B Does the project disturb less than one acre of land? If NO, you are subject to MRP C.6 requirements. Complete Section IV to identify best management practices (BMPs) that will be in the erosion control plan and implemented during construction.	☑	☐	
II.C. Priority Inspection Factors	☐	☐	
II.C.1 Is the project 1 acre or more?	☐	☑	
II.C.2 Does the project require a grading permit?	☑	☐	
II.C.3 Is the project adjacent to a creek or waterway?	☐	☑	
II.C.4 Is the project in a municipally defined hillside development area or meet local hillside criteria?	☐	☑	
II.C.5 Does the project site have a slope of >15% and disturb ≥ 5,000 sq ft?	☐	☑	
II.C.6 Does the project involve demolition of a structure subject to the PCBs Building Demolition requirements? If yes the completion of the PCBs Building Material Demolition is required.	☐	☑	
(Municipal staff – refer projects answering YES to any questions in section II.C to construction site inspection staff to be added to their list of projects that require stormwater inspections at least monthly during the wet season (October 1 through April 30) and other times of the year as appropriate.)			

Stormwater Requirements Checklist
Municipal Regional Stormwater Permit (MRP 3)
Stormwater Controls for Development Projects

III. Implementation of C.3 Stormwater Requirements

C.3.b Regulated Projects must complete all of Section III.
C.3.i Small Projects must complete Sections III.A and III.B
Projects not regulated by C.3 must complete Sections III.A and III.B if directed by the municipality.

III.A Select Appropriate Site Design Measures

C.3.b Regulated Projects must implement appropriate and feasible site design measures.
C.3.i Small Projects must implement at least one of site design measures listed in items a-f.
Projects not regulated by C.3 are encouraged to implement appropriate site design measures and those directed by the municipality.

Site Design Measure	Plan Sheet #	Yes	No
a. Direct roof runoff into cisterns or rain barrels and use rainwater for irrigation or other non-potable use.		☐	☑
b. Direct roof runoff onto vegetated areas.		☑	☐
c. Direct runoff from sidewalks, walkways, and/or patios onto vegetated areas.		☐	☑
d. Direct runoff from driveways and/or uncovered parking lots onto vegetated areas.		☐	☑
e. Construct sidewalks, walkways, and/or patios with pervious pavement systems.[8]		☐	☑
f. Construct bike lanes, driveways, and/or uncovered parking lots with pervious pavement systems.[8]		☐	☑
g. Minimize land disturbance and impervious surface (especially parking lots).		☑	☐
h. Maximize permeability by clustering development and preserving open space.		☑	☐
i. Use micro-detention, including distributed landscape-based detention.		☐	☑
j. Protect sensitive areas, including wetland and riparian areas, and minimize changes to the natural topography.		☐	☑
k. Self-treating area (see Chapter 5 of the *C.3 Technical Guidance*)		☐	☑
l. Self-retaining area (see Chapter 5 of the *C.3 Technical Guidance*)		☐	☑

III.B Select Appropriate Source Control Measures

C.3.b Regulated Projects must select and implement appropriate source control measures.
C.3.i Small Projects and projects not regulated by C.3 are encouraged to select and implement appropriate source control measures and those directed by the municipality.

Features in the project?		Features requiring source controls	Source control measures (Refer to Local Source Control List for detailed requirements)	Measure included in project plans?		
Yes	No			Yes	NO	Plan Sheet #
☑	☐	Storm Drain	Mark on-site inlets with the words “No Dumping! Flows to Bay” or equivalent.	☑	☐	
☐	☐	Floor Drains	Plumb interior floor drains to sanitary sewer[9] [or prohibit].	☐	☐	
☐	☑	Parking garage	Plumb interior parking garage floor drains to sanitary sewer.[9]	☐	☐	
☑	☐	Landscaping	▪ Retain existing vegetation as practicable. ▪ Select diverse species appropriate to the site. Include plants that are pest- and/or disease-resistant, drought-tolerant, and/or attract beneficial insects. ▪ Minimize use of pesticides and quick-release fertilizers. ▪ Use efficient irrigation system; design to minimize runoff.	☐	☐	
☐	☑	Pool/Spa/ Fountain	Provide connection to the sanitary sewer to facilitate draining.[9]	☐	☐	
☐	☑	Food Service Equipment (non-residential)	Provide sink or other area for equipment cleaning, which is: ▪ Connected to a grease interceptor prior to sanitary sewer discharge.[9] ▪ Large enough for the largest mat or piece of equipment to be cleaned. ▪ Indoors or in an outdoor roofed area designed to prevent stormwater run-on and run-off and signed to require equipment washing in this area.	☐	☐	

[8] Use the specifications in the *C.3 Technical Guidance* or for small projects see the *BASMAA Pervious Paving Factsheet*. For these documents and others go to www.cleanwaterprogram.org and click on “Resources.”
[9] Any connection to the sanitary sewer system is subject to sanitary district approval.

Stormwater Requirements Checklist
Municipal Regional Stormwater Permit (MRP 3)
Stormwater Controls for Development Projects

Features in the project?		Features requiring source controls	Source control measures (Refer to Local Source Control List for detailed requirements)	Measure included in project plans?		
Yes	No			Yes	NO	Plan Sheet #
☑	☐	Refuse Areas	▪ Provide a roofed and enclosed area for dumpsters, recycling containers, etc., designed to prevent stormwater run-on and runoff. ▪ Connect any drains in or beneath dumpsters, compactors, and tallow bin areas serving food service facilities to the sanitary sewer.[9]	☐	☐	
☐	☑	Outdoor Process Activities [10]	Perform process activities either indoors or in roofed outdoor area, designed to prevent stormwater run-on and runoff, and to drain to the sanitary sewer.[9]	☐	☐	
☐	☑	Outdoor Equipment/ Materials Storage	▪ Cover the area or design to avoid pollutant contact with stormwater runoff. ▪ Locate area only on paved and contained areas. ▪ Roof storage areas that will contain non-hazardous liquids, drain to sanitary sewer[9], and contain by berms or similar.	☐	☐	
☐	☑	Vehicle/ Equipment Cleaning	▪ Roofed, pave and berm wash area to prevent stormwater run-on and runoff, plumb to the sanitary sewer,[9] and sign as a designated wash area. ▪ Commercial car wash facilities shall discharge to the sanitary sewer.[9]	☐	☐	
☐	☑	Vehicle/ Equipment Repair and Maintenance	▪ Designate repair/maintenance area indoors, or an outdoors area designed to prevent stormwater run-on and runoff and provide secondary containment. Do not install drains in the secondary containment areas. ▪ No floor drains unless pretreated prior to discharge to the sanitary sewer. [9] ▪ Connect containers or sinks used for parts cleaning to the sanitary sewer. [9]	☐	☐	
☐	☑	Fuel Dispensing Areas	▪ Fueling areas shall have impermeable surface that is a) minimally graded to prevent ponding and b) separated from the rest of the site by a grade break. ▪ Canopy shall extend at least 10 ft in each direction from each pump and drain away from fueling area.	☐	☐	
☐	☑	Loading Docks	▪ Cover and/or grade to minimize run-on to and runoff from the loading area. ▪ Position downspouts to direct stormwater away from the loading area. ▪ Drain water from loading dock areas to the sanitary sewer.[9] ▪ Install door skirts between the trailers and the building.	☐	☐	
☑	☐	Fire Sprinklers	Design for discharge of fire sprinkler test water to landscape or sanitary sewer.[9]	☐	☐	
☐	☑	Miscellaneous Drain or Wash Water	▪ Drain condensate of air conditioning units to landscaping. Large air conditioning units may connect to the sanitary sewer.[9] ▪ Roof drains shall drain to unpaved area where practicable. ▪ Drain boiler drain lines, roof top equipment, all wash water to sanitary sewer. [9]	☐	☐	
☐	☑	Architectural Copper	Discharge rinse water to sanitary sewer [9] or collect and dispose properly offsite. See flyer *Requirements for Architectural Copper*.	☐	☐	

[10] Businesses that may have outdoor process activities/equipment include machine shops, auto repair, industries with pretreatment facilities.

Stormwater Requirements Checklist
Municipal Regional Stormwater Permit (MRP 3)
Stormwater Controls for Development Projects

III.C Stormwater Treatment Measures

C.3.b Regulated Projects must select and implement stormwater treatment measures to manage the C.3.d numeric sizing criteria. Complete the applicable sections below.

Yes	No	
☐	☑	**III.C.1 Is the project a Special Project?** (See Appendix J of the *C.3 Technical Guidance* for Special Project criteria.) If YES, complete the Special Projects Worksheet and consult with municipal staff about the need to prepare a discussion of the feasibility and infeasibility of 100% LID treatment. Indicate the type of non-LID treatment to be used, the hydraulic sizing method*, and percentage of the amount of runoff specified in Provision C.3.d that is treated.

Non-LID Treatment	Hydraulic Sizing Method (See Note 1)	% of C.3. Amount of Runoff Treated
☐ Media filter		
☐ Tree well filter		

Yes	No	
☑	☐	**III.C.2 Is the project using biotreatment to treat the C.3.d amount of runoff?** (See the *C.3 Technical Guidance* for information on infiltration and rainwater harvesting[11] and use of stormwater.) If YES, indicate the biotreatment measures to be used, and the hydraulic sizing method:

Biotreatment Measures	Hydraulic sizing method (See Note 1)
☐ Bioretention area	
☑ Flow-through planter	Combination hydraulic sizing approach
☐ Other (specify):	

Note 1. Indicate which of the following Provision C.3.d.i hydraulic sizing methods were used:

1. Volume based approaches – Refer to Provision C.3.d.i.(1):
   1(a) Urban Runoff Quality Management approach, or
   1(b) 80% capture approach (recommended volume-based approach).

2. Flow-based approaches – Refer to Provision C.3.d.i.(2):
   2(a) 10% of 50-year peak flow approach,
   2(b) Percentile rainfall intensity approach, or
   2(c) 0.2-Inch-per-hour intensity approach (this is recommended flow-based approach AND the basis for the 4% rule of thumb described in Section 7.1 of the C.3 Technical Guidance).

3. Combination hydraulic sizing approach -- Refer to Provision C.3.d.i.(3):
   If a combination flow and volume design basis was used, indicate which flow-based and volume-based criteria were used.

III.D Hydromodification Management (HM) Requirements

C.3.b Regulated Projects must complete this section

	YES	NO
III.D.1 Does the project create and/or replace 1 acre (43,560 sq. ft.) or more of impervious area? If YES continue to item III.D.2. If NO, this project is not subject to the HM requirements.	☐	☑
III.D.2 Is the total impervious area increased from the pre-project condition? If YES continue to item III.D.3. If NO, this project is not subject to the HM requirements.	☐	☐
III.D.3 Is the site located in a tidally influenced/depositional area, or in the extreme eastern portion of the county that is not subject to HM requirements? (See HMP Susceptibility Map.) If NO continue to III.D.4. If YES the project is exempt from HM requirements. Attach map indicating project location. Skip to III.D.6 and check "NO".	☐	☐
III.D.4 Is the site located in a high slope zone or special consideration watershed, as shown on the HMP Susceptibility Map? If YES Project is subject to HM requirements. Attach map indicating project location. Skip to III.D.6 and check "YES.". If NO, continue to III.D.5.	☐	☐
III.D.5 For sites located in a white area on the HMP Susceptibility Map, has an engineer or qualified environmental professional determined that runoff from the project flows only through a hardened channel or enclosed pipe along its entire length before emptying into a waterway in the exempt area?	☐	☐

[11] The MRP no longer requires that a feasibility analysis of infiltration and rainwater harvesting be conducted. However, applicants using biotreatment are encouraged to maximize infiltration of stormwater if site conditions allow. If feasible and desired, infiltration and rainwater harvesting may be cost effective solutions depending on the project.

If YES, the project is exempt from HM requirements. Attach signed statement by qualified professional. Go to III.D.6 and check "NO." If NO, the project is subject to HM requirements. Attach map indicating project location. Go to Item G.6 and check "YES."	☐	☐

III.D.6 Is the project a Hydromodification Management Project?

☐ YES the project is subject to the *HM requirements in MRP Provision C.3.g.*

☑ NO, the project is not subject to the HM requirements.

- If the project is subject to the HM requirements, incorporate in the project flow duration stormwater control measures designed such that post-project stormwater discharge rates and durations match pre-project discharge rates and durations. The Bay Area Hydrology Model (BAHM) has been developed to size flow duration controls. See https://www.clearcreeksolutions.info/bahm-download-page. Guidance is provided the *C.3 Technical Guidance*.

IV. Implementation of C.6 Construction Phase Requirements

All projects must complete Section IV.

IV.A Select Appropriate Construction Phase BMPs[12]

BMP	Plan Sheet #	Yes	No
Attach the municipality's construction BMP plan sheet to project plans and require contractor to implement the applicable BMPs on the plan sheet.	C5.1	☑	☐
Implement temporary erosion controls to stabilize all disturbed areas until permanent erosion controls are established.		☑	☐
Delineate with field markers clearing limits, easements, setbacks, sensitive or critical areas, buffer zones, trees, and drainage courses.		☑	☐
Provide notes, specifications, or attachments describing: ▪ Construction, operation and maintenance of erosion and sediment controls, include inspection frequency; ▪ Methods and schedule for grading, excavation, filling, clearing of vegetation, and storage and disposal of excavated or cleared material; ▪ Specifications for vegetative cover and mulch, include methods and schedules for planting and fertilization; ▪ Provisions for temporary and/or permanent irrigation.		☑	☐
Perform clearing and earth moving activities only during dry weather.		☑	☐
Use sediment controls or filtration to remove sediment when dewatering and obtain all necessary permits.		☑	☐
Protect all storm drain inlets in vicinity of site using drop inlet protection		☑	☐
Trap sediment on-site, using BMPs such as sediment basins or traps, earthen dikes or berms, silt fences, check dams, erosion control blankets, covers for soil stock piles, etc.		☑	☐
Divert on-site runoff around disturbed areas and construction materials; divert off-site runoff around the site (e.g., swales and dikes).		☑	☐
Protect adjacent properties and undisturbed areas from construction impacts using vegetative buffer strips, sediment barriers or filters, dikes, mulching, or other measures as appropriate.		☑	☐
No cleaning, fueling, or maintaining vehicles on-site, except in a designated area where wash water is contained for proper management and spill controls are in place.		☑	☐
Store, handle, and dispose of construction materials/wastes properly to prevent contact with stormwater.		☑	☐
Contractor shall train and provide instruction to all employees/subcontractors re: construction BMPs.		☑	☐
Control and prevent the discharge of all potential pollutants, including pavement cutting wastes, paints, concrete, petroleum products, chemicals, wash water or sediments, rinse water from architectural copper, and non-stormwater discharges to storm drains and watercourses.		☑	☐

[12] Additional information on Construction Phase BMPs can be found is MRP Provision C.6 and the California Stormwater Quality Association's Construction BMP Handbook.

V. Stormwater Treatment Measure and/HM Control Owner or Operator's Information *C.3.b Regulated Projects must complete Section V.*	
Name	Nhan Nguyen Le
Address	2425 Channing Way Ste. B, PMB #820 Berkeley, CA 94705
Phone	916-224-3715
Email	nhan@valiancecap.com
➢ *Applicant must call for inspection and receive inspection within 45 days of installation of treatment measures and/or hydromodification management controls.*	
Name of Applicant Completing Form	Jeffrey Moore
Signature	Date	09/04/2024

VI. For Completion by Municipal Staff

(This section is only applicable for C.3.b Regulated Projects)

VI.1 Alternative Certification	**YES**	**NO**
Was the treatment system sizing and design reviewed by a qualified third-party professional that is not a member of the project team or agency staff?	☐	☐
Name of Reviewer:	☐	☐
VI.2 Confirm Operations and Maintenance (O&M) Submittal Complete for C.3.b Regulated Projects and HM Projects	☐	☐
VI.2.a Was the maintenance plan submitted?	☐	☐
VI.2.b Was the maintenance plan approved?	☐	☐
VI.2.c Was the maintenance agreement approved?	☐	☐

Date maintenance agreement was executed:	

VI.3 HM Controls (if required) Are the applicable items for HM compliance included in the plan submittal?			
Documentation for HM Compliance	**YES**	**NO**	**NA**
Site plans with pre- and post-project impervious surface areas, surface flow directions of entire site, locations of flow duration controls and site design measures per HM site design requirement	☐	☐	☐
Soils report or other site-specific document showing soil types at all parts of site	☐	☐	☐
If project uses the Bay Area Hydrology Model (BAHM), a list of model inputs.	☐	☐	☐
If project uses custom modeling, a summary of the modeling calculations with corresponding graph showing curve matching (existing, post-project, and post-project with HM controls curves), goodness of fit, and (allowable) low flow rate.	☐	☐	☐
If project uses the Impracticability Provision, a listing of all applicable costs and a brief description of the alternative HM project (name, location, date of start up, entity responsible for maintenance).	☐	☐	☐
If the project uses alternatives to the default BAHM approach or settings, a written description and rationale.	☐	☐	☐

- Municipal staff: Refer to the "Flow Duration Control Review Worksheet for HM Submittals" to review the documentation submitted for HM compliance.

THIS SIDE FOR STAFF USE ONLY

Completion of this Pre-Occupancy Reporting Form requires approval from Department of Planning and Development staff. Approval requires that the project owner shows substantial evidence of and/or inspections confirm compliance with the applicable TDM Measures. Approval requires that the project owner shows substantial evidence of, and/or inspections confirm, compliance with the applicable TDM Measures. Documentation that can be used to confirm compliance includes receipts, invoices, lease documents which include reference to offered TDM measures such as unbundled parking or transit passes, or affidavits (names can be redacted; unit numbers should be included).

Required	Measure	Compliance
	TDM Measure 1: Real-Time Transportation Information Monitors	
	TDM Measure 2: Transit Passes	
	TDM Measwure 3: Unbundled Parking	
	TDM Measure 4: Bicycle Parking	

Based on the above, this project is eligible to receive its first certificate of occupancy.

ATTESTATION FORM

BIRD SAFE BUILDING REQUIREMENTS

planning@berkeleyca.gov • Phone **(510) 981-7410,** TDD **(510) 981-7450**
Planning and Development, 1947 Center St, 2nd Floor, Berkeley, CA 94704

GENERAL INFORMATION

The City Council adopted new requirements for Bird Safe Buildings, effective July 27, 2023, to reduce bird mortality from collisions with windows and other transparent or reflective buildings or building features.

Bird Safe Requirements apply to *building permits* that include new or replaced windows or contain transparent or reflective materials.

MORE INFORMATION

Berkeley Municipal Code (BMC) Section 23.304.150

BIRD SAFE BUILDING REQUIREMENTS

All regulated transparent or reflective materials located between the ground and 75 feet above grade must meet Bird Safe Building requirements.

With the exception of exempt projects, any High-Risk Feature, as defined in BMC Section 23.304.150 shall meet Bird Safe Building Requirements, regardless of distance from grade.

X ❑ I acknowledge this requirement (or N/A) _____

BIRD SAFE BUILDING COMPLIANCE OPTION

Pursuant to BMC Section 23.304.150, any regulated transparent or reflective material must meet at least one of the following compliance options. Construction plans must provide confirmation of compliance with applicable requirements at the time of application for the building permit. Details on each compliance path can be found on *Bird Safe Building Requirements Information and Submittal Checklist:*

Option 1: American Bird Conservancy Threat Factor Rating of 30 or less;

Option 2: Patterned Glazing Treatment that meets the specifications included in BMC Section 23.304.150; or

Option 3: External Screen, Shutter or Shading Device permanently installed on the exterior of the building that meets the specifications included in BMC Section 23.304.150.

X ❑ I acknowledge these requirements (or N/A) _____

PRESERVATION ARCHITECTURE

August 21, 2023

2298 Durant Ave./2360 Ellsworth St., Berkeley
City of Berkeley Historical Evaluation

This historical and historic architectural evaluation addresses the 2 existing properties and buildings at the above addresses per the City of Berkeley's historical and cultural resource evaluation criteria. This overall effort has been based on the review of City of Berkeley permit records, U.S. census records (heritagequest.org), Oakland/Berkeley telephone directories (loc.org, sfpl.org, berkeleypubliclibrary.org), historic newspapers (@CDNC.org), Alameda County property records, along with general historical and architectural research.

The subject parcels at 2298 Durant Ave. (APN 55-1887-1) and 2360 Ellsworth St. (APN 55-1887-2) are located south of the U. C. Berkeley campus on the west side of Ellsworth St. between Durant Ave. and Channing Way (figs.1-3). The existing parcels house an office building at the southwest corner of Durant and Ellsworth, 2298 Durant, and an adjoining mid-block apartment building, 2360 Ellsworth (fig.4).

While side-by-side properties on separate parcels, the present evaluation request provides the opportunity to consider the 2 properties and their buildings together. Both subject buildings are, essentially, post WWII resources, though the 2298 Durant building was adapted from an earlier residence whereas 2360 Ellsworth was built at the end of the post-WWII period, in 1963. Together, they represent divergent designs: Durant essentially mid-century traditional, Ellsworth a boxy Modern apartment building.

As delineated below, per the City of Berkeley's *Landmarks Preservation Ordinance (LPO)*, the adjoined properties and buildings located at 2298 Durant Ave. and 2360 Ellsworth St. are not eligible for designation as a City of Berkeley Landmark or Structure of Merit.

Summary History

The 2 subject properties occupy the northeastern corner of original lot 4 of block 13 of the 1866 College Homestead Association tract (fig.5), which corner was depicted as vacant in the 1894 Sanborn map. By 1911, the next Sanborn map iteration (fig.6), the corner had been subdivided and where there was a 2-story dwelling directly at the corner (block 1887, lot 1), that address then 2350 Ellsworth; and a 2-story, 2-flat building next door at 2360 Ellsworth (block 1887, lot 2). By 1950, the corner building, its address by then 2298 Durant, was depicted as a mixed 1 and 2-story building occupied by doctors' offices; the adjacent 2-story building at 2360 Ellsworth was identified as housing 3 flats, its plan unchanged from its 1911 and 1929 depictions. No images of the former residential building at 2350 Ellsworth have been located. Permit records for the removal of the former 2360 Ellsworth building included a photo that confirms it was a plain, brown-shingled style, which is further confirmed in another available photo, dated 1955, and which also included a glimpse of the 2298 Durant office building (further discussed below).

2298 Durant Ave.
The early house at 2350 Ellsworth St. was erected c1900. No original records have been located, yet it was listed in the 1903 directory (no 1893-1902 directories available) under the name Calvin Esterly, who was last listed at 2350 Ellsworth in 1906. And 2350 Ellsworth was not listed in the 1900 census so is presumed for the present purposes to date to c1903. The 1907 to 1915 directories

446 17th Street #302 Oakland 94612
510 418 0285 mhulbert@earthlink.net

listed William A. Huddart at 2350 Ellsworth and where the 1920 census also listed William A., Frank H. and Margaret Huddart, so the Huddarts were the next 2350 Ellsworth residents from 1907-c1920 (no 1921 directory is available and the Huddarts were not listed in 1922). The 1920 census recorded that William was the elder, Frank and Margaret his son and daughter in law. Again per directories, a number of identifiable persons followed, including Mrs. P. Dixon (1936) and Mrs. P. Gessler (1940-1944). Both were evidently tenants, as were any other occupants in the period from 1920-1946, as the 1946 sale of the property was from Frank H. Huddart to Ellis Grant.

Prior to its adaptation to offices in 1946, the former residential building – at the time of its conversion presumably a rooming house, as the 1946 permit tellingly identified the then extant use as a “hotel” – had a wider south side yard that was partly infilled when the office building was expanded to the south in 1948.

Dr. Ellis Grant (1903-1974), who acquired the 2246/2298 Durant property and building in October 1945, was responsible for adapting the former residence to a medical building in 1946-48, the 1946 permit (#58617 under the address 2246 Durant) for “converting present hotel building into doctors’ offices,” the architect listed as J. K. Ballantine, Jr., the contractor Anderson-Haglund, Inc.; and for which project a completion notice was recorded in August 1946. A 1948 permit (#62586 under the address 2298 Durant) was for a 22.5 foot by 35.5 foot “extension,” the architect again Ballantine, the contractor for that project Harold L. Paige. That extension was at the south side of the building and was a single story.

The 1950 Sanborn map then depicted that medical office building. The last Sanborn map iteration, dated c1981, showed the building unchanged from its 1950 conditions (fig.7).

Various, mostly miscellaneous building permits followed for interior remodels. The one substantive permitted project was in 1991, when the second story was added at the south end of the building and, based on photographic evidence, the first floor windows at that end were changed to reflect the new addition above (fig.8). Whether more or all of the windows were then replaced is not known, though all windows visually match. The owners and architect of that 1991 addition were York Buresh & Kaplan and Michael Raven & Associates of Berkeley respectively. Though permit records for the rear fire escapes were undated, the fire escapes were then or shortly thereafter added.

The last permit records under the listed ownership of Dr. Grant Ellis were in 1966 and Ellis’s office was last listed at 2298 Durant in the 1968 directory. The next round of permit records was in 1984, first under the ownership of Durrell Associates and then York Buresh & Kaplan, the latter identified as owners on permits into the early 1990s. By 1995, permits listed the owner as the Amicus Group.

Based on this chronological information, it is understood that the medical office building use existed from 1946-1968 and the building was thereafter converted to law offices, which use remains.

At 2298 Durant, a part of its 2-story form and its entry door with Georgian portal and leaded window above may or may not be surviving elements of the original or early house. It is equally possible that the Colonial portal was added by its architect in the latter 1940s. In any event, there is no clear evidence of the former residence that was adapted, added to and thus subsumed by the subsequent office use. The 1955 photo of the building, cited above, was from the parking lot across Ellsworth and was specifically a photo of the large redwood tree that then stood in the southwest corner of the subject lot. That view clearly showed the former apartment building at 2460 Ellsworth. Given the

angle and the large tree, the southwest corner of the 2298 Durant building was mostly obscured yet revealed that that end of the building was then only 1 story and also indicated that the windows at that end of the building were subsequently replaced, as the 1955 windows and openings do not match those today. So that photo confirms the 1991 permit for a second story addition and when the previous openings and windows were likely changed, at least at the south end of the building yet possibly throughout.

2360 Ellsworth St.
The extant apartment building at 2360 Ellsworth was built in 1963 for property owner Cyril Stevenson (1896-1978), who had acquired the property in which he then resided in 1961 from Clarence A. and Lillian Harbaugh, Bakersfield residents. The Harbaughs had in turn acquired the property and its former building in 1951 from the estate of Sara Emma Manchester. Permit related correspondence also indicated that the Harbaughs leased the property to Stevenson from 1951-1961. No earlier deeds have at this juncture been located.

In addition to Stevenson, the 1963 building permit listed an engineer and a contractor, Hollis Black and James Construction Co., respectively, while the architect/designer permit line was left blank. Miscellaneous permits identify 2 subsequent 20th century owners: A. Lipnosky (1975-1978) and Karol Nawaroski/Uryga-Nawaroski Foundation (1992-1998). Permit records confirm that the evidently recent replacement of exterior stucco and windows was undertaken in 2017 for owners Cascade Capital, at which time it is presumed that the siding at the stair tower was also added. The only other substantive permit was for the replacement of the concrete stairs and the metal stair railing, which work was permitted in 1993 for Nawaroski.

Context
The context is a Berkeley south-side mix — churches, dormitories, apartment buildings, professional office buildings, parking garages and a number of former single-family residences. In the immediate setting, the mix includes a curious cluster of 5 professional office buildings of which 2298 Durant is 1, yet which was formerly adapted from residential to medical and more recently to law offices. The other 4 were purpose built and date from 1938-1948, this modern period of origin adding to their curiosity as each is a traditional brick Colonial style building. The coincidence of this cluster of professional office buildings is in part explained by a news account for the 2298 Durant project, wherein that project was reportedly enabled by City of Berkeley “legislation aiming to expedite erection of professional offices…” (“Four Medical Office Buildings Planned,” *Oakland Tribune*, 3 January 1946, though none of the other 4 adjacent office buildings were identified in that account). A further partial explanation is nearby (1 mile) Alta Bates Hospital, though 2 of the 5 were dental office buildings.

At least one of the other 4 buildings, 2235 Channing, was designed and built in 1948 by the same architect as the 2298 adaptive remodel, J. K. Ballantine, Jr., so it may be presumed that building was also expedited per city legislation. While none of those office building developers appear to have been in common, 3 of the 4 were built by Harold L. Paige, who was the contractor of the 1948 addition to 2298 Durant.

By contrast to other Berkeley localities where former and historical relational contexts have been obscured or obliterated by subsequent development patterns (for example, the formerly residential Telegraph Ave.), in this case the cluster of office buildings is in evidence — specifically the 4 brick

Colonial buildings of the directly adjacent properties. Though lacking brick, the 1946-48 remodel of 2298 Durant is likewise Colonial style, at least based on its entry portal.

Summary Descriptions (figs.4, 9-12)

2298 Durant Ave.
The property at 2298 Durant – a 90 foot (north-south) by 94 foot (east-west) lot at the northwest corner of Durant and Ellsworth – houses a 2-story office building in its eastern half, its western half a paved parking lot. The building walls are stucco clad, its hipped composition shingle roof with continuous overhanging wood eaves above a traditional, molded wood cornice. Despite its Durant address, the building front and its off-center front entry face east towards Ellsworth, where the entry is recessed into a reentrant corner where the north end of the building front steps back from the south end. The building plan conversely steps at the rear, with its southern part recessed from the north end. The entry way is atop a low, open porch with brick walls, steps and landing, its steps running parallel to the front and a lean iron guard-railing along its eastern edge. The wood entry door is surrounded by an ornamental wood portal of Georgian/American Colonial design style and which is the one definitive stylistic building feature. Above the entry door and portal is a leaded glass window at the second story. Steel sash windows are otherwise generous at each elevation. Near the south end of the back (west) elevation, a pair of egress doorways are stacked, the upper story served by a metal and concrete fire escape, the recessed doorway at the first floor served by raised concrete landing with steps to grade. A projecting, stucco finished chimney stands at the north wall – another semi-evident remnant of a former residence. Shallow grass yards and wall plantings lie along the building's east and north fronts, a narrow paved driveway to the south, the paved lot with a large redwood tree at its northwestern corner at the rear.

Architecturally, 2298 Durant is — like the several other American Colonial style medical-dental office buildings adjacent — out of place and time for mid-20th century buildings. Each, including 2298 Durant, suggests an older building, yet none are, Durant included. Though it was an older residence, the building was much changed over time and its traditional stylistic elements are actually limited. Nonetheless, a Colonial theme runs through these several buildings, perhaps due to their architect, as at least 2 were designed by Ballantine and the similarities suggest others may have been. Either way, given their time frame, the traditional design focus was way out of sync with the Modern period.

2360 Ellsworth St.
The mid-block 2360 Ellsworth parcel measures 35 feet wide by 94 feet deep and houses a 3 1/2-story (3 stories over garage) 7-unit apartment building that fills its site but for minimal setbacks all around. The garage structure is concrete, the 3-story building atop in 2 parts: a (presumed) wood frame stucco clad apartment building with vinyl windows and a flat roof and roofline; and a partly open stair tower that is part stucco clad, part cement board clad and with metal stairs and railings. That stair tower leads to open balcony corridors that span the north side and provide access to each apartment unit.

The 2360 Ellsworth apartment building is another of many 1960s apartment buildings in Berkeley, in particular in the near campus environs. Nothing about its present exterior suggests that this was a building of any architectural intension, in fact there was no architect involved as it was credited to an engineer, Hollis Black. The exterior of this building has also been replaced in recent years, its stripped down character seemingly all the more pronounced.

Architect, Engineer and Builders

The architect for the 1946 adaptation/alteration and the 1948 addition to 2298 Durant was John Knox Ballantine, Jr. (1893-1969), a Berkeley architect. Based on general architectural research, a handful of Ballantine's Berkeley projects include the 1946-48 remodel and addition at 2298 Durant; 2 c1924 houses at 1512 and 1514 La Loma Ave., 1 the Ballantine residence (1512 La Loma) and both built in the wake of the 1923 Berkeley Fire and, consequently, of concrete block construction; and the 1948 dental office building at 2235 Channing Way, a brick Colonial.

No architect was utilized for the design of the 1963 apartment building at 2360 Ellsworth – the permit listed an engineer, Hollis Black, Jr., who was then listed as a civil engineer at 1836 University Ave. in Berkeley. At this juncture, 1 other identifiable project on which Hollis Black was listed as the engineer was the Tioga Building at 2020 Milvia St. (1954, Edwin J. Schruers architect).

The several construction contractors for these 2 buildings were Anderson-Haglund Inc. (1946 adaptive remodel of 2298 Durant), Harold L. Paige (1948 addition to 2298 Durant), and James Construction Co. (1963 construction of 2360 Ellsworth).

Evaluation

The subject property and buildings have not been previously considered or evaluated for historical potential.

Based on Berkeley's *LPO* criteria (from sec.*3.24.110 Landmarks, historic districts and structures of merit--Designation--Criteria for consideration*), this effort concludes with a Berkeley Landmark/Structure of Merit evaluation, first under the Landmarks criteria followed by Structure of Merit criteria.

Under the LPO's Landmark criteria, the properties and buildings at 2298 Durant and 2360 Ellsworth streets:

- Are not a "first, last, only or most significant architectural property of their type in the region," as the subject buildings are an office building (converted from a residential building yet which has no evident remains) and an apartment building, both dating to the mid-20th century, numbers of which building types remain. Architecturally, neither building has any potential architectural significance as the Durant office building is a stylistic anomaly for its period of origin while the Ellsworth apartment building is without evident architectural design intention and has been substantially altered (LPO Section A.1.a).
- Are not prototypical or outstanding nor is either the work of an identified or potential master builder. The 2298 Durant Ave. architect, J. K. Ballantine, Jr., has a small number of identifiable projects yet relative to which the 1946-48 alterations and additions are not notable or best examples (LPO Section A.1.b).
- Are not architecturally worthy of preservation for any potential value as part of the neighborhood fabric (LPO Section A.1.c).

  A pair of buildings within the mix of uses and buildings in its immediate vicinity, these 2 buildings have no potential exceptional values to offer to the neighborhood fabric.

  The 2298 Durant building was 1 of 5 professional office buildings constructed in the pre-and-post-WWII era in the immediate local, 2 of which were dental offices the other 3, including the

subject building, medical offices. Such medical buildings, of which there were and are dozens in the vicinity, were constructed in the context of the postwar expansion of the nearby Alta Bates Hospital, yet to which the subject and neighboring medical office buildings were indirectly related.

- Are not associated with the movement or evolution of religious, cultural, governmental, social or economic developments of the City (LPO Section A.2).

  As noted, the 2298 Durant building was 1 of a range of professional office buildings constructed in the vicinity while the 2360 Ellsworth apartment building is 1 of a large number in the vicinity. In the post-WWII period and context, there are no associated events or patterns of any identifiable historic importance. Rather, 2360 Ellsworth belongs to a general pattern of early-mid 20th century Berkeley development – more specifically, the concentrated development of off-campus apartment buildings throughout the neighborhoods adjoining the UC Berkeley campus – in the context of which this parcel and its modest apartment building is without importance.
- Are not worth preserving for usefulness as an educational force (LPO Section A.3).
- Do not embody or express the history of Berkeley/Alameda County/California/United States (LPO Section A.4).
- Are not listed on the National Register (LPO Section A.5).

Further, under Structure of Merit criteria, the subject property and buildings:

- Are not contemporary with a designated landmark within the neighborhood (LPO Section B.2.a1). In the context of which, the nearest landmarks include the Berkeley City Club (Morgan, 1929-30); Edwards Stadium (Perry & Jory, 1932); Odd Fellows' Temple (Plachek, 1930); and Howard Auto Co. (Reimers, 1930). Each are directly related to one another by age yet do not relate to the subject buildings. Nearby residential landmarks are the McCreary/Greer House (1901) and the Marsh House (Mau, 1901), both on Durant Ave., along with the Bancroft Apartments (Ratcliff, 1913) and Cambridge Apartments (Ratcliff, 1914), none of which are related to the Durant or Ellsworth buildings. Therefore, the subject buildings have no historical or historic architectural associations to or compatibility with any identified historic resources in the direct vicinity.
- Are not contemporary with an historic period or event of significance to the city or to this neighborhood, block, street frontage, or group of buildings (LPO Section B.2.a2), as the WWII urban development period constitutes a broad historic context, not an identified historic period. Neither do the subject buildings constitute a potential event of importance relative to the neighborhood, block, street frontage, or group of buildings
- As noted above, are not compatible in size, scale, style, materials or design with any nearby Berkeley Landmarks (LPO Section B.2b).
- Are not a good example of architectural design (LPO Section B.2c), as the traditionally styled Durant building is an anomaly for its modern period of development while the Ellsworth apartment building is highly modest as well as an altered example of its modern period.
- Are not historically significant to the character of their block and street frontage (LPO Section B.2d).

In conclusion, the 2 properties and buildings at 2298 Durant and 2360 Ellsworth streets in Berkeley are not eligible either as City of Berkeley Landmarks or Structures of Merit.

Signed:

Mark Hulbert

***P3a. Description:**
The property at 2298 Durant – a 90 foot (north-south) by 94 foot (east-west) lot at the northwest corner of Durant and Ellsworth – houses a 2-story office (formerly residential) building in its eastern half, its western half a paved parking lot. The building walls are stucco clad, its hipped composition shingle roof with continuous overhanging wood eaves above a traditional, molded wood cornice. Despite its Durant address, the building front and its off-center front entry face east towards Ellsworth, where the entry is recessed into a reentrant corner where the north end of the building front steps back from the south end. The building plan conversely steps at the rear, with its southern part recessed from the north end. The entry way is atop a low, open porch with brick walls, steps and landing, its steps running parallel to the front and a lean iron guard-railing along its eastern edge. (cont on p3)

CONTINUATION SHEET

Property Name: 2298 Durant Ave., Berkeley
Page 3 of 6

Description (cont. from p1)

The wood entry door is surrounded by an ornamental wood portal of Georgian/American Colonial design style and which is the one definitive stylistic building feature. Above the entry door and portal is a leaded glass window at the second story. Steel sash windows are otherwise generous at each elevation. Near the south end of the back (west) elevation, a pair of egress doorways are stacked, the upper story served by a metal and concrete fire escape, the recessed doorway at the first floor served by raised concrete landing with steps to grade. A projecting, stucco finished chimney stands at the north wall. A brick path leads from the Durant sidewalk to the entrance. Shallow grass yards and wall plantings otherwise lie along the building's east and north fronts, a narrow paved driveway to the south, the paved lot with a large redwood tree at its northwestern corner at the rear.

Figs.3-4 – 2298 Durant Ave. – North side (at left) and rear (west)

Construction History (cont. from p2)

The early house at 2350 Ellsworth St. was erected c1900. No original records have been located, yet it was listed in the 1903 directory (no 1893-1902 directories available) under the name Calvin Esterly, who was last listed at 2350 Ellsworth in 1906. And 2350 Ellsworth was not listed in the 1900 census so is presumed for the present purposes to date to c1903. The 1907 to 1915 directories listed William A. Huddart at 2350 Ellsworth and where the 1920 census also listed William A., Frank H. and Margaret Huddart, so the Huddarts were the next 2350 Ellsworth residents from 1907-c1920 (no 1921 directory is available and the Huddarts were not listed in 1922). The 1920 census recorded that William was the elder, Frank and Margaret his son and daughter in law. Again per directories, a number of identifiable persons followed, including Mrs. P. Dixon (1936) and Mrs. P. Gessler (1940-1944). Both were evidently tenants, as were any other occupants in the period from 1920-1946, as the 1946 sale of the property was from Frank H. Huddart to Ellis Grant. (cont. on p4)

Construction History (cont. from p3)

Dr. Ellis Grant (1903-1974), who acquired the 2246/2298 Durant property and building in October 1945, was responsible for adapting the former residential building to a medical building in 1946-48, the 1946 permit (#58617 under the address 2246 Durant) for "converting present hotel building into doctors' offices," the architect listed as J. K. Ballantine, Jr., the contractor Anderson-Haglund, Inc.; and for which project a completion notice was recorded in August 1946. A 1948 permit (#62586 under the address 2298 Durant) was for a 22.5 foot by 35.5 foot "extension," the architect again Ballantine, the contractor for that project Harold L. Paige. That extension was at the south side of the building and was a single story.

The 1950 Sanborn map then depicted that medical office building. The last Sanborn map iteration, dated c1981 (fig.2), showed the building unchanged from its 1950 conditions.

Various, mostly miscellaneous building permits followed for interior remodels. The one substantive permitted project was in 1991, when the second story was added at the south end of the building and, based on photographic evidence, the first floor windows at that end were changed to reflect the new addition above. Whether more or all of the windows were then replaced is not known, though all windows visually match. The owners and architect of that 1991 addition were York Buresh & Kaplan and Michael Raven & Associates of Berkeley respectively. Though permit records for the rear fire escapes were undated, the fire escapes were then or shortly thereafter added.

The last permit records under the listed ownership of Grant Ellis were in 1966 and Ellis's office was last listed at 2298 Durant in the 1968 directory. The next round of permit records was in 1984, first under the ownership name of Durrell Associates and then York Buresh & Kaplan, the latter identified as owners on permits into the early 1990s. By 1995, permits listed the owner as the Amicus Group.

Based on this chronological information, it is understood that the medical office building use existed from 1946-1968 and the building was thereafter converted to law offices, which use remains.

2298 Durant's entry door with Georgian/Colonial portal and leaded window above may or may not be surviving elements of the original or early residential building. It is equally possible that the ornamental portal was added by its architect in the latter 1940s. In any event, there is no clear evidence of the former residence that was adapted, added to and thus subsumed by the subsequent office use. The 1955 photo of the building, cited above, was from the parking lot across Ellsworth and was specifically a photo of the large redwood tree that then stood in the southwest corner of the subject lot. Given the angle and the large tree, the southwest corner of the 2298 Durant building was mostly obscured yet revealed that that end of the building was then only 1 story and also indicated that the windows at that end of the building were subsequently replaced, as the 1955 windows and openings do not match those today. So that photo confirms the 1991 permit for a second story addition and when the previous openings and windows were likely changed, at least at the south end of the building.

Architect/Builder

The architect for the 1946 adaptation/alteration and the 1948 addition to 2298 Durant was John Knox Ballantine, Jr. (1893-1969), a Berkeley architect. Based on general architectural research, Ballantine's Berkeley projects include the 1946-48 remodel and addition at 2298 Durant; 2 c1924 houses at 1512 and 1514 La Loma Ave., 1 the Ballantine residence (1512 La Loma) and both built in the wake of the 1923 Berkeley Fire and, consequently, of concrete block construction; and the 1948 dental office building at 2235 Channing Way, a brick Colonial.

The construction contractors were Anderson-Haglund Inc. (1946 adaptive remodel) and Harold L. Paige (1948 addition).

Significance (cont. from p2)

Context

The context is a Berkeley south-side mix — churches, dormitories, apartment buildings, professional office buildings, parking garages and a number of former single-family residences. In the immediate setting, the mix includes a curious cluster of 5 professional office buildings of which 2298 Durant is 1 (yet which was formerly adapted from residential to medical and more recently to law offices). The other 4 were purpose built and date from 1938-1948, this modern period of origin adding to their curiosity as each is a traditional brick Colonial style building. The coincidence of this cluster of professional office buildings is in part explained by a news account for the 2298 Durant project, wherein that project was reportedly enabled by City of Berkeley "legislation aiming to expedite erection of professional offices…" ("Four Medical Office Buildings Planned," *Oakland Tribune*, 3 January 1946, though none of the other 4 adjacent office buildings were identified in that account). A further partial explanation is nearby (within approx. 1 mile) Alta Bates Hospital, though 2 of the 5 were dental office buildings.

At least one of the other 4 buildings, 2235 Channing, was designed and built in 1948 by the same architect as the 2298 adaptive remodel, J. K. Ballantine, Jr., so it may be presumed that building was also expedited per city legislation. While none of those office building developers appear to have been in common, 3 of the 4 were built by Harold L. Paige, who was the contractor of the 1948 addition to 2298 Durant.

Architecturally, 2298 Durant is — like the several other American Colonial style medical-dental office buildings adjacent — out of place and time for mid-20th century buildings. Each, including 2298 Durant, suggests an older building, yet none are, Durant included. Though it was an older residence, the building was much changed over time and its traditional stylistic elements are actually limited. Nonetheless, a Colonial theme runs through these several buildings, perhaps due to their architect, as at least 2 were designed by Ballantine and the similarities suggest others may have been. Either way, given their time frame, the traditional design focus was way out of sync with the Modern period.

Evaluation

Based on the above information and as per California Register of Historical Resources evaluation criteria:

Criterion 1 – There is no evidence of any events of any historic importance associated with this property or building. Originally a c1903 residence in a residential setting, that former building was, by the 1940s, a rooming house that was adapted, altered and added to for professional offices in the latter 1940s.

The 2298 Durant building was 1 of 5 professional office buildings constructed in the pre-and-post-WWII era in the immediate local, 2 of which were dental offices the other 3, including the subject building, medical offices. Such medical buildings, of which there were and are dozens in the vicinity, were constructed in the context of the WWII era expansion of the nearby Alta Bates Hospital, yet to which the subject and neighboring medical office buildings were indirectly related.

The subject building's early 20th century residential setting and character are not in evidence. In its applicable 1940s development context, there are no generally or specifically associated events of historic importance. Therefore, 2298 Durant Ave. does not meet *CR criterion 1.* (cont. on p6)

Criterion 2 – The individual primarily associated with the subject office building, Dr. Ellis Grant, has no identified or identifiable historic importance. While several owners and occupants were subsequently associated, any such persons lack association with the subject buildings' design and construction, nor is there any evidence of any directly associated persons of importance relative to this property. Consequently, the subject property and its building do not meet *CR criterion 2.* (cont.on p6)

Significance (cont. from p5)

Criterion 3 – In terms of potential design and construction importance, the subject building is an office building (converted from a residential building yet which has no evident remains) dating to the mid-20th century. Architecturally, the 2298 Durant office building is a stylistic anomaly for its modern period of origin. Its architect, J. K. Ballantine, Jr., for whom there are a small number of identifiable projects, is also of no identifiable historical importance, nor are either of the associated builders (Anderson-Haglund; Paige). In addition, the extant property and building are without any artistic associations. Therefore, there is no identifiable significance under *CR criterion 3*. (cont. on p6)

Criterion 4 – Relative to potential historic architectural resources, the subject property has not yielded and at this juncture, beyond the contents of this record, does not appear to have any potential to yield additional information of any historical importance, so does not meet *CR criterion 4.*

Conclusion

In conclusion, the extant property and building at 2298 Durant Ave. in Berkeley lack any potential historical significance per the California Register criteria.

B2. Common Name: 2360 Ellsworth St.
B3. Original Use: Multi-family residential B4. Present Use: same
***B5. Architectural Style:** Modern
***B6. Construction History:**
The extant apartment building at 2360 Ellsworth was built in 1963 for property owner Cyril Stevenson (1896-1978), who had acquired the property in which he then resided in 1961 from Clarence A. and Lillian Harbaugh, Bakersfield residents. The Harbaughs had in turn acquired the property and its former building in 1951 from the estate of Sara Emma Manchester. No earlier deeds have at this juncture been located. In addition to Stevenson, the 1963 building permit listed an engineer and a contractor, Hollis Black and James Construction Co., respectively, while the architect/designer permit line was left blank. Miscellaneous permits identify 2 subsequent 20th century owners: A. Lipnosky (1975-1978) and Karol Nawaroski/Uryga-Nawaroski Foundation (1992-1998). Permit records confirm that the evidently recent replacement of exterior stucco and windows was undertaken in 2017 for owner Cascade Capital, at which time it is presumed that the board siding at the stair tower was also added. The only other substantive permit was for the replacement of the concrete stairs and the metal stair railing, which work was permitted in 1993 for Nawaroski.

(Sketch Map with north arrow required.)

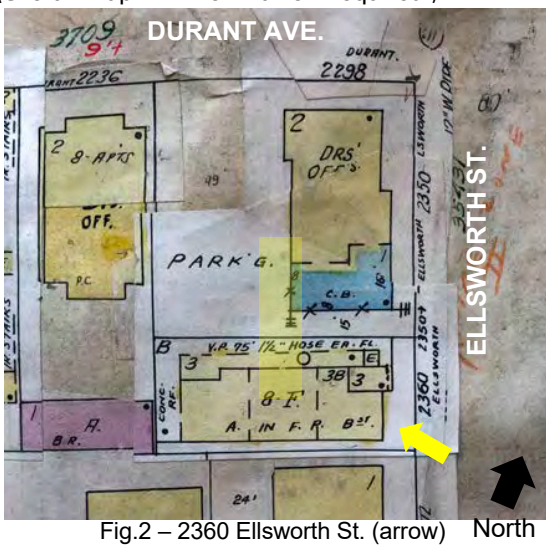

Fig.2 – 2360 Ellsworth St. (arrow)

Description (cont. from p1)

The 2360 Ellsworth apartment building is another of many c1960s apartment buildings in Berkeley, in particular in the near campus environs. Nothing about its present exterior suggests that this was a building of any architectural intension, in fact there was no architect involved as it was credited to an engineer, Hollis Black. The exterior of this building has also been replaced in recent years, its stripped-down. boxy character seemingly all the more pronounced.

Fig.3 – 2360 Ellsworth St. – Part view of south side from Durant Ave.

Construction History (cont. from p2):

Associated Persons

The developer of the 2360 Ellsworth St. apartment building was Cyril Stevenson, a local realtor.

Engineer

No architect was utilized for the design of the 1963 apartment building at 2360 Ellsworth – the permit listed an engineer, Hollis Black, Jr., who was then listed as a civil engineer at 1836 University Ave. in Berkeley. At this juncture, 1 other project on which Hollis Black was listed as the engineer was the Tioga Building at 2020 Milvia St. (1954, Edwin J. Schruers architect).

Significance (cont. from p2)

Evaluation

Based on the above information and as per California Register of Historical Resources evaluation criteria:

Criterion 1 – There is no evidence of any events of any historic importance associated with this property or apartment building. In its 1960s Berkeley development context – more specifically, the concentrated development of off-campus apartment buildings throughout the neighborhoods surrounding the UC Berkeley campus – there are no generally or specifically associated events of historic importance.

Criterion 2 – No persons of identified historic importance were associated with the origins of the subject apartment building.

Criterion 3 – 2360 Ellsworth St. houses an indistinct 1963 apartment building of basic and economical construction as well as simplistic Modern design and the exterior of which has been substantively altered. Lacking distinction, such architecture has no potential historic importance. No architect was involved in its design and its engineer, Hollis Black and builder, James Construction Co., are also of no identifiable importance. Additionally, the extant property and building are without any artistic associations. Therefore, there is no identifiable significance under criterion 3.

Criterion 4 – Relative to potential historic architectural resources, the subject property has not yielded and at this juncture, beyond the contents of this record, does not appear to have any potential to yield additional information of any historical importance.

Conclusion

In conclusion, the existing multi-residential property and building at 2360 Ellsworth St. in Berkeley lacks any potential historical significance per the California Register criteria.

Re: Application Status Incomplete No. 1– Zoning Permit #ZP2024-0126 for 2298 Durant Avenue and 2360 Ellsworth Street

Dear Austin Springer,

Thank you for the Zoning Permit application submittal received on September 5, 2024, for a Use Permit to demolish a commercial building, a residential building with seven dwelling units, and associated parking; merge two lots; and build an eight-story (91 feet-6 inches), 79,522 square-foot residential building, with 65 units (5 Very-Low Income units), utilizing a State Density Bonus. The application has been evaluated for completeness with the submittal checklist and application guidelines.

Required Zoning Permits

Based on my review, the following zoning permits are required:

1. Use Permit - BMC Section 23.326.020(B) to demolish dwelling units.
2. Use Permit - BMC Section 23.326.030(A)(3) to eliminate dwelling units through demolition.
3. Use Permit - BMC Section 23.326.070(A) to demolish a non-residential building.
4. Use Permit - BMC Section 23.202.020(A) to add a multi-family use.
5. Administrative Use Permit - BMC Section 23.304.050(A) to add architectural elements that exceed the height limit.
6. Density Bonus with the following requested reductions, waivers, and concessions:

   Waivers. The application requests four waivers to reduce the following development standards:

Development Standard	Requirement	Proposed
Useable Open Space (BMC Section 23.304.090(A))	3,181 square feet	2,146 square feet
Height (BMC Section 23.202.140(E)(1) and 23.304.050(C))	85 feet, plus 5-foot parapet	91 feet 6 inches
Long-Term Bicycle Parking (BMC Section 23.322.0690(A)(2))	80 spaces	0 spaces
Permit required to remove trees in public right of way (BMC Section 12.44.020)	City will review the permit application	Remove camphor tree on Durant Avenue

Concessions. The application requests three concessions.

1. Labor apprenticeship requirement (BMC Section 13.107.040)
2. Healthcare coverage for construction workers (BMC Section 13.107.050)
3. Prevailing wage for construction workers (BMC Section 13.108.030)

Pursuant to the Permit Streamlining Act (Government Code Chapter 4.5 Title 7), the application has been deemed incomplete as of October 4, 2024. Please prepare and resubmit the following required information, as described in the Zoning Project Application Submittal Requirements:

1. Transportation Demand Management and Bicycle Parking Supplemental Application (3G): Complete and sign the form (see page 10 of the Submittal Requirements).
2. Public Art Allocation (3I): Submit a completed form (see page 10 of the Submittal Requirements).
3. Bird Safe Requirements (3J): Provide a completed Attestation Form (see page 10 of the Submittal Requirements).
4. Historic Resource Evaluation (4B): Provide Historic Resource Evaluations, as described on page 11 of the Submittal Requirements.
5. Phase 1 (4D): Since the project is in the Environmental Management Area, provide a Phase 1, as described on page 12 of the Submittal Requirements.
6. Stormwater Requirements (4G): Complete the applicable checklist (see page 12 of the Submittal Requirements).
7. Affordable Housing Compliance Plan (5A): Submit a plan (see page 13 of the Submittal Requirements).
8. Anti-Discrimination Housing Policies (5B): Provide a written statement that answers the questions on page 13 of the Submittal Requirements.
9. Payment of Application Fees**:** The initial invoices for your project, are attached. There are two options for payment: electronically through the Berkeley's Online Permit Portal, or at the Permit Service Center during normal business hours, Monday – Thursday (cashier closed 12:30-1:30pm).

Advisory comments – Application Processing Review

During the course of review, the project planner may request that the applicant correct, clarify, amplify, or otherwise supplement the details provided in the application according to the Zoning Project Application Submittal Requirements. This may result in revisions to the information provided with your submittal, additional fees for zoning permits, CEQA review costs, and other processes/reviews, as needed based on the City's adopted fee schedule.

Next Steps

Please submit responses to **all** requested items at once, and not incrementally, and pay the attached initial invoice. Please be aware that under SB330 (Government Code Section 65941.1(a)(d)(2)), the applicant must submit the information in this incomplete letter within 90 days of the date of this letter. If the applicant does not submit this information within the 90 days period (January 2, 2025), then the preliminary application shall expire and have no further force or effect. Please use this BOX link for your

project and email me when you've uploaded. Once revised information is submitted, staff will review for application completeness within 30 days.

If you have any questions about the requested information, please reach out to me directly. Thank you in advance for your cooperation.

Sincerely,

Allison Riemer, AICP

PHASE I ENVIRONMENTAL SITE ASSESSMENT REPORT

2298 Durant Avenue
Berkeley, California 94704

Report Date
June 29, 2023

Partner Project No.
23-410652.1

Prepared for:
Valiance Capital
2425 Channing Way
Berkeley, California 94704

PARTNER

June 29, 2023

Mr. Lucas Butler
Valiance Capital
2425 Channing Way
Berkeley, California 94704

Subject: Phase I Environmental Site Assessment
2298 Durant Avenue
Berkeley, California 94704
Partner Project No. 23-410652.1

Dear Mr. Butler:

Partner Engineering and Science, Inc. (Partner) is pleased to provide this Phase I Environmental Site Assessment (Phase I ESA) report of the abovementioned address (the "subject property"). This assessment was performed in conformance with the scope and limitations as detailed in the ASTM Practice E1527-21 Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process and Client Agreement.

This assessment included a site reconnaissance as well as research and interviews with representatives of the public, property ownership, site manager, and regulatory agencies. An assessment was made, conclusions stated, and recommendations outlined.

We appreciate your trust in Partner and the opportunity to provide environmental services to you. If you have any questions concerning this report, or if we can assist you in any other matter, please contact me at (415) 992-3755

Sincerely,

Jay Grenfell
National Client Manager

EXECUTIVE SUMMARY

Partner Engineering and Science, Inc. (Partner) has performed a Phase I Environmental Site Assessment (ESA) in accordance with the scope of work and limitations of ASTM Practice E1527-21, the Environmental Protection Agency Standards and Practices for All Appropriate Inquiries (AAI) (40 CFR Part 312) and set forth by Valiance Capital for the property located at 2298 Durant Avenue in Berkeley, Alameda, California (the "subject property"). The Phase I Environmental Site Assessment is designed to provide Valiance Capital with an assessment concerning environmental conditions (limited to those issues identified in the report) as they exist at the subject property.

Property Description

The subject property is located on the southwest corner of the Ellsworth Street and Durant Avenue intersection within a residential and commercial area of Alameda. Please refer to the table below for a further description of the subject property:

Subject Property Data	
Address(es):	2298 Durant Avenue, Berkeley, California
Historical Address(es):	2246 Durant Avenue, 2350 Ellsworth Street
Property Use:	Office
Land Acreage (Ac):	0.2 Ac
Number of Buildings:	One
Number of Floors:	Two-story with a mezzanine level, a basement, and two separate crawl spaces
Gross Building Area (SF):	5,004 SF
Net Rentable Area (SF):	5,004 SF
Date of Construction:	1940
Parcel Number:	55-1887-1
Type of Construction:	Wood-framed
Current Tenants:	Beckman Feller & Chang P.C. for a law office
Site Assessment Performed By:	William Mitchell of Partner
Site Assessment Conducted On:	June 26, 2023
Regulatory Radius Report Date:	June 15, 2023
Lien Search Date:	N/A
Report Date:	June 27, 2023
FOIAs Date:	June 2023

The subject property is currently occupied by Beckman Feller & Chang P.C. for a law office Onsite operations consist of commercial office use. In addition to the current structure, the subject property is also improved with asphalt-paved parking areas and associated landscaping.

According to available historical sources, the subject property was formerly undeveloped as early as 1890 and up to 1894. A house appears to have occupied the subject property from 1895 to 1939. The existing commercial building was developed in 1940. The subject property was occupied by various offices from 1940 through the present. Tenants on the subject property have included residential listings at 2350 Ellsworth Street (1939); residential listings at 2298 Durant Avenue (1943); medical/dental occupants (1950-1975); Investment Associates (1985), attorney occupants (1987-2022)

The adjoining properties are tabulated below:

Adjoining Properties	
North:	Durant Avenue followed by: The Legends Aquatic Center (2214 Bancroft Way; and An apartment building (2241 Durant Avenue)
Northeast:	The intersection of Durant Avenue and Ellsworth Street followed by: An apartment building (2301 Durant Avenue)
East:	Ellsworth Street followed by: A dental office (2300 Durant Avenue)
South:	An apartment building (2360 Ellsworth Avenue)
West:	An apartment building (2236 Durant Avenue)

According to and a previous subsurface investigation conducted on a nearby property and topographic map interpretation, the physical setting features of the subject property identify the terrain as sloping to the south with the depth to groundwater in the vicinity of the subject property inferred to be approximately 23 to 28 feet below ground surface (bgs) and groundwater flow inferred to be toward the south.

Findings and Opinions

Recognized Environmental Condition

A recognized environmental condition (REC) refers to the presence of hazardous substances or petroleum products in, on, or at the subject property due to a release to the environment; the likely presence of hazardous substances or petroleum products in, on, or at the subject property due to a release or likely release to the environment; or the presence of hazardous substances or petroleum products in, on, or at the subject property under conditions that pose a material threat of a future release to the environment.

- Partner did not identify any RECs during the course of this assessment.

Controlled Recognized Environmental Condition

A controlled recognized environmental condition (CREC) refers to a REC affecting the subject property that has been addressed to the satisfaction of the applicable regulatory authority or authorities with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls (for example, activity and use limitations or other property use limitations).

- Partner did not identify any CRECs during the course of this assessment.

Historical Recognized Environmental Condition

A historical recognized environmental condition (HREC) refers to a previous release of hazardous substances or petroleum products affecting the subject property that has been addressed to the satisfaction of the applicable regulatory authority or authorities and meeting unrestricted use criteria established by the applicable regulatory authority or authorities without subjecting the subject property to any controls (for example, activity and use limitations or other property use limitations).

- Partner did not identify any HRECs during the course of this assessment.

Business Environmental Risk

A Business Environmental Risk (BER) is a risk which can have a material environmental or environmentally driven impact on the business associated with the current or planned use of commercial real estate, not necessarily related to those environmental issues required to be investigated in this practice. The following was identified during the course of this assessment:

- The potential exists that asbestos-containing materials (ACMs) are present on-site. Readily visible suspect ACMs were observed in good condition.

- Due to the age of the subject property building, there is a potential that lead-based paint (LBP) is present on-site. Readily visible painted surfaces were observed in good condition.
- At the request of the client, Partner conducted limited sampling at the subject property in order to ascertain general levels of radon concentrations at the subject property. Sampling activities were commenced by Partner on June 26, 2023 and completed by key site manager on June 29, 2023. A total of four charcoal canisters were placed throughout the subject property. Analytical results are pending.

Significant Data Gaps

No significant data gaps affecting the ability of the Environmental Professional to identify a REC were encountered during this assessment.

Conclusions and Recommendations

Partner has performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM Practice E1527-21 of 2298 Durant Avenue in Berkeley, Alameda, California (the "subject property"). Any exceptions to, or deletions from, this practice are described in Section 1.5 of this report.

This assessment has revealed no evidence of RECs, CRECs, or HRECs in connection with the subject property; however, BERs were identified. Based on the conclusions of this assessment, Partner recommends the following:

- An Operations and Maintenance (O&M) Program should be implemented in order to safely manage the suspect ACMs and LBP located at the subject property.

APPENDICES

Appendix A: Site Photographs
Appendix B: Historical/Regulatory Documentation
Appendix C: Regulatory Database Report
Appendix D: Qualifications

1.0 INTRODUCTION

Partner Engineering and Science, Inc. (Partner) has performed a Phase I Environmental Site Assessment (ESA) in conformance with the scope and limitations of ASTM Practice E1527-21 and the Environmental Protection Agency Standards and Practices for All Appropriate Inquiries (AAI) (40 CFR Part 312) for the property located at 2298 Durant Avenue in Berkeley, Alameda, California (the "subject property"). Any exceptions to, or deletions from, this scope of work are described in the report.

1.1 Purpose

The purpose of this ESA is to identify existing or potential Recognized Environmental Conditions (as defined by ASTM Standard E1527-21) affecting the subject property that: 1) constitute or result in a material violation or a potential material violation of any applicable environmental law; 2) impose any material constraints on the operation of the subject property or require a material change in the use thereof; 3) require clean-up, remedial action or other response with respect to Hazardous Substances or Petroleum Products on or affecting the subject property under any applicable environmental law; 4) may affect the value of the subject property; and 5) may require specific actions to be performed with regard to such conditions and circumstances. The information contained in the ESA Report will be used by Client to: 1) evaluate its legal and financial liabilities for transactions related to foreclosure, purchase, sale, loan origination, loan workout or seller financing; 2) evaluate the subject property's overall development potential, the associated market value and the impact of applicable laws that restrict financial and other types of assistance for the future development of the subject property; and/or 3) determine whether specific actions are required to be performed prior to the foreclosure, purchase, sale, loan origination, loan workout or seller financing of the subject property.

This ESA was performed to permit the User to satisfy one of the requirements to qualify for the innocent landowner, contiguous property owner, or bona fide prospective purchaser limitations on scope of Comprehensive Environmental Response, Compensation and Liability Act (CERCLA) (42 U.S.C. §9601) liability (hereinafter, the "landowner liability protections," or "LLPs"). ASTM Standard E1527-21 constitutes "all appropriate inquiry into the previous ownership and uses of the property consistent with good commercial or customary practice" as defined at 42 U.S.C. §9601(35)(B).

1.2 Scope of Work

The scope of work for this ESA is in accordance with and to the extent necessary to achieve the goal of the requirements set forth in the ASTM Standard E1527-21. This assessment included: 1) a property and adjoining site reconnaissance; 2) interviews with key personnel; 3) a review of historical sources; 4) a review of regulatory agency records; and 5) a review of a regulatory database report provided by a third-party vendor. Partner contacted local agencies, such as environmental health departments, fire departments and building departments to obtain readily ascertainable information to determine any current and/or former hazardous substances usage, storage and/or releases of hazardous substances on the subject property. Additionally, Partner researched readily available information on the presence of activity and use limitations (AULs) at these agencies. As defined by ASTM E1527-21, AULs include both legal (that is, institutional) and physical (that is, engineering) controls that may include legal or physical restrictions or limitations on the use of, or access to, a site or facility: 1) to reduce or eliminate potential exposure to hazardous substances or petroleum products in the soil, soil vapor, groundwater, or surface water on the subject property; or 2) to prevent activities that could interfere with the effectiveness of a response action, in order to ensure maintenance of a condition of no significant risk to public health or the environment. These legal or physical restrictions, which may include institutional and/or engineering controls (IC/ECs), are intended to prevent adverse impacts to individuals or populations that may be exposed to hazardous substances and petroleum products in the soil, soil vapor, groundwater, and/or surface water on a property.

If requested by Client, this report may also include the identification, discussion of, and/or limited sampling of asbestos-containing materials (ACMs), lead-based paint (LBP), mold, and/or radon.

1.3 Limitations

Partner warrants that the findings and conclusions contained herein were accomplished in accordance with the methodologies set forth in the Scope of Work. These methodologies are described as representing good commercial and customary practice for conducting an ESA of a property for the purpose of identifying recognized environmental conditions. There is a possibility that even with the proper application of these methodologies there may exist on the subject property conditions that could not be identified within the scope of the assessment or which were not reasonably identifiable from the available information. Partner believes that the information obtained from the record review and the interviews concerning the subject property is reliable. However, Partner cannot and does not warrant or guarantee that the information provided by these other sources is accurate or complete. The conclusions and findings set forth in this report are strictly limited in time and scope to the date of the evaluations. The conclusions presented in the report are based solely on the services described therein, and not on scientific tasks or procedures beyond the scope of agreed-upon services or the time and budgeting restraints imposed by the Client. No other warranties are implied or expressed.

Some of the information provided in this report is based upon personal interviews, and research of available documents, records, and maps held by the appropriate government and private agencies. This report is subject to the limitations of historical documentation, availability, and accuracy of pertinent records, and the personal recollections of those persons contacted.

This practice does not address requirements of any state or local laws or of any federal laws other than the all appropriate inquiry provisions of the LLPs. Further, this report does not intend to address all of the compliance and safety concerns, if any, associated with the subject property.

Environmental concerns, which are beyond the scope of a Phase I ESA as defined by ASTM include the following: ACMs, LBP, radon, and lead in drinking water. These issues may affect environmental risk at the subject property and may warrant discussion and/or assessment; however, are considered non-scope issues. If specifically requested by the Client, these non-scope issues are discussed in Section 6.3.

1.4 User Reliance

Valiance Capital engaged Partner to perform this assessment in accordance with an agreement governing the nature, scope and purpose of the work as well as other matters critical to the engagement. All reports, both verbal and written, are for the sole use and benefit of Valiance Capital . Either verbally or in writing, third parties may come into possession of this report or all or part of the information generated as a result of this work. In the absence of a written agreement with Partner granting such rights, no third parties shall have rights of recourse or recovery whatsoever under any course of action against Partner, its officers, employees, vendors, successors or assigns. Any such unauthorized user shall be responsible to protect, indemnify and hold Partner, Client and their respective officers, employees, vendors, successors and assigns harmless from any and all claims, damages, losses, liabilities, expenses (including reasonable attorneys' fees) and costs attributable to such Use. Unauthorized use of this report shall constitute acceptance of and commitment to these responsibilities, which shall be irrevocable and shall apply regardless of the cause of action or legal theory pled or asserted. Additional legal penalties may apply.

1.5 Limiting Conditions

The findings and conclusions contain all the limitations inherent in these methodologies that are referred to in ASTM Practice E1527-21.

Specific limitations and exceptions to this ESA are more specifically set forth below:

- Interviews with past or current owners, operators and occupants were not reasonably ascertainable and thus constitute a data gap. Based on information obtained from other historical sources, this data gap is not expected to alter the findings of this assessment.
- Partner requested information relative to deed restrictions and environmental liens from the Report User. This information was not provided at the time of the assessment.
- Partner submitted Freedom of Information Act (FOIA) requests to the Berkeley Building, Planning, and Fire Departments for information pertaining to building records, hazardous substances, underground storage tanks, releases, inspection records, for the subject property. As of this writing, these agencies have not responded to Partner's request. Based on information obtained from other historical resources, this limitation is not expected to alter the overall findings of this assessment. OR These records should be obtained and reviewed in order to rule out potential environmental concern to the subject property.

2.0 SITE DESCRIPTION

2.1 Site Location and Legal Description

The subject property at 2298 Durant Avenue in Berkeley, California is located on the southwest corner of the Ellsworth Street and Durant Avenue intersection. According to the Alameda County Assessor, the subject property is legally described as Alameda County Assessor Parcel Number (APN) 55-1887-1 and ownership is currently vested in Peggy Chan, Fred Feller, and N.S. Kaplan since 2021.

Please refer to Figure 1: Site Location Map, Figure 2: Site Plan, Figure 3: Topographic Map, and Appendix A: Site Photographs for the location and site characteristics of the subject property.

2.2 Current Property Use

The subject property is currently occupied by Beckman Feller & Chang P.C. for a law office Onsite operations consist of commercial office use. The subject property consists of a two-story building located on the east side of the property. In addition to the current structure, the subject property is also improved with asphalt-paved parking areas and associated landscaping.

The subject property is designated for R-S for High Density Residential development by the BPD. City of Berkeley.

The subject property was identified as a HAZNET (manifest) site in the regulatory database report of Section 4.2.

2.3 Current Use of Adjoining Properties

The subject property is located within a residential and commercial area of Alameda. During the vicinity reconnaissance, Partner observed the land uses on adjoining properties as defined in ASTM Practice E1527-21 as any real property or properties the border of which is contiguous or partially contiguous with that of the property, or that would be contiguous or partially contiguous with that of the property but for a street, road, or other public thoroughfare separating them. The adjoining properties are tabulated below:

Adjoining Properties	
North:	Durant Avenue followed by: The Legends Aquatic Center (2214 Bancroft Way; and An apartment building (2241 Durant Avenue)
Northeast:	The intersection of Durant Avenue and Ellsworth Street followed by: An apartment building (2301 Durant Avenue)
East:	Ellsworth Street followed by: A dental office (2300 Durant Avenue)
South:	An apartment building (2360 Ellsworth Avenue)
West:	An apartment building (2236 Durant Avenue)

The adjoining property to the east was identified as a HAZNET, Certified Unified Program Agency (CUPA) Berkeley, Hazardous Generator (HAZ GEN)site in the regulatory database report of Section 4.2.

2.4 Physical Setting Sources

2.4.1 Topography

The 2021 United States Geological Survey (USGS) Oakland West, California Quadrangle 7.5-minute series topographic map was reviewed for this ESA. According to the contour lines on the topographic map, the subject property is located at approximately 215 feet above mean sea level (MSL). The contour lines in the area of the subject property indicate the area is sloping gently towards the south.

A copy of the most recent topographic map is included as Figure 3 of this report.

2.4.2 Hydrology

While under natural and undisturbed conditions shallow groundwater flow most frequently follows the topography of the land surface, natural or man-made features can affect flow direction, and the presumed flow may not match the actual flow directions at the subject property and vicinity. shows the direction of groundwater flow in the vicinity of the subject property is inferred to be toward the south.

According to a previous subsurface investigation conducted on a nearby property, the depth to groundwater in the vicinity of the subject property is inferred to be approximately 23 to 28 feet bgs.

The nearest surface water in the vicinity of the subject property is Strawberry Creek located approximately 0.9 mile and east of the subject property. No settling ponds, lagoons, surface impoundments, wetlands or natural catch basins were observed at the subject property during this assessment.

According to available information, a public water system operated by the East Bay Municipal Utility District (EBMUD) serves the subject property vicinity. The sources of public water for the City of Berkeley are surface water from Mokelumne River Watershed .

2.4.3 Geology/Soils

The subject property is situated within the Coastal Ranges physiographic province of the State of California. The Coast Ranges are mountain ranges (2,000 to 4,000, occasionally 6,000 feet elevation above sea level) and valleys. The ranges and valleys trend northwest, subparallel to the San Andreas Fault. The province terminates on the east where strata dip beneath alluvium of the Great Valley; on the west by the Pacific Ocean with mountains rising sharply from uplifted and terraced, wave-cut coast; on the north by South Fork Mountain, which has the characteristic trend of the Coast Ranges, and on the south by the Transverse Ranges. The uppermost geologic formation underlying the soils at the subject property is Older Alluvium of Pleistocene Age. The formation consists of gravel, sand, silt, and clay.

Based on information obtained from the United States Department of Agriculture (USDA) Natural Resources Conservation Service Web Soil Survey online database, the subject property is mapped as Urban land-Tierra complex. The soil profile for this series is listed as consisting of clay loam from 0-12 inches bgs, clay from 12-32 inches bgs, and sandy clay loam from 32-60 inches bgs. The soils is further characterized as moderately well drained with a vert low to moderately low capacity to transmit water. Slopes range from 2 to 5 percent.

2.4.4 Flood Zone Information

Partner performed a review of the Flood Insurance Rate Map, published by the Federal Emergency Management Agency. According to Community Panel Number 06001C 0057G, dated August 03, 2009, the subject property appears to be located in Zone X (unshaded); defined as area of minimal flood hazard.

A copy of the reviewed flood map is included in Appendix B of this report.

3.0 HISTORICAL INFORMATION

Partner obtained historical use information about the subject property from a variety of sources. A chronological listing of the historical data found is summarized in the table below:

Historical Use Information		
Years	**Resource**	**Description/Use**
1890-1894	Fire Insurance Maps	Unimproved Land
1895-1939	Topographic Maps, Fire Insurance Maps, City Directories	Dwelling
1940-Present	Aerial Photographs, City Directories, Client-Provided Information, Interviews, Fire Insurance Maps, Topographic Maps	The existing commercial building

Tenants on the subject property have included residential listings at 2350 Ellsworth Street (1939); residential listings at 2298 Durant Avenue (1943); medical/dental occupants (1950-1975); Investment Associates (1985), attorney occupants (1987-2022)

No potential environmental concerns were identified in association with the current or former use of the subject property.

3.1 Aerial Photograph Review

Partner obtained available aerial photographs of the subject property and surrounding area from Environmental Risk Information Services (ERIS) on June 14, 2023. The inferred uses of the subject property and adjoining properties as interpreted from the aerial photographs in Appendix B are tabulated below:

Date:	*1939*	*Scale:*	*1"=500'*
Subject Property:	Appears to be developed with a house		
North:	Appears to be developed with an apartment building across Durant Avenue		
Northeast:	Appears to be developed with XX across XX Street		
East:	Appears to be developed with a house across the intersection of Durant Avenue and Ellsworth Street		
South:	Appears to be undeveloped land		
West:	Appears to be developed with two small structures		

Date:	*1946*	*Scale:*	*1"=500'*
Subject Property:	Appears to be developed with the existing commercial building		
North:	No significant changes visible		
Northeast:	No significant changes visible		
East:	Appears to be developed with the existing commercial building		
South:	Appears to be developed with an apartment building		
West:	No significant changes visible		

Date:	1950, 1958	Scale:	1"=500'
Subject Property:	No significant changes visible		
North:	No significant changes visible		
Northeast:	No significant changes visible		
East:	No significant changes visible		
South:	No significant changes visible		
West:	Appears to be developed with an apartment building and one garage structure		

Date:	1965, 1968, 1974, 1989, 1991, 1993, 2005, 2009, 2010, 2012, 2014, 2016, 2018, 2021	Scale:	1"=500'
Subject Property:	No significant changes visible		
North:	Appears to be developed with the two existing buildings		
Northeast:	Appears to be developed with a parking structure across the intersection of Durant Avenue and Ellsworth Street		
East:	No significant changes visible		
South:	Appears to be developed with the existing apartment building		
West:	No significant changes visible		

Copies of the reviewed aerial photographs are included in Appendix B of this report.

3.2 Fire Insurance Maps

Partner reviewed the collection of Fire insurance maps (FIMS) from ERIS on June 15, 2023. The following inferred uses of the subject property and adjoining properties interpreted from the FIMs in Appendix B are tabulated below:

Date:	1890
Subject Property:	Undeveloped land
North:	Developed with a house across Durant Avenue
Northeast:	Undeveloped land across Durant Avenue
East:	Undeveloped land
South:	Undeveloped land
West:	Undeveloped land

Date:	1894
Subject Property:	No significant changes noted
North:	No significant changes noted
Northeast:	No significant changes noted
East:	Developed with a house across Ellsworth Street
South:	No significant changes noted
West:	No significant changes noted

Date:	1903
Subject Property:	Developed with a house (addressed as 2350 Ellsworth Street)
North:	No significant changes noted
Northeast:	Developed with a house across the intersection of Durant Avenue and Ellsworth Street
East:	No significant changes noted
South:	No significant changes noted
West:	No significant changes noted

Date:	1911
Subject Property:	No significant changes noted
North:	Vacant land across Durant Avenue
Northeast:	No significant changes noted
East:	No significant changes noted
South:	Developed with a two-flat residential building
West:	Two garages

Date:	1929
Subject Property:	No significant changes noted other than the addition of a detached garage
North:	Developed with apartment building and a detached garage across Durant Avenue
Northeast:	Developed with an apartment building across the intersection of Durant Avenue and Ellsworth Street
East:	No significant changes noted
South:	No significant changes noted
West:	No significant changes noted other than the addition of an apartment building

Date:	1950
Subject Property:	A doctor's office
North:	Developed with apartment building across Durant Avenue
Northeast:	No significant changes noted other than the building also includes a store
East:	the existing dental office building
South:	No significant changes noted other than the building is shown as containing three flats
West:	No significant changes noted

Date:	1980
Subject Property:	No significant changes noted other than a parking lot is shown to the west of the building
North:	No significant changes noted
Northeast:	Developed with a parking garage across the intersection of Durant Avenue and Ellsworth Street
East:	No significant changes noted
South:	Developed with the existing apartment building

West:	No significant changes noted other than there is only one garage

Copies of reviewed FIMs are included in Appendix B of this report.

3.3 City Directories

Partner reviewed historical city directories obtained from ERIS on June 20, 2023 for past names and businesses that were listed for the subject property and adjoining properties. The findings are tabulated below:

City Directory Search for 2298 Durant Ave (Subject Property)	
Year(s)	**Occupant Listed**

Based on the city directory review, no environmentally sensitive listings were identified for the adjoining property addresses.

Copies of reviewed city directories are included in Appendix B of this report.

3.4 Historical Topographic Maps

Partner reviewed historical topographic maps obtained from ERIS on June 15, 2023. The following inferred uses of the subject property and adjoining properties interpreted from topographic maps in Appendix B and are tabulated below:

Date:	1895, 1899
Subject Property:	Depicted as developed with a small structure
North:	Depicted as undeveloped land beyond Durant Avenue
Northeast:	Depicted as undeveloped land beyond the intersection of Durant Avenue and Ellsworth Street
East:	Depicted as undeveloped land beyond Ellsworth Street
South:	Depicted as undeveloped land
West:	Depicted as undeveloped land

Date:	1915
Subject Property:	Depicted as undeveloped land
North:	Depicted as developed with a structure across Durant Avenue
Northeast:	No significant changes visible
East:	No significant changes visible
South:	No significant changes visible
West:	No significant changes visible

Date:	1949, 1959, 1968, 1973, 1980, 1996, 2015, 2018, 2021
Subject Property:	Shaded to depict urban development
North:	Shaded to depict urban development
Northeast:	Shaded to depict urban development
East:	Shaded to depict urban development
South:	Shaded to depict urban development
West:	Shaded to depict urban development

Copies of reviewed topographic maps are included in Appendix B of this report.

4.0 REGULATORY RECORDS REVIEW

4.1 Regulatory Agencies

4.1.1 State Department

4.1.2 Health Department

Regulatory Agency Data	
Name of Agency:	Alameda County Environmental Health Department (ACEHD)
Point of Contact:	None
Agency Address:	1131 Harbor Bay Parkway, Alameda CA
Agency Phone Number:	510-567-6700
Date of Contact:	June 29, 2023
Method of Communication:	Email
Summary of Communication: No records regarding hazardous substance use, storage or releases, or the presence of USTs and AULs on the subject property were on file with the ACEHD.	

4.1.3 Fire Department

Regulatory Agency Data	
Name of Agency:	Berkeley Fire Department (BFD)
Point of Contact:	online records request
Agency Address:	2180 Milvia Street, Berkeley
Agency Phone Number:	(510) 981-2489
Date of Contact:	June 16, 2023
Method of Communication:	Online
Summary of Communication: As of the date of this report, Partner has not received a response from the BFD for inclusion in this report.	

4.1.4 Building Department

Regulatory Agency Data	
Name of Agency:	Berkeley Building Department (BBD)
Point of Contact:	online records request
Agency Address:	2180 Milvia Street, Berkeley, California
Agency Phone Number:	(510) 981-2489
Date of Contact:	June 16, 2023
Method of Communication:	Online
Summary of Communication: As of the date of this report, Partner has not received a response from the BBD for inclusion in this report.	

4.1.5 Planning Department

Regulatory Agency Data	
Name of Agency:	Berkeley Planning Department (BPD)
Point of Contact:	Online records request
Agency Address:	2180 Milvia Street, Berkeley, California
Agency Phone Number:	(510) 981-2489
Date of Contact:	June 16, 2023
Method of Communication:	Online
Summary of Communication: As of the date of this report, Partner has not received a response from the BPD for inclusion in this report.	

4.1.6 Oil & Gas Exploration

Regulatory Agency Data	
Name of Agency:	California Geologic Energy Management Division (CalGEM)
Point of Contact:	N/A
Agency Address:	801 K Street, MS 24-01, Sacramento, CA 95814
Agency Phone Number:	(916) 322-1080
Date of Contact:	June 19, 2023
Method of Communication:	Online
Summary of Communication: According to CalGEM, no oil or gas wells are located on or adjoining to the subject property.	

4.1.7 Assessor's Office

Regulatory Agency Data	
Name of Agency:	Alameda County Assessor Office
Point of Contact:	Not identified
Agency Address:	1221 Oak Street, Room 145, Oakland, CA
Agency Phone Number:	(510) 272-3787
Date of Contact:	June 20, 2023
Method of Communication:	Telephone and Online
Summary of Communication: According to records reviewed, the subject property is identified by Assessor Parcel Number (APN) 55-1887-1 and is currently owned by Peggy Chan, Fred Faller, and N.S. Kaplan since 2021. No other relevant information was available.	

4.1.8 Air Pollution Control Agency

Regulatory Agency Data	
Name of Agency:	Bay Area Air Quality Management District (BAQMD)
Point of Contact:	Ms. Rochelle Henderson
Agency Address:	375 Beale Street, San Francisco, California
Agency Phone Number:	(415) 749-5000
Date of Contact:	
Method of Communication:	
Summary of Communication: No Permits to Operate (PTO), Notices of Violation (NOV), or Notices to Comply (NTC) or the presence of AULs, dry cleaning machines, or USTs were on file for the subject property with the AQMD. OR According to records reviewed, the subject property DISCUSS.	

4.1.9 Regional Water Quality Agency

Regulatory Agency Data	
Name of Agency:	California Regional Water Quality Control Board
Point of Contact:	Geotracker Website (www. geotracker.waterboards.ca.gov)
Agency Address:	11020 Sun Center Drive, Suite 200, Rancho Cordova, CA
Agency Phone Number:	(916) 464-3291
Date of Contact:	June 19, 2023
Method of Communication:	Online
Summary of Communication: No records regarding hazardous substance use, storage or releases, or the presence of USTs and AULs on the subject property were on file with the RWQCB..	

4.1.10 Department of Toxic Substances Control

Regulatory Agency Data	
Name of Agency:	California Department of Toxic Substances Control (DTSC)
Point of Contact:	Envirostor Website (www.envirostor.dtsc.ca.gov/public/)
Agency Address:	8800 Cal Center Drive, Sacramento, California 95826
Agency Phone Number:	(916) 255-6449
Date of Contact:	June 19, 2023
Method of Communication:	Online
Summary of Communication: No records regarding hazardous substance use, storage or releases, or the presence of USTs and AULs on the subject property were on file with the DTSC. The DTSC Hazardous Waste Tracking System (HWTS) was researched for hazardous waste manifest data submitted to the California DTSC. The subject property under the business name of The Amicus Group at 2298 Durant Avenue was identified in the HWTS website for opening a United States Environmental Protection Agency (USEPA) Hazardous Waste Generator Number (Generator Number) in 2001 that went inactive in 2002. No hazardous waste was manifested using this Generator Number according to the HWTS website.	

Copies of pertinent documents are included in Appendix B of this report.

4.2 Mapped Database Records Search

The regulatory database report provided by ERIS documents the listing of sites identified on federal, state, county, city, and tribal (when applicable) standard source environmental databases within the approximate minimum search distance (AMSD) specified by ASTM Practice E1527-21. The data from these sources are updated as these data are released and integrated into one database. The information contained in this report was compiled from publicly available sources.

The environmental database information is used to identify environmental concerns in connection with the subject property. The listings also serve to identify the known indications of the storage, use, generation, disposal, or release of hazardous substance at the subject property and the potential for contaminants to migrate onto the subject property from off-site sources in groundwater or soil in the form of liquids or vapor.

Using the ASTM definition of migration, Partner considers the migration of hazardous substances or petroleum products in any form onto the subject property during the evaluation of each site listed on the radius report, which includes solid, liquid, and vapor.

4.2.1 Regulatory Database Summary

The following table lists the sites as categorized by the regulatory database within the prescribed AMSD. The locations of the sites are plotted utilizing a geographic information system, which geocodes the site addresses. The accuracy of the geocoded locations is approximately +/-300 feet.

Database Report Data				
Database	**AMSD Radius (mile)**	**Listings Identified**		
		Subject Property	**Adjoining Properties**	**Surrounding Area Sites of Concern**
Federal NPL	1.00	N	N	N
Delisted NPL Site	0.50	N	N	N
Federal SEMS Site	0.50	N	N	N
Federal SEMS-ARCHIVE	0.50	N	N	N
Federal RCRA CORRACTS Facility	1.00	N	N	N
Federal RCRA TSDF Facility	0.50	N	N	N
Federal RCRA Generators Site (LQG, SQG, VSQG, CESQG)	Subject and Adjoining	N	N	N
Federal IC/EC Registries	Subject Property	N	N	N
Federal ERNS Site	Subject Property	N	N	N
State/Tribal Equivalent NPL	1.00	N	N	N
State/Tribal Equivalent CERCLIS	1.00	N	N	N
State/Tribal Landfill/Solid Waste Disposal Site	0.50	N	N	N
State/Tribal Leaking Storage Tank Site (LUST/LPST)	0.50	N	N	**Y**
State/Tribal Registered Storage Tank Sites (UST/AST)	Subject and Adjoining	N	N	N
State/Tribal IC/EC Registries	Subject and Adjoining	N	N	N

Database Report Data				
Database	AMSD Radius (mile)	Listings Identified		
		Subject Property	Adjoining Properties	Surrounding Area Sites of Concern
State/Tribal Voluntary Cleanup Sites (VCP)	0.50	N	N	N
State/Tribal Spills	0.25	N	N	N
Federal Brownfield Sites	0.50	N	N	N
State Brownfield Sites	0.50	N	N	N

4.2.2 Subject Property Listings

The subject property is identified as a HAZNET site in the regulatory database report, as discussed below:

Subject Property Database Listing	
Database:	HAZNET
Site Name:	The Amicus Group
Address:	2298 Durant Avenue
Substance Involved:	None reported
Years of Operation:	Not identified
Status:	Closed
Discussion:	The business opened a Generator Number in 2001 that went inactive in 2002. Based on the nature of the database listing and the lack of reported releases, this site is not expected to represent a significant environmental concern.

4.2.3 Adjoining Property Listings

The adjoining properties were identified in the regulatory database report, as discussed below:

Adjoining Property Database Listing	
Property Name:	Thomas E. Smithers DDS
Address:	2300 Durant Avenue
Direction:	East
Hydrological Gradient:	Down-Gradient
Database Listing:	HAZNET, CUPA Berkeley
Substance Involved:	None reported
Years of Operation:	Not identified
Status:	Closed
Discussion:	This site is identified on the HAZNET database as having opened a Generator Number in 2000 that went inactive in 2007. The dentist is also listed on the CUPA Berkeley database as an inactive hazardous waste generator facility under the oversight of the Berkeley Toxics agency. Based on the nature of the database listings and the lack of reported releases, this site is not expected to represent a significant environmental concern and it is unlikely that a regulatory file review for this site would alter the findings of this assessment.

Adjoining Property Database Listing	
Property Name:	Keneth Cusick DDS
Address:	2300 Durant Avenue
Direction:	East
Hydrological Gradient:	Cross-Gradient
Database Listing:	HAZNET, CUPA Berkeley
Substance Involved:	None reported
Years of Operation:	Not identified
Status:	Closed
Discussion:	This site is identified on the HAZNET database as having opened a United States a Generator Number in 1994 that went inactive in 2001. The dentist is also listed on the CUPA Berkeley database as an inactive hazardous waste generator facility under the oversight of the Berkeley Toxics agency. Based on the nature of the database listings and the lack of reported releases, this site is not expected to represent a significant environmental concern and it is unlikely that a regulatory file review for this site would alter the findings of this assessment.

Adjoining Property Database Listing	
Property Name:	A. Olson DDS
Address:	2300 Durant Avenue
Direction:	East
Hydrological Gradient:	Down-Gradient
Database Listing:	CUPA Berkeley
Substance Involved:	Not reported
Years of Operation:	Not identified
Status:	Closed
Discussion:	This site is identified on the CUPA Berkeley database as an inactive hazardous waste generator facility under the oversight of the Berkeley Toxics agency. Based on the nature of the database listing and the lack of reported releases, this site is not expected to represent a significant environmental concern and it is unlikely that a regulatory file review for this site would alter the findings of this assessment.

Adjoining Property Database Listing	
Property Name:	James Olson DDS
Address:	2300 Durant Avenue
Direction:	East
Hydrological Gradient:	Cross-Gradient
Substance Involved:	Not reported
Years of Operation:	Not identified
Status:	Closed
Discussion:	This site is identified on the HAZ GEN database as having opened opened a United States a Generator Number in 2000 that went inactive in 2016. Based on the nature of the database listings and the lack of reported releases, this site is not expected to

represent a significant environmental concern and it is unlikely that a regulatory file review for this site would alter the findings of this assessment.

Based on the findings, vapor migration is not considered an environmental concern at this time.

4.2.4 Surrounding Area Listings of Concern to Subject Property

No sites of concern are identified in the regulatory database report.

Based on the findings, vapor migration is not considered an environmental concern at this time.

4.2.5 Unplottable Listings

No unplottable listings of concern are identified in the regulatory database report.

A copy of the regulatory database report is included in Appendix C of this report.

5.0 USER PROVIDED INFORMATION AND INTERVIEWS

In order to qualify for one of the *Landowner Liability Protections (LLPs)* offered by the Small Business Liability Relief and Brownfields Revitalization Act of 2001 (the *Brownfields Amendments*), the *User* must conduct the following inquiries required by 40 CFR 312.25, 312.28, 312.29, 312.30, and 312.31. The *User* should provide the following information to the *environmental professional*. Failure to provide this information could result in a determination that *all appropriate inquiries* is not complete. The *User* is asked to provide information or knowledge of the following:

- Review Title and Judicial Records for Environmental Liens and AULs
- Specialized Knowledge or Experience of the User
- Actual Knowledge of the User
- Reason for Significantly Lower Purchase Price
- Commonly Known or *Reasonably Ascertainable* information
- Degree of Obviousness
- Reason for Preparation of this Phase I ESA

Fulfillment of these user responsibilities is key to qualification for the identified defenses to CERCLA liability. Partner requested our Client to provide information to satisfy User Responsibilities as identified in Section 6 of the ASTM guidance.

Pursuant to ASTM Practice E1527-21, Partner requested the following site information from Valiance Capital (User of this report).

User Responsibilities		
Item	**Provided By User**	**Not Provided By User**
AAI User Questionnaire	X	
Title Records, Environmental Liens, and AULs		X
Specialized Knowledge	X	
Actual Knowledge	X	
Valuation Reduction for Environmental Issues	X	
Identification of Key Site Manager		X
Reason for Performing Phase 1 ESA		X
Prior Environmental Reports		X
Other	X	

5.1 Interviews

5.1.1 Interview with Owner

The owner of the subject property since 2021, identified as Peggy Chan, Fred Faller, and N.S. Kaplan, was not available to be interviewed at the time of the assessment.

5.1.2 Interview with Report User

Mr. Lucas Butler, report user, was not aware of any pending, threatened, or past litigation relevant to hazardous substances or petroleum products in, on, or from the subject property; any pending, threatened, or past administrative proceedings relevant to hazardous substances or petroleum products in, on, or from

the subject property; or any notices from a governmental entity regarding any possible violation of environmental laws or possible liability relating to hazardous substances or petroleum products.

The report used stated that the subject property was developed in 1940 for Commercial use. Prior to that, the subject property was Vacant Land as early as 1890 to 1894.

5.1.3 Interview with Key Site Manager

A key site manager was not provided to be interviewed at the time of this assessment.

5.1.4 Interviews with Past Owners, Operators and Occupants

Interviews with past owners, operators, and occupants were not conducted since information regarding the potential for contamination at the subject property was obtained from other sources.

5.2 User Provided Information

5.2.1 Title Records, Environmental Liens, and AULs

Partner was not provided with title records or environmental lien and AUL information for review as part of this assessment.

5.2.2 Specialized Knowledge

The User did not have specialized knowledge of environmental conditions associated with the subject property at the time of the assessment.

5.2.3 Actual Knowledge of the User

The User was not aware of environmental liens and/or AULs encumbering the subject property or in connection with the subject property at the time of the assessment.

5.2.4 Valuation Reduction for Environmental Issues

The User was not aware of any reductions in property value due to environmental issues.

5.2.5 Commonly Known or Reasonably Ascertainable Information

he User did provide information that is commonly known or reasonably ascertainable within the local community about the subject property at the time of the assessment. According the User, the subject property was developed for commercial purposes in 1940.

5.2.6 Previous Reports and Other Provided Documentation

The following information was provided to Partner for review during the course of this assessment:

Property Details Report, 2298 Durant Avenue, Berkeley, California 94794-1577, Prepared for: Not identified, Prepared by: Title Pro 247 (April 6, 2023)

The document provided the current owner as Peggy Chan and Fred Feller, and listed the building construction date as 1940. No environmental liens or AULs were identified in the document.

Engineering Inspection- 2298 Durant Avenue, Berkeley, Prepared for: Mr. Mike Dinga, Mike Dinga Construction, Prepared by: Dan Szumski & Associates (February 7, 1995)

Engineering investigation of the building noting a few structural deficiencies and provided recommendations to correct

Stairway Support Repair, Prepared for: Buresh, Kaplan, Jang & Feller, Prepared by: Engineered Soil Repairs, Inc. (August 25, 2006)

Documented the repair of a stairway on the outside of the building,

Appraisal, 2298 Durant Avenue, Berkeley, California, Prepared for: Buresh, Kaplan, Jang & Feller, Prepared by: Yovino Young, Inc. (March 19, 1999)

Provided an appraisal of the subject property improvements in 1999.

Floor Plan- 2298 Durant Avenue, Berkeley, California, Prepared for: Not identified, Prepared by: Not identified (undated)

Document provides the floor plans for the first and second floors of the building.

Appraisal, 2298 Durant Avenue, Berkeley, California, Prepared for: Buresh, Kaplan, Jang & Feller, Prepared by: Yovino Young, Inc. (April 27, 2010)

Provided an appraisal of the subject property improvements in 2010.

Copies of pertinent pages reviewed are not included in Appendix B of this report.

6.0 SITE RECONNAISSANCE

The weather at the time of the site visit was sunny and clear. Refer to Section 1.5 for limitations encountered during the field reconnaissance and Sections 2.1 and 2.2 for subject property operations. The table below provides the site assessment details:

Site Assessment Data	
Site Assessment Performed By:	William Mitchell
Site Assessment Conducted On:	June 26, 2023

The table below provides the subject property personnel interviewed during the field reconnaissance:

Site Visit Personnel for the Subject Property			
Name	**Title/Role**	**Contact Number**	**Site Walk* Yes/No**
Mr. Sirabhop (Pepe) Sakulkerewatana	Key Site Manager	(510) 517-8140	Yes
* Accompanied Partner during the field reconnaissance activities and provided information pertaining to the current operations and maintenance of the subject property			

No potential environmental concerns were identified during the onsite reconnaissance.

6.1 General Site Characteristics

6.1.1 Solid Waste Disposal

Solid waste generated at the subject property is disposed of in commercial dumpsters located on the southwest side of the subject property. An independent solid waste disposal contractor, City of Berkeley, removes solid waste from the subject property. Solid waste generated at the subject property includes household-type trash. No evidence of illegal dumping of solid waste was observed during the Partner site reconnaissance.

6.1.2 Sewage Discharge and Disposal

Sanitary discharges on the subject property are directed into the municipal sanitary sewer system. The East Bay Municipal Utility District (EBMUD) services the subject property vicinity. No wastewater treatment facilities were observed or reported on the subject property. No septic systems were observed or reported on the subject property.

6.1.3 Stormwater and Surface Water Drainage

Stormwater is removed from the subject property primarily by sheet flow action across the paved surfaces towards stormwater drains located in the public right of way. No drywells were identified on the subject property.

6.1.4 Source of Heating and Cooling

Heating and cooling systems as well as domestic hot water equipment are fueled by natural gas and electricity, respectively, provided by the Pacific Gas & Electric Company (PG&E). The mechanical system is comprised of split system on the ground next to the building. Hot water is provided by central natural gas boiler units

6.1.5 Wells and Cisterns

No aboveground evidence of wells or cisterns was observed during the site reconnaissance.

6.1.6 Wastewater

Domestic wastewater generated at the subject property is disposed by means of the sanitary sewer system. No industrial processes are currently performed at the subject property.

6.1.7 Septic Systems

No septic systems were observed or reported on the subject property.

6.1.8 Additional Site Observations

No additional general site characteristics were observed during the site reconnaissance.

6.2 Potential Environmental Hazards

6.2.1 Hazardous Substances and Petroleum Products Used or Stored at the Site

No hazardous substances or petroleum products were observed on the subject property during the site reconnaissance.

Small quantities of general maintenance supplies were found to be properly labeled and stored at the time of the assessment with no signs of leaks, stains, or spills. The storage and use of maintenance supplies does not appear to pose a significant threat to the environmental integrity of the subject property at this time.

6.2.2 Aboveground & Underground Hazardous Substance or Petroleum Product Storage Tanks (ASTs/USTs)

No evidence of current or former ASTs or USTs was observed during the site reconnaissance.

6.2.3 Evidence of Releases

No spills, stains, or other indications that a surficial release has occurred at the subject property were observed.

6.2.4 Polychlorinated Biphenyls (PCBs)

No potential PCB-containing equipment (transformers, oil-filled switches, hoists, lifts, dock levelers, hydraulic elevators, etc.) was observed on the subject property during Partner's reconnaissance.

6.2.5 Strong, Pungent or Noxious Odors

No strong, pungent or noxious odors were evident during the site reconnaissance.

6.2.6 Pools of Liquid

No pools of liquid were observed on the subject property during the site reconnaissance.

6.2.7 Drains, Sumps and Clarifiers

No drains, sumps, or clarifiers, other than those associated with storm water removal, were observed on the subject property during the site reconnaissance.

6.2.8 Pits, Ponds and Lagoons

No pits, ponds, or lagoons were observed on the subject property.

6.2.9 Stressed Vegetation

No stressed vegetation was observed on the subject property.

6.2.10 Additional Potential Environmental Hazards

No additional environmental hazards, including landfill activities or radiological hazards, were observed.

6.3 Non-ASTM Services

6.3.1 Asbestos-Containing Materials (ACMs)

Asbestos is the name given to a number of naturally occurring, fibrous silicate minerals mined for their useful properties such as thermal insulation, chemical and thermal stability, and high tensile strength. The Occupational Safety and Health Administration (OSHA) regulation 29 CFR 1926.1101 requires certain construction materials to be presumed to contain asbestos, for purposes of this regulation. All thermal system insulation (TSI), surfacing material, and asphalt/vinyl flooring that are present in a building that have not been appropriately tested are “presumed asbestos-containing material” (PACM).

The subject property building was constructed in 1940. Partner has conducted a limited, visual evaluation of accessible areas for the presence of suspect ACM at the subject property. The objective of this visual survey was to note the presence and condition of suspect ACM observed. Please refer to the table below for identified suspect ACM:

Suspect ACMs			
Suspect ACM	**Location**	**Friable Yes/No**	**Physical Condition**
Drywall Systems	Throughout Building Interior	No	Good
Stucco	Throughout Building Exterior	Yes	Good

Based on this building’s date of construction, prior to disturbance, Partner recommends a comprehensive asbestos survey of the property be completed to determine the presence, condition, friability and likely future condition of suspect or confirmed ACM. All suspect materials must be handled as ACM according to local, state and federal regulations until the results of sampling and analysis indicate the material is a non-ACM.

Partner was not provided building plans or specifications for review, which may have been useful in determining areas likely to have used ACM.

6.3.2 Lead-Based Paint (LBP)

Lead is a highly toxic metal that affects virtually every system of the body. LBP is defined as any paint, varnish, stain, or other applied coating that has 1 mg/cm2 (or 5,000 µg/g or 0.5% by weight) or more of lead. Congress passed the Residential Lead-Based Paint Hazard Reduction Act of 1992, also known as “Title X,” to protect families from exposure to lead from paint, dust, and soil. Under Section 1017 of Title X, intact LBP on most walls and ceilings is not considered a “hazard,” although the condition of the paint should be monitored and maintained to ensure that it does not become deteriorated. Further, Section 1018 of this law directed the Housing and Urban Development (HUD) and the US EPA to require the disclosure of known information on LBP and LBP hazards before the sale or lease of most housing built before 1978.

Based on the age of the subject property building (pre-1978), there is a potential that LBP is present.

Actual material samples would need to be collected in order to determine if LBP is present.

6.3.3 Radon

Radon is a colorless, odorless, naturally occurring, radioactive, inert, gaseous element formed by radioactive decay of radium (Ra) atoms. The US EPA has prepared a map to assist National, State, and local organizations to target their resources and to implement radon-resistant building codes. The map divides the country into three Radon Zones, according to the table below:

EPA Radon Zones		
EPA Zones	**Average Predicted Radon Levels**	**Potential**
Zone 1	Exceed 4.0 pCi/L	Highest
Zone 2	Between 2.0 and 4.0 pCi/L	Moderate
Zone 3	Less than 2.0 pCi/L	Low

It is important to note that the EPA has found homes with elevated levels of radon in all three zones, and the US EPA recommends site-specific testing in order to determine radon levels at a specific location. However, the map does give a valuable indication of the propensity of radon gas accumulation in structures.

Review of the US EPA Map of Radon Zones places the subject property in Zone 2. Based upon the radon zone classification, radon is not considered an environmental concern.

At the request of the client, Partner conducted limited sampling at the subject property in order to ascertain general levels of radon concentrations at the subject property. Sampling activities were commenced by Partner on June 26, 2023 and completed by key site manager on June 29, 2023. A total of four charcoal canisters were placed throughout the subject property. Analytical results are pending.

Analytical results are pending.

6.3.4 Lead in Drinking Water

According to available information, a public water system operated by the East Bay Municipal Utility District (EBMUD) serves the subject property vicinity. The sources of public water for the City of Berkeley are surface water from Mokelumne River Watershed According to the 2022 Annual Water Quality Report, water supplied to the subject property is in compliance with all State and Federal regulations pertaining to drinking water standards, including lead and copper. Water sampling was not conducted to verify water quality.

6.3.5 Mold

Molds are microscopic organisms found virtually everywhere, indoors and outdoors. Mold will grow and multiply under the right conditions, needing only sufficient moisture (e.g.in the form of very high humidity, condensation, or water from a leaking pipe, etc.) and organic material (e.g., ceiling tile, drywall, paper, or natural fiber carpet padding).

No obvious indications of water damage or mold growth were observed during Partner's visual assessment.

6.3.6 Wetlands

The subject property does not appear to be a designated wetland area based on information obtained from the United States Fish and Wildlife Service; however, a comprehensive wetlands survey would be required in order to formally determine actual wetlands on the subject property. No settling ponds, lagoons, surface impoundments, wetlands or natural catch basins were observed at the subject property during this assessment.

6.4 Adjoining Property Reconnaissance

The adjoining property reconnaissance consisted of observing the adjoining properties from the subject property premises. No items of environmental concern were identified on the adjoining properties during the site assessment, including hazardous substances, petroleum products, ASTs, USTs, evidence of releases, PCBs, strong or noxious odors, pools of liquids, sumps or clarifiers, pits or lagoons, stressed vegetation, or any other potential environmental hazards.

7.0 VAPOR ENCROACHMENT CONDITIONS

Partner conducted a limited non-intrusive vapor screening on the subject property to identify, to the extent feasible, the potential for vapor encroachment conditions (VECs) in connection with the subject property. This included consideration of chemicals of concern (COC) that may migrate as vapors into the subsurface of the subject property as a result of contaminated soil and groundwater on or near the property.

This screening utilized readily available data sources previously discussed in this Phase I ESA that includes:

- the physical setting of the subject property (Section 2.4),
- standard historical sources for the subject property, adjoining, and surrounding area (Section 3.0),
- known or potentially contaminated sites as identified from information from regulatory agencies and sites on Federal, State, tribal and local databases (Section 4.0), and
- information from the site reconnaissance (Section 6.0) of the subject property and observations of the surrounding properties.

The results of our data collection, reconnaissance, and analysis are tabulated below:

Potential for Vapor Encroachment to Impact the Subject Property	
Area of Concern	***Likely or Known VEC to Subject Property***
Subject Property Existing Operations or Conditions	None identified that impact the subject property. Refer to Sections 2.0 Site Description and 6.0 Site Reconnaissance and discussion below.
Historical Uses of the Subject Property	None identified that impact the subject property. Refer to Section 3.0 Historical Use and discussion below.
Adjoining Property Operations or Existing Conditions	None identified that impact the subject property. Refer to Sections 2.3 Current Use of Adjoining Properties and 6.4 Adjoining Property Site Reconnaissance and discussion below.
Historical Uses of Adjoining Properties or Nearby Properties	None identified that impact the subject property. Refer to Section 3.0 Historical Use and discussion below.
Regulatory Review of sites identified on Federal, State, tribal and Local Environmental Databases which were located in the AMSD	None identified that impact the subject property. Refer to Section 4.0 Regulatory Review and discussion below.

Based on the findings of the limited non-intrusive vapor screening, vapor intrusion is unlikely to be an issue of concern in connection with the existing structures on the subject property. As such, no further assessment is recommended.

8.0 FINDINGS AND CONCLUSIONS

Findings and Opinions

Recognized Environmental Condition

A recognized environmental condition (REC) refers to the presence of hazardous substances or petroleum products in, on, or at the subject property due to a release to the environment; the likely presence of hazardous substances or petroleum products in, on, or at the subject property due to a release or likely release to the environment; or the presence of hazardous substances or petroleum products in, on, or at the subject property under conditions that pose a material threat of a future release to the environment.

- Partner did not identify any RECs during the course of this assessment.

Controlled Recognized Environmental Condition

A controlled recognized environmental condition (CREC) refers to a REC affecting the subject property that has been addressed to the satisfaction of the applicable regulatory authority or authorities with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls (for example, activity and use limitations or other property use limitations).

- Partner did not identify any CRECs during the course of this assessment.

Historical Recognized Environmental Condition

A historical recognized environmental condition (HREC) refers to a previous release of hazardous substances or petroleum products affecting the subject property that has been addressed to the satisfaction of the applicable regulatory authority or authorities and meeting unrestricted use criteria established by the applicable regulatory authority or authorities without subjecting the subject property to any controls (for example, activity and use limitations or other property use limitations).

- Partner did not identify any HRECs during the course of this assessment.

Business Environmental Risk

A Business Environmental Risk (BER) is a risk which can have a material environmental or environmentally driven impact on the business associated with the current or planned use of commercial real estate, not necessarily related to those environmental issues required to be investigated in this practice. The following was identified during the course of this assessment:

- The potential exists that asbestos-containing materials (ACMs) are present on-site. Readily visible suspect ACMs were observed in good condition.
- Due to the age of the subject property building, there is a potential that lead-based paint (LBP) is present on-site. Readily visible painted surfaces were observed in good condition.
- At the request of the client, Partner conducted limited sampling at the subject property in order to ascertain general levels of radon concentrations at the subject property. Sampling activities were commenced by Partner on June 26, 2023 and completed by key site manager on June 29, 2023. A total of four charcoal canisters were placed throughout the subject property. Analytical results are pending.

Significant Data Gaps

No significant data gaps affecting the ability of the Environmental Professional to identify a REC were encountered during this assessment.

Conclusions and Recommendations

Partner has performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM Practice E1527-21 of 2298 Durant Avenue in Berkeley, Alameda, California (the "subject property"). Any exceptions to, or deletions from, this practice are described in Section 1.5 of this report.

This assessment has revealed no evidence of RECs, CRECs, or HRECs in connection with the subject property; however, BERs were identified. Based on the conclusions of this assessment, Partner recommends the following:

- An Operations and Maintenance (O&M) Program should be implemented in order to safely manage the suspect ACMs and LBP located at the subject property.

9.0 SIGNATURES OF ENVIRONMENTAL PROFESSIONALS

Partner has performed a Phase I Environmental Site Assessment of the property located at 2298 Durant Avenue in Berkeley, Alameda, California in conformance with the scope and limitations of the protocol and the limitations stated earlier in this report. Exceptions to or deletions from this protocol are discussed earlier in this report.

By signing below, Partner declares that, to the best of our professional knowledge and belief, we meet the definition of *Environmental Professional* as defined in §312.10 of 40 CFR §312. Partner has the specific qualifications based on education, training, and experience to assess a *property* of the nature, history, and setting of the subject *property*. Partner has developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

RE: CITY DIRECTORY RESEARCH
2298 Durant Avenue
BERKELEY,CA 94704

Thank you for contacting ERIS for an City Directory Search for the site described above. Our staff has conducted a reverse listing City Directory search to determine prior occupants of the subject site and adjacent properties. We have provided the nearest addresses(s) when adjacent addresses are not listed. If we have searched a range of addresses, all addresses in that range found in the Directory are included.

Note: Reverse Listing Directories generally are focused on more highly developed areas. Newly developed areas may be covered in the more recent years, but the older directories will tend to cover only the "central" parts of the city. To complete the search, we have either utilized the ACPL, Library of Congress, State Archives, and/or a regional library or history center as well as multiple digitized directories. These do not claim to be a complete collection of all reverse listing city directories produced.

ERIS has made every effort to provide accurate and complete information but shall not be held liable for missing, incomplete or inaccurate information. To complete this search we used the general range(s) below to search for relevant findings. If you believe there are additional addresses or streets that require searching please contact us at 866-517-5204.

Search Criteria:
2200-2325 of Bancroft Way
2225-2325 of Channing Way
2200-2325 of Durant Ave
BEG-2400 of Ellsworth St

Re: Records Search

To bornite@comcast.net <bornite@comcast.net>

Thank you for contacting Alameda County Department of Environmental Health (ACDEH) Certified Unified Program Agency (CUPA) for your Public Records Act Request.

We have no ACDEH CUPA records for the address(es) you requested.

Please note that ACDEH CUPA only has files for sites within its jurisdiction and some cities within Alameda County are not part of the ACDEH CUPA jurisdiction. In those cases we advise that you contact the Fire or Planning Department of that city for any records. **Please view our Jurisdiction List in this link:**
https://deh.acgov.org/hazmat-assets/docs/CUPA-jurisdictions.pdf

In addition, ACDEH has other divisions which may have records for the requested address(es). I have listed the divisions below and who to contact to acquire records if relevant.

- Solid/Medical Waste

  Contact: LaTresca Porter at latresca.porter@acgov.org

- Operations Division (retail food, recreation, and tattoo parlors)

  Contact: dehwebmain@acgov.org

- Vector Control Division

  Contact: Daniel Wilson at daniel.wilson@acgov.org

- Land and Water Division (Local Oversite Program (LOP) and Onsite Wastewater Treatment Systems)

  The links listed below may be helpful to gather information on LOP sites. The search on the geotracker link may be conducted by address or site name. If you cannot find documents you are searching for then please contact LOP directly.
  Contact: deh.loptoxic@acgov.org
  https://deh.acgov.org/landwater/index.page
  http://geotracker.waterboards.ca.gov/

Due to the COVID-19 pandemic, all requested files are provided electronically.

However, once the precautionary measures related to COVID-19 are lifted, our office may make files available by appointment for review on Thursdays and Fridays from 9:00 AM until 12:00 noon. We will keep our requestors aware of this situation as it progresses.

Please send all future requests to dehcupafilereview@acgov.org.

Please reach out to us if you have any further questions or clarifications.

Thank you,
Alameda County CUPA
Alameda County Environmental Health
1131 Harbor Bay Pkwy

- No Digital Data Available
- Unmapped

N

The pin displayed on the map is an approximate point selected by the user and does not represent an authoritative property location.

This map complies with FEMA's standards for the use of digital flood maps if it is not void as described below. The basemap shown complies with FEMA's basemap accuracy standards

The flood hazard information is derived directly from the authoritative NFHL web services provided by FEMA. This map was exported on 6/19/2023 at 2:14 PM and does not reflect changes or amendments subsequent to this date and time. The NFHL and effective information may change or become superseded by new data over time.

This map image is void if the one or more of the following map elements do not appear: basemap imagery, flood zone labels, legend, scale bar, map creation date, community identifiers, FIRM panel number, and FIRM effective date. Map images for unmapped and unmodernized areas cannot be used for regulatory purposes.

LIST OF APPENDICES

APPENDIX A BLAINE TECH SERVICES, INC. – FIELD NOTES

APPENDIX B TEST AMERICA – LABORATORY REPORT

1.0 INTRODUCTION

Conestoga-Rovers & Associates (CRA) prepared this report on behalf of Equilon Enterprises LLC dba Shell Oil Products US (Shell).

1.1 SITE INFORMATION

Site Address	2200 Durant Avenue, Berkeley
Site Use	Independent Shell-branded Service Station
Shell Project Manager	Denis Brown
CRA Project Manager	Peter Schaefer
Lead Agency and Contact	TMD, Geoffery Fiedler
Shell SAP Code	135097
Shell Incident No.	98995189

Date of most recent agency correspondence was March 29, 2010 (electronic).

2.0 SITE ACTIVITIES, FINDINGS, AND DISCUSSION

2.1 CURRENT QUARTER'S ACTIVITIES

Blaine Tech Services, Inc. (Blaine) gauged and sampled the wells according to the established monitoring program for this site. Prior to this sampling event, Blaine redeveloped the site wells.

CRA prepared a vicinity map (Figure 1), a groundwater contour and chemical concentration map (Figure 2), and a groundwater data table (Table 1). Blaine's field notes are presented in Appendix A, and the laboratory report is presented in Appendix B.

2.2 CURRENT QUARTER'S FINDINGS

Groundwater Flow Direction	Southerly to southeasterly
Hydraulic Gradient	0.06

Depth to Water	23.24 to 27.64 feet below top of well casing

2.3 PROPOSED ACTIVITIES

As discussed in our August 24, 2011 meeting with Berkeley Toxics Management Division and San Francisco Bay Regional Water Quality Control Board (RWQCB), CRA on behalf of Shell, will submit a site conceptual model intended to address the deficiencies identified in the meeting. CRA recommends discontinuing groundwater monitoring and reporting, pending the RWQCB's review of the case for closure. No additional groundwater sampling events are scheduled.

2.4 DISCUSSION

CRA is submitting a site conceptual model under separate cover. Based on current concentration trends, CRA requests that the City of Berkeley Toxics Management Division review this case for closure.

All of Which is Respectfully Submitted,
CONESTOGA-ROVERS & ASSOCIATES

Peter Schaefer, CHG, CEG

Aubrey K. Cool, PG

Notes:
TPHd = Total petroleum hydrocarbons as diesel analyzed by modified EPA Method 8015
TPHg = Total petroleum hydrocarbons as gasoline analyzed by EPA Method 8260B; prior to October 26, 2001, analyzed by EPA Method 8015 unless otherwise noted.
BTEX = Benzene, toluene, ethylbenzene, and total xylenes analyzed by EPA Method 8260B
MTBE = Methyl tertiary-butyl ether analyzed by method noted
TBA = Tertiary-butyl alcohol analyzed by EPA Method 8260B
DIPE = Di-isopropyl ether analyzed by EPA Method 8260B
ETBE = Ethyl tertiary-butyl ether analyzed by EPA Method 8260B
TAME = Tertiary-amyl methyl ether analyzed by EPA Method 8260B
TOC = Top of casing elevation, in feet relative to mean sea level
SPH = Separate-phase hydrocarbons
GW = Groundwater
DO = Dissolved oxygen
µg/L = Micrograms per liter
ft = Feet
MSL = Mean sea level
mg/L = Milligrams per liter
<n = Below detection limit
<x = Not detected at reporting limit x
--- = Not analyzed or available
ND = Not detected at or above reporting limit; see laboratory analytical report for details.
(D) = Duplicate sample

a = Depth to liquid/Liquid surface elevation.
b = Chromatogram pattern indicated an unidentified hydrocarbon; hydrocarbon does not match pattern of laboratory's standard.
c = Not confirmed during re-sampling.
d = Analyzed for volatile and semi-volatile organics. Only detection is carbon disulfide at 16 ug/L.
e = Laboratory reported 60 ug/L TPPH in the equipment blank.
f = Erroneous laboratory data.
g = Laboratory reported 2.1 ug/L benzene and 0.64 ug/L toluene in the equipment blank.

TABLE 1

GROUNDWATER DATA
INDEPENDENT SHELL BRANDED SERVICE STATION
2200 DURANT AVENUE, BERKELEY, CALIFORNIA

Well ID	*Date*	*TPHd* (µg/L)	*TPHg* (µg/L)	*B* (µg/L)	*T* (µg/L)	*E* (µg/L)	*X* (µg/L)	*MTBE 8020* (µg/L)	*MTBE 8260* (µg/L)	*TBA* (µg/L)	*DIPE* (µg/L)	*ETBE* (µg/L)	*TAME* (µg/L)	*TOC* (ft MSL)	*Depth to Water* (ft TOC)	*GW Elevation* (ft MSL)	*DO Reading* (mg/L)

h = Sample was analyzed outside the recommended holding time.
k = The concentration reported reflects individual or discrete unidentified peaks not matching a typical fuel pattern.
l = Analyzed by EPA Method 8015B (M).
m = Analyte was detected at a concentration below the reporting limit and above the laboratory method detection limit. Reported value is estimated.
n = The sample chromatographic pattern for TPH does not match the chromatographic pattern of the specified standard. Quantitation of the unknown hydrocarbon(s) in the sample was based upon the specified standard.
o = Sample also analyzed for petroleum hydrocarbons as motor oil and hydraulic oil; none were detected.
p = Sample also analyzed for petroleum hydrocarbons as motor oil and hydraulic oil; hydraulic oil detected at 174 µg/L and motor oil not detected.

Wells MW-8, MW-13, MW-14, MW-16, and EW-2 completed in perched zone. Wells MW-2 and MW-4 located at 2140 Durant Ave. also completed in perched zone.
October 1993 well survey relative to monument at Fulton Street and Durant Avenue - 191.77 feet MSL. Previous survey relative to site datum of 200 feet.
All site wells except MW-7 surveyed March 21, 2002 by Virgil Chavez Land Surveying

LABORATORY REPORT

Prepared For: Blaine Tech San Jose/CRA Shell
1680 Rogers Avenue
San Jose, CA 95112-1105
Attention: Lorin King

Project: 2200 Durant Ave., Berkeley, CA

Sampled: 09/15/11
Received: 09/17/11
Issued: 09/27/11 17:03

NELAP #01108CA California ELAP#2706 CSDLAC #10256 AZ #AZ0671 NV #CA01531

The results listed within this Laboratory Report pertain only to the samples tested in the laboratory. The analyses contained in this report were performed in accordance with the applicable certifications as noted. All soil samples are reported on a wet weight basis unless otherwise noted in the report. This Laboratory Report is confidential and is intended for the sole use of TestAmerica and its client. This report shall not be reproduced, except in full, without written permission from TestAmerica. The Chain of Custody, 1 page, is included and is an integral part of this report.
This entire report was reviewed and approved for release.

DATA QUALIFIERS AND DEFINITIONS

ND Analyte NOT DETECTED at or above the reporting limit or MDL, if MDL is specified.

RPD Relative Percent Difference

ADDITIONAL COMMENTS

For 8260 analyses:

Due to the high water solubility of alcohols and ketones, the calibration criteria for these compounds is <30% RSD.
The average % RSD of all compounds in the calibration is 15%, in accordance with EPA methods.

For Volatile Fuel Hydrocarbons (C4-C12):

Volatile Fuel Hydrocarbons (C4-C12) are quantitated against a gasoline standard. Quantitation begins immediately before TBA-d9.

PHASE I ENVIRONMENTAL SITE ASSESSMENT QUESTIONNAIRE

The following questionnaire is required by the ASTM Standard E1527-13 and E1527-21, which adheres to the All Appropriate Inquiries (AAI) Rule (United States Environmental Protection Agency) (40 CFR 312).

As defined by ASTM, the User of the report is the *"party seeking to use Practice E1527 to complete an environmental site assessment of the property. A user may include, without limitation, a potential purchaser of property, a potential tenant of property, an owner of property, a lender, or a property manager. The user has specific obligations for completing a successful application of this practice."*

PROPERTY ADDRESS:	2298 DURANT AVE, 2360 ELLSWORTH ST,
PROPERTY CITY, STATE ZIP:	BERKELEY, CA 94704-1521 BERKELEY, CA 94704-1577

1. **Environmental liens that are filed or recorded against the property (40 CFR 312.25)**

   Did a search of land title records (or judicial records) identify any environmental liens filed or recorded against the subject property under federal, tribal, state or local law?

   [ ] YES [X] NO

   TBC - Title search underway.

2. **Activity and use limitations (AULs) that are in place on the subject property or that have been filed or recorded against the subject property (40 CFR 312.26(a)(1)(v) and (vi))**

   Did a search of land title records (or judicial records) identify any AULs, such as engineering controls, land use restrictions or institutional controls that are in place at the subject property and/or have been filed or recorded against the subject property under federal, tribal, state or local law?

   [ ] YES [X] NO

3. **Specialized knowledge or experience of the person seeking to qualify for the LLP (40 CFR 312.28)**

   Do you have any specialized knowledge or experience related to the subject property or nearby properties? For example, are you involved in the same line of business as the current or former occupants of the subject property or an adjoining property so that you would have specialized knowledge of the chemicals and processes used by this type of business?

   [ ] YES [X] NO

PARTNER

4. Relationship of the purchase price to the fair market value of the subject property if it were not contaminated (40 CFR 312.29)

Does the purchase price being paid for this subject property reasonably reflect the fair market value of the property? If you conclude that there is a difference, have you considered whether the lower purchase price is because contamination is known or believed to be present at the subject property?

[X] YES [ ] NO

---

5. Commonly known or reasonably ascertainable information about the Property (40 CFR 312.30)

Are you aware of commonly known or reasonably ascertainable information about the subject property that would help the environmental professional to identify conditions indicative of releases or threatened releases?

[ ] YES [X] NO

---

a. Do you know the past uses of the subject property?

[X] YES [ ] NO

---

b. Do you know of specific chemicals that are present or once were present at the subject property?

[ ] YES [X] NO

---

c. Do you know of spills or other chemical releases that have taken place at the subject property?

[ ] YES [X] NO

---

d. Do you know of any environmental cleanups that have taken place at the subject property?

[ ] YES [X] NO

---

e. Do you have any prior knowledge that the subject property was developed as a gas station, drycleaner, manufacturing/industrial facility in the past?

[ ] YES [X] NO

---

f. Are you aware of historical use of hazardous materials or petroleum products used or present on the subject property?

[ ] YES [X] NO

---

g. Do you know if the property is currently or was formerly equipped with underground storage tanks (USTs) or septic tanks?

[ ] YES [X] NO

h. Do you know of any past, threatened or pending lawsuits or administrative proceedings concerning a release or threatened release of any hazardous substance or petroleum products involving the property by any owner or occupant of the subject property?

[ ] YES [X] NO

6. The degree of obviousness of the presence or likely presence of contamination at the subject property, and the ability to detect the contamination by appropriate investigation (40 CFR 312.31)

Based on your knowledge and experience related to the subject property, are there any obvious indicators that point to the presence or likely presence of releases at the subject property?

[ ] YES [X] NO

ENVIRONMENTAL SITE ASSESSMENT QUESTIONNAIRE

Please complete to the best of your knowledge. For those questions that are not applicable, please respond with an "N/A". For those questions that are unknown, please respond with "unknown".

1. PROPERTY INFORMATION:

Property Name: 2298 Durant Ave and 2360 Ellsworth Street		
Property Address: 2298 Durant Ave and 2360 Ellsworth Street		
City Berkeley	State California	Zip 94704
Assessor's Parcel Number 5518871, 5518872		
Property Owner & Contact Information: Fred Feller and Peggy Chang (510) 422-2367, Nhan Nguyen Le (916) 224-3715		
Date Property Owner Purchased:		
Key Site Manager & Contact Information:		

2. COMPLETED BY

Signature Lucas Butler	Date 20 June 2023
Printed Name Lucas Butler	Relation to Subject Property Prospective Buyer

3. PREVIOUS INVESTIGATIONS

Have any previous environmental investigations been performed at the property, including Phase I ESAs, Phase II Subsurface Investigations, Remediation, Asbestos or Lead-Based Paint surveys?_____
_____(If yes, please provide copies)

4. PROPERTY DESCRIPTION

Property Size: 12,220 Sqft. Number of Building(s): 2

Size of Building(s): 5,004 Sqft - 2298 Durant, 5,037 Sqft – 2360 Ellsworth

Date of Construction: 1940 - 2298 Durant, 1964 - Ellsworth

Property Type: (please circle)

(Multi-Family) Hotel Mobile Home Park Retail/Commercial Industrial (Office)

Other: Durant – Office, Ellsworth - MF

Please provide Rent Roll if Applicable.

Historical Use of Property: Office and Multi-Family

5. Surrounding Property Uses

Direction	Use
North	Street
South	Res
East	Street
West	Res

Are you aware of any potential environmental concerns associated with surrounding properties?

_____ YES _____NO

If yes, please describe: _____

_____

_____

_____

6. Utilities & Services

Please provide the name of the utility or contractor providing the following:

Electric	_____	Bio-hazardous Waste	_____
Gas	_____	Elevator Maintenance	_____
Potable Water	_____	Used Grease	_____
Sanitary Sewer	_____	Hazardous Waste	_____

7. On Site Operations

Are you aware of any of the following conditions, either past or present, on the property?		
Condition	**Response**	**If yes, please describe**
1. Stored Chemicals	☐ Yes ☐ No	
2. Underground Storage Tanks	☐ Yes ☐ No	
3. Aboveground Storage Tanks	☐ Yes ☐ No	
4. Spills or Releases	☐ Yes ☐ No	
5. Dump Areas/Landfills	☐ Yes ☐ No	
6. Waste Treatment Systems	☐ Yes ☐ No	
7. Clarifiers/Separators	☐ Yes ☐ No	
8. Vents/Odors	☐ Yes ☐ No	
9. Floor Drains/Sumps	☐ Yes ☐ No	
10. Stained Soil	☐ Yes ☐ No	
11. Electrical Transformers	☐ Yes ☐ No	
12. Hydraulic Lifts/Elevators	☐ Yes ☐ No	
13. Dry Cleaning Operations	☐ Yes ☐ No	
14. Oil/Gas/Water/Monitoring Wells	☐ Yes ☐ No	
15. Environmental Permits	☐ Yes ☐ No

Alameda County, California, Western Part

150—Urban land-Tierra complex, 2 to 5 percent slopes

Map Unit Setting

National map unit symbol: hb7c
Elevation: 100 to 1,100 feet
Mean annual precipitation: 14 to 25 inches
Mean annual air temperature: 57 to 59 degrees F
Frost-free period: 300 to 320 days
Farmland classification: Not prime farmland

Typical profile

H1 - 0 to 12 inches: loam
H2 - 12 to 32 inches: clay
H3 - 32 to 60 inches: sandy clay loam

Properties and qualities

Slope: 2 to 5 percent
Depth to restrictive feature: More than 80 inches
Drainage class: Moderately well drained
Runoff class: High
Capacity of the most limiting layer to transmit water (Ksat): Very low to moderately low (0.00 to 0.06 in/hr)
Depth to water table: More than 80 inches
Frequency of flooding: None
Frequency of ponding: None
Maximum salinity: Nonsaline to very slightly saline (0.0 to 2.0 mmhos/cm)
Available water supply, 0 to 60 inches: Very low (about 1.8 inches)

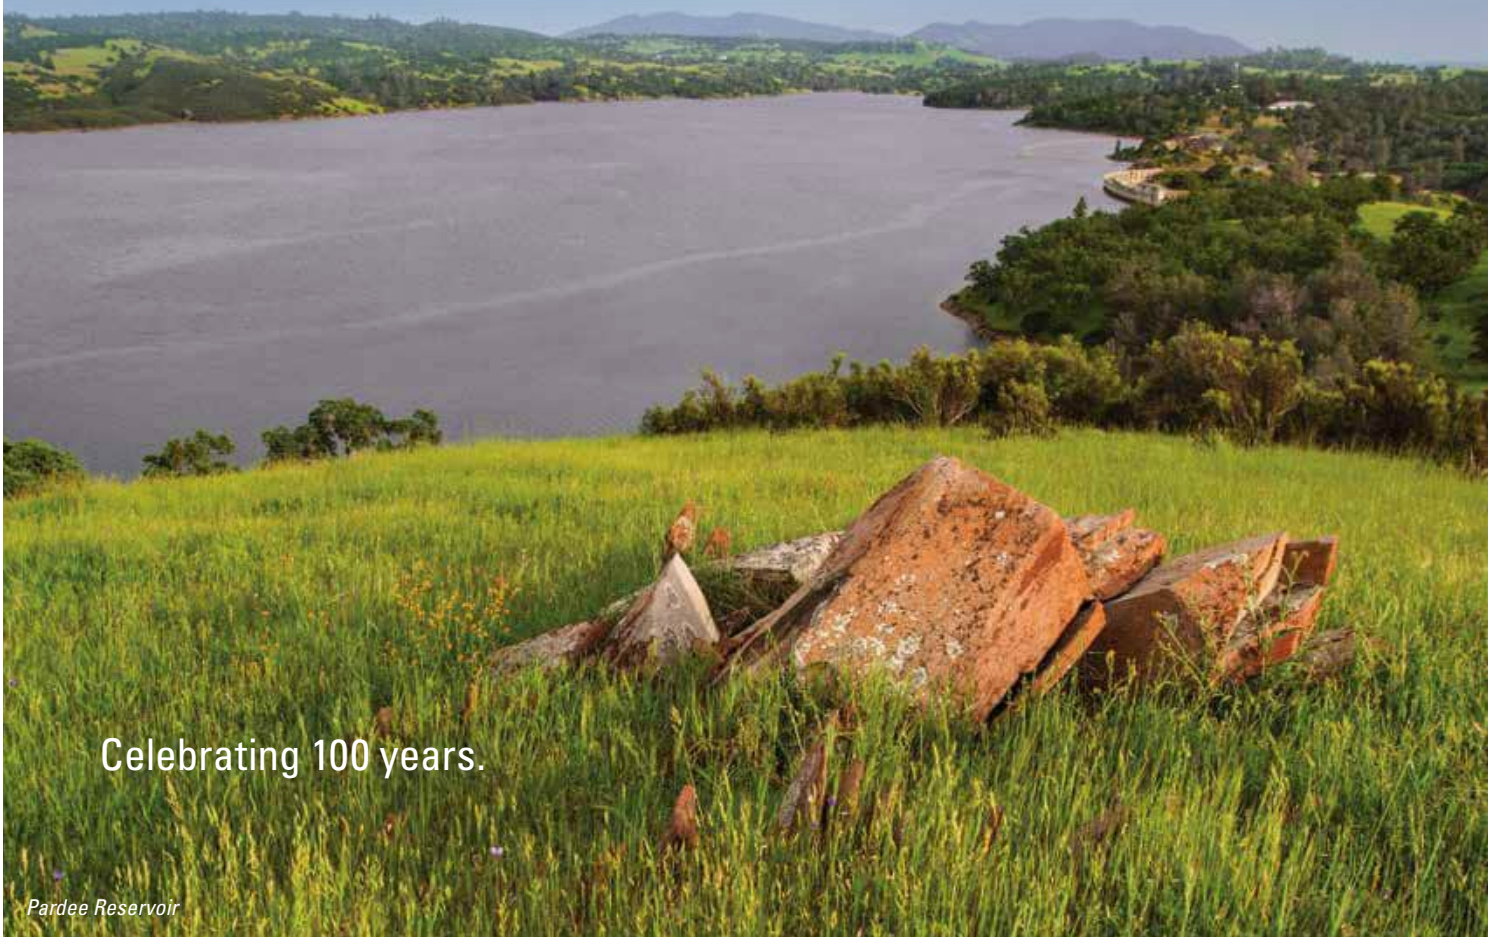
EBMUD

FLOWING INTO THE FUTURE 1923–2023

2022 Annual Water Quality Report

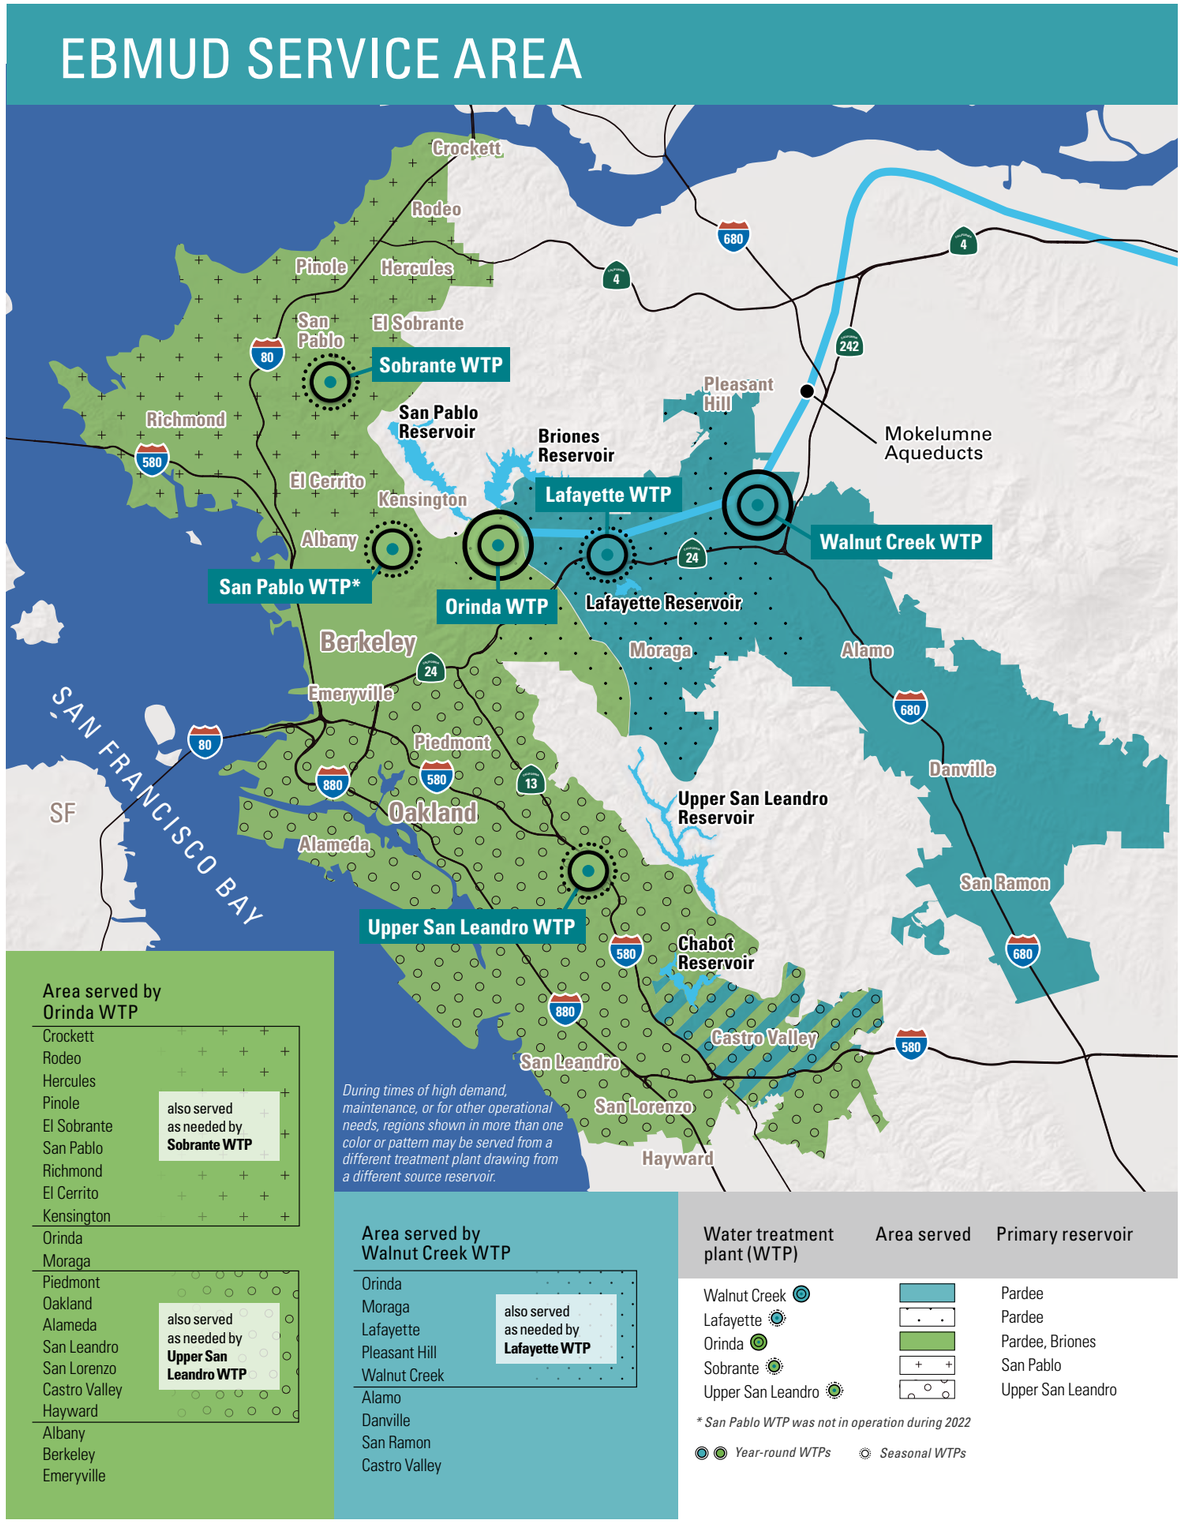
January through December

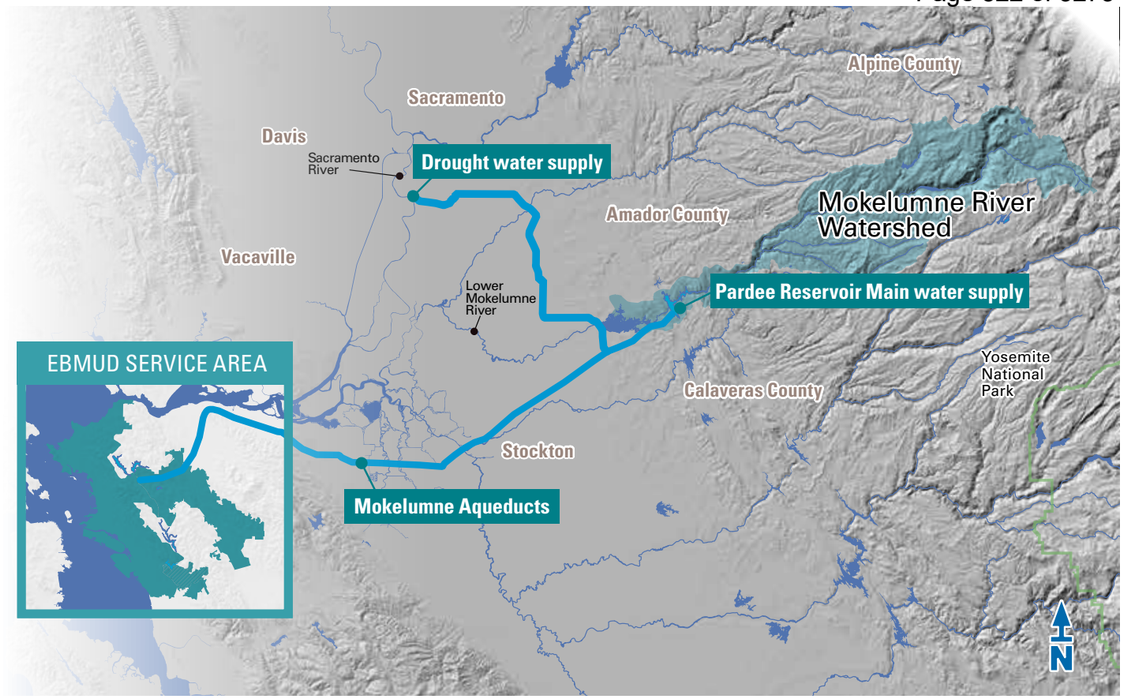
East Bay Municipal Utility District is pleased to report that in 2022 your drinking water quality met or surpassed every state and federal requirement that safeguards public health.



Celebrating 100 years.

Pardee Reservoir





A century of water service

EBMUD's drinking water makes an incredible journey to arrive at our taps.

Most of the high-quality water flowing to the taps of 1.4 million East Bay customers originates from the 577-square mile Mokelumne River Watershed on the western slope of the Sierra Nevada. This area, largely protected from human activity, consists mostly of national forests and undeveloped lands.

Snowmelt from Alpine, Amador, and Calaveras counties remains our primary water source as it has for nearly a century. Water from the Mokelumne River flows into Pardee Reservoir near Valley Springs, CA. Three large aqueducts transport water 90 miles from Pardee Reservoir to our treatment facilities and local watersheds, then deliver it to every customer and hydrant in our distribution system. During dry years, EBMUD may purchase water from other watersheds, like the Sacramento River, to meet customer needs.

In 2022, the year started with pandemic and drought, and ended with plentiful storms. Through it all, EBMUD worked around the clock, behind the scenes, and on your street. Crews operated a complex network of reservoirs, pipes, pumps, and water treatment plants to provide safe drinking water.

Historic problems, visionary solutions

Drought and climate change generate renewed interest in the origin of our water. Snowmelt that feeds the Mokelumne River remains our primary water source as it has, for a century. But with climate change and multi-year droughts posing ever-greater challenges, EBMUD plans far ahead for our region's water needs – currently through 2050 – and has outlined actions to manage uncertainties. Our diversified water supply portfolio makes the most of our region's resources.

In 2022, EBMUD again activated the Freeport Regional Water Facility to draw supplemental supplies from the Sacramento River. During a second year of statewide drought, 2022 marked the third time that Freeport brought emergency relief to low reservoir levels in the East Bay. During the third full year of the Covid-19 pandemic, and at a time of significant water scarcity, EBMUD delivered a total of 33 thousand acre-feet of water to its customers using this $500 million investment.

To ensure the safety of your drinking water, every drop of water delivered to customers was treated and the water treatment plants monitored water quality continuously. More than 20,000 laboratory tests are conducted each year, testing for the presence of more than 100 substances including microorganisms, pesticides, herbicides, asbestos, lead, copper, petroleum products, and by-products of industrial and water treatment processes.

Also in 2022, EBMUD and partners in San Joaquin County completed construction of facilities for groundwater banking project called Demonstration Recharge Extraction Aquifer Management, or DREAM. The completion of the project added a regional solution to the perpetual challenge of drought. As the calendar year 2022 came to an end, California seemed poised to bust out of drought with record rain and snowfall. Although EBMUD did not turn on the DREAM project in 2022, the quick changes in weather pattern from calendar year 2022 to 2023 increased momentum on this new endeavor.

Source water protection

EBMUD evaluates our water sources to ensure great water quality with sanitary surveys of the Mokelumne River Watershed and East Bay watersheds at least every five years. These surveys identify potential sources of contaminants in the watersheds, analyze trends, and recommend watershed management practices to protect raw water quality. The most recent surveys were completed in 2021 and include data for 2015 to 2019 for the Mokelumne River Watershed and 2015 to 2018 for the East Bay watersheds. Sources of potential contamination may include runoff from fire and fuels reduction efforts, geologic hazards, erosion, wildlife and livestock, sanitation facilities, recreation, urban storm water, and transportation corridors. Efforts to protect source waters from all potential contaminating activities are an integral part of EBMUD's water quality management. To review these reports, contact EBMUD or the State Water Resources Control Board.

Where your water is treated

Before reaching your tap, EBMUD treats the water at one of our water treatment plants in the East Bay. Some customers receive water from different treatment plants depending on the time of year. The taste and odor of your tap water may change throughout the year due to climate impacts, such as severe storms, drought and wildfires; operational changes, such as when a treatment plant is shut down for maintenance; or due to changes in the source water. These water treatment plant locations are shown on the map on page 2.

What was detected and reported

In 2022, EBMUD treated raw water from multiple sources and consistently provided high-quality drinking water, meeting or surpassing every public health requirement set by the State Water Resources Control Board (State Water Board) and the U.S. Environmental Protection Agency (USEPA).

The tables on the following pages show the measured amounts of contaminants detected in 2022 or in the most recent year sampling was required. Samples were collected in EBMUD's source waters, at water treatment plants, in the distribution system, and at customer taps.

Although EBMUD tests for more than 100 substances, this report only lists those detected at or above the state or federal level required for reporting. In this case, no news is good news! See a full list of parameters with most recent monitoring results.*

*2022 All Parameters Data Table.pdf

Mokelumne River

Table 1 Regulated for public health

These contaminants are regulated to protect your health. They have maximum contaminant levels, known as primary MCLs, set by the State Water Board or the USEPA. These levels are set as close to the established public health goals as is economically and technologically feasible.

Table 2 – Regulated for drinking water aesthetics

These contaminants are regulated to maintain aesthetic qualities such as taste, odor, and appearance of drinking water. They have maximum contaminant levels, also known as secondary MCLs, set by the State Water Board.

Table 3 – Parameters with Notification Level

This table includes other contaminants that have state notification levels, also known as NLs. NLs are health-based advisory levels established by the State Water Board for chemicals in drinking water that water agencies are not required to monitor for and that lack maximum contaminant levels (MCLs). When chemicals are found at concentrations greater than their NL, certain requirements and recommendations apply.

Table 4 – Other parameters of interest to customers

These water measurements, such as pH, hardness and alkalinity, may be of interest to customers.

How to read the water quality tables

Find your location on the map on page 2. Note which water treatment plant(s) serve that area.

1 Go to **column 1** in the tables on pages 6–8 to find the contaminant you are interested in. *Remember – no news is good news!*

2 **Column 2** lists the state or federal goal. At that amount or lower, there is no known or expected risk to health from the contaminant's presence in drinking water. Not all listed contaminants have state or federal goals.

3 **Column 3** notes the highest amount the State Water Board or the USEPA allows. This amount is usually not as low as the public health goal in **column 2**.

4 **Column 4** lists the average amount detected across the EBMUD service area or at designated locations.

5 Find the column that corresponds to the water treatment plant or plants that serve you. This is the range of concentration of the contaminant detected in your area's water.

6 The last column lists how the contaminant typically gets into your drinking water.

1 Regulated for public health (Note)	2 State or federal goal (PHG, MCLG or MRDLG)	3 Highest amount allowed (MCL, MRDL or AL)	4 System average	5 WATER TREATMENT PLANTS: Walnut Creek	Lafayette	Orinda	Sobrante	Upper San Leandro	6 Typical sources

Notes

A See **Pg 10** for additional information about fluoride in drinking water

B 90th percentile value at 50 sample sites. Lead monitoring was last completed in 2021. See **Pg 10** for additional lead information.

C Highest running annual average.

D Chloramine residuals in the distribution system are measured as an equivalent quantity of chlorine. When the chloramine residual cannot be detected,the sample is further analyzed to ensure that microbiological water quality is in compliance with regulations.

E This value is the highest locational running annual average, on which compliance is based. Water treatment plant values show the range of individual sample results throughout the distribution system.

Key Terms

AL — ***Regulatory Action Level***. The concentration which, if exceeded, triggers treatment or other requirements that a water system must follow.

DBP — ***Disinfection By-Products***. These are formed when chlorine and/or ozone reacts with natural constituents in water. Trihalomethanes (THMs), haloacetic acids (HAAs), chlorate, and bromate are disinfection by-products.

D/DBPs — ***Disinfectants and Disinfection By-products***. Disinfectant residuals, disinfection byproducts and byproduct precursors.

MCL — ***Maximum Contaminant Level***. The highest level of a contaminant that is allowed in drinking water. Primary MCLs are set as close to the PHGs or MCLGs as is economically and technologically feasible. Secondary MCLs address odor, taste and appearance of drinking water.

MCLG — ***Maximum Contaminant Level Goal***. The level of a contaminant in drinking water below which there is no known or expected risk to health. MCLGs are set by the USEPA.

MRDL — ***Maximum Residual Disinfectant Level***. The highest level of a disinfectant allowed in drinking water. There is convincing evidence that addition of a disinfectant is necessary for control of microbial contaminants.

MRDLG — ***Maximum Residual Disinfectant Level Goal***. The level of a drinking water disinfectant below which there is no known or expected risk to health. MRDLGs do not reflect the benefits of the use of disinfectants to control microbial contaminants.

NA — ***Not Applicable***.

Primary Drinking Water Standard — These standards regulate contaminants that affect health by setting MCLs, MRDLs, and Treatment Techniques (TT) along with their monitoring and reporting requirements.

PHG — ***Public Health Goal***. The level of a contaminant in drinking water below which there is no known or expected risk to health. PHGs are set by the California EPA.

TOC — ***Total Organic Carbon***. A measure of organic content in the water.

Turbidity — A measure of the cloudiness of water. Turbidity is monitored because it is a good indication of the effectiveness of our filtration systems.

TT — ***Treatment Technique***. A required process intended to reduce the level of a contaminant in drinking water.

Units

gpg — ***grains per gallon***

NTU — ***Nephelometric Turbidity Unit***. A measure of the cloudiness of water

ppm — ***parts per million***. One ppm is like 1 second in 11.5 days. (mg/L)

ppb — ***parts per billion***. One ppb is like 1 second in nearly 32 years. (µg/L)

ppt — ***parts per trillion***. One ppt is like 1 second in nearly 32,000 years. (ng/L)

TON — ***Threshold Odor Number***. A measure of odor in water

µS/cm — ***microsiemens per centimeter***. A measure of electrical conductance

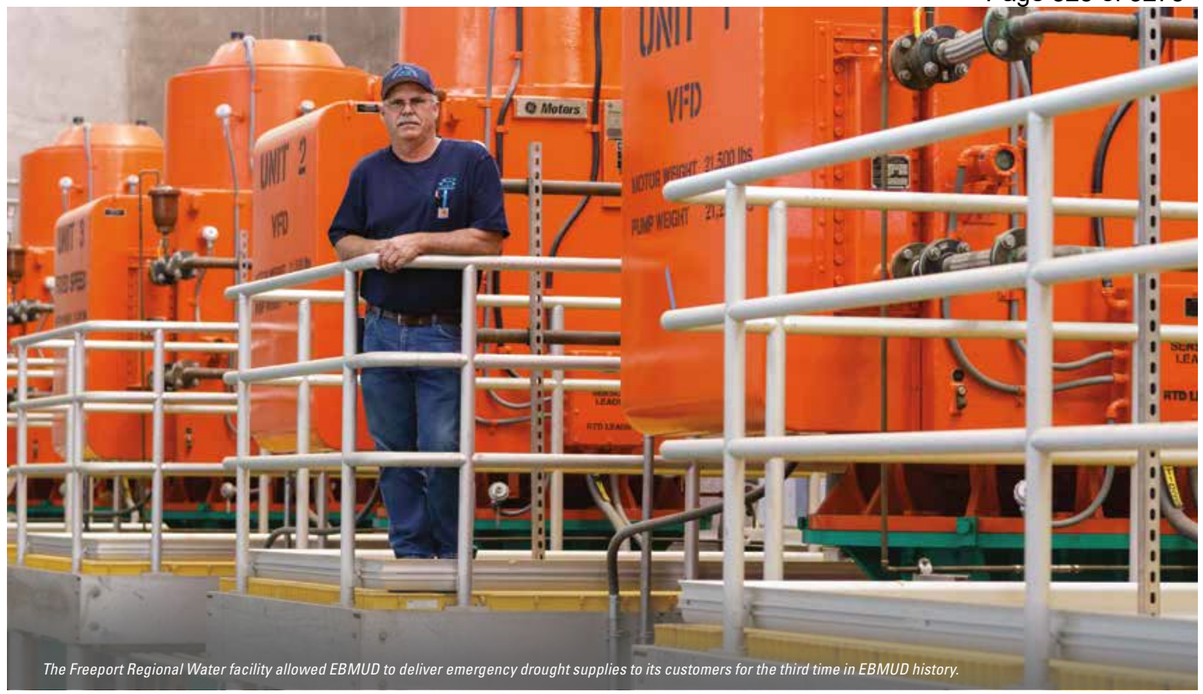
Notes

F These data are collected in the distribution system. The sample locations are assigned to the most representative water treatment plant, but the data may also represent water from another plant.

G **Grains Per Gallon (gpg)** is a measure of water hardness. Knowing the amount can help improve the function of dishwashers, cooling equipment and other industrial processes. Refer to your appliance manufacturer's instruction manual for the optimum grains per gallon level.

H Walnut Creek, Lafayette, and Orinda water treatment plants are not required to monitor TOC. Their treated water TOC values are similar to their source water.



The Freeport Regional Water facility allowed EBMUD to deliver emergency drought supplies to its customers for the third time in EBMUD history.

Water quality regulations

This report reflects changes in drinking water regulatory requirements in 2022. In order to ensure that tap water is safe to drink, the State Water Board and the USEPA prescribe regulations that limit the amount of certain contaminants in water provided by public water systems. California Department of Public Health (CDPH) and United States Food and Drug Administration regulations establish limits for contaminants in bottled water that provide the same protection for public health. Additional information on bottled water is available on the CDPH website.°

The sources of drinking water (both tap water and bottled water) include rivers, lakes, streams, ponds, reservoirs, springs and wells. As water travels over the surface of the land or through the ground, it dissolves naturally occurring minerals and, in some cases, radioactive material, and can pick up substances resulting from the presence of animals or from human activity.

Contaminants that may be present in source water include:

Microbial contaminants, such as viruses, bacteria and protozoa, such as *Cryptosporidium*, that may come from sewage treatment plants, septic systems, agricultural livestock operations and wildlife.

Inorganic contaminants, such as salts and metals, that can be naturally-occurring or result from urban stormwater runoff, industrial or domestic wastewater discharges, oil and gas production, mining or farming.

Pesticides and herbicides, that may come from a variety of sources, such as agriculture, urban stormwater runoff, and residential uses.

Organic chemical contaminants, including synthetic and volatile organic chemicals, that are by-products of industrial processes and petroleum production and can also come from gas stations, urban stormwater runoff, agricultural application and septic systems.

Radioactive contaminants that can be naturally occurring or be the result of oil and gas production and mining activities.

State and Federal regulatory agencies are working on new requirements for per- and polyfluoroalkyl substances (the so-called "forever chemicals") as well as microplastics. EBMUD is following these developments closely and plans to initiate new monitoring programs for these classes of compounds in 2023.

Drinking water, including bottled water, may reasonably be expected to contain at least small amounts of some contaminants. The presence of contaminants does not necessarily indicate that water poses a health risk. Additional information about contaminants and potential health effects is available on the USEPA website.* Contact your healthcare provider or visit the Centers for Disease Control and Prevention (CDC) website for guidelines on using tap water for health or medical purposes.

Vulnerable populations

Some people may be more vulnerable to contaminants in drinking water than the general population. Immuno-compromised persons such as persons with cancer undergoing chemotherapy, persons who have undergone organ transplants, people with HIV/AIDS or other immune system disorders, some elderly and infants can be particularly at risk to infection.

These people should seek advice about drinking water from their health care providers. USEPA/CDC guidelines on appropriate means to lessen the risk of infection by *Cryptosporidium* and *Giardia* and other microbial contaminants are available on the CDC website.◆

Cryptosporidium and Giardia

Cryptosporidium and *Giardia* are microbial contaminants that are naturally present in the environment and found in surface water throughout the United States. Filtration is highly effective in removing these contaminants; however, the most used filtration methods cannot guarantee 100 percent removal. In 2022 our monitoring detected *Cryptosporidium* and *Giardia* in our source water, prior to reaching EBMUD water treatment plants.

Cryptosporidium and *Giardia* must be ingested to cause disease, and it may spread through means other than drinking water. Most healthy individuals can overcome the disease within a few weeks. However, immuno-compromised people, infants and small children, and the elderly are at greater risk of developing life-threatening illness. We encourage these individuals to consult their physician regarding appropriate precautions to take to avoid infection.

A century of serving the East Bay

In 1923, East Bay residents voted to form the East Bay Municipal Utility District. Frustrated by decades of poor and unreliable local water supplies, they mobilized to create a public water system to replace 18 private companies that struggled to provide sufficient water for a burgeoning region.

Determined engineers and hardworking laborers built Pardee Dam – the highest in the United States at the time – and built an aqueduct to bring high-quality water 90 miles from the High Sierra to the East Bay. We didn't stop there.

In the 1930s, EBMUD chartered a new course in water service. Working with the UC Berkeley School of Civil Engineering, EBMUD helped to establish a corrosion control index. More than a century later, this index continues to serve as the guide for water providers across the nation to optimize corrosion control treatment to extend the life of materials.

In 1935, the heart of the EBMUD system came online: Orinda Water Treatment Plant. This first, and largest, of six water treatment plants that make up the EBMUD system today operates 24/7, year-round, to provide the highest quality drinking water to more than 800,000 of our 1.4 million water customers.

Following many improvements to the water system over the years, in 2022, EBMUD began a five-year, $325 million improvement project to add new multi-barrier disinfection technology to this historic facility for the next 100 years of service. The additions of an ultraviolet disinfection facility and a chlorine contact basin will enhance the treatment process, maintain high water quality, and reduce the formation of disinfection byproducts. As climate change challenges us to adjust to dramatic swings in weather that greatly impact the quality and quantity of the natural water cycle, this significant investment will prepare this vital facility for a future of handling diverse water sources, more frequently, and adjusting the process in real time.

Genesis (on the right), Laboratory Technician III, and Otto, Laboratory Technician II, performing sample preparation for Haloacetic Acids (HAAs) analysis.

Through earthquakes, devastating wildfires, an unprecedented pandemic, and climate change impacts, EBMUD's commitment to serve – affordably and reliably – remains as steadfast as ever.

Lead in drinking water

If present, elevated levels of lead can cause serious health problems. Pregnant women, infants and young children are typically more vulnerable to lead in drinking water than the general population. Lead in drinking water is primarily from materials and components associated with lead in water distribution pipes and home plumbing. EBMUD replaced all known lead service pipes in its service area in the 1990s and continues to actively seek out and replace any remaining lead materials. We maintain an aggressive corrosion control program to reduce lead leaching from our water mains and customer piping. Still, lead may be present as a legacy of older plumbing, particularly older plumbing within homes. According to the USEPA, homes built before 1986 are more likely to have lead pipes or fixtures and solder that contain lead.

During 2021, 90% of lead and copper results were below the regulatory detection limit at 50 customer homes. Due to low results, EBMUD samples for lead and copper every three years with the next monitoring in 2024.

If you are concerned about elevated lead levels in your home's water, you may have your water tested. EBMUD offers our customers one free lead test per year. Approximately 3,000 customers have requested a free lead test voucher since the program began in 2017. Lead concentrations from these customer samples are typically below 1 ppb. Request a lead test voucher by calling Customer Service at 866-403-2683 or email customerservice@ebmud.com.

Also, if you suspect you have lead in your fixtures, any time your water has been sitting for several hours, you can minimize the potential for lead exposure by running your faucet for 30 seconds to 2 minutes before using water for drinking or cooking. Capture and reuse this water for other uses such as watering ornamental plants.

REQUEST A FREE LEAD TEST VOUCHER
Call 866 403 2683 or email customerservice@ebmud.com

Fluoridation

EBMUD is required by state law to add fluoride to drinking water to help prevent dental decay in consumers. Current regulations require fluoride levels in the treated water be maintained between 0.6 to 1.2 ppm with an optimum dose of 0.7 ppm. Our monitoring showed that fluoride levels in the treated water distribution system averaged 0.7 ppm. According to the American Dental Association and CDC, it is safe to use optimally fluoridated water for preparing infant formula. If an infant is primarily fed infant formula prepared with fluoridated water, there may be an increased chance for mild enamel fluorosis, but enamel fluorosis does not affect the health of the infant or the health of the infant's teeth. To lessen this chance, deionized, purified, distilled or demineralized bottled water can be used. If you have additional questions about fluoride, contact your health provider. Additional information is available on the State Water Board ⁂ and CDC websites.★

REPORT A WATER QUALITY CONCERN
Do you have a question or concern about your water quality? Call 866 403 2683. EBMUD inspectors respond to calls within one business day regarding water which appears dirty, colored, has foreign particles or unusual taste or odor.

⁂ www.waterboards.ca.gov/drinking_water/certlic/drinkingwater/Fluoridation.html
★ www.cdc.gov/fluoridation

In a century of service, EBMUD's mission did not change. However, building and construction standards changed dramatically. Crews today use heavy machinery to perform work that, historically, was done using horses and buggies.

How to contact EBMUD

For more information about water quality or to report a water quality concern, call 866-403-2683 or visit www.ebmud.com/waterquality.

If you would like this report mailed to you, email customerservice@ebmud.com or call 866-403-2683. View this report online at www.ebmud.com/wqr.

EBMUD has a seven-member Board of Directors publicly elected from wards within the EBMUD service area. We invite the public to participate in decisions affecting drinking water quality and other matters at its Board of Directors meetings held the second and fourth Tuesdays of each month. For more information, see www.ebmud.com/board-meetings.

Regulated Programs

EI ID: 10196245 ***EI Description:*** Chemical Storage Facilities

EI ID: 10196245 ***EI Description:*** Hazardous Waste Generator

Violations

Violation Date: 09/13/2021 ***Violation Source:*** CERS
Violation Program: HMRRP ***Violation Division:*** Berkeley City Toxics Management Division
Citation: HSC 6.95 25508(a)(3) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(3)
Violation Notes:

Returned to compliance on 09/21/2021. Observation: In CERS, facility is using outdated federal hazard categories for each material in the Hazardous Materials Inventory. Corrective Action: Update inventory in CERS within 30 days; de-select old hazard categories and select new ones for each material.

Violation Description:

Failure to complete and electronically submit hazardous material inventory information for all reportable hazardous materials on site at or above reportable quantities.

Evaluations

Eval Date: 09/13/2021
Violations Found: No
Eval General Type: Compliance Evaluation Inspection
Eval Type: Routine done by local agency
Eval Division: Berkeley City Toxics Management Division
Eval Program: HW
Eval Source: CERS
Eval Notes:

Toxics Management Division (TMD) was on-site to conduct hazardous materials business plan (HMBP) and hazardous waste generator (HWG) inspections. Operator provided employee training and hazardous waste receipts upon request. TMD observed fire extinguishers current as of November 2020 and defibrillator. EPA ID# CAL000076150 was inactive at time of inspection and can be reactivated using the Department of Toxic Substance Control (DTSC)'s electronic verification questionnaire (eVQ). Site is treating photo fixer/silver-only waste utilizing the silver-only waste treatment exemption. This is not regulated as treatment. Amalgum is sent off for recycling as well. TMD observed - 1x 5gallon silver-only waste container dated 6/21/2021 - 1x 1 pint container of amalgum dated 7/1/2021; Note: data in [EVAL Notes] field for some records is truncated from the source.

Eval Date: 09/13/2021
Violations Found: Yes
Eval General Type: Compliance Evaluation Inspection
Eval Type: Routine done by local agency
Eval Division: Berkeley City Toxics Management Division
Eval Program: HMRRP
Eval Source: CERS
Eval Notes:

Toxics Management Division (TMD) was on-site to conduct hazardous materials business plan (HMBP) and hazardous waste generator (HWG) inspections. Operator provided employee training and hazardous waste receipts upon request. TMD observed fire extinguishers current as of November 2020 and defibrillator. Cylinders were seismically braced. Hazardous Materials Business Plan was printed and stored on-site. TMD observed - 1x 5gallon silver-only waste container dated 6/21/2021 - 2x 249CF oxygen - 2x 50lbs nitrous oxide - 1x 1 pint container of amalgum dated 7/1/2021; Note: data in [EVAL Notes] field for some records is truncated from the source.

Eval Date: 06/30/2015
Violations Found: No
Eval General Type: Compliance Evaluation Inspection
Eval Type: Routine done by local agency
Eval Division: Berkeley City Toxics Management Division
Eval Program: HMRRP
Eval Source: CERS
Eval Notes:

Map Key	Number of Records	Direction	Distance (mi/ft)	Elev/Diff (ft)	Site	DB

Eval Date: 06/30/2015
Violations Found: No
Eval General Type: Compliance Evaluation Inspection
Eval Type: Routine done by local agency
Eval Division: Berkeley City Toxics Management Division

Eval Date: 01/30/2018
Violations Found: No
Eval General Type: Compliance Evaluation Inspection
Eval Type: Routine done by local agency
Eval Division: Berkeley City Toxics Management Division
Eval Program: HW
Eval Source: CERS
Eval Notes:

Waste fixer is kept in basement, in proper containers. Business is no longer generating waste vapo-steril. EPA ID, CAL 000 076 150, is inactive. Reactivation is not required since the only waste is the exempt spent fixer.; Note: data in [EVAL Notes] field for some records is truncated from the source.

Eval Date: 04/14/2016
Violations Found: No
Eval General Type: Other/Unknown
Eval Type: Other, not routine, done by local agency
Eval Division: Berkeley City Toxics Management Division
Eval Program: HMRRP
Eval Source: CERS
Eval Notes:

Non-Inspection related violation: Failed to submit annual Hazardous Materials Business Plan for FY17 (XD); Note: data in [EVAL Notes] field for some records is truncated from the source.

Eval Date: 01/30/2018
Violations Found: No
Eval General Type: Compliance Evaluation Inspection
Eval Type: Routine done by local agency
Eval Division: Berkeley City Toxics Management Division
Eval Program: HMRRP
Eval Source: CERS
Eval Notes:

Hazardous materials on site are consistent with what is reported on CERS. Business is no longer using Vapo-Steril and should remove this from the inventory when updating. Hazardous materials are secured from public access.; Note: data in [EVAL Notes] field for some records is truncated from the source.

Enf Action Description: Notice of Violation Issued by the Inspector at the Time of Inspection
Enf Action Notes:

Evaluations

Eval Date: 03/26/2018
Violations Found: Yes
Eval General Type: Compliance Evaluation Inspection
Eval Type: Routine done by local agency
Eval Division: Berkeley City Toxics Management Division
Eval Program: HMRRP
Eval Source: CERS
Eval Notes:

Hazardous materials inventory is consistent with what is provided on CERS. Business has old cleaners that are no longer used and kept on a pallet in the Boiler Room - these chemicals must be properly disposed of at the Alameda House Hold Hazardous Waste facility. A receipt must be obtained and forwarded to TMD. If chemicals are not properly disposed of, they must be added to the inventory.; Note: data in [EVAL Notes] field for some records is truncated from the source.

Eval Date: 06/30/2015
Violations Found: Yes
Eval General Type: Compliance Evaluation Inspection
Eval Type: Routine done by local agency
Eval Division: Berkeley City Toxics Management Division
Eval Program: HMRRP
Eval Source: CERS
Eval Notes:

Trevor indicates they have switched cleaning supplies to Lotus Pro, ozone based cleaning. He indicates they do still use tub and tile and some other cleaning materials. All ewaste and universal waste is collected and taken to Alameda County HHW. Fluorescent tubes are collected in open bin, and it is suggested to place in bag to collect any breakage. Transitioning to bulk, auto feed for pool chemicals. Suggest absorbent pigs.; Note: data in [EVAL Notes] field for some records is truncated from the source.

Eval Date: 04/14/2016
Violations Found: Yes
Eval General Type: Other/Unknown
Eval Type: Other, not routine, done by local agency
Eval Division: Berkeley City Toxics Management Division
Eval Program: HMRRP
Eval Source: CERS
Eval Notes:

Non-Inspection related violation: Failed to submit annual Hazardous Materials Business Plan for FY17 (PM); Note: data in [EVAL Notes] field for some records is truncated from the source.

Eval Date: 08/15/2022
Violations Found: No
Eval General Type: Other/Unknown
Eval Type: Other, not routine, done by local agency
Eval Division: Berkeley City Toxics Management Division
Eval Program: HMRRP
Eval Source: CERS
Eval Notes:

A second Notice of Violation was certified mailed on August 4, 2022. On site to follow-up with the open violations. Reviewed the requirements to close the violations with operator and assisted operator with CERS submittal. The deadline to comply has been extended to September 2, 2022 for operator to complete the following: - conduct employee training and provide records - update site map - update inventory - update emergency response plan Please complete the Return to Compliance form and return it to this Agency by the deadline.; Note: data in [EVAL Notes] field for some records is truncated from the source.

Eval Date: 04/19/2022
Violations Found: Yes

Map Key	Number of Records	Direction	Distance (mi/ft)	Elev/Diff (ft)	Site	DB

Eval General Type: Compliance Evaluation Inspection
Eval Type: Routine done by local agency
Eval Division: Berkeley City Toxics Management Division
Eval Program: HMRRP
Eval Source: CERS
Eval Notes:

On site for a routine Hazardous Materials Business Plan (HMBP) inspection with Jamie Cooney, Toxics Management Division (TMD). Consent to enter and conduct inspection activities was provided by Trevor Johnson, Assistant GM. The following materials were observed in amounts that meet or exceed the minimum volumes required for disclosure as outlined in the California Health and Safety Code, California Code of Regulations, and/or Title 15 of the Berkeley Municipal Code: o Misc disinfectants and cleaners, ~50 gal o Birite detergent, 100 lbs o Sanitizer, 4 gal o Hand soap, 8 gal o Misc paint, ~60 gal o Misc spray cans, 1 gal o Wood stain/finish, 5 gal o Muriatic/hydrochloric acid, 40 gal o Chlorine, 40 gal o Calcium chloride, 100 lbs o Sodium bicarbonate, 100 lbs o Misc cleaners and degreasers, 15 gal o Butane cans (8oz x18) o Propane, 15 gal The emergency response plan was available for review. Needed new version. Observed fire extinguishers up to date, [Truncated]; Note: data in [EVAL Notes] field for some records is truncated from the source.

Eval Date: 08/31/2022
Violations Found: No
Eval General Type: Other/Unknown
Eval Type: Other, not routine, done by local agency
Eval Division: Berkeley City Toxics Management Division
Eval Program: HMRRP
Eval Source: CERS
Eval Notes:

Facility provided employee training record dated 8/24/22 and submitted in CERS. Violations corrected.; Note: data in [EVAL Notes] field for some records is truncated from the source.

Violations

Violation Date: 09/13/2017
Violation Source: CERS
Violation Program: UST
Violation Division: Berkeley City Toxics Management Division
Citation: 23 CCR 16 2632(d)(1)(C), 2641(h), 2711(a)(8) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2632(d)(1)(C), 2641(h), 2711(a)(8)
Violation Notes:

Returned to compliance on 10/19/2017. The UST Monitoring Site plan does not include the UDC sensors or the piping for the tanks. Corrective action: Update the site plan to include all required items and submit in CERS. 10/17/17 - Facility submitted 10/9/17, but did not include a corrected site plan. Gave extension until 11/1/17.

Violation Description:

Failure to submit or update a plot plan.

Violations

Violation Date: 09/28/2021
Violation Source: CERS
Violation Program: HMRRP
Violation Division: Berkeley City Toxics Management Division
Citation: HSC 6.95 25508(a)(3) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(3)
Violation Notes:

Returned to compliance on 11/14/2021. Observation: Items in HazMat inventory are using outdated federal hazard categories. Corrective Action: Update hazard categories and submit on CERS within 30 days of report delivery.

Violation Description:

Failure to complete and electronically submit hazardous material inventory information for all reportable hazardous materials on site at or above reportable quantities.

Violations

Violation Date: 10/06/2014
Violation Source: CERS
Violation Program: UST
Violation Division: Berkeley City Toxics Management Division
Citation: 23 CCR 16 2636(f)(5) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2636(f)(5)
Violation Notes:

Map Key	Number of Records	Direction	Distance (mi/ft)	Elev/Diff (ft)	Site	DB

Returned to compliance on 10/12/2014. Turbine sump sensor for the diesel tank did not shut down the pump. Corrective action: Correct immediately by having a properly licensed, trained and certified contractor replace or fix the failed sensor.

Violation Description:

Failure to maintain all product piping outside the dispenser to be fail-safe and shut down the pump when a leak is detected and the monitoring system shuts down the pump or flow restriction occurs when a leak is detected in the under dispenser containment.

Violations

Violation Date: 10/06/2014 ***Violation Source:*** CERS
Violation Program: UST ***Violation Division:*** Berkeley City Toxics Management Division
Citation: 23 CCR 16 2638 - California Code of Regulations, Title 23, Chapter 16, Section(s) 2638
Violation Notes:

Returned to compliance on 10/06/2014. Owner has not tested and certified leak detection equipment on or before the annual due date of 9/27/14. Corrective action; Certification was completed this date but all future certifications must be completed on or before 9/27 each year.

Violation Description:

Failure to test leak detection equipment as required every 12 months (VPH, sensor, LLD, ATG, etc.) and/or submit monitoring system certification to the CUPA within 30 days of completion of the test

Violations

Citation: HSC 6.7 25284.2 - California Health and Safety Code, Chapter 6.7, Section(s) 25284.2
Violation Notes:

Returned to compliance on 10/06/2014. Owner has not tested spill buckets on or before the annual due date of 9/27/14. Corrective action:

Map Key	Number of Records	Direction	Distance (mi/ft)	Elev/Diff (ft)	Site	DB

Certification/testing was completed this date but all future testing must be completed on or before 9/27

Violation Description:

Failure to test the spill bucket annually.

Violations

Violation Date: 09/25/2019 ***Violation Source:*** CERS
Violation Program: UST ***Violation Division:*** Berkeley City Toxics Management Division
Citation: HSC 6.7 25284.2 - California Health and Safety Code, Chapter 6.7, Section(s) 25284.2
Violation Notes:

Returned to compliance on 11/28/2021. Spill buckets for 87 and 91 have a capacity of 3.5 gallons. Corrective Action: Spill buckets must be replaced to comply with the 5 gallon minimum capacity.

Violation Description:

"Failure to meet one or more of the following requirements:

Install or maintain a liquid-tight spill container.

Have a minimum capacity of five gallons.

Have a functional drain valve or other method for the removal of liquid from the spill container.

Be resistant to galvanic corrosion.

Perform a tightness test at installation, every 12 months thereafter, or within 30 days after a repair to the spill container.

Tested using applicable manufacturer guidelines, industry codes, engineering standards, or a method approved by a professional engineer.

Tested by a certified UST service technician.

Maintain records of spill containment testing for 36 months.

"

Citation: HSC 6.75 25299.30-25299.34 - California Health and Safety Code, Chapter 6.75, Section(s) 25299.30-25299.34
Violation Notes:

Returned to compliance on 11/05/2014. Current financial responsiblity documents have not been submitted to TMD. Coverage expired 10/2/14. Corrective action: Submit updated financial certification electronically.

Violation Description:

Failure to submit and maintain complete and current Certification of Financial Responsibility or other mechanism of financial assurance.

Violations

Violation Date: 09/28/2021 **Violation Source:** CERS
Violation Program: UST **Violation Division:** Berkeley City Toxics Management Division
Citation: 23 CCR 16 2712(b)(1)(G) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2712(b)(1)(G)
Violation Notes:

Returned to compliance on 01/18/2022. Observation: Ball float valve on Tank 2 (87) is broken. The drop tube on Tank 3 (diesel) was calculated incorrectly and set at 99%. Corrective Action: Replace broken and miscalculated parts; submit proof to TMD within 60 days.

Violation Description:

Failure to comply with one or more of the following overfill prevention equipment requirements:
Alert the transfer operator when the tank is 90 percent full by restricting the flow into the tank or triggering an audible and visual alarm; or
Restrict delivery of flow to the tank at least 30 minutes before the tank overfills, provided the restriction occurs when the tank is filled to no more than 95 percent of capacity; and activate an audible alarm at least five minutes before the tank overfills; or
Provide positive shut-off of flow to the tank when the tank is filled to no more than 95 percent of capacity; or
Provide positive shut-off of flow to the tank so that none of the fittings located on the top of the tank are exposed to product due to overfilling.

Install/retrofit overfill prevention equipment that does not use flow restrictors on vent piping to meet overfill prevention equipment requirements when the overfill prevention equipment is installed, repaired, or replaced on and after October 1, 2018.

For USTs installed before October 1, 2018, perform an inspection by October 13, 2018 and every 36 months thereafter.

For USTs installed on and after October 1, 2018, perform an inspection at installation and every 36 months thereafter.

Inspected within 30 days after a repair to the overfill prevention equipment.

Inspected using an applicable manufacturer guidelines, industry codes, engineering standards, or a method approved by a professional engineer.

Inspected by a certified UST service technician.

Maintain records of overfill prevention equipment inspection for 36 months.

Eval Type: Routine done by local agency
Eval Division: Berkeley City Toxics Management Division
Eval Program: UST
Eval Source: CERS
Eval Notes:

Onsite to observe annual monitoring certification and spill bucket testing. Technicians Robert and Elmer Overfill prevention testing was conducted prior. Certifications - Robert Henninger - ICC UST Installation/Retrofitting -Expires 12/30/19; CA UST System Operator-v expires 12/20/19; CA UST Service Technician - expires 6/21/21 Vaporless Manufacturing, Inc. Authorizaton Installation Technician for Mechanical Line Leak detector. Expires 04/09/20. Veeder-root TLS-3XXX Certificate of Completion - expires 03/31/21. Training - Training is conducted annually by the Designated Operator. Last training was conducted by Robert Henninger on 9/24/19. One person trained - Hue Ly. Hue tends to the store full time - if anyone else is charged with oversight of the station, they must also be trained. T3 - Diesel : Spill bucket tested for an hour and passed. Sump sensor tested and passed. Annular sensor tested and passed. T2 - 87 : Spill bucket tested and [Truncated]; Note: data in [EVAL Notes] field for some records is truncated from the source.

Eval Date: 09/28/2021
Violations Found: Yes
Eval General Type: Compliance Evaluation Inspection
Eval Type: Routine done by local agency
Eval Division: Berkeley City Toxics Management Division
Eval Program: UST
Eval Source: CERS
Eval Notes:

Robert Henninger of Henninger Engineering provided notification of scheduled monitoring system certification and overfill prevention testing. Toxics Management Division (TMD) was on-site to conduct routine Underground Storage Tank (UST), Hazardous Materials Business Plan (HMBP), and Stormwater (SW) inspections. TMD received system setup and alarm history and confirmed response to all alarms and monthly DO reports. TMD observed - Veeder-Root ATG Certification; DC400 Dispensing Cutoff System Certificate; LDT-890 Leak Detector Tester Certification; Red Jacket Line Leak Detector Certification; EVR UST Certification; ICC California UST Service Technician Certification; FFS EVR Phase I Systems - VR-101 Certificate for Robert Henninger.; Note: data in [EVAL Notes] field for some records is truncated from the source.

Eval Program: UST
Eval Source: CERS
Eval Notes:

Met with service technician, Robert Henninger. Received system setup and alarm history. Service tech confirmed operation of diesel, regular and premium STP sump sensors and annular sensors. Tech confirmed overfill prevention on regular and premium tanks with audible and visual alarms at 90%. The diesel tank ATG riser is corroded and the tech was unable to remove the ATG to confirm operation of audible and visual alarm at 90%, at the time of inspection. Robert indicates they will repair this to ensure it is testable and confirm that it alarms at 90%. Robert confirmed operation of diesel, regular and premium line leak detectors. Confirmed sensor out, fail safe and positive shutdown. Tech confirmed operation of 1-2, 3-4, 5-6 dispenser sensors. TMD confirmed response to all alarms, monthly DO reports and training.; Note: data in [EVAL Notes] field for some records is truncated from the source.

Eval Division: Berkeley City Toxics Management Division
Eval Program: UST
Eval Source: CERS
Eval Notes:

Onsite to complete the annual inspection. the monitoring system certification was completed 9/18/15. Received a copy of the report, but not the alarm history or system setup. Please provide to TMD. The UST documents were submitted electronically 3/10/15 and are accepted and confirmed correct and accurate. Confirmed DO ICC certification. Please note that financial responsibility documents expire 10/1/2015. Nickie indicates that DO reports for July and August are offsite. Send copies to TMD.; Note: data in [EVAL Notes] field for some records is truncated from the source.

Eval Notes:

Toxics Management Division (TMD) received notification of Annual Monitoring Certification on September 8th, 2022. The Annual Monitoring Certification took place on September 21st, 2022. TMD inspected the site on September 27th and September 28th, 2022 to conduct paperwork review. Designated Operator reports were available for review and in good order. Employee training was current as of 9/21/2022. TMD received annual monitoring certification paperwork on 9/26. TMD verified ICC #5252265 is active. TMD reviewed monitoring certification. The box for "Were all LLDs confirmed operational within regulatory requirements?" was checked "no" but TMD confirmed with the UST technician that this was an error, and LLDs are functional. No violations observed.; Note: data in [EVAL Notes] field for some records is truncated from the source.

Violations Found: No
Eval General Type: Other/Unknown
Eval Type: Other, not routine, done by local agency
Eval Division: Berkeley City Toxics Management Division
Eval Program: UST
Eval Source: CERS
Eval Notes:

Toxics Management Division (TMD) was on-site to conduct inspection of modifications under permit F2022-00220. The scope of work was "to remove and replace the existing UST turbine sumps, fill and vapor ports, product piping and under dispenser sumps. Install new UST turbine sumps, fill and vapor ports double wall product piping. Existing fuel dispensers are to be removed and reinstalled on new sumps." TMD was on-site on 12/19/2022 to observe soil sampling, which was taken from beneath UDCs 1/2 and first bend in piping from here, UDC 3/4 and 20 feet up piping, UDC 5/6, at pipe bend near vent pipe. No sheen or smell observed by operator or TMD. Per soil sampling report: Lead was the only analyte detected, in five of the six soil

Map Key	Number of Records	Direction	Distance (mi/ft)	Elev/Diff (ft)	Site	DB

samples at concentrations of 3.7 to 4.2 parts per million. In our opinion, with no petroleum hydrocarbon detections, the lead values are from "background" concentrations and not indicative of a release. The values are well below the Tier 1 ESL [Truncated]; Note: data in [EVAL Notes] field for some records is truncated from the source.

Eval Notes:

Onsite in response to notification of spill from diesel nozzle on May 30. Caller indicates using diesel nozzle on dispenser 5 and the latch did not work and about 1 gallon of diesel overflowed. She indicates flow was slower than normal. Nozzle is model #159503-03 and is appropriate for use. No notification was required and spill has been cleaned up. Hue indicates they have had no other incidents. Business must provide notification to TMD in the event of future overfills/spills from nozzles, or maintain records onsite.; Note: data in [EVAL Notes] field for some records is truncated from the source.

EI ID: 10180357 **EI Description:** Chemical Storage Facilities

Violations

Violation Date: 06/22/2017 **Violation Source:** CERS
Violation Program: HMRRP **Violation Division:** Berkeley City Toxics Management Division
Citation: HSC 6.95 25508(a)(1) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(1)
Violation Notes:

Map Key	Number of Records	Direction	Distance (mi/ft)	Elev/Diff (ft)	Site	DB

Returned to compliance on 07/24/2017. A carboy of liquid nitrogen was observed in the receiving area. This needs to be added to the HMBP inventory.

Violation Description:

Failure to complete and electronically submit hazardous material inventory information for all reportable hazardous materials on site at or above reportable quantities.

Evaluations

Eval Date: 02/21/2014
Violations Found: No
Eval General Type: Compliance Evaluation Inspection
Eval Type: Routine done by local agency
Eval Division: Berkeley City Toxics Management Division
Eval Program: HW
Eval Source: CERS
Eval Notes:

Facility no longer generates hazardous waste. Xrays are done digitally.; Note: data in [EVAL Notes] field for some records is truncated from the source.

Eval Date: 01/28/2021
Violations Found: No
Eval General Type: Compliance Evaluation Inspection
Eval Type: Routine done by local agency
Eval Division: Berkeley City Toxics Management Division
Eval Program: HMRRP
Eval Source: CERS
Eval Notes:

Due to COVID-19 restrictions, inspection was conducted via video software - Blitzz. Inspector Meridith was present for inspection. The Tang center includes a pharmacy for students and faculty. Records for pharmaceutical waste disposal were not available for review. Provide TMD with disposal records for review. Specs for Genset should be provided to TMD - particularly looking at capacity of tank to compare with hazardous material inventory. Genset is equipped with overfill alarm. Inspection logs are being completed but were not available at time of inspection - provide to TMD. SPCC for UCB which includes Tang Center to be revieweed - provide plan to TMD. Training records for Christina Wistrom, Johnny Dunn, and Raymond Sanders were provided. Provide all records requested by April 20.; Note: data in [EVAL Notes] field for some records is truncated from the source.

Eval Date: 06/22/2017
Violations Found: Yes
Eval General Type: Compliance Evaluation Inspection
Eval Type: Routine done by local agency
Eval Division: Berkeley City Toxics Management Division
Eval Program: HMRRP
Eval Source: CERS
Eval Notes:

Met Tim Pine of EH&S and Ray Sanders, Facilities Manager of Tang. Reviewed the HMBP and conducted the routine HMBP inspection. Recommendation: 100 gallon diesel generator was unlocked. There is no surrounding fence. The cabinet should be locked to avoid potential tampering or vandalism. Requested training records for Ray Sanders by 7/23/17.; Note: data in [EVAL Notes] field for some records is truncated from the source.

Eval Date: 02/21/2014
Violations Found: No
Eval General Type: Compliance Evaluation Inspection
Eval Type: Routine done by local agency
Eval Division: Berkeley City Toxics Management Division
Eval Program: HMRRP

Site History:	

This case is an active commercial petroleum fueling facility. An unauthorized release was reported in August 1994 as a result of inventory reconciliation. USTs (four gasoline, one diesel) were tested and retrofitted and piping was removed and replaced in 1995. Historically, one of the gasoline USTs and

Map Key	Number of Records	Direction	Distance (mi/ft)	Elev/Diff (ft)	Site	DB

one of the diesel USTs were formerly utilized for waste oil storage. Approximately 350 cubic yards of impacted soil and overburden were removed and disposed offsite in 1995. No groundwater monitoring wells have been installed at the Site. According to grab groundwater data collected from soil borings, water quality objectives for benzene and MTBE have not been achieved and the contaminant plume is undefined. The petroleum release is limited to the soil and shallow groundwater. According to data available in GeoTracker, there are no supply wells regulated by the California Department of Public Health within 1,000 feet of the Site. No other water supply wells have been identified within 1,000 feet of the Site in files reviewed. There is no identified surface water within 250 feet of the Site. The nearest surface water body, Strawberry Creek, is located approximately 700 feet north-northeast of the Site. Water is provided to water users near the Site by the East Bay Municipal Utilities District. The affected groundwater is not currently being used as a source of drinking water, and it is highly unlikely that the affected groundwater will be used as a source of drinking water in the foreseeable future.

Received Issue Date: 9/27/2018
Doc Link: https://geotracker.waterboards.ca.gov/view_documents_all?global_id=T10000004535&doc_id=5976317
Title Description Comments:

Site Investigation Workplan - R2 staff communicated that this version of the Workplan did not waste oil tank constituents.

Action Type: Response Requested - Workplans
Action: Soil and Water Investigation Workplan - Regulator Responded
Action Date: 7/31/2018
Received Issue Date: 8/3/2018
Doc Link: https://geotracker.waterboards.ca.gov/view_documents_all?global_id=T10000004535&doc_id=5967096
Title Description Comments:

soil, soil vapor, and groundwater investigation work plan including a sensitive receptor survey and site conceptual model - The work plan was rejected because the consultant did not write that chlorinated volatile organic compounds would be included in the 8260B analyte list and because analysis for polyaromatic hydrocarbons using 8270 SIM was not included at all. This analysis was required in the 13267 directive letter, and recommended in the California LUFT Manual Table 16-1. This comment will be followed by a formal rejection letter by October 31, 2018. A revised work plan should be submitted, R2 staff received the updated workplan following our rejection earlier this week. We will inform the Discharger of the results of our review.

Action Type: Enforcement/Orders
Action: 13267 Requirement
Action Date: 6/13/2018
Received Issue Date: 6/13/2018
Doc Link: https://geotracker.waterboards.ca.gov/view_documents?global_id=T10000004535&enforcement_id=6360913&temptable=ENFORCEMENT
Title Description Comments:

01-3632 (Berkeley Touchless) - require RI workplan 6-13-18 The work plan is required to meet current regulatory standards in the LUFT Manual and be comprehensive. The USTs contained gasoline, diesel, and waste oil. Redevelopment is planned in the next couple of years and could include residential units.

Site Facility Name: PACIFIC BELL
Site Facility Type: LUST CLEANUP SITE
Cleanup Status: COMPLETED - CASE CLOSED
Address: 2116 BANCROFT WY
City: BERKELEY
Zip: 94704
County: ALAMEDA
Report Link: https://geotracker.waterboards.ca.gov/profile_report?global_id=T0600101021
Cleanup Status Detail: COMPLETED - CASE CLOSED AS OF 6/25/1999
Project Status:
Cleanup History Link: https://geotracker.waterboards.ca.gov/profile_report_include?global_id=T0600101021&tabname=regulatoryhistory
Potential COC: DIESEL
Potential Media of Concern: SOIL
File Location:
User Defined Beneficial Use:
Designated Beneficial Use: MUN, AGR, IND, PROC
DWR GW Sub Basin: Santa Clara Valley - East Bay Plain (2-009.04)
Calwater Watershed Name: Bay Bridges - Berkeley (203.30)
Post Closure Site Management:
Future Land Use:
Cleanup Oversight Agencies: SAN FRANCISCO BAY RWQCB (REGION 2) (LEAD) - CASE #: 01-1110
CASEWORKER: Regional Water Board
BERKELEY, CITY OF - CASE #: 01-1110
CASEWORKER: GEOFFERY FIEDLER

Tank Details

Epa Region: 9
No. of Closed UST: 0
No. of Inuse UST:
No. of Oos UST: 0
Owner Type: Non-Government
Tank ID No.: Q2002U001
Tank Status: Confirmed/Updated Information
Tank Type: Double Wall
Tank Alarms: No
Tank Ball Float: No
Tank Closure Date:
Tank Configuration: Stand Alone Tank
Tank Contents: Diesel
Tank Cp Impr Curr: No
Tank Cp Shutoff: Yes
Tank Installatn Dt: 11/6/1995 12:00:00 AM
Tank No of Compart: 1
Tank Pc Constructn: Steel
Tank Spill Bucket: Yes
Tribal Lands: No
Tank Operator Name: Pacific Bell Telephone Company dba AT&T California
Tank Operator Mail Address: 308 S. Akard St., 17th Floor
Tank Operator Mail City: Dallas
Tank Operator Mail State: TX
Tank Operator Mail Zip: 75202
Tank Owner Name: Pacific Bell Telephone Company dba AT&T California
Tank Owner Mailing Address: 308 S. Akard St., 17th Floor
Tank Owner Mailing City: Dallas
Tank Owner Mailing State: TX
Tank Owner Mailing Zip: 75202
Tank Capacity Gallons: 8021
Tank Piping Construction: Double Walled
Tank Piping Type: Conventional Suction
Tank Pw Piping Construction: Flexible
Tank Sacrificial Anode: No

Violations

Map Key	Number of Records	Direction	Distance (mi/ft)	Elev/Diff (ft)	Site	DB

Violation Date: 12/06/2018 ***Violation Source:*** CERS
Violation Program: UST ***Violation Division:*** Berkeley City Toxics Management Division
Citation: 23 CCR 16 2712(b)(1)(G) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2712(b)(1)(G)
Violation Notes:

Returned to compliance on 12/27/2018. The flapper valve was not tested by October 13, 2018. The inspection was completed October 15, 2018. The overfill prevention equipment inspection report from October 15, 2018 that was submitted in CERS did not include the inspection method used and documentation like the measurements used to determine the results, which is required to be attached to the report form. Corrective action: Within 30 days, please provide the additional information to TMD.

Violation Description:

Failure to comply with one or more of the following overfill prevention equipment requirements:
Alert the transfer operator when the tank is 90 percent full by restricting the flow into the tank or triggering an audible and visual alarm; or
Restrict delivery of flow to the tank at least 30 minutes before the tank overfills, provided the restriction occurs when the tank is filled to no more than 95 percent of capacity; and activate an audible alarm at least five minutes before the tank overfills; or
Provide positive shut-off of flow to the tank when the tank is filled to no more than 95 percent of capacity; or
Provide positive shut-off of flow to the tank so that none of the fittings located on the top of the tank are exposed to product due to overfilling.

Install/retrofit overfill prevention equipment that does not use flow restrictors on vent piping to meet overfill prevention equipment requirements when the overfill prevention equipment is installed, repaired, or replaced on and after October 1, 2018.

For USTs installed before October 1, 2018, perform an inspection by October 13, 2018 and every 36 months thereafter.

For USTs installed on and after October 1, 2018, perform an inspection at installation and every 36 months thereafter.

Inspected within 30 days after a repair to the overfill prevention equipment.

Inspected using an applicable manufacturer guidelines, industry codes, engineering standards, or a method approved by a professional engineer.

Inspected by a certified UST service technician.

Maintain records of overfill prevention equipment inspection for 36 months.

Violations

Violation Date: 12/06/2018 ***Violation Source:*** CERS
Violation Program: UST ***Violation Division:*** Berkeley City Toxics Management Division
Citation: 23 CCR 16 2632(c)(2)(A)&(B) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2632(c)(2)(A)&(B)
Violation Notes:

Returned to compliance on 12/06/2018. According to the contractor, the annular sensor did not activate an audible and visual alarm upon testing in liquid. Corrected at the time of the monitoring system certification as the service technician replaced the sensor with same and tested to confirm operational.

Violation Description:

Failure to continuously monitor the interstitial space of a double-walled tank with an audible and visual alarm system.

Violations

Violation Date: 12/13/2022 ***Violation Source:*** CERS
Violation Program: HMRRP ***Violation Division:*** Berkeley City Toxics Management Division
Citation: HSC 6.95 25508(a)(3) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(3)
Violation Notes:

Observation: Facility generates waste batteries and provided TMD with hazardous waste manifests, but reports a "0" throughput of hazardous waste batteries in CERS. Correction: Update Hazardous Materials Inventory within 30 days (under the Lead Acid Batteries material, under Annual Waste Amount, report an approximate throughput in gallons) and submit in CERS.

Violation Description:

Failure to complete and electronically submit hazardous material inventory information for all reportable hazardous materials on site at or above reportable quantities.

Map Key	Number of Records	Direction	Distance (mi/ft)	Elev/Diff (ft)	Site	DB

Violations

Violation Date: 01/09/2017
Violation Source: CERS
Violation Program: UST
Violation Division: Berkeley City Toxics Management Division
Citation: 23 CCR 6.7 25284, 25286 - California Code of Regulations, Title 23, Chapter 6.7, Section(s) 25284, 25286
Violation Notes:

Returned to compliance on 01/17/2017. The tank information for tank Q2002U001 indicates overfill protection includes audible/visual alarms and fill tube shut-off. Observed the flapper valve, but the site does not have an external audible visual alarm. Corrective action: Install an external audible visual alarm or remove this method from the tank information and resubmit in CERS.

Violation Description:

Failure to submit a complete and accurate application for a permit to operate a UST, or for renewal of the permit.

Eval Program: UST
Eval Source: CERS
Eval Notes:

Gary Chimienti left message regarding the monitoring system certification on 12/22/2017. Toxics Management Division (TMD) received written notification from contractor of the monitoring system certification on 1/2/2018. The contractor had sent the original notification to an incorrect email address on 12/6/2017. TMD requires written notification of required testing 48 hours in advance and the owner/operator and/or contractor must receive a written response from TMD. Met with Gary Chimienti, AT&T, and John Cascio with Tait Environmental. Received copy of system setup and alarm history. Reviewed DO reports, maintenance records and CERS submittal. Confirmed operation of sensors and spill bucket.; Note: data in [EVAL Notes] field for some records is truncated from the source.

Met with John Lokken, EH&S Environmental Site Manager-AT&T. The Monitoring System Certification was completed on December 8, 2020. Toxics

Map Key	Number of Records	Direction	Distance (mi/ft)	Elev/Diff (ft)	Site	DB

Management Division received the Monitoring System Certification Form and Spill Container Testing Report Form on January 4, 2021. The Spill Container Testing Report Form did not include the service technicians training and certifications. Updated Form was submitted January 20, 2021. Reviewed the monthly Designated UST Operator Visual Inspection Reports. The December 11, 2020 Report did not have an owner/operator signature. John indicates these are signed electronically and he will email copies to confirm they have been acknowledged by the owner/operator. TMD received a copy of the forms on January 20, 2021, confirming they are signed by the owner/operator within 72 hours of receipt.; Note: data in [EVAL Notes] field for some records is truncated from the source.

Violations

Violation Date: 06/19/2014
Violation Source: CERS
Violation Program: HMRRP
Violation Division: Berkeley City Toxics Management Division
Citation: HSC 6.95 25507 - California Health and Safety Code, Chapter 6.95, Section(s) 25507
Violation Notes:

Returned to compliance on 06/19/2014.

Violation Description:

Failure of business to report a release or threatened release of a hazardous material to the administering agency and CalEMA.

Violations

Violation Date: 06/19/2014
Violation Source: CERS
Violation Program: HW
Violation Division: Berkeley City Toxics Management Division
Citation: 40 CFR 1 265.173 - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 265.173
Violation Notes:

Returned to compliance on 06/19/2014. Multiple open containers of oil - principally at work stations.

Violation Description:

Failure to properly close hazardous waste containers when not in active use.

Violations

Violation Date: 06/19/2014
Violation Source: CERS
Violation Program: APSA
Violation Division: Berkeley City Toxics Management Division
Citation: HSC 6.67 25270.4.5(a) - California Health and Safety Code, Chapter 6.67, Section(s) 25270.4.5(a)
Violation Notes:

Returned to compliance on 12/02/2014. Facility inventory of petroleum oil exceeds 1,320 gallons.

Violation Description:

Failure to prepare and implement a Spill Prevention Control and Countermeasure (SPCC) Plan .

Violations

Violation Date: 12/03/2020 ***Violation Source:*** CERS
Violation Program: APSA ***Violation Division:*** Berkeley City Toxics Management Division
Citation: HSC 6.67 25270.4.5(a) - California Health and Safety Code, Chapter 6.67, Section(s) 25270.4.5(a)
Violation Notes:

Returned to compliance on 08/30/2021. Hazardous waste tanks need certification every 5 years. A written assessment meeting the requirements of 22 CCR §66265.192(k) must be obtained. An independent, qualified California-registered professional engineer (PE) must review the assessment and attest that the tank system has sufficient structural integrity and is acceptable for the transferring, storing and treating of hazardous waste. Contractor was brought in in August 2021. Used oil and waste antifreeze tanks were certified on 8/24. The engineer recommended anchoring the waste antifreeze tank. This was completed by 8/30/21.

Violation Description:

Failure to ensure that tanks are inspected and tested by an appropriately qualified person in accordance with industry standards.

Violations

Violation Date: 06/19/2014 ***Violation Source:*** CERS
Violation Program: HW ***Violation Division:*** Berkeley City Toxics Management Division
Citation: 22 CCR 15 66265.16 - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.16
Violation Notes:

Returned to compliance on 12/02/2014.

Violation Description:

Failure to provide employees within the first six months after the date of their employment, or assignment to the facility, or to work unsupervised, or to a new position at a facility with hazardous waste training to ensure employees are competent in the following areas: hazardous waste management procedures (including contingency plan implementation) relevant to the positions in which they are employed, emergency response and emergency equipment, and procedures for using, inspecting, repairing, and replacing facility emergency and monitoring equipment. In addition, the owner/operator shall ensure facility personnel take part in an annual review of the initial training and training records training records on current personnel shall be kept until closure of the facility. Training records on former employees shall be kept for at least three years from the date the employee last worked at the facility. The records shall include the following: the job title for each position at the facility related to hazardous waste management, and the name of the employee filling each job; a written job description for each position, duties of facility personnel assigned to each position, and a written description of the type and amount of both introductory and continuing training that will be given to each person filling a position.

Violations

Violation Date: 03/27/2017 ***Violation Source:*** CERS
Violation Program: HW ***Violation Division:*** Berkeley City Toxics Management Division
Citation: 40 CFR 1 265.201(c)(5) - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 265.201(c)(5)
Violation Notes:

Returned to compliance on 03/30/2017.

Violation Description:

Failure to inspect hazardous waste tanks for the following, when present:
4) The construction materials of the tank at least weekly to detect corrosion or leaking of fixtures or seams.
5) The construction materials of, and the area immediately surrounding, discharge confinement structures (e.g., dikes) at least weekly to detect erosion or obvious signs of leakage (e.g., wet spots or dead vegetation).

Violations

Eval General Type: Compliance Evaluation Inspection
Eval Type: Routine done by local agency
Eval Division: Berkeley City Toxics Management Division
Eval Program: HW
Eval Source: CERS
Eval Notes:

Facility has a HW generator I.D. and has properly represented their inventory of wastes, principally non-RCRA petroleum as used oil. No observance of mis-labeled waste containers or wastes exceeding accumulation time limits (90 days). Facility reports generation of waste requiring management standards as a large quantity generator. Incidental containers of ATF and motor oil - not labeled or covered at multiple work stations. Used oil filters stored in properly labeled drums. Used oil drums also properly labeled. Several waste containers ar not in use and are not closed.; Note: data in [EVAL Notes] field for some records is truncated from the source.

Waste Code Details

Hazardous Waste Code: U205
Waste Code Description: SELENIUM SULFIDE (OR) SELENIUM SULFIDE SES2 (R,T)

Hazardous Waste Code: U165
Waste Code Description: NAPHTHALENE

Hazardous Waste Code: U034
Waste Code Description: ACETALDEHYDE, TRICHLORO- (OR) CHLORAL

Hazardous Waste Code: P075
Waste Code Description: NICOTINE, & SALTS (OR) PYRIDINE, 3-(1-METHYL-2-PYRROLIDINYL)-,(S)-, & SALTS

Hazardous Waste Code: D011
Waste Code Description: SILVER

Hazardous Waste Code: D009
Waste Code Description: MERCURY

Hazardous Waste Code: D005
Waste Code Description: BARIUM

Hazardous Waste Code: D002
Waste Code Description: CORROSIVE WASTE

Hazardous Waste Code: 725
Waste Code Description: Liquids with mercury > 20 mg/l

Hazardous Waste Code: 352
Waste Code Description: Other organic solids

Hazardous Waste Code: 311
Waste Code Description: Pharmaceutical waste

Hazardous Waste Code: 181
Waste Code Description: Other inorganic solid waste

Hazardous Waste Code: 122
Waste Code Description: Alkaline solution without metals (pH > 12.5)

Hazardous Waste Code: U188
Waste Code Description: PHENOL

Hazardous Waste Code: U129
Waste Code Description: CYCLOHEXANE, 1,2,3,4,5,6-HEXACHLORO-, (1ALPHA, 2ALPHA, 3BETA, 4ALPHA, 5ALPHA, 6BETA)- (OR) LINDANE

Hazardous Waste Code: U002
Waste Code Description: 2-PROPANONE (I) (OR) ACETONE (I)

Hazardous Waste Code: P001
Waste Code Description: 2H-1-BENZOPYRAN-2-ONE, 4-HYDROXY-3-(3-OXO-1-PHENYLBUTYL)-, & SALTS, WHEN PRESENT AT CONCENTRATIONS GREATER THAN 0.3% (OR) WARFARIN, & SALTS, WHEN PRESENT AT CONCENTRATIONS GREATER THAN 0.3%

File Location: Regional Board
Site History:

Dry cleaning operations took place at the site as early as the 1930s and through approximately 1971 under the names Shattuck Laundry and Dry Cleaners (1930s - 1940s) and Rainbow Cleaners (1950s - 1971). The primary location of the former operations is associated with the address 2473 Shattuck Avenue. Rainbow Cleaners also utilized the address 2111 Dwight Way, in the 1950s and early 1960s. Except for the original residential use of the southeastern portion of the site (which ceased sometime prior to 1968), typical use of the site since the early 1900s has included a number of small commercial and/or retail tenants, including a bakery, creamery, various medical and commercial offices, auto repair (circa 1920-1930), sign making, drug store, a theater, hardware store, and restaurants. As noted above, former dry cleaning operations were identified on site. An apartment complex is being built on the site.

Violation/Evaluation Summary

Note:	NO RECORDS: As of Jan 2023, there are no Compliance Monitoring and Enforcement (violation) records associated with this facility (EPA ID).

Handler Summary

Importer Activity:	No
Mixed Waste Generator:	No
Transporter Activity:	No
Transfer Facility:	No
Onsite Burner Exemption:	No
Furnace Exemption:	No
Underground Injection Activity:	No
Commercial TSD:	No
Used Oil Transporter:	No
Used Oil Transfer Facility:	No
Used Oil Processor:	No
Used Oil Refiner:	No
Used Oil Burner:	No
Used Oil Market Burner:	No
Used Oil Spec Marketer:	No

Hazardous Waste Handler Details

Sequence No:	1
Receive Date:	20020116
Handler Name:	HUSTEADS COLLISION CENTER
Federal Waste Generator Code:	2
Generator Code Description:	Small Quantity Generator
Source Type:	Notification

Waste Code Details

Map Key	Number of Records	Direction	Distance (mi/ft)	Elev/Diff (ft)	Site	DB

Hazardous Waste Code: D001
Waste Code Description: IGNITABLE WASTE

Hazardous Waste Code: F002
Waste Code Description: THE FOLLOWING SPENT HALOGENATED SOLVENTS: TETRACHLOROETHYLENE, METHYLENE CHLORIDE, TRICHLOROETHYLENE, 1,1,1-TRICHLOROETHANE, CHLOROBENZENE, 1,1,2-TRICHLORO-1,2,2-TRIFLUOROETHANE, ORTHO-DICHLOROBENZENE, TRICHLOROFLUOROMETHANE, AND 1,1,2, TRICHLOROETHANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Hazardous Waste Code: F005
Waste Code Description: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE, 2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, OR F004; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Hazardous Waste Code: D035
Waste Code Description: METHYL ETHYL KETONE

Hazardous Waste Code: F003
Waste Code Description: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NONHALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS, AND A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Potential Media of Concern:	Other Groundwater (uses other than drinking water)
How Discovered Description:	PCE IDENTIFIED IN SOIL, VAPOR, AND GROUNDWATER SAMPLES.
Calwater Watershed Name:	Bay Bridges - Berkeley (203.30)
DWR GW Subbasin Name:	Santa Clara Valley - East Bay Plain (2-009.04)
Disadvantaged Community:	Severely Disadvantaged Community
Coordinate Source:	Google Map Move
Discharge Cause:	Unknown
Discharge Source:	Other
Facility Project Sub Type:	
Calenviroscreen 3 Score:	21-25%
Calenviroscreen 4 Score:	20-25%
File Location:	Local Agency
Site History:	

Cal Cleaners operated a dry cleaning business at the site from the 1970s through 2008.
