Title Description Comments:

Notification of Site Redevelopment and Report for Additional Remedial Work. Per the March 5, 2015, letter by Lennar, additional soil, soil vapor sampling and soil excavation was done voluntarily at the 2598 Shattuck site in 2014. Residential apartments will be constructed on 2598- 2600 Shattuck Avenue. The owner intends to voluntarily install a vapor mitigation system in the apartment complex as a precautionary measure and a soil management plan will be developed to specify protocols for safe handling of residual contaminants in order to protect construction workers during excavation and dewatering.

Calenviroscreen 3 Score: 41-45%
Calenviroscreen 4 Score: 35-40%
File Location: Regional Board
Site History:

Berkeley Repertory Theater (BRT) plans to expand its current facility at 2025 Addison Street in Berkeley, California, by purchasing and developing the adjacent property to the west. The property is currently owned by Williamson Properties, and consists of three contiguous parcels that have been vacated by their previous tenants. The businesses that most recently occupied the parcels included a car repair shop, a glass company, and an auto body shop.

Site History:

Alameda County Department of Environmental Health (ACDEH) has been providing regulatory environmental oversight for the investigation and cleanup activities associated with Cleanup Site Program Case No. RO0003411 since February 2020 subsequent to referral by the City of Berkeley Planning and Building Department. To redevelop the Site, environmental investigations are required to evaluate impacts to the subsurface from historic land use and develop corrective actions to reduce potential risk to construction workers, the surrounding community, and occupants of the new development. Subsurface investigations have been conducted to evaluate historical operations at the Site including but not limited to residential dwellings and various commercial configurations such as automobile service and repair operations with associated former underground storage tanks, dry cleaning facilities and a fire station. Results of these subsurface investigations has identified chemicals of concern (COCs) in environmental media (soil and soil vapor). To address this contamination prior to development, proposed corrective actions include remedial soil excavation and off-Site disposal of impacted soil at a permitted disposal facility; and installation of vapor mitigation engineering controls to control potential vapor intrusion to indoor air of the proposed development and migration along new utility corridors. Proposed redevelopment of the Site includes a 6-story Lat-grade residential building with two elevators, a sump pump, and an outdoor courtyard compressed of landscaping and hardscaping. The 0.82-acre Site is currently operating as a City of Berkeley owned public parking lot located at 2012 Berkeley Way in Berkeley, Alameda County, California. The Site is located in the North Berkeley neighborhood, in a mixed commercial and residential area, and east of the intersection between Berkeley Way and Milvia Street. Properties in the Site vicinity include single-family homes, multi-family apartments, commercial buildings, and the University of California, Berkeley campus. Historically the Site was used for residential dwellings prior to 1958. Historical uses of adjacent or adjoining properties included dry cleaners, automotive repair, tire shop, and fire station with underground storage tanks (USTs). Redevelopment of the Site is scheduled to commence in April 2020 and includes a six-floor, slab-on-grade, multi-residence building with two elevators, a sump pump, and an outdoor courtyard comprised of landscaping and hardscaping. Multiple site investigations have been conducted in October 2018, and June, August, and October 2019 which included the assessment of soil and soil gas in the subsurface beneath the Site. Results of these subsurface investigations have identified residual impact from lead in soil at several select locations at the Site exceeding applicable San Francisco Bay Regional Water Quality Control Board (SFBRWQCB) Tier 1 Environmental Screening

Map Key	Number of Records	Direction	Distance (mi/ft)	Elev/Diff (ft)	Site	DB

Levels (ESLs). The presence of lead in soil is likely associated with the demolition of the former on-Site structures (that based on their age may likely have a history of lead-based paints), and/or from aerially-deposited lead (ADL) associated with the former use of leaded gasoline in vehicles and nearby roadways. A Fact Sheet and invitation for public comment regarding environmental assessments conducted at the Site was distributed by ACDEH to the surrounding community on February 11, 2020. A public meeting was also conducted at the Berkeley public library on February 20, 2020. No participants from the general public attended the meeting. Additionally subsurface data gap assessment (DGA) investigations were conducted in late February 2020 to evaluate potential soil impacts from previously unassessed constituents, including polynuclear aromatic hydrocarbons (PAHs), polychlorinated biphenyls (PCBs), and asbestos which may have been associated with the historical structures identified onsite. Additional soil vapor samples were also advanced to further assess the potential for elevated soil vapor beneath the site. Shallow soil results indicated lead was detected in all analyzed samples at concentrations ranging from 2.5 micrograms per kilogram (mg/kg) to 94 mg/kg; however, the Residential ESL was only exceeded in one sample (RB•]14 at 1 foot below ground surface [bgs]). PCBs and asbestos was not detected in soil. Based on the results of the DGA investigation a corrective action plan (CAP) was submitted to ACDEH for review on March 26, 2020. Remedial and corrective actions presented in the CAP include remedial excavation of lead impacted soil via targeted remedial excavations prior to planned grading activities.

Cleanup Oversight Agencies: ALAMEDA COUNTY LOP (LEAD) - CASE #: RO0003411
CASEWORKER: DREW YORK

Cleanup History Link: https://geotracker.waterboards.ca.gov/profile_report_include?global_id=T10000013971&tabname=regulatoryhistory

Site History:

Alameda County Department of Environmental Health (ACDEH) has been providing regulatory environmental oversight for the investigation and cleanup activities associated with Cleanup Site Program Case No. RO0003411 since February 2020 subsequent to referral by the City of Berkeley Planning and Building Department. To redevelop the Site, environmental investigations are required to evaluate impacts to the subsurface from historic land use and develop corrective actions to reduce potential risk to construction workers, the surrounding community, and occupants of the new development. Subsurface investigations have been conducted to evaluate historical operations at the Site including but not limited to residential dwellings and various commercial configurations such as automobile service and repair operations with associated former underground storage tanks, dry cleaning facilities and a fire station. Results of these subsurface investigations has identified chemicals of concern (COCs) in environmental media (soil and soil vapor). To address this contamination prior to development, proposed corrective actions include remedial soil excavation and off-Site disposal of impacted soil at a permitted disposal facility; and installation of vapor mitigation engineering controls to control potential vapor intrusion to indoor air of the proposed development and migration along new utility corridors. Proposed redevelopment of the Site includes a 6-story Lat-grade residential building with two elevators, a sump pump, and an outdoor courtyard compressed of landscaping and hardscaping.

The 0.82-acre Site is currently operating as a City of Berkeley owned public parking lot located at 2012 Berkeley Way in Berkeley, Alameda County, California. The Site is located in the North Berkeley neighborhood, in a mixed commercial and residential area, and east of the intersection between Berkeley Way and Milvia Street. Properties in the Site vicinity include single-family homes, multi-family apartments, commercial buildings, and the University of California, Berkeley campus. Historically the Site was used for residential dwellings prior to 1958.

Historical uses of adjacent or adjoining properties included dry cleaners, automotive repair, tire shop, and fire station with underground storage tanks (USTs).

Redevelopment of the Site is scheduled to commence in April 2020 and includes a six-floor, slab-on-grade, multi-residence building with two elevators, a sump pump, and an outdoor courtyard comprised of landscaping and hardscaping.

Multiple site investigations have been conducted in October 2018, and June, August, and October 2019 which included the assessment of soil and soil gas in the subsurface beneath the Site. Results of these subsurface investigations have identified residual impact from lead in soil at several select locations at the Site exceeding applicable San Francisco Bay Regional Water Quality Control Board (SFBRWQCB) Tier 1 Environmental Screening Levels (ESLs). The presence of lead in soil is likely associated with the demolition of the former on-Site structures (that based on their age may likely have a history of lead-based paints), and/or from aerially-deposited lead (ADL) associated with the former use of leaded gasoline in vehicles and nearby roadways.

A Fact Sheet and invitation for public comment regarding environmental assessments conducted at the Site was distributed by ACDEH to the surrounding community on February 11, 2020. A public meeting was also conducted at the Berkeley public library on February 20, 2020. No participants from the general public attended the meeting.

Additionally subsurface data gap assessment (DGA) investigations were conducted in late February 2020 to evaluate potential soil impacts from previously unassessed constituents, including polynuclear aromatic hydrocarbons (PAHs), polychlorinated biphenyls (PCBs), and asbestos which may have been associated with the historical structures identified onsite. Additional soil vapor samples were also advanced to further assess the potential for elevated soil vapor beneath the site. Shallow soil results indicated lead was detected in all analyzed samples at concentrations ranging from 2.5 micrograms per kilogram (mg/kg) to 94 mg/kg; however, the Residential ESL was only exceeded in one sample (RB□]14 at 1 foot below ground surface [bgs]). PCBs and asbestos was not detected in soil.

Based on the results of the DGA investigation a corrective action plan (CAP) was submitted to ACDEH for review on March 26, 2020. Remedial and corrective actions presented in the CAP include remedial excavation of lead impacted soil via targeted remedial excavations prior to planned grading activities.

Title Link:
Area Name:
Area Link:
Sub Area:
Sub Area Link:

Map Key	Number of Records	Direction	Distance (mi/ft)	Elev/Diff (ft)	Site	DB

Document Type: Correspondence
Date Completed: 10/21/2020
Comments: Call with Water Board (Chani Hutto) and proponent (Greg McIver, RMD) to discuss the possible SCAP Grant for Virginia Cleaners. The Water Board says that the most likely date for Virginia Cleaners to receive the funding is February 2022. Following the meeting, the DTSC PM reviewed the proponent's draft SCAP Grant Scope of Work and sent comments on it to the proponent on October 21, 2020.

Handler Summary

Importer Activity: No
Mixed Waste Generator: No
Transporter Activity: Yes
Transfer Facility: No
Onsite Burner: No
Smelting, Melting and Refining: No
Underground Injection Control: No
Commercial TSD: No
Used Oil Transporter: No
Used Oil Transfer Facility: No
Used Oil Processor: No
Used Oil Refiner: No
Used Oil Burner: No
Used Oil Market Burner: No
Used Oil Spec Marketer: No

Hazardous Waste Handler Details

Sequence No: 8
Receive Date: 20040220
Handler Name: LAWRENCE BERKELEY NATIONAL LABORATORY
Federal Waste Generator Code: 1
Generator Code Description: Large Quantity Generator
Source Type: Annual/Biennial Report

Waste Code Details

Hazardous Waste Code: F001
Waste Code Description: THE FOLLOWING SPENT HALOGENATED SOLVENTS USED IN DEGREASING: TETRACHLOROETHYLENE, TRICHLORETHYLENE, METHYLENE CHLORIDE, 1,1,1-TRICHLOROETHANE, CARBON TETRACHLORIDE AND CHLORINATED FLUOROCARBONS; ALL SPENT SOLVENT MIXTURES/BLENDS USED IN DEGREASING CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Hazardous Waste Code: D043
Waste Code Description: VINYL CHLORIDE

Hazardous Waste Code: D040
Waste Code Description: TRICHLORETHYLENE

Hazardous Waste Code: D039
Waste Code Description: TETRACHLOROETHYLENE

Hazardous Waste Code: D030
Waste Code Description: 2,4-DINITROTOLUENE

Hazardous Waste Code: D022
Waste Code Description: CHLOROFORM

Hazardous Waste Code: D018
Waste Code Description: BENZENE

Hazardous Waste Code: D011
Waste Code Description: SILVER

Hazardous Waste Code: D009
Waste Code Description: MERCURY

Map Key	Number of Records	Direction	Distance (mi/ft)	Elev/Diff (ft)	Site	DB

Hazardous Waste Code: D007
Waste Code Description: CHROMIUM

Hazardous Waste Code: D005
Waste Code Description: BARIUM

Hazardous Waste Code: D003
Waste Code Description: REACTIVE WASTE

Hazardous Waste Code: D001
Waste Code Description: IGNITABLE WASTE

Hazardous Waste Code: F003
Waste Code Description: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NONHALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS, AND A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Hazardous Waste Code: F006
Waste Code Description: WASTEWATER TREATMENT SLUDGES FROM ELECTROPLATING OPERATIONS, EXCEPT FROM THE FOLLOWING PROCESSES: (1) SULFURIC ACID ANODIZING OF ALUMINUM; (2) TIN PLATING ON CARBON STEEL; (3) ZINC PLATING (SEGREGATED BASIS) ON CARBON STEEL; (4) ALUMINUM OR ZINC-ALUMINUM PLATING ON CARBON STEEL; (5) CLEANING/STRIPPING ASSOCIATED WITH TIN, ZINC, AND ALUMINUM PLATING ON CARBON STEEL; AND (6) CHEMICAL ETCHING AND MILLING OF ALUMINUM.

Hazardous Waste Code: P030
Waste Code Description: CYANIDES (SOLUBLE CYANIDE SALTS), NOT OTHERWISE SPECIFIED

Hazardous Waste Code: P105
Waste Code Description: SODIUM AZIDE

Hazardous Waste Code: U002
Waste Code Description: 2-PROPANONE (I) (OR) ACETONE (I)

Hazardous Waste Code: U006
Waste Code Description: ACETYL CHLORIDE (C,R,T)

Hazardous Waste Code: U012
Waste Code Description: ANILINE (I,T) (OR) BENZENAMINE (I,T)

Hazardous Waste Code: U041
Waste Code Description: EPICHLOROHYDRIN (OR) OXIRANE, (CHLOROMETHYL)-

Hazardous Waste Code: U052
Waste Code Description: CRESOL (CRESYLIC ACID) (OR) PHENOL, METHYL-

Hazardous Waste Code: U080
Waste Code Description: METHANE, DICHLORO- (OR) METHYLENE CHLORIDE

Hazardous Waste Code: U121
Waste Code Description: METHANE, TRICHLOROFLUORO- (OR) TRICHLOROMONOFLUOROMETHANE

Hazardous Waste Code: U123
Waste Code Description: FORMIC ACID (C,T)

Hazardous Waste Code: U134
Waste Code Description: HYDROFLUORIC ACID (C,T) (OR) HYDROGEN FLUORIDE (C,T)

Hazardous Waste Code: U138
Waste Code Description: METHANE, IODO- (OR) METHYL IODIDE

Hazardous Waste Code: U147
Waste Code Description: 2,5-FURANDIONE (OR) MALEIC ANHYDRIDE

Hazardous Waste Code: U154

Waste Code Description: TRICHLORETHYLENE

Hazardous Waste Code: F003
Waste Code Description: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NONHALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS, AND A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Hazardous Waste Code: F006
Waste Code Description: WASTEWATER TREATMENT SLUDGES FROM ELECTROPLATING OPERATIONS, EXCEPT FROM THE FOLLOWING PROCESSES: (1) SULFURIC ACID ANODIZING OF ALUMINUM; (2) TIN PLATING ON CARBON STEEL; (3) ZINC PLATING (SEGREGATED BASIS) ON CARBON STEEL; (4) ALUMINUM OR ZINC-ALUMINUM PLATING ON CARBON STEEL; (5) CLEANING/STRIPPING ASSOCIATED WITH TIN, ZINC, AND ALUMINUM PLATING ON CARBON STEEL; AND (6) CHEMICAL ETCHING AND MILLING OF ALUMINUM.

Hazardous Waste Code: P012
Waste Code Description: ARSENIC OXIDE AS2O3 (OR) ARSENIC TRIOXIDE

Hazardous Waste Code: P030
Waste Code Description: CYANIDES (SOLUBLE CYANIDE SALTS), NOT OTHERWISE SPECIFIED

Hazardous Waste Code: P105
Waste Code Description: SODIUM AZIDE

Hazardous Waste Code: P120
Waste Code Description: VANADIUM OXIDE V2O5 (OR) VANADIUM PENTOXIDE

Hazardous Waste Code: U002
Waste Code Description: 2-PROPANONE (I) (OR) ACETONE (I)

Hazardous Waste Code: U009
Waste Code Description: 2-PROPENENITRILE (OR) ACRYLONITRILE

Hazardous Waste Code: U012
Waste Code Description: ANILINE (I,T) (OR) BENZENAMINE (I,T)

Hazardous Waste Code: U021
Waste Code Description: [1,1'-BIPHENYL]-4,4'-DIAMINE (OR) BENZIDINE

Hazardous Waste Code: U031
Waste Code Description: 1-BUTANOL (I) (OR) N-BUTYL ALCOHOL (I)

Hazardous Waste Code: U044
Waste Code Description: CHLOROFORM (OR) METHANE, TRICHLORO-

Hazardous Waste Code: U057
Waste Code Description: CYCLOHEXANONE (I)

Hazardous Waste Code: U117
Waste Code Description: ETHANE, 1,1'-OXYBIS-(I) (OR) ETHYL ETHER (I)

Hazardous Waste Code: U134
Waste Code Description: HYDROFLUORIC ACID (C,T) (OR) HYDROGEN FLUORIDE (C,T)

Hazardous Waste Code: U154
Waste Code Description: METHANOL (I) (OR) METHYL ALCOHOL (I)

Hazardous Waste Code: U161
Waste Code Description: 4-METHYL-2-PENTANONE (I) (OR) METHYL ISOBUTYL KETONE (I) (OR) PENTANOL, 4-METHYL-

Waste Code Details

Hazardous Waste Code: 121
Waste Code Description: Alkaline solution (pH >12.5) with metals (antimony, arsenic, barium, beryllium, cadmium, chromium, cobalt, copper, lead, mercury, molybdenum, nickel, selenium, silver, thallium, vanadium, and zinc)

Hazardous Waste Code: 131
Waste Code Description: Aqueous solution (2 < pH < 12.5) containing reactive anions (azide, bromate, chlorate, cyanide, fluoride, hypochlorite, nitrite, perchlorate, and sulfide anions)

Hazardous Waste Code: 133
Waste Code Description: Aqueous solution with 10% or more total organic residues

Hazardous Waste Code: 135
Waste Code Description: Unspecified aqueous solution

Hazardous Waste Code: 151
Waste Code Description: Asbestos-containing waste

Hazardous Waste Code: 211
Waste Code Description: Halogenated solvents (chloroform, methyl chloride, perchloroethylene, etc.)

Hazardous Waste Code: 214
Waste Code Description: Unspecified solvent mixture

Hazardous Waste Code: 221
Waste Code Description: Waste oil and mixed oil

Hazardous Waste Code: 261
Waste Code Description: Polychlorinated biphenyls and material containing PCB's

Hazardous Waste Code: 343
Waste Code Description: Unspecified organic liquid mixture

Hazardous Waste Code: 491
Waste Code Description: Unspecified sludge waste

Hazardous Waste Code: 513
Waste Code Description: Empty containers less than 30 gallons

Hazardous Waste Code: 541
Waste Code Description: Photochemicals / photo processing waste

Waste Code Description:	Liquids with lead > 500 mg/l
Hazardous Waste Code:	551
Waste Code Description:	Laboratory waste chemicals
Hazardous Waste Code:	513
Waste Code Description:	Empty containers less than 30 gallons
Hazardous Waste Code:	352
Waste Code Description:	Other organic solids
Hazardous Waste Code:	331
Waste Code Description:	Off-specification, aged, or surplus organics
Hazardous Waste Code:	223
Waste Code Description:	Unspecified oil-containing waste
Hazardous Waste Code:	212
Waste Code Description:	Oxygenated solvents (acetone, butanol, ethyl acetate, etc.)
Hazardous Waste Code:	171
Waste Code Description:	Metal sludge (see 121)
Hazardous Waste Code:	141
Waste Code Description:	Off-specification, aged, or surplus inorganics
Hazardous Waste Code:	135
Waste Code Description:	Unspecified aqueous solution
Hazardous Waste Code:	132
Waste Code Description:	Aqueous solution w/metals (< restricted levels and see waste code 121 for a list of metals)
Hazardous Waste Code:	123
Waste Code Description:	Unspecified alkaline solution
Hazardous Waste Code:	121
Waste Code Description:	Alkaline solution (pH >12.5) with metals (antimony, arsenic, barium, beryllium, cadmium, chromium, cobalt, copper, lead, mercury, molybdenum, nickel, selenium, silver, thallium, vanadium, and zinc)
Hazardous Waste Code:	U117
Waste Code Description:	ETHANE, 1,1'-OXYBIS-(I) (OR) ETHYL ETHER (I)
Hazardous Waste Code:	U122
Waste Code Description:	FORMALDEHYDE
Hazardous Waste Code:	U133
Waste Code Description:	HYDRAZINE (R,T)
Hazardous Waste Code:	U138
Waste Code Description:	METHANE, IODO- (OR) METHYL IODIDE
Hazardous Waste Code:	U144
Waste Code Description:	ACETIC ACID, LEAD(2+) SALT (OR) LEAD ACETATE
Hazardous Waste Code:	U161
Waste Code Description:	4-METHYL-2-PENTANONE (I) (OR) METHYL ISOBUTYL KETONE (I) (OR) PENTANOL, 4-METHYL-
Hazardous Waste Code:	U197
Waste Code Description:	2,5-CYCLOHEXADIENE-1,4-DIONE (OR) P-BENZOQUINONE
Hazardous Waste Code:	U213
Waste Code Description:	FURAN, TETRAHYDRO-(I) (OR) TETRAHYDROFURAN (I)

Hazardous Waste Code: U246
Waste Code Description: CYANOGEN BROMIDE (CN)BR

Hazardous Waste Code: U080
Waste Code Description: METHANE, DICHLORO- (OR) METHYLENE CHLORIDE

Hazardous Waste Code: U070
Waste Code Description: BENZENE, 1,2-DICHLORO- (OR) O-DICHLOROBENZENE

Hazardous Waste Code: U044
Waste Code Description: CHLOROFORM (OR) METHANE, TRICHLORO-

Hazardous Waste Code: U012
Waste Code Description: ANILINE (I,T) (OR) BENZENAMINE (I,T)

Hazardous Waste Code: U003
Waste Code Description: ACETONITRILE (I,T)

Hazardous Waste Code: P105
Waste Code Description: SODIUM AZIDE

Hazardous Waste Code: P087
Waste Code Description: OSMIUM OXIDE OSO4, (T-4)- (OR) OSMIUM TETROXIDE

Hazardous Waste Code: P023
Waste Code Description: ACETALDEHYDE, CHLORO- (OR) CHLOROACETALDEHYDE

Hazardous Waste Code: P005
Waste Code Description: 2-PROPEN-1-OL (OR) ALLYL ALCOHOL

Hazardous Waste Code: F005
Waste Code Description: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE, 2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, OR F004; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Hazardous Waste Code: F003
Waste Code Description: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NONHALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS, AND A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Hazardous Waste Code: D043
Waste Code Description: VINYL CHLORIDE

Hazardous Waste Code: U123
Waste Code Description: FORMIC ACID (C,T)

Hazardous Waste Code: U134
Waste Code Description: HYDROFLUORIC ACID (C,T) (OR) HYDROGEN FLUORIDE (C,T)

Hazardous Waste Code: U151
Waste Code Description: MERCURY

Hazardous Waste Code: U165
Waste Code Description: NAPHTHALENE

Hazardous Waste Code: U205
Waste Code Description: SELENIUM SULFIDE (OR) SELENIUM SULFIDE SES2 (R,T)

Hazardous Waste Code: U215
Waste Code Description: CARBONIC ACID, DITHALLIUM(1+) SALT (OR) THALLIUM(I) CARBONATE

Map Key	Number of Records	Direction	Distance (mi/ft)	Elev/Diff (ft)	Site	DB

Waste Code Description: CRESOL

Hazardous Waste Code: D021
Waste Code Description: CHLOROBENZENE

Hazardous Waste Code: D019
Waste Code Description: CARBON TETRACHLORIDE

Hazardous Waste Code: D011
Waste Code Description: SILVER

Hazardous Waste Code: D009
Waste Code Description: MERCURY

Hazardous Waste Code: D007
Waste Code Description: CHROMIUM

Hazardous Waste Code: D005
Waste Code Description: BARIUM

Hazardous Waste Code: D002
Waste Code Description: CORROSIVE WASTE

Hazardous Waste Code: 792
Waste Code Description: Liquids with pH < 2 with metals

Hazardous Waste Code: 751
Waste Code Description: Solids or sludge with halogenated organic comp. > 1000 mg/kg

Hazardous Waste Code: 726
Waste Code Description: Liquids with nickel > 134 mg/l

Hazardous Waste Code: 721
Waste Code Description: Liquids with arsenic > 500 mg/l

Hazardous Waste Code: 551
Waste Code Description: Laboratory waste chemicals

Hazardous Waste Code: 512
Waste Code Description: Other empty containers 30 gallons or more

Hazardous Waste Code: 351
Waste Code Description: Organic solids with halogens

Hazardous Waste Code: 331
Waste Code Description: Off-specification, aged, or surplus organics

Map Key	Number of Records	Direction	Distance (mi/ft)	Elev/Diff (ft)	Site	DB

Hazardous Waste Code: 272
Waste Code Description: Polymeric resin waste

Hazardous Waste Code: 221
Waste Code Description: Waste oil and mixed oil

Hazardous Waste Code: 213
Waste Code Description: Hydrocarbon solvents (benzene, hexane, Stoddard, etc.)

Hazardous Waste Code: 151
Waste Code Description: Asbestos-containing waste

Hazardous Waste Code: 135
Waste Code Description: Unspecified aqueous solution

Hazardous Waste Code: 132
Waste Code Description: Aqueous solution w/metals (< restricted levels and see waste code 121 for a list of metals)

Waste Code Details

Hazardous Waste Code: D001
Waste Code Description: IGNITABLE WASTE

Hazardous Waste Code: U003
Waste Code Description: ACETONITRILE (I,T)

Hazardous Waste Code: P120
Waste Code Description: VANADIUM OXIDE V2O5 (OR) VANADIUM PENTOXIDE

Hazardous Waste Code: P105
Waste Code Description: SODIUM AZIDE

Hazardous Waste Code: P098
Waste Code Description: POTASSIUM CYANIDE (OR) POTASSIUM CYANIDE K(CN)

Hazardous Waste Code: P087
Waste Code Description: OSMIUM OXIDE OSO4, (T-4)- (OR) OSMIUM TETROXIDE

Map Key	Number of Records	Direction	Distance (mi/ft)	Elev/Diff (ft)	Site	DB

Hazardous Waste Code: P081
Waste Code Description: 1,2,3-PROPANETRIOL, TRINITRATE (R) (OR) NITROGLYCERINE (R)

Hazardous Waste Code: P075
Waste Code Description: NICOTINE, & SALTS (OR) PYRIDINE, 3-(1-METHYL-2-PYRROLIDINYL)-,(S)-, & SALTS

Hazardous Waste Code: P043
Waste Code Description: DIISOPROPYLFLUOROPHOSPHATE (DFP) (OR) PHOSPHOROFLUORIDIC ACID, BIS(1-METHYLETHYL) ESTER

Hazardous Waste Code: P030
Waste Code Description: CYANIDES (SOLUBLE CYANIDE SALTS), NOT OTHERWISE SPECIFIED

Hazardous Waste Code: P012
Waste Code Description: ARSENIC OXIDE AS2O3 (OR) ARSENIC TRIOXIDE

Hazardous Waste Code: P011
Waste Code Description: ARSENIC OXIDE AS2O5 (OR) ARSENIC PENTOXIDE

Hazardous Waste Code: P005
Waste Code Description: 2-PROPEN-1-OL (OR) ALLYL ALCOHOL

Hazardous Waste Code: LABP
Waste Code Description: LAB PACK

Hazardous Waste Code: F006
Waste Code Description: WASTEWATER TREATMENT SLUDGES FROM ELECTROPLATING OPERATIONS, EXCEPT FROM THE FOLLOWING PROCESSES: (1) SULFURIC ACID ANODIZING OF ALUMINUM; (2) TIN PLATING ON CARBON STEEL; (3) ZINC PLATING (SEGREGATED BASIS) ON CARBON STEEL; (4) ALUMINUM OR ZINC-ALUMINUM PLATING ON CARBON STEEL; (5) CLEANING/STRIPPING ASSOCIATED WITH TIN, ZINC, AND ALUMINUM PLATING ON CARBON STEEL; AND (6) CHEMICAL ETCHING AND MILLING OF ALUMINUM.

Hazardous Waste Code: F005
Waste Code Description: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE, 2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, OR F004; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Hazardous Waste Code: F003
Waste Code Description: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NONHALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS, AND A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Hazardous Waste Code: F002
Waste Code Description: THE FOLLOWING SPENT HALOGENATED SOLVENTS: TETRACHLOROETHYLENE, METHYLENE CHLORIDE, TRICHLOROETHYLENE, 1,1,1-TRICHLOROETHANE, CHLOROBENZENE, 1,1,2-TRICHLORO-1,2,2-TRIFLUOROETHANE, ORTHO-DICHLOROBENZENE, TRICHLOROFLUOROMETHANE, AND 1,1,2, TRICHLOROETHANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

QUARTERLY UPDATE
Quarterly Update Period: October to December 2022

Permit Renewal: The Facility submitted a renewal application on June 17, 2016. DTSC is reviewing the permit renewal application for technical completeness. DTSC issued a Notice of Deficiency on January 18, 2018. DTSC received the response to the Notice of Deficiency and revised application on July 5, 2018, and the final revised application on December 16, 2022. When the review is complete DTSC will make its decision on the application available for public review and comment.

FACILITY DESCRIPTION/HISTORY

The Lawrence Berkeley National Laboratory (LBNL) facility is located at 1 Cyclotron Road in the City of Berkeley, California on 202 acres of University of California (UC) Berkeley "Hill Campus" property in the Berkeley/Oakland Hills. The Facility is owned by the U.S. Department of Energy (DOE) and operated by UC. LBNL is a multiprogram science lab in the national laboratory system supported by DOE. The Facility was established in 1940 at its present location with the start of construction of UC Berkeley physics professor Ernest Lawrence's 184-inch cyclotron (Building 6 in the Old Town Area, now the Advanced Light Source synchrotron facility). LBNL conducts unclassified research in energy sciences, general sciences, and the life sciences.

PERMITTING REGULATORY DESCRIPTION/HISTORY

The DTSC-permitted facility, the Hazardous Waste Handling facility (HWHF), is situated in the eastern portion of LBNL at Building 85 and its associated yard area. LBNL conducts the following operations at the HWHF: storage of hazardous and mixed waste in containers, consolidation of compatible wastes into U.S. Department of Transportation-compliant containers, lab-packing, and treatment of waste. LBNL then ships the hazardous and mixed wastes off-site for treatment, disposal, or recycling.

The Facility was granted an Interim Status Document effective March 31,1981 for the existing hazardous waste management facility, now known as the former HWHF located in the central portion of the Facility at Building 69 and Building 75 and its associated yard area. The Facility was converted from Interim status to permitted status when LBNL was issued a hazardous waste facility permit effective November 7, 1983 for consolidation and storage operations at the former HWHF.

In 1987, the Facility submitted a timely permit renewal application and DTSC issued the first permit renewal May 4, 1993 for hazardous and mixed waste treatment and storage operations at the former HWHF with Building 75A and its associated yard area added. The 1993 permit included a corrective action schedule of compliance and authorized construction and operation of the current HWHF (Building 85 and its associated yard area). In April 1997, LBNL ceased operations at the former HWHF and began operations at the current HWHF. In 1998, LBNL completed closure of the former HWHF in accordance with the approved closure plan.

In 2002, LBNL submitted a timely permit renewal application and DTSC issued the second permit renewal in 2006 for ongoing hazardous and mixed waste treatment and storage operations at the HWHF. The 2006 permit included a summary of the corrective action activities completed to date, which included DTSC approval of the Corrective Measures Implementation Plan. See the "Corrective Action" tab above for more information on the corrective action activities completed to address past releases of hazardous wastes or constituents at the Facility. The 2006 permit was appealed, the appeal was subsequently denied, and and the permit became effective July 31, 2007. Since then, permit modifications have been incorporated periodically to update the 2006 permit and the permit application.

The Facility operates the following permitted units at the HWHF: 13 hazardous waste storage areas (total maximum capacity 14,950 gallons), 7 mixed waste storage areas (total maximum capacity 8,250 gallons), and 4 treatment units (respective maximum capacities 96, 440, 72, and 550 gallons per day).

The Facility is currently operating under the modified 2006 permit effective through December 21, 2016. Because LBNL submitted a timely renewal application (at least 180 days prior to permit expiration), state and federal law allows LBNL to continue to operate under the terms of the modified 2006 permit until DTSC makes a final decision on LBNL's renewal application.

Appendix: Database Descriptions

Environmental Risk Information Services (ERIS) can search the following databases. The extent of historical information varies with each database and current information is determined by what is publicly available to ERIS at the time of update. ERIS updates databases as set out in ASTM Standard E1527-13 and E1527-21, Section 8.1.8 Sources of Standard Source Information:

"Government information from nongovernmental sources may be considered current if the source updates the information at least every 90 days, or, for information that is updated less frequently than quarterly by the government agency, within 90 days of the date the government agency makes the information available to the public."

Standard Environmental Record Sources

Federal

National Priority List: NPL

Sites on the United States Environmental Protection Agency (EPA)'s National Priorities List of the most serious uncontrolled or abandoned hazardous waste sites identified for possible long-term remedial action under the Superfund program. The NPL, which EPA is required to update at least once a year, is based primarily on the score a site receives from EPA's Hazard Ranking System. A site must be on the NPL to receive money from the Superfund Trust Fund for remedial action. Sites are represented by boundaries where available in the EPA Superfund Site Boundaries maintained by the Shared Enterprise Geodata and Services (SEGS). Site boundaries represent the footprint of a whole site, the sum of all of the Operable Units and the current understanding of the full extent of contamination; for Federal Facility sites, the total site polygon may be the Facility boundary. Where there is no polygon boundary data available for a given site, the site is represented as a point.

Government Publication Date: Mar 23, 2023

National Priority List - Proposed: PROPOSED NPL

Sites proposed by the United States Environmental Protection Agency (EPA), the state agency, or concerned citizens for addition to the National Priorities List (NPL) due to contamination by hazardous waste and identified by the EPA as a candidate for cleanup because it poses a risk to human health and/or the environment. Sites are represented by boundaries where available in the EPA Superfund Site Boundaries maintained by the Shared Enterprise Geodata and Services (SEGS). Site boundaries represent the footprint of a whole site, the sum of all of the Operable Units and the current understanding of the full extent of contamination; for Federal Facility sites, the total site polygon may be the Facility boundary. Where there is no polygon boundary data available for a given site, the site is represented as a point.

Government Publication Date: Mar 23, 2023

Deleted NPL: DELETED NPL

Sites deleted from the United States Environmental Protection Agency (EPA)'s National Priorities List. The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate. Sites are represented by boundaries where available in the EPA Superfund Site Boundaries maintained by the Shared Enterprise Geodata and Services (SEGS). Site boundaries represent the footprint of a whole site, the sum of all of the Operable Units and the current understanding of the full extent of contamination; for Federal Facility sites, the total site polygon may be the Facility boundary. Where there is no polygon boundary data available for a given site, the site is represented as a point.

Government Publication Date: Mar 23, 2023

SEMS List 8R Active Site Inventory: SEMS

The U.S. Environmental Protection Agency's (EPA) Superfund Program has deployed the Superfund Enterprise Management System (SEMS), which integrates multiple legacy systems into a comprehensive tracking and reporting tool. This inventory contains active sites evaluated by the Superfund program that are either proposed to be or are on the National Priorities List (NPL) as well as sites that are in the screening and assessment phase for possible inclusion on the NPL. The Active Site Inventory Report displays site and location information at active SEMS sites. An active site is one at which site assessment, removal, remedial, enforcement, cost recovery, or oversight activities are being planned or conducted. This data includes SEMS sites from the List 8R Active file as well as applicable sites from the SEMS GIS/REST file layer obtained from EPA's Facility Registry Service.

Government Publication Date: Jan 25, 2023

Inventory of Open Dumps, June 1985: ODI

The Resource Conservation and Recovery Act (RCRA) provides for publication of an inventory of open dumps. The Act defines "open dumps" as facilities which do not comply with EPA's "Criteria for Classification of Solid Waste Disposal Facilities and Practices" (40 CFR 257).

Government Publication Date: Jun 1985

SEMS List 8R Archive Sites: SEMS ARCHIVE

The U.S. Environmental Protection Agency's (EPA) Superfund Enterprise Management System (SEMS) Archived Site Inventory displays site and location information at sites archived from SEMS. An archived site is one at which EPA has determined that assessment has been completed and no further remedial action is planned under the Superfund program at this time. This data includes sites from the List 8R Archived site file.

Government Publication Date: Jan 25, 2023

Comprehensive Environmental Response, Compensation and Liability Information System - CERCLIS: CERCLIS

Superfund is a program administered by the United States Environmental Protection Agency (EPA) to locate, investigate, and clean up the worst hazardous waste sites throughout the United States. CERCLIS is a database of potential and confirmed hazardous waste sites at which the EPA Superfund program has some involvement. It contains sites that are either proposed to be or are on the National Priorities List (NPL) as well as sites that are in the screening and assessment phase for possible inclusion on the NPL. The EPA administers the Superfund program in cooperation with individual states and tribal governments; this database is made available by the EPA.

Government Publication Date: Oct 25, 2013

EPA Report on the Status of Open Dumps on Indian Lands: IODI

Public Law 103-399, The Indian Lands Open Dump Cleanup Act of 1994, enacted October 22, 1994, identified congressional concerns that solid waste open dump sites located on American Indian or Alaska Native (AI/AN) lands threaten the health and safety of residents of those lands and contiguous areas. The purpose of the Act is to identify the location of open dumps on Indian lands, assess the relative health and environment hazards posed by those sites, and provide financial and technical assistance to Indian tribal governments to close such dumps in compliance with Federal standards and regulations or standards promulgated by Indian Tribal governments or Alaska Native entities.

Government Publication Date: Dec 31, 1998

CERCLIS - No Further Remedial Action Planned: CERCLIS NFRAP

An archived site is one at which EPA has determined that assessment has been completed and no further remedial action is planned under the Superfund program at this time. The Archive designation means that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL). This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

Government Publication Date: Oct 25, 2013

CERCLIS Liens: CERCLIS LIENS

A Federal Superfund lien exists at any property where EPA has incurred Superfund costs to address contamination ("Superfund site") and has provided notice of liability to the property owner. A Federal CERCLA ("Superfund") lien can exist by operation of law at any site or property at which EPA has spent Superfund monies. This database is made available by the United States Environmental Protection Agency (EPA). This database was provided by the United States Environmental Protection Agency (EPA). Refer to SEMS LIEN as the current data source for Superfund Liens.

Government Publication Date: Jan 30, 2014

RCRA CORRACTS-Corrective Action: RCRA CORRACTS

RCRA Info is the U.S. Environmental Protection Agency's (EPA) comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. At these sites, the Corrective Action Program ensures that cleanups occur. EPA and state regulators work with facilities and communities to design remedies based on the contamination, geology, and anticipated use unique to each site.

Government Publication Date: Jan 23, 2023

RCRA non-CORRACTS TSD Facilities: RCRA TSD

RCRA Info is the U.S. Environmental Protection Agency's (EPA) comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. This database includes Non-Corrective Action sites listed as treatment, storage and/or disposal facilities of hazardous waste as defined by RCRA.

Government Publication Date: Jan 23, 2023

RCRA Generator List: RCRA LQG

RCRA Info is the U.S. Environmental Protection Agency's (EPA) comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. RCRA Info replaces the data recording and reporting abilities of the Resource Conservation and Recovery Information System (RCRIS) and the Biennial Reporting System (BRS). A hazardous waste generator is any person or site whose processes and actions create hazardous waste (see 40 CFR 260.10). Large Quantity Generators (LQGs) generate 1,000 kilograms per month or more of hazardous waste or more than one kilogram per month of acutely hazardous waste.

Government Publication Date: Jan 23, 2023

RCRA Small Quantity Generators List: RCRA SQG

RCRA Info is the U.S. Environmental Protection Agency's (EPA) comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. RCRA Info replaces the data recording and reporting abilities of the Resource Conservation and Recovery Information System (RCRIS) and the Biennial Reporting System (BRS). A hazardous waste generator is any person or site whose processes and actions create hazardous waste (see 40 CFR 260.10). Small Quantity Generators (SQGs) generate more than 100 kilograms, but less than 1,000 kilograms, of hazardous waste per month.

Government Publication Date: Jan 23, 2023

RCRA Very Small Quantity Generators List: RCRA VSQG

RCRA Info is the U.S. Environmental Protection Agency's (EPA) comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. A hazardous waste generator is any person or site whose processes and actions create hazardous waste (see 40 CFR 260.10). Very Small Quantity Generators (VSQG) generate 100 kilograms or less per month of hazardous waste, or one kilogram or less per month of acutely hazardous waste. Additionally, VSQG may not accumulate more than 1,000 kilograms of hazardous waste at any time.

Government Publication Date: Jan 23, 2023

RCRA Non-Generators: RCRA NON GEN

RCRA Info is the U.S. Environmental Protection Agency's (EPA) comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. RCRA Info replaces the data recording and reporting abilities of the Resource Conservation and Recovery Information System (RCRIS) and the Biennial Reporting System (BRS). A hazardous waste generator is any person or site whose processes and actions create hazardous waste (see 40 CFR 260.10). Non-Generators do not presently generate hazardous waste.

Government Publication Date: Jan 23, 2023

RCRA Sites with Controls: RCRA CONTROLS

List of Resource Conservation and Recovery Act (RCRA) facilities with institutional controls in place. RCRA gives the U.S. Environmental Protection Agency (EPA) the authority to control hazardous waste from the "cradle-to-grave." This includes the generation, transportation, treatment, storage, and disposal of hazardous waste. RCRA also set forth a framework for the management of non-hazardous solid wastes. The 1986 amendments to RCRA enabled EPA to address environmental problems that could result from underground tanks storing petroleum and other hazardous substances.

Government Publication Date: Jan 23, 2023

Federal Engineering Controls-ECs: FED ENG

This list of Engineering controls (ECs) is provided by the United States Environmental Protection Agency (EPA). ECs encompass a variety of engineered and constructed physical barriers (e.g., soil capping, sub-surface venting systems, mitigation barriers, fences) to contain and/or prevent exposure to contamination on a property. The EC listing includes remedy component data from Superfund decision documents issued in fiscal years 1982-2020 for applicable sites on the final or deleted on the National Priorities List (NPL); and sites with a Superfund Alternative Approach (SAA) Agreement in place. The only sites included that are not on the NPL; proposed for NPL; or removed from proposed NPL, are those with an SAA Agreement in place.

Government Publication Date: Feb 23, 2023

Federal Institutional Controls- ICs: FED INST

This list of Institutional controls (ICs) is provided by the United States Environmental Protection Agency (EPA). ICs are non-engineered instruments, such as administrative and legal controls, that help minimize the potential for human exposure to contamination and/or protect the integrity of the remedy. Although it is EPA's expectation that treatment or engineering controls will be used to address principal threat wastes and that groundwater will be returned to its beneficial use whenever practicable, ICs play an important role in site remedies because they reduce exposure to contamination by limiting land or resource use and guide human behavior at a site. The IC listing includes remedy component data from Superfund decision documents issued in fiscal years 1982-2020 for applicable sites on the final or deleted on the National Priorities List (NPL); and sites with a Superfund Alternative Approach (SAA) Agreement in place. The only sites included that are not on the NPL; proposed for NPL; or removed from proposed NPL, are those with an SAA Agreement in place.

Government Publication Date: Feb 23, 2023

Land Use Control Information System: LUCIS

The LUCIS database is maintained by the U.S. Department of the Navy and contains information for former Base Realignment and Closure (BRAC) properties across the United States.

Government Publication Date: Sep 1, 2006

Institutional Control Boundaries at NPL sites: NPL IC

Boundaries of Institutional Control areas at sites on the United States Environmental Protection Agency (EPA)'s National Priorities List, or Proposed or Deleted, made available by the EPA's Shared Enterprise Geodata and Services (SEGS). United States Environmental Protection Agency (EPA)'s National Priorities List of the most serious uncontrolled or abandoned hazardous waste sites identified for possible long-term remedial action under the Superfund program. Institutional controls are non-engineered instruments such as administrative and legal controls that help minimize the potential for human exposure to contamination and/or protect the integrity of the remedy.

Government Publication Date: Mar 23, 2023

Emergency Response Notification System: ERNS 1982 TO 1986

Database of oil and hazardous substances spill reports controlled by the National Response Center. The primary function of the National Response Center is to serve as the sole national point of contact for reporting oil, chemical, radiological, biological, and etiological discharges into the environment anywhere in the United States and its territories.

Government Publication Date: 1982-1986

Emergency Response Notification System: ERNS 1987 TO 1989

Database of oil and hazardous substances spill reports controlled by the National Response Center. The primary function of the National Response Center is to serve as the sole national point of contact for reporting oil, chemical, radiological, biological, and etiological discharges into the environment anywhere in the United States and its territories.

Government Publication Date: 1987-1989

Emergency Response Notification System: ERNS

Database of oil and hazardous substances spill reports made available by the United States Coast Guard National Response Center (NRC). The NRC fields initial reports for pollution and railroad incidents and forwards that information to appropriate federal/state agencies for response. These data contain initial incident data that has not been validated or investigated by a federal/state response agency.

Government Publication Date: Jan 16, 2023

The Assessment, Cleanup and Redevelopment Exchange System (ACRES) Brownfield Database: FED BROWNFIELDS

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties protects the environment, reduces blight, and takes development pressures off greenspaces and working lands. This data is provided by the United States Environmental Protection Agency (EPA) and includes Brownfield sites from the Cleanups in My Community (CIMC) web application.

Government Publication Date: Sep 13, 2022

FEMA Underground Storage Tank Listing: FEMA UST

The Federal Emergency Management Agency (FEMA) of the Department of Homeland Security maintains a list of FEMA owned underground storage tanks.

Government Publication Date: Dec 31, 2017

Facility Response Plan: FRP

This listing contains facilities that have submitted Facility Response Plans (FRPs) to the U.S. Environmental Protection Agency (EPA). Facilities that could reasonably be expected to cause "substantial harm" to the environment by discharging oil into or on navigable waters are required to prepare and submit FRPs. Harm is determined based on total oil storage capacity, secondary containment and age of tanks, oil transfer activities, history of discharges, proximity to a public drinking water intake or sensitive environments. This listing includes FRP facilities from an applicable EPA FOIA file and Homeland Infrastructure Foundation-Level Data (HIFLD) data file.

Government Publication Date: Aug 8, 2022

Delisted Facility Response Plans: DELISTED FRP

Facilities that once appeared in - and have since been removed from - the list of facilities that have submitted Facility Response Plans (FRP) to EPA. Facilities that could reasonably be expected to cause "substantial harm" to the environment by discharging oil into or on navigable waters are required to prepare and submit Facility Response Plans (FRPs). Harm is determined based on total oil storage capacity, secondary containment and age of tanks, oil transfer activities, history of discharges, proximity to a public drinking water intake or sensitive environments.

Government Publication Date: Aug 8, 2022

Historical Gas Stations: HIST GAS STATIONS

This historic directory of service stations is provided by the Cities Service Company. The directory includes Cities Service filling stations that were located throughout the United States in 1930.

Government Publication Date: Jul 1, 1930

Petroleum Refineries: REFN

List of petroleum refineries from the U.S. Energy Information Administration (EIA) Refinery Capacity Report. Includes operating and idle petroleum refineries (including new refineries under construction) and refineries shut down during the previous year located in the 50 States, the District of Columbia, Puerto Rico, the Virgin Islands, Guam, and other U.S. possessions. Survey locations adjusted using public data.

Government Publication Date: Aug 30, 2022

Petroleum Product and Crude Oil Rail Terminals: BULK TERMINAL

List of petroleum product and crude oil rail terminals made available by the U.S. Energy Information Administration (EIA). Includes operable bulk petroleum product terminals located in the 50 States and the District of Columbia with a total bulk shell storage capacity of 50,000 barrels or more, and/or the ability to receive volumes from tanker, barge, or pipeline; also rail terminals handling the loading and unloading of crude oil that were active between 2017 and 2018. Petroleum product terminals comes from the EIA-815 Bulk Terminal and Blender Report, which includes working, shell in operation, and shell idle for several major product groupings. Survey locations adjusted using public data.

Government Publication Date: Jun 29, 2022

LIEN on Property: SEMS LIEN

The U.S. Environmental Protection Agency's (EPA) Superfund Enterprise Management System (SEMS) provides Lien details on applicable properties, such as the Superfund lien on property activity, the lien property information, and the parties associated with the lien.

Government Publication Date: Jan 25, 2023

Superfund Decision Documents: SUPERFUND ROD

This database contains a list of decision documents for Superfund sites. Decision documents serve to provide the reasoning for the choice of (or) changes to a Superfund Site cleanup plan. The decision documents include completed Records of Decision (ROD), ROD Amendments, Explanations of Significant Differences (ESD) for active and archived sites stored in the Superfund Enterprise Management System (SEMS), along with other associated memos and files. This information is maintained and made available by the U.S. Environmental Protection Agency.

Government Publication Date: Mar 23, 2023

Formerly Utilized Sites Remedial Action Program: DOE FUSRAP

The U.S. Department of Energy (DOE) established the Formerly Utilized Sites Remedial Action Program (FUSRAP) in 1974 to remediate sites where radioactive contamination remained from the Manhattan Project and early U.S. Atomic Energy Commission (AEC) operations. The DOE Office of Legacy Management (LM) established long-term surveillance and maintenance (LTS&M) requirements for remediated FUSRAP sites. DOE evaluates the final site conditions of a remediated site on the basis of risk for different future uses. DOE then confirms that LTS&M requirements will maintain protectiveness.

Government Publication Date: Mar 4, 2017

State

State Response Sites: RESPONSE

A list of identified confirmed release sites where the Department of Toxic Substances Control (DTSC) is involved in remediation, either in a lead or oversight capacity. These confirmed release sites are generally high-priority and high potential risk. This database is state equivalent NPL.

Government Publication Date: Feb 6, 2023

EnviroStor Database: ENVIROSTOR

The EnviroStor Data Management System is made available by the Department of Toxic Substances Control (DTSC). Includes Corrective Action sites, Tiered Permit sites, Historical Sites and Evaluation/Investigation sites. This database is state equivalent CERCLIS.

Government Publication Date: Feb 6, 2023

Delisted State Response Sites: DELISTED ENVS

Sites removed from the list of State Response Sites made available by the EnviroStor Data Management System, Department of Toxic Substances Control (DTSC).

Government Publication Date: Feb 6, 2023

Solid Waste Information System (SWIS): SWF/LF

The Solid Waste Information System (SWIS) database made available by the Department of Resources Recycling and Recovery (CalRecycle) contains information on solid waste facilities, operations, and disposal sites throughout the State of California. The types of facilities found in this database include landfills, transfer stations, material recovery facilities, composting sites, transformation facilities, waste tire sites, and closed disposal sites.

Government Publication Date: May 9, 2023

Solid Waste Disposal Sites with Waste Constituents Above Hazardous Waste Levels: SWRCB SWF

This is a list of solid waste disposal sites identified by California State Water Resources Control Board with waste constituents above hazardous waste levels outside the waste management unit.

Government Publication Date: Sep 20, 2006

Waste Management Unit Database: WMUD

The Waste Management Unit Database System tracks and inventories waste management units. CCR Title 27 contains criteria stating that Waste Management Units are classified according to their ability to contain wastes. Containment shall be determined by geology, hydrology, topography, climatology, and other factors relating to the ability of the Unit to protect water quality. Water Code Section 13273.1 requires that operators submit a water quality solid waste assessment test (SWAT) report to address leak status. The WMUDS was last updated by the State Water Resources control board in 2000.

Government Publication Date: Jan 1, 2000

EnviroStor Hazardous Waste Facilities: HWP

A list of hazardous waste facilities including permitted, post-closure and historical facilities found in the Department of Toxic Substances Control (DTSC) EnviroStor database.

Government Publication Date: Feb 6, 2023

Sites Listed in the Solid Waste Assessment Test (SWAT) Program Report: SWAT

In a 1993 Memorandum of Understanding, the State Water Resources Control Board (SWRCB) agreed to submit a comprehensive report on the Solid Waste Assessment Test (SWAT) Program to the California Integrated Waste Management Board (CIWMB). This report summarizes the work completed to date on the SWAT Program, and addresses both the impacts that leakage from solid waste disposal sites (SWDS) may have upon waters of the State and the actions taken to address such leakage.

Government Publication Date: Dec 31, 1995

Construction and Demolition Debris Recyclers: C&D DEBRIS RECY

This listing of Construction and Demolition Debris Recyclers is maintained by the California Intergrated Waste Management Board-common C&D materials include lumber, drywall, metals, masonry (brick, concrete, etc.), carpet, plastic, pipe, rocks, dirt, paper, cardboard, or green waste related to land development.

Government Publication Date: Jun 20, 2018

Recycling Centers: RECYCLING

This list of Certified Recycling Centers that are operating under the state of California's Beverage Container Recycling Program is maintained by the California Department of Resources Recycling and Recovery.

Government Publication Date: Apr 13, 2023

Listing of Certified Processors: PROCESSORS

This list of Certified Processors that are operating under the state of California's Beverage Container Recycling Program is maintained by the California Department of Resources Recycling and Recovery.

Government Publication Date: Apr 13, 2023

Listing of Certified Dropoff, Collection, and Community Service Programs: CONTAINER RECY

This list of Certified Dropoff, Collection, and Community Service Programs (non-buyback) operating under the state of California's Beverage Container Recycling Program is maintained by the California Department of Resources Recycling and Recovery.

Government Publication Date: Apr 19, 2023

Land Disposal Sites: LDS

Land Disposal Sites in GeoTracker, the State Water Resources Control Board (SWRCB)'s data management system. The Land Disposal program regulates of waste discharge to land for treatment, storage and disposal in waste management units. Waste management units include waste piles, surface impoundments, and landfills.

Government Publication Date: Feb 27, 2023

Leaking Underground Fuel Tank Reports: LUST

List of Leaking Underground Storage Tanks within the Cleanup Sites data in GeoTracker database. GeoTracker is the State Water Resources Control Board's (SWRCB) data management system for managing sites that impact groundwater, especially those that require groundwater cleanup (Underground Storage Tanks, Department of Defense and Site Cleanup Program) as well as permitted facilities such as operating Underground Storage Tanks. The Leak Prevention Program that overlooks LUST sites is the SWRCB in California's Environmental Protection Agency.

Government Publication Date: Feb 27, 2023

Delisted Leaking Storage Tanks: DELISTED LST

List of Leaking Underground Storage Tanks (LUST) cleanup sites removed from GeoTracker, the State Water Resources Control Board (SWRCB)'s database system, as well as sites removed from the SWRCB's list of UST Case closures.

Government Publication Date: Mar 10, 2023

Permitted Underground Storage Tank (UST) in GeoTracker: UST

List of Permitted Underground Storage Tank (UST) sites made available by the State Water Resources Control Board (SWRCB) in California's Environmental Protection Agency (EPA).

Government Publication Date: Jan 17, 2023

Proposed Closure of Underground Storage Tank Cases: UST CLOSURE

This listing includes Proposed Closure of Underground Storage Tank (UST) Cases which are being considered for closure by either the State Water Resources Control Board at a Future Board Meeting or the Executive Director that have been posted for a 60-day public comment period, and Closure of UST Cases with Closure Denials and Approved Orders. The lists are provided by the California Water Boards.

Government Publication Date: Mar 10, 2023

Historical Hazardous Substance Storage Information Database: HHSS

The Historical Hazardous Substance Storage database contains information collected in the 1980s from facilities that stored hazardous substances. The information was originally collected on paper forms, was later transferred to microfiche, and recently indexed as a searchable database. When using this database, please be aware that it is based upon self-reported information submitted by facilities which has not been independently verified. It is unlikely that every facility responded to the survey and the database should not be expected to be a complete inventory of all facilities that were operating at that time. This database is maintained by the California State Water Resources Control Board's (SWRCB) Geotracker.

Government Publication Date: Aug 27, 2015

Statewide Environmental Evaluation and Planning System: UST SWEEPS

The Statewide Environmental Evaluation and Planning System (SWEEPS) is a historical listing of active and inactive underground storage tanks made available by the California State Water Resources Control Board (SWRCB).

Government Publication Date: Oct 1, 1994

Aboveground Storage Tanks: AST

A statewide list from 2009 of aboveground storage tanks (ASTs) made available by the Cal FIRE Office of the State Fire Marshal (OSFM). This list is no longer maintained or updated by the Cal FIRE OSFM.

Government Publication Date: Aug 31, 2009

SWRCB Historical Aboveground Storage Tanks: AST SWRCB

A list of aboveground storage tanks made available by the California State Water Resources Control Board (SWRCB). Effective January 1, 2008, the Certified Unified Program Agencies (CUPAs) are vested with the responsibility and authority to implement the Aboveground Petroleum Storage Act (APSA).

Government Publication Date: Dec 1, 2007

Oil and Gas Facility Tanks: TANK OIL GAS

Locations of oil and gas tanks that fall under the jurisdiction of the Geologic Energy Management Division of the California Department of Conservation (CalGEM) (CCR 1760). CalGEM was formerly the Division of Oil, Gas, and Geothermal Resources (DOGGR).

Government Publication Date: Apr 12, 2023

Delisted Storage Tanks: DELISTED TNK

This database contains a list of storage tank sites that were removed by the State Water Resources Control Board (SWRCB) in California's Environmental Protection Agency (EPA) and the Cal FIRE Office of State Fire Marshal (OSFM).

Government Publication Date: May 15, 2023

California Environmental Reporting System (CERS) Tanks: CERS TANK

List of sites in the California Environmental Protection Agency (CalEPA) Regulated Site Portal which fall under the Aboveground Petroleum Storage and Underground Storage Tank regulatory programs. The CalEPA oversees the statewide implementation of the Unified Program which applies regulatory standards to protect Californians from hazardous waste and materials.

Government Publication Date: Apr 12, 2023

Delisted California Environmental Reporting System (CERS) Tanks: DELISTED CTNK

This database contains a list of Aboveground Petroleum Storage and Underground Storage Tank sites that were removed from in the California Environmental Protection Agency (CalEPA) Regulated Site Portal.

Government Publication Date: Apr 12, 2023

Historical Hazardous Substance Storage Container Information - Facility Summary: HIST TANK

The State Water Resources Control Board maintained the Hazardous Substance Storage Containers listing and inventory in th 1980s. This facility summary lists historic tank sites where the following container types were present: farm motor vehicle fuel tanks; waste tanks; sumps; pits, ponds, lagoons, and others; and all other product tanks. This set, published in May 1988, lists facility and owner information, as well as the number of containers. This data is historic and will not be updated.

Government Publication Date: May 27, 1988

Site Mitigation and Brownfields Reuse Program Facility Sites with Land Use Restrictions: LUR

The Department of Toxic Substances Control (DTSC) Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents land use restrictions that are active. Some sites have multiple land use restrictions.

Government Publication Date: Feb 6, 2023

CALSITES Database: CALSITES

This historical database was maintained by the Department of Toxic Substance Control (DTSC) for more than a decade. CALSITES contains information on Brownfield properties with confirmed or potential hazardous contamination. In 2006, DTSC introduced EnviroStor as the latest Brownfields site database.

Government Publication Date: May 1, 2004

Hazardous Waste Management Program Facility Sites with Deed / Land Use Restrictions: HLUR

The Department of Toxic Substances Control (DTSC) Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

Government Publication Date: Feb 18, 2021

Deed Restrictions and Land Use Restrictions: DEED

List of Deed Restrictions, Land Use Restrictions and Covenants in GeoTracker made available by the State Water Resources Control Board (SWRCB) in California's Environmental Protection Agency. A deed restriction (land use covenant) may be required to facilitate the remediation of past environmental contamination and to protect human health and the environment by reducing the risk of exposure to residual hazardous materials.

Government Publication Date: Feb 27, 2023

Voluntary Cleanup Program: VCP

List of sites in the Voluntary Cleanup Program made available by the Department of Toxic Substances and Control (DTSC). The Voluntary Cleanup Program was designed to respond to lower priority sites. Under the Voluntary Cleanup Program, DTSC enters site-specific agreements with project proponents for DTSC oversight of site assessment, investigation, and/or removal or remediation activities, and the project proponents agree to pay DTSC's reasonable costs for those services.

Government Publication Date: Feb 6, 2023

GeoTracker Cleanup Program Sites: CLEANUP SITES

A list of Cleanup Program sites in the state of California made available by The State Water Resources Control Board (SWRCB) of the California Environmental Protection Agency (EPA). SWRCB tracks leaking underground storage tank cleanups as well as other water board cleanups.

Government Publication Date: Feb 27, 2023

Delisted Cleanup Program Sites: DELISTED CLEANUP

A list of Cleanup Program sites which were once included - and have since been removed from - the list of Cleanup Program Sites in GeoTracker. GeoTracker is the State Water Resource Control Boards' data management system for sites that impact, or have the potential to impact, water quality in California, with emphasis on groundwater.
Government Publication Date: Feb 27, 2023

Delisted County Records: DELISTED COUNTY
Records removed from county or CUPA databases. Records may be removed from the county lists made available by the respective county departments because they are inactive, or because they have been deemed to be below reportable thresholds.
Government Publication Date: Apr 27, 2023

Tribal

Leaking Underground Storage Tanks on Tribal/Indian Lands: INDIAN LUST
This list of leaking underground storage tanks (LUSTs) on Tribal/Indian Lands in Region 9, which includes California, is made available by the United States Environmental Protection Agency (EPA).
Government Publication Date: Apr 19, 2023

Underground Storage Tanks on Tribal/Indian Lands: INDIAN UST
This list of underground storage tanks (USTs) on Tribal/Indian Lands in Region 9, which includes California, is made available by the United States Environmental Protection Agency (EPA).
Government Publication Date: Apr 19, 2023

Delisted Tribal Leaking Storage Tanks: DELISTED INDIAN LST
Leaking Underground Storage Tank (LUST) facilities which once appeared on - and have since been removed from - the Regional Tribal/Indian LUST lists made available by the United States Environmental Protection Agency (EPA).
Government Publication Date: Apr 20, 2023

Delisted Tribal Underground Storage Tanks: DELISTED INDIAN UST
Underground Storage Tank (UST) facilities which once appeared on - and have since been removed from - the Regional Tribal/Indian UST lists made available by the United States Environmental Protection Agency (EPA).
Government Publication Date: Apr 20, 2023

County

Alameda County - LOP Sites List: LOP ALAMEDA
List of sites in the Alameda County Department of Environmental Health's (ACDEH) Local Oversight Program (LOP). The ACDEH LOP program oversees the investigation and cleanup of hazardous materials releases to the environment under two programs. The Leaking Underground Fuel Tank (LUFT) program is specific to unauthorized releases associated with petroleum underground storage tank systems. The Site Cleanup Program (SCP) oversees the investigation and cleanup of releases from hazardous materials, including but not limited to releases of pesticides, heavy metals, dry cleaner solvents, etc., including redevelopment of sites with residual contamination from historic uses.
Government Publication Date: Jan 16, 2019

Alameda County Contaminated Sites: CONT ALAMEDA
This list of contaminated sites was provided by the Alameda County Department of Environmental Health (ACDEH) up until May 2019. This data is now obtained through the State Water Resources Control Board's GeoTracker. Releases of other types of hazardous materials from underground storage tanks or other releases and/or spills that have contaminated soil, soil vapor, and/or groundwater may be regulated by ACDEH under the Site Cleanup Program, San Francisco Bay Regional Water Board, or by the California Department of Toxic Substance Control. ACDEH under LOP's SCP oversees the cleanup of contaminated property under authority of Health and Safety Code Sections 101480 through 101490.
Government Publication Date: May 27, 2019

Alameda County - UST List: UST ALAMEDA
A list of registered Underground Storage Tanks (USTs) in the County of Alameda. The list is made available by Alameda County Department of Environmental Health.
Government Publication Date: May 1, 2023

Alameda County Aboveground Storage Tanks: AST ALAMEDA

This database containing active and inactive aboveground storage tank facilities is maintained by the Alameda County Department of Environmental Health. These aboveground storage tanks contain petroleum-based liquid products such as gasoline, diesel, lubricants, etc. Effective July 1, 2018, tanks in an underground area (TIUGA) are subject to the Aboveground Petroleum Storage Act Program.

Government Publication Date: May 2, 2022

Alameda County - City of Berkeley CUPA Facilities: CUPA BERKELEY

A list of facilities associated with various Certified Unified Program Agency (CUPA) programs at the City of Berkeley in Alameda County. This list is maintained by the Toxics Management Division at the City of Berkeley.

Government Publication Date: Apr 4, 2023

Alameda County - Hayward City CUPA List: CUPA HAYWARD

A list of facilities associated with various Certified Unified Program Agency (CUPA) programs in Hayward City. This list is maintained by the Hayward City Fire Department.

Government Publication Date: Jul 16, 2019

Alameda County - San Leandro City CUPA Facilities List: CUPA SANLEANDRO

A list of facilities associated with various Certified Unified Program Agency (CUPA) programs in San Leandro City, Alameda County. This list is made available by San Leandro City Environmental Services Section.

Government Publication Date: Apr 11, 2019

Alameda County - Union City USTs: UST UNION

A list of Underground Storage Tanks (USTs) in the city of Union in Alameda County. This data is made available by the Environmental Programs Division of Economic & Community Development, Union City.

Government Publication Date: May 3, 2021

Alameda County - Union City CERS CUPA List: CUPA CERS UNION

A list of CERS registered facilities associated with various Certified Unified Program Agency (CUPA) programs in the City of Union. This list is made available by the City of Union Economic and Community Development Department.

Government Publication Date: May 3, 2021

Alameda County - Union City CUPA Facilities: CUPA UNION

A list of facilities associated with various Certified Unified Program Agency (CUPA) programs in the City of Union. Includes facilities with active and inactive statuses. This list is made available by the City of Union Economic and Community Development Department.

Government Publication Date: Sep 30, 2020

Alameda County - City of Livermore and Pleasanton UST List: UST LIVERMORE

A list of registered Underground Storage Tank (UST) in City of Livermore and City of Pleasanton, Alameda County. This list is maintained by the Livermore-Pleasanton Fire Department.

Government Publication Date: Mar 31, 2023

Alameda County - City of Livermore and Pleasanton AST List: AST LIVERMORE

A list of registered Aboveground Storage Tank (AST) in City of Livermore and City of Pleasanton, Alameda County. This list is maintained by the Livermore-Pleasanton Fire Department.

Government Publication Date: Mar 31, 2023

Alameda County - City of Livermore and Pleasanton CUPA Facilities: CUPA LIVERMORE

A list of facilities associated with various Certified Unified Program Agency (CUPA) programs in City of Livermore and City of Pleasanton in Alameda County. This list is maintained by the Livermore-Pleasanton Fire Department.

Government Publication Date: Mar 31, 2023

Contra Costa County - CUPA List: CUPA CONTRACO

A list of facilities associated with various Certified Unified Program Agency (CUPA) programs in the County of Contra Costa. This list is made available by Contra Costa County which has been certified by CalEPA to implement the Unified program as a CUPA.

Government Publication Date: Apr 3, 2023

Additional Environmental Record Sources

Federal

Facility Registry Service/Facility Index: FINDS/FRS

The Facility Registry Service (FRS) is a centrally managed database that identifies facilities, sites, or places subject to environmental regulations or of environmental interest. FRS creates high-quality, accurate, and authoritative facility identification records through rigorous verification and management procedures that incorporate information from program national systems, state master facility records, and data collected from EPA's Central Data Exchange registrations and data management personnel. This list is made available by the Environmental Protection Agency (US EPA).

Government Publication Date: Aug 18, 2022

Toxics Release Inventory (TRI) Program: TRIS

The U.S. Environmental Protection Agency's Toxics Release Inventory (TRI) is a database containing data on disposal or other releases of toxic chemicals from U.S. facilities and information about how facilities manage those chemicals through recycling, energy recovery, and treatment. There are currently 770 individually listed chemicals and 33 chemical categories covered by the TRI Program. Facilities that manufacture, process or otherwise use these chemicals in amounts above established levels must submit annual reporting forms for each chemical. Note that the TRI chemical list does not include all toxic chemicals used in the U.S. One of TRI's primary purposes is to inform communities about toxic chemical releases to the environment.

Government Publication Date: Oct 19, 2022

PFOA/PFOS Contaminated Sites: PFAS NPL

List of National Priorities List (NPL) and related Superfund Alternative Agreement (SAA) sites where PFOA or PFOS contaminants have been found in water and/or soil. The site listing is provided by the Federal Environmental Protection Agency (EPA).

Government Publication Date: Mar 28, 2023

Federal Agency Locations with Known or Suspected PFAS Detections: PFAS FED SITES

List of Federal agency locations with known or suspected detections of Per- and Polyfluoroalkyl Substances (PFAS), made available by the U.S. Environmental Protection Agency (EPA) in their PFAS Analytic Tools data. EPA outlines that these data are gathered from several federal entities, such as the Federal Superfund program, Department of Defense (DOD), National Aeronautics and Space Administration, Department of Transportation, and Department of Energy. The dates this data was extracted for the PFAS Analytic Tools range from March 2022 to April 2023. Sites on this list do not necessarily reflect the source/s of PFAS contamination and detections do not indicate level of risk or human exposure at the site. Agricultural notifications in this data are limited to DOD sites only. At this time, the EPA is aware that this list is not comprehensive of all Federal agencies.

Government Publication Date: Apr 24, 2023

SSEHRI PFAS Contamination Sites: PFAS SSEHRI

This PFAS Contamination Site Tracker database is compiled by the Social Science Environmental Health Research Institute (SSEHRI) at Northeastern University. According to the SSEHRI, the database records qualitative and quantitative data from each known site of PFAS contamination, including timeline of discovery, sources, levels, health impacts, community response, and government response. The goal of this database is to compile information and support public understanding of the rapidly unfolding issue of PFAS contamination. All data presented was extracted from government websites, news articles, or publicly available documents, and this is cited in the tracker. Disclaimer: The source conveys this database undergoes regular updates as new information becomes available, some sites may be missing and/or contain information that is incorrect or outdated, as well as their information represents all contamination sites SSEHRI is aware of, not all possible contamination sites. This data is not intended to be used for legal purposes. Limited location details are available with this data. Access the following for the most current informations https://pfasproject.com/pfas-contamination-site-tr acker/

Government Publication Date: Dec 12, 2019

National Response Center PFAS Spills: ERNS PFAS

National Response Center (NRC) calls from 1990 to the most recent complete calendar year where there is indication of Aqueous Film Forming Foam (AFFF) usage. NRC calls may reference AFFF usage in the "Material Involved" or "Incident Description" fields. Data made available by the US Environmental Protection Agency (EPA). Disclaimer: dataset may include initial or misidentified incident data not yet validated or investigated by a federal/state response agency.

Government Publication Date: Feb 23, 2022

PFAS NPDES Discharge Monitoring: PFAS NPDES

This list of National Pollutant Discharge Elimination System (NPDES) permitted facilities with required monitoring for Per- and Polyfluoroalkyl (PFAS) Substances is made available via the U.S. Environmental Protection Agency (EPA)'s PFAS Analytic Tools. Any point-source wastewater discharger to waters of the United States must have a NPDES permit, which defines a set of parameters for pollutants and monitoring to ensure that the discharge does not degrade water quality or impair human health. This list includes NPDES permitted facilities associated with permits that monitor for Per- and Polyfluoroalkyl Substances (PFAS), limited to the years 2007 - present. EPA further advises the following regarding these data: currently, fewer than half of states have required PFAS monitoring for at least one of their permittees, and fewer states have established PFAS effluent limits for permittees. For states that may have required monitoring, some reporting and data transfer issues may exist on a state-by-state basis.

Government Publication Date: Feb 19, 2023

Perfluorinated Alkyl Substances (PFAS) from Toxic Release Inventory: PFAS TRI

List of Toxics Release Inventory (TRI) facilities at which the reported chemical is a per- or polyfluoroalkyl (PFAS) substance included in the U.S. Environmental Protection Agency's (EPA) consolidated PFAS Master List of PFAS Substances. Encompasses Toxics Release Inventory records included in the EPA PFAS Analytic Tools. The EPA's TRI database currently tracks information on disposal or releases of 770 individually listed toxic chemicals and 33 chemical categories from thousands of U.S. facilities and details about how facilities manage those chemicals through recycling, energy recovery, and treatment.

Government Publication Date: Oct 19, 2022

Perfluorinated Alkyl Substances (PFAS) Water Quality: PFAS WATER

The Water Quality Portal (WQP) is a cooperative service sponsored by the United States Geological Survey (USGS), the Environmental Protection Agency (EPA), and the National Water Quality Monitoring Council (NWQMC). This listing includes records from the Water Quality Portal where the characteristic (environmental measurement) is in the Environmental Protection Agency (EPA)'s consolidated Master List of PFAS Substances.

Government Publication Date: Jul 20, 2020

PFAS TSCA Manufacture and Import Facilities: PFAS TSCA

The U.S. Environmental Protection Agency (EPA) issued the Chemical Data Reporting (CDR) Rule under the Toxic Substances Control Act (TSCA) and requires chemical manufacturers and facilities that manufacture or import chemical substances to report data to EPA. This list is specific only to TSCA Manufacture and Import Facilities with reported per- and poly-fluoroalkyl (PFAS) substances. Data file is sourced from EPA's PFAS Analytic Tools TSCA dataset which includes CDR/Inventory Update Reporting data from 1998 up to 2020. Disclaimer: This data file includes production and importation data for chemicals identified in EPA's CompTox Chemicals Dashboard list of PFAS without explicit structures and list of PFAS structures in DSSTox. Note that some regulations have specific chemical structure requirements that define PFAS differently than the lists in EPA's CompTox Chemicals Dashboard. Reporting information on manufactured or imported chemical substance amounts should not be compared between facilities, as some companies claim Chemical Data Reporting Rule data fields for PFAS information as Confidential Business Information.

Government Publication Date: Jan 5, 2023

PFAS Waste Transfers from RCRA e-Manifest : PFAS E-MANIFEST

This Per- and Poly-Fluoroalkyl Substances (PFAS) Waste Transfers dataset is made available via the U.S. Environmental Protection Agency's (EPA) PFAS Analytic Tools. Every shipment of hazardous waste in the U.S. must be accompanied by a shipment manifest, which is a critical component of the cradle-to-grave tracking of wastes mandated by the Resource Conservation and Recovery Act (RCRA). According to the EPA, currently no Federal Waste Code exists for any PFAS compounds. To work around the lack of PFAS waste codes in the RCRA database, EPA developed the PFAS Transfers dataset by mining e-Manifest records containing at least one of these common PFAS keywords: • PFAS • PFOA • PFOS • PERFL • AFFF • GENX • GEN-X (plus the Vermont state-specific waste codes). Limitations: Amount or concentration of PFAS being transferred cannot be determined from the manifest information. Keyword searches may misidentify some manifest records that do not contain PFAS. This dataset should also not be considered to be exhaustive of all PFAS waste transfers.

Government Publication Date: Apr 9, 2023

PFAS Industry Sectors: PFAS IND

This Per- and Poly-Fluoroalkyl Substances (PFAS) Industry Sectors dataset is made available via the U.S. Environmental Protection Agency's (EPA) PFAS Analytic Tools. The EPA developed the dataset from various sources that show which industries may be handling PFAS including: EPA's Enforcement and Compliance History Online (ECHO) records restricted to potential PFAS-handling industry sectors; ECHO records for Fire Training Sites identified where fire-fighting foam may have been used in training exercises; and 14 CFR Part 139 Airports compiled from historic and current records from the FAA Airport Data and Information Portal. Since July 2006, all certificated Part 139 Airports are required to have fire-fighting foam onsite that meet certain military specifications, which to date have been fluorinated (Aqueous Film Forming Foam). Limitations: Inclusion in this dataset does not indicate that PFAS are being manufactured, processed, used, or released by the facility. Listed facilities potentially handle PFAS based on their industrial profile, but are unconfirmed by the EPA. Keyword searches in ECHO for Fire Training sites may misidentify some facilities and should not be considered to be an exhaustive list of fire training facilities in the U.S.

Government Publication Date: Apr 16, 2023

Hazardous Materials Information Reporting System: HMIRS

US DOT - Department of Transportation Pipeline and Hazardous Materials Safety Administration (PHMSA) Incidents Reports Database taken from Hazmat Intelligence Portal, U.S. Department of Transportation.

Government Publication Date: Sep 1, 2020

National Clandestine Drug Labs: NCDL

The U.S. Department of Justice ("the Department"), Drug Enforcement Administration (DEA), provides this data as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy.

Government Publication Date: Feb 8, 2023

Toxic Substances Control Act: TSCA

The Environmental Protection Agency (EPA) is amending the Toxic Substances Control Act (TSCA) section 8(a) Inventory Update Reporting (IUR) rule and changing its name to the Chemical Data Reporting (CDR) rule.
The CDR enables EPA to collect and publish information on the manufacturing, processing, and use of commercial chemical substances and mixtures (referred to hereafter as chemical substances) on the TSCA Chemical Substance Inventory (TSCA Inventory). This includes current information on chemical substance production volumes, manufacturing sites, and how the chemical substances are used. This information helps the Agency determine whether people or the environment are potentially exposed to reported chemical substances. EPA publishes submitted CDR data that is not Confidential Business Information (CBI).

Government Publication Date: Apr 11, 2019

Hist TSCA: HIST TSCA

The Environmental Protection Agency (EPA) is amending the Toxic Substances Control Act (TSCA) section 8(a) Inventory Update Reporting (IUR) rule and changing its name to the Chemical Data Reporting (CDR) rule.
The 2006 IUR data summary report includes information about chemicals manufactured or imported in quantities of 25,000 pounds or more at a single site during calendar year 2005. In addition to the basic manufacturing information collected in previous reporting cycles, the 2006 cycle is the first time EPA collected information to characterize exposure during manufacturing, processing and use of organic chemicals. The 2006 cycle also is the first time manufacturers of inorganic chemicals were required to report basic manufacturing information.

Government Publication Date: Dec 31, 2006

FTTS Administrative Case Listing: FTTS ADMIN

An administrative case listing from the Federal Insecticide, Fungicide, & Rodenticide Act (FIFRA) and Toxic Substances Control Act (TSCA), together known as FTTS. This database was obtained from the Environmental Protection Agency's (EPA) National Compliance Database (NCDB). The FTTS and NCDB was shut down in 2006.

Government Publication Date: Jan 19, 2007

FTTS Inspection Case Listing: FTTS INSP

An inspection case listing from the Federal Insecticide, Fungicide, & Rodenticide Act (FIFRA) and Toxic Substances Control Act (TSCA), together known as FTTS. This database was obtained from the Environmental Protection Agency's (EPA) National Compliance Database (NCDB). The FTTS and NCDB was shut down in 2006.

Government Publication Date: Jan 19, 2007

Potentially Responsible Parties List: PRP

Early in the site cleanup process, the U.S. Environmental Protection Agency (EPA) conducts a search to find the Potentially Responsible Parties (PRPs). The EPA looks for evidence to determine liability by matching wastes found at the site with parties that may have contributed wastes to the site. This listing contains PRPs, Noticed Parties, at sites in the EPA's Superfund Enterprise Management System (SEMS).

Government Publication Date: Jan 25, 2023

State Coalition for Remediation of Drycleaners Listing: SCRD DRYCLEANER

The State Coalition for Remediation of Drycleaners (SCRD) was established in 1998, with support from the U.S. Environmental Protection Agency (EPA) Office of Superfund Remediation and Technology Innovation. Coalition members are states with mandated programs and funding for drycleaner site remediation. Current members are Alabama, Connecticut, Florida, Illinois, Kansas, Minnesota, Missouri, North Carolina, Oregon, South Carolina, Tennessee, Texas, and Wisconsin. Since 2017, the SCRD no longer maintains this data, refer to applicable state source data where available.

Government Publication Date: Nov 08, 2017

Integrated Compliance Information System (ICIS): ICIS

The U.S. Environmental Protection Agency's Enforcement and Compliance History Online system incorporates data from the Integrated Compliance Information System - National Pollutant Discharge Elimination System (ICIS-NPDES). ICIS-NPDES is an information management system maintained by the Office of Compliance to track permit compliance and enforcement status of facilities regulated by the NPDES under the Clean Water Act. This data includes permit, inspection, violation and enforcement action information for applicable ICIS records.

Government Publication Date: Oct 15, 2022

Drycleaner Facilities: FED DRYCLEANERS

A list of drycleaner facilities from Enforcement and Compliance History Online (ECHO) data as made available by the U.S. Environmental Protection Agency (EPA), sourced from the ECHO Exporter file. The EPA tracks facilities that possess NAIC and SIC codes that classify businesses as drycleaner establishments.

Government Publication Date: Dec 11, 2022

Delisted Drycleaner Facilities: DELISTED FED DRY

List of sites removed from the list of Drycleaner Facilities (sites in the EPA's Integrated Compliance Information System (ICIS) with NAIC or SIC codes identifying the business as a drycleaner establishment).

Government Publication Date: Dec 11, 2022

Formerly Used Defense Sites: FUDS

Formerly Used Defense Sites (FUDS) are properties that were formerly owned by, leased to, or otherwise possessed by and under the jurisdiction of the Secretary of Defense prior to October 1986, where the Department of Defense (DOD) is responsible for an environmental restoration. The FUDS Annual Report to Congress (ARC) is published by the U.S. Army Corps of Engineers (USACE). This data is compiled from the USACE's Geospatial FUDS data layers and Homeland Infrastructure Foundation-Level Data (HIFLD) FUDS dataset.

Government Publication Date: Jul 12, 2022

FUDS Munitions Response Sites: FUDS MRS

Boundaries of Munitions Response Sites (MRS), published with the Formerly Used Defense Sites (FUDS) Annual Report to Congress (ARC) by the U.S. Army Corps of Engineers (USACE). An MRS is a discrete location within a Munitions response area (MRA) that is known to require a munitions response. An MRA means any area on a defense site that is known or suspected to contain unexploded ordnance (UXO), discarded military munitions (DMM), or munitions constituents (MC). This data is compiled from the USACE's Geospatial MRS data layers and Homeland Infrastructure Foundation-Level Data (HIFLD) MRS dataset.

Government Publication Date: Jul 12, 2022

Former Military Nike Missile Sites: FORMER NIKE

This information was taken from report DRXTH-AS-IA-83A016 (Historical Overview of the Nike Missile System, 12/1984) which was performed by Environmental Science and Engineering, Inc. for the U.S. Army Toxic and Hazardous Materials Agency Assessment Division. The Nike system was deployed between 1954 and the mid-1970's. Among the substances used or stored on Nike sites were liquid missile fuel (JP-4); starter fluids (UDKH, aniline, and furfuryl alcohol); oxidizer (IRFNA); hydrocarbons (motor oil, hydraulic fluid, diesel fuel, gasoline, heating oil); solvents (carbon tetrachloride, trichloroethylene, trichloroethane, stoddard solvent); and battery electrolyte. The quantities of material a disposed of and procedures for disposal are not documented in published reports. Virtually all information concerning the potential for contamination at Nike sites is confined to personnel who were assigned to Nike sites. During deactivation most hardware was shipped to depot-level supply points. There were reportedly instances where excess materials were disposed of on or near the site itself at closure. There was reportedly no routine site decontamination.

Government Publication Date: Dec 2, 1984

PHMSA Pipeline Safety Flagged Incidents: PIPELINE INCIDENT

A list of flagged pipeline incidents made available by the U.S. Department of Transportation (US DOT) Pipeline and Hazardous Materials Safety Administration (PHMSA). PHMSA regulations require incident and accident reports for five different pipeline system types.

Government Publication Date: Mar 31, 2021

Material Licensing Tracking System (MLTS): MLTS

A list of sites that store radioactive material subject to the Nuclear Regulatory Commission (NRC) licensing requirements. This list is maintained by the NRC. As of September 2016, the NRC no longer releases location information for sites. Site locations were last received in July 2016.

Government Publication Date: May 11, 2021

Historic Material Licensing Tracking System (MLTS) sites: HIST MLTS

A historic list of sites that have inactive licenses and/or removed from the Material Licensing Tracking System (MLTS). In some cases, a site is removed from the MLTS when the state becomes an "Agreement State". An Agreement State is a State that has signed an agreement with the Nuclear Regulatory Commission (NRC) authorizing the State to regulate certain uses of radioactive materials within the State.

Government Publication Date: Jan 31, 2010

Mines Master Index File: MINES

The Master Index File (MIF) is provided by the United State Department of Labor, Mine Safety and Health Administration (MSHA). This file, which was originally created in the 1970's, contained many Mine-IDs that were invalid. MSHA removes invalid IDs from the MIF upon discovery. MSHA applicable data includes the following: all Coal and Metal/Non-Metal mines under MSHA's jurisdiction since 1/1/1970; mine addresses for all mines in the database except for Abandoned mines prior to 1998 from MSHA's legacy system (addresses may or may not correspond with the physical location of the mine itself); violations that have been assessed penalties as a result of MSHA inspections beginning on 1/1/2000; and violations issued as a result of MSHA inspections conducted beginning on 1/1/2000.

Government Publication Date: Nov 7, 2022

Surface Mining Control and Reclamation Act Sites: SMCRA

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by the Office of Surface Mining Reclamation and Enforcement (OSMRE) to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of Abandoned Mine Land (AML) impacts, as well as information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

Government Publication Date: Aug 18, 2022

Mineral Resource Data System: MRDS

The Mineral Resource Data System (MRDS) is a collection of reports describing metallic and nonmetallic mineral resources throughout the world. Included are deposit name, location, commodity, deposit description, geologic characteristics, production, reserves, resources, and references. This database contains the records previously provided in the Mineral Resource Data System (MRDS) of USGS and the Mineral Availability System/Mineral Industry Locator System (MAS/MILS) originated in the U.S. Bureau of Mines, which is now part of USGS. The USGS has ceased systematic updates of the MRDS database with their focus more recently on deposits of critical minerals while providing a well-documented baseline of historical mine locations from USGS topographic maps.

Government Publication Date: Mar 15, 2016

DOE Legacy Management Sites: LM SITES

The U.S. Department of Energy (DOE) Office of Legacy Management (LM) currently manages radioactive and chemical waste, environmental contamination, and hazardous material at over 100 sites across the U.S. The LM manages sites with diverse regulatory drivers (statutes or programs that direct cleanup and management requirements at DOE sites) or as part of internal DOE or congressionally-recognized programs, such as but not limited to: Formerly Utilized Sites Remedial Action Program (FUSRAP), Uranium Mill Tailings Radiation Control Act (UMTRCA Title I, Tile II), Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA), Resource Conservation and Recovery Act (RCRA), Decontamination and Decommissioning (D&D), Nuclear Waste Policy Act (NWPA). This site listing includes data exported from the DOE Office of LM's Geospatial Environmental Mapping System (GEMS). GEMS Data disclaimer: The DOE Office of LM makes no representation or warranty, expressed or implied, regarding the use, accuracy, availability, or completeness of the data presented herein.

Government Publication Date: Dec 1, 2022

Alternative Fueling Stations: ALT FUELS

This list of alternative fueling stations is sourced from the Alternative Fuels Data Center (AFDC). The U.S. Department of Energy's Office of Energy Efficiency & Renewable Energy launched the AFDC in 1991 as a repository for alternative fuel vehicle performance data, which provides a wealth of information and data on alternative and renewable fuels, advanced vehicles, fuel-saving strategies, and emerging transportation technologies. The data includes Biodiesel (B20 and above), Compressed Natural Gas (CNG), Electric, Ethanol (E85), Hydrogen, Liquefied Natural Gas (LNG), Propane (LPG), and Renewable Diesel (R20 and above) fuel type locations.

Government Publication Date: Mar 23, 2023

Superfunds Consent Decrees: CONSENT DECREES

This list of Superfund consent decrees is provided by the Department of Justice, Environment & Natural Resources Division (ENRD) through a Freedom of Information Act (FOIA) applicable file. This listing includes Consent Decrees for CERCLA or Superfund Sites filed and/or as proposed within the ENRD's Case Management System (CMS) since 2010. CMS may not reflect the latest developments in a case nor can the agency guarantee the accuracy of the data. ENRD Disclaimer: Congress excluded three discrete categories of law enforcement and national security records from the requirements of the FOIA; response is limited to those records that are subject to the requirements of the FOIA; however, this should not be taken as an indication that excluded records do, or do not, exist.

Government Publication Date: Apr 19, 2023

Air Facility System: AFS

This EPA retired Air Facility System (AFS) dataset contains emissions, compliance, and enforcement data on stationary sources of air pollution. Regulated sources cover a wide spectrum; from large industrial facilities to relatively small operations such as dry cleaners. AFS does not contain data on facilities that are solely asbestos demolition and/or renovation contractors, or landfills. ECHO Clean Air Act data from AFS are frozen and reflect data as of October 17, 2014; the EPA retired this system for Clean Air Act stationary sources and transitioned to ICIS-Air.

Government Publication Date: Oct 17, 2014

Registered Pesticide Establishments: SSTS

List of active EPA-registered foreign and domestic pesticide-producing and device-producing establishments based on data from the Section Seven Tracking System (SSTS). The Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) Section 7 requires that facilities producing pesticides, active ingredients, or devices be registered. The list of establishments is made available by the EPA.

Government Publication Date: Mar 30, 2022

Polychlorinated Biphenyl (PCB) Transformers: PCBT

Locations of Transformers Containing Polychlorinated Biphenyls (PCBs) registered with the United States Environmental Protection Agency. PCB transformer owners must register their transformer(s) with EPA. Although not required, PCB transformer owners who have removed and properly disposed of a registered PCB transformer may notify EPA to have their PCB transformer de-registered. Data made available by EPA.

Government Publication Date: Oct 15, 2019

Polychlorinated Biphenyl (PCB) Notifiers: PCB

Facilities included in the national list of facilities that have notified the United States Environmental Protection Agency (EPA) of Polychlorinated Biphenyl (PCB) activities. Any company or person storing, transporting or disposing of PCBs or conducting PCB research and development must notify the EPA and receive an identification number.

Government Publication Date: Nov 3, 2022

State

PFAS Sampling Locations: PFAS SAMPLING

This data is sourced from the State Water Board's GeoTracker Per- and Polyfluoroalkyl Substances (PFAS) Map tool which contains individual sampling points (i.e., soil boring, groundwater monitoring well, drinking water well for municipal drinking water systems, etc.) or a site location with PFAS analytical data. Includes analytical results that are finalized and submitted electronically by the Responsible Parties via GeoTracker's Electronic Submittal of Information Portal, and after it's accepted by a Regional Water Quality Control Board.

Government Publication Date: Mar 14, 2023

Dry Cleaning Facilities: DRYCLEANERS

A list of drycleaner related facilities that have EPA ID numbers. These are facilities with certain SIC codes: power laundries, family and commercial, linen supply, commercial laundry, dry cleaning and pressing machines - Coin Operated Laundry and Dry Cleaning. This is provided by the Department of Toxic Substance Control.

Government Publication Date: Dec 20, 2021

Delisted Drycleaners: DELISTED DRYCLEANERS

Sites removed from the list of drycleaner related facilities that have EPA ID numbers, made available by the California Department of Toxic Substance Control.

Government Publication Date: Jan 31, 2022

Non-Toxic Dry Cleaning Incentive Program: DRYC GRANT

A list of grant recipients of the Non-Toxic Dry Cleaning Incentive Program made available by the California Air Resources Board (CARB). The program provides grants to eligible dry cleaning businesses to assist them in transitioning away from PERC machines to alternative non-toxic and non-smog forming technologies.

Government Publication Date: Jan 31, 2022

PFAS GeoTracker Cleanup Sites: PFAS GT CLEANUPS

A list of applicable cleanup sites from the State Water Resources Control Board's (SWRCB) GeoTracker data management system where one or more of the potential contaminants of concern are identified in the PFAS Master List of PFAS Substances made available by the Environmental Protection Agency (US EPA).

Government Publication Date: Feb 27, 2023

PFOA/PFOS Groundwater: PFAS GW

A list of water wells from the Groundwater Ambient Monitoring and Assessment Program (GAMA) Groundwater Information System with the groundwater chemical perfluorooctanoic acid (PFOA) (NL = 0.014 UG/L) or perfluorooctanoic sulfonate (PFOS) (NL = 0.013 UG/L). The GAMA Groundwater Information System search is made available by California Water Boards.

Government Publication Date: Apr 30, 2023

Hazardous Waste and Substances Site List - Site Cleanup: HWSS CLEANUP

The Hazardous Waste and Substances Sites (Cortese) List is a planning document used by the State, local agencies and developers to comply with the California Environmental Quality Act requirements in providing information about the location of hazardous materials release sites. This list is published by California Department of Toxic Substance Control.

Government Publication Date: Mar 15, 2023

Toxic Pit Cleanup Act Sites: TOXIC PITS

The Toxic Pits Cleanup Act (TPCA) list identifies sites suspected of containing hazardous substances where cleanup has not yet been completed. This list was maintained by the State Water Resources Control Board (SWRCB), is not longer maintained, and updates are not planned.

Government Publication Date: Jul 1, 1995

List of Hazardous Waste Facilities Subject to Corrective Action: DTSC HWF

This is a list of hazardous waste facilities identified in Health and Safety Code (HSC) § 25187.5. These facilities are those where Department of Toxic Substances Control (DTSC) has taken or contracted for corrective action because a facility owner/operator has failed to comply with a date for taking corrective action in an order issued under HSC § 25187, or because DTSC determined that immediate corrective action was necessary to abate an imminent or substantial endangerment.

Government Publication Date: Jul 18, 2016

EnviroStor Inspection, Compliance, and Enforcement: INSP COMP ENF

A list of permitted facilities with inspections and enforcements tracked by the California Department of Toxic Substance Control's (DTSC) EnviroStor data management system.

Government Publication Date: Mar 16, 2023

School Property Evaluation Program Sites: SCH

A list of sites registered with The Department of Toxic Substances Control (DTSC) School Property Evaluation and Cleanup (SPEC) Division. SPEC is responsible for assessing, investigating and cleaning up proposed school sites. The Division ensures that selected properties are free of contamination or, if the properties were previously contaminated, that they have been cleaned up to a level that protects the students and staff who will occupy the new school.

Government Publication Date: Feb 6, 2023

California Hazardous Material Incident Report System (CHMIRS): CHMIRS

A list of reported hazardous material incidents, spills, and releases from the California Hazardous Material Incident Report System (CHMIRS). This list has been made available by the California Office of Emergency Services (OES).

Government Publication Date: Nov 18, 2022

Historical California Hazardous Material Incident Report System (CHMIRS): HIST CHMIRS

A list of reported hazardous material incidents, spills, and releases from the California Hazardous Material Incident Report System (CHMIRS) prior to 1993. This list has been made available by the California Office of Emergency Services (OES).

Government Publication Date: Jan 1, 1993

Handlers from Hazardous Waste Manifest Data: HAZNET

A list of handlers not otherwise classified as Treatment, Storage, Disposal facilities (TSDF) or generators from the facilities and manifests data made available by the California Department of Toxic Substances Control (DTSC) in their Hazardous Waste Tracking System (HWTS).

Government Publication Date: Oct 24, 2016

Generators from Hazardous Waste Manifest Data: HAZ GEN

List of handlers listed as having generated waste from the facilities and manifests data made available by the California Department of Toxic Substances Control (DTSC) in their Hazardous Waste Tracking System (HWTS).

Government Publication Date: Dec 31, 2017

TSDF from Hazardous Waste Manifest Data: HAZ TSD

List of Treatment, Storage, and Disposal Facilities (TSDFs) from the facilities and manifests data made available by the California Department of Toxic Substances Control (DTSC) in their Hazardous Waste Tracking System (HWTS).

Government Publication Date: Dec 31, 2017

Historical Hazardous Waste Manifest Data: HIST MANIFEST

A list of historic hazardous waste manifests received by the Department of Toxic Substances Control (DTSC) from year the 1980 to 1992. The volume of manifests is typically 900,000 - 1,000,000 annually, representing approximately 450,000 - 500,000 shipments.

Government Publication Date: Dec 31, 1992

DTSC Registered Hazardous Waste Transporters: HW TRANSPORT

The California Department of Toxic Substances Control (DTSC) maintains this list of Registered Hazardous Waste Transporters.

Government Publication Date: Mar 23, 2023

Registered Waste Tire Haulers: WASTE TIRE

This list of registered waste tire haulers is maintained by the California Department of Resources Recycling and Recovery.

Government Publication Date: Oct 11, 2022

California Medical Waste Management Program Facility List: MEDICAL WASTE

This list of Medical Waste Management Program Facilities is maintained by the California Department of Public Health. The Medical Waste Management Program (MWMP) regulates the generation, handling, storage, treatment, and disposal of medical waste by providing oversight for the implementation of the Medical Waste Management Act (MWMA). The MWMP permits and inspects all medical waste off-site treatment facilities, medical waste transporters, and medical waste transfer stations. This list contains transporters, treatment, and transfer facilities.

Government Publication Date: Apr 19, 2023

Historical Cortese List: HIST CORTESE

List of sites which were once included on the Cortese list. The Hazardous Waste and Substances Sites (Cortese) List is a planning document used by the State, local agencies and developers to comply with the California Environmental Quality Act requirements for providing information about the location of hazardous sites.

Government Publication Date: Nov 13, 2008

Cease and Desist Orders and Cleanup and Abatement Orders: CDO/CAO

The California Environment Protection Agency "Cortese List" of active Cease and Desist Orders (CDO) and Cleanup and Abatement Orders (CAO). This list contains many CDOs and CAOs that do NOT concern the discharge of wastes that are hazardous materials. Many of the listed orders concern, as examples, discharges of domestic sewage, food processing wastes, or sediment that do not contain hazardous materials, but the Water Boards' database does not distinguish between these types of orders.

Government Publication Date: Dec 6, 2021

California Environmental Reporting System (CERS) Hazardous Waste Sites: CERS HAZ

List of sites in the California Environmental Protection Agency (CalEPA) Regulated Site Portal which fall under the following regulatory programs: Hazardous Chemical Management, Hazardous Waste Onsite Treatment, Household Hazardous Waste Collection, Hazardous Waste Generator, RCRA LQ HW Generator. The CalEPA oversees the statewide implementation of the Unified Program which applies regulatory standards to protect Californians from hazardous waste and materials.

Government Publication Date: Apr 12, 2023

Delisted Environmental Reporting System (CERS) Hazardous Waste Sites: DELISTED HAZ

This database contains a list of sites that were removed from the California Environmental Protection Agency (CalEPA) in the following regulatory programs: Hazardous Chemical Management, Hazardous Waste Onsite Treatment, Household Hazardous Waste Collection, Hazardous Waste Generator, RCRA LQ HW Generator.

Government Publication Date: Nov 29, 2018

Sites in GeoTracker: GEOTRACKER

GeoTracker is the State Water Resource Control Boards' data management system for sites that impact, or have the potential to impact, water quality in California, with emphasis on groundwater. This is a list of sites in GeoTracker that aren't otherwise categorized as LUST, Land Disposal Sites (LDS), Cleanup Sites, or sites having Waste Discharge Requirements (WDR). This listing includes program types such as Underground Injection Control (UIC), Confined Animal Facilities (CAF), Irrigated Lands Regulatory Program, plans, and non-case information.

Government Publication Date: Feb 27, 2023

Mines Listing: MINE

This list includes mine site locations extracted from the Mines Online database, maintained by the California Department of Conservation. Mines Online (MOL) is an interactive web map designed with GIS features that provide information such as the mine name, mine status, commodity sold, location, and other mine specific data. Please note: Mine location information is provided to assist experts in determining the location of mine operators in accordance with California Civil Code section 1103.4 and reflects information reported by mine operators in annual reports provided under Public Resources Code section 2207. While the Division of Mine Reclamation (DMR) attempts to populate MOL with accurate location information, the DMR cannot guarantee the accuracy of operator reported location information.

Government Publication Date: Dec 19, 2022

Recorded Environmental Cleanup Liens: LIEN

The California Department of Toxic Substance Control (DTSC) maintains this list of liens placed upon real properties. A lien is utilized by the DTSC to obtain reimbursement from responsible parties for costs associated with the remediation of contaminated properties.

Government Publication Date: Aug 3, 2022

Waste Discharge Requirements: WASTE DISCHG

List of sites in California State Water Resources Control Board (SWRCB) Waste Discharge Requirements (WDRs) Program in California, made available by the SWRCB via GeoTracker. The WDR program regulates point discharges that are exempt pursuant to Subsection 20090 of Title 27 and not subject to the Federal Water Pollution Control Act. The scope of the WDRs Program also includes the discharge of wastes classified as inert, pursuant to section 20230 of Title 27.

Government Publication Date: Feb 27, 2023

Toxic Pollutant Emissions Facilities: EMISSIONS

A list of criteria and toxic pollutant emissions data for facilities in California made available by the California Environmental Protection Agency - Air Resources Board (ARB). Risk data may be based on previous inventory submittals. The toxics data are submitted to the ARB by the local air districts as requirement of the Air Toxics "Hot Spots" Program. This program requires emission inventory updates every four years.

Government Publication Date: Dec 31, 2020

Clandestine Drug Lab Sites: CDL

The Department of Toxic Substances Control (DTSC) maintains a listing of drug lab sites. DTSC is responsible for removal and disposal of hazardous substances discovered by law enforcement officials while investigating illegal/clandestine drug laboratories.

Government Publication Date: Jan 19, 2021

Tribal

No Tribal additional environmental record sources available for this State.

County

Definitions

Database Descriptions: This section provides a detailed explanation for each database including: source, information available, time coverage, and acronyms used. They are listed in alphabetic order.

Detail Report: This is the section of the report which provides the most detail for each individual record. Records are summarized by location, starting with the project property followed by records in closest proximity.

Distance: The distance value is the distance between plotted points, not necessarily the distance between the sites' boundaries. All values are an approximation.

Direction: The direction value is the compass direction of the site in respect to the project property and/or center point of the report.

Elevation: The elevation value is taken from the location at which the records for the site address have been plotted. All values are an approximation. Source: Google Elevation API.

Executive Summary: This portion of the report is divided into 3 sections:

'Report Summary'- Displays a chart indicating how many records fall on the project property and, within the report search radii.

'Site Report Summary'-Project Property'- This section lists all the records which fall on the project property. For more details, see the 'Detail Report' section.

'Site Report Summary-Surrounding Properties'- This section summarizes all records on adjacent properties, listing them in order of proximity from the project property. For more details, see the 'Detail Report' section.

Map Key: The map key number is assigned according to closest proximity from the project property. Map Key numbers always start at #1. The project property will always have a map key of '1' if records are available. If there is a number in brackets beside the main number, this will indicate the number of records on that specific property. If there is no number in brackets, there is only one record for that property.

The symbol and colour used indicates 'elevation': the red inverted triangle will dictate 'ERIS Sites with Lower Elevation', the yellow triangle will dictate 'ERIS Sites with Higher Elevation' and the orange square will dictate 'ERIS Sites with Same Elevation.'

Unplottables: These are records that could not be mapped due to various reasons, including limited geographic information. These records may or may not be in your study area, and are included as reference.

PSR

Detail Report....20
Radon Information....160
Appendix....161
Liability Notice....163

The ERIS ***Physical Setting Report - PSR*** provides comprehensive information about the physical setting around a site and includes a complete overview of topography and surface topology, in addition to hydrologic, geologic and soil characteristics. The location and detailed attributes of oil and gas wells, water wells, public water systems and radon are also included for review.

The compilation of both physical characteristics of a site and additional attribute data is useful in assessing the impact of migration of contaminants and subsequent impact on soils and groundwater.

Disclaimer

This Report does not provide a full environmental evaluation for the site or adjacent properties. Please see the terms and disclaimer at the end of the Report for greater detail.

Topographic Information

Geologic Units

This maps shows geologic units in the area. Please refer to the report for detailed descriptions.

ERIS

0 0.275 0.55 Miles

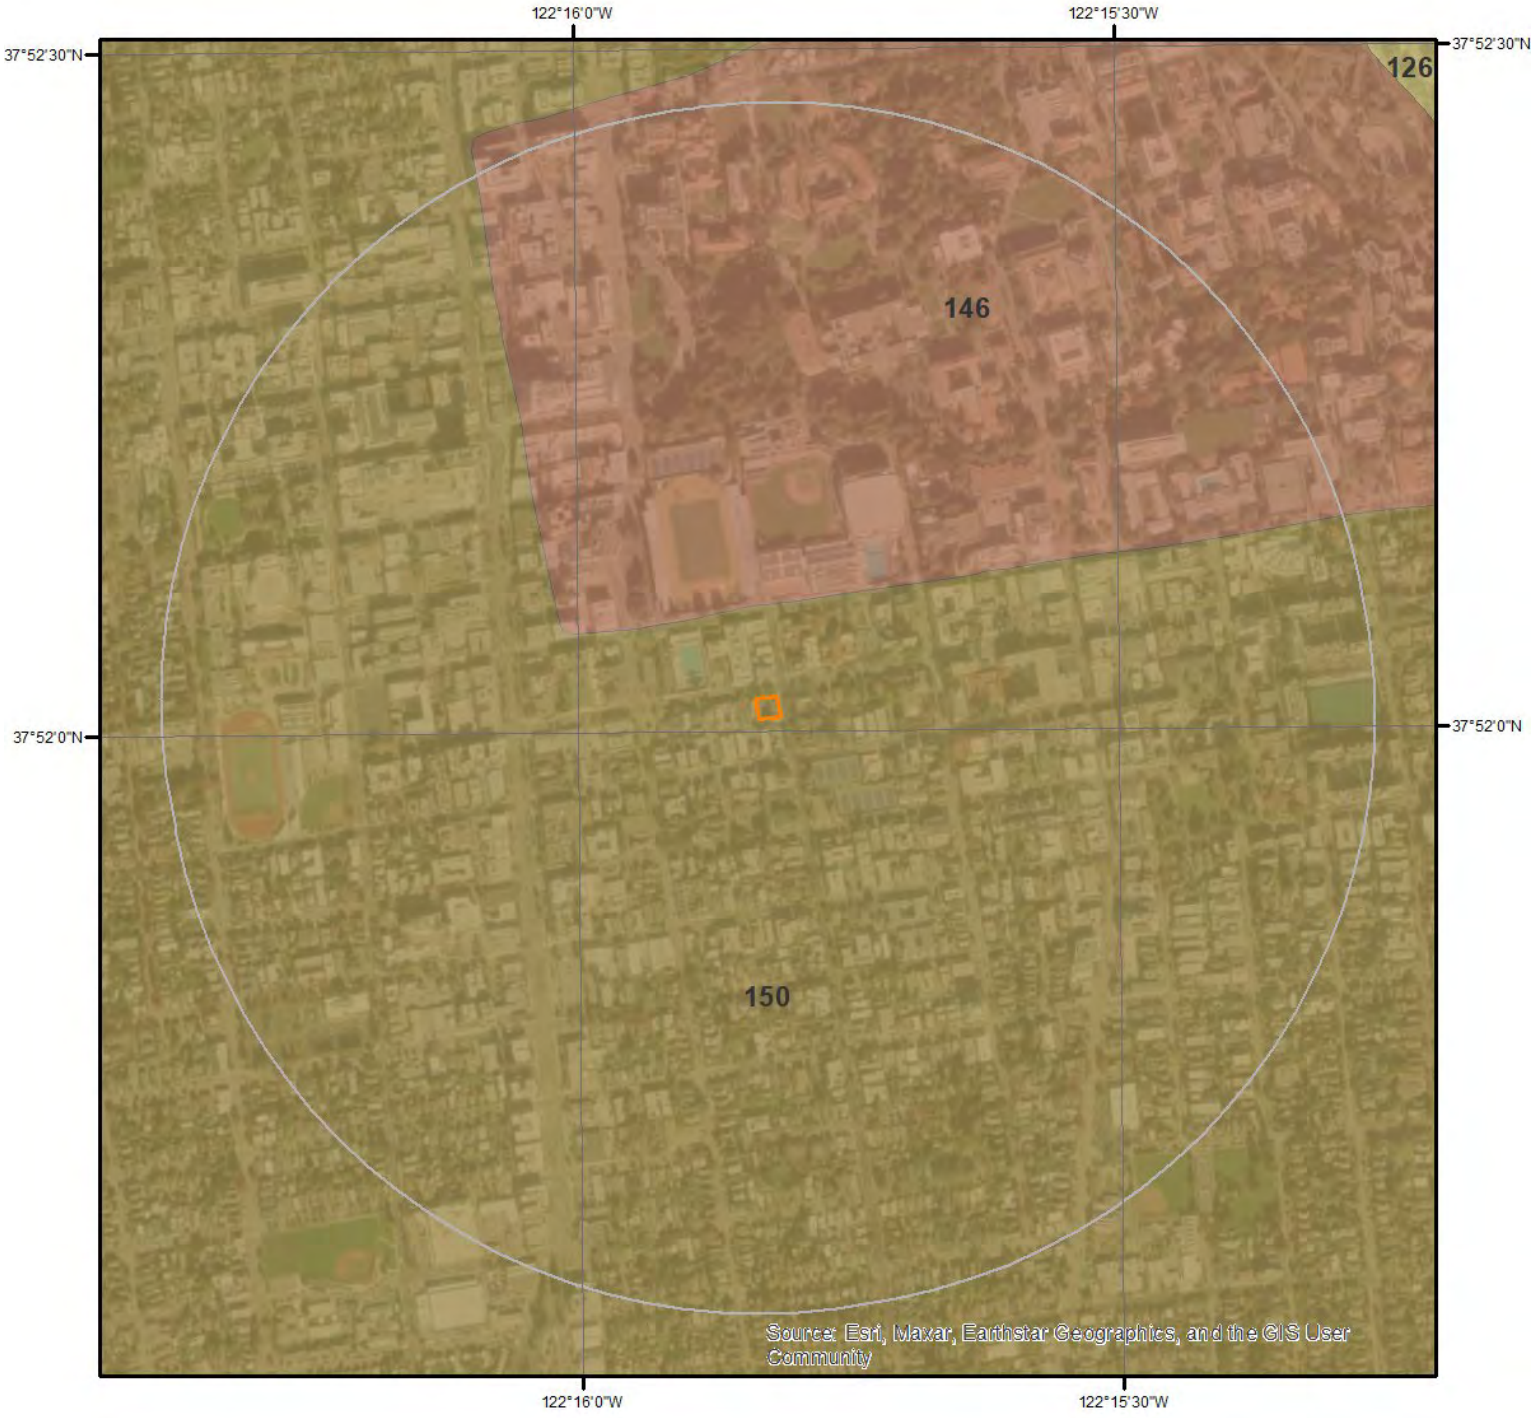
Geologic Information

The previous page shows USGS geology information. Detailed information about each unit is provided below.

Geologic Unit Q

Unit Name:	Quaternary alluvium and marine deposits
Unit Age:	Pliocene to Holocene
Primary Rock Type:	alluvium
Secondary Rock Type:	terrace
Unit Description:	Alluvium, lake, playa, and terrace deposits; unconsolidated and semi-consolidated. Mostly nonmarine, but includes marine deposits near the coast.

Soil Information



SSURGO Soils

0 0.175 0.35 Miles

N

This maps shows SSURGO soil units around the target property. Please refer to the report for detailed soil descriptions.

ERIS

Soil Information

The previous page shows a soil map using SSURGO data from USDA Natural Resources Conservation Service. Detailed information about each unit is provided below.

Map Unit 146 (7.49%)

Map Unit Name:	Urban land

No more attributes available for this map unit

Component Description:

Minor map unit components are excluded from this report.

Map Unit: 146 - Urban land

Component: Urban land (95%)
Generated brief soil descriptions are created for major soil components. The Urban land is a miscellaneous area.

Component: Unnamed (5%)
Generated brief soil descriptions are created for major soil components. The Unnamed soil is a minor component.

Map Unit 150 (92.51%)

Map Unit Name:	Urban land-Tierra complex, 2 to 5 percent slopes
Bedrock Depth - Min:	
Watertable Depth - Annual Min:	
Drainage Class - Dominant:	Moderately well drained
Hydrologic Group - Dominant:	D - Soils in this group have high runoff potential when thoroughly wet. Water movement through the soil is restricted or very restricted.

Major components are printed below

Tierra(50%)

horizon H1(0cm to 30cm)	Loam
horizon H2(30cm to 81cm)	Clay
horizon H3(81cm to 152cm)	Sandy clay loam

Component Description:

Minor map unit components are excluded from this report.

Map Unit: 150 - Urban land-Tierra complex, 2 to 5 percent slopes

Component: Tierra (50%)
The Tierra component makes up 50 percent of the map unit. Slopes are 2 to 5 percent. This component is on dissected fan terraces. The parent material consists of alluvium. Depth to a root restrictive layer, abrupt textural change, inches. The natural drainage class is moderately well drained. Water movement in the most restrictive layer is low. Available water to a depth of 60 inches (or restricted depth) is moderate. Shrink-swell potential is moderate. This soil is not flooded. It is not ponded. There is no zone of water saturation within a depth of 72 inches. Organic matter content in the surface horizon is about 3 percent. Nonirrigated land capability classification is 4e. This soil does not meet hydric criteria. There are no saline horizons within 30 inches of the soil surface.

Component: Urban land (40%)
Generated brief soil descriptions are created for major soil components. The Urban land is a miscellaneous area.

Component: Azule (5%)
Generated brief soil descriptions are created for major soil components. The Azule soil is a minor component.

Component: Danville (5%)
Generated brief soil descriptions are created for major soil components. The Danville soil is a minor component.

Radon Information

This section lists any relevant radon information found for the target property.

Federal EPA Radon Zone for *ALAMEDA* County: **2**

Zone 1: Counties with predicted average indoor radon screening levels greater than 4 pCi/L
Zone 2: Counties with predicted average indoor radon screening levels from 2 to 4 pCi/L
Zone 3: Counties with predicted average indoor radon screening levels less than 2 pCi/L

Federal Area Radon Information for *ALAMEDA* County

No Measures/Homes:	60
Geometric Mean:	0.5
Arithmetic Mean:	0.8
Median:	0.7
Standard Deviation:	1
Maximum:	4
% >4 pCi/L:	0
% >20 pCi/L:	0
Notes on Data Table:	TABLE 1. Screening indoor radon data from the EPA/State Residential Radon Survey of California conducted during 1989-90. Data represent 2-7 day charcoal canister measurements from the lowest level of each home tested.

Appendix

Federal Sources

FEMA National Flood Hazard Layer — **FEMA FLOOD**

The National Flood Hazard Layer (NFHL) data incorporates Flood Insurance Rate Map (FIRM) databases published by the Federal Emergency Management Agency (FEMA), and any Letters Of Map Revision (LOMRs) that have been issued against those databases since their publication date. The FIRM Database is the digital, geospatial version of the flood hazard information shown on the published paper FIRMs. The FIRM Database depicts flood risk information and supporting data used to develop the risk data. The FIRM Database is derived from Flood Insurance Studies (FISs), previously published FIRMs, flood hazard analyses performed in support of the FISs and FIRMs, and new mapping data, where available.

Indoor Radon Data — **INDOOR RADON**

Indoor radon measurements tracked by the Environmental Protection Agency(EPA) and the State Residential Radon Survey.

Public Water Systems Violations and Enforcement Data — **PWSV**

List of drinking water violations and enforcement actions from the Safe Drinking Water Information System (SDWIS) made available by the Drinking Water Protection Division of the US EPA's Office of Groundwater and Drinking Water. Enforcement sensitive actions are not included in the data released by the EPA. Address information provided in SWDIS may correspond either with the physical location of the water system, or with a contact address.

Radon Zone Level — **RADON ZONE**

Areas showing the level of Radon Zones (level 1, 2 or 3) by county. This data is maintained by the Environmental Protection Agency (EPA).

Safe Drinking Water Information System (SDWIS) — **SDWIS**

The Safe Drinking Water Information System (SDWIS) contains information about public water systems as reported to US Environmental Protection Agency (EPA) by the states. Addresses may correspond with the location of the water system, or with a contact address.

Soil Survey Geographic database — **SSURGO**

The Soil Survey Geographic database (SSURGO) contains information about soil as collected by the National Cooperative Soil Survey at the Natural Resources Conservation Service (NRCS). Soil maps outline areas called map units. The map units are linked to soil properties in a database. Each map unit may contain one to three major components and some minor components.

USGS Current Topo — **US TOPO**

US Topo topographic maps are produced by the National Geospatial Program of the U.S. Geological Survey (USGS). The project was launched in late 2009, and the term "US Topo" refers specifically to quadrangle topographic maps published in 2009 and later.

USGS Geology — **US GEOLOGY**

Seamless maps depicting geological information provided by the United States Geological Survey (USGS).

Wells from NWIS — **FED USGS**

The U.S. Geological Survey's National Water Information System (NWIS) is the nation's principal repository of water resources data. The NWIS includes comprehensive information of well-construction details, time-series data for gage height, streamflow, groundwater level, and precipitation and water use data. This NWIW dataset contains select Site Types from the overall NWIS Sites data, limited to the following Group Site Types only: Groundwater Group Site Types: Well, Collector or Ranney type well, Hyporheic-zone well, Interconnected Wells, Multiple wells; Spring Group Site Type: Spring; and Other Group Site Types: Aggregate groundwater use, Cistern.

State Sources

Oil and Gas Wells — **OGW**

A list of Oil and Gas well locations. This is provided by California's Department of Conservation Division of Oil, Gas and Geothermal Resources.

Appendix

Periodic Groundwater Level Measurement Locations **MONITOR WELLS**

Locations of groundwater level monitoring wells in the Department of Water Resources (DWR)'s Periodic Groundwater Levels dataset. The DWR Periodic Groundwater Levels dataset contains seasonal and long-term groundwater level measurements collected by the Department of Water Resources and cooperating agencies.

Well Completion Reports **WATER WELLS**

List of wells from the Well Completion Reports data made available by the California Department of Water Resources' (DWR) Online System for Well Completion Reports (OSWCR). Please note that the majority of well completion reports have been spatially registered to the center of the 1x1 mile Public Land Survey System section that the well is located in.

Liability Notice

Reliance on information in Report: The Physical Setting Report (PSR) DOES NOT replace a full Phase I Environmental Site Assessment but is solely intended to be used as a review of environmental databases and physical characteristics for the site or adjacent properties.

License for use of information in Report: No page of this report can be used without this cover page, this notice and the project property identifier. The information in Report(s) may not be modified or re-sold.

Your Liability for misuse: Using this Service and/or its reports in a manner contrary to this Notice or your agreement will be in breach of copyright and contract and ERIS may obtain damages for such mis-use, including damages caused to third parties, and gives ERIS the right to terminate your account, rescind your license to any previous reports and to bar you from future use of the Service.

No warranty of Accuracy or Liability for ERIS: The information contained in this report has been produced by ERIS Information Inc. ("ERIS") using various sources of information, including information provided by Federal and State government departments. The report applies only to the address and up to the date specified on the cover of this report, and any alterations or deviation from this description will require a new report. This report and the data contained herein does not purport to be and does not constitute a guarantee of the accuracy of the information contained herein and does not constitute a legal opinion nor medical advice. Although ERIS has endeavored to present you with information that is accurate, ERIS Information Inc. disclaims, any and all liability for any errors, omissions, or inaccuracies in such information and data, whether attributable to inadvertence, negligence or otherwise, and for any consequences arising therefrom. Liability on the part of ERIS is limited to the monetary value paid for this report.

Trademark and Copyright: You may not use the ERIS trademarks or attribute any work to ERIS other than as outlined above. This Service and Report(s) are protected by copyright owned by ERIS Information Inc. Copyright in data used in the Service or Report(s) (the "Data") is owned by ERIS or its licensors. The Service, Report(s) and Data may not be copied or reproduced in whole or in any substantial part without prior written consent of ERIS.

APPENDIX D: QUALIFICATIONS/INSURANCE

PARTNER

William A. Mitchell, PG
Partner Associate

Education

Post-Graduate Studies in Geology - California State University, Long Beach
B.S. in Geology - University of California, Davis
Certificate Program, Hazardous Materials Management - University of California, Irvine
Certificate Program, Site Assessment and Remediation - University of California, Irvine

Registrations

California Professional Geologist (PG), No. 6372

Training

40-hour HAZWOPER and annual 8-hour refresher courses (current)

Highlights

30+ years performing Environmental Due Diligence Assessments: Phase I / II Environmental Site Assessments (ESAs); Transaction Screen Assessments; Remediation; Environmental Desktop Reports; and groundwater monitoring
30+ years with conducting environmental investigations, including visual asbestos and lead-based paint surveys, radon sampling, and visual mold/water intrusion inspections of multi-family residential, commercial, and industrial properties
3+ years in the Geotechnical field conducting foundation testing and monitoring services
3+ years in the Engineering Geology field conducting geologic inspections, geologic/seismic investigations, and other engineering geology projects

Experience Summary

Mr. Mitchell is a seasoned Environmental Professional and registered Professional Geologist. He is familiar with all aspects of Environmental Due Diligence reporting and consulting for various purposes, to include: transactional / lender due diligence, regulatory closure, real estate re-development, etc. He has conducted ESAs on a variety of property types and has conducted over 2,500 Phase I ESAs, and over 600 Phase II ESAs, over the past 30 years.

Facilities include: multi-family residential buildings and developments; hospitals; schools/education; mortuaries; manufacturing sites; commercial offices; and warehouses. Also performed assessment services for mass-transit projects, siting proposed alignments for light-rail transportation projects. Phase II Environmental Site Assessments have included soil, soil vapor, and groundwater sampling, UST removals/closure investigations, and monitoring removal of contaminated soil during construction projects.

Project Experience

Environmental Site Assessment & Methane Gas Monitoring / Sewer Project / Los Angeles, CA. Performed methane gas assessments for a proposed 10-mile long sewer project in the Los Angeles area. Project involved a Phase I ESA as well as the installation of methane gas monitoring wells, and the subsequent sampling and analysis of gas contained within the wells.

Site Investigation / Confidential Client / East Palo Alto, CA. Served as Project Manager for a multiphase subsurface soil investigation of a former lawn mower repair shop that operated an underground storage tanks. Included oversight of contractors conducting underground storage tank (UST) and fuel line removal and impacted soil removal. Installed four groundwater monitoring wells and has conducted quarterly groundwater monitoring of the facility for a wide range of petroleum and solvent impacts.

Site Investigation / Confidential Client / Sacramento, CA. Served as Project Manager to investigate a car wash facility which was a former site of a gasoline station. The investigation included the drilling of several borings located in the former UST pit, the former pump islands, and the associated product line.

Site Investigations / Confidential telecommunications clients / Northern California and Northeastern Nevada. Served as Project Manager to investigate over 100 Phase I Environmental Site Assessments of proposed/existing telecommunication (wireless) facilities throughout Northern California and Northeastern Nevada. Some of the site involved conducting soil/groundwater sampling as part of a Phase II Environmental Site Assessment.

UST Abandonment / Confidential Client / Oakland, CA. Served as Project Manager to complete a complex abandonment in place for three fuel USTs located underneath a sidewalk in busy intersection in Oakland, California. Mr. Mitchell secured all permits for the client, drafted workplans that were approved by the local fire and health departments, completed soil and groundwater sampling, and prepared the closure report. Closure was obtained following issuance of the closure report.

Site Investigation / Confidential Client / Sacramento, CA. Served as Project Manager to conduct a Phase I Environmental Site Assessment of a large soup manufacturing facility. The facility had been previously identified as having known soil and groundwater contamination, and extensive regulatory agency reviews were required for completing the assessment.

Site Investigation and Remediation / Confidential Client / Palo Alto, CA. Supervised a geophysical survey of a former gasoline station site that was planned to be developed as an assisted living facility. Found four former USTs that were not found during previous investigations that were completed by other consultants. Supervised the removal of the USTs and monitored the removal of contaminated soil during the construction of the assisted living facility.

Environmental Management / Confidential Petroleum Client / Various Sites in Northern CA. Worked with a major petroleum company on obtaining regulatory site closure of several leaking underground storage tank sites at existing and closed gasoline stations in Northern California. Work included additional site characterization activities and regular regulatory agency contacts in the management of the projects. Successfully obtained regulatory closure on several sites.

PARTNER

Sue Krobthong
Project Manager

Education

Bachelor of Science, Environmental Science, University of California, Riverside, CA

Registrations

EPA Accredited Asbestos Building Inspector (Certificate #217-193-BIR)

Training

Include additional relevant training or courses
EPA Accredited Asbestos Inspector Training (current)

Highlights

Over 12 years of experience in the environmental consulting industry
Phase I Environmental Site Assessments
Phase II Environmental Site Assessments
Transaction Screen Assessments
Environmental Desktop Reports
Soil Vapor Screenings
Soil and Groundwater Remediation and Testing
Health and Safety Compliance
Permitting and Regulatory Compliance
Soil Management Plans
Experienced working for a diverse group of clients including government agencies, developers, national and regional lenders, investors, public/ private equity stakeholders, and property owners

Experience Summary

Ms. Krobthong currently holds the role of a Project Manager and her responsibilities include the preparation and technical review of assessments in line with the American Society of Testing and Materials (ASTM) standard and United States Environmental Protection Agency's All Appropriate Inquiry (AAI) as well as customized client formats, including equity-level projects, Fannie Mae, and Freddie Mac.

Ms. Krobthong has completed thousands of Phase I ESAs and limited environmental scope reports, and reviewed thousands of third-party Phase I, Phase II, and remediation reports. She has also managed and performed Phase I ESA portfolios for city blocks, hospitals, municipal and government owned properties for governmental entities for potential transactions. Ms. Krobthong has conducted sampling for asbestos containing materials (ACMs) and radon surveys. Ms. Krobthong has also assisted in subsurface sampling for soil and groundwater contamination, assisted in soil vapor assessments, oversaw underground storage tank removals, oversaw soil excavation activities and conducted confirmatory sampling in each event.

Project Experience

Sites included gasoline service stations, hotels, dry cleaning plants, auto repair and auto body shops, metal plating facilities, semi-conductor facilities, bulk oil facilities, multi-family properties, commercial office buildings, retail shopping centers, and various industrial manufacturing facilities. Responsibilities included overseeing staff, reviewing draft reports, and conducting field work for various due diligence type projects.

Environmental, Various School Districts, CA. Assessments for existing and proposed school sites (CEQA process per DTSC requirements), that included the completion of the California Department of Education (CDE) Checklist. School Districts include for the Desert Sands Unified School District, Los Angeles Unified School District, San Monica – Malibu Unified School District, Garvey Unified School District, Compton Unified School District and Orange Unified School District.

ISA, Street Widening Projects, Chino and Fontana, CA. Performed Initial Site Assessments (ISA) required by Caltrans for proposed street improvements/widening and development of highways and right-of ways for street widening projects in the City of Chino and Fontana.

Phase I ESA, Former Municipal Airport, Rialto, CA. Managed and prepared various Phase I ESA assessments for potential developers for the redevelopment of a former municipal airport in which she also assisted with soil remedial oversight and closure activities.

Hazardous Materials Audit, Cosmetics Manufacturer, Oxnard, CA. Prepared hazardous material audits, assisted in the completion of business plans, conducted limited compliance audits and health and safety audits for maintaining hazardous materials of a major cosmetics manufacturer located in California.

Desktop Portfolio, Aerospace, Los Angeles, Orange and San Diego Counties, CA. Prepared a portfolio of Third-Party Desktop reviews in which she provided comments on the standard of care for the due diligence for a large aerospace acquisition

Radon Studies, Orange County, CA. Performed radon studies of uranium granite slabs installed in homes throughout the country for a leading granite distributor in Orange County to ease concerns of radon emissions through granite countertops.

Phase I & II ESA, Agricultural, Various, CA. Performed Phase I & II ESAs for proposed residential developments on undeveloped land, former dairy farmland and historical agricultural land.

PARTNER

Jay Grenfell, REPA, LEED AP
National Client Manager, Principal

Education

B.A, Environmental Science, University of California at Berkeley

Registrations

Registered Environmental Property Assessor, National Registry of Environmental Professionals
LEED Accredited Professional, United States Green Building Council

Highlights

22+ years in the environmental and commercial real estate due diligence consulting industry

Extensive experience managing tens of thousands Environmental Site Assessments (ESAs), Property Condition Assessments (PCAs), Seismic Risk Assessments (SRAs), and other due diligence products with an emphasis on understanding stakeholder positions and providing appropriate risk management solutions.

Worked to develop protocols for reporting and compliance with ASTM Standards for Phase I ESAs.

Experience Summary

Mr. Grenfell currently serves as a National Client Manager providing risk management solutions to clients' due diligence and engineering needs. Mr. Grenfell's breadth of experience and understanding of commercial real estate transactions from both an equity investment and lending view allow him to provide risk management consulting that align with client objectives.

Mr. Grenfell conducted and managed thousands of Phase I ESAs on industrial, office, multi-family, government, retail, and hospitality properties prior to assuming his role as a client manager and business development professional. His experience also includes management of large multi-site portfolios for varied and demanding stakeholders, where he mentored field assessors, identifying environmental risks, and provided detailed reports within demanding deadlines. Mr. Grenfell experience includes understanding and coordinating a full suite of due diligence services, including Phase II subsurface investigations, Property Condition Assessments, Seismic Risk Assessments, ALTA Surveys, Asbestos and Lead Surveys, and Energy Audits.

Mr. Grenfell has worked for nationwide and local clients that include commercial developers, mortgage bankers, real estate brokers, individual investors, equity/institutional investment groups, and financial lending institutions, including CMBS lenders, SBA lenders, and GSA (Fannie and Freddie) lenders.

Project Experience

Environmental and Property Condition Due Diligence, County, and City Municipalities. Conducted Phase I ESAs, PCAs, and FCAs for local municipalities in Northern California, including Sonoma and San Mateo Counties, assisting in acquisition due diligence and for capital needs planning of municipality-owned assets.

Multi-Site Portfolio, Nationwide. Managed performance and delivery of summary matrix and complete reports for a 300-site portfolio of Class A high-rise office buildings, at the time valued as the largest real estate transaction in history. Lead scheduled conference calls summarizing and evaluating environmental liabilities for a large stakeholder group.

Phase II Subsurface Investigations, Kansas City, Missouri. Conducted eight Phase II Site Assessments at gasoline stations over a four-day period, coordinating and supervising the advancement of soil borings and collected soil and groundwater samples. Documented results in concise, well-written reports.

Industrial Compliance Evaluation, San Francisco, CA. Managed a compliance evaluation team at an 8,000 employee, 24-hour aircraft maintenance center, evaluating environmental regulatory compliance. Provided solutions and established protocols for ensuring compliance.

Third-Party Report Reviews, Chicago, IL. Conducted 3rd-party reviews of over 150 gasoline stations, documenting previous report findings and providing a matrix listing issues and updated risk-based recommendations.

High Rise Office Buildings, San Francisco. Worked with technical team to manage pre-acquisition due diligence for equity investor of high-rise office buildings in downtown San Francisco. Included equity PCA with specialty evaluations of façade, MEP, Fire and Life Safety, Roof, and ADA. Provided red flag analysis and summary costs tables within 48 hours of initial site visits with final reports provided within 10 business days.

Multi-Site Portfolio, California. Managed performance and delivery of summary matrix and complete reports for a 150-site portfolio of fast-food restaurants providing environmental and property condition assessments with specialty evaluations of roofs and MEP systems.

CERTIFICATE OF LIABILITY INSURANCE

DATE (MM/DD/YYYY) 9/28/2022

THIS CERTIFICATE IS ISSUED AS A MATTER OF INFORMATION ONLY AND CONFERS NO RIGHTS UPON THE CERTIFICATE HOLDER. THIS CERTIFICATE DOES NOT AFFIRMATIVELY OR NEGATIVELY AMEND, EXTEND OR ALTER THE COVERAGE AFFORDED BY THE POLICIES BELOW. THIS CERTIFICATE OF INSURANCE DOES NOT CONSTITUTE A CONTRACT BETWEEN THE ISSUING INSURER(S), AUTHORIZED REPRESENTATIVE OR PRODUCER, AND THE CERTIFICATE HOLDER.

IMPORTANT: If the certificate holder is an ADDITIONAL INSURED, the policy(ies) must have ADDITIONAL INSURED provisions or be endorsed. If SUBROGATION IS WAIVED, subject to the terms and conditions of the policy, certain policies may require an endorsement. A statement on this certificate does not confer rights to the certificate holder in lieu of such endorsement(s).

PRODUCER License # 0M63276 Gallant Risk and Insurance Services, LLC 4160 Temescal Canyon Rd. Suite 214 Corona, CA 92883	CONTACT NAME: PHONE (A/C, No, Ext): (951) 368-0700 FAX (A/C, No): (951) 368-0707 E-MAIL ADDRESS:

PHASE I ENVIRONMENTAL SITE ASSESSMENT REPORT

2360 Ellsworth Street
Berkeley, California 94704

Report Date
June 29, 2023

Partner Project No.
23-410652.2

Prepared for:
Valiance Capital
2425 Channing Way
Berkeley, California 94704

PARTNER

June 29, 2023

Mr. Lucas Butler
Valiance Capital
2425 Channing Way
Berkeley, California 94704

Subject: Phase I Environmental Site Assessment
2360 Ellsworth Street
Berkeley, California 94704
Partner Project No. 23-410652.2

Dear Mr. Butler:

Partner Engineering and Science, Inc. (Partner) is pleased to provide this Phase I Environmental Site Assessment (Phase I ESA) report of the abovementioned address (the "subject property"). This assessment was performed in conformance with the scope and limitations as detailed in the ASTM Practice E1527-21 Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process and Client Agreement.

This assessment included a site reconnaissance as well as research and interviews with representatives of the public, property ownership, site manager, and regulatory agencies. An assessment was made, conclusions stated, and recommendations outlined.

We appreciate your trust in Partner and the opportunity to provide environmental services to you. If you have any questions concerning this report, or if we can assist you in any other matter, please contact me at (415) 992-3755

Sincerely,

Jay Grenfell
National Client Manager

EXECUTIVE SUMMARY

Partner Engineering and Science, Inc. (Partner) has performed a Phase I Environmental Site Assessment (ESA) in accordance with the scope of work and limitations of ASTM Practice E1527-21, the Environmental Protection Agency Standards and Practices for All Appropriate Inquiries (AAI) (40 CFR Part 312) and set forth by Valiance Capital for the property located at 2360 Ellsworth Street in Berkeley, Alameda, California (the "subject property"). The Phase I Environmental Site Assessment is designed to provide Valiance Capital with an assessment concerning environmental conditions (limited to those issues identified in the report) as they exist at the subject property.

Property Description

The subject property is located on the east side of Ellsworth Street and approximately 100 feet south of Durant Avenue within a residential and commercial area of Alameda. Please refer to the table below for a further description of the subject property:

Subject Property Data	
Address(es):	2360 Ellsworth Street, Berkeley, California
Historical Address(es):	2362 Ellsworth Street
Property Use:	Multi-family residential
Land Acreage (Ac):	0.08 Ac
Number of Buildings:	One
Number of Floors:	Three-story with a tuck under parking garage, a storage area, and for a resident laundry room
Gross Building Area (SF):	5,037 SF
Net Rentable Area (SF):	5,037 Sf
Date of Construction:	1964
Parcel Number:	55-1887-2
Type of Construction:	Wood-framed
Current Tenants:	an apartment building consisting of seven residential units for residential use.
Site Assessment Performed By:	William Mitchell of Partner
Site Assessment Conducted On:	June 26, 2023
Regulatory Radius Report Date:	June 15, 2023
Lien Search Date:	N/A
Report Date:	June 27, 2023
FOIAs Date:	June 2023

The subject property is currently occupied by an apartment building consisting of seven residential units. In addition to the current structure, the subject property is also improved with concrete-paved rear yard, associated landscaping, and perimeter fencing.

According to available historical sources, the subject property appears unimproved land from as early as 1890 to at least 1903. A data gap exists between 1904 and 1910; however, this data gap does not appear significant since the subject property was likely unimproved land or was in multi-family residential use as indicated in a 1911 Sanborn Map. The subject property appears to have remained in this use up to present. The existing apartment building appears to have been developed in 1964.

The adjoining properties are tabulated below:

Adjoining Properties	
North:	A law office building (2298 Durant Avenue)
East:	Ellsworth Street followed by: A dental office (2300 Durant Avenue) and an apartment building (2339 Ellsworth Street)
South:	A medical office building (2372 Ellsworth Street) and an apartment building (2239 Channing Way)
West:	A parking garage associated with an apartment building (2236 Durant Avenue)

According to a previous subsurface investigation conducted on a nearby property and topographic map interpretation, the physical setting features of the subject property identify the terrain as sloping to the south with the depth to groundwater in the vicinity of the subject property inferred to be approximately 23 to 28 feet below ground surface (bgs) and groundwater flow inferred to be toward the south.

Findings and Opinions

Recognized Environmental Condition

A recognized environmental condition (REC) refers to the presence of hazardous substances or petroleum products in, on, or at the subject property due to a release to the environment; the likely presence of hazardous substances or petroleum products in, on, or at the subject property due to a release or likely release to the environment; or the presence of hazardous substances or petroleum products in, on, or at the subject property under conditions that pose a material threat of a future release to the environment.

- Partner did not identify any RECs during the course of this assessment.

Controlled Recognized Environmental Condition

A controlled recognized environmental condition (CREC) refers to a REC affecting the subject property that has been addressed to the satisfaction of the applicable regulatory authority or authorities with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls (for example, activity and use limitations or other property use limitations).

- Partner did not identify any CRECs during the course of this assessment.

Historical Recognized Environmental Condition

A historical recognized environmental condition (HREC) refers to a previous release of hazardous substances or petroleum products affecting the subject property that has been addressed to the satisfaction of the applicable regulatory authority or authorities and meeting unrestricted use criteria established by the applicable regulatory authority or authorities without subjecting the subject property to any controls (for example, activity and use limitations or other property use limitations).

- Partner did not identify any HRECs during the course of this assessment.

Business Environmental Risk

A Business Environmental Risk (BER) is a risk which can have a material environmental or environmentally driven impact on the business associated with the current or planned use of commercial real estate, not necessarily related to those environmental issues required to be investigated in this practice. The following was identified during the course of this assessment:

- The potential exists that asbestos-containing materials (ACMs) are present on-site. Readily visible suspect ACMs were observed in good condition.
- Due to the age of the subject property building/buildings, there is a potential that lead-based paint (LBP) is present on-site. Readily visible painted surfaces were observed in good condition.

Significant Data Gaps

No significant data gaps affecting the ability of the Environmental Professional to identify a REC were encountered during this assessment.

Conclusions and Recommendations

Partner has performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM Practice E1527-21 of 2360 Ellsworth Street in Berkeley, Alameda, California (the "subject property"). Any exceptions to, or deletions from, this practice are described in Section 1.5 of this report.

This assessment has revealed no evidence of RECs, CRECs, or HRECs in connection with the subject property; however, BERs were identified. Based on the conclusions of this assessment, Partner recommends the following:

- An Operations and Maintenance (O&M) Program should be implemented in order to safely manage the suspect ACMs and LBP located at the subject property.

Appendix B: Historical/Regulatory Documentation
Appendix C: Regulatory Database Report
Appendix D: Qualifications

1.0 INTRODUCTION

Partner Engineering and Science, Inc. (Partner) has performed a Phase I Environmental Site Assessment (ESA) in conformance with the scope and limitations of ASTM Practice E1527-21 and the Environmental Protection Agency Standards and Practices for All Appropriate Inquiries (AAI) (40 CFR Part 312) for the property located at 2360 Ellsworth Street in Berkeley, Alameda, California (the "subject property"). Any exceptions to, or deletions from, this scope of work are described in the report.

1.1 Purpose

The purpose of this ESA is to identify existing or potential Recognized Environmental Conditions (as defined by ASTM Standard E1527-21) affecting the subject property that: 1) constitute or result in a material violation or a potential material violation of any applicable environmental law; 2) impose any material constraints on the operation of the subject property or require a material change in the use thereof; 3) require clean-up, remedial action or other response with respect to Hazardous Substances or Petroleum Products on or affecting the subject property under any applicable environmental law; 4) may affect the value of the subject property; and 5) may require specific actions to be performed with regard to such conditions and circumstances. The information contained in the ESA Report will be used by Client to: 1) evaluate its legal and financial liabilities for transactions related to foreclosure, purchase, sale, loan origination, loan workout or seller financing; 2) evaluate the subject property's overall development potential, the associated market value and the impact of applicable laws that restrict financial and other types of assistance for the future development of the subject property; and/or 3) determine whether specific actions are required to be performed prior to the foreclosure, purchase, sale, loan origination, loan workout or seller financing of the subject property.

This ESA was performed to permit the User to satisfy one of the requirements to qualify for the innocent landowner, contiguous property owner, or bona fide prospective purchaser limitations on scope of Comprehensive Environmental Response, Compensation and Liability Act (CERCLA) (42 U.S.C. §9601) liability (hereinafter, the "landowner liability protections," or "LLPs"). ASTM Standard E1527-21 constitutes "all appropriate inquiry into the previous ownership and uses of the property consistent with good commercial or customary practice" as defined at 42 U.S.C. §9601(35)(B).

1.2 Scope of Work

The scope of work for this ESA is in accordance with and to the extent necessary to achieve the goal of the requirements set forth in the ASTM Standard E1527-21. This assessment included: 1) a property and adjoining site reconnaissance; 2) interviews with key personnel; 3) a review of historical sources; 4) a review of regulatory agency records; and 5) a review of a regulatory database report provided by a third-party vendor. Partner contacted local agencies, such as environmental health departments, fire departments and building departments to obtain readily ascertainable information to determine any current and/or former hazardous substances usage, storage and/or releases of hazardous substances on the subject property. Additionally, Partner researched readily available information on the presence of activity and use limitations (AULs) at these agencies. As defined by ASTM E1527-21, AULs include both legal (that is, institutional) and physical (that is, engineering) controls that may include legal or physical restrictions or limitations on the use of, or access to, a site or facility: 1) to reduce or eliminate potential exposure to hazardous substances or petroleum products in the soil, soil vapor, groundwater, or surface water on the subject property; or 2) to prevent activities that could interfere with the effectiveness of a response action, in order to ensure maintenance of a condition of no significant risk to public health or the environment. These legal or physical restrictions, which may include institutional and/or engineering controls (IC/ECs), are intended to prevent adverse impacts to individuals or populations that may be exposed to hazardous substances and petroleum products in the soil, soil vapor, groundwater, and/or surface water on a property.

If requested by Client, this report may also include the identification, discussion of, and/or limited sampling of asbestos-containing materials (ACMs), lead-based paint (LBP), mold, and/or radon.

1.3 Limitations

Partner warrants that the findings and conclusions contained herein were accomplished in accordance with the methodologies set forth in the Scope of Work. These methodologies are described as representing good commercial and customary practice for conducting an ESA of a property for the purpose of identifying recognized environmental conditions. There is a possibility that even with the proper application of these methodologies there may exist on the subject property conditions that could not be identified within the scope of the assessment or which were not reasonably identifiable from the available information. Partner believes that the information obtained from the record review and the interviews concerning the subject property is reliable. However, Partner cannot and does not warrant or guarantee that the information provided by these other sources is accurate or complete. The conclusions and findings set forth in this report are strictly limited in time and scope to the date of the evaluations. The conclusions presented in the report are based solely on the services described therein, and not on scientific tasks or procedures beyond the scope of agreed-upon services or the time and budgeting restraints imposed by the Client. No other warranties are implied or expressed.

Some of the information provided in this report is based upon personal interviews, and research of available documents, records, and maps held by the appropriate government and private agencies. This report is subject to the limitations of historical documentation, availability, and accuracy of pertinent records, and the personal recollections of those persons contacted.

This practice does not address requirements of any state or local laws or of any federal laws other than the all appropriate inquiry provisions of the LLPs. Further, this report does not intend to address all of the compliance and safety concerns, if any, associated with the subject property.

Environmental concerns, which are beyond the scope of a Phase I ESA as defined by ASTM include the following: ACMs, LBP, radon, and lead in drinking water. These issues may affect environmental risk at the subject property and may warrant discussion and/or assessment; however, are considered non-scope issues. If specifically requested by the Client, these non-scope issues are discussed in Section 6.3.

1.4 User Reliance

Valiance Capital engaged Partner to perform this assessment in accordance with an agreement governing the nature, scope and purpose of the work as well as other matters critical to the engagement. All reports, both verbal and written, are for the sole use and benefit of Valiance Capital . Either verbally or in writing, third parties may come into possession of this report or all or part of the information generated as a result of this work. In the absence of a written agreement with Partner granting such rights, no third parties shall have rights of recourse or recovery whatsoever under any course of action against Partner, its officers, employees, vendors, successors or assigns. Any such unauthorized user shall be responsible to protect, indemnify and hold Partner, Client and their respective officers, employees, vendors, successors and assigns harmless from any and all claims, damages, losses, liabilities, expenses (including reasonable attorneys' fees) and costs attributable to such Use. Unauthorized use of this report shall constitute acceptance of and commitment to these responsibilities, which shall be irrevocable and shall apply regardless of the cause of action or legal theory pled or asserted. Additional legal penalties may apply.

1.5 Limiting Conditions

The findings and conclusions contain all the limitations inherent in these methodologies that are referred to in ASTM Practice E1527-21.

Specific limitations and exceptions to this ESA are more specifically set forth below:

- Interviews with past or current owners, operators and occupants were not reasonably ascertainable and thus constitute a data gap. Based on information obtained from other historical sources, this data gap is not expected to alter the findings of this assessment.
- Partner requested information relative to deed restrictions and environmental liens from the Report User. This information was not provided at the time of the assessment.
- Partner inspected approximately 14% of all interior units and all common areas. Based on the size and nature of use of the uninspected units (residential tenants), this limited method of inspection is not expected to alter the overall findings of this assessment.
- Partner submitted Freedom of Information Act (FOIA) requests to the Berkeley Building, Planning, and Fire Departments for information pertaining to building records, hazardous substances, underground storage tanks, releases, inspection records, for the subject property. As of this writing, these agencies have not responded to Partner's request. Based on information obtained from other historical resources, this limitation is not expected to alter the overall findings of this assessment.

2.0 SITE DESCRIPTION

2.1 Site Location and Legal Description

The subject property at 2360 Ellsworth Street in Berkeley, California is located on the east side of Ellsworth Street and approximately 100 feet south of Durant Avenue. According to the Alameda County Assessor, the subject property is legally described as Alameda County Assessor Parcel Number (APN) 55-1887-2 and ownership is currently vested in Cascade Capital Berkeley Multi-Family LLC since 2013.

Please refer to Figure 1: Site Location Map, Figure 2: Site Plan, Figure 3: Topographic Map, and Appendix A: Site Photographs for the location and site characteristics of the subject property.

2.2 Current Property Use

The subject property is currently occupied by an apartment building consisting of seven residential units for residential use. Onsite operations consist of multi-family residential. The subject property consists of a three-story building with a partial basement located centrally on the property. In addition to the current structure, the subject property is also improved with concrete-paved rear yard, associated landscaping, and perimeter fencing.

The subject property is designated for R-S for High Density Residential development by the BPD. City of Berkeley.

The subject property was not identified in the regulatory database report of Section 4.2.

2.3 Current Use of Adjoining Properties

The subject property is located within a residential and commercial area of Alameda. During the vicinity reconnaissance, Partner observed the land uses on adjoining properties as defined in ASTM Practice E1527-21 as any real property or properties the border of which is contiguous or partially contiguous with that of the property, or that would be contiguous or partially contiguous with that of the property but for a street, road, or other public thoroughfare separating them. The adjoining properties are tabulated below:

Adjoining Properties	
North:	A law office building (2298 Durant Avenue)
East:	Ellsworth Street followed by: A dental office (2300 Durant Avenue) and an apartment building (2339 Ellsworth Street)
South:	A medical office building (2372 Ellsworth Street) and an apartment building (2239 Channing Way)
West:	A parking garage associated with an apartment building (2236 Durant Avenue)

The adjoining property to the north was identified various databases in the regulatory database report of Section 4.2.

2.4 Physical Setting Sources

2.4.1 Topography

The 2021 United States Geological Survey (USGS) Oakland West, California Quadrangle 7.5-minute series topographic map was reviewed for this ESA. According to the contour lines on the topographic map, the subject property is located at approximately 215 feet above mean sea level (MSL). The contour lines in the area of the subject property indicate the area is sloping gently towards the southwest.

A copy of the most recent topographic map is included as Figure 3 of this report.

2.4.2 Hydrology

While under natural and undisturbed conditions shallow groundwater flow most frequently follows the topography of the land surface, natural or man-made features can affect flow direction, and the presumed flow may not match the actual flow directions at the subject property and vicinity. A nearby groundwater monitoring report suggests the direction of groundwater flow in the vicinity of the subject property is inferred to be toward the south.

According to a previous subsurface investigation conducted on a nearby property, the depth to groundwater in the vicinity of the subject property is inferred to be approximately 23 to 28 feet bgs.

The nearest surface water in the vicinity of the subject property is Strawberry Creek located approximately 0.9 mile and east of the subject property. No settling ponds, lagoons, surface impoundments, wetlands or natural catch basins were observed at the subject property during this assessment.

According to available information, a public water system operated by the East Bay Municipal Utility District (EBMUD) serves the subject property vicinity. The sources of public water for the City of Berkeley are surface water from Mokelumne River Watershed .

2.4.3 Geology/Soils

The subject property is situated within the Coastal Ranges physiographic province of the State of California. The Coast Ranges are mountain ranges (2,000 to 4,000, occasionally 6,000 feet elevation above sea level) and valleys. The ranges and valleys trend northwest, subparallel to the San Andreas Fault. The province terminates on the east where strata dip beneath alluvium of the Great Valley; on the west by the Pacific Ocean with mountains rising sharply from uplifted and terraced, wave-cut coast; on the north by South Fork Mountain, which has the characteristic trend of the Coast Ranges, and on the south by the Transverse Ranges. The uppermost geologic formation underlying the soils at the subject property is Older Alluvium of Pleistocene Age. The formation consists of gravel, sand, silt, and clay.

Based on information obtained from the United States Department of Agriculture (USDA) Natural Resources Conservation Service Web Soil Survey online database, the subject property is mapped as Urban land-Tierra complex. The soil profile for this series is listed as consisting of clay loam from 0-12 inches bgs, clay from 12-32 inches bgs, and sandy clay loam from 32-60 inches bgs. The soils is further characterized as moderately well drained with a vert low to moderately low capacity to transmit water. Slopes range from 2 to 5 percent.

2.4.4 Flood Zone Information

Partner performed a review of the Flood Insurance Rate Map, published by the Federal Emergency Management Agency. According to Community Panel Number 06001C 0057G, dated August 03, 2009, the subject property appears to be located in Zone X (unshaded); defined as area of minimal flood hazard.

A copy of the reviewed flood map is included in Appendix B of this report.

3.0 HISTORICAL INFORMATION

Partner obtained historical use information about the subject property from a variety of sources. A chronological listing of the historical data found is summarized in the table below:

Historical Use Information		
Years	**Resource**	**Description/Use**
1890-1903	Fire Insurance Maps, Topographic Maps	Unimproved Land
1904-1910	Aerial Photographs, Assessor Records, City Directories, Client-Provided Information, Interviews, Fire Insurance Maps, Topographic Maps	Data Gap - Unknown Use
1911-Present	Aerial Photographs, Assessor Records, City Directories, Client-Provided Information, Interviews, Fire Insurance Maps, Topographic Maps	Multi-Family Residential

Tenants on the subject property have included residential listings from as early as 1939 XXXX (20XX-Present).

No potential environmental concerns were identified in association with the current or former use of the subject property.

3.1 Aerial Photograph Review

Partner obtained available aerial photographs of the subject property and surrounding area from Environmental Risk Information Services (ERIS) on June 14, 2023. The inferred uses of the subject property and adjoining properties as interpreted from the aerial photographs in Appendix B are tabulated below:

Date:	*1939, 1946*	*Scale:*	*1"=500'*
Subject Property:	Appears to be developed with a multi-family building		
North:	Appears to be developed with a house		
East:	Appears to be developed with a house across Ellsworth Street		
South:	Appears to be developed with a garage		
West:	Appears to be developed with two garages		

Date:	*1950, 1958*	*Scale:*	*1"=500'*
Subject Property:	No significant changes visible		
North:	Appears to be developed with the existing commercial building		
East:	Appears to be developed with the existing commercial building across Ellsworth Street		
South:	Appears to be developed with the existing commercial building		
West:	No significant changes visible		

Date:	1965, 1968, 1974, 1989, 1991, 1993, 2005, 2009, 2010, 2012, 2014, 2016, 2018, 2021	Scale:	1"=500'
Subject Property:	Appears to be developed with the existing multi-family building		
North:	No significant changes visible		
East:	No significant changes visible		
South:	No significant changes visible		
West:	No significant changes visible		

Copies of the reviewed photographs are included in Appendix B of this report.

3.2 Fire Insurance Maps

Partner reviewed the collection of Fire insurance maps (FIMS) from ERIS on June 15, 2023. The following inferred uses of the subject property and adjoining properties interpreted from the FIMs in Appendix B are tabulated below:

Date:	1890
Subject Property:	Undeveloped land
North:	Undeveloped land
East:	Undeveloped land
South:	Undeveloped land
West:	Undeveloped land

Date:	1894
Subject Property:	No significant changes noted
North:	No significant changes noted
East:	Developed with house across Ellsworth Street
South:	Developed with two houses
West:	No significant changes noted

Date:	1903
Subject Property:	No significant changes noted
North:	Developed with a house
East:	No significant changes noted
South:	No significant changes noted
West:	No significant changes noted

Date:	1911
Subject Property:	Developed with a 2-Flats building (addressed as 2360 and 2362 Ellsworth Street)
North:	No significant changes noted
South:	No significant changes noted
West:	Developed with two small structures

Date:	1929
Subject Property:	No significant changes noted
North:	No significant changes noted
East:	No significant changes noted
South:	Developed with a house and a detached garage
West:	No significant changes noted other than the two small structures are labeled a garages

Date:	1950
Subject Property:	No significant changes noted other than the building is labeled as 3-Flats
North:	Developed with a doctor's office building
East:	Developed with a doctor's office building across Ellsworth Street
South:	Developed with a doctor's office building and a house
West:	No significant changes noted

Date:	1980
Subject Property:	Developed with the existing apartment building, labeled as 8-Flats
North:	No significant changes noted
East:	No significant changes noted
South:	No significant changes noted other than the house has been replaced with an apartment building
West:	No significant changes noted other than their is only one garage shown

Copies of reviewed FIMs are included in Appendix B of this report.

3.3 City Directories

Partner reviewed historical city directories obtained from ERIS on June 20, 2023 for past names and businesses that were listed for the subject property and adjoining properties. The findings are tabulated below:

City Directory Search for 2360 Ellsworth St (Subject Property)	
Year(s)	**Occupant Listed**
1939	Manchester Walter
1945	No Listing
1956	Stevenson Cyril
1961	Stevenson Cyril
1966	Stevenson C, Pidgeon Sheryl A
1968	Campus Typing Service, Multi Tenant Residential

Based on the city directory review, no environmentally sensitive listings were identified for the adjoining property addresses.

Copies of reviewed city directories are included in Appendix B of this report.

3.4 Historical Topographic Maps

Partner reviewed historical topographic maps obtained from ERIS on June 15, 2023. The following inferred uses of the subject property and adjoining properties interpreted from topographic maps in Appendix B and are tabulated below:

Date:	***1895, 1899***
Subject Property:	Depicted as undeveloped
North:	Depicted as developed with a small structure
East:	Depicted as undeveloped land beyond Ellsworth Street
South:	Depicted as undeveloped land
West:	Depicted as undeveloped land

Date:	***1915***
Subject Property:	No significant changes visible
North:	Depicted as undeveloped land
East:	No significant changes visible
South:	No significant changes visible
West:	No significant changes visible

Date:	***1949, 1959, 1968, 1973, 1980, 1996, 2015, 2018, 2021***
Subject Property:	Shaded to depict urban development
North:	Shaded to depict urban development
East:	Shaded to depict urban development
South:	Shaded to depict urban development
West:	Shaded to depict urban development

Copies of reviewed topographic maps are included in Appendix B of this report.

4.0 REGULATORY RECORDS REVIEW

4.1 Regulatory Agencies

4.1.1 Health Department

Regulatory Agency Data	
Name of Agency:	Alameda County Environmental Health Department (ACEHD)
Point of Contact:	Not identified
Agency Address:	1131 Harbor Bay Parkway, Alameda CA
Agency Phone Number:	510-567-6700
Date of Contact:	June 20, 2023
Method of Communication:	Email
Summary of Communication: No records regarding hazardous substance use, storage or releases, or the presence of USTs and AULs on the subject property were on file with the ACEHD.	

4.1.2 Fire Department

Regulatory Agency Data	
Name of Agency:	Berkeley Fire Department (BFD)
Point of Contact:	online records request
Agency Address:	2180 Milvia Street, Berkeley
Agency Phone Number:	(510) 981-2489
Date of Contact:	
Method of Communication:	Online
Summary of Communication: As of the date of this report, Partner has not received a response from the BFD for inclusion in this report.	

4.1.3 Building Department

Regulatory Agency Data	
Name of Agency:	Berkeley Building Department (BBD)
Point of Contact:	online records request
Agency Address:	2180 Milvia Street, Berkeley, California
Agency Phone Number:	(510) 981-2489
Date of Contact:	June 16, 2023
Method of Communication:	Online
Summary of Communication: As of the date of this report, Partner has not received a response from the BBD for inclusion in this report.	

4.1.4 Planning Department

Regulatory Agency Data	
Name of Agency:	Berkeley Planning Department (BPD)
Point of Contact:	Online records request
Agency Address:	2180 Milvia Street, Berkeley, California
Agency Phone Number:	(510) 981-2489
Date of Contact:	June 16, 2023
Method of Communication:	Online
Summary of Communication: As of the date of this report, Partner has not received a response from the BPD for inclusion in this report.	

4.1.5 Oil & Gas Exploration

Regulatory Agency Data	
Name of Agency:	California Geologic Energy Management Division (CalGEM)
Point of Contact:	N/A
Agency Address:	801 K Street, MS 24-01, Sacramento, CA 95814
Agency Phone Number:	(916) 322-1080
Date of Contact:	June 19, 2023
Method of Communication:	Online
Summary of Communication: According to CalGEM, no oil or gas wells are located on or adjoining to the subject property.	

4.1.6 Assessor's Office

Regulatory Agency Data	
Name of Agency:	Alameda County Assessor Office
Point of Contact:	Not identified
Agency Address:	1221 Oak Street, Room 145, Oakland, CA
Agency Phone Number:	(510) 272-3787
Date of Contact:	June 20, 2023
Method of Communication:	Telephone and Online
Summary of Communication: According to records reviewed, the subject property is identified by Assessor Parcel Number (APN) 55-1887-2 and is currently owned by Cascade Capital Berkeley Multi-Family LLC since 2013. No other relevant information was available.	

4.1.7 Air Pollution Control Agency

Regulatory Agency Data	
Name of Agency:	Bay Area Air Quality Management District (BAQMD)
Point of Contact:	Ms. Rochelle Henderson
Agency Address:	375 Beale Street, San Francisco, California
Agency Phone Number:	(415) 749-5000
Date of Contact:	
Method of Communication:	
Summary of Communication:	

4.1.8 Regional Water Quality Agency

Regulatory Agency Data	
Name of Agency:	California Regional Water Quality Control Board (RWQCB)
Point of Contact:	Geotracker Website (www. geotracker.waterboards.ca.gov)
Agency Address:	11020 Sun Center Drive, Suite 200, Rancho Cordova, CA
Agency Phone Number:	(916) 464-3291
Date of Contact:	June 19, 2023
Method of Communication:	Online
Summary of Communication: No records regarding hazardous substance use, storage or releases, or the presence of USTs and AULs on the subject property were on file with the RWQCB..	

4.1.9 Department of Toxic Substances Control

Regulatory Agency Data	
Name of Agency:	California Department of Toxic Substances Control (DTSC)
Point of Contact:	Envirostor Website (www.envirostor.dtsc.ca.gov/public/)
Agency Address:	8800 Cal Center Drive, Sacramento, California 95826
Agency Phone Number:	(916) 255-6449
Date of Contact:	June 19, 2023
Method of Communication:	Online
Summary of Communication: No records regarding hazardous substance use, storage or releases, or the presence of USTs and AULs on the subject property were on file with the DTSC. The DTSC Hazardous Waste Tracking System (HWTS) was researched for hazardous waste manifest data submitted to the California DTSC. No listings were identified for the subject property.	

4.1.10 Berkeley Toxics Management Division (BTMD)

Regulatory Agency Data	
Name of Agency:	Berkeley Toxics Management Division (BTMD)
Point of Contact:	
Agency Address:	1947 Center Street, 3rd Floor, Berkeley,
Agency Phone Number:	(510) 981-7460
Date of Contact:	June 16, 2023
Method of Communication:	Email
Summary of Communication: No records regarding hazardous substance use, storage or releases, or the presence of USTs and AULs on the subject property were on file with the BTMD.	

Copies of pertinent documents are included in Appendix B of this report.

4.2 Mapped Database Records Search

The regulatory database report provided by ERIS documents the listing of sites identified on federal, state, county, city, and tribal (when applicable) standard source environmental databases within the approximate minimum search distance (AMSD) specified by ASTM Practice E1527-21. The data from these sources are updated as these data are released and integrated into one database. The information contained in this report was compiled from publicly available sources.

The environmental database information is used to identify environmental concerns in connection with the subject property. The listings also serve to identify the known indications of the storage, use, generation, disposal, or release of hazardous substance at the subject property and the potential for contaminants to migrate onto the subject property from off-site sources in groundwater or soil in the form of liquids or vapor.

Using the ASTM definition of migration, Partner considers the migration of hazardous substances or petroleum products in any form onto the subject property during the evaluation of each site listed on the radius report, which includes solid, liquid, and vapor.

4.2.1 Regulatory Database Summary

The following table lists the sites as categorized by the regulatory database within the prescribed AMSD. The locations of the sites are plotted utilizing a geographic information system, which geocodes the site addresses. The accuracy of the geocoded locations is approximately +/-300 feet.

Database Report Data				
Database	**AMSD Radius (mile)**	**Listings Identified**		
		Subject Property	**Adjoining Properties**	**Surrounding Area Sites of Concern**
Federal NPL	1.00	N	N	N
Delisted NPL Site	0.50	N	N	N
Federal SEMS Site	0.50	N	N	N
Federal SEMS-ARCHIVE	0.50	N	N	N
Federal RCRA CORRACTS Facility	1.00	N	N	N
Federal RCRA TSDF Facility	0.50	N	N	N
Federal RCRA Generators Site (LQG, SQG, VSQG, CESQG)	Subject and Adjoining	N	N	N

Database Report Data				
Database	**AMSD Radius (mile)**	**Listings Identified**		
		Subject Property	**Adjoining Properties**	**Surrounding Area Sites of Concern**
Federal IC/EC Registries	Subject Property	N	N	N
Federal ERNS Site	Subject Property	N	N	N
State/Tribal Equivalent NPL	1.00	N	N	N
State/Tribal Equivalent CERCLIS	1.00	N	N	N
State/Tribal Landfill/Solid Waste Disposal Site	0.50	N	N	N
State/Tribal Leaking Storage Tank Site (LUST/LPST)	0.50	N	N	**Y**
State/Tribal Registered Storage Tank Sites (UST/AST)	Subject and Adjoining	N	N	N
State/Tribal IC/EC Registries	Subject and Adjoining	N	N	N
State/Tribal Voluntary Cleanup Sites (VCP)	0.50	N	N	N
State/Tribal Spills	0.25	N	N	N
Federal Brownfield Sites	0.50	N	N	N
State Brownfield Sites	0.50	N	N	N

4.2.2 Subject Property Listings

The subject property is not identified in the regulatory database report.

4.2.3 Adjoining Property Listings

The adjoining property to the north is identified as a HAZNET site in the regulatory database report,, and the adjacent property to the east is found on HAZNET, HAZ GEN, and CUPA Berkeley site in the regulatory database report, as discussed below:

Adjoining Property Database Listing	
Property Name:	The Amicus Group
Address:	2298 Durant Avenue
Direction:	North
Hydrological Gradient:	Up-Gradient
Database Listing:	HAZNET
Substance Involved:	None reported
Years of Operation:	Not identified
Status:	Closed
Discussion:	The business opened a United States Environmental Protection Agency (USEPA) Hazardous Waste Generator Number (Generator Number) in 2001 that went inactive in 2002. Based on the nature of the database listing and the lack of reported releases, this

	site is not expected to represent a significant environmental concern and it is unlikely that a regulatory file review for this site would alter the findings of this assessment.

Adjoining Property Database Listing	
Property Name:	Thomas E. Smithers DDS
Address:	2300 Durant Avenue
Direction:	East
Hydrological Gradient:	Cross-Gradient
Database Listing:	HAZNET, CUPA Berkeley
Substance Involved:	None reported
Years of Operation:	Not identified
Status:	Closed
Discussion:	This site is identified on the HAZNET database as having opened a United States a Generator Number in 2000 that went inactive in 2007. The dentist is also listed on the CUPA Berkeley database as an inactive hazardous waste generator facility under the oversight of the Berkeley Toxics agency. Based on the nature of the database listings and the lack of reported releases, this site is not expected to represent a significant environmental concern and it is unlikely that a regulatory file review for this site would alter the findings of this assessment.

Adjoining Property Database Listing	
Property Name:	Keneth Cusick DDS
Address:	2300 Durant Avenue
Direction:	East
Hydrological Gradient:	Cross-Gradient
Database Listing:	HAZNET, CUPA Berkeley
Substance Involved:	None reported
Years of Operation:	Not identified
Status:	Closed
Discussion:	This site is identified on the HAZNET database as having opened a United States a Generator Number in 1994 that went inactive in 2001. The dentist is also listed on the CUPA Berkeley database as an inactive hazardous waste generator facility under the oversight of the Berkeley Toxics agency. Based on the nature of the database listings and the lack of reported releases, this site is not expected to represent a significant environmental concern and it is unlikely that a regulatory file review for this site would alter the findings of this assessment.

Adjoining Property Database Listing	
Property Name:	A. Olson DDS
Address:	2300 Durant Avenue
Direction:	East
Hydrological Gradient:	Cross-Gradient
Database Listing:	CUPA Berkeley

Substance Involved:	None reported
Years of Operation:	Not identified
Status:	Closed
Discussion:	This site is identified on the CUPA Berkeley database as an inactive hazardous waste generator facility under the oversight of the Berkeley Toxics agency. Based on the nature of the database listing and the lack of reported releases, this site is not expected to represent a significant environmental concern and it is unlikely that a regulatory file review for this site would alter the findings of this assessment.

Adjoining Property Database Listing	
Property Name:	James Olson DDS
Address:	2300 Durant Avenue
Direction:	East
Hydrological Gradient:	Cross-Gradient
Database Listing:	HAZ GEN
Substance Involved:	None reported
Years of Operation:	Not identified
Status:	Closed
Discussion:	This site is identified on the HAZ GEN database as having opened opened a United States a Generator Number in 2000 that went inactive in 2016. Based on the nature of the database listings and the lack of reported releases, this site is not expected to represent a significant environmental concern and it is unlikely that a regulatory file review for this site would alter the findings of this assessment.

Based on the findings, vapor migration is not considered an environmental concern at this time.

4.2.4 Surrounding Area Listings of Concern to Subject Property

No sites of concern are identified in the regulatory database report.

4.2.5 Unplottable Listings

No unplottable listings of concern are identified in the regulatory database report.

A copy of the regulatory database report is included in Appendix C of this report.

5.0 USER PROVIDED INFORMATION AND INTERVIEWS

In order to qualify for one of the *Landowner Liability Protections (LLPs)* offered by the Small Business Liability Relief and Brownfields Revitalization Act of 2001 (the *Brownfields Amendments*), the *User* must conduct the following inquiries required by 40 CFR 312.25, 312.28, 312.29, 312.30, and 312.31. The *User* should provide the following information to the *environmental professional*. Failure to provide this information could result in a determination that *all appropriate inquiries* is not complete. The *User* is asked to provide information or knowledge of the following:

- Review Title and Judicial Records for Environmental Liens and AULs
- Specialized Knowledge or Experience of the User
- Actual Knowledge of the User
- Reason for Significantly Lower Purchase Price
- Commonly Known or *Reasonably Ascertainable* information
- Degree of Obviousness
- Reason for Preparation of this Phase I ESA

Fulfillment of these user responsibilities is key to qualification for the identified defenses to CERCLA liability. Partner requested our Client to provide information to satisfy User Responsibilities as identified in Section 6 of the ASTM guidance.

Pursuant to ASTM Practice E1527-21, Partner requested the following site information from Valiance Capital (User of this report).

User Responsibilities		
Item	**Provided By User**	**Not Provided By User**
AAI User Questionnaire	X	
Title Records, Environmental Liens, and AULs		X
Specialized Knowledge	X	
Actual Knowledge	X	
Valuation Reduction for Environmental Issues	X	
Identification of Key Site Manager		X
Reason for Performing Phase 1 ESA		X
Prior Environmental Reports		X
Other	X	

5.1 Interviews

5.1.1 Interview with Owner

The owner of the subject property since 2013, identified as Cascade Capital Berkeley Multi-Family LLC, was not available to be interviewed at the time of the assessment.

5.1.2 Interview with Report User

Mr. Lucas Butler, report user, was not aware of any pending, threatened, or past litigation relevant to hazardous substances or petroleum products in, on, or from the subject property; any pending, threatened, or past administrative proceedings relevant to hazardous substances or petroleum products in, on, or from

the subject property; or any notices from a governmental entity regarding any possible violation of environmental laws or possible liability relating to hazardous substances or petroleum products.

The report used stated that the subject property was developed in 1964 for Multi-Family Residential use. Prior to that, the subject property was Multi-Family Residential as early as not indicated.

5.1.3 Interview with Key Site Manager

A key site manager was not provided to be interviewed at the time of this assessment.

5.1.4 Interviews with Past Owners, Operators and Occupants

Interviews with past owners, operators, and occupants were not conducted since information regarding the potential for contamination at the subject property was obtained from other sources.

5.2 User Provided Information

5.2.1 Title Records, Environmental Liens, and AULs

Partner was not provided with title records or environmental lien and AUL information for review as part of this assessment.

5.2.2 Specialized Knowledge

The User did not have specialized knowledge of environmental conditions associated with the subject property at the time of the assessment.

5.2.3 Actual Knowledge of the User

The User was not aware of environmental liens and/or AULs encumbering the subject property or in connection with the subject property at the time of the assessment.

5.2.4 Valuation Reduction for Environmental Issues

The User was not aware of any reductions in property value due to environmental issues.

5.2.5 Commonly Known or Reasonably Ascertainable Information

The User did provide information that is commonly known or reasonably ascertainable within the local community about the subject property at the time of the assessment. According the User, the subject property was developed for multi-family purposes in 1964.

5.2.6 Previous Reports and Other Provided Documentation

The following information was provided to Partner for review during the course of this assessment:

Property Details Report, 2360 Ellsworth Street, Berkeley, California 94794-1577, Prepared for: Not identified, Prepared by: Title Pro 247 (April 14, 2023)

The document provided the current owner as Cascade Capital Berkeley Multi Family I LLC, and listed the building construction date as 1964. No environmental liens or AULs were identified in the document.

6.0 SITE RECONNAISSANCE

The weather at the time of the site visit was sunny and clear. Refer to Section 1.5 for limitations encountered during the field reconnaissance and Sections 2.1 and 2.2 for subject property operations. The table below provides the site assessment details:

Site Assessment Data	
Site Assessment Performed By:	William Mitchell
Site Assessment Conducted On:	June 26, 2023

The table below provides the subject property personnel interviewed during the field reconnaissance:

Site Visit Personnel for the Subject Property			
Name	**Title/Role**	**Contact Number**	**Site Walk* Yes/No**
Mr. Sirabhop (Pepe) Sakulkerewatana	Key Site Manager	(510) 517-8140	Yes
* Accompanied Partner during the field reconnaissance activities and provided information pertaining to the current operations and maintenance of the subject property			

No potential environmental concerns were identified during the onsite reconnaissance.

6.1 General Site Characteristics

6.1.1 Solid Waste Disposal

Solid waste generated at the subject property is disposed of in commercial dumpsters located on the east side of the subject property. An independent solid waste disposal contractor, City of Berkeley, removes solid waste from the subject property. Solid waste generated at the subject property includes household-type trash. No evidence of illegal dumping of solid waste was observed during the Partner site reconnaissance.

6.1.2 Sewage Discharge and Disposal

Sanitary discharges on the subject property are directed into the municipal sanitary sewer system. The East Bay Municipal Utility District (EBMUD) services the subject property vicinity. No wastewater treatment facilities were observed or reported on the subject property. No septic systems were observed or reported on the subject property.

6.1.3 Stormwater and Surface Water Drainage

Stormwater is removed from the subject property primarily by sheet flow action across the paved surfaces towards a stormwater drain located in front of the basement parking garage, and in stormwater drains located in the public right of way. On-site storm water drains discharge to municipal owned and maintained storm sewer system. No drywells were identified on the subject property.

6.1.4 Source of Heating and Cooling

Heating and cooling systems as well as domestic hot water equipment are fueled by natural gas and electricity, respectively, provided by the Pacific Gas & Electric Company ()PG&E). The mechanical system is comprised of electrical air conditioner and natural gas furnace in each apartment unit Hot water is provided by central natural gas boiler units

6.1.5 Wells and Cisterns

No aboveground evidence of wells or cisterns was observed during the site reconnaissance.

6.1.6 Wastewater

Domestic wastewater generated at the subject property is disposed by means of the sanitary sewer system. No industrial processes are currently performed at the subject property.

6.1.7 Septic Systems

No septic systems were observed or reported on the subject property.

6.1.8 Additional Site Observations

No additional general site characteristics were observed during the site reconnaissance.

6.2 Potential Environmental Hazards

6.2.1 Hazardous Substances and Petroleum Products Used or Stored at the Site

No hazardous substances or petroleum products were observed on the subject property during the site reconnaissance.

Small quantities of general maintenance supplies were found to be properly labeled and stored at the time of the assessment with no signs of leaks, stains, or spills. The storage and use of maintenance supplies does not appear to pose a significant threat to the environmental integrity of the subject property at this time.

6.2.2 Aboveground & Underground Hazardous Substance or Petroleum Product Storage Tanks (ASTs/USTs)

No evidence of current or former ASTs or USTs was observed during the site reconnaissance.

6.2.3 Evidence of Releases

No spills, stains, or other indications that a surficial release has occurred at the subject property were observed.

6.2.4 Polychlorinated Biphenyls (PCBs)

No potential PCB-containing equipment (transformers, oil-filled switches, hoists, lifts, dock levelers, hydraulic elevators, etc.) was observed on the subject property during Partner's reconnaissance.

6.2.5 Strong, Pungent or Noxious Odors

No strong, pungent or noxious odors were evident during the site reconnaissance.

6.2.6 Pools of Liquid

No pools of liquid were observed on the subject property during the site reconnaissance.

6.2.7 Drains, Sumps and Clarifiers

No drains, sumps, or clarifiers, other than those associated with storm water removal, were observed on the subject property during the site reconnaissance.

6.2.8 Pits, Ponds and Lagoons

No pits, ponds, or lagoons were observed on the subject property.

6.2.9 Stressed Vegetation

No stressed vegetation was observed on the subject property.

6.2.10 Additional Potential Environmental Hazards

No additional environmental hazards, including landfill activities or radiological hazards, were observed.

6.3 Non-ASTM Services

6.3.1 Asbestos-Containing Materials (ACMs)

Asbestos is the name given to a number of naturally occurring, fibrous silicate minerals mined for their useful properties such as thermal insulation, chemical and thermal stability, and high tensile strength. The Occupational Safety and Health Administration (OSHA) regulation 29 CFR 1926.1101 requires certain construction materials to be presumed to contain asbestos, for purposes of this regulation. All thermal system insulation (TSI), surfacing material, and asphalt/vinyl flooring that are present in a building that have not been appropriately tested are "presumed asbestos-containing material" (PACM).

The subject property building was constructed in 1964. Partner has conducted a limited, visual evaluation of accessible areas for the presence of suspect ACM at the subject property. The objective of this visual survey was to note the presence and condition of suspect ACM observed. Please refer to the table below for identified suspect ACM:

Suspect ACMs			
Suspect ACM	**Location**	**Friable Yes/No**	**Physical Condition**
Drywall Systems	Throughout Building Interior	No	Good

Based on this building's date of construction, prior to disturbance, Partner recommends a comprehensive asbestos survey of the property be completed to determine the presence, condition, friability and likely future condition of suspect or confirmed ACM. All suspect materials must be handled as ACM according to local, state and federal regulations until the results of sampling and analysis indicate the material is a non-ACM.

Partner was not provided building plans or specifications for review, which may have been useful in determining areas likely to have used ACM.

6.3.2 Lead-Based Paint (LBP)

Lead is a highly toxic metal that affects virtually every system of the body. LBP is defined as any paint, varnish, stain, or other applied coating that has 1 mg/cm2 (or 5,000 µg/g or 0.5% by weight) or more of lead. Congress passed the Residential Lead-Based Paint Hazard Reduction Act of 1992, also known as "Title X," to protect families from exposure to lead from paint, dust, and soil. Under Section 1017 of Title X, intact LBP on most walls and ceilings is not considered a "hazard," although the condition of the paint should be monitored and maintained to ensure that it does not become deteriorated. Further, Section 1018 of this law directed the Housing and Urban Development (HUD) and the US EPA to require the disclosure of known information on LBP and LBP hazards before the sale or lease of most housing built before 1978.

Based on the age of the subject property building (pre-1978), there is a potential that LBP is present.

Actual material samples would need to be collected in order to determine if LBP is present.

6.3.3 Radon

Radon is a colorless, odorless, naturally occurring, radioactive, inert, gaseous element formed by radioactive decay of radium (Ra) atoms. The US EPA has prepared a map to assist National, State, and local organizations to target their resources and to implement radon-resistant building codes. The map divides the country into three Radon Zones, according to the table below:

EPA Radon Zones		
EPA Zones	**Average Predicted Radon Levels**	**Potential**
Zone 1	Exceed 4.0 pCi/L	Highest
Zone 2	Between 2.0 and 4.0 pCi/L	Moderate
Zone 3	Less than 2.0 pCi/L	Low

It is important to note that the EPA has found homes with elevated levels of radon in all three zones, and the US EPA recommends site-specific testing in order to determine radon levels at a specific location. However, the map does give a valuable indication of the propensity of radon gas accumulation in structures.

Review of the US EPA Map of Radon Zones places the subject property in Zone 2. Based upon the radon zone classification, radon is not considered an environmental concern.

6.3.4 Lead in Drinking Water

According to available information, a public water system operated by the East Bay Municipal Utility District (EBMUD) serves the subject property vicinity. The sources of public water for the City of Berkeley are surface water from Mokelumne River Watershed According to the 2022 Annual Water Quality Report, water supplied to the subject property is in compliance with all State and Federal regulations pertaining to drinking water standards, including lead and copper. Water sampling was not conducted to verify water quality.

6.3.5 Mold

Molds are microscopic organisms found virtually everywhere, indoors and outdoors. Mold will grow and multiply under the right conditions, needing only sufficient moisture (e.g.in the form of very high humidity, condensation, or water from a leaking pipe, etc.) and organic material (e.g., ceiling tile, drywall, paper, or natural fiber carpet padding).

No obvious indications of water damage or mold growth were observed during Partner's visual assessment.

6.3.6 Wetlands

The subject property does not appear to be a designated wetland area based on information obtained from the United States Fish and Wildlife Service; however, a comprehensive wetlands survey would be required in order to formally determine actual wetlands on the subject property. No settling ponds, lagoons, surface impoundments, wetlands or natural catch basins were observed at the subject property during this assessment.

6.4 Adjoining Property Reconnaissance

The adjoining property reconnaissance consisted of observing the adjoining properties from the subject property premises. No items of environmental concern were identified on the adjoining properties during the site assessment, including hazardous substances, petroleum products, ASTs, USTs, evidence of releases, PCBs, strong or noxious odors, pools of liquids, sumps or clarifiers, pits or lagoons, stressed vegetation, or any other potential environmental hazards.

7.0 VAPOR ENCROACHMENT CONDITIONS

Partner conducted a limited non-intrusive vapor screening on the subject property to identify, to the extent feasible, the potential for vapor encroachment conditions (VECs) in connection with the subject property. This included consideration of chemicals of concern (COC) that may migrate as vapors into the subsurface of the subject property as a result of contaminated soil and groundwater on or near the property.

This screening utilized readily available data sources previously discussed in this Phase I ESA that includes:

- the physical setting of the subject property (Section 2.4),
- standard historical sources for the subject property, adjoining, and surrounding area (Section 3.0),
- known or potentially contaminated sites as identified from information from regulatory agencies and sites on Federal, State, tribal and local databases (Section 4.0), and
- information from the site reconnaissance (Section 6.0) of the subject property and observations of the surrounding properties.

The results of our data collection, reconnaissance, and analysis are tabulated below:

Potential for Vapor Encroachment to Impact the Subject Property	
Area of Concern	***Likely or Known VEC to Subject Property***
Subject Property Existing Operations or Conditions	None identified that impact the subject property. Refer to Sections 2.0 Site Description and 6.0 Site Reconnaissance and discussion below.
Historical Uses of the Subject Property	None identified that impact the subject property. Refer to Section 3.0 Historical Use and discussion below.
Adjoining Property Operations or Existing Conditions	None identified that impact the subject property. Refer to Sections 2.3 Current Use of Adjoining Properties and 6.4 Adjoining Property Site Reconnaissance and discussion below.
Historical Uses of Adjoining Properties or Nearby Properties	None identified that impact the subject property. Refer to Section 3.0 Historical Use and discussion below.
Regulatory Review of sites identified on Federal, State, tribal and Local Environmental Databases which were located in the AMSD	None identified that impact the subject property. Refer to Section 4.0 Regulatory Review and discussion below.

Based on the findings of the limited non-intrusive vapor screening, vapor intrusion is unlikely to be an issue of concern in connection with the existing structures on the subject property. As such, no further assessment is recommended.

8.0 FINDINGS AND CONCLUSIONS

Findings and Opinions

Recognized Environmental Condition

A recognized environmental condition (REC) refers to the presence of hazardous substances or petroleum products in, on, or at the subject property due to a release to the environment; the likely presence of hazardous substances or petroleum products in, on, or at the subject property due to a release or likely release to the environment; or the presence of hazardous substances or petroleum products in, on, or at the subject property under conditions that pose a material threat of a future release to the environment.

- Partner did not identify any RECs during the course of this assessment.

Controlled Recognized Environmental Condition

A controlled recognized environmental condition (CREC) refers to a REC affecting the subject property that has been addressed to the satisfaction of the applicable regulatory authority or authorities with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls (for example, activity and use limitations or other property use limitations).

- Partner did not identify any CRECs during the course of this assessment.

Historical Recognized Environmental Condition

A historical recognized environmental condition (HREC) refers to a previous release of hazardous substances or petroleum products affecting the subject property that has been addressed to the satisfaction of the applicable regulatory authority or authorities and meeting unrestricted use criteria established by the applicable regulatory authority or authorities without subjecting the subject property to any controls (for example, activity and use limitations or other property use limitations).

- Partner did not identify any HRECs during the course of this assessment.

Business Environmental Risk

A Business Environmental Risk (BER) is a risk which can have a material environmental or environmentally driven impact on the business associated with the current or planned use of commercial real estate, not necessarily related to those environmental issues required to be investigated in this practice. The following was identified during the course of this assessment:

- The potential exists that asbestos-containing materials (ACMs) are present on-site. Readily visible suspect ACMs were observed in good condition.
- Due to the age of the subject property building/buildings, there is a potential that lead-based paint (LBP) is present on-site. Readily visible painted surfaces were observed in good condition.

Significant Data Gaps

No significant data gaps affecting the ability of the Environmental Professional to identify a REC were encountered during this assessment.

Conclusions and Recommendations

Partner has performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM Practice E1527-21 of 2360 Ellsworth Street in Berkeley, Alameda, California (the "subject property"). Any exceptions to, or deletions from, this practice are described in Section 1.5 of this report.

This assessment has revealed no evidence of RECs, CRECs, or HRECs in connection with the subject property; however, BERs were identified. Based on the conclusions of this assessment, Partner recommends the following:

- An Operations and Maintenance (O&M) Program should be implemented in order to safely manage the suspect ACMs and LBP located at the subject property.

9.0 SIGNATURES OF ENVIRONMENTAL PROFESSIONALS

Partner has performed a Phase I Environmental Site Assessment of the property located at 2360 Ellsworth Street in Berkeley, Alameda, California in conformance with the scope and limitations of the protocol and the limitations stated earlier in this report. Exceptions to or deletions from this protocol are discussed earlier in this report.

By signing below, Partner declares that, to the best of our professional knowledge and belief, we meet the definition of *Environmental Professional* as defined in §312.10 of 40 CFR §312. Partner has the specific qualifications based on education, training, and experience to assess a *property* of the nature, history, and setting of the subject *property*. Partner has developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

RE: CITY DIRECTORY RESEARCH
2360 Ellsworth Street
BERKELEY,CA 94704

Thank you for contacting ERIS for an City Directory Search for the site described above. Our staff has conducted a reverse listing City Directory search to determine prior occupants of the subject site and adjacent properties. We have provided the nearest addresses(s) when adjacent addresses are not listed. If we have searched a range of addresses, all addresses in that range found in the Directory are included.

Note: Reverse Listing Directories generally are focused on more highly developed areas. Newly developed areas may be covered in the more recent years, but the older directories will tend to cover only the "central" parts of the city. To complete the search, we have either utilized the ACPL, Library of Congress, State Archives, and/or a regional library or history center as well as multiple digitized directories. These do not claim to be a complete collection of all reverse listing city directories produced.

ERIS has made every effort to provide accurate and complete information but shall not be held liable for missing, incomplete or inaccurate information. To complete this search we used the general range(s) below to search for relevant findings. If you believe there are additional addresses or streets that require searching please contact us at 866-517-5204.

Search Criteria:
2220-2320 of Channing Way
2220-2320 of Durant Ave
2300-2420 of Ellsworth St

Re: Records Search

To bornite@comcast.net <bornite@comcast.net>

Thank you for contacting Alameda County Department of Environmental Health (ACDEH) Certified Unified Program Agency (CUPA) for your Public Records Act Request.

We have no ACDEH CUPA records for the address(es) you requested.

Please note that ACDEH CUPA only has files for sites within its jurisdiction and some cities within Alameda County are not part of the ACDEH CUPA jurisdiction. In those cases we advise that you contact the Fire or Planning Department of that city for any records. **Please view our Jurisdiction List in this link:**
https://deh.acgov.org/hazmat-assets/docs/CUPA-jurisdictions.pdf

In addition, ACDEH has other divisions which may have records for the requested address(es). I have listed the divisions below and who to contact to acquire records if relevant.

- Solid/Medical Waste

  Contact: LaTresca Porter at latresca.porter@acgov.org

- Operations Division (retail food, recreation, and tattoo parlors)

  Contact: dehwebmain@acgov.org

- Vector Control Division

  Contact: Daniel Wilson at daniel.wilson@acgov.org

- Land and Water Division (Local Oversite Program (LOP) and Onsite Wastewater Treatment Systems)

  The links listed below may be helpful to gather information on LOP sites. The search on the geotracker link may be conducted by address or site name. If you cannot find documents you are searching for then please contact LOP directly.
  Contact: deh.loptoxic@acgov.org
  https://deh.acgov.org/landwater/index.page
  http://geotracker.waterboards.ca.gov/

Due to the COVID-19 pandemic, all requested files are provided electronically.

However, once the precautionary measures related to COVID-19 are lifted, our office may make files available by appointment for review on Thursdays and Fridays from 9:00 AM until 12:00 noon. We will keep our requestors aware of this situation as it progresses.

Please send all future requests to dehcupafilereview@acgov.org.

Please reach out to us if you have any further questions or clarifications.

Thank you,
Alameda County CUPA
Alameda County Environmental Health

[External Message Added] City of Berkeley public records request #23-589

To bornite@comcast.net

-- Attach a non-image file and/or reply ABOVE THIS LINE with a message, and it will be sent to staff on this request. --

City of Berkeley Public Records

A message was sent to you regarding record request #23-589:

This is in response to your 06/16/23 Public Records Act request for:

Please search for records related to tanks, inspection records, hazmat, hazwaste, spills/LUST cases, wells, and septics for the following addresses:

2360 and 2362 Ellsworth Street

The City has completed its search for responsive documents and has determined that no responsive documents exist. With this response, staff has completed its work to process and respond to your Public Records Act request.

If you have any questions concerning your request, please feel free to contact me at toxics@berkeleyca.gov

N

The pin displayed on the map is an approximate point selected by the user and does not represent an authoritative property location.

This map complies with FEMA's standards for the use of digital flood maps if it is not void as described below. The basemap shown complies with FEMA's basemap accuracy standards

The flood hazard information is derived directly from the authoritative NFHL web services provided by FEMA. This map was exported on 6/19/2023 at 2:14 PM and does not reflect changes or amendments subsequent to this date and time. The NFHL and effective information may change or become superseded by new data over time.

This map image is void if the one or more of the following map elements do not appear: basemap imagery, flood zone labels, legend, scale bar, map creation date, community identifiers, FIRM panel number, and FIRM effective date. Map images for unmapped and unmodernized areas cannot be used for regulatory purposes.

LIST OF APPENDICES

APPENDIX A BLAINE TECH SERVICES, INC. – FIELD NOTES

APPENDIX B TEST AMERICA – LABORATORY REPORT

1.0 INTRODUCTION

Conestoga-Rovers & Associates (CRA) prepared this report on behalf of Equilon Enterprises LLC dba Shell Oil Products US (Shell).

1.1 SITE INFORMATION

Site Address	2200 Durant Avenue, Berkeley
Site Use	Independent Shell-branded Service Station
Shell Project Manager	Denis Brown
CRA Project Manager	Peter Schaefer
Lead Agency and Contact	TMD, Geoffery Fiedler
Shell SAP Code	135097
Shell Incident No.	98995189

Date of most recent agency correspondence was March 29, 2010 (electronic).

2.0 SITE ACTIVITIES, FINDINGS, AND DISCUSSION

2.1 CURRENT QUARTER'S ACTIVITIES

Blaine Tech Services, Inc. (Blaine) gauged and sampled the wells according to the established monitoring program for this site. Prior to this sampling event, Blaine redeveloped the site wells.

CRA prepared a vicinity map (Figure 1), a groundwater contour and chemical concentration map (Figure 2), and a groundwater data table (Table 1). Blaine's field notes are presented in Appendix A, and the laboratory report is presented in Appendix B.

2.2 CURRENT QUARTER'S FINDINGS

Groundwater Flow Direction	Southerly to southeasterly
Hydraulic Gradient	0.06

Depth to Water	23.24 to 27.64 feet below top of well casing

2.3 PROPOSED ACTIVITIES

As discussed in our August 24, 2011 meeting with Berkeley Toxics Management Division and San Francisco Bay Regional Water Quality Control Board (RWQCB), CRA on behalf of Shell, will submit a site conceptual model intended to address the deficiencies identified in the meeting. CRA recommends discontinuing groundwater monitoring and reporting, pending the RWQCB's review of the case for closure. No additional groundwater sampling events are scheduled.

2.4 DISCUSSION

CRA is submitting a site conceptual model under separate cover. Based on current concentration trends, CRA requests that the City of Berkeley Toxics Management Division review this case for closure.

All of Which is Respectfully Submitted,
CONESTOGA-ROVERS & ASSOCIATES

Peter Schaefer, CHG, CEG

Aubrey K. Cool, PG

Notes:
TPHd = Total petroleum hydrocarbons as diesel analyzed by modified EPA Method 8015
TPHg = Total petroleum hydrocarbons as gasoline analyzed by EPA Method 8260B; prior to October 26, 2001, analyzed by EPA Method 8015 unless otherwise noted.
BTEX = Benzene, toluene, ethylbenzene, and total xylenes analyzed by EPA Method 8260B
MTBE = Methyl tertiary-butyl ether analyzed by method noted
TBA = Tertiary-butyl alcohol analyzed by EPA Method 8260B
DIPE = Di-isopropyl ether analyzed by EPA Method 8260B
ETBE = Ethyl tertiary-butyl ether analyzed by EPA Method 8260B
TAME = Tertiary-amyl methyl ether analyzed by EPA Method 8260B
TOC = Top of casing elevation, in feet relative to mean sea level
SPH = Separate-phase hydrocarbons
GW = Groundwater
DO = Dissolved oxygen
µg/L = Micrograms per liter
ft = Feet
MSL = Mean sea level
mg/L = Milligrams per liter
<n = Below detection limit
<x = Not detected at reporting limit x
--- = Not analyzed or available
ND = Not detected at or above reporting limit; see laboratory analytical report for details.
(D) = Duplicate sample

a = Depth to liquid/Liquid surface elevation.
b = Chromatogram pattern indicated an unidentified hydrocarbon; hydrocarbon does not match pattern of laboratory's standard.
c = Not confirmed during re-sampling.
d = Analyzed for volatile and semi-volatile organics. Only detection is carbon disulfide at 16 ug/L.
e = Laboratory reported 60 ug/L TPPH in the equipment blank.
f = Erroneous laboratory data.
g = Laboratory reported 2.1 ug/L benzene and 0.64 ug/L toluene in the equipment blank.

TABLE 1

GROUNDWATER DATA
INDEPENDENT SHELL BRANDED SERVICE STATION
2200 DURANT AVENUE, BERKELEY, CALIFORNIA

Well ID	*Date*	*TPHd* (µg/L)	*TPHg* (µg/L)	*B* (µg/L)	*T* (µg/L)	*E* (µg/L)	*X* (µg/L)	*MTBE 8020* (µg/L)	*MTBE 8260* (µg/L)	*TBA* (µg/L)	*DIPE* (µg/L)	*ETBE* (µg/L)	*TAME* (µg/L)	*TOC* (ft MSL)	*Depth to Water* (ft TOC)	*GW Elevation* (ft MSL)	*DO Reading* (mg/L)

h = Sample was analyzed outside the recommended holding time.
k = The concentration reported reflects individual or discrete unidentified peaks not matching a typical fuel pattern.
l = Analyzed by EPA Method 8015B (M).
m = Analyte was detected at a concentration below the reporting limit and above the laboratory method detection limit. Reported value is estimated.
n = The sample chromatographic pattern for TPH does not match the chromatographic pattern of the specified standard. Quantitation of the unknown hydrocarbon(s) in the sample was based upon the specified standard.
o = Sample also analyzed for petroleum hydrocarbons as motor oil and hydraulic oil; none were detected.
p = Sample also analyzed for petroleum hydrocarbons as motor oil and hydraulic oil; hydraulic oil detected at 174 µg/L and motor oil not detected.

Wells MW-8, MW-13, MW-14, MW-16, and EW-2 completed in perched zone. Wells MW-2 and MW-4 located at 2140 Durant Ave. also completed in perched zone.
October 1993 well survey relative to monument at Fulton Street and Durant Avenue - 191.77 feet MSL. Previous survey relative to site datum of 200 feet.
All site wells except MW-7 surveyed March 21, 2002 by Virgil Chavez Land Surveying

LABORATORY REPORT

Prepared For: Blaine Tech San Jose/CRA Shell
1680 Rogers Avenue
San Jose, CA 95112-1105
Attention: Lorin King

Project: 2200 Durant Ave., Berkeley, CA

Sampled: 09/15/11
Received: 09/17/11
Issued: 09/27/11 17:03

NELAP #01108CA California ELAP#2706 CSDLAC #10256 AZ #AZ0671 NV #CA01531

The results listed within this Laboratory Report pertain only to the samples tested in the laboratory. The analyses contained in this report were performed in accordance with the applicable certifications as noted. All soil samples are reported on a wet weight basis unless otherwise noted in the report. This Laboratory Report is confidential and is intended for the sole use of TestAmerica and its client. This report shall not be reproduced, except in full, without written permission from TestAmerica. The Chain of Custody, 1 page, is included and is an integral part of this report.
This entire report was reviewed and approved for release.

DATA QUALIFIERS AND DEFINITIONS

ND Analyte NOT DETECTED at or above the reporting limit or MDL, if MDL is specified.

RPD Relative Percent Difference

ADDITIONAL COMMENTS

For 8260 analyses:

Due to the high water solubility of alcohols and ketones, the calibration criteria for these compounds is <30% RSD.
The average % RSD of all compounds in the calibration is 15%, in accordance with EPA methods.

For Volatile Fuel Hydrocarbons (C4-C12):

Volatile Fuel Hydrocarbons (C4-C12) are quantitated against a gasoline standard. Quantitation begins immediately before TBA-d9.

PHASE I ENVIRONMENTAL SITE ASSESSMENT QUESTIONNAIRE

The following questionnaire is required by the ASTM Standard E1527-13 and E1527-21, which adheres to the All Appropriate Inquiries (AAI) Rule (United States Environmental Protection Agency) (40 CFR 312).

As defined by ASTM, the User of the report is the *"party seeking to use Practice E1527 to complete an environmental site assessment of the property. A user may include, without limitation, a potential purchaser of property, a potential tenant of property, an owner of property, a lender, or a property manager. The user has specific obligations for completing a successful application of this practice."*

PROPERTY ADDRESS:	2298 DURANT AVE, 2360 ELLSWORTH ST,
PROPERTY CITY, STATE ZIP:	BERKELEY, CA 94704-1521 BERKELEY, CA 94704-1577

1. **Environmental liens that are filed or recorded against the property (40 CFR 312.25)**

   Did a search of land title records (or judicial records) identify any environmental liens filed or recorded against the subject property under federal, tribal, state or local law?

   [ ] YES [X] NO

   TBC - Title search underway.

2. **Activity and use limitations (AULs) that are in place on the subject property or that have been filed or recorded against the subject property (40 CFR 312.26(a)(1)(v) and (vi))**

   Did a search of land title records (or judicial records) identify any AULs, such as engineering controls, land use restrictions or institutional controls that are in place at the subject property and/or have been filed or recorded against the subject property under federal, tribal, state or local law?

   [ ] YES [X] NO

3. **Specialized knowledge or experience of the person seeking to qualify for the LLP (40 CFR 312.28)**

   Do you have any specialized knowledge or experience related to the subject property or nearby properties? For example, are you involved in the same line of business as the current or former occupants of the subject property or an adjoining property so that you would have specialized knowledge of the chemicals and processes used by this type of business?

   [ ] YES [X] NO

PARTNER

4. Relationship of the purchase price to the fair market value of the subject property if it were not contaminated (40 CFR 312.29)

Does the purchase price being paid for this subject property reasonably reflect the fair market value of the property? If you conclude that there is a difference, have you considered whether the lower purchase price is because contamination is known or believed to be present at the subject property?

[X] YES [ ] NO

---

5. Commonly known or reasonably ascertainable information about the Property (40 CFR 312.30)

Are you aware of commonly known or reasonably ascertainable information about the subject property that would help the environmental professional to identify conditions indicative of releases or threatened releases?

[ ] YES [X] NO

---

a. Do you know the past uses of the subject property?

[X] YES [ ] NO

---

b. Do you know of specific chemicals that are present or once were present at the subject property?

[ ] YES [X] NO

---

c. Do you know of spills or other chemical releases that have taken place at the subject property?

[ ] YES [X] NO

---

d. Do you know of any environmental cleanups that have taken place at the subject property?

[ ] YES [X] NO

---

e. Do you have any prior knowledge that the subject property was developed as a gas station, drycleaner, manufacturing/industrial facility in the past?

[ ] YES [X] NO

---

f. Are you aware of historical use of hazardous materials or petroleum products used or present on the subject property?

[ ] YES [X] NO

---

g. Do you know if the property is currently or was formerly equipped with underground storage tanks (USTs) or septic tanks?

[ ] YES [X] NO

h. Do you know of any past, threatened or pending lawsuits or administrative proceedings concerning a release or threatened release of any hazardous substance or petroleum products involving the property by any owner or occupant of the subject property?

[ ] YES [X] NO

6. The degree of obviousness of the presence or likely presence of contamination at the subject property, and the ability to detect the contamination by appropriate investigation (40 CFR 312.31)

Based on your knowledge and experience related to the subject property, are there any obvious indicators that point to the presence or likely presence of releases at the subject property?

[ ] YES [X] NO

ENVIRONMENTAL SITE ASSESSMENT QUESTIONNAIRE

Please complete to the best of your knowledge. For those questions that are not applicable, please respond with an "N/A". For those questions that are unknown, please respond with "unknown".

1. PROPERTY INFORMATION:

Property Name: 2298 Durant Ave and 2360 Ellsworth Street		
Property Address: 2298 Durant Ave and 2360 Ellsworth Street		
City Berkeley	State California	Zip 94704
Assessor's Parcel Number 5518871, 5518872		
Property Owner & Contact Information: Fred Feller and Peggy Chang (510) 422-2367, Nhan Nguyen Le (916) 224-3715		
Date Property Owner Purchased:		
Key Site Manager & Contact Information:		

2. COMPLETED BY

Signature Lucas Butler	Date 20 June 2023
Printed Name Lucas Butler	Relation to Subject Property Prospective Buyer

3. PREVIOUS INVESTIGATIONS

Have any previous environmental investigations been performed at the property, including Phase I ESAs, Phase II Subsurface Investigations, Remediation, Asbestos or Lead-Based Paint surveys?_____
_____(If yes, please provide copies)

4. PROPERTY DESCRIPTION

Property Size: 12,220 Sqft. Number of Building(s): 2

Size of Building(s): 5,004 Sqft - 2298 Durant, 5,037 Sqft – 2360 Ellsworth

Date of Construction: 1940 - 2298 Durant, 1964 - Ellsworth

Property Type: (please circle)

(Multi-Family) Hotel Mobile Home Park Retail/Commercial Industrial (Office)

Other: Durant – Office, Ellsworth - MF

Please provide Rent Roll if Applicable.

Historical Use of Property: Office and Multi-Family

5. Surrounding Property Uses

Direction	Use
North	Street
South	Res
East	Street
West	Res

Are you aware of any potential environmental concerns associated with surrounding properties?

_____ YES _____NO

If yes, please describe: _____

_____

_____

Alameda County, California, Western Part

150—Urban land-Tierra complex, 2 to 5 percent slopes

Map Unit Setting

National map unit symbol: hb7c
Elevation: 100 to 1,100 feet
Mean annual precipitation: 14 to 25 inches
Mean annual air temperature: 57 to 59 degrees F
Frost-free period: 300 to 320 days
Farmland classification: Not prime farmland

Typical profile

H1 - 0 to 12 inches: loam
H2 - 12 to 32 inches: clay
H3 - 32 to 60 inches: sandy clay loam

Properties and qualities

Slope: 2 to 5 percent
Depth to restrictive feature: More than 80 inches
Drainage class: Moderately well drained
Runoff class: High
Capacity of the most limiting layer to transmit water (Ksat): Very low to moderately low (0.00 to 0.06 in/hr)
Depth to water table: More than 80 inches
Frequency of flooding: None
Frequency of ponding: None
Maximum salinity: Nonsaline to very slightly saline (0.0 to 2.0 mmhos/cm)
Available water supply, 0 to 60 inches: Very low (about 1.8 inches)

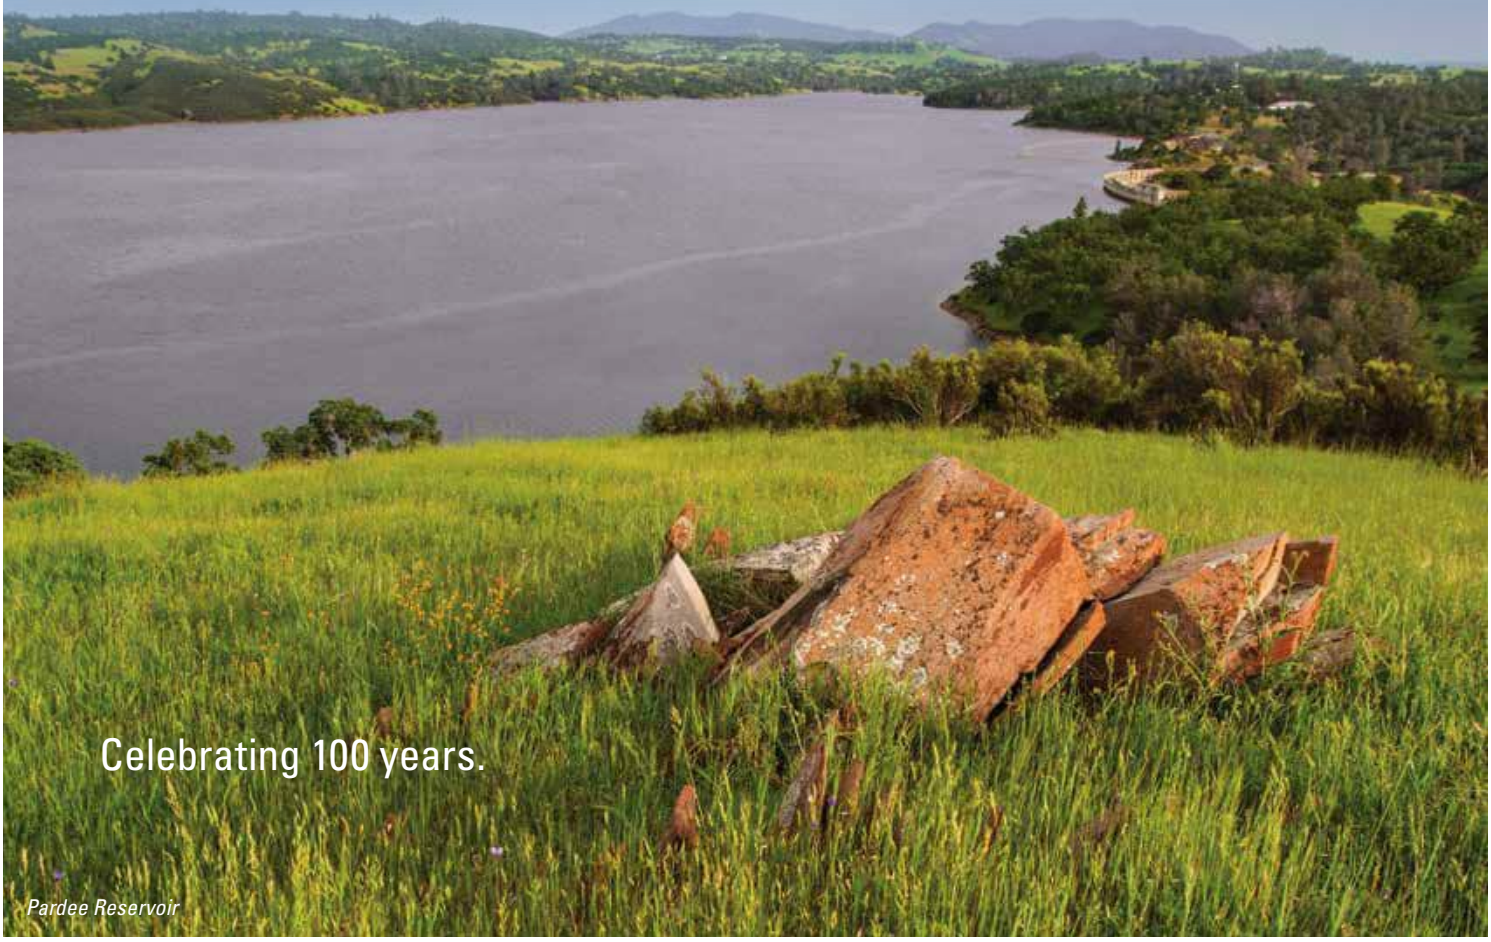
EBMUD

FLOWING INTO THE FUTURE 1923–2023

2022 Annual Water Quality Report

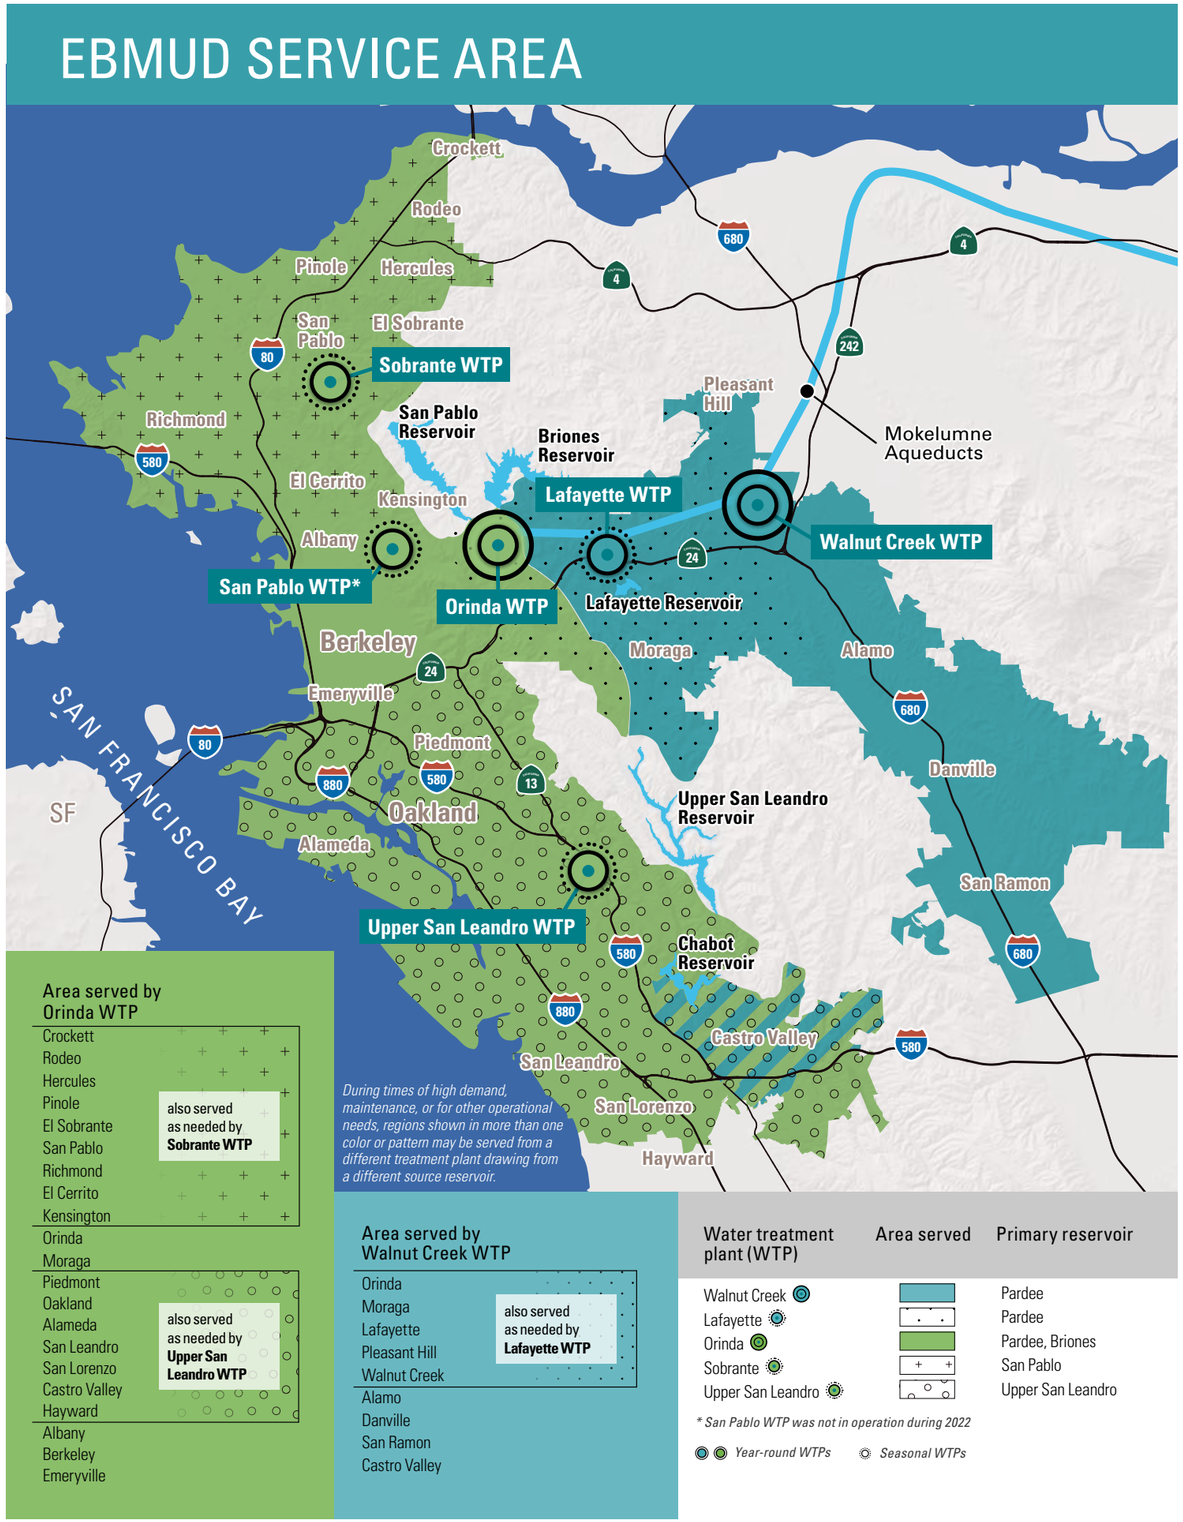
January through December

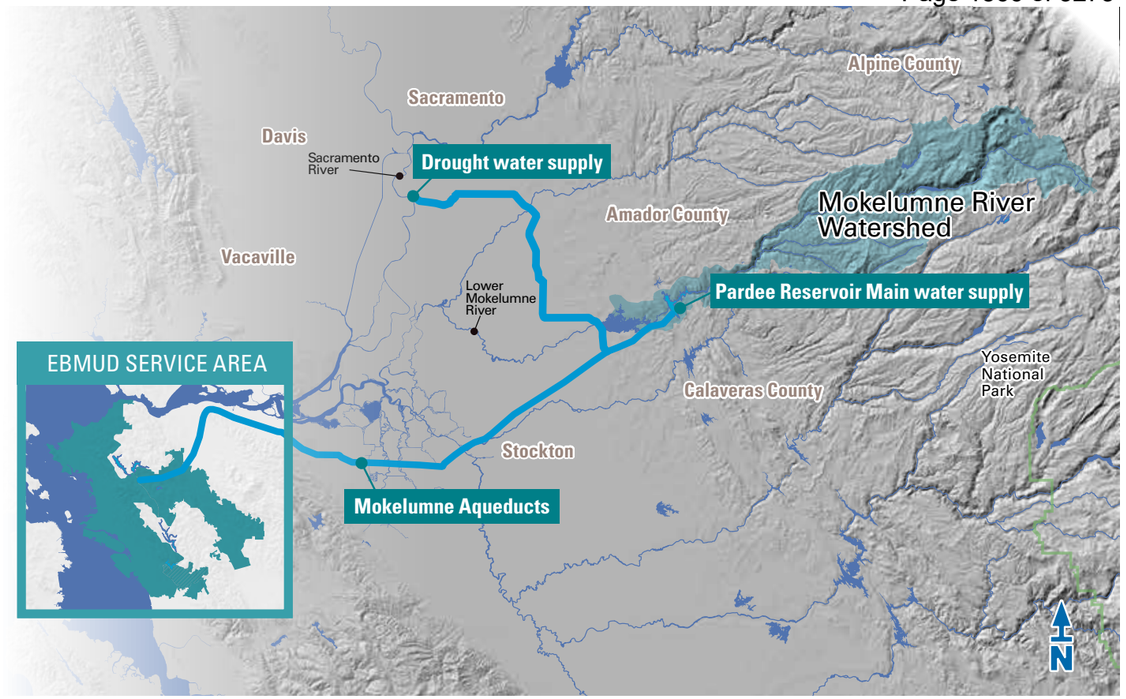
East Bay Municipal Utility District is pleased to report that in 2022 your drinking water quality met or surpassed every state and federal requirement that safeguards public health.



Celebrating 100 years.

Pardee Reservoir





A century of water service

EBMUD's drinking water makes an incredible journey to arrive at our taps.

Most of the high-quality water flowing to the taps of 1.4 million East Bay customers originates from the 577-square mile Mokelumne River Watershed on the western slope of the Sierra Nevada. This area, largely protected from human activity, consists mostly of national forests and undeveloped lands.

Snowmelt from Alpine, Amador, and Calaveras counties remains our primary water source as it has for nearly a century. Water from the Mokelumne River flows into Pardee Reservoir near Valley Springs, CA. Three large aqueducts transport water 90 miles from Pardee Reservoir to our treatment facilities and local watersheds, then deliver it to every customer and hydrant in our distribution system. During dry years, EBMUD may purchase water from other watersheds, like the Sacramento River, to meet customer needs.

In 2022, the year started with pandemic and drought, and ended with plentiful storms. Through it all, EBMUD worked around the clock, behind the scenes, and on your street. Crews operated a complex network of reservoirs, pipes, pumps, and water treatment plants to provide safe drinking water.

Historic problems, visionary solutions

Drought and climate change generate renewed interest in the origin of our water. Snowmelt that feeds the Mokelumne River remains our primary water source as it has, for a century. But with climate change and multi-year droughts posing ever-greater challenges, EBMUD plans far ahead for our region's water needs – currently through 2050 – and has outlined actions to manage uncertainties. Our diversified water supply portfolio makes the most of our region's resources.

In 2022, EBMUD again activated the Freeport Regional Water Facility to draw supplemental supplies from the Sacramento River. During a second year of statewide drought, 2022 marked the third time that Freeport brought emergency relief to low reservoir levels in the East Bay. During the third full year of the Covid-19 pandemic, and at a time of significant water scarcity, EBMUD delivered a total of 33 thousand acre-feet of water to its customers using this $500 million investment.

To ensure the safety of your drinking water, every drop of water delivered to customers was treated and the water treatment plants monitored water quality continuously. More than 20,000 laboratory tests are conducted each year, testing for the presence of more than 100 substances including microorganisms, pesticides, herbicides, asbestos, lead, copper, petroleum products, and by-products of industrial and water treatment processes.

Also in 2022, EBMUD and partners in San Joaquin County completed construction of facilities for groundwater banking project called Demonstration Recharge Extraction Aquifer Management, or DREAM. The completion of the project added a regional solution to the perpetual challenge of drought. As the calendar year 2022 came to an end, California seemed poised to bust out of drought with record rain and snowfall. Although EBMUD did not turn on the DREAM project in 2022, the quick changes in weather pattern from calendar year 2022 to 2023 increased momentum on this new endeavor.

Source water protection

EBMUD evaluates our water sources to ensure great water quality with sanitary surveys of the Mokelumne River Watershed and East Bay watersheds at least every five years. These surveys identify potential sources of contaminants in the watersheds, analyze trends, and recommend watershed management practices to protect raw water quality. The most recent surveys were completed in 2021 and include data for 2015 to 2019 for the Mokelumne River Watershed and 2015 to 2018 for the East Bay watersheds. Sources of potential contamination may include runoff from fire and fuels reduction efforts, geologic hazards, erosion, wildlife and livestock, sanitation facilities, recreation, urban storm water, and transportation corridors. Efforts to protect source waters from all potential contaminating activities are an integral part of EBMUD's water quality management. To review these reports, contact EBMUD or the State Water Resources Control Board.

Where your water is treated

Before reaching your tap, EBMUD treats the water at one of our water treatment plants in the East Bay. Some customers receive water from different treatment plants depending on the time of year. The taste and odor of your tap water may change throughout the year due to climate impacts, such as severe storms, drought and wildfires; operational changes, such as when a treatment plant is shut down for maintenance; or due to changes in the source water. These water treatment plant locations are shown on the map on page 2.

What was detected and reported

In 2022, EBMUD treated raw water from multiple sources and consistently provided high-quality drinking water, meeting or surpassing every public health requirement set by the State Water Resources Control Board (State Water Board) and the U.S. Environmental Protection Agency (USEPA).

The tables on the following pages show the measured amounts of contaminants detected in 2022 or in the most recent year sampling was required. Samples were collected in EBMUD's source waters, at water treatment plants, in the distribution system, and at customer taps.

Although EBMUD tests for more than 100 substances, this report only lists those detected at or above the state or federal level required for reporting. In this case, no news is good news! See a full list of parameters with most recent monitoring results.*

*2022 All Parameters Data Table.pdf

Mokelumne River

Table 1 Regulated for public health

These contaminants are regulated to protect your health. They have maximum contaminant levels, known as primary MCLs, set by the State Water Board or the USEPA. These levels are set as close to the established public health goals as is economically and technologically feasible.

Table 2 – Regulated for drinking water aesthetics

These contaminants are regulated to maintain aesthetic qualities such as taste, odor, and appearance of drinking water. They have maximum contaminant levels, also known as secondary MCLs, set by the State Water Board.

Table 3 – Parameters with Notification Level

This table includes other contaminants that have state notification levels, also known as NLs. NLs are health-based advisory levels established by the State Water Board for chemicals in drinking water that water agencies are not required to monitor for and that lack maximum contaminant levels (MCLs). When chemicals are found at concentrations greater than their NL, certain requirements and recommendations apply.

Table 4 – Other parameters of interest to customers

These water measurements, such as pH, hardness and alkalinity, may be of interest to customers.

How to read the water quality tables

Find your location on the map on page 2. Note which water treatment plant(s) serve that area.

1 Go to **column 1** in the tables on pages 6–8 to find the contaminant you are interested in. *Remember – no news is good news!*

2 **Column 2** lists the state or federal goal. At that amount or lower, there is no known or expected risk to health from the contaminant's presence in drinking water. Not all listed contaminants have state or federal goals.

3 **Column 3** notes the highest amount the State Water Board or the USEPA allows. This amount is usually not as low as the public health goal in **column 2**.

4 **Column 4** lists the average amount detected across the EBMUD service area or at designated locations.

5 Find the column that corresponds to the water treatment plant or plants that serve you. This is the range of concentration of the contaminant detected in your area's water.

6 The last column lists how the contaminant typically gets into your drinking water.

1 Regulated for public health (Primary MCL) (Unit)	2 State or federal goal PHG, MCLG or MRDLG	3 Highest amount allowed MCL, MRDL or AL	4 System average	5 WATER TREATMENT PLANTS: Walnut Creek	Lafayette	Orinda	Sobrante	Upper San Leandro	6 Typical sources

Notes

A See **Pg 10** for additional information about fluoride in drinking water

B 90th percentile value at 50 sample sites. Lead monitoring was last completed in 2021. See **Pg 10** for additional lead information.

C Highest running annual average.

D Chloramine residuals in the distribution system are measured as an equivalent quantity of chlorine. When the chloramine residual cannot be detected,the sample is further analyzed to ensure that microbiological water quality is in compliance with regulations.

E This value is the highest locational running annual average, on which compliance is based. Water treatment plant values show the range of individual sample results throughout the distribution system.

Key Terms

AL — ***Regulatory Action Level***. The concentration which, if exceeded, triggers treatment or other requirements that a water system must follow.

DBP — ***Disinfection By-Products***. These are formed when chlorine and/or ozone reacts with natural constituents in water. Trihalomethanes (THMs), haloacetic acids (HAAs), chlorate, and bromate are disinfection by-products.

D/DBPs — ***Disinfectants and Disinfection By-products***. Disinfectant residuals, disinfection byproducts and byproduct precursors.

MCL — ***Maximum Contaminant Level***. The highest level of a contaminant that is allowed in drinking water. Primary MCLs are set as close to the PHGs or MCLGs as is economically and technologically feasible. Secondary MCLs address odor, taste and appearance of drinking water.

MCLG — ***Maximum Contaminant Level Goal***. The level of a contaminant in drinking water below which there is no known or expected risk to health. MCLGs are set by the USEPA.

MRDL — ***Maximum Residual Disinfectant Level***. The highest level of a disinfectant allowed in drinking water. There is convincing evidence that addition of a disinfectant is necessary for control of microbial contaminants.

MRDLG — ***Maximum Residual Disinfectant Level Goal***. The level of a drinking water disinfectant below which there is no known or expected risk to health. MRDLGs do not reflect the benefits of the use of disinfectants to control microbial contaminants.

NA — ***Not Applicable***.

Primary Drinking Water Standard — These standards regulate contaminants that affect health by setting MCLs, MRDLs, and Treatment Techniques (TT) along with their monitoring and reporting requirements.

PHG — ***Public Health Goal***. The level of a contaminant in drinking water below which there is no known or expected risk to health. PHGs are set by the California EPA.

TOC — ***Total Organic Carbon***. A measure of organic content in the water.

Turbidity — A measure of the cloudiness of water. Turbidity is monitored because it is a good indication of the effectiveness of our filtration systems.

TT — ***Treatment Technique***. A required process intended to reduce the level of a contaminant in drinking water.

Units

gpg — ***grains per gallon***

NTU — ***Nephelometric Turbidity Unit***. A measure of the cloudiness of water

ppm — ***parts per million***. One ppm is like 1 second in 11.5 days. (mg/L)

ppb — ***parts per billion***. One ppb is like 1 second in nearly 32 years. (µg/L)

ppt — ***parts per trillion***. One ppt is like 1 second in nearly 32,000 years. (ng/L)

TON — ***Threshold Odor Number***. A measure of odor in water

µS/cm — ***microsiemens per centimeter***. A measure of electrical conductance

Pardee Reservoir

3 Parameters with notification level	State NL	System average	Water treatment plants				
			Walnut Creek	Lafayette	Orinda	Sobrante	Upper San Leandro
Chlorate (ppb)	800	197	180	150	210 - 240	82 - 290	76 - 280
N-Nitrosodimethylamine (NDMA)[F] (ppt)	10	2.5	<1 - 2.0	<1.0 - 1.7	<1 - 1.9	3.0 - 8.4	1.4 - 9.6

4 Other parameters of interest to customers *(Unit)*		Water treatment plants				
		Walnut Creek	Lafayette	Orinda	Sobrante	Upper San Leandro
Alkalinity, Total as $CaCO_3$ (ppm)		22 - 27	22 - 25	19 - 41	63 - 83	81 - 110
Calcium (ppm)		5 - 6	5 - 6	5 - 11	16 - 20	20 - 29
Hardness as $CaCO_3$	(gpg)[G]	1	1 -2	1 - 2	4	5 - 6
	(ppm)	16 - 24	16 - 26	14 - 36	63 - 76	84 - 110

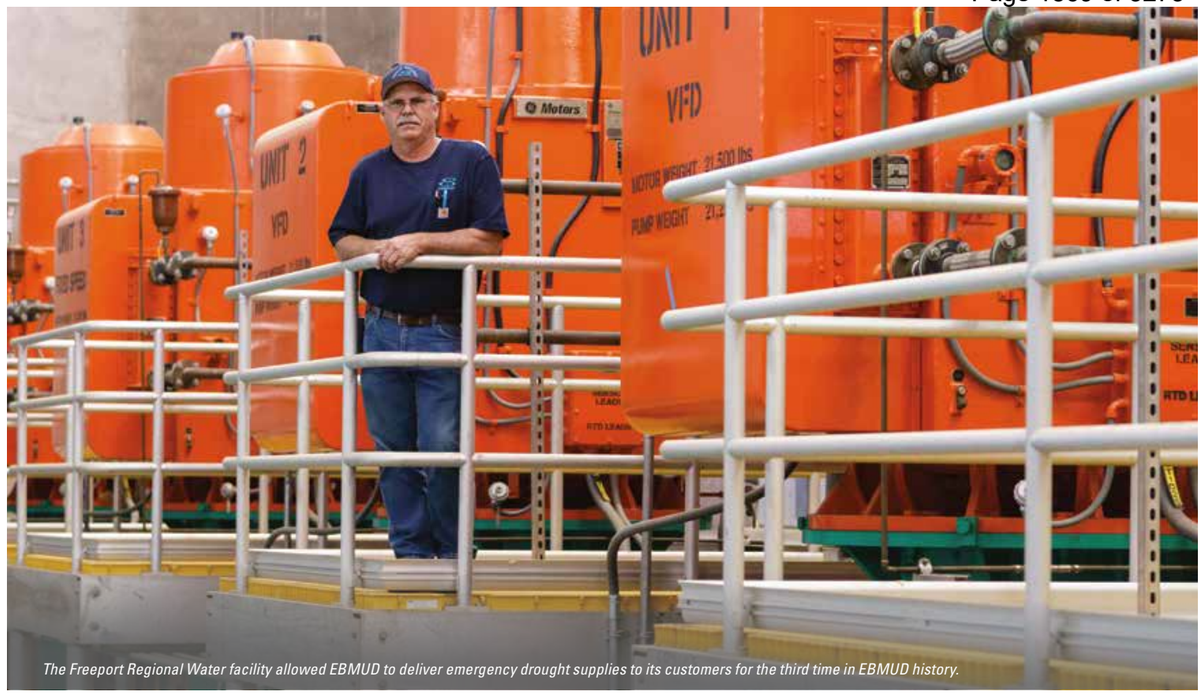
TOC in source water (ppm)		1.6 - 2.3	1.6 - 2.3	1.6 - 2.9	3.3 - 4.9	3.8 - 6.8
TOC in treated water [H] (ppm)		-	-	-	2.2 - 3.1	2.2 - 4.2
Sodium (ppm)		5 - 7	6 - 7	6 - 13	18 - 23	23 - 32

Notes

F These data are collected in the distribution system. The sample locations are assigned to the most representative water treatment plant, but the data may also represent water from another plant.

G **Grains Per Gallon (gpg)** is a measure of water hardness. Knowing the amount can help improve the function of dishwashers, cooling equipment and other industrial processes. Refer to your appliance manufacturer's instruction manual for the optimum grains per gallon level.

H Walnut Creek, Lafayette, and Orinda water treatment plants are not required to monitor TOC. Their treated water TOC values are similar to their source water.



The Freeport Regional Water facility allowed EBMUD to deliver emergency drought supplies to its customers for the third time in EBMUD history.

Water quality regulations

This report reflects changes in drinking water regulatory requirements in 2022. In order to ensure that tap water is safe to drink, the State Water Board and the USEPA prescribe regulations that limit the amount of certain contaminants in water provided by public water systems. California Department of Public Health (CDPH) and United States Food and Drug Administration regulations establish limits for contaminants in bottled water that provide the same protection for public health. Additional information on bottled water is available on the CDPH website.°

The sources of drinking water (both tap water and bottled water) include rivers, lakes, streams, ponds, reservoirs, springs and wells. As water travels over the surface of the land or through the ground, it dissolves naturally occurring minerals and, in some cases, radioactive material, and can pick up substances resulting from the presence of animals or from human activity.

Contaminants that may be present in source water include:

Microbial contaminants, such as viruses, bacteria and protozoa, such as *Cryptosporidium*, that may come from sewage treatment plants, septic systems, agricultural livestock operations and wildlife.

Inorganic contaminants, such as salts and metals, that can be naturally-occurring or result from urban stormwater runoff, industrial or domestic wastewater discharges, oil and gas production, mining or farming.

Pesticides and herbicides, that may come from a variety of sources, such as agriculture, urban stormwater runoff, and residential uses.

Organic chemical contaminants, including synthetic and volatile organic chemicals, that are by-products of industrial processes and petroleum production and can also come from gas stations, urban stormwater runoff, agricultural application and septic systems.

Radioactive contaminants that can be naturally occurring or be the result of oil and gas production and mining activities.

State and Federal regulatory agencies are working on new requirements for per- and polyfluoroalkyl substances (the so-called "forever chemicals") as well as microplastics. EBMUD is following these developments closely and plans to initiate new monitoring programs for these classes of compounds in 2023.

Drinking water, including bottled water, may reasonably be expected to contain at least small amounts of some contaminants. The presence of contaminants does not necessarily indicate that water poses a health risk. Additional information about contaminants and potential health effects is available on the USEPA website.* Contact your healthcare provider or visit the Centers for Disease Control and Prevention (CDC) website for guidelines on using tap water for health or medical purposes.

Vulnerable populations

Some people may be more vulnerable to contaminants in drinking water than the general population. Immuno-compromised persons such as persons with cancer undergoing chemotherapy, persons who have undergone organ transplants, people with HIV/AIDS or other immune system disorders, some elderly and infants can be particularly at risk to infection.

These people should seek advice about drinking water from their health care providers. USEPA/CDC guidelines on appropriate means to lessen the risk of infection by *Cryptosporidium* and *Giardia* and other microbial contaminants are available on the CDC website.◆

Cryptosporidium and Giardia

Cryptosporidium and *Giardia* are microbial contaminants that are naturally present in the environment and found in surface water throughout the United States. Filtration is highly effective in removing these contaminants; however, the most used filtration methods cannot guarantee 100 percent removal. In 2022 our monitoring detected *Cryptosporidium* and *Giardia* in our source water, prior to reaching EBMUD water treatment plants.

Cryptosporidium and *Giardia* must be ingested to cause disease, and it may spread through means other than drinking water. Most healthy individuals can overcome the disease within a few weeks. However, immuno-compromised people, infants and small children, and the elderly are at greater risk of developing life-threatening illness. We encourage these individuals to consult their physician regarding appropriate precautions to take to avoid infection.

A century of serving the East Bay

In 1923, East Bay residents voted to form the East Bay Municipal Utility District. Frustrated by decades of poor and unreliable local water supplies, they mobilized to create a public water system to replace 18 private companies that struggled to provide sufficient water for a burgeoning region.

Determined engineers and hardworking laborers built Pardee Dam – the highest in the United States at the time – and built an aqueduct to bring high-quality water 90 miles from the High Sierra to the East Bay. We didn't stop there.

In the 1930s, EBMUD chartered a new course in water service. Working with the UC Berkeley School of Civil Engineering, EBMUD helped to establish a corrosion control index. More than a century later, this index continues to serve as the guide for water providers across the nation to optimize corrosion control treatment to extend the life of materials.

In 1935, the heart of the EBMUD system came online: Orinda Water Treatment Plant. This first, and largest, of six water treatment plants that make up the EBMUD system today operates 24/7, year-round, to provide the highest quality drinking water to more than 800,000 of our 1.4 million water customers.

Following many improvements to the water system over the years, in 2022, EBMUD began a five-year, $325 million improvement project to add new multi-barrier disinfection technology to this historic facility for the next 100 years of service. The additions of an ultraviolet disinfection facility and a chlorine contact basin will enhance the treatment process, maintain high water quality, and reduce the formation of disinfection byproducts. As climate change challenges us to adjust to dramatic swings in weather that greatly impact the quality and quantity of the natural water cycle, this significant investment will prepare this vital facility for a future of handling diverse water sources, more frequently, and adjusting the process in real time.

Genesis (on the right), Laboratory Technician III, and Otto, Laboratory Technician II, performing sample preparation for Haloacetic Acids (HAAs) analysis.

Through earthquakes, devastating wildfires, an unprecedented pandemic, and climate change impacts, EBMUD's commitment to serve – affordably and reliably – remains as steadfast as ever.

Lead in drinking water

If present, elevated levels of lead can cause serious health problems. Pregnant women, infants and young children are typically more vulnerable to lead in drinking water than the general population. Lead in drinking water is primarily from materials and components associated with lead in water distribution pipes and home plumbing. EBMUD replaced all known lead service pipes in its service area in the 1990s and continues to actively seek out and replace any remaining lead materials. We maintain an aggressive corrosion control program to reduce lead leaching from our water mains and customer piping. Still, lead may be present as a legacy of older plumbing, particularly older plumbing within homes. According to the USEPA, homes built before 1986 are more likely to have lead pipes or fixtures and solder that contain lead.

During 2021, 90% of lead and copper results were below the regulatory detection limit at 50 customer homes. Due to low results, EBMUD samples for lead and copper every three years with the next monitoring in 2024.

If you are concerned about elevated lead levels in your home's water, you may have your water tested. EBMUD offers our customers one free lead test per year. Approximately 3,000 customers have requested a free lead test voucher since the program began in 2017. Lead concentrations from these customer samples are typically below 1 ppb. Request a lead test voucher by calling Customer Service at 866-403-2683 or email customerservice@ebmud.com.

Also, if you suspect you have lead in your fixtures, any time your water has been sitting for several hours, you can minimize the potential for lead exposure by running your faucet for 30 seconds to 2 minutes before using water for drinking or cooking. Capture and reuse this water for other uses such as watering ornamental plants.

REQUEST A FREE LEAD TEST VOUCHER
Call 866 403 2683 or email customerservice@ebmud.com

Fluoridation

EBMUD is required by state law to add fluoride to drinking water to help prevent dental decay in consumers. Current regulations require fluoride levels in the treated water be maintained between 0.6 to 1.2 ppm with an optimum dose of 0.7 ppm. Our monitoring showed that fluoride levels in the treated water distribution system averaged 0.7 ppm. According to the American Dental Association and CDC, it is safe to use optimally fluoridated water for preparing infant formula. If an infant is primarily fed infant formula prepared with fluoridated water, there may be an increased chance for mild enamel fluorosis, but enamel fluorosis does not affect the health of the infant or the health of the infant's teeth. To lessen this chance, deionized, purified, distilled or demineralized bottled water can be used. If you have additional questions about fluoride, contact your health provider. Additional information is available on the State Water Board ⁂ and CDC websites.★

REPORT A WATER QUALITY CONCERN
Do you have a question or concern about your water quality? Call 866 403 2683. EBMUD inspectors respond to calls within one business day regarding water which appears dirty, colored, has foreign particles or unusual taste or odor.

⁂ www.waterboards.ca.gov/drinking_water/certlic/drinkingwater/Fluoridation.html
★ www.cdc.gov/fluoridation

In a century of service, EBMUD's mission did not change. However, building and construction standards changed dramatically. Crews today use heavy machinery to perform work that, historically, was done using horses and buggies.

How to contact EBMUD

For more information about water quality or to report a water quality concern, call 866-403-2683 or visit www.ebmud.com/waterquality.

If you would like this report mailed to you, email customerservice@ebmud.com or call 866-403-2683. View this report online at www.ebmud.com/wqr.

EBMUD has a seven-member Board of Directors publicly elected from wards within the EBMUD service area. We invite the public to participate in decisions affecting drinking water quality and other matters at its Board of Directors meetings held the second and fourth Tuesdays of each month. For more information, see www.ebmud.com/board-meetings.

Notice: IMPORTANT LIMITATIONS and YOUR LIABILITY

Reliance on information in Report: This report DOES NOT replace a full Phase I Environmental Site Assessment but is solely intended to be used as database review of environmental records.

License for use of information in Report: No page of this report can be used without this cover page, this notice and the project property identifier. The information in Report(s) may not be modified or re-sold.

Your Liability for misuse: Using this Service and/or its reports in a manner contrary to this Notice or your agreement will be in breach of copyright and contract and ERIS may obtain damages for such mis-use, including damages caused to third parties, and gives ERIS the right to terminate your account, rescind your license to any previous reports and to bar you from future use of the Service.

No warranty of Accuracy or Liability for ERIS: The information contained in this report has been produced by ERIS Information Inc. ("ERIS") using various sources of information, including information provided by Federal and State government departments. The report applies only to the address and up to the date specified on the cover of this report, and any alterations or deviation from this description will require a new report. This report and the data contained herein does not purport to be and does not constitute a guarantee of the accuracy of the information contained herein and does not constitute a legal opinion nor medical advice. Although ERIS has endeavored to present you with information that is accurate, ERIS disclaims, any and all liability for any errors, omissions, or inaccuracies in such information and data, whether attributable to inadvertence, negligence or otherwise, and for any consequences arising therefrom. Liability on the part of ERIS is limited to the monetary value paid for this report.

Trademark and Copyright: You may not use the ERIS trademarks or attribute any work to ERIS other than as outlined above. This Service and Report (s) are protected by copyright owned by ERIS Information Inc. Copyright in data used in the Service or Report(s) (the "Data") is owned by ERIS or its licensors. The Service, Report(s) and Data may not be copied or reproduced in whole or in any substantial part without prior written consent of ERIS.

EI ID: 10196245 **EI Description:** Hazardous Waste Generator

Violations

Violation Date: 09/13/2021 **Violation Source:** CERS
Violation Program: HMRRP **Violation Division:** Berkeley City Toxics Management Division
Citation: HSC 6.95 25508(a)(3) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(3)
Violation Notes:

Returned to compliance on 09/21/2021. Observation: In CERS, facility is using outdated federal hazard categories for each material in the Hazardous Materials Inventory. Corrective Action: Update inventory in CERS within 30 days; de-select old hazard categories and select new ones for each material.

Violation Description:

Failure to complete and electronically submit hazardous material inventory information for all reportable hazardous materials on site at or above reportable quantities.

Evaluations

Eval Date: 09/13/2021
Violations Found: No
Eval General Type: Compliance Evaluation Inspection
Eval Type: Routine done by local agency
Eval Division: Berkeley City Toxics Management Division
Eval Program: HW
Eval Source: CERS
Eval Notes:

Toxics Management Division (TMD) was on-site to conduct hazardous materials business plan (HMBP) and hazardous waste generator (HWG) inspections. Operator provided employee training and hazardous waste receipts upon request. TMD observed fire extinguishers current as of November 2020 and defibrillator. EPA ID# CAL000076150 was inactive at time of inspection and can be reactivated using the Department of Toxic Substance Control (DTSC)'s electronic verification questionnaire (eVQ). Site is treating photo fixer/silver-only waste utilizing the silver-only waste treatment exemption. This is not regulated as treatment. Amalgum is sent off for recycling as well. TMD observed - 1x 5gallon silver-only waste container dated

Map Key	Number of Records	Direction	Distance (mi/ft)	Elev/Diff (ft)	Site	DB

6/21/2021 - 1x 1 pint container of amalgum dated 7/1/2021; Note: data in [EVAL Notes] field for some records is truncated from the source.

Eval Date: 09/13/2021

Evaluations

Eval Date: 03/26/2018
Violations Found: Yes
Eval General Type: Compliance Evaluation Inspection
Eval Type: Routine done by local agency
Eval Division: Berkeley City Toxics Management Division
Eval Program: HMRRP
Eval Source: CERS
Eval Notes:

Hazardous materials inventory is consistent with what is provided on CERS. Business has old cleaners that are no longer used and kept on a pallet in the Boiler Room - these chemicals must be properly disposed of at the Alameda House Hold Hazardous Waste facility. A receipt must be obtained and forwarded to TMD. If chemicals are not properly disposed of, they must be added to the inventory.; Note: data in [EVAL Notes] field for some records is truncated from the source.

Eval Date: 06/30/2015
Violations Found: Yes
Eval General Type: Compliance Evaluation Inspection
Eval Type: Routine done by local agency
Eval Division: Berkeley City Toxics Management Division
Eval Program: HMRRP
Eval Source: CERS
Eval Notes:

Map Key	Number of Records	Direction	Distance (mi/ft)	Elev/Diff (ft)	Site	DB

Trevor indicates they have switched cleaning supplies to Lotus Pro, ozone based cleaning. He indicates they do still use tub and tile and some other cleaning materials. All ewaste and universal waste is collected and taken to Alameda County HHW. Fluorescent tubes are collected in open bin, and it is suggested to place in bag to collect any breakage. Transitioning to bulk, auto feed for pool chemicals. Suggest absorbent pigs.; Note: data in [EVAL Notes] field for some records is truncated from the source.

Eval Date: 04/14/2016
Violations Found: Yes
Eval General Type: Other/Unknown
Eval Type: Other, not routine, done by local agency
Eval Division: Berkeley City Toxics Management Division
Eval Program: HMRRP
Eval Source: CERS
Eval Notes:

Non-Inspection related violation: Failed to submit annual Hazardous Materials Business Plan for FY17 (PM); Note: data in [EVAL Notes] field for some records is truncated from the source.

Eval Date: 08/15/2022
Violations Found: No
Eval General Type: Other/Unknown
Eval Type: Other, not routine, done by local agency
Eval Division: Berkeley City Toxics Management Division
Eval Program: HMRRP
Eval Source: CERS
Eval Notes:

A second Notice of Violation was certified mailed on August 4, 2022. On site to follow-up with the open violations. Reviewed the requirements to close the violations with operator and assisted operator with CERS submittal. The deadline to comply has been extended to September 2, 2022 for operator to complete the following: - conduct employee training and provide records - update site map - update inventory - update emergency response plan Please complete the Return to Compliance form and return it to this Agency by the deadline.; Note: data in [EVAL Notes] field for some records is truncated from the source.

Eval Date: 04/19/2022
Violations Found: Yes
Eval General Type: Compliance Evaluation Inspection
Eval Type: Routine done by local agency
Eval Division: Berkeley City Toxics Management Division
Eval Program: HMRRP
Eval Source: CERS
Eval Notes:

On site for a routine Hazardous Materials Business Plan (HMBP) inspection with Jamie Cooney, Toxics Management Division (TMD). Consent to enter and conduct inspection activities was provided by Trevor Johnson, Assistant GM. The following materials were observed in amounts that meet or exceed the minimum volumes required for disclosure as outlined in the California Health and Safety Code, California Code of Regulations, and/or Title 15 of the Berkeley Municipal Code: o Misc disinfectants and cleaners, ~50 gal o Birite detergent, 100 lbs o Sanitizer, 4 gal o Hand soap, 8 gal o Misc paint, ~60 gal o Misc spray cans, 1 gal o Wood stain/finish, 5 gal o Muriatic/hydrochloric acid, 40 gal o Chlorine, 40 gal o Calcium chloride, 100 lbs o Sodium bicarbonate, 100 lbs o Misc cleaners and degreasers, 15 gal o Butane cans (8oz x18) o Propane, 15 gal The emergency response plan was available for review. Needed new version. Observed fire extinguishers up to date, [Truncated]; Note: data in [EVAL Notes] field for some records is truncated from the source.

Eval Date: 08/31/2022
Violations Found: No
Eval General Type: Other/Unknown
Eval Type: Other, not routine, done by local agency
Eval Division: Berkeley City Toxics Management Division
Eval Program: HMRRP
Eval Source: CERS
Eval Notes:

Facility provided employee training record dated 8/24/22 and submitted in CERS. Violations corrected.; Note: data in [EVAL Notes] field for some records is truncated from the source.

Violations

Violation Date: 09/13/2017
Violation Source: CERS
Violation Program: UST
Violation Division: Berkeley City Toxics Management Division
Citation: 23 CCR 16 2632(d)(1)(C), 2641(h), 2711(a)(8) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2632(d)(1)(C), 2641(h), 2711(a)(8)
Violation Notes:

Returned to compliance on 10/19/2017. The UST Monitoring Site plan does not include the UDC sensors or the piping for the tanks. Corrective action: Update the site plan to include all required items and submit in CERS. 10/17/17 - Facility submitted 10/9/17, but did not include a corrected site plan. Gave extension until 11/1/17.

Violation Description:

Failure to submit or update a plot plan.

Violations

Violation Date: 09/28/2021
Violation Source: CERS
Violation Program: HMRRP
Violation Division: Berkeley City Toxics Management Division
Citation: HSC 6.95 25508(a)(3) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(3)
Violation Notes:

Returned to compliance on 11/14/2021. Observation: Items in HazMat inventory are using outdated federal hazard categories. Corrective Action: Update hazard categories and submit on CERS within 30 days of report delivery.

Violation Description:

Failure to complete and electronically submit hazardous material inventory information for all reportable hazardous materials on site at or above reportable quantities.

Violations

Violation Date: 10/06/2014
Violation Source: CERS
Violation Program: UST
Violation Division: Berkeley City Toxics Management Division
Citation: 23 CCR 16 2636(f)(5) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2636(f)(5)
Violation Notes:

Returned to compliance on 10/12/2014. Turbine sump sensor for the diesel tank did not shut down the pump. Corrective action: Correct immediately by having a properly licensed, trained and certified contractor replace or fix the failed sensor.

Violation Description:

Failure to maintain all product piping outside the dispenser to be fail-safe and shut down the pump when a leak is detected and the monitoring system shuts down the pump or flow restriction occurs when a leak is detected in the under dispenser containment.

Violations

Violation Date: 10/06/2014

Violation Program: UST ***Violation Division:*** Berkeley City Toxics Management Division
Citation: HSC 6.7 25284.2 - California Health and Safety Code, Chapter 6.7, Section(s) 25284.2
Violation Notes:

Map Key	Number of Records	Direction	Distance (mi/ft)	Elev/Diff (ft)	Site	DB

Returned to compliance on 11/28/2021. Spill buckets for 87 and 91 have a capacity of 3.5 gallons. Corrective Action: Spill buckets must be replaced to comply with the 5 gallon minimum capacity.

Violation Description:

"Failure to meet one or more of the following requirements:

Install or maintain a liquid-tight spill container.

Have a minimum capacity of five gallons.

Have a functional drain valve or other method for the removal of liquid from the spill container.

Be resistant to galvanic corrosion.

Perform a tightness test at installation, every 12 months thereafter, or within 30 days after a repair to the spill container.

Tested using applicable manufacturer guidelines, industry codes, engineering standards, or a method approved by a professional engineer.

Tested by a certified UST service technician.

Maintain records of spill containment testing for 36 months.

"

Citation: HSC 6.7 25284.2 - California Health and Safety Code, Chapter 6.7, Section(s) 25284.2
Violation Notes:

Returned to compliance on 12/09/2021. Observation: Spill bucket failed test and is not liquid tight. Corrective Action: Replace spill bucket within 60 days and submit proof to TMD.

Violation Description:

"Failure to meet one or more of the following requirements:

Install or maintain a liquid-tight spill container.

Have a minimum capacity of five gallons.

Have a functional drain valve or other method for the removal of liquid from the spill container.

Be resistant to galvanic corrosion.

Perform a tightness test at installation, every 12 months thereafter, or within 30 days after a repair to the spill container.

Tested using applicable manufacturer guidelines, industry codes, engineering standards, or a method approved by a professional engineer.

Tested by a certified UST service technician.

Maintain records of spill containment testing for 36 months.

Violation Notes:

Returned to compliance on 01/18/2022. Observation: Ball float valve on Tank 2 (87) is broken. The drop tube on Tank 3 (diesel) was calculated incorrectly and set at 99%. Corrective Action: Replace broken and miscalculated parts; submit proof to TMD within 60 days.

Violation Description:

Failure to comply with one or more of the following overfill prevention equipment requirements:
Alert the transfer operator when the tank is 90 percent full by restricting the flow into the tank or triggering an audible and visual alarm; or
Restrict delivery of flow to the tank at least 30 minutes before the tank overfills, provided the restriction occurs when the tank is filled to no more than 95 percent of capacity; and activate an audible alarm at least five minutes before the tank overfills; or
Provide positive shut-off of flow to the tank when the tank is filled to no more than 95 percent of capacity; or
Provide positive shut-off of flow to the tank so that none of the fittings located on the top of the tank are exposed to product due to overfilling.

Install/retrofit overfill prevention equipment that does not use flow restrictors on vent piping to meet overfill prevention equipment requirements when the overfill prevention equipment is installed, repaired, or replaced on and after October 1, 2018.

For USTs installed before October 1, 2018, perform an inspection by October 13, 2018 and every 36 months thereafter.

For USTs installed on and after October 1, 2018, perform an inspection at installation and every 36 months thereafter.

Inspected within 30 days after a repair to the overfill prevention equipment.

Inspected using an applicable manufacturer guidelines, industry codes, engineering standards, or a method approved by a professional engineer.

Inspected by a certified UST service technician.

Maintain records of overfill prevention equipment inspection for 36 months.

Eval Notes:

Met with service technician, Robert Henninger. Received system setup and alarm history. Service tech confirmed operation of diesel, regular and premium STP sump sensors and annular sensors. Tech confirmed overfill prevention on regular and premium tanks with audible and visual alarms at 90%. The diesel tank ATG riser is corroded and the tech was unable to remove the ATG to confirm operation of audible and visual alarm at 90%, at the time of inspection. Robert indicates they will repair this to ensure it is testable and confirm that it alarms at 90%. Robert confirmed operation of diesel, regular and premium line leak detectors. Confirmed sensor out, fail safe and positive shutdown. Tech confirmed operation of 1-2, 3-4, 5-6 dispenser sensors. TMD confirmed response to all alarms, monthly DO reports and training.; Note: data in [EVAL Notes] field for some records is truncated from the source.

Eval Notes:

Toxics Management Division (TMD) was on-site to conduct inspection of modifications under permit F2022-00220. The scope of work was "to remove and replace the existing UST turbine sumps, fill and vapor ports, product piping and under dispenser sumps. Install new UST turbine sumps, fill and vapor ports double wall product piping. Existing fuel dispensers are to be removed and reinstalled on new sumps." TMD was on-site on 12/19/2022 to observe soil sampling, which was taken from beneath UDCs 1/2 and first bend in piping from here, UDC 3/4 and 20 feet up piping, UDC 5/6, at pipe bend near vent pipe. No sheen or smell observed by operator or TMD. Per soil sampling report: Lead was the only analyte detected, in five of the six soil samples at concentrations of 3.7 to 4.2 parts per million. In our opinion, with no petroleum hydrocarbon detections, the lead values are from "background" concentrations and not indicative of a release. The values are well below the Tier 1 ESL [Truncated]; Note: data in [EVAL Notes] field for some records is truncated from the source.

EI ID: 10180357 **EI Description:** Chemical Storage Facilities

Violations

Violation Date: 06/22/2017 **Violation Source:** CERS
Violation Program: HMRRP **Violation Division:** Berkeley City Toxics Management Division
Citation: HSC 6.95 25508(a)(1) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(1)
Violation Notes:

Returned to compliance on 07/24/2017. A carboy of liquid nitrogen was observed in the receiving area. This needs to be added to the HMBP inventory.

Violation Description:

Failure to complete and electronically submit hazardous material inventory information for all reportable hazardous materials on site at or above reportable quantities.

Evaluations

Eval Date: 02/21/2014
Violations Found: No
Eval General Type: Compliance Evaluation Inspection
Eval Type: Routine done by local agency

Map Key	Number of Records	Direction	Distance (mi/ft)	Elev/Diff (ft)	Site	DB

Eval Division: Berkeley City Toxics Management Division
Eval Program: HW
Eval Source: CERS
Eval Notes:

Facility no longer generates hazardous waste. Xrays are done digitally.; Note: data in [EVAL Notes] field for some records is truncated from the source.

Eval Date: 01/28/2021
Violations Found: No
Eval General Type: Compliance Evaluation Inspection
Eval Type: Routine done by local agency
Eval Division: Berkeley City Toxics Management Division
Eval Program: HMRRP
Eval Source: CERS
Eval Notes:

Due to COVID-19 restrictions, inspection was conducted via video software - Blitzz. Inspector Meridith was present for inspection. The Tang center includes a pharmacy for students and faculty. Records for pharmaceutical waste disposal were not available for review. Provide TMD with disposal records for review. Specs for Genset should be provided to TMD - particularly looking at capacity of tank to compare with hazardous material inventory. Genset is equipped with overfill alarm. Inspection logs are being completed but were not available at time of inspection - provide to TMD. SPCC for UCB which includes Tang Center to be revieweed - provide plan to TMD. Training records for Christina Wistrom, Johnny Dunn, and Raymond Sanders were provided. Provide all records requested by April 20.; Note: data in [EVAL Notes] field for some records is truncated from the source.

Eval Date: 06/22/2017
Violations Found: Yes
Eval General Type: Compliance Evaluation Inspection
Eval Type: Routine done by local agency
Eval Division: Berkeley City Toxics Management Division
Eval Program: HMRRP
Eval Source: CERS
Eval Notes:

Met Tim Pine of EH&S and Ray Sanders, Facilities Manager of Tang. Reviewed the HMBP and conducted the routine HMBP inspection. Recommendation: 100 gallon diesel generator was unlocked. There is no surrounding fence. The cabinet should be locked to avoid potential tampering or vandalism. Requested training records for Ray Sanders by 7/23/17.; Note: data in [EVAL Notes] field for some records is truncated from the source.

Eval Date: 02/21/2014
Violations Found: No

Calenviroscreen 4 Score: 35-40%
Site History:

This case is an active commercial petroleum fueling facility. An unauthorized release was reported in August 1994 as a result of inventory reconciliation. USTs (four gasoline, one diesel) were tested and retrofitted and piping was removed and replaced in 1995. Historically, one of the gasoline USTs and one of the diesel USTs were formerly utilized for waste oil storage. Approximately 350 cubic yards of impacted soil and overburden were removed and disposed offsite in 1995. No groundwater monitoring wells have been installed at the Site. According to grab groundwater data collected from soil borings, water quality objectives for benzene and MTBE have not been achieved and the contaminant plume is undefined. The petroleum release is limited to the soil and shallow groundwater. According to data available in GeoTracker, there are no supply wells regulated by the California Department of Public Health within 1,000 feet of the Site. No other water supply wells have been identified within 1,000 feet of the Site in files reviewed. There is no identified surface water within 250 feet of the Site. The nearest surface water body, Strawberry Creek, is located approximately 700 feet north-northeast of the Site. Water is provided to water users near the Site by the East Bay Municipal Utilities District. The affected groundwater is not currently being used as a source of drinking water, and it is highly unlikely that the affected groundwater will be used as a source of drinking water in the foreseeable future.

soil, soil vapor, and groundwater investigation work plan including a sensitive receptor survey and site conceptual model - The work plan was rejected because the consultant did not write that chlorinated volatile organic compounds would be included in the 8260B analyte list and because analysis for polyaromatic hydrocarbons using 8270 SIM was not included at all. This analysis was required in the 13267 directive letter, and recommended in the California LUFT Manual Table 16-1. This comment will be followed by a formal rejection letter by October 31, 2018. A revised work plan should be submitted, R2 staff received the updated workplan following our rejection earlier this week. We will inform the Discharger of the results of our review.

Action Type: Enforcement/Orders

Violations

Violation Date: 12/06/2018
Violation Program: UST
Violation Source: CERS
Violation Division: Berkeley City Toxics Management Division
Citation: 23 CCR 16 2712(b)(1)(G) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2712(b)(1)(G)
Violation Notes:

Returned to compliance on 12/27/2018. The flapper valve was not tested by October 13, 2018. The inspection was completed October 15, 2018. The overfill prevention equipment inspection report from October 15, 2018 that was submitted in CERS did not include the inspection method used and documentation like the measurements used to determine the results, which is required to be attached to the report form. Corrective action: Within 30 days, please provide the additional information to TMD.

Violation Description:

Failure to comply with one or more of the following overfill prevention equipment requirements:
Alert the transfer operator when the tank is 90 percent full by restricting the flow into the tank or triggering an audible and visual alarm; or

Map Key	Number of Records	Direction	Distance (mi/ft)	Elev/Diff (ft)	Site	DB

Restrict delivery of flow to the tank at least 30 minutes before the tank overfills, provided the restriction occurs when the tank is filled to no more than 95 percent of capacity; and activate an audible alarm at least five minutes before the tank overfills; or
Provide positive shut-off of flow to the tank when the tank is filled to no more than 95 percent of capacity; or
Provide positive shut-off of flow to the tank so that none of the fittings located on the top of the tank are exposed to product due to overfilling.

Install/retrofit overfill prevention equipment that does not use flow restrictors on vent piping to meet overfill prevention equipment requirements when the overfill prevention equipment is installed, repaired, or replaced on and after October 1, 2018.

For USTs installed before October 1, 2018, perform an inspection by October 13, 2018 and every 36 months thereafter.

For USTs installed on and after October 1, 2018, perform an inspection at installation and every 36 months thereafter.

Inspected within 30 days after a repair to the overfill prevention equipment.

Inspected using an applicable manufacturer guidelines, industry codes, engineering standards, or a method approved by a professional engineer.

Inspected by a certified UST service technician.

Maintain records of overfill prevention equipment inspection for 36 months.

Violations

Violation Date: 12/06/2018 ***Violation Source:*** CERS
Violation Program: UST ***Violation Division:*** Berkeley City Toxics Management Division
Citation: 23 CCR 16 2632(c)(2)(A)&(B) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2632(c)(2)(A)&(B)
Violation Notes:

Returned to compliance on 12/06/2018. According to the contractor, the annular sensor did not activate an audible and visual alarm upon testing in liquid. Corrected at the time of the monitoring system certification as the service technician replaced the sensor with same and tested to confirm operational.

Violation Description:

Failure to continuously monitor the interstitial space of a double-walled tank with an audible and visual alarm system.

Violations

Violation Date: 12/13/2022 ***Violation Source:*** CERS
Violation Program: HMRRP ***Violation Division:*** Berkeley City Toxics Management Division
Citation: HSC 6.95 25508(a)(3) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(3)
Violation Notes:

Observation: Facility generates waste batteries and provided TMD with hazardous waste manifests, but reports a "0" throughput of hazardous waste batteries in CERS. Correction: Update Hazardous Materials Inventory within 30 days (under the Lead Acid Batteries material, under Annual Waste Amount, report an approximate throughput in gallons) and submit in CERS.

Violation Description:

Failure to complete and electronically submit hazardous material inventory information for all reportable hazardous materials on site at or above reportable quantities.

Violations

Violation Date: 01/09/2017 ***Violation Source:*** CERS
Violation Program: UST ***Violation Division:*** Berkeley City Toxics Management Division
Citation: 23 CCR 6.7 25284, 25286 - California Code of Regulations, Title 23, Chapter 6.7, Section(s) 25284, 25286
Violation Notes:

Returned to compliance on 01/17/2017. The tank information for tank Q2002U001 indicates overfill protection includes audible/visual alarms and fill tube shut-off. Observed the flapper valve, but the site does not have an external audible visual alarm. Corrective action: Install an external audible visual alarm or remove this method from the tank information and resubmit in CERS.

Violation Description:

Map Key	Number of Records	Direction	Distance (mi/ft)	Elev/Diff (ft)	Site	DB

Failure to submit a complete and accurate application for a permit to operate a UST, or for renewal of the permit.

Eval Type: Routine done by local agency
Eval Division: Berkeley City Toxics Management Division
Eval Program: UST
Eval Source: CERS
Eval Notes:

Gary Chimienti left message regarding the monitoring system certification on 12/22/2017. Toxics Management Division (TMD) received written notification from contractor of the monitoring system certification on 1/2/2018. The contractor had sent the original notification to an incorrect email address on 12/6/2017. TMD requires written notification of required testing 48 hours in advance and the owner/operator and/or contractor must receive a written response from TMD. Met with Gary Chimienti, AT&T, and John Cascio with Tait Environmental. Received copy of system setup and alarm history. Reviewed DO reports, maintenance records and CERS submittal. Confirmed operation of sensors and spill bucket.; Note: data in [EVAL Notes] field for some records is truncated from the source.

Eval Source: CERS
Eval Notes:

Met with John Lokken, EH&S Environmental Site Manager-AT&T. The Monitoring System Certification was completed on December 8, 2020. Toxics Management Division received the Monitoring System Certification Form and Spill Container Testing Report Form on January 4, 2021. The Spill Container Testing Report Form did not include the service technicians training and certifications. Updated Form was submitted January 20, 2021. Reviewed the monthly Designated UST Operator Visual Inspection Reports. The December 11, 2020 Report did not have an owner/operator signature. John indicates these are signed electronically and he will email copies to confirm they have been acknowledged by the owner/operator. TMD received a copy of the forms on January 20, 2021, confirming they are signed by the owner/operator within 72 hours of receipt.; Note: data in [EVAL Notes] field for some records is truncated from the source.

Eval General Type: Compliance Evaluation Inspection
Eval Type: Routine done by local agency
Eval Division: Berkeley City Toxics Management Division
Eval Program: UST
Eval Source: CERS
Eval Notes:

Onsite for routine inspections. Met with Gary Chimienti, EH&S AT&T and Victor Guerrero with Tait. Confirmed ICC, Veeder Root, and Franklin Fueling certifications for tech. Received a copy of the system setup and alarm history. Confirmed completion of monthly designated operator reports and maintenance records. Confirmed operation of annular, piping sensors, overfill and spill bucket. UST documents submitted through CERS 12/10/15. Confirmed the information is consistent with the site.; Note: data in [EVAL Notes] field for some records is truncated from the source.

Eval Date: 12/10/2019
Violations Found: No
Eval General Type: Compliance Evaluation Inspection
Eval Type: Routine done by local agency
Eval Division: Berkeley City Toxics Management Division
Eval Program: HW

Violations

Violation Date: 06/19/2014 ***Violation Source:*** CERS
Violation Program: HMRRP ***Violation Division:*** Berkeley City Toxics Management Division
Citation: HSC 6.95 25507 - California Health and Safety Code, Chapter 6.95, Section(s) 25507
Violation Notes:

Returned to compliance on 06/19/2014.

Violation Description:

Failure of business to report a release or threatened release of a hazardous material to the administering agency and CalEMA.

Violations

Violation Date: 06/19/2014 ***Violation Source:*** CERS
Violation Program: HW ***Violation Division:*** Berkeley City Toxics Management Division
Citation: 40 CFR 1 265.173 - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 265.173
Violation Notes:

Returned to compliance on 06/19/2014. Multiple open containers of oil - principally at work stations.

Violation Description:

Failure to properly close hazardous waste containers when not in active use.

Violations

Violation Date: 06/19/2014 ***Violation Source:*** CERS
Violation Program: APSA ***Violation Division:*** Berkeley City Toxics Management Division
Citation: HSC 6.67 25270.4.5(a) - California Health and Safety Code, Chapter 6.67, Section(s) 25270.4.5(a)
Violation Notes:

Returned to compliance on 12/02/2014. Facility inventory of petroleum oil exceeds 1,320 gallons.

Violation Description:

Failure to prepare and implement a Spill Prevention Control and Countermeasure (SPCC) Plan .

Violations

Violation Date: 12/03/2020 ***Violation Source:*** CERS
Violation Program: APSA ***Violation Division:*** Berkeley City Toxics Management Division
Citation: HSC 6.67 25270.4.5(a) - California Health and Safety Code, Chapter 6.67, Section(s) 25270.4.5(a)
Violation Notes:

Returned to compliance on 08/30/2021. Hazardous waste tanks need certification every 5 years. A written assessment meeting the requirements of 22 CCR §66265.192(k) must be obtained. An independent, qualified California-registered professional engineer (PE) must review the assessment and attest that the tank system has sufficient structural integrity and is acceptable for the transferring, storing and treating of hazardous waste. Contractor was brought in in August 2021. Used oil and waste antifreeze tanks were certified on 8/24. The engineer recommended anchoring the waste antifreeze tank. This was completed by 8/30/21.

Violation Description:

Map Key	Number of Records	Direction	Distance (mi/ft)	Elev/Diff (ft)	Site	DB

Failure to ensure that tanks are inspected and tested by an appropriately qualified person in accordance with industry standards.

Violations

Violation Date: 06/19/2014 ***Violation Source:*** CERS
Violation Program: HW ***Violation Division:*** Berkeley City Toxics Management Division
Citation: 22 CCR 15 66265.16 - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.16
Violation Notes:

Returned to compliance on 12/02/2014.

Violation Description:

Failure to provide employees within the first six months after the date of their employment, or assignment to the facility, or to work unsupervised, or to a new position at a facility with hazardous waste training to ensure employees are competent in the following areas: hazardous waste management procedures (including contingency plan implementation) relevant to the positions in which they are employed, emergency response and emergency equipment, and procedures for using, inspecting, repairing, and replacing facility emergency and monitoring equipment. In addition, the owner/operator shall ensure facility personnel take part in an annual review of the initial training and training records training records on current personnel shall be kept until closure of the facility. Training records on former employees shall be kept for at least three years from the date the employee last worked at the facility. The records shall include the following: the job title for each position at the facility related to hazardous waste management, and the name of the employee filling each job; a written job description for each position, duties of facility personnel assigned to each position, and a written description of the type and amount of both introductory and continuing training that will be given to each person filling a position.

Violations

Violation Date: 03/27/2017 ***Violation Source:*** CERS
Violation Program: HW ***Violation Division:*** Berkeley City Toxics Management Division
Citation: 40 CFR 1 265.201(c)(5) - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 265.201(c)(5)
Violation Notes:

Returned to compliance on 03/30/2017.

Violation Description:

Failure to inspect hazardous waste tanks for the following, when present:
4) The construction materials of the tank at least weekly to detect corrosion or leaking of fixtures or seams.
5) The construction materials of, and the area immediately surrounding, discharge confinement structures (e.g., dikes) at least weekly to detect erosion or obvious signs of leakage (e.g., wet spots or dead vegetation).

Violations

File Location: Regional Board
Site History:

Dry cleaning operations took place at the site as early as the 1930s and through approximately 1971 under the names Shattuck Laundry and Dry Cleaners (1930s - 1940s) and Rainbow Cleaners (1950s - 1971). The primary location of the former operations is associated with the address 2473 Shattuck Avenue. Rainbow Cleaners also utilized the address 2111 Dwight Way, in the 1950s and early 1960s. Except for the original residential use of the southeastern portion of the site (which ceased sometime prior to 1968), typical use of the site since the early 1900s has included a number of small commercial and/or retail tenants, including a bakery, creamery, various medical and commercial offices, auto repair (circa 1920-1930), sign making, drug store, a theater, hardware store, and restaurants. As noted above, former dry cleaning operations were identified on site. An apartment complex is being built on the site.

CASEWORKER: MARK JOHNSON
Cleanup History Link: https://geotracker.waterboards.ca.gov/profile_report_include?global_id=T10000005842&tabname=regulatoryhistory
Site History:

Dry cleaning operations took place at the site as early as the 1930s and through approximately 1971 under the names Shattuck Laundry and Dry Cleaners (1930s - 1940s) and Rainbow Cleaners (1950s - 1971). The primary location of the former operations is associated with the address 2473 Shattuck Avenue. Rainbow Cleaners also utilized the address 2111 Dwight Way, in the 1950s and early 1960s. Except for the original residential use of the southeastern portion of the site (which ceased sometime prior to 1968), typical use of the site since the early 1900s has included a number of small commercial and/or retail tenants, including a bakery, creamery, various medical and commercial offices, auto repair (circa 1920-1930), sign making, drug store, a theater, hardware store, and restaurants. As noted above, former dry cleaning operations were identified on site. An apartment complex is being built on the site.
