I.D. Projects not regulated by C.3 If your project is not regulated by C.3.b or C.3.i you are not subject to stormwater treatment requirements, however you are encouraged to incorporate site design and source control measures. The municipality may determine that source controls and site design measures are required for your project, if so, you must complete Section II and if required by the municipality, complete Sections III.A and III.B.			
I.E. C.3.i Small Projects If your project is regulated by C.3.i you are considered a "Small Project" and must implement site design (See III.A) and source control requirements (See III.B). You are not required to implement stormwater treatment requirements. You must complete Sections II, III.A, and III.B.			
I.F. C.3.b Regulated Projects If your project is a C.3.b regulated project, the project must include appropriate site design measures and source controls AND hydraulically-sized stormwater treatment measures. Hydromodification management may also be required. Complete Sections II, III, and V.			
II. Applicability C.6 Stormwater Requirements *All projects must complete Section II.*			
	Yes	No	
II.A Does the project disturb one acre or more of land? If YES you are required to obtain coverage under the State Construction Stormwater Permit, see https://www.waterboards.ca.gov/water_issues/programs/stormwater/construction.html. You must submit your WDID number and Stormwater Pollution Prevention Plan to the municipality before a building or grading permit will be issued. You do not need to complete Section IV.	☐	☐	
II.B Does the project disturb less than one acre of land? If NO, you are subject to MRP C.6 requirements. Complete Section IV to identify best management practices (BMPs) that will be in the erosion control plan and implemented during construction.	☐	☐	
II.C. Priority Inspection Factors	☐	☐	
II.C.1 Is the project 1 acre or more?	☐	☐	
II.C.2 Does the project require a grading permit?	☐	☐	
II.C.3 Is the project adjacent to a creek or waterway?	☐	☐	
II.C.4 Is the project in a municipally defined hillside development area or meet local hillside criteria?	☐	☐	
II.C.5 Does the project site have a slope of >15% and disturb ≥ 5,000 sq ft?	☐	☐	
II.C.6 Does the project involve demolition of a structure subject to the PCBs Building Demolition requirements? If yes the completion of the PCBs Building Material Demolition is required.	☐	☐	
(Municipal staff – refer projects answering YES to any questions in section II.C to construction site inspection staff to be added to their list of projects that require stormwater inspections at least monthly during the wet season (October 1 through April 30) and other times of the year as appropriate.)			

Stormwater Requirements Checklist
Municipal Regional Stormwater Permit (MRP 3)
Stormwater Controls for Development Projects

III. Implementation of C.3 Stormwater Requirements

C.3.b Regulated Projects must complete all of Section III.
C.3.i Small Projects must complete Sections III.A and III.B
Projects not regulated by C.3 must complete Sections III.A and III.B if directed by the municipality.

III.A Select Appropriate Site Design Measures

C.3.b Regulated Projects must implement appropriate and feasible site design measures.
C.3.i Small Projects must implement at least one of site design measures listed in items a-f.
Projects not regulated by C.3 are encouraged to implement appropriate site design measures and those directed by the municipality.

Site Design Measure	Plan Sheet #	Yes	No
a. Direct roof runoff into cisterns or rain barrels and use rainwater for irrigation or other non-potable use.		☐	☐
b. Direct roof runoff onto vegetated areas.		☐	☐
c. Direct runoff from sidewalks, walkways, and/or patios onto vegetated areas.		☐	☐
d. Direct runoff from driveways and/or uncovered parking lots onto vegetated areas.		☐	☐
e. Construct sidewalks, walkways, and/or patios with pervious pavement systems.[8]		☐	☐
f. Construct bike lanes, driveways, and/or uncovered parking lots with pervious pavement systems.[8]		☐	☐
g. Minimize land disturbance and impervious surface (especially parking lots).		☐	☐
h. Maximize permeability by clustering development and preserving open space.		☐	☐
i. Use micro-detention, including distributed landscape-based detention.		☐	☐
j. Protect sensitive areas, including wetland and riparian areas, and minimize changes to the natural topography.		☐	☐
k. Self-treating area (see Chapter 5 of the *C.3 Technical Guidance*)		☐	☐
l. Self-retaining area (see Chapter 5 of the *C.3 Technical Guidance*)		☐	☐

III.B Select Appropriate Source Control Measures

C.3.b Regulated Projects must select and implement appropriate source control measures.
C.3.i Small Projects and projects not regulated by C.3 are encouraged to select and implement appropriate source control measures and those directed by the municipality.

Features in the project?		Features requiring source controls	Source control measures (Refer to Local Source Control List for detailed requirements)	Measure included in project plans?		
Yes	No			Yes	NO	Plan Sheet #
☐	☐	Storm Drain	Mark on-site inlets with the words “No Dumping! Flows to Bay” or equivalent.	☐	☐	
☐	☐	Floor Drains	Plumb interior floor drains to sanitary sewer[9] [or prohibit].	☐	☐	
☐	☐	Parking garage	Plumb interior parking garage floor drains to sanitary sewer.[9]	☐	☐	
☐	☐	Landscaping	▪ Retain existing vegetation as practicable. ▪ Select diverse species appropriate to the site. Include plants that are pest- and/or disease-resistant, drought-tolerant, and/or attract beneficial insects. ▪ Minimize use of pesticides and quick-release fertilizers. ▪ Use efficient irrigation system; design to minimize runoff.	☐	☐	
☐	☐	Pool/Spa/ Fountain	Provide connection to the sanitary sewer to facilitate draining.[9]	☐	☐	
☐	☐	Food Service Equipment (non-residential)	Provide sink or other area for equipment cleaning, which is: ▪ Connected to a grease interceptor prior to sanitary sewer discharge.[9] ▪ Large enough for the largest mat or piece of equipment to be cleaned. ▪ Indoors or in an outdoor roofed area designed to prevent stormwater run-on and run-off and signed to require equipment washing in this area.	☐	☐	

[8] Use the specifications in the *C.3 Technical Guidance* or for small projects see the *BASMAA Pervious Paving Factsheet*. For these documents and others go to www.cleanwaterprogram.org and click on “Resources.”
[9] Any connection to the sanitary sewer system is subject to sanitary district approval.

Stormwater Requirements Checklist
Municipal Regional Stormwater Permit (MRP 3)
Stormwater Controls for Development Projects

Features in the project?		Features requiring source controls	Source control measures (Refer to Local Source Control List for detailed requirements)	Measure included in project plans?		
Yes	No			Yes	NO	Plan Sheet #
☐	☐	Refuse Areas	▪ Provide a roofed and enclosed area for dumpsters, recycling containers, etc., designed to prevent stormwater run-on and runoff. ▪ Connect any drains in or beneath dumpsters, compactors, and tallow bin areas serving food service facilities to the sanitary sewer.[9]	☐	☐	
☐	☐	Outdoor Process Activities [10]	Perform process activities either indoors or in roofed outdoor area, designed to prevent stormwater run-on and runoff, and to drain to the sanitary sewer.[9]	☐	☐	
☐	☐	Outdoor Equipment/ Materials Storage	▪ Cover the area or design to avoid pollutant contact with stormwater runoff. ▪ Locate area only on paved and contained areas. ▪ Roof storage areas that will contain non-hazardous liquids, drain to sanitary sewer[9], and contain by berms or similar.	☐	☐	
☐	☐	Vehicle/ Equipment Cleaning	▪ Roofed, pave and berm wash area to prevent stormwater run-on and runoff, plumb to the sanitary sewer,[9] and sign as a designated wash area. ▪ Commercial car wash facilities shall discharge to the sanitary sewer.[9]	☐	☐	
☐	☐	Vehicle/ Equipment Repair and Maintenance	▪ Designate repair/maintenance area indoors, or an outdoors area designed to prevent stormwater run-on and runoff and provide secondary containment. Do not install drains in the secondary containment areas. ▪ No floor drains unless pretreated prior to discharge to the sanitary sewer. [9] ▪ Connect containers or sinks used for parts cleaning to the sanitary sewer. [9]	☐	☐	
☐	☐	Fuel Dispensing Areas	▪ Fueling areas shall have impermeable surface that is a) minimally graded to prevent ponding and b) separated from the rest of the site by a grade break. ▪ Canopy shall extend at least 10 ft in each direction from each pump and drain away from fueling area.	☐	☐	
☐	☐	Loading Docks	▪ Cover and/or grade to minimize run-on to and runoff from the loading area. ▪ Position downspouts to direct stormwater away from the loading area. ▪ Drain water from loading dock areas to the sanitary sewer.[9] ▪ Install door skirts between the trailers and the building.	☐	☐	
☐	☐	Fire Sprinklers	Design for discharge of fire sprinkler test water to landscape or sanitary sewer.[9]	☐	☐	
☐	☐	Miscellaneous Drain or Wash Water	▪ Drain condensate of air conditioning units to landscaping. Large air conditioning units may connect to the sanitary sewer.[9] ▪ Roof drains shall drain to unpaved area where practicable. ▪ Drain boiler drain lines, roof top equipment, all wash water to sanitary sewer. [9]	☐	☐	
☐	☐	Architectural Copper	Discharge rinse water to sanitary sewer [9] or collect and dispose properly offsite. See flyer *Requirements for Architectural Copper*.	☐	☐	

[10] Businesses that may have outdoor process activities/equipment include machine shops, auto repair, industries with pretreatment facilities.

Stormwater Requirements Checklist
Municipal Regional Stormwater Permit (MRP 3)
Stormwater Controls for Development Projects

III.C Stormwater Treatment Measures

C.3.b Regulated Projects must select and implement stormwater treatment measures to manage the C.3.d numeric sizing criteria. Complete the applicable sections below.

Yes	No	
☐	☐	**III.C.1 Is the project a Special Project?** (See Appendix J of the *C.3 Technical Guidance* for Special Project criteria.) If YES, complete the Special Projects Worksheet and consult with municipal staff about the need to prepare a discussion of the feasibility and infeasibility of 100% LID treatment. Indicate the type of non-LID treatment to be used, the hydraulic sizing method*, and percentage of the amount of runoff specified in Provision C.3.d that is treated.

Non-LID Treatment	Hydraulic Sizing Method (See Note 1)	% of C.3. Amount of Runoff Treated
☐ Media filter		
☐ Tree well filter		

Yes	No	
☐	☐	**III.C.2 Is the project using biotreatment to treat the C.3.d amount of runoff?** (See the *C.3 Technical Guidance* for information on infiltration and rainwater harvesting[11] and use of stormwater.) If YES, indicate the biotreatment measures to be used, and the hydraulic sizing method:

Biotreatment Measures	Hydraulic sizing method (See Note 1)
☐ Bioretention area	
☐ Flow-through planter	
☐ Other (specify):	

Note 1. Indicate which of the following Provision C.3.d.i hydraulic sizing methods were used:

1. Volume based approaches – Refer to Provision C.3.d.i.(1):
   1(a) Urban Runoff Quality Management approach, or
   1(b) 80% capture approach (recommended volume-based approach).

2. Flow-based approaches – Refer to Provision C.3.d.i.(2):
   2(a) 10% of 50-year peak flow approach,
   2(b) Percentile rainfall intensity approach, or
   2(c) 0.2-Inch-per-hour intensity approach (this is recommended flow-based approach AND the basis for the 4% rule of thumb described in Section 7.1 of the C.3 Technical Guidance).

3. Combination hydraulic sizing approach -- Refer to Provision C.3.d.i.(3):
   If a combination flow and volume design basis was used, indicate which flow-based and volume-based criteria were used.

III.D Hydromodification Management (HM) Requirements

C.3.b Regulated Projects must complete this section

	YES	NO
III.D.1 Does the project create and/or replace 1 acre (43,560 sq. ft.) or more of impervious area? If YES continue to item III.D.2. If NO, this project is not subject to the HM requirements.	☐	☐
III.D.2 Is the total impervious area increased from the pre-project condition? If YES continue to item III.D.3. If NO, this project is not subject to the HM requirements.	☐	☐
III.D.3 Is the site located in a tidally influenced/depositional area, or in the extreme eastern portion of the county that is not subject to HM requirements? (See HMP Susceptibility Map.) If NO continue to III.D.4. If YES the project is exempt from HM requirements. Attach map indicating project location. Skip to III.D.6 and check "NO".	☐	☐
III.D.4 Is the site located in a high slope zone or special consideration watershed, as shown on the HMP Susceptibility Map? If YES Project is subject to HM requirements. Attach map indicating project location. Skip to III.D.6 and check "YES.". If NO, continue to III.D.5.	☐	☐
III.D.5 For sites located in a white area on the HMP Susceptibility Map, has an engineer or qualified environmental professional determined that runoff from the project flows only through a hardened channel or enclosed pipe along its entire length before emptying into a waterway in the exempt area?	☐	☐

[11] The MRP no longer requires that a feasibility analysis of infiltration and rainwater harvesting be conducted. However, applicants using biotreatment are encouraged to maximize infiltration of stormwater if site conditions allow. If feasible and desired, infiltration and rainwater harvesting may be cost effective solutions depending on the project.

If YES, the project is exempt from HM requirements. Attach signed statement by qualified professional. Go to III.D.6 and check "NO." If NO, the project is subject to HM requirements. Attach map indicating project location. Go to Item G.6 and check "YES."	☐	☐

III.D.6 Is the project a Hydromodification Management Project?

☐ YES the project is subject to the *HM requirements in MRP Provision C.3.g.*

☐ NO, the project is not subject to the HM requirements.

- If the project is subject to the HM requirements, incorporate in the project flow duration stormwater control measures designed such that post-project stormwater discharge rates and durations match pre-project discharge rates and durations. The Bay Area Hydrology Model (BAHM) has been developed to size flow duration controls. See https://www.clearcreeksolutions.info/bahm-download-page. Guidance is provided the *C.3 Technical Guidance*.

IV. Implementation of C.6 Construction Phase Requirements

All projects must complete Section IV.

IV.A Select Appropriate Construction Phase BMPs[12]

BMP	Plan Sheet #	Yes	No
Attach the municipality's construction BMP plan sheet to project plans and require contractor to implement the applicable BMPs on the plan sheet.		☐	☐
Implement temporary erosion controls to stabilize all disturbed areas until permanent erosion controls are established.		☐	☐
Delineate with field markers clearing limits, easements, setbacks, sensitive or critical areas, buffer zones, trees, and drainage courses.		☐	☐
Provide notes, specifications, or attachments describing: ▪ Construction, operation and maintenance of erosion and sediment controls, include inspection frequency; ▪ Methods and schedule for grading, excavation, filling, clearing of vegetation, and storage and disposal of excavated or cleared material; ▪ Specifications for vegetative cover and mulch, include methods and schedules for planting and fertilization; ▪ Provisions for temporary and/or permanent irrigation.		☐	☐
Perform clearing and earth moving activities only during dry weather.		☐	☐
Use sediment controls or filtration to remove sediment when dewatering and obtain all necessary permits.		☐	☐
Protect all storm drain inlets in vicinity of site using drop inlet protection		☐	☐
Trap sediment on-site, using BMPs such as sediment basins or traps, earthen dikes or berms, silt fences, check dams, erosion control blankets, covers for soil stock piles, etc.		☐	☐
Divert on-site runoff around disturbed areas and construction materials; divert off-site runoff around the site (e.g., swales and dikes).		☐	☐
Protect adjacent properties and undisturbed areas from construction impacts using vegetative buffer strips, sediment barriers or filters, dikes, mulching, or other measures as appropriate.		☐	☐
No cleaning, fueling, or maintaining vehicles on-site, except in a designated area where wash water is contained for proper management and spill controls are in place.		☐	☐
Store, handle, and dispose of construction materials/wastes properly to prevent contact with stormwater.		☐	☐
Contractor shall train and provide instruction to all employees/subcontractors re: construction BMPs.		☐	☐
Control and prevent the discharge of all potential pollutants, including pavement cutting wastes, paints, concrete, petroleum products, chemicals, wash water or sediments, rinse water from architectural copper, and non-stormwater discharges to storm drains and watercourses.		☐	☐

[12] Additional information on Construction Phase BMPs can be found is MRP Provision C.6 and the California Stormwater Quality Association's Construction BMP Handbook.

V. Stormwater Treatment Measure and/HM Control Owner or Operator's Information *C.3.b Regulated Projects must complete Section V.*	
Name	Nhan Nguyen Le
Address	2425 Channing Way Ste. B, PMB #820 Berkeley, CA 94705
Phone	916-224-3715
Email	nhan@valiancecap.com
➢ *Applicant must call for inspection and receive inspection within 45 days of installation of treatment measures and/or hydromodification management controls.*	
Name of Applicant Completing Form	
Signature	Nhan Nguyen Le
Date	Feb 3, 2025

Stormwater Requirements Checklist
Municipal Regional Stormwater Permit (MRP 3)
Stormwater Controls for Development Projects

VI. For Completion by Municipal Staff

(This section is only applicable for C.3.b Regulated Projects)

VI.1 Alternative Certification	**YES**	**NO**
Was the treatment system sizing and design reviewed by a qualified third-party professional that is not a member of the project team or agency staff?	☐	☐
Name of Reviewer:	☐	☐
VI.2 Confirm Operations and Maintenance (O&M) Submittal Complete for C.3.b Regulated Projects and HM Projects	☐	☐
VI.2.a Was the maintenance plan submitted?	☐	☐
VI.2.b Was the maintenance plan approved?	☐	☐
VI.2.c Was the maintenance agreement approved?	☐	☐

Date maintenance agreement was executed:	

VI.3 HM Controls (if required) Are the applicable items for HM compliance included in the plan submittal?			
Documentation for HM Compliance	**YES**	**NO**	**NA**
Site plans with pre- and post-project impervious surface areas, surface flow directions of entire site, locations of flow duration controls and site design measures per HM site design requirement	☐	☐	☐
Soils report or other site-specific document showing soil types at all parts of site	☐	☐	☐
If project uses the Bay Area Hydrology Model (BAHM), a list of model inputs.	☐	☐	☐
If project uses custom modeling, a summary of the modeling calculations with corresponding graph showing curve matching (existing, post-project, and post-project with HM controls curves), goodness of fit, and (allowable) low flow rate.	☐	☐	☐
If project uses the Impracticability Provision, a listing of all applicable costs and a brief description of the alternative HM project (name, location, date of start up, entity responsible for maintenance).	☐	☐	☐
If the project uses alternatives to the default BAHM approach or settings, a written description and rationale.	☐	☐	☐

- Municipal staff: Refer to the "Flow Duration Control Review Worksheet for HM Submittals" to review the documentation submitted for HM compliance.

Special Projects Worksheet

Complete this worksheet for projects that appear to meet the definition of "Special Project", per Provision C.3.e.ii of the Municipal Regional Stormwater Permit (MRP). The form assists in determining whether a project meets Special Project criteria, and the percentage of low impact development (LID) treatment reduction credit. Special Projects that implement less than 100% LID treatment must provide a narrative discussion of the feasibility or infeasibility of 100% LID treatment. See Appendix J of the C.3 Technical Guidance (download at https://www.cleanwaterprogram.org/) for more information.

Project Name: Student Housing 2298 Durant

Project Address: 2298 Durant Ave. Berkeley CA 94704

Applicant/Developer Name: Valiance Capital, 2298 Durant Ave., Berkeley, CA 94704

1. "Special Project" Determination *(Check the boxes to determine if the project meets any of the following categories.)*

Special Project Category "A"

Does the project have ALL of the following characteristics?

- ☒ Located in a municipality's designated central business district, downtown core area or downtown core zoning district, neighborhood business district or comparable pedestrian-oriented commercial district, or historic preservation site and/or district[1];
- ☒ Creates and/or replaces 0.5 acre or less of impervious surface;
- ☒ Includes no surface parking, except for incidental parking for emergency vehicle access, ADA access, and passenger or freight loading zones;
- ☒ Has at least 85% coverage of the entire site by permanent structures. The remaining 15% portion of the site may be used for safety access, parking structure entrances, trash and recycling service, utility access, pedestrian connections, public uses, landscaping and stormwater treatment.

☐ **No (continue)** ☒ **Yes – complete Section 2A of the Special Project Worksheet**

Special Project Category "B"

Does the project have ALL of the following characteristics?

- ☐ Located in a municipality's designated central business district, downtown core area or downtown core zoning district, neighborhood business district or comparable pedestrian-oriented commercial district, or historic preservation site and/or district[1];
- ☐ Creates and/or replaces an area of impervious surface that is greater than 0.5 acre, and no more than 2.0 acres of impervious surface;
- ☐ Includes no surface parking, except for incidental parking for emergency access, ADA access, and passenger or freight loading zones;
- ☐ Has at least 85% coverage of the entire site by permanent structures. The remaining 15% portion of the site may be used for safety access, parking structure entrances, trash and recycling service, utility access, pedestrian connections, public uses, landscaping, and stormwater treatment;
- ☐ Minimum density of either 50 dwelling units per acre (DU/ac) (for residential projects) or a Floor Area Ratio (FAR) of 2:1 (for commercial or mixed use projects)

☐ **No (continue)** ☐ **Yes – complete Section 2B of the Special Project Worksheet**

Special Project Category "C"

Does the project have ALL of the following characteristics?

- ☐ Must have affordable housing deed restrictions running a minimum of 55 years that limit the rent/mortgage rates (including utilities) to be no greater than 30 percent of the total household income and meet the income levels specified by the Federal Department of Housing and Urban Development's affordable housing in metropolitan areas: Extremely Low: 0-30 percent of area median household income (AMI); Very Low: 31-50 percent of AMI; Low: 51-80 percent of AMI; and Moderate 81-120 percent of AMI.
- ☐ Is primarily a residential development.
- ☐ Minimum gross density of 40 DU/ac.

☐ **No** ☐ **Yes – complete Section 2C of the Special Project Worksheet**

[1] And built as part of a municipality's stated objective to preserve/enhance a pedestrian-oriented type of urban design.

Special Projects Worksheet (continued)

2. LID Treatment Reduction Credit Calculation *(If more than one category applies, choose only one of the applicable categories and fill out the table for that category.)*

Category	Impervious Area Created/Replaced (sq. ft.)	Site Coverage (%)	Project Density or FAR	Density/Criteria	Allowable Credit (%)	Applied Credit (%)
A	10,878	87	NA	NA	100%	75
B				Res ≥ 50 DU/ac or FAR ≥ 2:1	50%	
				Res ≥ 75 DU/ac or FAR ≥ 3:1	75%	
				Res ≥ 100 DU/ac or FAR ≥ 4:1	100%	
C[2]				**Affordable Housing credit (select one):**		
				The minimum percentage of the DUs meet the 70% credit requirements listed in **Table 1**.	70%	
				The minimum percentage of the DUs meet the 50% credit requirements listed in **Table 1**.	50%	
				The minimum percentage of the DUs meet the 25% credit requirements listed in **Table 1**.	25%	
				Location credit (select one)[3]:		
				Within ¼ mile of transit hub	5%	
				Within a planned Priority Development Area (PDA)[4]	10%	
				Density credit (select one):		
				Gross density ≥ 40 DU/Ac	5%	
				Gross density ≥ 60 DU/Ac	10%	
				Gross density ≥ 100 DU/Ac	15%	
				Parking credit (select one):		
				Includes no surface parking, except for incidental parking for emergency vehicle access, ADA access, and passenger or freight loading zones	5%	
				TOTAL CATEGORY C CREDIT =		

[2] For any Category C Special Project, the total maximum LID Treatment Reduction Credit allowed is the sum of four different types of credits that the Category C Special Project may qualify for, namely: Affordable Housing + Location, Density + Minimized Surface Parking Credits. A Category C Special Project must at least qualify for an Affordable Housing credit before it can earn any credits in the other categories.

[3] To qualify for a Location Credit, 100% of the Category C Special Project's site must be located within the ¼-mile radius of an existing or planned transit hub.

[4] A "planned Priority Development Area" is an infill development area formally designated by the Association of Bay Area Government's Metropolitan Transportation Commission's FOCUS regional planning program.

Special Projects Worksheet (continued)

3. Narrative Discussion of the Feasibility/Infeasibility of 100% LID Treatment:

If project will implement less than 100% LID, prepare a discussion of the feasibility or infeasibility of 100% LID treatment, as described in Appendix J of the C.3 Technical Guidance.

4. Select Certified Non-LID Treatment Measures:

If the project will include non-LID treatment measures, select a treatment measure certified for "Basic" General Use Level Designation (GULD) by the Washington State Department of Ecology's Technical Assessment Protocol – Ecology (TAPE). Guidance is provided in Appendix J of the C.3 Technical Guidance.[5]

Special Projects Worksheet Completed by:

Brian Dorward — Signature

4/17/25 — Date

Brian Dorward

Print or Type Name

Table 1 Affordable Housing Credit Table

AMI	Minimum Percentage of DUs		
	70% credit	50% credit	25% credit
Moderate (≤120% of AMI)	100	75	50
Low (≤80% of AMI)	75	50	25
Very Low (≤50% of AMI)	50	25	15
Extremely Low (≤30% of AMI)	25	15	5

[5] TAPE certification is used in order to satisfy Special Project's reporting requirements in the MRP.

LID Infeasibility Special Projects Narrative

The project at 2298 Durant Avenue is an eight story apartment building with 65 units and 298 bedrooms, creating much needed housing in the City of Berkeley near the UC Berkeley campus.

The existing site is composed of two properties with an existing apartment building on each property that will be removed. The 2 properties will be merged for the construction of a new apartment building. The entire site is 0.281 acres.

The project is creating approximately 0.250 acres of new impervious area composed of roof and at grade concrete paving. The existing site has approximately 0.243 acres of impervious area.

The site is within ½ mile of an AC Transit bus stop serving bus lines 7, 36, 79, 518, 604, 605, 851.

There are many factors contributing to the infeasibility of the use of at grade storm water treatment areas.

The building footprint occupies approximately 87% of the project area. The site is a corner lot. The area outside of the building consists of a 5.22' setback on the south property line and 3.26' setback on the west property line. On the east and north property lines that front on Ellsworth Street and Durant Ave. the building is built up to the property line, except for a small courtyard on the east side of the property adjacent to Ellsworth Street.

Flowthrough planters cannot be constructed in the west and south building setbacks because of window washing OSHA requirements that require a level paved surface around the building for window washing equipment.

There is a small courtyard at the east property line on Ellsworth Street that is being utilized as a flow through planter. The flow through planter is not large enough to treat the entire roof since it shares the courtyard space with an above ground transformer. PG&E is no longer allowing projects to install below grade transformers that would typically be located in the city sidewalk. This courtyard area also needs to provide level paved surface adjacent to the building for window washing equipment.

At grade stormwater treatment is infeasible for the entire roof since flow through planters cannot be located in the 5.22' south setback and 3.26' west setback due to the OSHA window washing requirement for level paved surface around the building and the size of the flowthrough planter at the east courtyard is limited due to the above ground transformer and the OSHA window washing requirement for level paved surface around the building. The flow through planter at the courtyard can only treat 25% of the roof area.

Certification for the Contech filter vault has been included.

We reached out to Vincent Chen at the City of Berkeley Public Works Department and he was not aware of any off-site regional projects where alternative compliances can be used.

1 INTRODUCTION

This report has been prepared as a technical analysis for the proposed 65-unit multifamily housing development (project) at 2298 Durant Avenue in the City of Berkeley (City), Alameda County. The report includes a quantitative analysis of air quality impacts associated with the project, consistent with guidance and methodology from the Bay Area Air Quality Management District's (BAAQMD's) 2022 CEQA Guide (BAAQMD 2022). Further, the analysis is consistent with applicable California Environmental Quality Act (CEQA) Appendix G Checklist questions for air quality and all current State laws. The report includes a brief project description, applicable regulatory and existing environment, methods to analysis, thresholds of significance, and an impact analysis discussion.

2 PROJECT DESCRIPTION

The project is located on two parcels in the City: Assessor Parcel Number [APN]) 55-1887-1 located at 2298 Durant Avenue and APN 55-1887-2 located at 2360 Ellsworth Street in Berkelet, California. The project would involve demolishing existing structures, then combining of the existing two lots into one, to develop an 8-story 65-unit residential building. The existing approximately 5,004 square feet (sq. ft.) office building and associated parking/asphalt located at 2298 Durant Avenue as well as the existing approximately 5,307 sq. ft. apartment building and associated parking/asphalt located at 2360 Ellsworth Street would be demolished. The proposed residential building would be 8-stories with 65 residential units, totaling 80,046 sq. ft. No parking spaces are proposed.

2.1 PROJECT CONSTRUCTION

Both sites are currently developed, consisting of a 5,004 square sq. ft. office building, a 5307 sq. ft. apartment building, associated surface parking spaces and paved/asphalt areas. In total, 12,200 sq. ft. of the existing developed area would be demolished/removed from the site, before project construction. Demolition activities are anticipated to begin on February 1, 2026, and require up to three months, being completed by May 1, 2026. Project construction would be anticipated to require 20 months, beginning on May 1, 2026, and ending on March 1, 2028.

Construction activities would include the use of equipment such as backhoes, dump trucks, skid steers, rubber-tired dozers, graders, pavers, rollers, cranes, welders, and generators. As required by BAAQMD, applicable basic dust control practices would apply to all construction activities of the project. Standard construction best practices that would be implemented during construction include the following:

- During all active construction activity, all exposed surfaces (e.g., parking areas, staging areas, soil piles, graded areas, and unpaved access roads) shall be watered two times per day or as otherwise needed to control dust.
- All haul trucks transporting soil, sand, or other loose material off-site shall be covered.
- All visible mud or dirt track-out onto adjacent public roads shall be removed using wet power vacuum street sweepers at least once per day when necessary. The use of dry power sweeping is prohibited.
- All roadways, driveways, and sidewalks to be paved shall be completed as soon as possible. Building pads shall be laid as soon as possible after grading unless seeding or soil binders are used.
- Idling times shall be minimized either by shutting equipment off when not in use or reducing the maximum idling time to 5 minutes (as required by the California airborne toxics control measure Title 13, Section 2485 of California Code of Regulations [CCR]). Clear signage shall be provided for construction workers at all access points.
- All construction equipment shall be maintained and properly tuned in accordance with manufacturer's specifications. All equipment shall be checked by a certified mechanic and determined to be running in proper condition prior to operation.

- Post a publicly visible sign with the telephone number and person to contact as the Responsible Entity regarding dust complaints. This person shall respond and take corrective action within 48 hours. The BAAQMD's phone number shall also be visible to ensure compliance with applicable regulations.

3 REGULATORY SETTING

3.1 FEDERAL

The U.S. Environmental Protection Agency (EPA) has been charged with implementing national air quality programs. EPA's air quality mandates are drawn primarily from the federal Clean Air Act (CAA), which was enacted in 1970. The most recent major amendments to the CAA were made by Congress in 1990.

3.1.1 Criteria Air Pollutants

The CAA required EPA to establish national ambient air quality standards (NAAQS) for six common air pollutants found all over the United States referred to as criteria air pollutants and precursors. EPA has established primary and secondary NAAQS for the following criteria air pollutants: ozone, carbon monoxide (CO), nitrogen dioxide (NO_2), sulfur dioxide (SO_2), respirable particulate matter with aerodynamic diameter of 10 micrometers or less (PM_{10}), fine particulate matter with aerodynamic diameter of 2.5 micrometers or less ($PM_{2.5}$), and lead. Regulatory updates to the NAAQS have occurred since 2016. The most recent standards for NAAQS and the California Ambient Air Quality Standards (CAAQS) are summarized below in Table 1. Notably, the EPA updated the 8-hour ozone NAAQS in 2015 to 0.070 parts per million (ppm) (EPA 2022a). The primary standards protect public health and the secondary standards protect public welfare.

Table 1 National and California Ambient Air Quality Standards

Pollutant	Averaging Time	CAAQS[a,b]	NAAQS[c] Primary[b,d]	NAAQS[c] Secondary[b,e]
Ozone	1-hour	0.09 ppm (180 µg/m^3)	–[e]	Same as primary standard
	8-hour	0.070 ppm (137 µg/m^3)	0.070 ppm (147 µg/m^3)	Same as primary standard
Carbon monoxide (CO)	1-hour	20 ppm (23 mg/m^3)	35 ppm (40 mg/m^3)	Same as primary standard
	8-hour	9 ppm[f] (10 mg/m^3)	9 ppm (10 mg/m^3)	Same as primary standard
Nitrogen dioxide (NO_2)	Annual arithmetic mean	0.030 ppm (57 µg/m^3)	53 ppb (100 µg/m^3)	Same as primary standard
	1-hour	0.18 ppm (339 µg/m^3)	100 ppb (188 µg/m^3)	—
	24-hour	0.04 ppm (105 µg/m^3)	—	—
Sulfur dioxide (SO_2)	3-hour	—	—	0.5 ppm (1300 µg/m^3)
	1-hour	0.25 ppm (655 µg/m^3)	75 ppb (196 µg/m^3)	—
Respirable particulate matter (PM_{10})	Annual arithmetic mean	20 µg/m^3	—	Same as primary standard
	24-hour	50 µg/m^3	150 µg/m^3	Same as primary standard
Fine particulate matter ($PM_{2.5}$)	Annual arithmetic mean	12 µg/m^3	9 µg/m^3	15.0 µg/m^3
	24-hour	—	35 µg/m^3	Same as primary standard
Lead [f]	Calendar quarter	—	1.5 µg/m^3	Same as primary standard
	30-Day average	1.5 µg/m^3	—	—
	Rolling 3-Month Average	–	0.15 µg/m^3	Same as primary standard
Hydrogen sulfide	1-hour	0.03 ppm (42 µg/m^3)	No national Standards	No national Standards
Sulfates	24-hour	25 µg/m^3	No national Standards	No national Standards

Pollutant	Averaging Time	CAAQS[a,b]	NAAQS[c] Primary[b,d]	NAAQS[c] Secondary[b,e]
Vinyl chloride[f]	24-hour	0.01 ppm (26 µg/m^3)	No national Standards	No national Standards
Visibility-reducing particulate matter	8-hour	Extinction of 0.23 per km	No national Standards	No national Standards

Notes: CAAQS = California ambient air quality standards; NAAQS = national ambient air quality standards; µg/m^3 = micrograms per cubic meter; km = kilometers; ppb = parts per billion; ppm = parts per million.

a. California standards for ozone, carbon monoxide, SO_2 (1- and 24-hour), NO_2, particulate matter, and visibility-reducing particles are values that are not to be exceeded. All others are not to be equaled or exceeded. California ambient air quality standards are listed in the Table of Standards in Section 70200 of Title 17 of the California Code of Regulations.

b. Concentration expressed first in units in which it was promulgated. Equivalent units given in parentheses are based on a reference temperature of 25 degrees Celsius (°C) and a reference pressure of 760 torr. Most measurements of air quality are to be corrected to a reference temperature of 25°C and a reference pressure of 760 torr; ppm in this table refers to ppm by volume, or micromoles of pollutant per mole of gas.

c. National standards (other than ozone, particulate matter, and those based on annual averages or annual arithmetic means) are not to be exceeded more than once a year. The ozone standard is attained when the fourth highest 8-hour concentration in a year, averaged over three years, is equal to or less than the standard. The PM_{10} 24-hour standard is attained when the expected number of days per calendar year with a 24-hour average concentration above 150 µg/m^3 is equal to or less than one. The $PM_{2.5}$ 24-hour standard is attained when 98 percent of the daily concentrations, averaged over three years, are equal to or less than the standard. Contact the U.S. Environmental Protection Agency for further clarification and current federal policies.

d. National primary standards: The levels of air quality necessary, with an adequate margin of safety to protect the public health.

e. National secondary standards: The levels of air quality necessary to protect the public welfare from any known or anticipated adverse effects of a pollutant.

f. The California Air Resources Board has identified lead and vinyl chloride as toxic air contaminants with no threshold of exposure for adverse health effects determined. These actions allow for the implementation of control measures at levels below the ambient concentrations specified for these pollutants.

Sources: EPA 2022a, CARB 2016.

The sources of criteria air pollutants and their respective acute and chronic health impacts are described in Table 2.

Table 2 Sources and Health Effects of Criteria Air Pollutants

Pollutant	Sources	Acute[1] Health Effects	Chronic[2] Health Effects
Ozone	secondary pollutant resulting from reaction of ROG and NO_X in presence of sunlight. ROG emissions result from incomplete combustion and evaporation of chemical solvents and fuels; NO_X results from the combustion of fuels	increased respiration and pulmonary resistance; cough, pain, shortness of breath, lung inflammation	permeability of respiratory epithelia, possibility of permanent lung impairment
Carbon monoxide (CO)	incomplete combustion of fuels; motor vehicle exhaust	headache, dizziness, fatigue, nausea, vomiting, death	permanent heart and brain damage
Nitrogen dioxide (NO_2)	combustion devices; e.g., boilers, gas turbines, and mobile and stationary reciprocating internal combustion engines	coughing, difficulty breathing, vomiting, headache, eye irritation, chemical pneumonitis or pulmonary edema; breathing abnormalities, cough, cyanosis, chest pain, rapid heartbeat, death	chronic bronchitis, decreased lung function
Sulfur dioxide (SO_2)	coal and oil combustion, steel mills, refineries, and pulp and paper mills	irritation of upper respiratory tract, increased asthma symptoms	insufficient evidence linking SO_2 exposure to chronic health impacts
Respirable particulate matter (PM_{10}), Fine particulate matter ($PM_{2.5}$)	fugitive dust, soot, smoke, mobile and stationary sources, construction, fires and natural windblown dust, and formation in the atmosphere by condensation and/or transformation of SO_2 and ROG	breathing and respiratory symptoms, aggravation of existing respiratory and cardiovascular diseases, premature death	alterations to the immune system, carcinogenesis

Pollutant	Sources	Acute[1] Health Effects	Chronic[2] Health Effects
Lead	metal processing	reproductive/ developmental effects (fetuses and children)	numerous effects including neurological, endocrine, and cardiovascular effects

Notes: NOx = oxides of nitrogen; ROG = reactive organic gases.

[1] "Acute" refers to effects of short-term exposures to criteria air pollutants, usually at fairly high concentrations.

[2] "Chronic" refers to effects of long-term exposures to criteria air pollutants, usually at lower, ambient concentrations.

Source: EPA 2022b.

3.1.2 Toxic Air Contaminants

Toxic air contaminants (TACs) are a defined set of airborne pollutants that may pose a present or potential hazard to human health. A TAC is defined as an air pollutant that may cause or contribute to an increase in mortality or in serious illness, or that may pose a hazard to human health. TACs are usually present in minute quantities in the ambient air; however, their high toxicity or health risk may pose a threat to public health even at low concentrations.

A wide range of sources, from industrial plants to motor vehicles, emit TACs. The health effects associated with TACs are quite diverse and generally are assessed locally, rather than regionally. TACs can cause long-term health effects, such as cancer, birth defects, neurological damage, asthma, bronchitis, or genetic damage, or short-term acute effects, such as eye-watering, respiratory irritation (a cough), running nose, throat pain, and headaches.

For evaluation purposes, TACs are separated into carcinogens and noncarcinogens based on the nature of the physiological effects associated with exposure to the pollutant. Carcinogens are assumed to have no safe threshold below which health impacts would not occur. This contrasts with criteria air pollutants, for which acceptable levels of exposure can be determined and for which the ambient standards have been established (Table 1). Cancer risk from TACs is expressed as excess cancer cases per 1 million exposed individuals, typically over a lifetime of exposure.

EPA regulates HAPs through its National Emission Standards for Hazardous Air Pollutants. The standards for a particular source category require the maximum degree of emission reduction that EPA determines to be achievable, which is known as the Maximum Achievable Control Technology standards. These standards are authorized by Section 112 of the 1970 CAA, and the regulations are published in 40 CFR Parts 61 and 63.

3.2 STATE

The California Air Resources Board (CARB) is the agency responsible for coordination and oversight of state and local air pollution control programs in California and for implementing the California Clean Air Act (CCAA). The CCAA, which was adopted in 1988, required CARB to establish CAAQS.

3.2.1 Criteria Air Pollutants

CARB has established CAAQS for sulfates, hydrogen sulfide, vinyl chloride, visibility-reducing particulate matter, and the above-mentioned criteria air pollutants. In some cases, the CAAQS are more stringent than the NAAQS. Differences in the standards are generally explained by the health effects studies considered during the standard-setting process and the interpretation of the studies. In addition, the CAAQS incorporate a margin of safety to protect sensitive individuals.

The CCAA requires that all local air districts in the state endeavor to attain and maintain the CAAQS by the earliest date practical. The CCAA specifies that local air districts should focus particular attention on reducing the emissions from stationary emission sources and provides air districts with the authority to implement indirect source and transportation control measures.

3.2.2 Toxic Air Contaminants

TACs in California are regulated primarily through the Tanner Air Toxics Act (Assembly Bill [AB] 1807, Chapter 1047, Statutes of 1983) and the Air Toxics Hot Spots Information and Assessment Act of 1987 (AB 2588, Chapter 1252, Statutes of 1987). AB 1807 sets forth a formal procedure for CARB to designate substances as TACs. Research, public participation, and scientific peer review are required before CARB can designate a substance as a TAC. To date, CARB has identified more than 200 TACs and adopted EPA's list of hazardous air pollutants (HAPs) as TACs. Most recently, particulate matter (PM) exhaust from diesel engines (diesel PM) was added to CARB's list of TACs.

3.3 LOCAL

3.3.1 Bay Area Air Quality Management District

BAAQMD maintains and manages air quality conditions in the San Francisco Bay Area Air Basin (SFBAAB), including Alameda County, through a comprehensive program of planning, regulation, enforcement, technical innovation, and promotion of the understanding of air quality issues. The clean air strategy of BAAQMD includes the preparation of plans and programs for the attainment of the NAAQS and CAAQS, adoption and enforcement of rules and regulations, and issuance of permits for stationary sources. BAAQMD also inspects stationary sources, responds to citizen complaints, monitors ambient air quality and meteorological conditions, and implements other programs and regulations required by the CAA and CCAA.

The CCAA requires that all local air districts in the state endeavor to achieve and maintain the CAAQS in their region by the earliest practical date. The CCAA specifies that local air districts should focus attention on reducing the emissions from transportation and area-wide emission sources and provides districts with the authority to regulate indirect sources. To achieve the CAAQS, BAAQMD prepares and updates air quality plans regularly. The air quality plans published by BAAQMD and other local air districts in the state are incorporated into California's SIP Strategy and meet CAA requirements.

3.3.2 2017 Clean Air Plan: Spare the Air, Cool the Climate

The most recently adopted air quality plan for the San Francisco Bay Area Air Basin (SFBAAB) is the 2017 Clean Air Plan. To fulfill State ozone planning requirements, the 2017 control strategy includes all feasible measures to reduce emissions of ozone precursors (ROG and NO_X) and reduce the transport of ozone and its precursors to neighboring air basins. In addition, the 2017 Clean Air Plan builds upon and enhances BAAQMD's efforts to reduce emissions of fine particulate matter (i.e., $PM_{2.5}$) and TACs. The 2017 Clean Air Plan does not include control measures that apply directly to individual development projects. Instead, the control strategy includes measures related to stationary sources, transportation, energy, buildings, agriculture, natural and working lands, waste management, water, and super-greenhouse gas pollutants (BAAQMD 2017).

The 2017 Plan focuses on two paramount goals (BAAQMD 2017):

- Protect air quality and health at the regional and local scale by attaining all state and national air quality standards and eliminating disparities among Bay Area communities in cancer health risk from TACs;
- and protect the climate by reducing Bay Area GHG emissions to 40 percent below 1990 levels by 2030, and 80 percent below 1990 levels by 2050.

4 EXISTING ENVIRONMENTAL SETTING

The project site is located in the City of Berkeley, Alameda County, within the SFBAAB. Air quality in the project area is regulated by EPA, CARB, and the BAAQMD. Each agency develops rules, regulations, and/or policies to comply with

applicable legislation. EPA and CARB have set ambient air quality standards for certain air pollutants to protect public health and welfare. If an area has not achieved the NAAQS or CAAQS for any criteria pollutant, EPA and CARB classify it as a nonattainment area for the respective criteria pollutant. A nonattainment area is required to have an air quality attainment plan (AQAP) to attain and maintain the required standards. These plans are typically developed by the local air district which for the proposed action is BAAQMD. The attainment status of criteria air pollutants for Alameda County is shown below in Table 3.

Table 3 Attainment Status Designations for Alameda County

Pollutant	National Designation	State Designation
Ozone	Nonattainment	Nonattainment
PM_{10}	Attainment	Nonattainment
$PM_{2.5}$	Nonattainment	Nonattainment
CO	Attainment	Attainment
NO_2	Attainment	Attainment
SO_2	Attainment	Attainment
Lead (Particulate)	Attainment	Attainment

Notes: CO = carbon monoxide; NO_2 = nitrogen dioxide; $PM_{2.5}$ = fine particulate matter; PM_{10} = respirable particulate matter; SO_2 = sulfur dioxide.

Sources: EPA 2023, CARB 2022.

5 APPLICABLE STANDARDS OF ANALYSIS

The air quality analysis prepared for this project is intended to serve the purpose of satisfying CEQA requirements by providing the necessary analysis to support the preparation of an exemption. The following criteria were used to meet these requirements.

5.1 BAY AREA AIR QUALITY MANAGEMENT DISTRICT

BAAQMD sets thresholds of significance to evaluate air quality and GHG impacts under CEQA. BAAQMD's air quality thresholds of significance are tied to achieving or maintaining attainment designations with the NAAQS and CAAQS. BAAQMD's project level thresholds, which are scientifically substantiated, are numerical concentrations of criteria air pollutants considered to be protective of human health. Projects that do not exceed thresholds would not contribute to the nonattainment of the CAAQS and subsequently the NAAQS or result in increases in health-related impacts associated with increases in criteria air pollutants or ozone precursors. Applicable thresholds are shown below in Table 4.

Table 4 Standards of Analysis

Pollutant	Construction	Operations
Criteria Air Pollutants and Precursors	Average Daily (lb/day)	Average Daily Emissions (lb/day)
ROG	54	54
NOx	54	54
PM_{10} (exhaust)	82	82
$PM_{2.5}$ (exhaust)	54	54
$PM_{10}/PM_{2.5}$ (fugitive dust)	BMPs	None
Local CO	None	9.0 ppm (8-hour average), 20.0 ppm (1-hour average)
Risk and Hazards for new sources and receptors (Individual Project)	Same as Operational	Increased Cancer Risk of > 10.0 in a million Increased non-cancer risk of > 1.0 Hazard Index (Chronic/Acute) Ambient $PM_{2.5}$ increase: > 0.3 µg/m^3 annual average

Pollutant	Construction	Operations
Risk and Hazards for new sources and receptors (Cumulative Threshold)	Same as Operational	Cancer: > 100 in a million (from all sources) Non-cancer: > 10.0 Chronic Hazard Index (from all sources) $PM_{2.5}$: >0.8 µg/m^3 annual average (from all sources)
Odors	None	5 confirmed complaints per year averaged over three years

Notes: ROG=reactive organic compounds; NOx=oxides of nitrogen; PM_{10}=respirable particulate matter; $PM_{2.5}$=fine particulate matter; CO=carbon monoxide; BMPs=best management practices; lb/day=pounds per day; ppm=parts per million; µg/m^3=micrograms per cubic meter.

Source: BAAQMD 2022.

5.2 THRESHOLDS OF SIGNIFICANCE

The project site is in Alameda County, which is under the jurisdiction of BAAQMD. BAAQMD adopted thresholds of significance to assist lead agencies in the evaluation and mitigation of air quality impacts under CEQA. The BAAQMD thresholds, which are incorporated in the 2022 CEQA Air Quality Guidelines, establish the levels at which emissions of ozone precursors (ROG and NOx), PM, local carbon monoxide, and TACs would cause significant air quality impacts. Impacts are evaluated both based on CEQA Guidelines Appendix G questions and BAAQMD significance criteria. Appendix G of the State CEQA Guidelines includes the following criteria for assessing an air quality impact:

a) Would the project conflict with or obstruct the implementation of the applicable air quality plan?

b) Would the project result in a cumulatively considerable net increase of any criteria pollutant for which the Project region is non-attainment under an applicable federal or state ambient air quality standard?

c) Would the project expose sensitive receptors to substantial pollutant concentrations?

d) Would the project result in other emissions (such as those leading to odors) adversely affecting a substantial number of people?

Based on the CEQA Appendix G questions and adopted BAAQMD thresholds, the project would result in a significant air quality impact if it would:

- cause daily average construction-generated criteria air pollutant or precursor emissions to exceed 54 pounds per day (lb/day) for ROG and NO_X, 82 lb/day for PM_{10} exhaust, and 54 lb/day for $PM_{2.5}$ exhaust, or substantially contribute to emission concentrations (e.g., PM_{10}, $PM_{2.5}$) that exceed applicable NAAQS or CAAQS;
- cause daily average long-term criteria air pollutant or precursor emissions to exceed 54 lb/day or 10 tons per year (tons/year) of ROG and NO_X, 82 lb/day or 15 tons/year for PM_{10} exhaust, and 54 lb/day or 10 tons/year for $PM_{2.5}$ exhaust, or substantially contribute to emission concentrations (e.g., PM_{10}, $PM_{2.5}$) that exceed the applicable NAAQS or CAAQS;
- not implement BAAQMD's Basic Construction Mitigation Measures for dust emissions (e.g., PM_{10} and $PM_{2.5}$);
- result in long-term operational local mobile-source CO emissions that would violate or contribute substantially to concentrations that exceed the 1-hour CAAQS of 20 parts per million (ppm) or the 8-hour CAAQS of 9 ppm;
- expose sensitive receptors to a substantial incremental increase in TAC emissions that exceed 10 in one million for carcinogenic risk (i.e., the risk of contracting cancer) and/or a noncarcinogenic hazard index of 1.0 or greater and/or a chronic or acute hazard index of 1; or
- result in other emissions (such as those leading to odors) adversely affecting a substantial number of people (i.e., five confirmed complaints per year averaged over 3 years).

6 METHODS AND ASSUMPTIONS

All methods and emissions models used are consistent with BAAQMD's 2022 CEQA Guide. Notably, while the 2022 CEQA Guide provides screening tables to evaluate project's emissions, the screening tables are not appropriate for use when projects propose demolition activities. Therefore, in accordance with BAAQMD's recommended approach in this scenario, project construction and operational emissions were quantified. Detailed methods are described below.

Construction

Short-term construction-related emissions of criteria air pollutants and precursors were calculated using the California Emissions Estimator Model (CalEEMod) Version 2022.1.1.22 computer program (CAPCOA 2022). Construction modeling was based on project-specific information (e.g., construction schedule, building size/type to be demolished/constructed), as well as reasonable assumptions based on typical construction activities. The existing structures and associated paved areas would be wholly removed, totaling 12,200 sq. ft. of material. CalEEMod default conversion rates from sq. ft. to weight were applied to determine material waste haul trips that would be required.

Model defaults were used for construction equipment type and quantity. Site preparation and grading would be minimal and were assumed to be balanced with no export or import of material required. Per BAAQMD requirements, basic dust control practices were applied in-model as these practices would be required for all projects. See the Project Description above for a complete list of dust measures that would be implemented during construction. See Appendix A for further details on modeling inputs and assumptions. Regarding TACs, CO, and odors, these impacts were evaluated qualitatively.

Operations

Operational emissions of criteria air pollutants and precursors were estimated using project-specific information, where available, and default values in CalEEMod based on the project's location and land use. Mobile-source emissions were modeled in CalEEMod, using default trip generation rates. However, project-specific design features such as project development proximate to BART and no onsite parking were modeled in the mitigation portion of CalEEMod. While these are project features and not mitigation under CEQA, these design features are included in CalEEMod's mitigation module; thus, the resultant mitigated model output represents the proposed project. These project design features were incorporated in the CalEEMod run by including reduction measures T-3 (provide transit-oriented development) a T-15 (limit residential parking supply). T-3 incorporates vehicular use reduction for Transit-Oriented Development because the project site is within 0.5 miles of the BART and T-15 reduces anticipated vehicle trip use due to reduced onsite parking supply. Specific model assumptions and inputs for these calculations can be found in Appendix A. Regarding TACs, CO, and odors, these impacts were evaluated qualitatively.

7 IMPACT ANALYSIS

Impact 1- Project-Generated Criteria Air Pollutants and Ozone Precursors

Construction

Construction-related activities would generate emissions of ROG, NO_X, PM_{10}, and $PM_{2.5}$ associated with off-road equipment use, material delivery, hauling trips, worker commute trips, and other miscellaneous activities (e.g., application of architectural coatings). Fugitive dust emissions of PM_{10} and $PM_{2.5}$ would be associated primarily with the initial demolition and site preparation/grading phases. PM_{10} and $PM_{2.5}$ are also contained in exhaust from off-road equipment and on-road vehicles. Emissions of ozone precursors, ROG and NO_X, would be associated primarily with construction equipment and on-road mobile exhaust. The application of architectural coatings results in off-gas emissions of ROG.

The project would be expected to be built out over an approximately 23-month period beginning as early as February 2026 and completed by March 2028. The BAAQMD CEQA Guide provides screening tables to evaluate the

magnitude of criteria air pollutants and ozone precursors. The tables were derived using various land use types/sizes and adopted thresholds of significance, and default conservative values in CalEEMod. Thus, generally, projects that are similar or smaller in size than the values in the screening tables, would not result in an adverse impact on air quality. The project proposes to construct 65 residential unit. Applying the "apartment" or "condo-townhouse" land use from Table 4-1 Single Land Use Construction and Operational Criteria Air Pollutant and Ozone Precursor Screening Levels, the screening size is 416 units. Because the project would be substantially smaller than the most applicable screening size, adverse air quality impacts would not be anticipated. However, due to the need to demolish existing structures and the mixed-use component, BAAQMD and the City recommend conducting a more detailed evaluation.

Based on project-specific information, including building type and size, location, and proposed onsite amenities, emissions modeling was conducted using CalEEMod. Model defaults were used for construction phasing and duration to provide a conservative estimate of emissions. As mentioned above, BAAQMD basic dust control practices were applied in-model as these practices are required of all projects. See Appendix A for further details on modeling inputs and assumptions. Table 5 below summarizes air quality emissions related to the construction of the proposed project.

Table 5 Estimated Construction Emissions (Average Daily)

Construction Emissions	ROG	NO_X	PM_{10} Exhaust	$PM_{2.5}$ Exhaust
2026 Average Daily Emissions (lb/day)	<1	3.3	<1	<1
2027 Average Daily Emissions (lb/day)	<1	3.5	<1	<1
2028 Average Daily Emissions (lb/day)	3.1	<1	<1	<1
BAAQMD Construction Threshold (daily)	**54**	**54**	**82**	**54**
Exceeds Threshold?	**No**	**No**	**No**	**No**

Notes: BAAQMD=Bay Area Air Quality Management District; ROG = reactive organic gases; NOx = oxides of nitrogen; CO = carbon monoxide; $PM_{2.5}$ = fine particulate matter; PM_{10} = respirable particulate matter; lb/day = pounds per day.

Source: Modeled by Ascent, 2025.

As shown above, construction emissions would not exceed adopted BAAQMD thresholds of significance for any criteria air pollutant or ozone precursor. Note that thresholds for PM_{10}/$PM_{2.5}$ are for exhaust portions of PM; thus, because total PM_{10}/$PM_{2.5}$ emissions are presented above (and are below exhaust thresholds) the exhaust portions of these pollutants would be even less than shown above. See Appendix A, CalEEMod outputs for breakdown by pollutant type.

The BAAQMD's project thresholds are intended to maintain or achieve attainment designations in the SFBAAB for the CAAQS and NAAQS. Thus, because the project does not exceed the thresholds it would not contribute to nonattainment status of the region.

Operations

Project operations would result in the generation of long-term emissions of ROG, NO_X, PM_{10}, and $PM_{2.5}$. Criteria air pollutants and precursors would result from mobile-source emissions related to vehicle trips to and from the project site, area sources associated with landscaping equipment, and energy-related emissions (i.e., indirect emissions from electricity generation). Modeling was conducted using project-specific information (e.g., building size/type, location, operational year) and model defaults, as described above.

Project-specific trip generation or vehicle miles traveled (VMT) data were not available; therefore, model defaults were used, which tend to be conservative compared to site-specific VMT estimates. However, project design features that affect VMT and trip generation (i.e., proximity to BART, no onsite parking, no natural gas) were accounted for in the CalEEMod modeling; thus, operational VMT and associated emissions reflect the proposed project but are also conservatively high compared to if a site-specific VMT assessment was conducted. Model input and outputs are included in Appendix A and results are summarized below in Table 6.

Table 6 Estimated Operational Emissions (Average Daily)

Emissions Source	ROG (lb/day)	NOx (lb/day)	PM_{10} Exhaust (lb/day)	$PM_{2.5}$ Exhaust (lb/day)
Mobile	<1	<1	<1	<1
Area	2.2	<1	<1	<1
Energy	<1	<1	<1	<1
Total Emissions	**2.8**	**<1**	**<1**	**<1**
BAAQMD Operations Threshold (daily)	**54**	**54**	**82**	**54**
Exceeds Threshold?	**No**	**No**	**No**	**No**

Notes: ROG = reactive organic gases; NOx = oxides of nitrogen; CO = carbon monoxide; $PM_{2.5}$ = fine particulate matter; PM_{10} = respirable particulate matter; lb/day = pounds per day; BAAQMD = Bay Area Air Quality Management District.

Source: Modeled by Ascent, 2025

Project operational emissions would not exceed adopted BAAQMD thresholds of significance for any criteria air pollutant or ozone precursor. As was reflected in the operational modeling for the project, project-specific design features such as project development proximate to BART and reduced onsite parking supply project emissions would be minimal. BAAQMD's project thresholds are intended to maintain or achieve attainment designations in the SFBAAB for the CAAQS and NAAQS. Thus, because the project does not exceed the thresholds it would not contribute to the nonattainment status of the region. Further, the project would not include onsite parking and would be located close to existing transit services. These features all serve to reduce trip generation, VMT, and mobile-source emissions, consistent with the primary objectives of the 2017 Clean Air Plan.

The project's construction and operational emissions of criteria air pollutants and ozone precursors would not exceed adopted thresholds of significance and would not contribute to the nonattainment status of the region or conflict with the implementation of the 2017 Clean Air Plan.

Applicable Conditions of Approval

During all construction activities, the construction contractors shall comply with the following standard dust practices:

- During all active construction activity, all exposed surfaces (e.g., parking areas, staging areas, soil piles, graded areas, and unpaved access roads) shall be watered two times per day or as otherwise needed to control dust.
- All haul trucks transporting soil, sand, or other loose material off-site shall be covered.
- All visible mud or dirt track-out onto adjacent public roads shall be removed using wet power vacuum street sweepers at least once per day when necessary. The use of dry power sweeping is prohibited.
- All roadways, driveways, and sidewalks to be paved shall be completed as soon as possible. Building pads shall be laid as soon as possible after grading unless seeding or soil binders are used.
- Idling times shall be minimized either by shutting equipment off when not in use or reducing the maximum idling time to 5 minutes (as required by the California airborne toxics control measure Title 13, Section 2485 of California Code of Regulations [CCR]). Clear signage shall be provided for construction workers at all access points.
- All construction equipment shall be maintained and properly tuned in accordance with manufacturer's specifications. All equipment shall be checked by a certified mechanic and determined to be running in proper condition prior to operation.
- Post a publicly visible sign with the telephone number and person to contact as the Responsible Entity regarding dust complaints. This person shall respond and take corrective action within 48 hours. The BAAQMD's phone number shall also be visible to ensure compliance with applicable regulations.

Impact 2- Toxic Air Contaminants

Construction-related activities would result in temporary, intermittent emissions of diesel PM (the TAC of primary concern from construction activities) and fugitive dust from the exhaust of off-road, heavy-duty diesel equipment used for construction activities (e.g., demolition, building construction); on-road truck travel; and other miscellaneous activities. On-road diesel-powered haul trucks traveling to and from the construction areas to deliver materials and equipment are less of a concern because they would not stay on the site for long periods. The project would adhere to standard dust suppression practices during construction activities, limiting fugitive dust emissions, and the project does not involve substantial earthwork (e.g., 50,000 cy or more) for extended periods (e.g., 1 or more years). Therefore, overall, TAC emissions from the project would not be substantial.

When evaluating TAC concentrations and associated health risks, the primary factors influencing risk exposure include the relative mass of emissions generated, duration of exposure of such emissions at receptor locations, and proximity of sources to receivers, because health risk increases with increased exposure duration and pollutant concentrations reduce with increasing distance from the source.

Regarding the relative mass of emissions, as shown in Table 4, TACs (i.e., $PM_{2.5}$ exhaust would average less than 1 lb/day). Demolition and site preparation activities are anticipated to require the most intense diesel exhaust-generating activities due to the use of the heaviest equipment type (e.g., dozers, graders) during these phases and each of these phases would be no more than 90 days. Following demolition and site preparation work, construction activities would not involve numerous diesel-powered heavy duty equipment operating for extended periods of time throughout the construction phases. Thus, in consideration of the short-term duration of the most intensive activities in combination with the size of the site that is relatively flat (as its currently developed) and mass excavation/earth moving would not be required, the project would not result in substantial construction-related TAC emissions.

The project would construct 65 residential units which would not include any major stationary TAC sources but would include an onsite emergency diesel generator, which would only be used in emergencies, likely no more than a few days per year. Further, all stationary sources would be reviewed by BAAQMD and required to comply with all permit conditions, as applicable, per Regulation 2, Rule 2 New Source Review. Increases in vehicular trips would be minimal (i.e., 243 trips per day), based on default CalEEMod trip generation rates for the project, and the project would not include onsite parking (reducing mobile-source TAC emission). Thus, because project-generated TAC sources would not be substantial, they would likewise not result in considerable contributions to the cumulative risk levels in the project vicinity. Project-generated TAC exposure would not result in a new major source that could exceed project-level or cumulative risk thresholds at any nearby existing receptor.

Impact 3- Emissions that Generate Odors

Construction of the project would result in minor odors from the use of heavy-duty diesel equipment. These odors would be intermittent and temporary, as they would only occur during the construction phase. Construction activities would be subject to BAAQMD Regulation 8, Rule 3, Architectural Coatings, and Rule 15, Emulsified Asphalt, which reduce odors from VOCs. Therefore, construction is not anticipated to result in substantial odors.

The BAAQMD identifies land uses typically associated with potential odor impacts, including coffee roasters, industrial uses, waste and compost facilities, and wastewater treatment plants, among others. The project would include 65 residential units with associated onsite amenities (e.g., onsite community areas, walkways), none of which would include long-term odor sources.

The proposed project would not introduce new odor sources to the project area. The use of heavy-duty diesel equipment during construction would be intermittent and short-term and would not result in substantial odors. As a result, the project would not result in substantial odor impacts to both existing and future sensitive receptors.

Impact 4- Carbon Monoxide Emissions

Mobile-source CO emissions have historically decreased since the advent of catalytic converters, which decrease mobile-source exhaust emissions, as well as improvements in fuel economy since the CO AAQS were established as implemented by EPA and CARB (e.g., the Corporate Average Fuel Economy standards and Advanced Clean Cars II program). Additionally, based on the project's size of 65 multi-family units, no onsite parking, proximity to transit, and

daily trip generation of 243, the project would not generate trips that would exceed BAAQMD's 44,000 vehicles per hour screening-level used to determine when site-specific CO dispersion modeling should be conducted. For these reasons, CO emissions from the proposed project would not result in a CO hotspot.

8 CONCLUSION

Project-generated emissions of criteria air pollutants and ozone precursors would not exceed BAAQMD thresholds. Further, the project would not result in new odor sources, substantial traffic leading to CO hotspots, new major stationary TAC sources or substantial non-stationary TAC emissions. Project-generated TAC emissions would not exceed BAAQMD cancer risk or health hazard thresholds (i.e., 10 chances in one million for cancer risk, Health Hazard Index of 1.0 for acute/chronic risk, or substantial $PM_{2.5}$ concentrations), or the cumulative risk thresholds (i.e., 100 chances in one million for cancer, Health Hazard Index of 10.0 for acute/chronic risk, or substantial $PM_{2.5}$ concentrations). The project would not result in adverse impacts (i.e., less than significant) to air quality.

1.0 Executive Summary

This report summarizes our analysis of the existing environmental noise levels and anticipated project-generated noise for the 81,213 GSF project at 2298 Durant Avenue, Berkeley. The project consists of the demolition of both an existing 2-story commercial building and a 3-story residential building over a 1-story partially subterranean parking garage. The two existing lots will be merged into one contiguous lot whose front is along Durant Avenue and will take the address of 2298 Durant Avenue.

The proposed project is an 8-story residential building consisting of 65 units. The ground floor includes a lobby, lounge, media room, multi-purpose room, and utility spaces. Other common spaces include an indoor amenity area with a balcony at the 4th floor and a roof deck at the 8th floor.

This report contains a CEQA noise study. Long term measurements conducted around the project site determined that the existing 24-hour ambient noise levels are up to L_{DN} 69 dBA on Durant Avenue. No analysis of project-generated traffic noise has been conducted, as project-generated traffic noise is exempt from CEQA as the project is located in a Transit Priority Area. Further, based on our experience with similar projects, project-generated traffic would not be a significant Impact.

Based on the exterior noise limits set by the Berkeley Municipal Code, the maximum allowable sound pressure level (SPL) at a distance of 10 feet for exterior HVAC equipment is 60 dBA. This limit is based on certain equipment quantity and placement assumptions discussed in this report, and this limit may need to be adjusted by the project acoustical consultant depending upon the final mechanical design.

Building facade noise reduction recommendations to achieve Building Code interior noise requirements will be provided as the design progresses. Additionally, we recommend a detailed construction noise study be prepared to evaluate and reduce the short-term impacts of construction activity on adjacent sensitive receptors.

2.0 Fundamentals of Noise

Noise is typically defined as unwanted sound and has the potential of negatively affecting human health. Noise in the community has often been cited as a health problem since it affects general well-being and contributes to undue stress and annoyance. At particularly high noise levels, hearing loss can occur. Details about the fundamentals of sound and common noise descriptors, as well as further discussion regarding human response to noise, are provided below.

Sound is the energy (disturbance or vibration), that is transmitted in the form of waves through a medium, such as air. Sound waves are typically described in terms of intensity and frequency. Sound intensity refers to the amount of energy in a sound wave and is quantified on a logarithmic “decibel” scale. Levels of sound intensity correspond to different degrees of loudness, where 0 dBA generally corresponds with the threshold of human hearing and sound levels of 120 dBA to 140 dBA, or higher correspond to thresholds of pain. The frequency of sound is defined as the number of cycles per second and is measured in hertz (Hz). Humans are typically sensitive to sound levels between 20 Hz to 20,000 Hz, where the frequency of a sound wave corresponds to the perceived pitch.

Since human ears are not equally sensitive to all frequencies, noise measurements are therefore weighted to account for the ear's frequency-dependent response to sound. The most common example of frequency-weighting is known as A-weighted decibel level ("dBA"; "dB(A)"), which is applied to most environmental noise measurements. Since sound levels are measured on a logarithmic scale, decibel addition is also based on a logarithmic scale. For example, a 65 dBA sound source when added to another 65 dBA source (a doubling of the sound pressure) does not result in 130 dBA, but rather in a total incremental increase of 3 dBA. In general, a change in sound level between 1 dB to 3 dB is barely noticeable to humans, where a change of 10 dB is perceived as a doubling or halving of sound level.

Sound levels reduce with respect to distance at different rates, depending on the source type. In general, noise from sources such as stationary mechanical equipment and construction machinery (known as "point sources") reduce between 6 dB to 7.5 dB per doubling of distance from the source. Noise from sources such as a busy highway (known as "line sources") reduce between 3 dB to 4.5 dB per doubling of distance from the source. The presented ranges of attenuation depend on the type of ground surface between the noise source and the receiver. Highways and hard surfaces such as concrete or asphalt typically have an attenuation rate of 6 dB for point sources and 3 dB for line sources, whereas softer surfaces, such as vegetated terrain, have an attenuation rate of 7.5 dB for point sources and 4.5 dB for line sources. Atmospheric conditions as well as shielding (such as the existence of buildings or noise walls between source and receiver) could also affect noise levels from different positions.

3.0 Acoustical Criteria

3.1 City of Berkeley General Plan

The City of Berkeley 2003 General Plan stipulates the following policies/goals applicable to this project.

- **Policy EM-46**: Noise Mitigation
  - Require operational limitations and all feasible noise buffering for new user that generate significant noise impacts near residential, institutional, or recreational areas.
  - Promote use of noise insulation materials in new construction and major rehabilitation.
  - Mitigate significant noise impacts on parks and public open space, whenever feasible.
- **Policy EM-47**: Land Use Compatibility
  - Ensure that noise-sensitive uses, including, but not limited to, residences, child-care centers, hospitals, and nursing homes are protected from detrimental noise levels.
  - Noise-sensitive development proposals should be reviewed with respect to the Land Use Compatibility Guidelines below (see *Figure 1*).
  - If the noise level is within the "normally acceptable" level, noise exposure would be acceptable for the intended land use. Development may occur without requiring an evaluation of the noise environment unless the use could generate noise impacts on adjacent uses.
  - If the noise level is within the "conditionally acceptable" level, noise exposure would be conditionally acceptable; a specified land use may be permitted only after detailed analysis of the noise environment and the project characteristics to determine whether noise insulation or protection features are required. Such noise insulation features may include measures to protect noise-sensitive outdoor activity areas (e.g., at residences, schools, or

parks) or may include building sound insulation treatments such as sound-rated windows to protect interior spaces in sensitive receptors.

- If the noise level is within the "normally unacceptable" level, analysis and mitigation are required. Development should generally not be undertaken unless adequate noise mitigation options have been analyzed and appropriate mitigations incorporated into the project to reduce the exposure of people to unacceptable noise levels.
- If the noise level is within the "clearly unacceptable" level, new construction or development should not be undertaken unless all feasible noise mitigation options have been analyzed and appropriate mitigations incorporated into the project to reduce exposure of people to unacceptable noise levels.

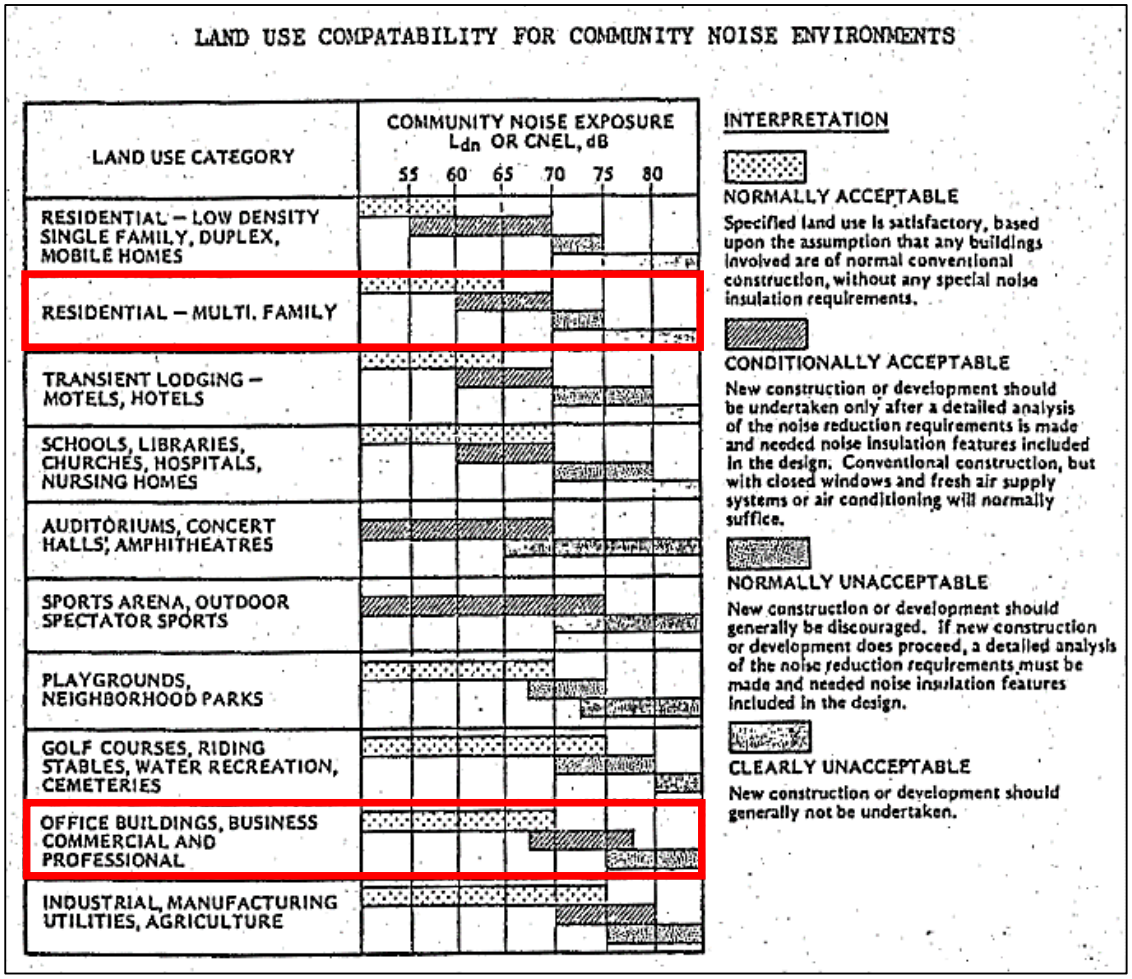

Figure 1: Berkeley Noise Land-Use Compatibility Guidelines

3.2 California Building Code – Residential Interior

The 2022 California Building Code (CBC), California Code of Regulations, Title 24, Part 2, Section 1206.4, stipulates that an interior noise level attributed to exterior sources shall not exceed L_{DN} 45 dB for any habitable room in a multi-family building.

3.3 CALGreen – Commercial Interior

CALGreen stipulates noise criteria for commercial spaces. If exterior hourly noise levels at the project site are above L_{EQ} 65 dBA, then interior noise levels in the commercial spaces must not exceed L_{EQ} 50 dBA during the noisiest hour of operation. This applies to the ground floor lobby, office, study and lounge spaces.

3.4 Berkeley Municipal Code – Exterior Noise Limits

The City of Berkeley Municipal Code Section 13.40.050 stipulates the following about property line noise limits:

- Maximum permissible sound levels shall be determined by the zoning district of the property subject to the noise, not the property from which the noise originates.
- The noise standards for the various categories of land use in Table 1 shall, unless otherwise specifically indicated in other codes, apply to all such property within a designated zone.
- No person shall operate or cause to be operated any source of sound at any location within the incorporated City or allow the creation of any noise on property owned, leased, occupied or otherwise controlled by such person, which causes the sound level when measured on any other property to exceed:
- (a) The noise standard for that land use as specified in Table 13.40-1 for a cumulative period of more than 30 minutes in any hour; or
- (b) The noise standard for that land use as specified in Table 13.40-1 plus 5 dBA for a cumulative period of more than 15 minutes in any hour; or
- (c) The noise standard for that land use as specified in Table 13.40-1 plus 10 dBA for a cumulative period of more than 5 minutes in any hour; or
- (d) The noise standard for that land use as specified in Table 13.40-1 plus 15 dBA for a cumulative period of more than 1 minute in any hour; or
- (e) The noise standard for that land use as specified in Table 13.40-1 plus 20 dBA for any period of time.

Table 1: Exterior Noise Limits, Ref. Table 13.40-1

Zoning District	Time Period	Noise Level (dBA)
R-1, R02, R-1 A, R-2A, and ESR	7:00 a.m. – 10:00 p.m. 10:00 p.m. – 7:00 a.m.	55 45
R-3 and above (R-S, R-SMU)	7:00 a.m. – 10:00 p.m. 10:00 p.m. – 7:00 a.m.	60 55
Commercial (C -T)	7:00 a.m. – 10:00 p.m. 10:00 p.m. – 7:00 a.m.	65 60
Industry	Anytime	70

- If the measured ambient noise level is greater than the level permissible within any of the noise limit categories above, the sound level when measured on any other property shall not exceed:
- The ambient noise level for a cumulative period of more than 30 minutes in any hour; or
- The ambient noise level plus 5 dBA for a cumulative period of more than 15 minutes in any hour; or
- The ambient noise level plus 10 dBA for a cumulative period of more than 5 minutes in any hour; or

- The ambient noise level plus 15 dBA for a cumulative period of more than 1 minute in any hour; or
- The ambient noise level plus 20 dBA for any period of time.
- If the measurement location is on a boundary between two different zones, the sound level limit applicable to the quieter noise zone shall apply.

3.5 City of Berkeley Conditions of Approval

The construction of this project is expected to produce noise levels that are consistent with those found during typical development activities in urban areas. Conditions of Approval (COA) provided by the City of Berkeley to mitigate any potential disturbance due to construction are as follows:

- **Damage Due to Construction Vibration**
  - The project applicant shall submit screening level analysis prior to, or concurrent with demolition building permit. If a screening level analysis shows that the project has the potential to result in damage to structures, a structural engineer or other appropriate professional shall be retained to prepare a vibration impact assessment (assessment). The assessment shall consider project specific information such as the composition of the structures, location of the various types of equipment used during each phase of the project, as well as the soil characteristics in the project area, in order to determine whether project construction may cause damage to any of the structures identified as potentially impacted in the screening level analysis. If the assessment finds that the project may cause damage to nearby structures, the structural engineer or other appropriate professional shall recommend design means and methods of construction that to avoid the potential damage, if feasible. The assessment and its recommendations shall be reviewed and approved by the Building and Safety Division and the Zoning Officer. If there are no feasible design means or methods to eliminate the potential for damage, the structural engineer or other appropriate professional shall undertake study of existing conditions (study) of any structures (or, in case of large buildings, of the portions of the structures) that may experience damage.
  - This study shall establish the baseline condition of these structures, including, but not limited to, the location and extent of any visible cracks or spalls; and include written descriptions and photographs.
  - The study shall be reviewed and approved by the Building and Safety Division and the Zoning Officer prior to issuance of a grading permit. Upon completion of the project, the structures (or, in case of large buildings, of the portions of the structures) previously inspected will be resurveyed, and any new cracks or other changes shall be compared to pre-construction conditions and a determination shall be made as to whether the proposed project caused the damage. The findings shall be submitted to the Building and Safety Division and the Zoning Officer for review. If it is determined that project construction has resulted in damage to the structure, the damage shall be repaired to the pre-existing condition by the project sponsor, provided that the property owner approves of the repair.
- **Construction Noise Reduction Program**
  - The applicant shall develop a site-specific noise reduction program prepared by a qualified acoustical consultant to reduce construction noise impacts to the maximum extent feasible, subject to review and approval of the Zoning Officer. The noise reduction program shall include the time limits for construction listed above, as measures needed to ensure that construction complies with BMC Section 13.40.070, Prohibited Acts. The noise

reduction program should include, but shall not be limited to, the following available controls to reduce construction noise levels as low as practical:

- Construction equipment should be well maintained and used judiciously to be as quiet as practical.
- Equip all internal combustion engine-driven equipment with mufflers, which are in good condition and appropriate for the equipment.
- Utilize "quiet" models of air compressors and other stationary noise sources where technology exists. Select hydraulically or electrically powered equipment and avoid pneumatically powered equipment where feasible.
- Locate stationary noise-generating equipment as far as possible from sensitive receptors when adjoining construction sites. Construct temporary noise barriers or partial enclosures to acoustically shield such equipment where feasible.
- Prohibit unnecessary idling of internal combustion engines.
- If impact pile driving is required, pre-drill foundation pile holes to minimize the number of impacts required to seat the pile.
- Construct solid plywood fences around construction sites adjacent to operational business, residences or other noise-sensitive land uses where the noise control plan analysis determines that a barrier would be effective at reducing noise.
- Erect temporary noise control blanket barriers, if necessary, along building facades facing construction sites. This mitigation would only be necessary if conflicts occurred which were irresolvable by proper scheduling. Noise control blanket barriers can be rented and quickly erected.
- Route construction related traffic along major roadways and away from sensitive receptors where feasible.

- **Construction Noise Management**
  - Public Notice Required. At least two weeks prior to initiating any construction activities at the site, the applicant shall provide notice to businesses and residents within 500 feet of the project site. This notice shall at a minimum provide the following: (1) project description, (2) description of construction activities during extended work hours and reason for extended hours, (3) daily construction schedule (i.e., time of day) and expected duration (number of months), (4) the name and phone number of the Project Liaison for the project that is responsible for responding to any local complaints, and (5) that construction work is about to commence. The liaison would determine the cause of all construction-related complaints (e.g., starting too early, bad muffler, worker parking, etc.) and institute reasonable measures to correct the problem. A copy of such notice and methodology for distributing the notice shall be provided in advance to the City for review and approval.
- **Construction Phases**
  - The applicant shall provide the Zoning Officer with a schedule of major construction phases with start dates and expected duration, a description of the activities and anticipated noise levels of each phase, and the name(s) and phone number(s) of the individual(s) directly supervising each phase. The Zoning Officer or his/her designee shall have the authority to require an on-site meeting with these individuals as necessary to ensure compliance with these conditions. The applicant shall notify the Zoning Officer of any changes to this schedule as soon as possible.

- **HVAC Noise Reduction**
  - Prior to the issuance of building permits, the project applicant shall submit plans that show the location, type, and design of proposed heating, ventilation, and cooling (HVAC) equipment. In addition, the applicant shall provide product specification sheets or a report from a qualified acoustical consultant showing that operation of the proposed HVAC equipment will meet the City's exterior noise requirements in BMC Section 13.40.050. The City's Planning and Development Department shall review the submitted plans, including the selected HVAC equipment, to verify compliance with exterior noise standards.
- **Interior Noise Levels**
  - Prior to issuance of a building permit, the applicant shall submit a report to the Building and Safety Division and the Zoning Officer by a qualified acoustic engineer certifying that the interior residential portions of the project will achieve interior noise levels of no more than 45 L_{DN} (Average Day-Night Levels). If the adopted Building Code imposes a more restrictive standard for interior noise levels, the report shall certify compliance with this standard.

3.6 CEQA Initial Study Checklist Questions

CEQA provides an assessment to determine the impact that project development and operation will have on the surrounding environment (see CEQA Statute and Guidelines, Appendix G, Page 288). The Initial Study Checklist Questions include assessing if the project will result in:

a) Exposure of persons to or generation of noise levels in excess of standards established in the local general plan or noise ordinance, or applicable standards of other agencies?
b) Exposure of persons to or generation of excessive groundborne vibration or groundborne noise levels?
c) A substantial permanent increase in ambient noise levels in the project vicinity above levels existing without the project?
d) A substantial temporary or periodic increase in ambient noise levels in the project vicinity above levels existing without the project?
e) For a project located within an airport land use plan or, where such a plan has not been adopted, within two miles of a public airport or public use airport, would the project expose people residing or working in the project area to excessive noise levels?
f) For a project within the vicinity of a private airstrip, would the project expose people residing or working in the project area to excessive noise levels?

4.0 Existing Noise Environment

Resonance Acoustics conducted environmental noise measurements to quantify the existing noise environment around the project site. A Type 1 Larson Davis Model 831c and Type 1 Rion NL-53 sound level meter were used for the site noise measurements. Equipment was calibrated immediately prior to and following the measurements. Measurement descriptions are provided below:

- **Long-term Measurement 1 (LT-1):** This 48-hour measurement was conducted between January 15 and 17, 2025 and was attached to a utility pole along Durant Avenue. The sound level meter was positioned approximately 12 feet above grade. Noise levels at this location were controlled by traffic along Durant Avenue. Minor sources of noise include pedestrians and the swimming facility on the north side of Durant Avenue. Construction activities occurred near the meter at 2:00pm on Thursday January 16, 2025. Noise levels from this time period were excluded from our analysis.

- **Long-term Measurement 2 (LT-2):** This 48-hour measurement was conducted between January 15 and 17, 2025 and was attached to a utility pole along Ellsworth Street. The sound level meter was positioned approximately 10 feet above grade. Noise levels at this location were controlled by traffic along Ellsworth Street. Minor sources of noise include pedestrians and traffic along Durant Avenue and Channing Way. Construction activities occurred near the meter between 12:00 and 2:00pm on Thursday January 16, 2025. Noise levels from this time period were excluded from our analysis.

The noise measurement location and the project site boundary are shown in Figure 2.

Figure 2: Noise Measurement Locations

4.1 Weather

Based on a review of online weather data between January 15 and 17, 2025, the temperature ranged from 40 to 63 degrees Fahrenheit, wind speed was between 0-12 miles per hour (mph), and there was no precipitation (the nearest available historical weather data is from the weather station at Oakland International Airport, accessed through weatherunderground.com). Based on a review of the noise levels during this timeframe, wind noise did not affect the measurements.

4.2 General Noise Conditions

Traffic along Durant Avenue is the primary source of noise at the project site. Traffic along Ellsworth Street is a secondary source of noise at the project site. Noise from pedestrian activity marginally contributes to the total noise environment at the project site.

Table 2 summarizes the noise measurement results. Figure 3 and Figure 4 represent the continuous sound levels throughout the measurement periods at LT-1 and LT-2, respectively.

Table 2: Calculated Noise Measurement Results

Measurement Location	Loudest 1-hour Noise Level, $L_{EQ\text{-}1\ hr}$, (Time Period)	Max 24-hour Noise Level L_{DN}
LT-1: Durant Avenue	74 dBA (1/16 at 9 AM)	69 dBA
LT-2: Ellsworth Street	67 dBA (1/17 at 8AM)	61 dBA

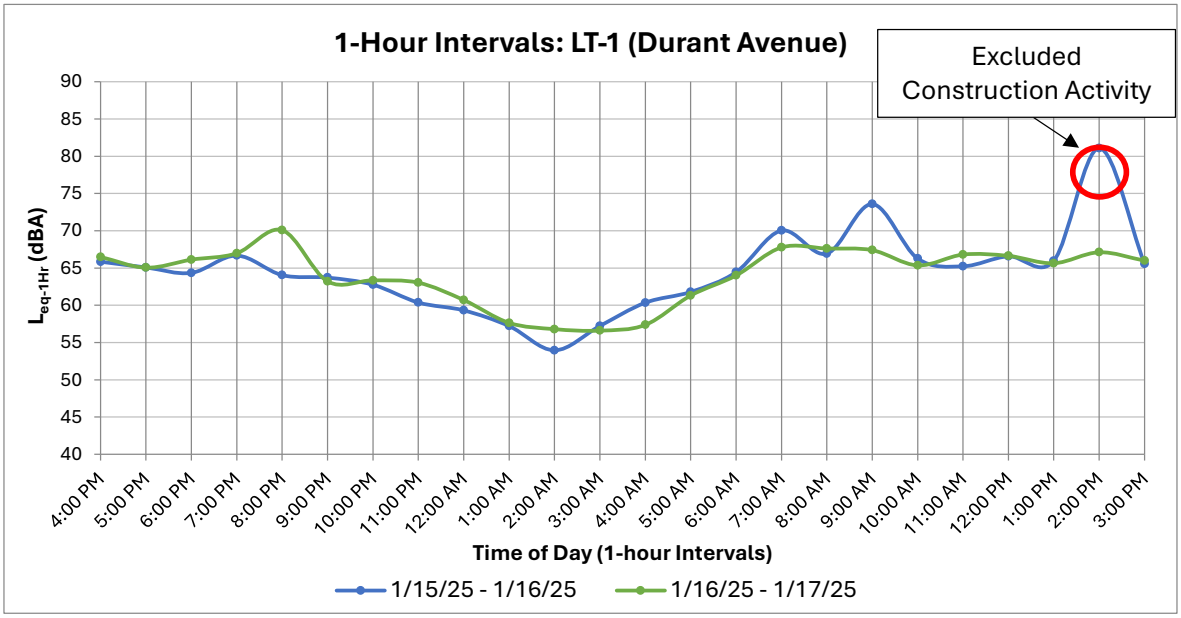

Figure 3: Continuous Noise Levels at LT-1 (Durant Avenue)

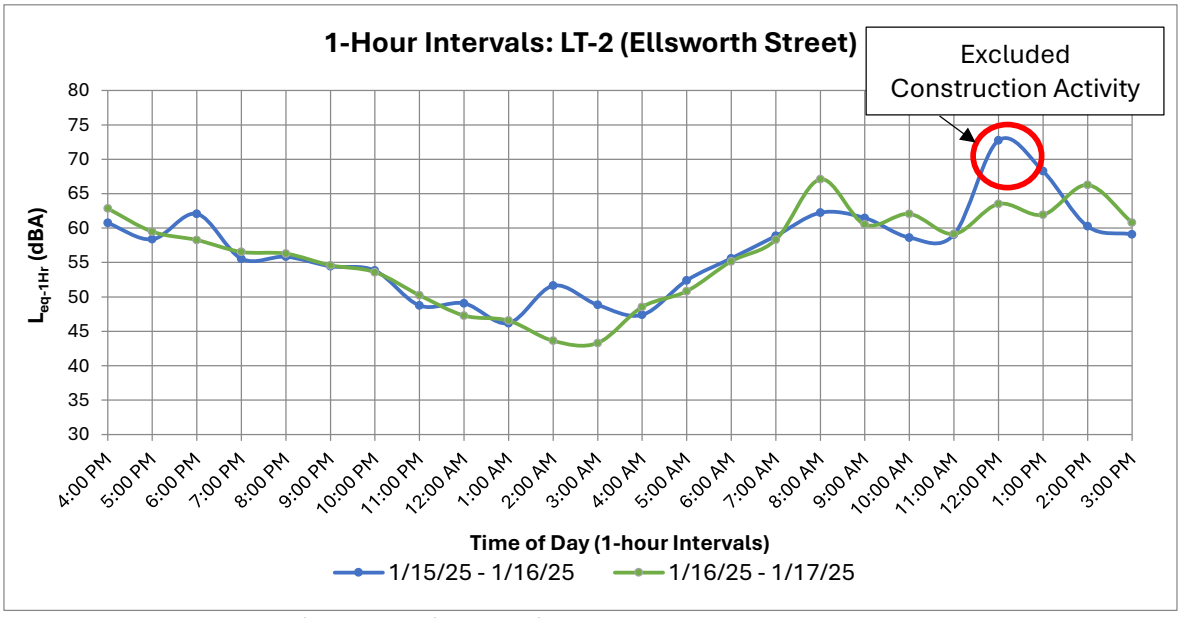

Figure 4: Continuous Noise Levels at LT-2 (Ellsworth Street)

5.0 CEQA Analysis

The questions from the CEQA initial Study checklist are discussed in Sections 5.1 through 5.6.

5.1 Checklist Item A

Would the project result in "exposure of persons to or generation of noise levels in excess of standards established in the local general plan or noise ordinance, or applicable standards of other agencies?"

- No. By the City of Berkeley Noise Land-Use Compatibility Guidelines, the resulting noise environment is expected to be "Conditionally Acceptable" for multi-family residential units and the ground floor office and lounge spaces. See Section 5.3 for details.

5.2 Checklist Item B

Would the project result in "exposure of persons to or generation of excessive groundborne vibration or groundborne noise levels?"

- No. No significant sources of vibration exist, or are planned to be implemented, within the project site vicinity. At this point in the project development, pile driving, blasting, or use of other repetitive noise/vibration sources are not anticipated. Should this change, a detailed construction vibration study should be conducted. The City of Berkeley's standard COA "Damage Due to Construction Vibration" outlines measures to reduce construction vibration impacts (see Section 3.5).

5.3 Checklist Item C

Would the project result in "a substantial permanent increase in ambient noise levels in the project vicinity above levels existing without the project?"

- No. A substantial, permanent increase in ambient noise levels is not expected in the project vicinity.
- Roof-mounted HVAC equipment will be a noise source generated by this project. As stated by the City of Berkeley's COA "HVAC Noise Reduction" (Section 3.5), outdoor HVAC equipment must meet the Exterior Noise Limits prescribed by section 13.40.050 of the Berkeley Municipal Code. The property line noise limit is established by the zoning district of the receiver property, as determined by Berkeley Municipal Code Sections 23.202 and 23.204. Figure 4 shows the zoning of adjacent properties (C-T is commercial, R-S/R-SMU is residential). Please note that a density bonus allows for the planned build height of 85 feet despite the 55 feet build height limit for R-S zones.

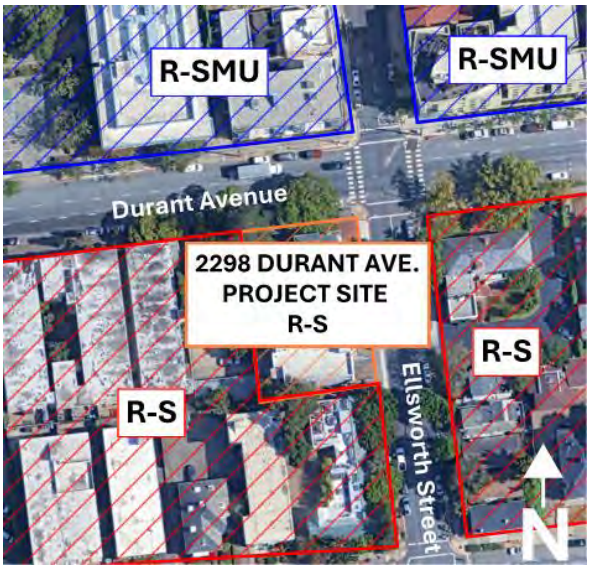

Figure 5: Adjacent Property Zoning Map

- The residential property to the east of the project site is the most noise sensitive because of the proximity of the planned HVAC mechanical equipment to the east property line. The maximum sound level for each HVAC unit depends on the following factors:
  - The total number of units mounted on the rooftop (we assumed 1 heat pump or similar unit per residence), equipment height of five feet or less.
  - The average distance of the HVAC equipment to the property line (we assumed the units were clustered in the HVAC Mechanical spaces as shown in Sheet A-103 of the drawing set dated September 5, 2024).
  - The maximum noise level allowed by the neighboring property.
  - The planned height of the project building.
  - The maximum build height for the adjacent property.
  - The height of the project building's rooftop parapet. In the drawings, the rooftop parapet is 2.5 feet tall at the north and south boundaries and 6.5 feet tall at the east and west boundaries.

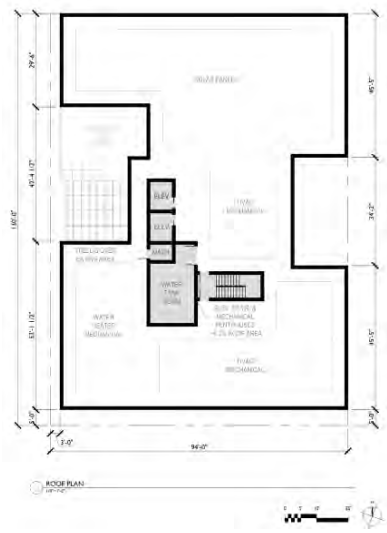

Figure 6: Sheet A-103 Roof Plan

The assumptions and calculation results are summarized in Table 3.

Table 3: Maximum HVAC Unit Noise Level (based on worst-case, east property line)

Number of HVAC Units Assumed	Planned Build Height (feet)	Max Build Height, Zone R-S (feet)	Parapet Height, East and West (feet)	Property Line Noise Limit (dBA)	Max SPL at 10' for each unit (dBA)
65	85	55	6.5	55	**60**

In conclusion, to meet the exterior noise limits at this property line, the maximum sound pressure level (SPL) at 10 feet for each HVAC unit should be 60 dBA or lower. Note that this requirement may change during the detailed design of the project, depending on the exact quantity and placement of the rooftop mechanical units.

5.4 Checklist Item D

Would the project result in "a substantial temporary or periodic increase in ambient noise levels in the project vicinity above levels existing without the project?"

- Yes, a substantial temporary increase in ambient noise levels in the project vicinity is expected during project construction. We recommend a detailed construction noise study be conducted to quantify the noise impact of construction activity and provide specific mitigation measures. The project should follow the City's Standard COA "Construction Noise Management" on providing notices to nearby businesses and residents prior to any construction activity (see Section 3.5).
- We offer the following preliminary guidance to reduce construction noise impacts, based on the City's Standard COA "Construction Noise Reduction Program" (see Section 3.5):

  1. Construction equipment should be well maintained and used judiciously to be as quiet as practical.
  2. Equip all internal combustion engine-driven equipment with mufflers, which are in good condition and appropriate for the equipment.

3. Utilize "quiet" models of air compressors and other stationary noise sources where technology exists. Select hydraulically or electrically powered equipment and avoid pneumatically powered equipment where feasible.
4. Locate stationary noise-generating equipment as far as possible from sensitive receptors when adjoining construction sites. Construct temporary noise barriers or partial enclosures to acoustically shield such equipment where feasible.
5. Prohibit unnecessary idling of internal combustion engines.
6. All equipment shall be turned off if not in use for more than 5 minutes.
7. Combine noisy operations so that they occur in the same time period. The total noise level produced will not be significantly greater than the level produced if the operation were performed separately (and the noise will be of shorter duration).
8. If impact pile driving is required, pre-drill foundation pile holes to minimize the number of impacts required to seat the pile.
9. Construction activity shall be limited to between the hours of 7:00 AM and 6:00 PM on Monday through Friday, and between 9:00 AM and 4:00 PM on Saturday. No construction-related activity shall occur on Sunday or any Federal Holiday.
10. Erect temporary noise control blanket barriers, if necessary, along building facades facing construction sites. This mitigation will only be necessary if conflicts occurred which were irresolvable by proper scheduling. Noise control blanket barriers can be rented and quickly erected.
11. Route construction related traffic along major roadways and away from sensitive receptors where feasible.

5.5 Checklist Item E

"For a project located within an airport land use plan or, where such a plan has not been adopted, within two miles of a public airport or public use airport, would the project expose people residing or working in the project area to excessive noise levels?"

- The project site is not located in the vicinity of a public airport. This item is not applicable.

5.6 Checklist Item F

"For a project within the vicinity of a private airstrip, would the project expose people residing or working in the project area to excessive noise levels?"

- The project site is not located in the vicinity of a private airstrip. This item is not applicable.

6.0 Recommended Mitigation Measures

With the mitigation measures noted in Section 5.0 and the list below, the project will meet the relevant noise criteria.

1. Prepare a detailed construction noise control plan to reduce construction noise impacts to adjacent receivers.
2. Locate and specify project mechanical equipment to meet the City's property line noise limits. Preliminarily, HVAC equipment should not exceed 60 dBA at 10'.

3. Conduct a detailed building facade analysis to provide the design team with the recommended window, exterior door, and exterior wall STC rating/design to meet the interior noise criteria provided by the CBC (Section 3.2) and the City of Berkeley's COA "Interior Noise Levels" (Section 3.5).

This concludes our CEQA noise study for 2298 Durant Ave, Berkeley CA. Please do not hesitate to contact us with questions.

Appendix A: Definitions of Acoustical Terms

A-Weighted Sound Level: A decibel scale for sound level measurements using the "A" weighted network of a sound level meter and is denoted as "dBA." The A-weighted network is shaped to correspond to the response of the human ear so that the results correlate approximately with human perception. It is the accepted standard for environmental noise measurements.

Day/Night Average Sound Level (L_{dn} or DNL): A descriptor established by the U.S. Environmental Protection Agency to describe the average day-night A-weighted noise level with a 10 dB penalty applied to noise occurring during the nighttime hours (10 pm to 7 am) to account for the increased sensitivity of people during sleeping hours. A 10 dB increase in sound level is perceived by people to be twice as loud.

Decibel (dB): A scale that measures sound level pressure defined as 20 times the logarithm of the ratio of the sound level pressure to a standard reference pressure level of 20 μPa.

Hertz (Hz): The rate or frequency of air pressure fluctuations that we call sound. One hertz is equivalent to one complete cycle of pressure variation per second. One kilohertz (kHz) is 1,000 cycles per second.

L_{eq}: The A-weighted equivalent continuous sound exposure level for a defined period of time.

L_{max}: The highest sound level in a stated period of time.

Sound Pressure Level (SPL): The amplitude of sound when compared to the reference sound pressure level of 20 μPa. SPL is measured in dB.

Ashley Honer, Environmental Planner, LSA

SUBJECT: Hydrology and Water Quality Technical Memorandum for the Proposed 2298 Durant Avenue Residential Project (APNs 055-1887-001 and 055-1887-002) in Berkeley, Alameda County, California

INTRODUCTION

This Hydrology and Water Quality Technical Memorandum (technical memorandum) has been prepared for the proposed 2298 Durant Avenue Residential Project (project) in Berkeley, Alameda County, California. The research and analysis contained within this technical memorandum were used to determine the existing conditions at the project site, identify applicable regulatory requirements applicable to the project, and provide a preliminary impact analysis of the project related to hydrology and water quality.

The 0.28-acre project site (Assessor's Parcel Numbers [APNs] 055-1887-001 and 055-1887-002) is located at 2298 Durant Avenue and 2360 Ellsworth Street in Berkeley, California. The regional vicinity of the project site and the project location are shown in **Figure 1**. The project site is currently developed with two existing buildings including a 2,380 square-foot (sf), 2-story commercial building with an associated surface parking lot and a 2,849 sf, 3-story residential building over a 1-story partially subterranean parking garage.

The project site is bordered by Durant Avenue to the north (beyond which are residential, medical, and institutional uses), Ellsworth Street to the east (beyond which are residential and medical uses), residential and medical uses to the south, and residential uses to west. Additional residential medical, institutional, and commercial uses are located in the immediate surrounding vicinity.

The proposed project would merge the two existing lots into one contiguous lot and demolish the existing 2,380 sf and 2,849 sf buildings and parking lot to construct an 80,046 sf, eight-story residential building consisting of 65 dwelling units. Five units would be below market rate. Additionally, the proposed project would include a lobby, 4,372 sf of amenity space, a balcony on the 4th floor, a roof deck on the 8th floor, and landscaping.

Construction would include demolition, site preparation, grading, building construction, paving, and architectural coating activities.

2298 Durant Avenue Project
Project Location

GENERAL CONDITIONS

Existing Drainage Conditions and Facilities

The project site is fully developed and is located in an urbanized area of Berkeley. Under existing conditions, stormwater collected at the project site sheet flows into the existing stormwater infrastructure located along Durant Avenue and Ellsworth Street,[1] which flows into the larger Potter Watershed storm drain network, which discharges into San Francisco Bay at the terminus of Potter Street through a 9-foot-diameter, egg-shaped trunkline.[2]

Surface Waters and Surface Water Quality

Berkeley is located on the eastern shoreline of the San Francisco Bay and extends east to the ridgelines of the East Bay Hills. In general, the physiography of the Berkeley watersheds reflects their general alignment in relation to the primary geologic structures. The watersheds in Berkeley typically drain to the west out of the steeper headwaters (Berkeley Hills), across a transitional alluvial fan zone, and then across the more gently sloping San Francisco Bay plain before discharging into San Francisco Bay.[3]

Berkeley is generally characterized as having a Mediterranean climate with moist, mild winters and hot, dry summers. More than 90 percent of precipitation falls between November and April, with an annual rainfall amount of about 18 to 26 inches. Areas of higher elevation receive higher rainfall annually due to the rain-shadow effects of the Berkeley Hills.[4] Because Berkeley is predominantly urban and developed, precipitation falling on impervious surfaces is directed to storm drains that flow to San Francisco Bay.

The proposed project is in the Potter/Derby Creek Watershed, as shown in **Figure 2**, and situated within the San Francisco Bay Regional Water Quality Control Board's (RWQCB) jurisdiction. According to the City of Berkeley's (City) Watershed Management Plan, the Potter/Derby Creek Watershed, which is the largest watershed in the City, has a total Drainage Area of 2,693 acres and receives annual precipitation of 22 inches.[5] The Potter/Derby Creek Watershed includes Potter Creek, Derby Creek, and several unnamed tributaries. Both Potter Creek and Derby Creek have been replaced by underground pipelines and culverts as part of the City's storm drainage system. The stream channels of these creeks and the tributaries have been almost entirely converted to man-made drainage structures. The Potter/Derby Creek Watershed drains to the Potter Watershed storm drain network,[6] which discharges into San Francisco Bay at the terminus of Potter Street through a 9-foot-diameter, egg-shaped trunkline.[7]

City of Berkeley Watersheds

Receiving waters for stormwater from the project site include Central San Francisco Bay. As detailed in the most recent United States Environmental Protection Agency (EPA) approved 303(d) list (2024), Central San Francisco Bay is listed as an impaired water body for several pollutants including pesticides (e.g., chlordane, dichlorodiphenyltrichloroethane [DDT], and dieldrin), trash, metals (e.g., selenium and mercury), toxic organics (e.g., chlorinated biphenyls [PCBs], dioxin compounds including 2-, 3-, 7-, 8-tetrachloro-dibenzodioxin [TCDD], and furan compounds), and invasive species.[8]

Groundwater Basin and Groundwater Quality

Berkeley and the project site are within the boundary of the Santa Clara Valley Groundwater Basin, East Bay Plain (EBP) Subbasin. The EBP Subbasin is a northwest trending alluvial plain bounded on the north by San Pablo Bay, on the east by the contact with Franciscan Basement rock, and on the south by the Niles Cone Groundwater Basin. The EBP Basin extends beneath San Francisco Bay to the west.[9] The groundwater basin and subbasin underlying the project site are shown in **Figure 3**. The EBP Subbasin is listed in the Water Quality Control Plan for the San Francisco Bay Basin (Basin Plan) as providing the following beneficial uses: municipal and domestic water supply, industrial process water supply, industrial service water supply, and agricultural water supply.[10]

The surface area of the EBP Subbasin is approximately 77,800 acres or 122 square miles, with an average annual rainfall over the subbasin ranging from 17 inches in the southeast to greater than 25 inches along the eastern boundary. Numerous creeks including San Pablo Creek, Wildcat Creek, San Leandro Creek, and San Lorenzo Creek flow from the western slope of the Coast Ranges westward across the plain and into the San Francisco and San Pablo Bays.[11]

The geologic history of the EBP Subbasin involves the rise and fall of sea level over the past 800,000 years, which resulted in deposits of different types of sediments/soils from streams (e.g., clay, sand, and gravel), wind (e.g., sand dunes), and the San Francisco Bay (e.g., Bay Mud and silt). These sediments/soils were laid down in different places at different times, thereby resulting in alternating sequences of clay, silt, sand, and gravel within each aquifer zone. Aquitard[12] layers consisting primarily of fine-grain materials (clay and silt) separate aquifer zones.

2298 Durant Avenue Project
Groundwater Basin and Subbasin

This depositional history resulted in more coarse-grained material (sand and gravel) in the Deep Aquifer Zone in the southern EBP Subbasin compared to shallower zones in the northern EBP Subbasin, which includes Berkeley and the project site. Based on recharge mechanisms, soil types, and surface geologic data groundwater recharge has the potential to occur throughout the EBP Subbasin.[13]

The EBP Subbasin is not experiencing a chronic lowering of groundwater levels and is currently in a sustainable and stable condition because estimated groundwater pumping from the 1990s to the present is well below the estimated sustainable yield of the EBP Subbasin. Since the 1950s, water levels in the deep (more than 500 feet) aquifer in the EBP Subbasin have varied between 10 and 140 feet below mean sea level (msl). Shallower aquifers have a much less pronounced water level fluctuation. Since 1950, the historical low water level for aquifers at a depth of about 250 feet below ground surface (bgs) has been about 30 feet below msl. Water levels rose about 5 feet per year between 1965 and 1980. Water levels have been rising continuously since then but at a slower rate. As of 2000, water levels are very near surface levels in all aquifers.[14] According to the Groundwater Sustainability Plan (GSP), groundwater pumping is much lower today (3,600 acre-feet [AF]) than in the 1960s (greater than 20,000 AF), groundwater levels are stable and the EBP Subbasin is sustainable. Further, the EBP Subbasin groundwater sustainability agencies are not aware of any residents who are solely or primarily dependent on groundwater for drinking water supplies.

Based on an analysis of 357 well logs, the California Department of Water Resources (DWR) calculated a total storage capacity in the subbasin of 2,670,000 AF. Based on 1993 groundwater elevations, DWR calculated the available storage to a depth of 1,000 below msl is about 2,500,000 AF. However, due to concern over potential adverse impacts such as seawater intrusion, based on 1993 groundwater elevations, DWR calculated the available storage was about 80,000 AF. The EBP Subbasin has not experienced significant seawater intrusion even during historical periods of much greater groundwater pumping than is taking place today, and the EBP Subbasin has no observed inelastic land subsidence even during historical periods of much greater groundwater pumping and much lower confined aquifer groundwater elevations than are taking place today. [15]

The Sustainable Groundwater Management Act (SGMA) of 2014 is a comprehensive three-bill package that Governor Jerry Brown signed into California State law in September 2014. The SGMA provides a framework for sustainable management of groundwater supplies by local authorities, with a limited role for State intervention if necessary to protect the resource. The plan is intended to ensure a reliable groundwater supply for California for years to come. The SGMA requires governments and water agencies of high- and medium-priority basins to halt overdrafts of groundwater basins as well as the formation of local groundwater sustainability agencies (GSAs) that are required to adopt Groundwater Sustainability Plans (GSP) to manage the sustainability of the

15 EBMUD GSA and City of Hayward GSA. 2022. East Bay Plan Subbasin, Groundwater Sustainability Plan. January.

groundwater basins. The DWR is charged with classifying groundwater basins in California as either high, medium, low, or very low priority. The DWR classifies the EBP Subbasin as a medium-priority basin.[16]

Pursuant to the SGMA, a GSP has been prepared by the East Bay Municipal District (EBMUD) and City of Hayward GSAs for the EBP Subbasin.[17] In January 2022, the EBMUD and City of Hayward GSAs adopted the EBP Subbasin GSP, which provides the basin setting, the quantitative methods for evaluating the health and sustainability of the subbasin, the monitoring networks, projects and management actions to achieve sustainability, and the implementation plan for the GSP.

Floodplains

According to Federal Emergency Management Agency (FEMA) Flood Insurance Rate Map (FIRM) No. 06001C0057G (effective August 3, 2009), the project site is located within Zone X, area of minimal flood hazard.[18]

Soils/Erosion Potential

The soils on the project site consist entirely of Urban land-Tierra complex, 2 to 5 percent slopes (150).[19] The Urban land-Tierra complex consists of 50 percent Tierra and similar soils, 40 percent urban land, and 10 percent minor components. The Tierra soil series consists of deep, moderately well-drained soils that formed in alluvial materials from sedimentary rocks. The Tierra soil series is characterized as being moderately well drained, having slow to rapid runoff, and very slow permeability.[20]

Regulatory Setting

Federal Regulations

Clean Water Act. In 1972, Congress amended the Federal Water Pollution Control Act, making the addition of pollutants to the waters of the United States from any point source unlawful unless the discharge is in compliance with a National Pollution Discharge Elimination System (NPDES) permit. Known today as the Clean Water Act (CWA), Congress has amended it several times. In the 1987 amendments, Congress directed dischargers of stormwater from municipal and industrial/ construction point sources to comply with the NPDES permit program. Important CWA sections are:

- Sections 303 and 304 require states to promulgate water quality standards, criteria, and guidelines.

Water quality standards consist of designated beneficial uses for a particular waterbody (e.g., wildlife habitat, agricultural supply, fishing), along with water quality criteria necessary to support those uses. Water quality criteria are set concentrations or levels of constituents (e.g., lead, suspended sediment, and fecal coliform bacteria) or narrative statements that represent the quality of water that support a particular use. Because California has not established a complete list of acceptable water quality criteria for toxic pollutants, the EPA Region IX established numeric water quality criteria for toxic constituents in the form of the California Toxics Rule (CTR).

When designated beneficial uses of a particular waterbody are being compromised by water quality, Section 303(d) of the CWA requires identifying and listing that waterbody as impaired.

The State Water Resources Control Board (SWRCB), in compliance with Section 303(d) of the CWA, prepares a list of impaired and threatened waters (e.g., stream/river segments, lakes). States are required to submit their list for EPA approval every two years. For each water on the list, the state identifies the pollutant causing the impairment, when known. In addition, the state assigns a priority for development of total maximum daily loads (TMDL) based on the severity of the pollution and the sensitivity of the uses for which the waters are being used, among other factors. A TMDL is an estimate of the total load of pollutants from point, nonpoint, and natural sources that a waterbody may receive without exceeding applicable water quality standards (often with a "factor of safety" included, which limits the total load of pollutants to a level well below that which could cause the standard to be exceeded). Once established, the TMDL is allocated among current and future dischargers into the waterbody.

In general, once a water body has been added to a state's list of impaired waters, it stays there until the state develops a TMDL and EPA approves it. EPA reporting guidance provides a way to keep track of a state's waterbodies, from listing as impaired to meeting water quality standards. This tracking system contains a running account of all of a state's waterbodies and categorizes each based on the attainment status. The SWRCB adopted the 2020/2022 California Integrated Report (CWA Section 303(d) List/305(b) Report) on January 19, 2022, and the EPA approved the list on May 11, 2022.

- Section 401 Certification requires an applicant for a federal license or permit to conduct any activity that may result in a discharge to waters of the United States to obtain certification from the state that the discharge will comply with other provisions of the act. (This is most frequently required in tandem with a Section 404 permit request and is discussed further below.)

- Section 402 establishes the NPDES, a permitting system for the discharges (except for dredge or fill material) of any pollutant into waters of the United States. Direct discharges of pollutants into waters of the United States are not allowed except in accordance with the NPDES program established in Section 402 of the CWA. The EPA delegated the implementation and administration of the NPDES program to the California SWRCB. The SWRCB established nine RWQCBs. The SWRCB enacts and enforces the federal NPDES program and all water quality programs and regulations that cross regional boundaries. The nine RWQCBs enact, administer,

and enforce all programs, including NPDES permitting, within their jurisdictional boundaries. Section 402(p) requires permits for discharges of stormwater from industrial, construction, and Municipal Separate Storm Sewer Systems (MS4s).

- Section 404 establishes a permit program for the discharge of dredge or fill material into waters of the United States including wetlands. This permit program is administered by the United States Army Corps of Engineers.

The objective of the CWA is "to restore and maintain the chemical, physical, and biological integrity of the Nation's waters."

National Flood Insurance Act. Congress acted to reduce the costs of disaster relief by passing the National Flood Insurance Act of 1968 and the Flood Disaster Protection Act of 1973. The intent of these acts was to reduce the need for large, publicly funded flood control structures and disaster relief efforts by restricting development in floodplains. FEMA administers the National Flood Insurance Program (NFIP), which provides flood insurance, floodplain management, and flood hazard mapping. Communities subject to flood hazards voluntarily participate in the NFIP by adopting and enforcing floodplain management ordinances to reduce the potential for flood damage. In turn, the NFIP offers federally funded flood insurance to homeowners, renters, and business owners in participating communities. Under this program, FEMA produces Flood Insurance Rate Maps (FIRM) that identify properties and buildings in flood insurance risk areas. Flood hazards related to storm events are generally described in terms of 100- or 500-year floods. These are floods that, respectively, have 1 percent and 0.2 percent chance of occurring every year.

If a proposed project would affect the hydrologic or hydraulic characteristics of a flooding source and result in the modification of an existing regulatory floodway, the effective Base Flood Elevations, or the Special Flood Hazard Area, FEMA may comment on the project in the form of a Conditional Letter of Map Revision. The letter does not revise an effective NFIP map but indicates whether the project, if built as proposed, would be recognized by FEMA. FEMA will issue a Letter of Map Revision to officially revise the current NFIP map to show changes to floodplains, regulatory floodways, or flood elevations. Because a Letter of Map Revision officially revises the effective FIRM, the flood hazard updates shown are used to rate flood insurance policies and enforce flood insurance and development requirements.

The City manages local storm drain facilities, and the Alameda County Flood Control District is responsible for regional flood control planning within Alameda County.

State Laws and Regulations

Porter-Cologne Water Quality Control Act of 1970. California's Porter-Cologne Water Quality Control Act (Porter-Cologne Act), enacted in 1969, provides the legal basis for water quality regulation within California. The Porter-Cologne Act requires a "Report of Waste Discharge" for any discharge of waste (liquid, solid, or gaseous) to land or surface waters that may impair beneficial uses for surface and/or groundwater of the State. It predates the CWA and regulates discharges to waters of the State. Waters of the State include more than just waters of the United States (e.g., groundwater is not considered waters of the United States). Additionally, it prohibits discharges of

"waste" as defined, and this definition is broader than the CWA definition of "pollutant." Discharges under the Porter-Cologne Act are permitted by Waste Discharge Requirements (WDRs) and may be required even when the discharge is already permitted or exempt under the CWA.

The SWRCB and RWQCBs are responsible for establishing the water quality standards as required by the CWA and regulating discharges to protect beneficial uses of water bodies. Details regarding water quality standards in a project area are contained in the applicable RWQCB Basin Plan. In California, RWQCBs designate beneficial uses for all water body segments in their jurisdictions, and then set standards necessary to protect these uses. Consequently, the water quality standards developed for particular water body segments are based on their designated use and vary depending on such use. Water body segments that fail to meet standards for specific pollutants are included in a statewide list in accordance with CWA Section 303(d). If an RWQCB determines that waters are impaired for one or more constituents and the standards cannot be met through point source or non-source point controls (NPDES permits or WDRs), the CWA requires the establishment of TMDLs. TMDLs specify allowable pollutant loads from all sources (point, non-point, and natural) for a given watershed.

State Water Resources Control Board and Regional Water Quality Control Boards. The SWRCB adjudicates water rights, sets water pollution control policy, issues water board orders on matters of statewide application, and oversees water quality functions throughout the State by approving Basin Plans, TMDLs, and NPDES permits. RWQCBs are responsible for protecting beneficial uses of water resources within their regional jurisdiction using planning, permitting, and enforcement authorities to meet this responsibility.

National Pollutant Discharge Elimination System Program. Section 402(p) of the CWA requires the issuance of NPDES permits for five categories of stormwater dischargers, including MS4s. The EPA defines an MS4 as "any conveyance or system of conveyances (roads with drainage systems, municipal streets, catch basins, curbs, gutters, ditches, human-made channels, and storm drains) owned or operated by a state, city, town, county, or other public body having jurisdiction over stormwater, that are designed or used for collecting or conveying stormwater." The SWRCB or the RWQCB issues NPDES permits for 5 years, and permit requirements remain active until a new permit has been adopted.

Municipal Separate Storm Sewer System. The Municipal Stormwater Permitting Program regulates stormwater discharges from MS4s. The NPDES MS4 permits are issued in two phases by the SWRCB and RWQCBs. Phase I MS4 Permits are issued to medium municipalities (serving between 100,000 and 250,000 people) and large municipalities (serving more than 250,000 people). Most of these permits are issued to a group of co-permittees encompassing an entire metropolitan area. The Phase II MS4 Permits are issued to smaller municipalities (populations of less than 100,000 people). The Phase II Small MS4 Permit covers Phase II permittees statewide and became effective on July 1, 2013. The Phase I and Phase II MS4 Permits require the permittees to develop a stormwater management program and individual dischargers to develop and implement a Storm Water Management Plan.

California Toxics Rule. As stated previously, because California had not established a complete list of acceptable water quality criteria for toxic pollutants, EPA Region IX established numeric water

quality criteria for toxic constituents in the form of the CTR. The CTR provides water quality criteria for certain potentially toxic compounds for inland surface waters, enclosed bays, estuaries, and waters designated for human health or aquatic life uses. The CTR is often used by the RWQCBs when establishing water quality objectives and TMDLs. Although the CTR criteria do not apply directly to discharges of stormwater runoff, they are used as benchmarks for evaluating the potential ecological impacts of stormwater runoff on receiving waters. The CTR applies to the receiving water body and establishes acute and chronic surface water quality standards for certain waterbodies. Acute criteria provide benchmarks for the highest permissible concentration below which aquatic life can be exposed for short periods of time without negative effects. Chronic criteria provide benchmarks for an extended period of time (i.e., 4 days or more) without negative effects. The acute CTR criteria have a shorter relevant averaging period (less than 4 days) and provide a more appropriate benchmark for assessing the impacts of stormwater flows.

Sustainable Groundwater Management Act. The SGMA of 2014 is a comprehensive three-bill package that Governor Jerry Brown signed into law in September 2014. The SGMA provides a framework for sustainable management of groundwater supplies by local authorities, with a limited role for State intervention if necessary to protect the resource. The plan is intended to ensure a reliable groundwater supply for California for years to come.

The SGMA requires governments and water agencies of high- and medium-priority basins to halt overdrafts of groundwater basins. The SGMA requires the formation of local GSAs that are required to adopt GSPs to manage the sustainability of the groundwater basins.

General Construction Activity Storm Water Permit. The *General Permit for Storm Water Discharges Associated with Construction and Land Disturbance Activities,* Order No. WQ 2022-0057-DWQ, NPDES No. CAS000002 (Construction General Permit), adopted by the SWRCB, regulates stormwater discharges from construction sites that result in a Disturbed Soil Area (DSA) of 1 acre or greater, and/or are smaller sites that are part of a larger common plan of development. For all projects subject to the Construction General Permit, the applicant is required to:

- Complete a Risk Assessment to determine pollution prevention requirements pursuant to the three risk levels established in the Construction General Permit;
- Conduct stormwater sampling, if required based on risk level;
- Eliminate or reduce non-stormwater discharges to storm sewer systems and other waters of the United States;
- Develop and implement a Storm Water Pollution Prevention Plan (SWPPP) that specifies best management practices (BMPs) that will reduce pollution in storm water discharges to the Best Available Technology/Economically Achievable/Best Conventional Pollutant Control Technology standards; and
- Perform inspections and maintenance of all BMPs.

To obtain coverage under the Construction General Permit, a project applicant must electronically file all permit registration documents with the SWRCB prior to the start of construction. Permit registration documents must include a:

- Notice of Intent (NOI);
- Risk Assessment;
- Site map;
- SWPPP;
- Annual fee; and
- Signed certification statement.

Typical BMPs contained in SWPPPs are designed to minimize erosion during construction, stabilize construction areas, control sediment, and control pollutants from construction materials. The SWPPP must also include a discussion of the program to inspect and maintain all BMPs.

Projects that disturb over 1 acre but less than 5 acres of soil may qualify for a waiver of Construction General Permit coverage. This occurs whenever the Rainfall Erosivity, (R) in the Revised Universal Soil Loss Equation (RUSLE), is less than 5. Construction activity that results in soil disturbances of less than 1 acre is subject to this Construction General Permit if there is potential for significant water quality impairment resulting from the activity as determined by the RWQCB.

Regional and Local Laws and Regulations

San Francisco By Municipal Regional Stormwater Permit Requirements. Pursuant to Section 402 of the CWA and the Porter-Cologne Act, municipal stormwater discharges in Berkeley are regulated under the San Francisco Bay RWQCB's Municipal Regional Stormwater (MRP) NPDES Permit, Order No. R2-2022-0018, as amended by Order No. R2-2023-0019, NPDES Permit No. CAS612008.[21] The MRP is overseen by the San Francsico Bay RWQCB. Local municipalities (the permittees) are responsible for ensuring compliance with the MRP. The MRP covers stormwater discharges from municipalities and local agencies in Alameda, Contra Costa, San Mateo, and Santa Clara counties, including the City of Berkeley.

The MRP requires all Bay Area municipalities to address potential sources of PCBs; this includes preventing certain building materials that may contain PCBs from entering storm drains as a result of building demolition activities. To obtain demolition permits from the City, assessments must be performed at the project site to screen existing buildings for PCBs in priority building materials, including caulks and sealants, thermal/fiberglass insulation and other insulating materials, adhesive/mastic, and rubber window seals/gaskets.[22]

---

21 San Francisco Bay RWQCB. 2022. San Francisco Bay Region Municipal Regional Stormwater NPDES Permit, Order No. R2-2022-0018, as amended by Order No. R2-2023-0019, NPDES Permit No. CAS612008. May 11.

22 City of Berkeley. 2024. Permit Forms Website, PCBs Screening Assessment Form. Website: https://berkeleyca.gov/sites/default/files/2022-02/PCBs_Screening_Assessment_Form.pdf (accessed December 24, 2024).

Provision C.3 of the MRP addresses post-construction stormwater management requirements for regulated projects, which are new development and redevelopment projects that create or replace 5,000 sf or more of impervious surface and special land use categories that create or replace 5,000 sf or more of impervious surface. Where a redevelopment project results in an alteration of more than 50 percent of the impervious surface of a previously existing development that was not subject to Provision C.3, the entire project, consisting of all existing, new, and/or replaced impervious surfaces, must be included in the treatment system design (i.e., stormwater treatment systems must be designed and sized to treat stormwater runoff from the entire redevelopment project). Provision C.3 requires regulated projects to implement practices that encompass low-impact development (LID), source control, site design, and stormwater treatment. LID employs principles such as preserving and recreating natural landscape features and minimizing impervious surfaces to create a functional and appealing site drainage system that treats stormwater as a resource rather than a waste product. Methods used to adhere to the LID principles rely on rain barrels and cisterns, permeable pavement, preservation of undeveloped open space, and biotreatment through rain gardens, bioretention areas, bioswales, and planter/tree boxes.

Provision C.3.i of the MRP requires small projects that create and/or replace more than 2,500 sf and less than 5,000 sf of impervious surface to install site design measures that reduce runoff and pollutants in runoff. Site design measures may include installing permeable pavements surfaces and directing runoff into cisterns, rain barrels, and vegetated areas.

Provision C.6 of the MRP pertains to construction site control and requires permittees to implement a construction site inspection and control program at all construction sites. Inspections must be performed to confirm implementation of appropriate and effective erosion and other construction pollutant controls by construction site operators/developers.

Provision C.7 of the MRP pertains to public information and outreach regarding the impacts of stormwater pollution on receiving waters and potential solutions to mitigate the pollution by encouraging implementation of appropriate solutions.

Provision C.8 of the MRP pertains to water quality monitoring through regional collaboration, countywide or area-wide programs, or third-party monitoring.

Provision C.9 of the MRP pertains to pesticide toxicity control and requires permittees to implement a pesticide toxicity control program that addresses their own and others' use of pesticides within their jurisdictions that pose a threat to water quality and that have the potential to enter the municipal conveyance system. This provision implements requirements of the TMDL for diazinon and pesticide-related toxicity for urban creeks in the region.

Provision C.10 of the MRP pertains to trash load reduction and requires permittees to reduce trash loads from MS4s by 100 percent (i.e., complete trash capture) or no adverse impact to receiving waters from trash by June 30, 2025.

Provisions C.11, C.12, and C.13 of the MRP pertain to the control of mercury, PCBs, and copper, respectively. The MRP requires permittees to implement source and treatment control measures and pollution prevention strategies for mercury and PCBs and requires permittees to prohibit the

discharge of wastewater to storm drains generated from the installation, cleaning, treating, and washing of the surface of copper architectural features, including copper roofs.

Provision C.15 of the MRP pertains to exempted unpolluted non-stormwater discharges and conditionally exempted non-stormwater discharges that are potential sources of pollutants that are permitted if appropriate control measures are implemented to eliminate adverse impacts to water quality.

Alameda County Clean Water Program. The Alameda County Clean Water Program (ACCWP) has developed a C.3 Stormwater Technical Guidance document to assist municipalities and developers in the design, implementation, and maintenance of stormwater infrastructure required by the MRP. In Section F.3 of the guidance document, ACCWP acknowledges that stormwater treatment designs should generally maximize infiltration to the underlying soils; however, at sites with high groundwater and/or groundwater contamination, where stormwater infiltration could promote migration of contamination and/or interfere with remediation, flow-through planters and other stormwater controls that are isolated from underlying soils are appropriate.[23]

RWQCB Order No. R2-2017-0048. If a dewatering activity is determined by the RWQCB not to be covered by the Construction General Permit due to contamination from fuels or volatile organic compounds (VOCs), the discharge may be allowed under NPDES Permit No. CAG912002, issued by the RWQCB under Order No. R2-2017-0048,[24] which covers the discharge or reclamation of extracted and treated groundwater resulting from the cleanup of groundwater polluted by VOCs, fuel leaks, fuel additives, and other related wastes.

Water Quality Control Plans. The State of California is divided into nine RWQCBs. The nine regional boards, along with the SWRCB, work together to preserve, protect, enhance and restore the State's water quality. RWQCB boundaries are based on watersheds and water quality requirements are based on the unique differences in climate, topography, geology, and hydrology for each watershed. Each RWQCB makes critical water quality decisions for its region, including setting standards, issuing WDRs, determining compliance with those requirements, and taking appropriate enforcement actions. The project site is within the boundaries of the San Francisco Bay RWQCB.

The San Francisco Bay RWQCB has adopted the Basin Plan for its region of responsibility that delineates water resource area boundaries based on hydrological features. For the purposes of achieving and maintaining water quality protection, specific beneficial uses have been identified for each of the surface waters and groundwater management zones described in the Basin Plan. Once beneficial uses are designated, appropriate water quality objectives are established, and programs

---

23 Alameda County Clean Water Program (ACCWP). 2023. C.3 Stormwater Technical Guidance, Version 8. March 22.

24 San Francisco Bay RWQCB. 2019. Order No. R2-2017-0048, NPDES Permit No. CAG912002, General Waste Discharge Requirements for Discharge or Reclamation of Extracted and Treated Groundwater Resulting from the Cleanup of Groundwater Polluted by Volatile Organic Compounds (VOCs), Fuel Leaks, Fuel Additives, and Other Related Wastes (VOC and Fuel General Permit). Effective January 1, 2019.

that maintain or enhance water quality can be implemented to ensure the protection of beneficial uses.

For planning purposes, the San Francisco Bay RWQCB identifies and organizes beneficial uses of each significant water body according to the seven major Hydrologic Planning Areas within the region. As designated by the San Francisco Bay RWQCB, the project site is in the San Francisco Bay Central Hydrologic Planning Area.[25] The Hydrologic Planning Areas are provided in **Figure 4**.

The beneficial uses of surface receiving waters for the project site (i.e., Central San Francisco Bay) include: Industrial Service Supply (IND); Industrial Process Supply (PROC); Commercial, and Sport Fishing (COMM); Shellfish Harvesting (SHELL); Estuarine Habitat (EST); Migration of Aquatic Organisms (MIGR); Rare, Threatened, or Endangered Species (RARE); Fish Spawning (SPWN); Wildlife Habitat (WILD); Water Contact Recreation (REC-1); Non-Contact Water Recreation (REC-2); and Navigation (NAV).[26]

Basin plans also establish implementation programs to achieve water quality objectives to protect beneficial uses and require monitoring to evaluate the effectiveness of the programs. These objectives must comply with the State antidegradation policy (State Board Resolution No. 68-16), which is designed to maintain high-quality waters while allowing some flexibility if beneficial uses are not unreasonably affected.

Basin plans have established narrative and numeric water quality objectives for inland surface streams and groundwater. If water quality objectives are exceeded, the RWQCBs can use their regulatory authority to require municipalities to reduce pollutant loads to the affected receiving waters. Relevant surface water quality objectives for all inland surface waters and groundwater under the jurisdiction of the San Franciso Bay RWQCB that would be applicable to the proposed project are shown in **Table A** and **Table B**, respectively. As provided above, the current impairments for receiving waters (i.e., Central San Francisco Bay) include pesticides (e.g., chlordane, DDT, and dieldrin), trash, metals (e.g., selenium and mercury), toxic organics (e.g., PCBs, dioxin compounds [including 2-, 3-, 7-, 8-TCDD], and furan compounds), and invasive species.[27] As such, the proposed project would be required to adhere to the water quality objectives of those pollutants.

San Francisco Bay Regional Water Quality Control Board Hydrologic Planning Areas

Table A: Surface Water Quality Objectives for Surface Waters

<table>
<tr><th>Constituent</th><th>Objective</th></tr>
<tr><td>Objectives for Specific Chemical Constituents</td><td>
Surface waters shall not contain concentrations of chemical constituents in amounts that adversely affect any designated beneficial use. Water quality objectives for selected toxic pollutants for surface waters are given in Tables 3-3, 3-3A, 3-3B, 3-3C, 3-4, and 3-4A.

The Water Board intends to work towards the derivation of site-specific objectives for the Bay-Delta estuarine system. Site-specific objectives to be considered by the Water Board shall be developed in accordance with the provisions of the federal Clean Water Act, the State Water Code, State Board water quality control plans, and this Plan. These site-specific objectives will take into consideration factors such as all available scientific information and monitoring data and the latest EPA guidance, and local environmental conditions and impacts caused by bioaccumulation. Pending the adoption of site-specific objectives, the objectives in Tables 3-3 and 3-4 apply throughout the region except as otherwise indicated in the tables or when site-specific objectives for the pollutant parameter have been adopted. Site-specific objectives have been adopted for copper in segments of San Francisco Bay (see Figure 7.2.1-01), for nickel in South San Francisco Bay (Table 3-3A), and for cyanide in all San Francisco Bay segments (Table 3-3C). Objectives for mercury that apply to San Francisco Bay are listed in Table 3-3B. Objectives for mercury that apply to Walker Creek, Soulajule Reservoir, and their tributaries, and to waters of the Guadalupe River watershed are listed in Table 3-4A.

South San Francisco Bay south of the Dumbarton Bridge is a unique, water-quality-limited, hydrodynamic and biological environment that merits continued special attention by the Water Board. Controlling urban and upland runoff sources is critical to the success of maintaining water quality in this portion of the Bay. Site-specific water quality objectives have been adopted for dissolved copper and nickel in this Bay segment. Site-specific objectives may be appropriate for other pollutants of concern, but this determination will be made on a case-by-case basis, and after it has been demonstrated that all other reasonable treatment, source control and pollution prevention measures have been exhausted. The Water Board will determine whether revised water quality objectives and/or effluent limitations are appropriate based on sound technical information and scientific studies, stakeholder input, and the need for flexibility to address priority problems in the watershed.

Table A: Surface Water Quality Objectives for Surface Waters

Constituent	Objective
	Notes: [a] Marine waters are those in which the salinity is equal to or greater than 10 parts per thousand 95% of the time, as set forth in Chapter 4 of the Basin Plan. Unless a site-specific objective has been adopted, these objectives shall apply to all marine waters except for the South Bay south of Dumbarton Bridge (where the California Toxics Rule (CTR) applies) or as specified in note h (below). For waters in which the salinity is between 1 and 10 parts per thousand, the applicable objectives are the more stringent of the freshwater (Table 3-4) or marine objectives. [b] Source: 40 CFR Part 131.38 (California Toxics Rule or CTR), May 18, 2000. [c] These objectives for metals are expressed in terms of the dissolved fraction of the metal in the water column. [d] According to the CTR, these objectives are expressed as a function of the water-effect ratio (WER), which is a measure of the toxicity of a pollutant in site water divided by the same measure of the toxicity of the same pollutant in laboratory dilution water. The 1-hr. and 4-day objectives = table value X WER. The table values assume a WER equal to one. [e] This objective may be met as total chromium. [f] Water quality objectives for copper were promulgated by the CTR and may be updated by U.S. EPA without amending the Basin Plan. Note: at the time of writing, the values are 3.1 ug/l (4-day average) and 4.8 ug/l (1-hr. average). The most recent version of the CTR should be consulted before applying these values. [g] Cyanide criteria were promulgated in the National Toxics Rule (NTR) (Note: at the time of writing, the values are 1.0 µg/l (4-day average) and 1.0 µg/l (1-hr. average)) and apply, except that site-specific marine water quality objectives for cyanide have been adopted for San Francisco Bay as set forth in Table 3-3C. [h] Source: U.S. EPA Ambient Water Quality Criteria for Mercury (1984). The 4-day average value for mercury does not apply to San Francisco Bay; instead, the water quality objectives specified in Table 3- 3B apply. The 1-hour average value continues to apply to San Francisco Bay. For enclosed bays and estuaries other than San Francisco Bay, which has site-specific objectives in Table 3-3B, refer to Part 2 of the Water Quality Control Plan for Inland Surface Waters, Enclosed Bays, and Estuaries of California—Tribal and Subsistence Fishing Beneficial Uses and Mercury Provisions (Statewide Mercury Provisions). [i] Selenium criteria were promulgated for all San Francisco Bay/Delta waters in the National Toxics Rule (NTR). The NTR criteria specifically apply to San Francisco Bay upstream to and including Suisun Bay and Sacramento-San Joaquin Delta. Note: at the time of writing, the values are 5.0 ug/l (4-day average) and 20 ug/l (1-hr. average). [j] Tributyltin is a compound used as an antifouling ingredient in marine paints and toxic to aquatic life in low concentrations. Ambient Aquatic Life Water Quality Criteria for Tributyltin (TBT) – Final (EPA 822-R03-031, December 2003). [k] The 24-hour average aquatic life protection objective for total PAHs is retained from the 1995 Basin Plan. Source: U.S. EPA 1980. The U.S. EPA (1980) Water Quality Criteria document indicates acute toxicity concentrations for salt water at or below 300 µg/l. An acute-to-chronic ratio of 20 yields an objective of 15 µg/l. Total PAHs are those compounds identified by EPA method 610. [l] Table 3-3A contains site-specific water quality objectives for copper and nickel applicable to San Francisco Bay segments. **Table 3-3B: Marine[a] Water Quality Objectives for Mercury in San Francisco Bay[b]** Protection of Human Health — 0.2 mg mercury per kg fish issue — Average wet weight concentration measured in the edible portion of trophic level 3 and trophic level 4 fish

Table A: Surface Water Quality Objectives for Surface Waters

Constituent	Objective		
	Protection of Aquatic Organizas and Wildlife	0.03 mg mercury per kg fish	Average wet weight concentration measured in whole fish 3–5 cm in length

Notes:
[a] Marine waters are those in which the salinity is equal to or greater than 10 parts per thousand 95% of the time, as set forth in Chapter 4 of the Basin Plan. For waters in which the salinity is between 1 and 10 parts per thousand, the applicable objectives are the more stringent of the freshwater or marine objectives.
[b] Objectives apply to all segments of San Francisco Bay, including Sacramento/San Joaquin River Delta (within San Francisco Bay region), Suisun Bay, Carquinez Strait, San Pablo Bay, Richardson Bay, Central San Francisco Bay, Lower San Francisco Bay, and South San Francisco Bay (including the Lower South Bay).
[c] Compliance shall be determined by analysis of fish tissue as described in Chapter 6, Surveillance and Monitoring.

Source: Water Quality Control Plan (Basin Plan) for the San Francisco Bay Basin (San Francisco Bay Regional Water Quality Control Board 2023).
µg/L = micrograms per liter
mg/L = milligrams per liter

Groundwater objectives consist primarily of narrative objectives combined with a limited number of numerical objectives. According to the Basin Plan, the maintenance of existing high quality of groundwater is the primary groundwater objective. In addition, at a minimum, the Basin Plan indicates that groundwater shall not contain concentrations of bacteria, chemical constituents, radioactivity, or substances producing taste and odor in excess of the objectives described below in **Table B** unless naturally occurring background concentrations are greater.

Table B: Groundwater Quality Objectives

Constituent	Objectives
Bacteria	In groundwater with a beneficial use of municipal and domestic supply, the median of the most probable number of coliform organisms over any seven-day period shall be less than 1.1 most probable number per 100 milliliters (MPN/100 mL) (based on multiple tube fermentation technique; equivalent test results based on other analytical techniques as specified in the National Primary Drinking Water Regulation, 40 CFR, Part 141.21 (f), revised June 10, 1992, are acceptable).
Organic and Inorganic Chemical Constituents	All groundwater shall be maintained free of organic and inorganic chemical constituents in concentrations that adversely affect beneficial uses. To evaluate compliance with water quality objectives, the Water Board will consider all relevant and scientifically valid evidence, including relevant and scientifically valid numerical criteria and guidelines developed and/or published by other agencies and organizations (e.g., U.S. Environmental Protection Agency (U.S. EPA), the State Water Board, California Department of Health Services (DHS), U.S. Food and Drug Administration, National Academy of Sciences, California Environmental Protection Agency's (Cal/EPA) Office of Environmental Health Hazard Assessment (OEHHA), U.S. Agency for Toxic Substances and Disease Registry, Cal/EPA Department of Toxic Substances Control (DTSC), and other appropriate organizations.) At a minimum, groundwater designated for use as domestic or municipal supply (MUN) shall not contain concentrations of constituents in excess of the maximum

Table B: Groundwater Quality Objectives

Constituent	Objectives
	(MCLs) or secondary maximum contaminant levels (SMCLs) specified in the following provisions of Title 22, which are incorporated by reference into this plan: Tables 64431-A (Inorganic Chemicals) of Section 64431, Table 64433.2-A (Fluoride) of Section 64433.2, and Table 64444-A (Organic Chemicals) of Section 64444. This incorporation-by-reference is prospective, including future changes to the incorporated provisions as the changes take effect. (See Table 3-5.) Groundwater with a beneficial use of agricultural supply shall not contain concentrations of chemical constituents in amounts that adversely affect such beneficial use. In determining compliance with this objective, the Water Board will consider as evidence relevant and scientifically valid water quality goals from sources such as the Food and Agricultural Organizations of the United Nations; University of California Cooperative Extension, Committee of Experts; and McKee and Wolf's "Water Quality Criteria," as well as other relevant and scientifically valid evidence. At a minimum, groundwater designated for use as agricultural supply (AGR) shall not contain concentrations of constituents in excess of the levels specified in Table 3-6. Groundwater with a beneficial use of freshwater replenishment shall not contain concentrations of chemicals in amounts that will adversely affect the beneficial use of the receiving surface water. Groundwater with a beneficial use of industrial service supply or industrial process supply shall not contain pollutant levels that impair current or potential industrial uses.
Radioactivity	At a minimum-, groundwater designated for use as domestic or municipal supply (MUN) shall not contain concentrations of radionuclides in excess of the MCLs specified in Table 4 (Radioactivity) of Section 64443 of Title 22, which is incorporated by reference into this plan. This incorporation-by-reference is prospective, including future changes to the incorporated provisions as the changes take effect. (See Table 3-5.)
Taste and Odor	Groundwater designated for use as domestic or municipal supply (MUN) shall not contain taste- or odor-producing substances in concentrations that cause a nuisance or adversely affect beneficial uses. At a minimum, groundwater designated for use as domestic or municipal supply shall not contain concentrations in excess of the SMCLs specified in Tables 64449-A (Secondary MCLs-Consumer Acceptance Limits) and 64449-B (Secondary MCLs-Ranges) of Section 64449 of Title 22, which is incorporated by reference into this plan. This incorporation-by-reference is prospective, including future changes to the incorporated provisions as the changes take effect. (See Table 3-5.)

Source: Water Quality Control Plan (Basin Plan) for the San Francisco Bay Basin (San Francisco Bay Regional Water Quality Control Board 2023).

City of Berkeley General Plan. The City's General Plan, adopted in 2002, contains the following policies and actions in the Disaster Preparedness and Safety Element[28] and Environmental Management Element,[29] which are relevant to the project:

[28] City of Berkeley. 2002a. Disaster Preparedness and Safety Element, General Plan, Adopted April 23.
[29] City of Berkeley. 2002b. Environmental Management Element, General Plan, Adopted April 23.

EM-23 Water Quality in Creeks and San Francisco Bay. Take action to improve water quality in creeks and San Francisco Bay.

Actions:

A. Work with the East Bay Municipal District (EBMUD) to ensure that wastewater discharges comply with the requirements of EBMUD's Wastewater Control Ordinance No. 311 to manage wastewater treatment discharges to protect San Francisco Bay.

B. To minimize storm sewer pollution of San Francisco Bay, maintain an effective street sweeping and cleaning program.

C. Identify and eliminate cross connections between the sanitary sewer and storm sewer systems.

D. Restore a healthy freshwater supply to creeks and the Bay by eliminating conditions that pollute rainwater, and by reducing impervious surfaces and encouraging use of swales, cisterns, and other devices that increase infiltration of water and replenishment of underground water supplies that nourish creeks.

Policy EM-25 Groundwater. Protect local groundwater by promoting enforcement of state water quality laws that ensure non-degradation and beneficial use of groundwater.

Berkeley Municipal Code. Section 17.16.050 of the Berkeley Municipal Code (BMC) includes requirements for storm drain construction including permitting requirements for new storm drains and connections.

Chapter 17.20 of the BMC includes requirements to protect and enhance the water quality of our watercourses, waterbodies, and wetlands in a manner pursuant to and consistent with the federal CWA.

Section 17.20.030 of the BMC provides that it is unlawful to discharge any matter except stormwater into the storm drain system except as otherwise expressly exempted in the BMC.

Section 17.20.050 of the BMC provides that any person engaged in activities that will or may result in pollutants entering the storm drain system shall undertake all practicable measures to reduce or prevent the contamination of stormwater by pollutants. Section 17.20.050.A of the BMC prohibits littering and Section 17.20.050.B includes requirements for construction and development including use of filtering materials at catch basins, use of BMPs during construction, and providing the City with evidence of filing a Notice of Intent to obtain coverage under the Construction General Permit with the SWRCB, when required.

Section 17.20.050.B.4 of the BMC provides that the City Manager may establish controls on the volume and rate of stormwater runoff from new developments and redevelopments as may be appropriate to minimize the discharge and transport of pollutants into the storm drain system.

Section 17.20.080.B of the BMC allows discharges from the following sources when the discharger manages the source such that the least amount of non-stormwater as practicable enters the storm drain system: crawl space and basement sump pumps; air conditioning condensation; groundwater drainage piping systems, including foundation drains, footing drains, and pumps; and uncontaminated pumped groundwater.

Section 17.20.090 of the BMC provides that any person in charge of a business which handles, processes, or stores a hazardous material or any person responsible for emergency response for such a business, who has knowledge of any confirmed or unconfirmed release of materials, pollutants or waste which may result in pollutants or non-stormwater discharges entering the City storm drain system, shall take all necessary steps to ensure the discovery, containment and cleanup of such release as soon as possible. Such person shall also notify the City of the occurrence by telephoning 911 immediately, and confirming the notification in writing to the emergency and toxics program of the City Manager's office within one week of said discovery.

Section 17.20.100 of the BMC describes the City's authority to conduct inspections and perform sampling for enforcement purposes.

City of Berkeley Standard Conditions of Approval for All Projects. Pursuant to Berkeley Municipal Code (BMC) Title 23 Zoning Ordinance and Title 13 Public Peace, Morals, and Welfare, the following conditions apply to the management of stormwater during construction and operation of the proposed project:

> ***Stormwater Requirements.*** The Applicant shall demonstrate compliance with the requirements of the City's National Pollution Discharge Elimination System (NPDES) permit as described in the Berkeley Municipal Code (BMC) Section 17.20. The following conditions apply:
>
> a. The project plans shall identify and show site-specific Best Management Practices (BMPs) appropriate to activities conducted on-site to limit to the maximum extent practicable the discharge of pollutants to the City's storm drainage system, regardless of season or weather conditions.
>
> b. Trash enclosures and/or recycling area(s) shall be covered; no other area shall drain onto this area. Drains in any wash or process area shall not discharge to the storm drain system; these drains should connect to the sanitary sewer. Applicant shall contact the City of Berkeley and EBMUD for specific connection and discharge requirements. Discharges to the sanitary sewer are subject to the review, approval and conditions of the City of Berkeley and EBMUD.
>
> c. Landscaping shall be designed with efficient irrigation to reduce runoff, promote surface infiltration and minimize the use of fertilizers and pesticides that contribute to stormwater pollution. Where feasible, landscaping should be designed and operated to treat runoff.

When and where possible, xeriscape and drought tolerant plants shall be incorporated into new development plans.

d. Design, location and maintenance requirements and schedules for any stormwater quality treatment structural controls shall be submitted to the Department of Public Works for review with respect to reasonable adequacy of the controls. The review does not relieve the property owner of the responsibility for complying with BMC Chapter 17.20 and future revisions to the City's overall stormwater quality ordinances. This review shall be conducted prior to the issuance of a Building Permit.

e. All paved outdoor storage areas must be designed to reduce/limit the potential for runoff to contact pollutants.

f. All on-site storm drain inlets/catch basins must be cleaned at least once a year immediately prior to the rainy season. The property owner shall be responsible for all costs associated with proper operation and maintenance of all storm drainage facilities (pipelines, inlets, catch basins, outlets, etc.) associated with the project, unless the City accepts such facilities by Council action. Additional cleaning may be required by City of Berkeley Public Works Engineering Dept.

g. All private or public projects that create and/or replace 5,000 square feet or more of impervious surface must comply with Provision C.3 of the Alameda County NPDES permit and must incorporate stormwater controls to enhance water quality. Permit submittals shall include a Stormwater Requirement Checklist and detailed information showing how the proposed project will meet Provision C.3 stormwater requirements, including a) Site design measures to reduce impervious surfaces, promote infiltration, and reduce water quality impacts; b) Source Control Measures to keep pollutants out of stormwater runoff; c) Stormwater treatment measures that are hydraulically sized to remove pollutants from stormwater; d) an O & M (Operations and Maintenance) agreement for all stormwater treatment devices and installations; and e) Engineering calculations for all stormwater devices (both mechanical and biological).

h. All on-site storm drain inlets must be labeled “No Dumping – Drains to Bay” or equivalent using methods approved by the City.

i. Washing and/or steam cleaning must be done at an appropriately equipped facility that drains to the sanitary sewer. Any outdoor washing or pressure washing must be managed in such a way that there is no discharge or soaps or other pollutants to the storm drain. Sanitary connections are subject to the review, approval and conditions of the sanitary district with jurisdiction for receiving the discharge.

j. All loading areas must be designated to minimize “run-on” or runoff from the area. Accumulated waste water that may contribute to the pollution of stormwater must be drained to the sanitary sewer or intercepted and pretreated prior to discharge to the storm drain system. The property owner shall ensure that BMPs are implemented to prevent

potential stormwater pollution. These BMPs shall include, but are not limited to, a regular program of sweeping, litter control and spill cleanup.

k. Sidewalks and parking lots shall be swept regularly to prevent the accumulation of litter and debris. If pressure washed, debris must be trapped and collected to prevent entry to the storm drain system. If any cleaning agent or degreaser is used, wash water shall not discharge to the storm drains; wash waters should be collected and discharged to the sanitary sewer. Discharges to the sanitary sewer are subject to the review, approval and conditions of the sanitary district with jurisdiction for receiving the discharge.

l. The Applicant is responsible for ensuring that all contractors and sub-contractors are aware of and implement all stormwater quality control measures. Failure to comply with the approved construction BMPs shall result in the issuance of correction notices, citations, or a project stop work order.

Public Works. All piles of debris, soil, sand, or other loose materials shall be covered at night and during rainy weather with plastic at least one-eighth millimeter thick and secured to the ground.

Public Works. The applicant shall ensure that all excavation accounts for surface and subsurface waters and underground streams so as not to adversely affect adjacent properties and rights-of-way.

Public Works. The project sponsor shall maintain sandbags or other devices around the site perimeter during the rainy season to prevent on-site soils from being washed off-site and into the storm drain system. The project sponsor shall comply with all City ordinances regarding construction and grading.

Public Works. Prior to any excavation, grading, clearing, or other activities involving soil disturbance during the rainy season the applicant shall obtain approval of an erosion prevention plan by the Building and Safety Division and the Public Works Department. The applicant shall be responsible for following these and any other measures required by the Building and Safety Division and the Public Works Department.

Drainage Patterns. The Applicant shall establish and maintain drainage patterns that do not adversely affect adjacent properties and rights-of-way. Drainage plans shall be submitted for approval of the Building & Safety Division and Public Works Department, if required.

IMPACT ANALYSIS

Potential Impacts to Water Quality

The proposed project would merge the two existing lots into one contiguous lot and demolish the existing 2,380 sf and 2,849 sf buildings and parking lot to construct an 80,046 sf, eight-story residential building consisting of 65 dwelling units. Five units would be below market rate. Additionally, the proposed project would include a lobby, 4,372 sf of amenity space, a balcony on the 4th floor a roof deck on the 8th floor, and landscaping.

Construction would include demolition, site preparation, grading, building construction, paving, and architectural coating activities.

Temporary Impacts During Construction

Pollutants of concern during construction include sediment, trash, petroleum products, paints, adhesives, concrete waste (dry and wet), sanitary waste, and chemicals. Each of these pollutants on its own or in combination with other pollutants can have a detrimental effect on water quality. During construction activities, excavated soil would be exposed, and there would be an increased potential for soil erosion and sedimentation compared to existing conditions. In addition, chemicals, liquid products, petroleum products (e.g., paints, solvents, and fuels), and concrete-related waste may be spilled or leaked during construction. Sediment from increased soil erosion and chemicals from spills and leaks have the potential to be transported via stormwater runoff into receiving waters.

Project construction would disturb the entire 0.28-acre project site. Because project construction would disturb less than 1 acre of soil, the proposed project would not be subject to the requirements of the SWRCB's Construction General Permit. However, the proposed project would be required to comply with the City's Standard Conditions of Approval during construction, which includes implementing City-specific standard conditions, such as erosion and sediment control (designed to minimize erosion and retain sediment on site) and good housekeeping practices (to prevent spills, leaks, and discharge of construction debris), to limit the discharge of pollutants to the City's storm drainage system. City-specific standard conditions include completing routine or area inspections to enforce the provisions of BMC Section 17.20; covering all piles of debris, soil, sand and other loose materials overnight and during rainy weather; maintaining sandbags or other devices around the site during the rainy season; and approving and implementing an erosion prevention plan. **Table C** provides the BMPs that would be implemented during construction of the proposed project, as indicated by the C.3 Stormwater Requirements Checklist[30] prepared for the proposed project.

Table C: 2298 Durant Avenue Multi-Family Building Project
C.6 Stormwater Construction Phase Requirements
Construction Best Management Practices

Best Management Practices (BMPs)
Attach the municipality's construction BMP plan sheet to project plans and require contractor to implement the applicable BMPs on the plan sheet.
Implement temporary erosion controls to stabilize all disturbed areas until permanent erosion controls are established.
Delineate with field markers clearing limits, easements, setbacks, sensitive or critical areas, buffer zones, trees, and drainage courses.
Provide notes, specifications, or attachments describing: • Construction, operation and maintenance of erosion and sediment controls, include inspection frequency;

[30] Brian Dorward. 2025. *C.3 Stormwater Requirements Checklist, Municipal Regional Stormwater Permit (MRP 3), Stormwater Controls for Development Projects*. February 3.

Table C: 2298 Durant Avenue Multi-Family Building Project
C.6 Stormwater Construction Phase Requirements
Construction Best Management Practices

Best Management Practices (BMPs)
• Methods and schedule for grading, excavation, filling, clearing of vegetation, and storage and disposal of excavated or cleared material; • Specifications for vegetative cover and mulch, include methods and schedules for planting and fertilization; and • Provisions for temporary and/or permanent irrigation.
Perform clearing and earth moving activities only during dry weather.
Use sediment controls or filtration to remove sediment when dewatering and obtain all necessary permits.
Protect all storm drain inlets in vicinity of site using drop inlet protection.
Trap sediment on-site, using BMPs such as sediment basins or traps, earthen dikes or berms, silt fences, check dams, erosion control blankets, covers for soil stock piles, etc.
Divert on-site runoff around disturbed areas and construction materials; divert off-site runoff around the site (e.g., swales and dikes).
Protect adjacent properties and undisturbed areas from construction impacts using vegetative buffer strips, sediment barriers or filters, dikes, mulching, or other measures as appropriate.
No cleaning, fueling, or maintaining vehicles on-site, except in a designated area where wash water is contained for proper management and spill controls are in place.
Store, handle, and dispose of construction materials/wastes properly to prevent contact with stormwater.
Contractor shall train and provide instruction to all employees/subcontractors re: construction BMPs.
Control and prevent the discharge of all potential pollutants, including pavement cutting wastes, paints, concrete, petroleum products, chemicals, wash water or sediments, rinse water from architectural copper, and non-stormwater discharges to storm drains and watercourses.

Source: *C.3 Stormwater Requirements Checklist, Municipal Regional Stormwater Permit (MRP 3), Stormwater Controls for Development Projects* (Brian Dorward).

Additionally, the proposed project would address potential sources of PCBs from being released from the project site during demolition activities and entering storm drains, as required by the MRP.[31] Addressing potential sources of PCBs during demolition activities requires existing buildings to be screened for PCBs in priority building materials, including caulks and sealants, thermal/fiberglass insulation and other insulating materials, adhesive/mastic, and rubber window seals/gaskets in order to obtain demolition permits from the City.[32] Because the proposed project would include the demolition of the existing building on the project site, completion of the City's PCBs Screening Assessment Form would be required. The PCBs screening process is part of the City's water quality protection program and has been designed in accordance with requirements detailed in the MRP. Participation in the City's PCBs screening process prior to demolition, which would address any potential hazardous impact due to PCBs present at the project site, would ensure the proposed project would not adversely impact water quality due to release of PCBs during demolition/construction activities.

[31] Brian Dorward. 2025. *C.3 Stormwater Requirements Checklist, Municipal Regional Stormwater Permit (MRP 3), Stormwater Controls for Development Projects*. February 3.

[32] City of Berkeley. 2024. Permit Forms Website, PCBs Screening Assessment Form. Website: https://berkeleyca.gov/sites/default/files/2022-02/PCBs_Screening_Assessment_Form.pdf (accessed December 26, 2024).

The proposed project is not anticipated to require excavation at depths that would encounter groundwater and construction-period groundwater dewatering is not expected to occur. However, if excavation extends to depths that may encounter groundwater, dewatering may be required during project construction. Groundwater dewatering activities could affect surface water quality through the discharge of polluted groundwater to surface waterbodies and storm drains. If the proposed project requires the discharge of groundwater polluted with fuels or VOCs to storm drains, the proposed project would be required to seek coverage under NPDES Permit No. CAG912002, issued by the RWQCB under Order No. R2-2017-0048,[33] which covers the discharge or reclamation of extracted and treated groundwater resulting from the cleanup of groundwater polluted by VOCs, fuel leaks, fuel additives, and other related wastes.

Overall, with the implementation of project-specific construction BMPs and an erosion control plan, completion of a PCBs Screening Assessment Form, and adherence to dewatering requirements, if necessary, the proposed project would not adversely impact water quality during project construction.

Permanent Impacts During Operation and Maintenance

During operation, anticipated pollutants of concern associated with the proposed project include pathogens (bacteria/virus), toxic organic compounds, nutrients, pesticides, sediment/turbidity, and trash and debris. Potential sources of these pollutants associated with the proposed project include:

- **Pathogens:** Food wastes, sediment and landscaping areas
- **Nutrients:** Fertilizers, sediment, and trash/debris
- **Pesticides:** Landscaping activities
- **Sediment/turbidity:** Disturbed or unstabilized landscaping areas
- **Trash and Debris:** Landscaping activities, food wrappers, and food wastes

Each of these pollutants on its own or in combination with other pollutants can have a detrimental effect on water quality. Potential water quality impacts during operation of the proposed project would be subject to the San Francisco Bay RWQCB's MRP (Order No. R2-2022-0018, as amended by Order No. R2-2023-0019, NPDES Permit No. CAS612008), as discussed below.

The project site currently consists of 10,604 sf of impervious surface area (approximately 87 percent of the project site). Implementation of the proposed project would replace 10,604 sf of impervious surface area and create 274 sf of new impervious surface area, resulting in 10,878 sf of impervious surface area at the project site post construction. The remaining surface area (1,357 sf) at the project site would be pervious and would consist of landscaped area and bioretention space. According to the C.3 Stormwater Requirements Checklist[34] prepared for the proposed project, the

---

[33] San Francisco Bay RWQCB. 2019. Order No. R2-2017-0048, NPDES Permit No. CAG912002, General Waste Discharge Requirements for Discharge or Reclamation of Extracted and Treated Groundwater Resulting from the Cleanup of Groundwater Polluted by Volatile Organic Compounds (VOCs), Fuel Leaks, Fuel Additives, and Other Related Wastes (VOC and Fuel General Permit). Effective January 1, 2019.

[34] Brian Dorward. 2025. *C.3 Stormwater Requirements Checklist, Municipal Regional Stormwater Permit (MRP 3), Stormwater Controls for Development Projects*. February 3.

proposed project is considered a C.3.b Regulated Project because it would result in more than 5,000 sf of total new/replaced impervious surface area. As such, the proposed project would be required to include appropriate site design, source control, and hydraulically sized stormwater treatment measures, to capture, treat, and reduce pollutants of concern in stormwater runoff in compliance with the MRP, as stipulated by the City's standard Conditions of Approval. In addition to being a Regulated Project, according to the C.3 Stormwater Requirements Checklist[35] prepared for the proposed project, the proposed project meets the criteria of a Special Project Category A as detailed in Appendix J of the C.3 Technical Guidance and qualifies for LID treatment reduction credits of 100 percent.[36] Therefore, the proposed project is allowed to use specific types of non-LID treatment if the use of 100 percent LID treatment is determined to be infeasible. As such, stormwater treatment measures would include a media filter and biotreatment of stormwater collected on the project site prior to discharge into the City's stormwater infrastructure. The proposed project would utilize a filter vault to treat stormwater from the western half of the project site and a flow-through planter to treat stormwater from the eastern half of the project site. Both the filter vault and the flow-through planter would be hydraulically sized to treat and manage stormwater using the 0.2-inch-per-hour intensity approach, which is the recommended approach as detailed in the MRP. **Table D** and **Table E** describe the proposed site design, treatment, and source control measures that would be implemented as part of the proposed project.

Table D: Site Design and Treatment Measures

Site Design and Treatment Measures
Bio Flow-Through Planter
Filter vault
Direct runoff onto vegetated areas.
Minimize land disturbance and impervious surface (especially parking lots).
Maximize permeability by clustering development and preserving open space.

Table E: Source Control Measures

Feature Requiring Source Controls	Source Control Measures
Refuse Areas	• Provide a roofed and enclosed area for dumpsters, recycling containers, etc., designed to prevent stormwater run-on and runoff. • Connect any drains in or beneath dumpsters, compactors, and tallow bin areas serving food service facilities to the sanitary sewer. [1]
Fire Sprinklers	Design for discharge of fire sprinkler test water to landscape or sanitary sewer.[1]

Source: *C.3 Stormwater Requirements Checklist, Municipal Regional Stormwater Permit (MRP 3), Stormwater Controls for Development Projects (Brian Dorward).*

[1] Any connection to the sanitary sewer system is subject to sanitary district approval.

In addition, the proposed project would be required to comply with the City's standard Conditions of Approval related to drainage patterns. As required by the City's Drainage Patterns standard condition of approval, the project applicant would be required to establish and maintain drainage patterns that do not adversely affect adjacent properties and rights-of-way. The current project design directs stormwater to either the existing stormwater infrastructure located along Durant Avenue; to the filter vault along the western edge of the site, which drains to the proposed flow-through planter; or to the proposed flow-through planter along the eastern edge of the site, which would drain to an 6-inch storm drain that discharges to the existing storm drain in Ellsworth Street.[37] The proposed project would be required to submit a Final Stormwater Control Plan to the City for review and approval to ensure that the proposed project would not adversely impact adjacent properties and rights-of-way due to stormwater runoff from the project site.

With the proper design, implementation, and maintenance of site design, source control, and hydraulically sized stormwater treatment BMPs, as detailed in the C.3 Stormwater Requirements Checklist prepared for the project, compliance with the applicable provisions of the MRP, and compliance with City's standard Conditions of Approval, the proposed project would not adversely impact water quality during operation of the proposed project.

Cumulative Impacts

Cumulative development in the Potter/Derby Creeks Watershed is a continuation of the existing urban pattern of development that has already resulted in modifications to watercourses in the area. Both Potter Creek and Derby Creek have been replaced by underground pipelines and culverts as part of the City's storm drainage system. The stream channels of these creeks and their tributaries have been almost entirely converted to man-made drainage structures. Future development of pervious or vegetated lands in the area could potentially increase the volume of stormwater runoff and contribute to pollutant loading in stormwater runoff reaching receiving waters or the City's storm drain system, thereby resulting in cumulative impacts to hydrology and surface water quality within the watershed. In addition, the construction and operation of future projects could result in localized degradation of groundwater quality that could eventually impair the continued use if pollutant discharge quantities are large enough. Cumulative impacts to

[37] Greenwood & Moore, Inc. 2025. *Improvement Plan for 2298 Durant Avenue.* January 31.

groundwater supply could also occur due to increases in impervious surfaces that impair groundwater recharge and increases in consumptive uses of groundwater.

Future projects must include BMPs to reduce construction- and operation-related impacts to water quality and hydrology in compliance with applicable NPDES permits and local plans and ordinances. Specifically, all projects that disturb 1 acre or more of soil must comply with the requirements of the Construction General Permit; all projects (including projects that disturb less than 1 acre of soil) must comply with the City's Stormwater Requirements Conditions of Approval, which require implementation of site-specific BMPs to limit the discharge of pollutants to the City's storm drainage system; any Regulated Projects (private or public projects that create and/or replace 5,000 sf or more of impervious surface) must comply with the requirements of the San Francisco Bay RWQCB's MRP (Order No. R2-2022-0018, as amended by Order No. R2-2023-0019, NPDES Permit No. CAS612008); and all projects must comply with the City's Drainage Patterns Condition of Approval, which requires the establishment and maintenance of drainage patterns that do not adversely affect adjacent properties and rights-or-way. The preparation and approval of construction BMPs for project construction and a C.3 Stormwater Requirements Checklist (for operation) would be required for projects to determine appropriate BMPs to minimize water quality impacts and the volume of stormwater runoff. In addition, the preparation and approval of a hydrology study would be required to determine the hydrologic control required to minimize increases in runoff from each site so that stormwater runoff does not exceed existing conditions or result in hydromodification impacts. The City Public Works Department reviews all proposed development projects within Berkeley on a case-by-case basis to ensure that sufficient local and regional drainage capacity is available.

All future projects must consider and address impacts to impaired receiving waters and TMDLs for receiving waters. The TMDL program is a cumulative approach to identifying all constituents that adversely affect the beneficial uses of waterbodies to identify appropriate reductions in pollutant loads so that the receiving waters can maintain/attain the beneficial uses in the Basin Plan. Thus, by complying with TMDLs, a project's cumulative impacts to overall water quality in the Potter/Derby Creeks Watershed is considered.

The proposed project, along with all future projects proposed in the Potter/Derby Creeks Watershed, would be required to comply with the requirements of the MRP and City Conditions of Approval, including implementing construction and operational BMPs to reduce pollutants in stormwater runoff. Compliance with these permits and regulations constitutes compliance with programs intended to address cumulative water quality impacts. Because the proposed project and other related projects would comply with applicable NPDES and City requirements and would include BMPs to reduce the volume of stormwater runoff and pollutants of concern in stormwater runoff, the proposed project would not contribute to cumulative hydrology and water quality impacts within the Potter/Derby Creeks Watershed. In addition, the proposed project does not encroach into the 100-year floodplain, so there is no cumulative impact from placement of developments within the floodplain.

Re: Application Processing– California Environmental Quality Act (CEQA) and Additional Information Required – Use Permit #ZP2024-0126 for 2298 Durant Avenue and 2360 Ellsworth Street

Dear Austin Springer,

Thank you for the Zoning Permit application deemed complete on October 21, 2024, for a Use Permit to demolish a commercial building, a residential building with seven dwelling units, and associated parking; merge two lots; and build an eight-story (92 foot), 80,000 square-foot residential building, with 65 units (5 Very-Low Income units), utilizing a State Density Bonus. The application has been evaluated for the level of environmental review required and readiness for final action according to the submittal checklist and application guidelines. Thank you for providing revised materials on April 18, 2025.

Required Zoning Permits

Based on my review, the following zoning permits are required:

1. Use Permit - BMC Section 23.326.020(B) to demolish dwelling units.
2. Use Permit - BMC Section 23.326.030(A)(3) to eliminate dwelling units through demolition.
3. Use Permit - BMC Section 23.326.070(A) to demolish a non-residential building.
4. Use Permit - BMC Section 23.202.020(A) to add a multi-family use.
5. Administrative Use Permit - BMC Section 23.304.050(A) to add architectural elements that exceed the height limit.
6. Density Bonus with the following requested reductions, waivers, and concessions:

   Waivers. The application requests five waivers to reduce the following development standards:

Development Standard	Requirement	Proposed
Useable Open Space (BMC Section 23.304.090(A))	3,159 square feet	1,695 square feet
Landscaped Useable Open Space (BMC Section 23.304.090(B)(7))	40% of proposed outdoor useable open space (796 square feet)	211 square feet
Height (BMC Section 23.202.140(E)(1) and 23.304.050(C))	85 feet, plus 5-foot parapet	91 feet 6 inches (to top of parapet)

Long-Term Bicycle Parking (BMC Section 23.322.0690(A)(2))	106 spaces (99 long-term, 7 short-term)	20 spaces (14 long-term, 6 short-term)
Permit required to remove trees in public right of way (BMC Section 12.44.020)	City will review the permit application	Remove camphor tree on Durant Avenue which conflicts with the proposed building massing.

Concessions. The application requests two concessions.

1. Healthcare coverage for construction workers (BMC Section 13.107.050)
2. Prevailing wage for construction workers (BMC Section 13.108.030)

Level of Review Under the California Environmental Quality Act

Under the California Environmental Quality Act (CEQA), staff determines whether an environmental impact report, a negative declaration, or a mitigated negative declaration will be required, depending on the type of project. This determination will be made within 30 days of an application being deemed complete. If a project is exempt from CEQA, staff recommends an exemption determination to the Zoning Officer or the Zoning Adjustments Board (ZAB).

It is Staff's recommendation that this project is eligible for a **Class 32 Infill Exemption** (CEQA Guidelines Section 15332). However, the final determination is made by the Zoning Adjustments Board (ZAB).

CEQA Review Items

1. Water Quality Memorandum. After updating the Stormwater Checklist and Special Projects Worksheet (see page 3 of this letter), have the consultant review the revised materials, update the memo with the correct references, and ask them to verify that the Impact Analysis is correct.

Action Items – Corrections, Clarifications, and/or Supplemental Information Required

1. Income Verification of Existing Tenants (for determining whether BMR replacement units are required): Two of the seven existing units have tenants who do not have guarantors, and the income information you provided can be used to determine the income level of tenants. Tenants of five of the seven existing units have guarantors, and income information was only provided for the guarantors. One of the guarantors for Unit E lists one of the tenants as a dependent on their 2022 tax return. Without tax returns listing the occupants as dependents on the guarantors' tax returns it is not possible to connect the guarantors to the occupants of four of the existing units and the income of those occupants is unknown. Per Government Code Section 65915(c)(3)(B)(i), since the income of four of the existing households is unknown, Comprehensive Housing

Affordability Strategy (CHAS) data is used to find the proportion of lower income households in the area.

Per the CHAS data, the affordability distribution of four of the seven replacement units shall include two Extremely Low-Income (ELI) units, one Very Low-Income (VLI) Unit, and one Low-Income (LI) Unit.

Summary Level: City **Data for: Berkeley city; California** **Year Selected: 2015-2019 ACS** **Income Distribution Overview**	**Renters**	**% of all renters Perce**	**% of all renters**	**Project units**
Household Income <= 30% HAMFI (Extremely Low)	7,500	0.30	30%	2
Household Income >30% to <=50% HAMFI (Very Low)	3,925	0.16	16%	1
Household Income >50% to <=80% HAMFI (Low-Income)	3,510	0.14	14%	1
Household Income >80% to <=100% HAMFI (Moderate)	1,825	0.07	7%	1
Household Income >100% HAMFI (Above Moderate)	8,345	0.33	33%	2
Total	25,105	1.00	100%	**7**

You have proposed five VLI replacement units. Please revise the applicant statement and AHCP to include the two required ELI units.

2. Bike Parking: Now that you are proposing bike parking, add the proposed and required bike parking to one of the tables on sheet AS-101.
3. Stormwater Checklist and Special Projects Worksheet: Please see the corrections from Vincent Chen, below.
    a. Stormwater Checklist page 6 of 9 needs the flow-based criteria used and the volume-based criteria used since they are using the combination hydraulic sizing approach.

Advisory comments

1. Rent Board Conditions of Approval: Please note the Conditions of Approval the Rent Board is recommending to ZAB to meet the requirements of State law and the prior demolition ordinance (at the end of the Rent Board memo dated January 14, 2025). **The letter from Holland and Knight incorrectly states that the City is applying the current demolition ordinance to the project. The conditions from the Rent Board are taken directly from the prior demolition ordinance. I have attached the prior demolition ordinance. The BMC references in the Rent Board conditions match the prior demolition ordinance, not the current demolition ordinance.**

Advisory comments – Application Processing Review

During the course of review, the project planner may request that the applicant correct, clarify, amplify, or otherwise supplement the details provided in the application according to the Zoning Project Application Submittal Requirements. This may result in revisions to the information provided with your submittal, additional fees for zoning permits, CEQA review costs, and other processes/reviews, as needed based on the City's adopted fee schedule.

Next Steps

Please submit responses to **all** requested items at once, and not incrementally. Be sure to include a written response. Please use this BOX link for your project and email me when you've uploaded. Once revised information is submitted, staff will review the application within 30 days.

Public

If you have any questions about the requested information, please reach out to me directly. Thank you in advance for your cooperation.

Sincerely,

Allison Riemer, AICP
Senior Planner
510-981-7433
ariemer@berkeleyca.gov

Attachment: Previous Demolition Ordinance

Chapter 23.326
DEMOLITION AND DWELLING UNIT CONTROL

Sections:

23.326.010 Chapter Purpose.
23.326.020 General Requirements.
23.326.030 Eliminating Dwelling Units through Demolition.
23.326.040 Eliminating Dwelling Units through Conversion and Change of Use.
23.326.050 Private Right of Action.
23.326.060 Elimination of Residential Hotel Rooms.
23.326.070 Demolitions of Non-Residential Buildings.
23.326.080 Building Relocations.
23.326.090 Limitations.

23.326.010 Chapter Purpose.

This chapter establishes demolition and dwelling unit control standards that promote the affordable housing, aesthetic, and safety goals of the City.

23.326.020 General Requirements.

A. *Applicability.* No dwelling unit or units may be eliminated or demolished except as authorized by this chapter.

B. *Findings.* In addition to the requirements below, the Zoning Adjustments Board (ZAB) may approve a Use Permit to eliminate or demolish a dwelling unit only upon finding that eliminating the dwelling unit would not be materially detrimental to the housing needs and public interest of the affected neighborhood and Berkeley.

23.326.030 Eliminating Dwelling Units through Demolition.

A. *Buildings with Two or More Units Constructed Before June 1980.*

1. *Applicability.* This subsection only applies to building with two or more units constructed before June 1980.

2. *Limitation.*

(a) Demolition is not allowed if:

i. The building was removed from the rental market under the Ellis Act during the preceding five years; or

ii. There have been verified cases of harassment or threatened or actual illegal eviction during the immediately preceding three years.

(b) Where allegations of harassment or threatened or actual illegal eviction are in dispute, either party may request a hearing before a Rent Board Hearing Examiner. The Rent Board Hearing Examiner will provide an assessment of the evidence and all available documentation to the ZAB. The ZAB shall determine whether harassment or threatened or actual illegal eviction occurred.

3. *Findings.* The ZAB may approve a Use Permit to demolish a building constructed before June 1980 on a property containing two or more dwelling units if any of the following are true:

(a) The building containing the units is hazardous or unusable and is infeasible to repair.

(b) The building containing the units will be moved to a different location within Berkeley with no net loss of units and no change in the affordability levels of the units.

(c) The demolition is necessary to permit construction of special housing needs facilities such as, but not limited to, childcare centers and affordable housing developments that serve the greater good of the entire community.

(d) The demolition is necessary to permit construction approved pursuant to this chapter of at least the same number of dwelling units.

4. *Fee Required.*

(a) The applicant shall pay a fee for each unit demolished to mitigate the impact of the loss of affordable housing in Berkeley.

(b) The amount of the fee shall be set by resolution of the City Council.

(c) *In Lieu of a Fee.*

i. In lieu of paying the impact fee, the applicant may provide a designated unit in the new project at a below market rate to a qualifying household in perpetuity.

ii. The affordability level of the below market rent and the income level of the qualifying household shall be set by resolution of the City Council.

iii. The applicant shall enter into a regulatory agreement with the City of Berkeley to provide the in lieu units.

5. *Occupied Units.*

(a) *Applicability.*

i. The requirements in this subsection apply if units to be demolished are occupied.

ii. These requirements do not apply to tenants who move in after the application for demolition is submitted to the City if the owner informs each prospective tenant about the proposed demolition and that demolition constitutes good cause for eviction.

(b) *Notice.* The applicant shall provide all sitting tenants notice of the application to demolish the building no later than the date it is submitted to the City, including notice of their rights under Municipal Code Section 13.76 (Rent Stabilization and Eviction for Good Cause Program).

(c) *General Requirements.*

i. The applicant shall provide assistance with moving expenses equivalent to in Chapter 13.84 (Relocation Services and Payments for Residential Tenant Households).

ii. The applicant shall subsidize the rent differential for a comparable replacement unit, in the same neighborhood if feasible, until new units are ready for occupancy. Funding for the rent differential shall be guaranteed in a manner approved by the City.

iii. *Exception.* An applicant who proposes to construct a 100 percent affordable housing project is not required to comply with this subsection but must comply with the Uniform Relocation Assistance and Real Property Acquisition Policies Act of 1970 as amended and the California Relocation Act (Government Code sections 7260 et seq.).

(d) *Sitting Tenants Rights.*

i. Sitting tenants who are displaced as a result of demolition shall be provided the right of first refusal to move into the new building.

ii. Tenants of units that are demolished shall have the right of first refusal to rent new below-market rate units designated to replace the units that were demolished, at the rent that would have applied if they had remained in place, as long as their tenancy continues.

iii. Income restrictions do not apply to displaced tenants.

iv. *Exception.*

(1) An applicant who proposes to construct a 100 percent affordable housing project is not required to comply with 23.326.030.A.5.a, b, and c, but must comply with the following requirement.

(2) Sitting tenants who are displaced as a result of demolition and who desire to return to the newly constructed building will be granted a right of first refusal subject to their ability to meet income qualifications and other applicable eligibility requirements when the new units are ready for occupancy.

B. *Buildings with a Single Dwelling Unit.*

1. *Applicability.* This subsection only applies to buildings with a single dwelling unit.

2. *Limitation.*

(a) Demolition is not allowed if:

i. The building was removed from the rental market under the Ellis Act during the preceding five years; or

ii. There have been verified cases of harassment or threatened or actual illegal eviction during the immediately preceding three years.

(b) Where allegations of harassment or threatened or actual illegal eviction are in dispute, either party may request a hearing before a Rent Board Hearing Examiner. The Rent Board Hearing Examiner will provide an assessment of the evidence and all available documentation to the ZAB. The ZAB shall determine whether harassment or threatened or actual illegal eviction occurred.

C. *Accessory Buildings.* Notwithstanding anything in Municipal Code Title 23 (Zoning Ordinance) to the contrary, but subject to any applicable requirements in Municipal Code Section 3.24 (Landmarks Preservation Ordinance), accessory buildings of any size, including, but not limited to, garages, carports, and sheds, but not including any structure containing a lawfully established dwelling unit, which serves and is located on the same lot as a lawful residential use, may be demolished by right.

23.326.040 Eliminating Dwelling Units through Conversion and Change of Use.

A. *General.* The ZAB may approve a Use Permit for the elimination of a dwelling unit in combination with another dwelling unit used for occupancy by a single household if it finds that:

1. The existing number of dwelling units exceeds maximum residential density in the district where the building is located; and

2. One of the following is true:

(a) One of the affected dwelling units has been occupied by the applicant's household as its principal place of residence for no less than two years before the date of the application and none of the affected units are currently occupied by a tenant.

(b) All of the affected dwelling units are being sold by an estate and the decedent occupied the units as their principal residence for no less than two years before the date of their death.

B. *Limitations.*

1. Demolition is not allowed if:

(a) The building was removed from the rental market under the Ellis Act during the preceding five years; or

(b) There have been verified cases of harassment or threatened or actual illegal eviction during the immediately preceding three years.

2. Where allegations of harassment or threatened or actual illegal eviction are in dispute, either party may request a hearing before a Rent Board Hearing Examiner. The Rent Board Hearing Examiner will provide an assessment of the evidence and all available documentation to the ZAB. The ZAB shall determine whether harassment or threatened or actual illegal eviction occurred.

C. *Effect of Noncompliance with the Two-Year Requirement.*

1. If a unit eliminated under Subsection A (General) is not occupied by the applicant's household for at least two consecutive years from the date of elimination, the affected unit must be restored to separate status.

2. This requirement shall be implemented by a condition of approval and a notice of limitation on the property, acceptable to the City of Berkeley.

3. The condition and notice will provide that if the owner's household does not occupy the unit for at least two years from the date of elimination the affected units must either be restored as separate dwelling units and the vacant unit(s) offered for rent within six months or the owner must pay a fee of $75,000 in 2013 dollars, adjusted in May of each year according to the Consumer Price Index for the San Francisco Bay Area. The fee shall be deposited into the City of Berkeley's Housing Trust Fund.

4. The City of Berkeley may exempt an applicant from the two-year residency requirement if of an unforeseeable life change that requires relocation.

D. *Effect of Eliminating a Dwelling Unit.*

1. If eliminating a dwelling unit reduces the number of units in a building to four, the applicant shall record a notice of limitation against the subject property that the limitation on eviction of tenants under Chapter 13 (Public Peace, Morals and Welfare) shall continue to apply until:

(a) The building is demolished; or

(b) Sufficient units are added or restored such that the building contains at least five units.

2. The Zoning Officer may issue an AUP for a building conversion which eliminates a dwelling unit upon finding that the conversion will restore or bring the building closer to the original number of dwelling units that was present at the time it was first constructed, provided the conversion meets the requirements 23.326.040.A.1 and 2 and 23.326.040.B and C.

E. *Exceptions.*

1. The ZAB may approve a Use Permit for a change of use to a community care or a child care facility which eliminates a dwelling unit if it finds that such use is in conformance with the regulations of the district in which it is located.

2. The ZAB may approve a Use Permit to eliminate a dwelling unit through combination with another dwelling unit for the purpose of providing private bathrooms, kitchenettes, accessibility upgrades, and/or seismic safety upgrades to single-residential occupancy rooms in residential developments undergoing a publicly-funded rehabilitation.

3. Notwithstanding the general Use Permit requirement under 23.326.020 (General Requirements), a lawfully established accessory dwelling unit that is not a controlled rental unit may be eliminated with a Zoning Certificate if:

(a) The re-conversion restores the original single-family use of the main building or lot; and

(b) No tenant is evicted.

23.326.050 Private Right of Action.

Any affected tenant may bring a private action for injunctive and/or compensatory relief against any applicant and/or owner to prevent or remedy a violation of Sections 23.326.030 (Eliminating Dwelling Units through Demolition) and 23.326.040 (Eliminating Dwelling Units through Conversion and Change of Use). In any such action a prevailing plaintiff may recover reasonable attorney's fees.

23.326.060 Elimination of Residential Hotel Rooms.

A. *General Requirements.* Before removal, the following requirements must be met for the ZAB to approve a Use Permit for the elimination of residential hotel rooms:

1. The residential hotel owner shall provide or cause to be provided standard housing of at least comparable size and quality, at comparable rents and total monthly or weekly charges to each affected tenant.

2. One of the following three requirements shall be met:

(a) The residential hotel rooms being removed are replaced by a common use facility, including, but not limited to, a shared kitchen, lounge, or recreation room, that will be available to and primarily of benefit to the existing residents of the residential hotel and that a majority of existing residents give their consent to the removal of the rooms.

(b) Before the date on which the residential hotel rooms are removed, one-for-one replacement of each room to be removed is made, with a comparable room, in one of the methods set forth in this section.

(c) Residential hotel rooms are removed because of building alterations related to seismic upgrade to the building or to improve access to meet the requirements of the American Disabilities Act (ADA).

B. *Criteria for Replacement Rooms.* For purposes of this section, replacement rooms must be:

1. Substantially comparable in size, location, quality, and amenities;

2. Subject to rent and eviction controls substantially equivalent to those provided by the Rent Stabilization Ordinance or those that applied to the original rooms which are being replaced; and

3. Available at comparable rents and total monthly or weekly charges to those being removed. Comparable rooms may be provided by:

(a) Offering the existing tenants of the affected rooms the right of first refusal to occupy the replacement rooms;

(b) Making available comparable rooms, which are not already classified as residential hotel rooms to replace each of the rooms to be removed; or

(c) Paying to the City of Berkeley's Housing Trust Fund an amount sufficient to provide replacement rooms.

i. The amount to be paid to the City of Berkeley shall be the difference between the replacement cost, including land cost, for the rooms and the amount which the City of Berkeley can obtain by getting a mortgage on the anticipated rents from the newly constructed rooms.

ii. The calculations shall assume that rents in the newly constructed rooms shall not exceed the greater of either a level comparable to the weekly or monthly charges for the replaced rooms or the level which would be charged if no current tenant paid more than 30 percent of such tenant's gross income for rent.

C. *Exception for Non-Profit Ownership.* In a residential hotel owned and operated by a non-profit organization, recognized as tax-exempt by either the Franchise Tax Board and/or the Internal Revenue Service, residential hotel rooms may be changed to non-residential hotel room uses if the average number of residential hotel rooms per day in each calendar year is at least 95 percent of residential hotel rooms established for that particular residential hotel.

23.326.070 Demolitions of Non-Residential Buildings.

A. *Main Non-Residential Buildings.* A main building used for non-residential purposes may be demolished with a Use Permit.

B. *Accessory Buildings.*

1. Demolishing an accessory building with less than 300 square feet of floor area is permitted as of right.

2. An accessory building with 300 square feet or more of floor area may be demolished with an AUP.

C. *Landmarks Preservation Commission Review.*

1. Any application for a Use Permit or AUP to demolish a non-residential building or structure which is 40 or more years old shall be forwarded to the Landmarks Preservation Commission (LPC) for review before consideration of the Use Permit or AUP.

2. The LPC may initiate a landmark or structure-of-merit designation or may choose solely to forward to the ZAB its comments on the application.

3. The ZAB shall consider the recommendations of the LPC in when acting on the application.

D. *Findings.* A Use Permit or an AUP for demolition of a non-residential building or structure may be approved only if the ZAB or the Zoning Officer finds that:

1. The demolition will not be materially detrimental to the commercial needs and public interest of any affected neighborhood or the City of Berkeley; and

2. The demolition:

(a) Is required to allow a proposed new building or other proposed new use;

(b) Will remove a building which is unusable for activities which are compatible with the purposes of the district in which it is located or which is infeasible to modify for such uses;

(c) Will remove a structure which represents an inhabitable attractive nuisance to the public; or

(d) Is required for the furtherance of specific plans or projects sponsored by the City of Berkeley or other local district or authority upon a demonstration that it is infeasible to obtain prior or concurrent approval for the new construction or new use which is contemplated by such specific plans or projects and that adhering to such a requirement would threaten the viability of the plan or project.

23.326.080 Building Relocations.

A. *Treatment of Building Relocation.*

1. Relocating a building from a lot is considered a demolition for purposes of this chapter.

2. Relocating a building to a lot is considered new construction and is subject to all requirements applicable to new construction.

3. When a building is relocated to a different lot within in Berkeley, the lot from which the building is removed shall be known as the source lot and the lot on which the building is to be sited shall be known as the receiving lot. In such cases all notification requirements apply to both the source and receiving lots.

B. *Findings.* The ZAB may approve a Use Permit to relocate a building upon finding that:

1. The building to be relocated is not in conflict with the architectural character, or the building scale of the neighborhood or area to which it will be relocated; and

2. The receiving lot provides adequate separation of buildings, privacy, yards, and usable open space.

23.326.090 Limitations.

A. *Unsafe, Hazard, or Danger.*

1. Notwithstanding anything to the contrary, if a building or structure is unsafe, presents a public hazard, and is not securable and/or is in imminent danger of collapse so as to endanger persons or property, as determined by the city's building official, it may be demolished without a Use Permit.

2. The Building Official's determination in this matter shall be governed by the standards and criteria in the most recent edition of the California Building Code that is in effect in the City of Berkeley.

B. *Ellis Act.* This chapter shall be applied only to the extent permitted by state law as to buildings which have been entirely withdrawn from the rental market pursuant to the Ellis Act (California Government Code Chapter 12.75).

Stormwater Requirements Checklist
Municipal Regional Stormwater Permit (MRP 3)
Stormwater Controls for Development Projects

I. Applicability C.3 Stormwater Requirements

All projects must complete Section I.

I.A. Enter Project Data *(Data for "C.3 Regulated Projects," will be reported in the municipality's stormwater Annual Report.)*

I.A.1 Project Name:			
I.A.2 Project Address (include cross street)			
I.A.3 Project APN(s)			
I.A.4 Project Watershed[1]			
I.A.5 Applicant Name			
I.A.6 Date Submitted			
I.A.7 Applicant Address			
I.A.8 Applicant Phone		I.A.9 Applicant E-mail Address	
I.A.10 Development Type (check all that apply)	☐ Residential ☐ Commercial ☐ Industrial ☐ Mixed-Use ☐ Streets, Roads, etc. ☐ Detached Single Family Home ☐ Redevelopment[2]		
I.A.11 Project Description (Include any past or future phase of the project)			
I.A.12 Total Project Area		I.A.13 % Slope on Site	
I.A.14 Total Land Disturbance Area (Include all areas to be cleared, excavated, graded, and borrow and stockpile areas)			

I.B. Is the project a "C.3 Regulated Project" per MRP Provision C.3.b or a Small Project per MRP Provision C.3.i

I.B.1 Complete the *Impervious and Pervious Surfaces Table*

Type of Impervious Surface[3]	a Pre-Project Impervious Area (sq ft)	b Existing Impervious Area to be Replaced (sq ft[4])	c New Impervious Area to be Created (sq ft)	d Post-Project Pervious Area (sq ft)
a. Impervious roof area(s)[5]				NA
b. Impervious sidewalks, patios, paths, driveways[6]				
c. Uncovered impervious parking[7]				
d. Streets (public)				
e. Streets (private)				
Totals				

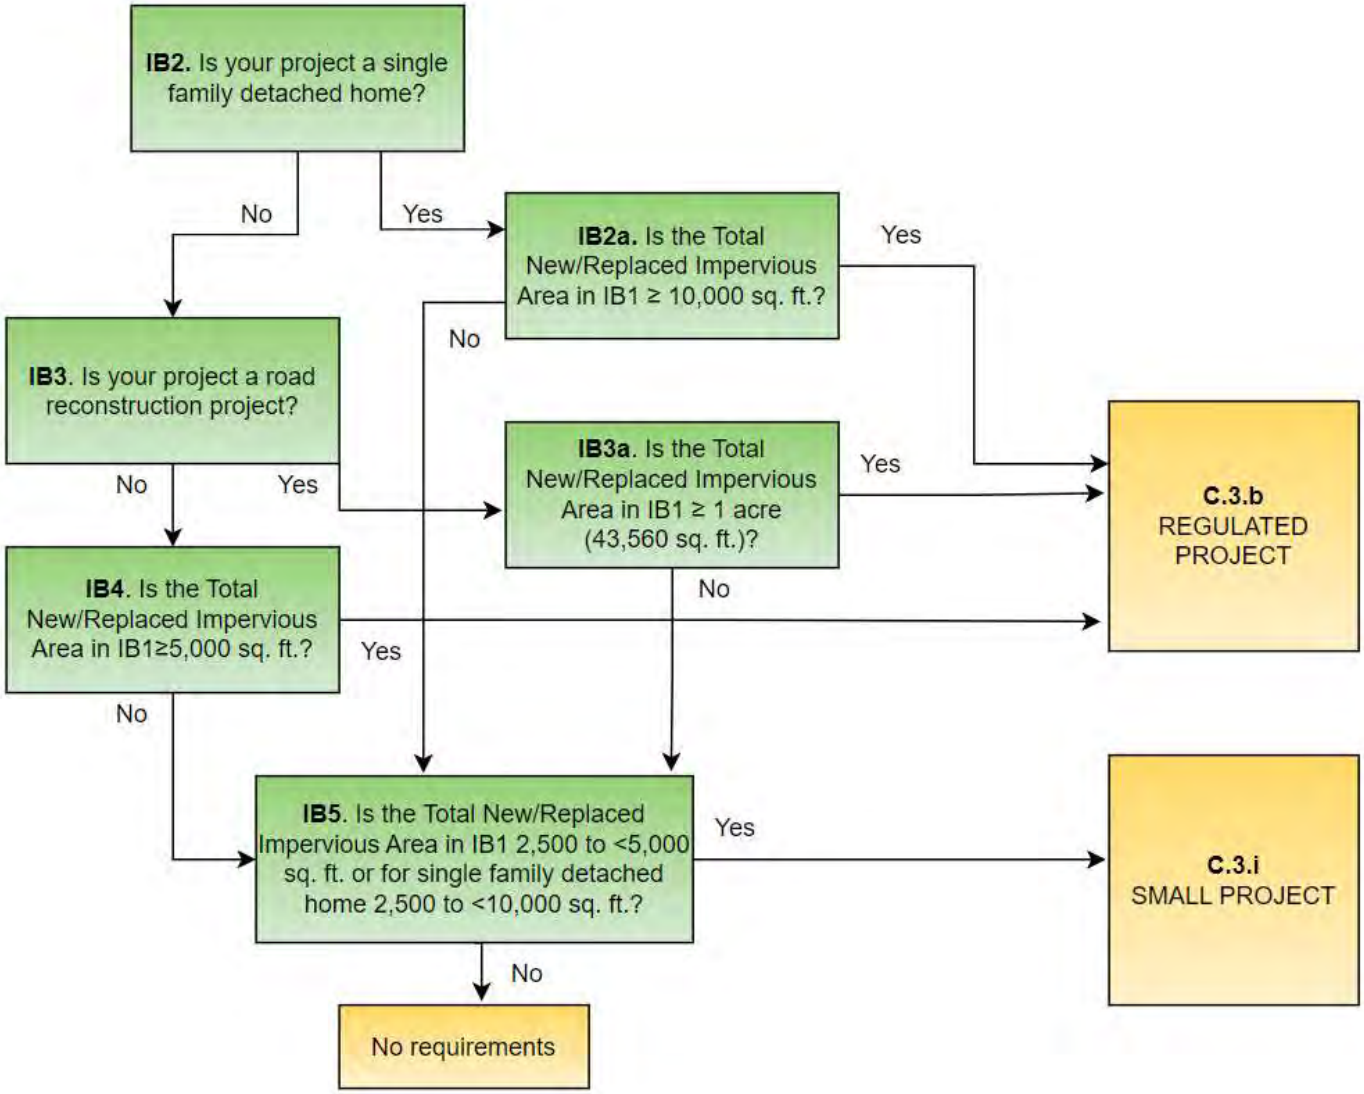
[1] Watershed is defined by the maps from the Alameda County Flood Control District at http://acfloodcontrol.org/resources/explore-watersheds
[2] As defined by MRP: creating, adding and/or replacing exterior existing impervious surface on a site where past development has occurred.
[3] A surface covering or pavement of a developed parcel of land that prevents the land's natural ability to absorb and infiltrate rainfall/stormwater.
[4] Replaced impervious area means any impervious area that is removed and replaced in kind or upgraded. See Chapter 2 of the *C.3 Technical Guidance.*
[5] Exclude green roofs.
[6] A gravel surface is an impervious surface, except when it is constructed as part of appropriately designed pervious pavement system.
[7] Uncovered parking includes top level of a parking structure unless drainage from the uncovered portion is connected to the sanitary sewer along with the covered portions of the parking structure.

Stormwater Requirements Checklist
Municipal Regional Stormwater Permit (MRP 3)
Stormwater Controls for Development Projects

Existing Impervious Area to remain in place		**NA**
Total New/Replaced Impervious Area *(sum columns b and c)*		

I.B. Is the project a "C.3 Regulated Project per MRP Provision C.3.b or a Small Project per MRP Provision C.3.i (cont'd)

	Yes	No	NA
I.B.2 Is your project a single family detached home? If Yes go to I.B.2.a; if NO go to I.B.3	☐	☐	☐
I.B.2.a Is the Total New/Replaced Impervious Area in I.B.1 ≥10,000 sq ft? If YES, your project is a C.3.b Regulated Project. (See I.D). If NO go to I.B.5.	☐	☐	☐
I.B.3 Is your project a road reconstruction project? If YES go to I.B.3.a; if NO go to I.B.4	☐	☐	☐
I.B.3.a Is the Total New/Replaced Impervious Area in I.B.1 ≥1 acre (43,560 sq ft)? If YES, your project is a C.3.b Regulated Project. (See I.D)	☐	☐	☐
I.B.4 Is the Total New/Replaced Impervious Area in I.B.1 ≥5,000 sq ft? If YES, your project is a C.3.b Regulated Project. If NO go to I.B.5	☐	☐	☐
I.B.5 Is the Total New/Replaced Impervious Area in I.B.1 2,500 to <5,000 sq ft or for single family detached home 2,500 to <10,000 sq ft? If Yes, your project is a C.3.i Small Project.	☐	☐	☐



Stormwater Requirements Checklist
Municipal Regional Stormwater Permit (MRP 3)
Stormwater Controls for Development Projects

I.C. Pervious Pavement Systems			
I.C.1 Will your project install 3,000 sq ft or more of pervious pavement systems (not including private-use patios at residences)? If **YES, stormwater treatment system inspection requirements (C.3.h) apply.** (Municipal staff – add this site to your list of sites needing a final inspection at the end of construction and on-going O&M inspections.)	☐	☐	☐
I.D. Projects not regulated by C.3 If your project is not regulated by C.3.b or C.3.i you are not subject to stormwater treatment requirements, however you are encouraged to incorporate site design and source control measures. The municipality may determine that source controls and site design measures are required for your project, if so, you must complete Section II and if required by the municipality, complete Sections III.A and III.B.			
I.E. C.3.i Small Projects If your project is regulated by C.3.i you are considered a "Small Project" and must implement site design (See III.A) and source control requirements (See III.B). You are not required to implement stormwater treatment requirements. You must complete Sections II, III.A, and III.B.			
I.F. C.3.b Regulated Projects If your project is a C.3.b regulated project, the project must include appropriate site design measures and source controls AND hydraulically-sized stormwater treatment measures. Hydromodification management may also be required. Complete Sections II, III, and V.			
II. Applicability C.6 Stormwater Requirements *All projects must complete Section II.*			
	Yes	No	
II.A Does the project disturb one acre or more of land? If YES you are required to obtain coverage under the State Construction Stormwater Permit, see https://www.waterboards.ca.gov/water_issues/programs/stormwater/construction.html. You must submit your WDID number and Stormwater Pollution Prevention Plan to the municipality before a building or grading permit will be issued. You do not need to complete Section IV.	☐	☐	
II.B Does the project disturb less than one acre of land? If NO, you are subject to MRP C.6 requirements. Complete Section IV to identify best management practices (BMPs) that will be in the erosion control plan and implemented during construction.	☐	☐	
II.C. Priority Inspection Factors	☐	☐	
II.C.1 Is the project 1 acre or more?	☐	☐	
II.C.2 Does the project require a grading permit?	☐	☐	
II.C.3 Is the project adjacent to a creek or waterway?	☐	☐	
II.C.4 Is the project in a municipally defined hillside development area or meet local hillside criteria?	☐	☐	
II.C.5 Does the project site have a slope of >15% and disturb ≥ 5,000 sq ft?	☐	☐	
II.C.6 Does the project involve demolition of a structure subject to the PCBs Building Demolition requirements? If yes the completion of the PCBs Building Material Demolition is required.	☐	☐	
(Municipal staff – refer projects answering YES to any questions in section II.C to construction site inspection staff to be added to their list of projects that require stormwater inspections at least monthly during the wet season (October 1 through April 30) and other times of the year as appropriate.)			

III. Implementation of C.3 Stormwater Requirements

C.3.b Regulated Projects must complete all of Section III.
C.3.i Small Projects must complete Sections III.A and III.B
Projects not regulated by C.3 must complete Sections III.A and III.B if directed by the municipality.

III.A Select Appropriate Site Design Measures

C.3.b Regulated Projects must implement appropriate and feasible site design measures.
C.3.i Small Projects must implement at least one of site design measures listed in items a-f.
Projects not regulated by C.3 are encouraged to implement appropriate site design measures and those directed by the municipality.

Site Design Measure	Plan Sheet #	Yes	No
a. Direct roof runoff into cisterns or rain barrels and use rainwater for irrigation or other non-potable use.		☐	☐
b. Direct roof runoff onto vegetated areas.		☐	☐
c. Direct runoff from sidewalks, walkways, and/or patios onto vegetated areas.		☐	☐
d. Direct runoff from driveways and/or uncovered parking lots onto vegetated areas.		☐	☐
e. Construct sidewalks, walkways, and/or patios with pervious pavement systems.[8]		☐	☐
f. Construct bike lanes, driveways, and/or uncovered parking lots with pervious pavement systems.[8]		☐	☐
g. Minimize land disturbance and impervious surface (especially parking lots).		☐	☐
h. Maximize permeability by clustering development and preserving open space.		☐	☐
i. Use micro-detention, including distributed landscape-based detention.		☐	☐
j. Protect sensitive areas, including wetland and riparian areas, and minimize changes to the natural topography.		☐	☐
k. Self-treating area (see Chapter 5 of the *C.3 Technical Guidance*)		☐	☐
l. Self-retaining area (see Chapter 5 of the *C.3 Technical Guidance*)		☐	☐

III.B Select Appropriate Source Control Measures

C.3.b Regulated Projects must select and implement appropriate source control measures.
C.3.i Small Projects and projects not regulated by C.3 are encouraged to select and implement appropriate source control measures and those directed by the municipality.

Features in the project?		Features requiring source controls	Source control measures (Refer to Local Source Control List for detailed requirements)	Measure included in project plans?		
Yes	No			Yes	NO	Plan Sheet #
☐	☐	Storm Drain	Mark on-site inlets with the words “No Dumping! Flows to Bay” or equivalent.	☐	☐	
☐	☐	Floor Drains	Plumb interior floor drains to sanitary sewer[9] [or prohibit].	☐	☐	
☐	☐	Parking garage	Plumb interior parking garage floor drains to sanitary sewer.[9]	☐	☐	
☐	☐	Landscaping	▪ Retain existing vegetation as practicable. ▪ Select diverse species appropriate to the site. Include plants that are pest- and/or disease-resistant, drought-tolerant, and/or attract beneficial insects. ▪ Minimize use of pesticides and quick-release fertilizers. ▪ Use efficient irrigation system; design to minimize runoff.	☐	☐	
☐	☐	Pool/Spa/ Fountain	Provide connection to the sanitary sewer to facilitate draining.[9]	☐	☐	
☐	☐	Food Service Equipment (non-residential)	Provide sink or other area for equipment cleaning, which is: ▪ Connected to a grease interceptor prior to sanitary sewer discharge.[9] ▪ Large enough for the largest mat or piece of equipment to be cleaned. ▪ Indoors or in an outdoor roofed area designed to prevent stormwater run-on and run-off and signed to require equipment washing in this area.	☐	☐	

[8] Use the specifications in the *C.3 Technical Guidance* or for small projects see the *BASMAA Pervious Paving Factsheet*. For these documents and others go to www.cleanwaterprogram.org and click on “Resources.”
[9] Any connection to the sanitary sewer system is subject to sanitary district approval.

Stormwater Requirements Checklist
Municipal Regional Stormwater Permit (MRP 3)
Stormwater Controls for Development Projects

Features in the project?		Features requiring source controls	Source control measures (Refer to Local Source Control List for detailed requirements)	Measure included in project plans?		
Yes	No			Yes	NO	Plan Sheet #
☐	☐	Refuse Areas	▪ Provide a roofed and enclosed area for dumpsters, recycling containers, etc., designed to prevent stormwater run-on and runoff. ▪ Connect any drains in or beneath dumpsters, compactors, and tallow bin areas serving food service facilities to the sanitary sewer.[9]	☐	☐	
☐	☐	Outdoor Process Activities [10]	Perform process activities either indoors or in roofed outdoor area, designed to prevent stormwater run-on and runoff, and to drain to the sanitary sewer.[9]	☐	☐	
☐	☐	Outdoor Equipment/ Materials Storage	▪ Cover the area or design to avoid pollutant contact with stormwater runoff. ▪ Locate area only on paved and contained areas. ▪ Roof storage areas that will contain non-hazardous liquids, drain to sanitary sewer[9], and contain by berms or similar.	☐	☐	
☐	☐	Vehicle/ Equipment Cleaning	▪ Roofed, pave and berm wash area to prevent stormwater run-on and runoff, plumb to the sanitary sewer,[9] and sign as a designated wash area. ▪ Commercial car wash facilities shall discharge to the sanitary sewer.[9]	☐	☐	
☐	☐	Vehicle/ Equipment Repair and Maintenance	▪ Designate repair/maintenance area indoors, or an outdoors area designed to prevent stormwater run-on and runoff and provide secondary containment. Do not install drains in the secondary containment areas. ▪ No floor drains unless pretreated prior to discharge to the sanitary sewer. [9] ▪ Connect containers or sinks used for parts cleaning to the sanitary sewer. [9]	☐	☐	
☐	☐	Fuel Dispensing Areas	▪ Fueling areas shall have impermeable surface that is a) minimally graded to prevent ponding and b) separated from the rest of the site by a grade break. ▪ Canopy shall extend at least 10 ft in each direction from each pump and drain away from fueling area.	☐	☐	
☐	☐	Loading Docks	▪ Cover and/or grade to minimize run-on to and runoff from the loading area. ▪ Position downspouts to direct stormwater away from the loading area. ▪ Drain water from loading dock areas to the sanitary sewer.[9] ▪ Install door skirts between the trailers and the building.	☐	☐	
☐	☐	Fire Sprinklers	Design for discharge of fire sprinkler test water to landscape or sanitary sewer.[9]	☐	☐	
☐	☐	Miscellaneous Drain or Wash Water	▪ Drain condensate of air conditioning units to landscaping. Large air conditioning units may connect to the sanitary sewer.[9] ▪ Roof drains shall drain to unpaved area where practicable. ▪ Drain boiler drain lines, roof top equipment, all wash water to sanitary sewer. [9]	☐	☐	
☐	☐	Architectural Copper	Discharge rinse water to sanitary sewer [9] or collect and dispose properly offsite. See flyer *Requirements for Architectural Copper*.	☐	☐	

[10] Businesses that may have outdoor process activities/equipment include machine shops, auto repair, industries with pretreatment facilities.

Stormwater Requirements Checklist
Municipal Regional Stormwater Permit (MRP 3)
Stormwater Controls for Development Projects

III.C Stormwater Treatment Measures

C.3.b Regulated Projects must select and implement stormwater treatment measures to manage the C.3.d numeric sizing criteria. Complete the applicable sections below.

Yes	No	
☐	☐	**III.C.1 Is the project a Special Project?** (See Appendix J of the *C.3 Technical Guidance* for Special Project criteria.) If YES, complete the Special Projects Worksheet and consult with municipal staff about the need to prepare a discussion of the feasibility and infeasibility of 100% LID treatment. Indicate the type of non-LID treatment to be used, the hydraulic sizing method*, and percentage of the amount of runoff specified in Provision C.3.d that is treated.

Non-LID Treatment	Hydraulic Sizing Method (See Note 1)	% of C.3. Amount of Runoff Treated
☐ Media filter		
☐ Tree well filter		

Yes	No	
☐	☐	**III.C.2 Is the project using biotreatment to treat the C.3.d amount of runoff?** (See the *C.3 Technical Guidance* for information on infiltration and rainwater harvesting[11] and use of stormwater.) If YES, indicate the biotreatment measures to be used, and the hydraulic sizing method:

Biotreatment Measures	Hydraulic sizing method (See Note 1)
☐ Bioretention area	
☐ Flow-through planter	
☐ Other (specify):	

Note 1. Indicate which of the following Provision C.3.d.i hydraulic sizing methods were used:

1. Volume based approaches – Refer to Provision C.3.d.i.(1):
   1(a) Urban Runoff Quality Management approach, or
   1(b) 80% capture approach (recommended volume-based approach).
2. Flow-based approaches – Refer to Provision C.3.d.i.(2):
   2(a) 10% of 50-year peak flow approach,
   2(b) Percentile rainfall intensity approach, or
   2(c) 0.2-Inch-per-hour intensity approach (this is recommended flow-based approach AND the basis for the 4% rule of thumb described in Section 7.1 of the C.3 Technical Guidance).
3. Combination hydraulic sizing approach -- Refer to Provision C.3.d.i.(3):
   If a combination flow and volume design basis was used, indicate which flow-based and volume-based criteria were used.

III.D Hydromodification Management (HM) Requirements

C.3.b Regulated Projects must complete this section

	YES	NO
III.D.1 Does the project create and/or replace 1 acre (43,560 sq. ft.) or more of impervious area? If YES continue to item III.D.2. If NO, this project is not subject to the HM requirements.	☐	☐
III.D.2 Is the total impervious area increased from the pre-project condition? If YES continue to item III.D.3. If NO, this project is not subject to the HM requirements.	☐	☐
III.D.3 Is the site located in a tidally influenced/depositional area, or in the extreme eastern portion of the county that is not subject to HM requirements? (See HMP Susceptibility Map.) If NO continue to III.D.4. If YES the project is exempt from HM requirements. Attach map indicating project location. Skip to III.D.6 and check "NO".	☐	☐
III.D.4 Is the site located in a high slope zone or special consideration watershed, as shown on the HMP Susceptibility Map? If YES Project is subject to HM requirements. Attach map indicating project location. Skip to III.D.6 and check "YES.". If NO, continue to III.D.5.	☐	☐
III.D.5 For sites located in a white area on the HMP Susceptibility Map, has an engineer or qualified environmental professional determined that runoff from the project flows only through a hardened channel or enclosed pipe along its entire length before emptying into a waterway in the exempt area?	☐	☐

[11] The MRP no longer requires that a feasibility analysis of infiltration and rainwater harvesting be conducted. However, applicants using biotreatment are encouraged to maximize infiltration of stormwater if site conditions allow. If feasible and desired, infiltration and rainwater harvesting may be cost effective solutions depending on the project.

If YES, the project is exempt from HM requirements. Attach signed statement by qualified professional. Go to III.D.6 and check "NO." If NO, the project is subject to HM requirements. Attach map indicating project location. Go to Item G.6 and check "YES."	☐	☐

III.D.6 Is the project a Hydromodification Management Project?

☐ YES the project is subject to the *HM requirements in MRP Provision C.3.g.*

☐ NO, the project is not subject to the HM requirements.

- If the project is subject to the HM requirements, incorporate in the project flow duration stormwater control measures designed such that post-project stormwater discharge rates and durations match pre-project discharge rates and durations. The Bay Area Hydrology Model (BAHM) has been developed to size flow duration controls. See https://www.clearcreeksolutions.info/bahm-download-page. Guidance is provided the *C.3 Technical Guidance*.

IV. Implementation of C.6 Construction Phase Requirements

All projects must complete Section IV.

IV.A Select Appropriate Construction Phase BMPs[12]

BMP	Plan Sheet #	Yes	No
Attach the municipality's construction BMP plan sheet to project plans and require contractor to implement the applicable BMPs on the plan sheet.		☐	☐
Implement temporary erosion controls to stabilize all disturbed areas until permanent erosion controls are established.		☐	☐
Delineate with field markers clearing limits, easements, setbacks, sensitive or critical areas, buffer zones, trees, and drainage courses.		☐	☐
Provide notes, specifications, or attachments describing: ▪ Construction, operation and maintenance of erosion and sediment controls, include inspection frequency; ▪ Methods and schedule for grading, excavation, filling, clearing of vegetation, and storage and disposal of excavated or cleared material; ▪ Specifications for vegetative cover and mulch, include methods and schedules for planting and fertilization; ▪ Provisions for temporary and/or permanent irrigation.		☐	☐
Perform clearing and earth moving activities only during dry weather.		☐	☐
Use sediment controls or filtration to remove sediment when dewatering and obtain all necessary permits.		☐	☐
Protect all storm drain inlets in vicinity of site using drop inlet protection		☐	☐
Trap sediment on-site, using BMPs such as sediment basins or traps, earthen dikes or berms, silt fences, check dams, erosion control blankets, covers for soil stock piles, etc.		☐	☐
Divert on-site runoff around disturbed areas and construction materials; divert off-site runoff around the site (e.g., swales and dikes).		☐	☐
Protect adjacent properties and undisturbed areas from construction impacts using vegetative buffer strips, sediment barriers or filters, dikes, mulching, or other measures as appropriate.		☐	☐
No cleaning, fueling, or maintaining vehicles on-site, except in a designated area where wash water is contained for proper management and spill controls are in place.		☐	☐
Store, handle, and dispose of construction materials/wastes properly to prevent contact with stormwater.		☐	☐
Contractor shall train and provide instruction to all employees/subcontractors re: construction BMPs.		☐	☐
Control and prevent the discharge of all potential pollutants, including pavement cutting wastes, paints, concrete, petroleum products, chemicals, wash water or sediments, rinse water from architectural copper, and non-stormwater discharges to storm drains and watercourses.		☐	☐

[12] Additional information on Construction Phase BMPs can be found is MRP Provision C.6 and the California Stormwater Quality Association's Construction BMP Handbook.

V. Stormwater Treatment Measure and/HM Control Owner or Operator's Information *C.3.b Regulated Projects must complete Section V.*	
Name	Nhan Nguyen Le
Address	2425 Channing Way Ste. B, PMB #820 Berkeley, CA 94705
Phone	916-224-3715
Email	nhan@valiancecap.com
➢ *Applicant must call for inspection and receive inspection within 45 days of installation of treatment measures and/or hydromodification management controls.*	
Name of Applicant Completing Form

MEMORANDUM

DATE: May 27, 2025

TO: Austin Springer, AIA, Studio KDA

FROM: Pam Reading, Principal Environmental Planner, LSA
Ashley Honer, Environmental Planner, LSA

SUBJECT: Hydrology and Water Quality Technical Memorandum for the Proposed 2298 Durant Avenue Residential Project (APNs 055-1887-001 and 055-1887-002) in Berkeley, Alameda County, California

INTRODUCTION

This Hydrology and Water Quality Technical Memorandum (technical memorandum) has been prepared for the proposed 2298 Durant Avenue Residential Project (project) in Berkeley, Alameda County, California. The research and analysis contained within this technical memorandum were used to determine the existing conditions at the project site, identify applicable regulatory requirements applicable to the project, and provide a preliminary impact analysis of the project related to hydrology and water quality.

The 0.28-acre project site (Assessor's Parcel Numbers [APNs] 055-1887-001 and 055-1887-002) is located at 2298 Durant Avenue and 2360 Ellsworth Street in Berkeley, California. The regional vicinity of the project site and the project location are shown in **Figure 1**. The project site is currently developed with two existing buildings including a 2,380 square-foot (sf), 2-story commercial building with an associated surface parking lot and a 2,849 sf, 3-story residential building over a 1-story partially subterranean parking garage.

The project site is bordered by Durant Avenue to the north (beyond which are residential, medical, and institutional uses), Ellsworth Street to the east (beyond which are residential and medical uses), residential and medical uses to the south, and residential uses to west. Additional residential medical, institutional, and commercial uses are located in the immediate surrounding vicinity.

The proposed project would merge the two existing lots into one contiguous lot and demolish the existing 2,380 sf and 2,849 sf buildings and parking lot to construct an 80,046 sf, eight-story residential building consisting of 65 dwelling units. Five units would be below market rate. Additionally, the proposed project would include a lobby, 4,372 sf of amenity space, a balcony on the 4th floor, a roof deck on the 8th floor, and landscaping.

Construction would include demolition, site preparation, grading, building construction, paving, and architectural coating activities.

2298 Durant Avenue Project
Project Location

GENERAL CONDITIONS

Existing Drainage Conditions and Facilities

The project site is fully developed and is located in an urbanized area of Berkeley. Under existing conditions, stormwater collected at the project site sheet flows into the existing stormwater infrastructure located along Durant Avenue and Ellsworth Street,[1] which flows into the larger Potter Watershed storm drain network, which discharges into San Francisco Bay at the terminus of Potter Street through a 9-foot-diameter, egg-shaped trunkline.[2]

Surface Waters and Surface Water Quality

Berkeley is located on the eastern shoreline of the San Francisco Bay and extends east to the ridgelines of the East Bay Hills. In general, the physiography of the Berkeley watersheds reflects their general alignment in relation to the primary geologic structures. The watersheds in Berkeley typically drain to the west out of the steeper headwaters (Berkeley Hills), across a transitional alluvial fan zone, and then across the more gently sloping San Francisco Bay plain before discharging into San Francisco Bay.[3]

Berkeley is generally characterized as having a Mediterranean climate with moist, mild winters and hot, dry summers. More than 90 percent of precipitation falls between November and April, with an annual rainfall amount of about 18 to 26 inches. Areas of higher elevation receive higher rainfall annually due to the rain-shadow effects of the Berkeley Hills.[4] Because Berkeley is predominantly urban and developed, precipitation falling on impervious surfaces is directed to storm drains that flow to San Francisco Bay.

The proposed project is in the Potter/Derby Creek Watershed, as shown in **Figure 2**, and situated within the San Francisco Bay Regional Water Quality Control Board's (RWQCB) jurisdiction. According to the City of Berkeley's (City) Watershed Management Plan, the Potter/Derby Creek Watershed, which is the largest watershed in the City, has a total Drainage Area of 2,693 acres and receives annual precipitation of 22 inches.[5] The Potter/Derby Creek Watershed includes Potter Creek, Derby Creek, and several unnamed tributaries. Both Potter Creek and Derby Creek have been replaced by underground pipelines and culverts as part of the City's storm drainage system. The stream channels of these creeks and the tributaries have been almost entirely converted to man-made drainage structures. The Potter/Derby Creek Watershed drains to the Potter Watershed storm drain network,[6] which discharges into San Francisco Bay at the terminus of Potter Street through a 9-foot-diameter, egg-shaped trunkline.[7]

2298 Durant Avenue Project

City of Berkeley Watersheds

Receiving waters for stormwater from the project site include Central San Francisco Bay. As detailed in the most recent United States Environmental Protection Agency (EPA) approved 303(d) list (2024), Central San Francisco Bay is listed as an impaired water body for several pollutants including pesticides (e.g., chlordane, dichlorodiphenyltrichloroethane [DDT], and dieldrin), trash, metals (e.g., selenium and mercury), toxic organics (e.g., chlorinated biphenyls [PCBs], dioxin compounds including 2-, 3-, 7-, 8-tetrachloro-dibenzodioxin [TCDD], and furan compounds), and invasive species.[8]

Groundwater Basin and Groundwater Quality

Berkeley and the project site are within the boundary of the Santa Clara Valley Groundwater Basin, East Bay Plain (EBP) Subbasin. The EBP Subbasin is a northwest trending alluvial plain bounded on the north by San Pablo Bay, on the east by the contact with Franciscan Basement rock, and on the south by the Niles Cone Groundwater Basin. The EBP Basin extends beneath San Francisco Bay to the west.[9] The groundwater basin and subbasin underlying the project site are shown in **Figure 3**. The EBP Subbasin is listed in the Water Quality Control Plan for the San Francisco Bay Basin (Basin Plan) as providing the following beneficial uses: municipal and domestic water supply, industrial process water supply, industrial service water supply, and agricultural water supply.[10]

The surface area of the EBP Subbasin is approximately 77,800 acres or 122 square miles, with an average annual rainfall over the subbasin ranging from 17 inches in the southeast to greater than 25 inches along the eastern boundary. Numerous creeks including San Pablo Creek, Wildcat Creek, San Leandro Creek, and San Lorenzo Creek flow from the western slope of the Coast Ranges westward across the plain and into the San Francisco and San Pablo Bays.[11]

The geologic history of the EBP Subbasin involves the rise and fall of sea level over the past 800,000 years, which resulted in deposits of different types of sediments/soils from streams (e.g., clay, sand, and gravel), wind (e.g., sand dunes), and the San Francisco Bay (e.g., Bay Mud and silt). These sediments/soils were laid down in different places at different times, thereby resulting in alternating sequences of clay, silt, sand, and gravel within each aquifer zone. Aquitard[12] layers consisting primarily of fine-grain materials (clay and silt) separate aquifer zones.

2298 Durant Avenue Project
Groundwater Basin and Subbasin

This depositional history resulted in more coarse-grained material (sand and gravel) in the Deep Aquifer Zone in the southern EBP Subbasin compared to shallower zones in the northern EBP Subbasin, which includes Berkeley and the project site. Based on recharge mechanisms, soil types, and surface geologic data groundwater recharge has the potential to occur throughout the EBP Subbasin.[13]

The EBP Subbasin is not experiencing a chronic lowering of groundwater levels and is currently in a sustainable and stable condition because estimated groundwater pumping from the 1990s to the present is well below the estimated sustainable yield of the EBP Subbasin. Since the 1950s, water levels in the deep (more than 500 feet) aquifer in the EBP Subbasin have varied between 10 and 140 feet below mean sea level (msl). Shallower aquifers have a much less pronounced water level fluctuation. Since 1950, the historical low water level for aquifers at a depth of about 250 feet below ground surface (bgs) has been about 30 feet below msl. Water levels rose about 5 feet per year between 1965 and 1980. Water levels have been rising continuously since then but at a slower rate. As of 2000, water levels are very near surface levels in all aquifers.[14] According to the Groundwater Sustainability Plan (GSP), groundwater pumping is much lower today (3,600 acre-feet [AF]) than in the 1960s (greater than 20,000 AF), groundwater levels are stable and the EBP Subbasin is sustainable. Further, the EBP Subbasin groundwater sustainability agencies are not aware of any residents who are solely or primarily dependent on groundwater for drinking water supplies.

Based on an analysis of 357 well logs, the California Department of Water Resources (DWR) calculated a total storage capacity in the subbasin of 2,670,000 AF. Based on 1993 groundwater elevations, DWR calculated the available storage to a depth of 1,000 below msl is about 2,500,000 AF. However, due to concern over potential adverse impacts such as seawater intrusion, based on 1993 groundwater elevations, DWR calculated the available storage was about 80,000 AF. The EBP Subbasin has not experienced significant seawater intrusion even during historical periods of much greater groundwater pumping than is taking place today, and the EBP Subbasin has no observed inelastic land subsidence even during historical periods of much greater groundwater pumping and much lower confined aquifer groundwater elevations than are taking place today. [15]

The Sustainable Groundwater Management Act (SGMA) of 2014 is a comprehensive three-bill package that Governor Jerry Brown signed into California State law in September 2014. The SGMA provides a framework for sustainable management of groundwater supplies by local authorities, with a limited role for State intervention if necessary to protect the resource. The plan is intended to ensure a reliable groundwater supply for California for years to come. The SGMA requires governments and water agencies of high- and medium-priority basins to halt overdrafts of groundwater basins as well as the formation of local groundwater sustainability agencies (GSAs) that are required to adopt Groundwater Sustainability Plans (GSP) to manage the sustainability of the

15 EBMUD GSA and City of Hayward GSA. 2022. East Bay Plan Subbasin, Groundwater Sustainability Plan. January.

groundwater basins. The DWR is charged with classifying groundwater basins in California as either high, medium, low, or very low priority. The DWR classifies the EBP Subbasin as a medium-priority basin.[16]

Pursuant to the SGMA, a GSP has been prepared by the East Bay Municipal District (EBMUD) and City of Hayward GSAs for the EBP Subbasin.[17] In January 2022, the EBMUD and City of Hayward GSAs adopted the EBP Subbasin GSP, which provides the basin setting, the quantitative methods for evaluating the health and sustainability of the subbasin, the monitoring networks, projects and management actions to achieve sustainability, and the implementation plan for the GSP.

Floodplains

According to Federal Emergency Management Agency (FEMA) Flood Insurance Rate Map (FIRM) No. 06001C0057G (effective August 3, 2009), the project site is located within Zone X, area of minimal flood hazard.[18]

Soils/Erosion Potential

The soils on the project site consist entirely of Urban land-Tierra complex, 2 to 5 percent slopes (150).[19] The Urban land-Tierra complex consists of 50 percent Tierra and similar soils, 40 percent urban land, and 10 percent minor components. The Tierra soil series consists of deep, moderately well-drained soils that formed in alluvial materials from sedimentary rocks. The Tierra soil series is characterized as being moderately well drained, having slow to rapid runoff, and very slow permeability.[20]

Regulatory Setting

Federal Regulations

Clean Water Act. In 1972, Congress amended the Federal Water Pollution Control Act, making the addition of pollutants to the waters of the United States from any point source unlawful unless the discharge is in compliance with a National Pollution Discharge Elimination System (NPDES) permit. Known today as the Clean Water Act (CWA), Congress has amended it several times. In the 1987 amendments, Congress directed dischargers of stormwater from municipal and industrial/ construction point sources to comply with the NPDES permit program. Important CWA sections are:

- Sections 303 and 304 require states to promulgate water quality standards, criteria, and guidelines.

Water quality standards consist of designated beneficial uses for a particular waterbody (e.g., wildlife habitat, agricultural supply, fishing), along with water quality criteria necessary to support those uses. Water quality criteria are set concentrations or levels of constituents (e.g., lead, suspended sediment, and fecal coliform bacteria) or narrative statements that represent the quality of water that support a particular use. Because California has not established a complete list of acceptable water quality criteria for toxic pollutants, the EPA Region IX established numeric water quality criteria for toxic constituents in the form of the California Toxics Rule (CTR).

When designated beneficial uses of a particular waterbody are being compromised by water quality, Section 303(d) of the CWA requires identifying and listing that waterbody as impaired.

The State Water Resources Control Board (SWRCB), in compliance with Section 303(d) of the CWA, prepares a list of impaired and threatened waters (e.g., stream/river segments, lakes). States are required to submit their list for EPA approval every two years. For each water on the list, the state identifies the pollutant causing the impairment, when known. In addition, the state assigns a priority for development of total maximum daily loads (TMDL) based on the severity of the pollution and the sensitivity of the uses for which the waters are being used, among other factors. A TMDL is an estimate of the total load of pollutants from point, nonpoint, and natural sources that a waterbody may receive without exceeding applicable water quality standards (often with a "factor of safety" included, which limits the total load of pollutants to a level well below that which could cause the standard to be exceeded). Once established, the TMDL is allocated among current and future dischargers into the waterbody.

In general, once a water body has been added to a state's list of impaired waters, it stays there until the state develops a TMDL and EPA approves it. EPA reporting guidance provides a way to keep track of a state's waterbodies, from listing as impaired to meeting water quality standards. This tracking system contains a running account of all of a state's waterbodies and categorizes each based on the attainment status. The SWRCB adopted the 2020/2022 California Integrated Report (CWA Section 303(d) List/305(b) Report) on January 19, 2022, and the EPA approved the list on May 11, 2022.

- Section 401 Certification requires an applicant for a federal license or permit to conduct any activity that may result in a discharge to waters of the United States to obtain certification from the state that the discharge will comply with other provisions of the act. (This is most frequently required in tandem with a Section 404 permit request and is discussed further below.)

- Section 402 establishes the NPDES, a permitting system for the discharges (except for dredge or fill material) of any pollutant into waters of the United States. Direct discharges of pollutants into waters of the United States are not allowed except in accordance with the NPDES program established in Section 402 of the CWA. The EPA delegated the implementation and administration of the NPDES program to the California SWRCB. The SWRCB established nine RWQCBs. The SWRCB enacts and enforces the federal NPDES program and all water quality programs and regulations that cross regional boundaries. The nine RWQCBs enact, administer,

and enforce all programs, including NPDES permitting, within their jurisdictional boundaries. Section 402(p) requires permits for discharges of stormwater from industrial, construction, and Municipal Separate Storm Sewer Systems (MS4s).

- Section 404 establishes a permit program for the discharge of dredge or fill material into waters of the United States including wetlands. This permit program is administered by the United States Army Corps of Engineers.

The objective of the CWA is "to restore and maintain the chemical, physical, and biological integrity of the Nation's waters."

National Flood Insurance Act. Congress acted to reduce the costs of disaster relief by passing the National Flood Insurance Act of 1968 and the Flood Disaster Protection Act of 1973. The intent of these acts was to reduce the need for large, publicly funded flood control structures and disaster relief efforts by restricting development in floodplains. FEMA administers the National Flood Insurance Program (NFIP), which provides flood insurance, floodplain management, and flood hazard mapping. Communities subject to flood hazards voluntarily participate in the NFIP by adopting and enforcing floodplain management ordinances to reduce the potential for flood damage. In turn, the NFIP offers federally funded flood insurance to homeowners, renters, and business owners in participating communities. Under this program, FEMA produces Flood Insurance Rate Maps (FIRM) that identify properties and buildings in flood insurance risk areas. Flood hazards related to storm events are generally described in terms of 100- or 500-year floods. These are floods that, respectively, have 1 percent and 0.2 percent chance of occurring every year.

If a proposed project would affect the hydrologic or hydraulic characteristics of a flooding source and result in the modification of an existing regulatory floodway, the effective Base Flood Elevations, or the Special Flood Hazard Area, FEMA may comment on the project in the form of a Conditional Letter of Map Revision. The letter does not revise an effective NFIP map but indicates whether the project, if built as proposed, would be recognized by FEMA. FEMA will issue a Letter of Map Revision to officially revise the current NFIP map to show changes to floodplains, regulatory floodways, or flood elevations. Because a Letter of Map Revision officially revises the effective FIRM, the flood hazard updates shown are used to rate flood insurance policies and enforce flood insurance and development requirements.

The City manages local storm drain facilities, and the Alameda County Flood Control District is responsible for regional flood control planning within Alameda County.

State Laws and Regulations

Porter-Cologne Water Quality Control Act of 1970. California's Porter-Cologne Water Quality Control Act (Porter-Cologne Act), enacted in 1969, provides the legal basis for water quality regulation within California. The Porter-Cologne Act requires a "Report of Waste Discharge" for any discharge of waste (liquid, solid, or gaseous) to land or surface waters that may impair beneficial uses for surface and/or groundwater of the State. It predates the CWA and regulates discharges to waters of the State. Waters of the State include more than just waters of the United States (e.g., groundwater is not considered waters of the United States). Additionally, it prohibits discharges of

"waste" as defined, and this definition is broader than the CWA definition of "pollutant." Discharges under the Porter-Cologne Act are permitted by Waste Discharge Requirements (WDRs) and may be required even when the discharge is already permitted or exempt under the CWA.

The SWRCB and RWQCBs are responsible for establishing the water quality standards as required by the CWA and regulating discharges to protect beneficial uses of water bodies. Details regarding water quality standards in a project area are contained in the applicable RWQCB Basin Plan. In California, RWQCBs designate beneficial uses for all water body segments in their jurisdictions, and then set standards necessary to protect these uses. Consequently, the water quality standards developed for particular water body segments are based on their designated use and vary depending on such use. Water body segments that fail to meet standards for specific pollutants are included in a statewide list in accordance with CWA Section 303(d). If an RWQCB determines that waters are impaired for one or more constituents and the standards cannot be met through point source or non-source point controls (NPDES permits or WDRs), the CWA requires the establishment of TMDLs. TMDLs specify allowable pollutant loads from all sources (point, non-point, and natural) for a given watershed.

State Water Resources Control Board and Regional Water Quality Control Boards. The SWRCB adjudicates water rights, sets water pollution control policy, issues water board orders on matters of statewide application, and oversees water quality functions throughout the State by approving Basin Plans, TMDLs, and NPDES permits. RWQCBs are responsible for protecting beneficial uses of water resources within their regional jurisdiction using planning, permitting, and enforcement authorities to meet this responsibility.

National Pollutant Discharge Elimination System Program. Section 402(p) of the CWA requires the issuance of NPDES permits for five categories of stormwater dischargers, including MS4s. The EPA defines an MS4 as "any conveyance or system of conveyances (roads with drainage systems, municipal streets, catch basins, curbs, gutters, ditches, human-made channels, and storm drains) owned or operated by a state, city, town, county, or other public body having jurisdiction over stormwater, that are designed or used for collecting or conveying stormwater." The SWRCB or the RWQCB issues NPDES permits for 5 years, and permit requirements remain active until a new permit has been adopted.

Municipal Separate Storm Sewer System. The Municipal Stormwater Permitting Program regulates stormwater discharges from MS4s. The NPDES MS4 permits are issued in two phases by the SWRCB and RWQCBs. Phase I MS4 Permits are issued to medium municipalities (serving between 100,000 and 250,000 people) and large municipalities (serving more than 250,000 people). Most of these permits are issued to a group of co-permittees encompassing an entire metropolitan area. The Phase II MS4 Permits are issued to smaller municipalities (populations of less than 100,000 people). The Phase II Small MS4 Permit covers Phase II permittees statewide and became effective on July 1, 2013. The Phase I and Phase II MS4 Permits require the permittees to develop a stormwater management program and individual dischargers to develop and implement a Storm Water Management Plan.

California Toxics Rule. As stated previously, because California had not established a complete list of acceptable water quality criteria for toxic pollutants, EPA Region IX established numeric water

quality criteria for toxic constituents in the form of the CTR. The CTR provides water quality criteria for certain potentially toxic compounds for inland surface waters, enclosed bays, estuaries, and waters designated for human health or aquatic life uses. The CTR is often used by the RWQCBs when establishing water quality objectives and TMDLs. Although the CTR criteria do not apply directly to discharges of stormwater runoff, they are used as benchmarks for evaluating the potential ecological impacts of stormwater runoff on receiving waters. The CTR applies to the receiving water body and establishes acute and chronic surface water quality standards for certain waterbodies. Acute criteria provide benchmarks for the highest permissible concentration below which aquatic life can be exposed for short periods of time without negative effects. Chronic criteria provide benchmarks for an extended period of time (i.e., 4 days or more) without negative effects. The acute CTR criteria have a shorter relevant averaging period (less than 4 days) and provide a more appropriate benchmark for assessing the impacts of stormwater flows.

Sustainable Groundwater Management Act. The SGMA of 2014 is a comprehensive three-bill package that Governor Jerry Brown signed into law in September 2014. The SGMA provides a framework for sustainable management of groundwater supplies by local authorities, with a limited role for State intervention if necessary to protect the resource. The plan is intended to ensure a reliable groundwater supply for California for years to come.

The SGMA requires governments and water agencies of high- and medium-priority basins to halt overdrafts of groundwater basins. The SGMA requires the formation of local GSAs that are required to adopt GSPs to manage the sustainability of the groundwater basins.

General Construction Activity Storm Water Permit. The *General Permit for Storm Water Discharges Associated with Construction and Land Disturbance Activities,* Order No. WQ 2022-0057-DWQ, NPDES No. CAS000002 (Construction General Permit), adopted by the SWRCB, regulates stormwater discharges from construction sites that result in a Disturbed Soil Area (DSA) of 1 acre or greater, and/or are smaller sites that are part of a larger common plan of development. For all projects subject to the Construction General Permit, the applicant is required to:

- Complete a Risk Assessment to determine pollution prevention requirements pursuant to the three risk levels established in the Construction General Permit;
- Conduct stormwater sampling, if required based on risk level;
- Eliminate or reduce non-stormwater discharges to storm sewer systems and other waters of the United States;
- Develop and implement a Storm Water Pollution Prevention Plan (SWPPP) that specifies best management practices (BMPs) that will reduce pollution in storm water discharges to the Best Available Technology/Economically Achievable/Best Conventional Pollutant Control Technology standards; and
- Perform inspections and maintenance of all BMPs.

To obtain coverage under the Construction General Permit, a project applicant must electronically file all permit registration documents with the SWRCB prior to the start of construction. Permit registration documents must include a:

- Notice of Intent (NOI);
- Risk Assessment;
- Site map;
- SWPPP;
- Annual fee; and
- Signed certification statement.

Typical BMPs contained in SWPPPs are designed to minimize erosion during construction, stabilize construction areas, control sediment, and control pollutants from construction materials. The SWPPP must also include a discussion of the program to inspect and maintain all BMPs.

Projects that disturb over 1 acre but less than 5 acres of soil may qualify for a waiver of Construction General Permit coverage. This occurs whenever the Rainfall Erosivity, (R) in the Revised Universal Soil Loss Equation (RUSLE), is less than 5. Construction activity that results in soil disturbances of less than 1 acre is subject to this Construction General Permit if there is potential for significant water quality impairment resulting from the activity as determined by the RWQCB.

Regional and Local Laws and Regulations

San Francisco By Municipal Regional Stormwater Permit Requirements. Pursuant to Section 402 of the CWA and the Porter-Cologne Act, municipal stormwater discharges in Berkeley are regulated under the San Francisco Bay RWQCB's Municipal Regional Stormwater (MRP) NPDES Permit, Order No. R2-2022-0018, as amended by Order No. R2-2023-0019, NPDES Permit No. CAS612008.[21] The MRP is overseen by the San Francsico Bay RWQCB. Local municipalities (the permittees) are responsible for ensuring compliance with the MRP. The MRP covers stormwater discharges from municipalities and local agencies in Alameda, Contra Costa, San Mateo, and Santa Clara counties, including the City of Berkeley.

The MRP requires all Bay Area municipalities to address potential sources of PCBs; this includes preventing certain building materials that may contain PCBs from entering storm drains as a result of building demolition activities. To obtain demolition permits from the City, assessments must be performed at the project site to screen existing buildings for PCBs in priority building materials, including caulks and sealants, thermal/fiberglass insulation and other insulating materials, adhesive/mastic, and rubber window seals/gaskets.[22]

---

21 San Francisco Bay RWQCB. 2022. San Francisco Bay Region Municipal Regional Stormwater NPDES Permit, Order No. R2-2022-0018, as amended by Order No. R2-2023-0019, NPDES Permit No. CAS612008. May 11.

22 City of Berkeley. 2024. Permit Forms Website, PCBs Screening Assessment Form. Website: https://berkeleyca.gov/sites/default/files/2022-02/PCBs_Screening_Assessment_Form.pdf (accessed December 24, 2024).

Provision C.3 of the MRP addresses post-construction stormwater management requirements for regulated projects, which are new development and redevelopment projects that create or replace 5,000 sf or more of impervious surface and special land use categories that create or replace 5,000 sf or more of impervious surface. Where a redevelopment project results in an alteration of more than 50 percent of the impervious surface of a previously existing development that was not subject to Provision C.3, the entire project, consisting of all existing, new, and/or replaced impervious surfaces, must be included in the treatment system design (i.e., stormwater treatment systems must be designed and sized to treat stormwater runoff from the entire redevelopment project). Provision C.3 requires regulated projects to implement practices that encompass low-impact development (LID), source control, site design, and stormwater treatment. LID employs principles such as preserving and recreating natural landscape features and minimizing impervious surfaces to create a functional and appealing site drainage system that treats stormwater as a resource rather than a waste product. Methods used to adhere to the LID principles rely on rain barrels and cisterns, permeable pavement, preservation of undeveloped open space, and biotreatment through rain gardens, bioretention areas, bioswales, and planter/tree boxes.

Provision C.3.i of the MRP requires small projects that create and/or replace more than 2,500 sf and less than 5,000 sf of impervious surface to install site design measures that reduce runoff and pollutants in runoff. Site design measures may include installing permeable pavements surfaces and directing runoff into cisterns, rain barrels, and vegetated areas.

Provision C.6 of the MRP pertains to construction site control and requires permittees to implement a construction site inspection and control program at all construction sites. Inspections must be performed to confirm implementation of appropriate and effective erosion and other construction pollutant controls by construction site operators/developers.

Provision C.7 of the MRP pertains to public information and outreach regarding the impacts of stormwater pollution on receiving waters and potential solutions to mitigate the pollution by encouraging implementation of appropriate solutions.

Provision C.8 of the MRP pertains to water quality monitoring through regional collaboration, countywide or area-wide programs, or third-party monitoring.

Provision C.9 of the MRP pertains to pesticide toxicity control and requires permittees to implement a pesticide toxicity control program that addresses their own and others' use of pesticides within their jurisdictions that pose a threat to water quality and that have the potential to enter the municipal conveyance system. This provision implements requirements of the TMDL for diazinon and pesticide-related toxicity for urban creeks in the region.

Provision C.10 of the MRP pertains to trash load reduction and requires permittees to reduce trash loads from MS4s by 100 percent (i.e., complete trash capture) or no adverse impact to receiving waters from trash by June 30, 2025.

Provisions C.11, C.12, and C.13 of the MRP pertain to the control of mercury, PCBs, and copper, respectively. The MRP requires permittees to implement source and treatment control measures and pollution prevention strategies for mercury and PCBs and requires permittees to prohibit the

discharge of wastewater to storm drains generated from the installation, cleaning, treating, and washing of the surface of copper architectural features, including copper roofs.

Provision C.15 of the MRP pertains to exempted unpolluted non-stormwater discharges and conditionally exempted non-stormwater discharges that are potential sources of pollutants that are permitted if appropriate control measures are implemented to eliminate adverse impacts to water quality.

Alameda County Clean Water Program. The Alameda County Clean Water Program (ACCWP) has developed a C.3 Stormwater Technical Guidance document to assist municipalities and developers in the design, implementation, and maintenance of stormwater infrastructure required by the MRP. In Section F.3 of the guidance document, ACCWP acknowledges that stormwater treatment designs should generally maximize infiltration to the underlying soils; however, at sites with high groundwater and/or groundwater contamination, where stormwater infiltration could promote migration of contamination and/or interfere with remediation, flow-through planters and other stormwater controls that are isolated from underlying soils are appropriate.[23]

RWQCB Order No. R2-2017-0048. If a dewatering activity is determined by the RWQCB not to be covered by the Construction General Permit due to contamination from fuels or volatile organic compounds (VOCs), the discharge may be allowed under NPDES Permit No. CAG912002, issued by the RWQCB under Order No. R2-2017-0048,[24] which covers the discharge or reclamation of extracted and treated groundwater resulting from the cleanup of groundwater polluted by VOCs, fuel leaks, fuel additives, and other related wastes.

Water Quality Control Plans. The State of California is divided into nine RWQCBs. The nine regional boards, along with the SWRCB, work together to preserve, protect, enhance and restore the State's water quality. RWQCB boundaries are based on watersheds and water quality requirements are based on the unique differences in climate, topography, geology, and hydrology for each watershed. Each RWQCB makes critical water quality decisions for its region, including setting standards, issuing WDRs, determining compliance with those requirements, and taking appropriate enforcement actions. The project site is within the boundaries of the San Francisco Bay RWQCB.

The San Francisco Bay RWQCB has adopted the Basin Plan for its region of responsibility that delineates water resource area boundaries based on hydrological features. For the purposes of achieving and maintaining water quality protection, specific beneficial uses have been identified for each of the surface waters and groundwater management zones described in the Basin Plan. Once beneficial uses are designated, appropriate water quality objectives are established, and programs

---

23 Alameda County Clean Water Program (ACCWP). 2023. C.3 Stormwater Technical Guidance, Version 8. March 22.

24 San Francisco Bay RWQCB. 2019. Order No. R2-2017-0048, NPDES Permit No. CAG912002, General Waste Discharge Requirements for Discharge or Reclamation of Extracted and Treated Groundwater Resulting from the Cleanup of Groundwater Polluted by Volatile Organic Compounds (VOCs), Fuel Leaks, Fuel Additives, and Other Related Wastes (VOC and Fuel General Permit). Effective January 1, 2019.

that maintain or enhance water quality can be implemented to ensure the protection of beneficial uses.

For planning purposes, the San Francisco Bay RWQCB identifies and organizes beneficial uses of each significant water body according to the seven major Hydrologic Planning Areas within the region. As designated by the San Francisco Bay RWQCB, the project site is in the San Francisco Bay Central Hydrologic Planning Area.[25] The Hydrologic Planning Areas are provided in **Figure 4**.

The beneficial uses of surface receiving waters for the project site (i.e., Central San Francisco Bay) include: Industrial Service Supply (IND); Industrial Process Supply (PROC); Commercial, and Sport Fishing (COMM); Shellfish Harvesting (SHELL); Estuarine Habitat (EST); Migration of Aquatic Organisms (MIGR); Rare, Threatened, or Endangered Species (RARE); Fish Spawning (SPWN); Wildlife Habitat (WILD); Water Contact Recreation (REC-1); Non-Contact Water Recreation (REC-2); and Navigation (NAV).[26]

Basin plans also establish implementation programs to achieve water quality objectives to protect beneficial uses and require monitoring to evaluate the effectiveness of the programs. These objectives must comply with the State antidegradation policy (State Board Resolution No. 68-16), which is designed to maintain high-quality waters while allowing some flexibility if beneficial uses are not unreasonably affected.

Basin plans have established narrative and numeric water quality objectives for inland surface streams and groundwater. If water quality objectives are exceeded, the RWQCBs can use their regulatory authority to require municipalities to reduce pollutant loads to the affected receiving waters. Relevant surface water quality objectives for all inland surface waters and groundwater under the jurisdiction of the San Franciso Bay RWQCB that would be applicable to the proposed project are shown in **Table A** and **Table B**, respectively. As provided above, the current impairments for receiving waters (i.e., Central San Francisco Bay) include pesticides (e.g., chlordane, DDT, and dieldrin), trash, metals (e.g., selenium and mercury), toxic organics (e.g., PCBs, dioxin compounds [including 2-, 3-, 7-, 8-TCDD], and furan compounds), and invasive species.[27] As such, the proposed project would be required to adhere to the water quality objectives of those pollutants.

<tr><th>Constituent</th><th>Objective</th></tr>
<tr><td>Objectives for Specific Chemical Constituents</td><td>
Surface waters shall not contain concentrations of chemical constituents in amounts that adversely affect any designated beneficial use. Water quality objectives for selected toxic pollutants for surface waters are given in Tables 3-3, 3-3A, 3-3B, 3-3C, 3-4, and 3-4A.

The Water Board intends to work towards the derivation of site-specific objectives for the Bay-Delta estuarine system. Site-specific objectives to be considered by the Water Board shall be developed in accordance with the provisions of the federal Clean Water Act, the State Water Code, State Board water quality control plans, and this Plan. These site-specific objectives will take into consideration factors such as all available scientific information and monitoring data and the latest EPA guidance, and local environmental conditions and impacts caused by bioaccumulation. Pending the adoption of site-specific objectives, the objectives in Tables 3-3 and 3-4 apply throughout the region except as otherwise indicated in the tables or when site-specific objectives for the pollutant parameter have been adopted. Site-specific objectives have been adopted for copper in segments of San Francisco Bay (see Figure 7.2.1-01), for nickel in South San Francisco Bay (Table 3-3A), and for cyanide in all San Francisco Bay segments (Table 3-3C). Objectives for mercury that apply to San Francisco Bay are listed in Table 3-3B. Objectives for mercury that apply to Walker Creek, Soulajule Reservoir, and their tributaries, and to waters of the Guadalupe River watershed are listed in Table 3-4A.

South San Francisco Bay south of the Dumbarton Bridge is a unique, water-quality-limited, hydrodynamic and biological environment that merits continued special attention by the Water Board. Controlling urban and upland runoff sources is critical to the success of maintaining water quality in this portion of the Bay. Site-specific water quality objectives have been adopted for dissolved copper and nickel in this Bay segment. Site-specific objectives may be appropriate for other pollutants of concern, but this determination will be made on a case-by-case basis, and after it has been demonstrated that all other reasonable treatment, source control and pollution prevention measures have been exhausted. The Water Board will determine whether revised water quality objectives and/or effluent limitations are appropriate based on sound technical information and scientific studies, stakeholder input, and the need for flexibility to address priority problems in the watershed.

Table A: Surface Water Quality Objectives for Surface Waters

Constituent	Objective
	Notes: [a] Marine waters are those in which the salinity is equal to or greater than 10 parts per thousand 95% of the time, as set forth in Chapter 4 of the Basin Plan. Unless a site-specific objective has been adopted, these objectives shall apply to all marine waters except for the South Bay south of Dumbarton Bridge (where the California Toxics Rule (CTR) applies) or as specified in note h (below). For waters in which the salinity is between 1 and 10 parts per thousand, the applicable objectives are the more stringent of the freshwater (Table 3-4) or marine objectives. [b] Source: 40 CFR Part 131.38 (California Toxics Rule or CTR), May 18, 2000. [c] These objectives for metals are expressed in terms of the dissolved fraction of the metal in the water column. [d] According to the CTR, these objectives are expressed as a function of the water-effect ratio (WER), which is a measure of the toxicity of a pollutant in site water divided by the same measure of the toxicity of the same pollutant in laboratory dilution water. The 1-hr. and 4-day objectives = table value X WER. The table values assume a WER equal to one. [e] This objective may be met as total chromium. [f] Water quality objectives for copper were promulgated by the CTR and may be updated by U.S. EPA without amending the Basin Plan. Note: at the time of writing, the values are 3.1 ug/l (4-day average) and 4.8 ug/l (1-hr. average). The most recent version of the CTR should be consulted before applying these values. [g] Cyanide criteria were promulgated in the National Toxics Rule (NTR) (Note: at the time of writing, the values are 1.0 µg/l (4-day average) and 1.0 µg/l (1-hr. average)) and apply, except that site-specific marine water quality objectives for cyanide have been adopted for San Francisco Bay as set forth in Table 3-3C. [h] Source: U.S. EPA Ambient Water Quality Criteria for Mercury (1984). The 4-day average value for mercury does not apply to San Francisco Bay; instead, the water quality objectives specified in Table 3- 3B apply. The 1-hour average value continues to apply to San Francisco Bay. For enclosed bays and estuaries other than San Francisco Bay, which has site-specific objectives in Table 3-3B, refer to Part 2 of the Water Quality Control Plan for Inland Surface Waters, Enclosed Bays, and Estuaries of California—Tribal and Subsistence Fishing Beneficial Uses and Mercury Provisions (Statewide Mercury Provisions). [i] Selenium criteria were promulgated for all San Francisco Bay/Delta waters in the National Toxics Rule (NTR). The NTR criteria specifically apply to San Francisco Bay upstream to and including Suisun Bay and Sacramento-San Joaquin Delta. Note: at the time of writing, the values are 5.0 ug/l (4-day average) and 20 ug/l (1-hr. average). [j] Tributyltin is a compound used as an antifouling ingredient in marine paints and toxic to aquatic life in low concentrations. Ambient Aquatic Life Water Quality Criteria for Tributyltin (TBT) – Final (EPA 822-R03-031, December 2003). [k] The 24-hour average aquatic life protection objective for total PAHs is retained from the 1995 Basin Plan. Source: U.S. EPA 1980. The U.S. EPA (1980) Water Quality Criteria document indicates acute toxicity concentrations for salt water at or below 300 µg/l. An acute-to-chronic ratio of 20 yields an objective of 15 µg/l. Total PAHs are those compounds identified by EPA method 610. [l] Table 3-3A contains site-specific water quality objectives for copper and nickel applicable to San Francisco Bay segments. **Table 3-3B: Marine[a] Water Quality Objectives for Mercury in San Francisco Bay[b]** Protection of Human Health — 0.2 mg mercury per kg fish issue — Average wet weight concentration measured in the edible portion of trophic level 3 and trophic level 4 fish

Table A: Surface Water Quality Objectives for Surface Waters

Constituent	Objective		
	Protection of Aquatic Organizas and Wildlife	0.03 mg mercury per kg fish	Average wet weight concentration measured in whole fish 3–5 cm in length

Notes:
[a] Marine waters are those in which the salinity is equal to or greater than 10 parts per thousand 95% of the time, as set forth in Chapter 4 of the Basin Plan. For waters in which the salinity is between 1 and 10 parts per thousand, the applicable objectives are the more stringent of the freshwater or marine objectives.
[b] Objectives apply to all segments of San Francisco Bay, including Sacramento/San Joaquin River Delta (within San Francisco Bay region), Suisun Bay, Carquinez Strait, San Pablo Bay, Richardson Bay, Central San Francisco Bay, Lower San Francisco Bay, and South San Francisco Bay (including the Lower South Bay).
[c] Compliance shall be determined by analysis of fish tissue as described in Chapter 6, Surveillance and Monitoring.

Source: Water Quality Control Plan (Basin Plan) for the San Francisco Bay Basin (San Francisco Bay Regional Water Quality Control Board 2023).
µg/L = micrograms per liter
mg/L = milligrams per liter

Groundwater objectives consist primarily of narrative objectives combined with a limited number of numerical objectives. According to the Basin Plan, the maintenance of existing high quality of groundwater is the primary groundwater objective. In addition, at a minimum, the Basin Plan indicates that groundwater shall not contain concentrations of bacteria, chemical constituents, radioactivity, or substances producing taste and odor in excess of the objectives described below in **Table B** unless naturally occurring background concentrations are greater.

Table B: Groundwater Quality Objectives

Constituent	Objectives
Bacteria	In groundwater with a beneficial use of municipal and domestic supply, the median of the most probable number of coliform organisms over any seven-day period shall be less than 1.1 most probable number per 100 milliliters (MPN/100 mL) (based on multiple tube fermentation technique; equivalent test results based on other analytical techniques as specified in the National Primary Drinking Water Regulation, 40 CFR, Part 141.21 (f), revised June 10, 1992, are acceptable).
Organic and Inorganic Chemical Constituents	All groundwater shall be maintained free of organic and inorganic chemical constituents in concentrations that adversely affect beneficial uses. To evaluate compliance with water quality objectives, the Water Board will consider all relevant and scientifically valid evidence, including relevant and scientifically valid numerical criteria and guidelines developed and/or published by other agencies and organizations (e.g., U.S. Environmental Protection Agency (U.S. EPA), the State Water Board, California Department of Health Services (DHS), U.S. Food and Drug Administration, National Academy of Sciences, California Environmental Protection Agency's (Cal/EPA) Office of Environmental Health Hazard Assessment (OEHHA), U.S. Agency for Toxic Substances and Disease Registry, Cal/EPA Department of Toxic Substances Control (DTSC), and other appropriate organizations.) At a minimum, groundwater designated for use as domestic or municipal supply (MUN) shall not contain concentrations of constituents in excess of the maximum

Table B: Groundwater Quality Objectives

Constituent	Objectives
	(MCLs) or secondary maximum contaminant levels (SMCLs) specified in the following provisions of Title 22, which are incorporated by reference into this plan: Tables 64431-A (Inorganic Chemicals) of Section 64431, Table 64433.2-A (Fluoride) of Section 64433.2, and Table 64444-A (Organic Chemicals) of Section 64444. This incorporation-by-reference is prospective, including future changes to the incorporated provisions as the changes take effect. (See Table 3-5.) Groundwater with a beneficial use of agricultural supply shall not contain concentrations of chemical constituents in amounts that adversely affect such beneficial use. In determining compliance with this objective, the Water Board will consider as evidence relevant and scientifically valid water quality goals from sources such as the Food and Agricultural Organizations of the United Nations; University of California Cooperative Extension, Committee of Experts; and McKee and Wolf's "Water Quality Criteria," as well as other relevant and scientifically valid evidence. At a minimum, groundwater designated for use as agricultural supply (AGR) shall not contain concentrations of constituents in excess of the levels specified in Table 3-6. Groundwater with a beneficial use of freshwater replenishment shall not contain concentrations of chemicals in amounts that will adversely affect the beneficial use of the receiving surface water. Groundwater with a beneficial use of industrial service supply or industrial process supply shall not contain pollutant levels that impair current or potential industrial uses.
Radioactivity	At a minimum-, groundwater designated for use as domestic or municipal supply (MUN) shall not contain concentrations of radionuclides in excess of the MCLs specified in Table 4 (Radioactivity) of Section 64443 of Title 22, which is incorporated by reference into this plan. This incorporation-by-reference is prospective, including future changes to the incorporated provisions as the changes take effect. (See Table 3-5.)
Taste and Odor	Groundwater designated for use as domestic or municipal supply (MUN) shall not contain taste- or odor-producing substances in concentrations that cause a nuisance or adversely affect beneficial uses. At a minimum, groundwater designated for use as domestic or municipal supply shall not contain concentrations in excess of the SMCLs specified in Tables 64449-A (Secondary MCLs-Consumer Acceptance Limits) and 64449-B (Secondary MCLs-Ranges) of Section 64449 of Title 22, which is incorporated by reference into this plan. This incorporation-by-reference is prospective, including future changes to the incorporated provisions as the changes take effect. (See Table 3-5.)

Source: Water Quality Control Plan (Basin Plan) for the San Francisco Bay Basin (San Francisco Bay Regional Water Quality Control Board 2023).

City of Berkeley General Plan. The City's General Plan, adopted in 2002, contains the following policies and actions in the Disaster Preparedness and Safety Element[28] and Environmental Management Element,[29] which are relevant to the project:

[28] City of Berkeley. 2002a. Disaster Preparedness and Safety Element, General Plan, Adopted April 23.
[29] City of Berkeley. 2002b. Environmental Management Element, General Plan, Adopted April 23.

EM-23 Water Quality in Creeks and San Francisco Bay. Take action to improve water quality in creeks and San Francisco Bay.

Actions:

A. Work with the East Bay Municipal District (EBMUD) to ensure that wastewater discharges comply with the requirements of EBMUD's Wastewater Control Ordinance No. 311 to manage wastewater treatment discharges to protect San Francisco Bay.

B. To minimize storm sewer pollution of San Francisco Bay, maintain an effective street sweeping and cleaning program.

C. Identify and eliminate cross connections between the sanitary sewer and storm sewer systems.

D. Restore a healthy freshwater supply to creeks and the Bay by eliminating conditions that pollute rainwater, and by reducing impervious surfaces and encouraging use of swales, cisterns, and other devices that increase infiltration of water and replenishment of underground water supplies that nourish creeks.

Policy EM-25 Groundwater. Protect local groundwater by promoting enforcement of state water quality laws that ensure non-degradation and beneficial use of groundwater.

Berkeley Municipal Code. Section 17.16.050 of the Berkeley Municipal Code (BMC) includes requirements for storm drain construction including permitting requirements for new storm drains and connections.

Chapter 17.20 of the BMC includes requirements to protect and enhance the water quality of our watercourses, waterbodies, and wetlands in a manner pursuant to and consistent with the federal CWA.

Section 17.20.030 of the BMC provides that it is unlawful to discharge any matter except stormwater into the storm drain system except as otherwise expressly exempted in the BMC.

Section 17.20.050 of the BMC provides that any person engaged in activities that will or may result in pollutants entering the storm drain system shall undertake all practicable measures to reduce or prevent the contamination of stormwater by pollutants. Section 17.20.050.A of the BMC prohibits littering and Section 17.20.050.B includes requirements for construction and development including use of filtering materials at catch basins, use of BMPs during construction, and providing the City with evidence of filing a Notice of Intent to obtain coverage under the Construction General Permit with the SWRCB, when required.

Section 17.20.050.B.4 of the BMC provides that the City Manager may establish controls on the volume and rate of stormwater runoff from new developments and redevelopments as may be appropriate to minimize the discharge and transport of pollutants into the storm drain system.

Section 17.20.080.B of the BMC allows discharges from the following sources when the discharger manages the source such that the least amount of non-stormwater as practicable enters the storm drain system: crawl space and basement sump pumps; air conditioning condensation; groundwater drainage piping systems, including foundation drains, footing drains, and pumps; and uncontaminated pumped groundwater.

Section 17.20.090 of the BMC provides that any person in charge of a business which handles, processes, or stores a hazardous material or any person responsible for emergency response for such a business, who has knowledge of any confirmed or unconfirmed release of materials, pollutants or waste which may result in pollutants or non-stormwater discharges entering the City storm drain system, shall take all necessary steps to ensure the discovery, containment and cleanup of such release as soon as possible. Such person shall also notify the City of the occurrence by telephoning 911 immediately, and confirming the notification in writing to the emergency and toxics program of the City Manager's office within one week of said discovery.

Section 17.20.100 of the BMC describes the City's authority to conduct inspections and perform sampling for enforcement purposes.

City of Berkeley Standard Conditions of Approval for All Projects. Pursuant to Berkeley Municipal Code (BMC) Title 23 Zoning Ordinance and Title 13 Public Peace, Morals, and Welfare, the following conditions apply to the management of stormwater during construction and operation of the proposed project:

> ***Stormwater Requirements.*** The Applicant shall demonstrate compliance with the requirements of the City's National Pollution Discharge Elimination System (NPDES) permit as described in the Berkeley Municipal Code (BMC) Section 17.20. The following conditions apply:
>
> a. The project plans shall identify and show site-specific Best Management Practices (BMPs) appropriate to activities conducted on-site to limit to the maximum extent practicable the discharge of pollutants to the City's storm drainage system, regardless of season or weather conditions.
>
> b. Trash enclosures and/or recycling area(s) shall be covered; no other area shall drain onto this area. Drains in any wash or process area shall not discharge to the storm drain system; these drains should connect to the sanitary sewer. Applicant shall contact the City of Berkeley and EBMUD for specific connection and discharge requirements. Discharges to the sanitary sewer are subject to the review, approval and conditions of the City of Berkeley and EBMUD.
>
> c. Landscaping shall be designed with efficient irrigation to reduce runoff, promote surface infiltration and minimize the use of fertilizers and pesticides that contribute to stormwater pollution. Where feasible, landscaping should be designed and operated to treat runoff.

When and where possible, xeriscape and drought tolerant plants shall be incorporated into new development plans.

d. Design, location and maintenance requirements and schedules for any stormwater quality treatment structural controls shall be submitted to the Department of Public Works for review with respect to reasonable adequacy of the controls. The review does not relieve the property owner of the responsibility for complying with BMC Chapter 17.20 and future revisions to the City's overall stormwater quality ordinances. This review shall be conducted prior to the issuance of a Building Permit.

e. All paved outdoor storage areas must be designed to reduce/limit the potential for runoff to contact pollutants.

f. All on-site storm drain inlets/catch basins must be cleaned at least once a year immediately prior to the rainy season. The property owner shall be responsible for all costs associated with proper operation and maintenance of all storm drainage facilities (pipelines, inlets, catch basins, outlets, etc.) associated with the project, unless the City accepts such facilities by Council action. Additional cleaning may be required by City of Berkeley Public Works Engineering Dept.

g. All private or public projects that create and/or replace 5,000 square feet or more of impervious surface must comply with Provision C.3 of the Alameda County NPDES permit and must incorporate stormwater controls to enhance water quality. Permit submittals shall include a Stormwater Requirement Checklist and detailed information showing how the proposed project will meet Provision C.3 stormwater requirements, including a) Site design measures to reduce impervious surfaces, promote infiltration, and reduce water quality impacts; b) Source Control Measures to keep pollutants out of stormwater runoff; c) Stormwater treatment measures that are hydraulically sized to remove pollutants from stormwater; d) an O & M (Operations and Maintenance) agreement for all stormwater treatment devices and installations; and e) Engineering calculations for all stormwater devices (both mechanical and biological).

h. All on-site storm drain inlets must be labeled “No Dumping – Drains to Bay” or equivalent using methods approved by the City.

i. Washing and/or steam cleaning must be done at an appropriately equipped facility that drains to the sanitary sewer. Any outdoor washing or pressure washing must be managed in such a way that there is no discharge or soaps or other pollutants to the storm drain. Sanitary connections are subject to the review, approval and conditions of the sanitary district with jurisdiction for receiving the discharge.

j. All loading areas must be designated to minimize “run-on” or runoff from the area. Accumulated waste water that may contribute to the pollution of stormwater must be drained to the sanitary sewer or intercepted and pretreated prior to discharge to the storm drain system. The property owner shall ensure that BMPs are implemented to prevent

potential stormwater pollution. These BMPs shall include, but are not limited to, a regular program of sweeping, litter control and spill cleanup.

k. Sidewalks and parking lots shall be swept regularly to prevent the accumulation of litter and debris. If pressure washed, debris must be trapped and collected to prevent entry to the storm drain system. If any cleaning agent or degreaser is used, wash water shall not discharge to the storm drains; wash waters should be collected and discharged to the sanitary sewer. Discharges to the sanitary sewer are subject to the review, approval and conditions of the sanitary district with jurisdiction for receiving the discharge.

l. The Applicant is responsible for ensuring that all contractors and sub-contractors are aware of and implement all stormwater quality control measures. Failure to comply with the approved construction BMPs shall result in the issuance of correction notices, citations, or a project stop work order.

Public Works. All piles of debris, soil, sand, or other loose materials shall be covered at night and during rainy weather with plastic at least one-eighth millimeter thick and secured to the ground.

Public Works. The applicant shall ensure that all excavation accounts for surface and subsurface waters and underground streams so as not to adversely affect adjacent properties and rights-of-way.

Public Works. The project sponsor shall maintain sandbags or other devices around the site perimeter during the rainy season to prevent on-site soils from being washed off-site and into the storm drain system. The project sponsor shall comply with all City ordinances regarding construction and grading.

Public Works. Prior to any excavation, grading, clearing, or other activities involving soil disturbance during the rainy season the applicant shall obtain approval of an erosion prevention plan by the Building and Safety Division and the Public Works Department. The applicant shall be responsible for following these and any other measures required by the Building and Safety Division and the Public Works Department.

Drainage Patterns. The Applicant shall establish and maintain drainage patterns that do not adversely affect adjacent properties and rights-of-way. Drainage plans shall be submitted for approval of the Building & Safety Division and Public Works Department, if required.

IMPACT ANALYSIS

Potential Impacts to Water Quality

The proposed project would merge the two existing lots into one contiguous lot and demolish the existing 2,380 sf and 2,849 sf buildings and parking lot to construct an 80,046 sf, eight-story residential building consisting of 65 dwelling units. Five units would be below market rate. Additionally, the proposed project would include a lobby, 4,372 sf of amenity space, a balcony on the 4th floor a roof deck on the 8th floor, and landscaping.

Construction would include demolition, site preparation, grading, building construction, paving, and architectural coating activities.

Temporary Impacts During Construction

Pollutants of concern during construction include sediment, trash, petroleum products, paints, adhesives, concrete waste (dry and wet), sanitary waste, and chemicals. Each of these pollutants on its own or in combination with other pollutants can have a detrimental effect on water quality. During construction activities, excavated soil would be exposed, and there would be an increased potential for soil erosion and sedimentation compared to existing conditions. In addition, chemicals, liquid products, petroleum products (e.g., paints, solvents, and fuels), and concrete-related waste may be spilled or leaked during construction. Sediment from increased soil erosion and chemicals from spills and leaks have the potential to be transported via stormwater runoff into receiving waters.

Project construction would disturb the entire 0.28-acre project site. Because project construction would disturb less than 1 acre of soil, the proposed project would not be subject to the requirements of the SWRCB's Construction General Permit. However, the proposed project would be required to comply with the City's Standard Conditions of Approval during construction, which includes implementing City-specific standard conditions, such as erosion and sediment control (designed to minimize erosion and retain sediment on site) and good housekeeping practices (to prevent spills, leaks, and discharge of construction debris), to limit the discharge of pollutants to the City's storm drainage system. City-specific standard conditions include completing routine or area inspections to enforce the provisions of BMC Section 17.20; covering all piles of debris, soil, sand and other loose materials overnight and during rainy weather; maintaining sandbags or other devices around the site during the rainy season; and approving and implementing an erosion prevention plan. **Table C** provides the BMPs that would be implemented during construction of the proposed project, as indicated by the C.3 Stormwater Requirements Checklist[30] prepared for the proposed project.

Table C: 2298 Durant Avenue Multi-Family Building Project
C.6 Stormwater Construction Phase Requirements
Construction Best Management Practices

Best Management Practices (BMPs)
Attach the municipality's construction BMP plan sheet to project plans and require contractor to implement the applicable BMPs on the plan sheet.
Implement temporary erosion controls to stabilize all disturbed areas until permanent erosion controls are established.
Delineate with field markers clearing limits, easements, setbacks, sensitive or critical areas, buffer zones, trees, and drainage courses.
Provide notes, specifications, or attachments describing: • Construction, operation and maintenance of erosion and sediment controls, include inspection frequency;

[30] Brian Dorward. 2025. *C.3 Stormwater Requirements Checklist, Municipal Regional Stormwater Permit (MRP 3), Stormwater Controls for Development Projects*. February 3.

Table C: 2298 Durant Avenue Multi-Family Building Project
C.6 Stormwater Construction Phase Requirements
Construction Best Management Practices

Best Management Practices (BMPs)
• Methods and schedule for grading, excavation, filling, clearing of vegetation, and storage and disposal of excavated or cleared material; • Specifications for vegetative cover and mulch, include methods and schedules for planting and fertilization; and • Provisions for temporary and/or permanent irrigation.
Perform clearing and earth moving activities only during dry weather.
Use sediment controls or filtration to remove sediment when dewatering and obtain all necessary permits.
Protect all storm drain inlets in vicinity of site using drop inlet protection.
Trap sediment on-site, using BMPs such as sediment basins or traps, earthen dikes or berms, silt fences, check dams, erosion control blankets, covers for soil stock piles, etc.
Divert on-site runoff around disturbed areas and construction materials; divert off-site runoff around the site (e.g., swales and dikes).
Protect adjacent properties and undisturbed areas from construction impacts using vegetative buffer strips, sediment barriers or filters, dikes, mulching, or other measures as appropriate.
No cleaning, fueling, or maintaining vehicles on-site, except in a designated area where wash water is contained for proper management and spill controls are in place.
Store, handle, and dispose of construction materials/wastes properly to prevent contact with stormwater.
Contractor shall train and provide instruction to all employees/subcontractors re: construction BMPs.
Control and prevent the discharge of all potential pollutants, including pavement cutting wastes, paints, concrete, petroleum products, chemicals, wash water or sediments, rinse water from architectural copper, and non-stormwater discharges to storm drains and watercourses.

Source: *C.3 Stormwater Requirements Checklist, Municipal Regional Stormwater Permit (MRP 3), Stormwater Controls for Development Projects* (Brian Dorward).

Additionally, the proposed project would address potential sources of PCBs from being released from the project site during demolition activities and entering storm drains, as required by the MRP.[31] Addressing potential sources of PCBs during demolition activities requires existing buildings to be screened for PCBs in priority building materials, including caulks and sealants, thermal/fiberglass insulation and other insulating materials, adhesive/mastic, and rubber window seals/gaskets in order to obtain demolition permits from the City.[32] Because the proposed project would include the demolition of the existing building on the project site, completion of the City's PCBs Screening Assessment Form would be required. The PCBs screening process is part of the City's water quality protection program and has been designed in accordance with requirements detailed in the MRP. Participation in the City's PCBs screening process prior to demolition, which would address any potential hazardous impact due to PCBs present at the project site, would ensure the proposed project would not adversely impact water quality due to release of PCBs during demolition/construction activities.

[31] Brian Dorward. 2025. *C.3 Stormwater Requirements Checklist, Municipal Regional Stormwater Permit (MRP 3), Stormwater Controls for Development Projects*. February 3.

[32] City of Berkeley. 2024. Permit Forms Website, PCBs Screening Assessment Form. Website: https://berkeleyca.gov/sites/default/files/2022-02/PCBs_Screening_Assessment_Form.pdf (accessed December 26, 2024).

The proposed project is not anticipated to require excavation at depths that would encounter groundwater and construction-period groundwater dewatering is not expected to occur. However, if excavation extends to depths that may encounter groundwater, dewatering may be required during project construction. Groundwater dewatering activities could affect surface water quality through the discharge of polluted groundwater to surface waterbodies and storm drains. If the proposed project requires the discharge of groundwater polluted with fuels or VOCs to storm drains, the proposed project would be required to seek coverage under NPDES Permit No. CAG912002, issued by the RWQCB under Order No. R2-2017-0048,[33] which covers the discharge or reclamation of extracted and treated groundwater resulting from the cleanup of groundwater polluted by VOCs, fuel leaks, fuel additives, and other related wastes.

Overall, with the implementation of project-specific construction BMPs and an erosion control plan, completion of a PCBs Screening Assessment Form, and adherence to dewatering requirements, if necessary, the proposed project would not adversely impact water quality during project construction.

Permanent Impacts During Operation and Maintenance

During operation, anticipated pollutants of concern associated with the proposed project include pathogens (bacteria/virus), toxic organic compounds, nutrients, pesticides, sediment/turbidity, and trash and debris. Potential sources of these pollutants associated with the proposed project include:

- **Pathogens:** Food wastes, sediment and landscaping areas
- **Nutrients:** Fertilizers, sediment, and trash/debris
- **Pesticides:** Landscaping activities
- **Sediment/turbidity:** Disturbed or unstabilized landscaping areas
- **Trash and Debris:** Landscaping activities, food wrappers, and food wastes

Each of these pollutants on its own or in combination with other pollutants can have a detrimental effect on water quality. Potential water quality impacts during operation of the proposed project would be subject to the San Francisco Bay RWQCB's MRP (Order No. R2-2022-0018, as amended by Order No. R2-2023-0019, NPDES Permit No. CAS612008), as discussed below.

The project site currently consists of 10,604 sf of impervious surface area (approximately 87 percent of the project site). Implementation of the proposed project would replace 10,604 sf of impervious surface area and create 274 sf of new impervious surface area, resulting in 10,878 sf of impervious surface area at the project site post construction. The remaining surface area (1,357 sf) at the project site would be pervious and would consist of landscaped area and bioretention space. According to the C.3 Stormwater Requirements Checklist[34] prepared for the proposed project, the

---

[33] San Francisco Bay RWQCB. 2019. Order No. R2-2017-0048, NPDES Permit No. CAG912002, General Waste Discharge Requirements for Discharge or Reclamation of Extracted and Treated Groundwater Resulting from the Cleanup of Groundwater Polluted by Volatile Organic Compounds (VOCs), Fuel Leaks, Fuel Additives, and Other Related Wastes (VOC and Fuel General Permit). Effective January 1, 2019.

[34] Brian Dorward. 2025. *C.3 Stormwater Requirements Checklist, Municipal Regional Stormwater Permit (MRP 3), Stormwater Controls for Development Projects*. February 3.

proposed project is considered a C.3.b Regulated Project because it would result in more than 5,000 sf of total new/replaced impervious surface area. As such, the proposed project would be required to include appropriate site design, source control, and hydraulically sized stormwater treatment measures, to capture, treat, and reduce pollutants of concern in stormwater runoff in compliance with the MRP, as stipulated by the City's standard Conditions of Approval. In addition to being a Regulated Project, according to the C.3 Stormwater Requirements Checklist[35] prepared for the proposed project, the proposed project meets the criteria of a Special Project Category A as detailed in Appendix J of the C.3 Technical Guidance and qualifies for LID treatment reduction credits of 100 percent.[36] Therefore, the proposed project is allowed to use specific types of non-LID treatment if the use of 100 percent LID treatment is determined to be infeasible. As such, stormwater treatment measures would include a media filter and biotreatment of stormwater collected on the project site prior to discharge into the City's stormwater infrastructure. The proposed project would utilize a filter vault to treat stormwater from the western half of the project site and a flow-through planter to treat stormwater from the eastern half of the project site. The filter vault would be hydraulically sized to treat and manage stormwater using the 0.2-inch-per-hour intensity approach, which is the recommended flow-based approach as detailed in the MRP. The flow-through planter would be hydraulically sized using a combination of volume and flow-based approaches including the 0.2-inch-per-hour intensity approach and the 80 percent capture approach, which is the recommended volume-based approach detailed in the MRP. **Table D** and **Table E** describe the proposed site design, treatment, and source control measures that would be implemented as part of the proposed project.

Table D: Site Design and Treatment Measures

Site Design and Treatment Measures
Bio Flow-Through Planter
Filter vault
Direct runoff onto vegetated areas.
Minimize land disturbance and impervious surface (especially parking lots).
Maximize permeability by clustering development and preserving open space.

Source: *C.3 Stormwater Requirements Checklist, Municipal Regional Stormwater Permit (MRP 3), Stormwater Controls for Development Projects* (Brian Dorward).

Table E: Source Control Measures

Feature Requiring Source Controls	Source Control Measures
Storm Drain	• Mark on-site inlets with the words "No Dumping! Flows to Bay" or equivalent
Landscaping	• Retain existing vegetation as practicable.

[35] Brian Dorward. 2025. *C.3 Stormwater Requirements Checklist, Municipal Regional Stormwater Permit (MRP 3), Stormwater Controls for Development Projects*. February 3.

[36] Brian Dorward. 2025. *MRP 2.0 Special Projects Worksheet, Project Name: Student Housing 2298 Durant.* April 10.

Table E: Source Control Measures

Feature Requiring Source Controls	Source Control Measures
	• Select diverse species appropriate to the site. Include plants that are pest- and/or disease-resistant, drought-tolerant, and/or attract beneficial insects. • Minimize use of pesticides and quick-release fertilizers. • Use efficient irrigation system; design to minimize runoff.
Refuse Areas	• Provide a roofed and enclosed area for dumpsters, recycling containers, etc., designed to prevent stormwater run-on and runoff. • Connect any drains in or beneath dumpsters, compactors, and tallow bin areas serving food service facilities to the sanitary sewer. [1]
Fire Sprinklers	Design for discharge of fire sprinkler test water to landscape or sanitary sewer.[1]

Source: *C.3 Stormwater Requirements Checklist, Municipal Regional Stormwater Permit (MRP 3), Stormwater Controls for Development Projects (Brian Dorward).*

[1] Any connection to the sanitary sewer system is subject to sanitary district approval.

In addition, the proposed project would be required to comply with the City's standard Conditions of Approval related to drainage patterns. As required by the City's Drainage Patterns standard condition of approval, the project applicant would be required to establish and maintain drainage patterns that do not adversely affect adjacent properties and rights-of-way. The current project design directs stormwater to either the existing stormwater infrastructure located along Durant Avenue; to the filter vault along the western edge of the site, which drains to the proposed flow-through planter; or to the proposed flow-through planter along the eastern edge of the site, which would drain to an 6-inch storm drain that discharges to the existing storm drain in Ellsworth Street.[37] The proposed project would be required to submit a Final Stormwater Control Plan to the City for review and approval to ensure that the proposed project would not adversely impact adjacent properties and rights-of-way due to stormwater runoff from the project site.

With the proper design, implementation, and maintenance of site design, source control, and hydraulically sized stormwater treatment BMPs, as detailed in the C.3 Stormwater Requirements Checklist prepared for the project, compliance with the applicable provisions of the MRP, and compliance with City's standard Conditions of Approval, the proposed project would not adversely impact water quality during operation of the proposed project.

Cumulative Impacts

Cumulative development in the Potter/Derby Creeks Watershed is a continuation of the existing urban pattern of development that has already resulted in modifications to watercourses in the area. Both Potter Creek and Derby Creek have been replaced by underground pipelines and culverts as part of the City's storm drainage system. The stream channels of these creeks and their tributaries have been almost entirely converted to man-made drainage structures. Future development of pervious or vegetated lands in the area could potentially increase the volume of stormwater runoff and contribute to pollutant loading in stormwater runoff reaching receiving waters or the City's storm drain system, thereby resulting in cumulative impacts to hydrology and

[37] Greenwood & Moore, Inc. 2025. *Improvement Plan for 2298 Durant Avenue.* January 31.

surface water quality within the watershed. In addition, the construction and operation of future projects could result in localized degradation of groundwater quality that could eventually impair the continued use if pollutant discharge quantities are large enough. Cumulative impacts to groundwater supply could also occur due to increases in impervious surfaces that impair groundwater recharge and increases in consumptive uses of groundwater.

Future projects must include BMPs to reduce construction- and operation-related impacts to water quality and hydrology in compliance with applicable NPDES permits and local plans and ordinances. Specifically, all projects that disturb 1 acre or more of soil must comply with the requirements of the Construction General Permit; all projects (including projects that disturb less than 1 acre of soil) must comply with the City's Stormwater Requirements Conditions of Approval, which require implementation of site-specific BMPs to limit the discharge of pollutants to the City's storm drainage system; any Regulated Projects (private or public projects that create and/or replace 5,000 sf or more of impervious surface) must comply with the requirements of the San Francisco Bay RWQCB's MRP (Order No. R2-2022-0018, as amended by Order No. R2-2023-0019, NPDES Permit No. CAS612008); and all projects must comply with the City's Drainage Patterns Condition of Approval, which requires the establishment and maintenance of drainage patterns that do not adversely affect adjacent properties and rights-or-way. The preparation and approval of construction BMPs for project construction and a C.3 Stormwater Requirements Checklist (for operation) would be required for projects to determine appropriate BMPs to minimize water quality impacts and the volume of stormwater runoff. In addition, the preparation and approval of a hydrology study would be required to determine the hydrologic control required to minimize increases in runoff from each site so that stormwater runoff does not exceed existing conditions or result in hydromodification impacts. The City Public Works Department reviews all proposed development projects within Berkeley on a case-by-case basis to ensure that sufficient local and regional drainage capacity is available.

All future projects must consider and address impacts to impaired receiving waters and TMDLs for receiving waters. The TMDL program is a cumulative approach to identifying all constituents that adversely affect the beneficial uses of waterbodies to identify appropriate reductions in pollutant loads so that the receiving waters can maintain/attain the beneficial uses in the Basin Plan. Thus, by complying with TMDLs, a project's cumulative impacts to overall water quality in the Potter/Derby Creeks Watershed is considered.

The proposed project, along with all future projects proposed in the Potter/Derby Creeks Watershed, would be required to comply with the requirements of the MRP and City Conditions of Approval, including implementing construction and operational BMPs to reduce pollutants in stormwater runoff. Compliance with these permits and regulations constitutes compliance with programs intended to address cumulative water quality impacts. Because the proposed project and other related projects would comply with applicable NPDES and City requirements and would include BMPs to reduce the volume of stormwater runoff and pollutants of concern in stormwater runoff, the proposed project would not contribute to cumulative hydrology and water quality impacts within the Potter/Derby Creeks Watershed. In addition, the proposed project does not encroach into the 100-year floodplain, so there is no cumulative impact from placement of developments within the floodplain.

APPLICATION CITY OF BERKELEY **LAND USE PLANNING**

AFFORDABLE HOUSING COMPLIANCE PLAN

Affordable Housing Compliance Plan Form

You are required to submit an Affordable Housing Compliance Plan (AHCP) for Housing Development Projects[4] that are subject to the affordable housing requirements of BMC Chapter 23.328, Inclusionary Housing. The AHCP is an enforceable commitment that identifies the number and type of affordable, or Below Market rate (BMR) units, the amount of In-Lieu Fees, and/or the parcels of land (or portions thereof) that will be provided and/or paid by the applicant to comply with those requirements.

The Department of Planning and Development's Land Use Division and the Department of Health, Housing, and Community Services use the information from this form and the related sheets to confirm which provisions of the City's affordable housing requirements apply to your project, and if the project complies.

Please complete the entire form. If a section doesn't apply, enter "n/a." If selecting the option to provide an alternative unit size mix or option to dedicate land, please complete the entire AHCP form and staff will contact you to discuss approval for these discretionary options.

You may be asked to revise this form to reflect the approved project during the permit review process and/or required plan sheets.

The Preliminary AHCP is required with a Zoning Permit or Zoning Certificate application. It is intended to provide estimates to the Applicant and City, and inform conditions of approval on discretionary zoning permits. See the **applicable pre-application and/or zoning submittal requirements** to determine if a Preliminary AHCP is needed for your project.

The Final AHCP is required with the first building permit application for construction, and will include the total fee amount due for projects electing to pay an In-Lieu Fee. The In-Lieu Fee can be paid any time prior to the issuance of the project's Certificate of Occupancy or Temporary Certificate of Occupancy (as applicable).

APPLICATION CITY OF BERKELEY **LAND USE PLANNING**

AFFORDABLE HOUSING COMPLIANCE PLAN

3.B. OPTION TO PAY AN IN-LIEU FEE

Housing Development Projects may provide less than the required number of on-site BMR units and pay a proportionately reduced In-Lieu Fee, calculated as follows:

The Fee Per Square Foot
multiplied by
the **Total Residential Unit Floor Area**
of a Housing Development Project,
multiplied by
the **Percentage of the Applicable Requirement Remaining** after accounting for any on-site Affordable Units provided.

Projects that do not provide any Affordable Units on-site will have an applicable requirement multiplier of one.

The in-lieu fee for Density Bonus Projects is calculated using the base project residential unit floor area only:

The Base Project Residential Unit Floor Area (BP RUFA)
is equal to:
the Final Residential Unit Floor Area (FP RUFA)
divided by
One plus the Density Bonus percentage taken (DB %)

BP RUFA = FP RUFA / (1+DB%)

AFFORDABLE HOUSING FEE DUE

Per Square Foot Fee
based on Total Residential Unit Floor Area, see Fee Schedule on Page 1) (Base Project only for density bonus projects)

X

Total Residential Unit Floor Area (square feet)
(Base Project only for density bonus projects)

X

In Lieu Fee percentage calculation*:
(Affordable Units required – affordable units provided) / Affordable Units required)

(*projects that provide no on-site Affordable Units have a multiplier of 1)

TOTAL FEE DUE

EXAMPLE CALCULATIONS:
50,000 square foot 100-unit project providing 15 Affordable Units

APPLICATION CITY OF BERKELEY **LAND USE PLANNING**

AFFORDABLE HOUSING COMPLIANCE PLAN

SECTION 4 REQUIRED PLAN SHEETS (LAND USE ENTITLEMENT PLANS AND BUILDING PERMIT PLANS)

REQUIRED AHCP PLAN SHEETS

In addition to completing this form, the land use entitlement and building permit plans for your housing development project must demonstrate compliance with the applicable affordable housing provisions. If your project includes a discretionary zoning permit, the entitlement plans must include a Preliminary AHCP plan sheet(s), and all building permits for construction must include a Final AHCP plan sheet(s).

What needs to be in the plans to demonstrate compliance with the City's affordable housing regulations?

The applicable AHCP plan sheets with the applicable information (listed below) must be in sequential pages near the beginning of your plan set and labeled as "Preliminary or Final Affordable Housing Compliance Plan Sheet." Having this information together in the plans will make locating the information easier during project and plan review, and provide transparency to the public. A sample plan set page is attached for reference (see Exhibit A). You will receive corrections from your zoning reviewer if information is not displayed properly in the plan set.

ALL PROJECTS: APPLICABILITY AND REQUIREMENTS OF BMC CHAPTER 23.328 INCLUSIONARY HOUSING

- Residential unit floor area diagrams* showing the floor area that is included and excluded from calculation. Diagrams must be consistent with and separate from the architectural floor plans and include:
  - Schematic diagrams of each floor or level, including mezzanines
  - Indicate floor area by use with shading, color, and/or callouts
  - Dimension all areas of the project that qualify as residential unit floor area, and provide the square footage of each area
  - Tabulation of the total residential unit floor area according to the diagrams
- Calculation of the number of required and proposed BMR units (Base Project only for density bonus)
- Calculation of 100% In-Lieu fee (provide even if on-site units are proposed)

* Diagrams should reflect the whole project (base and bonus), and provide a calculation of the Base Project Residential Unit Floor Area (RUFA) for projects that utilize state density bonus. *(See page 5)*

ON-SITE BELOW MARKET RATE (BMR) UNITS (ALL OR COMBINATION)

Any on-site BMR units
(BMC 23.328.030(A) Requirement to Construct Affordable Units

- Unit summary table by floor of BMR and market-rate units, with bedroom counts
- Alternate mix of unit types, if applicable
  - Calculations for 20 percent of residential unit floor area (must be a mix of affordable units that are either two- or three-bedrooms)

IN-LIEU FEE (ALL OR COMBINATION)

Payment in-lieu of providing some or all required affordable units on-site (BMC Section 23.328.030(B) Option to Pay In-Lieu)

In-Lieu Fee per Resolution No. 70,698-N.S. calculated as follows: the fee per square foot multiplied by the total Residential Unit Floor Area of a Housing Development Project, multiplied by the percentage of the applicable requirement remaining after accounting for any on-site Affordable Units provided. Projects that do not provide any Affordable Units on-site will have an applicable requirement multiplier of one. *(See page 5)*

The In-Lieu Fee per square foot is based on the residential unit floor area of the project (base project only if utilizing State Density Bonus provisions). *(See page 5)*

STAFF ADMINISTRATION USE ONLY

2298 DURANT AVENUE

APPLICATION FOR A HOUSING DEVELOPMENT PROJECT

APPLICANT STATEMENT

July 9, 2025

Figure 1. Proposed Project at 2298 Durant Ave.

The applicant team is pleased to submit this use permit application for a 65-unit multifamily apartment project at 2298 Durant Avenue & 2360 Ellsworth Street in Berkeley, California.

This applicant statement includes:

1. Project Description
2. Compliance with City Policies
3. Legislative Context
4. CEQA Overview
5. Required Findings
6. Project Team Contact Information

1. PROJECT DESCRIPTION

Property Information

APN:	055-1887-001, 055-1887-002
Total Lot Area:	12,220 sq. ft. / 0.28 acres
General Plan Designation:	Residential Mixed Use (RMU)
Zoning District:	Residential – Southside Mixed Use (R-SMU)
Area Plan:	Southside Area Plan (Residential High Density Subarea)

Project Overview

The proposed project is an application to demolish two existing buildings: a medical office building and 7-unit apartment building, and construct a multifamily housing development project with 65 dwelling units in a new 80,046 gross square foot building. The project includes five affordable units for rent to Extremely or Very-Low Income households. The two existing parcels will be merged into one parcel as part of the project.

The proposed project is subject to several statutory elements, including Housing Accountability Act (HAA), Senate Bill 330 (SB 330), and State Density Bonus Law (SDBL). While the project does not seek additional density, it does use SDBL for waivers and concessions to comply with applicable objective design standards.

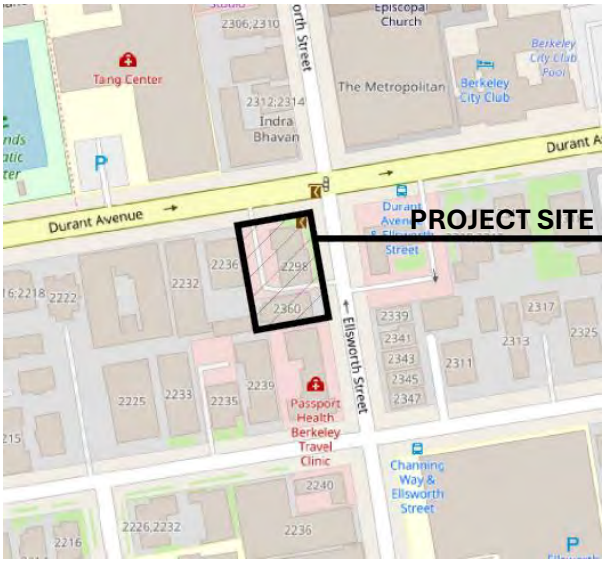

Figure 2. Project Site Location

The project site is on the south side of Bancroft Way and at the south west intersection of Durant Avenue and Ellsworth Street. The project site is conveniently located one block away from the UC Berkeley Campus. Additionally, the project site is located two blocks west of Telegraph Avenue, which is a transit and commercial corridor that provides a wide range of urban amenities and services. The location of this project will provide future residents with convenient access to the campus, the Southside neighborhood, and the Downtown area.

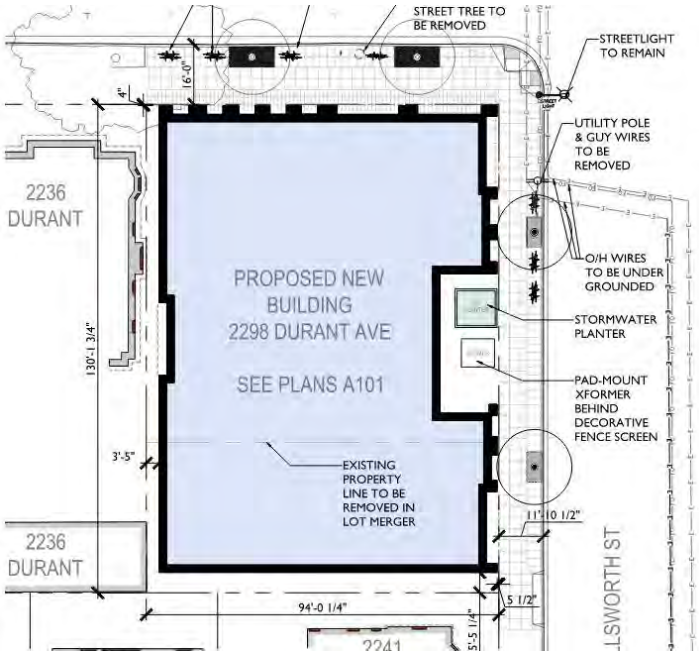

Figure 3. Project Site Plan

The site is highly accessible via public transit or active transportation. It is located 0.5 miles from the Downtown Berkeley BART station and is well served by multiple bus routes (Lines 6 – Downtown Oakland, 7 – Emeryville Amtrack, 36 – U.C. Campus, 51B – Rockridge BART, and 79 – Rockridge BART). The City of Berkeley does not require any residential parking to be provided for this project because it is a 100% residential project, and the project does not include any vehicle parking because the site is so well served by public transit.

Replacement Units

There are 7 existing dwelling units in the apartment building located on the 2360 Ellsworth Street parcel. These units are rent-controlled market rate units. The project proposes to replace all 7 units with no net loss in dwelling units. All replacement units will be provided at least equivalent size as existed (containing at least the same number of bedrooms as the units being replaced), and be occupied by persons or families in the same or lower income category as the persons or families in occupancy when the preliminary application was submitted, per Govt. Code § 65915(c)(3)(B). The City of Berkeley does not have an objective standard for verification of income levels. Therefore, this application relies on Comprehensive Housing Affordability Strategy data, pursuant to Govt. Code § 65915(c)(3)(B)(i) and as specified by the City of Berkeley in its May 16, 2025 comment letter:

- 2 extremely low income units (<30% of AMI);
- 1 very low income unit (<50% of AMI);
- 1 low income unit (<80% of AMI);
- 1 moderate income unit (<100% of AMI); and
- 2 above-moderate income units (>100% of AMI).

However, to meet the requirements of State Density Bonus Law, SB330, and a portion of the City's affordable housing fee in-lieu, the project replaces 5 of 7 units as affordable units to extremely and very low income households earning less than 50% of AMI. The remaining 2 replacement units will be provided at market rate. See Sheet A-110 for a list of the Replacement Unit locations.

65	7
= *NO NET LOSS IN DWELLING UNITS* *(compliant with SB 330)*	

Architectural Design

The building's design aligns with the guidelines in the Southside Design Guidelines. The building massing has been broken up along its long sides (East and West) to present as two towers with an "ABA" symmetry scheme present in many of the neighborhood buildings. The use of bays and insets provides a visually appealing façade articulation and modulation, which reinforce the proportions and rhythm in the Residential High Density Subarea. New building materials, especially those at the ground floor, have been selected for their resiliency and high quality. Materials such as fiber cement panels and cement plaster are consistently applied on the façades throughout the building to create a consistent and continuous look. Aluminum profile and panels create accent moments on the façade to create visual interest.

Figure 4. Rendering of Proposed Project

The building entrance is identified with a welcoming transparent ground floor along with building signage that engages the streetscape. The residential entrance is oriented to the sidewalk and street at the intersection of Durant Avenue and Ellsworth Street, which makes it clearly identifiable and inviting. The streetscape will see a dramatic upgrade with many planters proposed adjacent to the building, as well as several new street trees along both Durant and Ellsworth.

Sustainability

The proposed project aligns with several of the City's General Plan Environmental Management and Land Use sustainability policies:

- **Environmental Management Policy #5 – "Green" Buildings**
  Promote and encourage compliance with "green" building standards.

- **Environmental Management Policy #35 – Energy-Efficient Design**
  Promote high-efficiency design and technologies that provide cost-effective methods to conserve energy and use renewable energy sources.

- **Land Use Policy #3 – Infill Development**
  Encourage infill development that is architecturally and environmentally sensitive, embodies principles of sustainable planning and construction, and is compatible with neighboring land uses and architectural design and scale.

This project proposes efficiently sized dwelling units outfitted with water & energy efficient appliances in a transit-oriented development. These factors, in addition to meeting the City of Berkeley's Green Building requirements, make the proposed project a sustainable housing development. The building will be all-electric, and equipped with solar panels to power the building with clean energy. The dwelling units will have low-flow fixtures, and the proposed landscaping will all be drought-tolerant and largely comprised of native vegetation. This proposed project is environmentally and architecturally sensitive and incorporates many principles of sustainable development.

This is a true infill development project, which will re-develop an underutilized parcel. The proposed project at 2298 Durant Avenue will transform this site into a vibrant residential address and attractive pedestrian atmosphere. This infill project is especially sustainable in its provision of housing in close proximity to the UC Berkeley Campus and Telegraph Avenue, which has excellent access to goods and services as well as public transportation.

Bird Safe Glass

The proposed project will be subject to the Bird Safe Glass ordinance under Berkeley Municipal Code § 23.304.150, which was recently passed in June 25, 2024. For a building construction with 10,000 sq. ft. or more of gross floor area and an average building height greater than 35 ft, all transparent or reflective materials located between the ground and 75 feet above grade would be subject to bird safe requirements. In order to satisfy bird safe requirements, any regulated transparent or reflective material must either comply with a compliant threat factor rating or use patterned glazing treatments.

Landscaping

The landscape design for the proposed project consists of new streetscape, a stormwater treatment area, and planting at the building base at the ground floor. A landscaped terrace with views to the Bay will be located on Level 8, the uppermost floor of the project.

A Coast Redwood that is 40 inches in diameter exists just inside the northwest corner of the project footprint, and a 30-inch diameter Camphor tree is located at the Durant right of way approximately 50 feet from Ellsworth Street. Both trees will be removed to allow site access, construction of the new concrete slab foundation, and erection of scaffolding.

The existing concrete sidewalk paving in the right of way will be replaced with a new concrete surface per City standard details. Concrete control joints designate the pedestrian and frontage zones within the right of way; and different concrete finishes demarcate the shift from public to private space. Seven new bicycle racks provide 14 temporary parking spaces for cyclists visiting the building.

Four new street trees are proposed: two on Durant Avenue and two on Ellsworth Street. The installed trees will be in 24-inch box containers. The tree wells will be surfaced with the new flexi-pave detail that 122 West Design has coordinated with the Forestry Department, allowing water and oxygen into the tree root zones while maintaining accessible path of travel. Selection of the tree species is pending input from Forestry.

GFRC planters fit in between the building's structure providing a punctuated scrim of greenery at the building base. A bioretention planter is located adjacent to the egress discharge within the building's cutout on Ellsworth Street.

The Level 8 roof terrace consists of two program areas articulated by raised planters with integrated bench seating and an accessible unit paving surface. The counter and furnishings at the south area will function as a kitchen/dining area. The planters in the north area also have integrated seating with an overhead trellis that vines will grow into, maximizing the landscape character of the space. A bar height railing at the parapet overlooks the Bay. This area will be a more open and sunny area to have smaller gatherings or breakout sessions.

The project will provide 188 square feet of new landscape area and 5 new trees. Except for the pending final selection of street tree species, approximately 80% of plant material originates from within California so that the project will also provide ecosystem services for local insect populations while minimizing water use. All landscape areas will be irrigated by a WELO-compliant, high efficiency system.

Project Benefits
The proposed project will offer the following in-lieu and mitigation fees, and community benefits to the City of Berkeley:

- Redevelop an underutilized parcel in the Southside area.
- Provide 65 dwelling units of high density and transit-oriented housing.
- Provide 3 affordable dwelling units for Very Low-Income Households at 50% AMI, and 2 affordable dwelling units for Extremely Low-Income Households at 30% AMI.
- Encourage alternative modes of transportation – 0 vehicular spaces.
- Units will be equipped with energy efficient appliances and low flow fixtures, and the site will be planted with drought tolerant landscaping that supports the project's stormwater management plan.
- Compliant with Bird Safe Glass requirements as per BMC 23.304.150.
- Pay in-lieu fees, mitigation fees, and impact fees such as the Affordable Housing Mitigation fee of $1,259,830.19

Community Meeting
On September 4, 2024, the project team held a community meeting to provide information about the project and request feedback from community members. The team invited all owners and occupants within 300 feet of the project site, as well as neighborhood groups, based on a list provided by City staff. The meeting was held at 12 pm virtually over Zoom.

Apart from the project team, one neighbor attended the meeting. The main topics discussed included the anticipated construction timeline, size of the building, and the placement of the building on the project site. Please see attached 2298 Durant Ave Neighborhood Meeting Report for full length responses by the project team.

Statement Regarding Berkeley Energy Code and Berkeley Green Code
The proposed project is designed to comply with the Berkeley Energy Code (BMC Chapter 19.36) and Berkeley Green Code (BMC Chapter 19.37), adopted by the City Council on December 3, 2019, including

a solar PV system as well as energy and water efficiency measures. The building will be solar ready and accommodate solar PV as is physically and financially feasible for the project.

2. PROJECT COMPLIANCE WITH CITY POLICIES

General Plan

The City of Berkeley General Plan designates this project site as Residential Mixed Use (RMU). The Residential Mixed-Use designation is characterized by a diverse mixture of residential, commercial and institutional structures near job centers, shopping districts, and transit hubs.

Southside Area Plan

This site is located within the Southside Area Plan, which was adopted in 2011, with updated zoning regulations adopted in 2023. The site is within the Residential High Density Subarea designation which encourages higher density residential uses close to campus and Telegraph Avenue. The Southside Design Guidelines (2011) acknowledge the eclectic nature of the architecture within the Southside residential neighborhoods and emphasize compatibility of new construction with the scale, massing, quality, and detail evident in older buildings.

Zoning Ordinance

The proposed project site is zoned Residential Southside Mixed Use (R-SMU) which seeks to encourage "high-density, multi-story residential development close to major shopping, transportation, and employment centers" (BMC § 23.202.140(A)(1)). Zoning district standards are designed to promote the provision of dense multi-family housing and dense goods and services to serve the campus population that lives in the Southside Area neighborhood. The proposed project submitted a complete SB 330 preliminary application on August 6, 2024.

Figure 5. Zoning Map: Southside Residential – R-SMU

As shown in Table 1, the proposed project meets all the applicable objective zoning development standards, as modified pursuant to State Density Bonus Law (SDBL) and use permits allowed by the R-SMU zoning regulations.

Table 1: Major Development Standards

Municipal Code Standards	R-SMU Standard	Proposed	Compliance
Building Height, Maximum	85 feet + 5 foot parapet	93 feet 0 inches	Compliant through SDBL waiver
Residential Density, Minimum	150 DU / Acre	232 DU / Acre	Compliant

FAR, Maximum		7.0	6.54	Compliant
Lot Line Setbacks, Minimum	Front (Durant Ave.)	None	0'-4"	Compliant
	Rear	4 feet	5'-5 ¼"	Compliant
	Street Side (Ellsworth St.)	None	5 ½"	Compliant
	Interior Side	None	3'-5"	Compliant
Useable Open Space 40 sq. ft. per 1,000 sq. ft. residential floor area. (D) Max. 50% of UOS may be indoor amenities.		3,159 sq. ft. required (40 SF/ 1000 SF) x 78,965 SF = 3,159, SF required.	1,695 sq. ft. (outdoor: C.3 planter, 116 SF) (indoor amenities: 1,579 SF qualifies due to 50% limit of required UOS max)	Compliant with SDBL waiver
Landscaped Useable Open Space 40% of required sq. ft. (except balconies & indoor space)		40% of (3,159-1,579 SF) = 632 SF required	116 SF	Compliant with SDBL waiver
Parking	Automobile Parking	None	0	Compliant
	Long Term Bicycle Parking	1 space per 3 bedrooms (100 spaces)	0	Compliant with SDBL waiver
	Short Term Bicycle Parking	1 space per 40 bedrooms (6 spaces)	14	Compliant

3. LEGISLATIVE CONTEXT

The housing crisis continues to have a significant impact on Californians across the state. The Government Code sections discussed below are state legislative efforts that recognize the severity of California's housing crisis, and the difficulties associated with developing new housing at appropriately zoned, transit-oriented, and urbanized locations. The proposed housing development project is submitted pursuant to Senate Bill 330 and subject to the modifications and protections of State Density Bonus Law (Gov. Code § 65915) and the Housing Accountability Act (Gov. Code § 65589.5). The project also satisfies the City of Berkeley's inclusionary housing requirement under Berkeley Municipal Code § 22.238.

Housing Accountability Act

The Housing Accountability Act (Gov. Code § 65589.5) requires the City of Berkeley to approve the project because it is consistent with all objective standards. Under the Housing Accountability Act, the City is only permitted to reject a project if it can make findings based on a *preponderance* of evidence that the project would have a significant, unavoidable, and quantifiable impact on "objective, identified written public health or safety standards, policies, or conditions." (Gov. Code §65589.5(j)).

SB 330/Housing Crisis Act

The Housing Crisis Act (Gov. Code § 66300) prohibits a local agency from disapproving, or conditioning approval in a manner that renders infeasible, a housing development project that provides affordable housing. The act also requires that a development project must comply with all applicable, objective general plan and zoning standards and criteria that were in effect at the time the application was deemed to be complete. On August 6, 2024, the project team submitted a complete SB 330 Preliminary Application to the City of Berkeley, effectively freezing fees and regulations as of that date. The law also requires the city or county to consider and either approve or disapprove the housing development project within the five allowable public hearings under the HCA, and consistent with the applicable timelines under the Permit Streamlining Act.

AB 2097 Parking Requirements

AB 2097 (Gov Code § 65585) prohibits a public agency from imposing any minimum automobile parking requirement on most development projects within ½ mile of public transit unless the city makes written findings, within 30 days of the receipt of a completed application, that not imposing or enforcing minimum automobile parking requirements on the project development would have a substantially negative impact, supported by a preponderance of the evidence in the record.

Since the proposed project site is located within ½ mile of public transit (Downtown Berkeley BART Station and intersecting AC Transit services), the project is not subject to minimum parking requirements. Introducing parking in the proposed project will physically preclude the housing development project with the proposed number of units.

State Density Bonus Law Eligibility

The proposed project is eligible for the State Density Bonus (Gov. Code § 65915) because it meets all objective development standards, and provides a sufficient number of units as affordable housing. The project proposes five units housing units affordable to Very-Low Income households, which represents 10% of the base project.

The proposed base project that meets all objective standards includes 49 dwelling units, five of which are affordable for very low-income households (less than 50% AMI). These five affordable units comprise 10% of the proposed base project. Per State Density Bonus Law, that makes this project eligible for a 32.5% density bonus. The level of affordability provided entitles the project to unlimited waivers and two concessions, per Govt. Code § 65915(d)(2)(B). The average unit size for both the base project and density bonus project is 1,215 square feet.

Table 2: Density Bonus

Project Proposals	Market Rate Units	Below Market Rate Units	Total Units
Base Project	44	5	49
Density Bonus Project	60	5 *(10% Very Low Income or below)*	65 *(32.5% SDBL)*

With this density bonus, the project is entitled to use an unlimited number of waivers and up to two concessions for development standards that impede the project's ability to utilize the density bonus or increase feasibility. Tables 3 and 4 below show the five waivers and two concessions that are requested to be granted to accommodate the project. Without these waivers and concessions being granted, the proposed project would not be fiscally viable and could not physically be built as designed.

Table 3: Waivers Requested to Accommodate Density Bonus
If the project were to comply with any of the standards listed below, it would physically preclude the construction of the project as designed and would eliminate the number of proposed residential units.

Standard	Required	Proposed
Allowed Building Height (per BMC § 23.202.140(E)(3))	85 ft. maximum + 5 foot parapet	93 feet 0 inches
Residential Useable Open Space (per BMC Table 23.202-23)	3,159 sq. ft. required (40 SF/ 1000 SF) x 78,965 SF = 3,159, SF required.	1,695 sq. ft.
Landscaped Usable Open Space (per BMC 23.304.090(7)(a))	40% of (3,159-1,579 SF) = 632 SF required	116 SF
Long-Term Bicycle Parking (per BMC 23.322.090(A)(2))	1 space per 3 bedrooms = 298 / 3 = 100 spaces	0 Spaces
Tree Removal (per BMC 12.44.020)	- per BMC 12.44.020	Removal of Camphor Tree within public right of way, which conflicts with underground utilities and the building massing.

Table 4: Concessions Requested to Accommodate Density Bonus
As per Govt. Code § 65915(d)(1)(A), a project may seek concession requests if identifiable and actual cost reductions to provide for affordable housing costs are provided. The level of affordability provided in the proposed project (at least 10% for very low income households or below), entitles the project to two concessions, per Govt. Code § 65915(d)(2)(B). Compliance with the regulations below would render the project financially infeasible.

Regulation	Required	Proposed
BMC § 13.107.050 HARD HATS Ordinance	Provide healthcare coverage.	Exemption from BMC 13.107.050
BMC § 13.108 Southside Plan Prevailing Wage Requirement	Pay general prevailing rate set forth in the California Labor Code.	Exemption from BMC 13.108

City of Berkeley Inclusionary Housing Regulations
This project is also subject to the City of Berkeley's inclusionary housing requirement under Berkeley Municipal Code § 22.238 that requires the project to provide at least 20% of the base project dwelling units as inclusionary units at 80% AMI with the option of paying an in-lieu fee instead of providing the units on-site per Berkeley Municipal Code Section 22.238.030(B).

Alternatively, in lieu of providing affordable units, the proposed project may provide affordable units that comprise at least 20% of residential unit floor area of the project to achieve a mix of affordable units, including two-bedroom or three-bedroom units per Berkeley Municipal Code 23.328.030(A)(2).

This project proposes to provide 10% of the base project units onsite, 5 units, for very low-income households or below, and meet the remainder of the inclusionary requirement through paying the in-lieu fee. The project will enter in a regulatory agreement with the City of Berkeley that ensures that these proposed affordable dwelling units remain deed-restricted for the life of the project

4. CEQA OVERVIEW

The proposed project is eligible for a Class 32 Exemption from the CEQA Guidelines, as justified by the findings below. Further, AB 1633, which went into effect on January 1, 2024, establishes that if certain sites qualify for a Categorical Exemption under CEQA, and a local agency does not make an Exempt determination, it constitutes a violation under the Housing Accountability Act.

California Environmental Quality Act Class 32 Categorial Exemption for Infill Developments (CEQA Guideline § 15332):

a) **The project is consistent with the applicable general plan designation and all applicable general plan policies as well as with applicable zoning designation and regulations.**
The proposed project is a mixed-use project, which is an allowed use in the R-SMU zone, permitted with a Use Permit (and Public Hearing). The proposed project, with the density bonus, waivers, and concessions requested as part of this application, is consistent with all applicable, objective general plan policies and zoning regulations.

b) **The proposed development occurs within city limits on a project site of no more than five acres substantially surrounded by urban uses.**
The project is within the City Limits of Berkeley, south of the University of California Berkeley campus. The total lot area of the proposed project site is 0.28 acres, which is less than five acres. The project site is 100% surrounded by urbanized uses and development.

c) **The project site has no value as habitat for endangered, rare or threatened species.**

The existing condition of the project site is a 3 ½ story apartment building and a 2-story office building. There is no habitat value of any kind for any species (except humans), and the project site certainly does not contain any endangered, rare, or threatened species. The existing apartment was built in 1963, and the medical office was built in 1903. The project site is located in the rapidly developing Southside Area of Berkeley. The site does not contain, nor is it adjacent to, any habitat for rare, endangered, or threatened species.

d) Approval of the project would not result in any significant effects relating to traffic, noise, air quality, or water quality.
The project will not have any significant effects relating to traffic, noise, air quality, or water quality. There will be no vehicle parking onsite, and the site is located in the City of Berkeley's "low-VMT areas". The majority of trips are expected to be pedestrian, bicycle, or public transit trips, so the project will not result in significant effects relating to traffic or air quality. See provided air quality memo for more info.

The proposed project is not located near a stream or other body of water. It has direct access to storm and wastewater sewer connections. The proposed project will not include any sources of air or water pollution. A Stormwater Treatment Control Plan is included in the proposed project to remediate any stormwater runoff. See provided water quality memo for more info.

The proposed project is an allowed multi-family residential use in the R-SMU zoning district. Multi-family residential projects are typical in this location and the neighborhood context adjacent to the University campus. As a multi-family residential project, no significant noise sources will be generated by the project, with the exception of the construction period. The City of Berkeley's generally applicable conditions for construction and noise management will ensure that construction noise is mitigated. See provided Noise Memo for more info.

e) The site can be adequately served by all required utilities and public services.
The project site is within the service boundaries of all necessary utilities, none of which have declared a moratorium, or pending moratorium, on new services.

The proposed project does not trigger any of the following exceptions that would disqualify the project from CEQA's Categorical Exemptions:

"(a) Location. Classes 3, 4, 5, 6, and 11 are qualified by consideration of where the project is to be located – a project that is ordinarily insignificant in its impact on the environment may in a particularly sensitive environment be significant. Therefore, these classes are considered to apply all instances, except where the project may impact on an environmental resource of hazardous or critical concern where designated, precisely mapped, and officially adopted pursuant to law by federal, state, or local agencies.

(b) Cumulative Impact. All exemptions for these classes are inapplicable when the cumulative impact of successive projects of the same type in the same place, over time is significant.

(c) Significant Effect. A categorical exemption shall not be used for an activity where there is a reasonable possibility that the activity will have a significant effect on the environment due to unusual circumstances.

(d) Scenic Highways. A categorical exemption shall not be used for a project which may result in damage to scenic resources, including but not limited to, trees, historic buildings, rock outcroppings, or similar resources, within a highway officially designated mitigation by an adopted negative declaration or certified EIR.

(e) Hazardous Waste Sites. A categorical exemption shall not be used for a project located on a site which is included on any list compiled pursuant to Section 65962.5 of the Government Code.

(f) Historical Resources. A categorical exemption shall not be used for a project which may cause a substantial adverse change in the significance of a historical resource." Based on the Historical Evaluation provided by Preservation Architecture, the two subject properties of the proposed project have not been previously considered or evaluated for historical potential. Additionally, per the City of Berkeley's *Landmarks Preservation Ordinance (LPO),* the adjoined properties and buildings located at 2298 Durant Avenue and 2360 Ellsworth Street are not eligible for designation as a City of Berkeley Landmark or Structure of Merit. See DPR Forms and Historic Resource Evaluation attached with this application package.

None of the exceptions listed above apply to the proposed project, so it is still eligible for Categorical Exemptions under CEQA. Exception (a) is not applicable to the proposed project because it is seeking a Class 32 Categorical Exemption. The proposed impact will not contribute to any cumulative impacts on the environment. This is an infill development project that will not have a significant effect on any CEQA issues. The proposed project is at the intersection of Durant Avenue and Ellsworth Street, which both are not a Scenic Highway. The proposed project is not on a hazardous waste site, as attested to in the "Hazardous Waste & Substances Statement" and detailed in the Phase I Environmental Site Assessment Report. These supportive documents are included as attachments in this application package. The proposed project does not contain a historic resource.

Assembly Bill 1633 (AB 1633), which went into effect on January 1, 2024, establishes that if certain sites qualify for a Categorical Exemption under CEQA, and a local agency does not make an Exempt determination, it constitutes a violation under the Housing Accountability Act (HAA). To be eligible for the protections of AB 1633:

I. The Project cannot be on an environmentally sensitive site or a site subject to certain environmental hazards;
II. The Project must be on a legal parcel, within an urbanized area, and provide certain green benefits;
III. The density of the housing development project meets or exceeds 15 dwelling units per acre; and
IV. There is substantial evidence in the record that the Project qualifies for an exemption, and that it is not subject to any exception to the exemption."

The proposed project meets each of these requirements. The subject site is an urban infill lot that has been developed for over 100 years and is not an environmentally sensitive or hazardous site. The proposed project is on two legal parcels within an urbanized area.

The project will provide green benefits by increasing the supply of housing and offices near public transit, Downtown and Southside services and the University. The new building will be constructed

according to the Berkeley Green Code and Energy Code. The proposed project has a residential density of 232 units per acre.

The project materials provided in this application package provide substantial evidence that the project qualifies for a Class 32 Categorical Exemption. As detailed above, the proposed project is not subject to any exceptions to the exemption criteria. By satisfying each of these eligibility requirements, the proposed project is subject to the protections and provisions of AB 1633.

5. REQUIRED FINDINGS

This section outlines the proposed project's compliance with the required findings for approval of the requested Use Permits for this project.

1. Use Permit, under BMC § 23.202.020(A), to allow a Multi-family Residential Building
2. Administrative Use Permit, under BMC § 23.304.050 to allow rooftop equipment projections.

Use Permit Findings

The project is designed as a housing development project and is only subject to objective general plan and zoning standards and criteria, as per Gov Code § 65589.5(4). To the extent that required findings are objective, they are specified below. Use Permit findings that include subjective regulations cannot be enforced, according to the City's August 2, 2021 *Memo re: Housing Accountability Act & Density Bonus – Objective Standards*.[1]

1. Use Permit, under BMC § 23.204.020(A), to allow a residential building

Table 23.202-1: Allowed Uses in the Residential Districts.
Multi-Family Residential: UP(PH)

Response: Because this Use Permit does not have any objective standards in the required findings, the density bonus project assumes the Use Permit for new construction of a residential building. The construction, establishment, maintenance, and operation of the proposed project will not be detrimental to the health, safety, peace, morals, comfort, or general welfare of the neighborhood or the City as a whole. Multi-family residential projects are a permitted use in the R-SMU district, and the proposed structure is appropriate for the district in that it makes housing available in a convenient location proximate to downtown Berkeley and the UC Berkeley campus.

The proposed project is not anticipated to generate significant traffic or parking demand because it is located in the City of Berkeley's Low Vehicle-Miles Traveled (VMT) Area. This Low

[1] As noted in the City's August 2, 2021 Memo re: Housing Accountability Act & Density Bonus – Objective Standards: "the Zoning Officer, ZAB, DRC and LPC should refrain from applying subjective findings (e.g., nondetrimental) to any application to construct a qualifying housing development project (including remodeling or reconfiguration of housing) if that project satisfies objective standards for permit issuance, unless specific findings or denial under the Housing Accountability Act can be made. While decision-makers retain discretion in the overall land use and design review process, i.e., whether the use is properly located or the building and site improvements are compatibly designed, the ultimate decision on density and development intensity is protected by the HAA."

VMT area includes the Southside Area because the VMTs per resident are an average of 15% less than the rest of the Bay Area. In addition, the proposed project will have a Transportation Demand Management Program that includes secure bicycle parking and real-time transit information display monitors. Future residents will not be eligible for Residential Parking Permits (RPP). The proposed project will comply with all objective standards in the Southside Plan's adopted Mitigation Monitoring Program (MMP). As a result, the project would not be materially detrimental to the housing needs or public interest of the affected neighborhood and the City of Berkeley.

The project is designed as a Housing Development Project and is only subject to objective zoning standards and findings. Use Permit findings that include subjective regulations cannot be enforced, according to the City's August 2, 2021, Memo re: Housing Accountability Act & Density Bonus – Objective Standards. This finding is not an objective requirement.

2. **Administrative Use Permit, under BMC § 23.304.050 to construct rooftop projections which exceed the maximum height.**

Table 23.304-5: Allowed Projections Above Height Limit.
Residential Districts

Response: Because this Administrative Use Permit does not have any objective standards in the required findings, the proposed project assumes the Administrative Use Permit to allow rooftop projections to exceed the district's height limit. Because the proposed building height exceeds the district's height limit, the rooftop projections will also exceed that limit.

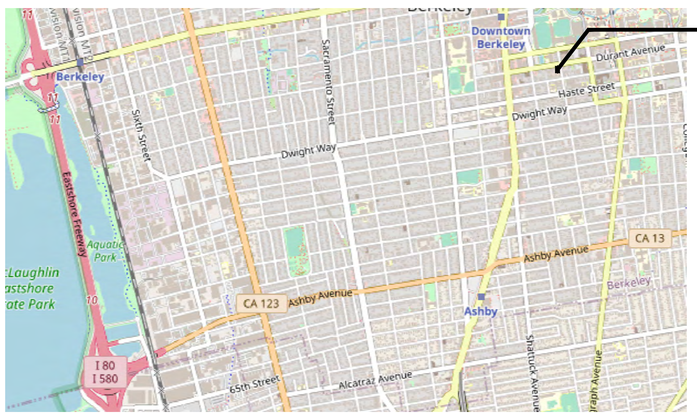
3 ASSESSORS PARCEL MAP

5 LOCATION MAP
N.T.S.



4 VICINITY MAP
N.T.S.

THE SITE'S REDEVELOPMENT WILL INCLUDE THE DEMOLITION OF BOTH EXISTING BUILDINGS AT 2298 DURANT AVE (A 2-STORY COMMERCIAL BUILDING) AND AT 2360 ELLSWORTH STREET (A 3-STORY RESIDENTIAL BUILDING OVER A 1-STORY PARTIALLY SUBTERRANEAN PARKING GARAGE). THE TWO EXISTING LOTS WILL BE MERGED INTO ONE CONTIGUOUS LOT WHOSE FRONT IS ALONG DURANT AVE AND WILL TAKE THE ADDRESS OF 2298 DURANT AVE.

PROPOSED IS AN 8-STORY RESIDENTIAL BUILDING, CONSISTING OF 65 UNITS AND 80,046 GSF OF BUILDING AREA. UNITS INCLUDE 2, 5, & 6 BEDROOM UNITS - ALL WITH IN-UNIT LAUNDRY. THE GROUND FLOOR INCLUDES A GENEROUS LOBBY, TENANT AMENITY SPACES, AND BUILDING UTILITY SPACES FOR ELECTRICAL AND TRASH THAT EXIT DIRECTLY TO ELLSWORTH STREET. OTHER COMMON SPACES INCLUDE AN INDOOR AMENITY AT THE GROUND FLOOR AND A ROOF DECK AT THE 8TH FLOOR.

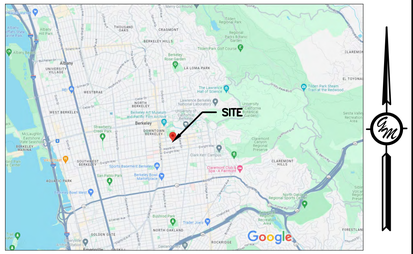
NONE OF SUCH IDEAS, DESIGNS, ARRANGEMENTS OR PLANS SHALL BE USED BY OR DISCLOSED TO ANY PERSON, FIRM OR CORPORATION FOR ANY PURPOSE WHATSOEVER WITHOUT THE WRITTEN PERMISSION OF GREENWOOD & MOORE, INC. WRITTEN DIMENSIONS ON THESE DRAWINGS SHALL HAVE PRECEDENCE OVER SCALE DIMENSIONS. CONTRACTORS SHALL VERIFY AND BE RESPONSIBLE FOR ALL DIMENSIONS AND CONDITIONS ON THE JOB. THIS OFFICE MUST BE NOTIFIED OF ANY VARIATION FROM THE DIMENSIONS AND CONDITIONS SHOWN BY THESE DRAWINGS. SHOP DETAILS OF ADEQUATE SCALE MUST BE SUBMITTED TO THIS OFFICE FOR APPROVAL BEFORE PROCEEDING WITH FABRICATION ON THE ITEMS SO NOTED.



VICINITY MAP

BASIS OF BEARINGS:

THE LINE IN DURANT AVENUE BETWEEN THE STANDARD CITY FOR BERKELEY MONUMENT FOUND AT ELLSWORTH STREET AND THE INTERSECTION OF THE REFERENCE POINTS AT FULTON STREET WAS TAKEN AS N83°00'00"E, PROJECTED AS SHOWN ON PARCEL MAP NO. 10100, FILED IN BOOK 320 OF MAPS, AT PAGES 96 THROUGH 100, ALAMEDA COUNTY RECORDS.

VERTICAL DATUM / BENCHMARK:

ELEVATIONS FOR THIS SURVEY ESTABLISHED BY HOLDING THE ELEVATION OF 211.60' ON THE TOP OF A 3/8^{ins} INCH BRASS PIN IN A MONUMENT WELL FOUND AT THE INTERSECTION OF ELLSWORTH STREET AND DURANT AVENUE, AS SHOWN ON THIS MAP. THIS MONUMENT WAS TAKEN AS CITY OF BERKELEY MONUMENT BO401, HELD PER CORNER RECORD 7052 AND CITY SURVEYOR'S NOTES AS CITY OF BERKELEY DATUM.
ELEVATION = 211.60' COB DATUM

TITLE REPORT NOTE:

THE INFORMATION REGARDING EXISTING EASEMENTS OR OTHER ENCUMBRANCES SHOWN ON THIS SURVEY IS BASED ON FIRST AMERICAN TITLE INSURANCE COMPANY PRELIMINARY TITLE REPORTS PROVIDED TO THE SURVEYOR, THE FIRST HAVING ORDER NUMBER NCS-1183023-CC, DATED MAY 31, 2023, AND THE SECOND HAVING ORDER NUMBER NCS-1177886, AMENDED, DATED APRIL 11, 2023, THERE MAY BE EASEMENTS OR OTHER ENCUMBRANCES OF RECORD THAT EXIST BUT ARE NOT DELINEATED HEREON.

UTILITIES NOTE:

INFORMATION SHOWN ON THIS SURVEY REGARDING EXISTING UTILITIES IS APPROXIMATE ONLY, IS BASED ON VISUAL OBSERVATIONS AND/OR UTILITY COMPANY RECORDS, AND HAS NOT BEEN VERIFIED AS BEING COMPLETE OR CORRECT. THE ENGINEER ASSUMES NO RESPONSIBILITY FOR THE ACCURACY OR COMPLETENESS OF THE EXISTING UTILITY INFORMATION SHOWN HEREON, NOR FOR THE PRESENCE OF OTHER UTILITIES WHICH MAY EXIST BUT ARE NOT SHOWN ON THIS SURVEY.

PROJECT NO. 2024.030
PHASE NO. XX
SHEET NO. C0.1

ALL IDEAS, DESIGNS, ARRANGEMENTS AND PLANS INDICATED OR SHOWN ON THIS DRAWING ARE OWNED BY AND THE PROPERTY OF THE OFFICE AND WERE CREATED, EVOLVED AND DEVELOPED FOR USE ON AND IN CONNECTION WITH THE SPECIFIED PROJECT. NONE OF SUCH IDEAS, DESIGNS, ARRANGEMENTS OR PLANS SHALL BE USED BY OR DISCLOSED TO ANY PERSON, FIRM OR CORPORATION FOR ANY PURPOSE WHATSOEVER WITHOUT THE WRITTEN PERMISSION OF GREENWOOD & MOORE, INC.

WRITTEN DIMENSIONS ON THESE DRAWINGS SHALL HAVE PRECEDENCE OVER SCALE DIMENSIONS. CONTRACTORS SHALL VERIFY AND BE RESPONSIBLE FOR ALL DIMENSIONS AND CONDITIONS ON THE JOB. THIS OFFICE MUST BE NOTIFIED OF ANY VARIATION FROM THE DIMENSIONS AND CONDITIONS SHOWN BY THESE DRAWINGS. SHOP DETAILS OF ADEQUATE SCALE MUST BE SUBMITTED TO THIS OFFICE FOR APPROVAL BEFORE PROCEEDING WITH FABRICATION ON THE ITEMS SO NOTED.

GENERAL NOTES:

1. THESE PLANS AND SPECIFICATIONS ARE SUBJECT TO MODIFICATION DURING CONSTRUCTION WHEN CONDITIONS DEVELOP THAT WERE NOT APPARENT DURING THE DESIGN AND PREPARATION OF THESE PLANS. ALL MODIFICATIONS MUST BE APPROVED BY THE CITY ENGINEER PRIOR TO CONSTRUCTION AND/OR IMPLEMENTATION.
2. ALL IMPROVEMENTS SHALL BE CONSTRUCTED IN ACCORDANCE WITH THE CITY OF BERKELEY STANDARD SPECIFICATIONS AND DETAILS SUBJECT TO THE INSPECTION AND APPROVAL OF THE ENGINEERING DIVISION OF THE PUBLIC WORKS DEPARTMENT. ALL REVISIONS MUST BE APPROVED BY THE CITY PRIOR TO CONSTRUCTION.
3. PRIOR TO COMMENCEMENT OF CONSTRUCTION, A PRE-JOB CONFERENCE SHALL BE REQUESTED BY THE DEVELOPER THROUGH THE CITY ENGINEER,
4. BEFORE COMMENCEMENT OF WORK, THE CONTRACTOR SHALL REVIEW ALL PLANS AND SPECIFICATIONS AND THE JOB SITE. THE CONTRACTOR WILL NOTIFY THE OWNER, THE ENGINEER WHO PREPARED THE PLANS, AND THE CITY ENGINEER OF ANY DISCREPANCIES THAT MAY REQUIRE MODIFICATION TO THESE PLANS OR OF ANY FIELD CONFLICTS.
5. APPROVAL OF THESE PLANS BY THE CITY ENGINEER SHALL NOT RELIEVE THE DEVELOPER OR THE ENGINEER FROM THE RESPONSIBILITY FOR THE DESIGN OF THE IMPROVEMENTS AND FOR ANY DEFICIENCIES RESULTING FROM THE DESIGN THEREOF.
7. ALL LANDSCAPING IS SUBJECT TO CITY INSPECTION. ANY CHANGE IN THE APPROVED LANDSCAPE PLAN MUST BE APPROVED BY THE CITY'S DESIGN REVIEW STAFF.
8. SHOULD IT APPEAR THAT THE WORK TO BE DONE OR ANY MATTER RELATIVE THERETO IS NOT SUFFICIENTLY DETAILED OR EXPLAINED ON THESE PLANS, THE CONTRACTOR SHALL CONTACT THE PROJECT ENGINEER FOR SUCH FURTHER EXPLANATIONS AS MAY BE NECESSARY.
9. IN ACCORDANCE WITH GENERALLY ACCEPTED CONSTRUCTION PRACTICES, THE CONTRACTOR WILL BE REQUIRED TO ASSUME SOLE AND COMPLETE RESPONSIBILITY FOR JOB SITE CONDITIONS DURING THE COURSE OF CONSTRUCTION OF THE PROJECT, INCLUDING SAFETY OF ALL PERSONS AND PROPERTY. THIS REQUIREMENT SHALL BE MADE TO APPLY CONTINUOUSLY AND NOT BE LIMITED TO NORMAL WORKING HOURS. THE CONTRACTOR FURTHER AGREES TO DEFEND, INDEMNIFY, AND HOLD THE CITY, THE OWNER, AND DESIGN PROFESSIONAL HARMLESS FROM ANY AND ALL LIABILITY, REAL OR ALLEGED, IN CONNECTION WITH THE PERFORMANCE OF WORK ON THIS PROJECT, EXCEPT FOR LIABILITY ARISING FROM THE SOLE NEGLIGENCE OF THE OWNER OR DESIGN PROFESSIONAL.
10. THE CONTRACTOR'S ATTENTION IS DIRECTED TO THE REQUIREMENTS OF THE DIVISION OF INDUSTRIAL SAFETY PERTAINING TO "CONFINED SPACES". ANY MANHOLE, CULVERT, DROP INLET OR TRENCH WHICH COULD CONTAIN AIR WHICH IS NOT READILY VENTILATED MAY BE CONSIDERED A "CONFINED SPACE". THE CONTRACTOR SHALL PROVIDE THE NECESSARY SAFETY OR TESTING EQUIPMENT AND PERSONNEL.
11. THE CONTRACTOR SHALL BE HELD RESPONSIBLE FOR ANY AND ALL DAMAGE TO EXISTING STRUCTURES AND/OR UTILITIES DURING CONSTRUCTION, PROPER REPAIR SHOULD BE DONE TO THE SATISFACTION OF THE REPRESENTATIVE OF THE CITY ENGINEER.
12. TO THE EXTENT FEASIBLE, SCHEDULE THE NOISIEST CONSTRUCTION ACTIVITIES DURING TIMES THAT WOULD HAVE THE LEAST IMPACT ON ADJACENT PROPERTIES. THIS WOULD INCLUDE RESTRICTING TYPICAL DEMOLITION AND EXTERIOR CONSTRUCTION ACTIVITIES TO STANDARD HOURS OF 7:00 AM TO 5:30 PM MONDAY THROUGH FRIDAY AND 8:00 AM TO 4:30 PM ON SATURDAY. THE CONTRACTOR SHALL ENSURE THAT ALL EQUIPMENT POWERED BY INTERNAL COMBUSTION ENGINES ARE FITTED EFFECTIVELY WITH MUFFLERS IN GOOD OPERATING CONDITION. WHERE FEASIBLE, NOISE GENERATING EQUIPMENT SHOULD BE STAGED AS FAR AWAY FROM EXISTING RESIDENCES, AND MOBILE EQUIPMENT SHOULD NOT BE ALLOWED TO IDLE UNNECESSARILY NEAR THE RESIDENTIAL OR CHILD CARE USES. THE CONTRACTOR SHALL COORDINATE CONSTRUCTION ACTIVITIES THAT GENERATE NOISE WITH THE OWNER.
13. CONTRACTOR SHALL OBTAIN ENCROACHMENT PERMITS FROM THE CITY OF BERKELEY PUBLIC WORKS PRIOR TO COMMENCING CONSTRUCTION INVOLVING THEIR RIGHT-OF-WAY, AND FOR THE CONSTRUCTION, MODIFICATION, OR CONNECTION TO DEPARTMENT OR DISTRICT-MAINTAINED FACILITIES. ALL WORKMANSHIP, EQUIPMENT AND MATERIALS SHALL CONFORM TO DEPARTMENT STANDARDS AND SPECIFICATIONS.
14. THE FORMS FOR CONCRETE SIDEWALKS, CURBS, GUTTERS AND DRIVEWAYS THAT ARE TO BE CONSTRUCTED TO CONFORM TO EXISTING ROADS SHALL BE INSTALLED TO THE GRADES SHOWN UPON THESE PLANS. PRIOR TO PLACING CONCRETE, THE FORMS SHALL BE INSPECTED AND APPROVED BY THE CITY ENGINEER FOR CONFORMANCE TO EXISTING ROAD IMPROVEMENTS. GRADES OF NEW IMPROVEMENTS ARE SUBJECT TO FIELD ADJUSTMENT TO FIT CONDITIONS.
15. THE PROPOSED STREET STRUCTURAL SECTION IS TO BE DESIGNED BY A REGISTERED CIVIL ENGINEER AND APPROVED BY THE CITY ENGINEER.
16. IN CONFORM AREAS, IF FULL STRUCTURAL SECTION IS NOT FOUND AT THE APPARENT EDGE OF PAVEMENT, FURTHER STREET EXCAVATION WILL BE REQUIRED UNTIL THE FULL SECTION IS ENCOUNTERED.
17. TEMPORARY REPAIRS TO ALL TRENCHES WITHIN THE TRAVELED WAY ON EXISTING ROADS SHALL BE MADE WITHIN TWENTY-FOUR (24) HOURS OF TRENCH OPENING. MINIMUM TEMPORARY REPAIRS SHALL CONSIST OF BACKFILLING AND COMPACTING 6" OF AGGREGATE BASE AND 1" OF TEMPORARY ASPHALTIC SURFACING. PERMANENT REPAIRS, INCLUDING RESTORATION OF THE EXISTING STRUCTURAL SECTION SHALL BE MADE WITHIN FIFTEEN (15) DAYS OF TRENCH OPENING.
18. IN THE EVENT OF ANY DISCREPANCY BETWEEN ANY DRAWING AND THE FIGURES WRITTEN THEREON, THE FIGURES SHALL BE TAKEN AS CORRECT.
19. THE CONTRACTOR SHALL POST EMERGENCY TELEPHONE NUMBERS AT THE JOB SITE FOR THE CONTRACTOR AND PUBLIC WORKS AGENCY.
20. THE CONTRACTOR SHALL PROVIDE FOR INGRESS AND EGRESS TO PRIVATE PROPERTY ADJACENT TO THE WORK THROUGHOUT THE PERIOD OF CONSTRUCTION.
21. THE CONTRACTOR SHALL NOT DISTURB ANY PERMANENT SURVEY POINTS WITHOUT THE CONSENT OF THE CITY ENGINEER. ANY POINTS DESTROYED SHALL BE REPLACED BY A LICENSED SURVEYOR AT THE CONTRACTOR'S EXPENSE.
22. THE CONTRACTOR IS RESPONSIBLE FOR MATCHING EXISTING FACILITIES TO AVOID ANY ABRUPT OR APPARENT CHANGES IN GRADES OR CROSS SLOPES, LOW SPOTS, OR HAZARDOUS CONDITIONS.
23. CONTRACTOR SHALL SALVAGE AND RELOCATE EXISTING STREET SIGNS AND INSTALL NEW SIGNS PER CITY OF BERKELEY SPECIFICATIONS AS REQUIRED.
24. WHERE UNSTABLE OR UNSUITABLE MATERIALS ARE ENCOUNTERED DURING SUB-GRADE PREPARATION, THE AREA IN QUESTION SHALL BE OVER EXCAVATED AND REPLACED BY SELECT BACKFILL MATERIAL AS DIRECTED IN THE FIELD BY THE ENGINEER.
25. ALL TRENCH EXCAVATION AND BACKFILL SHALL BE IN ACCORDANCE WITH THE TRENCH BACKFILL DETAIL, SHOWN ON THESE PLANS.
26. ALL TREES LOCATED WITHIN THE ROADWAY PRISM OR SHOWN TO BE REMOVED IN THE STREET RIGHT-OF-WAY OR EASEMENTS SHALL BE REMOVED COMPLETELY, INCLUDING ROOTS, AND HAULED AWAY.
27. THE CONTRACTOR SHALL NOT REMOVE, DISTURB, OR HARM, IN ANY WAY, ANY TREE NOT SPECIFICALLY DESIGNATED AND APPROVED BY THE INSPECTOR FOR REMOVAL.
28. COMPACTION TESTS SHALL BE PERFORMED ON ALL TRENCHES AND STREET WORK TO VERIFY THAT COMPACTION CONFORMS TO CITY STANDARDS. ALL TESTING WILL BE AT THE DEVELOPER OR CONTRACTOR'S EXPENSE.
29. THE DUTIES OF THE CITY ENGINEER AND PROJECT ENGINEER DO NOT INCLUDE THE ADEQUACY OF THE CONTRACTOR'S SAFETY IN, ON, OR NEAR THE CONSTRUCTION SITE.
30. THE CONTRACTOR SHALL COMPLY WITH THE RULES AND REGULATIONS OF THE STATE CONSTRUCTION SAFETY ORDERS. ALL TRENCHES OVER FIVE FEET IN DEPTH SHALL BE SHORED IN ACCORDANCE WITH CAL-OSHA "CONSTRUCTION SAFETY ORDERS" CURRENT EDITION. CONTRACTOR MUST HAVE VALID TRENCH SHORING PERMIT ISSUED BY CAL-OSHA.
31. TRAFFIC CONTROL SHALL BE PROVIDED IN ACCORDANCE WITH CALTRANS "MANUAL OF TRAFFIC CONTROLS FOR CONSTRUCTION AND MAINTENANCE WORK ZONES" CURRENT EDITION AND THESE PLANS. A TRAFFIC CONTROL PLAN WILL BE REQUIRED AND A PERMIT WILL BE REQUIRED TO IMPLEMENT IT. CONTRACTOR SHALL MEET WITH TRAFFIC AND PUBLIC WORKS TO DISCUSS PROJECT NEEDS AND PREPARE TRAFFIC CONTROL PLANS.
32. THE CONTRACTOR SHALL PROVIDE ALL LIGHTS, SIGNS, BARRICADES, FLAGMEN, OR OTHER DEVICES NECESSARY TO PROVIDE FOR PUBLIC SAFETY. SUBMIT LANE CLOSURE AND TRAFFIC CONTROL PLANS PRIOR TO BEGINNING WORK TO THE CITY ENGINEER FOR APPROVAL.
33. ALL UNDERGROUND UTILITIES WITHIN THE RIGHT-OF-WAY OR ACCESS EASEMENT, INCLUDING MAINS AND LATERALS, SHALL BE INSTALLED AND BACKFILL COMPLETED PRIOR TO THE START OF CURB, SIDEWALK AND PAVING CONSTRUCTION.
34. ALL TRENCH BACKFILL WITHIN THE RIGHT-OF-WAY SHALL BE COMPACTED AS SHOWN IN CITY'S STANDARD PLANS OR AS RECOMMENDED BY THE ENGINEER. IF TESTS SHOW THAT THE ACTUAL COMPACTION HAS NOT EQUALED OR SURPASSED THAT WHICH IS RECOMMENDED, THE ENGINEER SHALL PROVIDE THE PROPOSED ACTION TO BE TAKEN.
35. ALL NEW STORM DRAIN INLETS SHALL BE STENCILED OR STAMPED WITH CITY'S CLEAN WATER PROGRAM STANDARD LOGO, "NO DUMPING – DRAINS TO BAY," PRIOR TO THE ACCEPTANCE OF THE SITE IMPROVEMENTS OR THE FINAL BUILDING INSPECTION, WHICHEVER OCCURS FIRST.
36. CONTRACTOR SHALL NOTIFY UNDERGROUND SERVICE ALERT (USA) AT LEAST TWO WORKING DAYS PRIOR TO ANY EXCAVATION.
37. AN ENGINEERING PERMIT WILL BE REQUIRED FOR ANY WORK IN THE PUBLIC RIGHT-OF-WAY, INCLUDING BUT NOT LIMITED TO CONSTRUCTION STAGING, CONSTRUCTION PARKING, SIDEWALK, DRAINAGE, OR SEWER WORK. THE ENGINEERING PERMIT CAN BE ISSUED AFTER THE BUILDING PERMIT IS APPROVED AND ISSUED. APPROVAL OF THIS BUILDING PERMIT DOES NOT AUTHORIZE WORK IN THE PUBLIC RIGHT-OF-WAY.

DEMOLITION NOTES:

1. THE EXTENT OF DEMOLITION WORK IS TO BE AS SHOWN ON THIS PLAN. DEMOLITION INCLUDES COMPLETE WRECKING, REMOVAL AND DISPOSAL OF STRUCTURES, BURIED DEBRIS, FOUNDATIONS, PAVEMENT, CURBS, TREES & SHRUBS (INCLUDING ROOT SYSTEMS), DRAINAGE STRUCTURES, UTILITIES, SIGNAGE, LANDSCAPING AND/OR IRRIGATION SYSTEM, UNLESS OTHERWISE INDICATED ON THIS PLAN OR OTHERWISE DIRECTED BY THE OWNER OR HIS REPRESENTATIVE. EXISTING PERIMETER FENCES ARE TO REMAIN UNLESS OTHERWISE DIRECTED BY THE OWNER OR HIS REPRESENTATIVE
2. THIS DEMOLITION PLAN IS NOT INTENDED TO DETERMINE THE METHOD, DETAILS AND/OR MEANS OF PERFORMING THE DEMOLITION WORK. THIS PLAN MAKES NO INQUIRY OR DETERMINATION AS TO THE EXISTENCE OF HAZARDOUS OR TOXIC MATERIALS EXISTING ON SITE. IT IS RECOMMENDED THAT AN INDEPENDENT INQUIRY BE UNDERTAKEN PRIOR TO DEMOLITION WORK TO DETERMINE THE EXISTENCE OF ANY POTENTIAL HAZARDOUS OR TOXIC RISK.
3. THE CONTRACTOR SHALL BE RESPONSIBLE FOR LOCATING ALL EXISTING UNDERGROUND UTILITIES, WHETHER SHOWN ON THESE PLANS OR NOT, PRIOR TO THE COMMENCEMENT OF ANY DEMOLITION WORK.
4. ALL EXISTING UTILITIES AND APPURTENANCES THERETO SERVING ANY EXISTING STRUCTURE OR BUILDINGS AND THOSE IN THE PUBLIC RIGHT OF WAY SERVING PUBLIC UTILITIES ARE TO REMAIN AND SHALL BE PROTECTED IN PLACE UNLESS DIRECTED TO BE REMOVED AND REPLACED ELSEWHERE ON THESE PLANS.
5. THE CONTRACTOR SHALL CONTACT ALL ASSOCIATED UTILITY SUPPLIERS PRIOR TO DEMOLITION TO COORDINATE THE DISCONNECTION AND REMOVAL OR ABANDONMENT OF UTILITIES (I.E. TELEPHONE, ELECTRICAL, WATER, SEWER, ETC.) SERVING THE STRUCTURE TO BE DEMOLISHED.
6. THE CONTRACTOR SHALL OBTAIN A LIST OF ITEMS TO BE SALVAGED FROM THE OWNER PRIOR TO COMMENCING THE DEMOLITION WORK.
7. THE FINISHED GROUND SURFACE SHALL BE LEFT IN A SMOOTH, UNIFORM GRADED CONDITION.
8. DEMOLITION OPERATIONS AND REMOVAL OF DEBRIS SHALL BE CONDUCTED IN A MANNER TO INSURE MINIMUM INTERFERENCE WITH STREETS, SIDEWALKS AND OTHER ADJACENT OCCUPIED OR UTILIZED FACILITIES.
9. THE CONTRACTOR SHALL INSURE THE SAFE PASSAGE OF PERSONS AROUND THE DEMOLITION AREA. CONDUCT OPERATIONS TO PREVENT DAMAGE TO ADJACENT BUILDINGS, STRUCTURES AND OTHER FACILITIES.
10. THE CONTRACTOR SHALL PROMPTLY REPAIR ANY DAMAGE CAUSED TO ADJACENT FACILITIES BY DEMOLITION OPERATIONS AT NO COST TO THE OWNER.
11. USE WATER SPRINKLING, TEMPORARY ENCLOSURES AND OTHER SUITABLE METHODS TO LIMIT DUST AND DIRT SCATTERING AND RISING IN AIR TO LOWEST PRACTICAL LEVEL. COMPLY WITH GOVERNING REGULATIONS PERTAINING TO ENVIRONMENTAL PROTECTION. CONTRACTOR IS RESPONSIBLE FOR CLEANLINESS OF ADJACENT STRUCTURES AND IMPROVEMENTS. SUCH IMPROVEMENTS SHALL BE KEPT FREE OF DUST, DIRT AND DEBRIS CAUSED BY DEMOLITION OPERATIONS. RETURN ADJACENT AREAS TO CONDITIONS EXISTING PRIOR TO START OF WORK.
12. DUST CONTROLS SHALL BE IMPLEMENTED DURING ALL DEMOLITION AND GRADING OPERATIONS. PUBLIC STREETS SHALL BE SWEPT CLEAN AS NECESSARY.
13. THE GENERAL CONTRACTOR SHALL BE RESPONSIBLE FOR ALL REQUIRED TRAFFIC CONTROL AND SAFETY ISSUES.
14. THE GENERAL CONTRACTOR SHALL BE RESPONSIBLE FOR ALL CONSTRUCTION COORDINATION WITH ALL ADJACENT PROPERTY OWNERS FOR WORK TO BE PERFORMED ON THEIR PROPERTIES.
15. THE GENERAL CONTRACTOR SHALL BE RESPONSIBLE FOR THE DESIGN AND INSTALLATION OF ALL REQUIRED TEMPORARY ACCESS DEVICES (TRENCH PLATES, FENCES, ETC) AS REQUIRED TO ALLOW ACCESS DURING THE COURSE OF CONSTRUCTION.
16. ALL DEMOLITION WORK SHALL BE IN ACCORDANCE WITH CITY SPECIFICATIONS AND STANDARDS.
17. FIELD VERIFY ALL UTILITY TERMINATION POINTS, SIZES AND LOCATIONS PRIOR TO CONSTRUCTION. ALL UTILITIES TO BE CAPPED, ABANDONED OR MODIFIED SHOULD BE "POTHOLED" TO CONFIRM THEIR SIZE, LOCATION AND CONFIGURATION PRIOR TO CONSTRUCTION.
18. GENERAL CONTRACTOR SHALL PROVIDE A UTILITY REMOVAL/RELOCATION PLAN FOR CLIENT'S REVIEW PRIOR TO CONSTRUCTION.

GRADING NOTES:

1. THE DEVELOPER SHALL, AT HIS SOLE EXPENSE, MAKE TESTS OVER THE SOIL ON WHICH THE ROAD SURFACING AND BASE IS TO BE CONSTRUCTED.
2. A REPRESENTATIVE OF THE SOILS ENGINEER SHALL BE ON THE SITE DURING GRADING OPERATIONS AND SHALL OBSERVE THE GRADING AND IDENTIFY ANY CONDITIONS THAT SHOULD BE CORRECTED AND RECOMMEND CORRECTIVE MEASURES TO THE CONTRACTOR AND THE CITY ENGINEER.
3. GRADING AT THE BOUNDARIES OF THIS PROJECT SHALL BE DONE SO AS NOT TO OBSTRUCT THE RUNOFF OF STORM WATERS FROM ADJACENT PROPERTIES. ALL GRADING SHALL BE DONE TO PROVIDE STABLE SLOPES WHICH SHALL DRAIN ONTO THIS PROJECT, WHICH IN TURN SHALL BE GRADED TO STREETS OR DRAINAGE DITCHES OR ACROSS LAND WITHIN THIS PROJECT, WHICH IN TURN SHALL BE GRADED TO STREETS OR TO DRAINAGE FACILITIES SHOWN ON THESE PLANS. GRADING SHALL BE DONE IN SUCH A MANNER THAT ALL NEW SLOPES SHALL DIRECT STORM WATER TO THE STREETS OR INTERCEPTION DITCHES OR ACROSS LAND WITHIN THIS PROJECT AND SHALL NOT DIVERT OR CREATE A MEANS FOR STORM WATER TO FLOW ONTO ADJACENT PROPERTIES, EXCEPT AS INDICATED ON THE PLANS.
4. GRADING SHALL NOT BE PERMITTED ON THE SITE UNTIL A GRADING PERMIT IS ISSUED IN ACCORDANCE WITH THE CITY OF BERKELEY GENERAL ORDINANCE AND CODES FOR GRADING, EROSION AND SEDIMENT CONTROLS.
5. ALL GRADING, EROSION AND SEDIMENTATION CONTROL AND RELATED WORK UNDERTAKEN ON THIS SITE IS SUBJECT TO ALL TERMS AND CONDITIONS OF THE GRADING ORDINANCE AND APPLICATION FOR GRADING.
6. IF GRADING ON THE SITE IS STARTED, CONTINUED OR ABANDONED BETWEEN OCTOBER FIRST AND APRIL FIFTEENTH OF ANY YEAR OF CONSTRUCTION, ALL EROSION AND SEDIMENT CONTROL IMPROVEMENTS AND PLANTING SHALL BE COMPLETED PRIOR TO OCTOBER FIRST.
7. CONTRACTOR SHALL KEEP EXISTING STREETS FREE FROM DIRT AND DEBRIS DURING ALL PHASES OF CONSTRUCTION TO THE SATISFACTION OF THE CITY ENGINEER. ALL TRASH, CONSTRUCTION DEBRIS, AND MATERIALS WILL BE CONTAINED ON SITE UNTIL DISPOSAL OFF-SITE CAN BE ARRANGED.
8. DUST CONTROL MEASURES AS APPROVED BY THE CITY ENGINEER SHALL BE FOLLOWED IN ALL AREAS UNDERGOING GRADING AND OTHER CONSTRUCTION ACTIVITIES.

THE GRADING WORK DEPICTED HEREON SHALL CONFORM TO THE RECOMMENDATIONS CONTAINED IN THE SOIL INVESTIGATION TITLED "GEOTECHNICAL INVESTIGATION PROPOSED RESIDENTIAL BUILDING 2298 DURANT AVENUE BERKELEY, CALIFORNIA."

PREPARED BY:
ROCKRIDGE GEOTECHNICAL
1350 OCEAN AVE.
EMERYVILLE, CA 94608
(510) 420-5738

9. WHERE SOIL OR GEOLOGIC CONDITIONS ENCOUNTERED IN GRADING OPERATIONS ARE DIFFERENT FROM THOSE ANTICIPATED IN THE SOIL AND GEOLOGIC INVESTIGATION REPORT, OR WHERE CONDITIONS WARRANT CHANGES TO THE RECOMMENDATIONS CONTAINED THEREIN, A REVISED SOIL OR GEOLOGIC REPORT SHALL BE SUBMITTED FOR APPROVAL AND SHALL BE ACCOMPANIED BY AN ENGINEERS OPINION AS TO THE SAFETY OF THE SITE FROM THE POSSIBILITY OF LAND SLIPPAGE, SETTLEMENT AND SEISMIC ACTIVITY.
10. THE PROJECT ENGINEER AND GEOLOGIST SHALL PROVIDE A DECLARATION STATING THAT ALL WORK WAS DONE IN ACCORDANCE WITH THE APPROVED PLANS AND SPECIFICATIONS AND THE RECOMMENDATIONS CONTAINED IN THE SOIL AND GEOLOGIC REPORT.
11. THE SOILS ENGINEER SHALL BE NOTIFIED AT LEAST TWO (2) WORKING DAYS PRIOR TO PLACEMENT OF FILL SO THAT ARRANGEMENTS FOR INSPECTION CAN BE MADE.
12. THE CONTRACTOR SHALL ARRANGE A PRE-CONSTRUCTION MEETING WITH THE CITY ENGINEER BEFORE THE START OF CONSTRUCTION. THE CONTRACTOR SHALL CONTACT THE REVIEW ENGINEER AT (510) 581-2772 TO ARRANGE A TIME FOR THE MEETING.
13. OPERATIONS SHALL CEASE IN THE VICINITY OF ANY SUSPECTED ARCHAEOLOGICAL RESOURCE UNTIL AN ARCHAEOLOGIST IS CONSULTED AND HIS OR HER RECOMMENDATIONS FOLLOWED, SUBJECT TO APPROVAL BY THE PLANNING DIRECTOR. IF EVIDENCE OF HUMAN REMAINS IS DISCOVERED ON THE SITE, THE COUNTY CORONER SHALL BE NOTIFIED IMMEDIATELY.
14. ANY WATER WELL, CATHODIC PROTECTION WELL OR EXPLORATORY BORING THAT IS SHOWN ON THESE PLANS, IS KNOWN TO EXIST, IS PROPOSED OR IS LOCATED DURING THE COURSE OF FIELD OPERATIONS MUST BE PROPERLY DESTROYED, BACKFILLED OR MAINTAINED IN ACCORDANCE WITH THECITY OF BERKELEY REGULATIONS.
15. EXISTING UNDERGROUND FACILITIES AS SHOWN ARE APPROXIMATE ONLY AND WERE OBTAINED FROM AVAILABLE UTILITY RECORDS. THE PROJECT ENGINEER ASSUMES NO RESPONSIBILITY FOR THE ACCURACY OR COMPLETENESS OF EXISTING UTILITY INFORMATION. IT SHALL BE THE CONTRACTOR'S RESPONSIBILITY TO CONTACT ALL LOCAL UTILITIES AND TO HAVE ALL FACILITIES LOCATED AND EXPOSED TO VERIFY THE CLEARANCE AT NEW PIPE CROSSINGS PRIOR TO THE START OF NEW PIPELINE CONSTRUCTION.

FIRE PROTECTION AND DOMESTIC WATER NOTES:

1. ALL DOMESTIC WATER LINES 4" AND LARGER SHALL BE C900, CLASS 200 PIPE. DOMESTIC WATER LINES SMALLER THAN 4" SHALL BE PVC SCHEDULE 80.
2. EBMUD SPECIFICATIONS AND STANDARDS ARE INCORPORATED HEREON BY REFERENCE. ALL DOMESTIC AND FIRE WATER LINE CONSTRUCTION FROM THE CONNECTION TO THE MAIN TO THE BACKFLOW/DOUBLE DETECTOR CHECK VALVE SHALL BE INSTALLED PER EBMUD STANDARDS AND SPECIFICATIONS.
3. AN EBMUD PERMIT IS REQUIRED FOR CONNECTIONS TO EBMUD FACILITIES.
4. ALL EXISTING WATER SERVICES TO BE ABANDONED SHALL BE DONE PER EBMUD STANDARDS AND SPECIFICATIONS.
5. INSTALL LOCATOR WIRE DIRECTLY ON TOP OF THE PIPE AND MAGNETIC TAPE WITHIN 12" ABOVE ALL PLASTIC WATER PIPES.
6. THE FIRE SYSTEM DESIGN SHOWN ON THESE PLANS ARE FOR GENERAL PURPOSES ONLY. REFER TO FIRE SYSTEM SHOP DRAWINGS AND SPECIFICATIONS, BY GENERAL CONTRACTOR, FOR ADDITIONAL INFORMATION.

UTILITY NOTES:

1. FIELD VERIFY ALL UTILITY TERMINATION POINTS, SIZES AND LOCATIONS PRIOR TO CONSTRUCTION. ALL UTILITIES TO BE CAPPED, ABANDONED OR MODIFIED SHOULD BE "POTHOLED" TO CONFIRM THEIR SIZE, LOCATION AND CONFIGURATION PRIOR TO CONSTRUCTION.
2. GENERAL CONTRACTOR SHALL PROVIDE A UTILITY REMOVAL/RELOCATION PLAN FOR CLIENT'S REVIEW PRIOR TO CONSTRUCTION.
3. IT IS RECOMMENDED THAT ALL EXISTING UTILITIES THAT ARE TO BE REMOVED, RELOCATED, MODIFIED OR IMPACTED BY THE PROPOSED CONSTRUCTION BE FIELD LOCATED BY THE GENERAL CONTRACTOR PRIOR TO THE START OF CONSTRUCTION. THE INTENT OF THE UTILITY DESIGN IS TO CONTINUE TO USE THE MAJORITY OF THE EXISTING UTILITIES. THE LOCATION OF MOST OF THE UTILITIES ARE UNKNOWN OR UNVERIFIED. IF THE EXISTING UTILITIES ARE NOT LOCATED AS INDICATED ON THE PLAN, SUBSTANTIAL REDESIGN WORK MAY BE REQUIRED. THE GENERAL CONTRACTOR SHALL NOTIFY THE ENGINEER OF ANY DISCREPANCIES IN THE PLANS.
4. DEMOLISH AND REMOVE ALL EXISTING UTILITIES AND SUPPORT STRUCTURES AT BUILDINGS TO BE REMOVED.
5. ALL EXISTING UTILITY BOXES, LIDS, VALVE COVERS, VAULTS, ETC. THAT ARE TO REMAIN SHALL BE ADJUSTED TO MEET THE NEW FINISHED GRADES (AS REQUIRED). RE-USE EXISTING BOXES, LIDS, VALVE COVERS, VAULTS (IF POSSIBLE), OR INSTALL NEW PER COUNTY REQUIREMENTS. REPLACE ALL DAMAGED ITEMS. MATCH EXISTING SIZES. INSTALL/REPLACE TRAFFIC RATED BOXES WHERE REQUIRED. FIELD VERIFY THE EXTENT OF WORK.
6. REMOVE OR ABANDON ALL UNUSED SITE UTILITIES PER LOCAL REQUIREMENTS. FIELD VERIFY EXTENT OF REMOVAL.
7. THE CONTRACTOR IS RESPONSIBLE TO NOTIFY ALL UTILITIES AND UNDERGROUND SERVICE ALERT AT (800) 227-2600 48 HOURS PRIOR TO ANY EXCAVATION SO THAT THEIR LINES CAN BE MARKED.
8. ABANDONED UNDERGROUND STRUCTURES ENCOUNTERED IN THE STREET AREAS SHALL BE REMOVED TO SUFFICIENT DEPTH TO ALLOW UNDERGROUND LINES TO CROSS. EXCAVATED AREAS SHALL BE FILLED AND COMPACTED DURING ROUGH GRADING. THE COUNTY INSPECTOR MAY REQUIRE ADDITIONAL WORK BE DONE IF VISUAL INSPECTION INDICATES IT IS NECESSARY.
9. EXISTING UNDERGROUND FACILITIES AS SHOWN ARE APPROXIMATE ONLY AND WERE OBTAINED FROM AVAILABLE UTILITY RECORDS. THE PROJECT ENGINEER ASSUMES NO RESPONSIBILITY FOR THE ACCURACY OR COMPLETENESS OF EXISTING UTILITY INFORMATION. IT SHALL BE THE CONTRACTOR'S RESPONSIBILITY TO CONTACT ALL LOCAL UTILITIES AND TO HAVE ALL FACILITIES LOCATED AND EXPOSED TO VERIFY THE CLEARANCE AT NEW PIPE CROSSINGS PRIOR TO THE START OF NEW PIPELINE CONSTRUCTION.
10. ANY RELOCATION OF THE PUBLIC UTILITIES SHALL BE DONE IN ACCORDANCE WITH ANY AND ALL REQUIREMENTS OF THE UTILITY COMPANY AND WITH REGARD TO THE REQUIRED FEES, BONDS, PERMITS. WORKING CONDITIONS, ETC. OF SAID COMPANY. THIS WORK SHALL BE DONE AT NO EXPENSE TO THE COUNTY OF ALAMEDA. THE SUBDIVIDER SHALL PAY THE COST OF ALL SAID FEES. BONDS, PERMITS, ETC.
11. MINIMUM COVER FOR CONDUITS SHALL BE 36" UNLESS OTHERWISE SHOWN OR NOTED ON THESE PLANS OR ON UTILITY PLANS (BY OTHERS).

SANITARY SEWER NOTES:

1. CITY OF BERKELEY SPECIFICATIONS ARE INCORPORATED HEREON BY REFERENCE. SANITARY SEWER MAINS AND LATERALS SHALL BE INSTALLED AT THE LOCATIONS SHOWN HEREIN OR AS SPECIFIED IN THE FIELD BY DEVELOPER.
2. ALL SANITARY SEWER MAINS AND LATERALS SHALL BE CONSTRUCTED USING HDPE SDR-17 UNLESS OTHERWISE NOTED ON THE PLANS.

STORM DRAIN NOTES:

1. ALL STORM DRAIN PIPES SHALL BE HDPE SDR-17 OR BETTER, UNLESS OTHERWISE NOTED ON THE PLANS.
2. ALL ONSITE STORM DRAIN INLETS SHALL BE CLEARLY MARKED WITH THE WORDS "NO DUMPING! FLOWS TO BAY." OR EQUIVALENT.

TREE PRESERVATION NOTES:

1. ALL TRENCHING WITHIN 5' OF AN EXISTING TREE MUST BE DONE USING AN AIRSPADE PNEUMATIC EXCAVATION TOOL BY A TREE SERVICES CONTRACTOR WITH A D-49 STATE CONTRACTORS LICENSE. THE CITY'S ARBORIST SHALL INSPECT EXCAVATION PRIOR TO ANY ROOTS BEING CUT. CALL (510) 981-6660 TO SCHEDULE AN INSPECTION. ROOTS OVER 2" IN DIAMETER MAY REQUIRE PRESERVATION. ONLY A LICENSED AND INSURED TREE SERVICES CONTRACTOR MAY PRUNE THE TREE ROOTS. ROOTS ARE TO BE CUT WITH A SHARP AXE OF SAW. THE EXCAVATION SHALL NOT BE LEFT OPEN AND ROOTS EXPOSED TO AIR FOR MORE THAN 24 HOURS.

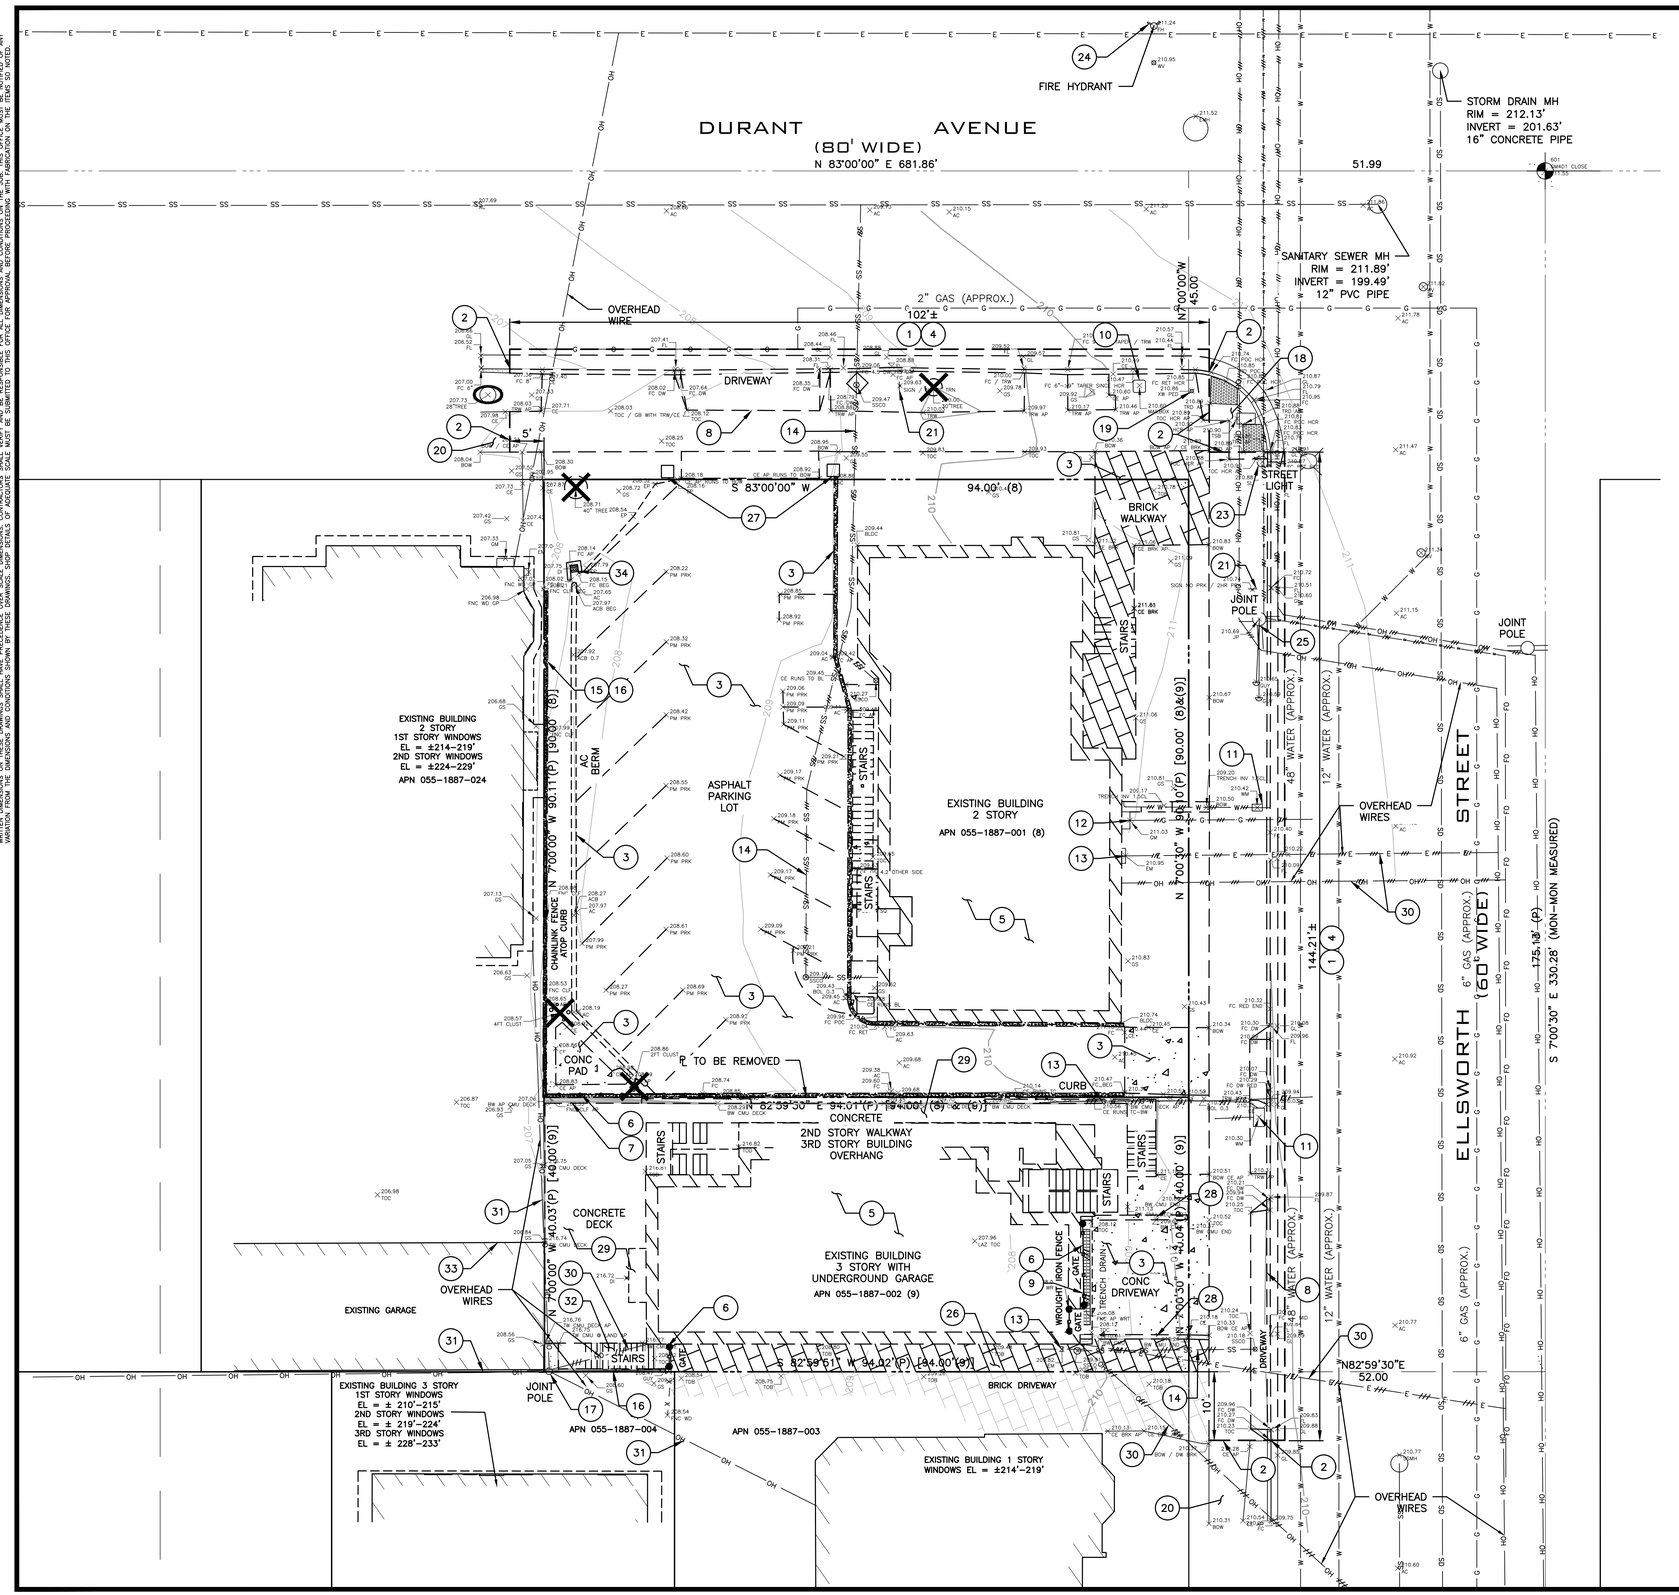
DEMOLITION NOTES:

SEE SHEET C2.0 FOR ADDITIONAL INFORMATION NOT SHOWN

1. THE CONTRACTOR SHALL BE RESPONSIBLE FOR LOCATING ALL EXISTING UNDERGROUND UTILITIES, WHETHER SHOWN ON THESE PLANS OR NOT, PRIOR TO THE COMMENCEMENT OF ANY DEMOLITION WORK.
2. ALL EXISTING UTILITIES AND APPURTENANCES THERETO SERVING ANY EXISTING STRUCTURE OR BUILDINGS AND THOSE IN THE PUBLIC RIGHT OF WAY SERVING PUBLIC UTILITIES ARE TO REMAIN AND SHALL BE PROTECTED IN PLACE. THE CONTRACTOR SHALL BE RESPONSIBLE FOR RELOCATING OR REMOVING ALL UTILITIES IMPACTED BY THE PROPOSED CONSTRUCTION WHETHER OR NOT INDICATED ON THE PLANS.
3. THE CONTRACTOR SHALL CONTACT ALL ASSOCIATED UTILITY SUPPLIERS PRIOR TO DEMOLITION TO COORDINATE THE D

ALL IDEAS, DESIGNS, ARRANGEMENTS, AND PLANS INDICATED ON THIS DRAWING ARE OWNED BY AND THE PROPERTY OF THE OFFICE AND WERE CREATED, EVOLVED AND DEVELOPED FOR USE ON - AND IN CONNECTION WITH THE SPECIFIED PROJECT. NONE OF SUCH IDEAS, DESIGNS, ARRANGEMENTS OR PLANS SHALL BE USED BY OR DISCLOSED TO ANY PERSON, FIRM OR CORPORATION FOR ANY PURPOSE WHATSOEVER WITHOUT THE WRITTEN PERMISSION OF GREENWOOD & MOORE, INC.

WRITTEN DIMENSIONS ON THESE DRAWINGS SHALL HAVE PRECEDENCE OVER SCALE DIMENSIONS. CONTRACTORS SHALL VERIFY AND BE RESPONSIBLE FOR ALL DIMENSIONS AND CONDITIONS ON THE JOB. THIS OFFICE MUST BE NOTIFIED OF ANY VARIATION FROM THE DIMENSIONS AND CONDITIONS SHOWN BY THESE DRAWINGS. SHOP DETAILS OF ADEQUATE SCALE MUST BE SUBMITTED TO THIS OFFICE FOR APPROVAL BEFORE PROCEEDING WITH FABRICATION ON THE ITEMS SO NOTED.



KEYNOTES:

1. SAWCUT
2. LIMIT OF REMOVAL
3. REMOVE (E) CONCRETE/ASPHALT/BRICK
4. REMOVE (E) SIDEWALK, CURB, & GUTTER
5. (E) BUILDING & FOUNDATION TO BE DEMOLISHED, REMOVE (E) ASSOCIATED RETAINING WALLS AND FOUNDATION. PG&E TO DISCONNECT ELECTRIC AND GAS SERVICE PRIOR TO DEMOLITION OF THE (E) BUILDING.
6. REMOVE (E) FENCE AND/OR GATE
7. REMOVE (E) RETAINING WALL
8. REMOVE (E) DRIVEWAY
9. REMOVE (E) TRENCH DRAIN
10. REMOVE & REINSTALL (E) MAILBOX. COORDINATE REMOVAL & REINSTALLATION WITH UNITED STATES POSTAL SERVICE.
11. REMOVE (E) WATER METER. CAP AND ABANDON (E) WATER LATERAL PER EBMUD STANDARDS (BY EBMUD)
12. PG&E TO REMOVE (E) GAS METER AND GAS LATERAL PRIOR TO DEMOLITION OF THE BUILDING. CONTRACTOR TO VERIFY LOCATION IN FIELD. CAP & ABANDON PER PG&E STANDARDS & REQUIREMENTS.
13. PG&E TO REMOVE (E) ELECTRIC METERS AND ASSOCIATED ELECTRIC LINE PRIOR TO DEMOLITION OF THE BUILDING. COORDINATE REMOVAL WITH OWNER AND PG&E.
14. ABANDON (E) SEWER LATERAL PER CITY OF BERKELEY REQUIREMENTS. FOR BUILDING DEMOLITION AND LATERAL ABANDONMENT: WHEN A BUILDING IS TO BE DEMOLISHED AND THE EXISTING LATERAL IS NOT TO BE RE–USED, THE LATERAL SEWER SHALL BE DUG AND EXPOSED WHERE IT ENTERS THE MAIN.
    A. IF THE LATERAL ENTERS THE MAIN BY MEANS OF A FACTORY MANUFACTURED WYE OR TEE BRANCH, AND IF THE MAIN AND WYE OR TEE BRANCH ARE ALL IN GOOD, UNDAMAGED CONDITION, THE LATERAL SHALL BE DISCONNECTED AND THE BRANCH SHALL BE PLUGGED WITH AN EXPANDABLE NEOPRENE RUBBER PLUG AT THE MAIN. THE BRANCH PLUG SHALL BE SHALL BE ENCLOSED WITH A MINIMUM THICKNESS OF 6 INCHES OF 6 SACK, ½" SIZE AGGREGATE. PORTLAND CEMENT CONCRETE. THE WYE BRANCH WITH RUBBER PLUG MUST BE INSPECTED AND APPROVED BY AN ENGINEERING INSPECTOR PRIOR TO ENCLOSURE WITH CONCRETE AND BACKFILL OF THE TRENCH.
    B. IF THE LATERAL ENTERS THE MAIN BY ANY METHOD OTHER THAN BY A FACTORY WYE OR TEE BRANCH, OR IF THE EXISTING MAIN, WYE OR TEE BRANCH IS DAMAGED IN ANY WAY, THE SECTION OF MAIN CONTAINING THE LATERAL ENTRY OPENING SHALL BE REMOVED AND REPLACED WITH A NEW SECTION OF PIPE OF THE SAME DIAMETER AS THE EXISTING MAIN. AN ENGINEERING INSPECTOR MUST INSPECT THE NEW MAIN SECTION BEFORE BACKFILL.
    C. THE ABANDONED LATERAL PIPE SHALL BE FILLED WITH SAND AND JETTED TO PREVENT THE PIPE FROM BECOMING A HOME FOR RODENTS OR OTHER DISEASE VECTORS.
    D. REMOVE (E) CLEANOUT FRAME & COVER.
15. REMOVE (E) CONCRETE WALL. COORDINATE REMOVAL WITH ADJACENT PROPERTY OWNER.
16. REMOVE (E) FENCE. COORDINATE REMOVAL WITH ADJACENT PROPERTY OWNER.
17. (E) JOINT POLE WITH GUY WIRE TO REMAIN
18. (E) ACCESSIBLE RAMP TO REMAIN
19. (E) CROSSWALK BUTTON/BOLLARD TO REMAIN
20. (E) CONCRETE TO REMAIN
21. (E) SIGN TO REMAIN
22. (E) CURB & GUTTER TO REMAIN
23. (E) LIGHT POLE TO REMAIN
24. (E) FIRE HYDRANT TO REMAIN
25. REMOVE (E) JOINT POLE & UNDERGROUND (E) OVERHEAD UTILITIES (BY OTHERS)
26. REMOVE (E) BRICK PAVERS TO PROPERTY LINE
27. REMOVE (E) BRICK POST
28. REMOVE (E) RETAINING WALL AND FOUNDATION.
29. REMOVED (E) CONCRETE DECK, WALLS AND FOUNDATION.
30. REMOVE (E) OVERHEAD UTILITY LINE TO BUILDING. COORDINATE REMOVAL WITH APPROPRIATE UTILITY MUNICIPALITY.
31. (E) OVERHEAD UTILITY LINE TO REMAIN.
32. REMOVE (E) CONCRETE STEPS.
33. PROTECT (E) BUILDING ON ADJACENT PROPERTY DURING DEMOLITION.
34. (E) DRAIN INLET AND STORM DRAIN TO REMAIN DURING DEMOLITION. REMOVE (E) DRAIN INLET AND STORM DRAIN PRIOR TO CONSTRUCTION OF (N) BUILDING FOUNDATION.

X REMOVE (E) TREE AND/OR (E) STUMP

O (E) TREE TO REMAIN. PROTECT TREE DURING CONSTRUCTION

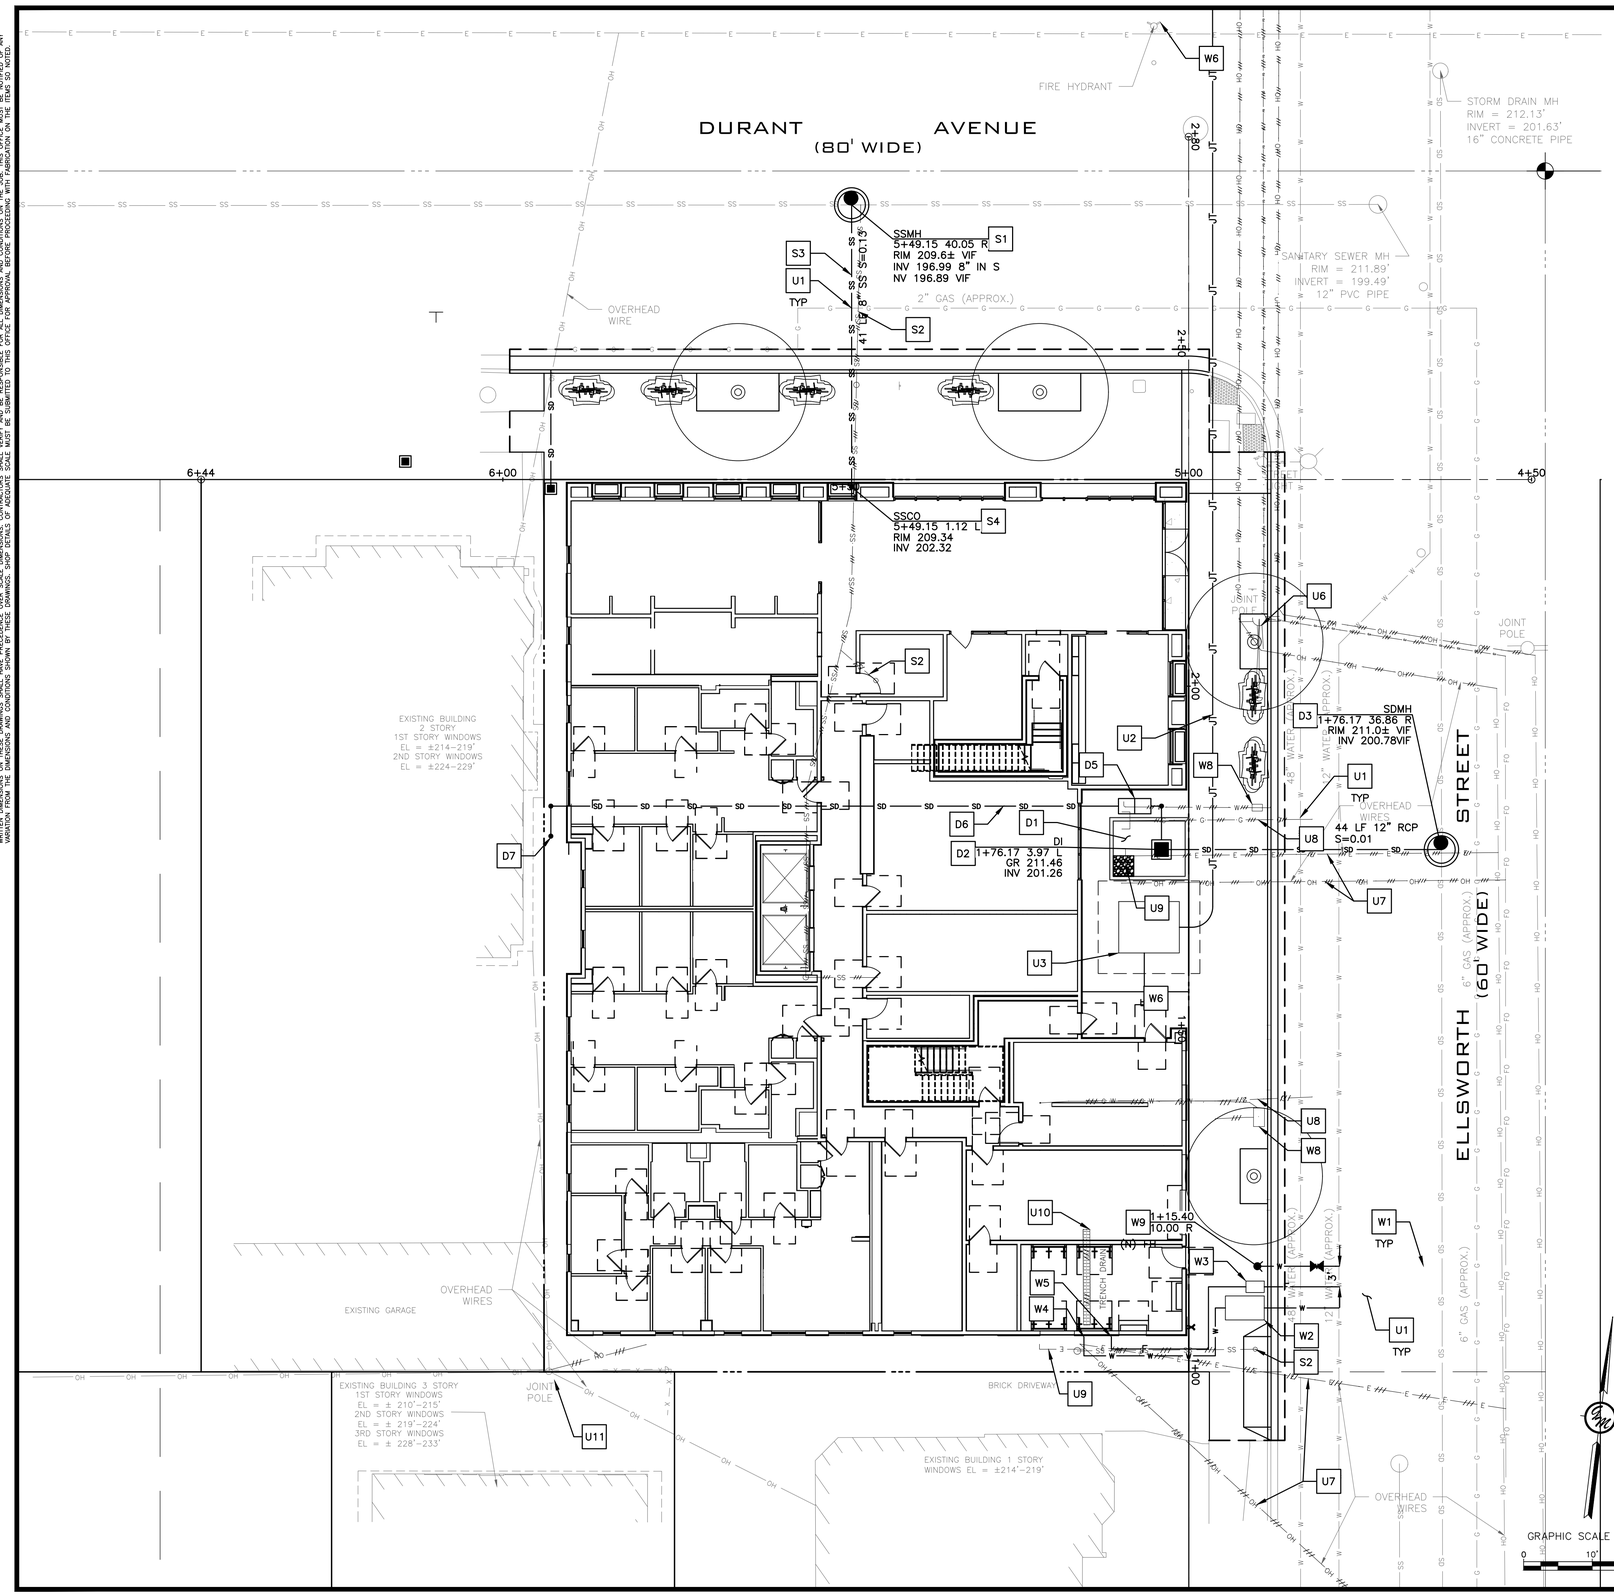
ALL IDEAS, DESIGNS, ARRANGEMENTS, AND PLANS INDICATED BY THIS DRAWING ARE OWNED BY AND THE PROPERTY OF THE OFFICE AND WERE CREATED, EVOLVED AND DEVELOPED FOR USE ON - AND IN CONNECTION WITH THE SPECIFIED PROJECT. NONE OF SUCH IDEAS, DESIGNS, ARRANGEMENTS OR PLANS SHALL BE USED BY OR DISCLOSED TO ANY PERSON, FIRM OR CORPORATION FOR ANY PURPOSE WHATSOEVER WITHOUT THE WRITTEN PERMISSION OF GREENWOOD & MOORE, INC.

WRITTEN DIMENSIONS ON THESE DRAWINGS SHALL HAVE PRECEDENCE OVER SCALE DIMENSIONS. CONTRACTORS SHALL VERIFY AND BE RESPONSIBLE FOR ALL DIMENSIONS AND CONDITIONS ON THE JOB. THIS OFFICE MUST BE NOTIFIED OF ANY VARIATION FROM THE DIMENSIONS AND CONDITIONS SHOWN BY THESE DRAWINGS. SHOP DETAILS OF ADEQUATE SCALE MUST BE SUBMITTED TO THIS OFFICE FOR APPROVAL BEFORE PROCEEDING WITH FABRICATION ON THE ITEMS SO NOTED.



STORM DRAINAGE KEYNOTES D#

1. FLOW THROUGH PLANTER
2. DRAIN INLET. GRATE TO BE 6" ABOVE FLOW THROUGH PLANTER FINISH GRADE. DRAIN INLET TO BE CP2424 PER DETAIL 1/C7.1 & 2/C7.1
3. STORM DRAIN MANHOLE PER CITY OF BERKELEY STANDARD DETAIL 7895. VERIFY EXISTING SEWER SIZE AND INVERT ELEVATION IN FIELD. SEE 4/C7.4.
4. APPROXIMATE LOCATION OF RAIN WATER DOWNSPOUT TO OUTFALL INTO BIORETENTION AREA AT COBBLE DISSIPATOR
5. BELOW GROUND CONTECH CARTRIDGE CATCH BASIN STORMFILTER TO TREAT ROOFTOP. CONNECT 6" STORM DRAIN OUTLET TO DRAIN INLET. SEE DETAIL 4/C7.1.
6. STORM DRAIN THROUGH BUILDING. COORDINATE WITH PLUMBING CONSULTANT.
7. CONNECT DOWNSPOUT TO STORM DRAIN THAT IS CONNECTED TO FILTER VAULT.

SEWER KEYNOTES S#

1. SSMH PER CITY OF BERKELEY STANDARD DETAIL 7895. VERIFY EXISTING SEWER SIZE AND INVERT ELEVATION IN FIELD. SEE 4/C7.4.
2. ABANDON (E) SEWER LATERAL. FOR BUILDING DEMOLITION AND LATERAL ABANDONMENT: WHEN A BUILDING IS TO BE DEMOLISHED AND THE EXISTING LATERAL IS NOT TO BE RE-USED, THE LATERAL SEWER SHALL BE DUG AND EXPOSED WHERE IT ENTERS THE MAIN.

A. IF THE LATERAL ENTERS THE MAIN BY MEANS OF A FACTORY MANUFACTURED WYE OR TEE BRANCH, AND IF THE MAIN AND WYE OR TEE BRANCH ARE ALL IN GOOD, UNDAMAGED CONDITION, THE LATERAL SHALL BE DISCONNECTED AND THE BRANCH SHALL BE PLUGGED WITH AN EXPANDABLE NEOPRENE RUBBER PLUG AT THE MAIN. THE BRANCH PLUG SHALL BE SHALL BE ENCLOSED WITH A MINIMUM THICKNESS OF 6 INCHES OF 6 SACK, ¾" SIZE AGGREGATE. PORTLAND CEMENT CONCRETE. THE WYE BRANCH WITH RUBBER PLUG MUST BE INSPECTED AND APPROVED BY AN ENGINEERING INSPECTOR PRIOR TO ENCLOSURE WITH CONCRETE AND BACKFILL OF THE TRENCH.

B. IF THE LATERAL ENTERS THE MAIN BY ANY METHOD OTHER THAN BY A FACTORY WYE OR TEE BRANCH, OR IF THE EXISTING MAIN, WYE OR TEE BRANCH IS DAMAGED IN ANY WAY, THE SECTION OF MAIN CONTAINING THE LATERAL ENTRY OPENING SHALL BE REMOVED AND REPLACED WITH A NEW SECTION OF PIPE OF THE SAME DIAMETER AS THE EXISTING MAIN. AN ENGINEERING INSPECTOR MUST INSPECT THE NEW MAIN SECTION BEFORE BACKFILL.

C. THE ABANDONED LATERAL PIPE SHALL BE FILLED WITH SAND AND JETTED TO PREVENT THE PIPE FROM BECOMING A HOME FOR RODENTS OR OTHER DISEASE VECTORS.

D. REMOVE (E) CLEANOUT FRAME & COVER.

3. 8" HDPE SDR 17
4. 2 WAY SEWER CLEANOUT WITH CAST IRON TRAFFIC RATED COVER. COORDINATE SEWER CONNECTION TO BUILDING LOCATION AND ELEVATION WITH PLUMBING PLANS.

WATER KEYNOTES W#

1. CONNECT TO EXISTING WATER LINE PER EBMUD STANDARDS AND REQUIREMENTS
2. RESIDENTIAL APARTMENT DOMESTIC WATER METER PER EBMUD STANDARDS AND REQUIREMENTS. VERIFY METER SIZE WITH EBMUD AND PLUMBING PLANS.
3. WATER METER AND CHECK VALVE FOR FIRE SERVICE PER EBMUD STANDARDS AND REQUIREMENTS.
4. 2" WATER SERVICE TO APARTMENT BUILDING. VERIFY SIZE AND LOCATION WITH PLUMBING PLANS. PROVIDE BACKFLOW DEVICE AT BUILDING PER EBMUD STANDARDS AND REQUIREMENTS.
5. X" FIRE SERVICE TO BUILDING. SEE FIRE SERVICE PLANS BY OTHERS FOR MORE INFORMATION. PROVIDE BACKFLOW DEVICE AT BUILDING PER EBMUD STANDARDS AND REQUIREMENTS.
6. (E) FIRE HYDRANT
7. FIRE DEPARTMENT CONNECTION. SEE PLANS BY OTHERS.
   7.1. THE FDC SHALL BE INSTALLED NO HIGHER THAN 3-FEET FROM FINISHED GRADE, AND SHALL BE LOCATED SO THAT FIRE APPARATUS AND HOSE CONNECTED TO SUPPLY THE SYSTEM WILL NOT OBSTRUCT ACCESS TO THE BUILDINGS FOR OTHER FIRE APPARATUS.
   7.2. THE FDC SUPPLYING WATER TO THE STANDPIPE SYSTEM MUST CONSIST OF A THREE (3) 2-1/2-INCH INLET CONNECTION AND ONE (1) 5-INCH STORZ CONNECTION WITH A BUILT-IN DEBRIS SCREEN.
8. REMOVE (E) WATER METER. CAP AND ABANDON (E) WATER LATERAL PER EBMUD STANDARDS (BY EBMUD)
9. (N) FIRE HYDRANT PER EBMUD AND CITY OF BERKELEY STANDARDS, REQUIREMENTS AND SPECIFICATIONS.

UTILITY KEYNOTES U#

1. CONTRACTOR FIELD LOCATE (E) UTILITIES. NOTIFY ENGINEER OF ANY CONFLICTS WITH (E) UTILITIES.
2. JOINT TRENCH BY OTHERS. SEE JOINT TRENCH PLANS
3. (N) ABOVE GROUND TRANSFORMER (BY OTHERS)
4. ALL TRENCHING IN THE CITY RIGHT OF WAY TO BE PER CITY OF BERKELEY STANDARD DETAIL 8136.
5. PROVIDE 1' MINIMUM CLEARANCE AT UTILITY CROSSING. VIF
6. REMOVE (E) JOINT POLE AND UNDERGROUND EXISTING OVERHEAD UTILITIES (BY OTHERS)
7. REMOVE (E) OVERHEAD LINES
8. PG&E TO REMOVE (E) GAS METER AND GAS LATERAL PRIOR TO DEMOLITION OF THE BUILDING. CONTRACTOR TO VERIFY LOCATION IN FIELD. CAP & ABANDON PER PG&E STANDARDS & REQUIREMENTS.
9. PG&E TO REMOVE (E) ELECTRIC METERS AND ASSOCIATED ELECTRIC LINE PRIOR TO DEMOLITION OF THE BUILDING. COORDINATE REMOVAL WITH OWNER AND PG&E.
10. REMOVE (E) TRENCH DRAIN. ABANDON EXISTING STORM DRAIN LINE.
11. (E) JOINT POLE TO REMAIN.

Worksheet for Calculating the Combination Flow and Volume Method

These calculations are based on the combination flow and volume hydraulic sizing method provided in the Alameda, San Mateo, and Santa Clara County C.3 Technical Guidance Manuals. The steps presented below are explained in Chapter 5, Section 5.1 of the gui

1.0 Project Information

1-1	Project Name:	2298 DURANT AVE	
1-2	City application ID:	BERKELEY	
1-3	Site Address or APN:	0	
1-4	Tract or Parcel Map No:	0	
1-5	Site Mean Annual Precip. (MAP)[1]	23.0	Inches
	Refer to the Mean Annual Precipitation Map in Appendix D of the C.3 Technical Guidance to determine the MAP, in inches, for the site.		Click here for map
1-6	Applicable Rain Gauge[2]	Oakland Airport (CWPAC)	
	MAP adjustment factor is automatically calculated as:	1.25	
	(The "Site Mean Annual Precipitation (MAP)" is divided by the MAP for the applicable rain gauge, shown in Table 5.2, below.)		

2.0 Calculate Percentage of Impervious Surface for Drainage Management Area (DMA)

2-1	Name of DMA:	DMA-2		
	For items 2-2 and 2-3, enter the areas in square feet for each type of surface within the DMA.			
	Type of Surface	Area of surface type within DMA (Sq. Ft)	Adjust Pervious Surface	Effective Impervious Area
2-2	Impervious Surface	5,312	1.0	5,312
2-3	Pervious Surface	165	0.1	17
	Total DMA Area (square feet) =	5,477		
2-4	***Total Effective Impervious Area (EIA)***			5,329 Square feet

3.0 Calculate Unit Basin Storage Volume in Inches

Table 5-2: Unit Basin Storage Volumes (in inches) for 80 Percent Capture Using 48-Hour Drawdowns

		Unit Basin Storage Volume (in) for Applicable Runoff Coefficients
Applicable Rain Gauge	Mean Annual Precipitation (in)	(Calculated for 100% imperviousness)
San Jose Airport (SCVURPPP)	13.9	0.58
Palo Alto (SCVURPPP)	13.7	0.62
Palo Alto (SMCWPPP)	14.6	0.64
Gilroy (SCVURPPP)	18.2	1.00
Morgan Hill (SCVURPPP)	19.5	1.00
Boulder Creek (SMCWPPP)	55.9	2.04
La Honda (SMCWPPP)	24.4	0.86
Half Moon Bay (SMCWPPP)	25.92	0.82
San Francisco (SMCWPPP)	21	0.73
San Francisco Airport (SMCWPPP)	20.1	0.85
San Francisco Oceanside (SMCWPPP)	19.3	0.72
Oakland Airport (CWPAC)	18.35	1.00

3-1	***Unit basin storage volume from Table 5.2:***	1.00	Inches
	(The coefficient for this method is 1.00, due to the conversion of any landscaping to effective impervious area)		
3-2	***Adjusted unit basin storage volume:***	1.25	Inches
	(The unit basin storage volume is adjusted by applying the MAP adjustment factor.)		
3-3	***Required Capture Volume (in cubic feet):***	557	Cubic feet
	(The adjusted unit basin sizing volume [inches] is multiplied by the size of the DMA and converted to feet)		

4.0 Calculate the Duration of the Rain Event

4-1	Rainfall intensity	0.2	Inches per hour
4-2	Divide Item 3-2 by Item 4-1	6.27	Hours of Rain Event Duration

5.0 Preliminary Estimate of Surface Area of Treatment Measure

5-1	4% of DMA impervious surface	213	Square feet
5-2	Area 25% smaller than item 5-1	160	Square feet
5-3	Volume of treated runoff for area in Item 5-2	417	Cubic feet (Item 5-2 * 5 inches per hour * 1/12 * Item 4-2)

6.0 Initial Adjustment of Depth of Surface Ponding Area

6-1	Subtract Item 5-3 from Item 3-3	139	Cubic feet (Amount of runoff to be stored in ponding area)
6-2	Divide Item 6-1 by Item 5-2	0.9	Feet (Depth of stored runoff in surface ponding area)
6-3	Convert Item 6-2 from ft to inches	10.4	Inches (Depth of stored runoff in surface ponding area)
6-4	If ponding depth in Item 6-3 meets your target depth of 6"-12", then Item 7-1 is equal to Item 5-2. If not, continue to Step 7-1.		

7.0 Optimize Size of Treatment Me 25

7-1	Enter an area larger or smaller than Item 5-2	165	Sq.ft. (enter larger area if you need less ponding depth; smaller for more depth.)
7-2	Volume of treated runoff for area in Item 7-1	431	Cubic feet (Item 7-1 * 5 inches per hour * 1/12 * Item 4-2)
7-3	Subtract Item 7-2 from Item 3-3	126	Cubic feet (Amount of runoff to be stored in ponding area)
7-4	Divide Item 7-3 by Item 7-1	0.76	Feet (Depth of stored runoff in surface ponding area)
7-5	Convert Item 7-4 from feet to inches	9.14	Inches (Depth of stored runoff in surface ponding area)
7-6	If the ponding depth in Item 7-5 meets target, stop here. If not, repeat Steps 7-1 through 7-5 until you obtain target depth. If the slope of the drainage area > 1%, then 11" will be the max ponding depth (slopes >1% will increase the ponding depth by 0.

BIORETENTION TREATMENT SOIL SPECIFICATIONS

1. BIORETENTION TREATMENT SOIL SHALL ACHIEVE A LONG TERM, IN-PLACE INFILTRATION RATE BETWEEN 5 IN/HR AND 10 IN/HR, CAPABLE OF SUPPORTING VIGOROUS PLAN GROWTH AND CONSIST OF 60%-70% SAND AND 30%-40% COMPOST.

1.1. THE APPLICANT TO SUBMIT TO THE MUNICIPALITY FOR APPROVAL:

1.1.a. A SAMPLE OF MIXED BIORETENTION SOIL.

1.1.b. CERTIFICATION FROM THE SOIL SUPPLIER OR AN ACCREDITED LABORATORY THAT THE BIORETENTION SOIL MEETS THE REQUIREMENTS OF THIS GUIDELINE SPECIFICATION.

1.1.c. GRAIN SIZE ANALYSIS RESULTS OF THE FINE SAND COMPONENT PERFORMED IN ACCORDANCE WITH ASTM D 422, STANDARD TEST METHOD FOR PARTICLE SIZE ANALYSIS OF SOILS.

1.1.d. QUALITY ANALYSIS RESULTS FOR COMPOST PERFORMED IN ACCORDANCE WITH SEAL OF TESTING ASSURANCE (STA) STANDARDS, AS SPECIFIED SECTION 1.4.

1.1.e. ORGANIC CONTENT TEST RESULTS OF MIXED BIORETENTION SOIL. ORGANIC CONTENT TEST SHALL BE PERFORMED IN ACCORDANCE WITH TESTING METHODS FOR EXAMINATION OF COMPOST AND COMPOSTING (TMECC) 05.07A, "LOSS-ON-IGNITION ORGANIC MATTER METHOD.

1.1.f. GRAIN SIZE ANALYSIS RESULTS OF THE COMPOST COMPONENT IN ACCORDANCE WITH ASTM D422, STANDARD TEST METHOD FOR PARTICLE SIZE ANALYSIS OF SOILS.

1.1.g. A DESCRIPTION OF THE EQUIPMENT AND METHODS USED TO MIX THE SAND AND COMPOST TO PRODUCE BIORETENTION SOIL.

1.1.h. PROVIDE THE FOLLOWING INFORMATION ABOUT THE TESTING LABORATORY(IES): CONTACT PERSON(S), ADDRESS(ES), PHONE CONTACTS(S), EMAIL ADDRESS(ES) AND QUALIFICATIONS OF LABORATORY(IES) AND PERSONNEL INCLUDING DATE OF CURRENT CERTIFICATION BY STA, ASTM, OR APPROVED EQUAL.

1.2. SAND FOR BIORETENTION SOIL:

1.2.a. SAND SHALL BE FREE OF WOOD, WASTE COATING SUCH AS CLAY, STONE, DUST, CARBONATE, ETC., OR ANY OTHER DELETERIOUS MATERIAL. ALL AGGREGATE PASSING THE NO. 200 SIEVE SHALL BE NON-PLASTIC.

1.2.b. SAND FOR BIORETENTION AREA SHALL BE ANALYZED BY AN ACCREDITED LAB USING #200, #100, #40, #30 #8, #4, AND 3/8" SIEVES (ASTM D 422 OR AS APPROVED BY MUNICIPALITY), AND MEET THE FOLLOWING GRADATION.

SIEVE SIZE	PERCENT PASSING (BY WEIGHT) MIN	MAX.
3/8"	100	100
NO. 4	90	100
NO. 8	70	100
NO. 16	40	95
NO. 30	15	70
NO. 40	5	55
NO. 100	0	15
NO. 200	0	5

NOTE: ALL SANDS COMPLYING WITH ASTM C33 FOR FINE AGGREGATE COMPLY WITH THE ABOVE GRADATION REQUIREMENTS.

1.3 COMPOSTED MATERIAL

COMPOST SHALL BE A WELL DECOMPOSED, STABLE, WEED FREE ORGANIC MATTER SOURCE DERIVED FROM WASTE MATERIALS INCLUDING YARD DEBRIS, WOOD WASTES OR OTHER ORGANIC MATERIALS NOT INCLUDING MANURE OR BIOSOLIDS MEETING THE STANDARDS DEVELOPED BY THE US COMPOSTING COUNCIL (USCC). THE PRODUCT SHALL BE CERTIFIED THROUGH THE USCC SEAL OF TESTING ASSURANCE (STA) PROGRAM (A COMPOST TESTING AND INFORMATION DISCLOSURE PROGRAM).

A. COMPOST QUALITY ANALYSIS: BEFORE DELIVERY OF THE SOIL, THE SUPPLIER SHALL SUBMIT A COPY OF LAB ANALYSIS PERFORMED BY A LABORATORY THAT IS ENROLLED IN THE US COMPOSTING COUNCIL'S COMPOST ANALYSIS PROFICIENCY (CAP) PROGRAM USING APPROVED TEST METHODS FOR THE EVALUATION OF COMPOSTING AND COMPOST (TMECC). THE LAB REPORT SHALL VERIFY:

1. FEEDSTOCK MATERIALS SHALL BE SPECIFIED AND INCLUDE ONE OF THE FOLLOWING: LANDSCAPE/YARD TRIMMINGS, GRASS CLIPPINGS, FOOD SCRAPS AND AGRICULTURE CROP RESIDUES.
2. ORGANIC MATTER CONTENT: 35%-75% BY DRY WEIGHT.
3. CARBON AND NITROGEN RATIO: C:N < 25:1 AND C:N > 15:1
4. MATURITY AND STABILITY SHALL HAVE A DARK BROWN COLOR AND A SOIL LIKE ODOR. COMPOST EXHIBITING A SOUR OR PUTRID SMELL, CONTAINING RECOGNIZABLE GRASS OR LEAVES, OR IS HOT (120F) UPON DELIVERY IS NOT ACCEPTABLE. IN ADDITION ANY ONE OF THE FOLLOWING IS REQUIRED TO INDICATE STABILITY:
   - 4.a. OXYGEN TEST < 1.3 02/UNIT TS/HR
   - 4.b. SPECIFIC OXY. TEST < 1.5 02/UNIT BVS/
   - 4.c. RESPIRATION TEST < 8 C/UNIT VS/DAY
   - 4.d. DEWAR TEST < 20 TEMP. RISE (DEGREES C) E.
   - 4.e. SOLVITA > 5 INDEX VALUE
5. TOXICITY: ANY OF THE FOLLOWING MEASURES IS SUFFICIENT TO INDICATE NON-TOXICITY:
   - 5.a. NH4- :NO3 < 3
   - 5.b. AMMONIUM < 500PPM, DRY BASIS
   - 5.c. SEED GERMINATION > 80% OF CONTROL
   - 5.d. PLANT TRIALS > 80% OF CONTROL
   - 5.e. SOLVITA > 5 INDEX VALUE
6. NUTRIENT CONTENT: PROVIDE ANALYSIS DETAILING NUTRIENT CONTENT INCLUDING N-P-K, CA, NA, MG AND B.
   - 6.a. TOTAL NITROGEN CONTENT 0.9% OR ABOVE PREFERRED
   - 6.b. BORON: TOTAL SHALL BE < 80PPM: SOLUBLE SHALL BE < 2.5 PPM
7. SALINITY: MUST BE REPORTED: < 6.0 MMHOS/CM
8. PH SHALL BE BETWEEN 6.5 AND 8. MAY VARY WITH PLANT SPECIES.

B. COMPOST FOR BIORETENTION SOIL TEXTURE

COMPOST FOR BIORETENTION SOILS SHALL BE ANALYZED BY AN ACCREDITED LAB USING #200, 1/4", 1/2" AND 1" SIEVES (ASTM D422 OR AS APPROVED BY MUNICIPALITY), AND MEET THE FOLLOWING GRADATION.

SIEVE SIZE	PERCENT PASSING (BY WEIGHT) MIN	MAX.
1"	99	100
1/2"	90	100
1/4"	40	90
NO. 200	2	10

C. BULK DENSITY SHALL BE BETWEEN 500 AND 1100 DRY LBS/CUBIC YARD

D. MOISTURE CONTENT SHALL BE BETWEEN 30%-55% OF DRY SOLIDS.

E. INERTS: COMPOST SHALL BE RELATIVELY FREE OF INERT INGREDIENTS, INCLUDING GLASS, PLASTIC AND PAPER, <1% BY WEIGHT OR VOLUME.

F. WEED SEED/PATHOGEN DESTRUCTION: PROVIDE PROOF OF PROCESS TO FURTHER REDUCE PATHOGENS (PFRP). FOR EXAMPLE, TURNED WINDROWS MUCH REACH MIN. 55C FOR 15 DAYS WITH AT LEAST 5 TURNINGS DURING THAT PERIOD.

G. SELECT PATHOGENS: SALMONELLA < 3 MPN/4 GRAMS OF TS, OR COLIFORM BACTERIA < 1000MPN/GRAM

H. TRACE CONTAMINANTS METALS (LEAD, MERCURY, ETC.) PRODUCT MUST MEET US EPA, 40 CFR 503 REGULATIONS.

I. COMPOST TESTING: THE COMPOST SUPPLIER WILL TEST ALL COMPOST PRODUCTS WITHIN 120 CALENDAR DAYS PRIOR TO APPLICATION. SAMPLES WILL BE TAKEN USING THE STA SAMPLE COLLECTION PROCESS PROTOCOL. (THE SAMPLE COLLECTION PROTOCOL CAN BE OBTAINED FROM THE U.S. COMPOSTING COUNCIL, 4250 VETERANS MEMORIAL HIGHWAY, SUITE 275, HOLBROOK, NY 11741 PHONE: 631-737-4931, (WWW.COMPOSTINGCOUNCIL.ORG) THE SAMPLE SHALL BE SENT TO AN INDEPENDENT STA PROGRAM APPROVED LAB. THE COMPOST SUPPLIER WILL PAY FOF THE TEST.

STORMFILTER STEEL CATCHBASIN DESIGN NOTES

STORMFILTER TREATMENT CAPACITY IS A FUNCTION OF THE CARTRIDGE SELECTION AND THE NUMBER OF CARTRIDGES. 1 CARTRIDGE CATCHBASIN HAS A MAXIMUM OF ONE CARTRIDGE. SYSTEM IS SHOWN WITH A 27" CARTRIDGE, AND IS ALSO AVAILABLE WITH AN 18" CARTRIDGE. STORMFILTER CATCHBASIN CONFIGURATIONS ARE AVAILABLE WITH A DRY INLET BAY FOR VECTOR CONTROL.
PEAK HYDRAULIC CAPACITY PER TABLE BELOW. IF THE SITE CONDITIONS EXCEED PEAK HYDRAULIC CAPACITY, AN UPSTREAM BYPASS STRUCTURE IS REQUIRED.

CARTRIDGE SELECTION

CARTRIDGE HEIGHT	27"			18"			18" DEEP		
RECOMMENDED HYDRAULIC DROP (H)	3.05'			2.3'			3.3'		
SPECIFIC FLOW RATE (gpm/sf)	2 gpm/sf	1.67* gpm/sf	1 gpm/sf	2 gpm/sf	1.67* gpm/sf	1 gpm/sf	2 gpm/sf	1.67* gpm/sf	1 gpm/sf
CARTRIDGE FLOW RATE (gpm)	22.5	18.79	11.25	15	12.53	7.5	15	12.53	7.5
PEAK HYDRAULIC CAPACITY	1.0			1.0			2.25		
INLET PERMANENT POOL LEVEL (A)	1'-0"			1'-0"			2'-0"		
OVERALL STRUCTURE HEIGHT (B)	4'-9"			3'-9"			4'-9"		

* 1.67 gpm/sf SPECIFIC FLOW RATE IS APPROVED WITH PHOSPHOSORB® (PSORB) MEDIA ONLY

GENERAL NOTES
1. CONTECH TO PROVIDE ALL MATERIALS UNLESS NOTED OTHERWISE.
2. FOR SITE SPECIFIC DRAWINGS WITH DETAILED STORMFILTER CATCHBASIN STRUCTURE DIMENSIONS AND WEIGHTS, PLEASE CONTACT YOUR CONTECH ENGINEERED SOLUTIONS LLC REPRESENTATIVE. www.contechES.com
3. STORMFILTER CATCHBASIN WATER QUALITY STRUCTURE SHALL BE IN ACCORDANCE WITH ALL DESIGN DATA AND INFORMATION CONTAINED IN THIS DRAWING.
4. INLET SHOULD NOT BE LOWER THAN OUTLET. INLET (IF APPLICABLE) AND OUTLET PIPING TO BE SPECIFIED BY ENGINEER AND PROVIDED BY CONTRACTOR.
5. MANUFACTURER TO APPLY A SURFACE BEAD WELD IN THE SHAPE OF THE LETTER "O" ABOVE THE OUTLET PIPE STUB ON THE EXTERIOR SURFACE OF THE STEEL SFCB.
6. STORMFILTER CATCHBASIN EQUIPPED WITH 4 INCH (APPROXIMATE) LONG STUBS FOR INLET (IF APPLICABLE) AND OUTLET PIPING. STANDARD OUTLET STUB IS 8 INCHES IN DIAMETER. MAXIMUM OUTLET STUB IS 15 INCHES IN DIAMETER. CONNECTION TO COLLECTION PIPING CAN BE MADE USING FLEXIBLE COUPLING BY CONTRACTOR.
7. STEEL STRUCTURE TO BE MANUFACTURED OF 1/4 INCH STEEL PLATE. CASTINGS SHALL MEET AASHTO M306 LOAD RATING. TO MEET HS20 LOAD RATING ON STRUCTURE, A CONCRETE COLLAR IS REQUIRED. WHEN REQUIRED, CONCRETE COLLAR WITH #4 REINFORCING BARS TO BE PROVIDED BY CONTRACTOR.
8. FILTER CARTRIDGES SHALL BE MEDIA-FILLED, PASSIVE, SIPHON ACTUATED, RADIAL FLOW, AND SELF CLEANING. RADIAL MEDIA DEPTH SHALL BE 7-INCHES. FILTER MEDIA CONTACT TIME SHALL BE AT LEAST 38 SECONDS.
9. SPECIFIC FLOW RATE IS EQUAL TO THE FILTER TREATMENT CAPACITY (gpm) DIVIDED BY THE FILTER CONTACT SURFACE AREA (sq ft).

INSTALLATION NOTES
A. ANY SUB-BASE, BACKFILL DEPTH, AND/OR ANTI-FLOTATION PROVISIONS ARE SITE-SPECIFIC DESIGN CONSIDERATIONS AND SHALL BE SPECIFIED BY ENGINEER OF RECORD.
B. CONTRACTOR TO PROVIDE EQUIPMENT WITH SUFFICIENT LIFTING AND REACH CAPACITY TO LIFT AND SET THE CATCHBASIN (LIFTING CLUTCHES PROVIDED).
C. CONTRACTOR TO TAKE APPROPRIATE MEASURES TO PROTECT CARTRIDGES FROM CONSTRUCTION-RELATED EROSION RUNOFF.

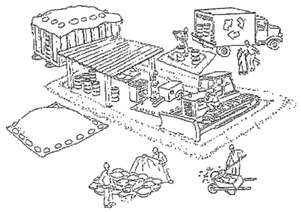
City of Berkeley's Pollution Prevention - It's Part of the Plan



Make sure your crews and subs do the job right!

Runoff from streets and other paved areas is a major source of pollution and damage to creeks and the San Francisco Bay. Construction activities can directly affect the health of creeks and the Bay unless contractors and crews plan ahead to keep dirt, debris, and other construction waste away from storm drains and local creeks. Following these guidelines and the project specifications will ensure your compliance with City of Berkeley requirements.

Materials storage & spill cleanup

Non-hazardous materials management

- Sand, dirt, and similar materials must be stored at least 10 feet (3 meters) from catch basins. All construction material must be covered with a tarp and contained with a perimeter control during wet weather or when rain is forecasted or when not actively being used within 14 days.
- Use (but don't overuse) reclaimed water for dust control as needed.
- Sweep or vacuum streets and other paved areas daily. Do not wash down streets or work areas with water!
- Recycle all asphalt, concrete, and aggregate base material from demolition activities. Comply with City of Berkeley Ordinances for recycling construction materials, wood, gyp board, pipe, etc.
- Check dumpsters regularly for leaks and to make sure they are not overfilled. Repair or replace leaking dumpsters promptly.
- Cover all dumpsters with a tarp at the end of every work day or during wet weather.

Hazardous materials management

- Label all hazardous materials and hazardous wastes (such as pesticides, paints, thinners, solvents, fuel, oil, and antifreeze) in accordance with city, county, state, and federal regulations.
- Store hazardous materials and wastes in water tight containers, store in appropriate secondary containment, and cover them at the end of every work day or during wet weather or when rain is forecasted.
- Follow manufacturer's application instructions for hazardous materials and be careful not to use more than necessary. Do not apply chemicals outdoors when rain is forecasted within 24 hours.
- Be sure to arrange for appropriate disposal of all hazardous wastes.

Spill prevention and control

- Keep a stockpile of spill cleanup materials (rags, absorbents, etc.) available at the construction site at all times.
- When spills or leaks occur, contain them immediately and be particularly careful to prevent leaks and spills from reaching the gutter, street, or storm drain. Never wash spilled material into a gutter, street, storm drain, or creek!
- Dispose of all containment and cleanup materials properly.
- Report any hazardous materials spills immediately! Dial 911 or the City of Berkeley's Public Works Department by dialing 311

Construction Entrances and Perimeter

- Establish and maintain effective perimeter controls and stabilize all construction entrances and exits to sufficiently control erosion and sediment discharges from site and tracking off site.
- Sweep or vacuum any street tracking immediately and secure sediment source to prevent further tracking.

Vehicle and equipment maintenance & cleaning

- Inspect vehicles and equipment for leaks frequently. Use drip pans to catch leaks until repairs are made; repair leaks promptly.
- Fuel and maintain vehicles on site only in a bermed area or over a drip pan that is big enough to prevent runoff.
- If you must clean vehicles or equipment on site, clean with water only in a bermed area that will not allow rinse water to run into gutters, streets, storm drains, or creeks.
- Do not clean vehicles or equipment on-site using soaps, solvents, degreasers, steam cleaning equipment, etc.

Earthwork & contaminated soils

- Keep excavated soil on the site where it will not collect in the street.
- Transfer to dump trucks should take place on the site, not in the street.
- Use fiber rolls, silt fences, or other control measures to minimize the flow of silt off the site.

- Earth moving activities are only allowed during dry weather by permit and as approved by the City Inspector in the Field.
- Mature vegetation is the best form of erosion control. Minimize disturbance to existing vegetation whenever possible.
- If you disturb a slope during construction, prevent erosion by securing the soil with erosion control fabric, or seed with fast-growing grasses as soon as possible. Place fiber rolls down-slope until soil is secure.
- If you suspect contamination (from site history, discoloration, odor, texture, abandoned underground tanks or pipes, or buried debris), call the Engineer for help in determining what should be done, and manage disposal of cntaminated soil according to their instructions.

Dewatering operations

- Effectively manage all run-on, all runoff within the site, and all runoff that discharges from the site. Run-on from off site shall be directed away from all disturbed areas or shall collectively be in compliance.
- Reuse water for dust control, irrigation, or another on-site purpose to the greatest extent possible.

- Be sure to notify and obtain approval from the Engineer before discharging water to a street, gutter, or storm drain. Filtration or diversion through a basin, tank, or sediment trap may be required.
- In areas of known contamination, testing is required prior to reuse or discharge of groundwater. Consult with the Engineer to determine what testing is required and how to interpret results. Contaminated groundwater must be treated or hauled off-site for proper disposal.

Saw cutting

- Always completely cover or barricade storm drain inlets when saw cutting. Use filter fabric, catch basin inlet filters, or sand/gravel bags to keep slurry out of the storm drain system.
- Shovel, absorb, or vacuum saw-cut slurry and pick up all waste as soon as you are finished in one location or at the end of each work day (whichever is sooner!).
- If saw cut slurry enters a catch basin, clean it up immediately.

Paving/asphalt work

- Always cover storm drain inlets and manholes when paving or applying seal coat, tack coat, slurry seal, or fog seal.
- Protect gutters, ditches, and drainage courses with sand/gravel bags, or earthen berms.
- Do not sweep or wash down excess sand from sand sealing into gutters, storm drains, or creeks. Collect sand and return it to the stockpile, or dispose of it as trash.
- Do not use water to wash down fresh asphalt concrete pavement.

Concrete, grout, and mortar storage & waste disposal

- Store concrete, grout, and mortar under cover, on pallets, and away from drainage areas. These materials must never reach a storm drain.
- Wash out concrete equipment/trucks off-site or into contained washout areas that will not allow discharge of wash water onto the underlying soil or onto the surrounding areas.

- Collect the wash water from washing exposed aggregate concrete and remove it for appropriate disposal off site.

Painting

- Never rinse paint brushes or materials in a gutter or street!
- Paint out excess water-based paint before rinsing brushes, rollers, or containers in a sink.
- Paint out excess oil-based paint before cleaning brushes in thinner.
- Filter paint thinners and solvents for reuse whenever possible. Dispose of oil-based paint sludge and unusable thinner as hazardous waste.

Landscape Materials

- Contain, cover, and store on pallets all stockpiled landscape materials (mulch, compost, fertilizers, etc.) during wet weather or when rain is forecasted or when not actively being used within 14 days.
- Discontinue the application of any erodible landscape material within 2 days of forecasted rain and during wet weather.

Storm drain polluters may be liable for fines of $10,000 or more per day!

PROJECT NO.	2024.030
PHASE NO.	XX
SHEET NO.	C7.2

ALL IDEAS, DESIGNS, ARRANGEMENTS AND PLANS INDICATED ON THIS DRAWING ARE OWNED BY AND THE PROPERTY OF THE OFFICE AND WERE CREATED, EVOLVED AND DEVELOPED FOR USE ON, AND IN CONNECTION WITH THE SPECIFIED PROJECT. NONE OF SUCH IDEAS, DESIGNS, ARRANGEMENTS OR PLANS SHALL BE USED BY OR DISCLOSED TO ANY PERSON, FIRM OR CORPORATION FOR ANY PURPOSE WHATSOEVER WITHOUT THE WRITTEN PERMISSION OF GREENWOOD & MOORE, INC. WRITTEN DIMENSIONS ON THESE DRAWINGS SHALL HAVE PRECEDENCE OVER SCALE DIMENSIONS. CONTRACTORS SHALL VERIFY AND BE RESPONSIBLE FOR ALL DIMENSIONS AND CONDITIONS ON THE JOB. THIS OFFICE MUST BE NOTIFIED OF ANY VARIATION FROM THE DIMENSIONS AND CONDITIONS SHOWN BY THESE DRAWINGS. SHOP DETAILS OF AGGREGATE SCALE MUST BE SUBMITTED TO THIS OFFICE FOR APPROVAL BEFORE PROCEEDING WITH FABRICATION ON THE ITEMS SO NOTED.

EROSION CONTROL NOTES

TEMPORARY EROSION CONTROL MEASURES EFFECTIVE DURING RAINY SEASON – OCTOBER 1 TO APRIL 30

1. TEMPORARY EROSION CONTROL DEVICES SHOWN ON GRADING PLAN WHICH INTERFERE WITH THE WORK SHALL BE RELOCATED OR MODIFIED WHEN THE INSPECTOR SO DIRECTS AS THE WORK PROGRESSES.
2. EXCEPT AS OTHERWISE DIRECTED BY THE INSPECTOR, ALL DEVICES SHOWN ON THE EROSION CONTROL PLAN SHALL BE IN PLACE AT THE END OF EACH WORKING DAY. ALL EROSION CONTROL FACILITIES MUST BE INSPECTED AND REPAIRED AT THE END OF EACH WORKING DAY DURING THE RAINY SEASON AND MAINTAINED DURING THE RAINY SEASON (OCTOBER 1 TO APRIL 30).
3. ALL EROSION AND SEDIMENT CONTROL MEASURES SHALL BE CONSTRUCTED AND MAINTAINED IN ACCORDANCE WITH THE PROVISIONS OF THE ASSOCIATION OF BAY AREA GOVERNMENTS (ABAG) "MANUAL OF STANDARDS FOR EROSION AND SEDIMENT CONTROL MEASURES" UNLESS OTHERWISE STATED WITHIN THESE GENERAL NOTES. CONTROL MEASURES ARE SUBJECT TO THE INSPECTION AND APPROVAL OF THE ENGINEERING DIVISION OF THE PUBLIC SERVICES DEPARTMENT. SCHEDULE AN ENGINEERING INSPECTION AT LEAST 48 HOURS PRIOR TO THE START OF ANY WORK.
4. ALL LOOSE SOIL AND DEBRIS SHALL BE REMOVED FROM THE STREET AREAS UPON STARTING OPERATIONS AND PERIODICALLY THEREAFTER AS DIRECTED BY THE INSPECTOR. THE SITE SHALL BE MAINTAINED SO AS TO MINIMIZE SEDIMENT LADEN RUNOFF TO ANY STORM DRAIN SYSTEM.
5. THE CONTRACTOR SHALL PLACE 3"–4" FRACTURED STONE AGGREGATE AS A GRAVEL ROADWAY (6" MINIMUM THICKNESS FOR THE FULL WIDTH AND 50 FEET LONG) AT EACH ROAD ENTRANCE TO THE SITE. ANY MUD THAT IS TRACKED ONTO PUBLIC STREETS SHALL BE REMOVED THE SAME DAY AS REQUIRED BY THE COUNTY ENGINEER. MINIMUM WIDTH OF GRAVEL ROADWAY IS 10 FEET.
6. A CONCRETE WASHOUT IS REQUIRED FOR ALL CONCRETE WORK. THE WASHOUT SHALL CONSIST OF A CONTAINMENT AREA ENCLOSED BY AN EARTHEN DIKE. PLASTIC TARP, COVERING THE CONTAINMENT AREA AND EARTHEN DIKE, SHALL BE STAKED IN AT OUTSIDE EDGE OF EARTHEN DIKE.
7. ADDITIONAL CONTAINMENT METHODS MUST BE PROVIDED FOR ANY WASTE STORAGE AREA, STOCKPILE/MATERIAL STORAGE AREA AND/OR CONSTRUCTION TOILET AREA.
8. THE PERSON RESPONSIBLE IMPLEMENTING, INSPECTING AND MAINTAINING THE EROSION AND SEDIMENT CONTROL MEASURES IS:

   CONTACT PERSON'S NAME: XXXX
   TELEPHONE NUMBER: XXXX

9. STAND–BY CREWS SHALL BE ALERTED BY THE PERMITTEE OR CONTRACTOR FOR EMERGENCY WORK DURING RAINSTORMS.
10. AFTER OCTOBER 1, ALL EROSION CONTROL MEASURES WILL BE INSPECTED DAILY AND AFTER EACH STORM. AFTER OCTOBER 1, BREACHES IN DIKES AND SWALES WILL BE REPAIRED AT THE CLOSE OF EACH DAY AND WHENEVER RAIN IS FORECAST.
11. AS A PART OF THE EROSION CONTROL MEASURES, UNDERGROUND STORM DRAIN FACILITIES AND CONCRETE SHALL BE INSTALLED COMPLETE AS SHOWN ON THE IMPROVEMENT PLANS.
12. ALL STORM DRAIN INLET STRUCTURES GREATER THAN FOUR FEET IN DEPTH SHALL HAVE STEPS INSTALLED PER THE LATEST ACCEPTED SAFETY STANDARDS. A 6" CONCRETE COVER SLAB SHALL BE INSTALLED OVER PIPE WITH LESS THAN 2.5 FEET OF COVER TO SUBGRADE. ALL PIPE TO BE CLASS III UNLESS OTHERWISE NOTED.
13. ALL GRADED AREAS, INCLUDING, BUT NOT LIMITED TO, CUT AND FILL SLOPES, STREETS, PARKING AREAS, AND BUILDING PADS SHALL BE HYDROSEEDED PER ABAG. IN ADDITION TO HYDROSEEDING, APPLICATION OF STRAW WITH A TACKIFIER OR MULCH MAY BE REQUIRED BY THE COUNTY ENGINEER.
14. IF ANY GRADING OPERATIONS, OTHER THAN LOT FINISH GRADING, ARE TO BE PERFORMED DURING THE RAINY SEASON, OCTOBER 1 THROUGH APRIL 30, AN EROSION CONTROL PLAN MUST BE SUBMITTED BY SEPTEMBER 1 AND THE PLAN MUST BE APPROVED BY THE COUNTY OF ALAMEDA PRIOR TO THE COMMENCEMENT OF ANY SUCH GRADING OPERATIONS.
15. TO MINIMIZE EROSION OF GRADED BANKS, ALL GRADED BANKS STEEPER THAN 2% AND HIGHER THAN 3 FEET, SHALL BE HYDROSEEDED, LANDSCAPED, OR SEALED. IN ADDITION TO HYDROSEEDING, APPLICATION OF STRAW WITH A TACKIFIER OR MULCH MAY BE REQUIRED BY THE COUNTY ENGINEER. IF THE PERMANENT STORM DRAIN SYSTEM IS NOT INSTALLED BY OCTOBER 1, TEMPORARY DITCHES SHALL BE CONSTRUCTED TO CONTAIN THE STORM WATER AND DIRECT IT, IN A MANNER THAT AVOIDS EROSION OF THE BANKS, TO THE EROSION AND SEDIMENT CONTROL FACILITIES.
16. ALL CUT AND FILL SLOPES ARE TO BE PROTECTED TO PREVENT OVERBANK FLOW USING 4" EARTH BERMS OR SILT FENCES.
17. ALL GRADED AREAS, INCLUDING, BUT NOT LIMITED TO, CUT AND FILL SLOPES, STREETS, PARKING AREAS, AND BUILDING PADS SHALL BE HYDROSEEDED PER COUNTY'S REQUIREMENT. SUGGESTED MIX DESIGN FOLLOWS:

'BLANDO' BROME	40 LBS/ACRE
ZORRO FESCUE	10 LBS/ACRE
HYKON ROSE CLOVER	9 LBS/ACRE
SUB CLOVER	5 LBS/ACRE
CALIFORNIA NATIVE WILDFLOWER	8 LBS/ACRE
FERTILIZER	300 LBS/ACRE
ORGANIC BINDER	100 LBS/ACRE
STRAW MULCH	4000 LBS/ACRE

18. BORROW AREAS AND TEMPORARY STOCKPILES SHALL BE PROTECTED WITH APPROPRIATE EROSION CONTROL MEASURES TO THE SATISFACTION OF THE COUNTY ENGINEER.
19. SANDBAGS, STRAW WATTLES AND/OR STRAW BALES SHALL BE STOCKPILED ON SITE AND PLACED AT INTERVALS SHOWN ON EROSION CONTROL PLANS, WHEN THE RAIN FORECAST IS 40% OR GREATER, OR WHEN DIRECTED BY THE INSPECTOR.
20. SANDBAGS REFERRED TO IN THE PRECEDING ITEMS MUST BE FULL. APPROVED SANDBAG FILL MATERIALS ARE DECOMPOSED GRANITE AND/OR GRAVEL, OR OTHER MATERIALS APPROVED BY THE INSPECTOR.
21. WHEN DIRECTED BY THE INSPECTOR, A 12–INCH BERM SHALL BE MAINTAINED ALONG THE TOP OF THE SLOPE OF THOSE FILLS ON WHICH GRADING IS NOT IN PROGRESS.
22. WHEN PAD ELEVATIONS OF ADJACENT LOTS OR ELEVATIONS BETWEEN THE STREET AND THE LOT ARE SEPARATED BY MORE THAN 6 FEET, A MINIMUM 12" BERM SHALL BE MAINTAINED ALONG THE PROPERTY LINE SEPARATING THE LOTS, AND THE BERM SHALL DIRECT THE WATER TO THE OUTLET. VELOCITY CHECK DAMS SHALL BE INSTALLED BETWEEN THE OUTLET ON THE LOT AND THE STREET.
23. PROVIDE VELOCITY CHECK DAMS IN ALL UNPAVED STREETS AT THE INTERVALS INDICATED BELOW IN NOTE #24. VELOCITY CHECK DAMS MAY BE CONSTRUCTED OF STRAW BALES, SANDBAGS OR OTHER EROSION RESISTANT MATERIALS APPROVED BY THE INSPECTOR, AND SHALL EXTEND COMPLETELY ACROSS THE STREET OR CHANNEL AT RIGHT ANGLES TO THE CENTERLINE. EARTH DIKES MAY NOT BE USED AS VELOCITY CHECK DAMS.
24. PROVIDE VELOCITY CHECK DAMS IN ALL UNPAVED GRADED CHANNELS AT THE INTERVALS INDICATED BELOW:

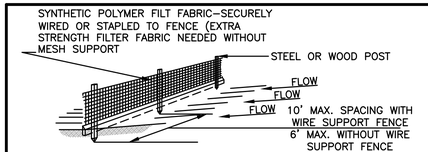
GRADE OF CHANNEL	INTERVAL
LESS THAN 3%	100 FEET
3% TO 6%	50 FEET
OVER 6%	25 FEET

25. SEWER OR STORM DRAIN TRENCHES THAT ARE OUT THROUGH BASIN DIKES OR BASIN INLET DIKES, SHALL BE PLUGGED WITH SANDBAGS FROM TOP OF PIPE TO TOP OF DIKE. SEWER LINES SHALL FIRST BE ENCASED IN CONCRETE BEFORE SANDBAGS ARE PLACED.
26. ALL OPEN UTILITY TRENCHES SHALL BE BLOCKED AT THE PRESCRIBED INTERVALS FROM THE BOTTOM TO TOP WITH A DOUBLE ROW OF SANDBAGS PRIOR TO BACKFILL. SEWER TRENCHES SHALL BE BLOCKED AT THE PRESCRIBED INTERVALS WITH A DOUBLE ROW OF SANDBAGS EXTENDING DOWNWARD, TWO SANDBAGS FROM THE GRADED SURFACE OF THE STREET. SANDBAGS ARE TO BE PLACED WITH ALTERNATE HEADER AND STRETCHER COURSES. THE INTERVALS PRESCRIBED BETWEEN SANDBAG LOCKING SHALL DEPEND ON THE SLOPE OF THE GROUND SURFACE, BUT NOT EXCEED THE FOLLOWING:

GRADE OF THE STREET	INTERVAL
LESS THAN 2%	AS REQUIRED
2% TO 4%	100 FEET
4% TO 10%	50 FEET
OVER 10%	25 FEET

27. AFTER STORM DRAIN, SANITARY SEWER AND UTILITY TRENCHES ARE BACKFILLED AND COMPACTED, THE SURFACES OVER SUCH TRENCHES SHALL BE MOUNDED SLIGHTLY TO PREVENT CHANNELING OF WATER IN THE TRENCH AREA. CARE SHOULD BE EXERCISED TO PROVIDE FOR CROSS FLOW AT FREQUENT INTERVALS WHERE TRENCHES ARE NOT ON THE CENTER LINE OF A CROWNED STREET.
28. SEDIMENT TRAPS SHALL BE CLEANED OUT PER INSPECTOR'S DIRECTION. IT IS THE CONTRACTOR'S RESPONSIBILITY TO CLEAN THE DESILTING BASINS AND THE SEDIMENT TRAPS.
29. THIS PLAN MAY NOT COVER ALL THE SITUATIONS THAT ARISE DURING CONSTRUCTION DUE TO UNANTICIPATED FIELD CONDITIONS. VARIATIONS MAY BE MADE TO THESE PLANS IN THE FIELD, SUBJECT TO APPROVAL OF THE COUNTY ENGINEER.
30. EROSION CONTROL STRUCTURES SHALL BE ADJUSTED BY THE CONTRACTOR TO REFLECT ALL CHANGES IN DRAINAGE AS STREETS AND BUILDING PADS ARE BEING INSTALLED.
31. INSTALL EXCELSIOR CURLEX II EROSION CONTROL BLANKET OR APPROVED EQUAL ON GRADED SLOPES STEEPER THAN 3:1. INSTALL PER MANUFACTURER'S RECOMMENDATIONS AND SPECIFICATIONS.

EROSION CONTROL NOTES | 10

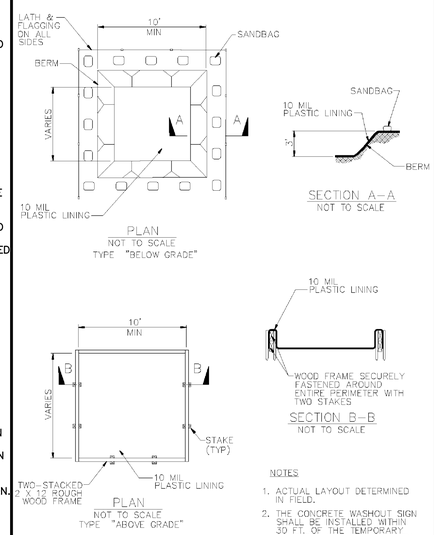


STANDARD DETAIL TRENCH WITH NATIVE BACKFILL

ALTERNATE DETAIL TRENCH WITH GRAVEL

1/2"=1'–0"

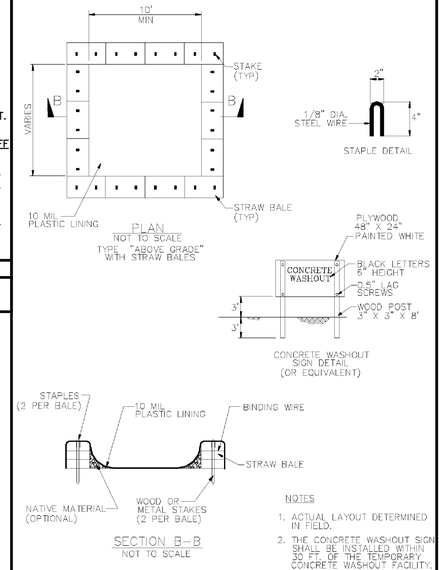
SILT FENCE | 9



NOTES
1. ACTUAL LAYOUT DETERMINED IN FIELD.
2. THE CONCRETE WASHOUT SIGN SHALL BE INSTALLED WITHIN 30 FT. OF THE TEMPORARY CONCRETE WASHOUT FACILITY.

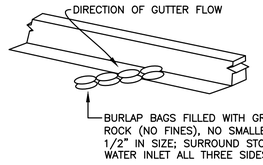
1/2"=1'–0"

WM–8 CONCRETE WASTE MANAGEMENT | 7



NOTES
1. ACTUAL LAYOUT DETERMINED IN FIELD.
2. THE CONCRETE WASHOUT SIGN SHALL BE INSTALLED WITHIN 30 FT. OF THE TEMPORARY CONCRETE WASHOUT FACILITY.

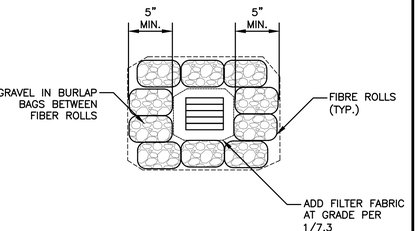
CONCRETE WASTE MANAGEMENT WM–8 | 8



NOTES
1. THICKNESS OF FILLED BAGS WHEN LAID FLAT SHALL NOT EXCEED 4".
2. ENSURE THERE ARE NO GAPS BETWEEN THE BAGS AND THE FACE OF CURB.
3. REMOVE ACCUMULATED SILT, DIRT, AND DEBRIS BEFORE IT EXCEEDS A THICKNESS OF 2" IN THE GUTTER.
4. INSPECT INLET PROTECTION DAILY DURING EXTENDED RAINFALL PERIODS AND BEFORE AND AFTER EACH RAIN EVENT.

1/2"=1'–0"

GRAVEL BAG CHECK DAM | 4

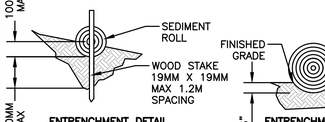


1/2"=1'–0"

INLET PROTECTION (UNPAVED AREAS) | 5

LIMITATIONS:
–DESIGNED FOR LOW SURFACE FLOWS NOT TO EXCEED 1 CFS FOR SMALL AREAS.
–DESIGNED FOR SHORT SLOPED OR SLOPES FLATTER THAN 3:1
– PRIMARY PURPOSE IS NOT SEDIMENT CONTROL, ALTHOUGH DO PROVIDE SOME SEDIMENT REMOVAL.

INSPECTION AND MAINTENANCE:
– REPAIR OR REPLACE SPLIT, TORN, UNRAVELING, OR SLUMPING FIBER ROLLS.
–INSPECT FIBER ROLLS WHEN RAIN IS FORECAST, FOLLOWING RAIN EVENTS AND AT LEAST DAILY DURING PROLONGED RAINFALL. PERFORM REQUIRED MAINTENANCE.
–IN MOST CASES, FIBER ROLLS DO NOT REQUIRE REMOVAL AND CAN BE ABANDONED IN PLACE. IF NOTE EXCESSIVELY SOILED, ROLLS MAY BE REMOVED. REPLACED AND REUSED.



ENTRENCHMENT DETAIL IN SLOPE AREA

ENTRENCHMENT DETAIL IN FLAT AREA

PURPOSE:
FIBER ROLLS (SEDIMENT LOGS OR WATTLES), COMPOSED OF BIO–DEGRADABLE FIBERS STUFFED IN A PHOTO–DEGRADEABLE OPEN WEAVE NETTING, ARE DESIGNED TO REDUCE SEDIMENT RUNOFF FROM DISTURBED SOILS INTO THE STORM DRAIN SYSTEM OR WATER–COURSES. FIBER ROLLS ARE POROUS AND ALLOW WATER TO FILTER THROUGH FIBERS AND TRAP SEDIMENT, INCREASE FILTRATION RATES, SLOW RUNOFF AND REDUCE SHEET AND HILL EROSION. WATTLES ALSO CREATE A FAVORABLE ENVIRONMENT FOR PLANT ESTABLISHMENT.

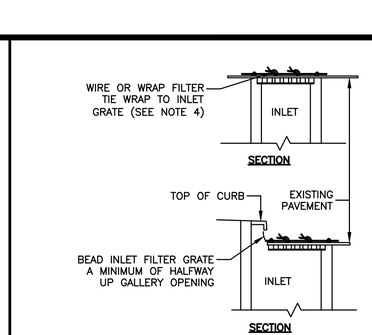
APPLICATION:
–ALONG THE FACE OF EXPOSED AND ERODIBLE SLOPES TO SHORTEN SLOPE LENGTH.
–AT GRADE BREAKS WHERE SLOPES TRANSITION TO A STEEPER SLOPE
–IN DRAINAGE SWALES TO SLOW FLOWS
–ALONG STREAMBANKS TO ASSIST STABILIZATION AND REVEGETATION

INSPECTION AND MAINTENANCE:
FOLLOW MANUFACTURER'S RECOMMENDATIONS FOR INSTALLATION. IN GENERAL, THESE WILL BE AS FOLLOWS:
–FINE GRADE THE SUBGRADE BY HAND DRESSING WHERE NECESSARY TO REMOVE LOCAL DEVIATIONS AND TO REMOVE LARGER STONES OR DEBRIS THAT WILL INHIBIT INTIMATE CONTACT OF THE FIBER ROLL WITH THE SUBGRADE.
–PRIOR TO ROLL INSTALLATION, CONTOUR A CONCAVE KEY TRENCH 50 TO 100MM (2 TO 4 INCHES) DEEP ALONG THE PROPOSED INSTALLATION ROUTE.
–SOIL EXCAVATION IN TRENCHING SHOULD BE PLACED ON THE UPHILL OR FLOW SIDE OF THE ROLL TO PREVENT WATER FROM UNDERCUTTING THE ROLL.
–PLACE FIBER ROLLS INTO THE KEY TRENCH AND STAKE ON BOTH SIDES OF THE ROLL WITHIN 6 FEET OF EACH END AND THEN EVERY SIX INCHES WITH 1" X 2" X 23" STAKES.
–STAKE ARE TYPICALLY DRIVEN IN ON ALTERNATING SIDES OF THE ROLL. WHEN MORE THAN ONE FIBER ROLL IS PLACED IN A ROW, THE ROLLS SHOULD BE BUTTED SECURELY TO ONE ANOTHER TO PROVIDE A TIGHT JOINT, NOT OVERLAPPED.

1/2"=1'–0"

STRAW WATTLE | 6

INLET PROTECTION (PAVED AREAS) | 1



NOTES:
1. FILTER FABRIC SHALL MEET CAL–TRANS OR HAY BAG SPECIFICATIONS.
2. FILTER MATERIAL AND GRATE SHALL OVERLAP INLET ON ALL SIDES BY A MINIMUM OF 1"
3. INLET FILTER GRATE SHALL BE MADE OF RE–BARS, CRISS CROSSED AT 6" (WELDED NUMBERED 3 OR TIED TOGETHER WITH WIRE) OR A PLATE WITH MINIMUM OF 75% OPEN AREA, BOTH OF SUFFICIENT STRENGTH TO PREVENT BENDING WHEN DRIVEN OVER BY A VEHICLE.
4. INLET FILTER GRATE SHALL BE SECURELY ATTACHED TO DRAIN INLET BY WIRE OR TIE–WRAPS (BEND OVER).
5. FILTERS SHALL BE INSPECTED WEEKLY AND AFTER EACH RAINFALL. REPAIRS, SEDIMENT/ DEBRIS REMOVAL SHALL BE MADE TO ASSURE EFFICIENCY OF FILTER SYSTEM.

1/2"=1'–0"

INLET PROTECTION (PAVED AREAS) | 1

TITLE DESCRIPTION

REAL PROPERTY IN THE CITY OF BERKELEY, COUNTY OF ALAMEDA, STATE OF CALIFORNIA, DESCRIBED AS FOLLOWS;

PORTION OF LOT 4, BLOCK 13, "MAP OF THE PROPERTY OF COLLEGE HOMESTEAD ASSOCIATION", RECORDED MAY 15, 1866, MAP BOOK "T" OF DEEDS, PAGE 799, ALAMEDA COUNTY RECORDS.

BEGINNING AT A POINT OF THE INTERSECTION OF THE WESTERN LINE OF ELLSWORTH STREET WITH THE SOUTHERN LINE OF DURANT AVENUE, AND RUNNING THENCE WESTERLY ALONG SAID LINE OF DURANT AVENUE, 94 FEET; THENCE AT RIGHT ANGLES SOUTHERLY 90 FEET; THENCE EASTERLY PARALLEL WITH SAID LINE OF DURANT AVENUE, 94 FEET TO THE WESTERN LINE OF ELLSWORTH STREET; THENCE NORTHERLY ALONG SAID LAST NAMED LINE, 90 FEET TO THE POINT OF BEGINNING.

EXCEPTING THEREFROM THE EXCLUSIVE RIGHT TO PROSPECT FOR, DRILL FOR, PRODUCE AND TAKE ANY OIL, GAS OR OTHER HYDROCARBON SUBSTANCES OR MINERAL SUBSTANCES AND ACCOMPANYING FLUIDS INCLUDING ALL GEOTHERMAL RESOURCES, FROM THE REAL PROPERTY GRANTED HEREIN, FROM THE DEPTH OF FIVE HUNDRED FEET FROM THE SAID REAL PROPERTY, INCLUDING THE RIGHT TO SLANT DRILL FROM ADJACENT PROPERTY, THE RIGHT TO UTILIZE SUBSURFACE STORAGE FOR NATURAL SUBSTANCES, AND THE RIGHT TO MAINTAIN SUBSURFACE PRESSURES.
GRANTOR COVENANTS AND EGRESS THAT THE ABOVE RESERVED RIGHTS WILL NOT BE EXERCISED IN DEROGATION OF GRANTEE'S USED AND PURPOSES OF THE SURFACE OF REAL PROPERTY. AS RESERVED IN THE DEED EXECUTED BY THE REGENTS OF THE UNIVERSITY OF CALIFORNIA, A CALIFORNIA CORPORATION, RECORDED SEPTEMBER 2, 1983, SERIES NO 83-163400, ALAMEDA COUNTY RECORDS.

APN: 055-1887-001

THE PROPERTY SURVEYED IS THE SAME AS DESCRIBED ABOVE AND SHOWN IN THE TITLE COMMITMENT FROM FIRST AMERICAN TITLE INSURANCE COMPANY, COMMITMENT NO. NCS-1177686-CC AND AN EFFECTIVE DATE OF SEPTEMBER 18, 2023, UPDATED OCTOBER 06, 2023.

TITLE COMMITMENT INFORMATION

The Title Description and Schedule 'B' items are the same as shown on the title commitment provided by First American Title Insurance Company, Commitment No. NCS-1177686-CC, issued with an effective date of September 18, 2023, updated October 06, 2023.

SURVEYOR'S NOTES

1. ALL STATEMENTS WITHIN THE CERTIFICATION, AND OTHER REFERENCES LOCATED ELSEWHERE HEREON, RELATED TO UTILITIES, IMPROVEMENTS, STRUCTURES, BUILDINGS, PARTY WALLS, EASEMENTS, SERVITUDES, FOUNDATIONS AND POSSIBLE ENCROACHMENTS ARE BASED SOLELY ON ABOVE GROUND, VISIBLE EVIDENCE, UNLESS ANOTHER SOURCE OF INFORMATION IS SPECIFICALLY REFERENCED HEREON.

2. SUBJECT TRACT HAS DIRECT PHYSICAL DRIVEWAY ACCESS TO ELLSWORTH STREET AND DURANT AVENUE, BOTH DEDICATED PUBLIC RIGHTS-OF-WAY.

3. THE DIMENSIONS AND AREA OF THE BUILDING(S) SHOWN ARE BASED ON THE BUILDING'S EXTERIOR FOOTPRINT AT GROUND LEVEL.

4. THE POINT OF HEIGHT MEASUREMENT IS IDENTIFIED ON THE SURVEY AND WAS TAKEN FROM THE NEAREST ADJACENT GRADE AT SAID POINT, THIS POINT REPRESENTS THE HEIGHT OF THE STRUCTURE AS OBSERVED FROM GROUND LEVEL.

5. UNDERGROUND UTILITIES HAVE BEEN LOCATED AND/OR SHOWN ON THIS SURVEY, ONLY VISIBLE AND/OR MARKED UTILITY APPURTENANCES ARE SHOWN.

6. THERE IS NO OBSERVABLE EVIDENCE OF EARTH MOVING WORK, OR BUILDING CONSTRUCTION ON THE SURVEYED PROPERTY.

7. THERE ARE NO OBSERVABLE EVIDENCE OF ANY CHANGES IN STREET RIGHT-OF-WAYS OR RECENT STREET OR SIDEWALK CONSTRUCTION OR REPAIR.

8. THERE IS NO OBSERVABLE EVIDENCE OF CEMETERIES ON THE SURVEYED PROPERTY.

9. ALL RECIPROCAL EASEMENT AGREEMENTS ("REAS") THAT HAVE BEEN REPORTED BY THE TITLE REPORT PROVIDED HAVE BEEN DENOTED ON THE SURVEY AND ARE SHOWN HEREON. THE LIMITS OF ANY OFFSITE APPURTENANT EASEMENTS THAT HAVE BEEN REPORTED BY THE TITLE REPORT PROVIDED HAVE BEEN DENOTED ON THE SURVEY AND ARE SHOWN HEREON.

10. THIS SURVEY DOES NOT PROVIDE A DETERMINATION OR OPINION CONCERNING THE LOCATION OR EXISTENCE OF WETLANDS, FAULT LINES, TOXIC OR HAZARDOUS WASTE AREAS, SUBSIDENCE, SUBSURFACE AND ENVIRONMENTAL CONDITIONS OR GEOLOGICAL ISSUES. NO STATEMENT IS MADE CONCERNING THE SUITABILITY OF THE SUBJECT TRACT FOR ANY INTENDED USE, PURPOSE OR DEVELOPMENT.

11. THE SURVEYED BOUNDARY SHOWN HEREON ARE CONTIGUOUS WITH ADJOINING PROPERTIES AND/OR RIGHTS OF WAY WITHOUT ANY GAPS, GORES OR OVERLAPS.

12. NO VISIBLE EVIDENCE OF SUBSTANTIAL AREAS OF REFUSE WERE OBSERVED AT THE TIME THE FIELDWORK WAS PERFORMED.

13. THE BOUNDARY LINE DIMENSIONS AS SHOWN ON THIS SURVEY MAP FORM A MATHEMATICALLY CLOSED FIGURE.

SURVEYOR'S CERTIFICATE

TO: 2298 DURANT LP, A CALIFORNIA LIMITED PARTNERSHIP; FIRST AMERICAN TITLE INSURANCE COMPANY:

THIS IS TO CERTIFY THAT THIS MAP OR PLAT AND THE SURVEY ON WHICH IT IS BASED WERE MADE IN ACCORDANCE WITH THE 2021 MINIMUM STANDARD DETAIL REQUIREMENTS FOR ALTA/NSPS LAND TITLE SURVEYS, JOINTLY ESTABLISHED AND ADOPTED BY ALTA AND NSPS, AND INCLUDES ITEMS 2, 3, 4, 5, 6(A), 6(B), 7(A), 7(B)(1), 7(C), 8, 9, 11(B), 13, 14, 16, 17 AND 19 OF TABLE A THEREOF. THE FIELDWORK WAS COMPLETED ON JUNE 29, 2023.

VICINITY MAP

BASIS OF BEARING

THE BEARING OF N80°51'12"E ALONG THE MONUMENT LINE OF CHANNING WAY AS SHOWN ON RECORD OF SURVEY NO. 2769, FILED IN BOOK 42 OF RECORD OF SURVEYS AT PAGE 46, RECORDS OF ALAMEDA COUNTY.

ELEVATION BENCH MARK

CITY OF BERKELEY MONUMENT AT THE INTERSECTION OF DURANT AVE. AND ELLSWORTH ST. PER CR7052.
CITY MONUMENT NO. B0401
ELEV.=211.60'

OBSERVED SIGNIFICANT OBSERVATIONS

NONE OBSERVED

UTILITY NOTE

THE SURVEY SHOWS THE LOCATION OF UTILITIES EXISTING ON OR SERVING THE SURVEYED PROPERTY AS DETERMINED BY OBSERVED EVIDENCE COLLECTED PURSUANT TO ALTA SECTION 5 E IV TOGETHER WITH EVIDENCE FROM PLANS REQUESTED BY THE SURVEYOR AND OBTAINED FROM THE UTILITY COMPANIES, OR PROVIDED BY THE CLIENT AND MARKINGS REQUESTED BY THE SUREYOR PURSUANT TO A 811 UTILITY LOCATE OF SIMILAR REQUEST.

TITLE DESCRIPTION

THE LAND REFERRED TO IS SITUATED IN THE COUNTY OF ALAMEDA, CITY OF BERKELEY, STATE OF CALIFORNIA, AND IS DESCRIBED AS FOLLOWS:

THAT PARCEL OF LAND IN THE CITY OF BERKELEY, COUNTY OF ALAMEDA, STATE OF CALIFORNIA, DESCRIBED AS FOLLOWS:

A PORTION OF LOT 4, BLOCK 13, "PROPERTY OF THE COLLEGE HOMESTEAD ASSOCIATION", FILED MAY 15, 1866, BOOK T OF DEEDS, PAGE 799, ALAMEDA COUNTY RECORDS, DESCRIBED AS FOLLOWS:

BEGINNING AT A POINT ON THE WESTERLY LINE OF ELLSWORTH STREET, DISTANT 90 FEET SOUTH OF THE INTERSECTION OF THE WESTERLY LINE OF ELLSWORTH STREET AND THE SOUTHERLY LINE OF DURANT AVENUE; THENCE SOUTHERLY ALONG THE WESTERLY LINE OF ELLSWORTH STREET 40 FEET; THENCE AT A RIGHT ANGLE WIESTERLY PARALLEL TO THE SOUTHERLY LINE OF DURANT AVENUE 94 FEET; THENCE NORTHERLY AT A RIGHT ANGLE PARALLEL TO THE WESTERLY LINE OF ELLSWORTH STREET, 40 FEET; THENCE AT A RIGHT ANGLE EASTERLY 94 FEET TO THE POINT OF BEGINNING.

APN: 055-1887-002

THE PROPERTY SURVEYED IS THE SAME AS DESCRIBED ABOVE AND SHOWN IN THE TITLE COMMITMENT FROM FIRST AMERICAN TITLE INSURANCE COMPANY, COMMITMENT NO. NCS-1183023-CC AND AN EFFECTIVE DATE OF MAY 31, 2023.

TITLE COMMITMENT INFORMATION

The Title Description and Schedule 'B' items are the same as shown on the title commitment provided by First American Title Insurance Company, Commitment No. NCS-1183023-CC, issued with an effective date of May 31, 2023.

SURVEYOR'S NOTES

1. ALL STATEMENTS WITHIN THE CERTIFICATION, AND OTHER REFERENCES LOCATED ELSEWHERE HEREON, RELATED TO UTILITIES, IMPROVEMENTS, STRUCTURES, BUILDINGS, PARTY WALLS, EASEMENTS, SERVITUDES, FOUNDATIONS AND POSSIBLE ENCROACHMENTS ARE BASED SOLELY ON ABOVE GROUND, VISIBLE EVIDENCE, UNLESS ANOTHER SOURCE OF INFORMATION IS SPECIFICALLY REFERENCED HEREON.

2. SUBJECT TRACT HAS DIRECT PHYSICAL DRIVEWAY ACCESS TO ELLSWORTH STREET AND DURANT AVENUE, BOTH DEDICATED PUBLIC RIGHTS-OF-WAY.

3. THE DIMENSIONS AND AREA OF THE BUILDING(S) SHOWN ARE BASED ON THE BUILDING'S EXTERIOR FOOTPRINT AT GROUND LEVEL.

4. THE POINT OF HEIGHT MEASUREMENT IS IDENTIFIED ON THE SURVEY AND WAS TAKEN FROM THE NEAREST ADJACENT GRADE AT SAID POINT, THIS POINT REPRESENTS THE HEIGHT OF THE STRUCTURE AS OBSERVED FROM GROUND LEVEL.

5. UNDERGROUND UTILITIES HAVE BEEN LOCATED AND/OR SHOWN ON THIS SURVEY, ONLY VISIBLE AND/OR MARKED UTILITY APPURTENANCES ARE SHOWN.

6. THERE IS NO OBSERVABLE EVIDENCE OF EARTH MOVING WORK, OR BUILDING CONSTRUCTION ON THE SURVEYED PROPERTY.

7. THERE ARE NO OBSERVABLE EVIDENCE OF ANY CHANGES IN STREET RIGHT-OF-WAYS OR RECENT STREET OR SIDEWALK CONSTRUCTION OR REPAIR.

8. THERE IS NO OBSERVABLE EVIDENCE OF CEMETERIES ON THE SURVEYED PROPERTY.

9. ALL RECIPROCAL EASEMENT AGREEMENTS ("REAS") THAT HAVE BEEN REPORTED BY THE TITLE REPORT PROVIDED HAVE BEEN DENOTED ON THE SURVEY AND ARE SHOWN HEREON. THE LIMITS OF ANY OFFSITE APPURTENANT EASEMENTS THAT HAVE BEEN REPORTED BY THE TITLE REPORT PROVIDED HAVE BEEN DENOTED ON THE SURVEY AND ARE SHOWN HEREON.

10. THIS SURVEY DOES NOT PROVIDE A DETERMINATION OR OPINION CONCERNING THE LOCATION OR EXISTENCE OF WETLANDS, FAULT LINES, TOXIC OR HAZARDOUS WASTE AREAS, SUBSIDENCE, SUBSURFACE AND ENVIRONMENTAL CONDITIONS OR GEOLOGICAL ISSUES. NO STATEMENT IS MADE CONCERNING THE SUITABILITY OF THE SUBJECT TRACT FOR ANY INTENDED USE, PURPOSE OR DEVELOPMENT.

11. THE SURVEYED BOUNDARY SHOWN HEREON ARE CONTIGUOUS WITH ADJOINING PROPERTIES AND/OR RIGHTS OF WAY WITHOUT ANY GAPS, GORES OR OVERLAPS.

12. NO VISIBLE EVIDENCE OF SUBSTANTIAL AREAS OF REFUSE WERE OBSERVED AT THE TIME THE FIELDWORK WAS PERFORMED.

13. THE BOUNDARY LINE DIMENSIONS AS SHOWN ON THIS SURVEY MAP FORM A MATHEMATICALLY CLOSED FIGURE.

14. RECORD AND MEASURED DISTANCES ARE THE SAME.

SURVEYOR'S CERTIFICATE

TO: ELLSWORTH, CASCADE CAPITAL- BERKELEY MULTI-FAMILY I, LLC, A CALIFORNIA LIMITED LIABILITY COMPANY; FIRST AMERICAN TITLE INSURANCE COMPANY;

THIS IS TO CERTIFY THAT THIS MAP OR PLAT AND THE SURVEY ON WHICH IT IS BASED WERE MADE IN ACCORDANCE WITH THE 2021 MINIMUM STANDARD DETAIL REQUIREMENTS FOR ALTA/NSPS LAND TITLE SURVEYS, JOINTLY ESTABLISHED AND ADOPTED BY ALTA AND NSPS, AND INCLUDES ITEMS 2, 3, 4, 5, 6(A), 6(B), 7(A), 7(B)(1), 7(C), 8, 9, 11(B), 13, 14, 16, 17 AND 19 OF TABLE A THEREOF. THE FIELDWORK WAS COMPLETED ON JUNE 29, 2023.

IRRIGATION NOTES

1. **POINT-SOURCE DRIP** IRRIGATED AREAS USE 1/2" MAINLINE FOR DISTRIBUTION TO 1/4" IN-LINE DRIP TUBING WITH EMITTERS SPACED 6", WRAPPED AROUND INDIVIDUAL PLANTS. MAINLINE TO BE ROUTED SO THAT IT IS AS CLOSE TO EACH INDIVIDUAL PLANT AS POSSIBLE. IF PLANT IS OVER 24" AWAY FROM THE MAINLINE, USE A 1/4" SOLID LATERAL LINE TO CONNECT THE 1/4" IN-LINE DRIP TUBING TO THE 1/2" MAINLINE. WRAP PLANT ONCE WITH IN-LINE DRIP TUBING AROUND ROOTBALL PER THE FOLLOWING:

2. IN-LINE DRIP IRRIGATED AREAS USE 1/2" MAINLINE FOR DISTRIBUTION TO 1/4" IN-LINE DRIP TUBING WITH EMITTERS SPACED 6", TO COMPLETELY COVER THE DESIGNATED PLANTING AREA. SPACE DRIP TUBING TO COVER ENTIRE PLANTING AREA AS SHOWN IN THE STANDARD IN-LINE DRIP LAYOUT DETAIL.

3. MP ROTATORS IRRIGATED AREAS USE 1/2" MAINLINE FOR DISTRIBUTION TO HIGH-EFFICIENCY POP-UP ROTATING JET STREAM EMITTERS, SPACED TO ENSURE HEAD-TO-HEAD COVERAGE WITHIN DESIGNATED PLANTING AREAS. ALL EMITTERS TO BE 6" AWAY FROM HARDSCAPE EDGE TO AVOID OVER-SPRAY.

CONTAINER SIZE	**IN-LINE DRIP TUBING PLACEMENT** (FROM CENTER OF PLANT)
#1	3"
#5	4"
#15	5"
24" BOX	5" AND 10" (2 LOOPS)

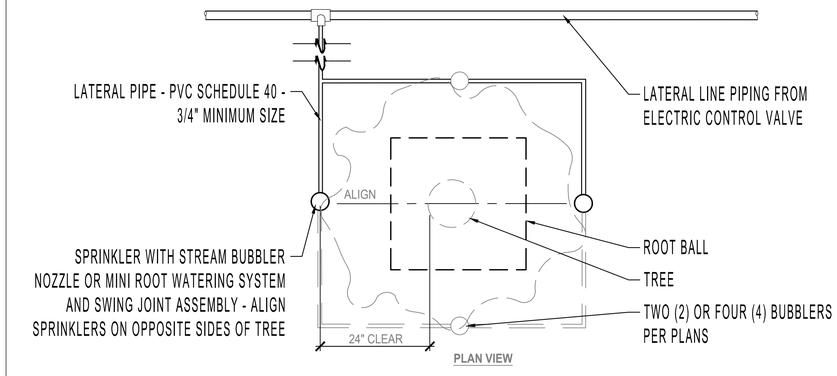
NOTES

1. REFER TO EQUIPMENT LEGEND FOR DRIPLINE AND PLANT MATERIAL ASSIGNMENT.
2. REFER TO STATION CALLOUTS ON PLAN SHEETS FOR SPECIFIC VALVE PERFORMANCE REQUIREMENTS AND CONFIGURATION OF DRIPLINE.
3. PROVIDE COUPLING FITTING (UNIVERSAL NUT LOCK) - WHERE REQUIRED.
4. REFER TO MANUFACTURER FOR DRIPLINE MAXIMUM LATERAL LENGTHS.

DRIPLINE SYSTEM LAYOUT - TYPICAL | 5

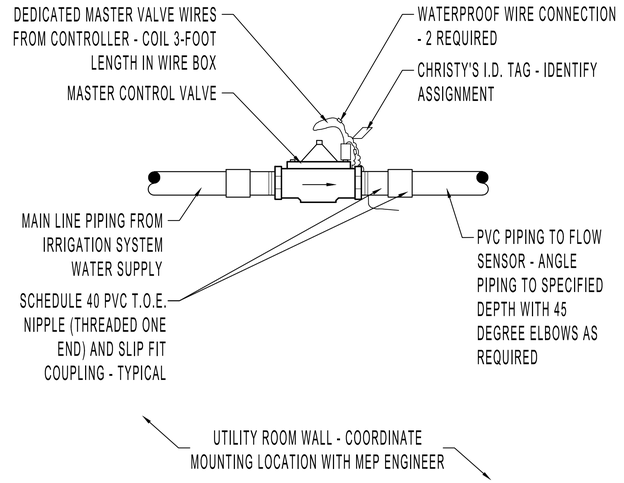


PLAN VIEW

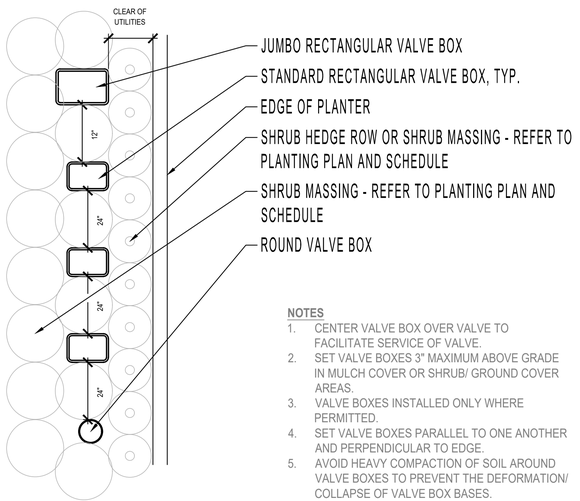
NOTES

1. ALIGN SPRINKLER HEADS FACING VINES ON PALM WHERE INSTALLED.
2. INSTALL FOUR (4) SPRINKLERS PER PALM AND INSTALL TWO (2) SPRINKLERS PER NON-PALM TREE.

TREE SPRINKLER LAYOUT | 3



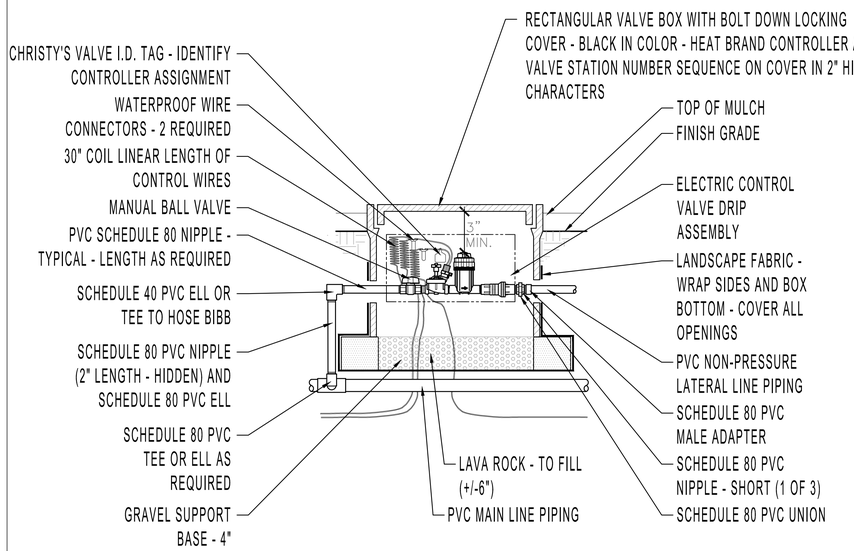
MASTER CONTROL VALVE | 1



NOTES

1. CENTER VALVE BOX OVER VALVE TO FACILITATE SERVICE OF VALVE.
2. SET VALVE BOXES 3" MAXIMUM ABOVE GRADE IN MULCH COVER OR SHRUB/ GROUND COVER AREAS.
3. VALVE BOXES INSTALLED ONLY WHERE PERMITTED.
4. SET VALVE BOXES PARALLEL TO ONE ANOTHER AND PERPENDICULAR TO EDGE.
5. AVOID HEAVY COMPACTION OF SOIL AROUND VALVE BOXES TO PREVENT THE DEFORMATION/ COLLAPSE OF VALVE BOX BASES.
6. SHRUB ROWS SHALL KEEP CONTINUITY WHEREVER PLANTED.

VALVE BOX LAYOUT (AT GRADE PLANTING) | 6



DRIP VALVE STATION | 4

Response to CEQA Additional Info Needed Letter – 2298 Durant

These responses have been prepared to address the corrections received in the letter dated 5/16/25. This comment response letter has been updated and is intended to replace the letter submitted on 6/27/25 to further respond to additional comments received from staff regarding replacement unit affordability received on 7/1/25.

CEQA Review Items	
1	Water Quality Memorandum. After updating the Stormwater Checklist and Special Projects Worksheet (see page 3 of this letter), have the consultant review the revised materials, update the memo with the correct references, and ask them to verify that the Impact Analysis is correct. *Water Quality Memo has been updated and verified.*

Action Items	
1	Income Verification of Existing Tenants (for determining whether BMR replacement units are required): Two of the seven existing units have tenants who do not have guarantors, and the income information you provided can be used to determine the income level of tenants. Tenants of five of the seven existing units have guarantors, and income information was only provided for the guarantors. One of the guarantors for Unit E lists one of the tenants as a dependent on their 2022 tax return. Without tax returns listing the occupants as dependents on the guarantors' tax returns it is not possible to connect the guarantors to the occupants of four of the existing units and the income of those occupants is unknown. Per Government Code Section 65915(c)(3)(B)(i), since the income of four of the existing households is unknown, Comprehensive Housing Affordability Strategy (CHAS) data is used to find the proportion of lower income households in the area. Per the CHAS data, the affordability distribution of four of the seven replacement units shall include two Extremely Low-Income (ELI) units, one Very Low-Income (VLI) Unit, and one Low- Income (LI) Unit.

Summary Level: City
Data for: Berkeley city; California
Year Selected: 2015-2019 ACS

Income Distribution Overview	**Renters**	**% of all renters Perce**	**% of all renters**	**Project units**
Household Income <= 30% HAMFI (Extremely Low)	7,500	0.30	30%	2
Household Income >30% to <=50% HAMFI (Very Low)	3,925	0.16	16%	1
Household Income >50% to <=80% HAMFI (Low-Income)	3,510	0.14	14%	1
Household Income >80% to <=100% HAMFI (Moderate)	1,825	0.07	7%	1
Household Income >100% HAMFI (Above Moderate)	8,345	0.33	33%	2
Total	25,105	1.00	100%	**7**

You have proposed five VLI replacement units. Please revise the applicant statement and AHCP to include the two required ELI units.

The City of Berkeley does not have an objective standard for verification of income levels. Therefore, this application relies on the Comprehensive Housing Affordability Strategy data and replacement unit breakdown cited above. However, to meet the requirements of State Density Bonus Law and a portion of the City's affordable

Response to CEQA Additional Info Needed Letter – 2298 Durant

	housing fee in-lieu—in addition to these SB330 replacement requirements—the project proposes deeper levels of affordability: 2 extremely low income units, 3 very low income units, and 2 market rate units.
2	Bike Parking: Now that you are proposing bike parking, add the proposed and required bike parking to one of the tables on sheet AS-101. *Bike parking has been removed from the project – the space is needed for a battery backup room.*
3	Stormwater Checklist page 6 of 9 needs the flow-based criteria used and the volume-based criteria used since they are using the combination hydraulic sizing approach. *The Stormwater Checklist, page 6 of 9 has been updated as requested.*

Resubmitted materials include updated Applicant Statement, Architectural Plans, Affordable Housing Compliance Plan, Stormwater Checklist, Stormwater Special Projects Worksheet, CEQA Air/Water/Noise Reports, and 2360 Ellsworth Tenant Income Verification & Leases.

Re: Application Processing – Additional Information Required – Use Permit #ZP2024-0126 for 2298 Durant Avenue and 2360 Ellsworth Street

Dear Austin Springer,

Thank you for the Zoning Permit application deemed complete on October 21, 2024, for a Use Permit to demolish a commercial building, a residential building with seven dwelling units, and associated parking; merge two lots; and build an eight-story (92 foot), 80,000 square-foot residential building, with 65 units (2 Extremely Low-Income, 3 Very-Low Income units), utilizing a State Density Bonus. The application has been evaluated for the level of environmental review required and readiness for final action according to the submittal checklist and application guidelines. Thank you for providing revised materials on June 27, 2025 and July 10, 2025.

Required Zoning Permits

Based on my review, the following zoning permits are required:

1. Use Permit - BMC Section 23.326.020(B) to demolish dwelling units.
2. Use Permit - BMC Section 23.326.030(A)(3) to eliminate dwelling units through demolition.
3. Use Permit - BMC Section 23.326.070(A) to demolish a non-residential building.
4. Use Permit - BMC Section 23.202.020(A) to add a multi-family use.
5. Administrative Use Permit - BMC Section 23.304.050(A) to add architectural elements that exceed the height limit.
6. Density Bonus with the following requested reductions, waivers, and concessions:

   Waivers. The application requests five waivers to reduce the following development standards:

Development Standard	Requirement	Proposed
Useable Open Space (BMC Section 23.304.090(A))	3,159 square feet	1,695 square feet
Landscaped Useable Open Space (BMC Section 23.304.090(B)(7))	40% of proposed outdoor useable open space (796 square feet)	116 square feet
Height (BMC Section 23.202.140(E)(1) and 23.304.050(C))	85 feet, plus 5-foot parapet	91 feet 6 inches (to top of parapet)

Long-Term Bicycle Parking (BMC Section 23.322.0690(A)(2))	106 spaces (99 long-term, 7 short-term)	0 spaces
Permit required to remove trees in public right of way (BMC Section 12.44.020)	City will review the permit application	Remove camphor tree on Durant Avenue which conflicts with the proposed building massing.

Concessions. The application requests two concessions.

1. Healthcare coverage for construction workers (BMC Section 13.107.050)
2. Prevailing wage for construction workers (BMC Section 13.108.030)

Level of Review Under the California Environmental Quality Act

Under the California Environmental Quality Act (CEQA), staff determines whether an environmental impact report, a negative declaration, or a mitigated negative declaration will be required, depending on the type of project. This determination will be made within 30 days of an application being deemed complete. If a project is exempt from CEQA, staff recommends an exemption determination to the Zoning Officer or the Zoning Adjustments Board (ZAB).

It is Staff's recommendation that this project is eligible for a **Class 32 Infill Exemption** (CEQA Guidelines Section 15332). However, the final determination is made by the Zoning Adjustments Board (ZAB).

Action Items – Corrections, Clarifications, and/or Supplemental Information Required

1. Affordable Housing Compliance Plan: Please use the updated form since Extremely-Low Units are proposed (see section 2D on page 4).

Advisory comments – Application Processing Review

During the course of review, the project planner may request that the applicant correct, clarify, amplify, or otherwise supplement the details provided in the application according to the Zoning Project Application Submittal Requirements. This may result in revisions to the information provided with your submittal, additional fees for zoning permits, CEQA review costs, and other processes/reviews, as needed based on the City's adopted fee schedule.

Next Steps

Please submit responses to **all** requested items at once, and not incrementally. Be sure to include a written response. Once revised information is submitted, staff will review the application within 30 days.

If you have any questions about the requested information, please reach out to me directly. Thank you in advance for your cooperation.

Sincerely,

Allison Riemer, AICP

Affordable Housing Requirements

BERKELEY MUNICIPAL CODE CHAPTER 23.328

Berkeley Municipal Code (BMC) Chapter 23.328, Inclusionary Housing, requires Housing Development Projects[1] to include at least 20 percent of the Residential Units[2] as permanently affordable units. All affordable units provided in the project will be established and monitored within the City's Below Market Rate (BMR) housing program, and are referred to as BMR Units. The housing development project must provide one of the following to comply with the City's Inclusionary Housing regulations:

A. Construct BMR units on-site

B. Pay an In-Lieu Fee

C. Combination of on-site BMR units and In-Lieu Fee

D. Other options allowed by the Chapter

Each option is described in more detail below.

A. CONSTRUCT ON-SITE AFFORDABLE UNITS

Projects must provide 20 percent of the total residential units as on-site BMR units. BMR units must have the same proportion of bedroom counts (except no affordable unit can have more than three bedrooms) and average unit size as the market rate units. BMR units must be reasonably dispersed throughout the project, be comparable to market-rate units in quality, and have access to the same amenities and common areas as market-rate units. BMR Units shall be affordable to lower income households (up to 80% AMI). At least 50 percent of the required Affordable Units in the Housing Development Project shall be affordable to Very Low-Income Households, and the remaining units shall be affordable to households earning no more than 80 percent, consistent with affordable housing costs in the CA Health and Safety Code. Further, 80 percent of Very Low-Income units shall be first offered to tenants receiving assistance under the Section 8 Program, or the Shelter Plus Care Voucher Program (40 percent each), prior to being offered to other potential tenants.[3]

B. OPTION TO PAY AN IN-LIEU FEE

Applicants have the option to pay an In-Lieu Fee instead of providing the required BMR units.

The in-lieu fee is $56.25 per square feet of the Residential Unit Floor Area (RUFA) for all housing development projects

The In-Lieu Fee applies to all housing development projects. The full fee must be paid prior to obtaining the Certificate of Occupancy, or, if a Certificate of Occupancy is not required, prior to the final building permit inspection. The fee is automatically adjusted every two years, beginning July 1, 2025 based on changes to the California Construction Cost Index.[3]

Applicants who pay the full in-lieu fee can qualify for a 5,000 square foot exemption. 5,000 square feet will be deducted from the RUFA calculation.

NOTES

[1] **HOUSING DEVELOPMENT PROJECT** means a development project, including a Mixed-Use Residential project **(as defined in 23.502.020(M)(13)**, involving the new construction of at least one Residential Unit. Projects with one or more buildings or projects including multiple contiguous parcels under common ownership or control shall be considered as a sole Housing Development Project and not as individual projects **(BMC 23.328.020(E))**.

[2] **RESIDENTIAL UNIT** means any Dwelling Unit, any Live/Work Unit, or any bedroom of a Group Living Accommodation (GLA) except a GLA in a University-recognized fraternity, sorority or co-op; provided, however, that for purposes of this Chapter, "Residential Unit" shall not include any Accessory Dwelling Unit or Junior Accessory Dwelling Unit **(BMC 23.328.020(I))**.

[3] In the case of a State Density Bonus Project, only the base project is used to calculate the in-lieu fee. Formula to determine the Base RUFA can be found on Page 4.

[4] See **BMC 23.328.020 Definitions**

APPLICATION CITY OF BERKELEY **LAND USE PLANNING**

AFFORDABLE HOUSING COMPLIANCE PLAN

Planning and Development
1947 Center St, 2nd Floor
Berkeley, CA 94704

planning@berkeleyca.gov • Phone **(510) 981-7410,** TDD **(510) 981-7450**

C. COMBINATION OF ON-SITE BMR UNITS AND IN-LIEU FEE

Projects may provide less than the required 20 percent total residential units as on-site BMR units by paying a pro-rated In-Lieu Fee.

Formula to calculate the pro-rated in-lieu fee:

The In-Lieu Fee Per Square Foot *multiplied by* the **Total Residential Unit Floor Area** of a Housing Development Project, *multiplied by* the **Percentage of the Applicable Requirement Remaining** after accounting for any on-site Affordable Units provided.[3]

D. OTHER OPTIONS ALLOWED BY BMC CHAPTER 23.328 – APPROVED AT THE CITY'S DISCRETION

Applicants may elect to fulfill the requirement to construct affordable housing via one of the options below. Unlike options A through C above, these options are approved at the City's discretion.

Alternative Unit Size Mix

In lieu of providing 20 percent of total residential units as on-site BMR units, an Applicant may propose an alternative mix of two-bedroom and/or three-bedroom BMR unit-types that comprise at least 20 percent of the residential unit floor area in the project.

Option to Dedicate Land

Affordable Housing requirements may be satisfied by dedicating land instead of constructing BMR units within the Housing Development Project. The site must meet the criteria outlined in **BMC 23.328.030(C)** to be considered.

APPLICATION CITY OF BERKELEY **LAND USE PLANNING**

AFFORDABLE HOUSING COMPLIANCE PLAN

Affordable Housing Compliance Plan Form

You are required to submit an Affordable Housing Compliance Plan (AHCP) for Housing Development Projects[1] that are subject to the affordable housing requirements of BMC Chapter 23.328, Inclusionary Housing. The AHCP is an enforceable commitment that identifies the number and type of affordable, or Below Market rate (BMR) units, the amount of In-Lieu Fees, and/or the parcels of land (or portions thereof) that will be provided and/or paid by the applicant to comply with those requirements. BMR units may include the required Inclusionary Housing (IH) units, Demolition Ordinance replacement units, Density Bonus units, SB 35 units and any other affordable units the project is applying under local and State law.

The Department of Planning and Development's Land Use Division and the Department of Health, Housing, and Community Services use the information from this form and the related sheets to confirm which provisions of the City's affordable housing requirements apply to your project, and if the project complies.

Please complete the entire form. If a section doesn't apply, enter "n/a." If selecting the option to provide an alternative unit size mix or option to dedicate land, please complete the entire AHCP form and staff will contact you to discuss approval for these discretionary options.

You may be asked to revise this form to reflect the approved project during the permit review process and/or required plan sheets.

The Preliminary AHCP is required with a Zoning Permit or Zoning Certificate application. It is intended to provide estimates to the Applicant and City, and inform conditions of approval on discretionary zoning permits. See the **applicable zoning submittal requirements** to determine if a Preliminary AHCP is needed for your project.

The Final AHCP is required with the first building permit application for construction, and will include the total fee amount due for projects electing to pay an In-Lieu Fee. The In-Lieu Fee can be paid any time prior to the issuance of the project's Certificate of Occupancy or Temporary Certificate of Occupancy (as applicable).

3.B. OPTION TO PAY AN IN-LIEU FEE

Housing Development Projects may choose not to include BMR units and pay the full in-lieu fee, calculated as follows:

The Fee Per Square Foot
multiplied by
the **Total Residential Unit Floor Area**
of a Housing Development Project,
minus
5,000 square feet

Projects opting to pay the full in lieu fee may deduct 5,000 square feet from their RUFA calculation

---

The Base Project Residential Unit Floor Area (BP RUFA)
is equal to:
The Final Project Residential Unit Floor Area (FP RUFA)
divided by
One plus the Density Bonus percentage taken (DB %)

BP RUFA = FP RUFA / (1+DB%)

AFFORDABLE HOUSING FEE DUE

$56.25 Per Square Foot Fee
(Base Project only for density bonus projects)

APPLICATION CITY OF BERKELEY **LAND USE PLANNING**

AFFORDABLE HOUSING COMPLIANCE PLAN

SECTION 4 REQUIRED PLAN SHEETS (LAND USE ENTITLEMENT PLANS AND BUILDING PERMIT PLANS)

REQUIRED AHCP PLAN SHEETS

In addition to completing this form, the land use entitlement and building permit plans for your housing development project must demonstrate compliance with the applicable affordable housing provisions. If your project includes a discretionary zoning permit, the entitlement plans must include a Preliminary AHCP plan sheet(s), and all building permits for construction must include a Final AHCP plan sheet(s).

What needs to be in the plans to demonstrate compliance with the City's affordable housing regulations?

The applicable AHCP plan sheets with the applicable information (listed below) must be in sequential pages near the beginning of your plan set and labeled as "Preliminary or Final Affordable Housing Compliance Plan Sheet." Having this information together in the plans will make locating the information easier during project and plan review, and provide transparency to the public. A sample plan set page is attached for reference (see Exhibit A). You will receive corrections from your zoning reviewer if information is not displayed properly in the plan set.

ALL PROJECTS: APPLICABILITY AND REQUIREMENTS OF BMC CHAPTER 23.328 INCLUSIONARY HOUSING

- Residential unit floor area diagrams showing the floor area that is included and excluded from calculation. Diagrams for density bonus projects must reflect the full project (base and bonus)*. Diagrams must be consistent with and separate from the architectural floor plans and include:
  - Schematic diagrams of each floor or level, including mezzanines
  - Indicate floor area by use with shading, color, and/or callouts
  - Dimension all areas of the project that qualify as residential unit floor area, and provide the square footage of each area
  - Tabulation of the total residential unit floor area according to the diagrams
- Calculation of the number of required and proposed BMR units (Base Project only for density bonus)
- Calculation of 100% In-Lieu fee (provide even if on-site units are proposed)

* The Base Project RUFA is used to determine the in-lieu fee for density bonus projects, and is calculated based on the RUFA total from the diagrams. *(See page 5)*

ON-SITE BELOW MARKET RATE (BMR) UNITS (ALL OR COMBINATION)

Any on-site BMR units
(BMC 23.328.030(A) Requirement to Construct Affordable Units

- Unit summary table by floor of BMR and market-rate units, with bedroom counts
- Alternate mix of unit types, if applicable
  - Calculations for 20 percent of residential unit floor area (must be a mix of affordable units that are either two- or three-bedrooms)

IN-LIEU FEE (ALL OR COMBINATION)

Payment in-lieu of providing some or all required affordable units on-site (BMC Section 23.328.030(B) Option to Pay In-Lieu)

In-Lieu Fee per Resolution No. 7,954-N.S. calculated as follows: the fee per square foot multiplied by the total Residential Unit Floor Area of a Housing Development Project, multiplied by the percentage of the applicable requirement remaining after accounting for any on-site Affordable Units provided. Projects that do not provide any Affordable Units on-site will have an applicable requirement multiplier of one. *(See page 5)*

The In-Lieu Fee per square foot is based on the residential unit floor area of the project (base project only if utilizing State Density Bonus provisions). *(See page 5)*

STAFF ADMINISTRATION USE ONLY

This Affordable Housing Compliance Plan (AHCP) is certified in compliance with BMC Chapter 23.328, Inclusionary Housing.

Re: Application Processing – Additional Information Required – Use Permit #ZP2024-0126 for 2298 Durant Avenue and 2360 Ellsworth Street

Dear Austin Springer,

Thank you for the Zoning Permit application deemed complete on October 21, 2024, for a Use Permit to demolish a commercial building, a residential building with seven dwelling units, and associated parking; merge two lots; and build an eight-story (92 foot), 80,000 square-foot residential building, with 65 units (2 Extremely Low-Income, 3 Very-Low Income units), utilizing a State Density Bonus. The application has been evaluated for the level of environmental review required and readiness for final action according to the submittal checklist and application guidelines. Thank you for providing revised materials on July 25, 2025.

Required Zoning Permits

Based on my review, the following zoning permits are required:

1. Use Permit - BMC Section 23.326.020(B) to demolish dwelling units.
2. Use Permit - BMC Section 23.326.030(A)(3) to eliminate dwelling units through demolition.
3. Use Permit - BMC Section 23.326.070(A) to demolish a non-residential building.
4. Use Permit - BMC Section 23.202.020(A) to add a multi-family use.
5. Administrative Use Permit - BMC Section 23.304.050(A) to add architectural elements that exceed the height limit.
6. Density Bonus with the following requested reductions, waivers, and concessions:

   Waivers. The application requests five waivers to reduce the following development standards:

Development Standard	Requirement	Proposed
Useable Open Space (BMC Section 23.304.090(A))	3,159 square feet	1,695 square feet
Landscaped Useable Open Space (BMC Section 23.304.090(B)(7))	40% of proposed outdoor useable open space (796 square feet)	116 square feet
Height (BMC Section 23.202.140(E)(1) and 23.304.050(C))	85 feet, plus 5-foot parapet	91 feet 6 inches (to top of parapet)

Long-Term Bicycle Parking (BMC Section 23.322.0690(A)(2))	106 spaces (99 long-term, 7 short-term)	0 spaces
Permit required to remove trees in public right of way (BMC Section 12.44.020)	City will review the permit application	Remove camphor tree on Durant Avenue which conflicts with the proposed building massing.

Concessions. The application requests two concessions.

1. Healthcare coverage for construction workers (BMC Section 13.107.050)
2. Prevailing wage for construction workers (BMC Section 13.108.030)

Level of Review Under the California Environmental Quality Act

Under the California Environmental Quality Act (CEQA), staff determines whether an environmental impact report, a negative declaration, or a mitigated negative declaration will be required, depending on the type of project. This determination will be made within 30 days of an application being deemed complete. If a project is exempt from CEQA, staff recommends an exemption determination to the Zoning Officer or the Zoning Adjustments Board (ZAB).

It is Staff's recommendation that this project is eligible for a **Class 32 Infill Exemption** (CEQA Guidelines Section 15332). However, the final determination is made by the Zoning Adjustments Board (ZAB).

Action Items – Corrections, Clarifications, and/or Supplemental Information Required

1. Affordable Housing Compliance Plan: Please revise the form to comply with the prior demolition ordinance. Since the seven units proposed for demolition are rent controlled they must be replaced with seven Below Market Rate units. At a minimum seven Low-Income units must be provided. You may provide Very-Low Income units to meet or partially meet inclusionary housing requirements.

Advisory comments – Application Processing Review

During the course of review, the project planner may request that the applicant correct, clarify, amplify, or otherwise supplement the details provided in the application according to the Zoning Project Application Submittal Requirements. This may result in revisions to the information provided with your submittal, additional fees for zoning permits, CEQA review costs, and other processes/reviews, as needed based on the City's adopted fee schedule.

Next Steps

Please submit responses to **all** requested items at once, and not incrementally. Be sure to include a written response. Once revised information is submitted, staff will review the application within 30 days.

Public

If you have any questions about the requested information, please reach out to me directly. Thank you in advance for your cooperation.

Sincerely,

Allison Riemer, AICP
Senior Planner
510-981-7433
ariemer@berkeleyca.gov

Response to Incomplete Application Letter – 2298 Durant

These responses have been prepared to address the corrections received in the letter dated 8/22/25.

Action Items	
1	Affordable Housing Compliance Plan: Please revise the form to comply with the prior demolition ordinance. Since the seven units proposed for demolition are rent controlled they must be replaced with seven Below Market Rate units. At a minimum seven Low-Income units must be provided. You may provide Very-Low Income units to meet or partially meet inclusionary housing requirements. *We have revised the affordable housing compliance plan, plan set, and applicant statement to demonstrate that we are proposing to replace the 7 existing units with 7 below-market rate units (5 VLI and 2 LI).*

Resubmitted materials include updated Applicant Statement, Architectural Plans, & Affordable Housing Compliance Plan.

Figure 1. Proposed Project at 2298 Durant Ave.

This applicant statement includes:

1. Project Description
2. Compliance with City Policies
3. Legislative Context
4. CEQA Overview
5. Required Findings
6. Project Team Contact Information

1. PROJECT DESCRIPTION

Property Information

APN:	055-1887-001, 055-1887-002
Total Lot Area:	12,220 sq. ft. / 0.28 acres
General Plan Designation:	Residential Mixed Use (RMU)
Zoning District:	Residential – Southside Mixed Use (R-SMU)
Area Plan:	Southside Area Plan (Residential High Density Subarea)

Project Overview

The proposed project is an application to demolish two existing buildings: a medical office building and 7-unit apartment building, and construct a multifamily housing development project with 65 dwelling units in a new 80,046 gross square foot building. The project includes seven affordable units for rent to Low or Very-Low Income households. The two existing parcels will be merged into one parcel as part of the project.

The proposed project is subject to several statutory elements, including Housing Accountability Act (HAA), Senate Bill 330 (SB 330), and State Density Bonus Law (SDBL). While the project does not seek additional density, it does use SDBL for waivers and concessions to comply with applicable objective design standards.

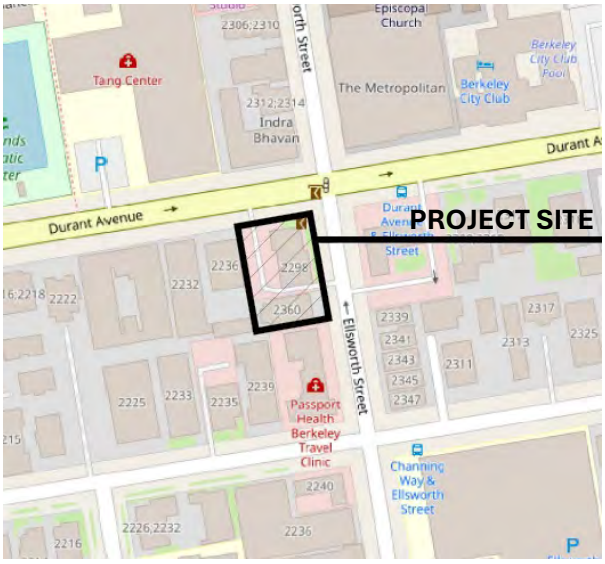

Figure 2. Project Site Location

The project site is on the south side of Bancroft Way and at the south west intersection of Durant Avenue and Ellsworth Street. The project site is conveniently located one block away from the UC Berkeley Campus. Additionally, the project site is located two blocks west of Telegraph Avenue, which is a transit and commercial corridor that provides a wide range of urban amenities and services. The location of this project will provide future residents with convenient access to the campus, the Southside neighborhood, and the Downtown area.

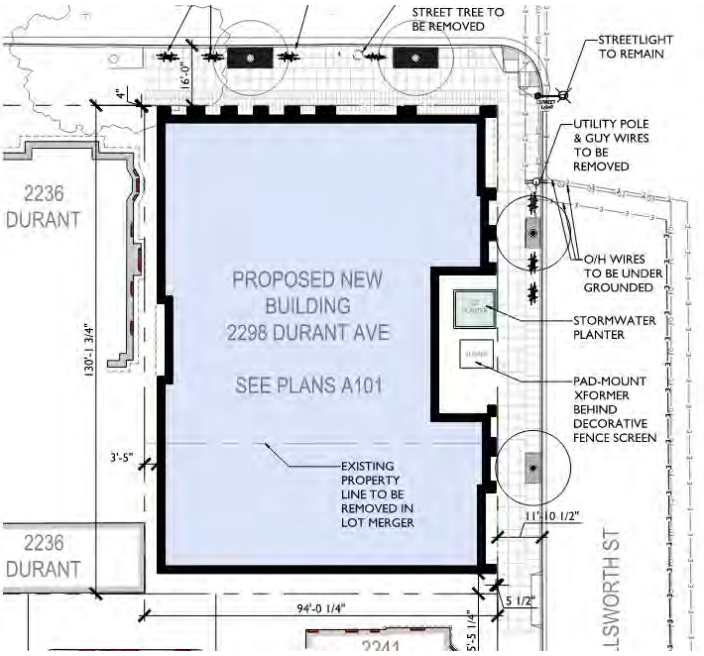

Figure 3. Project Site Plan

The site is highly accessible via public transit or active transportation. It is located 0.5 miles from the Downtown Berkeley BART station and is well served by multiple bus routes (Lines 6 – Downtown Oakland, 7 – Emeryville Amtrack, 36 – U.C. Campus, 51B – Rockridge BART, and 79 – Rockridge BART). The City of Berkeley does not require any residential parking to be provided for this project because it is a 100% residential project, and the project does not include any vehicle parking because the site is so well served by public transit.

Replacement Units

There are 7 existing dwelling units in the apartment building located on the 2360 Ellsworth Street parcel. These units are rent-controlled market rate units. The project proposes to replace all 7 units with no net loss in dwelling units and at affordable levels to meet the City's new interpretation of the applicable Demolition Ordinance. See Sheet A-110 for a list of the Replacement Unit locations.

EXISTING AT 2360 ELLSWORTH STREET	
# Existing Units	**# Units Demolished**
7	7
PROPOSED AT 2298 DURANT AVENUE	
Total Unit Count	**Replacement Units in Project**
65	7
= *NO NET LOSS IN DWELLING UNITS* *(compliant with SB 330)*	

Architectural Design

The building's design aligns with the guidelines in the Southside Design Guidelines. The building massing has been broken up along its long sides (East and West) to present as two towers with an "ABA" symmetry scheme present in many of the neighborhood buildings. The use of bays and insets provides a visually appealing façade articulation and modulation, which reinforce the proportions and rhythm in the Residential High Density Subarea. New building materials, especially those at the ground floor, have

been selected for their resiliency and high quality. Materials such as fiber cement panels and cement plaster are consistently applied on the façades throughout the building to create a consistent and continuous look. Aluminum profile and panels create accent moments on the façade to create visual interest.

Figure 4. Rendering of Proposed Project

The building entrance is identified with a welcoming transparent ground floor along with building signage that engages the streetscape. The residential entrance is oriented to the sidewalk and street at the intersection of Durant Avenue and Ellsworth Street, which makes it clearly identifiable and inviting. The streetscape will see a dramatic upgrade with many planters proposed adjacent to the building, as well as several new street trees along both Durant and Ellsworth.

Sustainability

The proposed project aligns with several of the City's General Plan Environmental Management and Land Use sustainability policies:

- **Environmental Management Policy #5 – "Green" Buildings**
  Promote and encourage compliance with "green" building standards.

- **Environmental Management Policy #35 – Energy-Efficient Design**
  Promote high-efficiency design and technologies that provide cost-effective methods to conserve energy and use renewable energy sources.

- **Land Use Policy #3 – Infill Development**
  Encourage infill development that is architecturally and environmentally sensitive, embodies principles of sustainable planning and construction, and is compatible with neighboring land uses and architectural design and scale.

This project proposes efficiently sized dwelling units outfitted with water & energy efficient appliances in a transit-oriented development. These factors, in addition to meeting the City of Berkeley's Green Building requirements, make the proposed project a sustainable housing development. The building will be all-electric, and equipped with solar panels to power the building with clean energy. The dwelling units will have low-flow fixtures, and the proposed landscaping will all be drought-tolerant and largely comprised of native vegetation. This proposed project is environmentally and architecturally sensitive and incorporates many principles of sustainable development.

This is a true infill development project, which will re-develop an underutilized parcel. The proposed project at 2298 Durant Avenue will transform this site into a vibrant residential address and attractive pedestrian atmosphere. This infill project is especially sustainable in its provision of housing in close proximity to the UC Berkeley Campus and Telegraph Avenue, which has excellent access to goods and services as well as public transportation.

Bird Safe Glass

The proposed project will be subject to the Bird Safe Glass ordinance under Berkeley Municipal Code § 23.304.150, which was recently passed in June 25, 2024. For a building construction with 10,000 sq. ft. or more of gross floor area and an average building height greater than 35 ft, all transparent or reflective materials located between the ground and 75 feet above grade would be subject to bird safe requirements. In order to satisfy bird safe requirements, any regulated transparent or reflective material must either comply with a compliant threat factor rating or use patterned glazing treatments.

Landscaping

The landscape design for the proposed project consists of new streetscape, a stormwater treatment area, and planting at the building base at the ground floor. A landscaped terrace with views to the Bay will be located on Level 8, the uppermost floor of the project.

A Coast Redwood that is 40 inches in diameter exists just inside the northwest corner of the project footprint, and a 30-inch diameter Camphor tree is located at the Durant right of way approximately 50 feet from Ellsworth Street. Both trees will be removed to allow site access, construction of the new concrete slab foundation, and erection of scaffolding.

The existing concrete sidewalk paving in the right of way will be replaced with a new concrete surface per City standard details. Concrete control joints designate the pedestrian and frontage zones within the right of way; and different concrete finishes demarcate the shift from public to private space. Seven new bicycle racks provide 14 temporary parking spaces for cyclists visiting the building.

Four new street trees are proposed: two on Durant Avenue and two on Ellsworth Street. The installed trees will be in 24-inch box containers. The tree wells will be surfaced with the new flexi-pave detail that 122 West Design has coordinated with the Forestry Department, allowing water and oxygen into the tree root zones while maintaining accessible path of travel. Selection of the tree species is pending input from Forestry.

GFRC planters fit in between the building's structure providing a punctuated scrim of greenery at the building base. A bioretention planter is located adjacent to the egress discharge within the building's cutout on Ellsworth Street.

The Level 8 roof terrace consists of two program areas articulated by raised planters with integrated bench seating and an accessible unit paving surface. The counter and furnishings at the south area will function as a kitchen/dining area. The planters in the north area also have integrated seating with an overhead trellis that vines will grow into, maximizing the landscape character of the space. A bar height railing at the parapet overlooks the Bay. This area will be a more open and sunny area to have smaller gatherings or breakout sessions.

The project will provide 188 square feet of new landscape area and 5 new trees. Except for the pending final selection of street tree species, approximately 80% of plant material originates from within California so that the project will also provide ecosystem services for local insect populations while minimizing water use. All landscape areas will be irrigated by a WELO-compliant, high efficiency system.

Project Benefits

The proposed project will offer the following in-lieu and mitigation fees, and community benefits to the City of Berkeley:

- Redevelop an underutilized parcel in the Southside area.
- Provide 65 dwelling units of high density and transit-oriented housing.
- Provide 5 affordable dwelling units for Very Low-Income Households at 50% AMI.
- Encourage alternative modes of transportation – 0 vehicular spaces.
- Units will be equipped with energy efficient appliances and low flow fixtures, and the site will be planted with drought tolerant landscaping that supports the project's stormwater management plan.
- Compliant with Bird Safe Glass requirements as per BMC 23.304.150.
- Pay in-lieu fees, mitigation fees, and impact fees such as the Affordable Housing Mitigation fee of $844,321.

Community Meeting
On September 4, 2024, the project team held a community meeting to provide information about the project and request feedback from community members. The team invited all owners and occupants within 300 feet of the project site, as well as neighborhood groups, based on a list provided by City staff. The meeting was held at 12 pm virtually over Zoom.

Apart from the project team, one neighbor attended the meeting. The main topics discussed included the anticipated construction timeline, size of the building, and the placement of the building on the project site. Please see attached 2298 Durant Ave Neighborhood Meeting Report for full length responses by the project team.

Statement Regarding Berkeley Energy Code and Berkeley Green Code
The proposed project is designed to comply with the Berkeley Energy Code (BMC Chapter 19.36) and Berkeley Green Code (BMC Chapter 19.37), adopted by the City Council on December 3, 2019, including a solar PV system as well as energy and water efficiency measures. The building will be solar ready and accommodate solar PV as is physically and financially feasible for the project.

2. PROJECT COMPLIANCE WITH CITY POLICIES

General Plan
The City of Berkeley General Plan designates this project site as Residential Mixed Use (RMU). The Residential Mixed-Use designation is characterized by a diverse mixture of residential, commercial and institutional structures near job centers, shopping districts, and transit hubs.

Southside Area Plan
This site is located within the Southside Area Plan, which was adopted in 2011, with updated zoning regulations adopted in 2023. The site is within the Residential High Density Subarea designation which encourages higher density residential uses close to campus and Telegraph Avenue. The Southside Design Guidelines (2011) acknowledge the eclectic nature of the architecture within the Southside residential neighborhoods and emphasize compatibility of new construction with the scale, massing, quality, and detail evident in older buildings.

Zoning Ordinance

The proposed project site is zoned Residential Southside Mixed Use (R-SMU) which seeks to encourage "high-density, multi-story residential development close to major shopping, transportation, and employment centers" (BMC § 23.202.140(A)(1)). Zoning district standards are designed to promote the provision of dense multi-family housing and dense goods and services to serve the campus population that lives in the Southside Area neighborhood. The proposed project submitted a complete SB 330 preliminary application on August 6, 2024.

As shown in Table 1, the proposed project meets all the applicable objective zoning development standards, as modified pursuant to State Density Bonus Law (SDBL) and use permits allowed by the R-SMU zoning regulations.

Figure 5. Zoning Map: Southside Residential – R-SMU

Table 1: Major Development Standards

Municipal Code Standards		**R-SMU Standard**	**Proposed**	**Compliance**
Building Height, Maximum		85 feet + 5 foot parapet	93 feet 0 inches	Compliant through SDBL waiver
Residential Density, Minimum		150 DU / Acre	232 DU / Acre	Compliant
FAR, Maximum		7.0	6.54	Compliant
Lot Line Setbacks, Minimum	Front (Durant Ave.)	None	0'-4"	Compliant
	Rear	4 feet	5'-5 ¼"	Compliant
	Street Side (Ellsworth St.)	None	5 ½"	Compliant
	Interior Side	None	3'-5"	Compliant
Useable Open Space 40 sq. ft. per 1,000 sq. ft. residential floor area.		3,159 sq. ft. required (40 SF/ 1000 SF) x 78,965 SF = 3,159, SF required.	1,695 sq. ft. (outdoor: C.3 planter, 116 SF)	Compliant with SDBL waiver

(D) Max. 50% of UOS may be indoor amenities.			(indoor amenities: 1,579 SF qualifies due to 50% limit of required UOS max)	
Landscaped Useable Open Space 40% of required sq. ft. (except balconies & indoor space)		40% of (3,159-1,579 SF) = 632 SF required	116 SF	Compliant with SDBL waiver
Parking	Automobile Parking	None	0	Compliant
	Long Term Bicycle Parking	1 space per 3 bedrooms (100 spaces)	0	Compliant with SDBL waiver
	Short Term Bicycle Parking	1 space per 40 bedrooms (6 spaces)	14	Compliant

3. LEGISLATIVE CONTEXT

The housing crisis continues to have a significant impact on Californians across the state. The Government Code sections discussed below are state legislative efforts that recognize the severity of California's housing crisis, and the difficulties associated with developing new housing at appropriately zoned, transit-oriented, and urbanized locations. The proposed housing development project is submitted pursuant to Senate Bill 330 and subject to the modifications and protections of State Density Bonus Law (Gov. Code § 65915) and the Housing Accountability Act (Gov. Code § 65589.5). The project also satisfies the City of Berkeley's inclusionary housing requirement under Berkeley Municipal Code § 22.238.

Housing Accountability Act

The Housing Accountability Act (Gov. Code § 65589.5) requires the City of Berkeley to approve the project because it is consistent with all objective standards. Under the Housing Accountability Act, the City is only permitted to reject a project if it can make findings based on a *preponderance* of evidence that the project would have a significant, unavoidable, and quantifiable impact on "objective, identified written public health or safety standards, policies, or conditions." (Gov. Code §65589.5(j)).

SB 330/Housing Crisis Act

The Housing Crisis Act (Gov. Code § 66300) prohibits a local agency from disapproving, or conditioning approval in a manner that renders infeasible, a housing development project that provides affordable housing. The act also requires that a development project must comply with all applicable, objective general plan and zoning standards and criteria that were in effect at the time the application was deemed to be complete. On August 6, 2024, the project team submitted a complete SB 330 Preliminary Application to the City of Berkeley, effectively freezing fees and regulations as of that date. The law also requires the city or county to consider and either approve or disapprove the housing development project within the five allowable public hearings under the HCA, and consistent with the applicable timelines under the Permit Streamlining Act.

AB 2097 Parking Requirements

AB 2097 (Gov Code § 65585) prohibits a public agency from imposing any minimum automobile parking requirement on most development projects within ½ mile of public transit unless the city makes written findings, within 30 days of the receipt of a completed application, that not imposing or enforcing minimum automobile parking requirements on the project development would have a substantially negative impact, supported by a preponderance of the evidence in the record.

Since the proposed project site is located within ½ mile of public transit (Downtown Berkeley BART Station and intersecting AC Transit services), the project is not subject to minimum parking requirements. Introducing parking in the proposed project will physically preclude the housing development project with the proposed number of units.

State Density Bonus Law Eligibility

The proposed project is eligible for the State Density Bonus (Gov. Code § 65915) because it meets all objective development standards, and provides a sufficient number of units as affordable housing. The project proposes five units housing units affordable to Very-Low Income households, which represents 10% of the base project (plus two additional units affordable to Low Income households to meet the City's new interpretation of the applicable Demolition Ordinance).

The proposed base project that meets all objective standards includes 49 dwelling units, five of which are affordable for very low-income households (less than 50% AMI). These five affordable units comprise 10% of the proposed base project. Per State Density Bonus Law, that makes this project eligible for a 32.5% density bonus. The level of affordability provided entitles the project to unlimited waivers and two concessions, per Govt. Code § 65915(d)(2)(B). The average unit size for both the base project and density bonus project is 1,215 square feet.

Table 2: Density Bonus

Project Proposals	Market Rate Units	Below Market Rate Units	Total Units
Base Project	44	5	49
Density Bonus Project	60	5 *(10% Very Low Income or below)*	65 *(32.5% SDBL)*

With this density bonus, the project is entitled to use an unlimited number of waivers and up to two concessions for development standards that impede the project's ability to utilize the density bonus or increase feasibility. Tables 3 and 4 below show the five waivers and two concessions that are requested to be granted to accommodate the project. Without these waivers and concessions being granted, the proposed project would not be fiscally viable and could not physically be built as designed.

Table 3: Waivers Requested to Accommodate Density Bonus

If the project were to comply with any of the standards listed below, it would physically preclude the construction of the project as designed and would eliminate the number of proposed residential units.

Standard	Required	Proposed
Allowed Building Height (per BMC § 23.202.140(E)(3))	85 ft. maximum + 5 foot parapet	93 feet 0 inches

Residential Useable Open Space (per BMC Table 23.202-23)	3,159 sq. ft. required (40 SF/ 1000 SF) x 78,965 SF = 3,159, SF required.	1,695 sq. ft.
Landscaped Usable Open Space (per BMC 23.304.090(7)(a))	40% of (3,159-1,579 SF) = 632 SF required	116 SF
Long-Term Bicycle Parking (per BMC 23.322.090(A)(2))	1 space per 3 bedrooms = 298 / 3 = 100 spaces	0 Spaces
Tree Removal (per BMC 12.44.020)	- per BMC 12.44.020	Removal of Camphor Tree within public right of way, which conflicts with underground utilities and the building massing.

Table 4: Concessions Requested to Accommodate Density Bonus

As per Govt. Code § 65915(d)(1)(A), a project may seek concession requests if identifiable and actual cost reductions to provide for affordable housing costs are provided. The level of affordability provided in the proposed project (at least 10% for very low income households or below), entitles the project to two concessions, per Govt. Code § 65915(d)(2)(B). Compliance with the regulations below would render the project financially infeasible.

Regulation	Required	Proposed
BMC § 13.107.050 HARD HATS Ordinance	Provide healthcare coverage.	Exemption from BMC 13.107.050
BMC § 13.108 Southside Plan Prevailing Wage Requirement	Pay general prevailing rate set forth in the California Labor Code.	Exemption from BMC 13.108

City of Berkeley Inclusionary Housing Regulations

This project is also subject to the City of Berkeley's inclusionary housing requirement under Berkeley Municipal Code § 22.238 that requires the project to provide at least 20% of the base project dwelling units as inclusionary units at 80% AMI with the option of paying an in-lieu fee instead of providing the units on-site per Berkeley Municipal Code Section 22.238.030(B).

Alternatively, in lieu of providing affordable units, the proposed project may provide affordable units that comprise at least 20% of residential unit floor area of the project to achieve a mix of affordable units, including two-bedroom or three-bedroom units per Berkeley Municipal Code 23.328.030(A)(2).

This project proposes to provide 5 units for very low-income households or below, 2 units for low income households and below, and meet the remainder of the inclusionary requirement through paying the in-lieu fee. The project will enter into a regulatory agreement with the City of Berkeley that ensures that these proposed affordable dwelling units remain deed-restricted for the life of the project

4. CEQA OVERVIEW

The proposed project is eligible for a Class 32 Exemption from the CEQA Guidelines, as justified by the findings below. Further, AB 1633, which went into effect on January 1, 2024, establishes that if certain

sites qualify for a Categorical Exemption under CEQA, and a local agency does not make an Exempt determination, it constitutes a violation under the Housing Accountability Act.

California Environmental Quality Act Class 32 Categorial Exemption for Infill Developments (CEQA Guideline § 15332):

a) **The project is consistent with the applicable general plan designation and all applicable general plan policies as well as with applicable zoning designation and regulations.**
The proposed project is a mixed-use project, which is an allowed use in the R-SMU zone, permitted with a Use Permit (and Public Hearing). The proposed project, with the density bonus, waivers, and concessions requested as part of this application, is consistent with all applicable, objective general plan policies and zoning regulations.

b) **The proposed development occurs within city limits on a project site of no more than five acres substantially surrounded by urban uses.**
The project is within the City Limits of Berkeley, south of the University of California Berkeley campus. The total lot area of the proposed project site is 0.28 acres, which is less than five acres. The project site is 100% surrounded by urbanized uses and development.

c) **The project site has no value as habitat for endangered, rare or threatened species.**
The existing condition of the project site is a 3 ½ story apartment building and a 2-story office building. There is no habitat value of any kind for any species (except humans), and the project site certainly does not contain any endangered, rare, or threatened species. The existing apartment was built in 1963, and the medical office was built in 1903. The project site is located in the rapidly developing Southside Area of Berkeley. The site does not contain, nor is it adjacent to, any habitat for rare, endangered, or threatened species.

d) **Approval of the project would not result in any significant effects relating to traffic, noise, air quality, or water quality.**
The project will not have any significant effects relating to traffic, noise, air quality, or water quality. There will be no vehicle parking onsite, and the site is located in the City of Berkeley's "low-VMT areas". The majority of trips are expected to be pedestrian, bicycle, or public transit trips, so the project will not result in significant effects relating to traffic or air quality. See provided air quality memo for more info.

The proposed project is not located near a stream or other body of water. It has direct access to storm and wastewater sewer connections. The proposed project will not include any sources of air or water pollution. A Stormwater Treatment Control Plan is included in the proposed project to remediate any stormwater runoff. See provided water quality memo for more info.

The proposed project is an allowed multi-family residential use in the R-SMU zoning district. Multi-family residential projects are typical in this location and the neighborhood context adjacent to the University campus. As a multi-family residential project, no significant noise sources will be generated by the project, with the exception of the construction period. The City of Berkeley's generally applicable conditions for construction and noise management will ensure that construction noise is mitigated. See provided Noise Memo for more info.

e) **The site can be adequately served by all required utilities and public services.**

The project site is within the service boundaries of all necessary utilities, none of which have declared a moratorium, or pending moratorium, on new services.

The proposed project does not trigger any of the following exceptions that would disqualify the project from CEQA's Categorical Exemptions:

"(a) Location. Classes 3, 4, 5, 6, and 11 are qualified by consideration of where the project is to be located – a project that is ordinarily insignificant in its impact on the environment may in a particularly sensitive environment be significant. Therefore, these classes are considered to apply all instances, except where the project may impact on an environmental resource of hazardous or critical concern where designated, precisely mapped, and officially adopted pursuant to law by federal, state, or local agencies.

(b) Cumulative Impact. All exemptions for these classes are inapplicable when the cumulative impact of successive projects of the same type in the same place, over time is significant.

(c) Significant Effect. A categorical exemption shall not be used for an activity where there is a reasonable possibility that the activity will have a significant effect on the environment due to unusual circumstances.

(d) Scenic Highways. A categorical exemption shall not be used for a project which may result in damage to scenic resources, including but not limited to, trees, historic buildings, rock outcroppings, or similar resources, within a highway officially designated mitigation by an adopted negative declaration or certified EIR.

(e) Hazardous Waste Sites. A categorical exemption shall not be used for a project located on a site which is included on any list compiled pursuant to Section 65962.5 of the Government Code.

(f) Historical Resources. A categorical exemption shall not be used for a project which may cause a substantial adverse change in the significance of a historical resource." Based on the Historical Evaluation provided by Preservation Architecture, the two subject properties of the proposed project have not been previously considered or evaluated for historical potential. Additionally, per the City of Berkeley's *Landmarks Preservation Ordinance (LPO),* the adjoined properties and buildings located at 2298 Durant Avenue and 2360 Ellsworth Street are not eligible for designation as a City of Berkeley Landmark or Structure of Merit. See DPR Forms and Historic Resource Evaluation attached with this application package.

None of the exceptions listed above apply to the proposed project, so it is still eligible for Categorical Exemptions under CEQA. Exception (a) is not applicable to the proposed project because it is seeking a Class 32 Categorical Exemption. The proposed impact will not contribute to any cumulative impacts on the environment. This is an infill development project that will not have a significant effect on any CEQA issues. The proposed project is at the intersection of Durant Avenue and Ellsworth Street, which both are not a Scenic Highway. The proposed project is not on a hazardous waste site, as attested to in the "Hazardous Waste & Substances Statement" and detailed in the Phase I Environmental Site Assessment Report. These supportive documents are included as attachments in this application package. The proposed project does not contain a historic resource.

Assembly Bill 1633 (AB 1633), which went into effect on January 1, 2024, establishes that if certain sites qualify for a Categorical Exemption under CEQA, and a local agency does not make an Exempt determination, it constitutes a violation under the Housing Accountability Act (HAA). To be eligible for the protections of AB 1633:

I. The Project cannot be on an environmentally sensitive site or a site subject to certain environmental hazards;
II. The Project must be on a legal parcel, within an urbanized area, and provide certain green benefits;
III. The density of the housing development project meets or exceeds 15 dwelling units per acre; and
IV. There is substantial evidence in the record that the Project qualifies for an exemption, and that it is not subject to any exception to the exemption."

The proposed project meets each of these requirements. The subject site is an urban infill lot that has been developed for over 100 years and is not an environmentally sensitive or hazardous site. The proposed project is on two legal parcels within an urbanized area.

The project will provide green benefits by increasing the supply of housing and offices near public transit, Downtown and Southside services and the University. The new building will be constructed according to the Berkeley Green Code and Energy Code. The proposed project has a residential density of 232 units per acre.

The project materials provided in this application package provide substantial evidence that the project qualifies for a Class 32 Categorical Exemption. As detailed above, the proposed project is not subject to any exceptions to the exemption criteria. By satisfying each of these eligibility requirements, the proposed project is subject to the protections and provisions of AB 1633.

5. REQUIRED FINDINGS

This section outlines the proposed project's compliance with the required findings for approval of the requested Use Permits for this project.

1. Use Permit, under BMC § 23.202.020(A), to allow a Multi-family Residential Building
2. Administrative Use Permit, under BMC § 23.304.050 to allow rooftop equipment projections.

Use Permit Findings

The project is designed as a housing development project and is only subject to objective general plan and zoning standards and criteria, as per Gov Code § 65589.5(4). To the extent that required findings are objective, they are specified below. Use Permit findings that include subjective regulations cannot be enforced, according to the City's August 2, 2021 *Memo re: Housing Accountability Act & Density Bonus – Objective Standards*.[1]

[1] As noted in the City's August 2, 2021 Memo re: Housing Accountability Act & Density Bonus – Objective Standards: "the Zoning Officer, ZAB, DRC and LPC should refrain from applying subjective findings (e.g., nondetrimental) to any application to construct a qualifying housing development project (including remodeling or reconfiguration of housing) if that project satisfies objective standards for permit issuance, unless specific findings

1. **Use Permit, under BMC § 23.204.020(A), to allow a residential building**

   Table 23.202-1: Allowed Uses in the Residential Districts.
   Multi-Family Residential: UP(PH)

   Response: Because this Use Permit does not have any objective standards in the required findings, the density bonus project assumes the Use Permit for new construction of a residential building. The construction, establishment, maintenance, and operation of the proposed project will not be detrimental to the health, safety, peace, morals, comfort, or general welfare of the neighborhood or the City as a whole. Multi-family residential projects are a permitted use in the R-SMU district, and the proposed structure is appropriate for the district in that it makes housing available in a convenient location proximate to downtown Berkeley and the UC Berkeley campus.

   The proposed project is not anticipated to generate significant traffic or parking demand because it is located in the City of Berkeley's Low Vehicle-Miles Traveled (VMT) Area. This Low VMT area includes the Southside Area because the VMTs per resident are an average of 15% less than the rest of the Bay Area. In addition, the proposed project will have a Transportation Demand Management Program that includes secure bicycle parking and real-time transit information display monitors. Future residents will not be eligible for Residential Parking Permits (RPP). The proposed project will comply with all objective standards in the Southside Plan's adopted Mitigation Monitoring Program (MMP). As a result, the project would not be materially detrimental to the housing needs or public interest of the affected neighborhood and the City of Berkeley.

   The project is designed as a Housing Development Project and is only subject to objective zoning standards and findings. Use Permit findings that include subjective regulations cannot be enforced, according to the City's August 2, 2021, Memo re: Housing Accountability Act & Density Bonus – Objective Standards. This finding is not an objective requirement.

2. **Administrative Use Permit, under BMC § 23.304.050 to construct rooftop projections which exceed the maximum height.**

   Table 23.304-5: Allowed Projections Above Height Limit.
   Residential Districts

   Response: Because this Administrative Use Permit does not have any objective standards in the required findings, the proposed project assumes the Administrative Use Permit to allow rooftop projections to exceed the district's height limit. Because the proposed building height exceeds the district's height limit, the rooftop projections will also exceed that limit.

---

or denial under the Housing Accountability Act can be made. While decision-makers retain discretion in the overall land use and design review process, i.e., whether the use is properly located or the building and site improvements are compatibly designed, the ultimate decision on density and development intensity is protected by the HAA."

Affordable Housing Requirements

BERKELEY MUNICIPAL CODE CHAPTER 23.328

Berkeley Municipal Code (BMC) Chapter 23.328, Inclusionary Housing, requires Housing Development Projects[1] to include at least 20 percent of the Residential Units[2] as permanently affordable units. All affordable units provided in the project will be established and monitored within the City's Below Market Rate (BMR) housing program, and are referred to as BMR Units. The housing development project must provide one of the following to comply with the City's Inclusionary Housing regulations:

A. Construct BMR units on-site

B. Pay an In-Lieu Fee

C. Combination of on-site BMR units and In-Lieu Fee

D. Other options allowed by the Chapter

Each option is described in more detail below.

A. CONSTRUCT ON-SITE AFFORDABLE UNITS

Projects must provide 20 percent of the total residential units as on-site BMR units. BMR units must have the same proportion of bedroom counts (except no affordable unit can have more than three bedrooms) and average unit size as the market rate units. BMR units must be reasonably dispersed throughout the project, be comparable to market-rate units in quality, and have access to the same amenities and common areas as market-rate units. BMR Units shall be affordable to lower income households (up to 80% AMI). At least 50 percent of the required Affordable Units in the Housing Development Project shall be affordable to Very Low-Income Households, and the remaining units shall be affordable to households earning no more than 80 percent, consistent with affordable housing costs in the CA Health and Safety Code. Further, 80 percent of Very Low-Income units shall be first offered to tenants receiving assistance under the Section 8 Program, or the Shelter Plus Care Voucher Program (40 percent each), prior to being offered to other potential tenants.[3]

B. OPTION TO PAY AN IN-LIEU FEE

Applicants have the option to pay an In-Lieu Fee instead of providing the required BMR units.

The in-lieu fee is $62.83 per square feet of the Residential Unit Floor Area (RUFA) for all housing development projects

The In-Lieu Fee applies to all housing development projects. The full fee must be paid prior to obtaining the Certificate of Occupancy, or, if a Certificate of Occupancy is not required, prior to the final building permit inspection. The fee is automatically adjusted every two years, beginning July 1, 2025 based on changes to the California Construction Cost Index.[3]

Applicants who pay the full in-lieu fee can qualify for a 5,000 square foot exemption. 5,000 square feet will be deducted from the RUFA calculation.

NOTES

[1] **HOUSING DEVELOPMENT PROJECT** means a development project, including a Mixed-Use Residential project **(as defined in 23.502.020(M)(13)**, involving the new construction of at least one Residential Unit. Projects with one or more buildings or projects including multiple contiguous parcels under common ownership or control shall be considered as a sole Housing Development Project and not as individual projects **(BMC 23.328.020(E))**.

[2] **RESIDENTIAL UNIT** means any Dwelling Unit, any Live/Work Unit, or any bedroom of a Group Living Accommodation (GLA) except a GLA in a University-recognized fraternity, sorority or co-op; provided, however, that for purposes of this Chapter, "Residential Unit" shall not include any Accessory Dwelling Unit or Junior Accessory Dwelling Unit **(BMC 23.328.020(I))**.

[3] In the case of a State Density Bonus Project, only the base project is used to calculate the in-lieu fee. Formula to determine the Base RUFA can be found on Page 4.

[4] See **BMC 23.328.020 Definitions**

APPLICATION CITY OF BERKELEY **LAND USE PLANNING**

AFFORDABLE HOUSING COMPLIANCE PLAN

planning@berkeleyca.gov • Phone **(510) 981-7410,** TDD **(510) 981-7450**

Planning and Development
1947 Center St, 2nd Floor
Berkeley, CA 94704

C. COMBINATION OF ON-SITE BMR UNITS AND IN-LIEU FEE

Projects may provide less than the required 20 percent total residential units as on-site BMR units by paying a pro-rated In-Lieu Fee.

Formula to calculate the pro-rated in-lieu fee:

The In-Lieu Fee Per Square Foot *multiplied by* the **Total Residential Unit Floor Area** of a Housing Development Project, *multiplied by* the **Percentage of the Applicable Requirement Remaining** after accounting for any on-site Affordable Units provided.[3]

D. OTHER OPTIONS ALLOWED BY BMC CHAPTER 23.328 – APPROVED AT THE CITY'S DISCRETION

Applicants may elect to fulfill the requirement to construct affordable housing via one of the options below. Unlike options A through C above, these options are approved at the City's discretion. See **BMC 23.328.030** for more information.

APPLICATION CITY OF BERKELEY **LAND USE PLANNING**

AFFORDABLE HOUSING COMPLIANCE PLAN

Affordable Housing Compliance Plan Form

You are required to submit an Affordable Housing Compliance Plan (AHCP) for Housing Development Projects[1] that are subject to the affordable housing requirements of BMC Chapter 23.328, Inclusionary Housing. The AHCP is an enforceable commitment that identifies the number and type of affordable, or Below Market rate (BMR) units, the amount of In-Lieu Fees, and/or the parcels of land (or portions thereof) that will be provided and/or paid by the applicant to comply with those requirements. BMR units may include the required Inclusionary Housing (IH) units, Demolition Ordinance replacement units, Density Bonus units, SB 35 units and any other affordable units the project is applying under local and State law.

The Department of Planning and Development's Land Use Division and the Department of Health, Housing, and Community Services use the information from this form and the related sheets to confirm which provisions of the City's affordable housing requirements apply to your project, and if the project complies.

Please complete the entire form. If a section doesn't apply, enter "n/a." If selecting the option to provide an alternative unit size mix or option to dedicate land, please complete the entire AHCP form and staff will contact you to discuss approval for these discretionary options.

You may be asked to revise this form to reflect the approved project during the permit review process and/or required plan sheets.

The Preliminary AHCP is required with a Zoning Permit or Zoning Certificate application. It is intended to provide estimates to the Applicant and City, and inform conditions of approval on discretionary zoning permits. See the **applicable zoning submittal requirements** to determine if a Preliminary AHCP is needed for your project.

The Final AHCP is required with the first building permit application for construction, and will include the total fee amount due for projects electing to pay an In-Lieu Fee. The In-Lieu Fee can be paid any time prior to the issuance of the project's Certificate of Occupancy or Temporary Certificate of Occupancy (as applicable).

2. PROJECT SUMMARY INFORMATION –

THIS INFORMATION IS USED TO ESTIMATE THE TOTAL NUMBER OF REQUIRED BMR UNITS

A **Number of Residential Units**
(Complete total units if not using Density Bonus)

Base Units:	
Density Bonus Units:	
Total Units:	

B **Total Residential Unit Floor Area[4] (square feet)**
(Density bonus projects only, see page 5)

Base Units:	
Density Bonus Units:	
Total Units:	

C **Total BMR Units required (20% of Base Units)**
(Total Inclusionary Housing (IH) units required)

D **Total BMR Units Proposed by Income**

30% AMI (Extremely Low- Income)	
50% AMI (Very-Low Income)	
80% AMI (Lower Income)	
120% AMI (Moderate)	
TOTAL BMR Units	

Does the project use Density Bonus?

YES **NO**

Total Affordable Qualifying Units for Density Bonus

Are there existing units that will be demolished? If yes, the Demolition Ordinance (BMC 23.326) will apply to the project.

YES **NO**

Total units to be demolished

Total affordable replacement units required

(separate calculation required, Gov. Code §65589.5)

Total units replaced (affordable and market-rate)

3. PLEASE INDICATE HOW THE PROJECT WILL FULFILL ALL OF THE AFFORDABLE HOUSING REQUIREMENTS

3.A. PROVISION OF ON-SITE

The following provisions apply:

- Inclusionary Housing units cannot exceed three bedrooms
- At least 50 percent of the required Inclusionary Housing Units in the Housing Development Project must be designated as affordable to Very-Low Income Households (round up for fractional numbers).

Please complete the table by noting the number of units in each category.

PROJECT UNIT TYPES AND AFFORDABILITY LEVELS

Unit Type	Market Rate	Extremely Low-Income (30% AMI)	Very Low-Income Affordable (50% AMI)	Low-Income Affordable (80% AMI)	Moderate Income (120 %AMI)	TOTAL
Studio						
One Bedroom						
Two Bedroom						
Three Bedroom						
Four Bedroom						
Five Bedroom						
TOTAL						

APPLICATION CITY OF BERKELEY **LAND USE PLANNING**

AFFORDABLE HOUSING COMPLIANCE PLAN

3.B. OPTION TO PAY AN IN-LIEU FEE

Housing Development Projects may choose not to include BMR units and pay the full in-lieu fee, calculated as follows:

The Fee Per Square Foot
multiplied by
the **Total Residential Unit Floor Area**
of a Housing Development Project,
minus
5,000 square feet

Projects opting to pay the full in lieu fee may deduct 5,000 square feet from their RUFA calculation

---

The Base Project Residential Unit Floor Area (BP RUFA)
is equal to:
The Final Project Residential Unit Floor Area (FP RUFA)
divided by
One plus the Density Bonus percentage taken (DB %)

BP RUFA = FP RUFA / (1+DB%)

AFFORDABLE HOUSING FEE DUE

$62.83 Per Square Foot Fee
(Base Project only for density bonus projects)

X

Total Residential Unit Floor Area (square feet)
(Base Project [BP RUFA] only for density bonus projects. Projects that pay the full in-lieu fee deduct 5,000 square feet)

X

In Lieu Fee percentage calculation*:
(Affordable Units required – affordable units provided) / Affordable Units required)

(*projects that provide no on-site Affordable Units have a multiplier of 1)

TOTAL FEE DUE

EXAMPLE CALCULATIONS:
50,000 square foot 100-unit project providing 15 Affordable Units

A **Total Residential Unit Floor Area[4] (square feet)**
RUFA (Base Project RUFA only for density projects)

50,000 square feet

B **Total Residential Units**
(Base Project only for density bonus projects)

100

C **Total BMR Units required (20% of B)**

20

D **Total BMR Units Proposed**

50% AMI (Very-Low Income)	8
80% AMI (Lower Income)	7
TOTAL BMR Units	15

Per Square Foot Fee
(Base Project only for density bonus projects)

$62.83

X

Total Residential Unit Floor Area (square feet)
(Base Project only for density bonus projects. Projects that pay the full in-lieu fee deduct 5,000 square feet)

50,000 square feet

X

In Lieu Fee percentage calculation*:
(Affordable Units required – affordable units provided) / Affordable Units required)

(*projects that provide no on-site Affordable Units have a multiplier of 1)	25% ((20-15)/20 = 0.25)

TOTAL FEE DUE

$785,375

APPLICATION CITY OF BERKELEY **LAND USE PLANNING**

AFFORDABLE HOUSING COMPLIANCE PLAN

SECTION 4 REQUIRED PLAN SHEETS (LAND USE ENTITLEMENT PLANS AND BUILDING PERMIT PLANS)

REQUIRED AHCP PLAN SHEETS

In addition to completing this form, the land use entitlement and building permit plans for your housing development project must demonstrate compliance with the applicable affordable housing provisions. If your project includes a discretionary zoning permit, the entitlement plans must include a Preliminary AHCP plan sheet(s), and all building permits for construction must include a Final AHCP plan sheet(s).

What needs to be in the plans to demonstrate compliance with the City's affordable housing regulations?

The applicable AHCP plan sheets with the applicable information (listed below) must be in sequential pages near the beginning of your plan set and labeled as "Preliminary or Final Affordable Housing Compliance Plan Sheet." Having this information together in the plans will make locating the information easier during project and plan review, and provide transparency to the public. A sample plan set page is attached for reference (see Exhibit A). You will receive corrections from your zoning reviewer if information is not displayed properly in the plan set.

ALL PROJECTS: APPLICABILITY AND REQUIREMENTS OF BMC CHAPTER 23.328 INCLUSIONARY HOUSING

- Residential unit floor area diagrams showing the floor area that is included and excluded from calculation. Diagrams for density bonus projects must reflect the full project (base and bonus)*. Diagrams must be consistent with and separate from the architectural floor plans and include:
  - Schematic diagrams of each floor or level, including mezzanines
  - Indicate floor area by use with shading, color, and/or callouts
  - Dimension all areas of the project that qualify as residential unit floor area, and provide the square footage of each area
  - Tabulation of the total residential unit floor area according to the diagrams
- Calculation of the number of required and proposed BMR units (Base Project only for density bonus)
- Calculation of 100% In-Lieu fee (provide even if on-site units are proposed)

* The Base Project RUFA is used to determine the in-lieu fee for density bonus projects, and is calculated based on the RUFA total from the diagrams. *(See page 5)*

ON-SITE BELOW MARKET RATE (BMR) UNITS (ALL OR COMBINATION)

Any on-site BMR units
(BMC 23.328.030(A) Requirement to Construct Affordable Units

- Unit summary table by floor of BMR and market-rate units, with bedroom counts
- Alternate mix of unit types, if applicable
  - Calculations for 20 percent of residential unit floor area (must be a mix of affordable units that are either two- or three-bedrooms)

IN-LIEU FEE (ALL OR COMBINATION)

Payment in-lieu of providing some or all required affordable units on-site (BMC Section 23.328.030(B) Option to Pay In-Lieu)

In-Lieu Fee per Resolution No. 7,954-N.S. calculated as follows: the fee per square foot multiplied by the total Residential Unit Floor Area of a Housing Development Project, multiplied by the percentage of the applicable requirement remaining after accounting for any on-site Affordable Units provided. Projects that do not provide any Affordable Units on-site will have an applicable requirement multiplier of one. *(See page 5)*

The In-Lieu Fee per square foot is based on the residential unit floor area of the project (base project only if utilizing State Density Bonus provisions). *(See page 5)*

THE SITE'S REDEVELOPMENT WILL INCLUDE THE DEMOLITION OF BOTH EXISTING BUILDINGS AT 2298 DURANT AVE (A 2-STORY COMMERCIAL BUILDING) AND AT 2360 ELLSWORTH STREET (A 3-STORY RESIDENTIAL BUILDING OVER A 1-STORY PARTIALLY SUBTERRANEAN PARKING GARAGE). THE TWO EXISTING LOTS WILL BE MERGED INTO ONE CONTIGUOUS LOT WHOSE FRONT IS ALONG DURANT AVE AND WILL TAKE THE ADDRESS OF 2298 DURANT AVE.

PROPOSED IS AN 8-STORY RESIDENTIAL BUILDING, CONSISTING OF 65 UNITS AND 80,046 GSF OF BUILDING AREA. UNITS INCLUDE 2, 5, & 6 BEDROOM UNITS - ALL WITH IN-UNIT LAUNDRY. THE GROUND FLOOR INCLUDES A GENEROUS LOBBY, TENANT AMENITY SPACES, AND BUILDING UTILITY SPACES FOR ELECTRICAL AND TRASH THAT EXIT DIRECTLY TO ELLSWORTH STREET. OTHER COMMON SPACES INCLUDE AN INDOOR AMENITY AT THE GROUND FLOOR AND A ROOF DECK AT THE 8TH FLOOR.

VICINITY MAP

BASIS OF BEARINGS:

THE LINE IN DURANT AVENUE BETWEEN THE STANDARD CITY FOR BERKELEY MONUMENT FOUND AT ELLSWORTH STREET AND THE INTERSECTION OF THE REFERENCE POINTS AT FULTON STREET WAS TAKEN AS N83°00'00"E, PROJECTED AS SHOWN ON PARCEL MAP NO. 10100, FILED IN BOOK 320 OF MAPS, AT PAGES 96 THROUGH 100, ALAMEDA COUNTY RECORDS.

VERTICAL DATUM / BENCHMARK:

ELEVATIONS FOR THIS SURVEY ESTABLISHED BY HOLDING THE ELEVATION OF 211.60' ON THE TOP OF A 3/8^{ins} INCH BRASS PIN IN A MONUMENT WELL FOUND AT THE INTERSECTION OF ELLSWORTH STREET AND DURANT AVENUE, AS SHOWN ON THIS MAP. THIS MONUMENT WAS TAKEN AS CITY OF BERKELEY MONUMENT BO401, HELD PER CORNER RECORD 7052 AND CITY SURVEYOR'S NOTES AS CITY OF BERKELEY DATUM.
ELEVATION = 211.60' COB DATUM

TITLE REPORT NOTE:

THE INFORMATION REGARDING EXISTING EASEMENTS OR OTHER ENCUMBRANCES SHOWN ON THIS SURVEY IS BASED ON FIRST AMERICAN TITLE INSURANCE COMPANY PRELIMINARY TITLE REPORTS PROVIDED TO THE SURVEYOR, THE FIRST HAVING ORDER NUMBER NCS-1183023-CC, DATED MAY 31, 2023, AND THE SECOND HAVING ORDER NUMBER NCS-1177886, AMENDED, DATED APRIL 11, 2023, THERE MAY BE EASEMENTS OR OTHER ENCUMBRANCES OF RECORD THAT EXIST BUT ARE NOT DELINEATED HEREON.

UTILITIES NOTE:

INFORMATION SHOWN ON THIS SURVEY REGARDING EXISTING UTILITIES IS APPROXIMATE ONLY, IS BASED ON VISUAL OBSERVATIONS AND/OR UTILITY COMPANY RECORDS, AND HAS NOT BEEN VERIFIED AS BEING COMPLETE OR CORRECT. THE ENGINEER ASSUMES NO RESPONSIBILITY FOR THE ACCURACY OR COMPLETENESS OF THE EXISTING UTILITY INFORMATION SHOWN HEREON, NOR FOR THE PRESENCE OF OTHER UTILITIES WHICH MAY EXIST BUT ARE NOT SHOWN ON THIS SURVEY.

GENERAL NOTES:

1. THESE PLANS AND SPECIFICATIONS ARE SUBJECT TO MODIFICATION DURING CONSTRUCTION WHEN CONDITIONS DEVELOP THAT WERE NOT APPARENT DURING THE DESIGN AND PREPARATION OF THESE PLANS. ALL MODIFICATIONS MUST BE APPROVED BY THE CITY ENGINEER PRIOR TO CONSTRUCTION AND/OR IMPLEMENTATION.
2. ALL IMPROVEMENTS SHALL BE CONSTRUCTED IN ACCORDANCE WITH THE CITY OF BERKELEY STANDARD SPECIFICATIONS AND DETAILS SUBJECT TO THE INSPECTION AND APPROVAL OF THE ENGINEERING DIVISION OF THE PUBLIC WORKS DEPARTMENT. ALL REVISIONS MUST BE APPROVED BY THE CITY PRIOR TO CONSTRUCTION.
3. PRIOR TO COMMENCEMENT OF CONSTRUCTION, A PRE-JOB CONFERENCE SHALL BE REQUESTED BY THE DEVELOPER THROUGH THE CITY ENGINEER,
4. BEFORE COMMENCEMENT OF WORK, THE CONTRACTOR SHALL REVIEW ALL PLANS AND SPECIFICATIONS AND THE JOB SITE. THE CONTRACTOR WILL NOTIFY THE OWNER, THE ENGINEER WHO PREPARED THE PLANS, AND THE CITY ENGINEER OF ANY DISCREPANCIES THAT MAY REQUIRE MODIFICATION TO THESE PLANS OR OF ANY FIELD CONFLICTS.
5. APPROVAL OF THESE PLANS BY THE CITY ENGINEER SHALL NOT RELIEVE THE DEVELOPER OR THE ENGINEER FROM THE RESPONSIBILITY FOR THE DESIGN OF THE IMPROVEMENTS AND FOR ANY DEFICIENCIES RESULTING FROM THE DESIGN THEREOF.
7. ALL LANDSCAPING IS SUBJECT TO CITY INSPECTION. ANY CHANGE IN THE APPROVED LANDSCAPE PLAN MUST BE APPROVED BY THE CITY'S DESIGN REVIEW STAFF.
8. SHOULD IT APPEAR THAT THE WORK TO BE DONE OR ANY MATTER RELATIVE THERETO IS NOT SUFFICIENTLY DETAILED OR EXPLAINED ON THESE PLANS, THE CONTRACTOR SHALL CONTACT THE PROJECT ENGINEER FOR SUCH FURTHER EXPLANATIONS AS MAY BE NECESSARY.
9. IN ACCORDANCE WITH GENERALLY ACCEPTED CONSTRUCTION PRACTICES, THE CONTRACTOR WILL BE REQUIRED TO ASSUME SOLE AND COMPLETE RESPONSIBILITY FOR JOB SITE CONDITIONS DURING THE COURSE OF CONSTRUCTION OF THE PROJECT, INCLUDING SAFETY OF ALL PERSONS AND PROPERTY. THIS REQUIREMENT SHALL BE MADE TO APPLY CONTINUOUSLY AND NOT BE LIMITED TO NORMAL WORKING HOURS. THE CONTRACTOR FURTHER AGREES TO DEFEND, INDEMNIFY, AND HOLD THE CITY, THE OWNER, AND DESIGN PROFESSIONAL HARMLESS FROM ANY AND ALL LIABILITY, REAL OR ALLEGED, IN CONNECTION WITH THE PERFORMANCE OF WORK ON THIS PROJECT, EXCEPT FOR LIABILITY ARISING FROM THE SOLE NEGLIGENCE OF THE OWNER OR DESIGN PROFESSIONAL.
10. THE CONTRACTOR'S ATTENTION IS DIRECTED TO THE REQUIREMENTS OF THE DIVISION OF INDUSTRIAL SAFETY PERTAINING TO "CONFINED SPACES". ANY MANHOLE, CULVERT, DROP INLET OR TRENCH WHICH COULD CONTAIN AIR WHICH IS NOT READILY VENTILATED MAY BE CONSIDERED A "CONFINED SPACE". THE CONTRACTOR SHALL PROVIDE THE NECESSARY SAFETY OR TESTING EQUIPMENT AND PERSONNEL.
11. THE CONTRACTOR SHALL BE HELD RESPONSIBLE FOR ANY AND ALL DAMAGE TO EXISTING STRUCTURES AND/OR UTILITIES DURING CONSTRUCTION, PROPER REPAIR SHOULD BE DONE TO THE SATISFACTION OF THE REPRESENTATIVE OF THE CITY ENGINEER.
12. TO THE EXTENT FEASIBLE, SCHEDULE THE NOISIEST CONSTRUCTION ACTIVITIES DURING TIMES THAT WOULD HAVE THE LEAST IMPACT ON ADJACENT PROPERTIES. THIS WOULD INCLUDE RESTRICTING TYPICAL DEMOLITION AND EXTERIOR CONSTRUCTION ACTIVITIES TO STANDARD HOURS OF 7:00 AM TO 5:30 PM MONDAY THROUGH FRIDAY AND 8:00 AM TO 4:30 PM ON SATURDAY. THE CONTRACTOR SHALL ENSURE THAT ALL EQUIPMENT POWERED BY INTERNAL COMBUSTION ENGINES ARE FITTED EFFECTIVELY WITH MUFFLERS IN GOOD OPERATING CONDITION. WHERE FEASIBLE, NOISE GENERATING EQUIPMENT SHOULD BE STAGED AS FAR AWAY FROM EXISTING RESIDENCES, AND MOBILE EQUIPMENT SHOULD NOT BE ALLOWED TO IDLE UNNECESSARILY NEAR THE RESIDENTIAL OR CHILD CARE USES. THE CONTRACTOR SHALL COORDINATE CONSTRUCTION ACTIVITIES THAT GENERATE NOISE WITH THE OWNER.
13. CONTRACTOR SHALL OBTAIN ENCROACHMENT PERMITS FROM THE CITY OF BERKELEY PUBLIC WORKS PRIOR TO COMMENCING CONSTRUCTION INVOLVING THEIR RIGHT-OF-WAY, AND FOR THE CONSTRUCTION, MODIFICATION, OR CONNECTION TO DEPARTMENT OR DISTRICT-MAINTAINED FACILITIES. ALL WORKMANSHIP, EQUIPMENT AND MATERIALS SHALL CONFORM TO DEPARTMENT STANDARDS AND SPECIFICATIONS.
14. THE FORMS FOR CONCRETE SIDEWALKS, CURBS, GUTTERS AND DRIVEWAYS THAT ARE TO BE CONSTRUCTED TO CONFORM TO EXISTING ROADS SHALL BE INSTALLED TO THE GRADES SHOWN UPON THESE PLANS. PRIOR TO PLACING CONCRETE, THE FORMS SHALL BE INSPECTED AND APPROVED BY THE CITY ENGINEER FOR CONFORMANCE TO EXISTING ROAD IMPROVEMENTS. GRADES OF NEW IMPROVEMENTS ARE SUBJECT TO FIELD ADJUSTMENT TO FIT CONDITIONS.
15. THE PROPOSED STREET STRUCTURAL SECTION IS TO BE DESIGNED BY A REGISTERED CIVIL ENGINEER AND APPROVED BY THE CITY ENGINEER.
16. IN CONFORM AREAS, IF FULL STRUCTURAL SECTION IS NOT FOUND AT THE APPARENT EDGE OF PAVEMENT, FURTHER STREET EXCAVATION WILL BE REQUIRED UNTIL THE FULL SECTION IS ENCOUNTERED.
17. TEMPORARY REPAIRS TO ALL TRENCHES WITHIN THE TRAVELED WAY ON EXISTING ROADS SHALL BE MADE WITHIN TWENTY-FOUR (24) HOURS OF TRENCH OPENING. MINIMUM TEMPORARY REPAIRS SHALL CONSIST OF BACKFILLING AND COMPACTING 6" OF AGGREGATE BASE AND 1" OF TEMPORARY ASPHALTIC SURFACING. PERMANENT REPAIRS, INCLUDING RESTORATION OF THE EXISTING STRUCTURAL SECTION SHALL BE MADE WITHIN FIFTEEN (15) DAYS OF TRENCH OPENING.
18. IN THE EVENT OF ANY DISCREPANCY BETWEEN ANY DRAWING AND THE FIGURES WRITTEN THEREON, THE FIGURES SHALL BE TAKEN AS CORRECT.
19. THE CONTRACTOR SHALL POST EMERGENCY TELEPHONE NUMBERS AT THE JOB SITE FOR THE CONTRACTOR AND PUBLIC WORKS AGENCY.
20. THE CONTRACTOR SHALL PROVIDE FOR INGRESS AND EGRESS TO PRIVATE PROPERTY ADJACENT TO THE WORK THROUGHOUT THE PERIOD OF CONSTRUCTION.
21. THE CONTRACTOR SHALL NOT DISTURB ANY PERMANENT SURVEY POINTS WITHOUT THE CONSENT OF THE CITY ENGINEER. ANY POINTS DESTROYED SHALL BE REPLACED BY A LICENSED SURVEYOR AT THE CONTRACTOR'S EXPENSE.
22. THE CONTRACTOR IS RESPONSIBLE FOR MATCHING EXISTING FACILITIES TO AVOID ANY ABRUPT OR APPARENT CHANGES IN GRADES OR CROSS SLOPES, LOW SPOTS, OR HAZARDOUS CONDITIONS.
23. CONTRACTOR SHALL SALVAGE AND RELOCATE EXISTING STREET SIGNS AND INSTALL NEW SIGNS PER CITY OF BERKELEY SPECIFICATIONS AS REQUIRED.
24. WHERE UNSTABLE OR UNSUITABLE MATERIALS ARE ENCOUNTERED DURING SUB-GRADE PREPARATION, THE AREA IN QUESTION SHALL BE OVER EXCAVATED AND REPLACED BY SELECT BACKFILL MATERIAL AS DIRECTED IN THE FIELD BY THE ENGINEER.
25. ALL TRENCH EXCAVATION AND BACKFILL SHALL BE IN ACCORDANCE WITH THE TRENCH BACKFILL DETAIL, SHOWN ON THESE PLANS.
26. ALL TREES LOCATED WITHIN THE ROADWAY PRISM OR SHOWN TO BE REMOVED IN THE STREET RIGHT-OF-WAY OR EASEMENTS SHALL BE REMOVED COMPLETELY, INCLUDING ROOTS, AND HAULED AWAY.
27. THE CONTRACTOR SHALL NOT REMOVE, DISTURB, OR HARM, IN ANY WAY, ANY TREE NOT SPECIFICALLY DESIGNATED AND APPROVED BY THE INSPECTOR FOR REMOVAL.
28. COMPACTION TESTS SHALL BE PERFORMED ON ALL TRENCHES AND STREET WORK TO VERIFY THAT COMPACTION CONFORMS TO CITY STANDARDS. ALL TESTING WILL BE AT THE DEVELOPER OR CONTRACTOR'S EXPENSE.
29. THE DUTIES OF THE CITY ENGINEER AND PROJECT ENGINEER DO NOT INCLUDE THE ADEQUACY OF THE CONTRACTOR'S SAFETY IN, ON, OR NEAR THE CONSTRUCTION SITE.
30. THE CONTRACTOR SHALL COMPLY WITH THE RULES AND REGULATIONS OF THE STATE CONSTRUCTION SAFETY ORDERS. ALL TRENCHES OVER FIVE FEET IN DEPTH SHALL BE SHORED IN ACCORDANCE WITH CAL-OSHA "CONSTRUCTION SAFETY ORDERS" CURRENT EDITION. CONTRACTOR MUST HAVE VALID TRENCH SHORING PERMIT ISSUED BY CAL-OSHA.
31. TRAFFIC CONTROL SHALL BE PROVIDED IN ACCORDANCE WITH CALTRANS "MANUAL OF TRAFFIC CONTROLS FOR CONSTRUCTION AND MAINTENANCE WORK ZONES" CURRENT EDITION AND THESE PLANS. A TRAFFIC CONTROL PLAN WILL BE REQUIRED AND A PERMIT WILL BE REQUIRED TO IMPLEMENT IT. CONTRACTOR SHALL MEET WITH TRAFFIC AND PUBLIC WORKS TO DISCUSS PROJECT NEEDS AND PREPARE TRAFFIC CONTROL PLANS.
32. THE CONTRACTOR SHALL PROVIDE ALL LIGHTS, SIGNS, BARRICADES, FLAGMEN, OR OTHER DEVICES NECESSARY TO PROVIDE FOR PUBLIC SAFETY. SUBMIT LANE CLOSURE AND TRAFFIC CONTROL PLANS PRIOR TO BEGINNING WORK TO THE CITY ENGINEER FOR APPROVAL.
33. ALL UNDERGROUND UTILITIES WITHIN THE RIGHT-OF-WAY OR ACCESS EASEMENT, INCLUDING MAINS AND LATERALS, SHALL BE INSTALLED AND BACKFILL COMPLETED PRIOR TO THE START OF CURB, SIDEWALK AND PAVING CONSTRUCTION.
34. ALL TRENCH BACKFILL WITHIN THE RIGHT-OF-WAY SHALL BE COMPACTED AS SHOWN IN CITY'S STANDARD PLANS OR AS RECOMMENDED BY THE ENGINEER. IF TESTS SHOW THAT THE ACTUAL COMPACTION HAS NOT EQUALED OR SURPASSED THAT WHICH IS RECOMMENDED, THE ENGINEER SHALL PROVIDE THE PROPOSED ACTION TO BE TAKEN.
35. ALL NEW STORM DRAIN INLETS SHALL BE STENCILED OR STAMPED WITH CITY'S CLEAN WATER PROGRAM STANDARD LOGO, "NO DUMPING – DRAINS TO BAY," PRIOR TO THE ACCEPTANCE OF THE SITE IMPROVEMENTS OR THE FINAL BUILDING INSPECTION, WHICHEVER OCCURS FIRST.
36. CONTRACTOR SHALL NOTIFY UNDERGROUND SERVICE ALERT (USA) AT LEAST TWO WORKING DAYS PRIOR TO ANY EXCAVATION.
37. AN ENGINEERING PERMIT WILL BE REQUIRED FOR ANY WORK IN THE PUBLIC RIGHT-OF-WAY, INCLUDING BUT NOT LIMITED TO CONSTRUCTION STAGING, CONSTRUCTION PARKING, SIDEWALK, DRAINAGE, OR SEWER WORK. THE ENGINEERING PERMIT CAN BE ISSUED AFTER THE BUILDING PERMIT IS APPROVED AND ISSUED. APPROVAL OF THIS BUILDING PERMIT DOES NOT AUTHORIZE WORK IN THE PUBLIC RIGHT-OF-WAY.

DEMOLITION NOTES:

1. THE EXTENT OF DEMOLITION WORK IS TO BE AS SHOWN ON THIS PLAN. DEMOLITION INCLUDES COMPLETE WRECKING, REMOVAL AND DISPOSAL OF STRUCTURES, BURIED DEBRIS, FOUNDATIONS, PAVEMENT, CURBS, TREES & SHRUBS (INCLUDING ROOT SYSTEMS), DRAINAGE STRUCTURES, UTILITIES, SIGNAGE, LANDSCAPING AND/OR IRRIGATION SYSTEM, UNLESS OTHERWISE INDICATED ON THIS PLAN OR OTHERWISE DIRECTED BY THE OWNER OR HIS REPRESENTATIVE. EXISTING PERIMETER FENCES ARE TO REMAIN UNLESS OTHERWISE DIRECTED BY THE OWNER OR HIS REPRESENTATIVE
2. THIS DEMOLITION PLAN IS NOT INTENDED TO DETERMINE THE METHOD, DETAILS AND/OR MEANS OF PERFORMING THE DEMOLITION WORK. THIS PLAN MAKES NO INQUIRY OR DETERMINATION AS TO THE EXISTENCE OF HAZARDOUS OR TOXIC MATERIALS EXISTING ON SITE. IT IS RECOMMENDED THAT AN INDEPENDENT INQUIRY BE PERFORMED PRIOR TO DEMOLITION WORK TO DETERMINE THE EXISTENCE OF ANY POTENTIAL HAZARDOUS OR TOXIC RISK.
3. THE CONTRACTOR SHALL BE RESPONSIBLE FOR LOCATING ALL EXISTING UNDERGROUND UTILITIES, WHETHER SHOWN ON THESE PLANS OR NOT, PRIOR TO THE COMMENCEMENT OF ANY DEMOLITION WORK.
4. ALL EXISTING UTILITIES AND APPURTENANCES THERETO SERVING ANY EXISTING STRUCTURE OR BUILDINGS AND THOSE IN THE PUBLIC RIGHT OF WAY SERVING PUBLIC UTILITIES ARE TO REMAIN AND SHALL BE PROTECTED IN PLACE UNLESS DIRECTED TO BE REMOVED AND REPLACED ELSEWHERE ON THESE PLANS.
5. THE CONTRACTOR SHALL CONTACT ALL ASSOCIATED UTILITY SUPPLIERS PRIOR TO DEMOLITION TO COORDINATE THE DISCONNECTION AND REMOVAL OR ABANDONMENT OF UTILITIES (I.E. TELEPHONE, ELECTRICAL, WATER, SEWER, ETC.) SERVING THE STRUCTURE TO BE DEMOLISHED.
6. THE CONTRACTOR SHALL OBTAIN A LIST OF ITEMS TO BE SALVAGED FROM THE OWNER PRIOR TO COMMENCING THE DEMOLITION WORK.
7. THE FINISHED GROUND SURFACE SHALL BE LEFT IN A SMOOTH, UNIFORM GRADED CONDITION.
8. DEMOLITION OPERATIONS AND REMOVAL OF DEBRIS SHALL BE CONDUCTED IN A MANNER TO INSURE MINIMUM INTERFERENCE WITH STREETS, SIDEWALKS AND OTHER ADJACENT OCCUPIED OR UTILIZED FACILITIES.
9. THE CONTRACTOR SHALL INSURE THE SAFE PASSAGE OF PERSONS AROUND THE DEMOLITION AREA. CONDUCT OPERATIONS TO PREVENT DAMAGE TO ADJACENT BUILDINGS, STRUCTURES AND OTHER FACILITIES.
10. THE CONTRACTOR SHALL PROMPTLY REPAIR ANY DAMAGE CAUSED TO ADJACENT FACILITIES BY DEMOLITION OPERATIONS AT NO COST TO THE OWNER.
11. USE WATER SPRINKLING, TEMPORARY ENCLOSURES AND OTHER SUITABLE METHODS TO LIMIT DUST AND DIRT SCATTERING AND RISING IN AIR TO LOWEST PRACTICAL LEVEL. COMPLY WITH GOVERNING REGULATIONS PERTAINING TO ENVIRONMENTAL PROTECTION. CONTRACTOR IS RESPONSIBLE FOR CLEANLINESS OF ADJACENT STRUCTURES AND IMPROVEMENTS. SUCH IMPROVEMENTS SHALL BE KEPT FREE OF DUST, DIRT AND DEBRIS CAUSED BY DEMOLITION OPERATIONS. RETURN ADJACENT AREAS TO CONDITIONS EXISTING PRIOR TO START OF WORK.
12. DUST CONTROLS SHALL BE IMPLEMENTED DURING ALL DEMOLITION AND GRADING OPERATIONS. PUBLIC STREETS SHALL BE SWEPT CLEAN AS NECESSARY.
13. THE GENERAL CONTRACTOR SHALL BE RESPONSIBLE FOR ALL REQUIRED TRAFFIC CONTROL AND SAFETY ISSUES.
14. THE GENERAL CONTRACTOR SHALL BE RESPONSIBLE FOR ALL CONSTRUCTION COORDINATION WITH ALL ADJACENT PROPERTY OWNERS FOR WORK TO BE PERFORMED ON THEIR PROPERTIES.
15. THE GENERAL CONTRACTOR SHALL BE RESPONSIBLE FOR THE DESIGN AND INSTALLATION OF ALL REQUIRED TEMPORARY ACCESS DEVICES (TRENCH PLATES, FENCES, ETC) AS REQUIRED TO ALLOW ACCESS DURING THE COURSE OF CONSTRUCTION.
16. ALL DEMOLITION WORK SHALL BE IN ACCORDANCE WITH CITY SPECIFICATIONS AND STANDARDS.
17. FIELD VERIFY ALL UTILITY TERMINATION POINTS, SIZES AND LOCATIONS PRIOR TO CONSTRUCTION. ALL UTILITIES TO BE CAPPED, ABANDONED OR MODIFIED SHOULD BE "POTHOLED" TO CONFIRM THEIR SIZE, LOCATION AND CONFIGURATION PRIOR TO CONSTRUCTION.
18. GENERAL CONTRACTOR SHALL PROVIDE A UTILITY REMOVAL/RELOCATION PLAN FOR CLIENT'S REVIEW PRIOR TO CONSTRUCTION.

GRADING NOTES:

1. THE DEVELOPER SHALL, AT HIS SOLE EXPENSE, MAKE TESTS OVER THE SOIL ON WHICH THE ROAD SURFACING AND BASE IS TO BE CONSTRUCTED.
2. A REPRESENTATIVE OF THE SOILS ENGINEER SHALL BE ON THE SITE DURING GRADING OPERATIONS AND SHALL OBSERVE THE GRADING AND IDENTIFY ANY CONDITIONS THAT SHOULD BE CORRECTED AND RECOMMEND CORRECTIVE MEASURES TO THE CONTRACTOR AND THE CITY ENGINEER.
3. GRADING AT THE BOUNDARIES OF THIS PROJECT SHALL BE DONE SO AS NOT TO OBSTRUCT THE RUNOFF OF STORM WATERS FROM ADJACENT PROPERTIES. ALL GRADING SHALL BE DONE TO PROVIDE STABLE SLOPES WHICH SHALL DRAIN ONTO THIS PROJECT, WHICH IN TURN SHALL BE GRADED TO STREETS OR DRAINAGE DITCHES OR ACROSS LAND WITHIN THIS PROJECT, WHICH IN TURN SHALL BE GRADED TO STREETS OR TO DRAINAGE FACILITIES SHOWN ON THESE PLANS. GRADING SHALL BE DONE IN SUCH A MANNER THAT ALL NEW SLOPES SHALL DIRECT STORM WATER TO THE STREETS OR INTERCEPTION DITCHES OR ACROSS LAND WITHIN THIS PROJECT AND SHALL NOT DIVERT OR CREATE A MEANS FOR STORM WATER TO FLOW ONTO ADJACENT PROPERTIES, EXCEPT AS INDICATED ON THE PLANS.
4. GRADING SHALL NOT BE PERMITTED ON THE SITE UNTIL A GRADING PERMIT IS ISSUED IN ACCORDANCE WITH THE CITY OF BERKELEY GENERAL ORDINANCE AND CODES FOR GRADING, EROSION AND SEDIMENT CONTROLS.
5. ALL GRADING, EROSION AND SEDIMENTATION CONTROL AND RELATED WORK UNDERTAKEN ON THIS SITE IS SUBJECT TO ALL TERMS AND CONDITIONS OF THE GRADING ORDINANCE AND APPLICATION FOR GRADING.
6. IF GRADING ON THE SITE IS STARTED, CONTINUED OR ABANDONED BETWEEN OCTOBER FIRST AND APRIL FIFTEENTH OF ANY YEAR OF CONSTRUCTION, ALL EROSION AND SEDIMENT CONTROL IMPROVEMENTS AND PLANTING SHALL BE COMPLETED PRIOR TO OCTOBER FIRST.
7. CONTRACTOR SHALL KEEP EXISTING STREETS FREE FROM DIRT AND DEBRIS DURING ALL PHASES OF CONSTRUCTION TO THE SATISFACTION OF THE CITY ENGINEER. ALL TRASH, CONSTRUCTION DEBRIS, AND MATERIALS WILL BE CONTAINED ON SITE UNTIL DISPOSAL OFF-SITE CAN BE ARRANGED.
8. DUST CONTROL MEASURES AS APPROVED BY THE CITY ENGINEER SHALL BE FOLLOWED IN ALL AREAS UNDERGOING GRADING AND OTHER CONSTRUCTION ACTIVITIES.

THE GRADING WORK DEPICTED HEREON SHALL CONFORM TO THE RECOMMENDATIONS CONTAINED IN THE SOIL INVESTIGATION TITLED "GEOTECHNICAL INVESTIGATION PROPOSED RESIDENTIAL BUILDING 2298 DURANT AVENUE BERKELEY, CALIFORNIA."

PREPARED BY:
ROCKRIDGE GEOTECHNICAL
1350 OCEAN AVE.
EMERYVILLE, CA 94608
(510) 420-5738

9. WHERE SOIL OR GEOLOGIC CONDITIONS ENCOUNTERED IN GRADING OPERATIONS ARE DIFFERENT FROM THOSE ANTICIPATED IN THE SOIL AND GEOLOGIC INVESTIGATION REPORT, OR WHERE CONDITIONS WARRANT CHANGES TO THE RECOMMENDATIONS CONTAINED THEREIN, A REVISED SOIL OR GEOLOGIC REPORT SHALL BE SUBMITTED FOR APPROVAL AND SHALL BE ACCOMPANIED BY AN ENGINEERS OPINION AS TO THE SAFETY OF THE SITE FROM THE POSSIBILITY OF LAND SLIPPAGE, SETTLEMENT AND SEISMIC ACTIVITY.
10. THE PROJECT ENGINEER AND GEOLOGIST SHALL PROVIDE A DECLARATION STATING THAT ALL WORK WAS DONE IN ACCORDANCE WITH THE APPROVED PLANS AND SPECIFICATIONS AND THE RECOMMENDATIONS CONTAINED IN THE SOIL AND GEOLOGIC REPORT.
11. THE SOILS ENGINEER SHALL BE NOTIFIED AT LEAST TWO (2) WORKING DAYS PRIOR TO PLACEMENT OF FILL SO THAT ARRANGEMENTS FOR INSPECTION CAN BE MADE.
12. THE CONTRACTOR SHALL ARRANGE A PRE-CONSTRUCTION MEETING WITH THE CITY ENGINEER BEFORE THE START OF CONSTRUCTION. THE CONTRACTOR SHALL CONTACT THE REVIEW ENGINEER AT (510) 581-2772 TO ARRANGE A TIME FOR THE MEETING.
13. OPERATIONS SHALL CEASE IN THE VICINITY OF ANY SUSPECTED ARCHAEOLOGICAL RESOURCE UNTIL AN ARCHAEOLOGIST IS CONSULTED AND HIS OR HER RECOMMENDATIONS FOLLOWED, SUBJECT TO APPROVAL BY THE PLANNING DIRECTOR. IF EVIDENCE OF HUMAN REMAINS IS DISCOVERED ON THE SITE, THE COUNTY CORONER SHALL BE NOTIFIED IMMEDIATELY.
14. ANY WATER WELL, CATHODIC PROTECTION WELL OR EXPLORATORY BORING THAT IS SHOWN ON THESE PLANS, IS KNOWN TO EXIST, IS PROPOSED OR IS LOCATED DURING THE COURSE OF FIELD OPERATIONS MUST BE PROPERLY DESTROYED, BACKFILLED OR MAINTAINED IN ACCORDANCE WITH THECITY OF BERKELEY REGULATIONS.
15. EXISTING UNDERGROUND FACILITIES AS SHOWN ARE APPROXIMATE ONLY AND WERE OBTAINED FROM AVAILABLE UTILITY RECORDS. THE PROJECT ENGINEER ASSUMES NO RESPONSIBILITY FOR THE ACCURACY OR COMPLETENESS OF EXISTING UTILITY INFORMATION. IT SHALL BE THE CONTRACTOR'S RESPONSIBILITY TO CONTACT ALL LOCAL UTILITIES AND TO HAVE ALL FACILITIES LOCATED AND EXPOSED TO VERIFY THE CLEARANCE AT NEW PIPE CROSSINGS PRIOR TO THE START OF NEW PIPELINE CONSTRUCTION.

FIRE PROTECTION AND DOMESTIC WATER NOTES:

1. ALL DOMESTIC WATER LINES 4" AND LARGER SHALL BE C900, CLASS 200 PIPE. DOMESTIC WATER LINES SMALLER THAN 4" SHALL BE PVC SCHEDULE 80.
2. EBMUD SPECIFICATIONS AND STANDARDS ARE INCORPORATED HEREON BY REFERENCE. ALL DOMESTIC AND FIRE WATER LINE CONSTRUCTION FROM THE CONNECTION TO THE MAIN TO THE BACKFLOW/DOUBLE DETECTOR CHECK VALVE SHALL BE INSTALLED PER EBMUD STANDARDS AND SPECIFICATIONS.
3. AN EBMUD PERMIT IS REQUIRED FOR CONNECTIONS TO EBMUD FACILITIES.
4. ALL EXISTING WATER SERVICES TO BE ABANDONED SHALL BE DONE PER EBMUD STANDARDS AND SPECIFICATIONS.
5. INSTALL LOCATOR WIRE DIRECTLY ON TOP OF THE PIPE AND MAGNETIC TAPE WITHIN 12" ABOVE ALL PLASTIC WATER PIPES.
6. THE FIRE SYSTEM DESIGN SHOWN ON THESE PLANS ARE FOR GENERAL PURPOSES ONLY. REFER TO FIRE SYSTEM SHOP DRAWINGS AND SPECIFICATIONS, BY GENERAL CONTRACTOR, FOR ADDITIONAL INFORMATION.

UTILITY NOTES:

1. FIELD VERIFY ALL UTILITY TERMINATION POINTS, SIZES AND LOCATIONS PRIOR TO CONSTRUCTION. ALL UTILITIES TO BE CAPPED, ABANDONED OR MODIFIED SHOULD BE "POTHOLED" TO CONFIRM THEIR SIZE, LOCATION AND CONFIGURATION PRIOR TO CONSTRUCTION.
2. GENERAL CONTRACTOR SHALL PROVIDE A UTILITY REMOVAL/RELOCATION PLAN FOR CLIENT'S REVIEW PRIOR TO CONSTRUCTION.
3. IT IS RECOMMENDED THAT ALL EXISTING UTILITIES THAT ARE TO BE REMOVED, RELOCATED, MODIFIED OR IMPACTED BY THE PROPOSED CONSTRUCTION BE FIELD LOCATED BY THE GENERAL CONTRACTOR PRIOR TO THE START OF CONSTRUCTION. THE INTENT OF THE UTILITY DESIGN IS TO CONTINUE TO USE THE MAJORITY OF THE EXISTING UTILITIES. THE LOCATION OF MOST OF THE UTILITIES ARE UNKNOWN OR UNVERIFIED. IF THE EXISTING UTILITIES ARE NOT LOCATED AS INDICATED ON THE PLAN, SUBSTANTIAL REDESIGN WORK MAY BE REQUIRED. THE GENERAL CONTRACTOR SHALL NOTIFY THE ENGINEER OF ANY DISCREPANCIES IN THE PLANS.
4. DEMOLISH AND REMOVE ALL EXISTING UTILITIES AND SUPPORT STRUCTURES AT BUILDINGS TO BE REMOVED.
5. ALL EXISTING UTILITY BOXES, LIDS, VALVE COVERS, VAULTS, ETC. THAT ARE TO REMAIN SHALL BE ADJUSTED TO MEET THE NEW FINISHED GRADES (AS REQUIRED). RE-USE EXISTING BOXES, LIDS, VALVE COVERS, VAULTS (IF POSSIBLE), OR INSTALL NEW PER COUNTY REQUIREMENTS. REPLACE ALL DAMAGED ITEMS. MATCH EXISTING SIZES. INSTALL/REPLACE TRAFFIC RATED BOXES WHERE REQUIRED. FIELD VERIFY THE EXTENT OF WORK.
6. REMOVE OR ABANDON ALL UNUSED SITE UTILITIES PER LOCAL REQUIREMENTS. FIELD VERIFY EXTENT OF REMOVAL.
7. THE CONTRACTOR IS RESPONSIBLE TO NOTIFY ALL UTILITIES AND UNDERGROUND SERVICE ALERT AT (800) 227-2600 48 HOURS PRIOR TO ANY EXCAVATION SO THAT THEIR LINES CAN BE MARKED.
8. ABANDONED UNDERGROUND STRUCTURES ENCOUNTERED IN THE STREET AREAS SHALL BE REMOVED TO SUFFICIENT DEPTH TO ALLOW UNDERGROUND LINES TO CROSS. EXCAVATED AREAS SHALL BE FILLED AND COMPACTED DURING ROUGH GRADING. THE COUNTY INSPECTOR MAY REQUIRE ADDITIONAL WORK BE DONE IF VISUAL INSPECTION INDICATES IT IS NECESSARY.
9. EXISTING UNDERGROUND FACILITIES AS SHOWN ARE APPROXIMATE ONLY AND WERE OBTAINED FROM AVAILABLE UTILITY RECORDS. THE PROJECT ENGINEER ASSUMES NO RESPONSIBILITY FOR THE ACCURACY OR COMPLETENESS OF EXISTING UTILITY INFORMATION. IT SHALL BE THE CONTRACTOR'S RESPONSIBILITY TO CONTACT ALL LOCAL UTILITIES AND TO HAVE ALL FACILITIES LOCATED AND EXPOSED TO VERIFY THE CLEARANCE AT NEW PIPE CROSSINGS PRIOR TO THE START OF NEW PIPELINE CONSTRUCTION.
10. ANY RELOCATION OF THE PUBLIC UTILITIES SHALL BE DONE IN ACCORDANCE WITH ANY AND ALL REQUIREMENTS OF THE UTILITY COMPANY AND WITH REGARD TO THE REQUIRED FEES, BONDS, PERMITS. WORKING CONDITIONS, ETC. OF SAID COMPANY. THIS WORK SHALL BE DONE AT NO EXPENSE TO THE COUNTY OF ALAMEDA. THE SUBDIVIDER SHALL PAY THE COST OF ALL SAID FEES. BONDS, PERMITS, ETC.
11. MINIMUM COVER FOR CONDUITS SHALL BE 36" UNLESS OTHERWISE SHOWN OR NOTED ON THESE PLANS OR ON UTILITY PLANS (BY OTHERS).

SANITARY SEWER NOTES:

1. CITY OF BERKELEY SPECIFICATIONS ARE INCORPORATED HEREON BY REFERENCE. SANITARY SEWER MAINS AND LATERALS SHALL BE INSTALLED AT THE LOCATIONS SHOWN HEREIN OR AS SPECIFIED IN THE FIELD BY DEVELOPER.
2. ALL SANITARY SEWER MAINS AND LATERALS SHALL BE CONSTRUCTED USING HDPE SDR-17 UNLESS OTHERWISE NOTED ON THE PLANS.

STORM DRAIN NOTES:

1. ALL STORM DRAIN PIPES SHALL BE HDPE SDR-17 OR BETTER, UNLESS OTHERWISE NOTED ON THE PLANS.
2. ALL ONSITE STORM DRAIN INLETS SHALL BE CLEARLY MARKED WITH THE WORDS "NO DUMPING! FLOWS TO BAY." OR EQUIVALENT.

TREE PRESERVATION NOTES:

1. ALL TRENCHING WITHIN 5' OF AN EXISTING TREE MUST BE DONE USING AN AIRSPADE PNEUMATIC EXCAVATION TOOL BY A TREE SERVICES CONTRACTOR WITH A D-49 STATE CONTRACTORS LICENSE. THE CITY'S ARBORIST SHALL INSPECT EXCAVATION PRIOR TO ANY ROOTS BEING CUT. CALL (510) 981-6660 TO SCHEDULE AN INSPECTION. ROOTS OVER 2" IN DIAMETER MAY REQUIRE PRESERVATION. ONLY A LICENSED AND INSURED TREE SERVICES CONTRACTOR MAY PRUNE THE TREE ROOTS. ROOTS ARE TO BE CUT WITH A SHARP AXE OF SAW. THE EXCAVATION SHALL NOT BE LEFT OPEN AND ROOTS EXPOSED TO AIR FOR MORE THAN 24 HOURS.

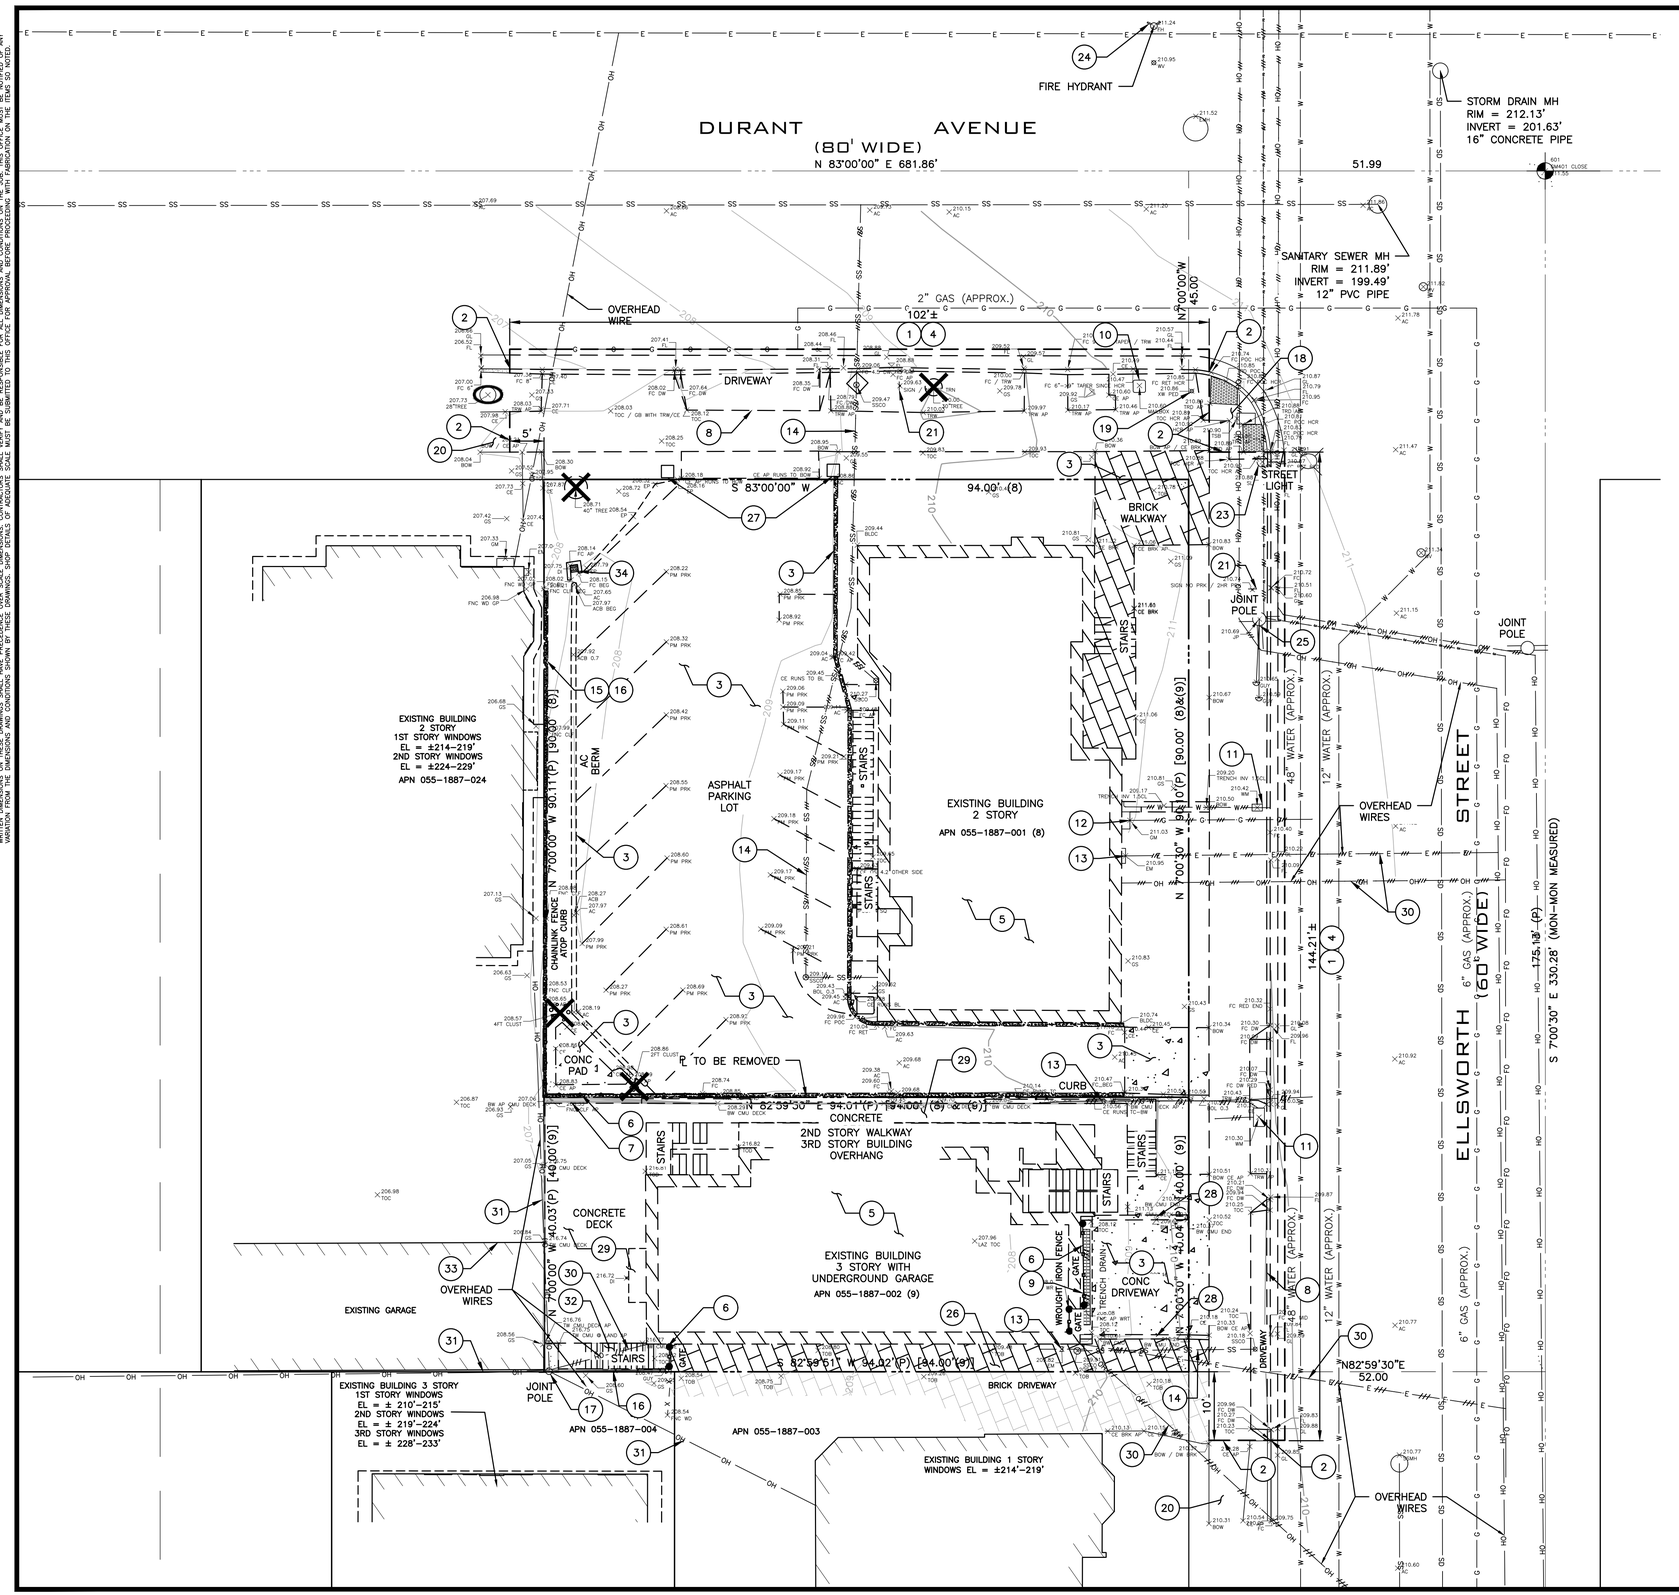
DEMOLITION NOTES:

SEE SHEET C2.0 FOR ADDITIONAL INFORMATION NOT SHOWN

1. THE CONTRACTOR SHALL BE RESPONSIBLE FOR LOCATING ALL EXISTING UNDERGROUND UTILITIES, WHETHER SHOWN ON THESE PLANS OR NOT, PRIOR TO THE COMMENCEMENT OF ANY DEMOLITION WORK.
2. ALL EXISTING UTILITIES AND APPURTENANCES THERETO SERVING ANY EXISTING STRUCTURE OR BUILDINGS AND THOSE IN THE PUBLIC RIGHT OF WAY SERVING PUBLIC UTILITIES ARE TO REMAIN AND SHALL BE PROTECTED IN PLACE. THE CONTRACTOR SHALL BE RESPONSIBLE FOR RELOCATING OR REMOVING ALL UTILITIES IMPACTED BY THE PROPOSED CONSTRUCTION WHETHER OR NOT INDICATED ON THE PLANS.
3. THE CONTRACTOR SHALL CONTACT ALL ASSOCIATED UTILITY SUPPLIERS PRIOR TO DEMOLITION TO COORDINATE THE DISCON

ALL IDEAS, DESIGNS, ARRANGEMENTS, AND PLANS INDICATED ON THIS DRAWING ARE OWNED BY AND THE PROPERTY OF THE OFFICE AND WERE CREATED, EVOLVED AND DEVELOPED FOR USE ON - AND IN CONNECTION WITH THE SPECIFIED PROJECT. NONE OF SUCH IDEAS, DESIGNS, ARRANGEMENTS OR PLANS SHALL BE USED BY OR DISCLOSED TO ANY PERSON, FIRM OR CORPORATION FOR ANY PURPOSE WHATSOEVER WITHOUT THE WRITTEN PERMISSION OF GREENWOOD & MOORE, INC.

WRITTEN DIMENSIONS ON THESE DRAWINGS SHALL HAVE PRECEDENCE OVER SCALE DIMENSIONS. CONTRACTORS SHALL VERIFY AND BE RESPONSIBLE FOR ALL DIMENSIONS AND CONDITIONS ON THE JOB. THIS OFFICE MUST BE NOTIFIED OF ANY VARIATION FROM THE DIMENSIONS AND CONDITIONS SHOWN BY THESE DRAWINGS. SHOP DETAILS OF ADEQUATE SCALE MUST BE SUBMITTED TO THIS OFFICE FOR APPROVAL BEFORE PROCEEDING WITH FABRICATION ON THE ITEMS SO NOTED.



KEYNOTES:

1. SAWCUT
2. LIMIT OF REMOVAL
3. REMOVE (E) CONCRETE/ASPHALT/BRICK
4. REMOVE (E) SIDEWALK, CURB, & GUTTER
5. (E) BUILDING & FOUNDATION TO BE DEMOLISHED, REMOVE (E) ASSOCIATED RETAINING WALLS AND FOUNDATION. PG&E TO DISCONNECT ELECTRIC AND GAS SERVICE PRIOR TO DEMOLITION OF THE (E) BUILDING.
6. REMOVE (E) FENCE AND/OR GATE
7. REMOVE (E) RETAINING WALL
8. REMOVE (E) DRIVEWAY
9. REMOVE (E) TRENCH DRAIN
10. REMOVE & REINSTALL (E) MAILBOX. COORDINATE REMOVAL & REINSTALLATION WITH UNITED STATES POSTAL SERVICE.
11. REMOVE (E) WATER METER. CAP AND ABANDON (E) WATER LATERAL PER EBMUD STANDARDS (BY EBMUD)
12. PG&E TO REMOVE (E) GAS METER AND GAS LATERAL PRIOR TO DEMOLITION OF THE BUILDING. CONTRACTOR TO VERIFY LOCATION IN FIELD. CAP & ABANDON PER PG&E STANDARDS & REQUIREMENTS.
13. PG&E TO REMOVE (E) ELECTRIC METERS AND ASSOCIATED ELECTRIC LINE PRIOR TO DEMOLITION OF THE BUILDING. COORDINATE REMOVAL WITH OWNER AND PG&E.
14. ABANDON (E) SEWER LATERAL PER CITY OF BERKELEY REQUIREMENTS. FOR BUILDING DEMOLITION AND LATERAL ABANDONMENT: WHEN A BUILDING IS TO BE DEMOLISHED AND THE EXISTING LATERAL IS NOT TO BE RE-USED, THE LATERAL SEWER SHALL BE DUG AND EXPOSED WHERE IT ENTERS THE MAIN.
    A. IF THE LATERAL ENTERS THE MAIN BY MEANS OF A FACTORY MANUFACTURED WYE OR TEE BRANCH, AND IF THE MAIN AND WYE OR TEE BRANCH ARE ALL IN GOOD, UNDAMAGED CONDITION, THE LATERAL SHALL BE DISCONNECTED AND THE BRANCH SHALL BE PLUGGED WITH AN EXPANDABLE NEOPRENE RUBBER PLUG AT THE MAIN. THE BRANCH PLUG SHALL BE SHALL BE ENCLOSED WITH A MINIMUM THICKNESS OF 6 INCHES OF 6 SACK, ¾" SIZE AGGREGATE. PORTLAND CEMENT CONCRETE. THE WYE BRANCH WITH RUBBER PLUG MUST BE INSPECTED AND APPROVED BY AN ENGINEERING INSPECTOR PRIOR TO ENCLOSURE WITH CONCRETE AND BACKFILL OF THE TRENCH.
    B. IF THE LATERAL ENTERS THE MAIN BY ANY METHOD OTHER THAN BY A FACTORY WYE OR TEE BRANCH, OR IF THE EXISTING MAIN, WYE OR TEE BRANCH IS DAMAGED IN ANY WAY, THE SECTION OF MAIN CONTAINING THE LATERAL ENTRY OPENING SHALL BE REMOVED AND REPLACED WITH A NEW SECTION OF PIPE OF THE SAME DIAMETER AS THE EXISTING MAIN. AN ENGINEERING INSPECTOR MUST INSPECT THE NEW MAIN SECTION BEFORE BACKFILL.
    C. THE ABANDONED LATERAL PIPE SHALL BE FILLED WITH SAND AND JETTED TO PREVENT THE PIPE FROM BECOMING A HOME FOR RODENTS OR OTHER DISEASE VECTORS.
    D. REMOVE (E) CLEANOUT FRAME & COVER.
15. REMOVE (E) CONCRETE WALL. COORDINATE REMOVAL WITH ADJACENT PROPERTY OWNER.
16. REMOVE (E) FENCE. COORDINATE REMOVAL WITH ADJACENT PROPERTY OWNER.
17. (E) JOINT POLE WITH GUY WIRE TO REMAIN
18. (E) ACCESSIBLE RAMP TO REMAIN
19. (E) CROSSWALK BUTTON/BOLLARD TO REMAIN
20. (E) CONCRETE TO REMAIN
21. (E) SIGN TO REMAIN
22. (E) CURB & GUTTER TO REMAIN
23. (E) LIGHT POLE TO REMAIN
24. (E) FIRE HYDRANT TO REMAIN
25. REMOVE (E) JOINT POLE & UNDERGROUND (E) OVERHEAD UTILITIES (BY OTHERS)
26. REMOVE (E) BRICK PAVERS TO PROPERTY LINE
27. REMOVE (E) BRICK POST
28. REMOVE (E) RETAINING WALL AND FOUNDATION.
29. REMOVED (E) CONCRETE DECK, WALLS AND FOUNDATION.
30. REMOVE (E) OVERHEAD UTILITY LINE TO BUILDING. COORDINATE REMOVAL WITH APPROPRIATE UTILITY MUNICIPALITY.
31. (E) OVERHEAD UTILITY LINE TO REMAIN.
32. REMOVE (E) CONCRETE STEPS.
33. PROTECT (E) BUILDING ON ADJACENT PROPERTY DURING DEMOLITION.
34. (E) DRAIN INLET AND STORM DRAIN TO REMAIN DURING DEMOLITION. REMOVE (E) DRAIN INLET AND STORM DRAIN PRIOR TO CONSTRUCTION OF (N) BUILDING FOUNDATION.

X REMOVE (E) TREE AND/OR (E) STUMP

O (E) TREE TO REMAIN. PROTECT TREE DURING CONSTRUCTION

PHASE NO.	XX
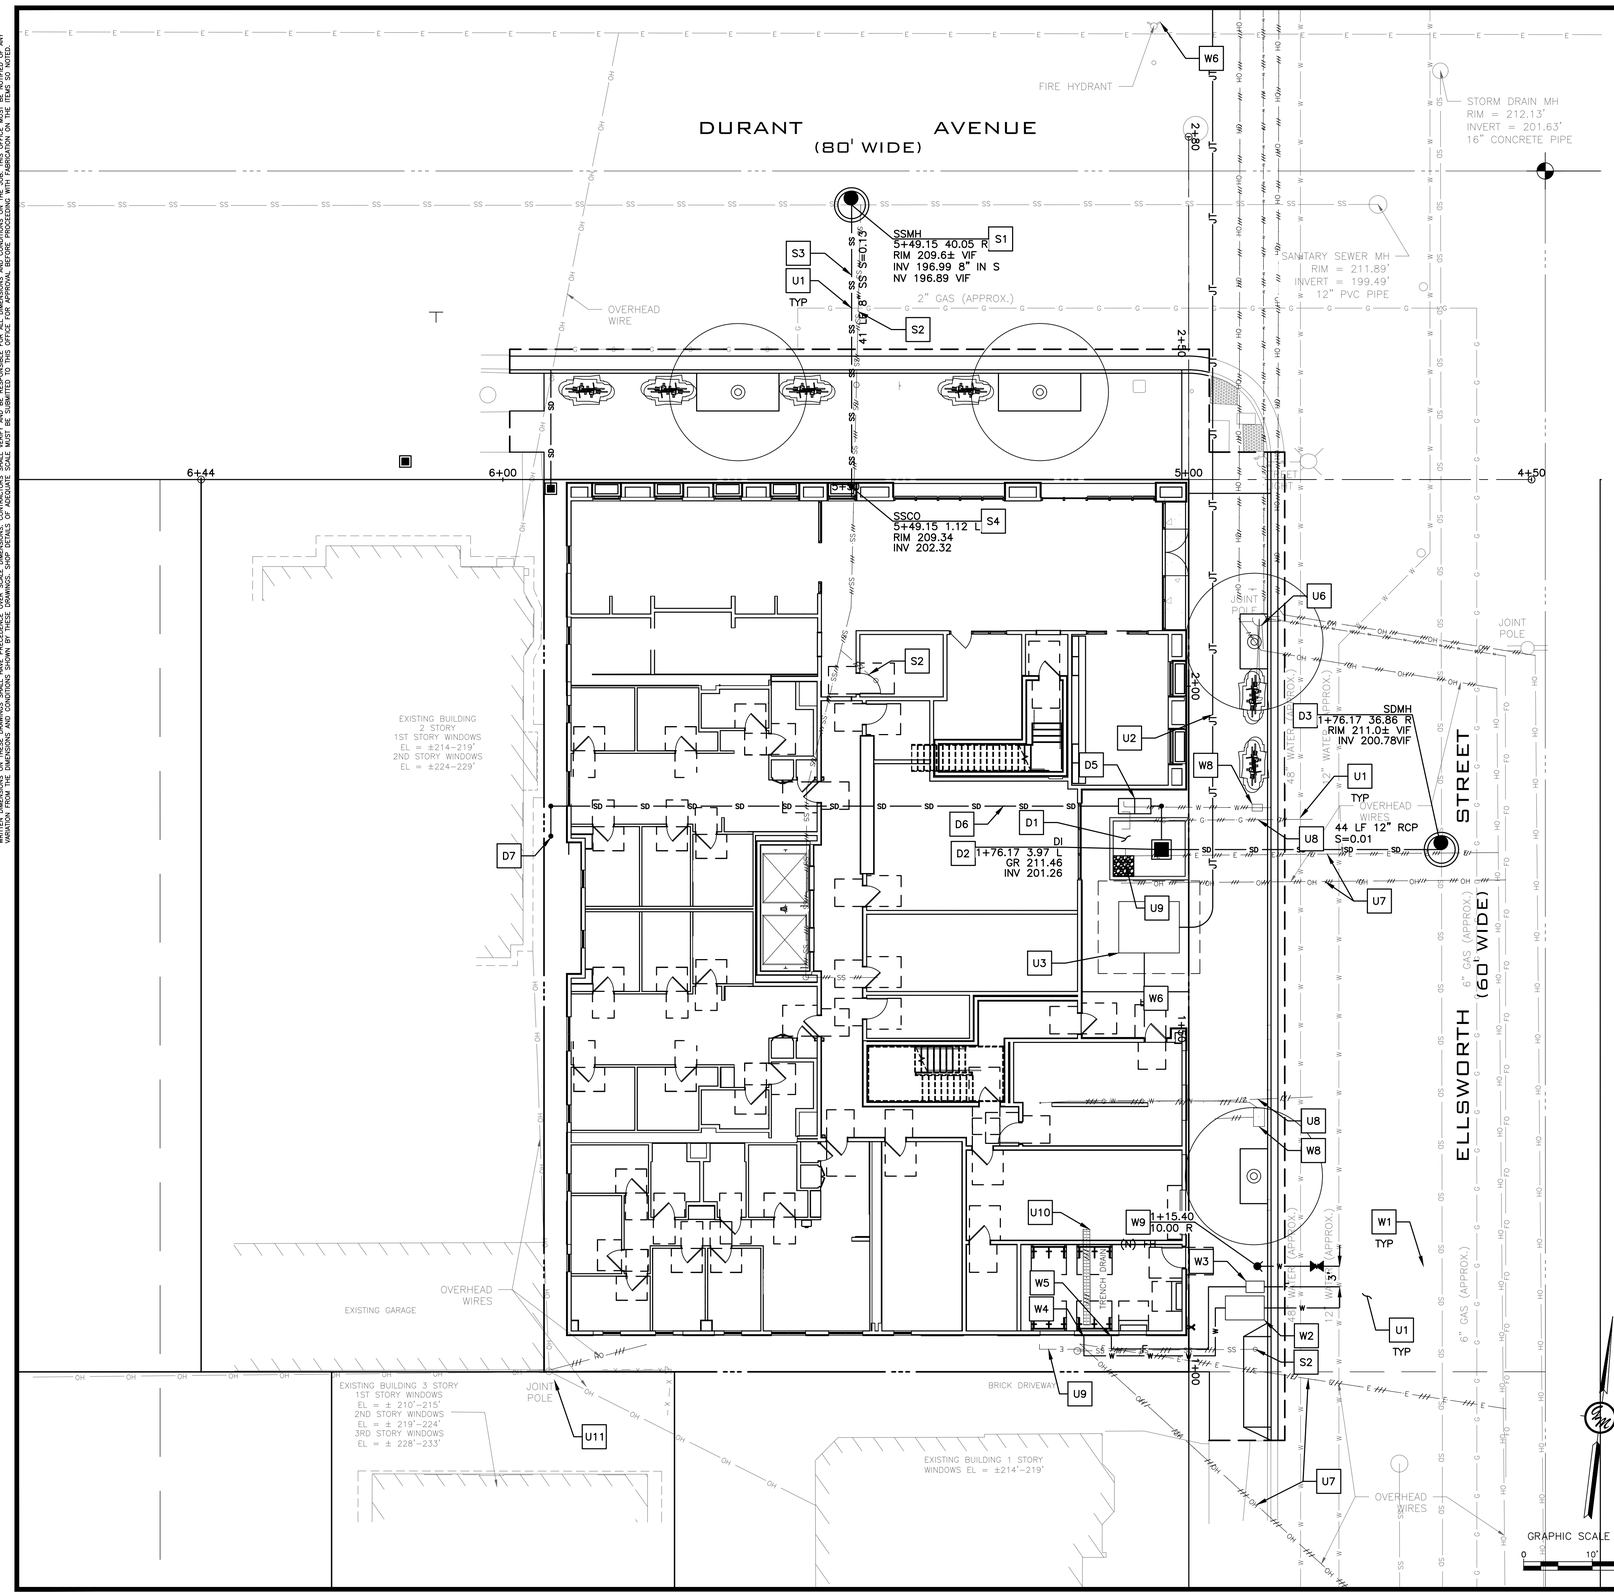
SHEET NO.	C2.0

ALL IDEAS, DESIGNS, ARRANGEMENTS, AND PLANS INDICATED BY THIS DRAWING ARE OWNED BY AND THE PROPERTY OF THE OFFICE AND WERE CREATED, EVOLVED AND DEVELOPED FOR USE ON - AND IN CONNECTION WITH THE SPECIFIED PROJECT. NONE OF SUCH IDEAS, DESIGNS, ARRANGEMENTS OR PLANS SHALL BE USED BY OR DISCLOSED TO ANY PERSON, FIRM OR CORPORATION FOR ANY PURPOSE WHATSOEVER WITHOUT THE WRITTEN PERMISSION OF GREENWOOD & MOORE, INC.
WRITTEN DIMENSIONS ON THESE DRAWINGS SHALL HAVE PRECEDENCE OVER SCALE DIMENSIONS. CONTRACTORS SHALL VERIFY AND BE RESPONSIBLE FOR ALL DIMENSIONS AND CONDITIONS ON THE JOB. THIS OFFICE MUST BE NOTIFIED OF ANY VARIATION FROM THE DIMENSIONS AND CONDITIONS SHOWN BY THESE DRAWINGS. SHOP DETAILS OF ADEQUATE SCALE MUST BE SUBMITTED TO THIS OFFICE FOR APPROVAL BEFORE PROCEEDING WITH FABRICATION ON THE ITEMS SO NOTED.



STORM DRAINAGE KEYNOTES D#

1. FLOW THROUGH PLANTER
2. DRAIN INLET. GRATE TO BE 6" ABOVE FLOW THROUGH PLANTER FINISH GRADE. DRAIN INLET TO BE CP2424 PER DETAIL 1/C7.1 & 2/C7.1
3. STORM DRAIN MANHOLE PER CITY OF BERKELEY STANDARD DETAIL 7895. VERIFY EXISTING SEWER SIZE AND INVERT ELEVATION IN FIELD. SEE 4/C7.4.
4. APPROXIMATE LOCATION OF RAIN WATER DOWNSPOUT TO OUTFALL INTO BIORETENTION AREA AT COBBLE DISSIPATOR
5. BELOW GROUND CONTECH CARTRIDGE CATCH BASIN STORMFILTER TO TREAT ROOFTOP. CONNECT 6" STORM DRAIN OUTLET TO DRAIN INLET. SEE DETAIL 4/C7.1.
6. STORM DRAIN THROUGH BUILDING. COORDINATE WITH PLUMBING CONSULTANT.
7. CONNECT DOWNSPOUT TO STORM DRAIN THAT IS CONNECTED TO FILTER VAULT.

SEWER KEYNOTES S#

1. SSMH PER CITY OF BERKELEY STANDARD DETAIL 7895. VERIFY EXISTING SEWER SIZE AND INVERT ELEVATION IN FIELD. SEE 4/C7.4.
2. ABANDON (E) SEWER LATERAL. FOR BUILDING DEMOLITION AND LATERAL ABANDONMENT: WHEN A BUILDING IS TO BE DEMOLISHED AND THE EXISTING LATERAL IS NOT TO BE RE-USED, THE LATERAL SEWER SHALL BE DUG AND EXPOSED WHERE IT ENTERS THE MAIN.

A. IF THE LATERAL ENTERS THE MAIN BY MEANS OF A FACTORY MANUFACTURED WYE OR TEE BRANCH, AND IF THE MAIN AND WYE OR TEE BRANCH ARE ALL IN GOOD, UNDAMAGED CONDITION, THE LATERAL SHALL BE DISCONNECTED AND THE BRANCH SHALL BE PLUGGED WITH AN EXPANDABLE NEOPRENE RUBBER PLUG AT THE MAIN. THE BRANCH PLUG SHALL BE SHALL BE ENCLOSED WITH A MINIMUM THICKNESS OF 6 INCHES OF 6 SACK, ¾" SIZE AGGREGATE. PORTLAND CEMENT CONCRETE. THE WYE BRANCH WITH RUBBER PLUG MUST BE INSPECTED AND APPROVED BY AN ENGINEERING INSPECTOR PRIOR TO ENCLOSURE WITH CONCRETE AND BACKFILL OF THE TRENCH.

B. IF THE LATERAL ENTERS THE MAIN BY ANY METHOD OTHER THAN BY A FACTORY WYE OR TEE BRANCH, OR IF THE EXISTING MAIN, WYE OR TEE BRANCH IS DAMAGED IN ANY WAY, THE SECTION OF MAIN CONTAINING THE LATERAL ENTRY OPENING SHALL BE REMOVED AND REPLACED WITH A NEW SECTION OF PIPE OF THE SAME DIAMETER AS THE EXISTING MAIN. AN ENGINEERING INSPECTOR MUST INSPECT THE NEW MAIN SECTION BEFORE BACKFILL.

C. THE ABANDONED LATERAL PIPE SHALL BE FILLED WITH SAND AND JETTED TO PREVENT THE PIPE FROM BECOMING A HOME FOR RODENTS OR OTHER DISEASE VECTORS.

D. REMOVE (E) CLEANOUT FRAME & COVER.

3. 8" HDPE SDR 17
4. 2 WAY SEWER CLEANOUT WITH CAST IRON TRAFFIC RATED COVER. COORDINATE SEWER CONNECTION TO BUILDING LOCATION AND ELEVATION WITH PLUMBING PLANS.

WATER KEYNOTES W#

1. CONNECT TO EXISTING WATER LINE PER EBMUD STANDARDS AND REQUIREMENTS
2. RESIDENTIAL APARTMENT DOMESTIC WATER METER PER EBMUD STANDARDS AND REQUIREMENTS. VERIFY METER SIZE WITH EBMUD AND PLUMBING PLANS.
3. WATER METER AND CHECK VALVE FOR FIRE SERVICE PER EBMUD STANDARDS AND REQUIREMENTS.
4. 2" WATER SERVICE TO APARTMENT BUILDING. VERIFY SIZE AND LOCATION WITH PLUMBING PLANS. PROVIDE BACKFLOW DEVICE AT BUILDING PER EBMUD STANDARDS AND REQUIREMENTS.
5. X" FIRE SERVICE TO BUILDING. SEE FIRE SERVICE PLANS BY OTHERS FOR MORE INFORMATION. PROVIDE BACKFLOW DEVICE AT BUILDING PER EBMUD STANDARDS AND REQUIREMENTS.
6. (E) FIRE HYDRANT
7. FIRE DEPARTMENT CONNECTION. SEE PLANS BY OTHERS.
   7.1. THE FDC SHALL BE INSTALLED NO HIGHER THAN 3-FEET FROM FINISHED GRADE, AND SHALL BE LOCATED SO THAT FIRE APPARATUS AND HOSE CONNECTED TO SUPPLY THE SYSTEM WILL NOT OBSTRUCT ACCESS TO THE BUILDINGS FOR OTHER FIRE APPARATUS.
   7.2. THE FDC SUPPLYING WATER TO THE STANDPIPE SYSTEM MUST CONSIST OF A THREE (3) 2-1/2-INCH INLET CONNECTION AND ONE (1) 5-INCH STORZ CONNECTION WITH A BUILT-IN DEBRIS SCREEN.
8. REMOVE (E) WATER METER. CAP AND ABANDON (E) WATER LATERAL PER EBMUD STANDARDS (BY EBMUD)
9. (N) FIRE HYDRANT PER EBMUD AND CITY OF BERKELEY STANDARDS, REQUIREMENTS AND SPECIFICATIONS.

UTILITY KEYNOTES U#

1. CONTRACTOR FIELD LOCATE (E) UTILITIES. NOTIFY ENGINEER OF ANY CONFLICTS WITH (E) UTILITIES.
2. JOINT TRENCH BY OTHERS. SEE JOINT TRENCH PLANS
3. (N) ABOVE GROUND TRANSFORMER (BY OTHERS)
4. ALL TRENCHING IN THE CITY RIGHT OF WAY TO BE PER CITY OF BERKELEY STANDARD DETAIL 8136.
5. PROVIDE 1' MINIMUM CLEARANCE AT UTILITY CROSSING. VIF
6. REMOVE (E) JOINT POLE AND UNDERGROUND EXISTING OVERHEAD UTILITIES (BY OTHERS)
7. REMOVE (E) OVERHEAD LINES
8. PG&E TO REMOVE (E) GAS METER AND GAS LATERAL PRIOR TO DEMOLITION OF THE BUILDING. CONTRACTOR TO VERIFY LOCATION IN FIELD. CAP & ABANDON PER PG&E STANDARDS & REQUIREMENTS.
9. PG&E TO REMOVE (E) ELECTRIC METERS AND ASSOCIATED ELECTRIC LINE PRIOR TO DEMOLITION OF THE BUILDING. COORDINATE REMOVAL WITH OWNER AND PG&E.
10. REMOVE (E) TRENCH DRAIN. ABANDON EXISTING STORM DRAIN LINE.
11. (E) JOINT POLE TO REMAIN.

Worksheet for Calculating the Combination Flow and Volume Method

These calculations are based on the combination flow and volume hydraulic sizing method provided in the Alameda, San Mateo, and Santa Clara County C.3 Technical Guidance Manuals. The steps presented below are explained in Chapter 5, Section 5.1 of the gui

1.0 Project Information

1-1	Project Name:	2298 DURANT AVE	
1-2	City application ID:	BERKELEY	
1-3	Site Address or APN:	0	
1-4	Tract or Parcel Map No:	0	
1-5	Site Mean Annual Precip. (MAP)[1]	23.0	Inches
	Refer to the Mean Annual Precipitation Map in Appendix D of the C.3 Technical Guidance to determine the MAP, in inches, for the site.		Click here for map
1-6	Applicable Rain Gauge[2]	Oakland Airport (CWPAC)	
	MAP adjustment factor is automatically calculated as:	1.25	
	(The "Site Mean Annual Precipitation (MAP)" is divided by the MAP for the applicable rain gauge, shown in Table 5.2, below.)		

2.0 Calculate Percentage of Impervious Surface for Drainage Management Area (DMA)

2-1	Name of DMA:	DMA-2		
	For items 2-2 and 2-3, enter the areas in square feet for each type of surface within the DMA.			
	Type of Surface	Area of surface type within DMA (Sq. Ft)	Adjust Pervious Surface	Effective Impervious Area
2-2	Impervious Surface	5,312	1.0	5,312
2-3	Pervious Surface	165	0.1	17
	Total DMA Area (square feet) =	5,477		
2-4	***Total Effective Impervious Area (EIA)***			5,329 Square feet

3.0 Calculate Unit Basin Storage Volume in Inches

Table 5-2: Unit Basin Storage Volumes (in inches) for 80 Percent Capture Using 48-Hour Drawdowns

		Unit Basin Storage Volume (in) for Applicable Runoff Coefficients
Applicable Rain Gauge	Mean Annual Precipitation (in)	(Calculated for 100% Imperviousness)
San Jose Airport (SCVURPPP)	13.9	0.58
Palo Alto (SCVURPPP)	13.7	0.62
Palo Alto (SMCWPPP)	14.6	0.64
Gilroy (SCVURPPP)	18.2	1.00
Morgan Hill (SCVURPPP)	19.5	1.00
Boulder Creek (SMCWPPP)	55.9	2.04
La Honda (SMCWPPP)	24.4	0.86
Half Moon Bay (SMCWPPP)	25.92	0.82
San Francisco (SMCWPPP)	21	0.73
San Francisco Airport (SMCWPPP)	20.1	0.85
San Francisco Oceanside (SMCWPPP)	19.3	0.72
Oakland Airport (CWPAC)	18.35	1.00

3-1	***Unit basin storage volume from Table 5.2:***	1.00	Inches
	(The coefficient for this method is 1.00, due to the conversion of any landscaping to effective impervious area)		
3-2	***Adjusted unit basin storage volume:***	1.25	Inches
	(The unit basin storage volume is adjusted by applying the MAP adjustment factor.)		
3-3	***Required Capture Volume (in cubic feet):***	557	Cubic feet
	(The adjusted unit basin sizing volume [inches] is multiplied by the size of the DMA and converted to feet)		

4.0 Calculate the Duration of the Rain Event

4-1	Rainfall intensity	0.2	Inches per hour
4-2	Divide Item 3-2 by Item 4-1	6.27	Hours of Rain Event Duration

5.0 Preliminary Estimate of Surface Area of Treatment Measure

5-1	4% of DMA impervious surface	213	Square feet
5-2	Area 25% smaller than item 5-1	160	Square feet
5-3	Volume of treated runoff for area in Item 5-2	417	Cubic feet (Item 5-2 * 5 inches per hour * 1/12 * Item 4-2)

6.0 Initial Adjustment of Depth of Surface Ponding Area

6-1	Subtract Item 5-3 from Item 3-3	139	Cubic feet (Amount of runoff to be stored in ponding area)
6-2	Divide Item 6-1 by Item 5-2	0.9	Feet (Depth of stored runoff in surface ponding area)
6-3	Convert Item 6-2 from ft to inches	10.4	Inches (Depth of stored runoff in surface ponding area)
6-4	If ponding depth in Item 6-3 meets your target depth of 6"-12", then Item 7-1 is equal to Item 5-2. If not, continue to Step 7-1.		

7.0 Optimize Size of Treatment Me 25

7-1	Enter an area larger or smaller than Item 5-2	165	Sq.ft. (enter larger area if you need less ponding depth; smaller for more depth.)
7-2	Volume of treated runoff for area in Item 7-1	431	Cubic feet (Item 7-1 * 5 inches per hour * 1/12 * Item 4-2)
7-3	Subtract Item 7-2 from Item 3-3	126	Cubic feet (Amount of runoff to be stored in ponding area)
7-4	Divide Item 7-3 by Item 7-1	0.76	Feet (Depth of stored runoff in surface ponding area)
7-5	Convert Item 7-4 from feet to inches	9.14	Inches (Depth of stored runoff in surface ponding area)
7-6	If the ponding depth in Item 7-5 meets target, stop here. If not, repeat Steps 7-1 through 7-5 until you obtain target depth. If the slope of the drainage area > 1%, then 11" will be the max ponding depth (slopes >1% will increase the ponding depth by 0.

BIORETENTION TREATMENT SOIL SPECIFICATIONS

1. BIORETENTION TREATMENT SOIL SHALL ACHIEVE A LONG TERM, IN-PLACE INFILTRATION RATE BETWEEN 5 IN/HR AND 10 IN/HR, CAPABLE OF SUPPORTING VIGOROUS PLAN GROWTH AND CONSIST OF 60%-70% SAND AND 30%-40% COMPOST.

1.1. THE APPLICANT TO SUBMIT TO THE MUNICIPALITY FOR APPROVAL:

1.1.a. A SAMPLE OF MIXED BIORETENTION SOIL.

1.1.b. CERTIFICATION FROM THE SOIL SUPPLIER OR AN ACCREDITED LABORATORY THAT THE BIORETENTION SOIL MEETS THE REQUIREMENTS OF THIS GUIDELINE SPECIFICATION.

1.1.c. GRAIN SIZE ANALYSIS RESULTS OF THE FINE SAND COMPONENT PERFORMED IN ACCORDANCE WITH ASTM D 422, STANDARD TEST METHOD FOR PARTICLE SIZE ANALYSIS OF SOILS.

1.1.d. QUALITY ANALYSIS RESULTS FOR COMPOST PERFORMED IN ACCORDANCE WITH SEAL OF TESTING ASSURANCE (STA) STANDARDS, AS SPECIFIED SECTION 1.4.

1.1.e. ORGANIC CONTENT TEST RESULTS OF MIXED BIORETENTION SOIL. ORGANIC CONTENT TEST SHALL BE PERFORMED IN ACCORDANCE WITH TESTING METHODS FOR EXAMINATION OF COMPOST AND COMPOSTING (TMECC) 05.07A, "LOSS-ON-IGNITION ORGANIC MATTER METHOD.

1.1.f. GRAIN SIZE ANALYSIS RESULTS OF THE COMPOST COMPONENT IN ACCORDANCE WITH ASTM D422, STANDARD TEST METHOD FOR PARTICLE SIZE ANALYSIS OF SOILS.

1.1.g. A DESCRIPTION OF THE EQUIPMENT AND METHODS USED TO MIX THE SAND AND COMPOST TO PRODUCE BIORETENTION SOIL.

1.1.h. PROVIDE THE FOLLOWING INFORMATION ABOUT THE TESTING LABORATORY(IES): CONTACT PERSON(S), ADDRESS(ES), PHONE CONTACTS(S), EMAIL ADDRESS(ES) AND QUALIFICATIONS OF LABORATORY(IES) AND PERSONNEL INCLUDING DATE OF CURRENT CERTIFICATION BY STA, ASTM, OR APPROVED EQUAL.

1.2. SAND FOR BIORETENTION SOIL:

1.2.a. SAND SHALL BE FREE OF WOOD, WASTE COATING SUCH AS CLAY, STONE, DUST, CARBONATE, ETC., OR ANY OTHER DELETERIOUS MATERIAL. ALL AGGREGATE PASSING THE NO. 200 SIEVE SHALL BE NON-PLASTIC.

1.2.b. SAND FOR BIORETENTION AREA SHALL BE ANALYZED BY AN ACCREDITED LAB USING #200, #100, #40, #30 #8, #4, AND 3/8" SIEVES (ASTM D 422 OR AS APPROVED BY MUNICIPALITY), AND MEET THE FOLLOWING GRADATION.

SIEVE SIZE	PERCENT PASSING (BY WEIGHT) MIN	MAX.
3/8"	100	100
NO. 4	90	100
NO. 8	70	100
NO. 16	40	95
NO. 30	15	70
NO. 40	5	55
NO. 100	0	15
NO. 200	0	5

NOTE: ALL SANDS COMPLYING WITH ASTM C33 FOR FINE AGGREGATE COMPLY WITH THE ABOVE GRADATION REQUIREMENTS.

1.3 COMPOSTED MATERIAL
COMPOST SHALL BE A WELL DECOMPOSED, STABLE, WEED FREE ORGANIC MATTER SOURCE DERIVED FROM WASTE MATERIALS INCLUDING YARD DEBRIS, WOOD WASTES OR OTHER ORGANIC MATERIALS NOT INCLUDING MANURE OR BIOSOLIDS MEETING THE STANDARDS DEVELOPED BY THE US COMPOSTING COUNCIL (USCC). THE PRODUCT SHALL BE CERTIFIED THROUGH THE USCC SEAL OF TESTING ASSURANCE (STA) PROGRAM (A COMPOST TESTING AND INFORMATION DISCLOSURE PROGRAM).

A. COMPOST QUALITY ANALYSIS: BEFORE DELIVERY OF THE SOIL, THE SUPPLIER SHALL SUBMIT A COPY OF LAB ANALYSIS PERFORMED BY A LABORATORY THAT IS ENROLLED IN THE US COMPOSTING COUNCIL'S COMPOST ANALYSIS PROFICIENCY (CAP) PROGRAM USING APPROVED TEST METHODS FOR THE EVALUATION OF COMPOSTING AND COMPOST (TMECC). THE LAB REPORT SHALL VERIFY:

1. FEEDSTOCK MATERIALS SHALL BE SPECIFIED AND INCLUDE ONE OF THE FOLLOWING: LANDSCAPE/YARD TRIMMINGS, GRASS CLIPPINGS, FOOD SCRAPS AND AGRICULTURE CROP RESIDUES.
2. ORGANIC MATTER CONTENT: 35%-75% BY DRY WEIGHT.
3. CARBON AND NITROGEN RATIO: C:N < 25:1 AND C:N > 15:1
4. MATURITY AND STABILITY SHALL HAVE A DARK BROWN COLOR AND A SOIL LIKE ODOR. COMPOST EXHIBITING A SOUR OR PUTRID SMELL, CONTAINING RECOGNIZABLE GRASS OR LEAVES, OR IS HOT (120F) UPON DELIVERY IS NOT ACCEPTABLE. IN ADDITION ANY ONE OF THE FOLLOWING IS REQUIRED TO INDICATE STABILITY:
   4.a. OXYGEN TEST < 1.3 02/UNIT TS/HR
   4.b. SPECIFIC OXY. TEST < 1.5 02/UNIT BVS/
   4.c. RESPIRATION TEST < 8 C/UNIT VS/DAY
   4.d. DEWAR TEST < 20 TEMP. RISE (DEGREES C) E.
   4.e. SOLVITA > 5 INDEX VALUE
5. TOXICITY: ANY OF THE FOLLOWING MEASURES IS SUFFICIENT TO INDICATE NON-TOXICITY:
   5.a. NH4- :NO3 < 3
   5.b. AMMONIUM < 500PPM, DRY BASIS
   5.c. SEED GERMINATION > 80% OF CONTROL
   5.d. PLANT TRIALS > 80% OF CONTROL
   5.e. SOLVITA > 5 INDEX VALUE
6. NUTRIENT CONTENT: PROVIDE ANALYSIS DETAILING NUTRIENT CONTENT INCLUDING N-P-K, CA, NA, MG AND B.
   6.a. TOTAL NITROGEN CONTENT 0.9% OR ABOVE PREFERRED
   6.b. BORON: TOTAL SHALL BE < 80PPM: SOLUBLE SHALL BE < 2.5 PPM
7. SALINITY: MUST BE REPORTED: < 6.0 MMHOS/CM
8. PH SHALL BE BETWEEN 6.5 AND 8. MAY VARY WITH PLANT SPECIES.

B. COMPOST FOR BIORETENTION SOIL TEXTURE
COMPOST FOR BIORETENTION SOILS SHALL BE ANALYZED BY AN ACCREDITED LAB USING #200, 1/4", 1/2" AND 1" SIEVES (ASTM D422 OR AS APPROVED BY MUNICIPALITY), AND MEET THE FOLLOWING GRADATION.

SIEVE SIZE	PERCENT PASSING (BY WEIGHT) MIN	MAX.
1"	99	100
1/2"	90	100
1/4"	40	90
NO. 200	2	10

C. BULK DENSITY SHALL BE BETWEEN 500 AND 1100 DRY LBS/CUBIC YARD
D. MOISTURE CONTENT SHALL BE BETWEEN 30%-55% OF DRY SOLIDS.
E. INERTS: COMPOST SHALL BE RELATIVELY FREE OF INERT INGREDIENTS, INCLUDING GLASS, PLASTIC AND PAPER, <1% BY WEIGHT OR VOLUME.
F. WEED SEED/PATHOGEN DESTRUCTION: PROVIDE PROOF OF PROCESS TO FURTHER REDUCE PATHOGENS (PFRP). FOR EXAMPLE, TURNED WINDROWS MUCH REACH MIN. 55C FOR 15 DAYS WITH AT LEAST 5 TURNINGS DURING THAT PERIOD.
G. SELECT PATHOGENS: SALMONELLA < 3 MPN/4 GRAMS OF TS, OR COLIFORM BACTERIA < 1000MPN/GRAM
H. TRACE CONTAMINANTS METALS (LEAD, MERCURY, ETC.) PRODUCT MUST MEET US EPA, 40 CFR 503 REGULATIONS.
I. COMPOST TESTING: THE COMPOST SUPPLIER WILL TEST ALL COMPOST PRODUCTS WITHIN 120 CALENDAR DAYS PRIOR TO APPLICATION. SAMPLES WILL BE TAKEN USING THE STA SAMPLE COLLECTION PROCESS PROTOCOL. (THE SAMPLE COLLECTION PROTOCOL CAN BE OBTAINED FROM THE U.S. COMPOSTING COUNCIL, 4250 VETERANS MEMORIAL HIGHWAY, SUITE 275, HOLBROOK, NY 11741 PHONE: 631-737-4931, (WWW.COMPOSTINGCOUNCIL.ORG) THE SAMPLE SHALL BE SENT TO AN INDEPENDENT STA PROGRAM APPROVED LAB. THE COMPOST SUPPLIER WILL PAY FOF THE TEST.

SECTION B-B

STORMFILTER STEEL CATCHBASIN DESIGN NOTES

STORMFILTER TREATMENT CAPACITY IS A FUNCTION OF THE CARTRIDGE SELECTION AND THE NUMBER OF CARTRIDGES. 1 CARTRIDGE CATCHBASIN HAS A MAXIMUM OF ONE CARTRIDGE. SYSTEM IS SHOWN WITH A 27" CARTRIDGE, AND IS ALSO AVAILABLE WITH AN 18" CARTRIDGE. STORMFILTER CATCHBASIN CONFIGURATIONS ARE AVAILABLE WITH A DRY INLET BAY FOR VECTOR CONTROL.
PEAK HYDRAULIC CAPACITY PER TABLE BELOW. IF THE SITE CONDITIONS EXCEED PEAK HYDRAULIC CAPACITY, AN UPSTREAM BYPASS STRUCTURE IS REQUIRED.

CARTRIDGE SELECTION

	27"			18"			18" DEEP		
CARTRIDGE HEIGHT	27"			18"			18" DEEP		
RECOMMENDED HYDRAULIC DROP (H)	3.05'			2.3'			3.3'		
SPECIFIC FLOW RATE (gpm/sf)	2 gpm/sf	1.67* gpm/sf	1 gpm/sf	2 gpm/sf	1.67* gpm/sf	1 gpm/sf	2 gpm/sf	1.67* gpm/sf	1 gpm/sf
CARTRIDGE FLOW RATE (gpm)	22.5	18.79	11.25	15	12.53	7.5	15	12.53	7.5
PEAK HYDRAULIC CAPACITY	1.0			1.0			2.25		
INLET PERMANENT POOL LEVEL (A)	1'-0"			1'-0"			2'-0"		
OVERALL STRUCTURE HEIGHT (B)	4'-9"			3'-0"			4'-9"		

* 1.67 gpm/sf SPECIFIC FLOW RATE IS APPROVED WITH PHOSPHOSORB® (PSORB) MEDIA ONLY

GENERAL NOTES
1. CONTECH TO PROVIDE ALL MATERIALS UNLESS NOTED OTHERWISE.
2. FOR SITE SPECIFIC DRAWINGS WITH DETAILED STORMFILTER CATCHBASIN STRUCTURE DIMENSIONS AND WEIGHTS, PLEASE CONTACT YOUR CONTECH ENGINEERED SOLUTIONS LLC REPRESENTATIVE. www.contechES.com
3. STORMFILTER CATCHBASIN WATER QUALITY STRUCTURE SHALL BE IN ACCORDANCE WITH ALL DESIGN DATA AND INFORMATION CONTAINED IN THIS DRAWING.
4. INLET SHOULD NOT BE LOWER THAN OUTLET. INLET (IF APPLICABLE) AND OUTLET PIPING TO BE SPECIFIED BY ENGINEER AND PROVIDED BY CONTRACTOR.
5. MANUFACTURER TO APPLY A SURFACE BEAD WELD IN THE SHAPE OF THE LETTER "O" ABOVE THE OUTLET PIPE STUB ON THE EXTERIOR SURFACE OF THE STEEL SFCB.
6. STORMFILTER CATCHBASIN EQUIPPED WITH 4 INCH (APPROXIMATE) LONG STUBS FOR INLET (IF APPLICABLE) AND OUTLET PIPING. STANDARD OUTLET STUB IS 8 INCHES IN DIAMETER. MAXIMUM OUTLET STUB IS 15 INCHES IN DIAMETER. CONNECTION TO COLLECTION PIPING CAN BE MADE USING FLEXIBLE COUPLING BY CONTRACTOR.
7. STEEL STRUCTURE TO BE MANUFACTURED OF 1/4 INCH STEEL PLATE. CASTINGS SHALL MEET AASHTO M306 LOAD RATING. TO MEET HS20 LOAD RATING ON STRUCTURE, A CONCRETE COLLAR IS REQUIRED. WHEN REQUIRED, CONCRETE COLLAR WITH #4 REINFORCING BARS TO BE PROVIDED BY CONTRACTOR.
8. FILTER CARTRIDGES SHALL BE MEDIA-FILLED, PASSIVE, SIPHON ACTUATED, RADIAL FLOW, AND SELF CLEANING. RADIAL MEDIA DEPTH SHALL BE 7-INCHES. FILTER MEDIA CONTACT TIME SHALL BE AT LEAST 38 SECONDS.
9. SPECIFIC FLOW RATE IS EQUAL TO THE FILTER TREATMENT CAPACITY (gpm) DIVIDED BY THE FILTER CONTACT SURFACE AREA (sq ft).

INSTALLATION NOTES
A. ANY SUB-BASE, BACKFILL DEPTH, AND/OR ANTI-FLOTATION PROVISIONS ARE SITE-SPECIFIC DESIGN CONSIDERATIONS AND SHALL BE SPECIFIED BY ENGINEER OF RECORD.
B. CONTRACTOR TO PROVIDE EQUIPMENT WITH SUFFICIENT LIFTING AND REACH CAPACITY TO LIFT AND SET THE CATCHBASIN (LIFTING CLUTCHES PROVIDED).
C. CONTRACTOR TO TAKE APPROPRIATE MEASURES TO PROTECT CARTRIDGES FROM CONSTRUCTION-RELATED EROSION RUNOFF.

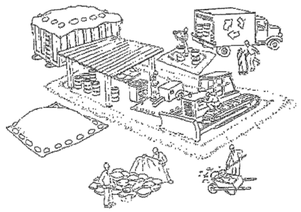
City of Berkeley's Pollution Prevention - It's Part of the Plan



Make sure your crews and subs do the job right!

Runoff from streets and other paved areas is a major source of pollution and damage to creeks and the San Francisco Bay. Construction activities can directly affect the health of creeks and the Bay unless contractors and crews plan ahead to keep dirt, debris, and other construction waste away from storm drains and local creeks. Following these guidelines and the project specifications will ensure your compliance with City of Berkeley requirements.

Materials storage & spill cleanup

Non-hazardous materials management

- Sand, dirt, and similar materials must be stored at least 10 feet (3 meters) from catch basins. All construction material must be covered with a tarp and contained with a perimeter control during wet weather or when rain is forecasted or when not actively being used within 14 days.
- Use (but don't overuse) reclaimed water for dust control as needed.
- Sweep or vacuum streets and other paved areas daily. Do not wash down streets or work areas with water!
- Recycle all asphalt, concrete, and aggregate base material from demolition activities. Comply with City of Berkeley Ordinances for recycling construction materials, wood, gyp board, pipe, etc.
- Check dumpsters regularly for leaks and to make sure they are not overfilled. Repair or replace leaking dumpsters promptly.
- Cover all dumpsters with a tarp at the end of every work day or during wet weather.

Hazardous materials management

- Label all hazardous materials and hazardous wastes (such as pesticides, paints, thinners, solvents, fuel, oil, and antifreeze) in accordance with city, county, state, and federal regulations.
- Store hazardous materials and wastes in water tight containers, store in appropriate secondary containment, and cover them at the end of every work day or during wet weather or when rain is forecasted.
- Follow manufacturer's application instructions for hazardous materials and be careful not to use more than necessary. Do not apply chemicals outdoors when rain is forecasted within 24 hours.
- Be sure to arrange for appropriate disposal of all hazardous wastes.

Spill prevention and control

- Keep a stockpile of spill cleanup materials (rags, absorbents, etc.) available at the construction site at all times.
- When spills or leaks occur, contain them immediately and be particularly careful to prevent leaks and spills from reaching the gutter, street, or storm drain. Never wash spilled material into a gutter, street, storm drain, or creek!
- Dispose of all containment and cleanup materials properly.
- Report any hazardous materials spills immediately! Dial 911 or the City of Berkeley's Public Works Department by dialing 311

Construction Entrances and Perimeter

- Establish and maintain effective perimeter controls and stabilize all construction entrances and exits to sufficiently control erosion and sediment discharges from site and tracking off site.
- Sweep or vacuum any street tracking immediately and secure sediment source to prevent further tracking.

Vehicle and equipment maintenance & cleaning

- Inspect vehicles and equipment for leaks frequently. Use drip pans to catch leaks until repairs are made; repair leaks promptly.
- Fuel and maintain vehicles on site only in a bermed area or over a drip pan that is big enough to prevent runoff.
- If you must clean vehicles or equipment on site, clean with water only in a bermed area that will not allow rinse water to run into gutters, streets, storm drains, or creeks.
- Do not clean vehicles or equipment on-site using soaps, solvents, degreasers, steam cleaning equipment, etc.

Earthwork & contaminated soils

- Keep excavated soil on the site where it will not collect in the street.
- Transfer to dump trucks should take place on the site, not in the street.
- Use fiber rolls, silt fences, or other control measures to minimize the flow of silt off the site.

- Earth moving activities are only allowed during dry weather by permit and as approved by the City Inspector in the Field.
- Mature vegetation is the best form of erosion control. Minimize disturbance to existing vegetation whenever possible.
- If you disturb a slope during construction, prevent erosion by securing the soil with erosion control fabric, or seed with fast-growing grasses as soon as possible. Place fiber rolls down-slope until soil is secure.
- If you suspect contamination (from site history, discoloration, odor, texture, abandoned underground tanks or pipes, or buried debris), call the Engineer for help in determining what should be done, and manage disposal of cntaminated soil according to their instructions.

Dewatering operations

- Effectively manage all run-on, all runoff within the site, and all runoff that discharges from the site. Run-on from off site shall be directed away from all disturbed areas or shall collectively be in compliance.
- Reuse water for dust control, irrigation, or another on-site purpose to the greatest extent possible.

- Be sure to notify and obtain approval from the Engineer before discharging water to a street, gutter, or storm drain. Filtration or diversion through a basin, tank, or sediment trap may be required.
- In areas of known contamination, testing is required prior to reuse or discharge of groundwater. Consult with the Engineer to determine what testing is required and how to interpret results. Contaminated groundwater must be treated or hauled off-site for proper disposal.

Saw cutting

- Always completely cover or barricade storm drain inlets when saw cutting. Use filter fabric, catch basin inlet filters, or sand/gravel bags to keep slurry out of the storm drain system.
- Shovel, absorb, or vacuum saw-cut slurry and pick up all waste as soon as you are finished in one location or at the end of each work day (whichever is sooner!).
- If saw cut slurry enters a catch basin, clean it up immediately.

Paving/asphalt work

- Always cover storm drain inlets and manholes when paving or applying seal coat, tack coat, slurry seal, or fog seal.
- Protect gutters, ditches, and drainage courses with sand/gravel bags, or earthen berms.
- Do not sweep or wash down excess sand from sand sealing into gutters, storm drains, or creeks. Collect sand and return it to the stockpile, or dispose of it as trash.
- Do not use water to wash down fresh asphalt concrete pavement.

Concrete, grout, and mortar storage & waste disposal

- Store concrete, grout, and mortar under cover, on pallets, and away from drainage areas. These materials must never reach a storm drain.
- Wash out concrete equipment/trucks off-site or into contained washout areas that will not allow discharge of wash water onto the underlying soil or onto the surrounding areas.

- Collect the wash water from washing exposed aggregate concrete and remove it for appropriate disposal off site.

Painting

- Never rinse paint brushes or materials in a gutter or street!
- Paint out excess water-based paint before rinsing brushes, rollers, or containers in a sink.
- Paint out excess oil-based paint before cleaning brushes in thinner.
- Filter paint thinners and solvents for reuse whenever possible. Dispose of oil-based paint sludge and unusable thinner as hazardous waste.

Landscape Materials

- Contain, cover, and store on pallets all stockpiled landscape materials (mulch, compost, fertilizers, etc.) during wet weather or when rain is forecasted or when not actively being used within 14 days.
- Discontinue the application of any erodible landscape material within 2 days of forecasted rain and during wet weather.

Storm drain polluters may be liable for fines of $10,000 or more per day!

WRITTEN DIMENSIONS ON THESE DRAWINGS SHALL HAVE PRECEDENCE OVER SCALE DIMENSIONS. CONTRACTORS SHALL VERIFY AND BE RESPONSIBLE FOR ALL DIMENSIONS AND CONDITIONS ON THE JOB. THIS OFFICE MUST BE NOTIFIED OF ANY VARIATION FROM THE DIMENSIONS AND CONDITIONS SHOWN BY THESE DRAWINGS. SHOP DETAILS OF ADEQUATE SCALE MUST BE SUBMITTED TO THIS OFFICE FOR APPROVAL BEFORE PROCEEDING WITH FABRICATION ON THE ITEMS SO NOTED.

EROSION CONTROL NOTES

TEMPORARY EROSION CONTROL MEASURES EFFECTIVE DURING RAINY SEASON – OCTOBER 1 TO APRIL 30

1. TEMPORARY EROSION CONTROL DEVICES SHOWN ON GRADING PLAN WHICH INTERFERE WITH THE WORK SHALL BE RELOCATED OR MODIFIED WHEN THE INSPECTOR SO DIRECTS AS THE WORK PROGRESSES.
2. EXCEPT AS OTHERWISE DIRECTED BY THE INSPECTOR, ALL DEVICES SHOWN ON THE EROSION CONTROL PLAN SHALL BE IN PLACE AT THE END OF EACH WORKING DAY. ALL EROSION CONTROL FACILITIES MUST BE INSPECTED AND REPAIRED AT THE END OF EACH WORKING DAY DURING THE RAINY SEASON AND MAINTAINED DURING THE RAINY SEASON (OCTOBER 1 TO APRIL 30).
3. ALL EROSION AND SEDIMENT CONTROL MEASURES SHALL BE CONSTRUCTED AND MAINTAINED IN ACCORDANCE WITH THE PROVISIONS OF THE ASSOCIATION OF BAY AREA GOVERNMENTS (ABAG) "MANUAL OF STANDARDS FOR EROSION AND SEDIMENT CONTROL MEASURES" UNLESS OTHERWISE STATED WITHIN THESE GENERAL NOTES. CONTROL MEASURES ARE SUBJECT TO THE INSPECTION AND APPROVAL OF THE ENGINEERING DIVISION OF THE PUBLIC SERVICES DEPARTMENT. SCHEDULE AN ENGINEERING INSPECTION AT LEAST 48 HOURS PRIOR TO THE START OF ANY WORK.
4. ALL LOOSE SOIL AND DEBRIS SHALL BE REMOVED FROM THE STREET AREAS UPON STARTING OPERATIONS AND PERIODICALLY THEREAFTER AS DIRECTED BY THE INSPECTOR. THE SITE SHALL BE MAINTAINED SO AS TO MINIMIZE SEDIMENT LADEN RUNOFF TO ANY STORM DRAIN SYSTEM.
5. THE CONTRACTOR SHALL PLACE 3"–4" FRACTURED STONE AGGREGATE AS A GRAVEL ROADWAY (6" MINIMUM THICKNESS FOR THE FULL WIDTH AND 50 FEET LONG) AT EACH ROAD ENTRANCE TO THE SITE. ANY MUD THAT IS TRACKED ONTO PUBLIC STREETS SHALL BE REMOVED THE SAME DAY AS REQUIRED BY THE COUNTY ENGINEER. MINIMUM WIDTH OF GRAVEL ROADWAY IS 10 FEET.
6. A CONCRETE WASHOUT IS REQUIRED FOR ALL CONCRETE WORK. THE WASHOUT SHALL CONSIST OF A CONTAINMENT AREA ENCLOSED BY AN EARTHEN DIKE. PLASTIC TARP, COVERING THE CONTAINMENT AREA AND EARTHEN DIKE, SHALL BE STAKED IN AT OUTSIDE EDGE OF EARTHEN DIKE.
7. ADDITIONAL CONTAINMENT METHODS MUST BE PROVIDED FOR ANY WASTE STORAGE AREA, STOCKPILE/MATERIAL STORAGE AREA AND/OR CONSTRUCTION TOILET AREA.
8. THE PERSON RESPONSIBLE IMPLEMENTING, INSPECTING AND MAINTAINING THE EROSION AND SEDIMENT CONTROL MEASURES IS:

   CONTACT PERSON'S NAME: XXXX
   TELEPHONE NUMBER: XXXX

9. STAND–BY CREWS SHALL BE ALERTED BY THE PERMITTEE OR CONTRACTOR FOR EMERGENCY WORK DURING RAINSTORMS.
10. AFTER OCTOBER 1, ALL EROSION CONTROL MEASURES WILL BE INSPECTED DAILY AND AFTER EACH STORM. AFTER OCTOBER 1, BREACHES IN DIKES AND SWALES WILL BE REPAIRED AT THE CLOSE OF EACH DAY AND WHENEVER RAIN IS FORECAST.
11. AS A PART OF THE EROSION CONTROL MEASURES, UNDERGROUND STORM DRAIN FACILITIES AND CONCRETE SHALL BE INSTALLED COMPLETE AS SHOWN ON THE IMPROVEMENT PLANS.
12. ALL STORM DRAIN INLET STRUCTURES GREATER THAN FOUR FEET IN DEPTH SHALL HAVE STEPS INSTALLED PER THE LATEST ACCEPTED SAFETY STANDARDS. A 6" CONCRETE COVER SLAB SHALL BE INSTALLED OVER PIPE WITH LESS THAN 2.5 FEET OF COVER TO SUBGRADE. ALL PIPE TO BE CLASS III UNLESS OTHERWISE NOTED.
13. ALL GRADED AREAS, INCLUDING, BUT NOT LIMITED TO, CUT AND FILL SLOPES, STREETS, PARKING AREAS, AND BUILDING PADS SHALL BE HYDROSEEDED PER ABAG. IN ADDITION TO HYDROSEEDING, APPLICATION OF STRAW WITH A TACKIFIER OR MULCH MAY BE REQUIRED BY THE COUNTY ENGINEER.
14. IF ANY GRADING OPERATIONS, OTHER THAN LOT FINISH GRADING, ARE TO BE PERFORMED DURING THE RAINY SEASON, OCTOBER 1 THROUGH APRIL 30, AN EROSION CONTROL PLAN MUST BE SUBMITTED BY SEPTEMBER 1 AND THE PLAN MUST BE APPROVED BY THE COUNTY OF ALAMEDA PRIOR TO THE COMMENCEMENT OF ANY SUCH GRADING OPERATIONS.
15. TO MINIMIZE EROSION OF GRADED BANKS, ALL GRADED BANKS STEEPER THAN 2% AND HIGHER THAN 3 FEET, SHALL BE HYDROSEEDED, LANDSCAPED, OR SEALED. IN ADDITION TO HYDROSEEDING, APPLICATION OF STRAW WITH A TACKIFIER OR MULCH MAY BE REQUIRED BY THE COUNTY ENGINEER. IF THE PERMANENT STORM DRAIN SYSTEM IS NOT INSTALLED BY OCTOBER 1, TEMPORARY DITCHES SHALL BE CONSTRUCTED TO CONTAIN THE STORM WATER AND DIRECT IT, IN A MANNER THAT AVOIDS EROSION OF THE BANKS, TO THE EROSION AND SEDIMENT CONTROL FACILITIES.
16. ALL CUT AND FILL SLOPES ARE TO BE PROTECTED TO PREVENT OVERBANK FLOW USING 4" EARTH BERMS OR SILT FENCES.
17. ALL GRADED AREAS, INCLUDING, BUT NOT LIMITED TO, CUT AND FILL SLOPES, STREETS, PARKING AREAS, AND BUILDING PADS SHALL BE HYDROSEEDED PER COUNTY'S REQUIREMENT. SUGGESTED MIX DESIGN FOLLOWS:

'BLANDO' BROME	40 LBS/ACRE
ZORRO FESCUE	10 LBS/ACRE
HYKON ROSE CLOVER	9 LBS/ACRE
SUB CLOVER	5 LBS/ACRE
CALIFORNIA NATIVE WILDFLOWER	8 LBS/ACRE
FERTILIZER	300 LBS/ACRE
ORGANIC BINDER	100 LBS/ACRE
STRAW MULCH	4000 LBS/ACRE

18. BORROW AREAS AND TEMPORARY STOCKPILES SHALL BE PROTECTED WITH APPROPRIATE EROSION CONTROL MEASURES TO THE SATISFACTION OF THE COUNTY ENGINEER.
19. SANDBAGS, STRAW WATTLES AND/OR STRAW BALES SHALL BE STOCKPILED ON SITE AND PLACED AT INTERVALS SHOWN ON EROSION CONTROL PLANS, WHEN THE RAIN FORECAST IS 40% OR GREATER, OR WHEN DIRECTED BY THE INSPECTOR.
20. SANDBAGS REFERRED TO IN THE PRECEDING ITEMS MUST BE FULL. APPROVED SANDBAG FILL MATERIALS ARE DECOMPOSED GRANITE AND/OR GRAVEL, OR OTHER MATERIALS APPROVED BY THE INSPECTOR.
21. WHEN DIRECTED BY THE INSPECTOR, A 12–INCH BERM SHALL BE MAINTAINED ALONG THE TOP OF THE SLOPE OF THOSE FILLS ON WHICH GRADING IS NOT IN PROGRESS.
22. WHEN PAD ELEVATIONS OF ADJACENT LOTS OR ELEVATIONS BETWEEN THE STREET AND THE LOT ARE SEPARATED BY MORE THAN 6 FEET, A MINIMUM 12" BERM SHALL BE MAINTAINED ALONG THE PROPERTY LINE SEPARATING THE LOTS, AND THE BERM SHALL DIRECT THE WATER TO THE OUTLET. VELOCITY CHECK DAMS SHALL BE INSTALLED BETWEEN THE OUTLET ON THE LOT AND THE STREET.
23. PROVIDE VELOCITY CHECK DAMS IN ALL UNPAVED STREETS AT THE INTERVALS INDICATED BELOW IN NOTE #24. VELOCITY CHECK DAMS MAY BE CONSTRUCTED OF STRAW BALES, SANDBAGS OR OTHER EROSION RESISTANT MATERIALS APPROVED BY THE INSPECTOR, AND SHALL EXTEND COMPLETELY ACROSS THE STREET OR CHANNEL AT RIGHT ANGLES TO THE CENTERLINE. EARTH DIKES MAY NOT BE USED AS VELOCITY CHECK DAMS.
24. PROVIDE VELOCITY CHECK DAMS IN ALL UNPAVED GRADED CHANNELS AT THE INTERVALS INDICATED BELOW:

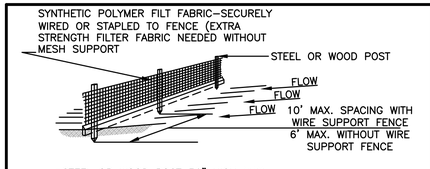
GRADE OF CHANNEL	INTERVAL
LESS THAN 3%	100 FEET
3% TO 6%	50 FEET
OVER 6%	25 FEET

25. SEWER OR STORM DRAIN TRENCHES THAT ARE OUT THROUGH BASIN DIKES OR BASIN INLET DIKES, SHALL BE PLUGGED WITH SANDBAGS FROM TOP OF PIPE TO TOP OF DIKE. SEWER LINES SHALL FIRST BE ENCASED IN CONCRETE BEFORE SANDBAGS ARE PLACED.
26. ALL OPEN UTILITY TRENCHES SHALL BE BLOCKED AT THE PRESCRIBED INTERVALS FROM THE BOTTOM TO TOP WITH A DOUBLE ROW OF SANDBAGS PRIOR TO BACKFILL. SEWER TRENCHES SHALL BE BLOCKED AT THE PRESCRIBED INTERVALS WITH A DOUBLE ROW OF SANDBAGS EXTENDING DOWNWARD, TWO SANDBAGS FROM THE GRADED SURFACE OF THE STREET. SANDBAGS ARE TO BE PLACED WITH ALTERNATE HEADER AND STRETCHER COURSES. THE INTERVALS PRESCRIBED BETWEEN SANDBAG LOCKING SHALL DEPEND ON THE SLOPE OF THE GROUND SURFACE, BUT NOT EXCEED THE FOLLOWING:

GRADE OF THE STREET	INTERVAL
LESS THAN 2%	AS REQUIRED
2% TO 4%	100 FEET
4% TO 10%	50 FEET
OVER 10%	25 FEET

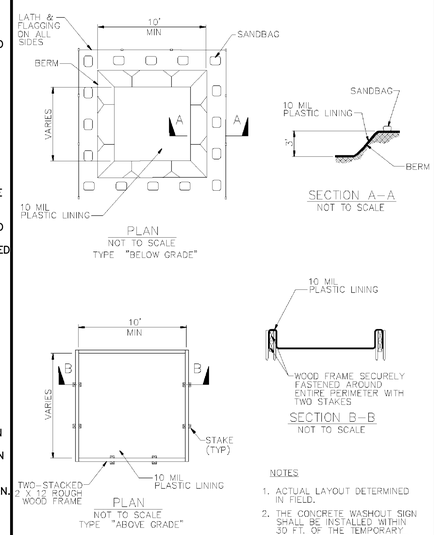
27. AFTER STORM DRAIN, SANITARY SEWER AND UTILITY TRENCHES ARE BACKFILLED AND COMPACTED, THE SURFACES OVER SUCH TRENCHES SHALL BE MOUNDED SLIGHTLY TO PREVENT CHANNELING OF WATER IN THE TRENCH AREA. CARE SHOULD BE EXERCISED TO PROVIDE FOR CROSS FLOW AT FREQUENT INTERVALS WHERE TRENCHES ARE NOT ON THE CENTER LINE OF A CROWNED STREET.
28. SEDIMENT TRAPS SHALL BE CLEANED OUT PER INSPECTOR'S DIRECTION. IT IS THE CONTRACTOR'S RESPONSIBILITY TO CLEAN THE DESILTING BASINS AND THE SEDIMENT TRAPS.
29. THIS PLAN MAY NOT COVER ALL THE SITUATIONS THAT ARISE DURING CONSTRUCTION DUE TO UNANTICIPATED FIELD CONDITIONS. VARIATIONS MAY BE MADE TO THESE PLANS IN THE FIELD, SUBJECT TO APPROVAL OF THE COUNTY ENGINEER.
30. EROSION CONTROL STRUCTURES SHALL BE ADJUSTED BY THE CONTRACTOR TO REFLECT ALL CHANGES IN DRAINAGE AS STREETS AND BUILDING PADS ARE BEING INSTALLED.
31. INSTALL EXCELSIOR CURLEX II EROSION CONTROL BLANKET OR APPROVED EQUAL ON GRADED SLOPES STEEPER THAN 3:1. INSTALL PER MANUFACTURER'S RECOMMENDATIONS AND SPECIFICATIONS.

EROSION CONTROL NOTES | 10

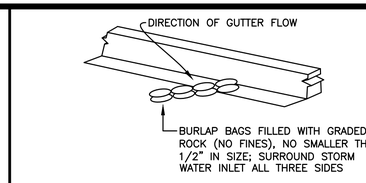


1/2"=1'–0"

SILT FENCE | 9



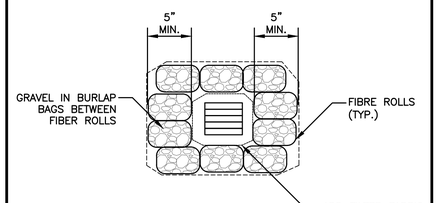
WM–8 CONCRETE WASTE MANAGEMENT | 7



NOTES
1. THICKNESS OF FILLED BAGS WHEN LAID FLAT SHALL NOT EXCEED 4".
2. ENSURE THERE ARE NO GAPS BETWEEN THE BAGS AND THE FACE OF CURB.
3. REMOVE ACCUMULATED SILT, DIRT, AND DEBRIS BEFORE IT EXCEEDS A THICKNESS OF 2" IN THE GUTTER.
4. INSPECT INLET PROTECTION DAILY DURING EXTENDED RAINFALL PERIODS AND BEFORE AND AFTER EACH RAIN EVENT.

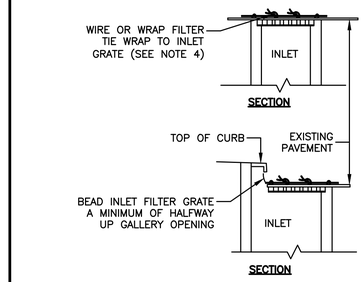
1/2"=1'–0"

GRAVEL BAG CHECK DAM | 4



1/2"=1'–0"

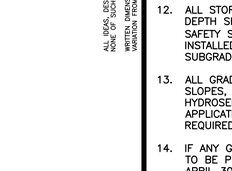
INLET PROTECTION (UNPAVED AREAS) | 5



NOTES:
1. FILTER FABRIC SHALL MEET CAL–TRANS OR HAY BAG SPECIFICATIONS.
2. FILTER MATERIAL AND GRATE SHALL OVERLAP INLET ON ALL SIDES BY A MINIMUM OF 1"
3. INLET FILTER GRATE SHALL BE MADE OF RE–BARS, CRISS CROSSED AT 6" (WELDED NUMBERED 3 OR TIED TOGETHER WITH WIRE) OR A PLATE WITH MINIMUM OF 75% OPEN AREA, BOTH OF SUFFICIENT STRENGTH TO PREVENT BENDING WHEN DRIVEN OVER BY A VEHICLE.
4. INLET FILTER GRATE SHALL BE SECURELY ATTACHED TO DRAIN INLET BY WIRE OR TIE–WRAPS (BEND OVER).
5. FILTERS SHALL BE INSPECTED WEEKLY AND AFTER EACH RAINFALL. REPAIRS, SEDIMENT/ DEBRIS REMOVAL SHALL BE MADE TO ASSURE EFFICIENCY OF FILTER SYSTEM.

1/2"=1'–0"

INLET PROTECTION (PAVED AREAS) | 1

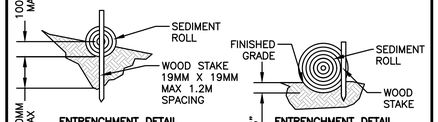


NOTES
1. ACTUAL LAYOUT DETERMINED IN FIELD.
2. THE CONCRETE WASHOUT SIGN SHALL BE INSTALLED WITHIN 30 FT OF THE TEMPORARY CONCRETE WASHOUT FACILITY.

CONCRETE WASTE MANAGEMENT WM–8 | 8

LIMITATIONS:
–DESIGNED FOR LOW SURFACE FLOWS NOT TO EXCEED 1 CFS FOR SMALL AREAS.
–DESIGNED FOR SHORT SLOPED OR SLOPES FLATTER THAN 3:1
– PRIMARY PURPOSE IS NOT SEDIMENT CONTROL, ALTHOUGH DO PROVIDE SOME SEDIMENT REMOVAL.

INSPECTION AND MAINTENANCE:
– REPAIR OR REPLACE SPLIT, TORN, UNRAVELING, OR SLUMPING FIBER ROLLS.
–INSPECT FIBER ROLLS WHEN RAIN IS FORECAST, FOLLOWING RAIN EVENTS AND AT LEAST DAILY DURING PROLONGED RAINFALL. PERFORM REQUIRED MAINTENANCE.
–IN MOST CASES, FIBER ROLLS DO NOT REQUIRE REMOVAL AND CAN BE ABANDONED IN PLACE. IF NOTE EXCESSIVELY SOILED, ROLLS MAY BE REMOVED. REPLACED AND REUSED.



PURPOSE:
FIBER ROLLS (SEDIMENT LOGS OR WATTLES), COMPOSED OF BIO–DEGRADABLE FIBERS STUFFED IN A PHOTO–DEGRADEABLE OPEN WEAVE NETTING, ARE DESIGNED TO REDUCE SEDIMENT RUNOFF FROM DISTURBED SOILS INTO THE STORM DRAIN SYSTEM OR WATER–COURSES. FIBER ROLLS ARE POROUS AND ALLOW WATER TO FILTER THROUGH FIBERS AND TRAP SEDIMENT, INCREASE FILTRATION RATES, SLOW RUNOFF AND REDUCE SHEET AND HILL EROSION. WATTLES ALSO CREATE A FAVORABLE ENVIRONMENT FOR PLANT ESTABLISHMENT.

APPLICATION:
–ALONG THE FACE OF EXPOSED AND ERODIBLE SLOPES TO SHORTEN SLOPE LENGTH.
–AT GRADE BREAKS WHERE SLOPES TRANSITION TO A STEEPER SLOPE
–IN DRAINAGE SWALES TO SLOW FLOWS
–ALONG STREAMBANKS TO ASSIST STABILIZATION AND REVEGETATION

INSPECTION AND MAINTENANCE:
FOLLOW MANUFACTURER'S RECOMMENDATIONS FOR INSTALLATION. IN GENERAL, THESE WILL BE AS FOLLOWS:
–FINE GRADE THE SUBGRADE BY HAND DRESSING WHERE NECESSARY TO REMOVE LOCAL DEVIATIONS AND TO REMOVE LARGER STONES OR DEBRIS THAT WILL INHIBIT INTIMATE CONTACT OF THE FIBER ROLL WITH THE SUBGRADE.
–PRIOR TO ROLL INSTALLATION, CONTOUR A CONCAVE KEY TRENCH 50 TO 100MM (2 TO 4 INCHES) DEEP ALONG THE PROPOSED INSTALLATION ROUTE.
–SOIL EXCAVATION IN TRENCHING SHOULD BE PLACED ON THE UPHILL OR FLOW SIDE OF THE ROLL TO PREVENT WATER FROM UNDERCUTTING THE ROLL.
–PLACE FIBER ROLLS INTO THE KEY TRENCH AND STAKE ON BOTH SIDES OF THE ROLL WITHIN 6 FEET OF EACH END AND THEN EVERY SIX INCHES WITH 1" X 2" X 23" STAKES.
–STAKE ARE TYPICALLY DRIVEN IN ON ALTERNATING SIDES OF THE ROLL. WHEN MORE THAN ONE FIBER ROLL IS PLACED IN A ROW, THE ROLLS SHOULD BE BUTTED SECURELY TO ONE ANOTHER TO PROVIDE A TIGHT JOINT, NOT OVERLAPPED.

TITLE DESCRIPTION

REAL PROPERTY IN THE CITY OF BERKELEY, COUNTY OF ALAMEDA, STATE OF CALIFORNIA, DESCRIBED AS FOLLOWS;

PORTION OF LOT 4, BLOCK 13, "MAP OF THE PROPERTY OF COLLEGE HOMESTEAD ASSOCIATION", RECORDED MAY 15, 1866, MAP BOOK "T" OF DEEDS, PAGE 799, ALAMEDA COUNTY RECORDS.

BEGINNING AT A POINT OF THE INTERSECTION OF THE WESTERN LINE OF ELLSWORTH STREET WITH THE SOUTHERN LINE OF DURANT AVENUE, AND RUNNING THENCE WESTERLY ALONG SAID LINE OF DURANT AVENUE, 94 FEET; THENCE AT RIGHT ANGLES SOUTHERLY 90 FEET; THENCE EASTERLY PARALLEL WITH SAID LINE OF DURANT AVENUE, 94 FEET TO THE WESTERN LINE OF ELLSWORTH STREET; THENCE NORTHERLY ALONG SAID LAST NAMED LINE, 90 FEET TO THE POINT OF BEGINNING.

EXCEPTING THEREFROM THE EXCLUSIVE RIGHT TO PROSPECT FOR, DRILL FOR, PRODUCE AND TAKE ANY OIL, GAS OR OTHER HYDROCARBON SUBSTANCES OR MINERAL SUBSTANCES AND ACCOMPANYING FLUIDS INCLUDING ALL GEOTHERMAL RESOURCES, FROM THE REAL PROPERTY GRANTED HEREIN, FROM THE DEPTH OF FIVE HUNDRED FEET FROM THE SAID REAL PROPERTY, INCLUDING THE RIGHT TO SLANT DRILL FROM ADJACENT PROPERTY, THE RIGHT TO UTILIZE SUBSURFACE STORAGE FOR NATURAL SUBSTANCES, AND THE RIGHT TO MAINTAIN SUBSURFACE PRESSURES.
GRANTOR COVENANTS AND EGRESS THAT THE ABOVE RESERVED RIGHTS WILL NOT BE EXERCISED IN DEROGATION OF GRANTEE'S USED AND PURPOSES OF THE SURFACE OF REAL PROPERTY. AS RESERVED IN THE DEED EXECUTED BY THE REGENTS OF THE UNIVERSITY OF CALIFORNIA, A CALIFORNIA CORPORATION, RECORDED SEPTEMBER 2, 1983, SERIES NO 83-163400, ALAMEDA COUNTY RECORDS.

APN: 055-1887-001

THE PROPERTY SURVEYED IS THE SAME AS DESCRIBED ABOVE AND SHOWN IN THE TITLE COMMITMENT FROM FIRST AMERICAN TITLE INSURANCE COMPANY, COMMITMENT NO. NCS-1177686-CC AND AN EFFECTIVE DATE OF SEPTEMBER 18, 2023, UPDATED OCTOBER 06, 2023.

TITLE COMMITMENT INFORMATION

The Title Description and Schedule 'B' items are the same as shown on the title commitment provided by First American Title Insurance Company, Commitment No. NCS-1177686-CC, issued with an effective date of September 18, 2023, updated October 06, 2023.

SURVEYOR'S NOTES

1. ALL STATEMENTS WITHIN THE CERTIFICATION, AND OTHER REFERENCES LOCATED ELSEWHERE HEREON, RELATED TO UTILITIES, IMPROVEMENTS, STRUCTURES, BUILDINGS, PARTY WALLS, EASEMENTS, SERVITUDES, FOUNDATIONS AND POSSIBLE ENCROACHMENTS ARE BASED SOLELY ON ABOVE GROUND, VISIBLE EVIDENCE, UNLESS ANOTHER SOURCE OF INFORMATION IS SPECIFICALLY REFERENCED HEREON.

2. SUBJECT TRACT HAS DIRECT PHYSICAL DRIVEWAY ACCESS TO ELLSWORTH STREET AND DURANT AVENUE, BOTH DEDICATED PUBLIC RIGHTS-OF-WAY.

3. THE DIMENSIONS AND AREA OF THE BUILDING(S) SHOWN ARE BASED ON THE BUILDING'S EXTERIOR FOOTPRINT AT GROUND LEVEL.

4. THE POINT OF HEIGHT MEASUREMENT IS IDENTIFIED ON THE SURVEY AND WAS TAKEN FROM THE NEAREST ADJACENT GRADE AT SAID POINT, THIS POINT REPRESENTS THE HEIGHT OF THE STRUCTURE AS OBSERVED FROM GROUND LEVEL.

5. UNDERGROUND UTILITIES HAVE BEEN LOCATED AND/OR SHOWN ON THIS SURVEY, ONLY VISIBLE AND/OR MARKED UTILITY APPURTENANCES ARE SHOWN.

6. THERE IS NO OBSERVABLE EVIDENCE OF EARTH MOVING WORK, OR BUILDING CONSTRUCTION ON THE SURVEYED PROPERTY.

7. THERE ARE NO OBSERVABLE EVIDENCE OF ANY CHANGES IN STREET RIGHT-OF-WAYS OR RECENT STREET OR SIDEWALK CONSTRUCTION OR REPAIR.

8. THERE IS NO OBSERVABLE EVIDENCE OF CEMETERIES ON THE SURVEYED PROPERTY.

9. ALL RECIPROCAL EASEMENT AGREEMENTS ("REAS") THAT HAVE BEEN REPORTED BY THE TITLE REPORT PROVIDED HAVE BEEN DENOTED ON THE SURVEY AND ARE SHOWN HEREON. THE LIMITS OF ANY OFFSITE APPURTENANT EASEMENTS THAT HAVE BEEN REPORTED BY THE TITLE REPORT PROVIDED HAVE BEEN DENOTED ON THE SURVEY AND ARE SHOWN HEREON.

10. THIS SURVEY DOES NOT PROVIDE A DETERMINATION OR OPINION CONCERNING THE LOCATION OR EXISTENCE OF WETLANDS, FAULT LINES, TOXIC OR HAZARDOUS WASTE AREAS, SUBSIDENCE, SUBSURFACE AND ENVIRONMENTAL CONDITIONS OR GEOLOGICAL ISSUES. NO STATEMENT IS MADE CONCERNING THE SUITABILITY OF THE SUBJECT TRACT FOR ANY INTENDED USE, PURPOSE OR DEVELOPMENT.

11. THE SURVEYED BOUNDARY SHOWN HEREON ARE CONTIGUOUS WITH ADJOINING PROPERTIES AND/OR RIGHTS OF WAY WITHOUT ANY GAPS, GORES OR OVERLAPS.

12. NO VISIBLE EVIDENCE OF SUBSTANTIAL AREAS OF REFUSE WERE OBSERVED AT THE TIME THE FIELDWORK WAS PERFORMED.

13. THE BOUNDARY LINE DIMENSIONS AS SHOWN ON THIS SURVEY MAP FORM A MATHEMATICALLY CLOSED FIGURE.

SURVEYOR'S CERTIFICATE

TO: 2298 DURANT LP, A CALIFORNIA LIMITED PARTNERSHIP; FIRST AMERICAN TITLE INSURANCE COMPANY:

THIS IS TO CERTIFY THAT THIS MAP OR PLAT AND THE SURVEY ON WHICH IT IS BASED WERE MADE IN ACCORDANCE WITH THE 2021 MINIMUM STANDARD DETAIL REQUIREMENTS FOR ALTA/NSPS LAND TITLE SURVEYS, JOINTLY ESTABLISHED AND ADOPTED BY ALTA AND NSPS, AND INCLUDES ITEMS 2, 3, 4, 5, 6(A), 6(B), 7(A), 7(B)(1), 7(C), 8, 9, 11(B), 13, 14, 16, 17 AND 19 OF TABLE A THEREOF. THE FIELDWORK WAS COMPLETED ON JUNE 29, 2023.

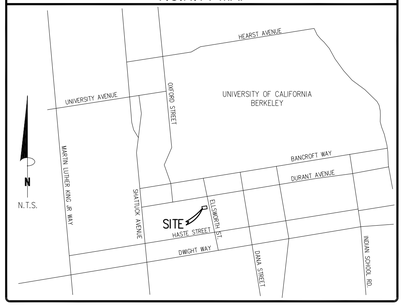
VICINITY MAP



BASIS OF BEARING

THE BEARING OF N80°51'12"E ALONG THE MONUMENT LINE OF CHANNING WAY AS SHOWN ON RECORD OF SURVEY NO. 2769, FILED IN BOOK 42 OF RECORD OF SURVEYS AT PAGE 46, RECORDS OF ALAMEDA COUNTY.

ELEVATION BENCH MARK

CITY OF BERKELEY MONUMENT AT THE INTERSECTION OF DURANT AVE. AND ELLSWORTH ST. PER CR7052.
CITY MONUMENT NO. B0401
ELEV.=211.60'

OBSERVED SIGNIFICANT OBSERVATIONS

NONE OBSERVED

UTILITY NOTE

THE SURVEY SHOWS THE LOCATION OF UTILITIES EXISTING ON OR SERVING THE SURVEYED PROPERTY AS DETERMINED BY OBSERVED EVIDENCE COLLECTED PURSUANT TO ALTA SECTION 5 E IV TOGETHER WITH EVIDENCE FROM PLANS REQUESTED BY THE SURVEYOR AND OBTAINED FROM THE UTILITY COMPANIES, OR PROVIDED BY THE CLIENT AND MARKINGS REQUESTED BY THE SUREYOR PURSUANT TO A 811 UTILITY LOCATE OF SIMILAR REQUEST.

TITLE DESCRIPTION

THE LAND REFERRED TO IS SITUATED IN THE COUNTY OF ALAMEDA, CITY OF BERKELEY, STATE OF CALIFORNIA, AND IS DESCRIBED AS FOLLOWS:

THAT PARCEL OF LAND IN THE CITY OF BERKELEY, COUNTY OF ALAMEDA, STATE OF CALIFORNIA, DESCRIBED AS FOLLOWS:

A PORTION OF LOT 4, BLOCK 13, "PROPERTY OF THE COLLEGE HOMESTEAD ASSOCIATION", FILED MAY 15, 1866, BOOK T OF DEEDS, PAGE 799, ALAMEDA COUNTY RECORDS, DESCRIBED AS FOLLOWS:

BEGINNING AT A POINT ON THE WESTERLY LINE OF ELLSWORTH STREET, DISTANT 90 FEET SOUTH OF THE INTERSECTION OF THE WESTERLY LINE OF ELLSWORTH STREET AND THE SOUTHERLY LINE OF DURANT AVENUE; THENCE SOUTHERLY ALONG THE WESTERLY LINE OF ELLSWORTH STREET 40 FEET; THENCE AT A RIGHT ANGLE WIESTERLY PARALLEL TO THE SOUTHERLY LINE OF DURANT AVENUE 94 FEET; THENCE NORTHERLY AT A RIGHT ANGLE PARALLEL TO THE WESTERLY LINE OF ELLSWORTH STREET, 40 FEET; THENCE AT A RIGHT ANGLE EASTERLY 94 FEET TO THE POINT OF BEGINNING.

APN: 055-1887-002

THE PROPERTY SURVEYED IS THE SAME AS DESCRIBED ABOVE AND SHOWN IN THE TITLE COMMITMENT FROM FIRST AMERICAN TITLE INSURANCE COMPANY, COMMITMENT NO. NCS-1183023-CC AND AN EFFECTIVE DATE OF MAY 31, 2023.

TITLE COMMITMENT INFORMATION

The Title Description and Schedule 'B' items are the same as shown on the title commitment provided by First American Title Insurance Company, Commitment No. NCS-1183023-CC, issued with an effective date of May 31, 2023.

SURVEYOR'S NOTES

1. ALL STATEMENTS WITHIN THE CERTIFICATION, AND OTHER REFERENCES LOCATED ELSEWHERE HEREON, RELATED TO UTILITIES, IMPROVEMENTS, STRUCTURES, BUILDINGS, PARTY WALLS, EASEMENTS, SERVITUDES, FOUNDATIONS AND POSSIBLE ENCROACHMENTS ARE BASED SOLELY ON ABOVE GROUND, VISIBLE EVIDENCE, UNLESS ANOTHER SOURCE OF INFORMATION IS SPECIFICALLY REFERENCED HEREON.

2. SUBJECT TRACT HAS DIRECT PHYSICAL DRIVEWAY ACCESS TO ELLSWORTH STREET AND DURANT AVENUE, BOTH DEDICATED PUBLIC RIGHTS-OF-WAY.

3. THE DIMENSIONS AND AREA OF THE BUILDING(S) SHOWN ARE BASED ON THE BUILDING'S EXTERIOR FOOTPRINT AT GROUND LEVEL.

4. THE POINT OF HEIGHT MEASUREMENT IS IDENTIFIED ON THE SURVEY AND WAS TAKEN FROM THE NEAREST ADJACENT GRADE AT SAID POINT, THIS POINT REPRESENTS THE HEIGHT OF THE STRUCTURE AS OBSERVED FROM GROUND LEVEL.

5. UNDERGROUND UTILITIES HAVE BEEN LOCATED AND/OR SHOWN ON THIS SURVEY, ONLY VISIBLE AND/OR MARKED UTILITY APPURTENANCES ARE SHOWN.

6. THERE IS NO OBSERVABLE EVIDENCE OF EARTH MOVING WORK, OR BUILDING CONSTRUCTION ON THE SURVEYED PROPERTY.

7. THERE ARE NO OBSERVABLE EVIDENCE OF ANY CHANGES IN STREET RIGHT-OF-WAYS OR RECENT STREET OR SIDEWALK CONSTRUCTION OR REPAIR.

8. THERE IS NO OBSERVABLE EVIDENCE OF CEMETERIES ON THE SURVEYED PROPERTY.

9. ALL RECIPROCAL EASEMENT AGREEMENTS ("REAS") THAT HAVE BEEN REPORTED BY THE TITLE REPORT PROVIDED HAVE BEEN DENOTED ON THE SURVEY AND ARE SHOWN HEREON. THE LIMITS OF ANY OFFSITE APPURTENANT EASEMENTS THAT HAVE BEEN REPORTED BY THE TITLE REPORT PROVIDED HAVE BEEN DENOTED ON THE SURVEY AND ARE SHOWN HEREON.

10. THIS SURVEY DOES NOT PROVIDE A DETERMINATION OR OPINION CONCERNING THE LOCATION OR EXISTENCE OF WETLANDS, FAULT LINES, TOXIC OR HAZARDOUS WASTE AREAS, SUBSIDENCE, SUBSURFACE AND ENVIRONMENTAL CONDITIONS OR GEOLOGICAL ISSUES. NO STATEMENT IS MADE CONCERNING THE SUITABILITY OF THE SUBJECT TRACT FOR ANY INTENDED USE, PURPOSE OR DEVELOPMENT.

11. THE SURVEYED BOUNDARY SHOWN HEREON ARE CONTIGUOUS WITH ADJOINING PROPERTIES AND/OR RIGHTS OF WAY WITHOUT ANY GAPS, GORES OR OVERLAPS.

12. NO VISIBLE EVIDENCE OF SUBSTANTIAL AREAS OF REFUSE WERE OBSERVED AT THE TIME THE FIELDWORK WAS PERFORMED.

13. THE BOUNDARY LINE DIMENSIONS AS SHOWN ON THIS SURVEY MAP FORM A MATHEMATICALLY CLOSED FIGURE.

14. RECORD AND MEASURED DISTANCES ARE THE SAME.

SURVEYOR'S CERTIFICATE

TO: ELLSWORTH, CASCADE CAPITAL- BERKELEY MULTI-FAMILY I, LLC, A CALIFORNIA LIMITED LIABILITY COMPANY; FIRST AMERICAN TITLE INSURANCE COMPANY;

THIS IS TO CERTIFY THAT THIS MAP OR PLAT AND THE SURVEY ON WHICH IT IS BASED WERE MADE IN ACCORDANCE WITH THE 2021 MINIMUM STANDARD DETAIL REQUIREMENTS FOR ALTA/NSPS LAND TITLE SURVEYS, JOINTLY ESTABLISHED AND ADOPTED BY ALTA AND NSPS, AND INCLUDES ITEMS 2, 3, 4, 5, 6(A), 6(B), 7(A), 7(B)(1), 7(C), 8, 9, 11(B), 13, 14, 16, 17 AND 19 OF TABLE A THEREOF. THE FIELDWORK WAS COMPLETED ON JUNE 29, 2023.

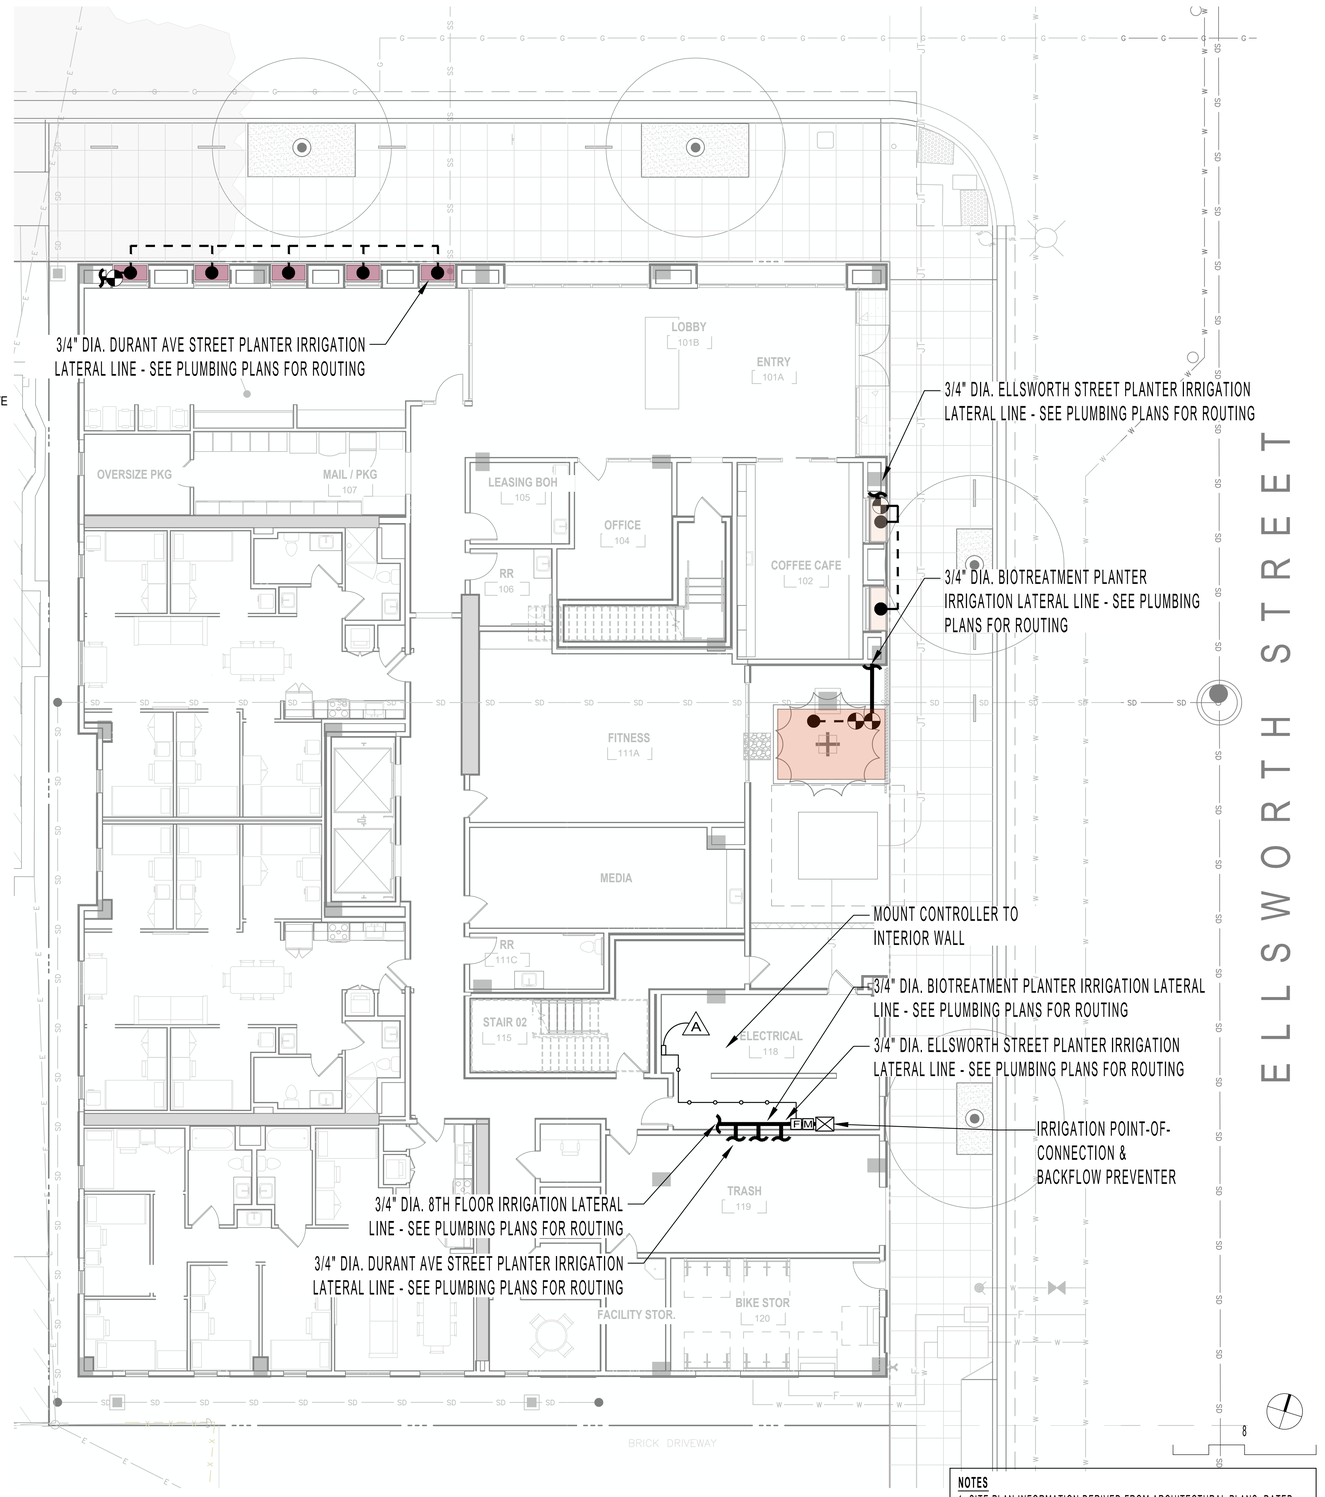
SOIL MOISTURE SENSOR		SOIL CLIK - LOCATED IN FIELD AS DIRECTED BY OWNER - REQUIRES HARD-WIRE AND WALL PLACEMENT ADJACENT TO CONTROLLER	HUNTER	SOIL-CLIK
RAIN MOISTURE SENSOR		RAIN METER - LOCATED IN FIELD AS DIRECTED BY OWNER - REQUIRES HARD-WIRE AND WALL PLACEMENT ADJACENT TO CONTROLLER	HUNTER	RAIN-CLIK
MASTER CONTROL VALVE	M	MASTER CONTROL VALVE - 1-INCH SIZE - 24 VOLT IRRIGATION SOLENOID - THREADED ENDS - LOCATE MASTER VALVE BEFORE FLOW SENSOR	SUPERIOR	
DRIP VALVE STATION		DRIP VALVE STATION - DRIP ELECTRIC CONTROL VALVE ASSEMBLY - W/ PRESSURE REGULATING BASKET FILTER (200 POLY MESH /40 PSI SETTING) USE 3/4-INCH SIZE DRIP ELECTRIC CONTROL VALVE ASSEMBLY FOR FLOWS 4 GPM AND UNDER (USE 1-INCH SIZE FOR FLOWS 5 GPM THROUGH 14 GPM - USE 1-1/2 INCH SIZE FOR FLOWS 15 GPM AND GREATER)	HUNTER	
QUICK COUPLING VALVE		QUICK COUPLING VALVE - 1-INCH SIZE - POTABLE WATER USE - LOCKING RUBBER COVER MOUNTED IN ROUND BOX - PROVIDE VALVE KEY AND SWIVEL		
AIR RELIEF VALVE		AIR RELIEF VALVE - THREADED - 1/2-INCH MIPT- INSTALL WITHIN ROUND VALVE BOX - INSTALL UNITS AT HIGH POINTS OF DRIPLINE SYSTEMS AT 2 PER VALVE		
BALL FULL PORT VALVE / DRIPLINE FLUSH OUT ASSEMBLY		SCHEDULE 40 PVC BALL FULL PORT VALVE AND PVC FLEX HOSE TUBING INSTALLED WITHIN ROUND VALVE BOX - ADAPT TO INSTALL DRIPLINE TUBING AS REQUIRED - UNITS WHERE SHOWN LOCATED AT ENDS OF DRIPLINE SYSTEMS		
PRESSURIZED MAIN LINE - COPPER IRRIGATION WATER PIPING STUB OUT	———	DRY COPPER PIPING - 3/4-INCH SIZE PIPING STUB OUT - PIPING ROUTED THROUGH BUILDING AND ROOF DECKING(S) FOR IRRIGATION SYSTEM CONTINUATION PER MECHANICAL ENGINEER'S DRAWINGS - REFER TO MECHANICAL ENGINEER'S DRAWINGS FOR ACTUAL LOCATION - ROUTING OF PIPE TO IRRIGATION VALUE TO BE PROVIDED BY PLUMBING CONTRACTOR.		
LATERAL LINE	- - - - - INDICATES CONNECTION TO ASSIGNED DRIP LINES, TYP.	SCHEDULE 40 PVC - 3/4 INCH DIA. - AS SHOWN ON PLANS		

IRRIGATION NOTES

1. IRRIGATION TO CONNECT TO WATER SUPPLY WITH BACKFLOW PREVENTION DEVICE INSTALLED PER AGENCY REQUIREMENTS.
2. IRRIGATION SYSTEM SHALL EMPLOY AN ELECTRONIC 'SMART' CONTROLLER WITH WEATHER-SENSING CAPABILITIES, 6 MIN. VALVES, SINGLE WIRE TYPE.
3. PLANTING HAS BEEN DESIGNED IN 'HYDROZONES' - WITH VALVES GROUPED ACCORDING TO LOCATION AND PLANT TYPE.
4. WATER EMITTERS SHALL BE USED TO DELIVER THE WATER IN THE MOST EFFICIENT MANNER POSSIBLE. USE, IN ORDER: IN-LINE DRIP, MICRO SPRAY, POINT-SOURCE. PROVIDE SEPARATE SYSTEMS FOR TREE POPUP STREAM BUBBLERS WITH PCS.
5. REFER TO PLUMBING PLANS FOR IRRIGATION WATER POINT-OF-CONNECTION LOCATION.
6. REFER TO ELECTRICAL ENGINEERING PLANS FOR IRRIGATION CONTROLLER CONNECTION LOCATION.



NOTES

IRRIGATION NOTES

1. **POINT-SOURCE DRIP** IRRIGATED AREAS USE 1/2" MAINLINE FOR DISTRIBUTION TO 1/4" IN-LINE DRIP TUBING WITH EMITTERS SPACED 6", WRAPPED AROUND INDIVIDUAL PLANTS. MAINLINE TO BE ROUTED SO THAT IT IS AS CLOSE TO EACH INDIVIDUAL PLANT AS POSSIBLE. IF PLANT IS OVER 24" AWAY FROM THE MAINLINE, USE A 1/4" SOLID LATERAL LINE TO CONNECT THE 1/4" IN-LINE DRIP TUBING TO THE 1/2" MAINLINE. WRAP PLANT ONCE WITH IN-LINE DRIP TUBING AROUND ROOTBALL PER THE FOLLOWING:

2. IN-LINE DRIP IRRIGATED AREAS USE 1/2" MAINLINE FOR DISTRIBUTION TO 1/4" IN-LINE DRIP TUBING WITH EMITTERS SPACED 6", TO COMPLETELY COVER THE DESIGNATED PLANTING AREA. SPACE DRIP TUBING TO COVER ENTIRE PLANTING AREA AS SHOWN IN THE STANDARD IN-LINE DRIP LAYOUT DETAIL.

3. MP ROTATORS IRRIGATED AREAS USE 1/2" MAINLINE FOR DISTRIBUTION TO HIGH-EFFICIENCY POP-UP ROTATING JET STREAM EMITTERS, SPACED TO ENSURE HEAD-TO-HEAD COVERAGE WITHIN DESIGNATED PLANTING AREAS. ALL EMITTERS TO BE 6" AWAY FROM HARDSCAPE EDGE TO AVOID OVER-SPRAY.

CONTAINER SIZE	**IN-LINE DRIP TUBING PLACEMENT** (FROM CENTER OF PLANT)
#1	3"
#5	4"
#15	5"
24" BOX	5" AND 10" (2 LOOPS)

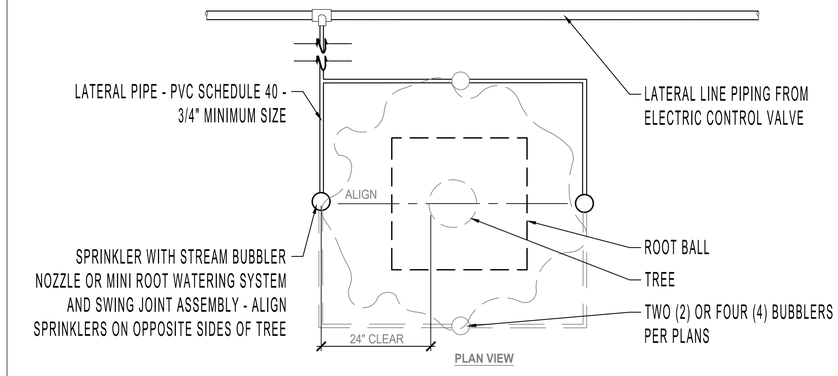
NOTES

1. REFER TO EQUIPMENT LEGEND FOR DRIPLINE AND PLANT MATERIAL ASSIGNMENT.
2. REFER TO STATION CALLOUTS ON PLAN SHEETS FOR SPECIFIC VALVE PERFORMANCE REQUIREMENTS AND CONFIGURATION OF DRIPLINE.
3. PROVIDE COUPLING FITTING (UNIVERSAL NUT LOCK) - WHERE REQUIRED.
4. REFER TO MANUFACTURER FOR DRIPLINE MAXIMUM LATERAL LENGTHS.

DRIPLINE SYSTEM LAYOUT - TYPICAL | 5

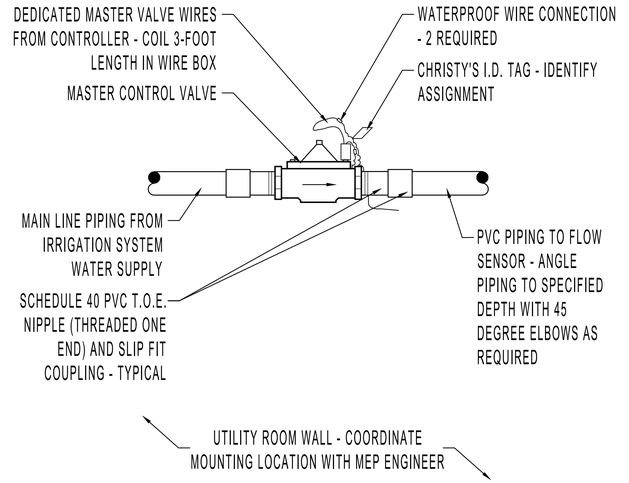


PLAN VIEW

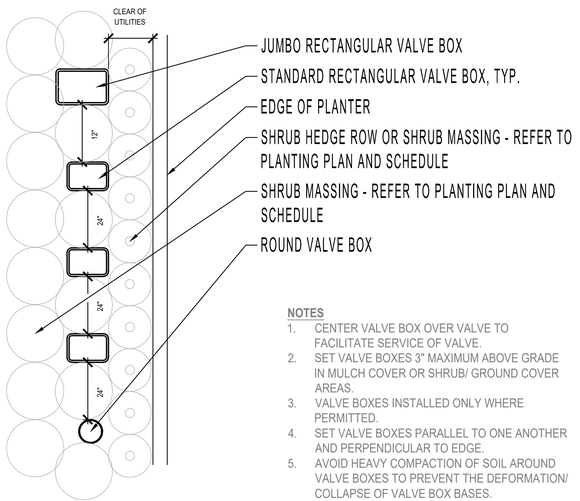
NOTES

1. ALIGN SPRINKLER HEADS FACING VINES ON PALM WHERE INSTALLED.
2. INSTALL FOUR (4) SPRINKLERS PER PALM AND INSTALL TWO (2) SPRINKLERS PER NON-PALM TREE.

TREE SPRINKLER LAYOUT | 3



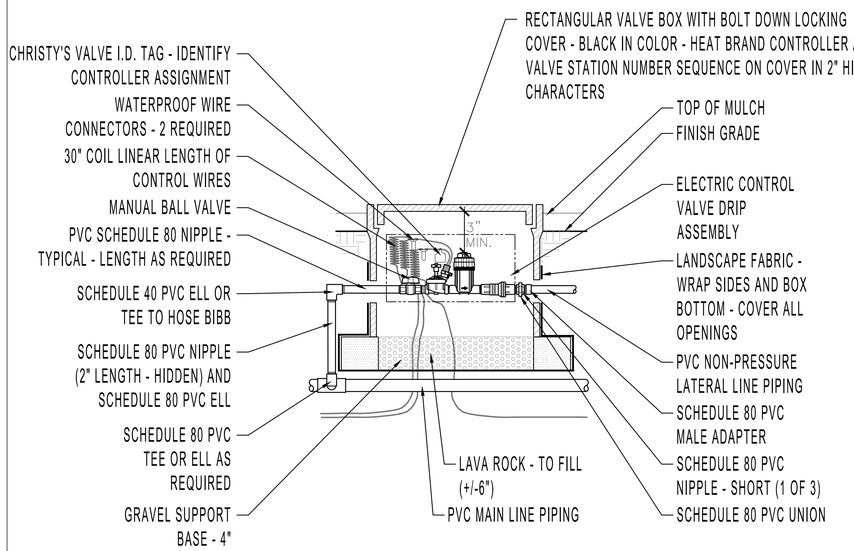
MASTER CONTROL VALVE | 1



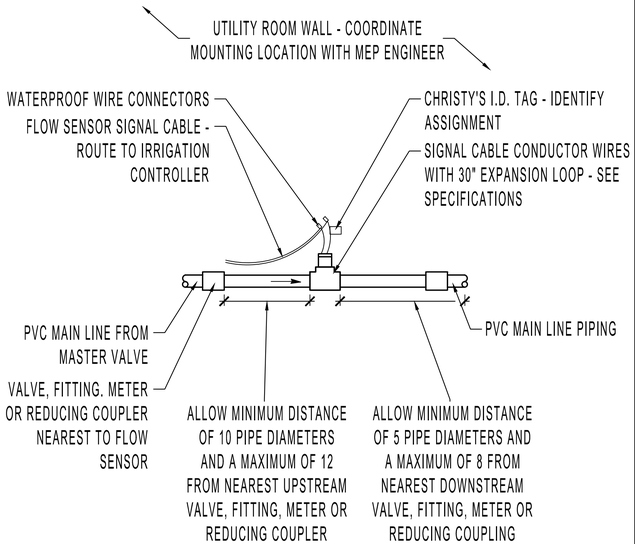
NOTES

1. CENTER VALVE BOX OVER VALVE TO FACILITATE SERVICE OF VALVE.
2. SET VALVE BOXES 3" MAXIMUM ABOVE GRADE IN MULCH COVER OR SHRUB/ GROUND COVER AREAS.
3. VALVE BOXES INSTALLED ONLY WHERE PERMITTED.
4. SET VALVE BOXES PARALLEL TO ONE ANOTHER AND PERPENDICULAR TO EDGE.
5. AVOID HEAVY COMPACTION OF SOIL AROUND VALVE BOXES TO PREVENT THE DEFORMATION/ COLLAPSE OF VALVE BOX BASES.
6. SHRUB ROWS SHALL KEEP CONTINUITY WHEREVER PLANTED.

VALVE BOX LAYOUT (AT GRADE PLANTING) | 6



DRIP VALVE STATION | 4



IRRIGATION FLOW SENSOR | 2

ZONING ADJUSTMENTS BOARD

NOTICE OF PUBLIC HEARING

2298 Durant Avenue and 2360 Ellsworth Street

Use Permit #ZP2024-0126 to demolish a commercial building, a residential building with 7 dwelling units, and associated parking; merge two lots; and build an eight-story (92 foot), 80,000 square-foot residential building, with 65 units (5 Very-Low Income, 2 Low-Income), utilizing a State Density Bonus.

The Zoning Adjustments Board of the City of Berkeley will hold a public hearing on the above matter, pursuant to Zoning Ordinance, Section 23.404.050 (Public Hearings and Decisions)

When: Thursday, October 30, 2025, 7:00 pm
Where: Berkeley Unified School District meeting room, 1231 Addison Street, (wheelchair accessible) with remote/hybrid option (via Zoom).

Please visit: https://berkeleyca.gov/your-government/boards-commissions/zoning-adjustments-board and click on the hearing date to access the most up-to-date meeting information, or call the Land Use Planning division (510) 981-7410.

PUBLIC ADVISORY: THIS MEETING WILL BE CONDUCTED IN A HYBRID MODEL WITH BOTH IN-PERSON ATTENDANCE AND VIRTUAL PARTICIPATION AVAILABLE FOR MEMBERS OF THE PUBLIC.

For in-person attendees, face coverings or masks that cover both the nose and mouth are encouraged. If you're feeling sick, please do not attend the meeting in-person as a public health precaution.

Currently, there are no physical distancing requirements in place by the State of California or the Local Health Officer for an indoor event similar to a Commission meeting. However, all attendees are requested to be respectful of the personal space of other attendees. An area of the public seating area will be designated as "distanced seating" to accommodate persons that need to distance for personal health reasons.

Land Use Planning Division
1947 Center Street, Second Floor, Berkeley, CA 94704 Tel: 510.981.7410 TDD: 510.981.7474 Fax: 510.981.7420
E-mail: zab@berkeleyca.gov

A. Land Use Designations:

- General Plan: Residential Mixed Use (RMU)
- Zoning: Residential Southside Mixed Use (R-SMU)

B. Zoning Permits Required:

- **Demolition.** BMC Section 23.326.020(B) **"General Requirements"** to demolish a dwelling.
- **Demolition.** BMC Section 23.326.030(A)(3) **"Eliminating Dwelling Units through Demolition"** to demolish a building constructed before June 1980 on a property containing two or more dwelling units.
- **Demolition.** BMC Section 23.326.070(A) **"Main Non-Residential Building"** to demolish a non-residential building.
- **New Construction.** BMC Section 23.202.020 (A) **"Allowed Land Uses"** to construct a multi-family use.
- **Height Projection** BMC Section 23.304.050 (A) "**Projections Above Height Limits"** exceed height limit with a rooftop projection.
- **Fence** BMC Section 23.304.080(A) "**Permits Required**"

C. Concessions and Waivers Requested Pursuant to State Density Bonus Law (California Government Code Section 65915):

- Concession from the healthcare requirement of the "HARD HATS" ordinance (BMC Section 13.107.050).
- Concession from the prevailing wage requirements of the Southside Plan Area (BMC Section 13.108.030).
- Waiver to provide 1,579 sq. ft. of Useable Open Space where 3,159 sq. ft. is required, and it will only consist of indoor amenity space (BMC Section 23.304.090(D) "**Southside Plan Area Shared Indoor Residential Amenities**").
- Waiver to provide no landscaped Useable Open Space, where 40 percent of required outdoor Useable Open Space must be landscaped.
- Waiver to exceed the 85-foot height limit and permit a 92-foot building.
- Waiver to provide no long-term bicycle parking, where 99 long-term spaces are required.
- Waiver to remove the camphor street tree on Durant Avenue; where street tree removal requires the City Arborist's approval.

D. CEQA Exemption Determination: Categorically exempt pursuant to Section 15332 of the CEQA Guidelines ("In-Fill Development Projects").

E. Project Recommendation: Approve Use Permit #ZP2024-0126, pursuant to BMC Section 23.406.040(E) "**Findings for Approval**."

F. Parties Involved:

- Applicant Austin Springer, Studio KDA
- Property Owner Valiance Capital, LLC

Further Information:
All application materials are available online at:
https://aca.cityofberkeley.info/CitizenAccess/Welcome.aspx.

The Zoning Adjustments Board final agenda and staff reports will be available online 6 days prior to this meeting at: https://berkeleyca.gov/your-government/boards-commissions/zoning-adjustments-board.

Questions about the project should be directed to the project planner, Allison Riemer, at (510) 981-7433 or ariemer@berkeleyca.gov.

Written comments or a request for a Notice of Decision should be directed to the Zoning Adjustments Board Secretary at zab@berkeleyca.gov.

Communication Disclaimer:
Communications to Berkeley boards, commissions or committees are public record and will become part of the City's electronic records, which are accessible through the City's website. **Please note: e-mail addresses, names, addresses, and other contact information are not required, but if included in any communication to a City board, commission or committee, will become part of the public record.** If you do not want your e-mail address or any other contact information to be made public, you may deliver communications via U.S. Postal Service or in person to the secretary of the relevant board, commission or committee. If you do not want your contact information included in the public record, please do not include that information in your communication. Please contact the secretary to the relevant board, commission or committee for further information.

Written Comments, Communications, and Reports:
Written comments must be directed to the ZAB Secretary at the Land Use Planning Division (Attn: ZAB Secretary), or via e-mail to: zab@berkeleyca.gov. All materials will be made available via the Zoning Adjustments Board Agenda page online at this address: https://berkeleyca.gov/your-government/boards-commissions/zoning-adjustments-board

All persons are welcome to attend the hearing and will be given an opportunity to address the Board. Comments may be made verbally at the public hearing and/or in writing before the hearing. The Board may limit the time granted to each speaker.

Correspondence received by 5:00 PM, eight days before this public hearing, will be provided with the agenda materials provided to the Board. Note that if you submit a hard copy document of more than 10 pages, or in color, or with photos, you must provide 15 copies. Correspondence received after this deadline will be conveyed to the Board in the following manner:

- **Correspondence received by 5:00 PM, two days before** this public hearing, will be conveyed to the Board in a Supplemental Communications and Reports #1, which is released around noon one day before the public hearing.
- **Correspondence received by 12:00 PM, the day of** this public hearing, will be conveyed to the Board in a Supplemental Communications and Reports #2, which is released around noon the day of the public hearing.
- **Correspondence received after 12:00 PM, the day of** this public hearing will be saved in the project administrative record.

Accessibility Information / ADA Disclaimer:
To request a disability-related accommodation(s) to participate in the meeting, including auxiliary aids or services, please contact the Disability Services specialist at 981-6342 (V) or 981-6345 (TDD) at least three business days before the meeting date.

SB 343 Disclaimer:
Any writings or documents provided to a majority of the Commission regarding any item on this agenda will be made available to the public. Please contact the Land Use Planning Division (zab@berkeleyca.gov) to request hard-copies or electronic copies.

Notice Concerning Your Legal Rights:
If you object to a decision by the Zoning Adjustments Board regarding a land use permit project, the following requirements and restrictions apply:

1. If you challenge the decision of the City in court, you may be limited to raising only those issues you or someone else raised at the public hearing described in this notice.
2. You must appeal to the City Council within 14 days after the Notice of Decision of the action of the Zoning Adjustments Board is mailed. It is your obligation to notify the Land Use Planning Division in writing of your desire to receive a Notice of Decision when it is completed.
3. Pursuant to Code of Civil Procedure Section 1094.6(b) and Government Code Section 65009(c)(1), no lawsuit challenging a City Council decision, as defined by Code of Civil Procedure Section 1094.6(e), regarding a use permit, variance or other permit may be filed more than 90 days after the date the decision becomes final, as defined in Code of Civil Procedure Section 1094.6(b). Any lawsuit not filed within that 90-day period will be barred.
4. Pursuant to Government Code Section 66020(d)(1), notice is hereby given to the applicant that the 90-day protest period for any fees, dedications, reservations, or other exactions included in any permit approval begins upon final action by the City, and that any challenge must be filed within this 90-day period.
5. If you believe that this decision or any condition attached to it denies you any reasonable economic use of the subject property, was not sufficiently related to a legitimate public purpose, was not sufficiently proportional to any impact of the project, or for any other reason constitutes a “taking” of property for public use without just compensation under the California or United States Constitutions, the following requirements apply:
    a. That this belief is a basis of your appeal.
    b. Why you believe that the decision or condition constitutes a "taking" of property as set forth above.
    c. All evidence and argument in support of your belief that the decision or condition constitutes a “taking” as set forth above. If you do not do so, you will waive any legal right to claim that your property has been taken, both before the City Council and in court.

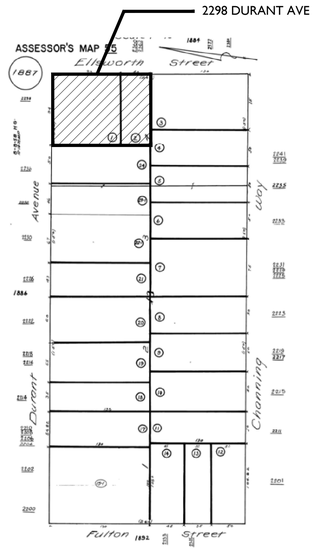
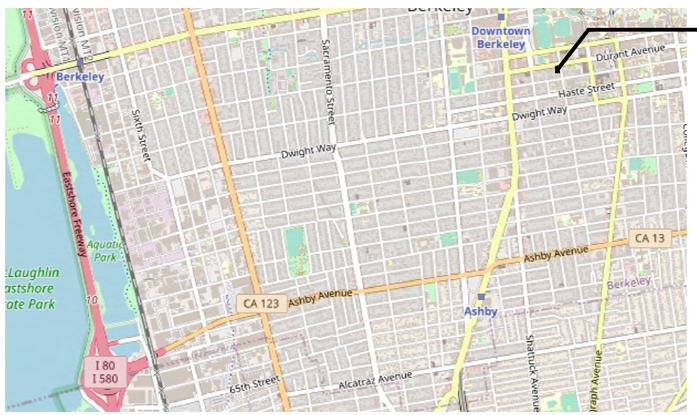
7 PROJECT TEAM



3 ASSESSORS PARCEL MAP

5 LOCATION MAP
N.T.S.



4 VICINITY MAP
N.T.S.

THE SITE'S REDEVELOPMENT WILL INCLUDE THE DEMOLITION OF BOTH EXISTING BUILDINGS AT 2298 DURANT AVE (A 2-STORY COMMERCIAL BUILDING) AND AT 2360 ELLSWORTH STREET (A 3-STORY RESIDENTIAL BUILDING OVER A 1-STORY PARTIALLY SUBTERRANEAN PARKING GARAGE). THE TWO EXISTING LOTS WILL BE MERGED INTO ONE CONTIGUOUS LOT WHOSE FRONT IS ALONG DURANT AVE AND WILL TAKE THE ADDRESS OF 2298 DURANT AVE.

PROPOSED IS AN 8-STORY RESIDENTIAL BUILDING, CONSISTING OF 65 UNITS AND 80,046 GSF OF BUILDING AREA. UNITS INCLUDE 2, 5, & 6 BEDROOM UNITS - ALL WITH IN-UNIT LAUNDRY. THE GROUND FLOOR INCLUDES A GENEROUS LOBBY, TENANT AMENITY SPACES, AND BUILDING UTILITY SPACES FOR ELECTRICAL AND TRASH THAT EXIT DIRECTLY TO ELLSWORTH STREET. OTHER COMMON SPACES INCLUDE AN INDOOR AMENITY AT THE GROUND FLOOR AND A ROOF DECK AT THE 8TH FLOOR.

VICINITY MAP

BASIS OF BEARINGS:

THE LINE IN DURANT AVENUE BETWEEN THE STANDARD CITY FOR BERKELEY MONUMENT FOUND AT ELLSWORTH STREET AND THE INTERSECTION OF THE REFERENCE POINTS AT FULTON STREET WAS TAKEN AS N83°00'00"E, PROJECTED AS SHOWN ON PARCEL MAP NO. 10100, FILED IN BOOK 320 OF MAPS, AT PAGES 96 THROUGH 100, ALAMEDA COUNTY RECORDS.

VERTICAL DATUM / BENCHMARK:

ELEVATIONS FOR THIS SURVEY ESTABLISHED BY HOLDING THE ELEVATION OF 211.60' ON THE TOP OF A 3/8^{ins} INCH BRASS PIN IN A MONUMENT WELL FOUND AT THE INTERSECTION OF ELLSWORTH STREET AND DURANT AVENUE, AS SHOWN ON THIS MAP. THIS MONUMENT WAS TAKEN AS CITY OF BERKELEY MONUMENT B0401, HELD PER CORNER RECORD 7052 AND CITY SURVEYOR'S NOTES AS CITY OF BERKELEY DATUM.
ELEVATION = 211.60' COB DATUM

TITLE REPORT NOTE:

THE INFORMATION REGARDING EXISTING EASEMENTS OR OTHER ENCUMBRANCES SHOWN ON THIS SURVEY IS BASED ON FIRST AMERICAN TITLE INSURANCE COMPANY PRELIMINARY TITLE REPORTS PROVIDED TO THE SURVEYOR, THE FIRST HAVING ORDER NUMBER NCS-1183023-CC, DATED MAY 31, 2023, AND THE SECOND HAVING ORDER NUMBER NCS-1177886, AMENDED, DATED APRIL 11, 2023, THERE MAY BE EASEMENTS OR OTHER ENCUMBRANCES OF RECORD THAT EXIST BUT ARE NOT DELINEATED HEREON.

UTILITIES NOTE:

INFORMATION SHOWN ON THIS SURVEY REGARDING EXISTING UTILITIES IS APPROXIMATE ONLY, IS BASED ON VISUAL OBSERVATIONS AND/OR UTILITY COMPANY RECORDS, AND HAS NOT BEEN VERIFIED AS BEING COMPLETE OR CORRECT. THE ENGINEER ASSUMES NO RESPONSIBILITY FOR THE ACCURACY OR COMPLETENESS OF THE EXISTING UTILITY INFORMATION SHOWN HEREON, NOR FOR THE PRESENCE OF OTHER UTILITIES WHICH MAY EXIST BUT ARE NOT SHOWN ON THIS SURVEY.

ALL IDEAS, DESIGNS, ARRANGEMENTS AND PLANS INDICATED ON THIS DRAWING ARE OWNED BY AND THE PROPERTY OF THE OFFICE AND WERE CREATED, EVOLVED AND DEVELOPED FOR USE ON AND IN CONNECTION WITH THE SPECIFIED PROJECT. NONE OF SUCH IDEAS, DESIGNS, ARRANGEMENTS OR PLANS SHALL BE USED BY OR DISCLOSED TO ANY PERSON, FIRM OR CORPORATION FOR ANY PURPOSE WHATSOEVER WITHOUT THE WRITTEN PERMISSION OF GREENWOOD & MOORE, INC.

WRITTEN DIMENSIONS ON THESE DRAWINGS SHALL HAVE PRECEDENCE OVER SCALE DIMENSIONS. CONTRACTORS SHALL VERIFY AND BE RESPONSIBLE FOR ALL DIMENSIONS AND CONDITIONS ON THE JOB. THIS OFFICE MUST BE NOTIFIED OF ANY VARIATION FROM THE DIMENSIONS AND CONDITIONS SHOWN BY THESE DRAWINGS. SHOP DETAILS OF ADEQUATE SCALE MUST BE SUBMITTED TO THIS OFFICE FOR APPROVAL BEFORE PROCEEDING WITH FABRICATION ON THE ITEMS SO NOTED.

GENERAL NOTES:

1. THESE PLANS AND SPECIFICATIONS ARE SUBJECT TO MODIFICATION DURING CONSTRUCTION WHEN CONDITIONS DEVELOP THAT WERE NOT APPARENT DURING THE DESIGN AND PREPARATION OF THESE PLANS. ALL MODIFICATIONS MUST BE APPROVED BY THE CITY ENGINEER PRIOR TO CONSTRUCTION AND/OR IMPLEMENTATION.
2. ALL IMPROVEMENTS SHALL BE CONSTRUCTED IN ACCORDANCE WITH THE CITY OF BERKELEY STANDARD SPECIFICATIONS AND DETAILS SUBJECT TO THE INSPECTION AND APPROVAL OF THE ENGINEERING DIVISION OF THE PUBLIC WORKS DEPARTMENT. ALL REVISIONS MUST BE APPROVED BY THE CITY PRIOR TO CONSTRUCTION.
3. PRIOR TO COMMENCEMENT OF CONSTRUCTION, A PRE-JOB CONFERENCE SHALL BE REQUESTED BY THE DEVELOPER THROUGH THE CITY ENGINEER,
4. BEFORE COMMENCEMENT OF WORK, THE CONTRACTOR SHALL REVIEW ALL PLANS AND SPECIFICATIONS AND THE JOB SITE. THE CONTRACTOR WILL NOTIFY THE OWNER, THE ENGINEER WHO PREPARED THE PLANS, AND THE CITY ENGINEER OF ANY DISCREPANCIES THAT MAY REQUIRE MODIFICATION TO THESE PLANS OR OF ANY FIELD CONFLICTS.
5. APPROVAL OF THESE PLANS BY THE CITY ENGINEER SHALL NOT RELIEVE THE DEVELOPER OR THE ENGINEER FROM THE RESPONSIBILITY FOR THE DESIGN OF THE IMPROVEMENTS AND FOR ANY DEFICIENCIES RESULTING FROM THE DESIGN THEREOF.
7. ALL LANDSCAPING IS SUBJECT TO CITY INSPECTION. ANY CHANGE IN THE APPROVED LANDSCAPE PLAN MUST BE APPROVED BY THE CITY'S DESIGN REVIEW STAFF.
8. SHOULD IT APPEAR THAT THE WORK TO BE DONE OR ANY MATTER RELATIVE THERETO IS NOT SUFFICIENTLY DETAILED OR EXPLAINED ON THESE PLANS, THE CONTRACTOR SHALL CONTACT THE PROJECT ENGINEER FOR SUCH FURTHER EXPLANATIONS AS MAY BE NECESSARY.
9. IN ACCORDANCE WITH GENERALLY ACCEPTED CONSTRUCTION PRACTICES, THE CONTRACTOR WILL BE REQUIRED TO ASSUME SOLE AND COMPLETE RESPONSIBILITY FOR JOB SITE CONDITIONS DURING THE COURSE OF CONSTRUCTION OF THE PROJECT, INCLUDING SAFETY OF ALL PERSONS AND PROPERTY. THIS REQUIREMENT SHALL BE MADE TO APPLY CONTINUOUSLY AND NOT BE LIMITED TO NORMAL WORKING HOURS. THE CONTRACTOR FURTHER AGREES TO DEFEND, INDEMNIFY, AND HOLD THE CITY, THE OWNER, AND DESIGN PROFESSIONAL HARMLESS FROM ANY AND ALL LIABILITY, REAL OR ALLEGED, IN CONNECTION WITH THE PERFORMANCE OF WORK ON THIS PROJECT, EXCEPT FOR LIABILITY ARISING FROM THE SOLE NEGLIGENCE OF THE OWNER OR DESIGN PROFESSIONAL.
10. THE CONTRACTOR'S ATTENTION IS DIRECTED TO THE REQUIREMENTS OF THE DIVISION OF INDUSTRIAL SAFETY PERTAINING TO "CONFINED SPACES". ANY MANHOLE, CULVERT, DROP INLET OR TRENCH WHICH COULD CONTAIN AIR WHICH IS NOT READILY VENTILATED MAY BE CONSIDERED A "CONFINED SPACE". THE CONTRACTOR SHALL PROVIDE THE NECESSARY SAFETY OR TESTING EQUIPMENT AND PERSONNEL.
11. THE CONTRACTOR SHALL BE HELD RESPONSIBLE FOR ANY AND ALL DAMAGE TO EXISTING STRUCTURES AND/OR UTILITIES DURING CONSTRUCTION, PROPER REPAIR SHOULD BE DONE TO THE SATISFACTION OF THE REPRESENTATIVE OF THE CITY ENGINEER.
12. TO THE EXTENT FEASIBLE, SCHEDULE THE NOISIEST CONSTRUCTION ACTIVITIES DURING TIMES THAT WOULD HAVE THE LEAST IMPACT ON ADJACENT PROPERTIES. THIS WOULD INCLUDE RESTRICTING TYPICAL DEMOLITION AND EXTERIOR CONSTRUCTION ACTIVITIES TO STANDARD HOURS OF 7:00 AM TO 5:30 PM MONDAY THROUGH FRIDAY AND 8:00 AM TO 4:30 PM ON SATURDAY. THE CONTRACTOR SHALL ENSURE THAT ALL EQUIPMENT POWERED BY INTERNAL COMBUSTION ENGINES ARE FITTED EFFECTIVELY WITH MUFFLERS IN GOOD OPERATING CONDITION. WHERE FEASIBLE, NOISE GENERATING EQUIPMENT SHOULD BE STAGED AS FAR AWAY FROM EXISTING RESIDENCES, AND MOBILE EQUIPMENT SHOULD NOT BE ALLOWED TO IDLE UNNECESSARILY NEAR THE RESIDENTIAL OR CHILD CARE USES. THE CONTRACTOR SHALL COORDINATE CONSTRUCTION ACTIVITIES THAT GENERATE NOISE WITH THE OWNER.
13. CONTRACTOR SHALL OBTAIN ENCROACHMENT PERMITS FROM THE CITY OF BERKELEY PUBLIC WORKS PRIOR TO COMMENCING CONSTRUCTION INVOLVING THEIR RIGHT-OF-WAY, AND FOR THE CONSTRUCTION, MODIFICATION, OR CONNECTION TO DEPARTMENT OR DISTRICT-MAINTAINED FACILITIES. ALL WORKMANSHIP, EQUIPMENT AND MATERIALS SHALL CONFORM TO DEPARTMENT STANDARDS AND SPECIFICATIONS.
14. THE FORMS FOR CONCRETE SIDEWALKS, CURBS, GUTTERS AND DRIVEWAYS THAT ARE TO BE CONSTRUCTED TO CONFORM TO EXISTING ROADS SHALL BE INSTALLED TO THE GRADES SHOWN UPON THESE PLANS. PRIOR TO PLACING CONCRETE, THE FORMS SHALL BE INSPECTED AND APPROVED BY THE CITY ENGINEER FOR CONFORMANCE TO EXISTING ROAD IMPROVEMENTS. GRADES OF NEW IMPROVEMENTS ARE SUBJECT TO FIELD ADJUSTMENT TO FIT CONDITIONS.
15. THE PROPOSED STREET STRUCTURAL SECTION IS TO BE DESIGNED BY A REGISTERED CIVIL ENGINEER AND APPROVED BY THE CITY ENGINEER.
16. IN CONFORM AREAS, IF FULL STRUCTURAL SECTION IS NOT FOUND AT THE APPARENT EDGE OF PAVEMENT, FURTHER STREET EXCAVATION WILL BE REQUIRED UNTIL THE FULL SECTION IS ENCOUNTERED.
17. TEMPORARY REPAIRS TO ALL TRENCHES WITHIN THE TRAVELED WAY ON EXISTING ROADS SHALL BE MADE WITHIN TWENTY-FOUR (24) HOURS OF TRENCH OPENING. MINIMUM TEMPORARY REPAIRS SHALL CONSIST OF BACKFILLING AND COMPACTING 6" OF AGGREGATE BASE AND 1" OF TEMPORARY ASPHALTIC SURFACING. PERMANENT REPAIRS, INCLUDING RESTORATION OF THE EXISTING STRUCTURAL SECTION SHALL BE MADE WITHIN FIFTEEN (15) DAYS OF TRENCH OPENING.
18. IN THE EVENT OF ANY DISCREPANCY BETWEEN ANY DRAWING AND THE FIGURES WRITTEN THEREON, THE FIGURES SHALL BE TAKEN AS CORRECT.
19. THE CONTRACTOR SHALL POST EMERGENCY TELEPHONE NUMBERS AT THE JOB SITE FOR THE CONTRACTOR AND PUBLIC WORKS AGENCY.
20. THE CONTRACTOR SHALL PROVIDE FOR INGRESS AND EGRESS TO PRIVATE PROPERTY ADJACENT TO THE WORK THROUGHOUT THE PERIOD OF CONSTRUCTION.
21. THE CONTRACTOR SHALL NOT DISTURB ANY PERMANENT SURVEY POINTS WITHOUT THE CONSENT OF THE CITY ENGINEER. ANY POINTS DESTROYED SHALL BE REPLACED BY A LICENSED SURVEYOR AT THE CONTRACTOR'S EXPENSE.
22. THE CONTRACTOR IS RESPONSIBLE FOR MATCHING EXISTING FACILITIES TO AVOID ANY ABRUPT OR APPARENT CHANGES IN GRADES OR CROSS SLOPES, LOW SPOTS, OR HAZARDOUS CONDITIONS.
23. CONTRACTOR SHALL SALVAGE AND RELOCATE EXISTING STREET SIGNS AND INSTALL NEW SIGNS PER CITY OF BERKELEY SPECIFICATIONS AS REQUIRED.
24. WHERE UNSTABLE OR UNSUITABLE MATERIALS ARE ENCOUNTERED DURING SUB-GRADE PREPARATION, THE AREA IN QUESTION SHALL BE OVER EXCAVATED AND REPLACED BY SELECT BACKFILL MATERIAL AS DIRECTED IN THE FIELD BY THE ENGINEER.
25. ALL TRENCH EXCAVATION AND BACKFILL SHALL BE IN ACCORDANCE WITH THE TRENCH BACKFILL DETAIL, SHOWN ON THESE PLANS.
26. ALL TREES LOCATED WITHIN THE ROADWAY PRISM OR SHOWN TO BE REMOVED IN THE STREET RIGHT-OF-WAY OR EASEMENTS SHALL BE REMOVED COMPLETELY, INCLUDING ROOTS, AND HAULED AWAY.
27. THE CONTRACTOR SHALL NOT REMOVE, DISTURB, OR HARM, IN ANY WAY, ANY TREE NOT SPECIFICALLY DESIGNATED AND APPROVED BY THE INSPECTOR FOR REMOVAL.
28. COMPACTION TESTS SHALL BE PERFORMED ON ALL TRENCHES AND STREET WORK TO VERIFY THAT COMPACTION CONFORMS TO CITY STANDARDS. ALL TESTING WILL BE AT THE DEVELOPER OR CONTRACTOR'S EXPENSE.
29. THE DUTIES OF THE CITY ENGINEER AND PROJECT ENGINEER DO NOT INCLUDE THE ADEQUACY OF THE CONTRACTOR'S SAFETY IN, ON, OR NEAR THE CONSTRUCTION SITE.
30. THE CONTRACTOR SHALL COMPLY WITH THE RULES AND REGULATIONS OF THE STATE CONSTRUCTION SAFETY ORDERS. ALL TRENCHES OVER FIVE FEET IN DEPTH SHALL BE SHORED IN ACCORDANCE WITH CAL-OSHA "CONSTRUCTION SAFETY ORDERS" CURRENT EDITION. CONTRACTOR MUST HAVE VALID TRENCH SHORING PERMIT ISSUED BY CAL-OSHA.
31. TRAFFIC CONTROL SHALL BE PROVIDED IN ACCORDANCE WITH CALTRANS "MANUAL OF TRAFFIC CONTROLS FOR CONSTRUCTION AND MAINTENANCE WORK ZONES" CURRENT EDITION AND THESE PLANS. A TRAFFIC CONTROL PLAN WILL BE REQUIRED AND A PERMIT WILL BE REQUIRED TO IMPLEMENT IT. CONTRACTOR SHALL MEET WITH TRAFFIC AND PUBLIC WORKS TO DISCUSS PROJECT NEEDS AND PREPARE TRAFFIC CONTROL PLANS.
32. THE CONTRACTOR SHALL PROVIDE ALL LIGHTS, SIGNS, BARRICADES, FLAGMEN, OR OTHER DEVICES NECESSARY TO PROVIDE FOR PUBLIC SAFETY. SUBMIT LANE CLOSURE AND TRAFFIC CONTROL PLANS PRIOR TO BEGINNING WORK TO THE CITY ENGINEER FOR APPROVAL.
33. ALL UNDERGROUND UTILITIES WITHIN THE RIGHT-OF-WAY OR ACCESS EASEMENT, INCLUDING MAINS AND LATERALS, SHALL BE INSTALLED AND BACKFILL COMPLETED PRIOR TO THE START OF CURB, SIDEWALK AND PAVING CONSTRUCTION.
34. ALL TRENCH BACKFILL WITHIN THE RIGHT-OF-WAY SHALL BE COMPACTED AS SHOWN IN CITY'S STANDARD PLANS OR AS RECOMMENDED BY THE ENGINEER. IF TESTS SHOW THAT THE ACTUAL COMPACTION HAS NOT EQUALED OR SURPASSED THAT WHICH IS RECOMMENDED, THE ENGINEER SHALL PROVIDE THE PROPOSED ACTION TO BE TAKEN.
35. ALL NEW STORM DRAIN INLETS SHALL BE STENCILED OR STAMPED WITH CITY'S CLEAN WATER PROGRAM STANDARD LOGO, "NO DUMPING – DRAINS TO BAY," PRIOR TO THE ACCEPTANCE OF THE SITE IMPROVEMENTS OR THE FINAL BUILDING INSPECTION, WHICHEVER OCCURS FIRST.
36. CONTRACTOR SHALL NOTIFY UNDERGROUND SERVICE ALERT (USA) AT LEAST TWO WORKING DAYS PRIOR TO ANY EXCAVATION.
37. AN ENGINEERING PERMIT WILL BE REQUIRED FOR ANY WORK IN THE PUBLIC RIGHT-OF-WAY, INCLUDING BUT NOT LIMITED TO CONSTRUCTION STAGING, CONSTRUCTION PARKING, SIDEWALK, DRAINAGE, OR SEWER WORK. THE ENGINEERING PERMIT CAN BE ISSUED AFTER THE BUILDING PERMIT IS APPROVED AND ISSUED. APPROVAL OF THIS BUILDING PERMIT DOES NOT AUTHORIZE WORK IN THE PUBLIC RIGHT-OF-WAY.

DEMOLITION NOTES:

1. THE EXTENT OF DEMOLITION WORK IS TO BE AS SHOWN ON THIS PLAN. DEMOLITION INCLUDES COMPLETE WRECKING, REMOVAL AND DISPOSAL OF STRUCTURES, BURIED DEBRIS, FOUNDATIONS, PAVEMENT, CURBS, TREES & SHRUBS (INCLUDING ROOT SYSTEMS), DRAINAGE STRUCTURES, UTILITIES, SIGNAGE, LANDSCAPING AND/OR IRRIGATION SYSTEM, UNLESS OTHERWISE INDICATED ON THIS PLAN OR OTHERWISE DIRECTED BY THE OWNER OR HIS REPRESENTATIVE. EXISTING PERIMETER FENCES ARE TO REMAIN UNLESS OTHERWISE DIRECTED BY THE OWNER OR HIS REPRESENTATIVE
2. THIS DEMOLITION PLAN IS NOT INTENDED TO DETERMINE THE METHOD, DETAILS AND/OR MEANS OF PERFORMING THE DEMOLITION WORK. THIS PLAN MAKES NO INQUIRY OR DETERMINATION AS TO THE EXISTENCE OF HAZARDOUS OR TOXIC MATERIALS EXISTING ON SITE. IT IS RECOMMENDED THAT AN INDEPENDENT INQUIRY BE PERFORMED PRIOR TO DEMOLITION WORK TO DETERMINE THE EXISTENCE OF ANY POTENTIAL HAZARDOUS OR TOXIC RISK.
3. THE CONTRACTOR SHALL BE RESPONSIBLE FOR LOCATING ALL EXISTING UNDERGROUND UTILITIES, WHETHER SHOWN ON THESE PLANS OR NOT, PRIOR TO THE COMMENCEMENT OF ANY DEMOLITION WORK.
4. ALL EXISTING UTILITIES AND APPURTENANCES THERETO SERVING ANY EXISTING STRUCTURE OR BUILDINGS AND THOSE IN THE PUBLIC RIGHT OF WAY SERVING PUBLIC UTILITIES ARE TO REMAIN AND SHALL BE PROTECTED IN PLACE UNLESS DIRECTED TO BE REMOVED AND REPLACED ELSEWHERE ON THESE PLANS.
5. THE CONTRACTOR SHALL CONTACT ALL ASSOCIATED UTILITY SUPPLIERS PRIOR TO DEMOLITION TO COORDINATE THE DISCONNECTION AND REMOVAL OR ABANDONMENT OF UTILITIES (I.E. TELEPHONE, ELECTRICAL, WATER, SEWER, ETC.) SERVING THE STRUCTURE TO BE DEMOLISHED.
6. THE CONTRACTOR SHALL OBTAIN A LIST OF ITEMS TO BE SALVAGED FROM THE OWNER PRIOR TO COMMENCING THE DEMOLITION WORK.
7. THE FINISHED GROUND SURFACE SHALL BE LEFT IN A SMOOTH, UNIFORM GRADED CONDITION.
8. DEMOLITION OPERATIONS AND REMOVAL OF DEBRIS SHALL BE CONDUCTED IN A MANNER TO INSURE MINIMUM INTERFERENCE WITH STREETS, SIDEWALKS AND OTHER ADJACENT OCCUPIED OR UTILIZED FACILITIES.
9. THE CONTRACTOR SHALL INSURE THE SAFE PASSAGE OF PERSONS AROUND THE DEMOLITION AREA. CONDUCT OPERATIONS TO PREVENT DAMAGE TO ADJACENT BUILDINGS, STRUCTURES AND OTHER FACILITIES.
10. THE CONTRACTOR SHALL PROMPTLY REPAIR ANY DAMAGE CAUSED TO ADJACENT FACILITIES BY DEMOLITION OPERATIONS AT NO COST TO THE OWNER.
11. USE WATER SPRINKLING, TEMPORARY ENCLOSURES AND OTHER SUITABLE METHODS TO LIMIT DUST AND DIRT SCATTERING AND RISING IN AIR TO LOWEST PRACTICAL LEVEL. COMPLY WITH GOVERNING REGULATIONS PERTAINING TO ENVIRONMENTAL PROTECTION. CONTRACTOR IS RESPONSIBLE FOR CLEANLINESS OF ADJACENT STRUCTURES AND IMPROVEMENTS. SUCH IMPROVEMENTS SHALL BE KEPT FREE OF DUST, DIRT AND DEBRIS CAUSED BY DEMOLITION OPERATIONS. RETURN ADJACENT AREAS TO CONDITIONS EXISTING PRIOR TO START OF WORK.
12. DUST CONTROLS SHALL BE IMPLEMENTED DURING ALL DEMOLITION AND GRADING OPERATIONS. PUBLIC STREETS SHALL BE SWEPT CLEAN AS NECESSARY.
13. THE GENERAL CONTRACTOR SHALL BE RESPONSIBLE FOR ALL REQUIRED TRAFFIC CONTROL AND SAFETY ISSUES.
14. THE GENERAL CONTRACTOR SHALL BE RESPONSIBLE FOR ALL CONSTRUCTION COORDINATION WITH ALL ADJACENT PROPERTY OWNERS FOR WORK TO BE PERFORMED ON THEIR PROPERTIES.
15. THE GENERAL CONTRACTOR SHALL BE RESPONSIBLE FOR THE DESIGN AND INSTALLATION OF ALL REQUIRED TEMPORARY ACCESS DEVICES (TRENCH PLATES, FENCES, ETC) AS REQUIRED TO ALLOW ACCESS DURING THE COURSE OF CONSTRUCTION.
16. ALL DEMOLITION WORK SHALL BE IN ACCORDANCE WITH CITY SPECIFICATIONS AND STANDARDS.
17. FIELD VERIFY ALL UTILITY TERMINATION POINTS, SIZES AND LOCATIONS PRIOR TO CONSTRUCTION. ALL UTILITIES TO BE CAPPED, ABANDONED OR MODIFIED SHOULD BE "POTHOLED" TO CONFIRM THEIR SIZE, LOCATION AND CONFIGURATION PRIOR TO CONSTRUCTION.
18. GENERAL CONTRACTOR SHALL PROVIDE A UTILITY REMOVAL/RELOCATION PLAN FOR CLIENT'S REVIEW PRIOR TO CONSTRUCTION.

GRADING NOTES:

1. THE DEVELOPER SHALL, AT HIS SOLE EXPENSE, MAKE TESTS OVER THE SOIL ON WHICH THE ROAD SURFACING AND BASE IS TO BE CONSTRUCTED.
2. A REPRESENTATIVE OF THE SOILS ENGINEER SHALL BE ON THE SITE DURING GRADING OPERATIONS AND SHALL OBSERVE THE GRADING AND IDENTIFY ANY CONDITIONS THAT SHOULD BE CORRECTED AND RECOMMEND CORRECTIVE MEASURES TO THE CONTRACTOR AND THE CITY ENGINEER.
3. GRADING AT THE BOUNDARIES OF THIS PROJECT SHALL BE DONE SO AS NOT TO OBSTRUCT THE RUNOFF OF STORM WATERS FROM ADJACENT PROPERTIES. ALL GRADING SHALL BE DONE TO PROVIDE STABLE SLOPES WHICH SHALL DRAIN ONTO THIS PROJECT, WHICH IN TURN SHALL BE GRADED TO STREETS OR DRAINAGE DITCHES OR ACROSS LAND WITHIN THIS PROJECT, WHICH IN TURN SHALL BE GRADED TO STREETS OR TO DRAINAGE FACILITIES SHOWN ON THESE PLANS. GRADING SHALL BE DONE IN SUCH A MANNER THAT ALL NEW SLOPES SHALL DIRECT STORM WATER TO THE STREETS OR INTERCEPTION DITCHES OR ACROSS LAND WITHIN THIS PROJECT AND SHALL NOT DIVERT OR CREATE A MEANS FOR STORM WATER TO FLOW ONTO ADJACENT PROPERTIES, EXCEPT AS INDICATED ON THE PLANS.
4. GRADING SHALL NOT BE PERMITTED ON THE SITE UNTIL A GRADING PERMIT IS ISSUED IN ACCORDANCE WITH THE CITY OF BERKELEY GENERAL ORDINANCE AND CODES FOR GRADING, EROSION AND SEDIMENT CONTROLS.
5. ALL GRADING, EROSION AND SEDIMENTATION CONTROL AND RELATED WORK UNDERTAKEN ON THIS SITE IS SUBJECT TO ALL TERMS AND CONDITIONS OF THE GRADING ORDINANCE AND APPLICATION FOR GRADING.
6. IF GRADING ON THE SITE IS STARTED, CONTINUED OR ABANDONED BETWEEN OCTOBER FIRST AND APRIL FIFTEENTH OF ANY YEAR OF CONSTRUCTION, ALL EROSION AND SEDIMENT CONTROL IMPROVEMENTS AND PLANTING SHALL BE COMPLETED PRIOR TO OCTOBER FIRST.
7. CONTRACTOR SHALL KEEP EXISTING STREETS FREE FROM DIRT AND DEBRIS DURING ALL PHASES OF CONSTRUCTION TO THE SATISFACTION OF THE CITY ENGINEER. ALL TRASH, CONSTRUCTION DEBRIS, AND MATERIALS WILL BE CONTAINED ON SITE UNTIL DISPOSAL OFF-SITE CAN BE ARRANGED.
8. DUST CONTROL MEASURES AS APPROVED BY THE CITY ENGINEER SHALL BE FOLLOWED IN ALL AREAS UNDERGOING GRADING AND OTHER CONSTRUCTION ACTIVITIES.

THE GRADING WORK DEPICTED HEREON SHALL CONFORM TO THE RECOMMENDATIONS CONTAINED IN THE SOIL INVESTIGATION TITLED "GEOTECHNICAL INVESTIGATION PROPOSED RESIDENTIAL BUILDING 2298 DURANT AVENUE BERKELEY, CALIFORNIA."

PREPARED BY:
ROCKRIDGE GEOTECHNICAL
1350 OCEAN AVE.
EMERYVILLE, CA 94608
(510) 420-5738

9. WHERE SOIL OR GEOLOGIC CONDITIONS ENCOUNTERED IN GRADING OPERATIONS ARE DIFFERENT FROM THOSE ANTICIPATED IN THE SOIL AND GEOLOGIC INVESTIGATION REPORT, OR WHERE CONDITIONS WARRANT CHANGES TO THE RECOMMENDATIONS CONTAINED THEREIN, A REVISED SOIL OR GEOLOGIC REPORT SHALL BE SUBMITTED FOR APPROVAL AND SHALL BE ACCOMPANIED BY AN ENGINEERS OPINION AS TO THE SAFETY OF THE SITE FROM THE POSSIBILITY OF LAND SLIPPAGE, SETTLEMENT AND SEISMIC ACTIVITY.
10. THE PROJECT ENGINEER AND GEOLOGIST SHALL PROVIDE A DECLARATION STATING THAT ALL WORK WAS DONE IN ACCORDANCE WITH THE APPROVED PLANS AND SPECIFICATIONS AND THE RECOMMENDATIONS CONTAINED IN THE SOIL AND GEOLOGIC REPORT.
11. THE SOILS ENGINEER SHALL BE NOTIFIED AT LEAST TWO (2) WORKING DAYS PRIOR TO PLACEMENT OF FILL SO THAT ARRANGEMENTS FOR INSPECTION CAN BE MADE.
12. THE CONTRACTOR SHALL ARRANGE A PRE-CONSTRUCTION MEETING WITH THE CITY ENGINEER BEFORE THE START OF CONSTRUCTION. THE CONTRACTOR SHALL CONTACT THE REVIEW ENGINEER AT (510) 581-2772 TO ARRANGE A TIME FOR THE MEETING.
13. OPERATIONS SHALL CEASE IN THE VICINITY OF ANY SUSPECTED ARCHAEOLOGICAL RESOURCE UNTIL AN ARCHAEOLOGIST IS CONSULTED AND HIS OR HER RECOMMENDATIONS FOLLOWED, SUBJECT TO APPROVAL BY THE PLANNING DIRECTOR. IF EVIDENCE OF HUMAN REMAINS IS DISCOVERED ON THE SITE, THE COUNTY CORONER SHALL BE NOTIFIED IMMEDIATELY.
14. ANY WATER WELL, CATHODIC PROTECTION WELL OR EXPLORATORY BORING THAT IS SHOWN ON THESE PLANS, IS KNOWN TO EXIST, IS PROPOSED OR IS LOCATED DURING THE COURSE OF FIELD OPERATIONS MUST BE PROPERLY DESTROYED, BACKFILLED OR MAINTAINED IN ACCORDANCE WITH THECITY OF BERKELEY REGULATIONS.
15. EXISTING UNDERGROUND FACILITIES AS SHOWN ARE APPROXIMATE ONLY AND WERE OBTAINED FROM AVAILABLE UTILITY RECORDS. THE PROJECT ENGINEER ASSUMES NO RESPONSIBILITY FOR THE ACCURACY OR COMPLETENESS OF EXISTING UTILITY INFORMATION. IT SHALL BE THE CONTRACTOR'S RESPONSIBILITY TO CONTACT ALL LOCAL UTILITIES AND TO HAVE ALL FACILITIES LOCATED AND EXPOSED TO VERIFY THE CLEARANCE AT NEW PIPE CROSSINGS PRIOR TO THE START OF NEW PIPELINE CONSTRUCTION.

FIRE PROTECTION AND DOMESTIC WATER NOTES:

1. ALL DOMESTIC WATER LINES 4" AND LARGER SHALL BE C900, CLASS 200 PIPE. DOMESTIC WATER LINES SMALLER THAN 4" SHALL BE PVC SCHEDULE 80.
2. EBMUD SPECIFICATIONS AND STANDARDS ARE INCORPORATED HEREON BY REFERENCE. ALL DOMESTIC AND FIRE WATER LINE CONSTRUCTION FROM THE CONNECTION TO THE MAIN TO THE BACKFLOW/DOUBLE DETECTOR CHECK VALVE SHALL BE INSTALLED PER EBMUD STANDARDS AND SPECIFICATIONS.
3. AN EBMUD PERMIT IS REQUIRED FOR CONNECTIONS TO EBMUD FACILITIES.
4. ALL EXISTING WATER SERVICES TO BE ABANDONED SHALL BE DONE PER EBMUD STANDARDS AND SPECIFICATIONS.
5. INSTALL LOCATOR WIRE DIRECTLY ON TOP OF THE PIPE AND MAGNETIC TAPE WITHIN 12" ABOVE ALL PLASTIC WATER PIPES.
6. THE FIRE SYSTEM DESIGN SHOWN ON THESE PLANS ARE FOR GENERAL PURPOSES ONLY. REFER TO FIRE SYSTEM SHOP DRAWINGS AND SPECIFICATIONS, BY GENERAL CONTRACTOR, FOR ADDITIONAL INFORMATION.

UTILITY NOTES:

1. FIELD VERIFY ALL UTILITY TERMINATION POINTS, SIZES AND LOCATIONS PRIOR TO CONSTRUCTION. ALL UTILITIES TO BE CAPPED, ABANDONED OR MODIFIED SHOULD BE "POTHOLED" TO CONFIRM THEIR SIZE, LOCATION AND CONFIGURATION PRIOR TO CONSTRUCTION.
2. GENERAL CONTRACTOR SHALL PROVIDE A UTILITY REMOVAL/RELOCATION PLAN FOR CLIENT'S REVIEW PRIOR TO CONSTRUCTION.
3. IT IS RECOMMENDED THAT ALL EXISTING UTILITIES THAT ARE TO BE REMOVED, RELOCATED, MODIFIED OR IMPACTED BY THE PROPOSED CONSTRUCTION BE FIELD LOCATED BY THE GENERAL CONTRACTOR PRIOR TO THE START OF CONSTRUCTION. THE INTENT OF THE UTILITY DESIGN IS TO CONTINUE TO USE THE MAJORITY OF THE EXISTING UTILITIES. THE LOCATION OF MOST OF THE UTILITIES ARE UNKNOWN OR UNVERIFIED. IF THE EXISTING UTILITIES ARE NOT LOCATED AS INDICATED ON THE PLAN, SUBSTANTIAL REDESIGN WORK MAY BE REQUIRED. THE GENERAL CONTRACTOR SHALL NOTIFY THE ENGINEER OF ANY DISCREPANCIES IN THE PLANS.
4. DEMOLISH AND REMOVE ALL EXISTING UTILITIES AND SUPPORT STRUCTURES AT BUILDINGS TO BE REMOVED.
5. ALL EXISTING UTILITY BOXES, LIDS, VALVE COVERS, VAULTS, ETC. THAT ARE TO REMAIN SHALL BE ADJUSTED TO MEET THE NEW FINISHED GRADES (AS REQUIRED). RE-USE EXISTING BOXES, LIDS, VALVE COVERS, VAULTS (IF POSSIBLE), OR INSTALL NEW PER COUNTY REQUIREMENTS. REPLACE ALL DAMAGED ITEMS. MATCH EXISTING SIZES. INSTALL/REPLACE TRAFFIC RATED BOXES WHERE REQUIRED. FIELD VERIFY THE EXTENT OF WORK.
6. REMOVE OR ABANDON ALL UNUSED SITE UTILITIES PER LOCAL REQUIREMENTS. FIELD VERIFY EXTENT OF REMOVAL.
7. THE CONTRACTOR IS RESPONSIBLE TO NOTIFY ALL UTILITIES AND UNDERGROUND SERVICE ALERT AT (800) 227-2600 48 HOURS PRIOR TO ANY EXCAVATION SO THAT THEIR LINES CAN BE MARKED.
8. ABANDONED UNDERGROUND STRUCTURES ENCOUNTERED IN THE STREET AREAS SHALL BE REMOVED TO SUFFICIENT DEPTH TO ALLOW UNDERGROUND LINES TO CROSS. EXCAVATED AREAS SHALL BE FILLED AND COMPACTED DURING ROUGH GRADING. THE COUNTY INSPECTOR MAY REQUIRE ADDITIONAL WORK BE DONE IF VISUAL INSPECTION INDICATES IT IS NECESSARY.
9. EXISTING UNDERGROUND FACILITIES AS SHOWN ARE APPROXIMATE ONLY AND WERE OBTAINED FROM AVAILABLE UTILITY RECORDS. THE PROJECT ENGINEER ASSUMES NO RESPONSIBILITY FOR THE ACCURACY OR COMPLETENESS OF EXISTING UTILITY INFORMATION. IT SHALL BE THE CONTRACTOR'S RESPONSIBILITY TO CONTACT ALL LOCAL UTILITIES AND TO HAVE ALL FACILITIES LOCATED AND EXPOSED TO VERIFY THE CLEARANCE AT NEW PIPE CROSSINGS PRIOR TO THE START OF NEW PIPELINE CONSTRUCTION.
10. ANY RELOCATION OF THE PUBLIC UTILITIES SHALL BE DONE IN ACCORDANCE WITH ANY AND ALL REQUIREMENTS OF THE UTILITY COMPANY AND WITH REGARD TO THE REQUIRED FEES, BONDS, PERMITS. WORKING CONDITIONS, ETC. OF SAID COMPANY. THIS WORK SHALL BE DONE AT NO EXPENSE TO THE COUNTY OF ALAMEDA. THE SUBDIVIDER SHALL PAY THE COST OF ALL SAID FEES. BONDS, PERMITS, ETC.
11. MINIMUM COVER FOR CONDUITS SHALL BE 36" UNLESS OTHERWISE SHOWN OR NOTED ON THESE PLANS OR ON UTILITY PLANS (BY OTHERS).

SANITARY SEWER NOTES:

1. CITY OF BERKELEY SPECIFICATIONS ARE INCORPORATED HEREON BY REFERENCE. SANITARY SEWER MAINS AND LATERALS SHALL BE INSTALLED AT THE LOCATIONS SHOWN HEREIN OR AS SPECIFIED IN THE FIELD BY DEVELOPER.
2. ALL SANITARY SEWER MAINS AND LATERALS SHALL BE CONSTRUCTED USING HDPE SDR-17 UNLESS OTHERWISE NOTED ON THE PLANS.

STORM DRAIN NOTES:

1. ALL STORM DRAIN PIPES SHALL BE HDPE SDR-17 OR BETTER, UNLESS OTHERWISE NOTED ON THE PLANS.
2. ALL ONSITE STORM DRAIN INLETS SHALL BE CLEARLY MARKED WITH THE WORDS "NO DUMPING! FLOWS TO BAY." OR EQUIVALENT.

TREE PRESERVATION NOTES:

1. ALL TRENCHING WITHIN 5' OF AN EXISTING TREE MUST BE DONE USING AN AIRSPADE PNEUMATIC EXCAVATION TOOL BY A TREE SERVICES CONTRACTOR WITH A D-49 STATE CONTRACTORS LICENSE. THE CITY'S ARBORIST SHALL INSPECT EXCAVATION PRIOR TO ANY ROOTS BEING CUT. CALL (510) 981-6660 TO SCHEDULE AN INSPECTION. ROOTS OVER 2" IN DIAMETER MAY REQUIRE PRESERVATION. ONLY A LICENSED AND INSURED TREE SERVICES CONTRACTOR MAY PRUNE THE TREE ROOTS. ROOTS ARE TO BE CUT WITH A SHARP AXE OF SAW. THE EXCAVATION SHALL NOT BE LEFT OPEN AND ROOTS EXPOSED TO AIR FOR MORE THAN 24 HOURS.

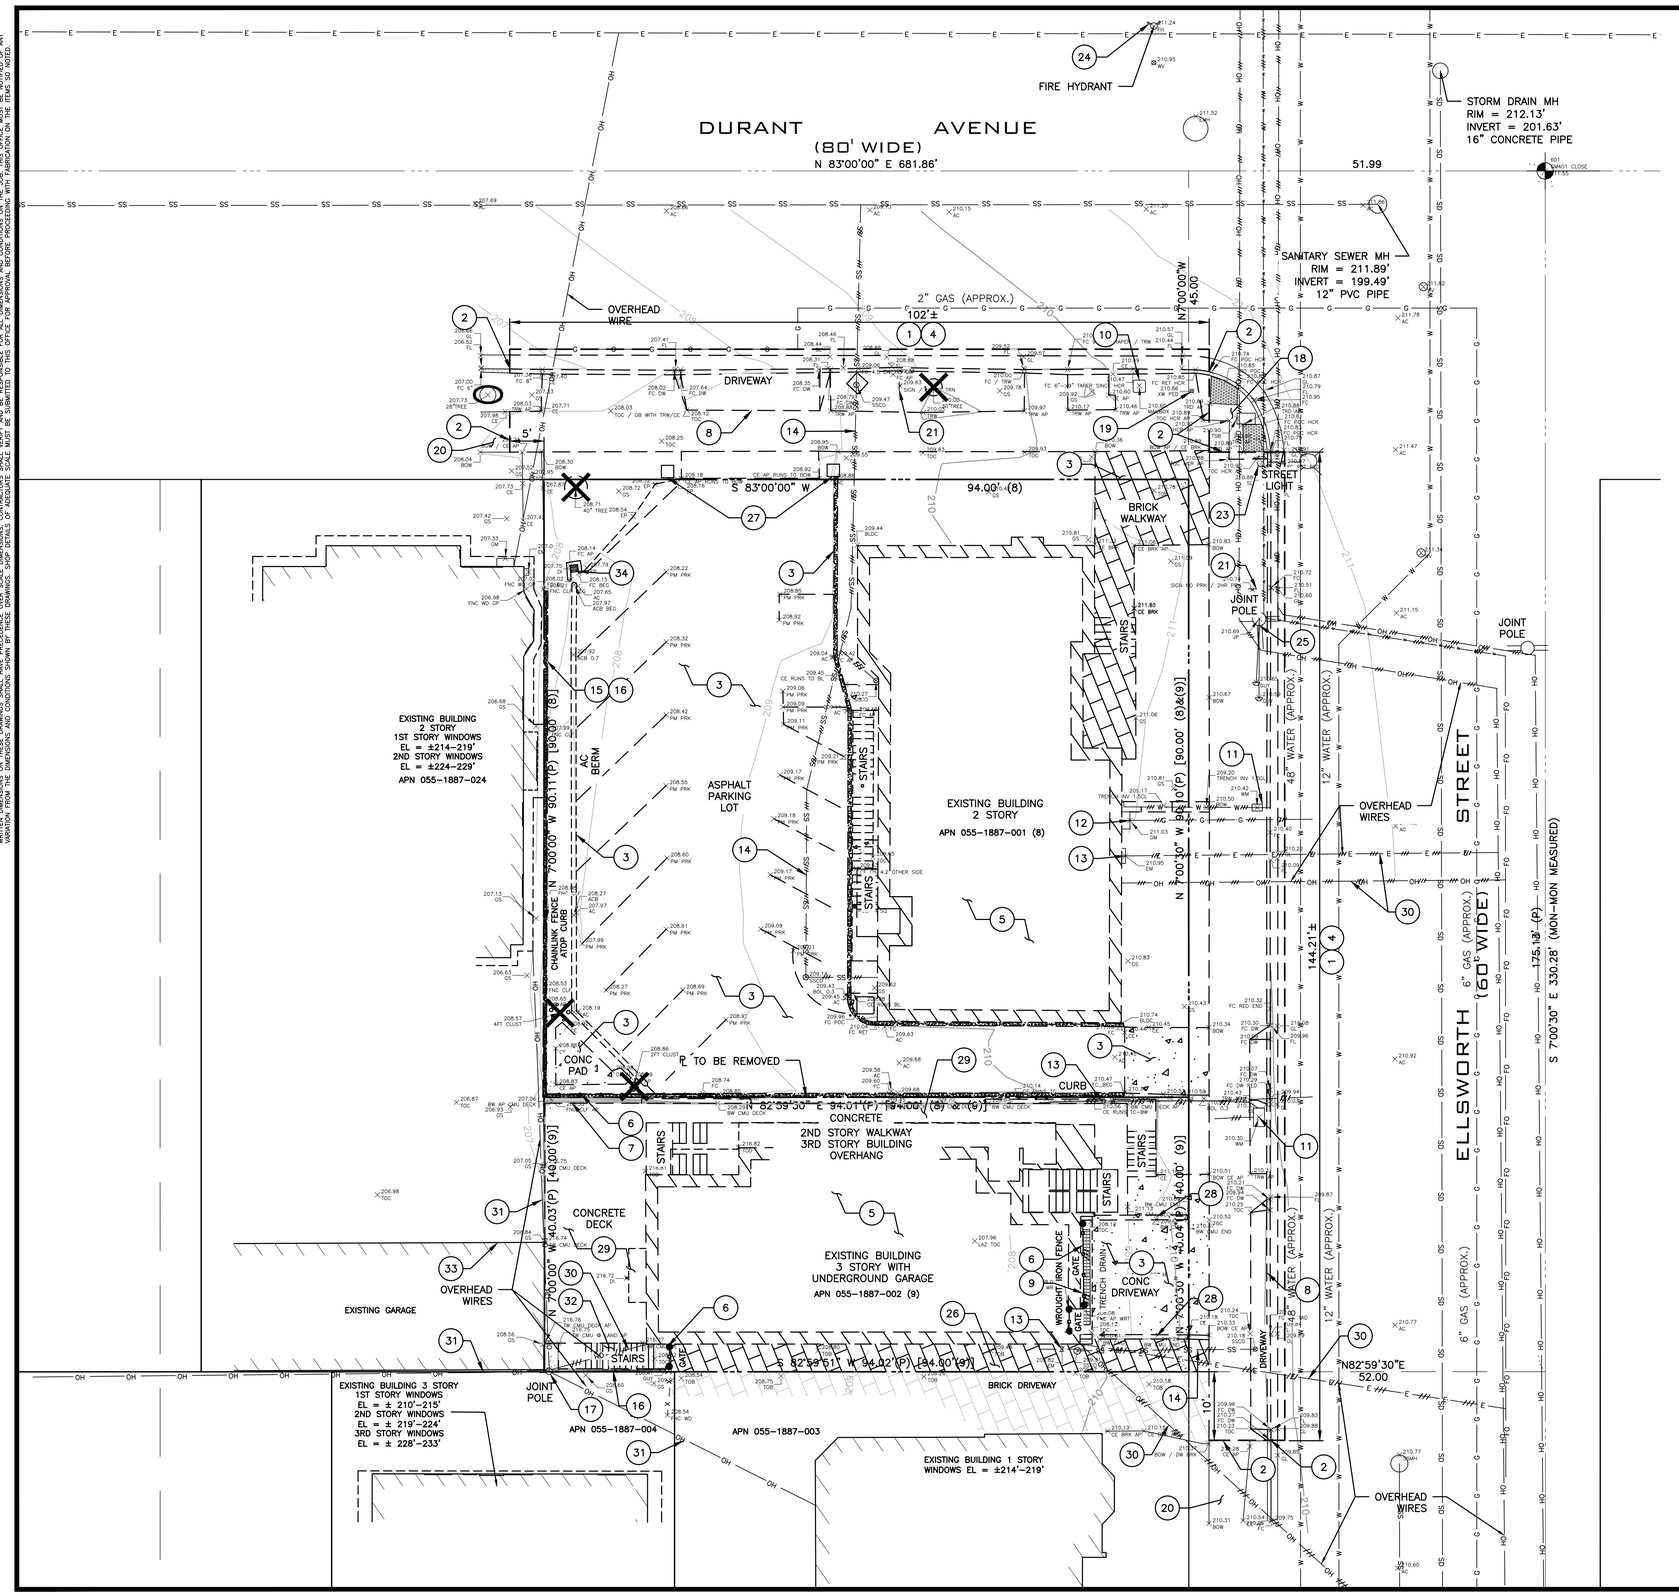
DEMOLITION NOTES:

SEE SHEET C2.0 FOR ADDITIONAL INFORMATION NOT SHOWN

1. THE CONTRACTOR SHALL BE RESPONSIBLE FOR LOCATING ALL EXISTING UNDERGROUND UTILITIES, WHETHER SHOWN ON THESE PLANS OR NOT, PRIOR TO THE COMMENCEMENT OF ANY DEMOLITION WORK.
2. ALL EXISTING UTILITIES AND APPURTENANCES THERETO SERVING ANY EXISTING STRUCTURE OR BUILDINGS AND THOSE IN THE PUBLIC RIGHT OF WAY SERVING PUBLIC UTILITIES ARE TO REMAIN AND SHALL BE PROTECTED IN PLACE. THE CONTRACTOR SHALL BE RESPONSIBLE FOR RELOCATING OR REMOVING ALL UTILITIES IMPACTED BY THE PROPOSED CONSTRUCTION WHETHER OR NOT INDICATED ON THE PLANS.
3. THE CONTRACTOR SHALL CONTACT ALL ASSOCIATED UTILITY SUPPLIERS PRIOR TO DEMOLITION TO COORDINATE THE DISCONNECTION, REL

ALL IDEAS, DESIGNS, ARRANGEMENTS, AND PLANS INDICATED ON THIS DRAWING ARE OWNED BY AND THE PROPERTY OF THIS OFFICE AND WERE CREATED, EVOLVED AND DEVELOPED FOR USE ON - AND IN CONNECTION WITH THE SPECIFIED PROJECT. NONE OF SUCH IDEAS, DESIGNS, ARRANGEMENTS OR PLANS SHALL BE USED BY OR DISCLOSED TO ANY PERSON, FIRM OR CORPORATION FOR ANY PURPOSE WHATSOEVER WITHOUT THE WRITTEN PERMISSION OF GREENWOOD & MOORE, INC.

WRITTEN DIMENSIONS ON THESE DRAWINGS SHALL HAVE PRECEDENCE OVER SCALE DIMENSIONS. CONTRACTORS SHALL VERIFY AND BE RESPONSIBLE FOR ALL DIMENSIONS AND CONDITIONS ON THE JOB. THIS OFFICE MUST BE NOTIFIED OF ANY VARIATION FROM THE DIMENSIONS AND CONDITIONS SHOWN BY THESE DRAWINGS. SHOP DETAILS OF ADEQUATE SCALE MUST BE SUBMITTED TO THIS OFFICE FOR APPROVAL BEFORE PROCEEDING WITH FABRICATION ON THE ITEMS SO NOTED.



KEYNOTES:

1. SAWCUT
2. LIMIT OF REMOVAL
3. REMOVE (E) CONCRETE/ASPHALT/BRICK
4. REMOVE (E) SIDEWALK, CURB, & GUTTER
5. (E) BUILDING & FOUNDATION TO BE DEMOLISHED, REMOVE (E) ASSOCIATED RETAINING WALLS AND FOUNDATION. PG&E TO DISCONNECT ELECTRIC AND GAS SERVICE PRIOR TO DEMOLITION OF THE (E) BUILDING.
6. REMOVE (E) FENCE AND/OR GATE
7. REMOVE (E) RETAINING WALL
8. REMOVE (E) DRIVEWAY
9. REMOVE (E) TRENCH DRAIN
10. REMOVE & REINSTALL (E) MAILBOX. COORDINATE REMOVAL & REINSTALLATION WITH UNITED STATES POSTAL SERVICE.
11. REMOVE (E) WATER METER. CAP AND ABANDON (E) WATER LATERAL PER EBMUD STANDARDS (BY EBMUD)
12. PG&E TO REMOVE (E) GAS METER AND GAS LATERAL PRIOR TO DEMOLITION OF THE BUILDING. CONTRACTOR TO VERIFY LOCATION IN FIELD. CAP & ABANDON PER PG&E STANDARDS & REQUIREMENTS.
13. PG&E TO REMOVE (E) ELECTRIC METERS AND ASSOCIATED ELECTRIC LINE PRIOR TO DEMOLITION OF THE BUILDING. COORDINATE REMOVAL WITH OWNER AND PG&E.
14. ABANDON (E) SEWER LATERAL PER CITY OF BERKELEY REQUIREMENTS. FOR BUILDING DEMOLITION AND LATERAL ABANDONMENT: WHEN A BUILDING IS TO BE DEMOLISHED AND THE EXISTING LATERAL IS NOT TO BE RE–USED, THE LATERAL SEWER SHALL BE DUG AND EXPOSED WHERE IT ENTERS THE MAIN.
    A. IF THE LATERAL ENTERS THE MAIN BY MEANS OF A FACTORY MANUFACTURED WYE OR TEE BRANCH, AND IF THE MAIN AND WYE OR TEE BRANCH ARE ALL IN GOOD, UNDAMAGED CONDITION, THE LATERAL SHALL BE DISCONNECTED AND THE BRANCH SHALL BE PLUGGED WITH AN EXPANDABLE NEOPRENE RUBBER PLUG AT THE MAIN. THE BRANCH PLUG SHALL BE SHALL BE ENCLOSED WITH A MINIMUM THICKNESS OF 6 INCHES OF 6 SACK, ¾" SIZE AGGREGATE. PORTLAND CEMENT CONCRETE. THE WYE BRANCH WITH RUBBER PLUG MUST BE INSPECTED AND APPROVED BY AN ENGINEERING INSPECTOR PRIOR TO ENCLOSURE WITH CONCRETE AND BACKFILL OF THE TRENCH.
    B. IF THE LATERAL ENTERS THE MAIN BY ANY METHOD OTHER THAN BY A FACTORY WYE OR TEE BRANCH, OR IF THE EXISTING MAIN, WYE OR TEE BRANCH IS DAMAGED IN ANY WAY, THE SECTION OF MAIN CONTAINING THE LATERAL ENTRY OPENING SHALL BE REMOVED AND REPLACED WITH A NEW SECTION OF PIPE OF THE SAME DIAMETER AS THE EXISTING MAIN. AN ENGINEERING INSPECTOR MUST INSPECT THE NEW MAIN SECTION BEFORE BACKFILL.
    C. THE ABANDONED LATERAL PIPE SHALL BE FILLED WITH SAND AND JETTED TO PREVENT THE PIPE FROM BECOMING A HOME FOR RODENTS OR OTHER DISEASE VECTORS.
    D. REMOVE (E) CLEANOUT FRAME & COVER.
15. REMOVE (E) CONCRETE WALL. COORDINATE REMOVAL WITH ADJACENT PROPERTY OWNER.
16. REMOVE (E) FENCE. COORDINATE REMOVAL WITH ADJACENT PROPERTY OWNER.
17. (E) JOINT POLE WITH GUY WIRE TO REMAIN
18. (E) ACCESSIBLE RAMP TO REMAIN
19. (E) CROSSWALK BUTTON/BOLLARD TO REMAIN
20. (E) CONCRETE TO REMAIN
21. (E) SIGN TO REMAIN
22. (E) CURB & GUTTER TO REMAIN
23. (E) LIGHT POLE TO REMAIN
24. (E) FIRE HYDRANT TO REMAIN
25. REMOVE (E) JOINT POLE & UNDERGROUND (E) OVERHEAD UTILITIES (BY OTHERS)
26. REMOVE (E) BRICK PAVERS TO PROPERTY LINE
27. REMOVE (E) BRICK POST
28. REMOVE (E) RETAINING WALL AND FOUNDATION.
29. REMOVED (E) CONCRETE DECK, WALLS AND FOUNDATION.
30. REMOVE (E) OVERHEAD UTILITY LINE TO BUILDING. COORDINATE REMOVAL WITH APPROPRIATE UTILITY MUNICIPALITY.
31. (E) OVERHEAD UTILITY LINE TO REMAIN.
32. REMOVE (E) CONCRETE STEPS.
33. PROTECT (E) BUILDING ON ADJACENT PROPERTY DURING DEMOLITION.
34. (E) DRAIN INLET AND STORM DRAIN TO REMAIN DURING DEMOLITION. REMOVE (E) DRAIN INLET AND STORM DRAIN PRIOR TO CONSTRUCTION OF (N) BUILDING FOUNDATION.

X REMOVE (E) TREE AND/OR (E) STUMP

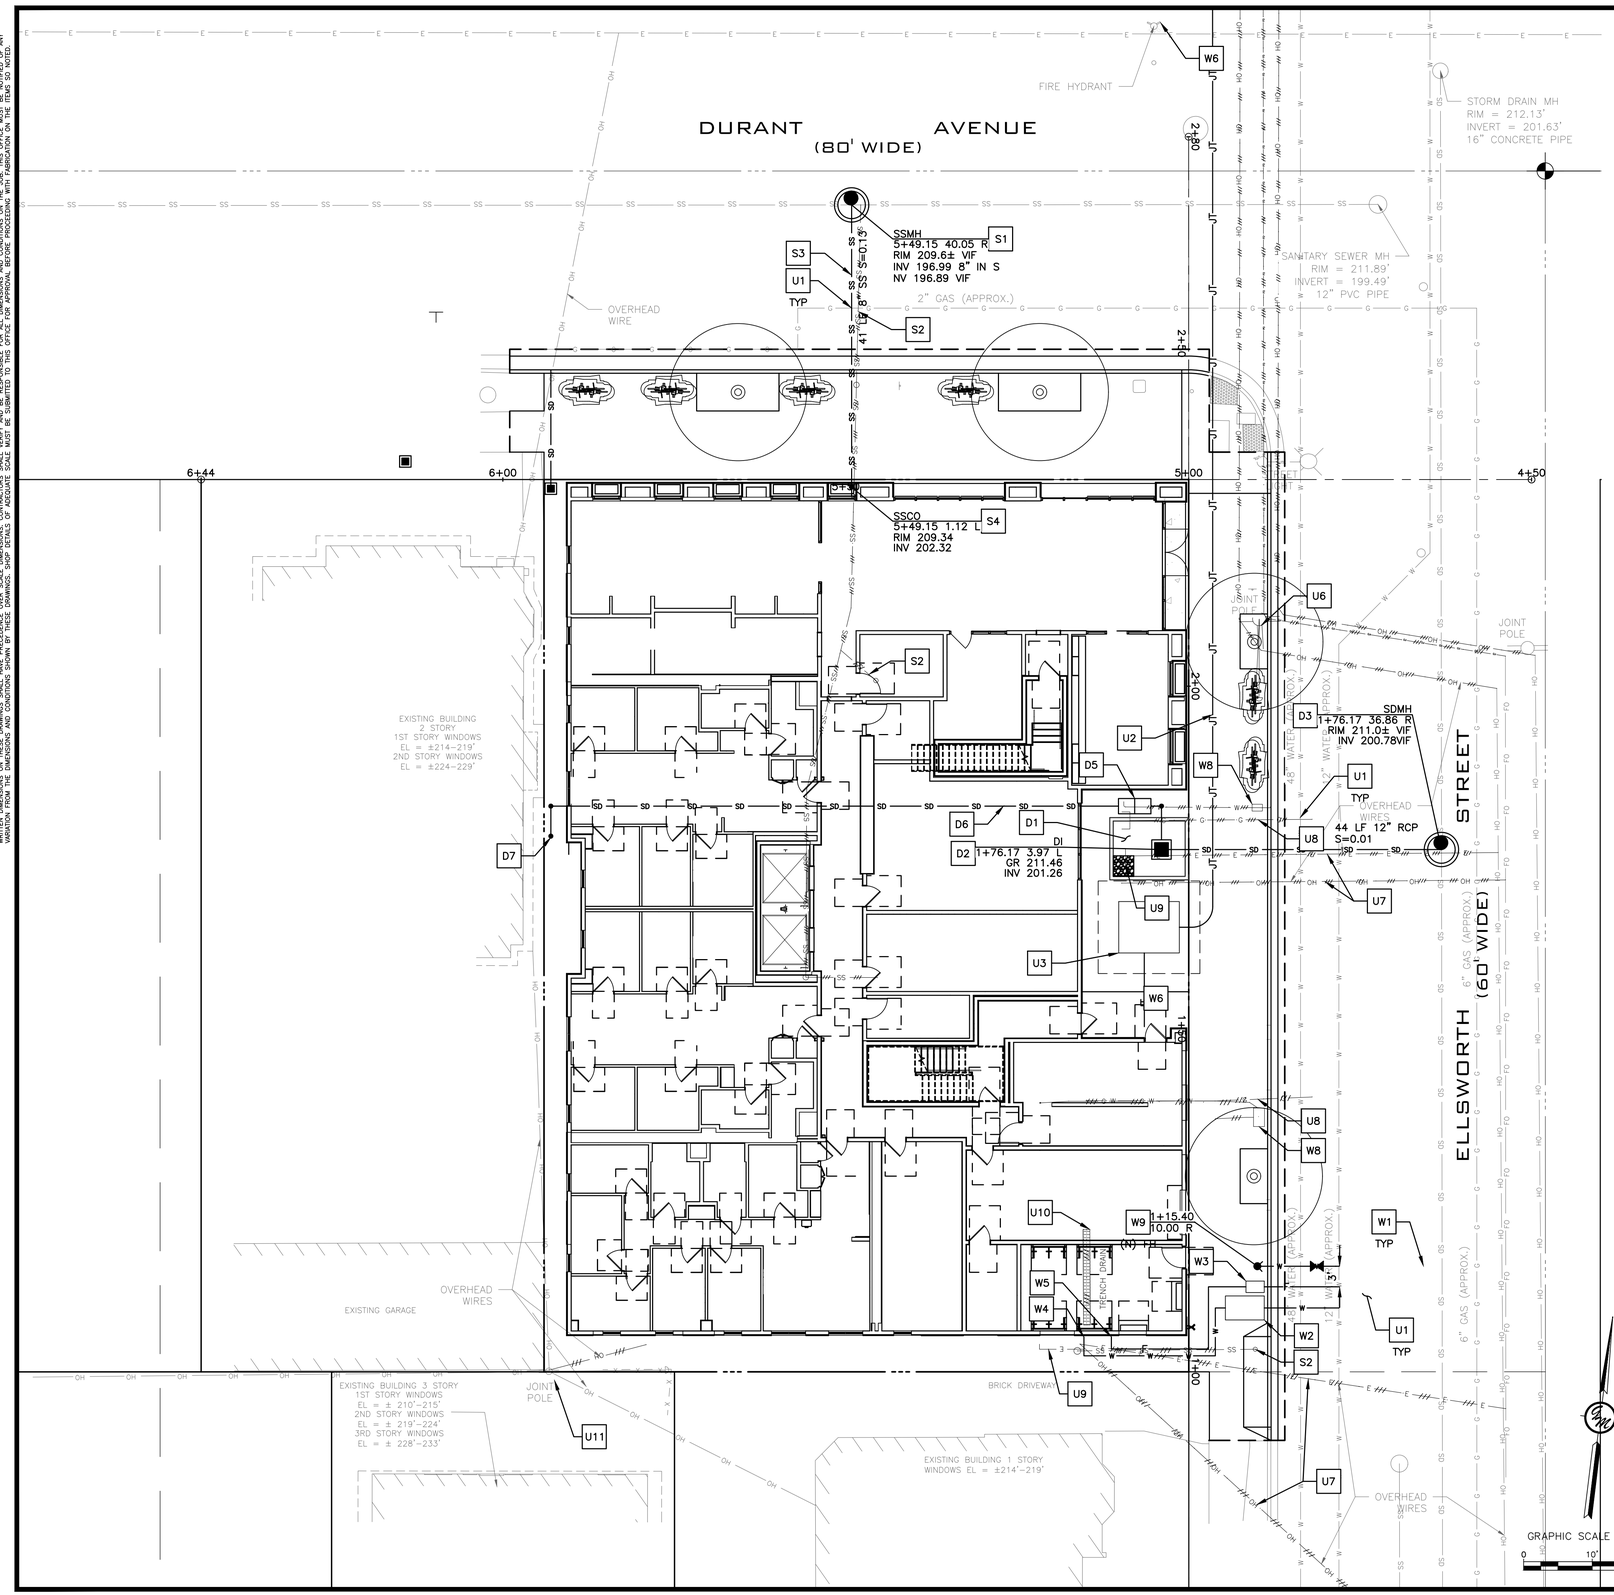
SHEET NO.	C2.0

ALL IDEAS, DESIGNS, ARRANGEMENTS, AND PLANS INDICATED BY THIS DRAWING ARE OWNED BY, AND THE PROPERTY OF THIS OFFICE AND WERE CREATED, EVOLVED AND DEVELOPED FOR USE ON, AND IN CONNECTION WITH THE SPECIFIED PROJECT. NONE OF SUCH IDEAS, DESIGNS, ARRANGEMENTS OR PLANS SHALL BE USED BY OR DISCLOSED TO ANY PERSON, FIRM OR CORPORATION FOR ANY PURPOSE WHATSOEVER WITHOUT THE WRITTEN PERMISSION OF GREENWOOD & MOORE, INC.
WRITTEN DIMENSIONS ON THESE DRAWINGS SHALL HAVE PRECEDENCE OVER SCALE DIMENSIONS. CONTRACTORS SHALL VERIFY AND BE RESPONSIBLE FOR ALL DIMENSIONS AND CONDITIONS ON THE JOB. THIS OFFICE MUST BE NOTIFIED OF ANY VARIATION FROM THE DIMENSIONS AND CONDITIONS SHOWN BY THESE DRAWINGS. SHOP DETAILS OF ADEQUATE SCALE MUST BE SUBMITTED TO THIS OFFICE FOR APPROVAL BEFORE PROCEEDING WITH FABRICATION ON THE ITEMS SO NOTED.



STORM DRAINAGE KEYNOTES D#

1. FLOW THROUGH PLANTER
2. DRAIN INLET. GRATE TO BE 6" ABOVE FLOW THROUGH PLANTER FINISH GRADE. DRAIN INLET TO BE CP2424 PER DETAIL 1/C7.1 & 2/C7.1
3. STORM DRAIN MANHOLE PER CITY OF BERKELEY STANDARD DETAIL 7895. VERIFY EXISTING SEWER SIZE AND INVERT ELEVATION IN FIELD. SEE 4/C7.4.
4. APPROXIMATE LOCATION OF RAIN WATER DOWNSPOUT TO OUTFALL INTO BIORETENTION AREA AT COBBLE DISSIPATOR
5. BELOW GROUND CONTECH CARTRIDGE CATCH BASIN STORMFILTER TO TREAT ROOFTOP. CONNECT 6" STORM DRAIN OUTLET TO DRAIN INLET. SEE DETAIL 4/C7.1.
6. STORM DRAIN THROUGH BUILDING. COORDINATE WITH PLUMBING CONSULTANT.
7. CONNECT DOWNSPOUT TO STORM DRAIN THAT IS CONNECTED TO FILTER VAULT.

SEWER KEYNOTES S#

1. SSMH PER CITY OF BERKELEY STANDARD DETAIL 7895. VERIFY EXISTING SEWER SIZE AND INVERT ELEVATION IN FIELD. SEE 4/C7.4.
2. ABANDON (E) SEWER LATERAL. FOR BUILDING DEMOLITION AND LATERAL ABANDONMENT: WHEN A BUILDING IS TO BE DEMOLISHED AND THE EXISTING LATERAL IS NOT TO BE RE-USED, THE LATERAL SEWER SHALL BE DUG AND EXPOSED WHERE IT ENTERS THE MAIN.

A. IF THE LATERAL ENTERS THE MAIN BY MEANS OF A FACTORY MANUFACTURED WYE OR TEE BRANCH, AND IF THE MAIN AND WYE OR TEE BRANCH ARE ALL IN GOOD, UNDAMAGED CONDITION, THE LATERAL SHALL BE DISCONNECTED AND THE BRANCH SHALL BE PLUGGED WITH AN EXPANDABLE NEOPRENE RUBBER PLUG AT THE MAIN. THE BRANCH PLUG SHALL BE SHALL BE ENCLOSED WITH A MINIMUM THICKNESS OF 6 INCHES OF 6 SACK, ¾" SIZE AGGREGATE. PORTLAND CEMENT CONCRETE. THE WYE BRANCH WITH RUBBER PLUG MUST BE INSPECTED AND APPROVED BY AN ENGINEERING INSPECTOR PRIOR TO ENCLOSURE WITH CONCRETE AND BACKFILL OF THE TRENCH.

B. IF THE LATERAL ENTERS THE MAIN BY ANY METHOD OTHER THAN BY A FACTORY WYE OR TEE BRANCH, OR IF THE EXISTING MAIN, WYE OR TEE BRANCH IS DAMAGED IN ANY WAY, THE SECTION OF MAIN CONTAINING THE LATERAL ENTRY OPENING SHALL BE REMOVED AND REPLACED WITH A NEW SECTION OF PIPE OF THE SAME DIAMETER AS THE EXISTING MAIN. AN ENGINEERING INSPECTOR MUST INSPECT THE NEW MAIN SECTION BEFORE BACKFILL.

C. THE ABANDONED LATERAL PIPE SHALL BE FILLED WITH SAND AND JETTED TO PREVENT THE PIPE FROM BECOMING A HOME FOR RODENTS OR OTHER DISEASE VECTORS.

D. REMOVE (E) CLEANOUT FRAME & COVER.

3. 8" HDPE SDR 17
4. 2 WAY SEWER CLEANOUT WITH CAST IRON TRAFFIC RATED COVER. COORDINATE SEWER CONNECTION TO BUILDING LOCATION AND ELEVATION WITH PLUMBING PLANS.

WATER KEYNOTES W#

1. CONNECT TO EXISTING WATER LINE PER EBMUD STANDARDS AND REQUIREMENTS
2. RESIDENTIAL APARTMENT DOMESTIC WATER METER PER EBMUD STANDARDS AND REQUIREMENTS. VERIFY METER SIZE WITH EBMUD AND PLUMBING PLANS.
3. WATER METER AND CHECK VALVE FOR FIRE SERVICE PER EBMUD STANDARDS AND REQUIREMENTS.
4. 2" WATER SERVICE TO APARTMENT BUILDING. VERIFY SIZE AND LOCATION WITH PLUMBING PLANS. PROVIDE BACKFLOW DEVICE AT BUILDING PER EBMUD STANDARDS AND REQUIREMENTS.
5. X" FIRE SERVICE TO BUILDING. SEE FIRE SERVICE PLANS BY OTHERS FOR MORE INFORMATION. PROVIDE BACKFLOW DEVICE AT BUILDING PER EBMUD STANDARDS AND REQUIREMENTS.
6. (E) FIRE HYDRANT
7. FIRE DEPARTMENT CONNECTION. SEE PLANS BY OTHERS.
   7.1. THE FDC SHALL BE INSTALLED NO HIGHER THAN 3-FEET FROM FINISHED GRADE, AND SHALL BE LOCATED SO THAT FIRE APPARATUS AND HOSE CONNECTED TO SUPPLY THE SYSTEM WILL NOT OBSTRUCT ACCESS TO THE BUILDINGS FOR OTHER FIRE APPARATUS.
   7.2. THE FDC SUPPLYING WATER TO THE STANDPIPE SYSTEM MUST CONSIST OF A THREE (3) 2-1/2-INCH INLET CONNECTION AND ONE (1) 5-INCH STORZ CONNECTION WITH A BUILT-IN DEBRIS SCREEN.
8. REMOVE (E) WATER METER. CAP AND ABANDON (E) WATER LATERAL PER EBMUD STANDARDS (BY EBMUD)
9. (N) FIRE HYDRANT PER EBMUD AND CITY OF BERKELEY STANDARDS, REQUIREMENTS AND SPECIFICATIONS.

UTILITY KEYNOTES U#

1. CONTRACTOR FIELD LOCATE (E) UTILITIES. NOTIFY ENGINEER OF ANY CONFLICTS WITH (E) UTILITIES.
2. JOINT TRENCH BY OTHERS. SEE JOINT TRENCH PLANS
3. (N) ABOVE GROUND TRANSFORMER (BY OTHERS)
4. ALL TRENCHING IN THE CITY RIGHT OF WAY TO BE PER CITY OF BERKELEY STANDARD DETAIL 8136.
5. PROVIDE 1' MINIMUM CLEARANCE AT UTILITY CROSSING. VIF
6. REMOVE (E) JOINT POLE AND UNDERGROUND EXISTING OVERHEAD UTILITIES (BY OTHERS)
7. REMOVE (E) OVERHEAD LINES
8. PG&E TO REMOVE (E) GAS METER AND GAS LATERAL PRIOR TO DEMOLITION OF THE BUILDING. CONTRACTOR TO VERIFY LOCATION IN FIELD. CAP & ABANDON PER PG&E STANDARDS & REQUIREMENTS.
9. PG&E TO REMOVE (E) ELECTRIC METERS AND ASSOCIATED ELECTRIC LINE PRIOR TO DEMOLITION OF THE BUILDING. COORDINATE REMOVAL WITH OWNER AND PG&E.
10. REMOVE (E) TRENCH DRAIN. ABANDON EXISTING STORM DRAIN LINE.
11. (E) JOINT POLE TO REMAIN.

Worksheet for Calculating the Combination Flow and Volume Method

These calculations are based on the combination flow and volume hydraulic sizing method provided in the Alameda, San Mateo, and Santa Clara County C.3 Technical Guidance Manuals. The steps presented below are explained in Chapter 5, Section 5.1 of the gui

1.0 Project Information

1-1	Project Name:	2298 DURANT AVE	
1-2	City application ID:	BERKELEY	
1-3	Site Address or APN:	0	
1-4	Tract or Parcel Map No:	0	
1-5	Site Mean Annual Precip. (MAP)[1]	23.0	Inches
	Refer to the Mean Annual Precipitation Map in Appendix D of the C.3 Technical Guidance to determine the MAP, in inches, for the site.		Click here for map
1-6	Applicable Rain Gauge[2]	Oakland Airport (CWPAC)	
	MAP adjustment factor is automatically calculated as:	1.25	
	(The "Site Mean Annual Precipitation (MAP)" is divided by the MAP for the applicable rain gauge, shown in Table 5.2, below.)		

2.0 Calculate Percentage of Impervious Surface for Drainage Management Area (DMA)

2-1	Name of DMA:	DMA-2		
	For items 2-2 and 2-3, enter the areas in square feet for each type of surface within the DMA.			
	Type of Surface	Area of surface type within DMA (Sq. Ft)	Adjust Pervious Surface	Effective Impervious Area
2-2	Impervious Surface	5,312	1.0	5,312
2-3	Pervious Surface	165	0.1	17
	Total DMA Area (square feet) =	5,477		
2-4	***Total Effective Impervious Area (EIA)***			5,329 Square feet

3.0 Calculate Unit Basin Storage Volume in Inches

Table 5-2: Unit Basin Storage Volumes (in inches) for 80 Percent Capture Using 48-Hour Drawdowns

		Unit Basin Storage Volume (in) for Applicable Runoff Coefficients
Applicable Rain Gauge	Mean Annual Precipitation (in)	(Calculated for 100% Imperviousness)
San Jose Airport (SCVURPPP)	13.9	0.58
Palo Alto (SCVURPPP)	13.7	0.62
Palo Alto (SMCWPPP)	14.6	0.64
Gilroy (SCVURPPP)	18.2	1.00
Morgan Hill (SCVURPPP)	19.5	1.00
Boulder Creek (SMCWPPP)	55.9	2.04
La Honda (SMCWPPP)	24.4	0.86
Half Moon Bay (SMCWPPP)	25.92	0.82
San Francisco (SMCWPPP)	21	0.73
San Francisco Airport (SMCWPPP)	20.1	0.85
San Francisco Oceanside (SMCWPPP)	19.3	0.72
Oakland Airport (CWPAC)	18.35	1.00

3-1	***Unit basin storage volume from Table 5.2:***	1.00	Inches
	(The coefficient for this method is 1.00, due to the conversion of any landscaping to effective impervious area)		
3-2	***Adjusted unit basin storage volume:***	1.25	Inches
	(The unit basin storage volume is adjusted by applying the MAP adjustment factor.)		
3-3	***Required Capture Volume (in cubic feet):***	557	Cubic feet
	(The adjusted unit basin sizing volume [inches] is multiplied by the size of the DMA and converted to feet)		

4.0 Calculate the Duration of the Rain Event

4-1	Rainfall intensity	0.2	Inches per hour
4-2	Divide Item 3-2 by Item 4-1	6.27	Hours of Rain Event Duration

5.0 Preliminary Estimate of Surface Area of Treatment Measure

5-1	4% of DMA impervious surface	213	Square feet
5-2	Area 25% smaller than item 5-1	160	Square feet
5-3	Volume of treated runoff for area in Item 5-2	417	Cubic feet (Item 5-2 * 5 inches per hour * 1/12 * Item 4-2)

6.0 Initial Adjustment of Depth of Surface Ponding Area

6-1	Subtract Item 5-3 from Item 3-3	139	Cubic feet (Amount of runoff to be stored in ponding area)
6-2	Divide Item 6-1 by Item 5-2	0.9	Feet (Depth of stored runoff in surface ponding area)
6-3	Convert Item 6-2 from ft to inches	10.4	Inches (Depth of stored runoff in surface ponding area)
6-4	If ponding depth in Item 6-3 meets your target depth of 6"-12", then Item 7-1 is equal to Item 5-2. If not, continue to Step 7-1.		

7.0 Optimize Size of Treatment Me 25

7-1	Enter an area larger or smaller than Item 5-2	165	Sq.ft. (enter larger area if you need less ponding depth; smaller for more depth.)
7-2	Volume of treated runoff for area in Item 7-1	431	Cubic feet (Item 7-1 * 5 inches per hour * 1/12 * Item 4-2)
7-3	Subtract Item 7-2 from Item 3-3	126	Cubic feet (Amount of runoff to be stored in ponding area)
7-4	Divide Item 7-3 by Item 7-1	0.76	Feet (Depth of stored runoff in surface ponding area)
7-5	Convert Item 7-4 from feet to inches	9.14	Inches (Depth of stored runoff in surface ponding area)
7-6	If the ponding depth in Item 7-5 meets target, stop here. If not, repeat Steps 7-1 through 7-5 until you obtain target depth. If the slope of the drainage area > 1%, then 11" will be the max ponding depth (slopes >1% will increase the ponding depth by 0.

BIORETENTION TREATMENT SOIL SPECIFICATIONS

1. BIORETENTION TREATMENT SOIL SHALL ACHIEVE A LONG TERM, IN-PLACE INFILTRATION RATE BETWEEN 5 IN/HR AND 10 IN/HR, CAPABLE OF SUPPORTING VIGOROUS PLAN GROWTH AND CONSIST OF 60%-70% SAND AND 30%-40% COMPOST.
   1.1. THE APPLICANT TO SUBMIT TO THE MUNICIPALITY FOR APPROVAL:
      1.1.a. A SAMPLE OF MIXED BIORETENTION SOIL.
      1.1.b. CERTIFICATION FROM THE SOIL SUPPLIER OR AN ACCREDITED LABORATORY THAT THE BIORETENTION SOIL MEETS THE REQUIREMENTS OF THIS GUIDELINE SPECIFICATION.
      1.1.c. GRAIN SIZE ANALYSIS RESULTS OF THE FINE SAND COMPONENT PERFORMED IN ACCORDANCE WITH ASTM D 422, STANDARD TEST METHOD FOR PARTICLE SIZE ANALYSIS OF SOILS.
      1.1.d. QUALITY ANALYSIS RESULTS FOR COMPOST PERFORMED IN ACCORDANCE WITH SEAL OF TESTING ASSURANCE (STA) STANDARDS, AS SPECIFIED SECTION 1.4.
      1.1.e. ORGANIC CONTENT TEST RESULTS OF MIXED BIORETENTION SOIL. ORGANIC CONTENT TEST SHALL BE PERFORMED IN ACCORDANCE WITH TESTING METHODS FOR EXAMINATION OF COMPOST AND COMPOSTING (TMECC) 05.07A, "LOSS-ON-IGNITION ORGANIC MATTER METHOD.
      1.1.f. GRAIN SIZE ANALYSIS RESULTS OF THE COMPOST COMPONENT IN ACCORDANCE WITH ASTM D422, STANDARD TEST METHOD FOR PARTICLE SIZE ANALYSIS OF SOILS.
      1.1.g. A DESCRIPTION OF THE EQUIPMENT AND METHODS USED TO MIX THE SAND AND COMPOST TO PRODUCE BIORETENTION SOIL.
      1.1.h. PROVIDE THE FOLLOWING INFORMATION ABOUT THE TESTING LABORATORY(IES): CONTACT PERSON(S), ADDRESS(ES), PHONE CONTACTS(S), EMAIL ADDRESS(ES) AND QUALIFICATIONS OF LABORATORY(IES) AND PERSONNEL INCLUDING DATE OF CURRENT CERTIFICATION BY STA, ASTM, OR APPROVED EQUAL.
   1.2. SAND FOR BIORETENTION SOIL:
      1.2.a. SAND SHALL BE FREE OF WOOD, WASTE COATING SUCH AS CLAY, STONE, DUST, CARBONATE, ETC., OR ANY OTHER DELETERIOUS MATERIAL. ALL AGGREGATE PASSING THE NO. 200 SIEVE SHALL BE NON-PLASTIC.
      1.2.b. SAND FOR BIORETENTION AREA SHALL BE ANALYZED BY AN ACCREDITED LAB USING #200, #100, #40, #30 #8, #4, AND 3/8" SIEVES (ASTM D 422 OR AS APPROVED BY MUNICIPALITY), AND MEET THE FOLLOWING GRADATION.

SIEVE SIZE	PERCENT PASSING (BY WEIGHT) MIN	MAX.
3/8"	100	100
NO. 4	90	100
NO. 8	70	100
NO. 16	40	95
NO. 30	15	70
NO. 40	5	55
NO. 100	0	15
NO. 200	0	5

NOTE: ALL SANDS COMPLYING WITH ASTM C33 FOR FINE AGGREGATE COMPLY WITH THE ABOVE GRADATION REQUIREMENTS.

1.3 COMPOSTED MATERIAL
COMPOST SHALL BE A WELL DECOMPOSED, STABLE, WEED FREE ORGANIC MATTER SOURCE DERIVED FROM WASTE MATERIALS INCLUDING YARD DEBRIS, WOOD WASTES OR OTHER ORGANIC MATERIALS NOT INCLUDING MANURE OR BIOSOLIDS MEETING THE STANDARDS DEVELOPED BY THE US COMPOSTING COUNCIL (USCC). THE PRODUCT SHALL BE CERTIFIED THROUGH THE USCC SEAL OF TESTING ASSURANCE (STA) PROGRAM (A COMPOST TESTING AND INFORMATION DISCLOSURE PROGRAM).

A. COMPOST QUALITY ANALYSIS: BEFORE DELIVERY OF THE SOIL, THE SUPPLIER SHALL SUBMIT A COPY OF LAB ANALYSIS PERFORMED BY A LABORATORY THAT IS ENROLLED IN THE US COMPOSTING COUNCIL'S COMPOST ANALYSIS PROFICIENCY (CAP) PROGRAM USING APPROVED TEST METHODS FOR THE EVALUATION OF COMPOSTING AND COMPOST (TMECC). THE LAB REPORT SHALL VERIFY:
1. FEEDSTOCK MATERIALS SHALL BE SPECIFIED AND INCLUDE ONE OF THE FOLLOWING: LANDSCAPE/YARD TRIMMINGS, GRASS CLIPPINGS, FOOD SCRAPS AND AGRICULTURE CROP RESIDUES.
2. ORGANIC MATTER CONTENT: 35%-75% BY DRY WEIGHT.
3. CARBON AND NITROGEN RATIO: C:N < 25:1 AND C:N > 15:1
4. MATURITY AND STABILITY SHALL HAVE A DARK BROWN COLOR AND A SOIL LIKE ODOR. COMPOST EXHIBITING A SOUR OR PUTRID SMELL, CONTAINING RECOGNIZABLE GRASS OR LEAVES, OR IS HOT (120F) UPON DELIVERY IS NOT ACCEPTABLE. IN ADDITION ANY ONE OF THE FOLLOWING IS REQUIRED TO INDICATE STABILITY:
   4.a. OXYGEN TEST < 1.3 02/UNIT TS/HR
   4.b. SPECIFIC OXY. TEST < 1.5 02/UNIT BVS/
   4.c. RESPIRATION TEST < 8 C/UNIT VS/DAY
   4.d. DEWAR TEST < 20 TEMP. RISE (DEGREES C) E.
   4.e. SOLVITA > 5 INDEX VALUE
5. TOXICITY: ANY OF THE FOLLOWING MEASURES IS SUFFICIENT TO INDICATE NON-TOXICITY:
   5.a. NH4- :NO3 < 3
   5.b. AMMONIUM < 500PPM, DRY BASIS
   5.c. SEED GERMINATION > 80% OF CONTROL
   5.d. PLANT TRIALS > 80% OF CONTROL
   5.e. SOLVITA > 5 INDEX VALUE
6. NUTRIENT CONTENT: PROVIDE ANALYSIS DETAILING NUTRIENT CONTENT INCLUDING N-P-K, CA, NA, MG AND B.
   6.a. TOTAL NITROGEN CONTENT 0.9% OR ABOVE PREFERRED
   6.b. BORON: TOTAL SHALL BE < 80PPM: SOLUBLE SHALL BE < 2.5 PPM
7. SALINITY: MUST BE REPORTED: < 6.0 MMHOS/CM
8. PH SHALL BE BETWEEN 6.5 AND 8. MAY VARY WITH PLANT SPECIES.

B. COMPOST FOR BIORETENTION SOIL TEXTURE
COMPOST FOR BIORETENTION SOILS SHALL BE ANALYZED BY AN ACCREDITED LAB USING #200, 1/4", 1/2" AND 1" SIEVES (ASTM D422 OR AS APPROVED BY MUNICIPALITY), AND MEET THE FOLLOWING GRADATION.

SIEVE SIZE	PERCENT PASSING (BY WEIGHT) MIN	MAX.
1"	99	100
1/2"	90	100
1/4"	40	90
NO. 200	2	10

C. BULK DENSITY SHALL BE BETWEEN 500 AND 1100 DRY LBS/CUBIC YARD
D. MOISTURE CONTENT SHALL BE BETWEEN 30%-55% OF DRY SOLIDS.
E. INERTS: COMPOST SHALL BE RELATIVELY FREE OF INERT INGREDIENTS, INCLUDING GLASS, PLASTIC AND PAPER, <1% BY WEIGHT OR VOLUME.
F. WEED SEED/PATHOGEN DESTRUCTION: PROVIDE PROOF OF PROCESS TO FURTHER REDUCE PATHOGENS (PFRP). FOR EXAMPLE, TURNED WINDROWS MUCH REACH MIN. 55C FOR 15 DAYS WITH AT LEAST 5 TURNINGS DURING THAT PERIOD.
G. SELECT PATHOGENS: SALMONELLA < 3 MPN/4 GRAMS OF TS, OR COLIFORM BACTERIA < 1000MPN/GRAM
H. TRACE CONTAMINANTS METALS (LEAD, MERCURY, ETC.) PRODUCT MUST MEET US EPA, 40 CFR 503 REGULATIONS.
I. COMPOST TESTING: THE COMPOST SUPPLIER WILL TEST ALL COMPOST PRODUCTS WITHIN 120 CALENDAR DAYS PRIOR TO APPLICATION. SAMPLES WILL BE TAKEN USING THE STA SAMPLE COLLECTION PROCESS PROTOCOL. (THE SAMPLE COLLECTION PROTOCOL CAN BE OBTAINED FROM THE U.S. COMPOSTING COUNCIL, 4250 VETERANS MEMORIAL HIGHWAY, SUITE 275, HOLBROOK, NY 11741 PHONE: 631-737-4931, (WWW.COMPOSTINGCOUNCIL.ORG) THE SAMPLE SHALL BE SENT TO AN INDEPENDENT STA PROGRAM APPROVED LAB. THE COMPOST SUPPLIER WILL PAY FOF THE TEST.

STORMFILTER STEEL CATCHBASIN DESIGN NOTES

STORMFILTER TREATMENT CAPACITY IS A FUNCTION OF THE CARTRIDGE SELECTION AND THE NUMBER OF CARTRIDGES. 1 CARTRIDGE CATCHBASIN HAS A MAXIMUM OF ONE CARTRIDGE. SYSTEM IS SHOWN WITH A 27" CARTRIDGE, AND IS ALSO AVAILABLE WITH AN 18" CARTRIDGE. STORMFILTER CATCHBASIN CONFIGURATIONS ARE AVAILABLE WITH A DRY INLET BAY FOR VECTOR CONTROL.
PEAK HYDRAULIC CAPACITY PER TABLE BELOW. IF THE SITE CONDITIONS EXCEED PEAK HYDRAULIC CAPACITY, AN UPSTREAM BYPASS STRUCTURE IS REQUIRED.

CARTRIDGE SELECTION

CARTRIDGE HEIGHT	27"			18"			18" DEEP		
RECOMMENDED HYDRAULIC DROP (H)	3.05'			2.3'			3.3'		
SPECIFIC FLOW RATE (gpm/sf)	2 gpm/sf	1.67* gpm/sf	1 gpm/sf	2 gpm/sf	1.67* gpm/sf	1 gpm/sf	2 gpm/sf	1.67* gpm/sf	1 gpm/sf
CARTRIDGE FLOW RATE (gpm)	22.5	18.79	11.25	15	12.53	7.5	15	12.53	7.5
PEAK HYDRAULIC CAPACITY	1.0			1.0			2.25		
INLET PERMANENT POOL LEVEL (A)	1'-0"			1'-0"			2'-0"		
OVERALL STRUCTURE HEIGHT (B)	4'-9"			3'-9"			4'-9"		

* 1.67 gpm/sf SPECIFIC FLOW RATE IS APPROVED WITH PHOSPHOSORB® (PSORB) MEDIA ONLY

GENERAL NOTES
1. CONTECH TO PROVIDE ALL MATERIALS UNLESS NOTED OTHERWISE.
2. FOR SITE SPECIFIC DRAWINGS WITH DETAILED STORMFILTER CATCHBASIN STRUCTURE DIMENSIONS AND WEIGHTS, PLEASE CONTACT YOUR CONTECH ENGINEERED SOLUTIONS LLC REPRESENTATIVE. www.contechES.com
3. STORMFILTER CATCHBASIN WATER QUALITY STRUCTURE SHALL BE IN ACCORDANCE WITH ALL DESIGN DATA AND INFORMATION CONTAINED IN THIS DRAWING.
4. INLET SHOULD NOT BE LOWER THAN OUTLET. INLET (IF APPLICABLE) AND OUTLET PIPING TO BE SPECIFIED BY ENGINEER AND PROVIDED BY CONTRACTOR.
5. MANUFACTURER TO APPLY A SURFACE BEAD WELD IN THE SHAPE OF THE LETTER "O" ABOVE THE OUTLET PIPE STUB ON THE EXTERIOR SURFACE OF THE STEEL SFCB.
6. STORMFILTER CATCHBASIN EQUIPPED WITH 4 INCH (APPROXIMATE) LONG STUBS FOR INLET (IF APPLICABLE) AND OUTLET PIPING. STANDARD OUTLET STUB IS 8 INCHES IN DIAMETER. MAXIMUM OUTLET STUB IS 15 INCHES IN DIAMETER. CONNECTION TO COLLECTION PIPING CAN BE MADE USING FLEXIBLE COUPLING BY CONTRACTOR.
7. STEEL STRUCTURE TO BE MANUFACTURED OF 1/4 INCH STEEL PLATE. CASTINGS SHALL MEET AASHTO M306 LOAD RATING. TO MEET HS20 LOAD RATING ON STRUCTURE, A CONCRETE COLLAR IS REQUIRED. WHEN REQUIRED, CONCRETE COLLAR WITH #4 REINFORCING BARS TO BE PROVIDED BY CONTRACTOR.
8. FILTER CARTRIDGES SHALL BE MEDIA-FILLED, PASSIVE, SIPHON ACTUATED, RADIAL FLOW, AND SELF CLEANING. RADIAL MEDIA DEPTH SHALL BE 7-INCHES. FILTER MEDIA CONTACT TIME SHALL BE AT LEAST 38 SECONDS.
9. SPECIFIC FLOW RATE IS EQUAL TO THE FILTER TREATMENT CAPACITY (gpm) DIVIDED BY THE FILTER CONTACT SURFACE AREA (sq ft).

INSTALLATION NOTES
A. ANY SUB-BASE, BACKFILL DEPTH, AND/OR ANTI-FLOTATION PROVISIONS ARE SITE-SPECIFIC DESIGN CONSIDERATIONS AND SHALL BE SPECIFIED BY ENGINEER OF RECORD.
B. CONTRACTOR TO PROVIDE EQUIPMENT WITH SUFFICIENT LIFTING AND REACH CAPACITY TO LIFT AND SET THE CATCHBASIN (LIFTING CLUTCHES PROVIDED).
C. CONTRACTOR TO TAKE APPROPRIATE MEASURES TO PROTECT CARTRIDGES FROM CONSTRUCTION-RELATED EROSION RUNOFF.

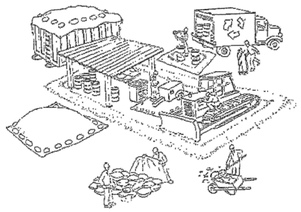
WRITTEN DIMENSIONS ON THESE DRAWINGS SHALL HAVE PRECEDENCE OVER SCALE DIMENSIONS. CONTRACTORS SHALL VERIFY AND BE RESPONSIBLE FOR ALL DIMENSIONS AND CONDITIONS ON THE JOB. THIS OFFICE MUST BE NOTIFIED OF ANY VARIATION FROM THE DIMENSIONS AND CONDITIONS SHOWN BY THESE DRAWINGS. SHOP DETAILS OF ADEQUATE SCALE MUST BE SUBMITTED TO THIS OFFICE FOR APPROVAL BEFORE PROCEEDING WITH FABRICATION ON THE ITEMS SO NOTED.

City of Berkeley's Pollution Prevention - It's Part of the Plan



Make sure your crews and subs do the job right!

Runoff from streets and other paved areas is a major source of pollution and damage to creeks and the San Francisco Bay. Construction activities can directly affect the health of creeks and the Bay unless contractors and crews plan ahead to keep dirt, debris, and other construction waste away from storm drains and local creeks. Following these guidelines and the project specifications will ensure your compliance with City of Berkeley requirements.

Materials storage & spill cleanup

Non-hazardous materials management

- Sand, dirt, and similar materials must be stored at least 10 feet (3 meters) from catch basins. All construction material must be covered with a tarp and contained with a perimeter control during wet weather or when rain is forecasted or when not actively being used within 14 days.
- Use (but don't overuse) reclaimed water for dust control as needed.
- Sweep or vacuum streets and other paved areas daily. Do not wash down streets or work areas with water!
- Recycle all asphalt, concrete, and aggregate base material from demolition activities. Comply with City of Berkeley Ordinances for recycling construction materials, wood, gyp board, pipe, etc.
- Check dumpsters regularly for leaks and to make sure they are not overfilled. Repair or replace leaking dumpsters promptly.
- Cover all dumpsters with a tarp at the end of every work day or during wet weather.

Hazardous materials management

- Label all hazardous materials and hazardous wastes (such as pesticides, paints, thinners, solvents, fuel, oil, and antifreeze) in accordance with city, county, state, and federal regulations.
- Store hazardous materials and wastes in water tight containers, store in appropriate secondary containment, and cover them at the end of every work day or during wet weather or when rain is forecasted.
- Follow manufacturer's application instructions for hazardous materials and be careful not to use more than necessary. Do not apply chemicals outdoors when rain is forecasted within 24 hours.
- Be sure to arrange for appropriate disposal of all hazardous wastes.

Spill prevention and control

- Keep a stockpile of spill cleanup materials (rags, absorbents, etc.) available at the construction site at all times.
- When spills or leaks occur, contain them immediately and be particularly careful to prevent leaks and spills from reaching the gutter, street, or storm drain. Never wash spilled material into a gutter, street, storm drain, or creek!
- Dispose of all containment and cleanup materials properly.
- Report any hazardous materials spills immediately! Dial 911 or the City of Berkeley's Public Works Department by dialing 311

Construction Entrances and Perimeter

- Establish and maintain effective perimeter controls and stabilize all construction entrances and exits to sufficiently control erosion and sediment discharges from site and tracking off site.
- Sweep or vacuum any street tracking immediately and secure sediment source to prevent further tracking.

Vehicle and equipment maintenance & cleaning

- Inspect vehicles and equipment for leaks frequently. Use drip pans to catch leaks until repairs are made; repair leaks promptly.
- Fuel and maintain vehicles on site only in a bermed area or over a drip pan that is big enough to prevent runoff.
- If you must clean vehicles or equipment on site, clean with water only in a bermed area that will not allow rinse water to run into gutters, streets, storm drains, or creeks.
- Do not clean vehicles or equipment on-site using soaps, solvents, degreasers, steam cleaning equipment, etc.

Earthwork & contaminated soils

- Keep excavated soil on the site where it will not collect in the street.
- Transfer to dump trucks should take place on the site, not in the street.
- Use fiber rolls, silt fences, or other control measures to minimize the flow of silt off the site.

- Earth moving activities are only allowed during dry weather by permit and as approved by the City Inspector in the Field.
- Mature vegetation is the best form of erosion control. Minimize disturbance to existing vegetation whenever possible.
- If you disturb a slope during construction, prevent erosion by securing the soil with erosion control fabric, or seed with fast-growing grasses as soon as possible. Place fiber rolls down-slope until soil is secure.
- If you suspect contamination (from site history, discoloration, odor, texture, abandoned underground tanks or pipes, or buried debris), call the Engineer for help in determining what should be done, and manage disposal of cntaminated soil according to their instructions.

Dewatering operations

- Effectively manage all run-on, all runoff within the site, and all runoff that discharges from the site. Run-on from off site shall be directed away from all disturbed areas or shall collectively be in compliance.
- Reuse water for dust control, irrigation, or another on-site purpose to the greatest extent possible.

- Be sure to notify and obtain approval from the Engineer before discharging water to a street, gutter, or storm drain. Filtration or diversion through a basin, tank, or sediment trap may be required.
- In areas of known contamination, testing is required prior to reuse or discharge of groundwater. Consult with the Engineer to determine what testing is required and how to interpret results. Contaminated groundwater must be treated or hauled off-site for proper disposal.

Saw cutting

- Always completely cover or barricade storm drain inlets when saw cutting. Use filter fabric, catch basin inlet filters, or sand/gravel bags to keep slurry out of the storm drain system.
- Shovel, absorb, or vacuum saw-cut slurry and pick up all waste as soon as you are finished in one location or at the end of each work day (whichever is sooner!).
- If saw cut slurry enters a catch basin, clean it up immediately.

Paving/asphalt work

- Always cover storm drain inlets and manholes when paving or applying seal coat, tack coat, slurry seal, or fog seal.
- Protect gutters, ditches, and drainage courses with sand/gravel bags, or earthen berms.
- Do not sweep or wash down excess sand from sand sealing into gutters, storm drains, or creeks. Collect sand and return it to the stockpile, or dispose of it as trash.
- Do not use water to wash down fresh asphalt concrete pavement.

Concrete, grout, and mortar storage & waste disposal

- Store concrete, grout, and mortar under cover, on pallets, and away from drainage areas. These materials must never reach a storm drain.
- Wash out concrete equipment/trucks off-site or into contained washout areas that will not allow discharge of wash water onto the underlying soil or onto the surrounding areas.

- Collect the wash water from washing exposed aggregate concrete and remove it for appropriate disposal off site.

Painting

- Never rinse paint brushes or materials in a gutter or street!
- Paint out excess water-based paint before rinsing brushes, rollers, or containers in a sink.
- Paint out excess oil-based paint before cleaning brushes in thinner.
- Filter paint thinners and solvents for reuse whenever possible. Dispose of oil-based paint sludge and unusable thinner as hazardous waste.

Landscape Materials

- Contain, cover, and store on pallets all stockpiled landscape materials (mulch, compost, fertilizers, etc.) during wet weather or when rain is forecasted or when not actively being used within 14 days.
- Discontinue the application of any erodible landscape material within 2 days of forecasted rain and during wet weather.

Storm drain polluters may be liable for fines of $10,000 or more per day!

EROSION CONTROL NOTES

TEMPORARY EROSION CONTROL MEASURES EFFECTIVE DURING RAINY SEASON – OCTOBER 1 TO APRIL 30

1. TEMPORARY EROSION CONTROL DEVICES SHOWN ON GRADING PLAN WHICH INTERFERE WITH THE WORK SHALL BE RELOCATED OR MODIFIED WHEN THE INSPECTOR SO DIRECTS AS THE WORK PROGRESSES.
2. EXCEPT AS OTHERWISE DIRECTED BY THE INSPECTOR, ALL DEVICES SHOWN ON THE EROSION CONTROL PLAN SHALL BE IN PLACE AT THE END OF EACH WORKING DAY. ALL EROSION CONTROL FACILITIES MUST BE INSPECTED AND REPAIRED AT THE END OF EACH WORKING DAY DURING THE RAINY SEASON AND MAINTAINED DURING THE RAINY SEASON (OCTOBER 1 TO APRIL 30).
3. ALL EROSION AND SEDIMENT CONTROL MEASURES SHALL BE CONSTRUCTED AND MAINTAINED IN ACCORDANCE WITH THE PROVISIONS OF THE ASSOCIATION OF BAY AREA GOVERNMENTS (ABAG) "MANUAL OF STANDARDS FOR EROSION AND SEDIMENT CONTROL MEASURES" UNLESS OTHERWISE STATED WITHIN THESE GENERAL NOTES. CONTROL MEASURES ARE SUBJECT TO THE INSPECTION AND APPROVAL OF THE ENGINEERING DIVISION OF THE PUBLIC SERVICES DEPARTMENT. SCHEDULE AN ENGINEERING INSPECTION AT LEAST 48 HOURS PRIOR TO THE START OF ANY WORK.
4. ALL LOOSE SOIL AND DEBRIS SHALL BE REMOVED FROM THE STREET AREAS UPON STARTING OPERATIONS AND PERIODICALLY THEREAFTER AS DIRECTED BY THE INSPECTOR. THE SITE SHALL BE MAINTAINED SO AS TO MINIMIZE SEDIMENT LADEN RUNOFF TO ANY STORM DRAIN SYSTEM.
5. THE CONTRACTOR SHALL PLACE 3"–4" FRACTURED STONE AGGREGATE AS A GRAVEL ROADWAY (6" MINIMUM THICKNESS FOR THE FULL WIDTH AND 50 FEET LONG) AT EACH ROAD ENTRANCE TO THE SITE. ANY MUD THAT IS TRACKED ONTO PUBLIC STREETS SHALL BE REMOVED THE SAME DAY AS REQUIRED BY THE COUNTY ENGINEER. MINIMUM WIDTH OF GRAVEL ROADWAY IS 10 FEET.
6. A CONCRETE WASHOUT IS REQUIRED FOR ALL CONCRETE WORK. THE WASHOUT SHALL CONSIST OF A CONTAINMENT AREA ENCLOSED BY AN EARTHEN DIKE. PLASTIC TARP, COVERING THE CONTAINMENT AREA AND EARTHEN DIKE, SHALL BE STAKED IN AT OUTSIDE EDGE OF EARTHEN DIKE.
7. ADDITIONAL CONTAINMENT METHODS MUST BE PROVIDED FOR ANY WASTE STORAGE AREA, STOCKPILE/MATERIAL STORAGE AREA AND/OR CONSTRUCTION TOILET AREA.
8. THE PERSON RESPONSIBLE IMPLEMENTING, INSPECTING AND MAINTAINING THE EROSION AND SEDIMENT CONTROL MEASURES IS:

   CONTACT PERSON'S NAME: XXXX
   TELEPHONE NUMBER: XXXX

9. STAND–BY CREWS SHALL BE ALERTED BY THE PERMITTEE OR CONTRACTOR FOR EMERGENCY WORK DURING RAINSTORMS.
10. AFTER OCTOBER 1, ALL EROSION CONTROL MEASURES WILL BE INSPECTED DAILY AND AFTER EACH STORM. AFTER OCTOBER 1, BREACHES IN DIKES AND SWALES WILL BE REPAIRED AT THE CLOSE OF EACH DAY AND WHENEVER RAIN IS FORECAST.
11. AS A PART OF THE EROSION CONTROL MEASURES, UNDERGROUND STORM DRAIN FACILITIES AND CONCRETE SHALL BE INSTALLED COMPLETE AS SHOWN ON THE IMPROVEMENT PLANS.
12. ALL STORM DRAIN INLET STRUCTURES GREATER THAN FOUR FEET IN DEPTH SHALL HAVE STEPS INSTALLED PER THE LATEST ACCEPTED SAFETY STANDARDS. A 6" CONCRETE COVER SLAB SHALL BE INSTALLED OVER PIPE WITH LESS THAN 2.5 FEET OF COVER TO SUBGRADE. ALL PIPE TO BE CLASS III UNLESS OTHERWISE NOTED.
13. ALL GRADED AREAS, INCLUDING, BUT NOT LIMITED TO, CUT AND FILL SLOPES, STREETS, PARKING AREAS, AND BUILDING PADS SHALL BE HYDROSEEDED PER ABAG. IN ADDITION TO HYDROSEEDING, APPLICATION OF STRAW WITH A TACKIFIER OR MULCH MAY BE REQUIRED BY THE COUNTY ENGINEER.
14. IF ANY GRADING OPERATIONS, OTHER THAN LOT FINISH GRADING, ARE TO BE PERFORMED DURING THE RAINY SEASON, OCTOBER 1 THROUGH APRIL 30, AN EROSION CONTROL PLAN MUST BE SUBMITTED BY SEPTEMBER 1 AND THE PLAN MUST BE APPROVED BY THE COUNTY OF ALAMEDA PRIOR TO THE COMMENCEMENT OF ANY SUCH GRADING OPERATIONS.
15. TO MINIMIZE EROSION OF GRADED BANKS, ALL GRADED BANKS STEEPER THAN 2% AND HIGHER THAN 3 FEET, SHALL BE HYDROSEEDED, LANDSCAPED, OR SEALED. IN ADDITION TO HYDROSEEDING, APPLICATION OF STRAW WITH A TACKIFIER OR MULCH MAY BE REQUIRED BY THE COUNTY ENGINEER. IF THE PERMANENT STORM DRAIN SYSTEM IS NOT INSTALLED BY OCTOBER 1, TEMPORARY DITCHES SHALL BE CONSTRUCTED TO CONTAIN THE STORM WATER AND DIRECT IT, IN A MANNER THAT AVOIDS EROSION OF THE BANKS, TO THE EROSION AND SEDIMENT CONTROL FACILITIES.
16. ALL CUT AND FILL SLOPES ARE TO BE PROTECTED TO PREVENT OVERBANK FLOW USING 4" EARTH BERMS OR SILT FENCES.
17. ALL GRADED AREAS, INCLUDING, BUT NOT LIMITED TO, CUT AND FILL SLOPES, STREETS, PARKING AREAS, AND BUILDING PADS SHALL BE HYDROSEEDED PER COUNTY'S REQUIREMENT. SUGGESTED MIX DESIGN FOLLOWS:

'BLANDO' BROME	40 LBS/ACRE
ZORRO FESCUE	10 LBS/ACRE
HYKON ROSE CLOVER	9 LBS/ACRE
SUB CLOVER	5 LBS/ACRE
CALIFORNIA NATIVE WILDFLOWER	8 LBS/ACRE
FERTILIZER	300 LBS/ACRE
ORGANIC BINDER	100 LBS/ACRE
STRAW MULCH	4000 LBS/ACRE

18. BORROW AREAS AND TEMPORARY STOCKPILES SHALL BE PROTECTED WITH APPROPRIATE EROSION CONTROL MEASURES TO THE SATISFACTION OF THE COUNTY ENGINEER.
19. SANDBAGS, STRAW WATTLES AND/OR STRAW BALES SHALL BE STOCKPILED ON SITE AND PLACED AT INTERVALS SHOWN ON EROSION CONTROL PLANS, WHEN THE RAIN FORECAST IS 40% OR GREATER, OR WHEN DIRECTED BY THE INSPECTOR.
20. SANDBAGS REFERRED TO IN THE PRECEDING ITEMS MUST BE FULL. APPROVED SANDBAG FILL MATERIALS ARE DECOMPOSED GRANITE AND/OR GRAVEL, OR OTHER MATERIALS APPROVED BY THE INSPECTOR.
21. WHEN DIRECTED BY THE INSPECTOR, A 12–INCH BERM SHALL BE MAINTAINED ALONG THE TOP OF THE SLOPE OF THOSE FILLS ON WHICH GRADING IS NOT IN PROGRESS.
22. WHEN PAD ELEVATIONS OF ADJACENT LOTS OR ELEVATIONS BETWEEN THE STREET AND THE LOT ARE SEPARATED BY MORE THAN 6 FEET, A MINIMUM 12" BERM SHALL BE MAINTAINED ALONG THE PROPERTY LINE SEPARATING THE LOTS, AND THE BERM SHALL DIRECT THE WATER TO THE OUTLET. VELOCITY CHECK DAMS SHALL BE INSTALLED BETWEEN THE OUTLET ON THE LOT AND THE STREET.
23. PROVIDE VELOCITY CHECK DAMS IN ALL UNPAVED STREETS AT THE INTERVALS INDICATED BELOW IN NOTE #24. VELOCITY CHECK DAMS MAY BE CONSTRUCTED OF STRAW BALES, SANDBAGS OR OTHER EROSION RESISTANT MATERIALS APPROVED BY THE INSPECTOR, AND SHALL EXTEND COMPLETELY ACROSS THE STREET OR CHANNEL AT RIGHT ANGLES TO THE CENTERLINE. EARTH DIKES MAY NOT BE USED AS VELOCITY CHECK DAMS.
24. PROVIDE VELOCITY CHECK DAMS IN ALL UNPAVED GRADED CHANNELS AT THE INTERVALS INDICATED BELOW:

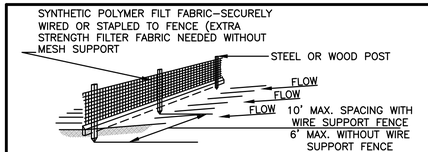
GRADE OF CHANNEL	INTERVAL
LESS THAN 3%	100 FEET
3% TO 6%	50 FEET
OVER 6%	25 FEET

25. SEWER OR STORM DRAIN TRENCHES THAT ARE OUT THROUGH BASIN DIKES OR BASIN INLET DIKES, SHALL BE PLUGGED WITH SANDBAGS FROM TOP OF PIPE TO TOP OF DIKE. SEWER LINES SHALL FIRST BE ENCASED IN CONCRETE BEFORE SANDBAGS ARE PLACED.
26. ALL OPEN UTILITY TRENCHES SHALL BE BLOCKED AT THE PRESCRIBED INTERVALS FROM THE BOTTOM TO TOP WITH A DOUBLE ROW OF SANDBAGS PRIOR TO BACKFILL. SEWER TRENCHES SHALL BE BLOCKED AT THE PRESCRIBED INTERVALS WITH A DOUBLE ROW OF SANDBAGS EXTENDING DOWNWARD, TWO SANDBAGS FROM THE GRADED SURFACE OF THE STREET. SANDBAGS ARE TO BE PLACED WITH ALTERNATE HEADER AND STRETCHER COURSES. THE INTERVALS PRESCRIBED BETWEEN SANDBAG LOCKING SHALL DEPEND ON THE SLOPE OF THE GROUND SURFACE, BUT NOT EXCEED THE FOLLOWING:

GRADE OF THE STREET	INTERVAL
LESS THAN 2%	AS REQUIRED
2% TO 4%	100 FEET
4% TO 10%	50 FEET
OVER 10%	25 FEET

27. AFTER STORM DRAIN, SANITARY SEWER AND UTILITY TRENCHES ARE BACKFILLED AND COMPACTED, THE SURFACES OVER SUCH TRENCHES SHALL BE MOUNDED SLIGHTLY TO PREVENT CHANNELING OF WATER IN THE TRENCH AREA. CARE SHOULD BE EXERCISED TO PROVIDE FOR CROSS FLOW AT FREQUENT INTERVALS WHERE TRENCHES ARE NOT ON THE CENTER LINE OF A CROWNED STREET.
28. SEDIMENT TRAPS SHALL BE CLEANED OUT PER INSPECTOR'S DIRECTION. IT IS THE CONTRACTOR'S RESPONSIBILITY TO CLEAN THE DESILTING BASINS AND THE SEDIMENT TRAPS.
29. THIS PLAN MAY NOT COVER ALL THE SITUATIONS THAT ARISE DURING CONSTRUCTION DUE TO UNANTICIPATED FIELD CONDITIONS. VARIATIONS MAY BE MADE TO THESE PLANS IN THE FIELD, SUBJECT TO APPROVAL OF THE COUNTY ENGINEER.
30. EROSION CONTROL STRUCTURES SHALL BE ADJUSTED BY THE CONTRACTOR TO REFLECT ALL CHANGES IN DRAINAGE AS STREETS AND BUILDING PADS ARE BEING INSTALLED.
31. INSTALL EXCELSIOR CURLEX II EROSION CONTROL BLANKET OR APPROVED EQUAL ON GRADED SLOPES STEEPER THAN 3:1. INSTALL PER MANUFACTURER'S RECOMMENDATIONS AND SPECIFICATIONS.

EROSION CONTROL NOTES | 10

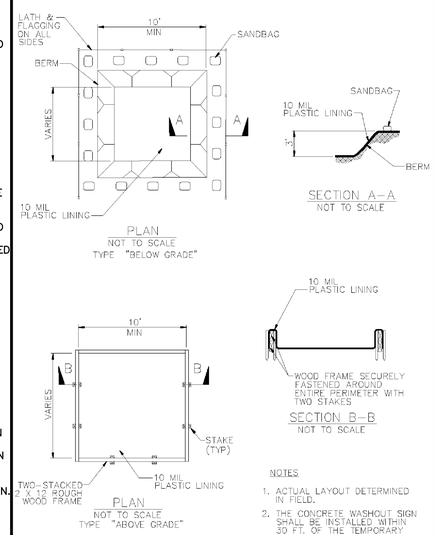


STANDARD DETAIL TRENCH WITH NATIVE BACKFILL

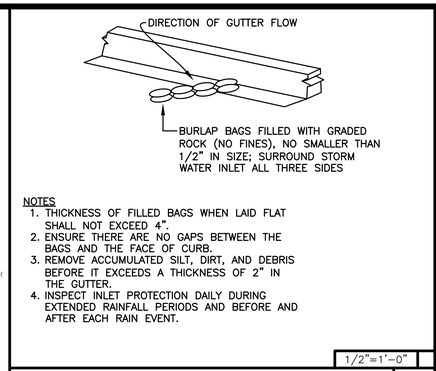
ALTERNATE DETAIL TRENCH WITH GRAVEL

1/2"=1'–0"

SILT FENCE | 9



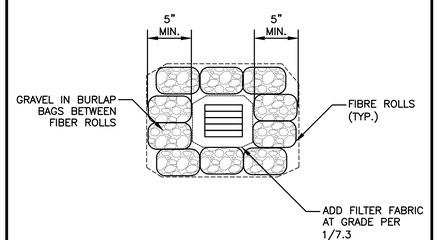
WM–8 CONCRETE WASTE MANAGEMENT | 7



NOTES
1. THICKNESS OF FILLED BAGS WHEN LAID FLAT SHALL NOT EXCEED 4".
2. ENSURE THERE ARE NO GAPS BETWEEN THE BAGS AND THE FACE OF CURB.
3. REMOVE ACCUMULATED SILT, DIRT, AND DEBRIS BEFORE IT EXCEEDS A THICKNESS OF 2" IN THE GUTTER.
4. INSPECT INLET PROTECTION DAILY DURING EXTENDED RAINFALL PERIODS AND BEFORE AND AFTER EACH RAIN EVENT.

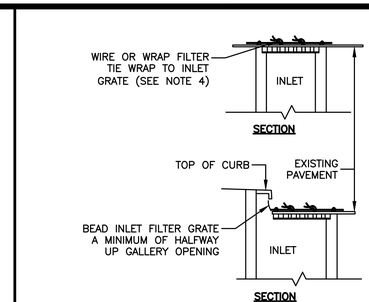
1/2"=1'–0"

GRAVEL BAG CHECK DAM | 4



1/2"=1'–0"

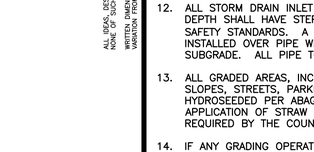
INLET PROTECTION (UNPAVED AREAS) | 5



NOTES:
1. FILTER FABRIC SHALL MEET CAL–TRANS OR HAY BAG SPECIFICATIONS.
2. FILTER MATERIAL AND GRATE SHALL OVERLAP INLET ON ALL SIDES BY A MINIMUM OF 1"
3. INLET FILTER GRATE SHALL BE MADE OF RE–BARS, CRISS CROSSED AT 6" (WELDED NUMBERED 3 OR TIED TOGETHER WITH WIRE) OR A PLATE WITH MINIMUM OF 75% OPEN AREA, BOTH OF SUFFICIENT STRENGTH TO PREVENT BENDING WHEN DRIVEN OVER BY A VEHICLE.
4. INLET FILTER GRATE SHALL BE SECURELY ATTACHED TO DRAIN INLET BY WIRE OR TIE–WRAPS (BEND OVER).
5. FILTERS SHALL BE INSPECTED WEEKLY AND AFTER EACH RAINFALL. REPAIRS, SEDIMENT/ DEBRIS REMOVAL SHALL BE MADE TO ASSURE EFFICIENCY OF FILTER SYSTEM.

1/2"=1'–0"

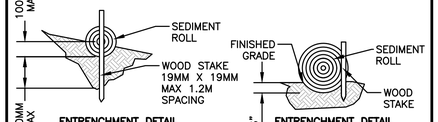
INLET PROTECTION (PAVED AREAS) | 1



CONCRETE WASTE MANAGEMENT WM–8 | 8

LIMITATIONS:
–DESIGNED FOR LOW SURFACE FLOWS NOT TO EXCEED 1 CFS FOR SMALL AREAS.
–DESIGNED FOR SHORT SLOPED OR SLOPES FLATTER THAN 3:1
– PRIMARY PURPOSE IS NOT SEDIMENT CONTROL, ALTHOUGH DO PROVIDE SOME SEDIMENT REMOVAL.

INSPECTION AND MAINTENANCE:
– REPAIR OR REPLACE SPLIT, TORN, UNRAVELING, OR SLUMPING FIBER ROLLS.
–INSPECT FIBER ROLLS WHEN RAIN IS FORECAST, FOLLOWING RAIN EVENTS AND AT LEAST DAILY DURING PROLONGED RAINFALL. PERFORM REQUIRED MAINTENANCE.
–IN MOST CASES, FIBER ROLLS DO NOT REQUIRE REMOVAL AND CAN BE ABANDONED IN PLACE. IF NOTE EXCESSIVELY SOILED, ROLLS MAY BE REMOVED. REPLACED AND REUSED.



ENTRENCHMENT DETAIL IN SLOPE AREA

ENTRENCHMENT DETAIL IN FLAT AREA

PURPOSE:
FIBER ROLLS (SEDIMENT LOGS OR WATTLES), COMPOSED OF BIO–DEGRADABLE FIBERS STUFFED IN A PHOTO–DEGRADEABLE OPEN WEAVE NETTING, ARE DESIGNED TO REDUCE SEDIMENT RUNOFF FROM DISTURBED SOILS INTO THE STORM DRAIN SYSTEM OR WATER–COURSES. FIBER ROLLS ARE POROUS AND ALLOW WATER TO FILTER THROUGH FIBERS AND TRAP SEDIMENT, INCREASE FILTRATION RATES, SLOW RUNOFF AND REDUCE SHEET AND HILL EROSION. WATTLES ALSO CREATE A FAVORABLE ENVIRONMENT FOR PLANT ESTABLISHMENT.

APPLICATION:
–ALONG THE FACE OF EXPOSED AND ERODIBLE SLOPES TO SHORTEN SLOPE LENGTH.
–AT GRADE BREAKS WHERE SLOPES TRANSITION TO A STEEPER SLOPE
–IN DRAINAGE SWALES TO SLOW FLOWS
–ALONG STREAMBANKS TO ASSIST STABILIZATION AND REVEGETATION

INSPECTION AND MAINTENANCE:
FOLLOW MANUFACTURER'S RECOMMENDATIONS FOR INSTALLATION. IN GENERAL, THESE WILL BE AS FOLLOWS:
–FINE GRADE THE SUBGRADE BY HAND DRESSING WHERE NECESSARY TO REMOVE LOCAL DEVIATIONS AND TO REMOVE LARGER STONES OR DEBRIS THAT WILL INHIBIT INTIMATE CONTACT OF THE FIBER ROLL WITH THE SUBGRADE.
–PRIOR TO ROLL INSTALLATION, CONTOUR A CONCAVE KEY TRENCH 50 TO 100MM (2 TO 4 INCHES) DEEP ALONG THE PROPOSED INSTALLATION ROUTE.
–SOIL EXCAVATION IN TRENCHING SHOULD BE PLACED ON THE UPHILL OR FLOW SIDE OF THE ROLL TO PREVENT WATER FROM UNDERCUTTING THE ROLL.
–PLACE FIBER ROLLS INTO THE KEY TRENCH AND STAKE ON BOTH SIDES OF THE ROLL WITHIN 6 FEET OF EACH END AND THEN EVERY SIX INCHES WITH 1" X 2" X 23" STAKES.
–STAKE ARE TYPICALLY DRIVEN IN ON ALTERNATING SIDES OF THE ROLL. WHEN MORE THAN ONE FIBER ROLL IS PLACED IN A ROW, THE ROLLS SHOULD BE BUTTED SECURELY TO ONE ANOTHER TO PROVIDE A TIGHT JOINT, NOT OVERLAPPED.

TITLE DESCRIPTION

REAL PROPERTY IN THE CITY OF BERKELEY, COUNTY OF ALAMEDA, STATE OF CALIFORNIA, DESCRIBED AS FOLLOWS;

PORTION OF LOT 4, BLOCK 13, "MAP OF THE PROPERTY OF COLLEGE HOMESTEAD ASSOCIATION", RECORDED MAY 15, 1866, MAP BOOK "T" OF DEEDS, PAGE 799, ALAMEDA COUNTY RECORDS.

BEGINNING AT A POINT OF THE INTERSECTION OF THE WESTERN LINE OF ELLSWORTH STREET WITH THE SOUTHERN LINE OF DURANT AVENUE, AND RUNNING THENCE WESTERLY ALONG SAID LINE OF DURANT AVENUE, 94 FEET; THENCE AT RIGHT ANGLES SOUTHERLY 90 FEET; THENCE EASTERLY PARALLEL WITH SAID LINE OF DURANT AVENUE, 94 FEET TO THE WESTERN LINE OF ELLSWORTH STREET; THENCE NORTHERLY ALONG SAID LAST NAMED LINE, 90 FEET TO THE POINT OF BEGINNING.

EXCEPTING THEREFROM THE EXCLUSIVE RIGHT TO PROSPECT FOR, DRILL FOR, PRODUCE AND TAKE ANY OIL, GAS OR OTHER HYDROCARBON SUBSTANCES OR MINERAL SUBSTANCES AND ACCOMPANYING FLUIDS INCLUDING ALL GEOTHERMAL RESOURCES, FROM THE REAL PROPERTY GRANTED HEREIN, FROM THE DEPTH OF FIVE HUNDRED FEET FROM THE SAID REAL PROPERTY, INCLUDING THE RIGHT TO SLANT DRILL FROM ADJACENT PROPERTY, THE RIGHT TO UTILIZE SUBSURFACE STORAGE FOR NATURAL SUBSTANCES, AND THE RIGHT TO MAINTAIN SUBSURFACE PRESSURES.
GRANTOR COVENANTS AND EGRESS THAT THE ABOVE RESERVED RIGHTS WILL NOT BE EXERCISED IN DEROGATION OF GRANTEE'S USED AND PURPOSES OF THE SURFACE OF REAL PROPERTY. AS RESERVED IN THE DEED EXECUTED BY THE REGENTS OF THE UNIVERSITY OF CALIFORNIA, A CALIFORNIA CORPORATION, RECORDED SEPTEMBER 2, 1983, SERIES NO 83-163400, ALAMEDA COUNTY RECORDS.

APN: 055-1887-001

THE PROPERTY SURVEYED IS THE SAME AS DESCRIBED ABOVE AND SHOWN IN THE TITLE COMMITMENT FROM FIRST AMERICAN TITLE INSURANCE COMPANY, COMMITMENT NO. NCS-1177686-CC AND AN EFFECTIVE DATE OF SEPTEMBER 18, 2023, UPDATED OCTOBER 06, 2023.

TITLE COMMITMENT INFORMATION

The Title Description and Schedule 'B' items are the same as shown on the title commitment provided by First American Title Insurance Company, Commitment No. NCS-1177686-CC, issued with an effective date of September 18, 2023, updated October 06, 2023.

SURVEYOR'S NOTES

1. ALL STATEMENTS WITHIN THE CERTIFICATION, AND OTHER REFERENCES LOCATED ELSEWHERE HEREON, RELATED TO UTILITIES, IMPROVEMENTS, STRUCTURES, BUILDINGS, PARTY WALLS, EASEMENTS, SERVITUDES, FOUNDATIONS AND POSSIBLE ENCROACHMENTS ARE BASED SOLELY ON ABOVE GROUND, VISIBLE EVIDENCE, UNLESS ANOTHER SOURCE OF INFORMATION IS SPECIFICALLY REFERENCED HEREON.

2. SUBJECT TRACT HAS DIRECT PHYSICAL DRIVEWAY ACCESS TO ELLSWORTH STREET AND DURANT AVENUE, BOTH DEDICATED PUBLIC RIGHTS-OF-WAY.

3. THE DIMENSIONS AND AREA OF THE BUILDING(S) SHOWN ARE BASED ON THE BUILDING'S EXTERIOR FOOTPRINT AT GROUND LEVEL.

4. THE POINT OF HEIGHT MEASUREMENT IS IDENTIFIED ON THE SURVEY AND WAS TAKEN FROM THE NEAREST ADJACENT GRADE AT SAID POINT, THIS POINT REPRESENTS THE HEIGHT OF THE STRUCTURE AS OBSERVED FROM GROUND LEVEL.

5. UNDERGROUND UTILITIES HAVE BEEN LOCATED AND/OR SHOWN ON THIS SURVEY, ONLY VISIBLE AND/OR MARKED UTILITY APPURTENANCES ARE SHOWN.

6. THERE IS NO OBSERVABLE EVIDENCE OF EARTH MOVING WORK, OR BUILDING CONSTRUCTION ON THE SURVEYED PROPERTY.

7. THERE ARE NO OBSERVABLE EVIDENCE OF ANY CHANGES IN STREET RIGHT-OF-WAYS OR RECENT STREET OR SIDEWALK CONSTRUCTION OR REPAIR.

8. THERE IS NO OBSERVABLE EVIDENCE OF CEMETERIES ON THE SURVEYED PROPERTY.

9. ALL RECIPROCAL EASEMENT AGREEMENTS ("REAS") THAT HAVE BEEN REPORTED BY THE TITLE REPORT PROVIDED HAVE BEEN DENOTED ON THE SURVEY AND ARE SHOWN HEREON. THE LIMITS OF ANY OFFSITE APPURTENANT EASEMENTS THAT HAVE BEEN REPORTED BY THE TITLE REPORT PROVIDED HAVE BEEN DENOTED ON THE SURVEY AND ARE SHOWN HEREON.

10. THIS SURVEY DOES NOT PROVIDE A DETERMINATION OR OPINION CONCERNING THE LOCATION OR EXISTENCE OF WETLANDS, FAULT LINES, TOXIC OR HAZARDOUS WASTE AREAS, SUBSIDENCE, SUBSURFACE AND ENVIRONMENTAL CONDITIONS OR GEOLOGICAL ISSUES. NO STATEMENT IS MADE CONCERNING THE SUITABILITY OF THE SUBJECT TRACT FOR ANY INTENDED USE, PURPOSE OR DEVELOPMENT.

11. THE SURVEYED BOUNDARY SHOWN HEREON ARE CONTIGUOUS WITH ADJOINING PROPERTIES AND/OR RIGHTS OF WAY WITHOUT ANY GAPS, GORES OR OVERLAPS.

12. NO VISIBLE EVIDENCE OF SUBSTANTIAL AREAS OF REFUSE WERE OBSERVED AT THE TIME THE FIELDWORK WAS PERFORMED.

13. THE BOUNDARY LINE DIMENSIONS AS SHOWN ON THIS SURVEY MAP FORM A MATHEMATICALLY CLOSED FIGURE.

SURVEYOR'S CERTIFICATE

TO: 2298 DURANT LP, A CALIFORNIA LIMITED PARTNERSHIP; FIRST AMERICAN TITLE INSURANCE COMPANY:

THIS IS TO CERTIFY THAT THIS MAP OR PLAT AND THE SURVEY ON WHICH IT IS BASED WERE MADE IN ACCORDANCE WITH THE 2021 MINIMUM STANDARD DETAIL REQUIREMENTS FOR ALTA/NSPS LAND TITLE SURVEYS, JOINTLY ESTABLISHED AND ADOPTED BY ALTA AND NSPS, AND INCLUDES ITEMS 2, 3, 4, 5, 6(A), 6(B), 7(A), 7(B)(1), 7(C), 8, 9, 11(B), 13, 14, 16, 17 AND 19 OF TABLE A THEREOF. THE FIELDWORK WAS COMPLETED ON JUNE 29, 2023.

TITLE DESCRIPTION

THE LAND REFERRED TO IS SITUATED IN THE COUNTY OF ALAMEDA, CITY OF BERKELEY, STATE OF CALIFORNIA, AND IS DESCRIBED AS FOLLOWS:

THAT PARCEL OF LAND IN THE CITY OF BERKELEY, COUNTY OF ALAMEDA, STATE OF CALIFORNIA, DESCRIBED AS FOLLOWS:

A PORTION OF LOT 4, BLOCK 13, "PROPERTY OF THE COLLEGE HOMESTEAD ASSOCIATION", FILED MAY 15, 1866, BOOK T OF DEEDS, PAGE 799, ALAMEDA COUNTY RECORDS, DESCRIBED AS FOLLOWS:

BEGINNING AT A POINT ON THE WESTERLY LINE OF ELLSWORTH STREET, DISTANT 90 FEET SOUTH OF THE INTERSECTION OF THE WESTERLY LINE OF ELLSWORTH STREET AND THE SOUTHERLY LINE OF DURANT AVENUE; THENCE SOUTHERLY ALONG THE WESTERLY LINE OF ELLSWORTH STREET 40 FEET; THENCE AT A RIGHT ANGLE WIESTERLY PARALLEL TO THE SOUTHERLY LINE OF DURANT AVENUE 94 FEET; THENCE NORTHERLY AT A RIGHT ANGLE PARALLEL TO THE WESTERLY LINE OF ELLSWORTH STREET, 40 FEET; THENCE AT A RIGHT ANGLE EASTERLY 94 FEET TO THE POINT OF BEGINNING.

APN: 055-1887-002

THE PROPERTY SURVEYED IS THE SAME AS DESCRIBED ABOVE AND SHOWN IN THE TITLE COMMITMENT FROM FIRST AMERICAN TITLE INSURANCE COMPANY, COMMITMENT NO. NCS-1183023-CC AND AN EFFECTIVE DATE OF MAY 31, 2023.

TITLE COMMITMENT INFORMATION

The Title Description and Schedule 'B' items are the same as shown on the title commitment provided by First American Title Insurance Company, Commitment No. NCS-1183023-CC, issued with an effective date of May 31, 2023.

SURVEYOR'S NOTES

1. ALL STATEMENTS WITHIN THE CERTIFICATION, AND OTHER REFERENCES LOCATED ELSEWHERE HEREON, RELATED TO UTILITIES, IMPROVEMENTS, STRUCTURES, BUILDINGS, PARTY WALLS, EASEMENTS, SERVITUDES, FOUNDATIONS AND POSSIBLE ENCROACHMENTS ARE BASED SOLELY ON ABOVE GROUND, VISIBLE EVIDENCE, UNLESS ANOTHER SOURCE OF INFORMATION IS SPECIFICALLY REFERENCED HEREON.

2. SUBJECT TRACT HAS DIRECT PHYSICAL DRIVEWAY ACCESS TO ELLSWORTH STREET AND DURANT AVENUE, BOTH DEDICATED PUBLIC RIGHTS-OF-WAY.

3. THE DIMENSIONS AND AREA OF THE BUILDING(S) SHOWN ARE BASED ON THE BUILDING'S EXTERIOR FOOTPRINT AT GROUND LEVEL.

4. THE POINT OF HEIGHT MEASUREMENT IS IDENTIFIED ON THE SURVEY AND WAS TAKEN FROM THE NEAREST ADJACENT GRADE AT SAID POINT, THIS POINT REPRESENTS THE HEIGHT OF THE STRUCTURE AS OBSERVED FROM GROUND LEVEL.

5. UNDERGROUND UTILITIES HAVE BEEN LOCATED AND/OR SHOWN ON THIS SURVEY. ONLY VISIBLE AND/OR MARKED UTILITY APPURTENANCES ARE SHOWN.

6. THERE IS NO OBSERVABLE EVIDENCE OF EARTH MOVING WORK, OR BUILDING CONSTRUCTION ON THE SURVEYED PROPERTY.

7. THERE ARE NO OBSERVABLE EVIDENCE OF ANY CHANGES IN STREET RIGHT-OF-WAYS OR RECENT STREET OR SIDEWALK CONSTRUCTION OR REPAIR.

8. THERE IS NO OBSERVABLE EVIDENCE OF CEMETERIES ON THE SURVEYED PROPERTY.

9. ALL RECIPROCAL EASEMENT AGREEMENTS ("REAS") THAT HAVE BEEN REPORTED BY THE TITLE REPORT PROVIDED HAVE BEEN DENOTED ON THE SURVEY AND ARE SHOWN HEREON. THE LIMITS OF ANY OFFSITE APPURTENANT EASEMENTS THAT HAVE BEEN REPORTED BY THE TITLE REPORT PROVIDED HAVE BEEN DENOTED ON THE SURVEY AND ARE SHOWN HEREON.

10. THIS SURVEY DOES NOT PROVIDE A DETERMINATION OR OPINION CONCERNING THE LOCATION OR EXISTENCE OF WETLANDS, FAULT LINES, TOXIC OR HAZARDOUS WASTE AREAS, SUBSIDENCE, SUBSURFACE AND ENVIRONMENTAL CONDITIONS OR GEOLOGICAL ISSUES. NO STATEMENT IS MADE CONCERNING THE SUITABILITY OF THE SUBJECT TRACT FOR ANY INTENDED USE, PURPOSE OR DEVELOPMENT.

11. THE SURVEYED BOUNDARY SHOWN HEREON ARE CONTIGUOUS WITH ADJOINING PROPERTIES AND/OR RIGHTS OF WAY WITHOUT ANY GAPS, GORES OR OVERLAPS.

12. NO VISIBLE EVIDENCE OF SUBSTANTIAL AREAS OF REFUSE WERE OBSERVED AT THE TIME THE FIELDWORK WAS PERFORMED.

13. THE BOUNDARY LINE DIMENSIONS AS SHOWN ON THIS SURVEY MAP FORM A MATHEMATICALLY CLOSED FIGURE.

14. RECORD AND MEASURED DISTANCES ARE THE SAME.

SURVEYOR'S CERTIFICATE

TO: ELLSWORTH, CASCADE CAPITAL- BERKELEY MULTI-FAMILY I, LLC, A CALIFORNIA LIMITED LIABILITY COMPANY; FIRST AMERICAN TITLE INSURANCE COMPANY;

THIS IS TO CERTIFY THAT THIS MAP OR PLAT AND THE SURVEY ON WHICH IT IS BASED WERE MADE IN ACCORDANCE WITH THE 2021 MINIMUM STANDARD DETAIL REQUIREMENTS FOR ALTA/NSPS LAND TITLE SURVEYS, JOINTLY ESTABLISHED AND ADOPTED BY ALTA AND NSPS, AND INCLUDES ITEMS 2, 3, 4, 5, 6(A), 6(B), 7(A), 7(B)(1), 7(C), 8, 9, 11(B), 13, 14, 16, 17 AND 19 OF TABLE A THEREOF. THE FIELDWORK WAS COMPLETED ON JUNE 29, 2023.

PLANTING NOTES

1. PLANT SYMBOLS WITH MULTIPLE SPECIES LISTED MAY BE ANY OF THE SPECIES, AS AVAILABLE AT TIME OF INSTALLATION.
2. ALL PLANTING AREAS TO RECEIVE 3" LAYER COMPOSTED BARK MULCH (50% 'GARDEN MULCH' + 50% 'FOREST FLOOR BARK' BY: AMERICAN SOIL & STONE) CONTRACTOR TO SUBMIT SAMPLES FOR REVIEW AND APPROVAL.
3. ALL PLANTING AREAS TO RECEIVE 1" COMPOST TO TOP 6" - 12" OF SOIL WITH SOIL TESTING.
4. ALL PROPOSED PLANT SPECIES ARE CLIMATE-ADAPTED TO BERKELEY AND ARE INTENDED TO BE LOW-MAINTENANCE.
5. APPROXIMATELY 80% OF THE PROPOSED PLANT SPECIES ARE CALIFORNIA NATIVES WITH ENHANCED BENEFICIAL QUALITIES FOR NATIVE ANIMAL SPECIES HABITAT, FOOD AND OVERALL ADAPTABILITY.
6. PLANT CITY STREET TREES ACCORDANCE WITH THE AMERICAN NATIONAL STANDARDS INSTITUTE (ANSI) A300 (PART 6)-2012.
7. USE FLEXI-PAVE IN CITY STREET TREE WELLS
8. SEE CITY OF BERKELEY 'TREE PRESERVATION DURING CONSTRUCTION' RECOMMENDATIONS FOR TREE PROTECTION GUIDELINES.

BALL FULL PORT VALVE / DRIPLINE FLUSH OUT ASSEMBLY		SCHEDULE 40 PVC BALL FULL PORT VALVE AND PVC FLEX HOSE TUBING INSTALLED WITHIN ROUND VALVE BOX - ADAPT TO INSTALL DRIPLINE TUBING AS REQUIRED - UNITS WHERE SHOWN LOCATED AT ENDS OF DRIPLINE SYSTEMS		
PRESSURIZED MAIN LINE - COPPER IRRIGATION WATER PIPING STUB OUT	———	DRY COPPER PIPING - 3/4-INCH SIZE PIPING STUB OUT - PIPING ROUTED THROUGH BUILDING AND ROOF DECKING(S) FOR IRRIGATION SYSTEM CONTINUATION PER MECHANICAL ENGINEER'S DRAWINGS - REFER TO MECHANICAL ENGINEER'S DRAWINGS FOR ACTUAL LOCATION - ROUTING OF PIPE TO IRRIGATION VALUE TO BE PROVIDED BY PLUMBING CONTRACTOR.		
LATERAL LINE	- - - - - INDICATES CONNECTION TO ASSIGNED DRIP LINES, TYP.	SCHEDULE 40 PVC - 3/4 INCH DIA. - AS SHOWN ON PLANS		

IRRIGATION NOTES

1. IRRIGATION TO CONNECT TO WATER SUPPLY WITH BACKFLOW PREVENTION DEVICE INSTALLED PER AGENCY REQUIREMENTS.
2. IRRIGATION SYSTEM SHALL EMPLOY AN ELECTRONIC 'SMART' CONTROLLER WITH WEATHER-SENSING CAPABILITIES, 6 MIN. VALVES, SINGLE WIRE TYPE.
3. PLANTING HAS BEEN DESIGNED IN 'HYDROZONES' - WITH VALVES GROUPED ACCORDING TO LOCATION AND PLANT TYPE.
4. WATER EMITTERS SHALL BE USED TO DELIVER THE WATER IN THE MOST EFFICIENT MANNER POSSIBLE. USE, IN ORDER: IN-LINE DRIP, MICRO SPRAY, POINT-SOURCE. PROVIDE SEPARATE SYSTEMS FOR TREE POPUP STREAM BUBBLERS WITH PCS.
5. REFER TO PLUMBING PLANS FOR IRRIGATION WATER POINT-OF-CONNECTION LOCATION.
6. REFER TO ELECTRICAL ENGINEERING PLANS FOR IRRIGATION CONTROLLER CONNECTION LOCATION.

IRRIGATION NOTES

1. **POINT-SOURCE DRIP** IRRIGATED AREAS USE 1/2" MAINLINE FOR DISTRIBUTION TO 1/4" IN-LINE DRIP TUBING WITH EMITTERS SPACED 6", WRAPPED AROUND INDIVIDUAL PLANTS. MAINLINE TO BE ROUTED SO THAT IT IS AS CLOSE TO EACH INDIVIDUAL PLANT AS POSSIBLE. IF PLANT IS OVER 24" AWAY FROM THE MAINLINE, USE A 1/4" SOLID LATERAL LINE TO CONNECT THE 1/4" IN-LINE DRIP TUBING TO THE 1/2" MAINLINE. WRAP PLANT ONCE WITH IN-LINE DRIP TUBING AROUND ROOTBALL PER THE FOLLOWING:

2. IN-LINE DRIP IRRIGATED AREAS USE 1/2" MAINLINE FOR DISTRIBUTION TO 1/4" IN-LINE DRIP TUBING WITH EMITTERS SPACED 6", TO COMPLETELY COVER THE DESIGNATED PLANTING AREA. SPACE DRIP TUBING TO COVER ENTIRE PLANTING AREA AS SHOWN IN THE STANDARD IN-LINE DRIP LAYOUT DETAIL.

3. MP ROTATORS IRRIGATED AREAS USE 1/2" MAINLINE FOR DISTRIBUTION TO HIGH-EFFICIENCY POP-UP ROTATING JET STREAM EMITTERS, SPACED TO ENSURE HEAD-TO-HEAD COVERAGE WITHIN DESIGNATED PLANTING AREAS. ALL EMITTERS TO BE 6" AWAY FROM HARDSCAPE EDGE TO AVOID OVER-SPRAY.

CONTAINER SIZE	**IN-LINE DRIP TUBING PLACEMENT** (FROM CENTER OF PLANT)
#1	3"
#5	4"
#15	5"
24" BOX	5" AND 10" (2 LOOPS)

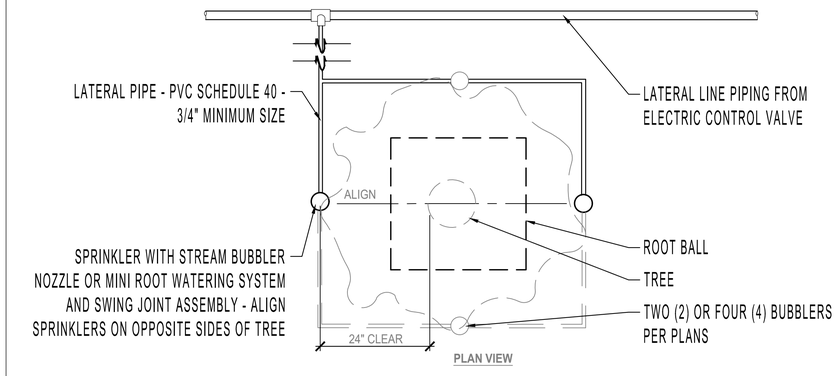
NOTES

1. REFER TO EQUIPMENT LEGEND FOR DRIPLINE AND PLANT MATERIAL ASSIGNMENT.
2. REFER TO STATION CALLOUTS ON PLAN SHEETS FOR SPECIFIC VALVE PERFORMANCE REQUIREMENTS AND CONFIGURATION OF DRIPLINE.
3. PROVIDE COUPLING FITTING (UNIVERSAL NUT LOCK) - WHERE REQUIRED.
4. REFER TO MANUFACTURER FOR DRIPLINE MAXIMUM LATERAL LENGTHS.

DRIPLINE SYSTEM LAYOUT - TYPICAL | 5

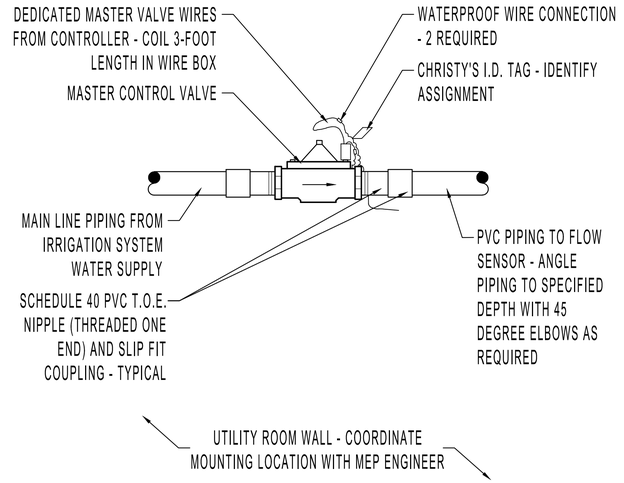


PLAN VIEW

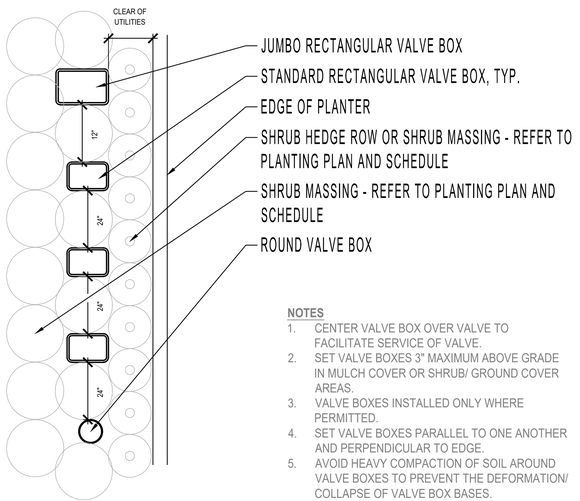
NOTES

1. ALIGN SPRINKLER HEADS FACING VINES ON PALM WHERE INSTALLED.
2. INSTALL FOUR (4) SPRINKLERS PER PALM AND INSTALL TWO (2) SPRINKLERS PER NON-PALM TREE.

TREE SPRINKLER LAYOUT | 3



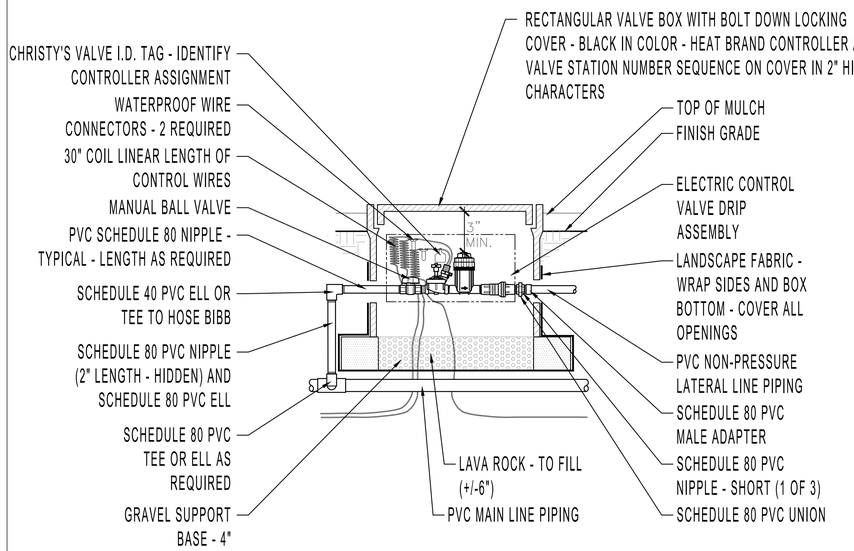
MASTER CONTROL VALVE | 1



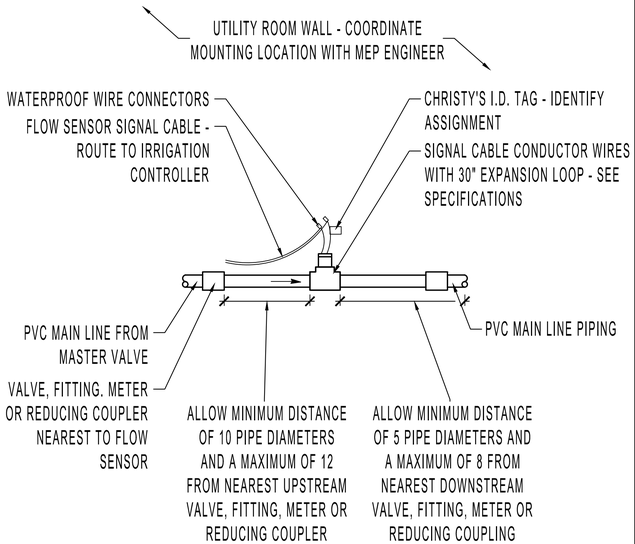
NOTES

1. CENTER VALVE BOX OVER VALVE TO FACILITATE SERVICE OF VALVE.
2. SET VALVE BOXES 3" MAXIMUM ABOVE GRADE IN MULCH COVER OR SHRUB/ GROUND COVER AREAS.
3. VALVE BOXES INSTALLED ONLY WHERE PERMITTED.
4. SET VALVE BOXES PARALLEL TO ONE ANOTHER AND PERPENDICULAR TO EDGE.
5. AVOID HEAVY COMPACTION OF SOIL AROUND VALVE BOXES TO PREVENT THE DEFORMATION/ COLLAPSE OF VALVE BOX BASES.
6. SHRUB ROWS SHALL KEEP CONTINUITY WHEREVER PLANTED.

VALVE BOX LAYOUT (AT GRADE PLANTING) | 6



DRIP VALVE STATION | 4



IRRIGATION FLOW SENSOR | 2

RHOADES PLANNING GROUP

Late Communications
Zoning Adjustment Board
OCT 30 2025
RECEIVED
At Meeting

2298 Durant Avenue
ZAB Presentation
2298 Durant Avenue
October 30, 2025

Dear Zoning Adjustments Board,

The following is a part of our project presentation for tonight's item on the ZAB's consent Calendar – a housing development project at 2298 Durant Avenue. The item is currently on the Consent Calendar. If the item is pulled from consent this same presentation will be made again. We respectfully request the item remain on the Consent Calendar because there is simply no reason or legal basis for the ZAB to make a decision on this project relevant to any labor standards or requirements pursuant to the protections afforded to housing development projects by the Housing Accountability Act, State Density Bonus Law, and the Housing Crisis Act.

State Density Bonus Law (SDBL), Housing Accountability Act (HAA), and Housing Crisis Act (HCA) are important and very powerful pieces of legislation that have started to help the state of California and the City of Berkeley begin to address the severe housing shortages that our region and state have been suffering for the last 40+ years because of local agency overregulation. We have witnessed this shortage firsthand here in our own town – and I have been working hard for the last 28 years here to address this problem.

You all were provided with copies of the Office of the City Attorney's opinion on the use of SDBL concessions for HARDHATS at the October 9, 2025 ZAB meeting relevant to 2425 Durant Avenue. It was first issued approximately two years ago. It is unequivocal. To deny a concession the ZAB must find:

> **GC Sec. 65915(d) (1) requires** - An applicant for a density bonus pursuant to subdivision (b) may submit to a city, county, or city and county a proposal for the specific incentives or concessions that the applicant requests pursuant to this section, and may request a meeting with the city, county, or city and county. The city, county, or city and county shall grant the concession or incentive requested by

RHOADES PLANNING GROUP

the applicant unless the city, county, or city and county makes a written finding, based upon substantial evidence, of any of the following:
(A) The concession or incentive does not result in identifiable and actual cost reductions, consistent with subdivision (k), to provide for affordable housing costs, as defined in Section 50052.5 of the Health and Safety Code, or for rents for the targeted units to be set as specified in subdivision (c).
(B) The concession or incentive would have a specific, adverse impact, as defined in paragraph (2) of subdivision (d) of Section 65589.5, upon public health and safety or on any real property that is listed in the California Register of Historical Resources and for which there is no feasible method to satisfactorily mitigate or avoid the specific, adverse impact without rendering the development unaffordable to low-income and moderate-income households.
(C) The concession or incentive would be contrary to state or federal law.

GC Sec. 65589.5(d)(2) requires - (2) The housing development project or emergency shelter as proposed would have a specific, adverse impact upon the public health or safety, and there is no feasible method to satisfactorily mitigate or avoid the specific, adverse impact without rendering the development unaffordable to low- and moderate-income households or rendering the development of the emergency shelter financially infeasible. As used in this paragraph, a "specific, adverse impact" means a significant, quantifiable, direct, and unavoidable impact, based on objective, identified written public health or safety standards, policies, or conditions as they existed on the date the application was deemed complete.

The basis for a finding such as this is lacking because there is clear evidence to the contrary. First – the City of Berkeley has no adopted objective health and safety standards relevant to labor requirements (nor likely would the state allow them) that would allow you to make this finding pursuant to 65915(d).

In addition, it has been demonstrated time and again that there is significant increase in labor cost with HARDHATS. That's common knowledge and the Schreiber case made clear that it is up to a local agency to prove that a concession wouldn't have a financial benefit. It is NOT up to the project proponent to demonstrate the opposite. But the City of Berkeley lacks adopted objective health and safety standards to do so. Imposing them now would be a violation of SB 330.

Our research (including extensive AI searches) shows that there is no other city in California that has adopted standards like HARDHATS. I am curious if the union knows of any. And if there aren't any others even though Berkeley's were adopted two years ago, we have to ask ourselves "why?"

RHOADES PLANNING GROUP

State law does not allow cities to dictate WHO builds projects as long as contractors are qualified pursuant to state licensing requirements. Almost all of the housing built in Berkeley in the last 30 years has been built without union labor – and there have been no demonstrations of public health and safety impacts of the nature required by the statutes. The finding simply cannot be made.

This project has conditions of approval to make sure that nonunion laborers are paid fairly. In addition, you should all know that our recent studies show that City of Berkeley fees are among the highest in the State of California. The development fees for this project are well over $3MM. Projects can't bear both millions of dollars in city fees AND millions of dollars in additional labor costs. And as we have seen, many projects can't afford either one. This is not a developer enriching issue it's a "barely able to make housing projects work as it is" issue.

Finally, we are not anti-union. We enjoy and appreciate working with our union counterparts where it's possible. We know that union-built projects are built better but non union projects are fine. We can't let perfect be the enemy of good. But I am stridently prohousing and if all of these projects have to comply with HARDHATS and prevailing wage requirements then we will simply stop building housing in Berkeley - like happened between 1970 and 1997. If we want projects to have more room for labor, we are going to have to address Berkeley's plan check fees (among other things) that have grown significantly over the last several years.

Sincerely,

Mark Rhoades, AICP

ZONING ADJUSTMENTS BOARD

NOTICE OF DECISION

DATE OF BOARD DECISION: October 30, 2025
DATE NOTICE MAILED: November 3, 2025
APPEAL PERIOD EXPIRATION: November 17, 2025
EFFECTIVE DATE OF PERMIT (Barring Appeal or Certification)[1]: November 18, 2025

2298 Durant & 2360 Ellsworth Street

Use Permit #ZP2024-0126 to demolish a commercial building, a residential building with 7 dwelling units, and associated parking; merge two lots; and build an eight-story (92 foot), 80,000 square-foot residential building, with 65 units (5 Very-Low Income, 2 Low-Income), utilizing a State Density Bonus.

The Zoning Adjustments Board of the City of Berkeley, **APPROVED** the following permits:

A Use Permit Public Hearing is required for the following permits:

1. **Demolition.** BMC Section 23.326.020(B) **"General Requirements"** to demolish a dwelling. *
2. **Demolition.** BMC Section 23.326.030(A)(3) **"Eliminating Dwelling Units through Demolition"** to demolish a building constructed before June 1980 on a property containing two or more dwelling units. *
3. **Demolition.** BMC Section 23.326.070(A) **"Main Non-Residential Building"** to demolish a non-residential building. *
4. **New Construction.** BMC Section 23.202.020 (A) **"Allowed Land Uses"** to construct a multi-family use.
5. **Height Projection** BMC Section 23.304.050 (A) "**Projections Above Height Limits"** exceed height limit with a rooftop projection.
6. **Fence** BMC Section 23.304.080(A) "**Permits Required**"

*Denotes required findings.

Density Bonus:

Waivers

- Provide 1,579 sq. ft. of Useable Open Space where 3,159 sq. ft. is required.
- Provide no landscaped Useable Open Space.
- Exceed the 85-foot height limit and permit a 92-foot building.
- Provide no long-term bicycle parking.
- Remove camphor tree on Durant Avenue.

Concessions

[1] Pursuant to BMC Section 23.410.050(C), the City Council Certifications, the City Council may take an action to review ZAB's decision on a Use Permit or Variance. This action is called certification and has the same effect as an appeal. Any member of the City Council may initiate the certification process of a ZAB decision during the 14-day appeal period after the notice of the ZAB's decision is issued. However, the Council's deadline to certify a project is suspended or tolled when the Council is on recess. Therefore, in all cases where the 14-day appeal period is scheduled to end during a Council recess, the certification deadline is extended to and through the day before the next regularly scheduled City Council meeting following any recess. *Extension of the certification deadline has no effect on the appeal deadline.*

- Healthcare coverage for construction workers (BMC Section 13.107.050)
- Prevailing wage for construction workers (BMC Section 13.108.030)

ZONING: Residential Mixed Use (RMU)

PUBLICATION OF NOTICE:

Pursuant to BMC Section 23.404.050, this notice shall be mailed to the applicant at the mailing address stated in the application and to any person who requests such notification by filing a written request with the Zoning Officer on or before the date of the Board action. This notice shall also be filed with the City Clerk. In addition, the notice shall be forwarded to the Zoning Adjustments Board and to the Main Library. The notice shall also be posted at a bulletin board at the Zoning Counter. The City Clerk shall make the notice available to interested members of the Council and the public.

FURTHER INFORMATION:

Questions about the project should be directed to the project planner, Allison Riemer, at (510) 981-7433 or ariemer@berkeleyca.gov. All project application materials, including full-size plans, may be viewed online at: https://aca.cityofberkeley.info/CitizenAccess/Welcome.aspx. or in the Permit Service Center at the Zoning Counter at 1947 Center Street, Third Floor, during normal office hours.

TO APPEAL THIS DECISION (see Section 23.410 of the Berkeley Municipal Code):

To appeal a decision of the Zoning Adjustments Board to the City Council you must:

1. Submit a letter clearly and concisely setting forth the grounds for the appeal to the City Clerk, located at 2180 Milvia Street, 1st Floor, Berkeley. The City Clerk's telephone number is (510) 981-6900.
2. Submit the required appeal fee (checks and money orders payable to "City of Berkeley"):
   A. The fee for persons other than the applicant is $3,000. This fee may be reduced to $1,000 if the appeal is signed by persons who lease or own at least 50 percent of the parcels or dwelling units within 300 feet of the project site, or at least 25 such persons (not including dependent children), whichever is less.
   B. The fee for all appeals by Applicants is $6,000.
3. The appeal must be received prior to 5:00 p.m. on the "APPEAL PERIOD EXPIRATION" date shown on page 1 (if the close of the appeal period falls on a weekend or holiday, then the appeal period expires the following business day).

If no appeal is received, the permit will be issued on the first business day following expiration of the appeal period, and the project may proceed at that time.

NOTICE CONCERNING YOUR LEGAL RIGHTS:

If you object to this decision, the following requirements and restrictions apply:

1. If you challenge this decision in court, you may be limited to raising only those issues you or someone else raised at the public hearing described in this notice, or in written correspondence delivered to the Zoning Adjustments Board at, or prior to, the public hearing.
2. You must appeal to the City Council within fourteen (14) days after the Notice of Decision of the action of the Zoning Adjustments Board is mailed. It is your obligation to notify the Land Use Planning Division in writing of your desire to receive a Notice of Decision when it is completed.
3. Pursuant to Code of Civil Procedure Section 1094.6(b) and Government Code Section 65009(c)(1), no lawsuit challenging a City Council decision, as defined by Code of Civil Procedure Section 1094.6(e), regarding a use permit, variance or other permit may be filed more than ninety (90) days after the date the decision becomes final, as defined in Code of Civil Procedure Section 1094.6(b). Any lawsuit not filed within that ninety (90) day period will be barred.
4. Pursuant to Government Code Section 66020(d)(1), notice is hereby given to the applicant that the 90-day protest period for any fees, dedications, reservations, or other exactions included in any permit approval begins upon final action by the City, and that any challenge must be filed within this 90-day period.
5. If you believe that this decision or any condition attached to it denies you any reasonable economic use of the subject property, was not sufficiently related to a legitimate public purpose, was not sufficiently proportional to any impact of the project, or for any other reason constitutes a “taking” of property for public use without just compensation under the California or United States Constitutions, your appeal of this decision must include the following information:
   A. That this belief is a basis of your appeal.
   B. Why you believe that the decision or condition constitutes a "taking" of property as set forth above.
   C. All evidence and argument in support of your belief that the decision or condition constitutes a “taking” as set forth above.

   If you do not do so, you will waive any legal right to claim that your property has been taken, both before the City Council and in court.

Zoning Adjustments Board Findings

APP # ZP2024-0126

October 30, 2025

Use Permit for a Project at 2298 Durant Avenue and 2360 Ellsworth Street

Quick Facts	Project Description:
Applicant: Austin Springer, Studio KDA **Project Address:** 2298 Durant Avenue **Site Size:** 12,220 sq. ft. **GP Land Use:** Residential Mixed Use (RMU) **Zoning:** Residential Southside Mixed Use (R-SMU **CEQA:** Section 15332 "In-Fill Development Projects" **Date Submitted:** September 5, 2024 **SB 330 Vesting Date:** August 6, 2024 **Date Deemed Complete:** October 21, 2024 **Project Planner:** Allison Riemer	The applicant is seeking approval to demolish a commercial building, a residential building with 7 dwelling units, and associated parking; merge two lots; and build an eight-story (92 foot), 80,000 square-foot residential building, with 65 units (5 Very-Low Income, 2 Low-Income), utilizing a State Density Bonus. **Permits Requested:** A Use Permit Public Hearing is required for the following permits: 1. **Demolition.** BMC Section 23.326.020(B) **"General Requirements"** to demolish a dwelling. * 2. **Demolition.** BMC Section 23.326.030(A)(3) **"Eliminating Dwelling Units through Demolition"** to demolish a building constructed before June 1980 on a property containing two or more dwelling units. * 3. **Demolition.** BMC Section 23.326.070(A) **"Main Non-Residential Building"** to demolish a non-residential building. * 4. **New Construction.** BMC Section 23.202.020 (A) **"Allowed Land Uses"** to construct a multi-family use. 5. **Height Projection** BMC Section 23.304.050 (A) "**Projections Above Height Limits"** exceed height limit with a rooftop projection. 6. **Fence** BMC Section 23.304.080(A) "**Permits Required**" *Denotes required findings. **Density Bonus:** **Waivers** • Provide 1,579 sq. ft. of Useable Open Space where 3,159 sq. ft. is required. • Provide no landscaped Useable Open Space. • Exceed the 85-foot height limit and permit a 92-foot building. • Provide no long-term bicycle parking. • Remove camphor tree on Durant Avenue. **Concessions** • Healthcare coverage for construction workers (BMC Section 13.107.050) • Prevailing wage for construction workers (BMC Section 13.108.030) **Staff Recommendation:** Staff recommends that ZAB determine the project is exempt from CEQA pursuant to Section 15332 of the CEQA Guidelines ("In-Fill Development Projects") and approve ZP2024-0126 pursuant to Section 23.406.040(E) "**Findings for Approval**" and subject to the attached Findings and Conditions of Approval.

I. CEQA

The project is categorically exempt from the requirements of CEQA pursuant to CEQA Guidelines Section 15332 ("In-Fill Development Projects").

Evidence: The project is consistent with the applicable general plan designation and all applicable general plan policies as well as with the applicable zoning designation and regulations. The project site is within city limits on a project site of fewer than five acres that is substantially surrounded by urban uses. The project site has no value as habitat for endangered, rare or threatened species. Approval of the project would not result in any significant effects relating to traffic, noise, air quality, or water quality. The site can be adequately served by all required utilities and public services.

Furthermore, none of the exceptions in CEQA Guidelines Section 15300.2 apply, as follows: (a) the site is not located in an environmentally sensitive area, (b) there are no significant cumulative impacts, (c) there are no significant effects due to unusual circumstances, (d) the project is not located near a scenic highway, (e) the project site is not located on a hazardous waste site pursuant to Government Code Section 65962.5, and (f) the project will not affect an historical resource.

II. FINDINGS FOR APPROVAL

1. As required by BMC Section 23.406.040(E)(1) "**Findings for Approval**," to approve a Use Permit, the ZAB shall find that the proposed project or use:

   (a) Will not be detrimental to the health, safety, peace, morals, comfort, or general welfare of persons residing or visiting in the area or neighborhood of the proposed use; and

   Evidence: The project will not be detrimental to the health safety, peace, morals, comfort or general welfare of persons residing or visiting in the area because the project will replace a commercial building and a residential building with seven units with a new residential building with 65 units, which is a use that already exists in the area. The setbacks will exceed what is required, the proposed Floor Area Ration (FAR) is 6.54 where 7 is the maximum, and the proposed lot coverage is 84.4 percent, where 100 percent is allowed. Waivers for an increased height, reduced useable open space, and no interior (long-term) bike parking are permissible pursuant to State Density Bonus Law.

   (b) Will not be detrimental or injurious to property and improvements of the adjacent properties, the surrounding area or neighborhood, or to the general welfare of the City.

Evidence: Findings can be made for adding a residential building with 65 units in the R-SMU District, where multi-family residential buildings are allowed:

Sunlight: According to the shadow studies submitted for the project, new shadows will affect dwellings in the existing single and multi-family buildings west, north, northeast, and southeast of the site, casting new shadows on the winter and summer solstice two hours after sunrise, at noon, and two hours before sunset.

Shadow impacts on adjacent dwellings are to be expected, because the subject site is in the R-SMU district, which allows heights of up to 85 feet by right. A waiver is allowed for a height beyond 85 feet to accommodate the density bonus units.

Based on the shadow analysis provided by the applicant, shadow impacts to neighboring residences will be limited to certain times of year, and during certain hours of the day, and shadow impacts will not be detrimental. Therefore, though the project will create new shadow impacts on neighboring residences, the projected impacts will be in line with what is expected within a built urban environment.

2. As required by BMC Section 23.406.040(E)(2) "**Findings for Approval**," to approve the Use Permit, the ZAB must also make any other Use Permit findings specifically required by the Zoning Ordinance for the proposed project.

   Density Bonus

   A. Pursuant to Government Code Section 65915, the Zoning Adjustments Board finds that:
      1. Under the City's methodology for implementing density bonuses, the base project consists of 49 units;
      2. The project will provide at least 5 qualifying units in the 49-unit base project, as more fully set forth in Condition 35;
      3. The project is entitled to a density increase of 32.5 percent over the otherwise maximum allowable residential density under the Zoning Ordinance and General Plan Land Use Element, under the requirements of Government Code Section 65915(b) and (f), plus two concessions or incentives. This equates to a density bonus of up to 16 units above the base project, for a total of up to 65 units.
   B. In accordance with Government Code Section 65915(d) and (k), the Zoning Adjustments Board hereby grants the following concessions in order to provide for affordable housing costs:

1. Healthcare coverage for construction workers (BMC Section 13.107.050); and
2. Prevailing wage for construction workers (BMC Section 13.108.030).

C. In accordance with Government Code Section 65915(d), in order to allow construction of the proposed project with the density permitted under State law, the Zoning Adjustments Board finds that the approval of the concessions is required to provide for affordable housing costs, as provided in Government Code Section 65915(d)(1)(A) because 1) approval of the concession would result in identifiable and actual cost reduction; 2) approval of the concession would not have a specific adverse impact upon public health and safety, or the physical environment, or on any real property listed in the California Register of Historical Resources; and 3) would not be contrary to State or Federal law.

D. In accordance with Government Code Section 65915(e) the Zoning Adjustments Board hereby grants the following waivers to modify development standards as necessary to accommodate these density bonus units.

1. Provide 1,579 sq. ft. of Useable Open Space where 3,159 sq. ft. is required.
2. Provide no landscaped Useable Open Space.
3. Exceed the 85-foot height limit and permit a 92-foot building.
4. Provide no long-term bicycle parking.
5. Remove the camphor tree on Durant Avenue.

E. In accordance with Government Code Section 65915(e), in order to allow construction of the proposed project with the density permitted under State law, the Zoning Adjustments Board finds that the approval of waivers is required 1) to construct the proposed project at the density permitted under State law; 2) approval of requested waivers will not have a specific adverse impact upon public health and safety, or the physical environment, or on any real property listed in the California Register of Historical Resources; and 3) approval of the requested waivers will not be contrary to State or Federal law.

Housing Accountability Act

The Housing Accountability Act, Government Code Section 65589.5(j) requires that when a proposed housing development complies with applicable, objective general plan and zoning standards, a local agency may not deny the project or approve it with reduced density unless the agency makes written findings

supported by substantial evidence that: (1) the development would have a specific adverse impact on public health or safety unless disapproved or approved at a lower density; and (2) there is no feasible method to satisfactorily mitigate or avoid the specific adverse impact, other than the disapproval or approval at a lower density.

Evidence: The project includes construction of 65 units. Because the base project complies with applicable, objective general plan and zoning standards, Section 65589.5(j) does apply to this project. No significant, quantifiable, direct and unavoidable impacts, based on objective, identified written public health or safety standards, polices, or conditions, have been identified.

3. As required by BMC Section 23.406.040(E)(3) "**Findings for Approval**," when taking action on a Use Permit, the ZAB shall consider in its findings:

(a) The proposed land use;

Evidence: The proposed land use meets the findings for approval because the proposed multi-family residential use is consistent with the R-SMU District purposes. One of the purposes of the R-SMU District is to "implement General Plan and Southside Plan policy by encouraging high-density, multi-story residential development close to major shopping, transportation, and employment centers." The project provides a high-density multi-story residential development near the UC Berkeley campus, Downtown Berkeley, and the Downtown Berkeley BART station.

(b) and the structure or addition that accommodates the use.

Evidence: The proposed eight-story residential building meets the findings for approval because it meets the R-SMU District development standards, with waivers to allow for a State Density Bonus.

4. As required by BMC Section 23.406.040(E)(4) "**Findings for Approval**," required findings shall be made based on the circumstances existing at the time a decision is made on the application.

Evidence: This finding is met because the application has been reviewed based on the current zoning standards, general plan policies, environmental conditions, site context, and plans received September 11, 2025.

5. As required by BMC Section 23.406.040(E)(5) "**Findings for Approval**," the ZAB shall deny a Use Permit application if it determines that it is unable to make any of the required findings.

Evidence: This finding does not apply because all required findings for approval can be made based on the submitted documents.

CITY OF BERKELEY
PLANNING AND DEVELOPMENT

USE PERMIT ZP2024-0126 CONDITIONS OF APPROVAL

October 30, 2025

2298 Durant Avenue and 2360 Ellsworth Street

Use Permit #ZP2024-0126 to demolish a commercial building, a residential building with 7 dwelling units, and associated parking; merge two lots; and build an eight-story (92 foot), 80,000 square-foot residential building, with 65 units (5 Very-Low Income, 2 Low-Income), utilizing a State Density Bonus.

I. STANDARD CONDITIONS OF APPROVAL FOR ALL PROJECTS

Pursuant to Berkeley Municipal Code (BMC) Title 23 Zoning Ordinance and Title 13 Public Peace, Morals, and Welfare, the following conditions, as well as all other applicable provisions of the Zoning Ordinance, apply to this Permit:

1. **Conditions Shall be Printed on Plans.** The conditions of this Permit shall be printed on the *second* sheet of each plan set submitted for a building permit pursuant to this Use Permit, under the title 'Use Permit Conditions.' *Additional sheets* may also be used if the *second* sheet is not of sufficient size to list all of the conditions. The sheet(s) containing the conditions shall be of the same size as those sheets containing the construction drawings.
2. **Compliance Required (BMC Section 23.102.050).** All land uses and structures in Berkeley must comply with the Zoning Ordinance and all applicable City ordinances and regulations. Compliance with the Zoning Ordinance does not relieve an applicant from requirements to comply with other federal, state, and City regulations that also apply to the property.
3. **Approval Limited to Proposed Project and Replacement of Existing Uses (BMC Sections 23.404.060(B)(1) and (2)):**
   - **A.** This Permit authorizes only the proposed project described in the application. In no way does an approval authorize other uses, structures or activities not included in the project description.
   - **B.** When the City approves a new use that replaces an existing use, any prior approval of the existing use becomes null and void when permits for the new use are exercised (e.g., building permit or business license issued). To re-establish the previously existing use, an applicant must obtain all permits required by the Zoning Ordinance for the use.
4. **Conformance to Approved Plans (BMC Section 23.404.060(B)(4)).** All work performed under an approved permit shall comply with the approved plans and any conditions of approval.
5. **Exercise and Expiration of Permits (BMC Section 23.404.060(C)):**

A. A permit authorizing a land use is exercised when both a valid City business license is issued (if required) and the land use is established on the property.

B. A permit authorizing construction is exercised when both a valid City building permit (if required) is issued and construction has lawfully begun.

C. The Zoning Officer may declare a permit lapsed if it is not exercised within one year of its issuance, except if the applicant has applied for a building permit or has made a substantial good faith effort to obtain a building permit and begin construction. The Zoning Officer may declare a permit lapsed only after 14 days written notice to the applicant. A determination that a permit has lapsed may be appealed to the ZAB in accordance with BMC Chapter 23.410, Appeals and Certification.

D. A permit declared lapsed shall be void and of no further force and effect. To establish the use or structure authorized by the lapsed permit, an applicant must apply for and receive City approval of a new permit.

6. **Permit Remains Effective for Vacant Property (BMC Section 23.404.060(D)).** Once a Permit for a use is exercised and the use is established, the permit authorizing the use remains effective even if the property becomes vacant. The same use as allowed by the original permit may be re-established without obtaining a new permit, except as set forth in Standard Condition #5 above.

7. **Permit Modifications (BMC Section 23.404.070).** No change in the use or structure for which this Permit is issued is permitted unless the Permit is modified by the Board. The Zoning Officer may approve changes to plans approved by the Board, consistent with the Board's policy adopted on May 24, 1978, which reduce the size of the project.

8. **Permit Revocation (BMC Section 23.404.080).** The City may revoke or modify a discretionary permit for completed projects due to: 1) violations of permit requirements; 2) Changes to the approved project; and/or 3) Vacancy for one year or more. However, no lawful residential use can lapse, regardless of the length of time of the vacancy. Proceedings to revoke or modify a permit may be initiated by the Zoning Officer, Zoning Adjustments Board (ZAB), or City Council referral.

9. **HARD HATS (BMC Section 13.107).** Pursuant to BMC Chapter 13.107 "Establishing Healthcare and Apprenticeship Standards for Private Development" projects within City limits consisting of construction of either a new building, addition to an existing building, alteration of existing floor area, or demolition of 50,000 square feet or more of floor area shall be subject to the requirements of this Chapter. The combination of alterations, additions and/or demolition that impacts 50,000 square feet or more of floor area shall be subject to the requirements of this Chapter. This includes compliance with the requirements contained in BMC Sections 13.107.040 - 13.107.090.

   A. Prior to Building Permit issuance and during project construction, the applicant shall comply with the following sections and submit the required document(s):

      i. BMC Section 13.107.040(a)-(d), Apprenticeship Requirements

      ~~ii. BMC Section 13.107.050(a)-(e), Health Care Expenditures~~

iii. Submit: Contractor Prequalification Questionnaire

B. At the time Building Permit Issuance, the applicant shall comply with the following section and submit the required document(s):
i. BMC Section 13.107.060, Required Applicant and Contractor Statements
ii. Submit: Applicant Declaration
iii. Submit: Statement of Compliance seven days before contractor starts work

C. Within 30 Days of completing each contractor's respective work
i. BMC Section 13.107.060, Required Applicant and Contractor Statements
ii. Submit: Contractor Satisfaction Statement

D. Prior to Issuance of Certificate of Occupancy, or prior to approved final inspection for alterations, additions, or demolition projects that do not change the occupancy class of the structure or space:
i. BMC Section 13.107.060, Required Applicant and Contractor Statements
ii. Submit: Applicant Certification of Compliance

E. During Project Construction, the applicant shall comply with the following sections:
i. BMC Section 13.107.070(a)-(b), Notice and Posting
ii. BMC Section 13.107.080, Retaliation Prohibited

F. On-Going and at least three years after receiving approved Final Inspection, the applicant shall comply with the following section:
i. BMC Section 13.107.090, Retention of Records

10. **Pay Transparency Acknowledgement (BMC Section 13.104.030).** Prior to the issuance of a building permit for any Project subject to this Chapter:

A. A Responsible Representative of the Permittee shall certify under penalty of perjury that the Permittee has reviewed Chapter 13.104 of the Berkeley Municipal Code, and will be responsible for demonstrating compliance with this Chapter.

B. The Permittee shall provide to the City a Contractor Pay Transparency Acknowledgment on a form approved by the City for this purpose. A Responsible Representative of the Permittee shall certify under penalty of perjury that the Contractor and all Qualifying Subcontractors performing work on the Project will comply with BMC Chapter 13.104 and with Labor Code sections 226(a) and 2810.5 for each employee who works on the Project.

11. **Pay Transparency Attestations following Project Completion (BMC Section 13.104.040).** Within 10 days of the approved final inspection of any Project subject to this Chapter, each Permittee shall provide to the City for each Contractor and Qualifying Subcontractor a Pay Transparency Attestation on a form approved by the City. On each Pay Transparency Attestation, a Responsible Representative of the Contractor or Qualifying Subcontractor shall attest under penalty of perjury that the Contractor or Qualifying Subcontractor complied with BMC Chapter 13.104 and Labor Code sections 226(a) and 2810.5 for each employee who performed work on the Project. The City will maintain Pay Transparency Attestation forms for period of at least three years after their date of receipt by the City
12. **Posting of Wage Theft Ordinance (BMC Section 13.104.050).** Each day work is performed on the Project, each Permittee shall post, and keep posted in a conspicuous location where it may be easily read by employees during the hours of the workday, a notice that: (A) contains the text of BMC Chapter 13.104; (B) explains that workers can report violations of Labor Code sections 226 and 2810.5 to the Labor Commissioner of the State of California; and (C) provides current contact information, including office address, telephone number, and email address of the Labor Commissioner of the State of California.
13. **Wage Theft Prevention Conditions of Approval (BMC Section 13.104.060).** The requirements of BMC Sections 13.104.030 through 13.104.050 shall be included as conditions of approval of any Use Permit or Zoning Certificate for any Project that is subject to this Chapter. Failure to comply with the requirements of any provision of this Chapter shall be grounds for issuance of an administrative citation under BMC Chapter 1.28 and/or the revocation or modification of any Use Permit issued for the Project under BMC Chapter 23.404.
14. **Hold Harmless.** The permittee agrees as a condition of approval of this application to indemnify, protect, defend with counsel selected by the City, and hold harmless, the City, and any agency or instrumentality thereof, and its elected and appointed officials, officers, employees and agents, from and against any and all liabilities, claims, actions, causes of action, proceedings, suits, damages, judgments, liens, levies, costs and expenses of whatever nature, including reasonable attorney's fees and disbursements (collectively, "Claims") arising out of or in any way relating to the approval of this application, any actions taken by the City related to this entitlement, or any environmental review conducted under the California Environmental Quality Act, Public Resources Code Section 210000 et seq., for this entitlement and related actions. The indemnification shall include any Claims that may be asserted by any person or entity, including the permittee, arising out of or in connection with the approval of this application, whether or not there is concurrent, passive or active negligence on the part of the City, and any agency or instrumentality thereof, and its elected and appointed officials, officers, employees and agents. The permittee's duty to defend the City shall not apply in those instances when the permittee has asserted the Claims, although the permittee shall still have a duty to indemnify, protect and hold harmless the City.

II. ADDITIONAL CONDITIONS IMPOSED BY THE ZONING ADJUSTMENTS BOARD

Pursuant to BMC Section 23.404.050(H) Conditions of Approval, the Zoning Adjustments Board attaches the following additional conditions to this Permit:

Prior to Submittal of Any Building Permit:

15. **Project Liaison.** The applicant shall include in all building permit plans and post onsite the name and telephone number of an individual empowered to manage construction-related complaints generated from the project. The individual's name, telephone number, and responsibility for the project shall be posted at the project site for the duration of the project in a location easily visible to the public. The individual shall record all complaints received and actions taken in response, and submit written reports of such complaints and actions to the project planner on a weekly basis. Please designate the name of this individual below:

    ☐ **Project Liaison** _____

    Name Phone #

16. **Address Assignment.** The applicant shall file an "Address Assignment Request Application" with the Permit Service Center (1947 Center Street) for any address change or new address associated with this Use Permit. The new address(es) shall be assigned in accordance with BMC Section 16.28.030 Assignment and Installation of Numbers, and, except for new buildings on vacant lots, entered into the City's database after the building permit is issued but prior to final inspection.

17. **Bird Safe Buildings.** Prior to submittal of the building permit, the applicant shall demonstrate compliance with the applicable bird safe building provisions in BMC Section 23.304.150, Bird Safe Buildings.

18. **Construction Noise Reduction Program.** The applicant shall develop a site-specific noise reduction program prepared by a qualified acoustical consultant to reduce construction noise impacts to the maximum extent feasible, subject to review and approval of the Zoning Officer. The noise reduction program shall include the time limits for construction listed above, as measures needed to ensure that construction complies with BMC Section 13.40.070, Prohibited Acts. The noise reduction program should include, but shall not be limited to, the following available controls to reduce construction noise levels as low as practical:

    A. Construction equipment should be well maintained and used judiciously to be as quiet as practical.

    B. Equip all internal combustion engine-driven equipment with mufflers, which are in good condition and appropriate for the equipment.

    C. Utilize "quiet" models of air compressors and other stationary noise sources where technology exists. Select hydraulically or electrically powered equipment and avoid pneumatically powered equipment where feasible.

    D. Locate stationary noise-generating equipment as far as possible from sensitive receptors when adjoining construction sites. Construct temporary noise barriers or partial enclosures to acoustically shield such equipment where feasible.

E. Prohibit unnecessary idling of internal combustion engines.

F. If impact pile driving is required, pre-drill foundation pile holes to minimize the number of impacts required to seat the pile.

G. Construct solid plywood fences around construction sites adjacent to operational business, residences or other noise-sensitive land uses where the noise control plan analysis determines that a barrier would be effective at reducing noise.

H. Erect temporary noise control blanket barriers, if necessary, along building facades facing construction sites. This mitigation would only be necessary if conflicts occurred which were irresolvable by proper scheduling. Noise control blanket barriers can be rented and quickly erected.

I. Route construction related traffic along major roadways and away from sensitive receptors where feasible.

19. **Damage Due to Construction Vibration.** The project applicant shall submit screening level analysis prior to, or concurrent with demolition building permit. If a screening level analysis shows that the project has the potential to result in damage to structures, a structural engineer or other appropriate professional shall be retained to prepare a vibration impact assessment (assessment). The assessment shall consider project specific information such as the composition of the structures, location of the various types of equipment used during each phase of the project, as well as the soil characteristics in the project area, in order to determine whether project construction may cause damage to any of the structures identified as potentially impacted in the screening level analysis. If the assessment finds that the project may cause damage to nearby structures, the structural engineer or other appropriate professional shall recommend design means and methods of construction that to avoid the potential damage, if feasible. The assessment and its recommendations shall be reviewed and approved by the Building and Safety Division and the Zoning Officer. If there are no feasible design means or methods to eliminate the potential for damage, the structural engineer or other appropriate professional shall undertake study of existing conditions (study) of any structures (or, in case of large buildings, of the portions of the structures) that may experience damage.

    This study shall establish the baseline condition of these structures, including, but not limited to, the location and extent of any visible cracks or spalls; and include written descriptions and photographs.

    The study shall be reviewed and approved by the Building and Safety Division and the Zoning Officer prior to issuance of a grading permit. Upon completion of the project, the structures (or, in case of large buildings, of the portions of the structures) previously inspected will be resurveyed, and any new cracks or other changes shall be compared to pre-construction conditions and a determination shall be made as to whether the proposed project caused the damage. The findings shall be submitted to the Building and Safety Division and the Zoning Officer for review. If it is determined that project construction has resulted in damage to the structure, the damage shall be repaired to the pre-existing condition by the project sponsor, provided that the property owner approves of the repair

20. **Compliance with Conditions of Approval and Environmental Mitigations.** The building permit application is subject to verification of compliance of these Conditions of Approval. The applicant shall be responsible for demonstrating compliance with all conditions of approval and mitigation measures per the timeline set forth by this use permit. The applicant shall deposit $10,000 with the City, or less with the approval of the Zoning Officer, to pay for the cost of monitoring compliance with these Conditions of Approval and other applicable conditions and regulations. Should compliance-monitoring expenses exceed the initial deposit, the applicant shall deposit additional funds to cover such additional expenses upon the request of the Zoning Officer; any unused deposit will be refunded to the applicant.

Prior to Issuance of Any Building & Safety Permit (Demolition or Construction)

21. **Prior Rental Rate.** Pursuant to Government Code Section 66300.6(b)(3), any existing residents will be allowed to occupy their units until six months before the start of construction activities with proper notice and, if asked to leave, shall be allowed to return at their prior rental rate if the demolition does not proceed and the property is returned to the rental market.

22. **Occupied Units- Requirement for Relocation Expenses.** Pursuant to BMC Section 23.326.030(A)(5)(c) (prior demolition ordinance):

    (i) The applicant shall provide qualified tenants assistance with moving expenses equivalent to those in Chapter 13.84 (Relocation Services and Payments for Residential Tenant Households), and

    (ii) Shall subsidize the rent differential for a comparable replacement unit, in the same neighborhood if feasible, until new units are ready for occupancy. Funding for the rent differential shall be guaranteed in a manner approved by the City. The applicant shall submit proof of implementation that includes an overall building tenant relocation plan and relocation agreements all applicable tenant households prior to submittal for building permits.

23. **Sitting Tenants Rights.** Pursuant to BMC Section 23.326.030(A)(5)(d) (prior demolition ordinance):

    (i) Sitting tenants who are displaced as a result of demolition shall be provided the right of first refusal to move into the new building, and

    (ii) Tenants of units that are demolished shall have the right of first refusal to rent new below market rate units designated to replace the units that were demolished, at the rent that would have applied if they had remained in place, as long as their tenancy continues.

    (iii) Income restrictions do not apply to displaced tenants.

24. **Demolition.** Demolition of the existing building cannot commence until a complete application is submitted for the replacement building. In addition, all plans presented to the City to obtain a permit to allow the demolition are subject to these conditions.

25. **Construction Noise Management -** Public Notice Required. At least two weeks prior to initiating any construction activities at the site, the applicant shall provide notice to businesses and residents within 500 feet of the project site. This notice shall at a minimum provide the following: (1) project description, (2) description of construction activities during extended work hours and reason for extended hours, (3) daily construction schedule (i.e., time of day) and expected duration (number of months), (4) the name and phone number of the Project Liaison for the project that is responsible for responding to any local complaints, and (5) that construction work is about to commence. The liaison would determine the cause of all construction-related complaints (e.g., starting too early, bad muffler, worker parking, etc.) and institute reasonable measures to correct the problem. A copy of such notice and methodology for distributing the notice shall be provided in advance to the City for review and approval.

26. **Construction Phases.** The applicant shall provide the Zoning Officer with a schedule of major construction phases with start dates and expected duration, a description of the activities and anticipated noise levels of each phase, and the name(s) and phone number(s) of the individual(s) directly supervising each phase. The Zoning Officer or his/her designee shall have the authority to require an on-site meeting with these individuals as necessary to ensure compliance with these conditions. The applicant shall notify the Zoning Officer of any changes to this schedule as soon as possible.

27. **Construction and Demolition Diversion.** Applicant shall submit a Construction Waste Management Plan that meets the requirements of BMC Chapter 19.37 including 100 percent diversion of asphalt, concrete, excavated soil and land-clearing debris and a minimum of 65 percent diversion of other nonhazardous construction and demolition waste.

28. **Toxics.** The applicant shall contact the Toxics Management Division (TMD) at 1947 Center Street or (510) 981-7470 to determine which of the following documents are required and timing for their submittal:

    A. Phase I and Phase II Environmental Site Assessment (ESA) (per ASTM 1527). A recent Phase I ESA (less than 2 years old) shall be submitted to the Toxics Management Division for developments for: all new commercial, industrial and mixed-use developments and all improvement projects that require work 5 or more feet below grade, and all new residential buildings with more than four dwelling units located in the Environmental Management Area (or EMA). The EMA can be viewed at: City of Berkeley Community GIS Portal (arcgis.com)

    B. Depending on the findings in the Phase I, a Phase II or additional investigation may be necessary. Any available soils and groundwater analytical data available for projects listed in this section must also be submitted to TMD.

C. Environmental Site Clearance. The applicant shall provide environmental screening clearance from either the San Francisco Bay Regional Water Quality Control Board (RWQCB), Department of Toxic Substances Control (DTSC), or the Alameda County Department of Environmental Health's Local Oversight Program (LOP). Clearance from one of these regulatory agencies will ensure that the property meets development investigation and cleanup standards for the specific use proposed on the property. Environmental screening clearance shall be submitted to the City of Berkeley's Toxics Management Division prior to issuance of any building permits.

D. Soil and Groundwater Management Plan. A site-specific Soil and Groundwater Management Plan (SGMP) shall be submitted to Toxics Management Division (TMD) for all non-residential projects, and residential or mixed-use projects with more than four dwelling units, that: (1) are in the Environmental Management Area (EMA), as shown on the most recent City of Berkeley EMA map, and (2) propose any excavations deeper than 5 feet below grade or if significant soils removal is anticipated. The SGMP shall be submitted to the TMD with the project's building permit application and shall be approved by TMD prior to issuance of the building permit.

The SGMP shall comply with the hazardous materials and waste management standards required by BMC Section 15.12.100, the stormwater pollution prevention requirements of San Francisco Bay Regional Water Quality Control Board's Order No. R2-2009-0074, California hazardous waste generator regulations (Title 22 California Code of Regulations (CCR) 66260 et seq.), and the East Bay Municipal Utility District's Ordinance 311, and shall include the following:

i. procedures for soil and groundwater management including identification of pollutants and disposal methods;

ii. procedures to manage odors, dust and other potential nuisance conditions expected during development;

iii. notification to TMD within 24 hours of the discovery of any previously undiscovered contamination; and

iv. the name and phone number of the individual responsible for implementing the SGMP and who will respond to community questions or complaints.

TMD may require additional information or impose additional conditions as deemed necessary to protect human health and the environment. All requirements of the approved SGMP shall be deemed conditions of approval.

E. Demolitions & Renovations – Building Materials Survey. A hazardous materials survey for building materials and plans on hazardous materials and hazardous waste removal and disposal is required and must be prepared by qualified professionals, and submitted to the Toxics Management Division (TMD) prior to issuance of the building permit.

i. The survey shall include the identification of all materials to be disturbed for lead-based paints, PCB containing equipment and caulking, hydraulic fluids, refrigerants, treated wood, and mercury containing devices (including fluorescent light bulbs and mercury switches), asbestos and other hazardous materials and chemicals.

ii. If asbestos is identified, Bay Area Air Quality Management District Regulation 11-2-401.3 a notification must be made and the J number must be made available to the City of Berkeley Permit Service Center. Contractors must follow state regulations where there is asbestos-related work involving 100 square feet or more of asbestos containing material (8 Cal. Code Regs. §1529, §341.6 et seq.)

iii. The report to the TMD shall include, in addition to the survey, plans on hazardous materials and hazardous waste removal and disposal that comply with State and Federal codes including California Code of Regulations (CCR) 66260 et seq.

iv. Documentation evidencing disposal of hazardous waste in compliance with the survey shall be submitted to TMD within 30 days of the completion of the demolition.

Please note, the PCB Screening Form required by Public Works, Engineering, is a separate requirement and does not address the PCB identification requirement of the Toxics Management Division.

F. Hazardous Materials Business Plan. A Hazardous Materials Business Plan (HMBP) in compliance with BMC Section 15.12.040 and California Health & Safety Code, Chapter 6.95 Div. 20, shall be submitted to the Toxics Management Division through the California Environmental Reporting System: http://cers.calepa.ca.gov/ for chemicals used or stored on site during construction that exceed reporting thresholds. The reporting is required if your facility stores or handles hazardous materials in aggregate quantities equal to or greater than 55 gallons for liquids, 500 pounds for solids, or 200 cubic feet of compressed gases, or generates any quantity of hazardous waste. This includes welding gases, emergency generator fuel, paints, etc.

Additionally, the business occupant must submit an HMBP within 30 days of starting operations.

G. Petroleum Storage. An (SPCC) Plan is required to be prepared and implemented for facilities with any one of the following:

i. aggregate aboveground petroleum storage capacities of 1,320 gallons or more stored in aboveground storage containers, tanks, oil-filled equipment, or

ii. one or more tank(s) in an underground area (TIUGA) with petroleum storage capacities of 55 gallons or greater. More information on TIUGAs can be found here: https://osfm.fire.ca.gov/divisions/pipeline-safety-and-cupa/certified-unified-program-agency-cupa/aboveground-petroleum-storage-act/tank-in-an-underground-area-tiuga/

The SPCC plan must be prepared prior to beginning operations and you must submit facility information to Toxics Management Division (TMD) through the California Environmental Reporting System: http://cers.calepa.ca.gov/. The SPCC plan will be reviewed during the site inspection and shall not be submitted in CERS or to the TMD.

Prior to Issuance of Any Building (Construction) Permit

29. **Parcel Merger/Lot Line Adjustment.** The applicant shall secure approval of any parcel merger and/or lot line adjustment associated with this Use Permit.

30. **HVAC Noise Reduction.** Prior to the issuance of building permits, the project applicant shall submit plans that show the location, type, and design of proposed heating, ventilation, and cooling (HVAC) equipment. In addition, the applicant shall provide product specification sheets or a report from a qualified acoustical consultant showing that operation of the proposed HVAC equipment will meet the City's exterior noise requirements in BMC Section 13.40.050. The City's Planning and Development Department shall review the submitted plans, including the selected HVAC equipment, to verify compliance with exterior noise standards.

31. **Solar Photovoltaic (Solar PV) and Battery Energy Storage Systems (ESS).** A solar PV system shall be installed, subject to specific limited exceptions, as specified by the Berkeley Energy Code (BMC Chapter 19.36). Energy storage system (ESS) readiness (new single-family, duplex, and townhouse homes) or ESS installation (new multifamily and most nonresidential buildings) shall be completed as specified by BMC Chapter 19.36. Location of the solar PV system and the ESS, if applicable, shall be noted on the construction plans. (Project required to meet applicable code at time of building permit application, if different from above.)

32. **Recycling and Organics Collection.** Applicant shall provide recycling and organics collection areas for occupants, clearly marked on plans, which comply with the Alameda County Organics Reduction and Recycling Ordinance (2021-02). Contact the Zero Waste Division at RecyclingProgram@berkeleyca.gov.

33. **Public Works ADA.** Plans submitted for building permit shall include replacement of sidewalk, curb, gutter, and other streetscape improvements, as necessary to comply with current City of Berkeley standards for accessibility.

AFFORDABLE HOUSING REQUIREMENTS – RESIDENTIAL PROJECTS

34. **Affordable Housing Compliance Plan.** The final Affordable Housing Compliance Plan ("AHCP") must be certified by the Zoning Officer and the Department of Health, Housing, and Community Services prior to the issuance of Building Permit. Projects that receive approval from the Building Official for multiple phase construction permits must have the final AHCP certified prior to the issuance of the phase one building permit.

35. **Below Market Rate Units. Five** Very-Low Income, and **two** Low Income Below Market Rate rental dwelling units (BMR Units) shall be provided in the project. All affordable units provided pursuant to Section II, Density Bonus, of the permit Findings shall be designated as BMR Units. All BMR units are required to comply with the stricter of the State Density Bonus Law (Government Code Section 65915)**,** BMC Section 23.328.030(A) Affordable Housing Requirements**,** and BMC Section 23.326.030 Eliminating Dwelling Units through Demolition **(previous ordinance).** All affordable units provided as replacement units pursuant to the Staff Report shall be designated as BMR Units. Any Extremely-Low Income replacement units provided shall be classified as Very-Low Income units to fulfill State Density Bonus Law.

Summary table of project BMR units			
Code Section	**Extremely-Low Income (30% AMI)**	**Very-Low Income (50% AMI)**	**Low Income (80% AMI)**
BMC Chapter 23.328 (Inclusionary Housing)		5	2
State Density Bonus Law (Gov. Code Section 65915)		5	
BMC Chapter 23.326 (Demolition, prior version)		5	2
Total		5	2

36. **Regulatory Agreement.** If BMR units are provided, the owner shall enter into a Regulatory Agreement that implements Government Code Section 65915, BMC Section 23.328.030, and other provisions for BMR units included in this Use Permit. The Regulatory Agreement may include any terms and affordability standards determined by the City to be necessary to ensure such compliance. The Regulatory Agreement will secure the property's obligation to comply with the requirements for providing BMR units as defined by BMC Chapter 23.328 and State Density Bonus Law (Government Code Section 65915). The applicant shall submit the Regulatory Agreement to the Department of Health, Housing, and Community Services for review and approval. All BMR units are required to comply with the Regulatory Agreement and the BMR Administrative Guidelines. Regulatory Agreements must be executed prior to the issuance of Building Permit, or, in the case of projects that receive approval from the Building Official for multiple phase construction permits, prior to the issuance of the phase one building permit.

37. **Payment of Affordable Housing In-Lieu Fee.** The Affordable Housing In-Lieu Fee shall be paid as required by BMC Section 23.328.030(B) and Resolution 70,698 N.S. The fee for this project is $844,321,39. Any adjustments to the fee and the final fee amount will be determined prior to building permit issuance as part of the Affordable Housing Compliance Plan approval. The In-Lieu Fee shall be paid prior to the issuance of the first Certificate of Occupancy, or if no Certificate of Occupancy is required, prior to the final inspection of the Project. Nothing in these conditions shall be interpreted to prohibit, or to require modification of the Use Permit or Regulatory Agreement to allow, the provision of additional BMR units, or additional affordability, then are required in the foregoing provisions.

Prior to Demolition or Start of Construction:

38. **Construction Meeting.** The applicant shall request of the Zoning Officer an on-site meeting with City staff and key parties involved in the early phases of construction (e.g., applicant, general contractor, foundation subcontractors) to review these conditions and the construction schedule. The general contractor or applicant shall ensure that all subcontractors involved in subsequent phases of construction aware of the conditions of approval.

39. **Transportation Construction Plan.** The applicant and all persons associated with the project are hereby notified that a Transportation Construction Plan (TCP) may be required, particularly for the following activities:

    A. Alterations, closures, or blockages to sidewalks, pedestrian paths or vehicle travel lanes (including bicycle lanes);

    B. Storage of building materials, equipment, dumpsters, debris anywhere in the public ROW;

    C. Provision of exclusive contractor parking on-street; or

    D. Significant truck activity.

Please contact the Office of Transportation at (510) 981-7010, or 1947 Center Street, and ask to speak to a traffic engineer. In addition to other requirements of the Traffic Engineer, this plan shall include the locations of material and equipment storage, trailers, worker parking, a schedule of site operations that may block traffic, and provisions for traffic control. The TCP shall be stamped and signed by a registered engineer prior to submittal. The TCP shall be consistent with any other requirements of the construction phase. A current copy of this Plan shall be available at all times at the construction site for review by City Staff.

40. **Construction/No Parking Permits.** Contact the Permit Service Center (PSC) at 1947 Center Street or 981-7500 for details on obtaining Construction/No Parking Permits (and associated signs and accompanying dashboard permits). Please note that the Zoning Officer and/or Traffic Engineer may limit off-site parking of construction-related vehicles if necessary to protect the health, safety or convenience of the surrounding neighborhood.

During Construction:

41. **Construction Hours.** Construction activity shall be limited to between the hours of 8:00 AM and 6:00 PM on Monday through Friday, and between 9:00 AM and Noon on Saturday. No construction-related activity shall occur on Sunday or any Federal Holiday.

42. **Construction Hours- Exceptions.** It is recognized that certain construction activities, such as the placement of concrete, must be performed in a continuous manner and may require an extension of these work hours. Prior to initiating any activity that might require a longer period, the developer must notify the Zoning Officer and request an exception for a finite period of time. If the Zoning Officer approves the request, then two weeks prior to the expanded schedule, the developer shall notify businesses and residents within 500 feet of the project site describing the expanded construction hours. A copy of such notice and methodology for distributing the notice shall be provided in advance to the City for review and approval. The project shall not be allowed more than 15 extended working days.

43. **Project Construction Website.** The applicant shall establish a project construction website with the following information clearly accessible and updated monthly or more frequently as changes warrant.

    A. Contact information (i.e. “hotline” phone number, and email address) for the project construction manager

    B. Calendar and schedule of daily/weekly/monthly construction activities

    C. The final Conditions of Approval, Mitigation Monitoring and Reporting Program, Transportation Construction Plan, Construction Noise Reduction Program, and any other reports or programs related to construction noise, air quality, and traffic.

44. **Public Works - Implement Bay Area Air District (BAAD)-**Recommended Measures during Construction. For all proposed projects, BAAD recommends implementing all the Basic Construction Mitigation Measures, listed below to meet the best management practices threshold for fugitive dust:

    A. All exposed surfaces (e.g., parking areas, staging areas, soil piles, graded areas, and unpaved access roads) shall be watered two times per day.

B. All haul trucks transporting soil, sand, or other loose material off-site shall be covered.

C. All visible mud or dirt track-out onto adjacent public roads shall be removed using wet power vacuum street sweepers at least once per day. The use of dry power sweeping is prohibited.

D. All vehicle speeds on unpaved roads shall be limited to 15 mph.

E. All roadways, driveways, and sidewalks to be paved shall be completed as soon as possible. Building pads shall be laid as soon as possible after grading unless seeding or soil binders are used.

F. Idling times shall be minimized either by shutting equipment off when not in use or reducing the maximum idling time to 5 minutes (as required by the California airborne toxics control measure Title 13, Section 2485 of California Code of Regulations [CCR]). Clear signage shall be provided for construction workers at all access points.

G. All construction equipment shall be maintained and properly tuned in accordance with manufacturer specifications. All equipment shall be checked by a certified visible emissions evaluator.

H. Post a publicly visible sign with the telephone number and person to contact at the lead agency regarding dust complaints. This person shall respond and take corrective action within 48 hours. The Air District's phone number shall also be visible to ensure compliance with applicable regulations.

45. Air Quality - Diesel Particulate Matter Controls during Construction. All off-road construction equipment used for projects with construction lasting more than 2 months shall comply with one of the following measures:

A. The project applicant shall prepare a health risk assessment that demonstrates the project's on-site emissions of diesel particulate matter during construction will not exceed health risk screening criteria after a screening-level health risk assessment is conducted in accordance with current guidance from BAAD and OEHHA. The health risk assessment shall be submitted to the Land Use Planning Division for review and approval prior to the issuance of building permits; or

B. All construction equipment shall be equipped with Tier 2 or higher engines and the most effective Verified Diesel Emission Control Strategies (VDECS) available for the engine type (Tier 4 engines automatically meet this requirement) as certified by the California Air Resources Board (CARB). The equipment shall be properly maintained and tuned in accordance with manufacturer specifications.

C. In addition, a Construction Emissions Minimization Plan (Emissions Plan) shall be prepared that includes the following:

i. An equipment inventory summarizing the type of off-road equipment required for each phase of construction, including the equipment manufacturer, equipment identification number, engine model year, engine certification (tier rating), horsepower, and engine serial number. For all VDECS, the equipment inventory shall also include the technology type, serial number, make, model, manufacturer, CARB verification number level, and installation date.

ii. A Certification Statement that the Contractor agrees to comply fully with the Emissions Plan and acknowledges that a significant violation of the Emissions Plan shall constitute a material breach of contract. The Emissions Plan shall be submitted to the Public Works Department for review and approval prior to the issuance of building permits.

46. **Construction and Demolition Diversion.** Divert debris according to your plan and collect required documentation. Get construction debris receipts from sorting facilities in order to verify diversion requirements. Upload recycling and disposal receipts if using Green Halo and submit online for City review and approval prior to final inspection. Alternatively, complete the Construction Waste Management Plan and present it, along with your construction debris receipts, to the Building Inspector by the final inspection to demonstrate diversion rate compliance. The Zoning Officer may request summary reports at more frequent intervals, as necessary to ensure compliance with this requirement.

47. **Low-Carbon Concrete.** The project shall maintain compliance with the Berkeley Green Code (BMC Chapter 19.37) including use of concrete mix design with a cement reduction of at least 25 percent. Documentation on concrete mix design shall be available at all times at the construction site for review by City Staff. (Project required to meet applicable code at time of building permit application, if different from above.)

48. **Avoid Disturbance of Nesting Birds.** Initial site disturbance activities, including vegetation and concrete removal, shall be prohibited during the general avian nesting season (February 1 to August 30), if feasible. If nesting season avoidance is not feasible, the applicant shall retain a qualified biologist to conduct a preconstruction nesting bird survey to determine the presence/absence, location, and activity status of any active nests on or adjacent to the project site. The extent of the survey buffer area surrounding the site shall be established by the qualified biologist to ensure that direct and indirect effects to nesting birds are avoided. To avoid the destruction of active nests and to protect the reproductive success of birds protected by the MBTA and CFGC, nesting bird surveys shall be performed not more than 14 days prior to scheduled vegetation and concrete removal. In the event that active nests are discovered, a suitable buffer (typically a minimum buffer of 50 feet for passerines and a minimum buffer of 250 feet for raptors) shall be established around such active nests and no construction shall be allowed inside the buffer areas until a qualified biologist has determined that the nest is no longer active (e.g., the nestlings have fledged and are no longer reliant on the nest). No ground-disturbing activities shall occur within this buffer until the qualified biologist has confirmed that breeding/nesting is completed and the young have fledged the nest. Nesting bird surveys are not required for construction activities occurring between August 31 and January 31.

49. **Archaeological Resources (*Ongoing throughout demolition, grading, and/or construction*).** Pursuant to CEQA Guidelines section 15064.5(f), "provisions for historical or unique archaeological resources accidentally discovered during construction" should be instituted. Therefore:

    A. In the event that any prehistoric or historic subsurface cultural resources are discovered during ground disturbing activities, all work within 50 feet of the resources shall be halted and the project applicant and/or lead agency shall consult with a qualified archaeologist, historian or paleontologist to assess the significance of the find.

    B. If any find is determined to be significant, representatives of the project proponent and/or lead agency and the qualified professional would meet to determine the appropriate avoidance measures or other appropriate measure, with the ultimate determination to be made by the City of Berkeley. All significant cultural materials recovered shall be subject to scientific analysis, professional museum curation, and/or a report prepared by the qualified professional according to current professional standards.

    C. In considering any suggested measure proposed by the qualified professional, the project applicant shall determine whether avoidance is necessary or feasible in light of factors such as the uniqueness of the find, project design, costs, and other considerations.

    D. If avoidance is unnecessary or infeasible, other appropriate measures (e.g., data recovery) shall be instituted. Work may proceed on other parts of the project site while mitigation measures for cultural resources is carried out.

    E. If significant materials are recovered, the qualified professional shall prepare a report on the findings for submittal to the Northwest Information Center.

50. **Human Remains (*Ongoing throughout demolition, grading, and/or construction*).** In the event that human skeletal remains are uncovered at the project site during ground-disturbing activities, all work shall immediately halt and the Alameda County Coroner shall be contacted to evaluate the remains, and following the procedures and protocols pursuant to Section 15064.5 (e)(1) of the CEQA Guidelines. If the County Coroner determines that the remains are Native American, the City shall contact the California Native American Heritage Commission (NAHC), pursuant to subdivision (c) of Section 7050.5 of the Health and Safety Code, and all excavation and site preparation activities shall cease within a 50-foot radius of the find until appropriate arrangements are made. If the agencies determine that avoidance is not feasible, then an alternative plan shall be prepared with specific steps and timeframe required to resume construction activities. Monitoring, data recovery, determination of significance and avoidance measures (if applicable) shall be completed expeditiously.

51. **Paleontological Resources (*Ongoing throughout demolition, grading, and/or construction*).** In the event of an unanticipated discovery of a paleontological resource during construction, excavations within 50 feet of the find shall be temporarily halted or diverted until the discovery is examined by a qualified paleontologist (per Society of Vertebrate Paleontology standards [SVP 1995,1996]). The qualified paleontologist shall document the discovery as needed, evaluate the potential resource, and assess the significance of the find. The paleontologist shall notify the appropriate agencies to determine procedures that would be followed before construction is allowed to resume at the location of the find. If the City determines that avoidance is not feasible, the paleontologist shall prepare an excavation plan for mitigating the effect of the project on the qualities that make the resource important, and such plan shall be implemented. The plan shall be submitted to the City for review and approval.

52. **Halt Work/Unanticipated Discovery of Tribal Cultural Resources.** In the event that cultural resources of Native American origin are identified during construction, all work within 50 feet of the discovery shall be redirected. The project applicant and project construction contractor shall notify the City Planning Department within 24 hours. The City will again contact any tribes who have requested consultation under AB 52, as well as contact a qualified archaeologist, to evaluate the resources and situation and provide recommendations. If it is determined that the resource is a tribal cultural resource and thus significant under CEQA, a mitigation plan shall be prepared and implemented in accordance with State guidelines and in consultation with Native American groups. If the resource cannot be avoided, additional measures to avoid or reduce impacts to the resource and to address tribal concerns may be required.

53. **Stormwater Requirements.** The applicant shall demonstrate compliance with the requirements of the City's National Pollution Discharge Elimination System (NPDES) permit as described in BMC Section 17.20. The following conditions apply:

    A. The project plans shall identify and show site-specific Best Management Practices (BMPs) appropriate to activities conducted on-site to limit to the maximum extent practicable the discharge of pollutants to the City's storm drainage system, regardless of season or weather conditions.

    B. Trash enclosures and/or recycling area(s) shall be covered; no other area shall drain onto this area. Drains in any wash or process area shall not discharge to the storm drain system; these drains should connect to the sanitary sewer. Applicant shall contact the City of Berkeley and EBMUD for specific connection and discharge requirements. Discharges to the sanitary sewer are subject to the review, approval and conditions of the City of Berkeley and EBMUD.

    C. Landscaping shall be designed with efficient irrigation to reduce runoff, promote surface infiltration and minimize the use of fertilizers and pesticides that contribute to stormwater pollution. Where feasible, landscaping should be designed and operated to treat runoff. When and where possible, xeriscape and drought tolerant plants shall be incorporated into new development plans.

D. Design, location and maintenance requirements and schedules for any stormwater quality treatment structural controls shall be submitted to the Department of Public Works for review with respect to reasonable adequacy of the controls. The review does not relieve the property owner of the responsibility for complying with BMC Chapter 17.20 and future revisions to the City's overall stormwater quality ordinances. This review shall be shall be conducted prior to the issuance of a Building Permit.

E. All paved outdoor storage areas must be designed to reduce/limit the potential for runoff to contact pollutants.

F. All on-site storm drain inlets/catch basins must be cleaned at least once a year immediately prior to the rainy season. The property owner shall be responsible for all costs associated with proper operation and maintenance of all storm drainage facilities (pipelines, inlets, catch basins, outlets, etc.) associated with the project, unless the City accepts such facilities by Council action. Additional cleaning may be required by City of Berkeley Public Works Engineering Dept.

G. All private or public projects that create and/or replace 5,000 square feet or more of impervious surface must comply with Provision C.3 of the Alameda County NPDES permit and must incorporate stormwater controls to enhance water quality. Permit submittals shall include a Stormwater Requirement Checklist and detailed information showing how the proposed project will meet Provision C.3 stormwater requirements, including a) Site design measures to reduce impervious surfaces, promote infiltration, and reduce water quality impacts; b) Source Control Measures to keep pollutants out of stormwater runoff; c) Stormwater treatment measures that are hydraulically sized to remove pollutants from stormwater; d) an O & M (Operations and Maintenance) agreement for all stormwater treatment devices and installations; and e) Engineering calculations for all stormwater devices (both mechanical and biological). (Project required to meet applicable code at time of building permit application, if different from above.)

H. All on-site storm drain inlets must be labeled “No Dumping – Drains to Bay” or equivalent using methods approved by the City.

I. Most washing and/or steam cleaning must be done at an appropriately equipped facility that drains to the sanitary sewer. Any outdoor washing or pressure washing must be managed in such a way that there is no discharge or soaps or other pollutants to the storm drain. Sanitary connections are subject to the review, approval and conditions of the sanitary district with jurisdiction for receiving the discharge.

J. All loading areas must be designated to minimize “run-on” or runoff from the area. Accumulated waste water that may contribute to the pollution of stormwater must be drained to the sanitary sewer or intercepted and pretreated prior to discharge to the storm drain system. The property owner shall ensure that BMPs are implemented to prevent potential stormwater pollution. These BMPs shall include, but are not limited to, a regular program of sweeping, litter control and spill cleanup.

K. Restaurants, where deemed appropriate, must be designed with a contained area for cleaning mats, equipment and containers. This contained wash area shall be covered or designed to prevent run-on or run-off from the area. The area shall not discharge to the storm drains; wash waters should drain to the sanitary sewer, or collected for ultimate disposal to the sanitary sewer. Employees shall be instructed and signs posted indicating that all washing activities shall be conducted in this area. Sanitary connections are subject to the review, approval and conditions of the waste water treatment plant receiving the discharge.

L. Sidewalks and parking lots shall be swept regularly to prevent the accumulation of litter and debris. If pressure washed, debris must be trapped and collected to prevent entry to the storm drain system. If any cleaning agent or degreaser is used, wash water shall not discharge to the storm drains; wash waters should be collected and discharged to the sanitary sewer. Discharges to the sanitary sewer are subject to the review, approval and conditions of the sanitary district with jurisdiction for receiving the discharge.

M. The applicant is responsible for ensuring that all contractors and sub-contractors are aware of and implement all stormwater quality control measures. Failure to comply with the approved construction BMPs shall result in the issuance of correction notices, citations, or a project stop work order.

54. **Public Works.** Subject to approval of the Public Works Department, the applicant shall repair any damage to public streets and/or sidewalks by construction vehicles traveling to or from the project site.

55. **Public Works.** All piles of debris, soil, sand, or other loose materials shall be covered at night and during rainy weather with plastic at least one-eighth millimeter thick and secured to the ground.

56. **Public Works.** The applicant shall ensure that all excavation accounts for surface and subsurface waters and underground streams so as not to adversely affect adjacent properties and rights-of-way.

57. **Public Works.** The project sponsor shall maintain sandbags or other devices around the site perimeter during the rainy season to prevent on-site soils from being washed off-site and into the storm drain system. The project sponsor shall comply with all City ordinances regarding construction and grading.

58. **Public Works.** Prior to any excavation, grading, clearing, or other activities involving soil disturbance during the rainy season the applicant shall obtain approval of an erosion prevention plan by the Building and Safety Division and the Public Works Department. The applicant shall be responsible for following these and any other measures required by the Building and Safety Division and the Public Works Department.

59. **Public Works.** The removal or obstruction of any fire hydrant shall require the submission of a plan to the City's Public Works Department for the relocation of the fire hydrant during construction.

60. **Public Works / Building and Safety.** If underground utilities leading to adjacent properties are uncovered and/or broken, the contractor involved shall immediately notify the Public Works Department and the Building & Safety Division, and carry out any necessary corrective action to their satisfaction.

Prior to Final Inspection or Issuance of Occupancy Permit:

61. **Percent for Public Art.** Consistent with BMC Section 23.316, the applicant shall either pay the required in-lieu fee or provide the equivalent amount in a financial guarantee to be released after installation of the On-Site Publicly Accessible Art .

62. **Compliance with Conditions.** The project shall conform to the plans and statements in the Use Permit. The developer is responsible for providing sufficient evidence to demonstrate compliance with the requirements throughout the implementation of this Use Permit.

63. All landscape, site and architectural improvements shall be completed per the attached approved drawings received October 22, 2025.

64. **Transportation Demand Management.** Prior to issuance of a Certificate of Occupancy, the property owner shall facilitate a site inspection by Land Use Division staff to confirm that the physical improvements required in BMC Sections 23.334.030(C) and 23.322.090 (bike parking) have been installed. A Parking and Transportation Demand Management (PTDM) compliance report documenting that the programmatic measures required in BMC Sections 23.334.030(C) and 23.322.090 are implemented shall be submitted to the Land Use Division prior to occupancy, and on an annual basis thereafter, which demonstrates that the project is compliant with the applicable requirements in these sections.

    A. Consistent with BMC Section 23.334.030(A), all parking spaces provided for residents be leased or sold separate from the rental or purchase of dwelling units for the life of the dwelling units. The property owner shall notify all residents of this restriction in leases and/or contracts, and shall provide sample leases and/or contracts including such notification to the project planner prior to issuance of Certificate of Occupancy or final inspection.

    B. Consistent with BMC Section 23.334.030(C), publicly-available, real-time transportation information in a common area, such as a lobby or elevator bay, on televisions, computer monitors or other displays readily visible to residents and/or visitors, shall be provided. Transportation information shall include, but is not limited to, transit arrivals and departures for nearby transit routes.

    C. Property owners may be required to pay administrative fees associated with compliance with this Condition.

At All Times:

65. **Compliance with Approved Plan.** The project shall conform to the plans and statements in the Use Permit.

66. **Transportation Demand Management Compliance.** A Transportation Demand Management compliance report shall be submitted to the Zoning Officer, on a form acceptable to the City, prior to occupancy, and on an annual basis for ten years thereafter, which demonstrates that the project complies with the applicable requirements. After three years of timely compliant submittals, staff has the option to accept less frequent submittals (minimum one every three years). Property owners may be required to pay administrative fees associated with compliance with this Condition, pursuant to BMC Section 23.334.040(B).
67. **Exterior Lighting.** All exterior lighting shall be energy efficient where feasible; and shielded and directed downward and away from property lines to prevent excessive glare beyond the subject property.
68. **Rooftop Projections.** No additional rooftop or elevator equipment shall be added to exceed the approved maximum roof height without submission of an application for a Use Permit Modification, subject to Board review and approval.
69. **Drainage Patterns.** The applicant shall establish and maintain drainage patterns that do not adversely affect adjacent properties and rights-of-way. Drainage plans shall be submitted for approval of the Building & Safety Division and Public Works Department, if required.
70. **Electrical Meter.** Only one electrical meter fixture may be installed per dwelling unit.
71. **Loading.** All loading/unloading activities associated with deliveries to all uses shall be restricted to the hours of 7:00 a.m. to 10:00 p.m. daily.
72. **Residential Permit Parking.** No Residential Permit Parking (RPP) permits shall be issued to project residents, nor shall commercial placards be issued to non-residential occupants and/or users of the site. The Finance Department, Customer Service Center shall add these addresses to the list of addresses ineligible for RPP permits. The property owner shall notify all tenants of rental units, and/or buyers of condominium units, of this restriction in leases and/or contracts.
73. **Required Bike Parking.** Secure and on-site bike parking for at least 7 bicycles (exterior/short-term) shall be provided for the life of the building.

VICINITY MAP

BASIS OF BEARINGS:

THE LINE IN DURANT AVENUE BETWEEN THE STANDARD CITY FOR BERKELEY MONUMENT FOUND AT ELLSWORTH STREET AND THE INTERSECTION OF THE REFERENCE POINTS AT FULTON STREET WAS TAKEN AS N83°00'00"E, PROJECTED AS SHOWN ON PARCEL MAP NO. 10100, FILED IN BOOK 320 OF MAPS, AT PAGES 96 THROUGH 100, ALAMEDA COUNTY RECORDS.

VERTICAL DATUM / BENCHMARK:

ELEVATIONS FOR THIS SURVEY ESTABLISHED BY HOLDING THE ELEVATION OF 211.60' ON THE TOP OF A 3/8^{ths} INCH BRASS PIN IN A MONUMENT WELL FOUND AT THE INTERSECTION OF ELLSWORTH STREET AND DURANT AVENUE, AS SHOWN ON THIS MAP. THIS MONUMENT WAS TAKEN AS CITY OF BERKELEY MONUMENT BO401, HELD PER CORNER RECORD 7052 AND CITY SURVEYOR'S NOTES AS CITY OF BERKELEY DATUM.
ELEVATION = 211.60' COB DATUM

TITLE REPORT NOTE:

THE INFORMATION REGARDING EXISTING EASEMENTS OR OTHER ENCUMBRANCES SHOWN ON THIS SURVEY IS BASED ON FIRST AMERICAN TITLE INSURANCE COMPANY PRELIMINARY TITLE REPORTS PROVIDED TO THE SURVEYOR, THE FIRST HAVING ORDER NUMBER NCS-1183023-CC, DATED MAY 31, 2023, AND THE SECOND HAVING ORDER NUMBER NCS-1177686, AMENDED, DATED APRIL 11, 2023. THERE MAY BE EASEMENTS OR OTHER ENCUMBRANCES OF RECORD THAT EXIST BUT ARE NOT DELINEATED HEREON.

UTILITIES NOTE:

INFORMATION SHOWN ON THIS SURVEY REGARDING EXISTING UTILITIES IS APPROXIMATE ONLY, IS BASED ON VISUAL OBSERVATIONS AND/OR UTILITY COMPANY RECORDS, AND HAS NOT BEEN VERIFIED AS BEING COMPLETE OR CORRECT. THE ENGINEER ASSUMES NO RESPONSIBILITY FOR THE ACCURACY OR COMPLETENESS OF THE EXISTING UTILITY INFORMATION SHOWN HEREON, NOR FOR THE PRESENCE OF OTHER UTILITIES WHICH MAY EXIST BUT ARE NOT SHOWN ON THIS SURVEY.

PROJECT NO.	2024.030
PHASE NO.	XX
SHEET NO.	C0.1

ALL IDEAS, DESIGNS, ARRANGEMENTS AND PLANS INDICATED BY THIS DRAWING ARE OWNED BY, AND THE PROPERTY OF THIS OFFICE AND WERE CREATED, EVOLVED AND DEVELOPED FOR USE ON, AND IN CONNECTION WITH THE SPECIFIED PROJECT. NONE OF SUCH IDEAS, DESIGNS, ARRANGEMENTS OR PLANS SHALL BE USED BY OR DISCLOSED TO ANY PERSON, FIRM OR CORPORATION FOR ANY PURPOSE WHATSOEVER WITHOUT THE WRITTEN PERMISSION OF GREENWOOD & MOORE, INC.
VISUAL CONTACT WITH THESE DRAWINGS SHALL HAVE PRECEDENCE OVER SCALE DIMENSIONS. CONTRACTOR SHALL VERIFY AND BE RESPONSIBLE FOR ALL DIMENSIONS AND CONDITIONS ON THE JOB. THIS OFFICE MUST BE NOTIFIED OF ANY VARIATIONS FROM DIMENSIONS AND CONDITIONS SHOWN BY THESE DRAWINGS PRIOR TO COMMENCEMENT OF WORK.

GENERAL NOTES:

1. THESE PLANS AND SPECIFICATIONS ARE SUBJECT TO MODIFICATION DURING CONSTRUCTION WHEN CONDITIONS DEVELOP THAT WERE NOT APPARENT DURING THE DESIGN AND PREPARATION OF THESE PLANS. ALL MODIFICATIONS MUST BE APPROVED BY THE CITY ENGINEER PRIOR TO CONSTRUCTION AND/OR IMPLEMENTATION.
2. ALL IMPROVEMENTS SHALL BE CONSTRUCTED IN ACCORDANCE WITH THE CITY OF BERKELEY STANDARD SPECIFICATIONS AND DETAILS SUBJECT TO THE INSPECTION AND APPROVAL OF THE ENGINEERING DIVISION OF THE PUBLIC WORKS DEPARTMENT. ALL REVISIONS MUST BE APPROVED BY THE CITY PRIOR TO CONSTRUCTION.
3. PRIOR TO COMMENCEMENT OF CONSTRUCTION, A PRE-JOB CONFERENCE SHALL BE REQUESTED BY THE DEVELOPER THROUGH THE CITY ENGINEER,
4. BEFORE COMMENCEMENT OF WORK, THE CONTRACTOR SHALL REVIEW ALL PLANS AND SPECIFICATIONS AND THE JOB SITE. THE CONTRACTOR WILL NOTIFY THE OWNER, THE ENGINEER WHO PREPARED THE PLANS, AND THE CITY ENGINEER OF ANY DISCREPANCIES THAT MAY REQUIRE MODIFICATION TO THESE PLANS OR OF ANY FIELD CONFLICTS.
5. APPROVAL OF THESE PLANS BY THE CITY ENGINEER SHALL NOT RELIEVE THE DEVELOPER OR THE ENGINEER FROM THE RESPONSIBILITY FOR THE DESIGN OF THE IMPROVEMENTS AND FOR ANY DEFICIENCIES RESULTING FROM THE DESIGN THEREOF.
7. ALL LANDSCAPING IS SUBJECT TO CITY INSPECTION. ANY CHANGE IN THE APPROVED LANDSCAPE PLAN MUST BE APPROVED BY THE CITY'S DESIGN REVIEW STAFF.
8. SHOULD IT APPEAR THAT THE WORK TO BE DONE OR ANY MATTER RELATIVE THERETO IS NOT SUFFICIENTLY DETAILED OR EXPLAINED ON THESE PLANS, THE CONTRACTOR SHALL CONTACT THE PROJECT ENGINEER FOR SUCH FURTHER EXPLANATIONS AS MAY BE NECESSARY.
9. IN ACCORDANCE WITH GENERALLY ACCEPTED CONSTRUCTION PRACTICES, THE CONTRACTOR WILL BE REQUIRED TO ASSUME SOLE AND COMPLETE RESPONSIBILITY FOR JOB SITE CONDITIONS DURING THE COURSE OF CONSTRUCTION OF THE PROJECT, INCLUDING SAFETY OF ALL PERSONS AND PROPERTY. THIS REQUIREMENT SHALL BE MADE TO APPLY CONTINUOUSLY AND NOT BE LIMITED TO NORMAL WORKING HOURS. THE CONTRACTOR FURTHER AGREES TO DEFEND, INDEMNIFY, AND HOLD THE CITY, THE OWNER, AND DESIGN PROFESSIONAL HARMLESS FROM ANY AND ALL LIABILITY, REAL OR ALLEGED, IN CONNECTION WITH THE PERFORMANCE OF WORK ON THIS PROJECT, EXCEPT FOR LIABILITY ARISING FROM THE SOLE NEGLIGENCE OF THE OWNER OR DESIGN PROFESSIONAL.
10. THE CONTRACTOR'S ATTENTION IS DIRECTED TO THE REQUIREMENTS OF THE DIVISION OF INDUSTRIAL SAFETY PERTAINING TO "CONFINED SPACES". ANY MANHOLE, CULVERT, DROP INLET OR TRENCH WHICH COULD CONTAIN AIR WHICH IS NOT READILY VENTILATED MAY BE CONSIDERED A "CONFINED SPACE". THE CONTRACTOR SHALL PROVIDE THE NECESSARY SAFETY OR TESTING EQUIPMENT AND PERSONNEL.
11. THE CONTRACTOR SHALL BE HELD RESPONSIBLE FOR ANY AND ALL DAMAGE TO EXISTING STRUCTURES AND/OR UTILITIES DURING CONSTRUCTION, PROPER REPAIR SHOULD BE DONE TO THE SATISFACTION OF THE REPRESENTATIVE OF THE CITY ENGINEER.
12. TO THE EXTENT FEASIBLE, SCHEDULE THE NOISIEST CONSTRUCTION ACTIVITIES DURING TIMES THAT WOULD HAVE THE LEAST IMPACT ON ADJACENT PROPERTIES. THIS WOULD INCLUDE RESTRICTING TYPICAL DEMOLITION AND EXTERIOR CONSTRUCTION ACTIVITIES TO STANDARD HOURS OF 7:00 AM TO 5:30 PM MONDAY THROUGH FRIDAY AND 8:00 AM TO 4:30 PM ON SATURDAY. THE CONTRACTOR SHALL ENSURE THAT ALL EQUIPMENT POWERED BY INTERNAL COMBUSTION ENGINES ARE FITTED EFFECTIVELY WITH MUFFLERS IN GOOD OPERATING CONDITION. WHERE FEASIBLE, NOISE GENERATING EQUIPMENT SHOULD BE STAGED AS FAR AWAY FROM EXISTING RESIDENCES, AND MOBILE EQUIPMENT SHOULD NOT BE ALLOWED TO IDLE UNNECESSARILY NEAR THE RESIDENTIAL OR CHILD CARE USES. THE CONTRACTOR SHALL COORDINATE CONSTRUCTION ACTIVITIES THAT GENERATE NOISE WITH THE OWNER.
13. CONTRACTOR SHALL OBTAIN ENCROACHMENT PERMITS FROM THE CITY OF BERKELEY PUBLIC WORKS PRIOR TO COMMENCING CONSTRUCTION INVOLVING THEIR RIGHT-OF-WAY, AND FOR THE CONSTRUCTION, MODIFICATION, OR CONNECTION TO DEPARTMENT OR DISTRICT-MAINTAINED FACILITIES. ALL WORKMANSHIP, EQUIPMENT AND MATERIALS SHALL CONFORM TO DEPARTMENT STANDARDS AND SPECIFICATIONS.
14. THE FORMS FOR CONCRETE SIDEWALKS, CURBS, GUTTERS AND DRIVEWAYS THAT ARE TO BE CONSTRUCTED TO CONFORM TO EXISTING ROADS SHALL BE INSTALLED TO THE GRADES SHOWN UPON THESE PLANS. PRIOR TO PLACING CONCRETE, THE FORMS SHALL BE INSPECTED AND APPROVED BY THE CITY ENGINEER FOR CONFORMANCE TO EXISTING ROAD IMPROVEMENTS. GRADES OF NEW IMPROVEMENTS ARE SUBJECT TO FIELD ADJUSTMENT TO FIT CONDITIONS.
15. THE PROPOSED STREET STRUCTURAL SECTION IS TO BE DESIGNED BY A REGISTERED CIVIL ENGINEER AND APPROVED BY THE CITY ENGINEER.
16. IN CONFORM AREAS, IF FULL STRUCTURAL SECTION IS NOT FOUND AT THE APPARENT EDGE OF PAVEMENT, FURTHER STREET EXCAVATION WILL BE REQUIRED UNTIL THE FULL SECTION IS ENCOUNTERED.
17. TEMPORARY REPAIRS TO ALL TRENCHES WITHIN THE TRAVELED WAY ON EXISTING ROADS SHALL BE MADE WITHIN TWENTY-FOUR (24) HOURS OF TRENCH OPENING. MINIMUM TEMPORARY REPAIRS SHALL CONSIST OF BACKFILLING AND COMPACTING 6" OF AGGREGATE BASE AND 1" OF TEMPORARY ASPHALTIC SURFACING. PERMANENT REPAIRS, INCLUDING RESTORATION OF THE EXISTING STRUCTURAL SECTION SHALL BE MADE WITHIN FIFTEEN (15) DAYS OF TRENCH OPENING.
18. IN THE EVENT OF ANY DISCREPANCY BETWEEN ANY DRAWING AND THE FIGURES WRITTEN THEREON, THE FIGURES SHALL BE TAKEN AS CORRECT.
19. THE CONTRACTOR SHALL POST EMERGENCY TELEPHONE NUMBERS AT THE JOB SITE FOR THE CONTRACTOR AND PUBLIC WORKS AGENCY.
20. THE CONTRACTOR SHALL PROVIDE FOR INGRESS AND EGRESS TO PRIVATE PROPERTY ADJACENT TO THE WORK THROUGHOUT THE PERIOD OF CONSTRUCTION.
21. THE CONTRACTOR SHALL NOT DISTURB ANY PERMANENT SURVEY POINTS WITHOUT THE CONSENT OF THE CITY ENGINEER. ANY POINTS DESTROYED SHALL BE REPLACED BY A LICENSED SURVEYOR AT THE CONTRACTOR'S EXPENSE.
22. THE CONTRACTOR IS RESPONSIBLE FOR MATCHING EXISTING FACILITIES TO AVOID ANY ABRUPT OR APPARENT CHANGES IN GRADES OR CROSS SLOPES, LOW SPOTS, OR HAZARDOUS CONDITIONS.
23. CONTRACTOR SHALL SALVAGE AND RELOCATE EXISTING STREET SIGNS AND INSTALL NEW SIGNS PER CITY OF BERKELEY SPECIFICATIONS AS REQUIRED.
24. WHERE UNSTABLE OR UNSUITABLE MATERIALS ARE ENCOUNTERED DURING SUB-GRADE PREPARATION, THE AREA IN QUESTION SHALL BE OVER EXCAVATED AND REPLACED BY SELECT BACKFILL MATERIAL AS DIRECTED IN THE FIELD BY THE ENGINEER.
25. ALL TRENCH EXCAVATION AND BACKFILL SHALL BE IN ACCORDANCE WITH THE TRENCH BACKFILL DETAIL, SHOWN ON THESE PLANS.
26. ALL TREES LOCATED WITHIN THE ROADWAY PRISM OR SHOWN TO BE REMOVED IN THE STREET RIGHT-OF-WAY OR EASEMENTS SHALL BE REMOVED COMPLETELY, INCLUDING ROOTS, AND HAULED AWAY.
27. THE CONTRACTOR SHALL NOT REMOVE, DISTURB, OR HARM, IN ANY WAY, ANY TREE NOT SPECIFICALLY DESIGNATED AND APPROVED BY THE INSPECTOR FOR REMOVAL.
28. COMPACTION TESTS SHALL BE PERFORMED ON ALL TRENCHES AND STREET WORK TO VERIFY THAT COMPACTION CONFORMS TO CITY STANDARDS. ALL TESTING WILL BE AT THE DEVELOPER OR CONTRACTOR'S EXPENSE.
29. THE DUTIES OF THE CITY ENGINEER AND PROJECT ENGINEER DO NOT INCLUDE THE ADEQUACY OF THE CONTRACTOR'S SAFETY IN, ON, OR NEAR THE CONSTRUCTION SITE.
30. THE CONTRACTOR SHALL COMPLY WITH THE RULES AND REGULATIONS OF THE STATE CONSTRUCTION SAFETY ORDERS. ALL TRENCHES OVER FIVE FEET IN DEPTH SHALL BE SHORED IN ACCORDANCE WITH CAL-OSHA "CONSTRUCTION SAFETY ORDERS" CURRENT EDITION. CONTRACTOR MUST HAVE VALID TRENCH SHORING PERMIT ISSUED BY CAL-OSHA.
31. TRAFFIC CONTROL SHALL BE PROVIDED IN ACCORDANCE WITH CALTRANS "MANUAL OF TRAFFIC CONTROLS FOR CONSTRUCTION AND MAINTENANCE WORK ZONES" CURRENT EDITION AND THESE PLANS. A TRAFFIC CONTROL PLAN WILL BE REQUIRED AND A PERMIT WILL BE REQUIRED TO IMPLEMENT IT. CONTRACTOR SHALL MEET WITH TRAFFIC AND PUBLIC WORKS TO DISCUSS PROJECT NEEDS AND PREPARE TRAFFIC CONTROL PLANS.
32. THE CONTRACTOR SHALL PROVIDE ALL LIGHTS, SIGNS, BARRICADES, FLAGMEN, OR OTHER DEVICES NECESSARY TO PROVIDE FOR PUBLIC SAFETY. SUBMIT LANE CLOSURE AND TRAFFIC CONTROL PLANS PRIOR TO BEGINNING WORK TO THE CITY ENGINEER FOR APPROVAL.
33. ALL UNDERGROUND UTILITIES WITHIN THE RIGHT-OF-WAY OR ACCESS EASEMENT, INCLUDING MAINS AND LATERALS, SHALL BE INSTALLED AND BACKFILL COMPLETED PRIOR TO THE START OF CURB, SIDEWALK AND PAVING CONSTRUCTION.
34. ALL TRENCH BACKFILL WITHIN THE RIGHT-OF-WAY SHALL BE COMPACTED AS SHOWN IN CITY'S STANDARD PLANS OR AS RECOMMENDED BY THE ENGINEER. IF TESTS SHOW THAT THE ACTUAL COMPACTION HAS NOT EQUALED OR SURPASSED THAT WHICH IS RECOMMENDED, THE ENGINEER SHALL PROVIDE THE PROPOSED ACTION TO BE TAKEN.
35. ALL NEW STORM DRAIN INLETS SHALL BE STENCILED OR STAMPED WITH CITY'S CLEAN WATER PROGRAM STANDARD LOGO, "NO DUMPING – DRAINS TO BAY," PRIOR TO THE ACCEPTANCE OF THE SITE IMPROVEMENTS OR THE FINAL BUILDING INSPECTION, WHICHEVER OCCURS FIRST.
36. CONTRACTOR SHALL NOTIFY UNDERGROUND SERVICE ALERT (USA) AT LEAST TWO WORKING DAYS PRIOR TO ANY EXCAVATION.
37. AN ENGINEERING PERMIT WILL BE REQUIRED FOR ANY WORK IN THE PUBLIC RIGHT-OF-WAY, INCLUDING BUT NOT LIMITED TO CONSTRUCTION STAGING, CONSTRUCTION PARKING, SIDEWALK, DRAINAGE, OR SEWER WORK. THE ENGINEERING PERMIT CAN BE ISSUED AFTER THE BUILDING PERMIT IS APPROVED AND ISSUED. APPROVAL OF THIS BUILDING PERMIT DOES NOT AUTHORIZE WORK IN THE PUBLIC RIGHT-OF-WAY.

DEMOLITION NOTES:

1. THE EXTENT OF DEMOLITION WORK IS TO BE AS SHOWN ON THIS PLAN. DEMOLITION INCLUDES COMPLETE WRECKING, REMOVAL AND DISPOSAL OF STRUCTURES, BURIED DEBRIS, FOUNDATIONS, PAVEMENT, CURBS, TREES & SHRUBS (INCLUDING ROOT SYSTEMS), DRAINAGE STRUCTURES, UTILITIES, SIGNAGE, LANDSCAPING AND/OR IRRIGATION SYSTEM, UNLESS OTHERWISE INDICATED ON THIS PLAN OR OTHERWISE DIRECTED BY THE OWNER OR HIS REPRESENTATIVE. EXISTING PERIMETER FENCES ARE TO REMAIN UNLESS OTHERWISE DIRECTED BY THE OWNER OR HIS REPRESENTATIVE
2. THIS DEMOLITION PLAN IS NOT INTENDED TO DETERMINE THE METHOD, DETAILS AND/OR MEANS OF PERFORMING THE DEMOLITION WORK. THIS PLAN MAKES NO INQUIRY OR DETERMINATION AS TO THE EXISTENCE OF HAZARDOUS OR TOXIC MATERIALS EXISTING ON SITE. IT IS RECOMMENDED THAT AN INDEPENDENT INQUIRY BE PERFORMED PRIOR TO DEMOLITION WORK TO DETERMINE THE EXISTENCE OF ANY POTENTIAL HAZARDOUS OR TOXIC RISK.
3. THE CONTRACTOR SHALL BE RESPONSIBLE FOR LOCATING ALL EXISTING UNDERGROUND UTILITIES, WHETHER SHOWN ON THESE PLANS OR NOT, PRIOR TO THE COMMENCEMENT OF ANY DEMOLITION WORK.
4. ALL EXISTING UTILITIES AND APPURTENANCES THERETO SERVING ANY EXISTING STRUCTURE OR BUILDINGS AND THOSE IN THE PUBLIC RIGHT OF WAY SERVING PUBLIC UTILITIES ARE TO REMAIN AND SHALL BE PROTECTED IN PLACE UNLESS DIRECTED TO BE REMOVED AND REPLACED ELSEWHERE ON THESE PLANS.
5. THE CONTRACTOR SHALL CONTACT ALL ASSOCIATED UTILITY SUPPLIERS PRIOR TO DEMOLITION TO COORDINATE THE DISCONNECTION AND REMOVAL OR ABANDONMENT OF UTILITIES (I.E. TELEPHONE, ELECTRICAL, WATER, SEWER, ETC.) SERVING THE STRUCTURE TO BE DEMOLISHED.
6. THE CONTRACTOR SHALL OBTAIN A LIST OF ITEMS TO BE SALVAGED FROM THE OWNER PRIOR TO COMMENCING THE DEMOLITION WORK.
7. THE FINISHED GROUND SURFACE SHALL BE LEFT IN A SMOOTH, UNIFORM GRADED CONDITION.
8. DEMOLITION OPERATIONS AND REMOVAL OF DEBRIS SHALL BE CONDUCTED IN A MANNER TO INSURE MINIMUM INTERFERENCE WITH STREETS, SIDEWALKS AND OTHER ADJACENT OCCUPIED OR UTILIZED FACILITIES.
9. THE CONTRACTOR SHALL INSURE THE SAFE PASSAGE OF PERSONS AROUND THE DEMOLITION AREA. CONDUCT OPERATIONS TO PREVENT DAMAGE TO ADJACENT BUILDINGS, STRUCTURES AND OTHER FACILITIES.
10. THE CONTRACTOR SHALL PROMPTLY REPAIR ANY DAMAGE CAUSED TO ADJACENT FACILITIES BY DEMOLITION OPERATIONS AT NO COST TO THE OWNER.
11. USE WATER SPRINKLING, TEMPORARY ENCLOSURES AND OTHER SUITABLE METHODS TO LIMIT DUST AND DIRT SCATTERING AND RISING IN AIR TO LOWEST PRACTICAL LEVEL. COMPLY WITH GOVERNING REGULATIONS PERTAINING TO ENVIRONMENTAL PROTECTION. CONTRACTOR IS RESPONSIBLE FOR CLEANLINESS OF ADJACENT STRUCTURES AND IMPROVEMENTS. SUCH IMPROVEMENTS SHALL BE KEPT FREE OF DUST, DIRT AND DEBRIS CAUSED BY DEMOLITION OPERATIONS. RETURN ADJACENT AREAS TO CONDITIONS EXISTING PRIOR TO START OF WORK.
12. DUST CONTROLS SHALL BE IMPLEMENTED DURING ALL DEMOLITION AND GRADING OPERATIONS. PUBLIC STREETS SHALL BE SWEPT CLEAN AS NECESSARY.
13. THE GENERAL CONTRACTOR SHALL BE RESPONSIBLE FOR ALL REQUIRED TRAFFIC CONTROL AND SAFETY ISSUES.
14. THE GENERAL CONTRACTOR SHALL BE RESPONSIBLE FOR ALL CONSTRUCTION COORDINATION WITH ALL ADJACENT PROPERTY OWNERS FOR WORK TO BE PERFORMED ON THEIR PROPERTIES.
15. THE GENERAL CONTRACTOR SHALL BE RESPONSIBLE FOR THE DESIGN AND INSTALLATION OF ALL REQUIRED TEMPORARY ACCESS DEVICES (TRENCH PLATES, FENCES, ETC) AS REQUIRED TO ALLOW ACCESS DURING THE COURSE OF CONSTRUCTION.
16. ALL DEMOLITION WORK SHALL BE IN ACCORDANCE WITH CITY SPECIFICATIONS AND STANDARDS.
17. FIELD VERIFY ALL UTILITY TERMINATION POINTS, SIZES AND LOCATIONS PRIOR TO CONSTRUCTION. ALL UTILITIES TO BE CAPPED, ABANDONED OR MODIFIED SHOULD BE "POTHOLED" TO CONFIRM THEIR SIZE, LOCATION AND CONFIGURATION PRIOR TO CONSTRUCTION.
18. GENERAL CONTRACTOR SHALL PROVIDE A UTILITY REMOVAL/RELOCATION PLAN FOR CLIENT'S REVIEW PRIOR TO CONSTRUCTION.

GRADING NOTES:

1. THE DEVELOPER SHALL, AT HIS SOLE EXPENSE, MAKE TESTS OVER THE SOIL ON WHICH THE ROAD SURFACING AND BASE IS TO BE CONSTRUCTED.
2. A REPRESENTATIVE OF THE SOILS ENGINEER SHALL BE ON THE SITE DURING GRADING OPERATIONS AND SHALL OBSERVE THE GRADING AND IDENTIFY ANY CONDITIONS THAT SHOULD BE CORRECTED AND RECOMMEND CORRECTIVE MEASURES TO THE CONTRACTOR AND THE CITY ENGINEER.
3. GRADING AT THE BOUNDARIES OF THIS PROJECT SHALL BE DONE SO AS NOT TO OBSTRUCT THE RUNOFF OF STORM WATERS FROM ADJACENT PROPERTIES. ALL GRADING SHALL BE DONE TO PROVIDE STABLE SLOPES WHICH SHALL DRAIN ONTO THIS PROJECT, WHICH IN TURN SHALL BE GRADED TO STREETS OR DRAINAGE DITCHES OR ACROSS LAND WITHIN THIS PROJECT, WHICH IN TURN SHALL BE GRADED TO STREETS OR TO DRAINAGE FACILITIES SHOWN ON THESE PLANS. GRADING SHALL BE DONE IN SUCH A MANNER THAT ALL NEW SLOPES SHALL DIRECT STORM WATER TO THE STREETS OR INTERCEPTION DITCHES OR ACROSS LAND WITHIN THIS PROJECT AND SHALL NOT DIVERT OR CREATE A MEANS FOR STORM WATER TO FLOW ONTO ADJACENT PROPERTIES, EXCEPT AS INDICATED ON THE PLANS.
4. GRADING SHALL NOT BE PERMITTED ON THE SITE UNTIL A GRADING PERMIT IS ISSUED IN ACCORDANCE WITH THE CITY OF BERKELEY GENERAL ORDINANCE AND CODES FOR GRADING, EROSION AND SEDIMENT CONTROLS.
5. ALL GRADING, EROSION AND SEDIMENTATION CONTROL AND RELATED WORK UNDERTAKEN ON THIS SITE IS SUBJECT TO ALL TERMS AND CONDITIONS OF THE GRADING ORDINANCE AND APPLICATION FOR GRADING.
6. IF GRADING ON THE SITE IS STARTED, CONTINUED OR ABANDONED BETWEEN OCTOBER FIRST AND APRIL FIFTEENTH OF ANY YEAR OF CONSTRUCTION, ALL EROSION AND SEDIMENT CONTROL IMPROVEMENTS AND PLANTING SHALL BE COMPLETED PRIOR TO OCTOBER FIRST.
7. CONTRACTOR SHALL KEEP EXISTING STREETS FREE FROM DIRT AND DEBRIS DURING ALL PHASES OF CONSTRUCTION TO THE SATISFACTION OF THE CITY ENGINEER. ALL TRASH, CONSTRUCTION DEBRIS, AND MATERIALS WILL BE CONTAINED ON SITE UNTIL DISPOSAL OFF-SITE CAN BE ARRANGED.
8. DUST CONTROL MEASURES AS APPROVED BY THE CITY ENGINEER SHALL BE FOLLOWED IN ALL AREAS UNDERGOING GRADING AND OTHER CONSTRUCTION ACTIVITIES.

THE GRADING WORK DEPICTED HEREON SHALL CONFORM TO THE RECOMMENDATIONS CONTAINED IN THE SOIL INVESTIGATION TITLED "GEOTECHNICAL INVESTIGATION PROPOSED RESIDENTIAL BUILDING 2298 DURANT AVENUE BERKELEY, CALIFORNIA."

PREPARED BY:
ROCKRIDGE GEOTECHNICAL
1350 OCEAN AVE.
EMERYVILLE, CA 94608
(510) 420-5738

9. WHERE SOIL OR GEOLOGIC CONDITIONS ENCOUNTERED IN GRADING OPERATIONS ARE DIFFERENT FROM THOSE ANTICIPATED IN THE SOIL AND GEOLOGIC INVESTIGATION REPORT, OR WHERE CONDITIONS WARRANT CHANGES TO THE RECOMMENDATIONS CONTAINED THEREIN, A REVISED SOIL OR GEOLOGIC REPORT SHALL BE SUBMITTED FOR APPROVAL AND SHALL BE ACCOMPANIED BY AN ENGINEERS OPINION AS TO THE SAFETY OF THE SITE FROM THE POSSIBILITY OF LAND SLIPPAGE, SETTLEMENT AND SEISMIC ACTIVITY.
10. THE PROJECT ENGINEER AND GEOLOGIST SHALL PROVIDE A DECLARATION STATING THAT ALL WORK WAS DONE IN ACCORDANCE WITH THE APPROVED PLANS AND SPECIFICATIONS AND THE RECOMMENDATIONS CONTAINED IN THE SOIL AND GEOLOGIC REPORT.
11. THE SOILS ENGINEER SHALL BE NOTIFIED AT LEAST TWO (2) WORKING DAYS PRIOR TO PLACEMENT OF FILL SO THAT ARRANGEMENTS FOR INSPECTION CAN BE MADE.
12. THE CONTRACTOR SHALL ARRANGE A PRE-CONSTRUCTION MEETING WITH THE CITY ENGINEER BEFORE THE START OF CONSTRUCTION. THE CONTRACTOR SHALL CONTACT THE REVIEW ENGINEER AT (510) 581-2772 TO ARRANGE A TIME FOR THE MEETING.
13. OPERATIONS SHALL CEASE IN THE VICINITY OF ANY SUSPECTED ARCHAEOLOGICAL RESOURCE UNTIL AN ARCHAEOLOGIST IS CONSULTED AND HIS OR HER RECOMMENDATIONS FOLLOWED, SUBJECT TO APPROVAL BY THE PLANNING DIRECTOR. IF EVIDENCE OF HUMAN REMAINS IS DISCOVERED ON THE SITE, THE COUNTY CORONER SHALL BE NOTIFIED IMMEDIATELY.
14. ANY WATER WELL, CATHODIC PROTECTION WELL OR EXPLORATORY BORING THAT IS SHOWN ON THESE PLANS, IS KNOWN TO EXIST, IS PROPOSED OR IS LOCATED DURING THE COURSE OF FIELD OPERATIONS MUST BE PROPERLY DESTROYED, BACKFILLED OR MAINTAINED IN ACCORDANCE WITH THECITY OF BERKELEY REGULATIONS.
15. EXISTING UNDERGROUND FACILITIES AS SHOWN ARE APPROXIMATE ONLY AND WERE OBTAINED FROM AVAILABLE UTILITY RECORDS. THE PROJECT ENGINEER ASSUMES NO RESPONSIBILITY FOR THE ACCURACY OR COMPLETENESS OF EXISTING UTILITY INFORMATION. IT SHALL BE THE CONTRACTOR'S RESPONSIBILITY TO CONTACT ALL LOCAL UTILITIES AND TO HAVE ALL FACILITIES LOCATED AND EXPOSED TO VERIFY THE CLEARANCE AT NEW PIPE CROSSINGS PRIOR TO THE START OF NEW PIPELINE CONSTRUCTION.

FIRE PROTECTION AND DOMESTIC WATER NOTES:

1. ALL DOMESTIC WATER LINES 4" AND LARGER SHALL BE C900, CLASS 200 PIPE. DOMESTIC WATER LINES SMALLER THAN 4" SHALL BE PVC SCHEDULE 80.
2. EBMUD SPECIFICATIONS AND STANDARDS ARE INCORPORATED HEREON BY REFERENCE. ALL DOMESTIC AND FIRE WATER LINE CONSTRUCTION FROM THE CONNECTION TO THE MAIN TO THE BACKFLOW/DOUBLE DETECTOR CHECK VALVE SHALL BE INSTALLED PER EBMUD STANDARDS AND SPECIFICATIONS.
3. AN EBMUD PERMIT IS REQUIRED FOR CONNECTIONS TO EBMUD FACILITIES.
4. ALL EXISTING WATER SERVICES TO BE ABANDONED SHALL BE DONE PER EBMUD STANDARDS AND SPECIFICATIONS.
5. INSTALL LOCATOR WIRE DIRECTLY ON TOP OF THE PIPE AND MAGNETIC TAPE WITHIN 12" ABOVE ALL PLASTIC WATER PIPES.
6. THE FIRE SYSTEM DESIGN SHOWN ON THESE PLANS ARE FOR GENERAL PURPOSES ONLY. REFER TO FIRE SYSTEM SHOP DRAWINGS AND SPECIFICATIONS, BY GENERAL CONTRACTOR, FOR ADDITIONAL INFORMATION.

UTILITY NOTES:

1. FIELD VERIFY ALL UTILITY TERMINATION POINTS, SIZES AND LOCATIONS PRIOR TO CONSTRUCTION. ALL UTILITIES TO BE CAPPED, ABANDONED OR MODIFIED SHOULD BE "POTHOLED" TO CONFIRM THEIR SIZE, LOCATION AND CONFIGURATION PRIOR TO CONSTRUCTION.
2. GENERAL CONTRACTOR SHALL PROVIDE A UTILITY REMOVAL/RELOCATION PLAN FOR CLIENT'S REVIEW PRIOR TO CONSTRUCTION.
3. IT IS RECOMMENDED THAT ALL EXISTING UTILITIES THAT ARE TO BE REMOVED, RELOCATED, MODIFIED OR IMPACTED BY THE PROPOSED CONSTRUCTION BE FIELD LOCATED BY THE GENERAL CONTRACTOR PRIOR TO THE START OF CONSTRUCTION. THE INTENT OF THE UTILITY DESIGN IS TO CONTINUE TO USE THE MAJORITY OF THE EXISTING UTILITIES. THE LOCATION OF MOST OF THE UTILITIES ARE UNKNOWN OR UNVERIFIED. IF THE EXISTING UTILITIES ARE NOT LOCATED AS INDICATED ON THE PLAN, SUBSTANTIAL REDESIGN WORK MAY BE REQUIRED. THE GENERAL CONTRACTOR SHALL NOTIFY THE ENGINEER OF ANY DISCREPANCIES IN THE PLANS.
4. DEMOLISH AND REMOVE ALL EXISTING UTILITIES AND SUPPORT STRUCTURES AT BUILDINGS TO BE REMOVED.
5. ALL EXISTING UTILITY BOXES, LIDS, VALVE COVERS, VAULTS, ETC. THAT ARE TO REMAIN SHALL BE ADJUSTED TO MEET THE NEW FINISHED GRADES (AS REQUIRED). RE-USE EXISTING BOXES, LIDS, VALVE COVERS, VAULTS (IF POSSIBLE), OR INSTALL NEW PER COUNTY REQUIREMENTS. REPLACE ALL DAMAGED ITEMS. MATCH EXISTING SIZES. INSTALL/REPLACE TRAFFIC RATED BOXES WHERE REQUIRED. FIELD VERIFY THE EXTENT OF WORK.
6. REMOVE OR ABANDON ALL UNUSED SITE UTILITIES PER LOCAL REQUIREMENTS. FIELD VERIFY EXTENT OF REMOVAL.
7. THE CONTRACTOR IS RESPONSIBLE TO NOTIFY ALL UTILITIES AND UNDERGROUND SERVICE ALERT AT (800) 227-2600 48 HOURS PRIOR TO ANY EXCAVATION SO THAT THEIR LINES CAN BE MARKED.
8. ABANDONED UNDERGROUND STRUCTURES ENCOUNTERED IN THE STREET AREAS SHALL BE REMOVED TO SUFFICIENT DEPTH TO ALLOW UNDERGROUND LINES TO CROSS. EXCAVATED AREAS SHALL BE FILLED AND COMPACTED DURING ROUGH GRADING. THE COUNTY INSPECTOR MAY REQUIRE ADDITIONAL WORK BE DONE IF VISUAL INSPECTION INDICATES IT IS NECESSARY.
9. EXISTING UNDERGROUND FACILITIES AS SHOWN ARE APPROXIMATE ONLY AND WERE OBTAINED FROM AVAILABLE UTILITY RECORDS. THE PROJECT ENGINEER ASSUMES NO RESPONSIBILITY FOR THE ACCURACY OR COMPLETENESS OF EXISTING UTILITY INFORMATION. IT SHALL BE THE CONTRACTOR'S RESPONSIBILITY TO CONTACT ALL LOCAL UTILITIES AND TO HAVE ALL FACILITIES LOCATED AND EXPOSED TO VERIFY THE CLEARANCE AT NEW PIPE CROSSINGS PRIOR TO THE START OF NEW PIPELINE CONSTRUCTION.
10. ANY RELOCATION OF THE PUBLIC UTILITIES SHALL BE DONE IN ACCORDANCE WITH ANY AND ALL REQUIREMENTS OF THE UTILITY COMPANY AND WITH REGARD TO THE REQUIRED FEES, BONDS, PERMITS. WORKING CONDITIONS, ETC. OF SAID COMPANY. THIS WORK SHALL BE DONE AT NO EXPENSE TO THE COUNTY OF ALAMEDA. THE SUBDIVIDER SHALL PAY THE COST OF ALL SAID FEES. BONDS, PERMITS, ETC.
11. MINIMUM COVER FOR CONDUITS SHALL BE 36" UNLESS OTHERWISE SHOWN OR NOTED ON THESE PLANS OR ON UTILITY PLANS (BY OTHERS).

SANITARY SEWER NOTES:

1. CITY OF BERKELEY SPECIFICATIONS ARE INCORPORATED HEREON BY REFERENCE. SANITARY SEWER MAINS AND LATERALS SHALL BE INSTALLED AT THE LOCATIONS SHOWN HEREIN OR AS SPECIFIED IN THE FIELD BY DEVELOPER.
2. ALL SANITARY SEWER MAINS AND LATERALS SHALL BE CONSTRUCTED USING HDPE SDR-17 UNLESS OTHERWISE NOTED ON THE PLANS.

STORM DRAIN NOTES:

1. ALL STORM DRAIN PIPES SHALL BE HDPE SDR-17 OR BETTER, UNLESS OTHERWISE NOTED ON THE PLANS.
2. ALL ONSITE STORM DRAIN INLETS SHALL BE CLEARLY MARKED WITH THE WORDS "NO DUMPING! FLOWS TO BAY." OR EQUIVALENT.

TREE PRESERVATION NOTES:

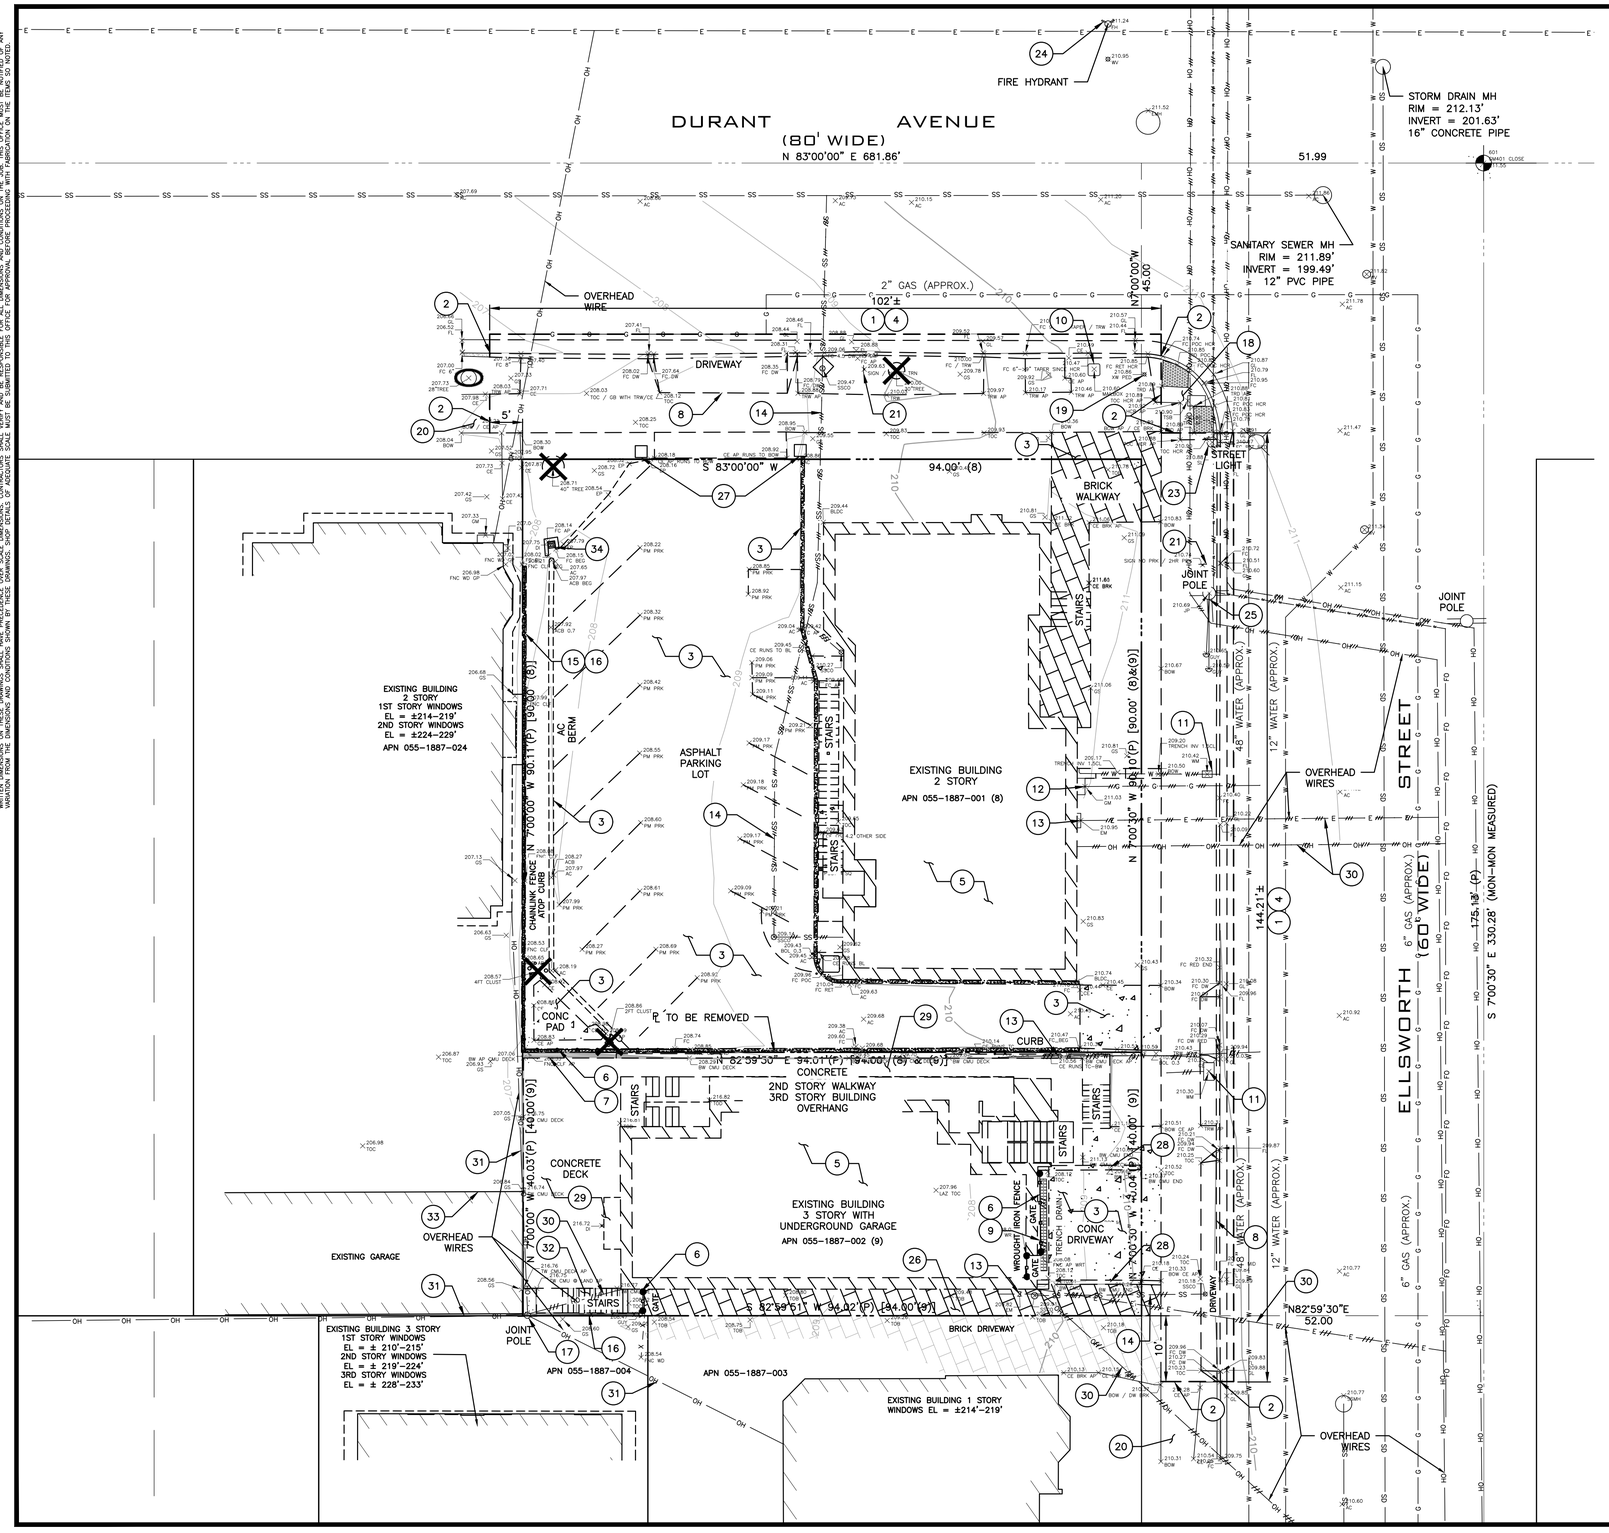
1. ALL TRENCHING WITHIN 5' OF AN EXISTING TREE MUST BE DONE USING AN AIRSPADE PNEUMATIC EXCAVATION TOOL BY A TREE SERVICES CONTRACTOR WITH A D-49 STATE CONTRACTORS LICENSE. THE CITY'S ARBORIST SHALL INSPECT EXCAVATION PRIOR TO ANY ROOTS BEING CUT. CALL (510) 981-6660 TO SCHEDULE AN INSPECTION. ROOTS OVER 2" IN DIAMETER MAY REQUIRE PRESERVATION. ONLY A LICENSED AND INSURED TREE SERVICES CONTRACTOR MAY PRUNE THE TREE ROOTS. ROOTS ARE TO BE CUT WITH A SHARP AXE OF SAW. THE EXCAVATION SHALL NOT BE LEFT OPEN AND ROOTS EXPOSED TO AIR FOR MORE THAN 24 HOURS.

DEMOLITION NOTES:

SEE SHEET C2.0 FOR ADDITIONAL INFORMATION NOT SHOWN

1. THE CONTRACTOR SHALL BE RESPONSIBLE FOR LOCATING ALL EXISTING UNDERGROUND UTILITIES, WHETHER SHOWN ON THESE PLANS OR NOT, PRIOR TO THE COMMENCEMENT OF ANY DEMOLITION WORK.
2. ALL EXISTING UTILITIES AND APPURTENANCES THERETO SERVING ANY EXISTING STRUCTURE OR BUILDINGS AND THOSE IN THE PUBLIC RIGHT OF WAY SERVING PUBLIC UTILITIES ARE TO REMAIN AND SHALL BE PROTECTED IN PLACE. THE CONTRACTOR SHALL BE RESPONSIBLE FOR RELOCATING OR REMOVING ALL UTILITIES IMPACTED BY THE PROPOSED CONSTRUCTION WHETHER OR NOT INDICATED ON THE PLANS.
3. THE CONTRACTOR SHALL CONTACT ALL ASSOCIATED UTILITY SUPPLIERS PRIOR TO DEMOLITION TO COORDINATE THE DISCONNECTION, RELOCATION, AND REMOVAL OR ABANDONMENT OF UTILITIES (I.E

ALL IDEAS, DESIGNS, ARRANGEMENTS AND PLANS INDICATED BY THIS DRAWING ARE OWNED BY, AND THE PROPERTY OF THIS OFFICE AND WERE CREATED, EVOLVED AND DEVELOPED FOR USE ON, AND IN CONNECTION WITH THE SPECIFIED PROJECT. NONE OF SUCH IDEAS, DESIGNS, ARRANGEMENTS OR PLANS SHALL BE USED BY OR DISCLOSED TO ANY PERSON, FIRM OR CORPORATION FOR ANY PURPOSE WHATSOEVER WITHOUT THE WRITTEN PERMISSION OF GREENWOOD & MOORE, INC.
WRITTEN DIMENSIONS ON THESE DRAWINGS SHALL HAVE PRECEDENCE OVER SCALE DIMENSIONS. CONTRACTORS SHALL VERIFY AND BE RESPONSIBLE FOR ALL DIMENSIONS AND CONDITIONS ON THE JOB. THIS OFFICE MUST BE NOTIFIED OF ANY VARIATION FROM THE DIMENSIONS AND CONDITIONS SHOWN BY THESE DRAWINGS BEFORE ANY WORK IS SUBMITTED TO THIS OFFICE FOR APPROVAL. NO WORK SHALL PROCEED WITH ANY VARIATION FROM THE DRAWINGS UNLESS SO APPROVED.



KEYNOTES:

1. SAWCUT
2. LIMIT OF REMOVAL
3. REMOVE (E) CONCRETE/ASPHALT/BRICK
4. REMOVE (E) SIDEWALK, CURB, & GUTTER
5. (E) BUILDING & FOUNDATION TO BE DEMOLISHED, REMOVE (E) ASSOCIATED RETAINING WALLS AND FOUNDATION. PG&E TO DISCONNECT ELECTRIC AND GAS SERVICE PRIOR TO DEMOLITION OF THE (E) BUILDING.
6. REMOVE (E) FENCE AND/OR GATE
7. REMOVE (E) RETAINING WALL
8. REMOVE (E) DRIVEWAY
9. REMOVE (E) TRENCH DRAIN
10. REMOVE & REINSTALL (E) MAILBOX. COORDINATE REMOVAL & REINSTALLATION WITH UNITED STATES POSTAL SERVICE.
11. REMOVE (E) WATER METER. CAP AND ABANDON (E) WATER LATERAL PER EBMUD STANDARDS (BY EBMUD)
12. PG&E TO REMOVE (E) GAS METER AND GAS LATERAL PRIOR TO DEMOLITION OF THE BUILDING. CONTRACTOR TO VERIFY LOCATION IN FIELD. CAP & ABANDON PER PG&E STANDARDS & REQUIREMENTS.
13. PG&E TO REMOVE (E) ELECTRIC METERS AND ASSOCIATED ELECTRIC LINE PRIOR TO DEMOLITION OF THE BUILDING. COORDINATE REMOVAL WITH OWNER AND PG&E.
14. ABANDON (E) SEWER LATERAL PER CITY OF BERKELEY REQUIREMENTS. FOR BUILDING DEMOLITION AND LATERAL ABANDONMENT: WHEN A BUILDING IS TO BE DEMOLISHED AND THE EXISTING LATERAL IS NOT TO BE RE–USED, THE LATERAL SEWER SHALL BE DUG AND EXPOSED WHERE IT ENTERS THE MAIN.
    A. IF THE LATERAL ENTERS THE MAIN BY MEANS OF A FACTORY MANUFACTURED WYE OR TEE BRANCH, AND IF THE MAIN AND WYE OR TEE BRANCH ARE ALL IN GOOD, UNDAMAGED CONDITION, THE LATERAL SHALL BE DISCONNECTED AND THE BRANCH SHALL BE PLUGGED WITH AN EXPANDABLE NEOPRENE RUBBER PLUG AT THE MAIN. THE BRANCH PLUG SHALL BE SHALL BE ENCLOSED WITH A MINIMUM THICKNESS OF 6 INCHES OF 6 SACK, ¾" SIZE AGGREGATE. PORTLAND CEMENT CONCRETE. THE WYE BRANCH WITH RUBBER PLUG MUST BE INSPECTED AND APPROVED BY AN ENGINEERING INSPECTOR PRIOR TO ENCLOSURE WITH CONCRETE AND BACKFILL OF THE TRENCH.
    B. IF THE LATERAL ENTERS THE MAIN BY ANY METHOD OTHER THAN BY A FACTORY WYE OR TEE BRANCH, OR IF THE EXISTING MAIN, WYE OR TEE BRANCH IS DAMAGED IN ANY WAY, THE SECTION OF MAIN CONTAINING THE LATERAL ENTRY OPENING SHALL BE REMOVED AND REPLACED WITH A NEW SECTION OF PIPE OF THE SAME DIAMETER AS THE EXISTING MAIN. AN ENGINEERING INSPECTOR MUST INSPECT THE NEW MAIN SECTION BEFORE BACKFILL.
    C. THE ABANDONED LATERAL PIPE SHALL BE FILLED WITH SAND AND JETTED TO PREVENT THE PIPE FROM BECOMING A HOME FOR RODENTS OR OTHER DISEASE VECTORS.
    D. REMOVE (E) CLEANOUT FRAME & COVER.
15. REMOVE (E) CONCRETE WALL. COORDINATE REMOVAL WITH ADJACENT PROPERTY OWNER.
16. REMOVE (E) FENCE. COORDINATE REMOVAL WITH ADJACENT PROPERTY OWNER.
17. (E) JOINT POLE WITH GUY WIRE TO REMAIN
18. (E) ACCESSIBLE RAMP TO REMAIN
19. (E) CROSSWALK BUTTON/BOLLARD TO REMAIN
20. (E) CONCRETE TO REMAIN
21. (E) SIGN TO REMAIN
22. (E) CURB & GUTTER TO REMAIN
23. (E) LIGHT POLE TO REMAIN
24. (E) FIRE HYDRANT TO REMAIN
25. REMOVE (E) JOINT POLE & UNDERGROUND (E) OVERHEAD UTILITIES (BY OTHERS)
26. REMOVE (E) BRICK PAVERS TO PROPERTY LINE
27. REMOVE (E) BRICK POST
28. REMOVE (E) RETAINING WALL AND FOUNDATION.
29. REMOVED (E) CONCRETE DECK, WALLS AND FOUNDATION.
30. REMOVE (E) OVERHEAD UTILITY LINE TO BUILDING. COORDINATE REMOVAL WITH APPROPRIATE UTILITY MUNICIPALITY.
31. (E) OVERHEAD UTILITY LINE TO REMAIN.
32. REMOVE (E) CONCRETE STEPS.
33. PROTECT (E) BUILDING ON ADJACENT PROPERTY DURING DEMOLITION.
34. (E) DRAIN INLET AND STORM DRAIN TO REMAIN DURING DEMOLITION. REMOVE (E) DRAIN INLET AND STORM DRAIN PRIOR TO CONSTRUCTION OF (N) BUILDING FOUNDATION.

X REMOVE (E) TREE AND/OR (E) STUMP

O (E) TREE TO REMAIN. PROTECT TREE DURING CONSTRUCTION

ALL IDEAS, DESIGNS, ARRANGEMENTS AND PLANS INDICATED BY THIS DRAWING ARE OWNED BY, AND THE PROPERTY OF THIS OFFICE AND WERE CREATED, EVOLVED AND DEVELOPED FOR USE ON AND IN CONNECTION WITH THE SPECIFIED PROJECT. NONE OF SUCH IDEAS, DESIGNS, ARRANGEMENTS OR PLANS SHALL BE USED BY OR DISCLOSED TO ANY PERSON, FIRM OR CORPORATION FOR ANY PURPOSE WHATSOEVER WITHOUT THE WRITTEN PERMISSION OF GREENWOOD & MOORE, INC.
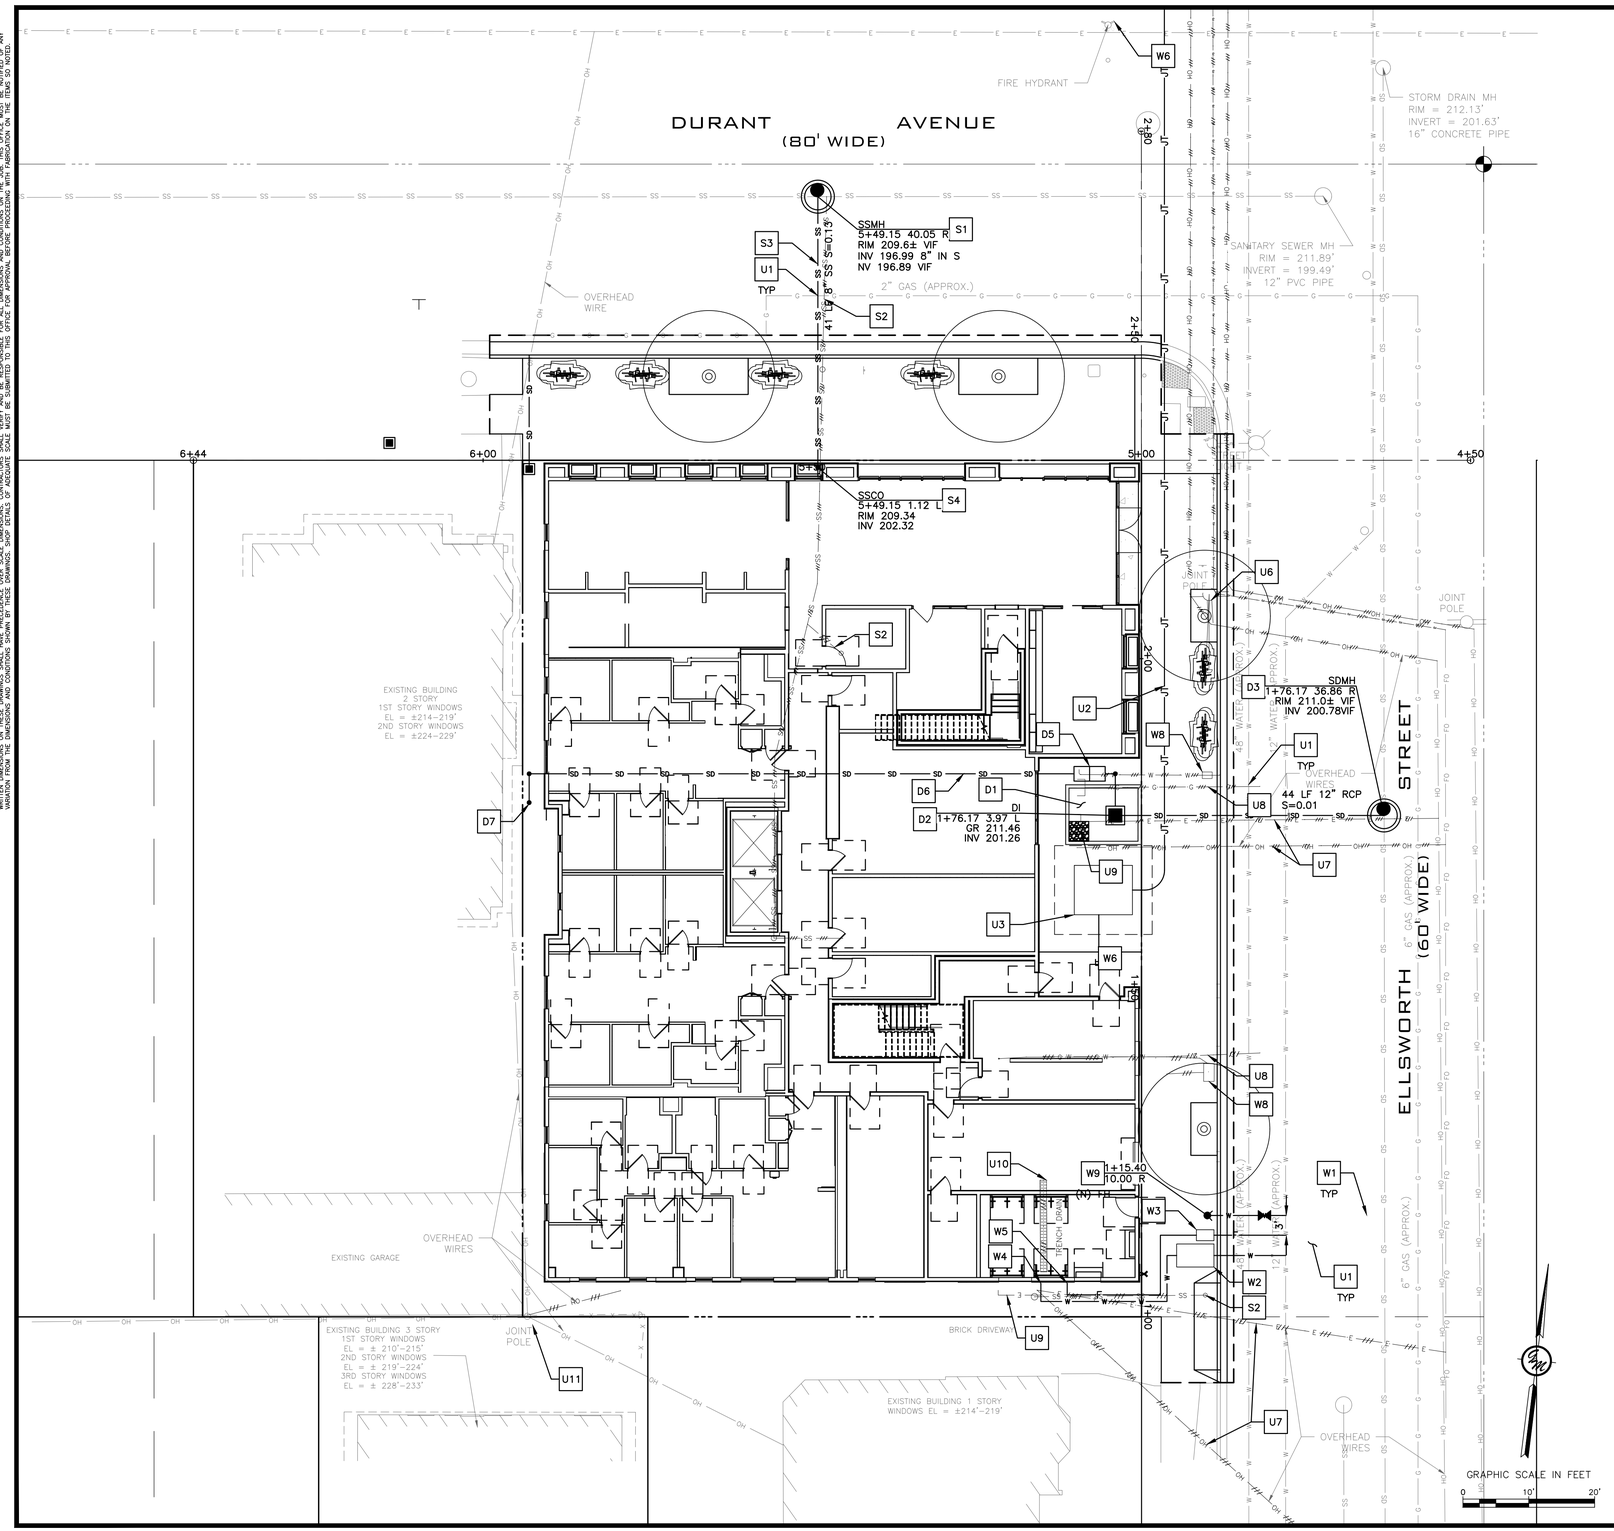
WRITTEN DIMENSIONS ON THESE DRAWINGS SHALL HAVE PRECEDENCE OVER SCALE DIMENSIONS. CONTRACTORS SHALL VERIFY AND BE RESPONSIBLE FOR ALL DIMENSIONS AND CONDITIONS ON THE JOB. THIS OFFICE MUST BE NOTIFIED OF ANY VARIATIONS FROM THE DIMENSIONS AND CONDITIONS SHOWN BY THESE DRAWINGS AND MUST GIVE APPROVAL BEFORE PROCEEDING WITH THE WORK AFFECTED. SHOP DRAWINGS SHALL BE SUBMITTED TO THIS OFFICE FOR APPROVAL BEFORE PROCEEDING WITH FABRICATION.



STORM DRAINAGE KEYNOTES D#

1. FLOW THROUGH PLANTER
2. DRAIN INLET. GRATE TO BE 6" ABOVE FLOW THROUGH PLANTER FINISH GRADE. DRAIN INLET TO BE CP2424 PER DETAIL 1/C7.1 & 2/C7.1
3. STORM DRAIN MANHOLE PER CITY OF BERKELEY STANDARD DETAIL 7895. VERIFY EXISTING SEWER SIZE AND INVERT ELEVATION IN FIELD. SEE 4/C7.4.
4. APPROXIMATE LOCATION OF RAIN WATER DOWNSPOUT TO OUTFALL INTO BIORETENTION AREA AT COBBLE DISSIPATOR
5. BELOW GROUND CONTECH CARTRIDGE CATCH BASIN STORMFILTER TO TREAT ROOFTOP. CONNECT 6" STORM DRAIN OUTLET TO DRAIN INLET. SEE DETAIL 4/C7.1.
6. STORM DRAIN THROUGH BUILDING. COORDINATE WITH PLUMBING CONSULTANT.
7. CONNECT DOWNSPOUT TO STORM DRAIN THAT IS CONNECTED TO FILTER VAULT.

SEWER KEYNOTES S#

1. SSMH PER CITY OF BERKELEY STANDARD DETAIL 7895. VERIFY EXISTING SEWER SIZE AND INVERT ELEVATION IN FIELD. SEE 4/C7.4.
2. ABANDON (E) SEWER LATERAL. FOR BUILDING DEMOLITION AND LATERAL ABANDONMENT: WHEN A BUILDING IS TO BE DEMOLISHED AND THE EXISTING LATERAL IS NOT TO BE RE-USED, THE LATERAL SEWER SHALL BE DUG AND EXPOSED WHERE IT ENTERS THE MAIN.

A. IF THE LATERAL ENTERS THE MAIN BY MEANS OF A FACTORY MANUFACTURED WYE OR TEE BRANCH, AND IF THE MAIN AND WYE OR TEE BRANCH ARE ALL IN GOOD, UNDAMAGED CONDITION, THE LATERAL SHALL BE DISCONNECTED AND THE BRANCH SHALL BE PLUGGED WITH AN EXPANDABLE NEOPRENE RUBBER PLUG AT THE MAIN. THE BRANCH PLUG SHALL BE SHALL BE ENCLOSED WITH A MINIMUM THICKNESS OF 6 INCHES OF 6 SACK, ½" SIZE AGGREGATE. PORTLAND CEMENT CONCRETE. THE WYE BRANCH WITH RUBBER PLUG MUST BE INSPECTED AND APPROVED BY AN ENGINEERING INSPECTOR PRIOR TO ENCLOSURE WITH CONCRETE AND BACKFILL OF THE TRENCH.

B. IF THE LATERAL ENTERS THE MAIN BY ANY METHOD OTHER THAN BY A FACTORY WYE OR TEE BRANCH, OR IF THE EXISTING MAIN, WYE OR TEE BRANCH IS DAMAGED IN ANY WAY, THE SECTION OF MAIN CONTAINING THE LATERAL ENTRY OPENING SHALL BE REMOVED AND REPLACED WITH A NEW SECTION OF PIPE OF THE SAME DIAMETER AS THE EXISTING MAIN. AN ENGINEERING INSPECTOR MUST INSPECT THE NEW MAIN SECTION BEFORE BACKFILL.

C. THE ABANDONED LATERAL PIPE SHALL BE FILLED WITH SAND AND JETTED TO PREVENT THE PIPE FROM BECOMING A HOME FOR RODENTS OR OTHER DISEASE VECTORS.

D. REMOVE (E) CLEANOUT FRAME & COVER.

3. 8" HDPE SDR 17
4. 2 WAY SEWER CLEANOUT WITH CAST IRON TRAFFIC RATED COVER. COORDINATE SEWER CONNECTION TO BUILDING LOCATION AND ELEVATION WITH PLUMBING PLANS.

WATER KEYNOTES W#

1. CONNECT TO EXISTING WATER LINE PER EBMUD STANDARDS AND REQUIREMENTS
2. RESIDENTIAL APARTMENT DOMESTIC WATER METER PER EBMUD STANDARDS AND REQUIREMENTS. VERIFY METER SIZE WITH EBMUD AND PLUMBING PLANS.
3. WATER METER AND CHECK VALVE FOR FIRE SERVICE PER EBMUD STANDARDS AND REQUIREMENTS.
4. 2" WATER SERVICE TO APARTMENT BUILDING. VERIFY SIZE AND LOCATION WITH PLUMBING PLANS. PROVIDE BACKFLOW DEVICE AT BUILDING PER EBMUD STANDARDS AND REQUIREMENTS.
5. X" FIRE SERVICE TO BUILDING. SEE FIRE SERVICE PLANS BY OTHERS FOR MORE INFORMATION. PROVIDE BACKFLOW DEVICE AT BUILDING PER EBMUD STANDARDS AND REQUIREMENTS.
6. (E) FIRE HYDRANT
7. FIRE DEPARTMENT CONNECTION. SEE PLANS BY OTHERS.
   7.1. THE FDC SHALL BE INSTALLED NO HIGHER THAN 3-FEET FROM FINISHED GRADE, AND SHALL BE LOCATED SO THAT FIRE APPARATUS AND HOSE CONNECTED TO SUPPLY THE SYSTEM WILL NOT OBSTRUCT ACCESS TO THE BUILDINGS FOR OTHER FIRE APPARATUS.
   7.2. THE FDC SUPPLYING WATER TO THE STANDPIPE SYSTEM MUST CONSIST OF A THREE (3) 2-1/2-INCH INLET CONNECTION AND ONE (1) 5-INCH STORZ CONNECTION WITH A BUILT-IN DEBRIS SCREEN.
8. REMOVE (E) WATER METER. CAP AND ABANDON (E) WATER LATERAL PER EBMUD STANDARDS (BY EBMUD)
9. (N) FIRE HYDRANT PER EBMUD AND CITY OF BERKELEY STANDARDS, REQUIREMENTS AND SPECIFICATIONS.

UTILITY KEYNOTES U#

1. CONTRACTOR FIELD LOCATE (E) UTILITIES. NOTIFY ENGINEER OF ANY CONFLICTS WITH (E) UTILITIES.
2. JOINT TRENCH BY OTHERS. SEE JOINT TRENCH PLANS
3. (N) ABOVE GROUND TRANSFORMER (BY OTHERS)
4. ALL TRENCHING IN THE CITY RIGHT OF WAY TO BE PER CITY OF BERKELEY STANDARD DETAIL 8136.
5. PROVIDE 1' MINIMUM CLEARANCE AT UTILITY CROSSING. VIF
6. REMOVE (E) JOINT POLE AND UNDERGROUND EXISTING OVERHEAD UTILITIES (BY OTHERS)
7. REMOVE (E) OVERHEAD LINES
8. PG&E TO REMOVE (E) GAS METER AND GAS LATERAL PRIOR TO DEMOLITION OF THE BUILDING. CONTRACTOR TO VERIFY LOCATION IN FIELD. CAP & ABANDON PER PG&E STANDARDS & REQUIREMENTS.
9. PG&E TO REMOVE (E) ELECTRIC METERS AND ASSOCIATED ELECTRIC LINE PRIOR TO DEMOLITION OF THE BUILDING. COORDINATE REMOVAL WITH OWNER AND PG&E.
10. REMOVE (E) TRENCH DRAIN. ABANDON EXISTING STORM DRAIN LINE.
11. (E) JOINT POLE TO REMAIN.

Worksheet for Calculating the Combination Flow and Volume Method

1.0 Project Information

1-1	Project Name:	2298 DURANT AVE	These calculations are based on the combination flow and volume hydraulic sizing method provided in the Alameda, San Mateo, and Santa Clara County C.3 Technical Guidance Manuals. The steps presented below are explained in Chapter 5, Section 5.1 of the gui
1-2	City application ID:	BERKELEY	
1-3	Site Address or APN:	0	
1-4	Tract or Parcel Map No:	0	
1-5	Site Mean Annual Precip. (MAP)[1]	23.0 Inches	
	Refer to the Mean Annual Precipitation Map in Appendix D of the C.3 Technical Guidance to determine the MAP, in inches, for the site.		Click here for map
1-6	Applicable Rain Gauge[2]	Oakland Airport (CWPAC)	
	MAP adjustment factor is automatically calculated as:		1.25
	(The "Site Mean Annual Precipitation (MAP)" is divided by the MAP for the applicable rain gauge, shown in Table 5.2, below.)		

2.0 Calculate Percentage of Impervious Surface for Drainage Management Area (DMA)

2-1 Name of DMA: DMA-2

For items 2-2 and 2-3, enter the areas in square feet for each type of surface within the DMA.

	Type of Surface	Area of surface type within DMA (Sq. Ft)	Adjust Pervious Surface	Effective Impervious Area
2-2	Impervious Surface	5,312	1.0	5,312
2-3	Pervious Surface	165	0.1	17
	Total DMA Area (square feet) =	5,477		
2-4		***Total Effective Impervious Area (EIA)***		5,329 Square feet

3.0 Calculate Unit Basin Storage Volume in Inches

Table 5-2: Unit Basin Storage Volumes (in inches) for 80 Percent Capture Using 48-Hour Drawdowns

		Unit Basin Storage Volume (in) for Applicable Runoff Coefficients
Applicable Rain Gauge	Mean Annual Precipitation (in)	(Calculated for 100% Imperviousness)
San Jose Airport (SCVURPPP)	13.9	0.58
Palo Alto (SCVURPPP)	13.7	0.62
Palo Alto (SMCWPPP)	14.6	0.64
Gilroy (SCVURPPP)	18.2	1.00
Morgan Hill (SCVURPPP)	19.5	1.00
Boulder Creek (SMCWPPP)	55.9	2.04
La Honda (SMCWPPP)	24.4	0.86
Half Moon Bay (SMCWPPP)	25.92	0.82
San Francisco (SMCWPPP)	21	0.73
San Francisco Airport (SMCWPPP)	20.1	0.85
San Francisco Oceanside (SMCWPPP)	19.3	0.72
Oakland Airport (CWPAC)	18.35	1.00

3-1	***Unit basin storage volume from Table 5.2:***	1.00	Inches
	(The coefficient for this method is 1.00, due to the conversion of any landscaping to effective impervious area)		
3-2	***Adjusted unit basin storage volume:***	1.25	Inches
	(The unit basin storage volume is adjusted by applying the MAP adjustment factor.)		
3-3	***Required Capture Volume (in cubic feet):***	557	Cubic feet
	(The adjusted unit basin sizing volume [inches] is multiplied by the size of the DMA and converted to feet)		

4.0 Calculate the Duration of the Rain Event

4-1	Rainfall intensity	0.2	Inches per hour
4-2	Divide Item 3-2 by Item 4-1	6.27	Hours of Rain Event Duration

5.0 Preliminary Estimate of Surface Area of Treatment Measure

5-1	4% of DMA impervious surface	213	Square feet
5-2	Area 25% smaller than item 5-1	160	Square feet
5-3	Volume of treated runoff for area in Item 5-2	417	Cubic feet (Item 5-2 * 5 inches per hour * 1/12 * Item 4-2)

6.0 Initial Adjustment of Depth of Surface Ponding Area

6-1	Subtract Item 5-3 from Item 3-3	139	Cubic feet (Amount of runoff to be stored in ponding area)
6-2	Divide Item 6-1 by Item 5-2	0.9	Feet (Depth of stored runoff in surface ponding area)
6-3	Convert Item 6-2 from ft to inches	10.4	Inches (Depth of stored runoff in surface ponding area)
6-4	If ponding depth in Item 6-3 meets your target depth of 6"-12", then Item 7-1 is equal to Item 5-2. If not, continue to Step 7-1.		

7.0 Optimize Size of Treatment Me 25

7-1	Enter an area larger or smaller than Item 5-2	165	Sq.ft. (enter larger area if you need less ponding depth; smaller for more depth.)
7-2	Volume of treated runoff for area in Item 7-1	431	Cubic feet (Item 7-1 * 5 inches per hour * 1/12 * Item 4-2)
7-3	Subtract Item 7-2 from Item 3-3	126	Cubic feet (Amount of runoff to be stored in ponding area)
7-4	Divide Item 7-3 by Item 7-1	0.76	Feet (Depth of stored runoff in surface ponding area)
7-5	Convert Item 7-4 from feet to inches	9.14	Inches (Depth of stored runoff in surface ponding area)
7-6	If the ponding depth in Item 7-5 meets target, stop here. If not, repeat Steps 7-1 through 7-5 until you obtain target depth. If the slope of the drainage area > 1%, then 11" will be the max ponding depth (slopes >1% will increase the ponding depth by 0.

BIORETENTION TREATMENT SOIL SPECIFICATIONS

1. BIORETENTION TREATMENT SOIL SHALL ACHIEVE A LONG TERM, IN-PLACE INFILTRATION RATE BETWEEN 5 IN./HR AND 10 IN/HR, CAPABLE OF SUPPORTING VIGOROUS PLAN GROWTH AND CONSIST OF 60%-70% SAND AND 30%-40% COMPOST.

1.1. THE APPLICANT TO SUBMIT TO THE MUNICIPALITY FOR APPROVAL:
- 1.1.a. A SAMPLE OF MIXED BIORETENTION SOIL.
- 1.1.b. CERTIFICATION FROM THE SOIL SUPPLIER OR AN ACCREDITED LABORATORY THAT THE BIORETENTION SOIL MEETS THE REQUIREMENTS OF THIS GUIDELINE SPECIFICATION.
- 1.1.c. GRAIN SIZE ANALYSIS RESULTS OF THE FINE SAND COMPONENT PERFORMED IN ACCORDANCE WITH ASTM D 422, STANDARD TEST METHOD FOR PARTICLE SIZE ANALYSIS OF SOILS.
- 1.1.d. QUALITY ANALYSIS RESULTS FOR COMPOST PERFORMED IN ACCORDANCE WITH SEAL OF TESTING ASSURANCE (STA) STANDARDS, AS SPECIFIED SECTION 1.4.
- 1.1.e. ORGANIC CONTENT TEST RESULTS OF MIXED BIORETENTION SOIL. ORGANIC CONTENT TEST SHALL BE PERFORMED IN ACCORDANCE WITH TESTING METHODS FOR EXAMINATION OF COMPOST AND COMPOSTING (TMECC) 05.07A, "LOSS-ON-IGNITION ORGANIC MATTER METHOD.
- 1.1.f. GRAIN SIZE ANALYSIS RESULTS OF THE COMPOST COMPONENT IN ACCORDANCE WITH ASTM D422, STANDARD TEST METHOD FOR PARTICLE SIZE ANALYSIS OF SOILS.
- 1.1.g. A DESCRIPTION OF THE EQUIPMENT AND METHODS USED TO MIX THE SAND AND COMPOST TO PRODUCE BIORETENTION SOIL.
- 1.1.h. PROVIDE THE FOLLOWING INFORMATION ABOUT THE TESTING LABORATORY(IIES): CONTACT PERSON(S), ADDRESS(ES), PHONE CONTACTS(S), EMAIL ADDRESS(ES) AND QUALIFICATIONS OF LABORATORY(IES) AND PERSONNEL INCLUDING DATE OF CURRENT CERTIFICATION BY STA, ASTM, OR APPROVED EQUAL.

1.2. SAND FOR BIORETENTION SOIL:
- 1.2.a. SAND SHALL BE FREE OF WOOD, WASTE COATING SUCH AS CLAY, STONE, DUST, CARBONATE, ETC., OR ANY OTHER DELETERIOUS MATERIAL. ALL AGGREGATE PASSING THE NO. 200 SIEVE SHALL BE NON-PLASTIC.
- 1.2.b. SAND FOR BIORETENTION AREA SHALL BE ANALYZED BY AN ACCREDITED LAB USING #200, #100, #40, #30 #8, #4, AND 3/8" SIEVES (ASTM D 422 OR AS APPROVED BY MUNICIPALITY), AND MEET THE FOLLOWING GRADATION.

SIEVE SIZE	PERCENT PASSING (BY WEIGHT) MIN	MAX.

NO. 4	90	100
NO. 8	70	100
NO. 16	40	95
NO. 30	15	70
NO. 40	5	55
NO. 100	0	15
NO. 200	0	5

NOTE: ALL SANDS COMPLYING WITH ASTM C33 FOR FINE AGGREGATE COMPLY WITH THE ABOVE GRADATION REQUIREMENTS.

1.3 COMPOSTED MATERIAL
COMPOST SHALL BE A WELL DECOMPOSED, STABLE, WEED FREE ORGANIC MATTER SOURCE DERIVED FROM WASTE MATERIALS INCLUDING YARD DEBRIS, WOOD WASTES OR OTHER ORGANIC MATERIALS NOT INCLUDING MANURE OR BIOSOLIDS MEETING THE STANDARDS DEVELOPED BY THE US COMPOSTING COUNCIL (USCC). THE PRODUCT SHALL BE CERTIFIED THROUGH THE USCC SEAL OF TESTING ASSURANCE (STA) PROGRAM (A COMPOST TESTING AND INFORMATION DISCLOSURE PROGRAM).

A. COMPOST QUALITY ANALYSIS: BEFORE DELIVERY OF THE SOIL, THE SUPPLIER SHALL SUBMIT A COPY OF LAB ANALYSIS PERFORMED BY A LABORATORY THAT IS ENROLLED IN THE US COMPOSTING COUNCIL'S COMPOST ANALYSIS PROFICIENCY (CAP) PROGRAM USING APPROVED TEST METHODS FOR THE EVALUATION OF COMPOSTING AND COMPOST (TMECC). THE LAB REPORT SHALL VERIFY:
1. FEEDSTOCK MATERIALS SHALL BE SPECIFIED AND INCLUDE ONE OF THE FOLLOWING: LANDSCAPE/YARD TRIMMINGS, GRASS CLIPPINGS, FOOD SCRAPS AND AGRICULTURE CROP RESIDUES.
2. ORGANIC MATTER CONTENT: 35%-75% BY DRY WEIGHT.
3. CARBON AND NITROGEN RATIO: C:N < 25:1 AND C:N > 15:1
4. MATURITY AND STABILITY SHALL HAVE A DARK BROWN COLOR AND A SOIL LIKE ODOR. COMPOST EXHIBITING A SOUR OR PUTRID SMELL, CONTAINING RECOGNIZABLE GRASS OR LEAVES, OR IS HOT (120F) UPON DELIVERY IS NOT ACCEPTABLE. IN ADDITION ANY ONE OF THE FOLLOWING IS REQUIRED TO INDICATE STABILITY:
   - 4.a. OXYGEN TEST < 1.3 O2/UNIT TS/HR
   - 4.b. SPECIFIC OXY. TEST < 1.5 O2/UNIT BVS/
   - 4.c. RESPIRATION TEST < 8 C/UNIT VS/DAY
   - 4.d. DEWAR TEST < 20 TEMP. RISE (DEGREES C) E.
   - 4.e. SOLVITA > 5 INDEX VALUE
5. TOXICITY: ANY OF THE FOLLOWING MEASURES IS SUFFICIENT TO INDICATE NON-TOXICITY:
   - 5.a. NH4- :NO3 < 3
   - 5.b. AMMONIUM < 500PPM, DRY BASIS
   - 5.c. SEED GERMINATION > 80% OF CONTROL
   - 5.d. PLANT TRIALS > 80% OF CONTROL
   - 5.e. SOLVITA > 5 INDEX VALUE
6. NUTRIENT CONTENT: PROVIDE ANALYSIS DETAILING NUTRIENT CONTENT INCLUDING N-P-K, CA, NA, MG AND B.
   - 6.a. TOTAL NITROGEN CONTENT 0.9% OR ABOVE PREFERRED
   - 6.b. BORON: TOTAL SHALL BE < 80PPM: SOLUBLE SHALL BE < 2.5 PPM
7. SALINITY: MUST BE REPORTED: < 6.0 MMHOS/CM
8. PH SHALL BE BETWEEN 6.5 AND 8. MAY VARY WITH PLANT SPECIES.

B. COMPOST FOR BIORETENTION SOIL TEXTURE
COMPOST FOR BIORETENTION SOILS SHALL BE ANALYZED BY AN ACCREDITED LAB USING #200, 1/4", 1/2" AND 1" SIEVES (ASTM D422 OR AS APPROVED BY MUNICIPALITY), AND MEET THE FOLLOWING GRADATION.

SIEVE SIZE	PERCENT PASSING (BY WEIGHT) MIN	MAX.
1"	99	100
1/2"	90	100
1/4"	40	90
NO. 200	2	10

C. BULK DENSITY SHALL BE BETWEEN 500 AND 1100 DRY LBS/CUBIC YARD
D. MOISTURE CONTENT SHALL BE BETWEEN 30%-55% OF DRY SOLIDS.
E. INERTS: COMPOST SHALL BE RELATIVELY FREE OF INERT INGREDIENTS, INCLUDING GLASS, PLASTIC AND PAPER, <1% BY WEIGHT OR VOLUME.
F. WEED SEED/PATHOGEN DESTRUCTION: PROVIDE PROOF OF PROCESS TO FURTHER REDUCE PATHOGENS (PFRP). FOR EXAMPLE, TURNED WINDROWS MUCH REACH MIN. 55C FOR 15 DAYS WITH AT LEAST 5 TURNINGS DURING THAT PERIOD.
G. SELECT PATHOGENS: SALMONELLA < 3 MPN/4 GRAMS OF TS, OR COLIFORM BACTERIA < 1000MPN/GRAM
H. TRACE CONTAMINANTS METALS (LEAD, MERCURY, ETC.) PRODUCT MUST MEET US EPA, 40 CFR 503 REGULATIONS.
I. COMPOST TESTING: THE COMPOST SUPPLIER WILL TEST ALL COMPOST PRODUCTS WITHIN 120 CALENDAR DAYS PRIOR TO APPLICATION. SAMPLES WILL BE TAKEN USING THE STA SAMPLE COLLECTION PROCESS PROTOCOL. (THE SAMPLE COLLECTION PROTOCOL CAN BE OBTAINED FROM THE U.S. COMPOSTING COUNCIL, 4250 VETERANS MEMORIAL HIGHWAY, SUITE 275, HOLBROOK, NY 11741 PHONE: 631-737-4931, (WWW.COMPOSTINGCOUNCIL.ORG) THE SAMPLE SHALL BE SENT TO AN INDEPENDENT STA PROGRAM APPROVED LAB. THE COMPOST SUPPLIER WILL PAY FOF THE TEST.

STORMFILTER STEEL CATCHBASIN DESIGN NOTES

STORMFILTER TREATMENT CAPACITY IS A FUNCTION OF THE CARTRIDGE SELECTION AND THE NUMBER OF CARTRIDGES. 1 CARTRIDGE CATCHBASIN HAS A MAXIMUM OF ONE CARTRIDGE. SYSTEM IS SHOWN WITH A 27" CARTRIDGE, AND IS ALSO AVAILABLE WITH AN 18" CARTRIDGE. STORMFILTER CATCHBASIN CONFIGURATIONS ARE AVAILABLE WITH A DRY INLET BAY FOR VECTOR CONTROL.
PEAK HYDRAULIC CAPACITY PER TABLE BELOW. IF THE SITE CONDITIONS EXCEED PEAK HYDRAULIC CAPACITY, AN UPSTREAM BYPASS STRUCTURE IS REQUIRED.

CARTRIDGE SELECTION

	27"			18"			18" DEEP		
CARTRIDGE HEIGHT									
RECOMMENDED HYDRAULIC DROP (H)	3.05'			2.3'			3.3'		
SPECIFIC FLOW RATE (gpm/sf)	2 gpm/sf	1.67* gpm/sf	1 gpm/sf	2 gpm/sf	1.67* gpm/sf	1 gpm/sf	2 gpm/sf	1.67* gpm/sf	1 gpm/sf
CARTRIDGE FLOW RATE (gpm)	22.5	18.79	11.25	15	12.53	7.5	15	12.53	7.5
PEAK HYDRAULIC CAPACITY	1.0			1.0			2.25		
INLET PERMANENT POOL LEVEL (A)	1'-0"			1'-0"			2'-0"		
OVERALL STRUCTURE HEIGHT (B)	4'-9"			3'-9"			4'-9"		

* 1.67 gpm/sf SPECIFIC FLOW RATE IS APPROVED WITH PHOSPHOSORB® (PSORB) MEDIA ONLY

GENERAL NOTES
1. CONTECH TO PROVIDE ALL MATERIALS UNLESS NOTED OTHERWISE.
2. FOR SITE SPECIFIC DRAWINGS WITH DETAILED STORMFILTER CATCHBASIN STRUCTURE DIMENSIONS AND WEIGHTS, PLEASE CONTACT YOUR CONTECH ENGINEERED SOLUTIONS LLC REPRESENTATIVE. www.contechES.com
3. STORMFILTER CATCHBASIN WATER QUALITY STRUCTURE SHALL BE IN ACCORDANCE WITH ALL DESIGN DATA AND INFORMATION CONTAINED IN THIS DRAWING.
4. INLET SHOULD NOT BE LOWER THAN OUTLET. INLET (IF APPLICABLE) AND OUTLET PIPING TO BE SPECIFIED BY ENGINEER AND PROVIDED BY CONTRACTOR.
5. MANUFACTURER TO APPLY A SURFACE BEAD WELD IN THE SHAPE OF THE LETTER "O" ABOVE THE OUTLET PIPE STUB ON THE EXTERIOR SURFACE OF THE STEEL SFCB.
6. STORMFILTER CATCHBASIN EQUIPPED WITH 4 INCH (APPROXIMATE) LONG STUBS FOR INLET (IF APPLICABLE) AND OUTLET PIPING. STANDARD OUTLET STUB IS 8 INCHES IN DIAMETER. MAXIMUM OUTLET STUB IS 15 INCHES IN DIAMETER. CONNECTION TO COLLECTION PIPING CAN BE MADE USING FLEXIBLE COUPLING BY CONTRACTOR.
7. STEEL STRUCTURE TO BE MANUFACTURED OF 1/4 INCH STEEL PLATE. CASTINGS SHALL MEET AASHTO M306 LOAD RATING. TO MEET HS20 LOAD RATING ON STRUCTURE, A CONCRETE COLLAR IS REQUIRED. WHEN REQUIRED, CONCRETE COLLAR WITH #4 REINFORCING BARS TO BE PROVIDED BY CONTRACTOR.
8. FILTER CARTRIDGES SHALL BE MEDIA-FILLED, PASSIVE, SIPHON ACTUATED, RADIAL FLOW, AND SELF CLEANING. RADIAL MEDIA DEPTH SHALL BE 7-INCHES. FILTER MEDIA CONTACT TIME SHALL BE AT LEAST 38 SECONDS.
9. SPECIFIC FLOW RATE IS EQUAL TO THE FILTER TREATMENT CAPACITY (gpm) DIVIDED BY THE FILTER CONTACT SURFACE AREA (sq ft).

INSTALLATION NOTES
A. ANY SUB-BASE, BACKFILL DEPTH, AND/OR ANTI-FLOTATION PROVISIONS ARE SITE-SPECIFIC DESIGN CONSIDERATIONS AND SHALL BE SPECIFIED BY ENGINEER OF RECORD.
B. CONTRACTOR TO PROVIDE EQUIPMENT WITH SUFFICIENT LIFTING AND REACH CAPACITY TO LIFT AND SET THE CATCHBASIN (LIFTING CLUTCHES PROVIDED).
C. CONTRACTOR TO TAKE APPROPRIATE MEASURES TO PROTECT CARTRIDGES FROM CONSTRUCTION-RELATED EROSION RUNOFF.

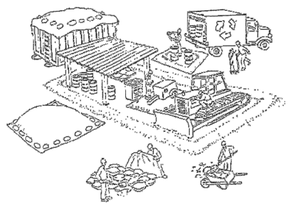
City of Berkeley's Pollution Prevention - It's Part of the Plan



Make sure your crews and subs do the job right!

Runoff from streets and other paved areas is a major source of pollution and damage to creeks and the San Francisco Bay. Construction activities can directly affect the health of creeks and the Bay unless contractors and crews plan ahead to keep dirt, debris, and other construction waste away from storm drains and local creeks. Following these guidelines and the project specifications will ensure your compliance with City of Berkeley requirements.

Materials storage & spill cleanup

Non-hazardous materials management

- Sand, dirt, and similar materials must be stored at least 10 feet (3 meters) from catch basins. All construction material must be covered with a tarp and contained with a perimeter control during wet weather or when rain is forecasted or when not actively being used within 14 days.
- Use (but don't overuse) reclaimed water for dust control as needed.
- Sweep or vacuum streets and other paved areas daily. Do not wash down streets or work areas with water!
- Recycle all asphalt, concrete, and aggregate base material from demolition activities. Comply with City of Berkeley Ordinances for recycling construction materials, wood, gyp board, pipe, etc.
- Check dumpsters regularly for leaks and to make sure they are not overfilled. Repair or replace leaking dumpsters promptly.
- Cover all dumpsters with a tarp at the end of every work day or during wet weather.

Hazardous materials management

- Label all hazardous materials and hazardous wastes (such as pesticides, paints, thinners, solvents, fuel, oil, and antifreeze) in accordance with city, county, state, and federal regulations.
- Store hazardous materials and wastes in water tight containers, store in appropriate secondary containment, and cover them at the end of every work day or during wet weather or when rain is forecasted.
- Follow manufacturer's application instructions for hazardous materials and be careful not to use more than necessary. Do not apply chemicals outdoors when rain is forecasted within 24 hours.
- Be sure to arrange for appropriate disposal of all hazardous wastes.

Spill prevention and control

- Keep a stockpile of spill cleanup materials (rags, absorbents, etc.) available at the construction site at all times.
- When spills or leaks occur, contain them immediately and be particularly careful to prevent leaks and spills from reaching the gutter, street, or storm drain. Never wash spilled material into a gutter, street, storm drain, or creek!
- Dispose of all containment and cleanup materials properly.
- Report any hazardous materials spills immediately! Dial 911 or the City of Berkeley's Public Works Department by dialing 311

Construction Entrances and Perimeter

- Establish and maintain effective perimeter controls and stabilize all construction entrances and exits to sufficiently control erosion and sediment discharges from site and tracking off site.
- Sweep or vacuum any street tracking immediately and secure sediment source to prevent further tracking.

Vehicle and equipment maintenance & cleaning

- Inspect vehicles and equipment for leaks frequently. Use drip pans to catch leaks until repairs are made; repair leaks promptly.
- Fuel and maintain vehicles on site only in a bermed area or over a drip pan that is big enough to prevent runoff.
- If you must clean vehicles or equipment on site, clean with water only in a bermed area that will not allow rinse water to run into gutters, streets, storm drains, or creeks.
- Do not clean vehicles or equipment on-site using soaps, solvents, degreasers, steam cleaning equipment, etc.

Earthwork & contaminated soils

- Keep excavated soil on the site where it will not collect in the street.
- Transfer to dump trucks should take place on the site, not in the street.
- Use fiber rolls, silt fences, or other control measures to minimize the flow of silt off the site.

- Earth moving activities are only allowed during dry weather by permit and as approved by the City Inspector in the Field.
- Mature vegetation is the best form of erosion control. Minimize disturbance to existing vegetation whenever possible.
- If you disturb a slope during construction, prevent erosion by securing the soil with erosion control fabric, or seed with fast-growing grasses as soon as possible. Place fiber rolls down-slope until soil is secure.
- If you suspect contamination (from site history, discoloration, odor, texture, abandoned underground tanks or pipes, or buried debris), call the Engineer for help in determining what should be done, and manage disposal of cntaminated soil according to their instructions.

Dewatering operations

- Effectively manage all run-on, all runoff within the site, and all runoff that discharges from the site. Run-on from off site shall be directed away from all disturbed areas or shall collectively be in compliance.
- Reuse water for dust control, irrigation, or another on-site purpose to the greatest extent possible.

- Be sure to notify and obtain approval from the Engineer before discharging water to a street, gutter, or storm drain. Filtration or diversion through a basin, tank, or sediment trap may be required.
- In areas of known contamination, testing is required prior to reuse or discharge of groundwater. Consult with the Engineer to determine what testing is required and how to interpret results. Contaminated groundwater must be treated or hauled off-site for proper disposal.

Saw cutting

- Always completely cover or barricade storm drain inlets when saw cutting. Use filter fabric, catch basin inlet filters, or sand/gravel bags to keep slurry out of the storm drain system.
- Shovel, absorb, or vacuum saw-cut slurry and pick up all waste as soon as you are finished in one location or at the end of each work day (whichever is sooner!).
- If saw cut slurry enters a catch basin, clean it up immediately.

Paving/asphalt work

- Always cover storm drain inlets and manholes when paving or applying seal coat, tack coat, slurry seal, or fog seal.
- Protect gutters, ditches, and drainage courses with sand/gravel bags, or earthen berms.
- Do not sweep or wash down excess sand from sand sealing into gutters, storm drains, or creeks. Collect sand and return it to the stockpile, or dispose of it as trash.
- Do not use water to wash down fresh asphalt concrete pavement.

Concrete, grout, and mortar storage & waste disposal

- Store concrete, grout, and mortar under cover, on pallets, and away from drainage areas. These materials must never reach a storm drain.
- Wash out concrete equipment/trucks off-site or into contained washout areas that will not allow discharge of wash water onto the underlying soil or onto the surrounding areas.

- Collect the wash water from washing exposed aggregate concrete and remove it for appropriate disposal off site.

Painting

- Never rinse paint brushes or materials in a gutter or street!
- Paint out excess water-based paint before rinsing brushes, rollers, or containers in a sink.
- Paint out excess oil-based paint before cleaning brushes in thinner.
- Filter paint thinners and solvents for reuse whenever possible. Dispose of oil-based paint sludge and unusable thinner as hazardous waste.

Landscape Materials

- Contain, cover, and store on pallets all stockpiled landscape materials (mulch, compost, fertilizers, etc.) during wet weather or when rain is forecasted or when not actively being used within 14 days.
- Discontinue the application of any erodible landscape material within 2 days of forecasted rain and during wet weather.

Storm drain polluters may be liable for fines of $10,000 or more per day!

SHEET NO. C7.2

ALL IDEAS, DESIGNS, ARRANGEMENTS AND PLANS INDICATED BY THIS DRAWING ARE OWNED BY, AND THE PROPERTY OF THIS OFFICE AND WERE CREATED, EVOLVED AND DEVELOPED FOR USE ON, AND IN CONNECTION WITH THE SPECIFIED PROJECT. NONE OF SUCH IDEAS, DESIGNS, ARRANGEMENTS OR PLANS SHALL BE USED BY OR DISCLOSED TO ANY PERSON, FIRM OR CORPORATION FOR ANY PURPOSE WHATSOEVER WITHOUT THE WRITTEN PERMISSION OF GREENWOOD & MOORE, INC. WRITTEN DIMENSIONS ON THESE DRAWINGS SHALL HAVE PRECEDENCE OVER SCALE DIMENSIONS. CONTRACTORS SHALL VERIFY AND BE RESPONSIBLE FOR ALL DIMENSIONS AND CONDITIONS ON THE JOB. THIS OFFICE MUST BE NOTIFIED OF ANY VARIATIONS FROM THE DIMENSIONS AND CONDITIONS SHOWN BY THESE DRAWINGS AND SPECIFICATIONS BEFORE PROCEEDING WITH THE WORK. ANY CHANGES MADE ON THESE DRAWINGS OR DETAILS WITHOUT THE CONSENT OF THE ARCHITECT/ENGINEER WILL RELIEVE HIM OF RESPONSIBILITY FOR THE RESULTING CONDITIONS AND WILL MAKE HIM RESPONSIBLE FOR ANY LIABILITY OR ADDITIONAL WORK INCURRED.

EROSION CONTROL NOTES

TEMPORARY EROSION CONTROL MEASURES EFFECTIVE DURING RAINY SEASON – OCTOBER 1 TO APRIL 30

1. TEMPORARY EROSION CONTROL DEVICES SHOWN ON GRADING PLAN WHICH INTERFERE WITH THE WORK SHALL BE RELOCATED OR MODIFIED WHEN THE INSPECTOR SO DIRECTS AS THE WORK PROGRESSES.
2. EXCEPT AS OTHERWISE DIRECTED BY THE INSPECTOR, ALL DEVICES SHOWN ON THE EROSION CONTROL PLAN SHALL BE IN PLACE AT THE END OF EACH WORKING DAY. ALL EROSION CONTROL FACILITIES MUST BE INSPECTED AND REPAIRED AT THE END OF EACH WORKING DAY DURING THE RAINY SEASON AND MAINTAINED DURING THE RAINY SEASON (OCTOBER 1 TO APRIL 30).
3. ALL EROSION AND SEDIMENT CONTROL MEASURES SHALL BE CONSTRUCTED AND MAINTAINED IN ACCORDANCE WITH THE PROVISIONS OF THE ASSOCIATION OF BAY AREA GOVERNMENTS (ABAG) "MANUAL OF STANDARDS FOR EROSION AND SEDIMENT CONTROL MEASURES" UNLESS OTHERWISE STATED WITHIN THESE GENERAL NOTES. CONTROL MEASURES ARE SUBJECT TO THE INSPECTION AND APPROVAL OF THE ENGINEERING DIVISION OF THE PUBLIC SERVICES DEPARTMENT. SCHEDULE AN ENGINEERING INSPECTION AT LEAST 48 HOURS PRIOR TO THE START OF ANY WORK.
4. ALL LOOSE SOIL AND DEBRIS SHALL BE REMOVED FROM THE STREET AREAS UPON STARTING OPERATIONS AND PERIODICALLY THEREAFTER AS DIRECTED BY THE INSPECTOR. THE SITE SHALL BE MAINTAINED SO AS TO MINIMIZE SEDIMENT LADEN RUNOFF TO ANY STORM DRAIN SYSTEM.
5. THE CONTRACTOR SHALL PLACE 3"–4" FRACTURED STONE AGGREGATE AS A GRAVEL ROADWAY (6" MINIMUM THICKNESS FOR THE FULL WIDTH AND 50 FEET LONG) AT EACH ROAD ENTRANCE TO THE SITE. ANY MUD THAT IS TRACKED ONTO PUBLIC STREETS SHALL BE REMOVED THE SAME DAY AS REQUIRED BY THE COUNTY ENGINEER. MINIMUM WIDTH OF GRAVEL ROADWAY IS 10 FEET.
6. A CONCRETE WASHOUT IS REQUIRED FOR ALL CONCRETE WORK. THE WASHOUT SHALL CONSIST OF A CONTAINMENT AREA ENCLOSED BY AN EARTHEN DIKE. PLASTIC TARP, COVERING THE CONTAINMENT AREA AND EARTHEN DIKE, SHALL BE STAKED IN AT OUTSIDE EDGE OF EARTHEN DIKE.
7. ADDITIONAL CONTAINMENT METHODS MUST BE PROVIDED FOR ANY WASTE STORAGE AREA, STOCKPILE/MATERIAL STORAGE AREA AND/OR CONSTRUCTION TOILET AREA.
8. THE PERSON RESPONSIBLE IMPLEMENTING, INSPECTING AND MAINTAINING THE EROSION AND SEDIMENT CONTROL MEASURES IS:

   CONTACT PERSON'S NAME: XXXX
   TELEPHONE NUMBER: XXXX

9. STAND–BY CREWS SHALL BE ALERTED BY THE PERMITTEE OR CONTRACTOR FOR EMERGENCY WORK DURING RAINSTORMS.
10. AFTER OCTOBER 1, ALL EROSION CONTROL MEASURES WILL BE INSPECTED DAILY AND AFTER EACH STORM. AFTER OCTOBER 1, BREACHES IN DIKES AND SWALES WILL BE REPAIRED AT THE CLOSE OF EACH DAY AND WHENEVER RAIN IS FORECAST.
11. AS A PART OF THE EROSION CONTROL MEASURES, UNDERGROUND STORM DRAIN FACILITIES AND CONCRETE SHALL BE INSTALLED COMPLETE AS SHOWN ON THE IMPROVEMENT PLANS.
12. ALL STORM DRAIN INLET STRUCTURES GREATER THAN FOUR FEET IN DEPTH SHALL HAVE STEPS INSTALLED PER THE LATEST ACCEPTED SAFETY STANDARDS. A 6" CONCRETE COVER SLAB SHALL BE INSTALLED OVER PIPE WITH LESS THAN 2.5 FEET OF COVER TO SUBGRADE. ALL PIPE TO BE CLASS III UNLESS OTHERWISE NOTED.
13. ALL GRADED AREAS, INCLUDING, BUT NOT LIMITED TO, CUT AND FILL SLOPES, STREETS, PARKING AREAS, AND BUILDING PADS SHALL BE HYDROSEEDED PER ABAG. IN ADDITION TO HYDROSEEDING, APPLICATION OF STRAW WITH A TACKIFIER OR MULCH MAY BE REQUIRED BY THE COUNTY ENGINEER.
14. IF ANY GRADING OPERATIONS, OTHER THAN LOT FINISH GRADING, ARE TO BE PERFORMED DURING THE RAINY SEASON, OCTOBER 1 THROUGH APRIL 30, AN EROSION CONTROL PLAN MUST BE SUBMITTED BY SEPTEMBER 1 AND THE PLAN MUST BE APPROVED BY THE COUNTY OF ALAMEDA PRIOR TO THE COMMENCEMENT OF ANY SUCH GRADING OPERATIONS.
15. TO MINIMIZE EROSION OF GRADED BANKS, ALL GRADED BANKS STEEPER THAN 2% AND HIGHER THAN 3 FEET, SHALL BE HYDROSEEDED, LANDSCAPED, OR SEALED. IN ADDITION TO HYDROSEEDING, APPLICATION OF STRAW WITH A TACKIFIER OR MULCH MAY BE REQUIRED BY THE COUNTY ENGINEER. IF THE PERMANENT STORM DRAIN SYSTEM IS NOT INSTALLED BY OCTOBER 1, TEMPORARY DITCHES SHALL BE CONSTRUCTED TO CONTAIN THE STORM WATER AND DIRECT IT, IN A MANNER THAT AVOIDS EROSION OF THE BANKS, TO THE EROSION AND SEDIMENT CONTROL FACILITIES.
16. ALL CUT AND FILL SLOPES ARE TO BE PROTECTED TO PREVENT OVERBANK FLOW USING 4" EARTH BERMS OR SILT FENCES.
17. ALL GRADED AREAS, INCLUDING, BUT NOT LIMITED TO, CUT AND FILL SLOPES, STREETS, PARKING AREAS, AND BUILDING PADS SHALL BE HYDROSEEDED PER COUNTY'S REQUIREMENT. SUGGESTED MIX DESIGN FOLLOWS:

'BLANDO' BROME	40 LBS/ACRE
ZORRO FESCUE	10 LBS/ACRE
HYKON ROSE CLOVER	9 LBS/ACRE
SUB CLOVER	5 LBS/ACRE
CALIFORNIA NATIVE WILDFLOWER	8 LBS/ACRE
FERTILIZER	300 LBS/ACRE
ORGANIC BINDER	100 LBS/ACRE
STRAW MULCH	4000 LBS/ACRE

18. BORROW AREAS AND TEMPORARY STOCKPILES SHALL BE PROTECTED WITH APPROPRIATE EROSION CONTROL MEASURES TO THE SATISFACTION OF THE COUNTY ENGINEER.
19. SANDBAGS, STRAW WATTLES AND/OR STRAW BALES SHALL BE STOCKPILED ON SITE AND PLACED AT INTERVALS SHOWN ON EROSION CONTROL PLANS, WHEN THE RAIN FORECAST IS 40% OR GREATER, OR WHEN DIRECTED BY THE INSPECTOR.
20. SANDBAGS REFERRED TO IN THE PRECEDING ITEMS MUST BE FULL. APPROVED SANDBAG FILL MATERIALS ARE DECOMPOSED GRANITE AND/OR GRAVEL, OR OTHER MATERIALS APPROVED BY THE INSPECTOR.
21. WHEN DIRECTED BY THE INSPECTOR, A 12–INCH BERM SHALL BE MAINTAINED ALONG THE TOP OF THE SLOPE OF THOSE FILLS ON WHICH GRADING IS NOT IN PROGRESS.
22. WHEN PAD ELEVATIONS OF ADJACENT LOTS OR ELEVATIONS BETWEEN THE STREET AND THE LOT ARE SEPARATED BY MORE THAN 6 FEET, A MINIMUM 12" BERM SHALL BE MAINTAINED ALONG THE PROPERTY LINE SEPARATING THE LOTS, AND THE BERM SHALL DIRECT THE WATER TO THE OUTLET. VELOCITY CHECK DAMS SHALL BE INSTALLED BETWEEN THE OUTLET ON THE LOT AND THE STREET.
23. PROVIDE VELOCITY CHECK DAMS IN ALL UNPAVED STREETS AT THE INTERVALS INDICATED BELOW IN NOTE #24. VELOCITY CHECK DAMS MAY BE CONSTRUCTED OF STRAW BALES, SANDBAGS OR OTHER EROSION RESISTANT MATERIALS APPROVED BY THE INSPECTOR, AND SHALL EXTEND COMPLETELY ACROSS THE STREET OR CHANNEL AT RIGHT ANGLES TO THE CENTERLINE. EARTH DIKES MAY NOT BE USED AS VELOCITY CHECK DAMS.
24. PROVIDE VELOCITY CHECK DAMS IN ALL UNPAVED GRADED CHANNELS AT THE INTERVALS INDICATED BELOW:

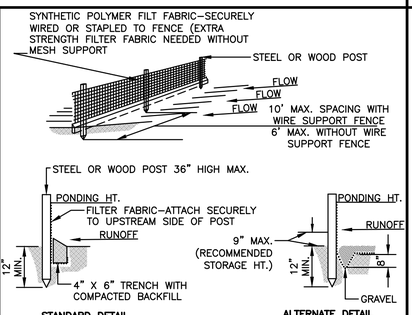
GRADE OF CHANNEL	INTERVAL
LESS THAN 3%	100 FEET
3% TO 6%	50 FEET
OVER 6%	25 FEET

25. SEWER OR STORM DRAIN TRENCHES THAT ARE CUT THROUGH BASIN DIKES OR BASIN INLET DIKES, SHALL BE PLUGGED WITH SANDBAGS FROM TOP OF PIPE TO TOP OF DIKE. SEWER LINES SHALL FIRST BE ENCASED IN CONCRETE BEFORE SANDBAGS ARE PLACED.
26. ALL OPEN UTILITY TRENCHES SHALL BE BLOCKED AT THE PRESCRIBED INTERVALS FROM THE BOTTOM TO TOP WITH A DOUBLE ROW OF SANDBAGS PRIOR TO BACKFILL. SEWER TRENCHES SHALL BE BLOCKED AT THE PRESCRIBED INTERVALS WITH A DOUBLE ROW OF SANDBAGS EXTENDING DOWNWARD, TWO SANDBAGS FROM THE GRADED SURFACE OF THE STREET. SANDBAGS ARE TO BE PLACED WITH ALTERNATE HEADER AND STRETCHER COURSES. THE INTERVALS PRESCRIBED BETWEEN SANDBAG LOCKING SHALL DEPEND ON THE SLOPE OF THE GROUND SURFACE, BUT NOT EXCEED THE FOLLOWING:

GRADE OF THE STREET	INTERVAL
LESS THAN 2%	AS REQUIRED
2% TO 4%	100 FEET
4% TO 10%	50 FEET
OVER 10%	25 FEET

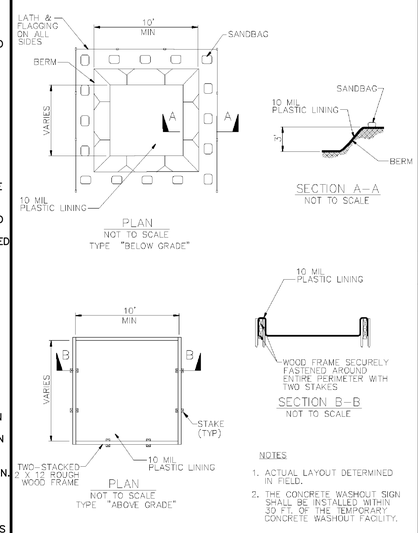
27. AFTER STORM DRAIN, SANITARY SEWER AND UTILITY TRENCHES ARE BACKFILLED AND COMPACTED, THE SURFACES OVER SUCH TRENCHES SHALL BE MOUNDED SLIGHTLY TO PREVENT CHANNELING OF WATER IN THE TRENCH AREA. CARE SHOULD BE EXERCISED TO PROVIDE FOR CROSS FLOW AT FREQUENT INTERVALS WHERE TRENCHES ARE NOT ON THE CENTER LINE OF A CROWNED STREET.
28. SEDIMENT TRAPS SHALL BE CLEANED OUT PER INSPECTOR'S DIRECTION. IT IS THE CONTRACTOR'S RESPONSIBILITY TO CLEAN THE DESILTING BASINS AND THE SEDIMENT TRAPS.
29. THIS PLAN MAY NOT COVER ALL THE SITUATIONS THAT ARISE DURING CONSTRUCTION DUE TO UNANTICIPATED FIELD CONDITIONS. VARIATIONS MAY BE MADE TO THESE PLANS IN THE FIELD, SUBJECT TO APPROVAL OF THE COUNTY ENGINEER.
30. EROSION CONTROL STRUCTURES SHALL BE ADJUSTED BY THE CONTRACTOR TO REFLECT ALL CHANGES IN DRAINAGE AS STREETS AND BUILDING PADS ARE BEING INSTALLED.
31. INSTALL EXCELSIOR CURLEX II EROSION CONTROL BLANKET OR APPROVED EQUAL ON GRADED SLOPES STEEPER THAN 3:1. INSTALL PER MANUFACTURER'S RECOMMENDATIONS AND SPECIFICATIONS.

EROSION CONTROL NOTES | 10

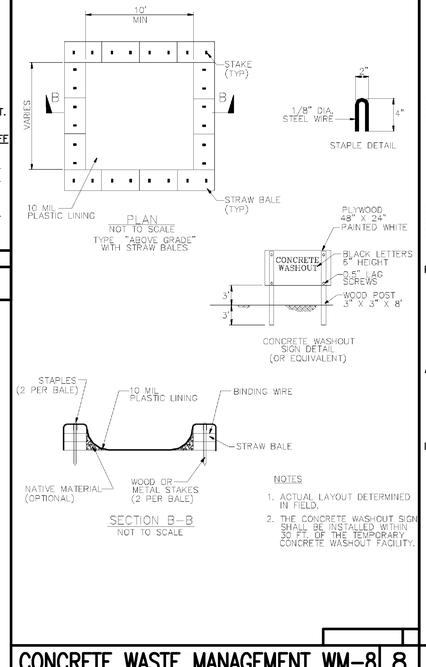


1/2"=1'–0"

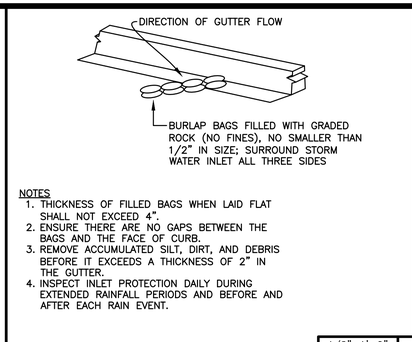
SILT FENCE | 9



WM–8 CONCRETE WASTE MANAGEMENT | 7

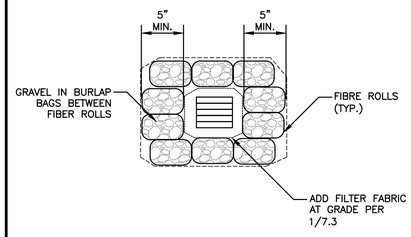


CONCRETE WASTE MANAGEMENT WM–8 | 8



1/2"=1'–0"

GRAVEL BAG CHECK DAM | 4

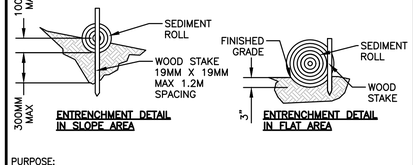


1/2"=1'–0"

INLET PROTECTION (UNPAVED AREAS) | 5

LIMITATIONS:
–DESIGNED FOR LOW SURFACE FLOWS NOT TO EXCEED 1 CFS FOR SMALL AREAS.
–DESIGNED FOR SHORT SLOPED OR SLOPES FLATTER THAN 3:1
– PRIMARY PURPOSE IS NOT SEDIMENT CONTROL, ALTHOUGH DO PROVIDE SOME SEDIMENT REMOVAL.

INSPECTION AND MAINTENANCE:
– REPAIR OR REPLACE SPLIT, TORN, UNRAVELING, OR SLUMPING FIBER ROLLS.
–INSPECT FIBER ROLLS WHEN RAIN IS FORECAST, FOLLOWING RAIN EVENTS AND AT LEAST DAILY DURING PROLONGED RAINFALL. PERFORM REQUIRED MAINTENANCE.
–IN MOST CASES, FIBER ROLLS DO NOT REQUIRE REMOVAL AND CAN BE ABANDONED IN PLACE. IF NOTE EXCESSIVELY SOILED, ROLLS MAY BE REMOVED. REPLACED AND REUSED.



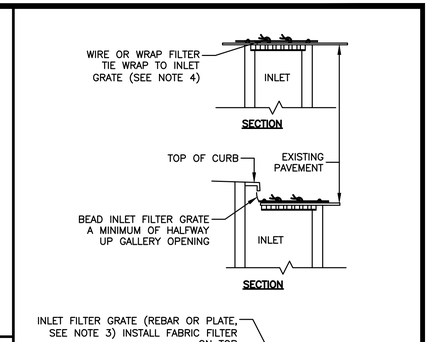
PURPOSE:
FIBER ROLLS (SEDIMENT LOGS OR WATTLES), COMPOSED OF BIO–DEGRADABLE FIBERS STUFFED IN A PHOTO–DEGRADEABLE OPEN WEAVE NETTING, ARE DESIGNED TO REDUCE SEDIMENT RUNOFF FROM DISTURBED SOILS INTO THE STORM DRAIN SYSTEM OR WATER–COURSES. FIBER ROLLS ARE POROUS AND ALLOW WATER TO FILTER THROUGH FIBERS AND TRAP SEDIMENT, INCREASE FILTRATION RATES, SLOW RUNOFF AND REDUCE SHEET AND HILL EROSION. WATTLES ALSO CREATE A FAVORABLE ENVIRONMENT FOR PLANT ESTABLISHMENT.

APPLICATION:
–ALONG THE FACE OF EXPOSED AND ERODIBLE SLOPES TO SHORTEN SLOPE LENGTH.
–AT GRADE BREAKS WHERE SLOPES TRANSITION TO A STEEPER SLOPE
–IN DRAINAGE SWALES TO SLOW FLOWS
–ALONG STREAMBANKS TO ASSIST STABILIZATION AND REVEGETATION

INSPECTION AND MAINTENANCE:
FOLLOW MANUFACTURER'S RECOMMENDATIONS FOR INSTALLATION. IN GENERAL, THESE WILL BE AS FOLLOWS:
–FINE GRADE THE SUBGRADE BY HAND DRESSING WHERE NECESSARY TO REMOVE LOCAL DEVIATIONS AND TO REMOVE LARGER STONES OR DEBRIS THAT WILL INHIBIT INTIMATE CONTACT OF THE FIBER ROLL WITH THE SUBGRADE.
–PRIOR TO ROLL INSTALLATION, CONTOUR A CONCAVE KEY TRENCH 50 TO 100MM (2 TO 4 INCHES) DEEP ALONG THE PROPOSED INSTALLATION ROUTE.
–SOIL EXCAVATION IN TRENCHING SHOULD BE PLACED ON THE UPHILL OR FLOW SIDE OF THE ROLL TO PREVENT WATER FROM UNDERCUTTING THE ROLL.
–PLACE FIBER ROLLS INTO THE KEY TRENCH AND STAKE ON BOTH SIDES OF THE ROLL WITHIN 6 FEET OF EACH END AND THEN EVERY SIX INCHES WITH 1" X 2" X 23" STAKES.
–STAKE ARE TYPICALLY DRIVEN IN ON ALTERNATING SIDES OF THE ROLL. WHEN MORE THAN ONE FIBER ROLL IS PLACED IN A ROW, THE ROLLS SHOULD BE BUTTED SECURELY TO ONE ANOTHER TO PROVIDE A TIGHT JOINT, NOT OVERLAPPED.

1/2"=1'–0"

STRAW WATTLE | 6



NOTES:
1. FILTER FABRIC SHALL MEET CAL–TRANS OR HAY BAG SPECIFICATIONS.
2. FILTER MATERIAL AND GRATE SHALL OVERLAP INLET ON ALL SIDES BY A MINIMUM OF 1"
3. INLET FILTER GRATE SHALL BE MADE OF RE–BARS, CRISS CROSSED AT 6" (WELDED NUMBERED 3 OR TIED TOGETHER WITH WIRE) OR A PLATE WITH MINIMUM OF 75% OPEN AREA, BOTH OF SUFFICIENT STRENGTH TO PREVENT BENDING WHEN DRIVEN OVER BY A VEHICLE.
4. INLET FILTER GRATE SHALL BE SECURELY ATTACHED TO DRAIN INLET BY WIRE OR TIE–WRAPS (BEND OVER).
5. FILTERS SHALL BE INSPECTED WEEKLY AND AFTER EACH RAINFALL. REPAIRS, SEDIMENT/ DEBRIS REMOVAL SHALL BE MADE TO ASSURE EFFICIENCY OF FILTER SYSTEM.

TITLE DESCRIPTION

REAL PROPERTY IN THE CITY OF BERKELEY, COUNTY OF ALAMEDA, STATE OF CALIFORNIA, DESCRIBED AS FOLLOWS:

PORTION OF LOT 4, BLOCK 13, "MAP OF THE PROPERTY OF COLLEGE HOMESTEAD ASSOCIATION", RECORDED MAY 15, 1866, MAP BOOK "T" OF DEEDS, PAGE 799, ALAMEDA COUNTY RECORDS.

BEGINNING AT A POINT OF THE INTERSECTION OF THE WESTERN LINE OF ELLSWORTH STREET WITH THE SOUTHERN LINE OF DURANT AVENUE, AND RUNNING THENCE WESTERLY ALONG SAID LINE OF DURANT AVENUE, 94 FEET; THENCE AT RIGHT ANGLES SOUTHERLY 90 FEET; THENCE EASTERLY PARALLEL WITH SAID LINE OF DURANT AVENUE, 94 FEET TO THE WESTERN LINE OF ELLSWORTH STREET; THENCE NORTHERLY ALONG SAID LAST NAMED LINE, 90 FEET TO THE POINT OF BEGINNING.

EXCEPTING THEREFROM THE EXCLUSIVE RIGHT TO PROSPECT FOR, DRILL FOR, PRODUCE AND TAKE ANY OIL, GAS OR OTHER HYDROCARBON SUBSTANCES OR MINERAL SUBSTANCES AND ACCOMPANYING FLUIDS INCLUDING ALL GEOTHERMAL RESOURCES, FROM THE REAL PROPERTY GRANTED HEREIN, FROM THE DEPTH OF FIVE HUNDRED FEET FROM THE SAID REAL PROPERTY, INCLUDING THE RIGHT TO SLANT DRILL FROM ADJACENT PROPERTY, THE RIGHT TO UTILIZE SUBSURFACE STORAGE FOR NATURAL SUBSTANCES, AND THE RIGHT TO MAINTAIN SUBSURFACE PRESSURES.
GRANTOR COVENANTS AND EGRESS THAT THE ABOVE RESERVED RIGHTS WILL NOT BE EXERCISED IN DEROGATION OF GRANTEE'S USED AND PURPOSES OF THE SURFACE OF REAL PROPERTY, AS RESERVED IN THE DEED EXECUTED BY THE REGENTS OF THE UNIVERSITY OF CALIFORNIA, A CALIFORNIA CORPORATION. RECORDED SEPTEMBER 2, 1983, SERIES NO 83-163400, ALAMEDA COUNTY RECORDS.

APN: 055-1887-001

THE PROPERTY SURVEYED IS THE SAME AS DESCRIBED ABOVE AND SHOWN IN THE TITLE COMMITMENT FROM FIRST AMERICAN TITLE INSURANCE COMPANY, COMMITMENT NO. NCS-1177686-CC AND AN EFFECTIVE DATE OF SEPTEMBER 18, 2023, UPDATED OCTOBER 06, 2023.

TITLE COMMITMENT INFORMATION

The Title Description and Schedule 'B' items are the same as shown on the title commitment provided by First American Title Insurance Company, Commitment No. NCS-1177686-CC, issued with an effective date of September 18, 2023, updated October 06, 2023.

SURVEYOR'S NOTES

1. ALL STATEMENTS WITHIN THE CERTIFICATION, AND OTHER REFERENCES LOCATED ELSEWHERE HEREON, RELATED TO UTILITIES, IMPROVEMENTS, STRUCTURES, BUILDINGS, PARTY WALLS, EASEMENTS, SERVITUDES, FOUNDATIONS AND POSSIBLE ENCROACHMENTS ARE BASED SOLELY ON ABOVE GROUND, VISIBLE EVIDENCE, UNLESS ANOTHER SOURCE OF INFORMATION IS SPECIFICALLY REFERENCED HEREON.

2. SUBJECT TRACT HAS DIRECT PHYSICAL DRIVEWAY ACCESS TO ELLSWORTH STREET AND DURANT AVENUE, BOTH DEDICATED PUBLIC RIGHTS-OF-WAY.

3. THE DIMENSIONS AND AREA OF THE BUILDING(S) SHOWN ARE BASED ON THE BUILDING'S EXTERIOR FOOTPRINT AT GROUND LEVEL.

4. THE POINT OF HEIGHT MEASUREMENT IS IDENTIFIED ON THE SURVEY AND WAS TAKEN FROM THE NEAREST ADJACENT GRADE AT SAID POINT. THIS POINT REPRESENTS THE HEIGHT OF THE STRUCTURE AS OBSERVED FROM GROUND LEVEL.

5. UNDERGROUND UTILITIES HAVE BEEN LOCATED AND/OR SHOWN ON THIS SURVEY. ONLY VISIBLE AND/OR MARKED UTILITY APPURTENANCES ARE SHOWN.

6. THERE IS NO OBSERVABLE EVIDENCE OF EARTH MOVING WORK, OR BUILDING CONSTRUCTION ON THE SURVEYED PROPERTY.

7. THERE ARE NO OBSERVABLE EVIDENCE OF ANY CHANGES IN STREET RIGHT-OF-WAYS OR RECENT STREET OR SIDEWALK CONSTRUCTION OR REPAIR.

8. THERE IS NO OBSERVABLE EVIDENCE OF CEMETERIES ON THE SURVEYED PROPERTY.

9. ALL RECIPROCAL EASEMENT AGREEMENTS ("REAS") THAT HAVE BEEN REPORTED BY THE TITLE REPORT PROVIDED HAVE BEEN DENOTED ON THE SURVEY AND ARE SHOWN HEREON. THE LIMITS OF ANY OFFSITE APPURTENANT EASEMENTS THAT HAVE BEEN REPORTED BY THE TITLE REPORT PROVIDED HAVE BEEN DENOTED ON THE SURVEY AND ARE SHOWN HEREON.

10. THIS SURVEY DOES NOT PROVIDE A DETERMINATION OR OPINION CONCERNING THE LOCATION OR EXISTENCE OF WETLANDS, FAULT LINES, TOXIC OR HAZARDOUS WASTE AREAS, SUBSIDENCE, SUBSURFACE AND ENVIRONMENTAL CONDITIONS OR GEOLOGICAL ISSUES. NO STATEMENT IS MADE CONCERNING THE SUITABILITY OF THE SUBJECT TRACT FOR ANY INTENDED USE, PURPOSE OR DEVELOPMENT.

11. THE SURVEYED BOUNDARY SHOWN HEREON ARE CONTIGUOUS WITH ADJOINING PROPERTIES AND/OR RIGHTS OF WAY WITHOUT ANY GAPS, GORES OR OVERLAPS.

12. NO VISIBLE EVIDENCE OF SUBSTANTIAL AREAS OF REFUSE WERE OBSERVED AT THE TIME THE FIELDWORK WAS PERFORMED.

13. THE BOUNDARY LINE DIMENSIONS AS SHOWN ON THIS SURVEY MAP FORM A MATHEMATICALLY CLOSED FIGURE.

SURVEYOR'S CERTIFICATE

TO: 2298 DURANT LP, A CALIFORNIA LIMITED PARTNERSHIP; FIRST AMERICAN TITLE INSURANCE COMPANY:

THIS IS TO CERTIFY THAT THIS MAP OR PLAT AND THE SURVEY ON WHICH IT IS BASED WERE MADE IN ACCORDANCE WITH THE 2021 MINIMUM STANDARD DETAIL REQUIREMENTS FOR ALTA/NSPS LAND TITLE SURVEYS, JOINTLY ESTABLISHED AND ADOPTED BY ALTA AND NSPS, AND INCLUDES ITEMS 2, 3, 4, 5, 6(A), 6(B), 7(A), 7(B)(1), 7(C), 8, 9, 11(B), 13, 14, 16, 17 AND 19 OF TABLE A THEREOF. THE FIELDWORK WAS COMPLETED ON JUNE 29, 2023.

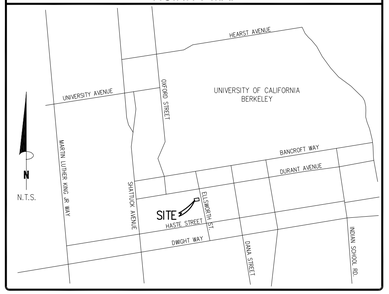
VICINITY MAP



BASIS OF BEARING

THE BEARING OF N80°51'12"E ALONG THE MONUMENT LINE OF CHANNING WAY AS SHOWN ON RECORD OF SURVEY NO. 2769, FILED IN BOOK 42 OF RECORD OF SURVEYS AT PAGE 46, RECORDS OF ALAMEDA COUNTY.

ELEVATION BENCH MARK

CITY OF BERKELEY MONUMENT AT THE INTERSECTION OF DURANT AVE. AND ELLSWORTH ST. PER CR7052.
CITY MONUMENT NO. B0401
ELEV.=211.60'

OBSERVED SIGNIFICANT OBSERVATIONS

NONE OBSERVED

UTILITY NOTE

THE SURVEY SHOWS THE LOCATION OF UTILITIES EXISTING ON OR SERVING THE SURVEYED PROPERTY AS DETERMINED BY OBSERVED EVIDENCE COLLECTED PURSUANT TO ALTA SECTION 5 E IV TOGETHER WITH EVIDENCE FROM PLANS REQUESTED BY THE SURVEYOR AND OBTAINED FROM THE UTILITY COMPANIES, OR PROVIDED BY THE CLIENT AND MARKINGS REQUESTED BY THE SUREYOR PURSUANT TO A 811 UTILITY LOCATE OF SIMILAR REQUEST.

TITLE DESCRIPTION

THE LAND REFERRED TO IS SITUATED IN THE COUNTY OF ALAMEDA, CITY OF BERKELEY, STATE OF CALIFORNIA, AND IS DESCRIBED AS FOLLOWS:

THAT PARCEL OF LAND IN THE CITY OF BERKELEY, COUNTY OF ALAMEDA, STATE OF CALIFORNIA, DESCRIBED AS FOLLOWS:

A PORTION OF LOT 4, BLOCK 13, "PROPERTY OF THE COLLEGE HOMESTEAD ASSOCIATION", FILED MAY 15, 1866, BOOK T OF DEEDS, PAGE 799, ALAMEDA COUNTY RECORDS, DESCRIBED AS FOLLOWS:

BEGINNING AT A POINT ON THE WESTERLY LINE OF ELLSWORTH STREET, DISTANT 90 FEET SOUTH OF THE INTERSECTION OF THE WESTERLY LINE OF ELLSWORTH STREET AND THE SOUTHERLY LINE OF DURANT AVENUE; THENCE SOUTHERLY ALONG THE WESTERLY LINE OF ELLSWORTH STREET 40 FEET; THENCE AT A RIGHT ANGLE WESTERLY PARALLEL TO THE SOUTHERLY LINE OF DURANT AVENUE 94 FEET; THENCE NORTHERLY AT A RIGHT ANGLE PARALLEL TO THE WESTERLY LINE OF ELLSWORTH STREET, 40 FEET; THENCE AT A RIGHT ANGLE EASTERLY 94 FEET TO THE POINT OF BEGINNING.

APN: 055-1887-002

THE PROPERTY SURVEYED IS THE SAME AS DESCRIBED ABOVE AND SHOWN IN THE TITLE COMMITMENT FROM FIRST AMERICAN TITLE INSURANCE COMPANY, COMMITMENT NO. NCS-1183023-CC AND AN EFFECTIVE DATE OF MAY 31, 2023.

TITLE COMMITMENT INFORMATION

The Title Description and Schedule 'B' items are the same as shown on the title commitment provided by First American Title Insurance Company. Commitment No. NCS-1183023-CC, issued with an effective date of May 31, 2023.

SURVEYOR'S NOTES

1. ALL STATEMENTS WITHIN THE CERTIFICATION, AND OTHER REFERENCES LOCATED ELSEWHERE HEREON, RELATED TO UTILITIES, IMPROVEMENTS, STRUCTURES, BUILDINGS, PARTY WALLS, EASEMENTS, SERVITUDES, FOUNDATIONS AND POSSIBLE ENCROACHMENTS ARE BASED SOLELY ON ABOVE GROUND, VISIBLE EVIDENCE, UNLESS ANOTHER SOURCE OF INFORMATION IS SPECIFICALLY REFERENCED HEREON.
2. SUBJECT TRACT HAS DIRECT PHYSICAL DRIVEWAY ACCESS TO ELLSWORTH STREET AND DURANT AVENUE, BOTH DEDICATED PUBLIC RIGHTS-OF-WAY.
3. THE DIMENSIONS AND AREA OF THE BUILDING(S) SHOWN ARE BASED ON THE BUILDING'S EXTERIOR FOOTPRINT AT GROUND LEVEL.
4. THE POINT OF HEIGHT MEASUREMENT IS IDENTIFIED ON THE SURVEY AND WAS TAKEN FROM THE NEAREST ADJACENT GRADE AT SAID POINT. THIS POINT REPRESENTS THE HEIGHT OF THE STRUCTURE AS OBSERVED FROM GROUND LEVEL.
5. UNDERGROUND UTILITIES HAVE BEEN LOCATED AND/OR SHOWN ON THIS SURVEY. ONLY VISIBLE AND/OR MARKED UTILITY APPURTENANCES ARE SHOWN.
6. THERE IS NO OBSERVABLE EVIDENCE OF EARTH MOVING WORK, OR BUILDING CONSTRUCTION ON THE SURVEYED PROPERTY.
7. THERE ARE NO OBSERVABLE EVIDENCE OF ANY CHANGES IN STREET RIGHT-OF-WAYS OR RECENT STREET OR SIDEWALK CONSTRUCTION OR REPAIR.
8. THERE IS NO OBSERVABLE EVIDENCE OF CEMETERIES ON THE SURVEYED PROPERTY.
9. ALL RECIPROCAL EASEMENT AGREEMENTS ("REAS") THAT HAVE BEEN REPORTED BY THE TITLE REPORT PROVIDED HAVE BEEN DENOTED ON THE SURVEY AND ARE SHOWN HEREON. THE LIMITS OF ANY OFFSITE APPURTENANT EASEMENTS THAT HAVE BEEN REPORTED BY THE TITLE REPORT PROVIDED HAVE BEEN DENOTED ON THE SURVEY AND ARE SHOWN HEREON.
10. THIS SURVEY DOES NOT PROVIDE A DETERMINATION OR OPINION CONCERNING THE LOCATION OR EXISTENCE OF WETLANDS, FAULT LINES, TOXIC OR HAZARDOUS WASTE AREAS, SUBSIDENCE, SUBSURFACE AND ENVIRONMENTAL CONDITIONS OR GEOLOGICAL ISSUES. NO STATEMENT IS MADE CONCERNING THE SUITABILITY OF THE SUBJECT TRACT FOR ANY INTENDED USE, PURPOSE OR DEVELOPMENT.
11. THE SURVEYED BOUNDARY SHOWN HEREON ARE CONTIGUOUS WITH ADJOINING PROPERTIES AND/OR RIGHTS OF WAY WITHOUT ANY GAPS, GORES OR OVERLAPS.
12. NO VISIBLE EVIDENCE OF SUBSTANTIAL AREAS OF REFUSE WERE OBSERVED AT THE TIME THE FIELDWORK WAS PERFORMED.
13. THE BOUNDARY LINE DIMENSIONS AS SHOWN ON THIS SURVEY MAP FORM A MATHEMATICALLY CLOSED FIGURE.
14. RECORD AND MEASURED DISTANCES ARE THE SAME.

SURVEYOR'S CERTIFICATE

TO: ELLSWORTH, CASCADE CAPITAL- BERKELEY MULTI-FAMILY I, LLC, A CALIFORNIA LIMITED LIABILITY COMPANY: FIRST AMERICAN TITLE INSURANCE COMPANY:

THIS IS TO CERTIFY THAT THIS MAP OR PLAT AND THE SURVEY ON WHICH IT IS BASED WERE MADE IN ACCORDANCE WITH THE 2021 MINIMUM STANDARD DETAIL REQUIREMENTS FOR ALTA/NSPS LAND TITLE SURVEYS, JOINTLY ESTABLISHED AND ADOPTED BY ALTA AND NSPS, AND INCLUDES ITEMS 2, 3, 4, 5, 6(A), 6(B), 7(A), 7(B)(1), 7(C), 8, 9, 11(B), 13, 14, 16, 17 AND 19 OF TABLE A THEREOF, THE FIELDWORK WAS COMPLETED ON JUNE 29, 2023.

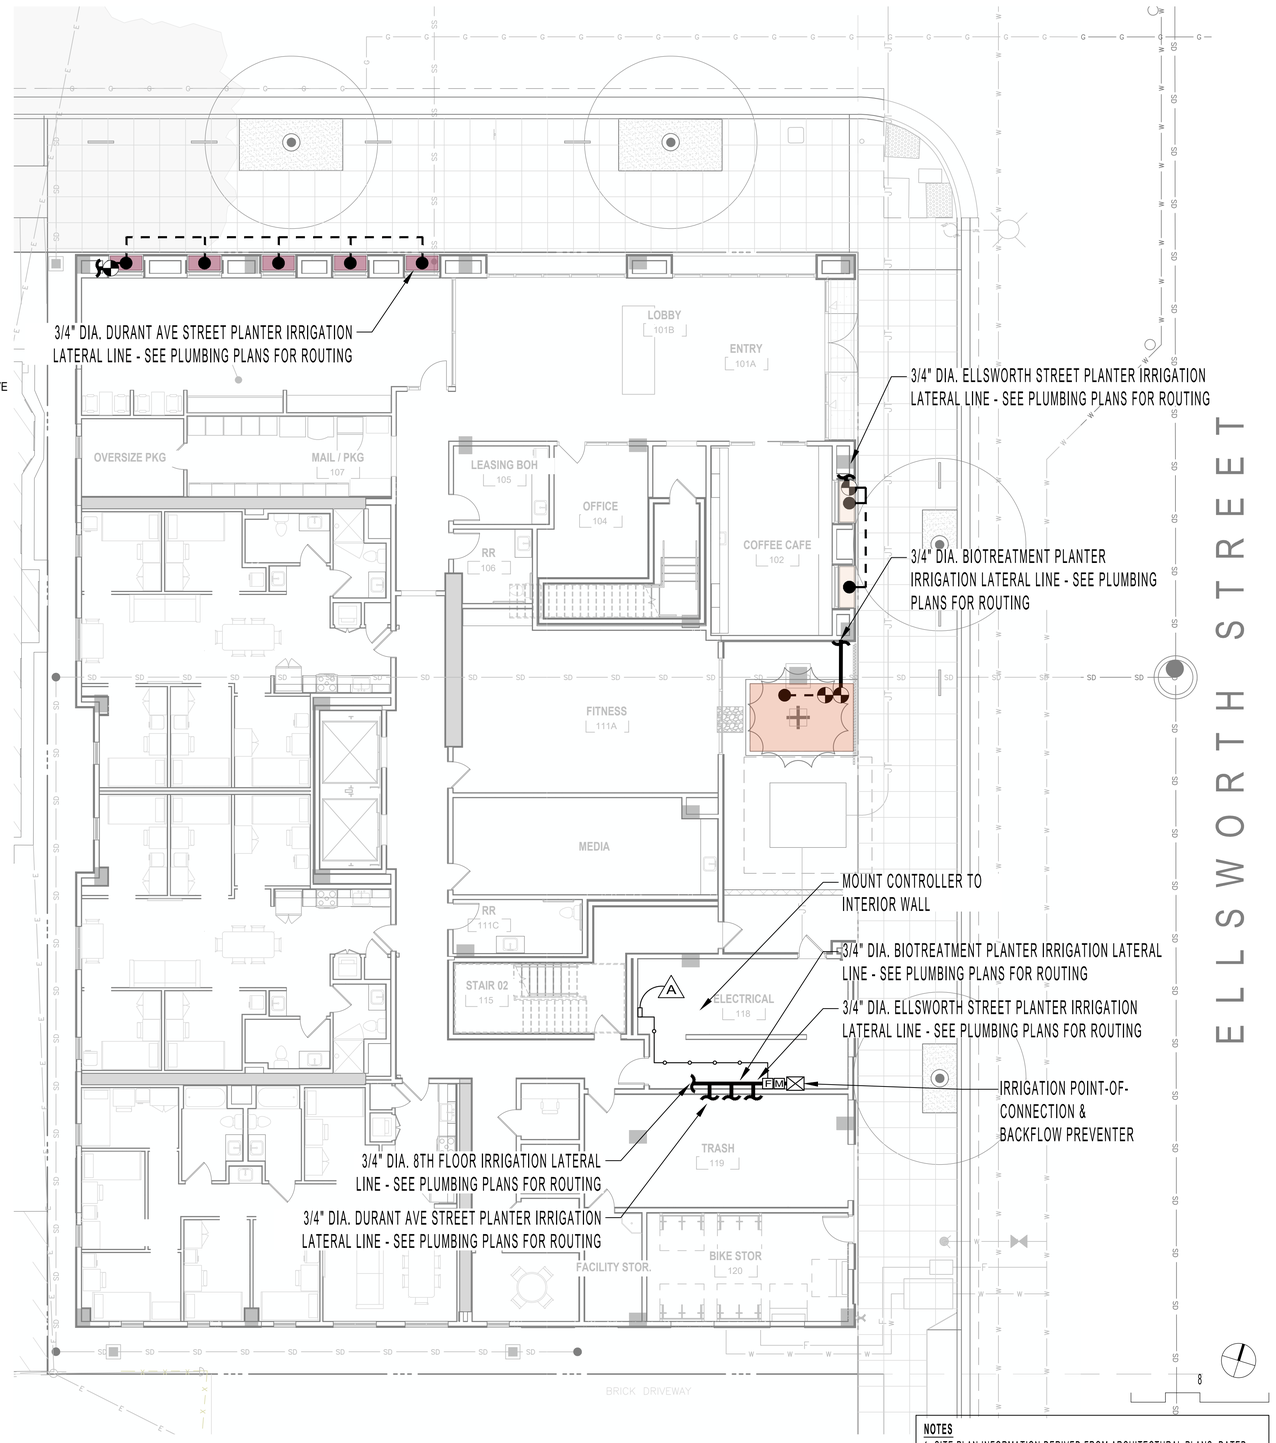
- INDICATES FLOW IN GPM FOR ELECTRIC CONTROL VALVE
- INDICATES IRRIGATION SPRINKLER CONTROLLER STATION NUMBER
- INDICATES PLANT WATER USE CATEGOR (M=MODERATE, H=HIGH, WATER USE)
- INDICATES ELECTRIC CONTROL VALVE SIZE
- INDICATES PRECIPITATION RATE

IRRIGATION EQUIPMENT

ITEM	SYMBOL	DESCRIPTION	MANUFACTURER	MODEL NO.
IRRIGATION POINT-OF-CONNECTION	⊠	REFER TO PLUMBING PLANS FOR LOCATION INFORMATION		
IRRIGATION 'SMART' CONTROLLER	A	IRRIGATION 'SMART' CONTROLLER MOUNTED ON WALL INSIDE LOCKABLE CABINET, SWITCH AND SURGE PROTECTION - PROVIDE ON-SITE WEATHER SENSOR AND ENCLOSURE IN VICINITY AS DIRECTED BY ON-SITE OPERATOR	HUNTER	HC HYDRAWISE WITH WIFI
FLOW METER	F	HC FLOW METER - PVC HOUSING - 1-INCH SIZE - WITHIN MASTER VALVE ENCLOSURE ASSEMBLY- REQUIRED HARD-WIRE	HUNTER	HC FLOW METER
SOIL MOISTURE SENSOR		SOIL CLIK - LOCATED IN FIELD AS DIRECTED BY OWNER - REQUIRES HARD-WIRE AND WALL PLACEMENT ADJACENT TO CONTROLLER	HUNTER	SOIL-CLIK
RAIN MOISTURE SENSOR		RAIN METER - LOCATED IN FIELD AS DIRECTED BY OWNER - REQUIRES HARD-WIRE AND WALL PLACEMENT ADJACENT TO CONTROLLER	HUNTER	RAIN-CLIK
MASTER CONTROL VALVE	M	MASTER CONTROL VALVE - 1-INCH SIZE - 24 VOLT IRRIGATION SOLENOID - THREADED ENDS - LOCATE MASTER VALVE BEFORE FLOW SENSOR	SUPERIOR	
DRIP VALVE STATION		DRIP VALVE STATION - DRIP ELECTRIC CONTROL VALVE ASSEMBLY - W/ PRESSURE REGULATING BASKET FILTER (200 POLY MESH /40 PSI SETTING) USE 3/4-INCH SIZE DRIP ELECTRIC CONTROL VALVE ASSEMBLY FOR FLOWS 4 GPM AND UNDER (USE 1-INCH SIZE FOR FLOWS 5 GPM THROUGH 14 GPM - USE 1-1/2 INCH SIZE FOR FLOWS 15 GPM AND GREATER)	HUNTER	
QUICK COUPLING VALVE		QUICK COUPLING VALVE - 1-INCH SIZE - POTABLE WATER USE - LOCKING RUBBER COVER MOUNTED IN ROUND BOX - PROVIDE VALVE KEY AND SWIVEL		
AIR RELIEF VALVE		AIR RELIEF VALVE - THREADED - 1/2-INCH MIPT- INSTALL WITHIN ROUND VALVE BOX - INSTALL UNITS AT HIGH POINTS OF DRIPLINE SYSTEMS AT 2 PER VALVE		
BALL FULL PORT VALVE / DRIPLINE FLUSH OUT ASSEMBLY		SCHEDULE 40 PVC BALL FULL PORT VALVE AND PVC FLEX HOSE TUBING INSTALLED WITHIN ROUND VALVE BOX - ADAPT TO INSTALL DRIPLINE TUBING AS REQUIRED - UNITS WHERE SHOWN LOCATED AT ENDS OF DRIPLINE SYSTEMS		
PRESSURIZED MAIN LINE - COPPER IRRIGATION WATER PIPING STUB OUT	———	DRY COPPER PIPING - 3/4-INCH SIZE PIPING STUB OUT - PIPING ROUTED THROUGH BUILDING AND ROOF DECKING(S) FOR IRRIGATION SYSTEM CONTINUATION PER MECHANICAL ENGINEER'S DRAWINGS - REFER TO MECHANICAL ENGINEER'S DRAWINGS FOR ACTUAL LOCATION - ROUTING OF PIPE TO IRRIGATION VALUE TO BE PROVIDED BY PLUMBING CONTRACTOR.		
LATERAL LINE	● - - - - INDICATES CONNECTION TO ASSIGNED DRIP LINES, TYP.	SCHEDULE 40 PVC - 3/4 INCH DIA. - AS SHOWN ON PLANS		

IRRIGATION NOTES

1. IRRIGATION TO CONNECT TO WATER SUPPLY WITH BACKFLOW PREVENTION DEVICE INSTALLED PER AGENCY REQUIREMENTS.
2. IRRIGATION SYSTEM SHALL EMPLOY AN ELECTRONIC 'SMART' CONTROLLER WITH WEATHER-SENSING CAPABILITIES, 6 MIN. VALVES, SINGLE WIRE TYPE.
3. PLANTING HAS BEEN DESIGNED IN 'HYDROZONES' - WITH VALVES GROUPED ACCORDING TO LOCATION AND PLANT TYPE.
4. WATER EMITTERS SHALL BE USED TO DELIVER THE WATER IN THE MOST EFFICIENT MANNER POSSIBLE. USE, IN ORDER: IN-LINE DRIP, MICRO SPRAY, POINT-SOURCE. PROVIDE SEPARATE SYSTEMS FOR TREE POPUP STREAM BUBBLERS WITH PCS.
5. REFER TO PLUMBING PLANS FOR IRRIGATION WATER POINT-OF-CONNECTION LOCATION.
6. REFER TO ELECTRICAL ENGINEERING PLANS FOR IRRIGATION CONTROLLER CONNECTION LOCATION.



NOTES

IRRIGATION NOTES

1. **POINT-SOURCE DRIP** IRRIGATED AREAS USE 1/2" MAINLINE FOR DISTRIBUTION TO 1/4" IN-LINE DRIP TUBING WITH EMITTERS SPACED 6", WRAPPED AROUND INDIVIDUAL PLANTS. MAINLINE TO BE ROUTED SO THAT IT IS AS CLOSE TO EACH INDIVIDUAL PLANT AS POSSIBLE. IF PLANT IS OVER 24" AWAY FROM THE MAINLINE, USE A 1/4" SOLID LATERAL LINE TO CONNECT THE 1/4" IN-LINE DRIP TUBING TO THE 1/2" MAINLINE. WRAP PLANT ONCE WITH IN-LINE DRIP TUBING AROUND ROOTBALL PER THE FOLLOWING:
2. **IN-LINE DRIP** IRRIGATED AREAS USE 1/2" MAINLINE FOR DISTRIBUTION TO 1/4" IN-LINE DRIP TUBING WITH EMITTERS SPACED 6", TO COMPLETELY COVER THE DESIGNATED PLANTING AREA. SPACE DRIP TUBING TO COVER ENTIRE PLANTING AREA AS SHOWN IN THE STANDARD IN-LINE DRIP LAYOUT DETAIL.
3. **MP ROTATORS** IRRIGATED AREAS USE 1/2" MAINLINE FOR DISTRIBUTION TO HIGH-EFFICIENCY POP-UP ROTATING JET STREAM EMITTERS, SPACED TO ENSURE HEAD-TO-HEAD COVERAGE WITHIN DESIGNATED PLANTING AREAS. ALL EMITTERS TO BE 6" AWAY FROM HARDSCAPE EDGE TO AVOID OVER-SPRAY.

CONTAINER SIZE	**IN-LINE DRIP TUBING PLACEMENT** (FROM CENTER OF PLANT)
#1	3"
#5	4"
#15	5"
24" BOX	5" AND 10" (2 LOOPS)

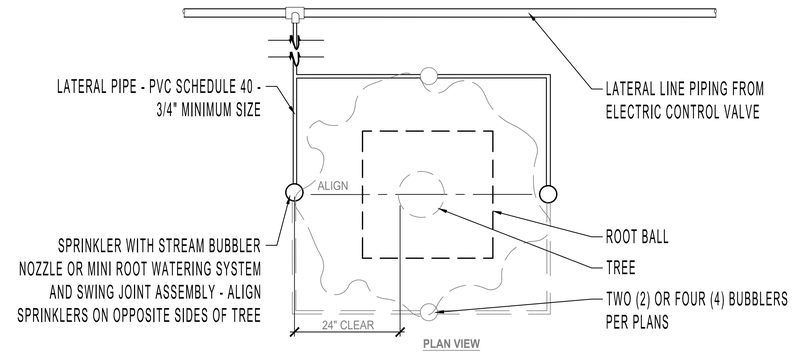
NOTES

1. REFER TO EQUIPMENT LEGEND FOR DRIPLINE AND PLANT MATERIAL ASSIGNMENT.
2. REFER TO STATION CALLOUTS ON PLAN SHEETS FOR SPECIFIC VALVE PERFORMANCE REQUIREMENTS AND CONFIGURATION OF DRIPLINE.
3. PROVIDE COUPLING FITTING (UNIVERSAL NUT LOCK) - WHERE REQUIRED.
4. REFER TO MANUFACTURER FOR DRIPLINE MAXIMUM LATERAL LENGTHS.

DRIPLINE SYSTEM LAYOUT - TYPICAL | 5

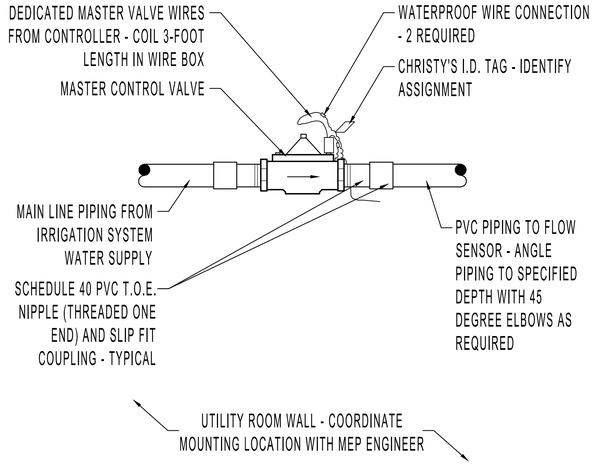


PLAN VIEW

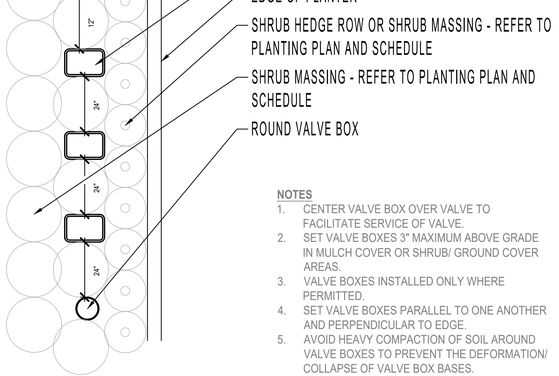
NOTES

1. ALIGN SPRINKLER HEADS FACING VINES ON PALM WHERE INSTALLED.
2. INSTALL FOUR (4) SPRINKLERS PER PALM AND INSTALL TWO (2) SPRINKLERS PER NON-PALM TREE.

TREE SPRINKLER LAYOUT | 3



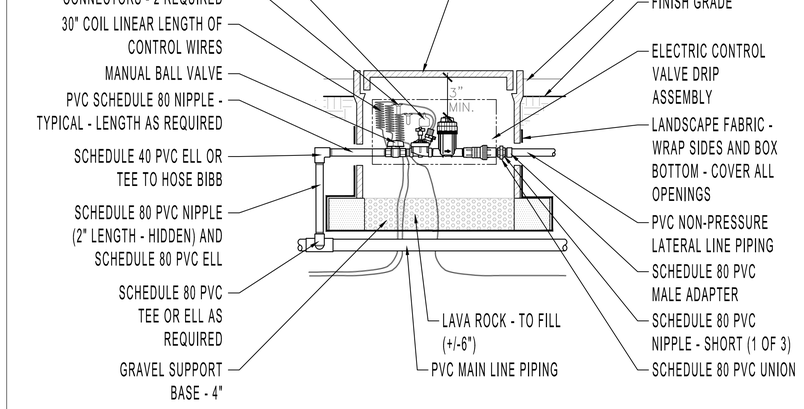
MASTER CONTROL VALVE | 1



NOTES

1. CENTER VALVE BOX OVER VALVE TO FACILITATE SERVICE OF VALVE.
2. SET VALVE BOXES 3" MAXIMUM ABOVE GRADE IN MULCH COVER OR SHRUB/ GROUND COVER AREAS.
3. VALVE BOXES INSTALLED ONLY WHERE PERMITTED.
4. SET VALVE BOXES PARALLEL TO ONE ANOTHER AND PERPENDICULAR TO EDGE.
5. AVOID HEAVY COMPACTION OF SOIL AROUND VALVE BOXES TO PREVENT THE DEFORMATION/ COLLAPSE OF VALVE BOX BASES.
6. SHRUB ROWS SHALL KEEP CONTINUITY WHEREVER PLANTED.

VALVE BOX LAYOUT (AT GRADE PLANTING) | 6



DRIP VALVE STATION | 4

PROOF OF SERVICE

DATE: November 3, 2025

TO: Whom It May Concern

FROM: Melinda Jacob, OSII

SUBJECT: **USE PERMIT #ZP2024-0126 – 2298 DURANT AVENUE**

I, the undersigned, certify that I am employed in the City of Berkeley, County of Alameda, California; that I am over eighteen years of age; that I am not a party to the within action; and that my business address is 1947 Center Street, Berkeley, California 94704. On this date, I served the following documents:

ZONING ADJUSTMENTS BOARD NOTICE OF DECISION

On the parties stated below by placing true copies thereof in sealed envelope(s) addressed as shown below by the following means of service:

Austin Springer Studio KDA 1810 Sixth Street Berkeley, CA 94710	Valiance Capital, LLC 2425 Channing Way, Suite B PMB #820 Berkeley, CA 94705

☒ By First Class Mail - I am readily familiar with the City's practice for collecting and processing of correspondence for mailing. Under the practice, the correspondence is deposited with the U.S. Postal Service on the same day as collected, with First Class postage thereon fully prepaid, in Berkeley, California, for mailing to the addressee following ordinary business practices.

☐ By Personal Service - I caused each such envelope to be given to the City of Berkeley mail service person to personally deliver to the office of the addressee.

I declare under penalty of perjury that the foregoing is true and correct. Executed on November 3, 2025 at Berkeley, California.

Re: Appeal to City Council of 2298 Durant & 2360 Ellsworth Use Permit #ZP2024-0126

Dear Mayor Ishii, City Councilmembers Kesarwani, Taplin, Bartlett, Tregub, O'Keefe, Blackaby, Lunaparra, and Humbert, and City Clerk Numainville,

Our law office represents the Building and Construction Trades Council of Alameda County, AFL-CIO ("Trades Council") and the Northern California Carpenters Regional Council ("Carpenters"). We are writing on behalf of the Trades Council and Carpenters to appeal the approval by the City of Berkeley ("City") Zoning Adjustment Board ("ZAB") of Use Permit #ZP2024-0126 for the 2298 Durant & 2360 Ellsworth project ("Project").[1]

The Project is proposed by Austin Springer, Studio KDA, 1810 Sixth Street, Berkeley, CA 94710 ("Applicant"). The Applicant applied for a Use Permit from the City to demolish a commercial building, a residential building with 7 dwelling units, and associated parking; merge two lots; and build an eight-story (92 foot) 80,000 square-foot residential building with 65 units (5 very low income and 2 low income).

This appeal is timely filed within fourteen (14) days of the City's November 3, 2025 mailing of the Notice of Decision, pursuant to Berkeley Municipal Code ("BMC") section 23.410.020. This appeal is accompanied by payment of the requisite fee of $3000.[2]

[1] City of Berkeley Zoning Adjustments Board Notice of Decision, 2298 Durant & 2360 Ellsworth, Date of Board Decision October 30, 2025, Date Notice Mailed November 3, 2025, Appeal Period Expiration November 17, 2025 ("Notice of Decision").

[2] Notice of Decision, page 4; BMC section 23.410.030.

In particular, this appeal pertains to the Applicant's requested "Concessions" under the California State Density Bonus Law, Cal. Gov. Code § 65915 *et. seq.* ("SDBL"), which are as follows:

1. Concession from "Healthcare coverage for construction workers" (BMC Section 13.107.040).

2. Concession from "Prevailing wage for construction workers" (BMC Section 13.108.030).

Item 1 above is part of the City's HARD HATS Ordinance, which was adopted on May 2, 2023 and became effective on January 1, 2024. Item 2 above is part of the City's Southside Plan, as amended and adopted in November of 2023. For the reasons that follow, the concessions requested by the Applicant are improper under the SDBL and City policy and should be denied.

I. The City Should Not Grant Concessions that Waive Local Labor Standards

The City should not grant concessions under the SDBL that waive local labor standards. The Applicant is pursuing a novel and unorthodox strategy of using SDBL concessions to avoid two construction labor standards, namely, the requirement to provide health care and the requirement to pay a living wage. Until very recently, the Trades Council and Carpenters were not aware of any project that had received similar concessions from the City (or any city). The requested concessions are an attempted misuse of the SDBL to avoid important labor standards that the City enacted to protect public health and safety.

On October 21, 2025, our office made a California Public Records Act request to the City seeking all records relating to whether the City has, at any time, granted any State Density Bonus concessions or waivers relating, in any way, to the City's HARD HATS Ordinance. The City responded that the only project that has received such concessions is the 2425 Durant project, which the Building Trades Council and the Carpenters appealed and will be heard by City Council on February 10, 2026.[3]

On November 7, 2025, our office made a California Public Records Act request to the City seeking all records relating to whether the City has, at any time, granted any State Density Bonus concessions or waivers relating, in any way, to the Prevailing Wage Requirements in Southside Plan Area. The City responded that the only projects that have received such concessions are the 2425 Durant project and this Project, which the Building Trades Council and the Carpenters are now appealing.[4]

Subsection 65915(d)(1) of the SDBL provides:

> (d)(1) An applicant for a density bonus pursuant to subdivision (b) may submit to a city, county, or city and county a proposal for the specific incentives or concessions that the applicant requests pursuant to this section, and may request a meeting with the city, county, or city and county. The city, county, or city and county shall grant the concession or incentive requested by the applicant unless the city, county, or city and county makes a written finding, based upon substantial evidence, of any of the following:
>
> > (A) The concession or incentive does not result in identifiable and actual cost reductions, consistent with subdivision (k), to provide for affordable housing costs, as defined in Section 50052.5 of the Health and Safety Code, or for rents for the targeted units to be set as specified in subdivision (c).

[3] The response received from the City of Berkeley Planning and Development Department is attached hereto.

[4] The response received from the City of Berkeley Planning and Development Department is attached hereto.

> (B) The concession or incentive would have a specific, adverse impact, as defined in paragraph (2) of subdivision (d) of Section 65589.5, upon public health and safety or on any real property that is listed in the California Register of Historical Resources and for which there is no feasible method to satisfactorily mitigate or avoid the specific, adverse impact without rendering the development unaffordable to low-income and moderate-income households.
>
> (C) The concession or incentive would be contrary to state or federal law.[5]

Subsection 65915(k) of the SDBL defines a "concession or incentive" as either (1) a reduction in site development standards or a modification of zoning code requirements or architectural design requirements that exceed the minimum building standards approved by the California Building Standards commission, for example, a reduction in setback and square footage requirements and in the ratio of vehicular parking spaces; (2) approval of mixed-use zoning; or (3) other regulatory incentives or concessions that result in identifiable and actual cost reductions to provide for affordable housing costs or for rents to be set at the statutory rate.[6] By providing these examples, the Legislature clearly contemplated that concessions under the SDBL should relate to the physical characteristics of the development such as the location, number of units, design, or site improvements, or other aspects of the development that would "result in identifiable and actual cost reductions" that would contribute to more affordable housing.

This is supported by the legislative intent of the SDBL, which is focused on allowing developers to include more total units in affordable housing projects than would otherwise be allowed by local zoning ordinances, and to cover some of the financing gap in affordable housing.[7] Notably, the Legislature also intended to "ensure that any additional benefits conferred upon a developer are balanced with the receipt of a public benefit in the form of adequate levels of affordable housing."[8] In other words, the Legislature was mindful of the need to balance housing density with social benefits.

The requested prevailing wage concession is doubly in conflict with the intent of the SDBL because, in addition to threatening the health and safety of construction workers, the concession would reduce their wages and make the very housing they are building less affordable to them. This outcome would be antithetical to the intent and policy of the SDBL, which is ultimately to make housing more affordable. Historically speaking, the SDBL waivers and concessions that have been granted by the City over the years have not posed this problem.

The SDBL should not be misused to allow developers to avoid minimum labor standards or other social benefits, especially where there has been no demonstration of an actual financial benefit that would result in more affordable housing.

II. The City Should Request Reasonable Documentation to Support the Concessions

The SDBL "does not prohibit a local government from requiring an applicant to provide reasonable documentation to establish eligibility for a requested density bonus."[9] This includes incentives or

[6] Cal. Gov. Code § 65915(k).
[7] Cal. Gov. Code § 65915(u)(1)
[8] Cal. Gov. Code § 65915(u)(2).
[9] Cal. Gov. Code § 65915(a)(2).

concessions.[10] Moreover, the local government is also tasked with "provid[ing] the applicant with a determination as to the following matters:

> (I) The amount of density bonus, calculated pursuant to subdivision (f), for which the applicant is eligible.
>
> (II) If the applicant requests a parking ratio pursuant to subdivision (p), the parking ratio for which the applicant is eligible.
>
> (II) If the applicant requests incentives or concessions pursuant to subdivision (d) or waivers or reductions of development standards pursuant to subdivision (e), whether the applicant has provided adequate information for the local government to make a determination as to those incentives, concessions, waivers, or reductions of development standards."[11]

In the case of *Schreiber v. City of Los Angeles* (*Schreiber*), the Court of Appeal recognized that "[a] city or county is not prohibited from requesting or considering information relevant to cost reductions."[12] This is the case even though the statute places the ultimate burden of proof on the local government.[13] Accordingly, the City can and should take the position that the Applicant has not yet provided adequate information for the City to make a determination as to its requested concessions, and require the Applicant to provide reasonable documentation in support of same.

Here, the Applicant has not provided any evidence or information whatsoever to substantiate its requested concessions. It simply included them in its application with no explanation.

The ZAB findings similarly do not provide any rationale whatsoever that would link the requested concessions to cost savings. Instead, the ZAB makes summary conclusions by referencing back to the law without any analysis or explanation.[14] Therefore, the Trades Council and Carpenters respectfully request that the City remand this matter to the ZAB to request reasonable documentation from the Applicant in support of the requested concessions, so the City can determine whether they should be granted.

III. The Requested Concessions Would Not Result In Identifiable and Actual Cost Reductions

The SDBL provides that when an applicant for a density bonus submits a proposal for specific incentives or concessions, the local government shall grant such incentives or concessions unless the local government makes a written finding based on substantial evidence that "the concession or incentive does not result in identifiable and actual cost reductions, consistent with subdivision (k), to provide for affordable housing costs…"[15]

---

[10] Cal. Gov. Code § 65915(b)(1).

[11] Cal. Gov. Code § 65915(i).

[12] *Schreiber*, 69 Cal.App.5th at 557.

[13] Cal. Gov. Code § 65915(d)(4); *Schreiber v. City of Los Angeles* (2021) 69 Cal.App.5th 549, 556-557 ("This subdivision does not prohibit a local government from requiring an applicant to provide reasonable documentation to establish eligibility for a requested density bonus, incentives or concessions, as described in subdivision (d), or waivers or reductions of development standards, as described in subdivision (e).")

[14] ZAB 2025-10-30 Findings, Page 3-4.

[15] Cal. Gov. Code § 65915(d)(1)(A).

As explained above, the Applicant has not provided any information at all regarding how the requested concessions would result in identifiable and actual cost reductions. Even though the law places the ultimate burden of proof on the City, the City may request information from the Applicant to make an initial *prima facie* showing of how the concessions would, in some way, actually save development costs and allow the Applicant to build more affordable housing. Here, given the importance of the labor standards in the HARD HATS Ordinance and the Southside Plan, the City should exercise this option.

IV. The Requested Concessions Would Have a Specific, Adverse Impact Upon Public Health and Safety

The SDBL also provides that when an applicant for a density bonus submits a proposal for specific incentives or concessions, the local government shall grant such incentives or concessions unless the local government makes a written finding based on substantial evidence that "the concession or incentive would have a specific, adverse impact, as defined in paragraph (2) of subdivision (d) of Section 65589.5, upon public health and safety… and for which there is no feasible method to satisfactorily mitigate or avoid the specific, adverse impact without rendering the development unaffordable to low-income and moderate-income households…"[16]

Working in construction is a particularly dangerous occupation. The construction industry is responsible for roughly 20% of all workplace fatalities in the U.S. despite employing only 10% of the U.S. workforce. Unfortunately, in recent years, there has been a disproportionately high number of construction worker fatalities in Berkeley specifically.[17]

This is, in large part, why the City of Berkeley adopted the HARD HATS ordinance requiring health care expenditures. Section 13.107.020 of the ordinance states that it was adopted to enhance the good health of construction workers working in the City, and to promote retention and growth of a skilled labor pool in the City. The staff report recommending adoption of the ordinance echoed these concerns.

Waiving the requirement to provide health care and the requirement to pay a living wage would therefore have a specific, adverse impact, as defined in paragraph (2) of subdivision (d) of Section 65589.5, upon public health and safety.

(a) Health Care:

The construction industry has one of the highest injury rates among all occupations due to the nature of the work, which involves manual labor, working at heights, and exposure to hazardous materials. According to the Bureau of Labor Statistics, the construction industry accounted for 1,008 fatal work injuries in 2020, the highest of any industry sector.[18]

Research underscores the additional dangers faced by workers without health coverage. A recent publication from the UC Berkeley Labor Center found that California construction workers were 2.6 times more likely

Code § 65915(d)(3) ("This subdivision shall not be interpreted to require a local government to grant an incentive or concession that has a specific, adverse impact, as defined in paragraph (2) of subdivision (d) of Section 65589.5, upon health or safety, and for which there is no feasible method to satisfactorily mitigate or avoid the specific, adverse impact.")

[17] See, https://www.berkeleyside.org/2019/06/17/family-files-wrongful-death-lawsuit-after-construction-worker-fatality-in-berkeley.

[18] See, https://www.bls.gov/opub/ted/2022/a-look-at-workplace-deaths-injuries-and-illnesses-on-workers-memorial-day.htm.

than other California workers to be uninsured, and that California construction workers and/or their dependents account for a disproportionately high percentage of spending on Medicaid/CHIP.[19] In addition, the Center for Construction Research & Training's analysis of nationwide data found that the high uninsured construction worker rate is driven by non-union-signatory employers.[20] Finally, a 2009 study conducted by Harvard Medical School and Cambridge Health Alliance found that uninsured, working-age Americans have a 40% higher risk of death compared to those with insurance.[21] For construction workers, whose jobs already involve elevated hazards, the absence of health coverage magnifies these risks.

This is precisely why the City of Berkeley adopted health care expenditure requirements in the HARD HATS Ordinance, to ensure that contractors in the City are not shirking their responsibility to address the health care needs of workers and their families. Allowing the Applicant to avoid this requirement would undermine the City's protective framework and place workers' health at greater risk.

(b) Prevailing Wages:

There is a robust statistical connection between wage rates – including living wage and prevailing wage rates – and job safety. In California, this is reflected in our "dual wage" workers compensation system, where higher-paid employees have a lower workers' compensation insurance rate than lower-paid employees. This is because higher-paid employees are less likely to produce adverse workers' compensation losses, because their superior training and experience results in safer job sites.

A 2019 study in the publication Public Works Management & Policy found that repealing state prevailing wage laws actually contributed to workplace hazards.[22] Doing so increased construction injury rates across various types of injuries, from 11.6% to 13.1% as the seriousness of injuries increased. Disabilities also increased by 7.5% to 8.2%.

By requiring prevailing wages to be paid in the Southside Plan, the City is promoting the use of a skilled, stable workforce – one less prone to accidents and workers' compensation claims. This not only protects workers but incentivizes responsible contractors who maintain high safety standards. Exempting the Project from the Southside Plan's prevailing wage requirement would directly undermine these protections.

For the reasons set forth in sections (a) and (b) above, allowing contractors working on the Project to avoid the City's health care expenditure and prevailing wage requirements would have a specific, adverse impact upon public health and safety, and the Applicant's request for these concessions should be denied.

V. Conclusion

The Trades Council and Carpenters respectfully request that City Council either reverse the ZAB decision approving the Use Permit with the proposed concessions, reverse the ZAB decision with respect to the proposed concessions but approve the remainder of the Use Permit, or remand the matter to the ZAB to reconsider the application in light of the foregoing.[23] Additionally, the Trades Council and Carpenters request that City Council direct staff to request supporting documentation from the Applicant and confer

City of Berkeley Public Records

A document has been released for record request #25-2530 along with the following message:

This is in response to your 10/20/2025 Public Records Act request for:
We request all records relating to whether the City has, at any time, granted any State Density Bonus concessions or waivers relating, in any way, to the City's HARD HATS Ordinance, codified at Chapter 13.107 of the Berkeley Municipal Code (passed May 2, 2023).
The only project that has received concessions for Hard Hats is 2425 Durant (ZP2024-0162).
Your request is granted. The City has completed its search for responsive documents and as a courtesy has attached them to this letter. With this response, staff have completed their work to process and respond to your Public Records Act request.
If you have any questions concerning your request, please feel free to contact me at [CONTACT INFORMATION]

1375 55th St
Emeryville, CA 94608

RE: 2298 Durant & 2360 Ellsworth Street – Appeal ZAB Decision Use Permit #ZP2024-0126

Dear Appellant:

This will acknowledge receipt of your appeal of the Zoning Adjustments Board decision of October 30, 2025 approving the following permits:

A Use Permit Public Hearing is required for the following permits:
1. **Demolition.** BMC Section 23.326.020(B) **"General Requirements"** to demolish a dwelling. *
2. **Demolition.** BMC Section 23.326.030(A)(3) **"Eliminating Dwelling Units through Demolition"** to demolish a building constructed before June 1980 on a property containing two or more dwelling units. *
3. **Demolition.** BMC Section 23.326.070(A) **"Main Non-Residential Building"** to demolish a non-residential building. *
4. **New Construction.** BMC Section 23.202.020 (A) **"Allowed Land Uses"** to construct a multi-family use.
5. **Height Projection** BMC Section 23.304.050 (A) "**Projections Above Height Limits"** exceed height limit with a rooftop projection.
6. **Fence** BMC Section 23.304.080(A) "**Permits Required**"
*Denotes required findings.

Density Bonus:

Waivers

- Provide 1,579 sq. ft. of Useable Open Space where 3,159 sq. ft. is required.
- Provide no landscaped Useable Open Space.
- Exceed the 85-foot height limit and permit a 92-foot building.
- Provide no long-term bicycle parking.
- Remove camphor tree on Durant Avenue.

Concessions

- Healthcare coverage for construction workers (BMC Section 13.107.050)
- Prevailing wage for construction workers (BMC Section 13.108.030)

Your appeal has been referred to the Planning Department.

The Planning Department will transmit to Council a statement setting forth the reasons for the Zoning Adjustments Board decision. This report, as well as a copy of the appeal, will appear on the Council agenda of **February 23, 2026**.

This meeting of the Council will commence at 6:00 p.m. and will be held in the School District Board Room located at 1231 Addison Street. The meeting will be conducted in a hybrid model with both in-person attendance and virtual participation. Once posted, the agenda for this meeting will include a link for public participation using Zoom video technology.

Pursuant to the City Council Rules of Procedure, this appeal will appear on the City Council's agenda as a public hearing. Time shall be provided for five-minute presentations each by the appellant and applicant. Where the appellant is not the applicant, the appellants collectively shall have five minutes to comment and the applicant shall have five minutes to comment. Where the appellant is the applicant, the applicant/appellant shall have five minutes to comment and the persons supporting the action of the board or commission on appeal shall have five minutes to comment.

After the conclusion of the five-minute comment periods, members of the public may comment on the appeal pursuant to the Rules of Procedure in effect for the Council meeting.

The Council will then deliberate and determine to do one of three things: 1) continue the public hearing; 2) based on the record of the Council's consideration and hearing, reverse or affirm, wholly or partly, or modify any decision, determination, condition or requirement of the Board's original action; or 3) remand the matter to the Board to reconsider the application, or any revisions thereto submitted after the Board's action.

Communications to the City Council that are received by the City Clerk pursuant to the following deadlines will be accepted and distributed as follows:

Submission Deadline	Distributed	Packet
February 9, 2026, by 5:00 p.m. (Monday)	Twelve days before the meeting (Wednesday)	Agenda Packet
February 17, 2026, by 5:00 p.m. (Tuesday)	Four days before the meeting (Thursday)	Supplemental 1
February 23, 2026, 12:00 p.m. (Monday)	By 5:00 pm the day of the meeting (Monday)	Supplemental 2

Communications should be submitted directly to the City Clerk to ensure receipt by all Councilmembers. Electronic communications may be submitted to council@berkeleyca.gov for immediate distribution to the Mayor, each City Councilmember, and the City Clerk for inclusion in the official record. Please note that for communications submitted in hardcopy, if the communication includes maps or photos or any other material not reproducible on a copy machine, fifteen copies should be provided to the City Clerk.

During the five-minute presentations each by the appellant and applicant, electronic presentations are permissible by the appellant, applicant, or their respective designees. To present materials electronically (such as a PowerPoint or PDF presentation), the presenter must join the Zoom meeting using the public link on the meeting agenda. Public Wi-Fi is available at the meeting location. All meeting audio is processed through the audio-visual system in the meeting room (the microphone and speakers on the presentation device must be muted). At the designated time, City staff will promote the presenter to a Panelist, which will allow them to share their screen within Zoom to show the presentation. Please note that due to the technological demands of running the Council meeting, City staff are unable to facilitate electronic presentations on behalf of individuals.

Please note that Berkeley's Lobbyist Registration Act (Berkeley Municipal Code Chapter 2.09) is effective beginning on January 1, 2020. Information and resources regarding the Lobbyist Registration Act are available from the City's website at: https://berkeleyca.gov/your-government/lobbyist-registration

If you have any additional questions regarding this matter, please do not hesitate to contact me at (510) 981-6908.

A copy of the staff report and a City Council agenda will be available from this office upon request after 4:00 p.m. on Wednesday, February 11, 2026 or can be viewed on our website at: berkeleyca.gov/council-agendas.

Sincerely,

Mark Numainville
City Clerk
