EDR Historical Topo Map Report

09/14/23

Site Name:

483661
2029-2039 University Avenue
Berkeley, CA 94704
EDR Inquiry # 7444008.4

Client Name:

AEI Consultants
2500 Camino Diablo
Walnut Creek, CA 94597
Contact: Dania Ledezma

EDR Topographic Map Library has been searched by EDR and maps covering the target property location as provided by AEI Consultants were identified for the years listed below. EDR's Historical Topo Map Report is designed to assist professionals in evaluating potential liability on a target property resulting from past activities. EDRs Historical Topo Map Report includes a search of a collection of public and private color historical topographic maps, dating back to the late 1800s.

Search Results:

P.O.# 346149
Project: 483661

Coordinates:

Latitude:	37.87227 37° 52' 20" North

Requester + Staff

Good Afternoon,

This is in response to your September 13, 2023, Public Records Act request for:

[This request pertains to **2029, 2031, 2033, 2035, 2037, 2039 University Avenue, Berkeley**.

I am looking for copies of any files relating to dry cleaners, gas stations, hazardous materials inventory matrices, USTs, fuel dispensers, UST system monitoring/testing information, wells (gw or vapor), permits, site inspection forms, notice of violations, environmental investigations/cleanup, and any files relating to hazmat in general.

Thank you kindly

Adrian A]

Your request is granted. The Fire Department has completed its search for responsive documents and as a courtesy has attached them to this letter. With this response, staff have completed their work to process and respond to your Public Records Act request.

If you have any questions concerning your request, please feel free to contact me at cmcclellan@berkeleyca.gov.

You are hereby notified that an inspection of your premises for the minimum fire and life safety requirements of City of Berkeley Ordinance No. 5474-N.S. known as "The Berkeley Fire Code" and/or the provisions of State law has revealed the following violations:

Berkeley Fire Code Section	DESCRIPTION OF VIOLATION AND CORRECTIVE ACTION REQUIRED *NOTE: NVN - No Violations Noted NA - Not Applicable V - Violation
NVN ☐ NA ☐ V ☐	1. ELECTRICAL:
11.404b	a. Discontinue use of extension cords in lieu of permanent wiring.
11.404b	b. Remove extension cords placed under rugs, furniture, or where subject to damage.
11.404a	c. Maintain wiring in good condition and protect from damage.
NVN ☐ NA ☐ V ☐	2. EXITS:
12.104b&e	a. Remove all other locks or latches from doors with panic hardware; all exit doors shall be openable from the inside without the use of key or any special knowledge or effort.
12.103e	b. Remove obstructions from exits, aisles, corridors, and stairways.
12.104b	c. Unlock all exit doors during business hours.
12.113a	d. Provide lighting for corridors, stairways, and exterior exitways.
12.113b	e. Provide approved exit signs at every required exit doorway.
NVN ☐ NA ☐ V ☐	3. FIRE ALARM SYSTEMS:
10.307c	a. Maintain fire alarm system in operable condition and test monthly.
NVN ☐ NA ☐ V ☐	4. FIRE DOORS:
12.104e	a. Remove obstruction(s) and alterations to fire doors.
11.408	b. Keep attic access and scuttle openings closed.
NVN ☐ NA ☐ V ☐	5. FIRE EXTINGUISHERS:
10.301a	a. Provide ____ extinguisher(s) of a _____ minimum rating.
10.301a	b. Mount extinguishers where readily available, with top not higher than 5 feet.
10.301a	c. Where extinguishers are not readily visible, post signs indicating location.
10.302a	d. Service and tag (by State Licensee) each extinguisher annually and after use.
NVN ☐ NA ☐ V ☐	6. FIRE PROTECTION INSTALLATIONS:
10.302	a. Maintain access to, and operation of standpipes, fire hose, and sprinkler valves.
10.302	b. Inspect and test sprinkler system monthly and maintain records.
10.302	c. Identify sprinkler valves and secure in open position.
10.302	d. Provide spare sprinklers (6 minimum) and sprinkler wrench.
10.313	e. Inspect and service hood and duct extinguishing system over cooking equipment at least every six months or after activation of the system.
10.302	f. Remove decoration or other attachments from sprinkler system.
10.302	g. Replace damaged, corroded or painted sprinkler heads.
NVN ☐ NA ☐ V ☐	7. FLAMMABLE LIQUIDS:
79.103.1	a. Reduce Class I (gasoline, etc.) to less than 5 gallons inside without a permit.
79.103.2	b. Reduce Class II, III (solvents, etc.) to 25 gallons total inside & 60 gallons outside without a permit.
79.104	c. Remove flammable liquids not stored in original containers or approved closed metal cans.
79.402b	d. Remove flammable liquids not used for maintenance in assembly building, offices, apartments and motels.
79.111	e. Discontinue use of Class I (liquids with a flash point below 100°F.) for cleaning.
79.402a	f. Store flammable liquids away from corridors, main aisles, stairways, and exit areas.
79.109a	g. Discontinue dispensing from containers exceeding 5 gallons or provide pump taking suction from top.
79.110	h. Discontinue the discharge of flammable or combustible liquids into drains or on ground.
NVN ☐ NA ☐ V ☐	8. HEAT PRODUCING APPLIANCES:
11.406d	a. Remove combustibles and storage from heater area or room.
11.406d	b. Provide clearance between heat producing appliances and combustible material.
NVN ☐ NA ☐ V ☐	9. HOUSEKEEPING (INTERIOR)
11.201b	a. Remove or store rubbish, waste material and oily rags in closed metal containers.
11.407	b. Clean grease filters, and hood duct systems over cooking appliances.
76.103c	c. Provide waste collecting receptacles at dust producing machines.
NVN ☐ NA ☐ V ☐	10. RUBBISH (OUTSIDE ACCUMULATION):
11.201a&b	a. Remove waste, trash, and weeds, OR store in closed metal or metal-lined containers.
NVN ☐ NA ☐ V ☐	11. SMOKING AND OPEN FLAMES:
13.101	a. Post and enforce "NO SMOKING" signs: _____
13.101	b. Provide ash trays, sand receptacles, or butt cans, where smoking is permitted.
NVN ☐ NA ☐ V ☐	12. STORAGE:
12.106e	a. Remove storage from under stairways.
11.203b	b. Arrange storage in orderly manner and provide for exiting.
10.308d	c. Remove storage to 18" below level of sprinkler deflectors.
11.203b	d. Reduce storage height to at least 2 feet below ceiling.
74.104b	e. Secure and identify compressed gas cylinders with name of product.
NVN ☐ NA ☐ V ☐	13. PERMITS:
4.101	a. Obtain a permit from the Fire Prevention Bureau, or DISCONTINUE.
4.102	b. Comply with permit conditions.

MAILED
APR 27 1989

ADDITIONAL REQUIREMENTS AND/OR REMARKS:

Extinguishers Located in Rear Room And Basement Need to be Serviced

ORDER TO COMPLY: As the above conditions are contrary to law, you are hereby required to correct said conditions immediately upon receipt of this notice. A reinspection to determine whether you have complied with this notice will be conducted after ____ days. Failure to correct the violations identified on this form will constitute an infraction of law under City of Berkeley Ordinance No. 5499 N.S. and will result in the issuance of a citation which may require your appearance in court and a fine of up to $250.00. If you have any questions regarding the inspection, please do not hesitate to contact the inspector below at the listed telephone number. Thank you for your cooperation.

MAP INFORMATION

The soil surveys that comprise your AOI were mapped at 1:24,000.

Warning: Soil Map may not be valid at this scale.

Enlargement of maps beyond the scale of mapping can cause misunderstanding of the detail of mapping and accuracy of soil line placement. The maps do not show the small areas of contrasting soils that could have been shown at a more detailed scale.

Please rely on the bar scale on each map sheet for map measurements.

Source of Map: Natural Resources Conservation Service
Web Soil Survey URL:
Coordinate System: Web Mercator (EPSG:3857)

Maps from the Web Soil Survey are based on the Web Mercator projection, which preserves direction and shape but distorts distance and area. A projection that preserves area, such as the Albers equal-area conic projection, should be used if more accurate calculations of distance or area are required.

This product is generated from the USDA-NRCS certified data as of the version date(s) listed below.

Soil Survey Area: Alameda County, California, Western Part
Survey Area Data: Version 19, Sep 14, 2022

Soil map units are labeled (as space allows) for map scales 1:50,000 or larger.

Date(s) aerial images were photographed: Mar 7, 2021—Mar 27, 2021

The orthophoto or other base map on which the soil lines were compiled and digitized probably differs from the background imagery displayed on these maps. As a result, some minor shifting of map unit boundaries may be evident.

Subject: **Soil Vapor Monitoring Report**
2012 Berkeley Way, Berkeley, California
Alameda County LOP Case: RO0003411

Dear Mr. York:

At the request of BRIDGE Housing Corporation, Rincon Consultants, Inc. has prepared this Soil Vapor Monitoring Report for the property located at 2012 Berkeley Way in Berkeley, California (site).

This report has been prepared to address the requirements of the Alameda County Department of Environmental Health in their letter, dated May 13, 2020. The purpose of this report is to evaluate if sub-surface vapors on the site have been impacted by operations on the site and/or adjacent properties and identify appropriate soil vapor intrusion mitigation measures to be implemented during redevelopment of the site.

Sincerely,
Rincon Consultants, Inc.

Lisa Bestard
Senior Environmental Scientist

Executive Summary

Pursuant to the findings of our initial Phase II Environmental Site Assessment (ESA) dated November 13, 2018, Rincon Consultants, Inc. (Rincon) has performed soil vapor monitoring on behalf of BRIDGE Housing (BRIDGE) at the property located at 2012 Berkeley Way in Berkeley, California (subject property). The subject property is a 0.82-acre parking lot located south of Berkeley Way, east of Milvia Street, west of Shattuck Avenue, and north of University Avenue. It is our understanding that BRIDGE plans to redevelop the subject property with a six-floor, slab-on-grade, multi-use building.

The results of soil vapor sampling performed in October 2018 indicated that toluene was the only volatile organic compound (VOC) detected on the subject property; however, the laboratory method detection limits (MDLs) for select VOCs exceeded their respective San Francisco Bay Regional Water Quality Control Board Environmental Screening Levels (ESLs) for residential sub-slab vapors and/or Tier 1 ESLs. In accordance with a request from the Alameda County Department of Environmental Health (ACDEH), additional soil vapor sampling was needed across the subject property to evaluate for potential soil vapor impacts from off-site and historical on-site uses.

In February 2020, seven temporary soil vapor probes (SV-6 through SV-12) were installed on the subject property, sampled, and analyzed for VOCs, total petroleum hydrocarbons as gasoline (TPH-g), and fixed gases. During the February 2020 sampling event, several VOCs were detected above the MDLs; however, only TPH-g in one sample (SV-12 at 15 feet below ground surface [bgs]) and benzene in each sample were detected at concentrations that exceeded their respective ESLs. In addition, trichloroethene (TCE) was detected in two samples collected at the southern boundary of the subject property adjacent to a former dry cleaner and a former auto repair shop (SV-9 at 5 feet bgs and SV-12 at 5 feet bgs); however, the concentrations were below the Tier 1 and sub-slab vapor ESLs of 15 micrograms per cubic meter ($\mu g/m^3$).

The February 2020 sampling data were submitted to ACDEH for their review and, in a meeting on March 3, 2020, ACDEH indicated that the detections of TPH-g and fuel-related VOCs were indicative of a regional groundwater issue and were not associated with an onsite release; however, the detections of TCE along the southern property boundary were indicative of a potential release on the southern adjacent properties.

The February 2020 soil vapor sampling results summarized above indicate that there is a potential release of VOCs from the southern adjacent properties that may be impacting the subject property. In meeting with ACDEH on March 3, 2020, it was determined that permanent soil vapor probes should be installed on the southern boundary of the subject property and sampled over two sampling events to evaluate offsite impacts from the south. In April 2020 three permanent soil vapor probes (SV-9A, SV-12A, and SV-13) were installed on the southern boundary of the subject property, which were sampled and analyzed for VOCs and fixed gases in April and May 2020.

During the April and May 2020 sampling events, several VOCs were detected above the MDLs; however, only benzene in two samples (SV-9A and SV-13 in April 2020) was detected at concentrations that exceeded the Tier 1 and/or residential sub-slab vapor ESL. During the May 2020 sampling event, VOCs were not detected at concentrations that exceeded their respective Tier 1 and/or residential sub-slab vapor ESLs. TCE was not detected above the laboratory MDLs limits during the April or May 2020 sampling events.

Based on the laboratory analytical results from Rincon's February, April, and May 2020 soil vapor sampling events, the concentrations of VOCs detected in the April and May sampling events are consistent with or lower than the concentrations detected February 2020. In addition, VOCs (other than benzene, which has been attributed by ACDEH to regional groundwater impacts) are not present in sub-surface soil vapor at a concentration that would present a potential health risk for residential land uses. Therefore, soil vapor mitigation engineering controls are not recommended as part of redevelopment of the subject property. Further, the April and May 2020 sampling data was provided to ACDEH in advance of this report. In a meeting on June 1, 2020, ACDEH indicated that they concur that a soil vapor barrier is not required; however, they recommend that trench dams be installed at the property line for all utilities entering the subject property from off-site to mitigate for potential vapor intrusion from off-site sources.

Introduction and Background

On behalf of BRIDGE Housing Corporation (BRIDGE), Rincon Consultants, Inc. (Rincon) has performed soil vapor monitoring at the property located at 2012 Berkeley Way in Berkeley, California (subject property – Figure 1). The subject property is a 0.82-acre parking lot located south of Berkeley Way, east of Milvia Street, west of Shattuck Avenue, and north of University Avenue (Figure 2). BRIDGE intends to redevelop the property and construct a six-story, slab-on-grade, mixed-used development. The project history with respect to soil vapor is summarized below. Information regarding the assessment of soil conditions at the subject property is summarized in the *Soil Remedial Action Plan*, prepared by Rincon, dated March 26, 2020.

Phase II ESA – October 2018

Based on the findings of a Phase I Environmental Site Assessment (ESA) prepared for the subject property by Rincon (most recent update to the report dated January 2, 2020), a Phase II ESA was completed (report dated November 13, 2018). In October 2018, Rincon advanced five soil borings (RB1/SV1 through RB5/SV5) at the subject property for the purposes of collecting soil matrix and soil vapor samples. The boring locations are depicted on Figure 2. Results of the soil vapor samples were compared to the San Francisco Bay Regional Water Quality Control Board (SFB RWQCB) Environmental Screening Levels (ESLs) for residential sub-slab vapor and the Tier 1 ESLs. A summary of soil vapor analytical data is presented in Table 1. Although the results of the sampling indicated that only toluene was detected in soil vapor on subject property (in SV5 at a concentration below the ESLs), the laboratory detection limits for select other volatile organic compounds (VOCs) exceeded their respective ESLs.

Revised Proposed Additional Assessment Rationale and Methodology – February 2020

In accordance with a request from the Alameda County Department of Environmental Health (ACDEH) (in a meeting on February 3, 2020), Rincon provided a work plan, dated February 26, 2020, to detail the rational and methodology behind additional site investigation to be performed to address data gaps identified by ACDEH in the October 2018 Phase II ESA. Additional soil and soil vapor sampling were proposed, which included the installation and sampling of seven temporary soil vapor probes (SV-6 through SV-12) on the subject property to evaluate potential soil vapor impacts. The installation and sampling of the temporary soil vapor probes is summarized in this report.

ACDEH Meeting – March 3, 2020

Results of the sampling of temporary soil vapor probes in February 2020 were provided to ACDEH for their review and discussed in a meeting on March 3,2020. Based on the February 2020 soil vapor sampling results, ACDEH required the installation of three permanent soil vapor probes (SV-9A, SV-12A, and SV-13) on the southern property boundary to evaluate soil vapor impacts from southern adjacent properties. The ACDEH recommended the collection of two additional rounds of soil vapor

data for volatile organic compounds (VOCs) in order to assess variability in the concentrations over time. The installation and sampling of the soil vapor probes is summarized below.

Geologic and Hydrologic Setting

Site Geology

According to the United States Geological Survey (USGS) Map, *Areal and Engineering Geology of the Oakland West Quadrangle, California* (1957), the subject property is underlain by materials of the Quaternary-age Temescal Formation (Qtc). Qtc is described as gravel, clayey; clay, sandy, silty; and sand-clay-silt mixtures. The map indicates that the formation covers most of the surface between the Berkeley Hills and the shore of San Francisco Bay, and is approximately 5 to 60 feet in thickness.

Soil encountered during Rincon's sampling events has generally consisted of brown to dark brown, slightly moist to moist, loose to soft or firm, sandy silt/silty sand mixtures with clay zones at depth (beyond 5 feet below ground surface[bgs]). Copies of the boring logs are presented in Appendix A.

Site Hydrogeology

The subject property is located within the Santa Clara Valley groundwater basin and East Bay Plain subbasin (California Department of Water Resources, 2003).

According to the Case Closure Summary for Oscar's Café, Former Shell Service Station (pre-1960) dated July 25, 2016, depth to groundwater is approximately 37 feet bgs. Groundwater flow direction was shown to flow to the west. This property is located approximately 390 feet to the north-northwest of the subject property. Based on various groundwater monitoring reports for other nearby sites, the regional groundwater flow direction appears to be to the west-southwest or to the southwest.

Groundwater was not encountered during Rincon's sub-surface assessments to the maximum depth explored of 15 feet bgs. Additionally, groundwater was not encountered during the advancement of geotechnical borings completed by others in June 2019 (maximum depth of geotechnical borings – 15 feet bgs).

Soil Vapor Monitoring

This Soil Vapor Monitoring Report summarizes the installation and sampling of temporary soil vapor probes (SV-6 through SV-12) in February 2020 and the installation and sampling of permanent soil vapor probes in April and May 2020 (SV-9A, SV-12A, and SV-13). The purpose and scope of these assessments are briefly described below. The sampling methodology, findings, conclusions, and recommendations resulting from these assessments are detailed in subsequent sections of this report.

February 2020 Soil Vapor Sampling

Purpose

The results of the October 2018 soil vapor sampling indicated that toluene was the only VOCs detected on the subject property, which was at a concentration below the ESL; however, the laboratory detection limits for select VOCs exceeded their respective SFB RWQCB ESLs for residential sub-slab vapors and/or Tier 1 ESLs. In accordance with the ACDEH's request, additional soil vapor sampling was needed across the subject property to evaluate for potential soil vapor impacts from off-site and historical on-site uses. Seven temporary soil vapor probes (SV-6 through SV-12) were installed on February 19, 2020 in accordance with the *Revised Proposed Additional Assessment Rationale and Methodology* (Rincon 2020b) (Figure 2). Copies of the boring logs are provided in Appendix A.

Scope of Work

The February 2020 soil vapor sampling event included the following:

- Soil boring mark outs and notification of Underground Service Alert.
- Obtained boring permits from the City of Berkeley Planning and Development Department Toxics Management Division, as borings were advanced to depths of up to 5 feet bgs.
- Updated of the site-specific Health & Safety Plan (HASP) which was prepared as part of the initial October 2018 Phase II ESA. The HASP outlined the measures to be followed during the proposed sampling to minimize exposure of potential contamination to onsite workers who are participating in the soil matrix sampling activities.
- Advanced seven temporary soil vapor probes at the subject property. Borings SV-6 and SV-8 were advanced to a depth of 6 feet bgs in the areas of the proposed elevator shafts. Boring SV-7 was advanced to a depth of 5 feet bgs in the vicinity of the detection of toluene in SV5 in October 2018. Boring SV-9 was advanced to a depth of 12 feet bgs in the area of a proposed sump pump. Borings SV-10, SV-11, and SV-12 were advanced to a depth of 15 feet bgs to evaluate to assess soil vapor in proximity to two former offsite automotive facilities and the former offsite drycleaners.
- Collected soil vapor samples were analyzed for VOCs by United States Environmental Protection Agency (EPA) Method TO-15, total petroleum hydrocarbons in the gasoline range (TPH-g) by EPA Method TO-3, and fixed gases by American Society of Testing and Materials (ASTM) Method D1946-90.

April and May 2020 Soil Vapor Sampling

Purpose

The February 2020 soil vapor sampling results summarized above indicated that there is a potential release of VOCs from the southern adjacent properties that may be impacting the subject property. In meeting with ACDEH on March 3, 2020, it was determined that permanent soil vapor probes should be installed on the southern boundary of the subject property and sampled over two sampling events to evaluate offsite impacts from the south. In April 2020 three permanent soil vapor probes (SV-9A, SV-12A, and SV-13) were installed on the southern boundary of the subject property, which were sampled in April and May 2020 (Figure 2). Copies of the boring logs and well construction details are provided in Appendix A.

Scope of Work

The April and May 2020 soil vapor sampling event included the following:

- Soil boring mark outs and notification of Underground Service Alert.
- Updated the HASP to reflect the revised scope of work.
- Obtained boring permits from the City of Berkeley Planning and Development Department Toxics Management Division, as permanent soil vapor probes were installed.
- Advanced three soil borings to a depth of 5 feet bgs and installed permanent soil vapor probes. Soil vapor probes SV-9A and SV-12A were installed adjacent to the temporary soil vapor sample points SV-9 and SV-12 and soil vapor probes SV-13 was installed mid-way between SV-9A and SV-12A.
- Collected soil vapor samples in April and May 2020 and analyzed the samples for VOCs by EPA Method TO-15 and fixed gases by ASTM Method D1946-90.

Sampling Methodology

The temporary soil vapor probes and permanent soil vapor probes were installed as described in the following sections. Non-dedicated equipment was decontaminated between sampling locations in a non-phosphate soap/potable water solution and rinsed with potable water and distilled water. Installation and sampling were performed under the oversight of a California Professional Geologist. Additional details from each of the three sampling events are presented below.

Soil Vapor Probe Installation

On February 19, 2020, seven soil borings were advanced by TEG using a truck-mounted Geoprobe rig with direct push technology (DPT) and converted to temporary soil vapor probes (SV-6 through SV-12). On April 9, 2020, three soil borings were advanced by PeneCore Drilling using hand tools and converted to permanent soil vapor probes (SV-9A, SV-12A, and SV-13) (Figure 2).

The soil vapor probes were constructed using inert FEP Teflon tubing with a 3/16-inch inner diameter connected to a polyethylene probe tip. The probe tip was centered vertically in 1 foot of Cemex No. 2 sand, which was overlain by roughly 6 inches of Cetco No. 8 bentonite crumbles and finished with hydrated bentonite to either the next sampling interval, or to the surface. The bentonite was deposited in roughly 6-inch lifts and hydrated after each lift. For the permanent soil vapor probes, four-inch diameter well vaults were installed at the surface. Copies of the soil boring logs, including well construction diagrams, are provided in Appendix A.

A single soil vapor probe was installed in SV-6 and SV-8 at a depth of 6 feet bgs and in SV-7, SV-9A, SV-12A, and SV-13 at a depth of 5 feet bgs. Dual-nested probes were installed in SV-9 at depths of 5 and 12 feet bgs and in SV-10 through SV-12 at depths of 5 and 15 feet bgs. Soil vapor sampling was performed as described in the following sections.

Following the completion of sampling, the temporary soil vapor probe materials were removed, and boring locations were backfilled with hydrated bentonite chips and capped with cold-patch asphalt to match existing surface conditions. The permanent soil vapor probes are proposed to be removed concurrent with grading during subject property redevelopment activities in June 2020. Documentation of the removal of the permanent soil vapor wells will be provided to the City of Berkeley and ACDEH under separate cover.

Soil Vapor Sampling

After allowing for the appropriate time interval to elapse for sub-surface conditions to equilibrate (2-hours for DPT borings, and 48-hours for hand augered borings), soil vapor samples were collected as described below and transported under chain of custody documentation to Enthalpy Analytical, Inc., a State-certified analytical laboratory in Berkeley, California. Copies of the field data sheets are provided in Appendix. B.

Due to low-flow conditions encountered below approximately 6 feet bgs, samples could not be collected from the deeper probes set at SV-9, SV-10, and SV-11.

Shut-in Test

Prior to making a connection to the sampling point, the integrity of the sampling manifold was tested using a shut-in test. The sampling manifold was connected to a 60 milliliter (mL) syringe to evacuate the manifold and create a vacuum. The valve on the manifold was then closed, "shutting in" the vacuum, and the start time and flow controller reading were recorded on the field sheets. The flow controller was observed for at least three minutes to confirm that the vacuum did not decrease over time. After at least three minutes had elapsed, the end time and final flow controller readings were recorded. If the vacuum reading decreased by any amount during the shut-in test, the connections were re-checked, and the test conducted again.

Leak Test and Soil Vapor Probe Purging

To assess whether ambient air was infiltrating the sample or the hydrated bentonite sealing the soil vapor probes, a leak test was performed using a shroud and helium gas provided by the laboratory. After the shut-in test, the manifold was connected to the sample point, and the entire sample train was placed inside of the shroud. The shroud was sealed and charged with helium until an atmosphere composition of at least 15 percent helium was achieved and stabilized.

Prior to sampling, a volume equal to three times the combined volume of the tubing, the sand pack pore space, and the sample train were purged from the system. The purged soil vapor was passed through a helium detector. If any amount of helium was detected in the purged vapor, the sample train was checked, and the test was rerun until the absence of helium in the sample train was established. Data collected during the leak tests were recorded on sampling field sheets (Appendix B).

The samples were collected with the cannisters placed inside the helium charged shroud, such that if an undetected leak occurred after the leak test, helium would be drawn into the sample train and detected during laboratory analysis. The Department of Toxic Substances Control's (DTSC) July 2015 *Active Soil vapor Investigations Advisory* states that a concentration of helium greater than or equal to 5 percent of the shroud's atmosphere concentration indicates that a leak occurred. In the field, the shroud's atmosphere was maintained at a concentration of at least 15 percent; therefore, a laboratory result of at least 0.75 percent would indicate a leak.

Helium was not detected in any of the collected samples, indicating that a leak did not occur.

Laboratory Analyses

Soil vapor samples were transported under chain of custody documentation to Enthalpy Analytical, Inc., a State-certified analytical laboratory in Berkeley, California. The analytical laboratory ELAP number is included in the analytical reports (Appendix C).

The samples were analyzed for VOCs by EPA Method TO-15 and fixed gases by ASTM method D1946-90.

Soil Vapor Analytical Results

Soil vapor analytical results are summarized in Tables 1 and 2. Soil vapor analytical results were compared to the SFB RWQCB residential ESLs for sub-slab vapor and Tier 1 ESLs (July 2019). Figures 3 through 5 show the concentrations of VOCs exceeding ESLs.

February 2020 Sample Results

During the February 2020 sampling event, several VOCs were detected above the MDLs; however, only TPH-g and benzene were detected at concentrations that exceeded their respective ESLs as described below:

- TPH-g was detected in each of the soil vapor samples at concentrations ranging from 654 B to 13,497 B micrograms per liter (µg/m^3). The soil vapor sample collected from SV-12 at 15 feet bgs contained TPH-g at a concentration 13,497 µg/m^3, which exceeds the Tier 1 ESL of 3,300 µg/m^3 but is below the residential sub-slab vapor ESL of 20,000 µg/m^3. The remaining samples did not contain TPH-g at concentrations above the Tier 1 or residential sub-slab vapor ESL. The 'B' qualifier indicates TPH-g was detected above the laboratory reporting limit in the method blank.
- Benzene was detected in each of the soil vapor samples at concentrations ranging from 5.9 to 28.4 µg/m^3, which exceed the Tier 1 (3.2 µg/m^3) and residential sub-slab vapor ESL (3.2 µg/m^3).

Trichloroethene (TCE) was detected in two samples collected at the southern boundary of the subject property (adjacent to a former dry cleaner and a former auto repair shop) at concentrations of 7.8 J µg/m^3 (SV-9 at 5 feet bgs) and 1.1 J µg/m^3 (SV-12 at 5 feet bgs), which are below the Tier 1 and sub-slab vapor ESL of 15 µg/m^3. The 'J' qualifier indicates TCE was detected at a concentration between the MDL and the laboratory practical quantitation limit.

Helium was not detected in the samples collected, indicating that there were no leaks in the sampling train. Oxygen was present at concentrations ranging from 8.1 percent to 16 percent, indicating an aerobic environment. Carbon dioxide was present at concentrations ranging from 2.0 percent to 10.0 percent. Methane was not detected above the MDLs, which ranged from 0.20 to 0.67 percent.

April and May 2020 Sample Results

During the April and May 2020 sampling events, several VOCs were detected above the MDLs; however, only benzene was detected at concentrations that exceeded the ESLs as described below:

- Benzene was detected in the soil vapor samples collected from SV-9A in April at a concentration of 9.5 µg/m^3 and from SV-13 at a concentration of 4.0 µg/m^3, which exceed the Tier 1 (3.2 µg/m^3) and residential sub-slab vapor ESLs (3.2 µg/m^3).

During the May 2020 sampling event, VOCs were not detected at concentrations that exceeded their respective Tier 1 and/or residential sub-slab vapor ESLs.

TCE was not detected above the laboratory MDLs during the April or May 2020 sampling events. The laboratory MDLs for TCE were below the Tier 1 and residential sub-slab vapor ESLs.

Helium was not detected in the samples collected, indicating that there were no leaks in the sampling train. Oxygen was present at concentrations ranging from 8.8 percent to 17 percent, which is consistent with the February sampling event and indicates an aerobic environment. Carbon dioxide was present at concentrations ranging from 1.6 percent to 8.4 percent, which is consistent with the February sampling event . Methane was not detected above the MDLs, which ranged from 0.15 to 0.20 percent.

Conclusions and Recommendations

Based on the laboratory analytical results from Rincon's February, April, and May 2020 soil vapor sampling events, the concentrations of VOCs detected in the April and May sampling events are consistent with or lower than the concentrations detected February 2020. In addition, VOCs (other than benzene, which has been attributed by ACDEH to regional groundwater impacts) are not present in sub-surface soil vapor at a concentration that would present a potential health risk for residential land uses. Therefore, soil vapor mitigation engineering controls are not recommended as part of redevelopment of the subject property. Further, the April and May 2020 sampling data was provided to ACDEH in advance of this report. In a meeting on June 1, 2020, ACDEH indicated that they concur that a soil vapor barrier is not required; however, they recommend that trench dams be installed at the property line for all utilities entering the property from off-site to mitigate for potential vapor intrusion from off-site sources. A copy of the trench dam design is provided in Appendix D.

Limitations

This report has been prepared for and is intended for the exclusive use of BRIDGE. The contents of this report should not be relied upon by any other party without the written consent of Rincon Consultants, Inc.

Our conclusions regarding the subject property are based on observations of existing site conditions and the results of a limited subsurface sampling program. The results of this evaluation are qualified by the fact that only limited sampling and analytical testing was conducted during this assessment.

This scope was not intended to completely establish the quantities and distribution of contaminants present at the subject property. The concentrations of contaminants measured at any given location may not be representative of conditions at other locations. Furthermore, conditions may change at any particular location as a function of time in response to natural conditions, chemical reactions, and other events. Conclusions regarding the condition of the subject property do not represent a warranty that all areas within the subject property are similar to those sampled.

Definitions:

% - Percentage

- - Not sampled

< - Constituent not detected above associated laboratory reporting limit

bold - Constituent detected above laboratory reporting limit

ppmv - Parts per million vapor

NE - Screening level not established

Note: 5% of the helium shroud's concentration indicates a leak. Under Site-specific field conditions, the helium shroud atmosphere was kept at around 20%. A detection of 1% in the sample would suggest a leak. (Department of Toxic Substances Control, Advisory - Active Soil Gas Investigations, July 2015).

*Duplicate Sample (SV-12A)

Case Narrative

Rincon Consultants 449 15th Street #303 Oakland, CA 94612 Alexis White	Lab Job Number: 318407 Project No: 18-06102 Location: 2012 Berkeley Way Date Received: 02/19/20

This data package contains sample and QC results for seven air samples, requested for the above referenced project on 02/19/20. The samples were received intact.

Volatile Organics in Air GC (ASTM D1946-90 and EPA TO-3):
Gasoline range organics C6-C12 was detected above the RL in the method blank for batch 278742. No other analytical problems were encountered.

Volatile Organics in Air (EPA TO-15):
Enthalpy Analytical in Orange, CA performed the analysis (NELAP certified). Please see the Enthalpy Analytical case narrative.

SAMPLE RECEIPT CHECKLIST

Section 1: Login # 318407 Client: Dincon

Date Received: 2/19/20 Project: _____

ENTHALPY

Section 2: Shipping info (if applicable) _____

Are custody seals present? ☐ No, or ☐ Yes. If yes, where? ☐ on cooler, ☐ on samples, ☐ on package

☐ Date: _____ How many _____ ☐ Signature, ☐ Initials, ☐ None

Were custody seals intact upon arrival? ☐ Yes ☐ No ☐ N/A

Samples received in a cooler? ☐ Yes, how many? _____ ☐ No **(skip Section 3 below)**

If no cooler Sample Temp (°C): _____ using IR Gun # ☐ B, or ☐ C

☐ Samples received on ice directly from the field. Cooling process had begun

If in cooler: Date Opened _____ By (print)_____ (sign)_____

Section 3: ***Important*: Notify PM if temperature exceeds 6°C or arrive frozen.**

Packing in cooler: (if other, describe)_____

☐ Bubble Wrap, ☐ Foam blocks, ☐ Bags, ☐ None, ☐ Cloth material, ☑ Cardboard, ☐ Styrofoam, ☐ Paper towels

☐ Samples received on ice directly from the field. Cooling process had begun

Type of ice used : ☐ Wet, ☐ Blue/Gel, ☐ None Temperature blank(s) included? ☐ Yes, ☐ No

Temperature measured using ☐ Thermometer ID:_____, or IR Gun # ☐ B ☐ C

Cooler Temp (°C): #1: _____, #2: _____, #3: _____, #4: _____, #5: _____, #6: _____, #7: _____

Section 4:	YES	NO	N/A
Were custody papers dry, filled out properly, and the project identifiable	✓		
Were Method 5035 sampling containers present?		✓	
If YES, what time were they transferred to freezer?_____			
Did all bottles arrive unbroken/unopened?	✓		
Are there any missing / extra samples?		✓	
Are samples in the appropriate containers for indicated tests?	✓		
Are sample labels present, in good condition and complete?	✓		
Does the container count match the COC?	✓		
Do the sample labels agree with custody papers?	✓		
Was sufficient amount of sample sent for tests requested?	✓		
Did you change the hold time in LIMS for unpreserved VOAs?			✓
Did you change the hold time in LIMS for preserved terracores?			✓
Are bubbles > 6mm present in VOA samples?			✓
Was the client contacted concerning this sample delivery?			
If YES, who was called?_____ By_____ Date:_____			

Section 5:	YES	NO	N/A
Are the samples appropriately preserved? (if N/A, skip the rest of section 5)			✓
Did you check preservatives for all bottles for each sample?			
Did you document your preservative check?			

pH strip lot# _____, pH strip lot# _____, pH strip lot# _____

Preservative added:

☐ H2SO4 lot# _____ added to samples _____ on/at _____

☐ HCL lot# _____ added to samples _____ on/at _____

☐ HNO3 lot# _____ added to samples _____ on/at _____

☐ NaOH lot# _____ added to samples _____ on/at _____

Section 6:

Explanations/Comments: _____

Date Logged in 2/19/20 **By (print)** AC **(sign)** _____

Client: Enthalpy - Berkeley
Address: 2323 Fifth Street
Berkeley, CA 94710

Attn: Jessica Silberman

Comments: Project Number: 318407
Site: 2012 Berkeley Way

Lab Request: 425071
Report Date: 02/26/2020
Date Received: 02/22/2020
Client ID: 15279

This laboratory request covers the following listed samples which were analyzed for the parameters indicated on the attached Analytical Result Report. All analyses were conducted using the appropriate methods. Methods accredited by NELAC are indicated on the report. This cover letter is an integral part of the final report.

Sample #	Client Sample ID
425071-001	SV-8@6
425071-002	SV-9@5
425071-003	SV-12@5
425071-004	SV-7@5
425071-005	SV-12@15
425071-006	SV-6@6
425071-007	SV-10@5

Thank you for the opportunity to be of service to your company. Please feel free to call if there are any questions regarding this report or if we can be of further service.

Report Review performed by: Lisa Nguyen, PM

NOTE: Unless notified in writing, all samples will be discarded by appropriate disposal protocol 45 days from date received.

The reports of the Enthalpy Analytical, Inc. are confidential property of our clients and may not be reproduced or used for publication in part or in full without our written permission. This is for the mutual protection of the public, our clients, and ourselves.

Data Qualifiers and Definitions

Qualifiers

A	See Report Comments.
B	Analyte was present in an associated method blank.
B1	Analyte was present in a sample and associated method blank greater than MDL but less than RDL.
BQ1	No valid test replicates. Sample Toxicity is possible. Best result was reported.
BQ2	No valid test replicates.
BQ3	No valid test replicates. Final DO is less than 1.0 mg/L. Result may be greater.
BQ4	Minor Dissolved Oxygen loss was observed in the blank water check, however, the LCS was within criteria, validating the batch.
BQ5	Minor Dissolved Oxygen loss was observed in the blank water check.
C	Possible laboratory contamination.
D	RPD was not within control limits. The sample data was reported without further clarification.
D1	Lesser amount of sample was used due to insufficient amount of sample supplied.
D2	Reporting limit is elevated due to sample matrix. Target analyte was not detected above the elevated reporting limit.
D3	Insufficient sample was supplied for TCLP. Client was notified. TCLP was performed per the Client's instructions.
DW	Sample result is calculated on a dry weigh basis.
E	Concentration is estimated because it exceeds the quantification limits of the method.
I	The sample was read outside of the method required incubation period.
IR	Inconclusive Result. Legionella is present, however, there is possible non-specific agglutination preventing specific identification.
J	Reported value is estimated
L	The laboratory control sample (LCS) or laboratory control sample duplicate (LCSD) was out of control limits. Associated sample data was reported with qualifier.
L2	LCS did not meet recovery criteria, however, the MS and/or MSD met LCS recovery criteria, validating the batch.
M	The matrix spike (MS) or matrix spike duplicate (MSD) was not within control limits due to matrix interference. The associated LCS and/or LCSD was within control limits and the sample data was reported without further clarification.
M1	The matrix spike (MS) or matrix spike duplicate (MSD) is not within control limits due to matrix interference.
M2	The matrix spike (MS) or matrix spike duplicate (MSD) was not within control limits. The associated LCS and/or LCSD was not within control limits. Sample result is estimated.
N1	Sample chromatography does not match the specified TPH standard pattern.
NC	The analyte concentration in the sample exceeded the spike level by a factor of four or greater, spike recovery and limits do not apply.
P	Sample was received without proper preservation according to EPA guidelines.
P1	Temperature of sample storage refrigerator was out of acceptance limits.
P2	The sample was preserved within 24 hours of collection in accordance with EPA 218.6.
P3	Per Client request, sample was composited for volatile analysis. Sample compositing for volatile analysis is not recommended due to potential loss of target analytes. Results may be biased low.
Q1	Analyte Calibration Verification exceeds criteria. The result is estimated.
Q2	Analyte calibration was not verified and the result was estimated.
Q3	Analyte initial calibration was not available or exceeds criteria. The result was estimated.
S	The surrogate recovery was out of control limits due to matrix interference. The associated method blank surrogate recovery was within control limits and the sample data was reported without further clarification.
S1	The associated surrogate recovery was out of control limits; result is estimated.
S2	The surrogate was diluted out due to the presence of high concentrations of target and/or non-target compounds. Surrogate recoveries in the associated batch QC met recovery criteria.
S3	Internal Standard did not meet recovery limits. Analyte concentration is estimated.
T	Sample was extracted/analyzed past the holding time.
T1	Reanalysis was reported past hold time due to failing replicates in the original analysis (BOD only).
T2	Sample was analyzed ASAP but received and analyzed past the 15 minute holding time.
T3	Sample received and analyzed out of hold time per client's request.
T4	Sample was analyzed out of hold time per client's request.
T5	Reanalysis was reported past hold time. The original analysis was within hold time, but not reportable.
T6	Hold time is indeterminable due to unspecified sampling time.
T7	Sample was analyzed past hold time due to insufficient time remaining at time of receipt.

Definitions

DF	Dilution Factor
MDL	Method Detection Limit. Result is reported ND when it is less than or equal to MDL.
ND	Analyte was not detected or was less than the detection limit.
NR	Not Reported. See Report Comments.
RDL	Reporting Detection Limit
TIC	Tentatively Identified Compounds

SAMPLE ACCEPTANCE CHECKLIST

Section 1
Client: Enthalpy Berkeley Project: 318407
Date Received: 2/28/20 Sampler's Name Present: ☐ Yes ☑ No

Section 2
Sample(s) received in a cooler? ☐ Yes, How many? _____ ☐ No (skip section 2) Sample Temp (°C) (No Cooler): ambient
Sample Temp (°C), One from each cooler: #1: _____ #2: _____ #3: _____ #4: _____
(Acceptance range is < 6°C but not frozen (for Microbiology samples, acceptance range is < 10°C but not frozen). It is acceptable for samples collected the same day as sample receipt to have a higher temperature as long as there is evidence that cooling has begun.)
Shipping Information: _____

Section 3
Was the cooler packed with: ☐ Ice ☐ Ice Packs ☐ Bubble Wrap ☐ Styrofoam ☐ Paper ☐ None ☐ Other _____
Cooler Temp (°C): #1: _____ #2: _____ #3: _____ #4: _____

Section 4	YES	NO	N/A
Was a COC received?	✓		
Are sample IDs present?	✓		
Are sampling dates & times present?	✓		
Is a relinquished signature present?	✓		
Are the tests required clearly indicated on the COC?	✓		
Are custody seals present?		✓	
If custody seals are present, were they intact?			✓
Are all samples sealed in plastic bags? (Recommended for Microbiology samples)			✓
Did all samples arrive intact? If no, indicate in Section 4 below.	✓		
Did all bottle labels agree with COC? (ID, dates and times)	✓		
Were the samples collected in the correct containers for the required tests?	✓		
Are the containers labeled with the correct preservatives?			✓
Is there headspace in the VOA vials greater than 5-6 mm in diameter?			✓
Was a sufficient amount of sample submitted for the requested tests?	✓		

Section 5 Explanations/Comments
Air Samples

Section 6
For discrepancies, how was the Project Manager notified? ☐ Verbal PM Initials: _____ Date/Time _____
☐ Email (email sent to/on): _____ / _____
Project Manager's response:

Case Narrative

Rincon Consultants 449 15th Street #303 Oakland, CA 94612 Alexis White	Lab Job Number: 319292 Project No: 18-06102 Location: 2012 Berkeley Way Date Received: 04/13/20

This data package contains sample and QC results for four air samples, requested for the above referenced project on 04/13/20. The samples were received cold and intact.

Volatile Organics in Air (EPA TO-15):
Enthalpy Analytical in Orange, CA performed the analysis (NELAP certified). Please see the Enthalpy Analytical case narrative.

(ASTM D1946):
Enthalpy Analytical in Orange, CA performed the analysis (NELAP certified). Please see the Enthalpy Analytical case narrative.

ENTHALPY ANALYTICAL

Detection Summary for 319292

Client: Rincon Consultants
Project: 18-06102
Location 2012 Berkeley Way

No detections for SV-12A, Lab ID 319292-001

No detections for SV-15, Lab ID 319292-002

No detections for SV-13, Lab ID 319292-003

No detections for SV-9A, Lab ID 319292-004

Results for any subcontracted analyses are not included in this summary. Data qualifiers and additional information necessary for the interpretation of the test results are contained in the PDF file and may not be included in this summary.

ENTHALPY ANALYTICAL

SAMPLE ACCEPTANCE CHECKLIST

Section 1

Client: ENTHALPY BERKELEY Project: _____

Date Received: 04/15/22 Sampler's Name Present: ☐ Yes ☑ No

Section 2

Sample(s) received in a cooler? ☐ Yes, How many? _____ ☑ No (skip section 2) Sample Temp (°C) (No Cooler): AMBIENT

Sample Temp (°C), One from each cooler: #1: _____ #2: _____ #3: _____ #4: _____

(Acceptance range is < 6°C but not frozen (for Microbiology samples, acceptance range is < 10°C but not frozen). It is acceptable for samples collected the same day as sample receipt to have a higher temperature as long as there is evidence that cooling has begun.)

Shipping Information: GLS

Section 3

Was the cooler packed with: ☐ Ice ☐ Ice Packs ☐ Bubble Wrap ☐ Styrofoam ☐ Paper ☐ None ☐ Other _____

Cooler Temp (°C): #1: _____ #2: _____ #3: _____ #4: _____

Section 4	YES	NO	N/A
Was a COC received?	✓		
Are sample IDs present?	✓		
Are sampling dates & times present?	✓		
Is a relinquished signature present?	✓		
Are the tests required clearly indicated on the COC?	✓		
Are custody seals present?		✓	
If custody seals are present, were they intact?			✓
Are all samples sealed in plastic bags? (Recommended for Microbiology samples)			✓
Did all samples arrive intact? If no, indicate in Section 4 below.	✓		
Did all bottle labels agree with COC? (ID, dates and times)	✓		
Were the samples collected in the correct containers for the required tests?	✓		
Are the containers labeled with the correct preservatives?			✓
Is there headspace in the VOA vials greater than 5-6 mm in diameter?			✓
Was a sufficient amount of sample submitted for the requested tests?	✓		

Section 5 Explanations/Comments

_____

_____

_____

Section 6

For discrepancies, how was the Project Manager notified? ☐ Verbal PM Initials: _____ Date/Time _____

☐ Email (email sent to/on): _____ / _____

Project Manager's response:

Completed By: _____ Date: 04/15/22

Case Narrative

Rincon Consultants 449 15th Street #303 Oakland, CA 94612 Alex Cruz	Lab Job Number: 428596 Project No: 2012 BERKELEY Location: 2012 Berkeley Way Date Received: 05/22/20

This data package contains sample and QC results for four air samples, requested for the above referenced project on 05/22/20. The samples were received cold and intact.

Volatile Organics in Air by MS (EPA TO-15):
No analytical problems were encountered.

Volatile Organics in Air GC (ASTM D1946):
No analytical problems were encountered.

SAMPLE ACCEPTANCE CHECKLIST

Section 1

Client: Rincon Project: 2012 Berkeley

Date Received: 5/23/20 Sampler's Name Present: ☑ Yes ☐ No

Section 2

Sample(s) received in a cooler? ☐ Yes, How many? _____ ☑ No (skip section 2) Sample Temp (°C) (No Cooler): Ambient

Sample Temp (°C), One from each cooler: #1: _____ #2: _____ #3: _____ #4: _____

(Acceptance range is < 6°C but not frozen (for Microbiology samples, acceptance range is < 10°C but not frozen). It is acceptable for samples collected the same day as sample receipt to have a higher temperature as long as there is evidence that cooling has begun.)

Shipping Information: GLS

Section 3

Was the cooler packed with: ☐ Ice ☐ Ice Packs ☐ Bubble Wrap ☐ Styrofoam ☐ Paper ☐ None ☐ Other _____

Cooler Temp (°C): #1: _____ #2: _____ #3: _____ #4: _____

Section 4	YES	NO	N/A
Was a COC received?	✓		
Are sample IDs present?	✓		
Are sampling dates & times present?	✓		
Is a relinquished signature present?	✓		
Are the tests required clearly indicated on the COC?	✓		
Are custody seals present?		✓	
If custody seals are present, were they intact?			✓
Are all samples sealed in plastic bags? (Recommended for Microbiology samples)			✓
Did all samples arrive intact? If no, indicate in Section 4 below.	✓		
Did all bottle labels agree with COC? (ID, dates and times)	✓		
Were the samples collected in the correct containers for the required tests?	✓		
Are the containers labeled with the correct preservatives?			✓
Is there headspace in the VOA vials greater than 5-6 mm in diameter?			✓
Was a sufficient amount of sample submitted for the requested tests?	✓		

Section 5 Explanations/Comments

Section 6

For discrepancies, how was the Project Manager notified? ☐ Verbal PM Initials: _____ Date/Time _____

☐ Email (email sent to/on): _____ / _____

Project Manager's response:

Completed By: _____ Date: 05/23/20

5/22/2020

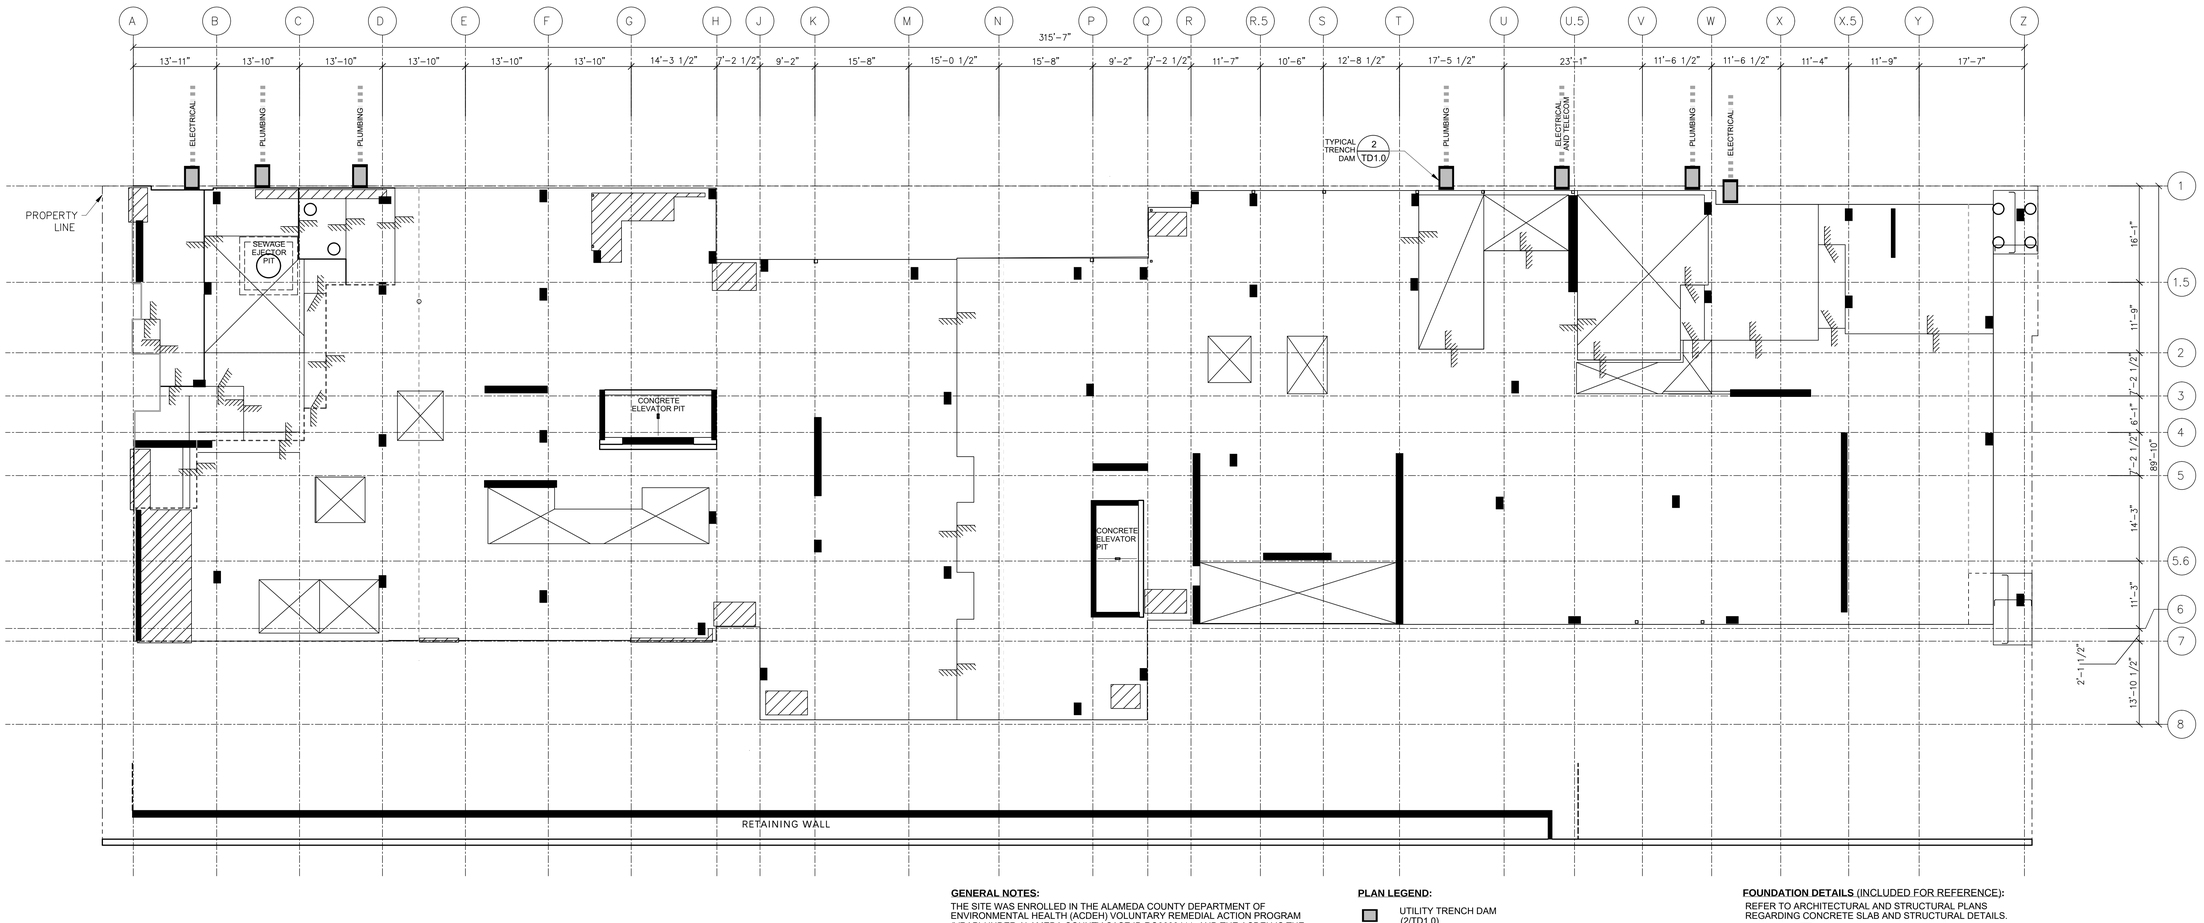
Trench Dam Design Detail



GENERAL NOTES:

THE SITE WAS ENROLLED IN THE ALAMEDA COUNTY DEPARTMENT OF ENVIRONMENTAL HEALTH (ACDEH) VOLUNTARY REMEDIAL ACTION PROGRAM (VRAP) UNDER ALAMEDA COUNTY CASE ID RO0003411, AND THE ACDEH IS THE LEAD REGULATORY OVERSIGHT AGENCY. THE SITE IS INCLUDED ON THE STATE WATER RESOURCES CONTROL BOARD'S GEOTRACKER WEBSITE (GLOBAL ID T10000013971).

BASED ON VARIOUS SUBSURFACE ENVIRONMENTAL ASSESSMENTS AND AS REQUESTED BY THE ACDEH, UTILITY TRENCH DAMS WILL BE INSTALLED AT OR NEAR THE PROPERTY BOUNDARY IN UTILITY TRENCHES THAT ORIGINATE FROM OUTSIDE OF THE PROPERTY BOUNDARY AND EXTEND TO THE BUILDING FOOTPRINT. THE PURPOSE OF EACH TRENCH DAM IS TO REDUCE THE POTENTIAL OF OFF-SITE CONTAMINATED VAPORS FROM MIGRATING THROUGH TRENCH BACKFILL MATERIAL TO BENEATH THE BUILDING FOOTPRINT.

PLAN LEGEND:

UTILITY TRENCH DAM (2/TD1.0)

PLAN NOTES:

1. REFER TO CIVIL, PLUMBING, ELECTRICAL, TECHNOLOGY, AND JOINT TRENCH PLANS FOR ADDITIONAL INFORMATION REGARDING UTILITY TRENCH LOCATIONS, AS SHOWN ON THIS DRAWING.

FOUNDATION DETAILS (INCLUDED FOR REFERENCE)**:**

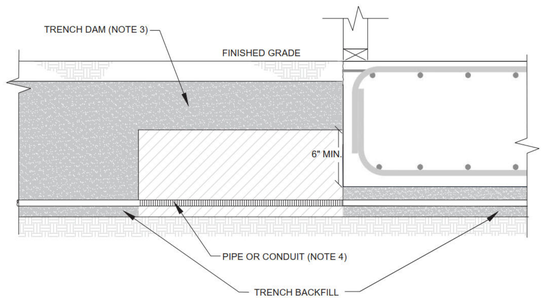
REFER TO ARCHITECTURAL AND STRUCTURAL PLANS REGARDING CONCRETE SLAB AND STRUCTURAL DETAILS.

- CONCRETE COLUMN
- CONCRETE BEARING / SHEAR WALLS
- SLAB STEP
- SLAB SLOPE CHANGE
- SLAB DEPRESSION
- SLOPE TOP OF SLAB

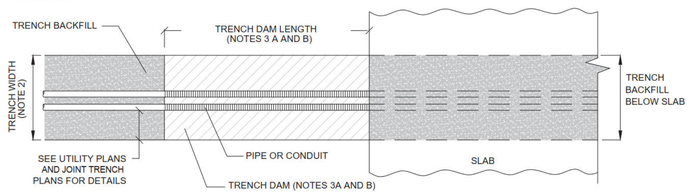
1 TD1.0 UTILITY TRENCH DAM SITE PLAN

3/32" = 1'-0"

SECTION:



PLAN VIEW:



NOTES:

1. UTILITY TRENCH DAMS SHALL BE INSTALLED AT OR NEAR THE PROPERTY BOUNDARY IN UTILITY TRENCHES THAT ORIGINATE FROM OUTSIDE OF THE PROPERTY BOUNDARY AND EXTEND TO THE BUILDING FOOTPRINT.
2. THE WIDTH OF A TRENCH DAM SHALL BE BASED ON HALF THE LENGTH.
3. TRENCH DAMS SHALL BE CONSTRUCTED OF ONE OF THE FOLLOWING:
   a. BENTONITE CEMENT SLURRY THREE FEET LONG: A MIXTURE OF 4% TYPE II CEMENT AND 2% POWDERED BENTONITE.
   b. COMPACTED NATIVE SOILS BACKFILL FIVE FEET LONG: NATIVE SOILS SHALL BE COMPACTED AT LEAST 90% RELATIVE COMPACTION IN ACCORDANCE WITH ASTM D-1557 TESTING PROCEDURES.
   c. CONCRETE MIXES OTHER THAN BENTONITE CEMENT SLURRY MAY BE USED PROVIDED CONDUIT OR PIPING IS WRAPPED WITH HIGH-DENSITY PVC FOAM TAPE, CLOSED CELLS, ADHESIVE BACKED, 1/4" THICK BY 1/2" WIDE SHALL BE APPLIED TO CLEAN SURFACE WITH ENDS BUTTED TOGETHER AT MOST VISIBLE LOCATIONS IN TRENCH DAM.
4. PIPING AND CONDUIT SHALL BE PROTECTED FROM CORROSION AND STRUCTURAL SETTLEMENT AS FOLLOWS:
   a. TAPE SHALL BE APPLIED ON METAL CONDUIT AND PIPING ENCASED IN CEMENT SLURRY OR CONCRETE.
   b. TAPE SHALL BE PS-37-90, BLACK PLASTIC PVC OR PE PRESSURE-SENSITIVE CORROSION PREVENTIVE TAPE.

QUALIFICATIONS

ADRIAN M. ANGEL

ASSOCIATE CONSULTANT

EDUCATION

- UC Santa Cruz, Earth Sciences, June 2004

CERTIFICATIONS

- Geologist-in-Training, California State Board of Geologists and Geophysicists
- 40 Hour Hazwoper Training

SUMMARY OF PROFESSIONAL EXPERIENCE

Mr. Angel has 15+ years of experience in the geological and environmental sciences. Mr. Angel's experience includes the completion of a myriad of Phase I Environmental Site Assessments, Phase II Subsurface/Site Characterization Investigations, Remedial Actions (i.e. soil excavations and soil vapor extraction), and Case Closure Petitions. His clients have included major oil companies, city and county agencies, financial institutions, hospitals, and land developers. He has acted as a client-regulatory liaison to negotiate closure or redevelopment requirements for various residential and commercial/industrial sites throughout the San Francisco Bay Area.

PROJECT EXPERIENCE

Select project experience for Mr. Angel includes:

- **Investigation and Cleanup, Alameda Naval Air Station, Alameda, California** - A former naval air station, which utilized large quantities of petroleum hydrocarbons and chlorinated solvents, occupied the site from 1939 to 1993. In preparation for site redevelopment, Mr. Angel was involved in site investigations, cleanups, and regulatory case closure for portions of the former naval air station.
- **Dry Cleaner Facility Cleanup, San Jose, California** – A significant release of tetrachloroethene (PCE) was identified from a historic dry cleaner. Mr. Angel was involved in site investigations, cleanups, and regulatory case closure for the property. Case closure was granted by the oversight agency following soil excavation and soil vapor extraction remedial methods.
- **Shell-Brand Gas Station Cleanup, San Jose, California** – A significant release of petroleum hydrocarbons was identified from an active gas station during UST upgrades. Mr. Angel was involved in site investigations, cleanups, and regulatory case closure for the property.
- **Property Redevelopment, Santa Clara, California** – A significant release of trichloroethene (TCE) was identified from a historic electronics manufacturer. Mr. Angel was involved in site investigations, cleanups, and regulatory case closure in preparation for redevelopment. Case closure was granted by the oversight agency following soil excavation and the implementation of an active sub-slab depressurization system as part of the new structure.
- **Property Redevelopment, Van Ness and Geary streets, San Francisco, California** - The property was formerly occupied by auto mechanic businesses and printing operations. Hazardous substances utilized on-site included petroleum hydrocarbons and chlorinated solvents. Mr. Angel managed site investigations, cleanup, and negotiated case closure for the construction of a new multi-story hospital facility for Sutter Health.
- **Phase I ESA Portfolios, Gilroy, California** - Mr. Angel performed Phase I ESAs for a large portfolio of properties in preparation for mixed redevelopment for a land developer.
- **Property Development, Naturally-Occurring Asbestos, Lathrop, California** - Mr. Angel scoped and managed a 150 acre soil sampling program for asbestos in shallow soil for a portfolio of properties in preparation for residential site development for a land developer.

Kerran Pender

National Client Manager, Due Diligence

EDUCATION

- Bachelors, Chemistry, New York University

SUMMARY OF PROFESSIONAL EXPERIENCE

Ms. Pender has project experience in the environmental consulting industry since 2004 and has extensive experience in due diligence assessments for a variety of property types, as well as in the needs and requirements of a varied number of reporting standards including ASTM E1527-05, ASTM E1527-13, ASTM E2600-10, EPA's All Appropriate Inquiry (AAI), U.S. Small Business Administration's (SBA) SOP 50 10, and other customized client formats. Specifically, she has project experience in Phase I ESAs, Environmental Transaction Screens (ETSs), radon screening, Phase II and III subsurface investigations, remedial cost estimates, soil vapor surveys, indoor air quality assessments, and remediation activities.

Ms. Pender has conducted and managed ESAs and ETSs on multifamily properties, commercial office buildings, retail shopping centers, gasoline service stations, hotels, dry cleaning plants, auto repair and auto body shops, industrial warehouse buildings, plating facilities, and various manufacturing operations throughout the U.S. She has also managed various portfolio projects involving shopping malls, lube changing facilities, storage facilities, and gasoline service stations.

Ms. Pender has managed and conducted Phase II subsurface investigations of gasoline service stations, dry cleaning plants, agricultural facilities, and auto repair facilities. She has extensive experience in testing soil, soil gas, and groundwater in the context of a real estate transaction and for private petroleum clients, as well as under the supervision of state and federal regulators. She has participated in the characterization of groundwater and soil contamination; quarterly groundwater monitoring; implementation of various systems such as soil vapor extraction systems and soil excavation projects such as tank removals at several clean-up sites in both California and New York.

PROJECT EXPERIENCE

Project experience for Ms. Pender includes:

- **Gasoline station portfolio, including bulk storage facilities, New York** – Ms. Pender's responsibilities included scheduling and execution of field activities and completion of follow up reports and figures. Projects included soil vapor extraction, pump and treat, and air sparge systems installation and maintenance, pilot tests, quarterly geochemical sampling, overseeing Geoprobe and hollow stem auger drilling operations including soil boring advancement, monitoring well installations, and monitoring well development, preparation of remedial action plans and work plans, preparation of Health and Safety Plans, as well as acting as the health and safety officer during field operations, and coordinating remediation efforts with the local regulatory agencies.

- **BP refinery and bulk storage facility, Carson, California** – Ms. Pender's responsibilities included scheduling and execution of field activities for the BP Gage Aquifer investigation. Projects included overseeing Geoprobe, hollow stem auger, mud rotary, and sonic drilling operations including soil boring advancement, monitoring well

installations, monitoring well development, and well abandonment, conducting a CPT/ROST investigation, preparation of Health and Safety Plans as well as acting as the health and safety officer during field operations including assuring that all sites were in compliance with all refinery policies, organizing and leading all project safety kick off meetings, interacting and coordinating with the assigned BP Environmental Business Manager (EBM), and coordinating remediation efforts with the local regulatory agencies.

- **Phase II subsurface investigations, Phase III site characterizations, and remediation activities, various locations** – Ms. Pender managed these projects which included overseeing Geoprobe drilling operations, soil vapor surveys, soil vapor extraction system installation, completion of remedial action plans and work plans, conducting peer reviews, preparation of Health and Safety Plans, as well as acting as the health and safety officer during field operations, and coordinating remediation efforts with clients and local regulatory agencies.

- **Phase I ESAs, gasoline station portfolio, various locations, California** – As manager, Ms. Pender's responsibilities included assigning assessors to each site, coordinating site access, and reviewing reports to ensure they met the client's expectations and quality standards.

- **Phase I ESAs, ETSs, and Database Reviews, various locations, U.S.** – Ms. Pender primarily performed these projects in the context of real estate transactions. Her specific activities included writing and reviewing various due diligence reports including communicating potential issues and delays to clients. As a senior member of the due diligence staff, Ms. Pender provided senior review experience to ensure ASTM compliance and satisfaction of client requirements.

GENERAL INFORMATION

Design Review is a discretionary process to ensure that exterior changes to buildings comply with the City of Berkeley Design Guidelines and other applicable City design standards and guidelines, pursuant to **Berkeley Municipal Code Section 23.406.070 Design Review.**

Design Review is required for the following projects that include new construction and/or exterior changes to existing buildings: projects in all non-residential districts (including Commercial and Manufacturing Districts), mixed use and community and institutional projects in the R-3 district within the Southside Plan area, and commercial, mixed-use, and community and institutional projects in the R-4, R-SMU, and R-S districts.

DESIGN REVIEW APPLICATION

DRAWINGS PROTECTED BY COPYRIGHT STATEMENT

Effective January 1, 2023, (State Government Code, Section 65103.5 (e), SB 1214), if an official copy of architectural drawings are submitted to the Land Use Division of the Planning and Development Department as part of a zoning permit application, the design professional (or the owner of the copyright if different from the design professional) may submit a separate "site plan" or "massing diagram" for posting online or for distribution to the public.

If a separate "site plan" or "massing diagram" is not submitted in addition to the official architectural plans, permission is deemed granted to the Land Use Division to post online or to provide to the public copies of the architectural drawings without the restrictions that would otherwise apply.

A massing diagram and a site plan are defined as follows per Government Code Section 65103.5 (f): "Massing diagram" means a document that displays the three-dimensional form of a building and describes the general profile, bulk, setbacks, and size of the building, but does not contain specific architectural detail.

"Site plan" means a document for a project that is drawn to scale and displays all of the following: property lines, setback lines, topographic lines, easements, drainage, utilities, lighting, driveways, surrounding streets and traffic flow, parking lots and parking spaces, landscaped areas, setback distance between buildings and property lines, outline of existing and proposed buildings and structures, distance between buildings, and ground sign location.

PLEASE CHECK ONE OF THE FOLLOWING (required):

☑ **My application includes a separate "site plan" or "massing diagram," defined in Government Code Section 65103.5(f), for posting online or for distribution to the public.**

☐ **Permission is granted to make publicly available the submitted architectural drawings without restriction to posting online or distribution to the public.**

Under penalty of perjury, I certify that:

(1) the application materials are true and complete to the best of my knowledge; and
(2) if provided, the attached paper and electronic copies of this application are the same; and
(3) I agree to pay all expenses associated with this application

ATTESTATION FORM

BIRD SAFE BUILDING REQUIREMENTS

planning@berkeleyca.gov • Phone (510) 981-7410, TDD (510) 981-7450
Planning and Development, 1947 Center St, 2nd Floor, Berkeley, CA 94704

GENERAL INFORMATION

The City Council adopted new requirements for Bird Safe Buildings, effective July 27, 2023, to reduce bird mortality from collisions with windows and other transparent or reflective buildings or building features.

Bird Safe Requirements apply to *building permits* that include new or replaced windows or contain transparent or reflective materials.

MORE INFORMATION

Berkeley Municipal Code (BMC) Section 23.304.150

BIRD SAFE BUILDING REQUIREMENTS

All regulated transparent or reflective materials located between the ground and 75 feet above grade must meet Bird Safe Building requirements.

With the exception of exempt projects, any High-Risk Feature, as defined in BMC Section 23.304.150 shall meet Bird Safe Building Requirements, regardless of distance from grade.

☒ I acknowledge this requirement (or N/A) Steve Heaton 12/16/2024

BIRD SAFE BUILDING COMPLIANCE OPTION

Pursuant to BMC Section 23.304.150, any regulated transparent or reflective material must meet at least one of the following compliance options. Construction plans must provide confirmation of compliance with applicable requirements at the time of application for the building permit. Details on each compliance path can be found on *Bird Safe Building Requirements Information and Submittal Checklist:*

Option 1: American Bird Conservancy Threat Factor Rating of 30 or less;

Option 2: Patterned Glazing Treatment that meets the specifications included in BMC Section 23.304.150; or

Option 3: External Screen, Shutter or Shading Device permanently installed on the exterior of the building that meets the specifications included in BMC Section 23.304.150.

☒ I acknowledge these requirements (or N/A) Steve Heaton 12/16/2024

Karimzadegan, Niloufar

Subject: FW: Please review 2 project proposals for the site at 2029 University Ave by 1/10/2025

From: Kim, Nicole <NKim@berkeleyca.gov>
Sent: Tuesday, January 14, 2025 8:41 AM
To: Karimzadegan, Niloufar <NKarimzadegan@berkeleyca.gov>
Subject: RE: Please review 2 project proposals for the site at 2029 University Ave by 1/10/2025

Internal

Hi Nilu,

Apologies for the delay, I've been out sick. Since the project involves a change in use from commercial to residential, this part of the phase I stood out to me:

Petroleum impacts are attributed to a regional benzene plume. No details regarding this plume is available, and it is unclear if it is present beneath the subject property, but due to the historical use of the subject property primarily for retail, residential, and/or car park purposes, it is unlikely the subject property owner would be responsible for any future assessment or remediation activities. Additionally, as shallow soil vapor samples collected from the subject property vicinity have consistently been below commercial/ industrial ESLs (and non detect in the most recent sampling events), it does not appear that the potential benzene impacts represent a vapor intrusion risk to subject property occupants, and no further action appears warranted at this time. However, if the subject property is redeveloped for residential use in the future, additional sampling and/or mitigation efforts may be required.

There also seems to have been significant soil contamination in the adjoining property and commercial/industrial ESLs were followed for remediation metrics. I'd like to recommend having a Phase II investigation be completed so that the subject property can be cleared prior to development.

Best,

Nicole Kim

RE: Use Permit Application (ZP#2024-0181/Multifamily Proposal) Review for 2029 University Avenue

(APN: 057 205300801). Other addresses on parcel include: 2035 UNIVERSITY AV - [Primary] 2033 UNIVERSITY AV - [Primary] 2031 UNIVERSITY AV - [Primary] 2037 UNIVERSITY AV - [Primary] 2039 UNIVERSITY AV - [Primary] 2029 UNIVERSITY AV - [Primary]

On December 19, 2024, staff received application material submitted for the zoning permit application referenced above. The project is to demolish an existing two-story commercial building and ten parking garages on a 12,385 square-feet lot and to construct a 23-story approximately 190,878 square-feet residential building (multifamily) containing 240 dwelling units including 18 VLI units (15%),18 MI units (15%) for a 100% density bonus (AB1287). The proposed project provides 29 off-street parking spaces, 176 Long-term and 8 Short-Term bike parking spaces **An SB330 Preliminary Application (PLN2023-0093) for this project is deemed complete on January 9, 2025**.

This application is deemed **Incomplete** per the Zoning Project Submittal Requirements Checklist as of **January 17, 2025**. Note that if this Use Permit application is deemed complete per the Zoning Project Submittal Requirements Checklist **within the next 90 days** (In this case no later than **April 17, 2025)**, the Pre-Application vesting date will stay in place. Otherwise, the Pre-Application vesting date would change to the date that the Use Permit Application is deemed complete. Once the application is deemed complete, additional revisions may be required to allowed for the analytical review before the project can be scheduled for the ZAB Public Hearing.

Pursuant to Government Code Section 65944, once a public agency accepts an application complete, a public agency can request and obtain information that may be needed in order to comply with the provisions of CEQA (Division 13 commencing with Section 21000). The public agency may also request additional information to clarify, amplify, correct, or otherwise supplement the information required for the application. This may result in additional fees for zoning permits, CEQA review costs, and other processes/reviews, as needed based on the City's adopted fee schedule.

I. Permits required:

1) Use Permit per BMC Section 23.204.020(A) to construct a new multifamily development (Fee required)
2) Use Permit under BMC Section 23.204.030(A) to create new floor area of 10,000 square feet or more (Fee required)
3) Use Permit per BMC Section 23.204.130(E)(1) to increase the maximum building height limit to 75' (plus 5' parapet, by right) (Fee required)
4) Use Permit per BMC Section 23.204.130(E)(2)(a) to allow for an Increased Height Allowance for up to 2 buildings in the Outer Core District that can be a maximum of 120 feet exceeding the C-DMU height limits (75 ft.) (Fee required)
5) Use Permit per BMC Section 23.204.130(E)(3)(b) to modify front, side, and rear setback requirements (Fee required)
6) Use Permit, per BMC Section 23.204.130(E)(6)(b) to pay a fee in lieu of providing open space (Fee required at Building Permit Phase)
7) Administrative Use Permit per BMC Section 23.304.050(A) to exceed building height limits with rooftop architectural elements which exceed the maximum height limit for the district (Fee required)
8) Use Permit per BMC Section 23.326.070(A) to demolish a non-residential building (Fee required)
9) City Arborist Review Fees (Fee required)
10) City Traffic Engineer Review Fees (TBD)
11) Use Permit additional review time (Fee required)

II. Waivers:

1) Waiver of BMC Section 23.204.130(E)(4) for providing 1,048 square feet of Usable Open Space, where 19,200 square feet is required.
2) Waiver of BMC Section 23.304.90 for Usable Open Space landscaped area to be 321 square feet where 7,680 square feet (40%) is required.
3) Waiver of BMC Section 23.204130(E)(1)(a) to exceed building height limits—to be 256 ft. (TBD) while 75 ft. + 5 ft. parapet is the allowable height
4) Waiver of BMC Section 23.204130(E)(2)(a) for constructing the third building in the Combined Core and Outer Core for a height of over 120 ft. while only a maximum of 2 buildings are allowed and only for a maximum height of 120 ft. (Please update application material accordingly)
5) Waiver of BMC Section 23.204.130(E)(3)(d) for the building's width over 120 feet of height, to be about 139 ft. at the widest point (on the diagonal in plan review) where maximum width allowed is 120 feet.

III. Concessions: None

IV. CEQA Review:

Under the California Environmental Quality Act (CEQA), staff recommends a determination to the Zoning Adjustments Board (ZAB). The final determination is made by ZAB. Staff may require an environmental impact report (EIR), a negative declaration, or a mitigated negative declaration, depending on the type of project. Additional environmental reports will be required.

Please note that in the case of a Categorical Exemption, reports relating to relating to traffic, noise, air quality, or water quality will be required.

V. Zoning Project Submittal Requirements (Quantitative/Checklist):

Section 1:

C. Payment of Application Fees:

- Please provide payment for the attached invoice.

Section 2:

B. Landscape and Usable Open Space Plan/Existing and Proposed Street Trees

- Please see the attached Arborist comments regarding street trees

Section 4:

D. Phase II Site Assessment:

- Since the subject property is proposed to be redeveloped for residential use, due to significant soil contamination in the adjoining property, and because commercial/industrial ESLs were followed for remediation metrics, a Phase II is required by the City's Toxics Management Division.

G. Stormwater Requirements Checklist:

- The new form must be filled out. The one submitted is outdated. Please complete the attached worksheet instead.
- Please fill out the attached PCB screening form prior to issuance of the demolition permit. Note that Each building to be demolished requires its own PCB form.

Section 6:

A) WELO Landscape Requirements (TBD)

B. Berkeley Energy Code and Berkeley Green Code

C. Green Building Requirements:

- Please see the attached comments from Building and Safety, Green Building

Program

Section 7:

A. Design Review

- Design Review comments will be provided by Anne Burns.

VI. Zoning Project Analysis (Qualitative):

1) Number of existing dwelling units:
A unit has been previously registered with the Rent Stabilization Board under 2035 University Avenue. Please provide clarification.

2) Inclusionary Housing requirements (BMC 23.328):

Option to provide BMR units (VLI and LI:

20% X 120 =24 (half of which has to be VLI/18 are VLIs 6 LIs are required in this option)

Option to provide a combination of BMR units and In-lieu fee:

1. 120 (Number of Base units) X 20%= 24 (number of required VLI and LI units)
2. 18 VLI units are provided on site as Qualifying Units for State Density Bonus
3. 24 (AF units required) - 18 (VLIs provided for DB) = 6 LI units are required

To pay an In-lieu Fee for the 4 remaining units:

6/24= 25%

(25% of RUFA (calculated by applicant as 63,120 sq. ft.) = 15,780 sq. ft. X $56= $887,625 in-lieu fee is required per the applicant's calculations.

Option to provide In-lieu fee:

$56.25 X RUFA (63,120 sq. ft.) = Per Applicant's calculations)

3) Demolition ordinance (BMC23.323): Per BMC 23.323.020 any units registered with the Rent Board must be replaced.

Note that based on this ordinance, known-Income VLI units (<50%) must be replaced by ELI units (<30%). Any unknown-Income unit that is protected must be replace by VLI and LI units (half must be VLI)

4) CHAS: if the income levels of the existing tenants or tenants within the last five years are unknown, they must be replaced with "equivalent" units of affordability levels that are the same or lower than the income distribution of renters for City of Berkeley according to the United States Department of Housing and Urban Development's Comprehensive Housing Affordability Strategy (CHAS) database.

5) Required Findings: Please include the following required findings in the Applicant stent

Additional Permit Requirements (23.204.030(A)(2): C-DMU Findings. To approve a Use Permit for new floor area in the C-DMU district, the ZAB must find that:

(a) The addition or new building is compatible with the visual character and form of the district; and

(b) No designated landmark structure, structure of merit, or historic district in the vicinity would be adversely affected by the appearance or design of the proposed addition.

6) Code Compliance per 23.204.130.E & BMC Section 23.304.050 & 23.322.090(A)(2):

Required Development Standards		**Base Project**	**Proposed Project**	**Notes**
Usable Open Space, Minimum	80 sq. ft. per unit	80 sq. ft. X 120 units = 9600 sq. ft. required	80 sq. ft. X240 units= 19,200 sq. ft. required Proposed Project has provided 1,048 sq. ft., only.	Base Project complies (Roof Deck) Please revise Base plans to show a recreational roof deck that includes amenities and with 40% landscape areas. Proposed Project does not comply/**Waiver required**
Usable Open Space, Landscaped area	40% of UOS	40% X 19,200 sq. ft. = 7,680 q. ft. 0 sq. ft. is provided where 2,560 sq. ft. is required. Please revise application	Project has only provided 321 Sq. ft.	Base Project does not comply/ Please revise Proposed Project does not comply/**Waiver required**
Privately-Owned Public Open Space	Not required in a residential project	N/A	N/A	N/A

Open Space Alternatives	Per BMC 23.204.130 (E)(6)(a), In lieu of providing the open space required by this section on-site, an applicant may either: i. Pay an in-lieu fee to help fund the Streets and Open Space Improvement Plan (SOSIP); and/or ii. Construct public improvement consistent with the SOSIP.	N/A	In lieu of providing the open space required by this section on-site, an applicant may either: i. Pay an in-lieu fee to help fund the Streets and Open Space Improvemen t Plan (SOSIP); and/or ii. Construct public improvement consistent with the SOSIP.	Not provided for the Proposed Project. Provide information re the required in-lieu fee or public improvement consistent with the SOSIP
Min. Building Height	40 ft.	75 ft. + 5 ft. parapets	256 ft.	Base Complies Proposed complies
Max. Building Height	75 with Use Permit +5 feet of parapets	75 ft. + 5 ft. parapets	256 ft.	Base Project complies Proposed project does not comply. Waivers are requested. -Height must be measured to the top of the bricks over the roof

				-Proposed project requires the following waivers: 1) waiver for going over 75 ft. allowable height 2) Waiver for being the third building in the Combined Core and Outer Core for a height of over 120 ft. while only a maximum of 2 buildings are allowed and only for a maximum height of 120 ft. Please update application material accordingly
Community Benefits	See BMC Section 23.204.130 (E)(2)(c)	N/A	Statement from Applicant to provide community Benefits is missing	Per BMC 23.204.130 (E)(2)(c) *Community Benefit is Required* To approve a Use Permit for increased building height under this section Provide a Community Benefit Statement in the Applicant Statement.
Setbacks	See Setback table below	Per BMC 23.204.130 (E) (3)(b), Use Permit option to modify setbacks is available	Per BMC 23.204.130 (E) (3)(b), Use Permit option to modify setbacks is available	Base project complies Proposed complies

Streets and Open Space Improvement Plan (SOSIP) Fee	Per BMC 23.204.130 (F), in addition to any other requirement of this section, projects shall be subject to payment of an impact fee to implement the Streets and Open Space Improvement Plan.	N/A	Statement from Applicant to provide SOSIP is missing	Required. Provide information about this requirement in the Applicant Statement.
Green Building Provisions	New Buildings. Construction of any new building shall attain either: (a) LEED Gold rating or higher as defined by the U.S. Green Building Council (USGBC); or (b) Building performance equivalent to this rating, as determined by the Zoning Officer.	N/A	Statement from Applicant to comply with Green *Building Provisions i*s missing.	Required. Provide information about this requirement in the Applicant Statement.
Environmental Impacts	Projects that may create potentially significant environmental impacts as described in the Downtown Area Plan Final EIR shall be subject to the adopted Mitigation Monitoring Program for the Downtown Area Plan.	N/A		Required. See the attached Downtown Area Plan
Auto Parking	N/A per AB2097	Provided 0 parking spaces	Provided 29 parking spaces	
Bike Parking	Residential Long-Term Bike Parking space required: One space per 3 bedrooms	complies	280/3=94 Residential Long-Term Bike Parking spaces are required	Base Project complies 176 LT spaces are provided. Proposed project complies

	Residential Short-Term Bike Parking space required: One space per 40 bedrooms	complies	280/40=7 Residential Short-Term Bike Parking spaces are required	Base Project complies 8 provided/ Proposed project complies with the ST requirements.
Per 23.304.050(A)/ Allowed Projections Above Height Limits/Rooftop Elevator Equipment and Water Heaters	Building and site features, including but not limited to, mechanical penthouses, elevator equipment rooms and cupolas, domes, turrets and other architectural elements, may not exceed 15% of the average floor area of all of the building's stories. No tower or similar structure may be used as habitable space or for any commercial purpose, other than the mechanical needs of the building	N/A	?	Clarify this % and If non-compliant a waiver must be requested

	Bicycle				min

_____ = Concession or Waiver requested to modify the district standard

Abbreviations: sq. ft. = square feet; max. = maximum; min. = minimum; n/a = not applicable; % = percent; avg. = average, ft = feet (’), in. = inches (”)

Notes:

a. AB-2097, effective January 1, 2023, prohibits local jurisdictions from requiring minimum parking for most non-residential uses.

C. Please submit the setback table below:

Setbacks								
Portion of building at height	**Front**		**Min. Interior side 35’ and less from lot frontage**		**Min. Interior side over 65’ from lot frontage**		**Minimum rear**	
	Required	Provided	Required	Provided	Required	Provided	Required	Provided
0’-20’	5’ max.		N/A		N/A		N/A	
21’-75’	N/A		N/A		5’		5’	
76’-120’	15’ min.		5’		15’		15’	
120’-260’	X		X		X		X	

VII. Advisory:

1) Note that **only one Use Permit** Entitlement **can be exercised** (23.404.060.C.1 (Exercised Defined). for this site.

2) Bike parking: Per BMC 23.322.090(A)(2), the following bike parking standards will apply:

a. Long-Term Parking and Short-Term Parking shall meet the design standards included in Appendix F of the 2017 Berkeley Bicycle Plan, or as subsequently amended by the Transportation Division.

b. Per BMC 23.322.090.B for Bicycle Parking Standards, the following standards apply to required bicycle parking spaces in a non-residential district:

1. Bicycle parking spaces shall be located in either a locker, or in a rack suitable for secure locks, and shall require location approval by the City Traffic Engineer and Zoning Officer.

2. Bicycle parking shall be located in accordance to the Design Review Guidelines and other design specifications promulgated by the Transportation Division. (Ord. 7815-NS § 14, 2022: Ord. 7787-NS § 2 (Exh. A), 2021)

3) Note that this project is subject to the **Downtown Area Plan** (See attached).

Please submit responses to all requested items at once, and not incrementally. In your resubmittal, **include a letter** stating how you have addressed the incomplete items.

Sincerely,

Nilu Karimzadegan, Senior Planner

MEMORANDUM

Planning and Development Department

DATE: January 3, 2025

TO: Nilu Karimzadegan, Senior Planner

FROM: Darya Barar, Managing Consulting Urban Forester

SUBJECT: 2029 University Avenue – Arborist Plan Review

I reviewed Stackhouse De La Pena Trachtenberg Architects for 2029 University Avenue Apartments dated December 19, 2024 for the development proposed at the same address. The plans show the demolition of the existing building and construction of a new multi-story mixed-use building. One existing red maple was growing in a bulb out on University Ave.

The design shows preservation of the street tree. However, no trees are proposed on University Avenue.

Replacement Planting

Please review the City's tree-planting standards and add one street tree at the northern corner of the property. Plant trees in accordance with the American National Standards Institute (ANSI) A300 (Part 6)-2012, Planting and Transplanting which outlines items such as planting in planting pits twice the size of the root ball, leaving the tree 1 inch higher than natural grade, back filling the hole with native soil. Remove the nursery stake and replace with a two-stake system that encourages tree movement. Trees should be planted in the 24-inch box size. No root barrier, pavers, or tree grates should be used. Please use flexi-pave in the tree wells.

I recommend planting one of the following species: Brisbane box (*Lophostemon confertus*), sour gum (*Nyssa sylvatica*), or sweetshade (*Hymenosporum flavum*).

Stormwater Requirements Checklist
Municipal Regional Stormwater Permit (MRP 3)
Stormwater Controls for Development Projects

I. Applicability C.3 Stormwater Requirements

All projects must complete Section I.

I.A. Enter Project Data *(Data for "C.3 Regulated Projects," will be reported in the municipality's stormwater Annual Report.)*

I.A.1 Project Name:			
I.A.2 Project Address (include cross street)			
I.A.3 Project APN(s)			
I.A.4 Project Watershed[1]			
I.A.5 Applicant Name			
I.A.6 Date Submitted			
I.A.7 Applicant Address			
I.A.8 Applicant Phone		I.A.9 Applicant E-mail Address	
I.A.10 Development Type (check all that apply)	☐ Residential ☐ Commercial ☐ Industrial ☐ Mixed-Use ☐ Streets, Roads, etc. ☐ Detached Single Family Home ☐ Redevelopment[2]		
I.A.11 Project Description (Include any past or future phase of the project)			
I.A.12 Total Project Area		I.A.13 % Slope on Site	
I.A.14 Total Land Disturbance Area (Include all areas to be cleared, excavated, graded, and borrow and stockpile areas)			

I.B. Is the project a "C.3 Regulated Project" per MRP Provision C.3.b or a Small Project per MRP Provision C.3.i

I.B.1 Complete the *Impervious and Pervious Surfaces Table*

Type of Impervious Surface[3]	a Pre-Project Impervious Area (sq ft)	b Existing Impervious Area to be Replaced (sq ft[4])	c New Impervious Area to be Created (sq ft)	d Post-Project Pervious Area (sq ft)
a. Impervious roof area(s)[5]				NA
b. Impervious sidewalks, patios, paths, driveways[6]				
c. Uncovered impervious parking[7]				
d. Streets (public)				
e. Streets (private)				
Totals				

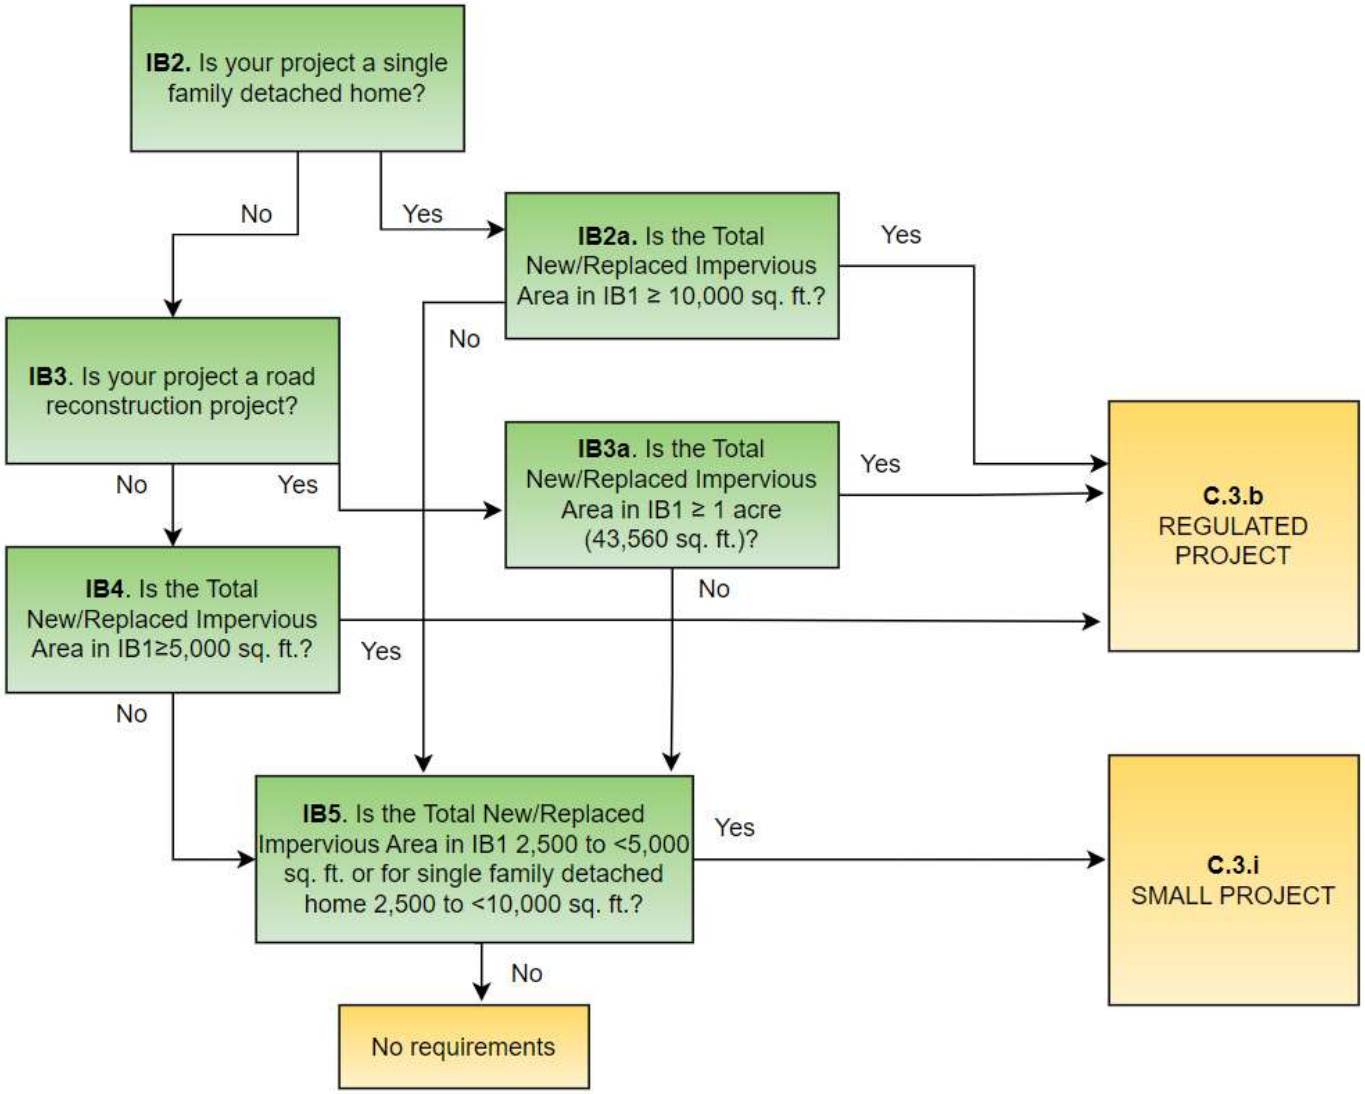
[1] Watershed is defined by the maps from the Alameda County Flood Control District at http://acfloodcontrol.org/resources/explore-watersheds
[2] As defined by MRP: creating, adding and/or replacing exterior existing impervious surface on a site where past development has occurred.
[3] A surface covering or pavement of a developed parcel of land that prevents the land's natural ability to absorb and infiltrate rainfall/stormwater.
[4] Replaced impervious area means any impervious area that is removed and replaced in kind or upgraded. See Chapter 2 of the *C.3 Technical Guidance.*
[5] Exclude green roofs.
[6] A gravel surface is an impervious surface, except when it is constructed as part of appropriately designed pervious pavement system.
[7] Uncovered parking includes top level of a parking structure unless drainage from the uncovered portion is connected to the sanitary sewer along with the covered portions of the parking structure.

Stormwater Requirements Checklist
Municipal Regional Stormwater Permit (MRP 3)
Stormwater Controls for Development Projects

Existing Impervious Area to remain in place		**NA**
Total New/Replaced Impervious Area *(sum columns b and c)*		

I.B. Is the project a "C.3 Regulated Project per MRP Provision C.3.b or a Small Project per MRP Provision C.3.i (cont'd)

	Yes	No	NA
I.B.2 Is your project a single family detached home? If Yes go to I.B.2.a; if NO go to I.B.3	☐	☐	☐
I.B.2.a Is the Total New/Replaced Impervious Area in I.B.1 ≥10,000 sq ft? If YES, your project is a C.3.b Regulated Project. (See I.D). If NO go to I.B.5.	☐	☐	☐
I.B.3 Is your project a road reconstruction project? If YES go to I.B.3.a; if NO go to I.B.4	☐	☐	☐
I.B.3.a Is the Total New/Replaced Impervious Area in I.B.1 ≥1 acre (43,560 sq ft)? If YES, your project is a C.3.b Regulated Project. (See I.D)	☐	☐	☐
I.B.4 Is the Total New/Replaced Impervious Area in I.B.1 ≥5,000 sq ft? If YES, your project is a C.3.b Regulated Project. If NO go to I.B.5	☐	☐	☐
I.B.5 Is the Total New/Replaced Impervious Area in I.B.1 2,500 to <5,000 sq ft or for single family detached home 2,500 to <10,000 sq ft? If Yes, your project is a C.3.i Small Project.	☐	☐	☐



Stormwater Requirements Checklist
Municipal Regional Stormwater Permit (MRP 3)
Stormwater Controls for Development Projects

I.C. Pervious Pavement Systems			
I.C.1 Will your project install 3,000 sq ft or more of pervious pavement systems (not including private-use patios at residences)? If **YES, stormwater treatment system inspection requirements (C.3.h) apply.** (Municipal staff – add this site to your list of sites needing a final inspection at the end of construction and on-going O&M inspections.)	☐	☐	☐
I.D. Projects not regulated by C.3 If your project is not regulated by C.3.b or C.3.i you are not subject to stormwater treatment requirements, however you are encouraged to incorporate site design and source control measures. The municipality may determine that source controls and site design measures are required for your project, if so, you must complete Section II and if required by the municipality, complete Sections III.A and III.B.			
I.E. C.3.i Small Projects If your project is regulated by C.3.i you are considered a "Small Project" and must implement site design (See III.A) and source control requirements (See III.B). You are not required to implement stormwater treatment requirements. You must complete Sections II, III.A, and III.B.			
I.F. C.3.b Regulated Projects If your project is a C.3.b regulated project, the project must include appropriate site design measures and source controls AND hydraulically-sized stormwater treatment measures. Hydromodification management may also be required. Complete Sections II, III, and V.			
II. Applicability C.6 Stormwater Requirements *All projects must complete Section II.*			
	Yes	No	
II.A Does the project disturb one acre or more of land? If YES you are required to obtain coverage under the State Construction Stormwater Permit, see https://www.waterboards.ca.gov/water_issues/programs/stormwater/construction.html. You must submit your WDID number and Stormwater Pollution Prevention Plan to the municipality before a building or grading permit will be issued. You do not need to complete Section IV.	☐	☐	
II.B Does the project disturb less than one acre of land? If NO, you are subject to MRP C.6 requirements. Complete Section IV to identify best management practices (BMPs) that will be in the erosion control plan and implemented during construction.	☐	☐	
II.C. Priority Inspection Factors	☐	☐	
II.C.1 Is the project 1 acre or more?	☐	☐	
II.C.2 Does the project require a grading permit?	☐	☐	
II.C.3 Is the project adjacent to a creek or waterway?	☐	☐	
II.C.4 Is the project in a municipally defined hillside development area or meet local hillside criteria?	☐	☐	
II.C.5 Does the project site have a slope of >15% and disturb ≥ 5,000 sq ft?	☐	☐	
II.C.6 Does the project involve demolition of a structure subject to the PCBs Building Demolition requirements? If yes the completion of the PCBs Building Material Demolition is required.	☐	☐	
(Municipal staff – refer projects answering YES to any questions in section II.C to construction site inspection staff to be added to their list of projects that require stormwater inspections at least monthly during the wet season (October 1 through April 30) and other times of the year as appropriate.)			

III. Implementation of C.3 Stormwater Requirements

C.3.b Regulated Projects must complete all of Section III.
C.3.i Small Projects must complete Sections III.A and III.B
Projects not regulated by C.3 must complete Sections III.A and III.B if directed by the municipality.

III.A Select Appropriate Site Design Measures

C.3.b Regulated Projects must implement appropriate and feasible site design measures.
C.3.i Small Projects must implement at least one of site design measures listed in items a-f.
Projects not regulated by C.3 are encouraged to implement appropriate site design measures and those directed by the municipality.

Site Design Measure	Plan Sheet #	Yes	No
a. Direct roof runoff into cisterns or rain barrels and use rainwater for irrigation or other non-potable use.		☐	☐
b. Direct roof runoff onto vegetated areas.		☐	☐
c. Direct runoff from sidewalks, walkways, and/or patios onto vegetated areas.		☐	☐
d. Direct runoff from driveways and/or uncovered parking lots onto vegetated areas.		☐	☐
e. Construct sidewalks, walkways, and/or patios with pervious pavement systems.[8]		☐	☐
f. Construct bike lanes, driveways, and/or uncovered parking lots with pervious pavement systems.[8]		☐	☐
g. Minimize land disturbance and impervious surface (especially parking lots).		☐	☐
h. Maximize permeability by clustering development and preserving open space.		☐	☐
i. Use micro-detention, including distributed landscape-based detention.		☐	☐
j. Protect sensitive areas, including wetland and riparian areas, and minimize changes to the natural topography.		☐	☐
k. Self-treating area (see Chapter 5 of the *C.3 Technical Guidance*)		☐	☐
l. Self-retaining area (see Chapter 5 of the *C.3 Technical Guidance*)		☐	☐

III.B Select Appropriate Source Control Measures

C.3.b Regulated Projects must select and implement appropriate source control measures.
C.3.i Small Projects and projects not regulated by C.3 are encouraged to select and implement appropriate source control measures and those directed by the municipality.

Features in the project?		Features requiring source controls	Source control measures (Refer to Local Source Control List for detailed requirements)	Measure included in project plans?		
Yes	No			Yes	NO	Plan Sheet #
☐	☐	Storm Drain	Mark on-site inlets with the words “No Dumping! Flows to Bay” or equivalent.	☐	☐	
☐	☐	Floor Drains	Plumb interior floor drains to sanitary sewer[9] [or prohibit].	☐	☐	
☐	☐	Parking garage	Plumb interior parking garage floor drains to sanitary sewer.[9]	☐	☐	
☐	☐	Landscaping	▪ Retain existing vegetation as practicable. ▪ Select diverse species appropriate to the site. Include plants that are pest- and/or disease-resistant, drought-tolerant, and/or attract beneficial insects. ▪ Minimize use of pesticides and quick-release fertilizers. ▪ Use efficient irrigation system; design to minimize runoff.	☐	☐	
☐	☐	Pool/Spa/ Fountain	Provide connection to the sanitary sewer to facilitate draining.[9]	☐	☐	
☐	☐	Food Service Equipment (non-residential)	Provide sink or other area for equipment cleaning, which is: ▪ Connected to a grease interceptor prior to sanitary sewer discharge.[9] ▪ Large enough for the largest mat or piece of equipment to be cleaned. ▪ Indoors or in an outdoor roofed area designed to prevent stormwater run-on and run-off and signed to require equipment washing in this area.	☐	☐	

[8] Use the specifications in the *C.3 Technical Guidance* or for small projects see the *BASMAA Pervious Paving Factsheet*. For these documents and others go to www.cleanwaterprogram.org and click on “Resources.”
[9] Any connection to the sanitary sewer system is subject to sanitary district approval.

Stormwater Requirements Checklist
Municipal Regional Stormwater Permit (MRP 3)
Stormwater Controls for Development Projects

Features in the project?		Features requiring source controls	Source control measures (Refer to Local Source Control List for detailed requirements)	Measure included in project plans?		
Yes	No			Yes	NO	Plan Sheet #
☐	☐	Refuse Areas	▪ Provide a roofed and enclosed area for dumpsters, recycling containers, etc., designed to prevent stormwater run-on and runoff. ▪ Connect any drains in or beneath dumpsters, compactors, and tallow bin areas serving food service facilities to the sanitary sewer.[9]	☐	☐	
☐	☐	Outdoor Process Activities [10]	Perform process activities either indoors or in roofed outdoor area, designed to prevent stormwater run-on and runoff, and to drain to the sanitary sewer.[9]	☐	☐	
☐	☐	Outdoor Equipment/ Materials Storage	▪ Cover the area or design to avoid pollutant contact with stormwater runoff. ▪ Locate area only on paved and contained areas. ▪ Roof storage areas that will contain non-hazardous liquids, drain to sanitary sewer[9], and contain by berms or similar.	☐	☐	
☐	☐	Vehicle/ Equipment Cleaning	▪ Roofed, pave and berm wash area to prevent stormwater run-on and runoff, plumb to the sanitary sewer,[9] and sign as a designated wash area. ▪ Commercial car wash facilities shall discharge to the sanitary sewer.[9]	☐	☐	
☐	☐	Vehicle/ Equipment Repair and Maintenance	▪ Designate repair/maintenance area indoors, or an outdoors area designed to prevent stormwater run-on and runoff and provide secondary containment. Do not install drains in the secondary containment areas. ▪ No floor drains unless pretreated prior to discharge to the sanitary sewer. [9] ▪ Connect containers or sinks used for parts cleaning to the sanitary sewer. [9]	☐	☐	
☐	☐	Fuel Dispensing Areas	▪ Fueling areas shall have impermeable surface that is a) minimally graded to prevent ponding and b) separated from the rest of the site by a grade break. ▪ Canopy shall extend at least 10 ft in each direction from each pump and drain away from fueling area.	☐	☐	
☐	☐	Loading Docks	▪ Cover and/or grade to minimize run-on to and runoff from the loading area. ▪ Position downspouts to direct stormwater away from the loading area. ▪ Drain water from loading dock areas to the sanitary sewer.[9] ▪ Install door skirts between the trailers and the building.	☐	☐	
☐	☐	Fire Sprinklers	Design for discharge of fire sprinkler test water to landscape or sanitary sewer.[9]	☐	☐	
☐	☐	Miscellaneous Drain or Wash Water	▪ Drain condensate of air conditioning units to landscaping. Large air conditioning units may connect to the sanitary sewer.[9] ▪ Roof drains shall drain to unpaved area where practicable. ▪ Drain boiler drain lines, roof top equipment, all wash water to sanitary sewer. [9]	☐	☐	
☐	☐	Architectural Copper	Discharge rinse water to sanitary sewer [9] or collect and dispose properly offsite. See flyer *Requirements for Architectural Copper*.	☐	☐	

[10] Businesses that may have outdoor process activities/equipment include machine shops, auto repair, industries with pretreatment facilities.

Stormwater Requirements Checklist
Municipal Regional Stormwater Permit (MRP 3)
Stormwater Controls for Development Projects

III.C Stormwater Treatment Measures

C.3.b Regulated Projects must select and implement stormwater treatment measures to manage the C.3.d numeric sizing criteria. Complete the applicable sections below.

Yes	No	
☐	☐	**III.C.1 Is the project a Special Project?** (See Appendix J of the *C.3 Technical Guidance* for Special Project criteria.) If YES, complete the Special Projects Worksheet and consult with municipal staff about the need to prepare a discussion of the feasibility and infeasibility of 100% LID treatment. Indicate the type of non-LID treatment to be used, the hydraulic sizing method*, and percentage of the amount of runoff specified in Provision C.3.d that is treated.

Non-LID Treatment	Hydraulic Sizing Method (See Note 1)	% of C.3. Amount of Runoff Treated
☐ Media filter		
☐ Tree well filter		

Yes	No	
☐	☐	**III.C.2 Is the project using biotreatment to treat the C.3.d amount of runoff?** (See the *C.3 Technical Guidance* for information on infiltration and rainwater harvesting[11] and use of stormwater.) If YES, indicate the biotreatment measures to be used, and the hydraulic sizing method:

Biotreatment Measures	Hydraulic sizing method (See Note 1)
☐ Bioretention area	
☐ Flow-through planter	
☐ Other (specify):	

Note 1. Indicate which of the following Provision C.3.d.i hydraulic sizing methods were used:

1. Volume based approaches – Refer to Provision C.3.d.i.(1):
   1(a) Urban Runoff Quality Management approach, or
   1(b) 80% capture approach (recommended volume-based approach).
2. Flow-based approaches – Refer to Provision C.3.d.i.(2):
   2(a) 10% of 50-year peak flow approach,
   2(b) Percentile rainfall intensity approach, or
   2(c) 0.2-Inch-per-hour intensity approach (this is recommended flow-based approach AND the basis for the 4% rule of thumb described in Section 7.1 of the C.3 Technical Guidance).
3. Combination hydraulic sizing approach -- Refer to Provision C.3.d.i.(3):
   If a combination flow and volume design basis was used, indicate which flow-based and volume-based criteria were used.

III.D Hydromodification Management (HM) Requirements

C.3.b Regulated Projects must complete this section

	YES	NO
III.D.1 Does the project create and/or replace 1 acre (43,560 sq. ft.) or more of impervious area? If YES continue to item III.D.2. If NO, this project is not subject to the HM requirements.	☐	☐
III.D.2 Is the total impervious area increased from the pre-project condition? If YES continue to item III.D.3. If NO, this project is not subject to the HM requirements.	☐	☐
III.D.3 Is the site located in a tidally influenced/depositional area, or in the extreme eastern portion of the county that is not subject to HM requirements? (See HMP Susceptibility Map.) If NO continue to III.D.4. If YES the project is exempt from HM requirements. Attach map indicating project location. Skip to III.D.6 and check "NO".	☐	☐
III.D.4 Is the site located in a high slope zone or special consideration watershed, as shown on the HMP Susceptibility Map? If YES Project is subject to HM requirements. Attach map indicating project location. Skip to III.D.6 and check "YES.". If NO, continue to III.D.5.	☐	☐
III.D.5 For sites located in a white area on the HMP Susceptibility Map, has an engineer or qualified environmental professional determined that runoff from the project flows only through a hardened channel or enclosed pipe along its entire length before emptying into a waterway in the exempt area?	☐	☐

[11] The MRP no longer requires that a feasibility analysis of infiltration and rainwater harvesting be conducted. However, applicants using biotreatment are encouraged to maximize infiltration of stormwater if site conditions allow. If feasible and desired, infiltration and rainwater harvesting may be cost effective solutions depending on the project.

If YES, the project is exempt from HM requirements. Attach signed statement by qualified professional. Go to III.D.6 and check "NO." If NO, the project is subject to HM requirements. Attach map indicating project location. Go to Item G.6 and check "YES."	☐	☐

III.D.6 Is the project a Hydromodification Management Project?

☐ YES the project is subject to the *HM requirements in MRP Provision C.3.g.*

☐ NO, the project is not subject to the HM requirements.

- If the project is subject to the HM requirements, incorporate in the project flow duration stormwater control measures designed such that post-project stormwater discharge rates and durations match pre-project discharge rates and durations. The Bay Area Hydrology Model (BAHM) has been developed to size flow duration controls. See https://www.clearcreeksolutions.info/bahm-download-page. Guidance is provided the *C.3 Technical Guidance*.

IV. Implementation of C.6 Construction Phase Requirements

All projects must complete Section IV.

IV.A Select Appropriate Construction Phase BMPs[12]

BMP	Plan Sheet #	Yes	No
Attach the municipality's construction BMP plan sheet to project plans and require contractor to implement the applicable BMPs on the plan sheet.		☐	☐
Implement temporary erosion controls to stabilize all disturbed areas until permanent erosion controls are established.		☐	☐
Delineate with field markers clearing limits, easements, setbacks, sensitive or critical areas, buffer zones, trees, and drainage courses.		☐	☐
Provide notes, specifications, or attachments describing: ▪ Construction, operation and maintenance of erosion and sediment controls, include inspection frequency; ▪ Methods and schedule for grading, excavation, filling, clearing of vegetation, and storage and disposal of excavated or cleared material; ▪ Specifications for vegetative cover and mulch, include methods and schedules for planting and fertilization; ▪ Provisions for temporary and/or permanent irrigation.		☐	☐
Perform clearing and earth moving activities only during dry weather.		☐	☐
Use sediment controls or filtration to remove sediment when dewatering and obtain all necessary permits.		☐	☐
Protect all storm drain inlets in vicinity of site using drop inlet protection		☐	☐
Trap sediment on-site, using BMPs such as sediment basins or traps, earthen dikes or berms, silt fences, check dams, erosion control blankets, covers for soil stock piles, etc.		☐	☐
Divert on-site runoff around disturbed areas and construction materials; divert off-site runoff around the site (e.g., swales and dikes).		☐	☐
Protect adjacent properties and undisturbed areas from construction impacts using vegetative buffer strips, sediment barriers or filters, dikes, mulching, or other measures as appropriate.		☐	☐
No cleaning, fueling, or maintaining vehicles on-site, except in a designated area where wash water is contained for proper management and spill controls are in place.		☐	☐
Store, handle, and dispose of construction materials/wastes properly to prevent contact with stormwater.		☐	☐
Contractor shall train and provide instruction to all employees/subcontractors re: construction BMPs.		☐	☐
Control and prevent the discharge of all potential pollutants, including pavement cutting wastes, paints, concrete, petroleum products, chemicals, wash water or sediments, rinse water from architectural copper, and non-stormwater discharges to storm drains and watercourses.		☐	☐

[12] Additional information on Construction Phase BMPs can be found is MRP Provision C.6 and the California Stormwater Quality Association's Construction BMP Handbook.

V. Stormwater Treatment Measure and/HM Control Owner or Operator's Information *C.3.b Regulated Projects must complete Section V.*	
Name	
Address	
Phone	
Email	
➢ *Applicant must call for inspection and receive inspection within 45 days of installation of treatment measures and/or hydromodification management controls.*	
Name of Applicant Completing Form	
Signature	
Date	

VI. For Completion by Municipal Staff

(This section is only applicable for C.3.b Regulated Projects)

VI.1 Alternative Certification	**YES**	**NO**
Was the treatment system sizing and design reviewed by a qualified third-party professional that is not a member of the project team or agency staff?	☐	☐
Name of Reviewer:	☐	☐
VI.2 Confirm Operations and Maintenance (O&M) Submittal Complete for C.3.b Regulated Projects and HM Projects	☐	☐
VI.2.a Was the maintenance plan submitted?	☐	☐
VI.2.b Was the maintenance plan approved?	☐	☐
VI.2.c Was the maintenance agreement approved?	☐	☐

Date maintenance agreement was executed:	

VI.3 HM Controls (if required) Are the applicable items for HM compliance included in the plan submittal?			
Documentation for HM Compliance	**YES**	**NO**	**NA**
Site plans with pre- and post-project impervious surface areas, surface flow directions of entire site, locations of flow duration controls and site design measures per HM site design requirement	☐	☐	☐
Soils report or other site-specific document showing soil types at all parts of site	☐	☐	☐
If project uses the Bay Area Hydrology Model (BAHM), a list of model inputs.	☐	☐	☐
If project uses custom modeling, a summary of the modeling calculations with corresponding graph showing curve matching (existing, post-project, and post-project with HM controls curves), goodness of fit, and (allowable) low flow rate.	☐	☐	☐
If project uses the Impracticability Provision, a listing of all applicable costs and a brief description of the alternative HM project (name, location, date of start up, entity responsible for maintenance).	☐	☐	☐
If the project uses alternatives to the default BAHM approach or settings, a written description and rationale.	☐	☐	☐

- Municipal staff: Refer to the "Flow Duration Control Review Worksheet for HM Submittals" to review the documentation submitted for HM compliance.

Special Projects Worksheet

Complete this worksheet for projects that appear to meet the definition of "Special Project", per Provision C.3.e.ii of the Municipal Regional Stormwater Permit (MRP). The form assists in determining whether a project meets Special Project criteria, and the percentage of low impact development (LID) treatment reduction credit. Special Projects that implement less than 100% LID treatment must provide a narrative discussion of the feasibility or infeasibility of 100% LID treatment. See Appendix J of the C.3 Technical Guidance (download at https://www.cleanwaterprogram.org/) for more information.

Project Name:_____

Project Address:_____

Applicant/Developer Name:_____

1. "Special Project" Determination *(Check the boxes to determine if the project meets any of the following categories.)*

Special Project Category "A"

Does the project have ALL of the following characteristics?

- ☐ Located in a municipality's designated central business district, downtown core area or downtown core zoning district, neighborhood business district or comparable pedestrian-oriented commercial district, or historic preservation site and/or district[1];
- ☐ Creates and/or replaces 0.5 acre or less of impervious surface;
- ☐ Includes no surface parking, except for incidental parking for emergency vehicle access, ADA access, and passenger or freight loading zones;
- ☐ Has at least 85% coverage of the entire site by permanent structures. The remaining 15% portion of the site may be used for safety access, parking structure entrances, trash and recycling service, utility access, pedestrian connections, public uses, landscaping and stormwater treatment.

☐ **No (continue)** ☐ **Yes – complete Section 2A of the Special Project Worksheet**

Special Project Category "B"

Does the project have ALL of the following characteristics?

- ☐ Located in a municipality's designated central business district, downtown core area or downtown core zoning district, neighborhood business district or comparable pedestrian-oriented commercial district, or historic preservation site and/or district[1];
- ☐ Creates and/or replaces an area of impervious surface that is greater than 0.5 acre, and no more than 2.0 acres of impervious surface;
- ☐ Includes no surface parking, except for incidental parking for emergency access, ADA access, and passenger or freight loading zones;
- ☐ Has at least 85% coverage of the entire site by permanent structures. The remaining 15% portion of the site may be used for safety access, parking structure entrances, trash and recycling service, utility access, pedestrian connections, public uses, landscaping, and stormwater treatment;
- ☐ Minimum density of either 50 dwelling units per acre (DU/ac) (for residential projects) or a Floor Area Ratio (FAR) of 2:1 (for commercial or mixed use projects)

☐ **No (continue)** ☐ **Yes – complete Section 2B of the Special Project Worksheet**

Special Project Category "C"

Does the project have ALL of the following characteristics?

- ☐ Must have affordable housing deed restrictions running a minimum of 55 years that limit the rent/mortgage rates (including utilities) to be no greater than 30 percent of the total household income and meet the income levels specified by the Federal Department of Housing and Urban Development's affordable housing in metropolitan areas: Extremely Low: 0-30 percent of area median household income (AMI); Very Low: 31-50 percent of AMI; Low: 51-80 percent of AMI; and Moderate 81-120 percent of AMI.
- ☐ Is primarily a residential development.
- ☐ Minimum gross density of 40 DU/ac.

☐ **No** ☐ **Yes – complete Section 2C of the Special Project Worksheet**

[1] And built as part of a municipality's stated objective to preserve/enhance a pedestrian-oriented type of urban design.

Special Projects Worksheet (continued)

2. LID Treatment Reduction Credit Calculation *(If more than one category applies, choose only one of the applicable categories and fill out the table for that category.)*

Category	Impervious Area Created/Replaced (sq. ft.)	Site Coverage (%)	Project Density or FAR	Density/Criteria	Allowable Credit (%)	Applied Credit (%)
A			NA	NA	100%	
B				Res ≥ 50 DU/ac or FAR ≥ 2:1	50%	
				Res ≥ 75 DU/ac or FAR ≥ 3:1	75%	
				Res ≥ 100 DU/ac or FAR ≥ 4:1	100%	
C[2]				**Affordable Housing credit (select one):**		
				The minimum percentage of the DUs meet the 70% credit requirements listed in **Table 1**.	70%	
				The minimum percentage of the DUs meet the 50% credit requirements listed in **Table 1**.	50%	
				The minimum percentage of the DUs meet the 25% credit requirements listed in **Table 1**.	25%	
				Location credit (select one)[3]:		
				Within ¼ mile of transit hub	5%	
				Within a planned Priority Development Area (PDA)[4]	10%	
				Density credit (select one):		
				Gross density ≥ 40 DU/Ac	5%	
				Gross density ≥ 60 DU/Ac	10%	
				Gross density ≥ 100 DU/Ac	15%	
				Parking credit (select one):		
				Includes no surface parking, except for incidental parking for emergency vehicle access, ADA access, and passenger or freight loading zones	5%	
				TOTAL CATEGORY C CREDIT =		

[2] For any Category C Special Project, the total maximum LID Treatment Reduction Credit allowed is the sum of four different types of credits that the Category C Special Project may qualify for, namely: Affordable Housing + Location, Density + Minimized Surface Parking Credits. A Category C Special Project must at least qualify for an Affordable Housing credit before it can earn any credits in the other categories.

[3] To qualify for a Location Credit, 100% of the Category C Special Project's site must be located within the ¼-mile radius of an existing or planned transit hub.

[4] A "planned Priority Development Area" is an infill development area formally designated by the Association of Bay Area Government's Metropolitan Transportation Commission's FOCUS regional planning program.

Special Projects Worksheet (continued)

3. Narrative Discussion of the Feasibility/Infeasibility of 100% LID Treatment:

If project will implement less than 100% LID, prepare a discussion of the feasibility or infeasibility of 100% LID treatment, as described in Appendix J of the C.3 Technical Guidance.

4. Select Certified Non-LID Treatment Measures:

If the project will include non-LID treatment measures, select a treatment measure certified for "Basic" General Use Level Designation (GULD) by the Washington State Department of Ecology's Technical Assessment Protocol – Ecology (TAPE). Guidance is provided in Appendix J of the C.3 Technical Guidance.[5]

Special Projects Worksheet Completed by:

Signature _____ Date _____

Print or Type Name _____

Table 1 Affordable Housing Credit Table

AMI	Minimum Percentage of DUs		
	70% credit	50% credit	25% credit
Moderate (≤120% of AMI)	100	75	50
Low (≤80% of AMI)	75	50	25
Very Low (≤50% of AMI)	50	25	15
Extremely Low (≤30% of AMI)	25	15	5

[5] TAPE certification is used in order to satisfy Special Project's reporting requirements in the MRP.

Land Use Notes
January 6th, 2025
Notes from Kurt Hurley, Building and Safety, Green Building Program Manager
khurley@berkeleyca.gov

University 2029 Proposal #1: Multifamily Housing ZP2024-0181

Land Use Representative: Nilu Karimzadegan <NKarimzadegan@berkeleyca.gov>
Architects: Trachtenberg Architecture
Civil: BFK Engineers
Landscape Architects: Jett Landscape Architecture + Design
Owner: Laconia Development LLC
Application Submittal Date: 12/2024

Project Summary
This proposed project scope demolishes an existing two-story commercial building and ten parking garages (TBD) on a 12,385 square-feet lot and constructs a 23-story (256 ft. tall) approximately 190,878 square-feet residential building (multifamily) containing 240 dwelling units including 18 VLI units (15%),18 MI units (15%) for a 100% density bonus.

Green Building/Energy

- The building permit coversheet declaration pertaining to code compliance must reference the 2022 Mid-Cycle Energy and Green Code adopted by Berkeley City Council and effective July 1st, 2024.

- Quantitative values for appliance fuel efficiency (for addition and altered exiting systems), e.g. Space Conditioning Heat Pump SEER2 or Heat Pump Water Heater UEF, Manual J Heating and Cooling Load Calculations, insulation R-values, window U-Value (max) and window Solar Heat Gain Coefficient SHGC (min) must be included in relevant architectural sheets and window & door schedules, and on architectural, plumbing, and mechanical sheets, matching those values stipulated in prescriptive or performance energy compliance documents.

- Cement reductions in concrete mix design of at least 25% must be specified in structural sheets at building permit application based on the formula: [1 – ((cement)/(cement + amendment))] x 100 = the % cement reduction. Cement used in concrete is the largest single material source of embodied emissions in buildings and is responsible for 8% of global emissions. Replacing cement with alternatives, such as fly ash, slag, silica fume, or rice hull ash, can reduce total emissions for concrete by 50%.

2022 Berkeley Green Code EV Charging Requirement

The current submission indicates zero new vehicle parking spaces serving residential occupancies.

For a building permit application on or after July 1, 2024 any change in scope resulting in new parking serving new residential occupancies must demonstrate:

[1] 20% of spaces as 'EV CAPABLE' with 1" raceway and 208/240V 40 ampere load capacity,
[2] 25% of spaces as 'EV READY' with 208/240V 20 ampere circuit and receptacle
[3] 5% of spaces as 'EV CHARGING STATIONS' with 208/240V 40 ampere supply equipment.

For a building permit application on or after July 1, 2024 any change in scope resulting in new parking serving new non- residential occupancies must demonstrate:

[1] 20% of spaces as 'EV CAPABLE' with 1" raceway and 208/240V 40 ampere load capacity,
[2] 10% of spaces as 'EV CHARGING STATIONS' with 208/240V 40 ampere supply equipment

Values are rounded up to the nearest whole integer.
Installed EV charging system components must comply with the requirements of CEC 625.

CEDA Design Assistance
The California Energy Design Assistance (CEDA) Program provides free energy design assistance and incentives for new construction and major alterations for commercial, public, multifamily (4+ stories), industrial, and agricultural projects. See this PG&E CEDA webpage as well as Willdan's CEDA webpage and area contact Jeff Glover, JGlover@willdan.com.

Electric Service

Please Contact PG&E Express connect as soon as possible to understand any special considerations for project electrical service.

WELO: Landscaping/Water Efficiency
Landscaping must comply with the State's Model Water Efficient Landscape Ordinance (WELO), available at water.ca.gov/Programs/Water-Use-And-Efficiency, as revised in 2015. [CGBSC 4.304]

~~Demonstrate a compliant Estimated Total Water Use (ETWU) less than the Maximum Allowed Water Allowance (MAWA) using a minimum 41.8 ET_o for the City of Berkeley. [CGBSC 4.304]~~ SATISFIED SHEET L5.01

Provide a color-coded landscaping hydrozone map matching the WUCOLS plant materials categories by collocating planting materials by WUCOLS water use category VL, L, M, or H and assigning a unique color for each. [CGBSC 4.304] ADD OR AMEND AN EXISTING SHEET

~~Specify minimum 3" mulch depth and compost application to achieve a minimum 6% organic matter in soil composition based on a MWELO specified soil analysis results for the site soil. [CGBSC 4.304]~~
SATISFIED SHEET L3.01

Locate a rain sensor in the landscaping design whose signal is specified as compatible with the master control valve. [CGBSC 4.304] ADD A SPECIFICATION OR LOCATE THE COMPONENT ON SHEET L5.01

Update plans to demonstrate a complying landscaping design

The following is needed:

- Compliance with EBMUD Section 31: Water Efficiency Requirements
- Bay-Friendly Basics Landscape Checklist
- ~~WELO calculations (by building permit application), see Appendix B, Sample Water Efficient Landscape Worksheet, from (available as a Word document at https://www.water.ca.gov/Programs/Water-Use-And-Efficiency/Urban-Water-Use-Efficiency). The Reference Evapotranspiration (ETo) for Berkeley is 41.8.~~

Bird Safe Berkeley Municipal Code Section 23.304.150 effective 07/27/23
This multifamily project exceeds 10,000 GFA and 35 in Average Height feet and is a Covered Project. On each elevation, note the percentage of facade area consisting of transparent or reflective material, such as windows. Where Bird Safe Materials are required, please indicate the compliance option(s) selected (including all window schedule entries) and the product name(s), including threat factor rating where applicable, and material(s) used.

1- INTRODUCTION IN-1

THE VISION FOR DOWNTOWN BERKELEY IN-1

PURPOSE AND PROCESS IN-1

THE 1990 DOWNTOWN PLAN IN-2

THE DOWNTOWN AREA PLAN PROCESS IN-2

PROJECT LOCATION AND BOUNDARIES IN-5

DOWNTOWN'S HISTORIC SETTING IN-6

LAND USE IN-9

TRANSPORTATION IN-13

DEMOGRAPHICS AND HOUSING IN-15

PUBLIC SPACES IN-16

SUSTAINABILITY IN-16

CHAPTERS OF THE PLAN IN-17

SUMMARY OF GOALS IN-17

PLAN IMPLEMENTATION IN-21

2. ENVIRONMENTAL SUSTAINABILITY ES-1

STRATEGIC STATEMENT ES-1

KEY ENVIRONMENTAL COMPONENTS AND THEIR BENEFITS ES-2

GOALS, POLICIES & ACTIONS ES-5

GOAL ES-1: INTEGRATE ENVIRONMENTALLY SUSTAINABLE DEVELOPMENT AND PRACTICES IN DOWNTOWN, AND IN EVERY ASPECT OF THE DOWNTOWN AREA PLAN. ES-5

Policy ES-1.1: Sustainability as Comprehensive. ES-5

GOAL ES-2: MODEL BEST PRACTICES FOR SUSTAINABILITY AND PROMOTE DOWNTOWN TO BUSINESSES, INSTITUTIONS, AND RESIDENTS WHO ARE COMMITTED TO ENVIRONMENTAL SUSTAINABILITY. ES-5

Policy ES-2.1: Promote a Green Downtown and Model Best Practices ES-5

Policy ES-2.2: Green Businesses & Institutions ES-6

Policy ES-2.3: Local Food & Businesses. ES-6

Policy ES-2.4: Downtown Energy & Water Facilities. ES-6

Policy ES-2.5: Environmental Leadership. ES-6

GOAL ES-3: ENCOURAGE HIGH DENSITY, HIGHLY LIVABLE DEVELOPMENT TO TAKE ADVANTAGE OF DOWNTOWN'S PROXIMITY TO REGIONAL TRANSIT AND TO IMPROVE THE AVAILABILITY OF DIVERSE WALK-TO DESTINATIONS – SUCH AS RETAIL, SERVICES, CULTURE, AND RECREATION ES-7

Policy ES-3.1: Land Use ES-7

Policy ES-3.2: Streets and Open Space ES-7

Policy ES-3.3: Urban Design ES-7

Policy ES-3.4: Alternative Modes ES-7

Policy ES-3.5: Pedestrian Priority ES-7

GOAL ES- 4: PROMOTE "GREEN" BUILDINGS ES-7

Policy ES- 4.1: Energy and Environmental Performance ES-7

Policy ES-4.2: Alternative Modes ES-8

Policy ES-4.3: Water Conservation, Reuse & Retention ES-9

Policy ES-4.4: Green Materials ES-9

Policy ES-4.5: Noise ES-9

Policy ES-4.6: Longevity ES-9

Policy ES-4.7: Solar & Wind Impacts ES-10

Policy ES-4.8: Adaptive Reuse. ES-10

Policy ES-4.9: Green Pathway Development Review Process. ES-10

GOAL ES-5: PROMOTE ECOLOGICALLY BENEFICIAL LANDSCAPING AND STORMWATER FEATURES THROUGHOUT THE DOWNTOWN, TO FILTER POLLUTANTS FOUND IN URBAN RUNOFF, PROTECT AND RESTORE THE HEALTH OF CONNECTED WATERSHEDS, REDUCE DOWNSTREAM STORMWATER FLOWS, AND EXPRESS THE COMMUNITY'S COMMITMENT TO ENVIRONMENTAL SUSTAINABILITY. ES-10

Policy ES-5.1: Stormwater Quality. ES-10

Policy ES-5.2: Green Infrastructure Requirements ES-11
Policy ES-5.3: On-Site Features ES-12
Policy ES-5.4: Natural Areas on UC Campus ES-12
GOAL ES-6: MINIMIZE WASTE GENERATED DOWNTOWN, AND STRIVE TO MAKE DOWNTOWN A "ZERO WASTE ZONE." ES-12
Policy ES-6.1: Recycling & Reuse ES-12
Policy ES-6.2: Adaptive Reuse ES-12
GOAL ES-7: CONTINUOUSLY IMPROVE CITY STANDARDS AND PROGRAMS PROMOTING SUSTAINABLE PRACTICES. ES-12
Policy ES-7.1: Continuous Improvement. ES-12

3. LAND USE LU-1

STRATEGIC STATEMENT LU-1

GOALS, POLICIES & ACTIONS LU-5

GOAL LU-1: ENCOURAGE A THRIVING, LIVABLE DOWNTOWN THAT IS A FOCAL POINT FOR THE CITY AND A MAJOR DESTINATION FOR THE REGION, WITH A UNIQUE CONCENTRATION OF HOUSING, JOBS AND CULTURAL DESTINATIONS NEAR TRANSIT, SHOPS AND AMENITIES. LU-5
Policy LU-1.1: Downtown Uses LU-5
Policy LU-1.2: Culture & Entertainment. LU-7
Policy LU-1.3: Complementary & Active Businesses LU-10
Policy LU-1.4: Civic Focus LU-11
Policy LU-1.5: Downtown Intensities & Building Heights LU-11
GOAL LU-2: NEW DEVELOPMENT SHALL CONTRIBUTE ITS FAIR SHARE TOWARD DOWNTOWN IMPROVEMENTS. COORDINATE DEVELOPMENT FEES AND OTHER FUNDING OPPORTUNITIES WITH PUBLIC IMPROVEMENTS FOR THE ORDERLY AND ATTRACTIVE TRANSFORMATION OF DOWNTOWN LU-12
Policy LU-2.1: Contributions Required of All Development LU-12
Policy LU-2.2: Additional Community Benefits for Buildings Exceeding 75 Feet LU-13
Policy LU-2.3: Voluntary Green Pathway LU-13
Policy LU-2.4: Developer Contributions for Open Space LU-14
Policy LU-2.5: DAP Evaluation & Updates LU-15

GOAL LU-3: CULTIVATE DOWNTOWN AS AN ATTRACTIVE RESIDENTIAL NEIGHBORHOOD WITH A RANGE OF HOUSING OPPORTUNITIES, AND AN EMPHASIS ON AFFORDABLE HOUSING AND FAMILY HOUSING LU-15

Policy LU-3.1: Housing Needs LU-15

Policy LU-3.2: Housing Diversity & Affordability LU-15

GOAL LU-4: NEW DEVELOPMENT SHOULD ENHANCE DOWNTOWN'S VITALITY, LIVABILITY, SUSTAINABILITY, AND CHARACTER THROUGH APPROPRIATE LAND USE AND DESIGN LU-15

Policy LU-4.1: Transit-Oriented Development LU-15

Policy LU-4.2: Development Compatibility LU-16

Policy LU-4.3: Historic Resources LU-16

GOAL LU-5: ENHANCE DOWNTOWN AS A CENTER FOR EMPLOYMENT AND INNOVATIVE BUSINESSES. LU-16

Policy LU-5.1: Office Space LU-16

GOAL LU-6: ENCOURAGE UNIVERSITY USES IN DOWNTOWN THAT WILL BENEFIT THE GREATER DOWNTOWN AREA LU-16

Policy LU-6.1: University Land Uses LU-16

Policy LU-6.2: UC Housing LU-18

Policy LU-6.3: Business Synergies LU-18

GOAL LU-7: MAINTAIN THE EXISTING SCALE AND CHARACTER OF RESIDENTIAL-ONLY AREAS LU-18

Policy LU-7.1: Neighborhood Protections LU-18

Policy LU-7.2: Transitions LU-19

GOAL LU-8: MAINTAIN AND EXPAND COMMUNITY HEALTH CARE FACILITIES AND SOCIAL SERVICES IN THE DOWNTOWN AREA LU-19

Policy LU-8.1: Herrick Site LU-19

Policy LU-8.2: UC Health Services LU-19

Policy LU-8.3: Other Care Providers LU-19

4. ACCESS AC-1

STRATEGIC STATEMENT AC-1

PRIORITIZE PEDESTRIANS AC-1

BICYCLING AC-3

PUBLIC TRANSIT AC-3

REDUCING AUTO USE AC-4
PARKING AC-6

GOALS, POLICIES & ACTIONS AC-8

GOAL AC-1: IMPROVE OPTIONS THAT INCREASE ACCESS TO DOWNTOWN ON FOOT, BY BICYCLE, AND VIA TRANSIT. MAKE LIVING, WORKING, AND VISITING DOWNTOWN AS CAR-FREE AS POSSIBLE AC-8
Policy AC-1.1: Street Modifications AC-8
Policy AC-1.2: Single-Occupant Vehicles AC-9
Policy AC-1.3: Alternative Modes & Transportation Demand Management (TDM) AC-10
GOAL AC-2: GIVE PEDESTRIANS PRIORITY IN DOWNTOWN, AND MAKE WALKING DOWNTOWN SAFE, ATTRACTIVE, EASY AND CONVENIENT FOR PEOPLE OF ALL AGES AND ABILITIES AC-10
Policy AC-2.1: Pedestrian Safety and Amenities AC-10
Policy AC-2.2: Universal Access AC-11
GOAL AC-3: PROVIDE PARKING TO MEET THE NEEDS OF DOWNTOWN, WHILE DISCOURAGING COMMUTER PARKING AND ENCOURAGING MOTORISTS TO PARK THEIR CARS AND EXPERIENCE DOWNTOWN AS A PEDESTRIAN AC-11
Policy AC-3.1: Effective Parking AC-11
Policy AC-3.2: New Parking AC-13
Policy AC-3.3: Pedestrian Impacts AC-13
Policy AC-3.4: University Cooperation AC-14
Policy AC-3.5: Equitable Access AC-14
Policy AC-3.6: Residential Parking AC-14
GOAL AC-4: PROMOTE TRANSIT AS AN EFFICIENT AND ATTRACTIVE CHOICE – AND AS A PRIMARY MODE OF MOTOR-VEHICLE TRAVEL AC-14
Policy AC-4.1: Transit Priority AC-14
Policy AC-4.2: Attractive Transit AC-15
Policy AC-4.3: Transit Center AC-16
Policy AC-4.4: Transit and Bikes AC-16
Policy AC-4.5: Local Transit & Shuttle Connections AC-17
Policy AC-4.6: Paratransit AC-18
Policy AC-4.7: Events AC-18
Policy AC-4.8: Transit-Supportive Uses AC-18

GOAL AC-5: MAINTAIN AND ENHANCE SAFE, ATTRACTIVE AND CONVENIENT BICYCLE CIRCULATION WITHIN DOWNTOWN, AND TO AND FROM SURROUNDING AREAS, FOR PEOPLE OF ALL AGES AND ABILITIES. PROMOTE BICYCLING DOWNTOWN AC-18
Policy AC-5.1: Bike Network Improvements AC-18
Policy AC-5.2: Bicycle Parking. AC-18
Policy AC-5.3: Bike Sharing AC-19
Policy AC-5.4: Business & Institutional Support AC-19

Policy OS-4.1: Safe Environments....OS-11
Policy OS-4.2: Cleaning & Maintenance....OS-11
Policy OS-4.3: Public Conveniences....OS-11

7. HOUSING AND COMMUNITY HEALTH & SERVICES....HC-1

STRATEGIC STATEMENT....HC-1
GOALS, POLICIES & ACTIONS....HC-7
GOAL HC-1: ENCOURAGE DOWNTOWN AS A THRIVING, LIVABLE, DIVERSE RESIDENTIAL NEIGHBORHOOD WITH A MIX OF SUPPORTIVE USES....HC-7
Policy HC-1.1: Neighborhood-Serving Uses....HC-7
Policy HC-1.2: Sufficient Open Space....HC-7
GOAL HC-2: MAINTAIN A GOOD QUALITY OF LIFE FOR RESIDENTS OF ALL AGES DURING THE DAY AND AT NIGHT IN DOWNTOWN AND IN SURROUNDING RESIDENTIAL AREAS....HC-7
Policy HC-2.1: Residential Daylight....HC-7
Policy HC-2.2: Noise Mitigation....HC-7
Policy HC-2.3: Construction Noise....HC-8

GOAL HC-3: OFFER DIVERSE HOUSING OPPORTUNITIES FOR PERSONS OF DIFFERENT AGES AND INCOMES, HOUSEHOLDS OF VARYING SIZE, AND PERSONS OF VARYING ABILITIES. GIVE DOWNTOWN A SIGNIFICANT ROLE IN MEETING BERKELEY'S CONTINUING NEED FOR ADDITIONAL HOUSING HC-8

Policy HC-3.1: Growth with Preservation HC-8

Policy HC-3.2: Affordable Housing & Supportive Services. HC-8

Policy HC-3.3: Larger Residential Units. HC-9

Policy HC-3.4: Home Ownership. HC-9

Policy HC-3.5: Senior & Disabled Housing HC-9

Policy HC-3.6: UC Housing. HC-9

GOAL HC-4: PRESERVE EXISTING AFFORDABLE HOUSING DOWNTOWN, AND EXPAND THE SUPPLY OF AFFORDABLE HOUSING FOR LOW-INCOME, VERY LOW-INCOME AND WORKING-CLASS HOUSEHOLDS IN DOWNTOWN. HC-9

Policy HC-4.1: Prevent Displacement HC-9

Policy HC-4.2: Affordable Housing & Supportive Services HC-10

GOAL HC-5: DELIVER IN DOWNTOWN EFFECTIVE AND COMPASSIONATE SERVICES FOR SENIORS, PARENTS AND YOUTH, AND PERSONS WITH SPECIAL NEEDS, INCLUDING INDIVIDUALS WHO ARE HOMELESS, HAVE PHYSICAL AND/OR MENTAL DISABILITIES, AND/OR SUFFER FROM SUBSTANCE ABUSE HC-10

Policy HC-5.1: Youth Services. HC-10

Policy HC-5.2: Training & Skill Building. HC-11

Policy HC-5.3: Senior Services. HC-11

Policy HC-5.4: Social Services. HC-11

Policy HC-5.5: Communication Services. HC-11

GOAL HC-6: PROVIDE A SAFE, CLEAN AND ATTRACTIVE DOWNTOWN, IN PARTNERSHIP WITH THE COMMUNITY. HC-11

Policy HC-6.1: Safe Environments. HC-11

Policy HC-6.2: Cleaning & Maintenance. HC-12

Policy HC-6.3: Design for Public Safety. HC-12

GOAL HC-7: MAINTAIN AND EXPAND INTEGRATED HEALTH SERVICES AVAILABLE IN DOWNTOWN TO ADDRESS HEALTH INEQUITIES HC-12

Policy HC-7.1. Health Services. HC-12

8. ECONOMIC DEVELOPMENT ED-1

STRATEGIC STATEMENT ED-1

GOALS, POLICIES & ACTIONS ED-4

GOAL ED-1: SERVE THE NEEDS OF THE NEIGHBORHOOD AND THE CITY. MAKE DOWNTOWN A MORE ATTRACTIVE REGIONAL DESTINATION, BY BUILDING ON DOWNTOWN'S UNIQUE BLEND OF CULTURAL, HISTORIC, ENTERTAINMENT, ART, EDUCATIONAL, AND COMMUNITY INSTITUTIONS – AND BY PROMOTING SUCCESSFUL RETAIL BUSINESSES AND OTHER ATTRACTIONS, WITH DAYTIME AND NIGHTTIME POPULATIONS TO SUPPORT THEM ED-4

Policy ED-1.1: Shop Downtown ED-4

Policy ED-1.2: Parking ED-4

Policy ED-1.3: Retail, Restaurants & Cultural Uses ED-4

Policy ED-1.4: Rehabs & Reuse ED-5

Policy ED-1.5: Local Businesses ED-5

Policy ED-1.6: Larger Retail Spaces ED-5

Policy ED-1.7: Entertainment & Culture ED-5

Policy ED-1.8: Families ED-6

Policy ED-1.9: Educational Uses ED-6

Policy ED-1.10: Conference Facilities ED-6

Policy ED-1.11: Hotels ED-6

Policy ED–1.12: Signage ED-7

Policy ED–1.13: Parking ED-7

GOAL ED-2: MAINTAIN SAFE AND INVITING STREETS, PARKS & PLAZAS THAT CONTRIBUTE TO THE SUCCESS OF BUSINESSES AND THE WELL-BEING OF RESIDENTS ED-7

Policy ED-2.1: Activity & Safety ED-7

Policy ED-2.2: Public Conveniences ED-7

Policy ED 2.3: Clean Public Spaces ED-7

GOAL ED-3: TO MAKE DOWNTOWN MORE ATTRACTIVE AND ECONOMICALLY SUCCESSFUL, ENCOURAGE PLACE-MAKING THROUGH THE PRESERVATION OF HISTORIC BUILDINGS, STREET AND OPEN SPACE IMPROVEMENTS, AND HIGH-QUALITY NEW CONSTRUCTION ED-7

GOAL ED-4: ENSURE THAT UC BERKELEY IS A PARTNER IN PROMOTING A HEALTHY AND VITAL DOWNTOWN ED-8

Policy ED-4.1: Guiding and Cooperating with UC Berkeley. ED-8
Policy ED-4.2: Community Uses & Economic Activity ED-8
Policy ED-4.3: Downtown Retail..... ED-8
Policy ED-4.4: Fair Compensation. ED-8
GOAL ED-5: INCORPORATE SUSTAINABLE PRACTICES AS AN ESSENTIAL COMPONENT OF ECONOMIC DEVELOPMENT, AND ESTABLISH DOWNTOWN AS A RECOGNIZED CENTER FOR BUSINESSES AND INSTITUTIONS THAT ARE COMMITTED TO ENVIRONMENTAL SUSTAINABILITY..... ED-8
Policy ED-5.1: Green Businesses..... ED-8
Policy ED-5.2: Public Awareness. ED-8
Policy ED-5.3: Local Food and Businesses ED-9
Policy ED-5.4: Local Businesses. ED-9
GOAL ED-6: INVEST IN CIVIC IMPROVEMENTS (SUCH AS STREETS, OPEN SPACES, AND COMMUNITY FACILITIES) TO ENHANCE DOWNTOWN AS A PLACE TO LIVE, WORK, AND VISIT. ED-9
GOAL ED-7: PROMOTE DOWNTOWN AS A REGIONAL CULTURAL CENTER AND VISITOR DESTINATION ED-9
Policy ED-7.1: Culture & the Arts ED-9
Policy ED-7.2: Tourism & Visitors ED-9
GOAL ED-8: INCREASE THE NUMBER OF DOWNTOWN JOBS THAT GO TO BERKELEY RESIDENTS, AND SUPPORT THE DEVELOPMENT OF JOB SKILLS FOR BERKELEY RESIDENTS – ESPECIALLY BERKELEY'S YOUTH ED-9
Policy ED-8.1: Job Development ED-9
Policy ED-8.2: Business Opportunities. ED-10
GOAL ED-9: ENCOURAGE LOCAL BUSINESSES THAT REPRESENT THE CITY'S DIVERSE ETHNIC, CULTURAL AND INCOME GROUPS ED-10
Policy ED-9.1: Local Businesses. ED-10
GOAL ED-10: SERVE THE HOUSING NEEDS OF ALL INCOME GROUPS AND PROVIDE A GROWING BASE OF RESIDENTS WHO SUPPORT A BROAD RANGE OF DOWNTOWN RETAIL AND OTHER BUSINESSES. ED-11
GOAL ED-11: PROVIDE ACCESS TO DOWNTOWN, WHICH SUPPORTS RETAIL, RESTAURANTS, ENTERTAINMENT, HOTELS AND CULTURAL USES..... ED-11
GOAL ED-12: INVEST RESOURCES DOWNTOWN TO SUPPORT CITY GOALS AND TO IMPROVE AND MAINTAIN A HIGH QUALITY OF ENVIRONMENT ED-11
Policy ED-12.1: Revenues for Downtown. ED-11

1 - INTRODUCTION

1- INTRODUCTION

THE VISION FOR DOWNTOWN BERKELEY

Downtown is the heart of Berkeley where people enjoy urban life.

Downtown demonstrates Berkeley's commitment to sustainability. Downtown models ways to minimize human impacts on the environment, through its emphasis on walking, bicycling, transit, green streets, and green architecture.

Downtown is economically vibrant. Downtown increasingly serves Berkeley's residents and visitors with attractive retail, exceptional restaurants, community services, and remarkable streets, parks, and plazas. Downtown celebrates its proximity to a university renowned for academic accomplishment and physical beauty. Downtown's cultural, educational and historic assets form the foundation for its continued success.

> *Downtown is a great pedestrian-oriented neighborhood. Safe and tree-lined streets, shops, services, and amenities make it possible to meet most daily needs on foot. It offers diverse housing opportunities for all kinds of people, with an emphasis on affordability and supporting people of all abilities.*

Facing Page: *Berkeleyans participated extensively in the creation of the DAP, including three visioning workshops held early in the process. Here, citizens discuss their goals for the Downtown Area at a public 'visioning meeting.' Staff photo.*

PURPOSE AND PROCESS

Downtown serves as the vital, recognizable heart to the city of Berkeley. In Downtown, Berkeleyans come together to work, play, shop, stroll, and meet. When out-of-town guests say they want to "See Berkeley," Downtown springs to mind.

Downtown Berkeley possesses many qualities of a great downtown. Shops and buildings come to the edge of sidewalks, as is typical of America's "main streets." Windowed storefronts reveal merchandise and inside activity. An eclectic mix of buildings – many historic – give visual interest and suggest a rich history. Newer buildings complement their historic neighbors while demonstrating Berkeley's forward-thinking culture. Downtown offers a variety of places to eat, theatrical shows, a great library, a widely used YMCA, and unique shops. Downtown continues to be a major transit hub, and it has the advantage of a large world-class university on its doorstep.

To be successful, Berkeley should have a clear and realistic vision of what Downtown is and can become. The Downtown Area Plan (DAP) builds on the strengths of the 1990 Downtown Plan, which succeeded in: making Downtown a recognized center for culture and the arts, bringing new housing to Downtown, and preserving Downtown's historic assets. The DAP adds result-oriented provisions to make Downtown more vibrant. The DAP also promotes environmental sustainability with new standards for green building and green infrastructure, and by accommodating future residential and employment growth within a pedestrian-friendly and transit-oriented district.

THE 1990 DOWNTOWN PLAN

The previous Downtown Plan was adopted in 1990 after six years of effort. The 1990 Plan emerged at a time when the things that made Downtown a special place were at risk, especially features that give Downtown its unique pedestrian-friendly character. Soulless banks and fast food restaurants replaced older buildings. Street improvements focused on moving cars while reserving modest sidewalks for pedestrians. BART's construction further disrupted Downtown. Many feel that it never recovered.

Figure IN-1: View of Downtown Looking West. *Downtown plays a vital economic and cultural role within Berkeley – and the larger Bay Area. Staff photo*

The 1990 Downtown Plan emphasized the importance of protecting Downtown's traditional character. The Plan embraced the community's values for protecting its historic character, cultural diversity, and human scale. Cultural uses formed another cornerstone of the 1990 Plan. While Downtown's retail anchors were not saved, cultural uses presented a way to maintain Downtown as a regional destination. A new Arts District was created by successfully recruiting live theatres, preserving historic facades, and making community-inspired street improvements.

The 1990 Plan also emphasized high-density housing as being critical to Downtown's revitalization, at a time when little "urban infill" was occurring. At that time, the community understood that in the face of auto-oriented suburban malls and big-box retail, revitalization of a traditional downtown meant increasing the number of people living and shopping there. The 1993 Downtown Design Guidelines that helped to implement the 1990 Plan was innovative in its emphasis on traditional building types where buildings are built to the street edge, and where residences and offices are built over stores that face the street.

The 1990 Plan also could not anticipate a new spectrum of concerns. Environmental sustainability and global climate change had not yet emerged as leading issues. "Transit-oriented development" had not been coined as an expression, let alone developed as a concept. In addition, the social benefits and economic imperative of well-designed streets and buildings was poorly understood and received little emphasis.

THE DOWNTOWN AREA PLAN PROCESS

A new Downtown Area Plan effort was initiated in 2005, partly to settle a dispute between the University of California, Berkeley and the City of Berkeley regarding the University's Long Range

Development Plan (LRDP). The University's LRDP called for 800,000 square feet of new development in and adjacent to Downtown. It was not clear how UC's Downtown development would be arranged or what its character would be.

The City and University recognized that the future of Downtown was of mutual concern, and that fostering a healthy, sustainable, livable, and vibrant Downtown was in the interests of both the City and the University. Specifically, the City and University agreed to foster Downtown revitalization by working in partnership to develop a new Downtown Area Plan that would address community goals and shape University development plans.

The Downtown Area Plan was developed through the extensive participation of Berkeley's citizens, along with the cooperation and support of the University. Community concerns and a community-based process were central to the Plan's development. In 2005, Berkeley's City Council appointed a 21-member Downtown Area Plan Advisory Committee (DAPAC), with three additional ex officio University representatives. The DAPAC provided direction for a draft Downtown Area Plan that expressed a shared vision, common goals, and policy objectives. DAPAC and its subcommittees met through two years and nearly one hundred meetings, with assistance by City and University staff. Various experts were brought in to better clarify complex issues that DAPAC faced.

The DAPAC identified the issues addressed by the DAP and set the direction for most policies contained in the Plan. DAPAC made its final recommendations and forwarded them to City Council and Planning Commission in late 2007. The development of implementing measures was deferred to the Planning Commission.

In 2008, Berkeley's Planning Commission began developing its recommendations for the Downtown Area Plan. Using DAPAC recommendations as a foundation, the Commission considered an array of measures for implementing the Plan. The Commission also sharpened language to eliminate redundancies and ambiguities.

The Planning Commission differed with DAPAC on some substantive issues. Most Planning Commissioners expressed support for having a few more tall buildings Downtown, while a majority of DAPAC members did not. The Planning Commission agreed with the DAPAC that there were significant public benefits from higher intensity development, but it concluded, based on a development feasibility study (Strategic Economics, 2008), that taller buildings would be needed to attain many benefits. The study found that the economics associated with height, building codes and construction costs are likely to make buildings heights between 75 and 160 feet infeasible under typical conditions.

In July 2009, City Council adopted a Downtown Area Plan that was rescinded after opponents to the 2009 Plan gained enough signatures to place that Plan on the ballot. In February 2010, the Council identified significant substantive changes and additions for consideration, and referred the development of a new draft Plan to Planning Commission. Planning Commission made its recommendations for a new DAP in May 2010.

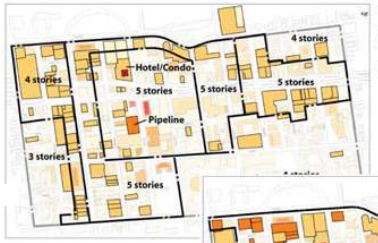
The City Council decided to place controversial aspects of the recommended Plan on the ballot as "Measure R". This advisory measure contained general goals for a new DAP, and detailed provisions relating to building heights, incentives for sustainable development, and ways to streamline the entitlement process. Measure R passed by a 65% to 35% margin in November 2010.

DAPAC's Analysis of Alternatives

DAPAC considered several land use alternatives, which were analyzed from the perspective of residential yield, greenhouse gas generation, solar access, and aesthetics of massing options. Three alternatives were developed early on by Staff, served as touchstones during debate, and were illustrated using the corner of Allston at Shattuck as an example.

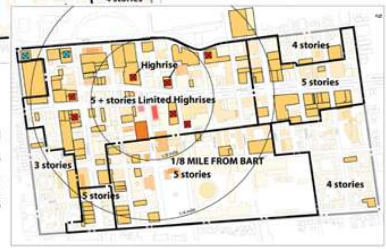
5-Story Baseline "By-Right". *This Alternative depicts what would probably be built using zoning and practices that were in effect, which would generally result in 5-story building heights in commercial/mixed-use zones and 4-story building heights in residential areas.*

8-Story Alternative. *This Alternative assumes an 8-story building height, except for the Civic Center area. While a majority of DAPAC members preferred buildings at this height, an economic feasibility study conducted after DAPAC indicated that projects of this height have high construction costs relative to the number of units they yield, and that residential projects between 76 feet and 160 feet are unlikely under typical circumstances.*

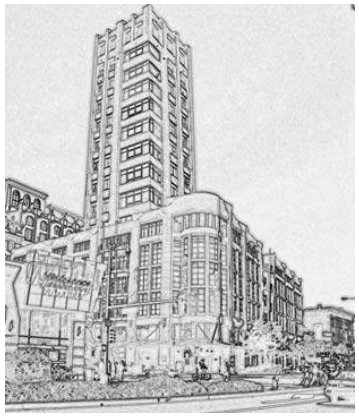


Existing Zoning (new construction at 5 stories) – 1800 new units

Mid-Rise Option (new construction at 8-story) – 2500 new units



High-Rise Option (16-stories on 9 sites otherwise 5-stories) – 2500 new units



5-Story at Street with Narrow High-Rise. *This Alternative steps the building back above the 5th floor. Zoning controls would limit the width of the upper part of the building so that sunlight would be blocked at any point on the street for only an hour or two in a day. Setting the building back also maintain a building silhouette of 5-6 stories as seen from sidewalks. The taller building height of the building depicted is also 180 feet, while the height at the street is about 65 feet.*

In early 2011, Planning Commission considered the creation of a new Downtown Area Plan once again, using its May 2010 recommendations as a foundation. Implementation measures were also added. In December 2011 Planning Commission made its recommendations for this new DAP to the City Council. In early 2012, after six years of effort and nearly two hundred public meetings, City Council adopted this Downtown Area Plan, and the General Plan amendments needed for it to take effect.

The University of California will also make use of the adopted Plan. While this State of California institution remains jurisdictionally separate from the City, it has pledged to use the Downtown Area Plan as it plans for and constructs on University property in the Downtown Area.

PROJECT LOCATION AND BOUNDARIES

Downtown Berkeley is one of the Bay Area's principal city centers (Figure IN-2: Regional Context). In a location adjacent to the University of California, Berkeley, the Downtown Area grew around the intersection of Shattuck Avenue, a historic link to Oakland, and University Avenue, linking the campus and Downtown to Berkeley's original settlement at the Bay's edge and I-80. Shattuck and University remain as major arterials within the East Bay. Downtown Berkeley continues to be the second largest transit node in the East Bay, and is served by BART (Bay Area Rapid Transit), bus lines operated by AC Transit, and shuttle buses operated by UC Berkeley and others.

The Downtown Area is generally bounded by Hearst Avenue along its northern edge, Oxford-Fulton Streets along its eastern edge (east of which lies UC Berkeley's main campus), Dwight Way to the south, and Martin Luther King Jr. Way to the west (Figure IN-3: City Context).

Figure IN-2: Regional Context.

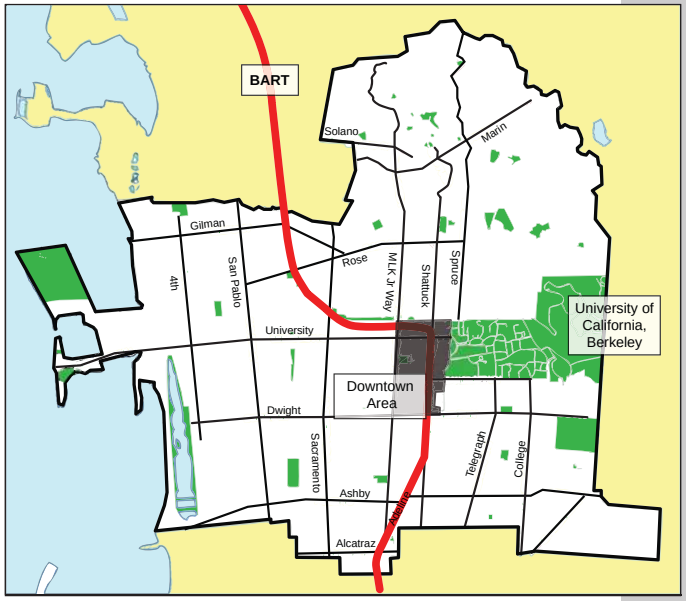


Figure IN-3: City Context.

The Downtown Area includes all of the commercial and civic areas considered by Berkeley residents to be "Downtown." The planning area for the DAP is significantly larger than the area considered by the 1990 Downtown Plan that focused largely on the blocks closely surrounding the BART station. The Downtown Area also takes in portions of residential neighborhoods, to allow the DAP to consider boundaries and appropriate ways to transition (Figure IN-4: Existing Street-Level Uses) to these lower-intensity residential areas.

DOWNTOWN'S HISTORIC SETTING

Downtown Berkeley has a long history compared with many California cities. A central business district began to take shape in the 1870's, with successive waves of development through the 1920's and 30's. Development in this period followed the traditional pattern of American cities, with a grid street pattern and most buildings built to the edge of the sidewalk with housing or office space above street-level storefronts. Many buildings in Downtown date from before World War II and contribute to the character of Downtown, while other buildings have been built since.

Downtown's position as a transportation center played a pivotal role in its development, as Downtown was a convergence point for several rail lines. Shattuck Avenue's generous right-of-way held several intercity rail tracks, and was a focal point for commercial activity. University Avenue intersects Shattuck in the Downtown Area and offered local streetcar service.

Significant retail development continued to happen through the 1950's, but by the 1970's Downtown's position as a regional shopping destination was in decline. Interurban train service ceased in 1958 and when BART opened its Downtown Berkeley station in 1973, shopping destinations with easy auto access were eclipsing traditional centers across the nation. BART construction was also a major disruption to Downtown and – in an effort to make it more welcoming to cars – Shattuck was reconfigured to maximize diagonal parking spaces while moving through-traffic quickly. Fortunately, Berkeley did not embrace the "urban renewal" schemes of the 1960's and 1970's, in which other cities tore down whole blocks of historic fabric to create large-scale redevelopment opportunities. Much of Berkeley's historic fabric remains and is highly valued by Berkeley residents. The DAP reflects this value, as described in more detail in the Historic Preservation and Urban Design chapter.

Since the 1960's and 1970's, and continuing to today, UC Berkeley has played a growing role in Downtown development motivated by expanding programs and fewer opportunities for new development within its core campus. University expansion is occurring in Southside, Northside, and Downtown areas. The University, and the affiliated Lawrence Berkeley National Laboratory (LBNL), have leased and developed space in Downtown, such as the Helios Solar Energy Research Center. The DAP will help guide the University's plans for continued expansion within the Downtown Area.

The 1990's brought new interest in developing apartment buildings in Downtown. Students occupy most, but not all, of this new housing. Oxford Plaza has brought more families Downtown and projects like the Arpeggio are expected to attract more professionals and empty-nesters.

Downtown's reputation as a center for theatre and the arts was also strengthened in the past 20 years, with development of the "Arts District" along Addison Street, including a second stage for Berkeley Repertory Theater, the Jazz School, the Aurora Theater, and the Freight and

NOTES

"Opportunity Sites" are illustrative. Nearly all of them are:

- Vacant, OR
- 1-story, OR
- 2-story near BART.

Not all sites will be developed.

There may be additional sites beyond those shown.

Salvage folk-music club, among other arts venues. Anticipated construction of a new Berkeley Art Museum / Pacific Film Archive will further enhance Downtown as a cultural destination.

LAND USE

The Downtown Area has a wide mix of uses that result from an economy with five general sectors:

- A diverse retail sector, including shops and restaurants that cater to local patrons and, more occasionally, patrons from outside of the area.
- Cultural uses that bring people Downtown and include live theater and music, museums, cinemas, and community uses like the YMCA and Central Branch Library.
- Personal services medical services, and services that support business activities.
- A major employment center because of its offices and institutions, including city government and space associated with UC Berkeley.
- Apartments and other residential uses that support Downtown's retail and service sectors.
- Portions of low-intensity residential neighborhoods are included in the boundaries of the Downtown Area.

Foremost, Downtown is known as a commercial hub along Shattuck near BART, and extending along Shattuck and University Avenues. These commercial areas have largely retained a "main street" character where storefronts are built to the street.

Many Downtown buildings are "mixed-use" with residential units or office space above retail shops or other street-level uses. Some mixed-use buildings have been built recently, while others are older and contribute to Downtown's historic character.

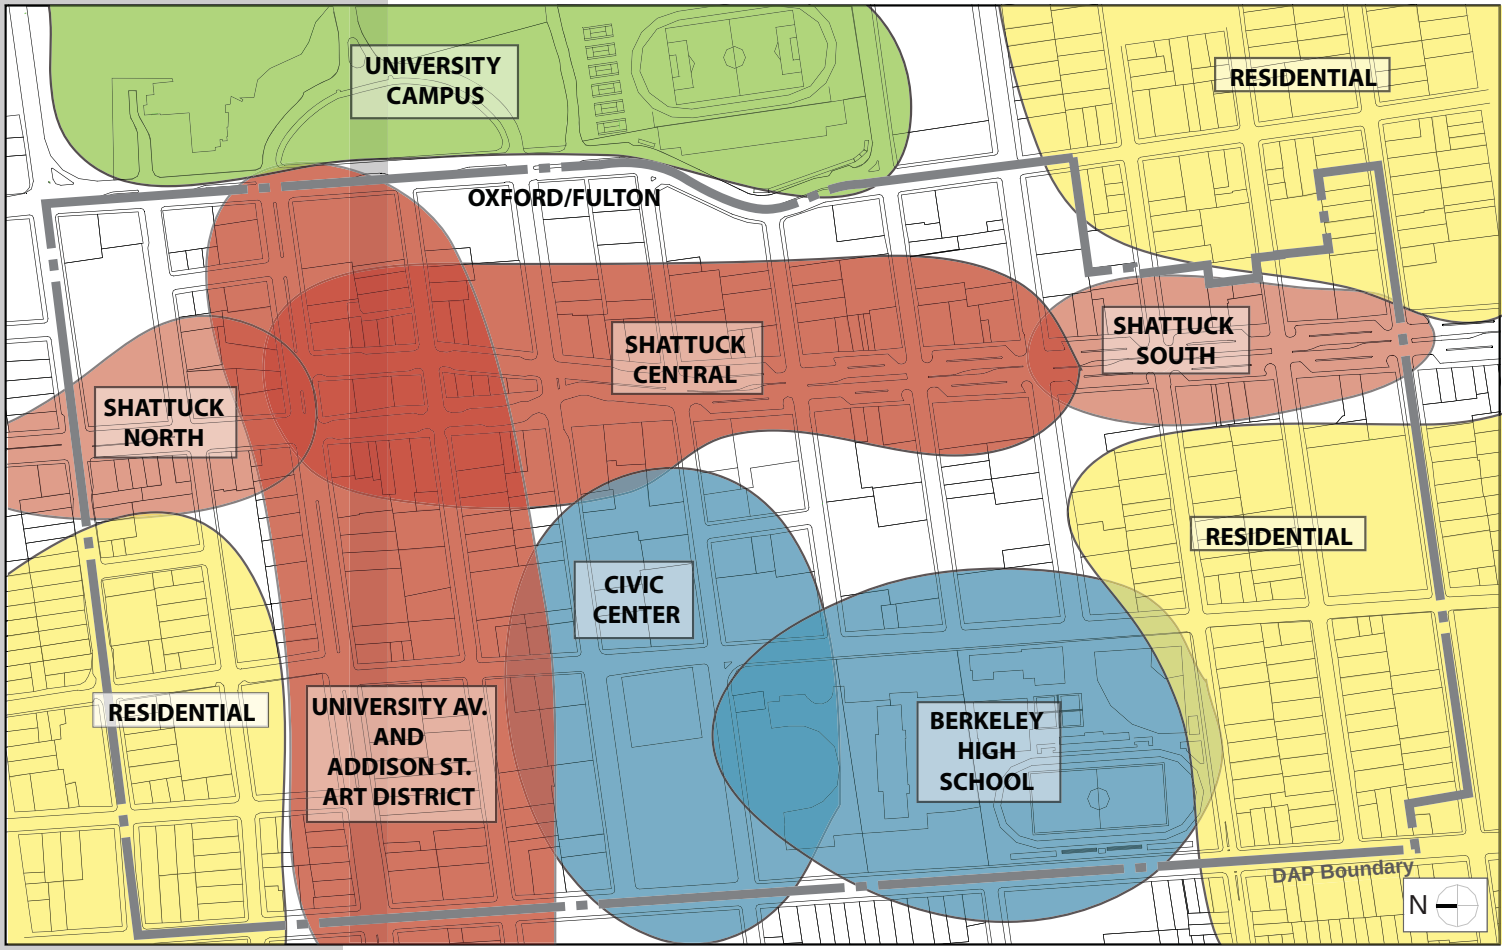
While Downtown has long been a cultural center recent efforts have cultivated a regionally recognized "Arts District" that includes an especially high concentration of live theaters and music venues along Addison Street. A cluster of cinemas, near Shattuck and Kittredge, and a growing number of museums continue Downtown's identity as a cultural center.

Downtown is also a major employment center. Office space occupies the upper floors of many buildings, and a range of commercial uses occupy most ground floors. Additions and renovations have modernized office space in many older buildings. New space is more limited, particularly full-service professional, or "Class A," office space. In its entirety, the Downtown Area makes up 168 acres. Private- and institutionally-owned parcels comprise 113 acres within the Downtown Area. Among these parcels, approximately 27 acres have been identified as potential "development opportunity" sites. These sites are comprised of vacant lots, surface parking lots, one-story buildings, and two-story buildings near BART (see Figure IN-5: Potential Development Opportunity Sites). Two-thirds of Downtown Area parcels are occupied by more substantial buildings and unlikely to experience change in the 20 year time frame of the DAP.

There are several major institutions in and immediately adjacent to the Downtown Area. Just east of Downtown is the main campus of UC Berkeley. The University owns several properties in Downtown, most on the blocks immediately adjacent to campus, including the former

FIGURE IN-6: Existing Subareas

Depicted informally here, the Downtown Area is comprised of several subareas -- each having special characteristics and issues to address.



California Department of Health Services site. The University also owns and plans development on other key sites on or near Oxford Street.

Near the western edge of Downtown lies Berkeley High School and the largest open space in the Downtown Area, Civic Center Park. Other major civic uses line other sides of the Park, including two City administration buildings and, on the west side of Martin Luther King Jr. Way, Old City Hall. North of Civic Center Park lies Veterans Memorial Hall, the YMCA youth center, and government offices. Many community-serving uses line Allston Way, including the YMCA, Berkeley High School, and Post Office. Berkeley's Central Library offers a large collection on Kittredge Street. Berkeley City College serving 5,300 students is located on Center Street.

Herrick Hospital is another important institution at the southern edge of the Downtown Area, and offers some health services as part of the larger Summit/Alta Bates medical system. Many small medical offices are in its vicinity.

Apartments can be seen throughout Downtown, often above commercial uses. At its southwest and northwest corners, the Downtown Area also includes blocks that are exclusively residential, comprised of single-family homes and apartments. Many apartment buildings in these areas were converted from former single family homes.

Retail. A downtown's vitality is largely defined by its retail environment. At one time, Berkeley was a major regional retail center, attracting people from many East Bay communities to its department stores and specialty shops. But Berkeley's retail sector declined as its department stores migrated to locations that offer easy access by car, as has been the case for American retailers generally. Downtown's mix of retail has since tilted toward neighborhood-serving shops and shops that carry retail goods that attract all Berkeleyans has declined.

Special factors can maintain urban centers as viable regional destinations, however. Downtown San Francisco continues to be a strong draw because of its preeminent regional location and superior transit service. Downtown Santa Rosa, San Diego and Pasadena and Walnut Creek have also retained department stores, but only through the use of mostly inward-looking shopping malls that resulted from aggressive redevelopment efforts.

Downtown Berkeley offers a very different retail environment from the malls, homogenized chain stores, and big-box retailers that have dominated retailing over the past 30 years. Downtown Berkeley must build on its unique characteristics and inherent strengths to distinguish itself as a retail destination. Downtown offers restaurants, bookstores, cinemas, live theater and other cultural uses that regularly draw people from other communities. Downtown can also capitalize on the proximity of the University's staff and students. Finally, increasing the number of Downtown residents can provide an essential base of support for businesses – including those with a larger regional clientele.

Downtown Berkeley can also promote itself by being an interesting and welcoming place to be, such as by having beautiful streets, inviting plazas, and public art. It can distinguish itself by using green infrastructure, like rain gardens and permeable pavers, and by maintaining a sense of history. Urban places also succeed when the offer a sense of community. Any downtown should be a great place to people watch, meet friends, and enjoy events.

Employment. Downtown continues to be a major employment center that offers professional

and personal services, serves the community with health and government services, houses functions relating to UC Berkeley, and maintains retail and other commercial activities. Because the retail at street-level is largely built out, employment related to retail is not expected to grow significantly. Office growth can be expected, however.

Downtown has low vacancy rates in offices, and office rents are high compared to most parts of the Bay Area. The University leases a significant amount of office space in the Downtown Area. Downtown's central and transit-oriented location also adds private demand for office space. Access to "intellectual capital" in the city and University breeds start-ups and spin-offs. In spite of this demand, Berkeley has little high-quality office space. Downtown has only two "class A" office buildings as defined by exceptional interior finishes, state of the art IT systems, high levels of security, and reception areas.

A large number of non-profit organizations find Downtown to be an advantageous. These non-profits represent a wide spectrum of concerns, such as public policy, computer and internet technologies, cultural programs, and community services.

Despite the low vacancy rate and relatively high rental rates, there has been very little office development in Downtown Berkeley for many years. State density bonuses, City policies encouraging residential development and, until recently, a very strong housing market, have made office development a less attractive option for developers. DAP building height policies and the usual swings in the market place may result in more private office development in the next 20 years than has been seen recently.

The University of California, Berkeley. UC Berkeley, the city's largest employer, has development plans that may greatly increase the amount of employment in Downtown as it builds on the vacant and underutilized sites that it owns. The University's "Long Range Development Plan" (LRDP) anticipates new construction of up to 800,000 square feet in the Downtown Area and abutting the Tang parking lot (on Bancroft abutting the DAP area). The LRDP targets the "West Adjacent Blocks" in the Downtown Area for museums, public services, and other visitor-intensive uses, along with research & development and administrative activities.

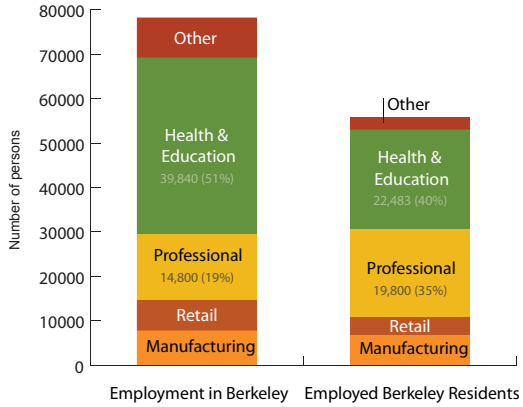


Figure IN-7: Berkeley Employment and Employed Residents. *Each day, Berkeley imports health and education workers and exports professionals. (US Census, 2000)*

While the University's growth into the surrounding city has been a source of town-gown tension (partly because the University, as a state agency, is not subject to City property taxes or regulations), the Downtown Area Plan offers a new approach to University-City relations. University students, staff and faculty already help support Downtown restaurants, cinemas and other businesses. If planned appropriately, University growth can also accelerate revitalization

in Downtown by bringing additional employees and public services – and by enhancing the look of Downtown through attractive new buildings and landscaping.

Personal and Business Services. Downtown contains many kinds of services including personal services such as hair stylists and tailors, and business-related services such as photocopying or shipping packages. These commercial service providers support both local businesses and the University.

Community Services. Many types of community services are provided in and around Downtown, and especially in the Civic Center area. The YMCA serves the community by offering a variety of programs for people of all ages and abilities. The Civic Center area also provides social services for those with physical and mental disabilities, recovering from drug and alcohol abuse, needing job skills and assistance in getting employment, and who are homeless or hungry. The array of available services attracts people with special needs to Downtown. Downtown Berkeley has a high concentration of homeless individuals relative to most places in the Bay Area.

Health Services. Herrick Hospital lies just inside the southern boundary of the Downtown Area, and is a part of the Summit/Alta Bates medical system. Herrick provides targeted services for certain illnesses, and has not been a general service hospital for many years. Health services might also be provided by the University if it implements the "Community Health Campus" envisioned in its Long Range Development Plan. As envisioned by the Plan, UC clinics that serve the general public would be built on the former Department of Health Services site, to help make services more accessible to the general public.

Cultural Uses. The arts and entertainment community play a crucial role in Downtown. Live theater, music clubs, cinemas and museums bring people to Downtown from all over the Bay Area. In addition, the University's Berkeley Art Museum & Pacific Film Archive is planned Downtown and further enhance it as a cultural destination.

Housing. Housing supplies an essential component to Downtown's economy. Local residents support – and will continue to strengthen – local businesses and cultural events. Without the freeway access that is essential for regional department stores, housing has become the foundation on which Downtown's economy must stand.

Residential Neighborhoods. Several residential blocks lay in the northwest and southwest corners of the Downtown Area. Residents have expressed their desire to maintain their scale and character of these residential areas. Downtown Area Plan policies seek to reduce development pressures in and maintain the general character of these residential areas.

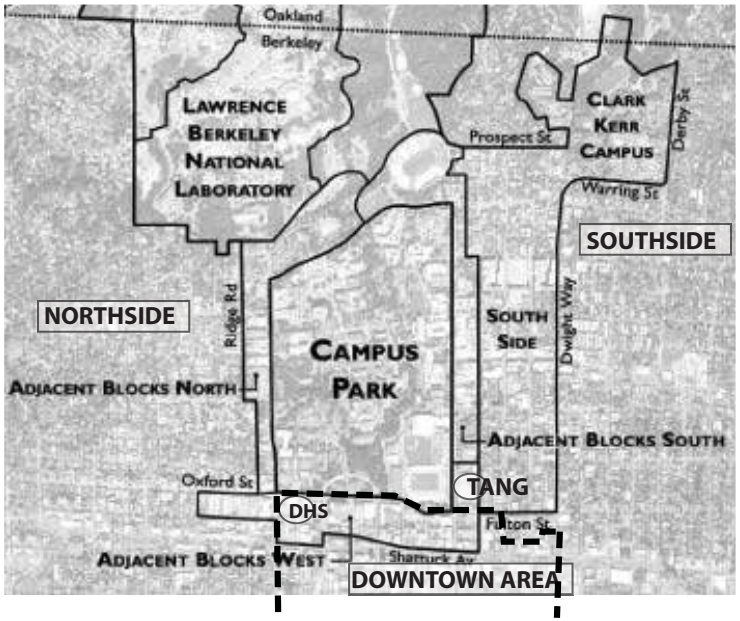
TRANSPORTATION

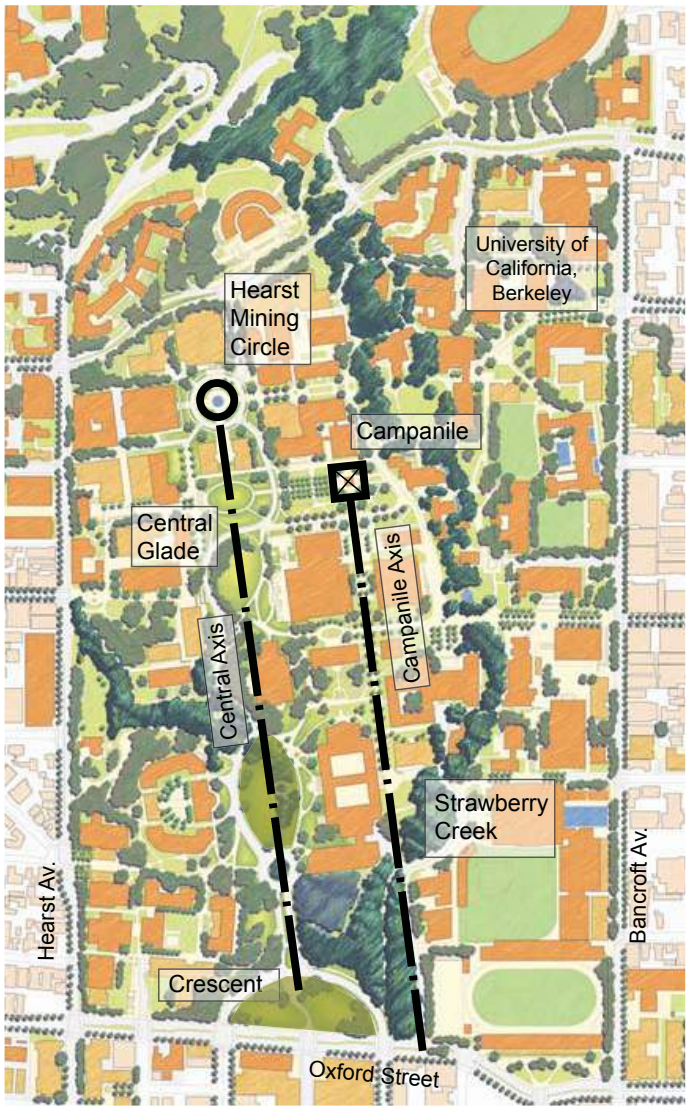
Walking is the best way to enjoy Downtown and is the dominant transportation mode for local trips and after you arrive by some other mode. The quality of Downtown's pedestrian environment promotes its position as a unique urban destination and a great place to live and work. Downtown's walking environment also helps reduce car use and corresponding greenhouse gases. Downtown residents walk more and drive less than the City as a whole. Of roughly 2,000 households in Downtown, 40 percent do not own a car.

Downtown continues to serve, as it did originally, as a major regional transportation hub where numerous buses and BART converge.

UC Berkeley's Long Range Development Plan

The University of California, Berkeley's 2020 LRDP provides a framework to shape future decisions on land use, enrollment, housing, parking, academic facilities, architecture, and landscape design. It defines the maximum potential growth of the campus through 2020 and encompasses the Core Campus (east of Oxford Street) and its surrounding environs – including the "West Adjacent Blocks" area in and adjacent to the Downtown Area. The LRDP promotes academic excellence, incorporates smart growth principles, encourages transit use, fosters state-of-the-art environmental policies, and calls for the creation of community spaces on and off campus.





40,000 daily transit trips begin, end, and connect through Downtown Berkeley. BART comprises 22,000 of those trips. Trips to and from UC Berkeley are a sizable part of transit trips. Many Berkeley residents use BART on their way to and from work – with higher transit ridership associated with residents who live closer.

Transit service also gives Downtown a unique advantage as an employment center and regional destination. Downtown's extensive transit resources, combined with transit passes for City and University employees, has resulted in very high ridership rates. Of the people who work in Downtown Berkeley (Berkeley residents and non-residents), about 15% get there on foot or by bicycle, about 35% get there using transit or in a carpool, and a little over half get there by driving.

It is the goal of this Plan, as with the previous Downtown Plan, to encourage more car users – and especially commuters – to get to Downtown a different way. For some people, however, the car remains the only practical means of getting to and from Downtown. Many people find walking or bicycling difficult. Transit options may not be nearby and bus service can be unreliable. Driving remains the easiest way for most Berkeley residents to visit Downtown for shorter trips, such as shopping or services, as well as for night-time activities. Parking will continue to play an important role in Downtown, and programs can make it more available for short-term users while encouraging commuters to use alternative modes.

DEMOGRAPHICS AND HOUSING

Downtown Berkeley continues to grow in population, becoming an increasing share of the citywide population. Berkeley's population shrank from 1970 to 1990, after which it grew slightly to reach its 1980 population level in 2000. While the City's population of about 102,000 has remained steady since 1990, Downtown's population has grown by nearly 10 percent.

Downtown's housing tends to be more affordable and occupied by households with lower incomes than the rest of Berkeley. Sixty percent of Downtown households earn less than $25,000, compared to 32 percent for Berkeley and 21 percent for Alameda County. Students tend to have lower incomes, and Downtown houses many of them. From 1990 to 2000, the number of Downtown residents under the age of 24 increased by nearly 40 percent. Families occupy only four percent of Downtown households and only four percent of Downtown housing units are owner-occupied (compared to 43 percent citywide).

In 2005, only nine percent of Downtown households earned more than $75,000 annually. While residents provide support for local businesses, most Downtown businesses also rely on employees, students and visitors.

The Association of Bay Area Governments (ABAG) estimates that Berkeley has about 20% more jobs than working residents (Projections 2007). Between 2005 and 2020, the University alone is expected to add 2,900 jobs. Because of Berkeley's jobs, its accessible location in the region, and its overall attractiveness, the demand for housing in Berkeley is likely to continue to outstrip supply. As a result of these pressures, Berkeley's housing costs are likely to remain higher than in other nearby cities. Many long time residents cannot afford to live in Berkeley without rent controls. When tenants move out, rents increase to current market-rate, and households move in with generally higher income than those moving out. Consequently, residents with modest or fixed incomes have an increasingly difficult time finding affordable housing.

State laws mandate that cities accommodate their fair share of regional housing growth. Because of expected high demand and state requirements, there will be a continuing need for Berkeley to accommodate significant growth in its housing supply. Moreover, a recent State law in relation to sustainable development patterns (SB 375) identifies meeting housing needs within existing urbanized areas near jobs and transit as one of many critical strategies to reduce greenhouse gases (GHG).

The Downtown Area Plan has made housing growth a cornerstone strategy. Increasing the number of residents will support Downtown's economic vitality, put more eyes on the street, accommodate growing demand with less impact on Berkeley's residential neighborhoods, and minimize auto use and greenhouse gases.

PUBLIC SPACES

Urban communities require attractive highly-functional public spaces. At higher residential densities, streets, plazas and small parks play a critical role in the life of a neighborhood. Public spaces offer opportunities for neighbors to meet and for recreation, thereby strengthening the fabric of community.

Faced with competition from highway-accessible commercial centers, historic downtown can remain economically relevant by offering a great urban experience provided, in large part, by exceptional streets and open spaces. In a regional economy, shoppers have myriad options, and improving Downtown's unique character is one of the critical ways that it can compete.

Berkeley's Downtown already contains a few special public places, such as the Addison Street "Poetry Walk" or, as on parts of Center Street, generous tree-lined sidewalks. Many other streets provide only narrow sidewalks, and over one-third of street segments in Downtown have no street trees. With a few exceptions, little investment has occurred in public streets and open spaces since BART was built almost 40 years ago. Public spaces need to be enhanced, maintained and feel safe if Downtown is to thrive.

The Downtown Area presents major opportunities to enhance the pedestrian environment. In several Downtown locations, traffic lanes and inefficient parking arrangements can be eliminated, and land can be repurposed for wider sidewalks, more landscaping, bike lanes, small parks and plazas, and green infrastructure. There are also improvements that can be made throughout the Downtown area, such as enhanced lighting, public art, more street trees, and the use of a consistent aesthetic that accentuates Downtown's historic setting. Public improvement strategies are described in the Streetscape and Open Space chapter, and are set forth in more detail, including financing strategies, in the "Downtown Streets & Open Space Improvement Plan".

SUSTAINABILITY

Sustainable development has been a principle of Berkeley planning for many years, and was established as a core organizing strategy for Downtown by the DAPAC. Sustainability touches every aspect of the DAP: requiring energy efficient buildings, promoting walking and transit, treating polluted urban runoff, and minimizing waste.

Downtown is also a significant resource for creating a sustainable region. The current efforts to create a Sustainable Communities Strategy for the Bay Area under the requirements of SB 375 makes clear the importance of connecting urban land use patterns and the region's transit infrastructure. Research shows that people in high-

er-density city centers with good transit drive one-third as much as people in urban neighborhoods and less than one-sixth as much as those living in suburban areas (see Figure IN-8).

Two million more people are expected to live in the Bay Area within the next in 30 years, and emphasizing growth in urban centers is a critical sustainability strategy. Urban growth near transit reduces market pressures for growth in outlying, less transit-accessible locations, and supports the preservation of open space and agricultural land.

Sustainable growth also means enhancing the character and quality of Downtown. A critical part of what makes Berkeley's Downtown a special place, is its sense of history. Care must be taken so that new development respects and enhances Downtown's historic setting – while also being authentic for the time period in which it is being built. Downtown must also be a comfortable and attractive place to live. Newer buildings must fit into the existing urban fabric in a manner that respects historic character and minimizes such impacts as shadowing on public open spaces and blank walls or wide driveways that deaden the street and conflict with pedestrian safety and comfort.

Downtown Berkeley can also distinguish itself as a leading location for green innovations. The DAP requires green building requirements and calls for ecologically beneficial features as part of street and open space improvements. Every chapter of DAP promotes sustainability, with an integrated and comprehensive approach set forth in the Environmental Sustainability chapter.

CHAPTERS OF THE PLAN

The Downtown Area Plan contains the following chapters: Environmental Sustainability (ES), Land Use (LU), Access (AC), Historic Preservation & Urban Design (HD), Streets and Open Space (OS), Housing and Community Health & Services (HC), and Economic Development (ED).

Each chapter begins with a Strategic Statement that discusses issues of critical concern and background information, followed by goals, policies and implementing actions. Goals are a general and ultimate purpose. Policies describe a guiding strategy. Implementing actions are the tools and techniques to carry out policies.

SUMMARY OF GOALS

Goals for each chapter are summarized here as a brief overview of the DAP.

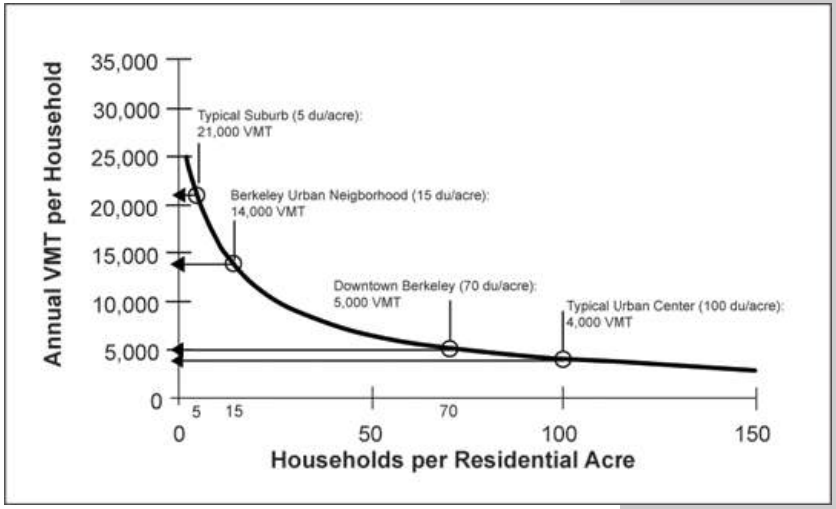


Figure IN-8: Driving and Residential Density. *People who live in high-density urban centers like Downtown drive less than people who live in other locations. Empirical research shows a consistent relationship between residential density and the household average for vehicle-miles traveled (VMT). (Adapted from research by John Holtzclaw, 2002)*

Environmental Sustainability (ES).

- Goal ES-1: Integrate environmentally sustainable development and practices in Downtown, and in every aspect of the Downtown Area Plan.

- Goal ES-2: Model best practices for sustainability and promote Downtown to businesses, institutions, and residents who are committed to environmental sustainability.

- Goal ES-3: Encourage high density, highly livable development to take advantage of Downtown's proximity to regional transit and to improve the availability of diverse walk-to destinations – such as retail, services, culture, and recreation.

- Goal ES- 4: Promote "green" buildings.

- Goal ES-5: Promote ecologically beneficial landscaping and stormwater features throughout the Downtown, to filter pollutants found in urban runoff, protect and restore the health of connected watersheds, reduce downstream stormwater flows, and express the community's commitment to environmental sustainability.

- Goal ES-6: Minimize waste generated Downtown, and strive to make Downtown a "zero waste zone."

- Goal ES-7: Continuously improve city standards and programs promoting sustainable practices.

Land Use (LU).

- Goal LU-1: Encourage a thriving, livable Downtown that is a focal point for the city and a major destination for the region, with a unique concentration of housing, jobs and cultural destinations near transit, shops and amenities.

- Goal LU-2: New development shall contribute its fair share toward Downtown improvements. Coordinate development fees and other funding opportunities with public improvements for the orderly and attractive transformation of Downtown.

- Goal LU-3: Cultivate Downtown as an attractive residential neighborhood with a range of housing opportunities, and an emphasis on affordable housing and family housing.

- Goal LU-4: New development should enhance Downtown's vitality, livability, sustainability, and character through appropriate land use and design.

- Goal LU-5: Enhance Downtown as a center for employment and innovative businesses.

- Goal LU-6: Encourage University uses in Downtown that will benefit the greater Downtown area.

- Goal LU-7: Maintain the existing scale and character of residential-only areas.

- Goal LU-8: Maintain and expand community health care facilities and social services in the Downtown area.

Access (AC).

- Goal AC-1: Improve options that increase access to Downtown on foot, by bicycle, and via transit. Make living,

working, and visiting Downtown as car-free as possible.

- Goal AC-2: Give pedestrians priority in Downtown, and make walking Downtown safe, attractive, easy and convenient for people of all ages and abilities.

- Goal AC-3: Provide parking to meet the needs of Downtown, while discouraging commuter parking and encouraging motorists to park their cars and experience Downtown as a pedestrian.

- Goal AC-4: Promote transit as an efficient, attractive choice and as a primary mode of motor-vehicle travel.

- Goal AC-5: Maintain and enhance safe, attractive and convenient bicycle circulation within Downtown, and to and from surrounding areas, for people of all ages and abilities. Promote bicycling Downtown.

Historic Preservation and Urban Design (HD).

- Goal HD-1: Conserve Downtown's historic resources and unique character and sense of place.

- Goal HD-2: Enhance areas of special character in Downtown, such as clusters of historic resources.

- Goal HD-3: Provide continuity and harmony between the old and the new in the built environment.

- Goal HD-4: Improve the visual and environmental quality of Downtown, with an emphasis on pedestrian environments that are active, safe and visually engaging. Encourage appropriate new development Downtown.

- Goal HD-5: Enhance and improve the physical connection between Downtown and the University of California.

Streetscapes and Open Space (OS).

- Goal OS-1: Enhance public open spaces and streets to benefit pedestrians, improve Downtown's livability, and foster an exceptional sense of place. In particular, create new public gathering places that support nearby uses and Downtown as a destination.

- Goal OS-2: Promote watershed health through the use of ecologically beneficial landscaping and other features. Incorporate natural features throughout Downtown to improve its visual quality, help restore natural processes, and reinforce berkeley's commitment to environmental sustainability.

- Goal OS-3: Streets and open space improvements, maintenance, and cleaning should be adequately funded. Require that new development contribute to greenery and open space.

- Goal OS-4: Ensure that parks, plazas, streets, walkways, and other publicly accessible open spaces are safe, comfortable, and inviting.

Housing and Community Health & Services (HC).

- Goal HC-1: Encourage Downtown as a thriving, livable, diverse residential neighborhood with a mix of supportive uses.

- Goal HC-2: Maintain good quality of life for residents of all ages during the day and at night in Downtown and in surrounding residential areas.

- Goal HC-3: Offer diverse housing opportunities for persons of different ages and incomes, households of varying size, and persons of varying abilities. Give Downtown a significant role in meeting Berkeley's continuing need for additional housing.

- Goal HC-4: Preserve existing affordable housing Downtown, and expand the supply of affordable housing to low-income, very low-income and working-class households in Downtown.

- Goal HC-5: Deliver in Downtown effective and compassionate services for seniors, parents and youth, and persons with special needs, including individuals who are homeless, have physical and/or mental disabilities, and/or suffer from substance abuse.

- Goal HC-6: Provide a safe, clean and attractive Downtown, in partnership with the community.

- Goal HC-7: Maintain and expand integrated health services available in Downtown to address health inequities.

Economic Development (ED).

- Goal ED-1: Serve the needs of the neighborhood and the city. Make Downtown a more attractive regional destination, by building on Downtown's unique blend of cultural, historic, entertainment, art, educational, and community institutions – and by promoting successful retail businesses and other attractions with daytime and nighttime populations to support them.

- Goal ED-2: Maintain safe and inviting streets, parks & plazas that contribute to the success of businesses and the well-being of residents.

- Goal ED-3: To make Downtown more attractive and economically successful, encourage place-making through the preservation of historic buildings, street and open space improvements, and high-quality new construction.

- Goal ED-4: Ensure that UC Berkeley is a partner in promoting a healthy and vital Downtown.

- Goal ED-5: Incorporate sustainable practices as an essential component of economic development, and establish Downtown as a recognized center for businesses and institutions that are committed to environmental sustainability.

- Goal ED-6: Invest in civic improvements (such as streets, open spaces, and community facilities) to enhance Downtown as a place to live, work, and visit.

- Goal ED-7: Promote Downtown as a regional cultural center and visitor destination.

- Goal ED-8: Increase the number of Downtown jobs that go to Berkeley residents, and support the development of

job skills for Berkeley residents – especially Berkeley's youth.

- Goal ED-9: Encourage local businesses that represent the city's diverse ethnic, cultural and income groups.

- Goal ED-10: Serve the housing needs of all income groups and provide a growing base of residents who support a broad range of Downtown retail and other businesses.

- Goal ED-11: Provide access to Downtown, which supports retail, restaurants, entertainment, hotels and cultural uses.

- Goal ED-12: Invest resources Downtown to support City goals and to improve and maintain a high quality of environment.

PLAN IMPLEMENTATION

Upon adoption, the DAP will replace and cover a larger area than the current Berkeley Downtown Plan (adopted in 1990). In addition, the Downtown Area Plan adoption was accompanied by General Plan amendments.

Each DAP chapter contains many implementing actions. Of note are four major implementing initiatives.

Revised Zoning Provisions. New zoning provisions translate DAP policies into standards appropriate to Berkeley's urban mixed-use city center. New zoning addresses community character (or "form-based") considerations with provisions for building envelopes, active street-frontages, on-site open space, while retaining appropriate flexibility regarding use. Measurable standards facilitate administrative review and allow discretionary review to focus on issues for which public debate is essential.

Amended Downtown Design Guidelines. The Downtown Design Guidelines adopted in 1994 provided excellent guidance on ways that buildings should face streets in order to reinforce Downtown's "Main Street" character. Additions seek to encourage new development that respects historic assets, minimize impacts from taller buildings, further emphasize pedestrian-oriented design, and consider sustainable design in the context of Downtown.

Streets and Open Space Improvement Plan (SOSIP). A "Streets and Open Space Improvement Plan" provides schematic designs for major improvements and guidelines for improvements that can be made throughout the Downtown Area. The SOSIP sets near-term priorities and is accompanied by financing strategies.

Parking and Transportation Demand Management (PTDM). "Parking and Transportation Demand Management" programs encourage transit and other alternatives to the car, as well as more effective use of parking. Appropriate pricing will make parking more available for retail patrons and other short-term visitors, while discouraging its use by all-day commuters who have other travel options.

2 - ENVIRONMENTAL SUSTAINABILITY

2. ENVIRONMENTAL SUSTAINABILITY

STRATEGIC STATEMENT

A sustainable society is one that satisfies its needs without diminishing the prospects of future generations. – Lester Brown, Founder and President, Worldwatch Institute

Sustainability is the capability to equitably meet the vital human needs of the present without compromising the ability of future generations to meet their own needs by preserving and protecting the area's ecosystems and natural resources. – American Planning Association

Definitions of sustainability address the essential need for maintenance of a healthy, vibrant, and ecologically functional planet into the future. To do this, sustainability must address ecological health, environmental health, economic health, and a community's social health comprehensively.

Sustainability constitutes the central vision and overarching framework for the Downtown Area Plan (DAP). Global imperatives such as climate change, increasing scarcities, and degradation of natural resources – and local demands for more livable, healthful, and equitable communities – make sustainability an essential concern.

Facing Page: *Environmental Footprint. Residents and workers in Downtown's walkable transit-rich location will generally use less energy, water, and other resources than those who live in less dense areas. Staff photo.*

The concept of sustainability reflects Berkeley's values. Berkeley's General Plan emphasizes sustainability, as has Berkeley's socially and environmentally progressive history. Eighty percent of Berkeley's voters endorsed Measure G, which is the foundation for Berkeley's award-winning Climate Action Plan and calls for an 80% reduction in local greenhouse gas emissions by 2050.

The DAP plays a vital role in meeting Berkeley's future needs in ways that minimize our impact on ecological systems and the world as a whole. It translates broad concepts for sustainability into specific strategies and actions for getting the following results.

1) Reduce net energy consumption and greenhouse gas emissions:

   - Make it easier for people to walk, bike, and use transit.
   - Promote energy efficient building design.
   - Use state-of-the-art green building construction.
   - Retrofit existing buildings with new windows and insulation, and energy efficient appliances.
   - Generate renewable energy using photovoltaics, rooftop wind turbines, and other emerging technologies.
   - Shift consumption toward locally generated goods and services.
   - Support transit-oriented development.
   - Improve Berkeley's jobs-housing balance.

2) Conserve water and help restore ecological systems:

   - Increase the number of street trees and promote other landscape features;
   - Use green infrastructure, like permeable paving and bio-retention basins, to capture and filter runoff, recharge aquifers, and steward Berkeley's watersheds; and
   - Minimize water use with drought-tolerant landscaping, low-flow appliances, and water recycling.

3) Minimize waste:

   - Expand convenient reuse and recycling opportunities.
   - Emphasize goods and construction that are resource-efficient.
   - Encourage the retention of historic resources and the adaptive reuse of buildings.

4) Support economic development and the health of community members:

   - Offer an appealing place to live, work, learn and visit.
   - Keep business and building operating costs low.
   - Make Downtown a model for green business and environmental practices.
   - Promote Downtown as an advantageous place to visit and conduct business.
   - Create a highly livable place that supports social needs and features beautiful streets, parks, and architecture.

A sustainable Downtown must be "green" not only in appearance, but also in its ability to help regenerate the natural systems with which it is intertwined. Downtown's buildings, streets, plants, and activities have profound impacts locally and beyond, in terms of water and air quality, resource conservation, and reduced consumption of non-renewable energy. A sustainable Downtown will not only include an abundant tree canopy, attractive landscaping and open spaces, but also land uses and public improvements that promote walking, innovative technologies for buildings and transportation, transit-oriented intensities, and the minimization of waste and harmful activities.

KEY ENVIRONMENTAL COMPONENTS AND THEIR BENEFITS

Sustainable cities provide for a broad range of factors that, as an integrated whole, support healthy, functional ecological relationships. Sustainable urban areas enjoy lasting environmental, economic, and social benefits. The DAP incorporates protections and enhancements for the natural systems to which Downtown is connected.

Greenhouse Gas Emissions. Global climate change is arguably the defining environmental issue of this century. The City developed and adopted a Climate Action Plan after Berkeley voters overwhelmingly approving Measure G in 2006. Measure G set a target of reducing greenhouse gas emissions 80% by the year 2050.

Goals, policies, and implementing actions contained in the DAP are expected to make significant contributions to meeting Measure G targets and Climate Action Plan objectives. The transit-oriented location and pedestrian-supportive

form of development promoted by the Downtown Area Plan will reduce per-capita transportation-related greenhouse gas generation for new residents, and contribute to the City's greenhouse gas reduction goals. DAP policies also promote the preservation and reuse of existing buildings, which avoids greenhouse gases associated with new construction. DAP policies also require new construction that incorporates cutting-edge design and technologies for reducing energy use, conserving water, and avoiding waste.

Transit-Oriented and Pedestrian-Supportive Development. Transportation is the single largest contributor to Berkeley's greenhouse gas emissions, accounting for roughly half of emissions.

Walk-to destinations (such as shops, services, and amenities) and easy access to transit make downtowns a place where residents, workers, and visitors can navigate easily on foot, thereby minimizing the use of GHG generating automobiles. For travel into and out of Downtown, transit service must be frequent and reliable. Higher densities support transit use and the availability of walk-to conveniences.

Energy and Resource Efficient Buildings. The United Nations Environment Program has estimated that 30-40 % of global energy is consumed when operating buildings. Appropriate regulations, energy saving technologies, and behavioral change can substantially reduce energy and greenhouse gas impacts resulting from buildings. For heating and cooling, energy benefits can be obtained in a variety of ways, including: super insulation, efficient mechanical systems, passive solar features (for winter), shading devices (for summer), and natural ventilation using operable vents and windows. For lighting, energy can be saved with low-energy fixtures and interior "daylighting" from windows, skylights, and light shelves to bounce sunlight into interior spaces. Photovoltaic and wind technologies are regularly incorporated into new buildings to generate energy and offset greenhouse gases.

Green buildings also improve the health and well-being of occupants. Research links health and productivity with indoor air quality, lighting levels, and an ability to control air flow and temperature, such as with operable windows.

Urban Forest. Downtown Berkeley needs more trees. Trees have significant environmental, aesthetic, and economic benefits. Shaded streets are significantly cooler on summer days. Air quality authorities promote urban tree planting programs to reduce the heat absorbed by unshaded asphalt and other high-temperature "heat islands." Heat islands make urban places less comfortable, but also increase the rate at which nitrogen oxides reacts with airborne pollutants to generate ozone – further contributing to the generation of smog and the incidence of respiratory ailments. Street trees also play a major role in enhancing Downtown's character and charm – and will help give Downtown an exceptional sense of place.

Urban Runoff. Urban runoff includes the rainwater and other water that runs off of streets and carries pollutants, like motor oil, tire debris, and litter. Urban runoff is the largest source of degraded water in the Bay Area. Increased urban runoff is a direct consequence of unmitigated urban development and where hard impervious surfaces flush rooftops and streets directly into stormsewers.

"Green infrastructure" refers to a menu of techniques that filter pollutants before they reach the culverts that carry them to receiving water resources such as the Bay, and to other techniques for reducing the amount of paved space that can capture and concentrate pollutants. Paving can be permeable to trap pollutants and

Brower Center and Oxford Plaza

Downtown's Oxford Plaza and Brower Center project makes extraordinary environmental and social contributions. Oxford Plaza, the southern half of the project, offers nearly one hundred new low- and very low-income units that are sized and designed for families. The David Brower Center, named for the first executive director of the Sierra Club, houses and supports world-class environmental organizations and conferences. It utilizes the latest in energy-saving technologies and recycled building materials. The US Green Building Council gave the project that group's highest rating for green buildings: LEED Platinum. Completed in 2009, the project received ABAG's "Growing Smarter Together" Urban Design Award.

David Brower Center from Oxford Street

slow runoff. In several Downtown locations, paving can be reduced by eliminating unneeded traffic lanes. Vegetation and soils can filter and hold stormwater. Swales and other surface drainage can complement the stormwater pipes now in existence. Such features are becoming commonplace as standards for stormwater quality become progressively more stringent.

Green strategies can also help reduce downstream flooding. Until recently, standard practice has focused on "conveyance": moving water into a network of pipes and delivering it rapidly to a river or bay. Because water moves swiftly within a conveyance-based system, little lag time occurs between when it rains and when that rainwater reaches locations prone to flooding. Green approaches to stormwater management create a decentralized stormwater network that holds water back close to its source, and delays its progress downstream.

Water Conservation and Recycling. Downtown can help conserve water resources, for which there will be increasing competition statewide. For landscaped areas, drought resistant plants and low-water irrigation are essential. Conservation techniques available for buildings include using low flow fixtures and reusing shower water or other "graywater" for flushing.

Zero Waste. Berkeley's City Council has adopted a goal of reducing the waste that goes to landfills to zero by 2020. Reducing waste sent to the landfills reduces the miles traveled by refuse trucks and reduces the amount of methane gas (a greenhouse gas) that is generated by decomposing waste. In addition, as more waste is recycled into new products, less the energy is generally needed to produce that product. For every ton of mixed waste that is recycled, over two tons of greenhouse gas emissions are avoided.

Coordination. To be effective, environmental policies will require comprehensive and coordinated strategies. City departments will need to work together to implement on interrelated policies, crossing over traditional boundaries and specialties. Developers and other stakeholders will also play pivotal roles, as private capital will be needed to attain many needed improvements.

Upfront Costs versus Long-Term Savings. Increased cost of green design is typically offset by saving elsewhere, for example in reduced cost of heating, lighting, water, and waste management. Green buildings typically require greater up-front capital costs while reducing ongoing operating costs. Since the first years of a project present the highest financing costs and project risks, builders often emphasize near-term capital costs instead of long-term savings associated with reduced use of energy, water, and other resources. For public and private investments alike, a "life-cycle" approach is needed to realize long-term cost savings associated with energy efficiency, reduced waste, and other green actions, and to consider these savings when facing up-front capital costs.

GOALS, POLICIES & ACTIONS

GOAL ES-1: INTEGRATE ENVIRONMENTALLY SUSTAINABLE DEVELOPMENT AND PRACTICES IN DOWNTOWN, AND IN EVERY ASPECT OF THE DOWNTOWN AREA PLAN.

Policy ES-1.1: Sustainability as Comprehensive. Improve the environmental performance of Downtown Berkeley. Consider and develop programs for environmental sustainability in a comprehensive way to: reduce the generation of greenhouse gases, minimize the use of non-renewable resources, minimize impacts on affected ecosystems, improve public health, promote social equity, and communicate Berkeley's commitment to sustainability.

a) Create a checklist of actions for promoting sustainability Downtown, consistent with this chapter, Berkeley's Climate Action Plan, and other City policies. Accompany this checklist with priorities for implementation, potential funding/ resources, and measures for performance.

GOAL ES-2: MODEL BEST PRACTICES FOR SUSTAINABILITY, AND PROMOTE DOWNTOWN TO BUSINESSES, INSTITUTIONS, AND RESIDENTS WHO ARE COMMITTED TO ENVIRONMENTAL SUSTAINABILITY.

Policy ES-2.1: Promote a Green Downtown and Model Best Practices. Promote Downtown as a model of sustainability and a place that will attract visitors who want to see how "green" a city can be. Increase public awareness of environmental features and programs Downtown.

a) Model best practices applicable to urban centers. Encourage "state-of-the-art" features and programs within public and private projects.

b) Develop literature and internet pages to promote public awareness of sustainability features.

c) Develop an interpretive signage program to heighten awareness of Strawberry Creek, drainage patterns, natural areas, and sustainability features in Downtown.

d) Create educational programs that highlight best practices for sustainability, including: green buildings, transit-oriented-development, adaptive re-use, and pedestrian and bicycle facilities and amenities. Consider establishing walking tours to highlight sustainability features and the idea of "nature in the city" (such as by offering tours of songbird or butterfly habitat, examining the effects of trees and vegetation on microclimate, or considering fish habitat in Strawberry Creek).

Policy ES-2.2: Green Businesses & Institutions. Encourage new "green businesses" and institutions to locate Downtown, and existing businesses and institutions to go "green."

a) Promote environmental business practices to reduce energy use, reduce water use, and increase recycling and composting, as provided in this chapter.

b) Promote Downtown as a recognized location for businesses and institutions that are committed to environmental sustainability, by working with developers, real estate brokers, local companies, the University of California, the Convention and Visitors Bureau and the Downtown Business Association.

c) Develop a marketing plan to attract green enterprises by highlighting Berkeley's reputation for innovation, Downtown's transit-accessible location, and green practices that will be implemented.

d) Encourage Downtown businesses to be certified under Alameda County's green business program.

e) Work to attract East Bay Green Corridor Partnership uses to Downtown (see Policy LU-6.3).

Policy ES-2.3: Local Food & Businesses. Promote strategies that connect Downtown residents, businesses and visitors with local sources of products, services, and healthful foods (see Policies ED-5.3).

a) Retain and expand farmers markets in the Downtown Area. Support organizations that promote farmers markets, "community supported agriculture," and buy-local initiatives. Work with farmers' market providers to explore opportunities to serve Downtown on more days of the week.

b) Review City regulations and procedures to identify obstacles to sidewalk produce stands and consider eliminating such obstacles.

Policy ES-2.4: Downtown Energy & Water Facilities. Consider sustainable infrastructure that serves several parcels or blocks in Downtown and abutting areas.

a) Consider creating a local electrical "cogeneration" facility to heat buildings with energy that is usually wasted when generating electricity.

b) Consider ground-source heat pumps for heating and cooling multiple buildings in Downtown.

c) Consider integrating management of energy systems among multiple buildings to optimize use.

d) Consider incentives and institutional cooperation to promote greywater recycling systems that serve multiple properties and/or the larger Downtown Area.

e) Offer Downtown businesses and residents energy conservation auditing and advice on energy retrofits at little or no cost, possibly in cooperation with PG&E.

Policy ES-2.5: Environmental Leadership. The City of Berkeley should demonstrate leadership in environmental sustainability through its own actions.

a) Promote the highest possible standards for architectural and green design.

b) Conduct design competitions and intensive design explorations to help achieve the highest possible standards for architectural and green design.

c) Make "green infrastructure" improvements to enhance stormwater quality and watershed health (see policies under Goals ES-5 and OS-2).

d) Evaluate the performance of City buildings in the Downtown Area, and formalize a program to continue energy- and water-conserving retrofits for such buildings.

e) Develop and adopt a model program to certify City facilities, both owned and leased, for green building operations and maintenance.

f) The City should encourage property owners from whom it leases space, to make water and energy efficiency improvements. Consider establishing standard lease agreement provisions.

g) The City-owned Berkeley Way parking lot should become a "super-green" affordable housing project with zero net energy use (with enough energy generated on-site to cover on-site energy used), while simultaneously avoiding a reduction in off-street parking spaces in the area (see Policy HC-4.2).

GOAL ES-3: ENCOURAGE HIGH DENSITY, HIGHLY LIVABLE DEVELOPMENT TO TAKE ADVANTAGE OF DOWNTOWN'S PROXIMITY TO REGIONAL TRANSIT AND TO IMPROVE THE AVAILABILITY OF DIVERSE WALK-TO DESTINATIONS – SUCH AS RETAIL, SERVICES, CULTURE, AND RECREATION.

Policy ES-3.1: Land Use. Encourage development with high intensities close to transit, and encourage a mix of uses that allows most needs to be met on foot (see policies under Goal LU-1).

Policy ES-3.2: Streets & Open Space. Make major enhancements and additions to sidewalks, parks, plazas, midblock pedestrian walkways, streets, and other open space, and incorporate ecologically beneficial features (see Streets & Open Space chapter).

Policy ES-3.3: Urban Design. Encourage exceptional, high-quality new architecture, and minimize noise, wind, glare and other impacts from development (see policies under Goals ES-4, LU-4 and HD-4).

Policy ES-3.4: Alternative Modes. Enhance and expand transit service, walking and bicycle use, as an alternative to the use and ownership of private vehicles (see Access goals and policies.)

Policy ES-3.5: Pedestrian Priority. Streets and other public improvements and programs, should give pedestrians priority in Downtown (see Access goals and policies).

GOAL ES- 4: PROMOTE "GREEN" BUILDINGS.

Policy ES- 4.1: Energy and Environmental Performance. Require environmentally sustainable "green" building with public benefits in all cases, except when "green standards" would discourage historic rehabilitations or adaptive reuse of existing buildings. Promote highly energy-efficient buildings and on-site energy generation through design and construction techniques. Buildings should have exceptional environmental performance across the full spectrum of concerns (as described in Policies ES-4.2 to

ES-4.9). Coordinate Downtown initiatives with citywide provisions.

a) Require energy performance of LEED Gold or equivalent in all new non-UC buildings and substantial additions, except for historic rehabilitations and adaptive re-use of existing buildings. (LEED is the US Green Building Council's "Leadership in Energy and Environmental Design" program.) Provide incentives and programs for even greater energy and environmental performance, with LEED Platinum as a goal. Allow projects that are LEED Platinum, and "net-zero" projects that generate as much energy as they use, to defer building permit fees.

b) Meet Title-24 energy requirements and any local green standards adopted by Council. Require commercial properties to use management tools that track building energy use and benchmark performance. Energy efficiency provisions should vary by building type, in recognition of the unique opportunities and constraints associated with each. Describe preferred development practices through amendments to the Downtown Design Guidelines. Factors to consider include but are not limited to:

   - reuse of buildings or portions of buildings;
   - super insulated walls, windows, and doors;
   - daylighting interiors;
   - passive solar heating;
   - efficient appliances and equipment;
   - making the use of stairways a more inviting alternative to the use of elevators;
   - "smart-metering" to capture detailed energy usage information about a building or unit, and communicate it to occupants; and
   - credit for energy performance features not recognized by Title 24 - such as the use of natural ventilation and providing on-site renewable energy generation.

c) Encourage UC Berkeley to go beyond its LEED Silver standard in its Downtown projects and continue its practice of outperforming California's Title 24 by a minimum of 20%.

d) Development projects should pay an impact fee to fund the Streets & Open Space Improvement Plan (SOSIP), and provide public-serving on-site open space or pay an in lieu fee for SOSIP improvements. (See policies under Goal LU-2 and OS-1.)

e) Procedures for verifying compliance and penalties for non-compliance should be developed, and returned to City Council for consideration before its adoption of zoning provisions to implement the DAP. With the approval of the City Council, specific requirement thresholds may be adjusted after further analysis, if significant contributions are maintained.

f) Green building requirements may be waived to encourage historic rehabilitations and adaptive reuse of older buildings (see Policies LU-2.1, LU-4.3 and HD-4.2).

Policy ES-4.2: Alternative Modes. Modify development standards to promote alternatives to the automobile by providing car share and bicycle facilities, transit passes for residents, and parking regulations that favor alternative modes, as are described in policies under Goal AC-1.

Policy ES-4.3: Water Conservation, Reuse & Retention. Promote best practices for substantial water conservation, re-use, & retention as part of new construction, renovations, site improvements, and landscaping.

a) Require on-site water conservation and stormwater retention features, and establish development incentives for performance in this area.

b) Development projects should generate no new net rainwater runoff.

c) Work with East Bay Municipal Utility Districts to provide incentives for the installation and/or replacement of water fixtures for greater efficiency.

d) Encourage the use of innovative water conservation technologies, such as waterless urinals and water reuse, through the development of local guidelines and/or alternative building code requirements.

e) Encourage cisterns and devices to retain and make use of rainwater (see policies under Goals ES-5 and OS-2).

f) Encourage water recycling through the use of graywater for flushing toilets, irrigation, and other purposes, by working to reform existing regulations that may discourage such practices, and by developing guidelines to illustrate opportunities and design considerations.

Policy ES-4.4: Green Materials. Encourage use of environmentally preferable materials for building construction and maintenance to: maintain healthful indoor air quality; reduce exposure to harmful materials during their production; install and dispose; protect threatened & endangered species; and reduce consumption of natural resources.

a) Establish building requirements and/or incentives for performance in these areas.

b) Inform builders and landowners of standards and guidelines for preferable construction products, such as those developed by LEED, Green Seal, Stopwaste, and the Healthy Building Network.

c) Encourage reused, reclaimed or recycled materials, and responsibly-harvested wood products, such as those certified by the Forest Steward Council (FSC). Provide builders with information on these options.

d) Encourage preferable construction materials by developing a new “green building materials checklist” for Downtown projects. Consider creating a “worst in class” list of materials to avoid. Consider incentives for construction projects that conform significantly to this checklist.

e) Inform building owners and managers of standards and guidelines for preferable maintenance products and operations, such as integrated pest management, and environmental purchasing and waste reduction strategies.

Policy ES-4.5: Noise. Evaluate and strengthen noise mitigation measures as appropriate to Downtown’s active mixed-use environments (see Policy HC-2.2).

Policy ES-4.6: Longevity. Promote long-lasting buildings and features that require less frequent maintenance or replacement.

a) Continue to apply the Downtown Design Guidelines provisions that encourage architectural and site features that are durable materials and detailed to be long lasting.

b) Provide public education and technical assistance to encourage private builders to factor mid- and long-term "life-cycle costs" in the design of buildings. Green buildings generally have lower on-going operating costs that should be factored when considering up-front capital investments for green features.

c) Encourage life-cycle analysis of long-term maintenance and replacement costs for building and site features, such as by making such an analysis part of a new "green" building material checklist.

Policy ES-4.7: Solar & Wind Impacts. Design and locate new buildings to avoid significant adverse solar- or wind-related impacts on important public open spaces (see policies under Goals LU-4 and HD-4).

Policy ES-4.8: Adaptive Reuse. Encourage adaptive reuse of older buildings by promoting their rehabilitation, and by allowing intensification of the site where appropriate (see Policies ES-4.1, LU-2.1 and LU-4.3).

Policy ES-4.9: Green Pathway Development Review Process. Establish a voluntary "Green Pathway" development review process that would provide a streamlined permit process for buildings that move beyond the new "green" development requirements, by providing extraordinary public benefits that could not otherwise be obtained. Green Pathway projects shall conform with building height standards described in the Land Use chapter. Zoning associated with the Green Pathway shall assure adequate mitigation of air quality, noise, and short-term construction impacts, as well as the possible disturbance of archeological resources.

GOAL ES-5: PROMOTE ECOLOGICALLY BENEFICIAL LANDSCAPING AND STORMWATER FEATURES THROUGHOUT THE DOWNTOWN, TO FILTER POLLUTANTS FOUND IN URBAN RUNOFF, PROTECT AND RESTORE THE HEALTH OF CONNECTED WATERSHEDS, REDUCE DOWNSTREAM STORMWATER FLOWS, AND EXPRESS THE COMMUNITY'S COMMITMENT TO ENVIRONMENTAL SUSTAINABILITY.

Policy ES-5.1: Stormwater Quality. New development and public infrastructure should provide "best-practices" to protect and improve ecological quality and functions relating to stormwater, by treating urban runoff, retaining stormwater, and attaining no net increase in runoff from Downtown (see Policies LU-2.1 and OS-2.1).

a) Address the management and retention of stormwater in a comprehensive way and recharge local aquifers to the extent feasible. Address urban runoff and stormwater quality as part of a Streets & Open Space Improvements Plan[1] (see OS-1.1). The strategy should look beyond the boundaries of Downtown to consider issues and opportunities comprehensively, and should engage the University as a partner in this process.

b) Design public improvements, including streets, parks and plazas, to include appropriate "best management practices," such

[1] *A draft comprehensive Streets & Open Space Improvement Plan (SOSIP) was developed by the SOSIP Subcommittee and has been recommended for Council adoption by the Subcommittee in September 2010.*

as for retention and infiltration of urban runoff by diverting urban runoff (which contains waterborne pollutants) to bio-filtration systems (such as landscaped swales), and infiltration areas (at-grade and/or below-grade). Specific opportunities include: streets where travel lanes might be eliminated, median strips that might be retrofitted or widened, parks, and plazas.

c) Develop design guidelines and development standards to encourage appropriate "best management practices" for urban runoff retention and infiltration as part of private and institutional development projects, by diverting rainwater to:

- landscaped retention features (such as swales or "rain gardens"),
- permeable paving,
- "green roofs,"
- below-grade "dry wells," and
- rooftop and/or below-grade cisterns.

d) Consider the use of cisterns as an emergency source of water, if East Bay Municipal Utility District (EBMUD) service is interrupted.

Policy ES-5.2: Green Infrastructure Requirements. Promote extensive landscaping and "best-practices" for landscaping that benefit and help restore natural systems throughout the Downtown area (see policies under Goal OS-2).

a) Adopt a Streets & Open Space Improvements Plan and amend the Downtown Design Guidelines to promote landscaping,

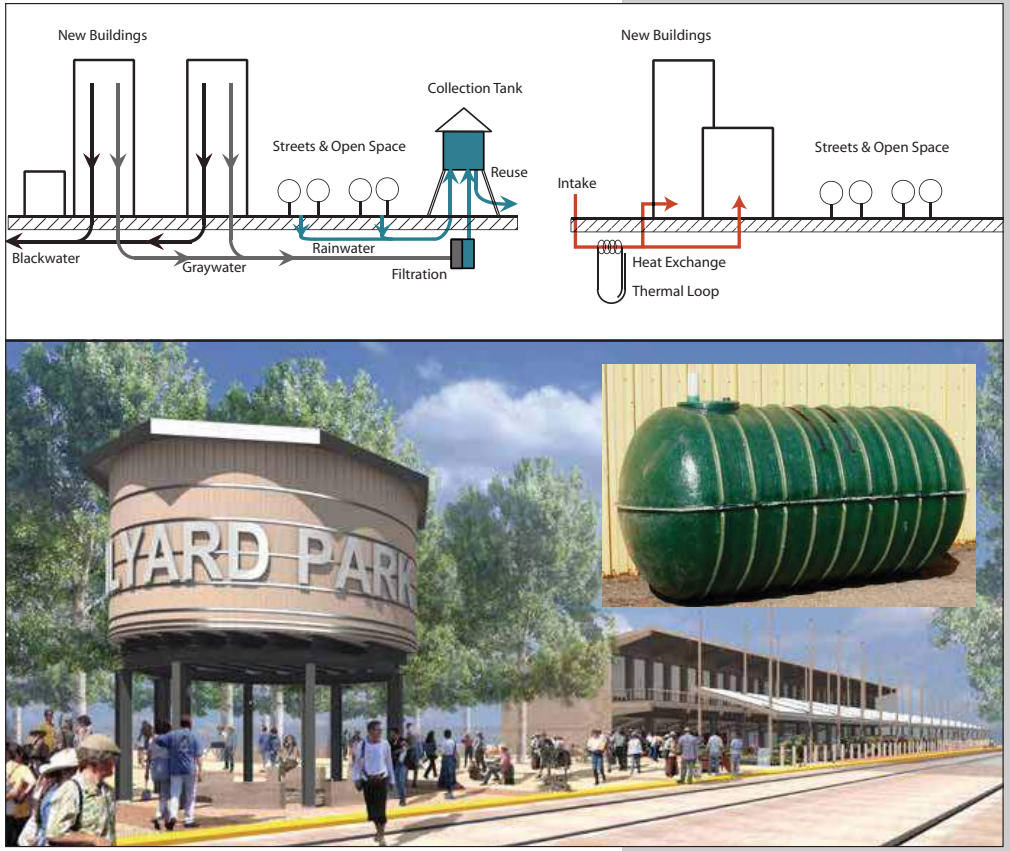

Figure ES-1: Recycling Water at a District Scale. *Santa Fe includes a network of swales, permeable paving, catchbasins, and cisterns. New Mexico's Railyard Park serves as an example of rainwater reuse on a large scale. Staff images, rendering lower left courtesy Ken Smith Landscape Architect.*

naturalized features and permeable paving (see policies under Goals OS-1 and OS-2).

Policy ES-5.3: On-Site Features. Promote beneficial landscaping and other open space features as part of private development. Adaptive reuse should be considered a significant community benefit when considering proposals for taller buildings.

a) Private development should expand and enhance on-site open space and landscaping, and promote their use to address urban runoff and drainage issues. Amend the Downtown Design Guidelines to promote additional greenery and environmentally beneficial features on-site (see Policies ES-4.3 and OS-2.1).

Policy ES-5.4: Natural Areas on UC Campus. Encourage the University to maintain and enhance natural areas adjacent to Downtown, such as near Strawberry Creek (see Policy HD-5.2).

a) Encourage the University to explore opportunities for incorporating best management practices for urban places along the western edge of the Campus, such as on "the Crescent."

GOAL ES-6: MINIMIZE WASTE GENERATED DOWNTOWN, AND STRIVE TO MAKE DOWNTOWN A "ZERO WASTE ZONE."

Policy ES-6.1: Recycling & Reuse. Maximize recycling and reuse opportunities for residents, workers, visitors, businesses, and institutions.

a) Require on-site recycling services with sufficient space for receptacles, in all new construction, substantial additions, and substantial renovations, except for historic rehabilitation and adaptive re-use.

b) Promote on-site recycling by apartment and condominium dwellers and businesses, including recycling within existing buildings. Develop guidelines for accessible storage and collection areas for the separation and collection of recyclable materials.

c) Educate building owners, managers and tenants about techniques for on-site recycling, local recycling programs and State "recycling plan" requirements.

d) Maintain and enhance existing programs for receiving and processing restaurant compostables.

e) Expand recycling receptacles on street and in other public open spaces, and provide for their continued maintenance. Evaluate opportunities for composting receptacles on street and in other public open spaces, and consider their implementation.

f) Encourage recycling programs through the University, BUSD, and other institutions.

g) Encourage recycling at all Downtown events.

Policy ES-6.2: Adaptive Reuse. Encourage adaptive reuse of older buildings (see Policies ES-4.1, LU-2.1, LU-4.3, HD-1.1 and HD-1.3).

GOAL ES-7: CONTINUOUSLY IMPROVE CITY STANDARDS AND PROGRAMS PROMOTING SUSTAINABLE PRACTICES.

Policy ES-7.1: Continuous Improvement. The City Council shall regularly evaluate the Downtown Area Plan for its impacts on environmental goals, aesthetics, livability, economic vitality, housing growth and affordability, sustainability, and other factors, and shall consider adjust-

ments to the Plan's policies and development regulations to better attain desirable outcomes and address unacceptable negative impacts.

a) Establish progress indicators using Berkeley's Climate Action Plan and DAP policies, and regularly assess progress. City Council should be provided with an evaluation of the DAP's performance every 5 years, and may accompany the evaluation with recommendations for improving performance.

3 - LAND USE

3. LAND USE

Strategic Statement

Land use sets the framework for many aspects of the Downtown Area Plan. In its narrowest sense, "land use" identifies the amount of development and the types of uses (or permitted activities) allowed on a particular parcel of land or in a given area. But effective land use policies must go farther. Land use policies create a framework on which other planning objectives are supported. To be effective, land use policies must also focus on fundamental determinants – both obstacles and encouragements – for key uses and their intensity, such as economic feasibility, building standards, exactions and incentives, and project approval procedures. For the Downtown Area Plan, overarching intentions for the Land Use chapter include:

Sustainability. Downtown presents unique opportunities to appreciably reduce transportation energy use and greenhouse gas emissions associated with development. This is especially true because it is a regional transit hub. To the degree the City meets its share of regional growth in transit rich locations such as Downtown, there will be a significant reduction in greenhouse gas generation per-household relative to growth in more auto-reliant locations – such as those portions of Berkeley with less transit service. In addition, Downtown's complementary mix of uses makes most daily needs accessible on foot. Land use intensity also plays an important role because the greater the number residents and workers, the greater the availability of local shops, entertainment venues, and services. Land use intensity also boosts the number of transit riders in an area, and allows agencies to deliver better transit service with less subsidy.

Livability. Sustainability is not only measured in tons of carbon, but also by the quality of persons' lives. Livability is enhanced when a mix of uses brings homes and workplaces within walking distance of shops, services and entertainment, especially where the walking environment is attractive. In addition, public amenities, landscaping and open space is needed to meet the recreational needs of Downtown residents. The livability of a district also depends on the general availability of sunshine and relative quiet, factors that can be maintained through regulation and mindful design. In recognition of the impacts that it may bring, new development should help pay for those amenities and open spaces. New development should also be arranged to minimize its impacts like the shading of public places, while yielding increased economic vitality.

Economic Vitality. Downtown must build on its competitive advantages as a destination, especially its existing (and potential future) cultural, educational and historic assets. Housing and employment growth is also needed to add residents and workers to support Downtown shops, restaurants, and services. To attain a vibrant Downtown, the City should set a target of housing an additional 5,000 residents during the 15- to 20-year timeframe of this Plan.

Business Synergies. Downtown is a major job center with many spin-off businesses from the University. Downtown should play a role in supporting start- up businesses, and retaining expanding businesses. New commercial development must be accompanied by new housing to avoid exacerbating Berkeley's jobs-housing imbalance.

Facing Page: *Existing conditions can be seen in this 2007 aerial, except for subsequent development projects. Photo from city files*

A Great Neighborhood. Housing sets the cornerstone for a successful Downtown, because Downtown needs lots of people, day and night, to be vibrant. Housing brings activity to Downtown streets and patrons to Downtown stores, services, restaurants, and theaters. Housing and residents also bring comfort and safety. With a special emphasis on affordability, new and diverse housing options can make Downtown a place for families and individuals of all ages.

History. Conserving Downtown's historic resources and main-street character maintains connections with the past, and helps give Downtown a unique sense of place. New construction can heal the scars posed by unsightly properties, but care must be taken not to overwhelm Downtown's historic jewels.

University as Partner. Downtown offers opportunities to celebrate the city's connections to UC Berkeley. UC Berkeley should be encouraged to strengthen Downtown by contributing new cultural uses (such as the University's Berkeley Art Museum and Pacific Film Archive), community services (such as a new Health Campus), and by enlarging Downtown's workforce to support economic activity. At the same time, Downtown revitalization can better serve the UC Berkeley's faculty, students and staff.

Development Opportunities. The Downtown Area contains a mix of commercial, residential, cultural, and institutional uses. Most Downtown development will take place on parcels that are vacant or have a relatively low level of improvement. These underutilized development, or "opportunity sites," comprise about one-third of all parcels Downtown. These sites include vacant lots, surface parking lots, one-story buildings, and two-story buildings near BART. Not all of these opportunity sites will be built upon, and the development that does happen will occur incrementally over many years.

Two-thirds of available land has substantial buildings that generate significant income and are unlikely to change, except for renovations and the adaptive re-use of older buildings. Very few opportunity sites have been identified in the residential areas in the northwest and southwest portions of the Downtown Area, where the DAP encourages retention of the existing character.

Core Area. The Downtown Area Plan allows for taller buildings in the Core Area (see Figure LU-1), because of its exceptional access to transit, shops amenities, and the UC campus. The Core Area contains BART, the convergence of over thirty bus lines, unique cultural resources, and the highest volume of foot traffic in the East Bay. The Core Area also contains two existing taller buildings that reach to about 180 feet.

Consideration was given to maximum allowable building heights that are less than permitted under the Downtown Area Plan, however an economic feasibility study showed that buildings above 75 feet (slightly more with architectural features) and below roughly 160 feet are unlikely to be built. The building code includes requirements that only apply when certain height thresholds are exceeded, and height thresholds within the building code can have a dramatic impact on construction costs. Buildings that exceed building code height thresholds often need to reach a certain size to generate enough income to justify increased code-related costs (Downtown Berkeley Development Feasibility Study, Strategic Economics, 2008). An exceptionally large construction site, an especially strong economy, and public subsidies may make otherwise infeasible heights possible, but such conditions may be rare.

Because of immediate access to BART, multiple bus lines, and walk-to conveniences, provisions for the Core Area allows the tallest buildings, including three buildings up to 180 feet. The Core Area is not near residential areas and tall buildings will not shade or crowd surrounding residential neighborhoods.

Outer Core. The Outer Core contains mixed-use areas within a quarter mile of BART, giving it good proximity to transit and conveniences. High densities in the Outer Core will confer a variety of economic, social and environmental benefits. 120-foot buildings are allowed in the Outer Core, and while buildings of this height may be generally infeasible for housing, office projects may be attainable.

The Outer Core contains major University-owned development sites, including most of the former Department of Health Services (DHS) site (east of Shattuck and between Hearst and Berkeley Way) and the site at the northwest corner of University and Oxford. The University is the largest landowner of opportunity sites in Downtown, and has planned 800,000 square feet of development in the Downtown Area and the adjacent Tang parking lot (east of Oxford between Durant and Bancroft). Policies in the Land Use chapter and throughout the Downtown Area Plan encourage University development that will leverage major benefits and minimize impacts.

Corridor. Shattuck Avenue and University Avenue form Berkeley's most prominent commercial corridors, along with San Pablo Avenue in West Berkeley. These corridors have more commercial uses and higher levels of bus service than other parts of Berkeley, which makes transit- and pedestrian-oriented development along these corridors especially advantageous. The DAP provides for buildings up to 75 feet in the Corridors. Buildings of this height will also help frame these wide rights-of-way to create more attractive urban environments.

Buffer. In the Buffer areas, buildings would be required to be closer in height to surrounding residential neighborhoods. Additional height reductions will be required immediately abutting residentially-designated residential parcels, to further provide for a suitable transition.

Residential Neighborhoods. Few opportunity sites exist in residential-only areas, but when development does occur, it will be subject to residential zoning. Many residents have expressed their desire to maintain the scale and character of these residential areas. To reduce development pressures that could result in inappropriate development, Plan policies call for downzoning the southwest portion of the Downtown Area from R-4 to R-3.

Open Space. The Downtown Area Plan also calls for the creation of major new public open spaces, adding to the existing opportunities afforded by Civic Center Park and the Berkeley High School playing fields. New "Park Blocks," are also proposed, which would repurpose excessive parking aisles and unneeded travel lanes with inviting, active, sun-filled spaces (see Streets and Open Space chapter). Several small plazas are also called for, most notably the creation of Center Street Plaza, on Center Street between Shattuck and Oxford.

GOALS, POLICIES & ACTIONS

GOAL LU-1: ENCOURAGE A THRIVING, LIVABLE DOWNTOWN THAT IS A FOCAL POINT FOR THE CITY AND A MAJOR DESTINATION FOR THE REGION, WITH A UNIQUE CONCENTRATION OF HOUSING, JOBS AND CULTURAL DESTINATIONS NEAR TRANSIT, SHOPS AND AMENITIES.

Policy LU-1.1: Downtown Uses. Encourage uses that allow people who live, work and learn in Downtown to meet daily needs on foot.

a) Allow the following uses in the mixed-use Core Area, Outer Core, Corridor, and Buffer areas, except as noted below.

- commercial uses (such as retail, restaurants, offices, cinemas, nightclubs, hotels, personal services, professional services, fitness centers);
- multifamily residential uses (such as apartments, condominiums, townhouses, and "live-work" lofts/townhouses);
- cultural & community uses (such as libraries, theaters, museums, art galleries, visitor services, supportive services, childcare, government, health care & health-related facilities);
- educational uses (such as classrooms, student and staff services, recreation facilities, and research facilities); and
- public and private open space.

A detailed list of allowable, conditionally allowed and excluded uses shall be defined by zoning provisions.

b) For use provisions applying to residential designations, refer to Berkeley's Zoning Ordinance.

c) Along sidewalks where it is desirable to have high levels of foot traffic and visual/physical connections between public and interior space, not all allowable uses are appropriate at street-level. Where designated by "Figure LU-3, Public-Serving Frontage Required," appropriate street-facing street-level uses are defined below.

- active commercial uses (such as retail, restaurants, offices, nightclubs, hotels, and personal services;
- active cultural & community uses (such as libraries, theaters, museums, art galleries, visitor services, supportive services, and childcare;
- active educational uses (such as student and staff services, but not recreation, research or classrooms);
- "live-work" lofts & townhouses with entry to office, art studio, or similarly active street-level use; and
- similarly intensive pedestrian-/visitor-/customer-based activities.
- Lobbies and reception areas (including those that serve uses that are generally not appropriate).

d) Residential uses, parking garages, and parking lots are not appropriate at the street-level where Public-Serving Frontages are required. A detailed list of allowable, conditionally allowed and excluded uses shall be defined in revised Zoning provisions.

e) Minimize discretionary review for street-level uses that are appropriate to Public-Serving Frontages (see Figure LU-3), except when needed to address negative impacts.

f) Non-residential uses may not be appropriate on upper floors in some Buffer locations. Consider whether upper-story uses in certain locations should be limited to multi-family residential and supportive services for residents. Allow community-serving uses such as health care and health-related facilities with findings and conditions to minimize impacts of such uses on nearby residentially-zoned areas (see policies under Goals LU-7 & HC-2).

g) Encourage a full-service grocery store in or near Downtown by working with property owners and real estate brokers and by considering incentives, such as modifications to Zoning standards and impact fee waivers (see policies under Goal ED-1).

h) Encourage day care facilities in and near Downtown by: working with property owners, real estate brokers, and UC Berkeley to promote Downtown childcare facilities; by maintaining development fees for child care (see Policy LU-2.1); and by allowing increased floor areas for providing child care as is provided under a State density bonus. Consider incentives for other neighborhood services.

i) Create new public open spaces such that a park or plaza becomes available within a few blocks of every resident (see chapter on Streets and Open Space).

j) Encourage hotels in the Core Area through incentives and height exceptions allowed under Table LU-1.

Figure LU-2: Civic Center Area. *Government buildings, Berkeley High School, Berkeley Historic Society's History Center, and social services border Civic Center Park, as does an outdoor Farmers' Market every Saturday.*

k) Parking and other transportation provisions should support this Policy (see Access chapter).

Policy LU-1.2: Culture & Entertainment. Encourage unique cultural and entertainment uses that serve the city and region, including museums, live theater, and cinemas (see Economic Development chapter).

a) Adopt incentives to retain and support the expansion of culture and the arts, especially in the "Arts District."

b) Retain and support Downtown's cinemas. Consider incentives for retaining existing movie theaters and upgrading their facilities.

FIGURE LU-3: Existing Public Serving Street-Level Uses

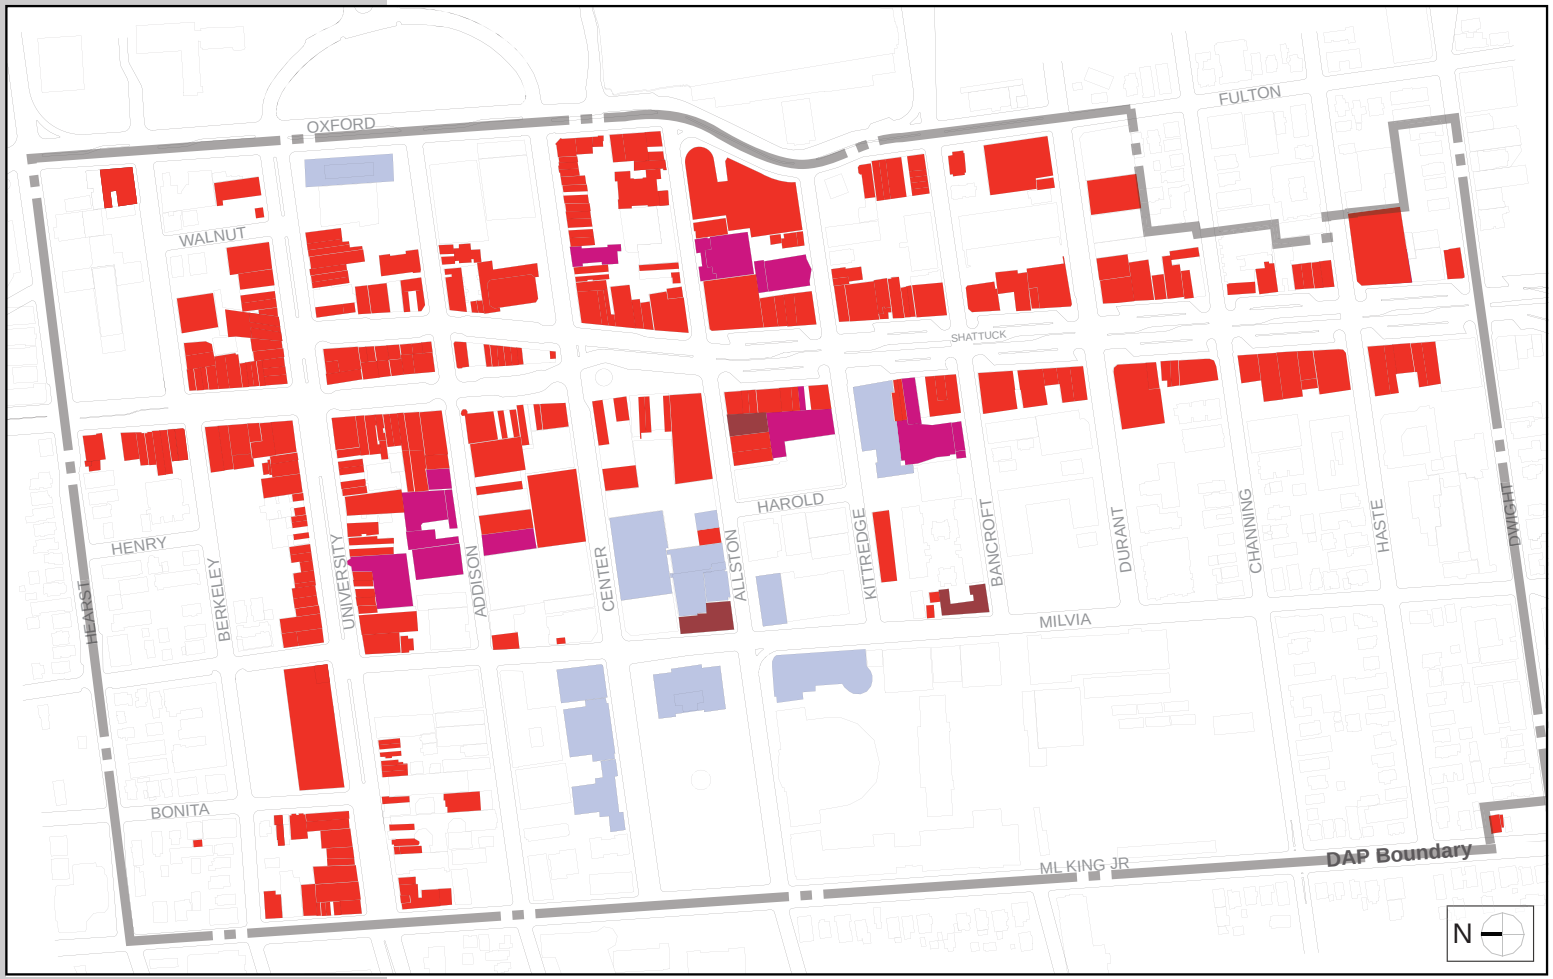

FIGURE LU-4: Public-Serving Frontage Required

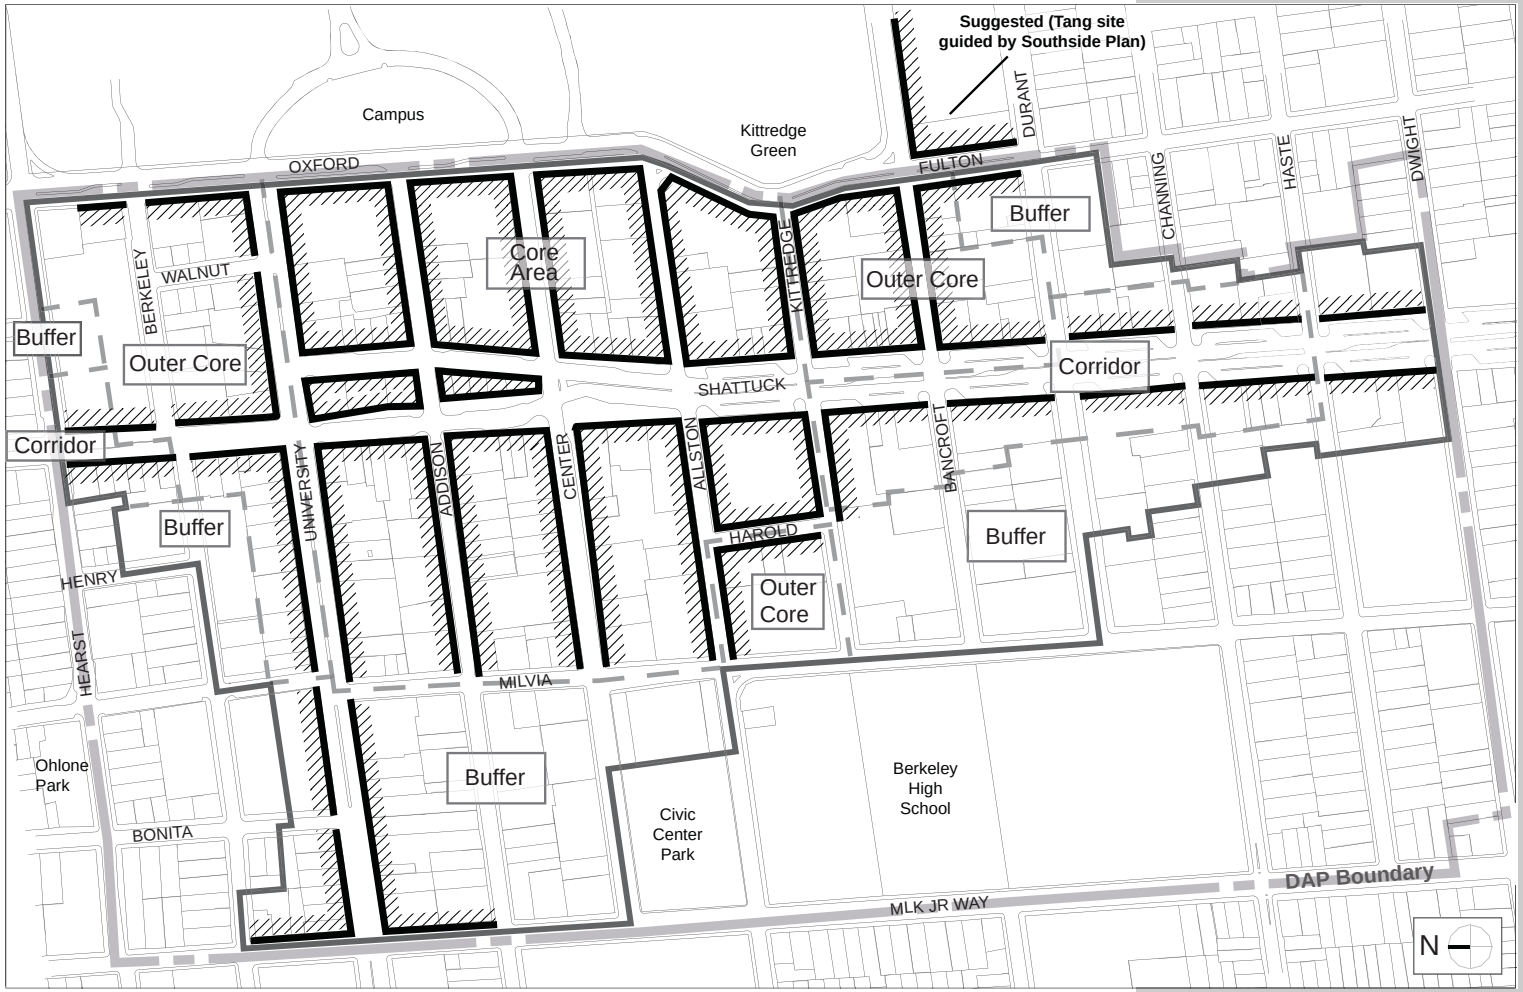

Subarea		Minimum Building Height *(4,5)*	Generally Allowed Maximum	With Use Permit for Increased Height *(6)*	Limited Number of Buildings Allowed to Exceed Generally Allowed Height *(7, 8, 9, 10)*
Mixed-Use	Core Area	50'	60'	75'	Core Area Only: Maximum of 2 residential buildings (with commercial groundfloor) that are no taller than 180 feet. Maximum of 1 hotel (with conference & related commercial) that is no taller than 180 feet. Core Area and/or Outer Core Only: Maximum of 2 office or residential buildings (with commercial groundfloor) up to 120 feet (non-UC). And maximum of 2 UC buildings up to 120 feet
	Outer Core	40'			
	Corridor *(11)*				None.
	Buffer *(11)*	None	50'	60'	

Table LU-1: Allowable Building Heights (1, 2).

c) Recruit uses that complement Downtown as an evening destination, including new cinemas, restaurants, and art and entertainment venues.

d) Support the Convention & Visitors Bureau and Downtown Berkeley Association in promoting events and festivals that capitalize on Downtown's unique cultural strengths.

Policy LU-1.3: Complementary & Active Businesses. Cultivate synergy between restaurants, shops and other businesses, combined with Downtown's focus on cultural and educational uses, to encourage a thriving and diverse retail environment (see policies under Goal ED-1).

a) Strengthen retail by supporting an increase in the number of: people working and living Downtown, cultural and art uses, connections to UC Berkeley, and attractive streets and public spaces.

b) Implement and coordinate public improvements, historic preservation, and other efforts to emphasize Downtown as a pedestrian-friendly environment with a strong sense of place (see Historic Preservation and Urban Design chapter).

c) Evaluate alternatives for a vacancy tax and other provisions that incentivize the productive use of land and street-level space Downtown.

(1) All new buildings must provide significant public benefits. Buildings over 75 feet must provide additional benefits, as described in Policies under Goal LU-2.

(2) Height dimensions are to roof, and do not include parapets, mechanical penthouses, appurtenances, & decorative features.

(3) Theater and museum buildings are exempt from minimum height requirement, as are historic rehabilitations and the adaptive reuse of existing buildings.

(4) The minimum building height may not be attained by using parapets, pitched roofs, or floor-to-floor heights that exceed typical dimensions for proposed use(s).

(5) UC projects are not subject to Use Permit provisions or local land use controls. UC buildings may be built to 100 feet and without stepbacks in Core Area and Outer Core, on parcels controlled by UC Berkeley as of July 2009.

(6) Taller exceptions must contribute significant additional community benefits (see Policy LU-2.3).

(7) Portions of buildings that are over 85 feet above grade shall be subject to solar, visual, or wind analysis, and possible modifications to project design (see Policies LU-1.5 & LU-4.2).

(8) Use restrictions apply to upper floors (3rd floor & above). Mixed uses permitted at street level & 2nd floor.

(9) Along Shattuck between Durant and Dwight, buildings shall be stepped back 15 feet where the building to not to exceeds 65 feet.

(10) Along Martin Luther King Jr. Way, limit height of new buildings adjacent to or confronting existing residential buildings to 45 feet within 10 feet of the sidewalk.

(11) Stepback provisions apply where projects abut or confront residentially-designated parcels (see Policy LU-7.2).

Policy LU-1.4: Civic Focus. Focus City government and civic activity in the Civic Center area, and recognize Downtown's central role in providing community services.

a) Maintain the present assemblage of civic buildings (including the High School) in the Civic Center area. Require new buildings in this area to face Civic Center Park and abutting streets with active, community-serving street level uses.

b) Encourage governmental, social service and other community uses that serve all Berkeleyans in and near the Civic Center area, so that they are centrally and conveniently located.

c) Maintain and enhance Civic Center Park with physical improvements and enhanced maintenance (see Goal OS-3).

d) Seek funding to retrofit the Veterans Building to resist earthquakes and, in addition to supporting veterans' activities, recruit a community-serving use for its main floor.

Policy LU-1.5: Downtown Intensities & Building Heights. To advance Downtown as a vibrant city center and encourage car-free options near transit, accommodate urban intensities by using building heights that are appropriate and feasible, as indicated in Table LU-1 and "Figure

LU-1, Land Use & Building Heights." All new buildings shall deliver significant public benefits, many of which should be in proportion to building height (see Policy LU-2.1). Buildings exceeding a height of 85 feet shall be subject to shadow studies and visual analysis, – and buildings exceeding a height of 120 feet shall be subject to wind analysis – to avoid detriment to residential areas, public streets and public open spaces, and if necessary require modifications to the project design including setbacks and stepbacks to reduce view and shadow impacts (see policies under Goals ES-4, LU-2, and HD-1, as well as footnotes in Table LU-1). Provide appropriate transitions to Residential areas that surround Downtown as described in Policies LU-4.2.

GOAL LU-2: NEW DEVELOPMENT SHALL CONTRIBUTE ITS FAIR SHARE TOWARD DOWNTOWN IMPROVEMENTS. COORDINATE DEVELOPMENT FEES AND OTHER FUNDING OPPORTUNITIES WITH PUBLIC IMPROVEMENTS FOR THE ORDERLY AND ATTRACTIVE TRANSFORMATION OF DOWNTOWN.

Policy LU-2.1: Contributions Required of All Development. New buildings and substantial additions, regardless of height, shall provide the following public benefits, except as noted for historic rehabilitations and adaptive re-use of existing buildings.

a) Green Buildings (see policies under Goal ES-4).

- Meet LEED Gold or equivalent.
- Meet Title-24 energy requirements and any local green standards adopted by Council.
- Provide on-site recycling services.

b) Open Space and Green Infrastructure (see also Streets and Open Space chapter).

- Pay an impact fee to fund the Streets and Open Space Improvement Plan (SOSIP).
- Provide on-site open space. On-site open space requirements may be reduced by paying an in lieu fee to be applied toward Downtown SOSIP improvements.
- Ensure no new net water runoff on-site or through in lieu payment for Downtown improvements (see policies under Goal ES-5).

c) Alternative Transportation (see policies in Access chapter).

- Provide car sharing opportunities.
- Provide on-site bike parking.
- Provide transit passes for project's residents and/or employees.
- Make pretax transit commuter benefits available to residents and/or employees.
- Parking spaces shall be rented separate from dwelling units.
- Residents in new downtown buildings shall be ineligible for Residential Preferential Parking permits.
- Pay a fee for Downtown SOSIP improvements.
- Provide on-site parking. Required parking may be reduced by paying into a

fund to provide enhanced transit services, which may contained within the Streets and Open Space Improvement Plan. (See Policy AC-1.3.)

d) Housing and Community Services (see policies in Housing and Community Health & Services chapter).

   - Pay an affordable housing mitigation fee and/or provide affordable housing per City policy.

   - Pay child care mitigation fee.

e) Before new zoning provisions for new building heights are adopted, specific requirements will be defined in the context of citywide provisions and returned to City Council for approval.

f) At the recommendation of the Landmarks Preservation Commission and at the discretion of the Zoning Adjustments Board, requirements may be waived to encourage the adaptive reuse of older buildings. Also consider zoning provisions to define thresholds where substantial renovations and substantial additions to existing buildings may be exempt (see Policies ES-4.1, LU-4.3, HD-4.2 and HD-4.3).

g) The applicable public benefit requirements shall be included as conditions of approval and the owner shall enter into a written agreement that shall be binding on all successors in interest.

Policy LU-2.2: Additional Community Benefits for Buildings Exceeding 75 Feet. Developers of buildings in excess of 75 feet must provide significant community benefits beyond what would otherwise be required. These may include: affordable housing, supportive social services, green features, open space, transportation demand features, job training, and/or employment opportunities. The applicable public benefit requirements shall be included as conditions of approval and the owner shall enter into a written agreement that shall be binding on all successors in interest.

Policy LU-2.3: Voluntary Green Pathway. Establish a voluntary "Green Pathway" development review process that would provide a streamlined permit process for buildings to get extraordinary public benefits that could not otherwise be obtained. Provisions for implementing the Green Pathway shall include requirements to mitigate air quality, noise, and short-term construction impacts, as well as the possible disturbance of archeological resources. Public Benefit and labor compliance shall be monitored and verified, with violations subject to penalty.

a) Concessions from Green Pathway projects with buildings at or below 75 feet should include:

   - Provide 20% affordable rental housing onsite or in a building located in the Downtown Area, or paying a fee to the Housing Trust Fund.

   - Waive the right to the State Density bonus.

   - Employ approximately 30% of a project's construction workers from Berkeley, and if qualified persons are not available in Berkeley, from cities in the East Bay Green Corridor. A contractor may gain credit for a locally hired worker who is employed on another project.

b) Green Pathway streamlined entitlement process for buildings at or below 75 feet would include:

- Submit Landmarks Request for Determination application to City staff including funds for City-conducted analysis of historical value.
- Submit completed analysis to Landmarks Preservations Commission (LPC) for determination. LPC shall complete its determination within 90 days. LPC determination shall be in effect while in an active pursuit of the use permit. If LPC designates a Landmark, the project reverts to standard zoning review process. LPC action appealable to City Council.
- Design Review Commission has up to 90 days to assess whether the project conforms to Downtown Design Guidelines, subject to appeal directly to City Council.
- Zoning Certificate is issued upon completion of this process. No Zoning Adjustment Board review is required.

c) Green Pathway buildings over 75 feet would have the following additional requirements and limitations:

- Buildings with more than 100 units of housing or office buildings above 75' will pay prevailing wages for construction workers and employ approximately 16% of total employees as apprentices from State Certified Apprenticeships with a record of graduating apprentices.
- Hotels above 75 feet will pay prevailing wages for hotel employees.
- Green Pathway Project applications will receive priority status to meet approval deadlines.
- New process for submitting application to determine landmark status, with final determination by Landmarks Preservation Commission within 90 days, with possible option to pay for City-conducted analysis of historical value. If LPC issues negative determination, it shall be in effect while in an active pursuit of the use permit. If LPC designates a positive determination, the project reverts to standard zoning review process. LPC action appealable to City Council.
- Design Review Commission and Zoning Adjustment Board (ZAB) process not to exceed a combined total of 210 days; ZAB action appealable to City Council.

Policy LU-2.4: Developer Contributions for Open Space. New development shall help pay for streetscape and public open space improvements and maintenance.

a) Adopt a Streets and Open Space Improvements Fee for recreation and open space, and dedicate it to improvements in the Streets and Open Space Improvement Plan (SOSIP) and consistent with California law.

b) Developers shall provide adequate on-site open space for public use at street-level and for capturing run-off or pay an in-lieu fee for public open space improvements. Street-level open space requirements are in addition to private open space requirements for occupants of residential projects (see policies in Goals ES-5 and OS-1 to 3).

c) Require developers to make improvements to abutting streets as a condition for approval. Required improvements should conform to the SOSIP.

d) Contributions from institutional and nonprofit uses should be pursued in a manner consistent with requirements on all projects developed by "nonprofit" institutions.

e) See Policy ED-12.1 – Revenues for Downtown, regarding revenue for Downtown streetscape and open space improvements.

f) Coordinate developer contributions with other funding opportunities and priorities.

Policy LU-2.5: DAP Evaluation & Updates. The City Council shall regularly review the Downtown Area Plan for its impacts on environmental goals, aesthetics, livability, economic vitality, housing growth and affordability, sustainability, and other factors, and shall consider adjustments to the Plan's policies and development regulations to better attain desirable outcomes and address unacceptable negative impacts.

a) The City Council should review the Downtown Area Plan five (5) years after adoption. City Council may consider adjustments to DAP policies and development regulations to better attain desired benefits and address unacceptable impacts. Prior to this review, the Planning Commission should undertake a comprehensive evaluation of the DAP. Based on this evaluation, the Planning Commission may recommend DAP revisions to the City Council for consideration and possible adoption.

b) The Planning Commission should undertake a comprehensive evaluation every five (5) years thereafter. Based on each evaluation, the Planning Commission may recommend that the City Council adopt changes to DAP policies and development regulations.

GOAL LU-3: CULTIVATE DOWNTOWN AS AN ATTRACTIVE RESIDENTIAL NEIGHBORHOOD WITH A RANGE OF HOUSING OPPORTUNITIES, AND AN EMPHASIS ON AFFORDABLE HOUSING AND FAMILY HOUSING.

Policy LU-3.1: Housing Needs. Accommodate a significant portion of Berkeley's share of regional housing growth as defined by Regional Housing Needs Assessments (RHNA) within the Core Area, Outer Core, Corridor, and Buffer areas, as compared with other appropriate areas in Berkeley.

Policy LU-3.2: Housing Diversity & Affordability. Offer diverse housing opportunities for persons of different ages and incomes, households of varying size and the disabled, and give Downtown a significant role in meeting Berkeley's continuing need for additional housing, especially affordable housing (see Housing and Community Health & Services chapter).

GOAL LU-4: NEW DEVELOPMENT SHOULD ENHANCE DOWNTOWN'S VITALITY, LIVABILITY, SUSTAINABILITY, AND CHARACTER THROUGH APPROPRIATE LAND USE AND DESIGN.

Policy LU-4.1: Transit-Oriented Development. Encourage use of transit and help reduce regional greenhouse gas emissions, by allowing buildings of the highest appropriate intensity and height near BART and along the Shattuck and University Avenue transit corridors (see Goal ES-3).

a) Require efficient use of available sites and help attain goals related to vitality. Adopt minimum building heights as provided in Table LU 1.

Figure LU-5: 1952 Oxford. *University vehicles used to be maintained in this 1940 Mission Revival building designed by Walter Ratcliff. Staff photo.*

Policy LU-4.2: Development Compatibility. Encourage compatible relationships between new and historic buildings, and reduce localized impacts from new buildings to acceptable levels. The size and placement of new buildings should: reduce street-level shadow, view, and wind impacts to acceptable levels; and maintain compatible relationships with historic resources (such as streetwall continuity in commercial areas). See policies under Goals ES-4 and HD-1, and Policy LU-1.5.

a) Revise zoning provisions and amend the Downtown Design Guidelines to provide for appropriate controls on setbacks and building bulk (such as through the use of floor area ratios and maximum horizontal dimensions), and rules for street-level open space and other devices. Emphasize measurable standards that are easy to understand and apply.

b) Strengthen zoning and the Downtown Design Guidelines to better address solar access and wind impacts. For buildings exceeding 85 feet, use solar, visual and wind simulations to evaluate and refine design alternatives.

Policy LU-4.3: Historic Resources. Preserve historic buildings and sites of Downtown, and provide where appropriate for their adaptive reuse and/or intensification (see Policies ES-4.1, LU-2.1 and HD-1.1).

a) Allow flexibility in parking, green building, and other zoning standards, such as exemption from on-site parking and open space requirements, when buildings are substantially and appropriately preserved or restored as part of a development project. At the recommendation of the Landmarks Preservation Commission and at the discretion of the Zoning Adjustments Board, green building requirements may be waived to encourage historic rehabilitations and adaptive reuse of older buildings (see Policy LU-2.1). Review and, if necessary, revise standards that may discourage historic rehabilitation and adaptive reuse.

GOAL LU-5: ENHANCE DOWNTOWN AS A CENTER FOR EMPLOYMENT AND INNOVATIVE BUSINESSES.

Policy LU-5.1: Office Space. Encourage new office space to serve the growth needs of existing and start-up businesses, recruit private-sector spin-offs from the University, and provide jobs for Berkeley's workforce, such as professionals and high-tech workers who now commute elsewhere (see Economic Development chapter).

a) Encourage new office and research space that has floor plates of a size that will help retain growing local businesses within Berkeley. Review zoning provisions for possible encumbrances to the creation of contiguous floor areas exceeding 10,000 square feet, and consider their elimination.

b) Review zoning provisions for possible encumbrances to creating small offices and research spaces suitable for start-up businesses, and to the sharing of equipment among multiple tenants, and consider their elimination.

c) Encourage start up businesses.

GOAL LU-6: ENCOURAGE UNIVERSITY USES IN DOWNTOWN THAT WILL BENEFIT THE GREATER DOWNTOWN AREA.

Policy LU-6.1: University Land Uses. Encourage the University to use its Downtown sites for uses that serve the public or are of general interest, such as creating a new public health campus and relocating the Berkeley Art Museum / Pacific Film Archive to Downtown. To the extent pos-

sible, UC buildings should line streets and public open spaces with retail and other public-serving uses that encourage activity and meet the needs of Downtown residents, workers, and visitors (see policies under Goals HD-5 and OS-1).

a) **Museums.** Encourage UC to move museums (such as the Lawrence Hall of Science and the Hearst Museum of Anthropology), satellite museums and/or museum collections into Downtown. Support the relocation of the Berkeley Art Museum and Pacific Film Archive to the UC Printing Plant building and adjoining garage (bounded by Center, Oxford, and Addison). Locate museum entrances, cafes, and retail stores in ways that strengthen existing retail and cultural uses.

b) **Retail Frontages.** Encourage the University to locate retailing activities along the Shattuck and University Avenue frontages that it controls. Encourage UC to open branches of affiliated retail stores into Downtown, such as the Scholars Workstation and UC museum stores, and make these stores open to the general public. Retail frontages are encouraged along Shattuck and University Avenues at a depth of 100 feet, if feasible. Prior to development, the City and University should jointly consider how deep the retail space should be and work together to attract tenants to strengthen retail activity.

c) **Community Health & Services.** Encourage the University to move programs that serve the general public to Downtown, such as health clinics, an optometry clinic, social work, community-based research, community outreach, auditoriums available for community events, and other community services.

d) **University Avenue Gateway – South Side.** To provide a new sense of arrival and gateway at the east end of University Avenue and to help transform Oxford Street, the City recommends additional development on the University Hall site and adjacent UC property just to the west. University Hall could be modified and/or additional building area could be added to contain visitor oriented uses such as a joint Visitor Center, an information center for UC and non-UC events, a multicultural center, and/or branches of University museums that would contribute to Addison Street as a cultural destination. If UC develops consolidated parking Downtown, the site west of University Hall is appropriate for this use (see Policy AC-1).

e) **University Avenue Gateway – North Side.** The City recommends near-term development of UC properties on the block bounded by Oxford, Walnut, Berkeley Way, and University Avenue, possibly for University "surge" space (to house functions as they undergo reconstruction or repair). The University is encouraged to seek unified development of this block by acquiring non-UC properties – with the exception of the apartment building at Berkeley Way and Walnut Street, and with the integration and preservation of a meaningful portion of the exterior of the landmarked garage building its forecourt at 1952 Oxford Street.

f) **Department of Health Services Site (between Shattuck, Hearst, Oxford, and Berkeley Way).** Encourage near-term development of the former Department of Health Services (DHS) site, between Shattuck, Berkeley Way, Hearst and Walnut. In addition to retail along Shattuck (see "b"), pedestrian-friendly, and have frequent windows and entrances. The scale of new University buildings on the DHS site should be lower building heights across from existing residences along Hearst as provided in Figure LU-1: Land Use & Building Heights map.

Figure LU-6: Residential Neighborhoods. *The Downtown Area includes residential neighborhoods with single-family homes and apartment buildings. As shown, the character of many residential buildings is noteworthy. Staff photos*

Health services are encouraged on the site (see LU 8.2).

g) **Health Services** in Downtown (see policies under Goals LU-8 and HC-7).

h) **Tang Center Parking Lot.** The parking lot site adjacent to the Tang Center between Bancroft and Durant is associated with UC planning in the Downtown Area, but is guided by the Southside Plan. Relative to sites located in the Downtown Area, encourage UC to make the Tang Center site a relatively low priority for near-term development. A multicultural center is encouraged on the site, which could bring together Berkeley High School students, UC students and other young adults. Office and storefronts are considered appropriate ground floor uses for the site facing Bancroft. The south side of the site is appropriate for housing at a scale that relates to nearby existing residential uses.

i) **Activity Facilities.** Encourage the University to retain the Edwards Field track, tennis courts, and similar activity facilities near Downtown. Also encourage new activity facilities that will bring activity and amenities to locations in or adjacent to Downtown.

j) **Childcare.** Encourage the University to add childcare facilities for faculty, staff, and students to its Downtown properties, and to consider making these facilities available to the general public.

Policy LU-6.2: UC Housing. Encourage the University to create more housing Downtown, possibly in cooperation with private developers.

a) Encourage the University to replace the Banway building on Bancroft in the long term with housing for faculty, students (including undergraduate and graduate), or families (see Policy HC-3.6).

b) For the northern portion of the Golden Bear site, the R-2A height limit of 35 feet should be retained, except for affordable housing projects, but no commercial space, in which case a maximum height of 65 feet and modified development standards shall be allowed.

Policy LU-6.3: Business Synergies. Encourage University uses in Downtown that will enhance it as a center of employment and innovative businesses (see Policies LU-5.1 and ED-8.2).

a) Encourage University uses in Downtown to enhance it as a center of employment and innovative businesses. Encourage UC Berkeley to site office, laboratory, cultural, and associated space (as anticipated in UC's Long Range Development Plan) in Downtown on sites already owned by the University.

b) Encourage the University to locate East Bay Green Corridor Partnership uses in Downtown (see Policy ES-2.2).

GOAL LU-7: MAINTAIN THE EXISTING SCALE AND CHARACTER OF RESIDENTIAL-ONLY AREAS.

Policy LU-7.1: Neighborhood Protections. Seek to reduce development pressures in residential-only areas, to promote the preservation and rehabilitation of older structures – and to conserve the scale of their historic fabric (see Policy HD-1.5).

a) Maintain the R-2A zoning designation and downzone R-4 areas to R-3 (as shown in Figure LU-1), except for the north side of Dwight Way east of Shattuck Avenue.

b) Development on parcels that remain residentially zoned shall be controlled by applicable residential zoning provisions. Private development should not be subject to DAP private development requirements or procedures unless explicitly called for in the DAP.

c) Consider creation of design guidelines and public improvements that maintain and enhance the special character of residential neighborhoods.

Policy LU-7.2: Transitions. Avoid abrupt transitions between residential-only neighborhoods and development projects built in Corridor and Buffer areas.

a) Zoning provisions should be developed so that projects that are across the street from residentially-designated parcels respect the predominant scale of existing buildings on the confronting block. For projects that abut or confront residentially designated property, the new building should not exceed 45 feet at the sidewalk or 60 feet where a 10-foot "stepback" is provided (see Table LU-1).

b) No project should exceed 60 feet within 40 feet of any residentially designated property (see Figure LU-1). The required depth of this "stepback" shall be evaluated and determined as Zoning provisions are revised, and be sufficient for mitigating significant shadow and privacy impacts on abutting residentially zoned parcels.

GOAL LU-8: MAINTAIN AND EXPAND COMMUNITY HEALTH CARE FACILITIES AND SOCIAL SERVICES IN THE DOWNTOWN AREA.

Policy LU-8.1: Herrick Site. Encourage the retention of community-serving health services on the Herrick Hospital site. Work with Alta Bates Summit Medical Center to retain all or a portion of the Herrick site for health services to the extent feasible.

a) The City should redesignate the Herrick site as "Buffer," if the proposed project incorporates health care for the community on the Herrick site or in its general vicinity, such as through the provision of a community-serving health clinic, primary care, or similar facility, on the Herrick site or in its general vicinity.

b) If only housing is proposed on the Herrick site, the housing should be consistent with its residential neighbors.

Policy LU-8.2: UC Health Services. Encourage UC to move health services and programs that serve the general public into the Downtown Area, such as a new public health campus on Shattuck at Berkeley Way.

a) Work with the University as it considers moving health services and programs into the Downtown Area, such as health clinics, an optometry clinic, social work, community-based research, community outreach, auditoriums available for community events, and other community services.

b) Consider the DHS site as a campus for providing a range of health services and health-service activities in the same location (see Policies LU-6.1 and HC-7.1).

Policy LU-8.3: Other Care Providers. Support public, non-profit and for-profit agencies in Downtown that provide health-related and social services (see Housing and Community Health & Services chapter).

4. ACCESS

STRATEGIC STATEMENT

Downtown's transportation system must serve Downtown's three principal roles: a vibrant city center, a livable neighborhood, and a regional destination for employment, education and culture. Interdependent and complementary transportation management strategies set forth in the DAP address the following themes.

- Emphasize and enhance Downtown as a destination.
- Give priority to transit, pedestrians, and bicyclists, while reducing automobile use, especially by commuters.
- Improve connectivity between Downtown and Berkeley neighborhoods, and between Downtown and the Bay Area.

PRIORITIZE PEDESTRIANS

Downtown's advantages spring first and foremost from having complementary uses close together and connected by pedestrian environments that are convenient, safe, and attractive for all ages and abilities. Inviting pedestrian environments are the foundation for attaining many Downtown goals. Pedestrian-oriented environments serve the needs of Downtown residents who can meet most daily needs on foot and for whom Downtown's streets are the social space at their front door. Walkable

Facing Page: *Bikes, pedestrians, buses, shuttles and taxis come together at the Downtown Berkeley's BART station, a major Bay Area transit hub. Staff photo*

Figure AC-2: Bike Paths and Routes Serving Downtown (2011).

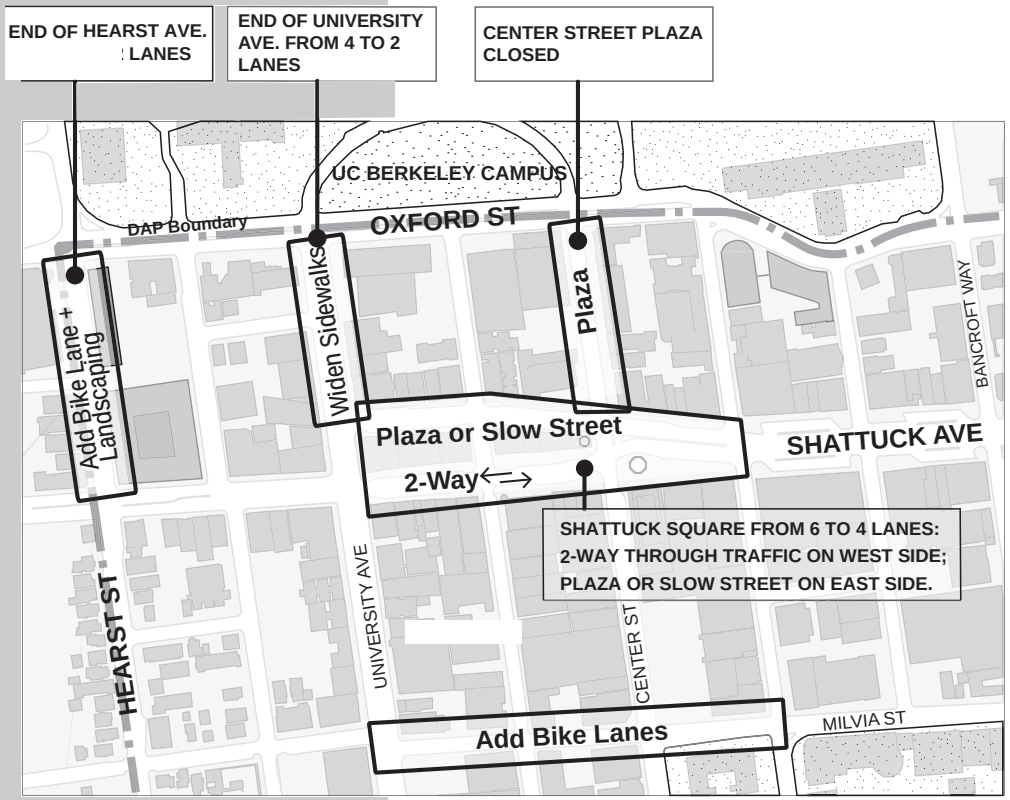

Figure AC-3: Potential Travel Lane Modifications.

environments also serve daytime denizens: Downtown employees, shoppers, students, and visitors who walk around and through Downtown.

Downtown has high levels of foot traffic already. Between BART and UC Berkeley's campus, Center Street has more foot traffic than any other street in the East Bay. Citywide, seventy percent of Berkeley residents say that they sometimes walk to shop or run errands (2001 City of Berkeley General Plan). 15 percent of Berkeley residents walk to work, five times the rate for Alameda County (Census, 2000), and the highest walk-to-work rates are in Downtown Area census tracts.

An attractive downtown walking environment can play a critical role in economic revitalization. Retail patrons, cultural uses, businesses, and new development can be attracted to Downtown with especially inviting pedestrian places. For retail, Downtown's success as a pedestrian-friendly place can distinguish it and help it compete with other regional destinations.

With residential growth, Downtown's streets will increasingly serve as community open spaces where residents can sit outside and meet neighbors. Pedestrian improvements anticipate Berkeley's increasingly aging population, for whom Downtown offers car-free housing options. Twenty one percent of Americans aged 65 and older do not drive (STPP Aging Americans: Stranded without Options: April, 2004). Downtown Berkeley offers an ideal location for aging baby-boomers interested in active lives near conveniences, transit, the University and other attractions.

While Downtown retains many strengths, many Downtown streets do not provide a high-quality walking environment, in spite of high pedestrian volumes and City policies focusing on pedestrian environments. Many sidewalks are relatively narrow; one-third of Downtown sidewalks lack street

trees; and street elements like street lights and furnishings have an inconsistent and sometimes unattractive appearance. Blank walls and parking lots front onto some streets, making them less inviting and less safe. Unsightly utility boxes add to a cluttered sidewalk. Concrete and asphalt characterize most of Downtown and date from public improvements that emphasized the convenience of motorists over the comfort of pedestrians.

While some of the existing environment is not attractive for the pedestrian, the opportunity to enhance that environment is also evident. By repurposing space now used for cars, sidewalks can be expanded, landscaping enhanced and bicycle lanes. Engineering standards of the past fifty years have traditionally focused on vehicle flow and minimizing vehicular conflicts, and less on the needs of pedestrians and bicyclists. While Downtown contains some features that protect pedestrians and cause drivers to slow (such as curb extensions at some crosswalks), many additional opportunities are available for more generous pedestrian environments. Traffic modeling indicates that several street segments can lose traffic lanes with no significant impact on congestion. Traffic lanes can also be reduced in width, thereby slowing traffic and enhancing pedestrian safety.

Programs that promote alternative modes can also benefit pedestrians by reducing and calming traffic. Contemporary transit improvements emphasize the need for "complete streets" that emphasize all travel modes and is an important tool for enhancing pedestrian access to transit. Programs that promote alternative transportation modes reduce the need for parking on and driveways to private parcels, thereby reducing potential conflicts between pedestrians and cars.

BICYCLING

Bicycling offers an excellent way to get around Berkeley. Six percent of Berkeley residents bike to work in Berkeley every day (2000 United States Census), four times the Alameda County average. In addition, UC Berkeley's students and staff regularly bike through Downtown to get to the campus destination as 21 percent of University bike trips originate in Berkeley (UC Berkeley Bike Plan, 2006).

While there are many bike lanes and routes in Downtown, there are also discontinuities in the bike network in Downtown. For example, Milvia, Berkeley's first "Bicycle Boulevard," offers a protected route for bicyclists traveling from the north and south, except between University Avenue and Allston. Oxford-Fulton Street carries over 1,400 peak hour bicyclists (UC Berkeley Bike Plan, 2006) but bike lanes end at Durant. Bicyclists traveling on the "Ohlone Greenway" bike path, can access the bike lanes along Hearst Avenue to Shattuck, but the bike lanes two blocks short of to the UC Campus.

Downtown also needs more parking for bikes. Downtown BART Bike Station has helped meet some demand since it opened in 2010, but the demand for bicycle parking exceeds the supply near major destinations like the YMCA, central library, and blocks with high levels of commercial activity.

PUBLIC TRANSIT

Downtown Berkeley is the second largest transit hub in the East Bay, and has extraordinary access by bus and BART. Thirteen AC Transit bus lines (2008) and several shuttles (for UC Berkeley, LBNL and Summit/Alta Bates) converge Downtown. At a local and regional scale, transit

presents an important alternative to the single-occupant car.

Transit also provides an essential service to persons who do not or cannot drive. A 2000 survey of AC Transit riders showed that 61% of adult riders were transit-dependent (AC Transit 2002 On-Board Passenger Survey), over one-quarter of whom live in low-income households without access to a car (Transportation and Land Use Coalition 2002 Urban Habitat presentation). Many disabled and elderly individuals are unable to drive.

Transit also reduces impacts traffic generated by the University of California and Downtown employment. UC Berkeley's 2020 Long Range Development Plan requires that all new University housing be accessible to the central campus within 20 minutes on foot and using transit. To meet this goal the University provides students with free "Bear Passes" for unlimited local bus service. The City of Berkeley provides each employee with AC Transit passes. Transit subsidies have proved so successful that communities like Boulder CO have avoided the need to build new expensive parking garages by giving each downtown employee a free pass for local bus service.

The DAP encourages the City to work closely with BART and AC Transit to maintain attractive transit options with service that is frequent and reliable, such as by giving buses priority at traffic lights. Other possible improvements include the use of platforms to speed boarding and real-time arrival/departure information. Safe and convenient pedestrian routes to and from transit stops also support transit use.

REDUCING AUTO USE

Berkeley has long supported policies that reduce vehicle use in order to reduce impacts on the community and the environment. At the same time, automobiles are likely to remain the dominant transportation mode in the foreseeable future (even if they are mostly electric or hybrid), and trucks will continue to deliver most goods. While Berkeley's population stayed constant from 1990 to 2000, traffic on Berkeley streets increased and Berkeley households owned more cars.

This Plan seeks to balance a strong desire to minimize the use of autos, while also accommodating them to the degree necessary and mitigating potential negative impacts on pedestrians and bicyclists. Accommodation of cars must be consistent with the City's priorities for pedestrians, bicycles and transit. To achieve this balance, multiple strategies are needed to promote alternative modes, manage parking and traffic more effectively, and make street- and parking-related improvements that support DAP goals.

Motorists are comprised of different user groups with different needs and patterns of use. To simultaneously reduce car use while making Downtown a more attractive destination, each user group requires different and multiple transportation management strategies.

Commuters. Of all user groups, commuters present the best opportunities for encouraging alternative modes, especially for those who do not need regular access to their car during the day. Long-standing City and University policies have successfully discouraged many commuters driving, but more needs to be done. Strategies can be employed that increase the cost of parking all-day, while decreasing the cost and inconvenience of using transit. Berkeley has excellent transit access, which presents better transit options than most other communities. Programs like "Guaranteed Ride Home" and access to car-sharing vehicles can also play an important role in that they provide the flexibility of a car when occasionally needed. A lasting

strategy to reduce commuting is to build more housing near UC Berkeley and Downtown, so that more people can walk or bicycle to work.

Shoppers and Short-Term Visitors. People who come Downtown to shop or conduct other short-term business are less likely to use alternative modes because they place a premium on convenience and transit can seem unreliable and time consuming (especially at off-peak times). At the same time, shoppers and other short-term visitors are vital to Downtown's economic health and attractiveness as a destination. To maintain a thriving shopping district, Downtown must rely on people from outside of the area, and retailers must compete with other shopping options in Berkeley and surrounding communities. For retail, the availability of short-term parking – especially convenient on-street parking – plays a critical role, as does a safe and attractive pedestrian environment. Convenient parking is also important to persons with disabilities and families with small children. Accordingly, one of the key strategies for this group is adequate management of the parking supply to ensure that short-term parking is available and convenient (as described below).

Residents. The average resident in Downtown Berkeley today is much less likely to own an automobile than residents in other parts of Berkeley or the region, but may need a vehicle occasionally. As more housing is built Downtown, some accommodation of cars will be needed but residents' use of cars can be minimized by leveraging the proximity of walk-to conveniences, ensuring excellent accessibility by transit, making it easy to bike, and providing carshare opportunities.

Global Climate Change. In 2005, automobile gasoline and diesel consumption accounted for 47 percent of Berkeley's total greenhouse gas emissions, almost 293,000 tons of greenhouse gases, and contributed to the region's air pollution and rates of respiratory disease. While less polluting vehicles could become more available, they will still generate off-site greenhouse gas and environmental impacts from generating electricity. High rates of car use also alter the character of Berkeley, including pedestrian safety, noise, and the use of limited Downtown land resources for parking and streets. Reducing car use can best be achieved by increasing the numbers of people living near good public transit, and at intensities that support shops and services within walking distance.

Transportation Demand Management (TDM). Using a menu of strategies, TDM programs discourage car use (especially commuting) and encourage transit, bicycling, ridesharing, and walking. TDM programs include:

- cash equivalent to the cost of parking given to those who do not drive alone;
- pre-tax commuter benefits;
- free or low-cost transit passes;
- car-/van-pool coordination and free car-/van-pool parking;
- showers for bicyclists and vouchers for bike repairs;
- car-sharing opportunities; and
- a "guaranteed free-ride-home" when people who didn't drive are faced with emergencies.

Generally implemented by larger employers and institutions, TDM programs typically offer incentives relating to cost and convenience. A UC sur-

vey determined that “convenience” (at 37%) and “travel time” (at 30%) were most often cited as reasons why faculty and staff drive rather than use alternate modes. Through TDM programs, government can help “even the playing field” and make TDM programs workable for smaller employers and residents and more competitive with the cost and convenience of auto usage.

PARKING

Just as with auto use described above, parking needs can be divided into three types: long term parking generally used by commuters; long-term parking used by residents, and short term parking generally used for shopping, services, recreation and cultural activities. Each need is addressed with a different set of strategies. Fundamentally, the City’s policy has been to discourage long term parking for commuters, manage the available parking supply so that it can be more readily available for short-term users, and have relatively low minimum parking requirements for residential development. While the DAP continues many of these same policies, it recommends a different set of strategies to achieve those goals.

Commuter Parking. City policy has discouraged commuters from parking in Downtown for some time. A 2004 survey of Downtown workers led by UC Professor Elizabeth Deakin found that 37% of Downtown Berkeley workers said they drive alone or with others and park in Downtown. Of those who arrive by car, 70% reported parking in parking garages. The remaining workers said they parked on-street and avoided citations by moving their cars and “feeding” meters. Consequently, on-street parking spaces are occupied every day by about 700 employees (2004 Transportation Research Board, Deakin et al).

City policy can alter parking behavior through careful management of the parking supply. Information technologies can direct motorists to parking garages with available parking spaces. By increasing the price of on-street parking, some commuters will chose to park in a parking garage or get to downtown some other way – and make on-street spaces more available to other users. Strategies that discourage commuter parking in Downtown can lead some commuters to seek parking in surrounding neighborhoods which must be managed through on-street parking restrictions and enforcement.

Parking for Restaurants, Shops and Entertainment. The availability of readily-available on-street parking can be critical to the livelihood of shops and restaurants. Downtown’s on-street parking can be priced and enforced to discourage long-term use and to encourage use of lower-priced parking garages for those who are willing to walk farther. In his book, The High Price of Free Parking, Donald Shoup, a UCLA professor observes that the price of parking is a minor factor for retail competition, but that its availability and convenience plays a major role. Shoup recommends parking ordinances that price on-street parking to attain a vacancy rate of about one parking space on each block face (a vacancy rate of about 15%). Since demand for parking can vary by time of day or location, prices might be adjusted accordingly and the technology for variable pricing is already installed. Although retailers often object to increases in the price of parking, other cities have found them much more accepting of it if the increased revenue from parking is invested in things that benefit the retail district, such as street improvements and sidewalk cleaning.

While enforcement of parking restrictions has traditionally ended at 6 PM in Berkeley (and most other cities), evening parking requires the

same strategies to manage short term and long term demand. IBI Group's 2006 transportation background analysis for the DAP EIR found that evening on-street parking "had an overall higher occupancy when compared to the midday period [and] revealed that parking on select blocks was fully occupied" close to cinemas and theaters. Shorter-term evening entertainment venues can therefore benefit from price-based supply-and-demand strategies. On-street parking would become more available for restaurants and shops if metered hours were extended (2006 MTC Downtown Berkeley Parking Study).

Parking Garages. While perceptions prevail that parking is not available in Downtown, surveys show that many publicly accessible parking garages are only 80% full during the early afternoon when demand peaks. Parking garages would be better utilized if their price of parking was lower than on-street parking, which is not the case today. The public could also be provided with information on where garage parking is available by using "real-time" signs that indicate how many parking spaces are available at each major garage.

Residential Parking. To promote Downtown's revitalization, development in the Downtown's Core Area (the blocks around the Downtown BART station) already has some of the lowest parking requirements in the Bay Area outside of San Francisco: one space for every three dwelling units if a Use Permit is obtained. Actual demand corresponds closely with this requirement, testifying to the reduced driving rates of Downtown residents. (Wilbur Smith Associates).

Current Zoning provisions require on-site parking for each project, and while it allows a fee to be paid in-lieu of on-site parking, the City does not have a consistent vehicle for collecting these fees and spending them on Downtown parking or other transportation improvements. An in-lieu fee option could help make adaptive re-use of existing buildings and new development on smaller sites more feasible. In addition, the City could promote bicycle and transit use by requiring that new developments provide bicycle parking, carshare opportunities, and transit passes in lieu of parking.

Parking demand in the Downtown Area has the potential to "spillover" into surrounding neighborhoods. Berkeley's "Residential Preferential Parking" program (RPP) seeks to limit parking in surrounding neighborhoods to residents and short-term use. Residents in new downtown buildings shall be ineligible for Residential Preferential Parking permits. Residents in surrounding neighborhoods benefit from enforcement of the RPP, along with other tools with which to better management of transportation demand Downtown.

Parking & Transportation Demand Management Program (PTDM). Parking management and transportation demand programs are complementary: TDM encourages people to use alternatives to the automobile, especially commuters, while parking management programs can ensure that parking is available for those that need it most, while discouraging it for those for whom transit and other modes are viable options. Together, these programs allow the City to better utilize available parking, and minimize the need to build expensive new parking garages. A comprehensive Parking and Transportation Demand Program that coordinates these two strategies has the potential to maximize the efficient use of available parking and the use of alternatives to the personal vehicle, such by using transit, riding a bike, or by car sharing.

UC Berkeley Parking & TDM. The University has its own parking management program to address demand and meet TDM goals. According to UC Berkeley's Long Range Development Plan,

Figure AC-4: Rhino Meters. *For better administration and attractive streets, "rhino meters" replaced individual meters. Rhino meters track whether parking is over- or under-utilized, making them an important parking management tool. Staff photo.*

The University may add over one thousand additional parking spaces in Downtown to address its growth needs. However, as UC Parking fees do not currently cover the cost of providing structured parking, the University also has a significant incentive for University parking built in Downtown to share with non-UC users, as has been the case during evenings and weekends. In addition, the University and City are working in concert to implement a range of TDM strategies.

Carsharing. Carsharing programs have recently been established in many urban areas, which provide affordable short-term car rentals to members. Carsharing eliminates the need to own a car (or a second car) for occasional trips by making low-cost and convenient short-term car rentals easily available. Carsharing also allows commuters who regularly bike or use transit to use a car to meet infrequent or unexpected needs.

GOALS, POLICIES & ACTIONS

Note: Policies under Goal AC-1 focus on integrated multimodal strategies to strengthening Downtown as a place for people to enjoy. Policies relating specifically to walking, transit, and bicycling are found in Goals AC-2, AC-4 and AC-5, respectively.

GOAL AC-1: IMPROVE OPTIONS THAT INCREASE ACCESS TO DOWNTOWN ON FOOT, BY BICYCLE, AND VIA TRANSIT. MAKE LIVING, WORKING, AND VISITING DOWNTOWN AS CAR-FREE AS POSSIBLE.

Policy AC-1.1: Street Modifications. Modify Downtown's streets and street network to better serve the needs of pedestrians, bicyclists, and transit (see policies under Goal OS-1). While recognizing that automobiles will be an important transportation mode for the foreseeable future, reduce and avoid negative impacts from the private automobile on pedestrians, transit, and bicycles (see policies under Goals AC-2, AC-4 and AC-5). Development projects that are adjacent to designated street improvements should finance a fair-share of these improvements as condition of project approval.

a) Encourage potential motorists to access Downtown using other modes (as described in multiple policies below).

b) Modify streets to slow automobile traffic to speeds appropriate to the function and character of each street, and emphasize the needs and comfort of pedestrians, transit and bicycles.

   - Modifications should encourage traffic to flow at speeds under 25 miles per hour.

   - Monitor traffic volumes and speeds on residential streets in and near Downtown using established standards, and improve traffic calming and enforcement until General Plan targets are attained.

c) Implement street improvements that benefit pedestrians, bicyclists, and transit. Reallocate parts of public rights-of-way that give unneeded capacity to motor vehicles and can be repurposed to yield pedestrian, bicycle, and/or ecological benefits. Travel lanes should not be eliminated until analysis has determined that safety, transit, and traffic operations can be adequately addressed, however the DAP EIR has indicated that traffic lane reductions appear to be feasible in the following locations:

   - Shattuck Avenue and Shattuck Square between University Avenue and Allston;

- University Avenue between Shattuck Square and Oxford;
- Hearst Avenue between Shattuck and Oxford; and
- closing Center Street to regular traffic between Shattuck and Oxford.

d) Adopt a Downtown Streets & Open Space Improvement Plan that establishes policies and actions relating to street improvements that can occur throughout the Downtown Area (such as sidewalk bulb-outs, suitable travel lane widths, bicycle parking, street trees, street lighting, furnishings, etc.), as well as major projects (including Center Street Plaza, Center Street Greenway and Civic Center Park, Shattuck Square, University Avenue Gateway, Shattuck Avenue, and Hearst Street). See Policy OS-1.1.

e) Evaluate street network changes from the perspective of the needs, safety and comfort of bicyclists and pedestrians, including changes to lanes and turning movements. Where accommodations for private automobiles and accommodations for pedestrians are in conflict, decisions should reflect the priority of the pedestrian. Accept that improvements may result in slowing down vehicular traffic. Reconfigure automobile traffic on Shattuck Square, so that the west side of Shattuck Square accommodates two-way through traffic, and the east side of Shattuck Square can become a slow street or plaza with a high level of pedestrian amenity.

f) Once the design of improvements is conceptually approved, private and public developers adjacent to designed improvements should implement them as part of the development project, whenever feasible and as described in Policies (see policies under Goals LU-2 and OS-3).

g) Engage merchants, property owners, transit agencies, the University and other stakeholders to emphasize Downtown as a shared destination. Work with AC Transit and other transit agencies to evaluate the impact of proposed street and street network changes on transit vehicle operations, and to identify suitable bus stop and layover locations (such as to replace those displaced by a new Center Street Plaza). Bus stops and layover locations should not degrade transit service, and should not negatively impact pedestrian environments.

Policy AC-1.2: Single-Occupant Vehicles. Discourage the use of single-occupant vehicles (SOVs) by commuters to Downtown and encourage commuting with transit, ridesharing, bicycles, and on foot.

a) Require larger development projects to provide ridesharing parking and support their on-going operations. Strive to serve subareas where ridesharing locations are not convenient by identifying potential ridesharing locations and working with ridesharing providers.

b) Promote ridesharing to and from Downtown by employers and institutions. In public parking garages, continue to discount parking prices for organized ridesharing, and provide preferential parking locations. Encourage private parking garages to make similar accommodations.

c) Strengthen parking policies that discourage all-day SOV parking while encouraging alternative modes (see policies under Goal AC-3).

d) Consistent with the Urban Environmental Accords endorsed by Berkeley, strive to reduce single occupancy vehicles (SOVs) to be no more than 40% of all commute trips by 2020. Monitor peak period trips to the extent feasible, and adjust measures to meet these targets.

Policy AC-1.3: Alternative Modes & Transportation Demand Management (TDM). New development and on-going programs should reduce Downtown car use, support alternative travel modes, and consolidate publicly-accessible parking facilities and Transportation Demand Management (TDM) programs (see requirements under Policy LU-2.1).

a) A fee requirement should be established to support alternative modes (i.e. transit, walking & bicycling) and Transportation Demand Management programs. Parking requirements for new development may be reduced by paying an in lieu fee into a fund to enhance transit, which might be contained within the Streets and Open Space Improvement Plan (SOSIP); in lieu payments for parking should be encouraged.

b) See Policy ED-12.1 – Revenues for Downtown, regarding revenues to reduce Downtown car use, while simultaneously supporting the parking needs of local merchants and cultural/entertainment uses. Consider raising on-going TDM revenues through the creation of a Downtown Transportation Benefits District.

c) Develop a finance strategy to evaluate potential transportation-related revenues and compare their financial capacity with the costs of potential Downtown improvements, maintenance and services. The finance strategy should set near-term priorities for improvements based on public input and other considerations.

d) Require that new buildings and substantial additions support alternative transportation as identified in Policy LU-2.1c. The City should help small businesses and smaller development projects qualify for discounted transit passes, such as by working directly with AC Transit or by encouraging the formation of an association assigned with this mission.

e) Develop a TDM “toolbox” for new development that explains TDM requirements, and encourages other TDM features such as: showers for bike commuters, bicycle sharing kiosks, and plug-in facilities for electric vehicles.

f) Encourage all Downtown businesses to reward customers and employees who arrive by transit, by bicycle, or on foot, or who use off-street garages instead of on-street parking, such as with merchant validation programs and other incentives.

GOAL AC-2: GIVE PEDESTRIANS PRIORITY IN DOWNTOWN, AND MAKE WALKING DOWNTOWN SAFE, ATTRACTIVE, EASY AND CONVENIENT FOR PEOPLE OF ALL AGES AND ABILITIES.

Policy AC-2.1: Pedestrian Safety and Amenities. Improve the safety, attractiveness and convenience of pedestrian routes within Downtown – and to and from surrounding areas. Encourage a wide range of pedestrian amenities to meet the needs and interests of those who live and work in and near Downtown (see policies under Goals HD-4 and in the Streets and Open Space chapter).

a) Adopt a Streets and Open Space Improvement Plan with policies and implementing

actions, including provisions for adequate sidewalk width, shortening pedestrian crossing distances at intersections, and new mid-block pedestrian crosswalks where justified by high volumes of pedestrians and a long distance between intersections.

b) To reduce pedestrian-vehicle conflicts, minimize driveway curb cuts to the extent feasible, and where they must occur: avoid making driveways too wide or creating uneven surfaces where driveways cross sidewalks.

c) Maintain sidewalks, crosswalks, plazas, and other pedestrian environments so that they are safe, clean and in good repair.

d) Regularly evaluate indicators of pedestrian safety, and adjust implementation priorities to improve pedestrian safety.

Policy AC-2.2: Universal Access. Provide safe access to all Downtown streets and pathways for people of all abilities.

a) Use regulation and incentives to require and/or encourage universal accessibility upgrades for private businesses when significant modifications to structures are made.

b) Consider grants, low-cost loans, technical assistance and/or other incentives for businesses to correct unacceptable conditions, where significant modifications to existing buildings are not expected.

GOAL AC-3: PROVIDE PARKING TO MEET THE NEEDS OF DOWNTOWN, WHILE DISCOURAGING COMMUTER PARKING AND ENCOURAGING MOTORISTS TO PARK THEIR CARS AND EXPERIENCE DOWNTOWN AS A PEDESTRIAN.

Policy AC-3.1: Effective Parking. Manage parking more effectively to promote Downtown economic vitality while simultaneously discouraging all-day parking. Parking standards should support the continued health of Downtown's retail and cultural uses.

a) Effective parking management should be encouraged by developing a consolidated Parking/Transportation Demand Management (PTDM) program. Employ pay-and-display meters and/or other technology to increase the City's ability to manage the demand for on-street parking spaces.

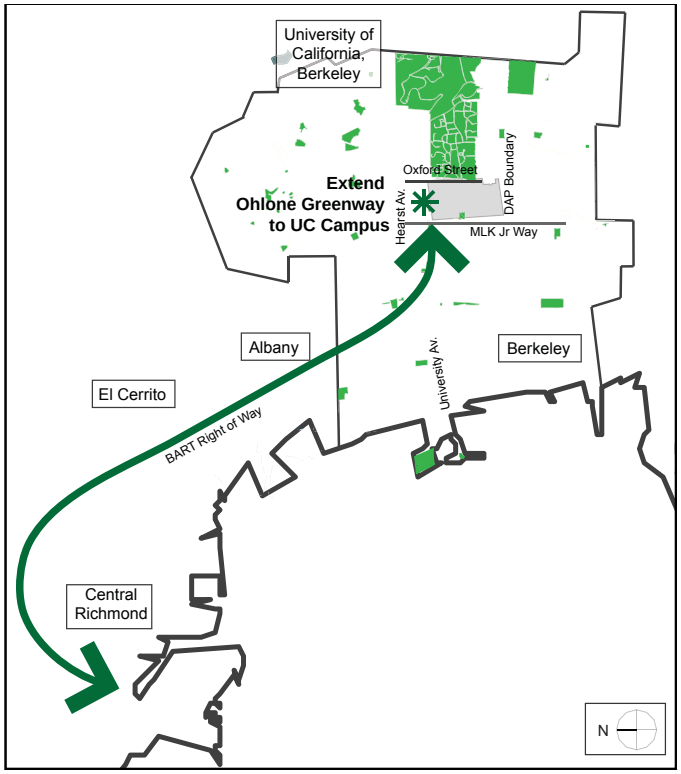
b) Promote efficient use of parking by using technologies that communicate the location of available parking, such as dynamic and static signage that directs motorists to where garage parking is available. Consider technologies that provide real-time information on parking space availability and location.

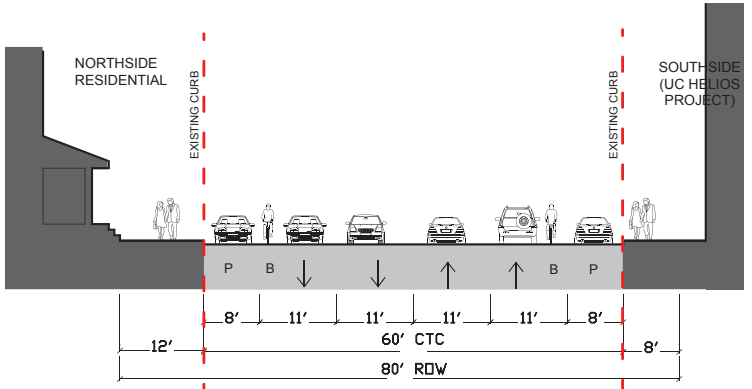
c) Use pricing strategies that increase the availability of on-street and short-term parking for retail and cultural uses – while simultaneously discouraging all-day parking by commuters. Increase pricing at on-street meters throughout Downtown until an acceptable vacancy rate is attained (such as a 15% vacancy rate). Authorize the Transportation Division to adjust parking rates whenever necessary to reach and maintain the established vacancy-rate target. Price public garages and encourage private parking vendors to make off-street parking more affordable and convenient relative to on-street parking, and favor short-term (less than 4 hours) over all-day use. Phase out monthly parking permits in City-owned Downtown parking facilities.

d) Encourage employers who provide free parking as an employee benefit to promote a cash allowance instead. (State law requires

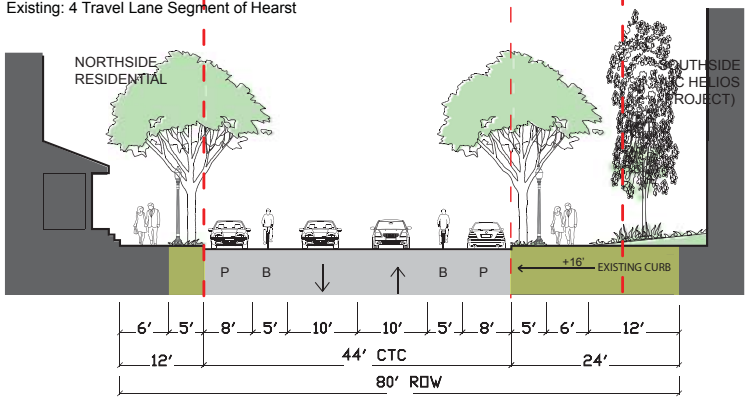
Ohlone Greenway

The Ohlone Greenway stretches more than three miles from the intersection of Hearst and MLK to central Richmond. The eastern portion of the Greenway runs through land that was acquired for the construction of BART, and then runs along a former rail line right-of-way through Albany, El Cerrito, and Richmond. The path is named for the Ohlone Indians, the pre-European inhabitants of the area.





Existing: 4 Travel Lane Segment of Hearst



Design Concept: Travel Lanes with New Bike Lane + Landscaping

employers who subsidize employee parking to offer a cash allowance to each employee in lieu of an assigned parking space.)

e) Off-street parking spaces for new housing units shall be leased or sold separately from the residence.

f) Encourage the City Manager to phase out parking assigned to City staff for their privately-owned vehicles, and to park vehicles needed for City business in locations outside of the Downtown Area or on the upper floors of off-street facilities.

g) Continue and expand flat prepaid rates (i.e., paid upon entrance) to prevent long queues upon exiting public and private parking garages after evening performances.

Policy AC-3.2: New Parking. Provide sufficient parking for expected growth by evaluating future parking needs, funding parking facilities, and promoting alternatives to the car. In addition, replace on-street parking lost to street and other improvements within off-street garages. Consolidate parking in shared facilities to the extent possible.

a) Parking facilities should be planned as part of a Parking/TDM program to address future parking needs, replace on-street parking lost to improvements, and evaluate locations for potential parking garages, and encourage visitors to park once and experience Downtown on foot and/or via low-cost shuttles/transit (see Policy AC-4.5).

b) Allow fees to be paid in lieu of on-site parking, and apply revenues toward transit enhancements (see Policy AC-1.3). Encourage developers to pay fees in lieu of on-site parking, especially commercial projects that bring large numbers of new commuters Downtown.

c) Consider revisions to parking standards and programs to better accomplish policies of the DAP. Analyze such revisions as part of a consolidated Parking/TDM program and as a way to reduce impediments to the preservation and the adaptive reuse of historic buildings.

d) Prohibit new driveways on Shattuck and University Avenues in Downtown except when it can be demonstrated that no other site-access options exist or where other alternatives would have greater negative impacts.

e) Monitor the amount of on-site parking that new development includes and, if excessive, develop standards for maximum allowable on-site parking.

f) Expand electric car and hybrid plug-in location through standards and guidelines, and encourage their connection to local renewable energy sources.

g) New development should provide effective parking and TDM measures (see Policy LU-2.1 and AC-1.3).

Policy AC-3.3: Pedestrian Impacts. Locate and design new parking in ways that minimize negative impacts upon the pedestrian quality of Downtown (see Policy HD-4.1).

a) With new development, discourage parking on-site to increase space available for street-level retail and activity.

b) Minimize driveway curb cuts to make Downtown more safe and attractive for pedestrians. Locate, design, and size entrances and exits to parking to minimize impact on the pedestrian realm, such as through traffic management, exit mirrors, and warning lights.

Figure AC-5: First Curb Cut. *The first curb cut in the United States was pioneered by the disability rights leader Ed Roberts in 1970, and is situated on the street corner adjacent to the Wells Fargo Bank.*

Curb cuts allow someone in a wheelchair to move onto or off a sidewalk without difficulty. The Berkeley community continues to play a pivotal role in advocating for universal access by people of all abilities. Staff photo.

c) Consolidate parking to minimize visual and other negative impacts from parking. Enlarge the capacity of existing parking garages as feasible, through management practices and/or physical improvements.

d) Discourage use of more than 25% of a building's street-level area for parking. Place parking below grade when feasible. When below-grade parking is deemed infeasible, above-grade parking structures should face streets and public open spaces in ways that support pedestrian safety and activity. Surface parking should be prohibited along streets.

Policy AC-3.4: University Cooperation. Encourage the University to review existing parking programs, and work with the University in developing comprehensive parking strategies for: planning parking facilities, managing parking more effectively, and making more UC parking available to the public (see Policies AC-3.1).

a) Work with the University to coordinate optimum parking rates and locations, and possible development of shared facilities at: the DHS site, the Berkeley Art Museum and Pacific Film Archive site, the Tang site, University property west of University Hall, and the site at the corner of Oxford and University.

b) Encourage underground parking in all locations considered by UC, to maximize use of above-ground space for other uses.

c) Encourage the University to locate replacement parking for parking eliminated on campus to a Downtown site where parking can be shared, but not in excess of what is called for under UC Berkeley's Long Range Development Plan.

Policy AC-3.5: Equitable Access. Mitigate impacts of transportation measures that make access to Downtown more difficult for low-income Berkeleyans.

a) Consider provisions for transit passes, bicycles, and subsidized carsharing to low-income residents as an affordable alternative to driving to Downtown.

b) To accommodate low income Berkeley households and individuals accessing social and health services, consider transit or parking vouchers for off-street public parking facilities.

Policy AC-3.6: Residential Parking. In residential neighborhoods near Downtown where parking demand by non-residents is high, maintain an adequate supply of on-street parking for use by residents and reduce impacts of parking by non-residents.

a) Establish measures for managing parking demand by non-residents more effectively, such as: installation of metered parking, the use of residential parking permits or placing residential permit parking on one side of the street with parking meters on the other side.

b) See Policy ED-12.1 – Revenues for Downtown, regarding improvements in residential neighborhoods.

GOAL AC-4: PROMOTE TRANSIT AS AN EFFICIENT AND ATTRACTIVE CHOICE – AND AS A PRIMARY MODE OF MOTOR-VEHICLE TRAVEL.

Policy AC-4.1: Transit Priority. Promote transit as the primary mode for commuting to and from Downtown, and give transit priority over personal vehicles. Encourage use of transit by area businesses, institutions, and residents.

The City strongly supports improved local and regional transit service to and from Downtown.

a) Require that new development provides bus passes and promotes use of alternative modes (see Policies LU-2.1 and AC-1.3).

b) Work collaboratively with Downtown employers, institutions, and organizations (including major employers such as the City of Berkeley, UC Berkeley, Berkeley Unified School District, Berkeley City College, Berkeley Unified School District, Lawrence Berkeley National Laboratory, and Alta Bates Medical Center) to adopt aggressive TDM programs and facilities that reduce automobile use by staff, faculty and students.

c) Require that Downtown businesses provide bus passes to employees and pre-tax commute-by-transit vouchers. Work with businesses and institutions to expand guaranteed-ride-home programs for employees who use transit. Encourage Downtown employers to provide other subsidies for bicycling, walking and public transit use. Encourage Berkeley Unified School District and Peralta Community College to participate in such programs or to establish their own programs to reduce automobile use by faculty and staff.

d) Encourage retail, restaurant, theater, cinema, and cultural uses to promote transit, possibly by providing transit refunds or vouchers. Examine examples of transit validation programs for these uses, and consider implementation of similar programs Downtown. Encourage AC Transit, BART, and other transit providers to increase evening service to Downtown. Work with these providers to improve nighttime conditions near transit stops that affect safety, such as lighting and visual access.

Policy AC-4.2: Attractive Transit. Make transit an efficient and attractive choice by improving speed, reliability, pedestrian safety, and comfort. Improve transit options and give transit priority over personal vehicles.

a) Give consideration to transit-supportive street and facility improvements in the Downtown Area, in collaboration with AC Transit, other transit providers and community stakeholders. Implement “complete streets” concepts that enhance pedestrian and bicycle routes to transit. Other beneficial improvements might include: transit signal priority, queue jump lanes, left turn phasing, improvements to bus shelters, bus curb extensions, bus stop amenities, pre-pay fare vending machines, superior bus stop locations, concrete bus pads, and raised platforms. Address daytime and nighttime conditions that may discourage transit use.

b) Consult with AC Transit about Downtown circulation proposals that could degrade transit service, so that potential impacts can be evaluated and addressed. Street improvements should be designed to avoid an appreciable decline in bus travel times and reliability.

c) Work with AC Transit and shuttle providers to identify suitable bus stops and layover locations. Consider the integration of bus facilities within City, University, and/or private projects.

d) Avoid bus stop and layover locations that interrupt pedestrian movement or block clear views of sidewalks, plazas or storefronts. Give careful consideration to trade-offs between facilitating bus turning movements and other operations versus reductions in on-street parking supply, landscaping, and sidewalks.

e) Engage community stakeholders, especially those representing Downtown interests.

f) Work with AC Transit and shuttle providers to maintain safe, attractive and weather-protected bus stops. Encourage frequent maintenance, graffiti abatement, and the elimination of unsafe conditions. Alert responsible agencies when bus stops may be unsafe or are in poor repair.

g) Support citywide and regional efforts to improve transit service:

- Encourage AC Transit, BART, and other transit providers to improve transit reliability and shorten travel times and headways (i.e., the wait time for buses and trains).
- Encourage BART to improve the frequency of weekend service to and from Downtown, and to consider late night service.
- Encourage AC Transit to implement a pre-pay fare system and other improvements that will shorten boarding times.
- Consider the possibility of a transit fare-free zone in Downtown or a larger area, potentially funded through a local tax measure.
- Consider how enhanced bus service might be extended west on University Avenue and/or north on Shattuck Avenue, and avoid improvements that might preclude such options.
- Work with transit providers to improve access to Downtown from eastern Alameda and Contra Costa Counties, and other locations where large numbers of Downtown-bound trips originate. For example, AC Transit might consider park-and-ride facilities in locations that will encourage people who start their trip by car to transfer to transit before reaching Downtown.
- Support AC Transit and BART in their efforts to receive increased federal and state funding.
- Encourage AC Transit and BART to make transit as affordable as possible.

Policy AC-4.3: Transit Center. Improve access to BART and enhance the Downtown BART Station as a transportation hub for AC Transit and other transit providers.

a) Explore alternatives for creating a Downtown Transit Center to link AC Transit to other modes, including shuttles, taxis, bicycles and bike rentals, arrival by car, and walking. Consider how bus turn-around, boarding platforms, and visitor information facilities might be incorporated. The transit center should speed boarding and transfers, but should not be used for bus layovers. Transit center improvements should result in an inviting, pedestrian-friendly place with negative impacts from buses mitigated to the extent possible.

b) Enhance access to BART on foot and by bike (see Policy AC-4.2). Improve the BART Plaza's function as a transit hub by implementing improvements that make it more pedestrian-friendly (see Policy OS-1.1).

Policy AC-4.4: Transit and Bikes. Encourage bicycle access to Downtown for local and regional transit trips.

a) Increase high-capacity bicycle parking near BART and other major transit stops.

b) Support the expansion of the Downtown Berkeley bicycle station and high-quality bicycle storage facilities in other transit-accessible locations.

c) Encourage transit providers to expand bicycle access on transit vehicles, including increased storage on trains and buses.

Policy AC-4.5: Local Transit & Shuttle Connections. Improve transit and shuttle connections between Downtown, University destinations, and Berkeley neighborhoods, especially connections to: neighborhood commercial areas, facilities for transit-dependent residents, concentrations of potential but poorly-served riders, and areas with concentrations of single-occupancy vehicle (SOV) trips.

a) Work with AC Transit, UC Berkeley, LBNL, Alta Bates, and lifeline service to improve shuttle service and consider ways that they can:

- attract users now driving regularly to the UC campus and/or Downtown thereby reducing parking demand;
- connect multiple points Downtown with each other and with other local destinations, including Telegraph retail, north Shattuck retail, and University destinations;
- build upon existing shuttle systems to expand shuttle service sooner;
- undertake an effective public information campaign to advertise new service as it is made available; and
- schedule shuttles on regular routes and/or make them demand-responsive, depending on the needs of users.

b) Consider how Rapid Bus and other service enhancements can be extended west on University Avenue and/or north on Shattuck Avenue.

c) Consider the possibility of a transit fare-free zone in Downtown or a larger area (such as Telegraph Avenue), potentially funded through a local tax measure.

d) Collaborate with AC Transit and shuttle providers to identify and obtain funds to improve service to areas with high-concentrations of transit-dependent residents, as well as underserved areas where large numbers of commuters drive regularly to the UC campus and/or Downtown.

e) Develop a shuttle funding and operations strategy with the University. Funding sources might include:

- replacement or reassignment of some existing services;
- mitigation funds from new development;
- assessments in lieu of new parking;
- a surcharge on fees for off-street parking; a charge for multiple car ownership;
- capital grants for carbon neutral vehicles;
- jobs or work/study program funding for drivers' salaries;

- fares prepaid by institutions/employers; and/or

- a parking benefits district.

f) To the extent feasible, use low-carbon fuels and promote shuttles as a way for people to reduce their carbon footprint and meet Climate Action Plan goals.

Policy AC-4.6: Paratransit. Accommodate taxi service and on-demand transport service providers.

a) Incorporate a location for taxis when making improvements near BART.

b) Consult with on-demand transport service providers- such as public transit agencies, community groups, hospitals, and businesses, especially those serving Berkeley's disabled community- to see how their needs can be better met.

Policy AC-4.7: Events. Give priority to transit during major events so as to reduce traffic congestion, such as during Cal football games, Berkeley High School morning drop-off, cultural events, etc.

a) Work with AC Transit and other transit operators to consider how transit operations, measures, and programs might be refined to reduce acute short-term traffic congestion.

b) Pursue joint marketing campaigns with transit agencies and event sponsors promoting alternative ways to get to city events in Downtown.

Policy AC-4.8: Transit-Supportive Uses. Concentrate housing, jobs, and cultural destinations within Downtown, to be near transit, shops and amenities, while simultaneously enhancing Downtown's character and livability (see policies under Goals LU-1 and ED-1).

GOAL AC-5: MAINTAIN AND ENHANCE SAFE, ATTRACTIVE AND CONVENIENT BICYCLE CIRCULATION WITHIN DOWNTOWN, AND TO AND FROM SURROUNDING AREAS, FOR PEOPLE OF ALL AGES AND ABILITIES. PROMOTE BICYCLING DOWNTOWN.

Policy AC-5.1: Bike Network Improvements. Give bicycles priority over personal vehicles on many streets Downtown. Make bicycling safer and more convenient in and through Downtown by making improvements to Berkeley's and Downtown's bicycle network. Provide bikeways on low-speed low-traffic streets and bike lanes where appropriate. Address the needs of bicyclists of all ages and abilities.

a) Adopt a Downtown Streets & Open Space Improvement Plan with specific policies and actions relating to bike network improvements.

b) Consider locations in Downtown where bike-activated traffic lights would improve safety and convenience along streets with higher levels of bicycle use.

Policy AC-5.2: Bicycle Parking. Increase the availability of convenient, secure and attractive short- and long-term bicycle parking throughout Downtown.

a) Increase the availability of secured bicycle parking throughout Downtown, particularly in areas of high use, including bicycle parking options that are sheltered and/or attended.

b) Increase availability of bicycle racks throughout Downtown, especially where parking meter poles are removed.

c) Provide sufficient bicycle parking near transit centers and major destinations (see Policy AC-4.4).

d) Promote the creation of an at-grade attended or automated bicycle-parking service. Work with BART to consider replacing the existing bicycle station with a joint City/BART aboveground facility, perhaps in a storefront on Shattuck Avenue.

e) Require the provision of secure bicycle parking facilities by new development projects (and major renovations), both public and private.

Policy AC-5.3: Bike Sharing. Promote convenient "bike sharing" options (i.e., short-term bike rentals) and their use by employees, residents, and visitors – especially near BART.

a) Publicize available bike rentals in Downtown, such as at the Berkeley Bike Station.

b) Identify criteria for the design, program and location of new bike sharing facilities. Solicit proposals from bike share providers for facilities consistent with these criteria. Give special consideration to locations near BART.

Policy AC-5.4: Business & Institutional Support. Make it easier for Downtown employees to commute by bike, especially employees of the City, University, and BUSD.

a) Require new office and retail construction and substantial renovations to provide showers and lockers for employees, so that bicyclists can change into work clothes at their destinations.

b) Study the feasibility of subsidizing the cost of bicycles for Downtown employees. Work with Downtown employers and bicycle merchants to explore the potential for discounts for the purchase of bicycles.

c) If bike sharing is established, consider reducing the cost of bike sharing for Downtown employees and others.

d) Enhance the City's own bicycle program for City employees.

5 - HISTORIC PRESERVATION & URBAN DESIGN

5. HISTORIC PRESERVATION AND URBAN DESIGN

STRATEGIC STATEMENT

Berkeley has one of the few examples in California of a substantially intact pre-World War II downtown of its size. Sections of Downtown remain much as they were in the 1920s and 1930s. Our Downtown has an exemplary and vital heritage of historic buildings in a wide variety of architectural styles and scales. The scale, massing, and visual character of many historic buildings remain. Downtown buildings also relate to streets in traditional ways, with commercial ground floors fronting directly onto the public sidewalk and thereby maintaining continuous intimate pedestrian scale, in contrast to deep setbacks found in suburban settings.

While Downtown's historic assets are significant, Downtown is an incomplete and unfinished cityscape. It has many underused and nondescript properties, and it needs many public improvements. New development can bring many benefits, including new residents, affordable housing, environmental sustainability, and a renewed sense of vitality.

HISTORIC PRESERVATION AND NEW DEVELOPMENT

Policies of the Downtown Area Plan seek to harmonize and balance the twin goals of preserving and enhancing historic resources, and encouraging new and complementary development. It is fundamental to this Plan that, with appropriate design guidelines and regulations, both goals can be achieved and complement each other. The character of new development must be considered through the lens of good urban design and consideration for Downtown's historic settings. Context – geographic and cultural – presents critical design considerations that help lead to projects that fit the place. In addition, through continued care and investment, historic buildings and good urban design will continue to contribute continuity and character to Downtown's changing yet principled cityscape.

Preservation planning and the continued utilization of historic resources are critical in the following ways:

- Preservation helps retain a community's distinct character and sense of place, and creates a tie with the past that establishes community and builds roots. The tangible presence of historic buildings and places speaks of other times and people and enables us to chart paths to the present and future.

- Berkeley can capitalize on Downtown's potential for cultural tourism by celebrating its historic character through civic improvements and ongoing programs and activities.

- Conserving existing buildings can be part of a "green" strategy, as preservation and rehabilitation use fewer natural resources and less "embodied" energy than new construction, and keep demolition waste out of landfills.

Facing Page: *Downtown features taller buildings, including the Wells Fargo Building built in 1925 (at left), and may include new buildings of similar height or somewhat greater height in the case of hotels (at right). Images courtesy BAHA (left) and Cambridge Seven Associates (right).*

Figure HD-1: Berkeley Station Looking Southwest in 1910. *Image courtesy of BAHA.*

- Studies show that historic preservation is good for the economy and for property values.

- Older buildings tend to offer distinctive retail spaces with special facade character, taller ceiling heights, and deeper retail space.

- Older buildings provide much of Berkeley's most affordable and most family-friendly housing.

Appropriate new development and urban design policies also offer critical benefits:

- New construction can fill the gaps within our historic Downtown, heal the scars posed by unsightly properties, and strengthen and help energize the cityscape.

- New construction, and the renovation and adaptive reuse of existing buildings, can provide needed new housing.

Figure HD-2: Shattuck Avenue Looking North circa 1940. *Image courtesy of BAHA.*

- New construction, renovation, and adaptive reuse can embody and exemplify new ideas such as energy-saving designs or innovative construction techniques.

- New construction, renovation, and adaptive reuse give needed scope for the exercise of design talents and creativity.

- New construction, renovation, and reuse can help revitalize Downtown's economy by bringing people who will support local shops and cultural uses.

- Street and open space improvements can enhance Downtown, by complementing the best aspects of its present character and by offering public places for our enjoyment.

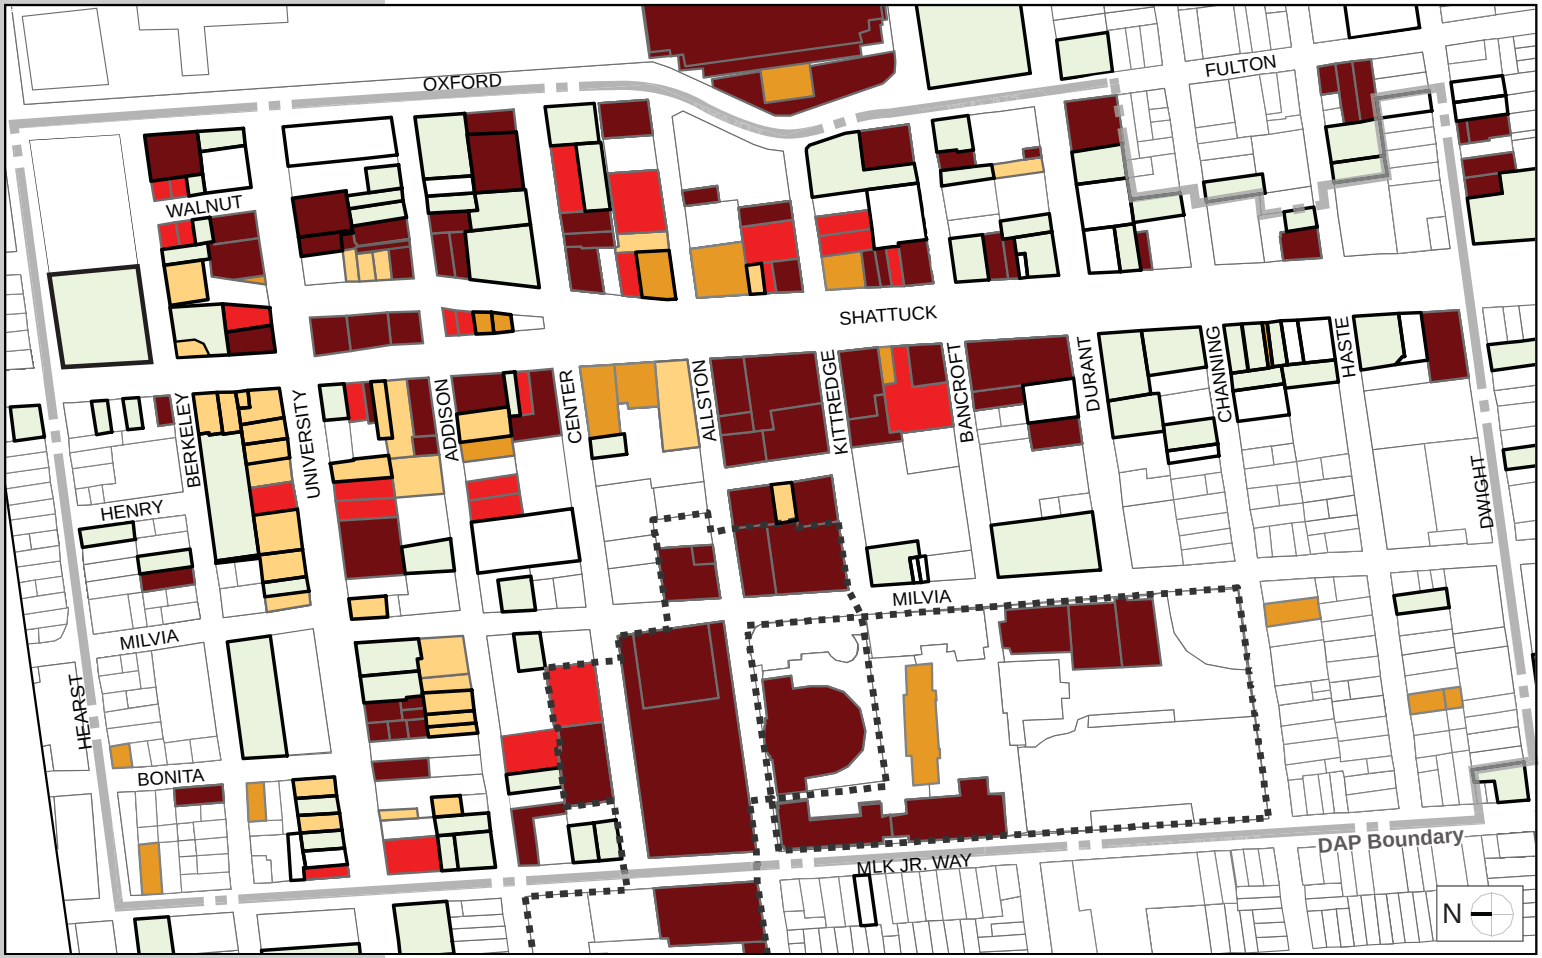
- Through fees and taxes that it generates, new development can support public street and open space improvements and help to finance affordable housing.

FIGURE HD-3: Historic Resources, Noteworthy Buildings and Potential Development Opportunity Sites

Designated Landmark or Structure of Merit
Significant per both 1993 LPC List and 1994 Design Guidelines
Building on SHRI
Other Building called Contributing or Significant by BAHA Report, 1990 Downtown Plan, LPC List, or Design Guidelines

Development Opportunity Site (indicated by heavy outline around site)
Development Opportunity Site apparently containing no Historic Resource
Civic Center Historic District and Berkeley High School Campus

As of March 25, 2009. While the map is generally accurate the status of any individual parcel should be verified. (For site-specific information see the DAP Reconnaisance Survey Matrix.)



DOWNTOWN'S HISTORICAL EVOLUTION

In the mid-19th century Francis Kittredge Shattuck and George Blake acquired large landholdings, flanking today's Shattuck Avenue, that would include most of the 2011 Downtown Plan area. Downtown's early development was stimulated especially by the opening of a railroad branch line in 1876 to stations that were located at Dwight Way and at what is now known as Berkeley Square. Shattuck Avenue's unusual width accommodated the train tracks in addition to horses, carriages, and pedestrians. The City of Berkeley was incorporated in 1878, by which time most of Downtown's street pattern had been established.

In the 20th century's first three decades, dramatic growth and rebuilding were stimulated by electric rail service, which linked Berkeley to Oakland and (by ferryboats) San Francisco; by resettlement of San Franciscans to the East Bay after the 1906 earthquake and fire; and by growth of the University. There was much less development during the Great Depression, although some of Downtown's finest historic buildings such as the Public Library and the Kress building date from the 1930s.

Downtown Berkeley escaped the wholesale redevelopment that scarred many California cities during the 1960s and 1970s. Some demolition and new construction did occur along Shattuck during the BART construction era, from about 1966 to 1973, when two early-1900s large structures at Shattuck and Center were torn down and replaced by the present high-rise Great Western building and suburban-style Bank of America building. But recent development has occurred mainly on side streets east and west of Shattuck, or on Shattuck's lower portion south of Durant. The scale, massing, and visual character of most of Shattuck's own frontages – and many other parts of the plan area – remain much as they were in the 1920s or 1930s. Downtown's character is largely due to the fact that so many of its buildings were constructed between 1900 and 1941 and so many of them have basically retained their historic appearance. They also relate to the street in traditional urban ways in keeping with the character of their time.

PRESERVATION CONTROLS AND DESIGN GUIDELINES

Partially in response to the demolition of some important historic buildings in Downtown, the City adopted the Landmarks Preservation Ordinance (LPO) in 1974. This ordinance authorizes the Landmarks Preservation Commission (LPC) to designate properties as Landmarks, Structures of Merit, or Historic Districts and gives it regulatory power over the properties it designates. Many properties within the expanded Downtown Plan area have been designated as Landmarks or Structures of Merit.

Nine properties (all of them also City-designated Landmarks) have gone through the separate process to be individually listed on the National Register of Historic Places.

The City has under the LPO designated the Civic Center Historic District, which is also listed on the National Register. The high school's campus constitutes the Berkeley High School Historic District, which is on the National Register but has not been designated as a district under the LPO.

In 1994 the Planning Commission adopted "Downtown Berkeley Design Guidelines". This document has continued to provide valuable guidance on diverse aspects of both alterations and new construction.

SURVEYS AND LISTS

Several surveys of historic resources have been conducted for Downtown.

In 1977-1979 the Berkeley Architectural Heritage Association (BAHA) in conjunction with the City, with grants from the State Office of Historic Preservation and the San Francisco Foundation, did a well-regarded, representative but not exhaustive survey and documentation of historic resources in Berkeley. It gathered significant information on many Downtown buildings.

In 1987 BAHA assembled available information on Downtown historic resources into a report entitled "Historic Survey of Downtown". The report included maps, one of which showed properties it classified as:

- "City Landmarks" (and in some cases also "National Register"),
- "Included on State Inventory [but not landmarked]," or
- "Contributing."

"Contributing" properties were defined in BAHA's 1987 report as "Properties [that] could be considered contributing to the existing fabric of downtown by virtue of age, scale, height, massing, materials."

The 1990 Downtown Plan referenced BAHA's "Historic Survey of Downtown" report, and included a map with three resource categories:

- "Landmark Building – City and/or National Register,"
- "Significant Structure (BAHA)," or
- "Contributing Structure (BAHA)."

In 1993 the Landmarks Preservation Commission adopted a list entitled "Historically Significant Buildings in the Downtown" that "have been either officially designated City of Berkeley Landmarks or appear to be eligible for designation, based on preliminary research...because of their cultural, architectural or historic contribution to the city, state or nation".

The 1994 Downtown Berkeley Design Guidelines contains lists of "Landmark Buildings" and "Significant Buildings," and a map depicting these.

In 2006, Architectural Resources Group (ARG) was selected by the City to evaluate and advise regarding historic resources in the expanded Downtown Area. ARG produced a set of "Context Statements," organized by historic themes such as "Transportation," "Commercial Architecture," "Residential Development," and "Health and Medicine." ARG also conducted a "Reconnaissance Survey" involving roughly 500 structures within the Downtown Area, as well as about 100 located just outside its boundaries. ARG provided a preliminary evaluation of the integrity of potential historic resources.

SUMMARY MAP

Figure HD-3, Historic Resources, Noteworthy Buildings and Potential Development Opportunity Sites, provides a partial summary of the overall situation as of March 2009. It indicates the following classes of individual properties:

- "Designated Landmark or Structure of Merit." This includes the properties so designated by March 2009.
- "Significant per BOTH 1993 LPC List and 1994 Design Guidelines." These

are properties (other than those that have been designated as Landmarks or Structures of Merit) that were included in the 1993 LPC list of significant buildings as well as in the 1994 Design Guidelines' list of significant buildings.

- "Building on the SHRI." This consists of buildings (other than those in the map's above two categories) that were recorded by the State Historic Resources Inventory of 1977-1979.

- "Other Building Called Contributing or Significant by BAHA Report, 1990 Downtown Plan, LPC List, and/or Design Guidelines." Many of these are buildings were identified as "contributing" by the 1990 Downtown Plan.

- "Development Opportunity Site Apparently Containing No Historic Resource." The mapping of these sites is tentative and illustrative. Nearly all of them involve one-story buildings, parking lots or other open uses, or vacant land. A few properties with two-or-more-story buildings are shown in special cases, including some buildings that are very near the BART station or that have serious seismic problems.

Figure HD-3 also depicts the boundaries of the Civic Center Historic District and the Berkeley High School Historic District.

In the future, additional properties will be designated or documented as historic. On the other hand, some of the properties that were noted as "contributing" or "significant" only by the 1987 BAHA report and/or 1990 Downtown Plan may – upon further analysis – be deemed to be not historic.

SUBAREAS AND CONTEXTUAL DESIGN

The cityscape of Downtown contains numerous and diverse subareas. Some of them have a strong visual identity, and these involve noticeable concentrations of historic buildings. Downtown's most important historic subarea generally includes the buildings along Shattuck Avenue from about University to Durant, as well as some buildings on side streets. Despite some unfortunate remodelings, this "main street" has retained its basic visual character. Another particularly important historic subarea is the Civic Center.

Some other parts of Downtown contain fewer historic buildings and lack a strong visual identity. Substantial demolition and rebuilding has occurred since 1950 along many side streets, where parking lots and other underutilized sites interrupt the urban fabric.

A balanced urban design strategy should include both preservation and infill, and should:

- conserve the character of subareas that have a strong historic identity, while recognizing that sensitive infill development and, in appropriate cases, additions to designated Landmarks can occur; and

- channel much of Downtown's new development into sections now lacking a strong visual identity.

The answer to "What should a new building look like?" will vary from place to place.

Two different urban design approaches are needed: one for subareas that have a strong historic character, and one for Downtown development outside those subareas.

In subareas where historic resources are concentrated, designers should pay special attention to a project's context, including the character of adjacent properties and the subarea as a whole. The Downtown Design Guidelines should be strengthened to better protect and reinforce the overall character of these subareas. In addition, the Landmarks Preservation Commission should evaluate subareas, including residential ones, to determine whether any additional subareas should be designated as Historic Districts. Recent years' additions to the Berkeley Main Library and the Francis K. Shattuck Building (at 2100 Shattuck) illustrate how sensitive design and development can both respect and enhance a historic subarea.

For subareas without historic character, historic evaluations, design review, and landmarking should be used to protect individual historic buildings and the general Downtown cityscape, while allowing for a lively variety of good architecture.

In all commercial and mixed-use subareas, the Downtown Design Guidelines should be amended and applied to attract demographic diversity, encourage economically viable retail space, provide on-site open space, mitigate impacts from parking garages, promote public safety, and promote resource-efficiency and sustainable practices (see Goal HD-4). Development should reinforce the character of Downtown's commercial and mixed-use streets by bringing buildings up to the sidewalk, maintaining continuous storefronts, continuing dominant rhythms for structural bays or bay windows, and continuing dominant cornice lines. While contextual design can be perceived as limiting, solutions can be highly creative.

URBAN DESIGN THROUGH BUILDING STANDARDS AND PUBLIC IMPROVEMENTS

DAP urban design objectives should inform zoning regulations, not the least of which address building heights, setbacks, and street-level uses. New "character-based" provisions should spell out desirable and measurable urban relationships, such as the ways that buildings should face streets and make them more active, safe, and attractive.

Improvements to Downtown's public realm of streets and open spaces are also vital. Public improvements should be appropriate to Downtown's historic settings and enhance Downtown as a place to live, work, shop, learn, or play (see Streets and Open Space chapter).

THE UNIVERSITY'S ROLE

The University, as with any developer within Downtown, should support urban design objectives through its development, to the joint benefit of town and gown. UC development should be integrated closely and sensitively into the traditional urban fabric of Downtown.

Where it owns historic buildings, the University should maintain the significant parts of these buildings' character and integrate any remodeling and/or additions following the Secretary of the Interior's Standards. Where it plans for new buildings, the University should itself include suitable landscape features that relate Downtown to the main campus's green features.

Furthermore, significant open space and streetscape opportunities exist for coordinating City actions and University actions. One such opportunity is to reduce the number of auto lanes on the east-of-Shattuck segment of Hearst Avenue, create bicycle lanes there, and provide truly substantial adjacent landscaping (see what the Streets and Open Space chapter says about extending the Ohlone Greenway).

GOALS, POLICIES & ACTIONS

GOAL HD-1: CONSERVE DOWNTOWN'S HISTORIC RESOURCES AND UNIQUE CHARACTER AND SENSE OF PLACE.

Policy HD-1.1: Historic Buildings & Sites. Preserve historic buildings and sites of Downtown, and provide where appropriate for their adaptive reuse and/or intensification.[2]

a) Retain Landmarks and Structures of Merit in Downtown. Designate, where appropriate, additional properties as Landmarks or Structures of Merit.

b) When evaluating potential modifications, adaptive reuse or intensification of designated or sufficiently documented historic resources, in addition to applying the Landmarks Preservation Ordinance, the proposed work must also be evaluated for conformance with the Secretary of the Interior's Standards for the Treatment of Historic Properties with Guidelines for Preserving, Rehabilitating, Restoring, and Reconstructing Historic Buildings. Where applicable, the Secretary of the Interior's Standards for the Treatment of Historic Properties with Guidelines for the Treatment of Cultural Landscapes, must also be applied. At a minimum, historic facades should be maintained and/or rehabilitated and the scale and character of additions must be compatible with the historic building.

c) For the most common practices and alterations, compile reference materials that describe appropriate maintenance and façade improvements document, and where additional information can be obtained. Develop materials using community participation. Make these materials available to property owners, contractors, and architects.

Figure HD-4: Adaptive Reuse & Intensification. *The bottom three stories of the Francis K. Shattuck Building were built in 1901 and were renovated in 2000 at the same time as when a new fourth story was added. Staff photo*

[2] *Additional analysis will be needed to determine with certainty the merit of resources that were noted as "Contributing" (and in some cases noted as "Significant") in the 1990 Plan but that have not been designated as Landmarks or Structures of Merit, or documented as historic resources. Ongoing efforts and analysis may elevate some of these to be designated Landmarks or Structures of Merit. Other undesignated properties that were noted as "Contributing" or "Significant" in the 1990 Plan may be deemed to be not historic after evaluation required under CEQA and vetting through local procedures.*

Figure HD-5: Historic Context & Green Features. *The Fine Arts Building furthers a tradition of Art Deco buildings Downtown, and incorporates in a sympathetic way green features for energy efficiency, such as light shelves that bounce daylight deeply into interior spaces. Staff photos*

d) Allow flexibility in parking and other standards, such as exemption from on-site open space requirements, when such buildings are substantially and appropriately preserved or restored as part of a development project. Review and, if necessary, revise standards that may discourage historic rehabilitation and adaptive reuse. Identify potential sources of financing, tax relief (such as through the Mills Act), grants, and a full range of other incentives and resources for historic preservation, such as those relating to accessibility and seismic upgrading. Provide this information to owners of historic resources (see Policies ES-4.1, LU-2.1 and LU-4.3).

Policy HD-1.2: Evaluation of Potential Resources. Encourage historic resource surveys evaluating properties that may qualify as a Landmark or Structure of Merit – especially on underutilized parcels that are potential sites for future development.

a) Complete a historic resources survey for Downtown with information on significant building and site attributes, such as: building age, dates of alterations and/or additions, architect and/or builder, architectural integrity, building height. Also cite historic registrations and/or designations, and classifications from prior surveys and previously adopted plans. Update this survey as construction or demolition occurs. Use the historic resources survey as an additional tool for evaluating resources that may qualify as a Landmark or Structure of Merit, especially those called out as historic or potentially historic in previous plans and surveys. Update this survey as construction or demolition occurs.

Policy HD-1.3: Repairs & Alterations. When substantial repairs or alterations are proposed for buildings over 40 years old, the City will encourage the restoration and repair of any lost or damaged historic features when feasible and appropriate.

a) Allow flexibility in parking, open space, and other standards (see Policies ES-4.1, LU-2.1 and LU-4.3).

b) Evaluate and, if needed, strengthen recommendations relating to substantial alterations contained within the Downtown Design Guidelines.

c) Encourage property owners, developers, and other stakeholders to use archives and other resources to guide the design of appropriate restorations and repairs. Support the maintenance of and encourage public access to archives with information on older Downtown buildings.

Policy HD-1.4: Public Awareness. Enhance community awareness of Downtown's unique history and architectural heritage.

a) Use public communications to promote Downtown's history and architectural heritage. Refer users of the City's web pages to materials of interest at the City's libraries.

b) Refine Downtown's "Historic Context Statements" (prepared in 2007) for the use and enjoyment of a general audience. Make it available at a nominal price. In this publication, use the historic resources database and add maps to describe Downtown's historic contexts.

c) Work with the Berkeley Architectural Heritage Association (BAHA) to update and expand its "Downtown Walking Tour" brochure. Encourage distribution of this brochure by the Downtown Berkeley Association, the Berkeley Convention and Visitors Bureau, UC Berkeley, and other organizations.

d) Promote the use of plaques, signage, murals, and other ways to increase citizen awareness of Downtown's history.

e) Encourage invited artists to install art in Downtown to refer to Downtown's historic features and events.

Policy HD-1.5: Residential Character. Conserve the scale of residential-only neighborhoods within the Downtown Area, and reduce development pressures that lead to the loss of older buildings that contribute to the overall character of these neighborhoods (see policies under Goal LU-4).

GOAL HD-2: ENHANCE AREAS OF SPECIAL CHARACTER IN DOWNTOWN, SUCH AS CLUSTERS OF HISTORIC RESOURCES.

Policy HD-2.1: Special Subareas. Identify areas with special character that might be highlighted with streetscape improvements and other public and private design features.

a) Recognize subareas having a unique and/or historic character by making street and open space improvements that reinforce the character of these subareas – while also encouraging overall design continuity for some features throughout Downtown.

Policy HD-2.2: Historic Subareas. Protect and reinforce the character of discrete subareas where historic resources are concentrated, while also recognizing that sensitive change may occur within such subareas. Make sure that within subareas where historic resources are concentrated, building alterations, new construction and public improvements are designed with particular concern for compatibility with their surroundings.

a) The Landmarks Preservation Commission may designate one or more historic subareas as Historic Districts to protect historic resources and promote compatible new development – while acknowledging the importance of creativity, and continued growth and increased building densities in Downtown's mixed-use areas.

   - Newly designated Historic District should be accompanied by development design guidelines to describe how new development can complement the District's historic character.

   - Encourage the analysis of known and potential historic resources as a part of considering Historic District designation(s) by the Landmarks Preservation Commission.

   - Consider creating a "Shattuck Avenue Historic District" that would generally

include buildings along Shattuck Avenue, between University Avenue and Durant Avenue.

- Use criteria pertaining to historic district designations in Berkeley's Landmark Preservation Ordinance (LPO) and applicable guidelines in the National Register Bulletin "How to Apply the National Register Criteria for Evaluation".

b) Evaluate and, if needed, strengthen the existing Downtown Design Guidelines to encourage designs that are contextual to subareas where historic resources are concentrated (see Figure HD-3, Historic Resources, Noteworthy Buildings and Potential Development Opportunity Sites). Use available survey findings to inform this process.

GOAL HD-3: PROVIDE CONTINUITY AND HARMONY BETWEEN THE OLD AND THE NEW IN THE BUILT ENVIRONMENT.

Policy HD-3.1: Contextual Design. To promote continuity between old and new, new construction and building alterations should meet streets and public spaces in contextual ways that line streets with building streetwalls and support a pedestrian-oriented public realm.

a) Review and, if needed, strengthen the Downtown Design Guidelines to further encourage continuity and harmony between old and new construction. Promote ways to complement Downtown's historic context through: materials, cadence/modulation, color, fenestration & entry patterns, cornice lines, massing, roof form, building "build-to lines," and other appropriate architectural devices.

b) Consider new and/or revised Zoning standards and Design Guidelines that will help support and maintain Downtown's traditional main-street character. Specifically, modify the Zoning provisions and Design Guidelines to better address continuity and relationships between buildings (see Policy HD-4,1).

c) Amend the Downtown Design Guidelines to address how taller buildings can be made compatible with Downtown's context and historic resources (see policies under Goal LU-4).

Policy HD-3.2: Continued Variety. Recognizing building height, massing and scale, allow for continued variety that respects Downtown's context.

a) The review of development proposals, and resulting refinements, should consider Downtown's traditional context and respect Downtown's historic resources while also considering DAP policies relating to building height and envelope (see Land Use chapter).

GOAL HD-4: IMPROVE THE VISUAL AND ENVIRONMENTAL QUALITY OF DOWNTOWN, WITH AN EMPHASIS ON PEDESTRIAN ENVIRONMENTS THAT ARE ACTIVE, SAFE AND VISUALLY ENGAGING. ENCOURAGE APPROPRIATE NEW DEVELOPMENT DOWNTOWN.

Policy HD-4.1: Pedestrian-Oriented Design. Improve the pedestrian experience and the aesthetic quality of Downtown's environments through appropriate design. New construction and building alterations should promote pleasing public open spaces and streets with frequent street-level entrances and beautiful facades. In commercial areas, buildings should encourage activity along the street and generally maintain the urban tradition of no street-level setbacks.

a) Continue to apply the Downtown Design Guidelines to new development and building alterations, and strengthen them to:

- include contextual provisions specific to where historic resources are concentrated;
- help attract a variety of people to live Downtown through the design of appropriate multi-family housing;
- encourage economically viable and physically adequate retail spaces (see Policies ED-1.3 and ED-1.6);
- better guide the design of on-site open space, including publicly accessible courtyards, plazas, and midblock walkways, and the inclusion of ecological site features (see Policy OS-3.1);
- address the design and adequacy of open space for residents;
- mitigate potential impacts of parking garages on streets and publicly accessible open spaces;
- provide adequate lighting and safety features in garages, in bus shelters and at bicycle parking;
- promote resource-efficient design and emerging sustainability practices (see Environmental Sustainability chapter); and
- encourage on-site greenery and ecologically beneficial features (see policies under Goals ES-5 and OS-2).

b) Consider new and/or revised development standards that will help promote active, interesting and pleasing pedestrian environments. Specifically, modify the zoning code to better address issues of continuity, compatibility, sustainability, and the special existing qualities of Downtown, such as: frequent building entrances, street-level transparency/windows, on-site open space, etc. Emphasize measurable standards that are easy to understand and apply. Zoning provisions should be developed with extensive input from the public.

c) Evaluate and improve public signage to reduce visual clutter and help visitors navigate Downtown (see Policy ED-1.12).

d) Encourage outdoor dining, street fairs, and other beneficial yet limited use of public space by private concerns (see policies under Goal ED-1)

e) Establish new and enhance existing convenience facilities including publicly accessible restrooms and drinking fountains (see Policy OS-4.3).

Policy HD–4.2: Solar, Visual & Wind Impacts. Design and position new buildings to avoid significant adverse solar-, visual- or wind-related impacts on important public open spaces. Also provide for adequate natural light in residential units through appropriate building form (see Policies ES-3.3 and LU-4.2, and Table LU-1).

a) Strengthen standards and guidelines to better address potential solar access and wind impacts.

b) For buildings exceeding 85 feet, use solar, visual and wind simulations to evaluate and refine design alternatives.

Policy HD-4.3: Urban Open Spaces. Create, enhance and maintain streets, plazas, midblock open spaces, and other urban open spaces to enhance the pedestrian environment and in-

crease the number of people who will use Downtown. The design of streets and open spaces should complement the character of Downtown as a whole and the character of nearby architecture – especially in subareas where historic resources are concentrated (see Policy OS-1.1).

Policy HD-4.4: Design Creativity & Excellence. Continue Berkeley's tradition of architectural excellence. Support design creativity during the development approval process and in the resulting construction. All new construction and building alterations should be of the highest quality and promote sustainability (see policies under Goal ES-4).

a) Strengthen the existing Downtown Design Guidelines to:

   - further promote excellence in design;
   - encourage visually interesting buildings;
   - promote appropriate methods for intensification and adaptive reuse (see Policy HD-1.1);
   - encourage architectural and site features that use durable materials and are detailed to be long-lasting promote excellence in design;

b) Promote and, where appropriate, require buildings that have resource-efficient design and emerging sustainable design practices (see Policies ES-4.1 and ES-4.4).

GOAL HD-5: ENHANCE AND IMPROVE THE PHYSICAL CONNECTION BETWEEN DOWNTOWN AND THE UNIVERSITY OF CALIFORNIA.

Policy HD-5.1: Appropriate Buildings. Encourage the University to use the Downtown Design Guidelines and Downtown Area Plan to guide the character and scale of its future development. Strongly encourage the University to design buildings that are appropriate to Downtown and make streets that abut University property pedestrian-friendly, in a manner required of any Downtown developer. Along street frontages of University buildings Downtown, the ground floor should be pedestrian-friendly and have windows and entrances, and avoid blank walls. Encourage active street-level uses. Provide retail or other active public-serving uses along Shattuck Avenue and University Avenue (see policies under Goal LU-6).

a) Encourage the University to use the Downtown Design Guidelines and Downtown Area Plan to guide the character and scale of its future development.

b) Encourage the University to make development at the east end of University Avenue (between Walnut and Oxford) a priority to bring more retail and pedestrian activity, and for the creation of an important "Gateway" for persons arriving to the Campus or Downtown.

c) Active pedestrian-friendly ground floor uses should be maintained on all three sides of the proposed new Berkeley Art Museum and Pacific Film Archive (BAM/PFA). The proposed primary entry of the museum should be located on Center Street, with a secondary entry provided from Oxford or the corner of Oxford and Addison. Consider modulated edges and pockets of open space. Loading docks should be carefully designed to contribute positively to the pedestrian environment.

Policy HD-5.2: Public Improvements. Encourage the University to enhance streets and public open spaces in Downtown (see Streets and Open Space chapter). Urge the University to make substantial and fair contributions for street improvements adjacent to their properties, and engage the University on how to fund other Downtown improvements.

a) Urge the University to make substantial and fair contributions for street improvements adjacent to their properties.

b) Work in partnership with the University to implement the Streets & Open Space Improvements Plan (see Policy OS-1.1), especially in locations of mutual interest. Engage the University on how to fund improvements benefiting all of Downtown.

c) Encourage University efforts to enhance open spaces along the Oxford-Fulton edge of the main campus, including "the Crescent" and the new open space referred to as "Kittredge Glade" in UC Berkeley's 2020 Long Range Development Plan.

d) Celebrate the seam between the park-like campus and the urban Downtown. Partner with the University on the design and implementation of Oxford-Fulton as a green boulevard, through both street improvements and active building fronts.

e) Encourage the University to help extend the Ohlone Greenway along its Hearst Avenue frontage.

f) Maintain public access along the Walnut Street passage between Hearst and Berkeley Way.

g) Encourage midblock pedestrian connections between University Avenue and Center Street, as part of UC development.

Policy HD-5.3: Historic Buildings. Encourage the University to respect historically important buildings, and strive to integrate them within its development.

a) When proposed UC development includes or adjoins historically important buildings, consistent with provisions of the UC Berkeley 2020 Long Range Development Plan, the City expects that the University will consult early in the development design process with appropriate City entities, and use the Secretary of the Interior's Standards.

b) Encourage the University to preserve a meaningful portion of the landmarked garage building and forecourt at 1952 Oxford Street, and integrate it within future development.

6 - STREETS & OPEN SPACE

6. STREETS AND OPEN SPACE

STRATEGIC STATEMENT

Benefits from High-Quality Streets and Open Space. Downtown streets and open spaces provide Berkeley with important public gathering places. Public spaces support Downtown's continuing role as Berkeley's social, cultural and economic center. Parks, plazas, and streets make Downtown more livable, enhance connected watersheds, and promote economic development. The physical and psychological health of residents and workers depend on the availability of green and attractive open spaces. Streets and open spaces provide places to relax and rejuvenate.

Well-designed streets and public open spaces promote social interaction and connections, and can help Downtown become a more inviting and livable place. In these places, people of all ages can come together to celebrate, debate, and participate in the choreography of urban life.

The economic health of Downtown also depends on the quality of its pedestrian environments. Downtown must compete among other commercial and cultural destinations. Inviting and interesting public places can give Downtown a special advantage.

Facing Page: *Civic Center Park is the largest public open space in the Downtown Area and is used for rest, recreation, festivals, and political protests (Also shown is Old City Hall that lies just outside of the Downtown Area.). Staff photo*

Parks, plazas, and streets should reflect the highest aspirations of a community. With thoughtful design and careful programming, streets and open space address complex functional challenges relating to transportation, ecological restoration, regular and occasional activities, and community life. Benefits of well-designed public spaces include:

- new recreation opportunities, whether to jog around a park or enjoy ice cream on the grass;
- accelerated economic revitalization by making Downtown a more attractive destination;
- increased tourism if Downtown's open spaces are remarkable, such as by promoting sustainability with innovative features; and
- improved water quality, by filtering polluted "urban runoff" while simultaneously beautifying Downtown.

Pedestrian-friendly streets encourage higher levels of physical activity, especially when paired with local destinations such as shops and restaurants. Communities with inviting sidewalks, safe bike lanes, nearby parks, and pedestrian amenities support active living. Walkable streets improve physical health, reduce mental stress, and increase social interaction.

Parks and plazas also promote physical activity when they are nearby. Open spaces and play areas are especially important for children because early habits influence health later in life. Active lifestyles also benefit elderly persons by helping to maintain mental acuity, physical abilities, and healthy hearts.

The Trust for Public Land's 2006 white paper "The Benefits of Parks" cites concrete reasons to create and enhance parks, plazas, and walking environments, including:

- increased physical activity and perceived energy;
- lower rates of obesity, heart disease, and diabetes;
- decreased levels of anxiety;
- increased mental alertness and cognitive performance; and
- cooler temperatures on hot days.

Streets & Public Open Space. Downtown contains significant open spaces, but needs more. Ideally, a park or plaza should be within walking distance of every Downtown residence. Civic Center Park is Downtown's largest open space and was recently improved to add a tot lot and skateboarding area. Berkeley High School's track provides opportunities for community recreation when it is not being used for School activities. BART Plaza (also known as Constitution Square) serves Downtown and received a grant in 2010 to improve its function as a transportation hub and community open space. "The Crescent" on the UC Campus offers a large grassy slope.

Street right of ways are themselves valuable public open spaces and determine the character of urban places in large part. The City has direct control over streets and can, through its investments, dramatically transform Downtown. Street rights-of-way serve many functions. Not only do they move traffic, bicycles and pedestrians, but they are also vital for supporting community life. Attractive, beautiful, active streets support abutting uses and help make Downtown a commercial and cultural destination. Wide sidewalks, frequent street trees, pedestrian-scaled lighting, and beautiful landscaping also promote Downtown as a highly livable residential neighborhood. Enhanced pedestrian environments also make transit use more attractive.

There are many opportunities for street and open space improvements throughout Downtown which are addressed in the ***Downtown Streets & Open Space Improvement Plan (SOSIP)*** draft that was developed by a Subcommittee of interested Commissions and was recommended to City Council for adoption in September 2010.[3]

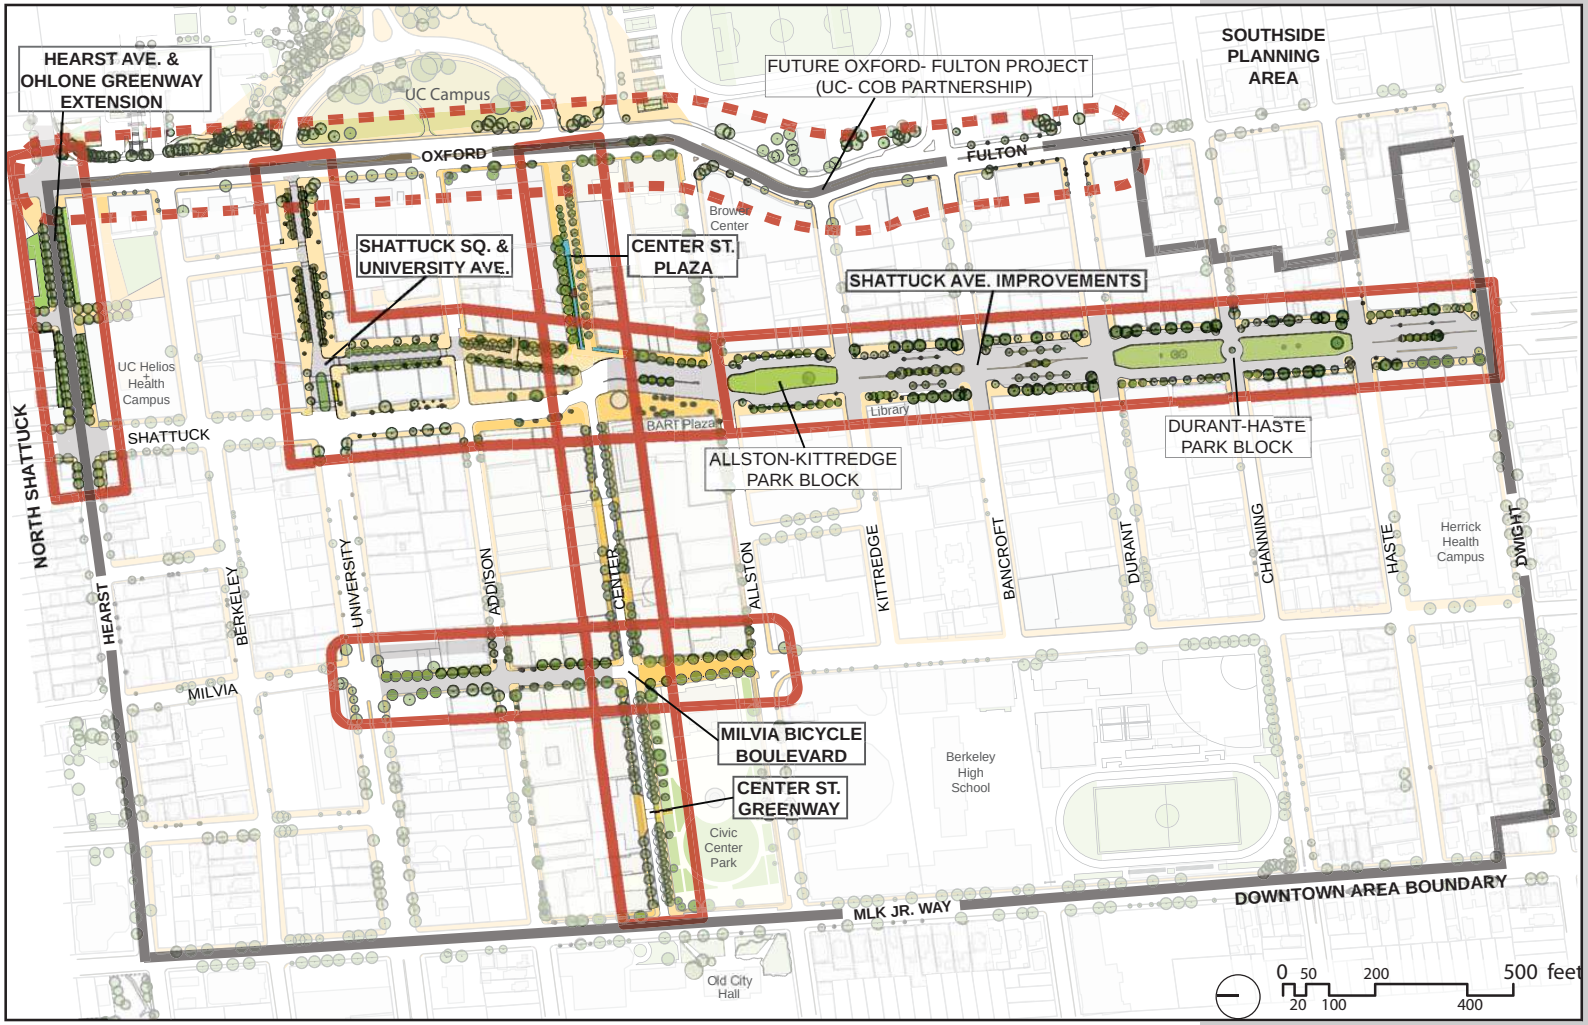
Significant improvements can be made in the streetscape by reducing travel lanes or reconfiguring parking. Center Street, Shattuck Avenue, Hearst, and the east end of University Avenue have great potential for being remade as exceptional pedestrian-friendly places. In addition, improvements along Milvia and Shattuck can support bicycling in and through Downtown.

Establishing a consistent design for street and open space features, such as light poles and street furniture, can help give Downtown a stronger sense of identity and complement its historic setting. There are also opportunities to accentuate the character of distinct subareas within Downtown, such as has been done for the "Arts District" along Addison Street and the Civic Center Historic District.

Street trees and landscaping play a critical role in making downtown's more attractive and invit-

[3] *The draft SOSIP is expected to be before City Council around the same time as, or soon after the 2011 DAP.*

FIGURE OS-1:
Major Projects for Streets and Open Space



See Streets & Open Space Improvement Plan (SOSIP).

ing. People derive psychological benefits by having access to green spaces and feeling a connection with nature. Street trees also eliminate heat from unshaded asphalt, thereby reducing smog and respiratory ailments.

Streets and opens spaces will need to be carefully designed and well programmed, however, in order to maximize benefits, discourage unwanted behavior, and avoid excessive costs. Taken as a whole, parks and plazas should meet the needs of people of all ages, and encourage their use by a broad cross-section of the community. Downtown open spaces can offer modest recreation options, locations for community events, and a chance to rest outdoors.

New development can help to finance street and open space improvements, and can add areas for people to enjoy through publicly-accessible open space on private land.

Open Spaces on Private Property. Downtown open spaces also include plazas, courtyards and walkways on private land. Streetside plazas provide active gathering places connected to public life. Midblock courtyards offer intimate and protected environments that complement the bustle of streets and streetside spaces. Midblock walkways provide "short cuts" that make Downtown more walkable.

Open space can also be shared among residents within a building or complex of buildings. Shared open spaces include courtyards and roof gardens that offer protected spaces for the enjoyment of residents.

Watershed Health & Green Infrastructure. Streets and open spaces, both public and private, can enhance the health of the watershed to which Downtown is attached. "Green infrastructure" features like bio-retention basins and permeable paving treat pollutants in urban runoff before they head downstream. Features can also retain rainwater, thereby reducing peak stormwater runoff volumes and rates. In addition, green infrastructure features can make Downtown more attractive by adding distinctive landscaping, special pavers, and "rain gardens" where small amounts of rainwater are intentionally gathered. Landscaping should be designed to conserve water, however, through the use of drought resistant plants and low-water irrigation systems. Greenery and green infrastructure give subtle reminders that – even in urban areas – we are connected with nature.

GOALS, POLICIES & ACTIONS

GOAL OS-1: ENHANCE PUBLIC OPEN SPACES AND STREETS TO BENEFIT PEDESTRIANS, IMPROVE DOWNTOWN'S LIVABILITY, AND FOSTER AN EXCEPTIONAL SENSE OF PLACE. IN PARTICULAR, CREATE NEW PUBLIC GATHERING PLACES THAT SUPPORT NEARBY USES AND DOWNTOWN AS A DESTINATION.

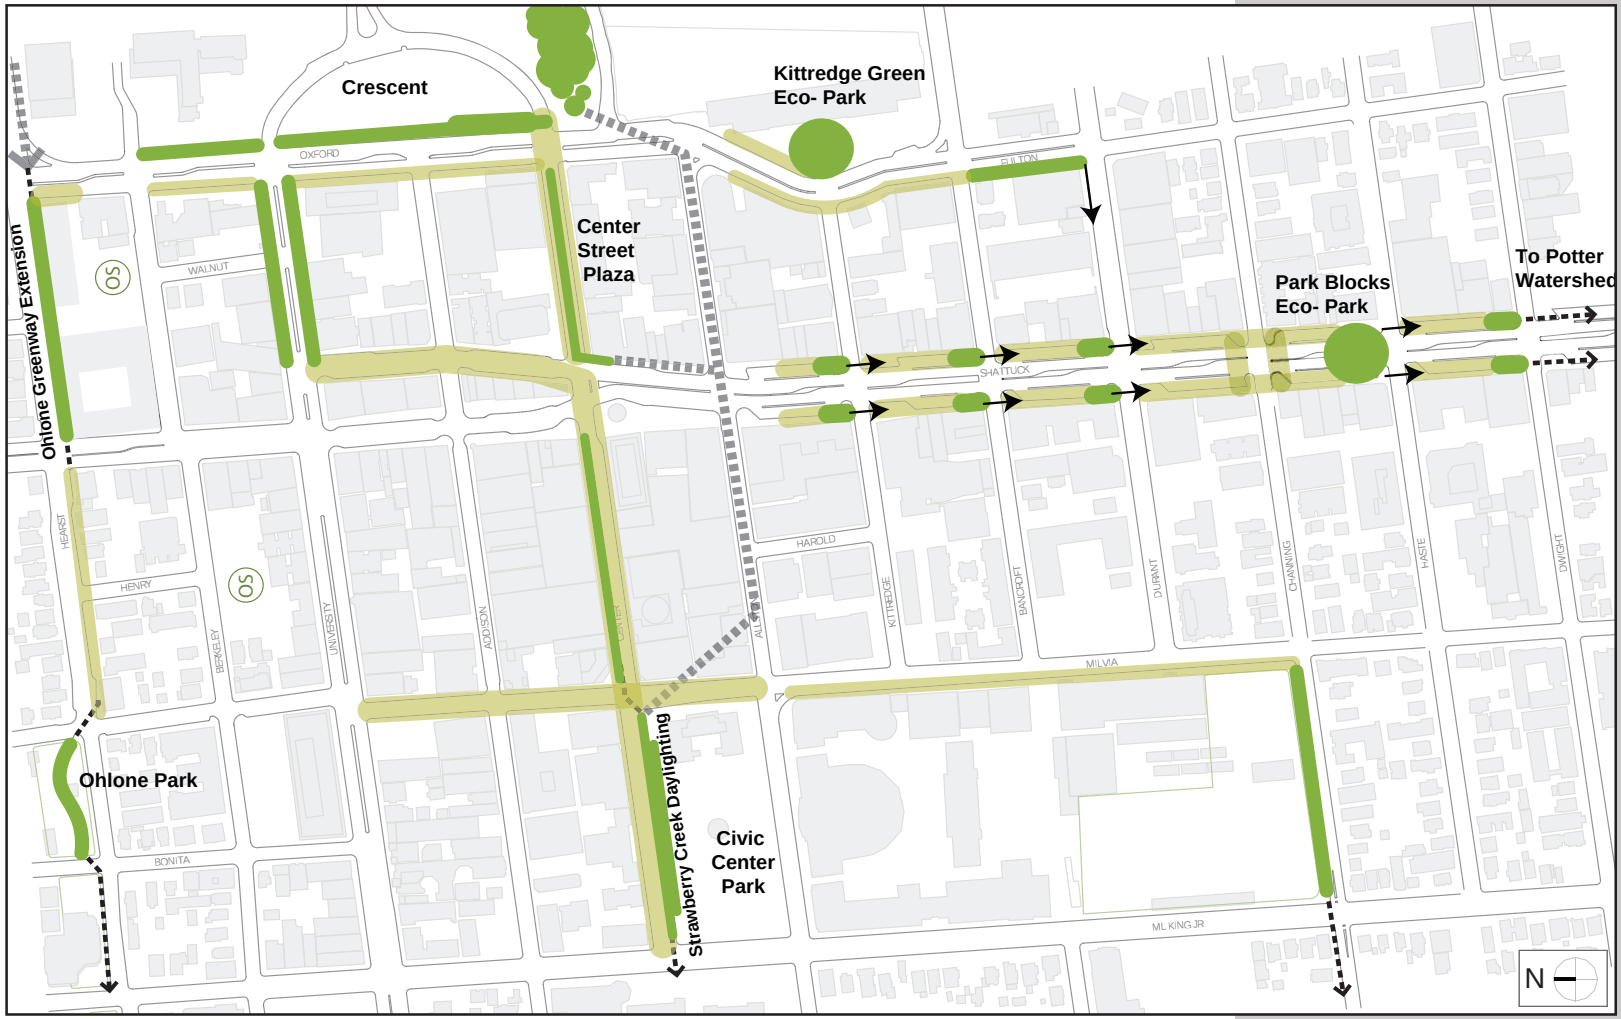
Policy OS-1.1: Streets & Open Space Improvements. Make significant additions and improvements to Downtown's parks, plazas, and streets to be aesthetically pleasing, and support pedestrians and abutting uses. Use consistent features to help make Downtown distinctive. Special subareas and conditions may call for unique treatments. Emphasize the creation and enhancement of public gathering places.

a) Adopt a Streets & Open Space Improvements Plan (SOSIP) to guide the comprehensive design of significant positive alterations and additions to Downtown's parks, plazas, and streetscapes. The SOSIP will identify

Potential features

- Rain Garden/ Swale Opportunity
- Permeable Paving Opportunity
- Pipe Connections
- Outflow From Area

FIGURE OS-2: Green Stormwater Infrastructure Concept.



See Streets & Open Space Improvement Plan (SOSIP).

objectives and develop design concepts to depict how the community intends to:

- increase recreational opportunities;
- create space for gathering and performances;
- increase street trees and vegetation using a consistent and appropriate palette;
- widen sidewalks in areas of high pedestrian activity;
- improve safety for bicyclists and pedestrians, such as through the use of flashing crosswalk lights;
- reduce pedestrian crossing distances through the use of curb extensions, median refuge areas, and appropriate travel lane widths;
- improve public lighting for nighttime safety;
- offer street furniture and other amenities for pedestrians;
- encourage appropriate behavior;
- introduce flashing crosswalk lights;
- select light standards and other street features to complement Downtown's pedestrian scale and traditional mainstreet character; and
- promote lighting that is energy efficient and minimizes light intrusion into residential units;
- develop signage and strategies to help visitors navigate Downtown, while reducing visual clutter;
- incorporate green infrastructure features to treat "urban run-off" and retain rainwater (see policies under Goals ES-5 and OS-2);
- establish a palette appropriate tree species for streets, with consideration of native species.

b) Include improvements that heighten awareness of subareas having a unique character, such as where historic resources are clustered. Relate design features to the special character and predominant uses along each street and around each open space (see Policy HD-2.1).

c) Seek to incorporate public restrooms and drinking fountains, so they are distributed across Downtown.

d) Evaluate street and open space recommendations, including potential lane eliminations, from the perspective of the needs, safety and comfort of bicyclists and pedestrians. Consider their potential impact on merchants, residents, transit providers, bus service, and other affected stakeholders. For recommendations that involve changes to traffic lanes and turning movements, consider traffic impacts in light of pedestrian- and transit-oriented priorities described in the Access chapter.

e) Prioritize street and open space recommendations by engaging the public, and considering factors such as visual prominence, benefit to retailers, levels of pedestrian ac-

tivity, proximity to historic resources, and meeting the recreational needs of residents. Match top priorities with available resources.

Policy OS-1.2: Street & Open Space Opportunities. Develop appropriate design options for the following street segments, and existing and potential open spaces (see Policy AC-1.1 and the Streets & Open Space Improvements Plan).

a) Center Street Plaza. Close Center between Shattuck and Oxford to create a pedestrian plaza with public gathering space, and sustainable features referencing Strawberry Creek.

b) Center Street Greenway and Civic Center Park. Create a continuous green corridor and pedestrian connection between Civic Center Park, BART and Center Street Plaza.

c) University Avenue Gateway. Establish a "Gateway" at the east end of University Avenue by widening sidewalks, increasing landscaping, and encouraging visitors information facilities.

d) Shattuck Square. Transform the east side of Shattuck Square into a public open space with a high level of pedestrian amenity. Do this by accommodating two-way traffic on the west side of Shattuck Square.

e) Shattuck Avenue. Make Shattuck a world-class tree-lined "boulevard" that is exceptionally attractive, emphasizes pedestrians and bicyclists, and models sustainability. Dedicate a significant portion of Shattuck's right of way to be park or similarly active space.

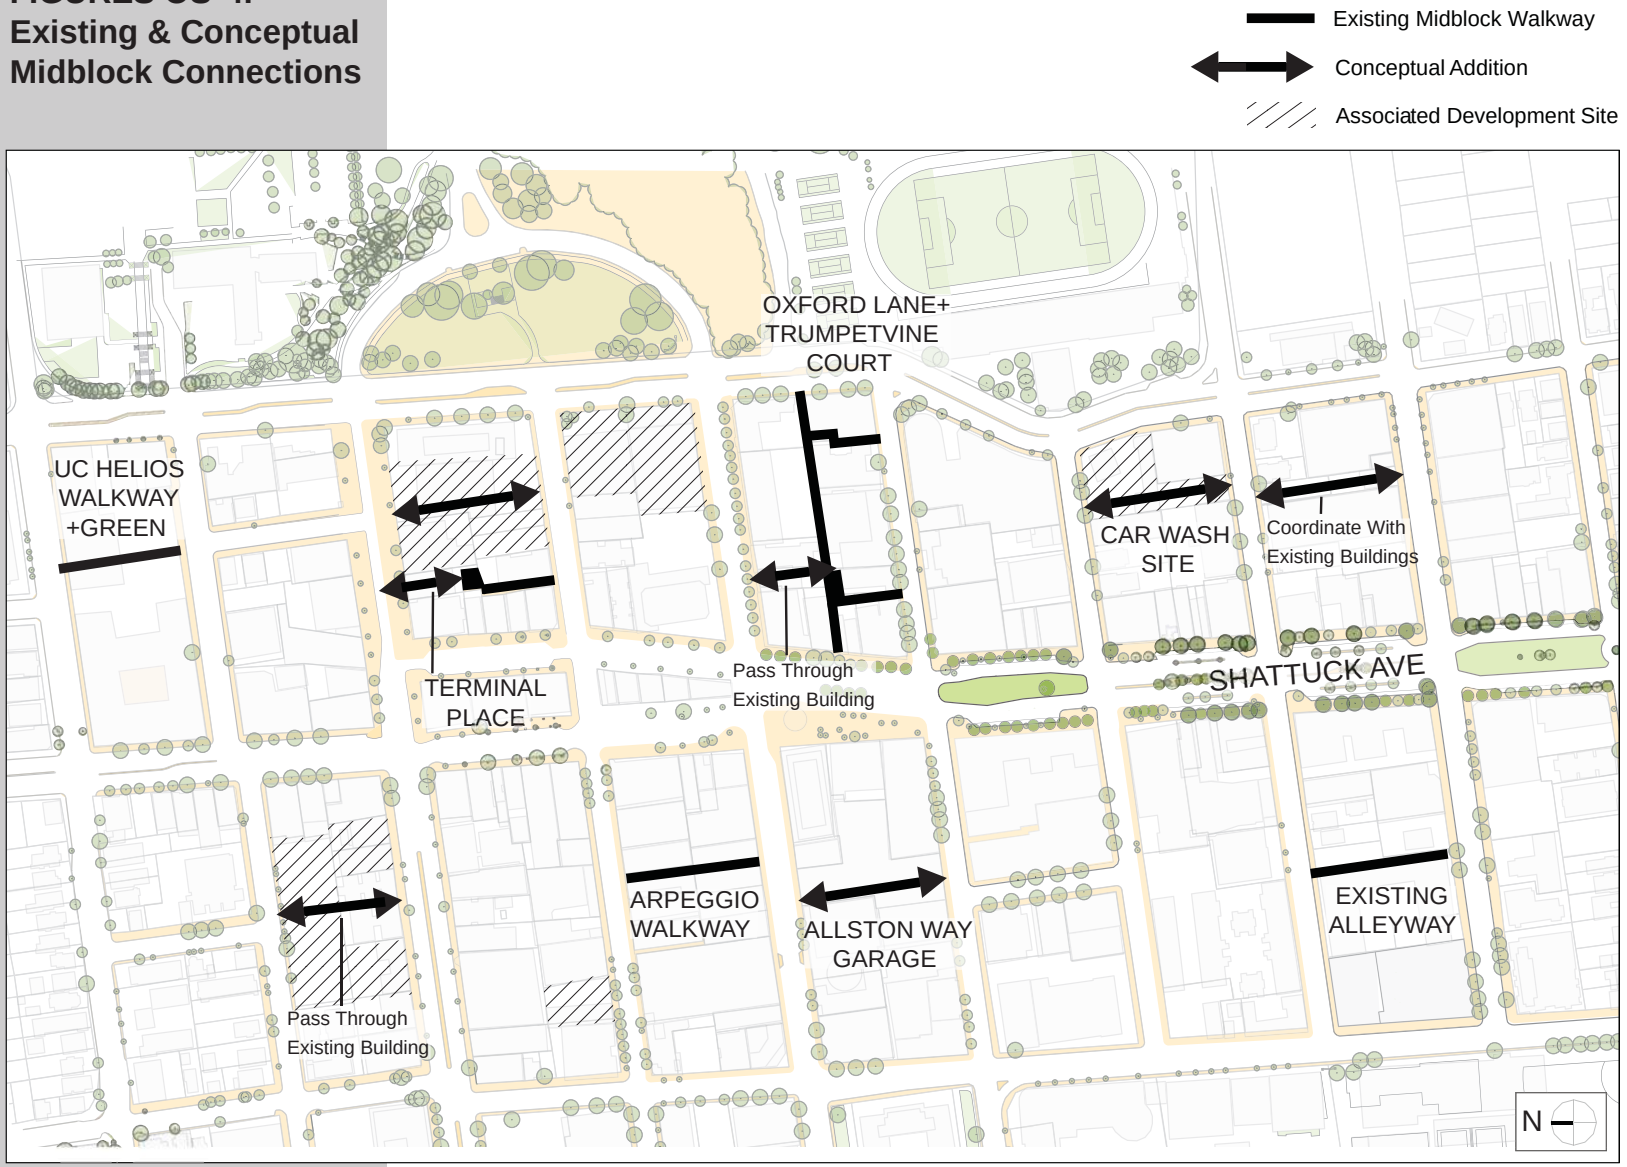
f) Ohlone Greenway Extension. Extend the Ohlone Greenway from where it ends to the UC Campus by adding bicycle facilities, street trees and greenery.

Figure OS-3: Kittredge Green. *Edwards Stadium lies just outside of the Downtown Area on the UC campus, at the corner of Fulton and Bancroft. Its historic Art Deco façade will become more visible when land just to the west is cleared and improved as a University-owned open space, named in the DAP as Kittredge Green. Staff photo*

g) Allston Way as a Special Civic Street. Celebrate Allston Way and abutting community uses by installing decorative special features and making it more pedestrian- and bicycle-friendly.

h) Harold Way. As a connection between the Library and the YMCA, consider making Harold Way a slow-street.

FIGURES OS-4: Existing & Conceptual Midblock Connections



i) Terminal Place. Consider improving Terminal Place, a public alley off of Addison near Shattuck, to become an active and attractive public open space.

j) Oxford-Fulton & UC Open Spaces. Create a "green boulevard" that complements Downtown, enhances abutting open spaces, and improves connections between the Campus and Downtown.

k) Kittredge Green. Support University plans to create a publicly-accessible open space between Edwards Field and Fulton Street – at the end of Kittredge Street.

Policy OS-1.3: Residential Area Improvements. Enhance the residential character and livability of Downtown's residential areas – and surrounding residential areas – through street and open space improvements.

a) Work with residents to understand and address their recreational needs.

Policy OS-1.4: Maintenance. Maintain clean, safe and attractive streets, parks, and plazas (see Policy LU-2.4).

a) Maintain sidewalks, crosswalks, plazas, and other pedestrian environments to be safe, clean and in good repair.

b) Establish standards for the maintenance of public spaces, and develop funding mechanisms and City priorities that maintain adequate budget at all times. Emphasize durability and "life-cycle" costing in the design of new construction.

c) Encourage public utilities to underground overhead wires, as development and street improvements occur.

GOAL OS-2: PROMOTE WATERSHED HEALTH THROUGH THE USE OF ECOLOGICALLY BENEFICIAL LANDSCAPING AND OTHER FEATURES. INCORPORATE NATURAL FEATURES THROUGHOUT DOWNTOWN TO IMPROVE ITS VISUAL QUALITY, HELP RESTORE NATURAL PROCESSES, AND REINFORCE BERKELEY'S COMMITMENT TO ENVIRONMENTAL SUSTAINABILITY.

Policy OS-2.1: Green Infrastructure. Promote green infrastructure and other ecologically beneficial features within the design of public open spaces, streets and on private property (see policies under Goal ES-5).

a) The SOSIP should describe a program for significant near-term "greening" of Downtown by planting street trees and landscaping. Recommend appropriate and consistent tree and plant species for Downtown's streets and open spaces. Consider the use of native tree species.

b) All street tree installations should be accompanied by appropriate soil and drainage to encourage each tree's healthy maturation.

c) On public land, maintain healthy mature trees wherever possible (see Policy OS-2.3 & 2.4). Eliminate mature trees only in instances of disease, public safety, or overriding public benefits. Use clear criteria for the retention of trees and the replacement of trees for instances when tree removal is unavoidable. Permit the elimination of trees only after findings have been made according to established criteria and only after opportunities for public comment, except in cases when unsafe conditions or property damage may result.

d) Establish new, and strengthen existing, landscaping standards and guidelines for sub-

stantial water conservation and recycling in new landscaping and retrofits. Specify appropriate plants for use Downtown, and ways to reduce waste, nourish the soil, conserving energy, and protect water and air quality. When developing provisions, consider guidelines used by Berkeley's municipal projects and Stopwaste's "Bay Friendly Guidelines" (www.stopwaste.org). See Policy OS-2.5.

Policy OS-2.2: Nature in the City. Highlight "nature in the city" and its benefits.

a) Maximize greenery, such as trees, shrubs, landscaping, and "micro-habitats" that support bees and birds.

b) Reference natural environments when making landscaping and ecologically beneficial improvements, on public and private property.

c) Promote programs, literature and signage to enhance awareness of ecologically beneficial features in Downtown and just outside of Downtown (see Policy ED-5.2).

d) Consider the design and creation of connected stormwater retention features, not just to filter urban runoff, but also to create water features that during heavy rains reveal Downtown's topography and our connection with nature (see Figure OS-2.2, Green Stormwater Infrastructure Concept).

Policy OS-2.3: Street Trees. New street trees should be planned and planted in ways that will encourage their healthy maturation. When planning, anticipate future streetscape improvements that could affect street tree placement and retention.

a) All tree installations should use appropriate soil and drainage to encourage each tree's healthy maturation. Address the long-term health of new trees when developing the SOSIP (see Policy OS-1.1). Develop standards and guidelines in consultation with urban forestry experts and organizations, and utility companies.

Policy OS-2.4: Existing Trees. Maintain mature trees growing on public land, wherever possible.

a) Permit the elimination of mature trees only in instances of transmissible disease, public safety, or overriding public benefits.

b) Establish standards and guidelines for the retention of trees – and the replacement trees for instances when tree removal is unavoidable.

c) Permit tree elimination only after findings have been made using established criteria and after opportunities for public comment, except in cases when unsafe conditions or property damage may result.

Policy OS-2.5: Water Conservation. New landscaping and retrofits should incorporate effective water conservation and water reuse features.

a) Establish water conservation and recycling standards for new landscaping. Require use of drought tolerant plants and advanced irrigation systems to substantially reduce water usage.

GOAL OS-3: STREETS AND OPEN SPACE IMPROVEMENTS, MAINTENANCE, AND CLEANING SHOULD BE ADEQUATELY FUNDED. REQUIRE THAT NEW DEVELOPMENT CONTRIBUTE TO GREENERY AND OPEN SPACE.

Policy OS-3.1: Private Contributions to Beneficial Open Space. Private development should expand and enhance open spaces that serve the public, both on-site and as part of public improvements. Public serving open spaces that can be provided on-site include: plazas, courtyards, landscaped setbacks, rainwater retention and urban-runoff features, and mid-block walkways and open spaces (see Policies LU-2.1 and OS-3.3).

Policy OS-3.2: Open Space for Residents. Housing projects should serve residents' needs by providing adequate on-site open space, such as by providing courtyards, roof gardens, community gardens, etc.

Policy OS-3.3: Public Funds. See Policy ED-12.1 – Revenues for Downtown, regarding paying for street and open space improvements and upkeep of the public realm.

GOAL OS-4: ENSURE THAT PARKS, PLAZAS, STREETS, WALKWAYS, AND OTHER PUBLICLY ACCESSIBLE OPEN SPACES ARE SAFE, COMFORTABLE, AND INVITING.

Policy OS-4.1: Safe Environments. Encourage safe environments by addressing unsafe conditions and inappropriate behavior.

a) Provide adequate pedestrian-scaled lighting in public parks, plazas, and streets. Amend the Downtown Design Guidelines to further promote building-mounted lighting to enhance safety (see Policy HD-4.1).

b) Promote safety in publicly-accessible open space by encouraging activity and deterring unwanted behavior, through thoughtful design and programming. Encourage outdoor dining, street fairs, outdoor merchandising, and other private uses, as appropriate.

c) Maintain a high level of visual and physical connections from public streets into open spaces.

d) Monitor locations and conditions where aggressive, abusive and unsanitary behavior occurs frequently; and engage merchants, the Police Department, mental health and social service providers, and homeless advocates in defining critical issues and actions.

Policy OS-4.2: Cleaning & Maintenance. Maintain clean and well-maintained streets, parks and plazas, as well as attractive street furnishings and other amenities (see policies under Goal HC-6).

a) Strengthen standards and provide resources for the frequent cleaning of streets and open spaces, the prompt repair of street furnishings and other features, and the immediate removal of graffiti.

b) See Policy ED-12.1 – Revenues for Downtown, regarding on-going maintenance and repair of public spaces in Downtown.

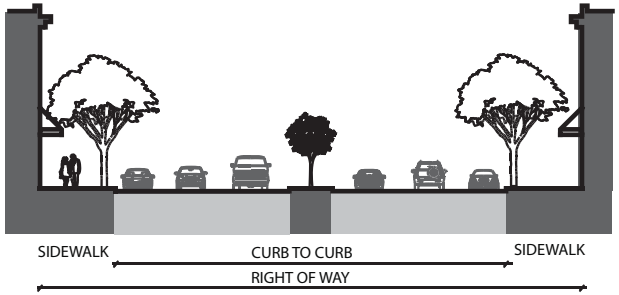
Policy OS-4.3: Public Conveniences. Establish new and enhance existing publicly accessible convenience facilities such as 24-hour restrooms, drinking fountains, and other amenities throughout Downtown.

Existing sidewalk conditions. *A relatively narrow sidewalk for pedestrians is accompanied by a wide swath of asphalt devoted to motor vehicles. Staff photo.*

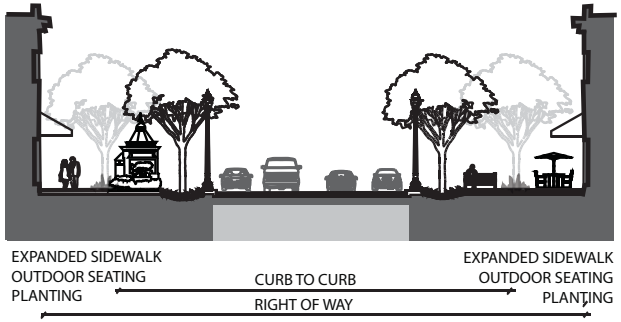
Wide sidewalk with varied amenities. *Generous sidewalks might be accompanied by public seating, outdoor dining, and freestanding flower stands or food kiosks. Large pockets of landscaping, including ecological "rain gardens," could be created. Staff photosimulation.*

UNIVERSITY AVENUE GATEWAY

The easternmost segment of University Avenue lies between Shattuck Square and Oxford, and is the arrival point (or "gateway") for many people visiting UC Berkeley and the Downtown. This segment also has relatively little traffic, and transportation modeling has shown that two of its four travel lanes may not be needed. Major pedestrian enhancements can be made if two travel lanes are eliminated. The street frontage along the University Avenue Gateway includes many historic buildings, as well as major University development opportunities that will contain retail shops and visitors' information facilities. A combination of street improvements, University construction, and historic adaptive reuse could result in rapid and positive transformation of this area.



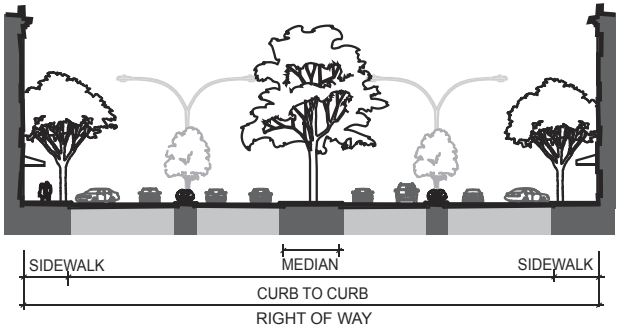
Existing



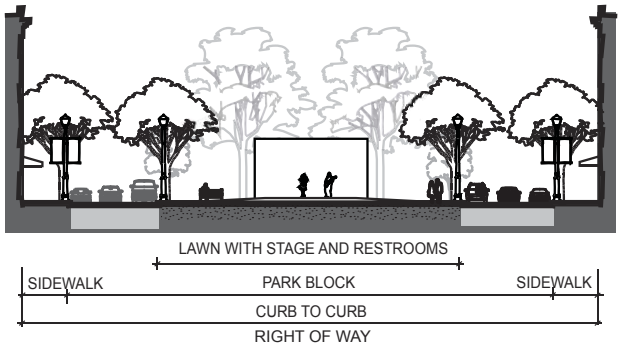
Design Concept

PARK BLOCKS CONCEPT

Shattuck's right-of-way is wide enough to accommodate a new linear park that is over 60 feet wide, if on-street parking is reconfigured. (The diagonal parking with backup lane takes up nearly half of Shattuck's existing 160-foot right-of-way, while use of parallel parking would use relatively few feet.) Linear parks of similar dimension exist and are well used in many other cities, including the "Park Blocks" in Portland, Oregon, "South Park" in San Francisco, and portions of the "Emerald Necklace" in Boston.



Existing

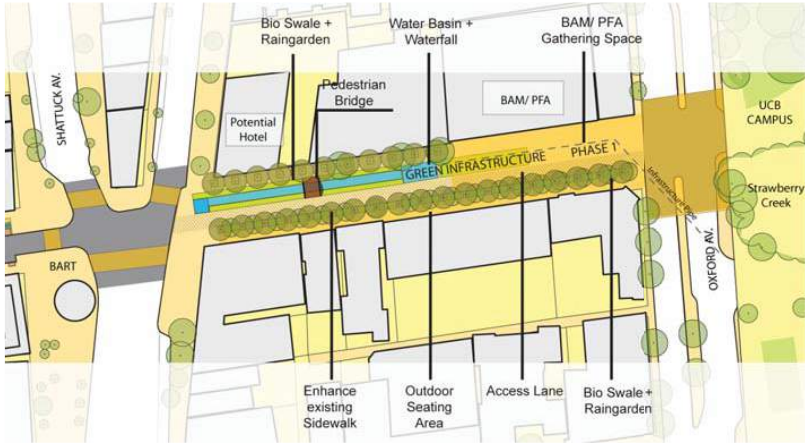


Design Concept

Existing Conditions. *Diagonal parking and a generous backup lane are on the other side of a narrow 3-foot planting strip from the travel lanes in the foreground. Staff photo.*

Park Blocks Photo Simulation. *If travel and parking lane dimensions are kept to a minimum, trees in the existing planting strip can be retained and the park would occupy the space in between. The Park Blocks might contain a variety of elements, such as multipurpose lawn, a stage for small performances, public bathrooms, and play equipment. Staff photosimulation.*

A Classic "Main Street." *Improvements along Center Street's southern edge were designed by Lyndon-Buchanan, and offer a generous sidewalk and places to sit under a canopy of mature trees. Staff photo.*



Ceter Street Plaza. *This plan-diagram illustrates features and relationships within a new pedestrian plaza with environmental features.*

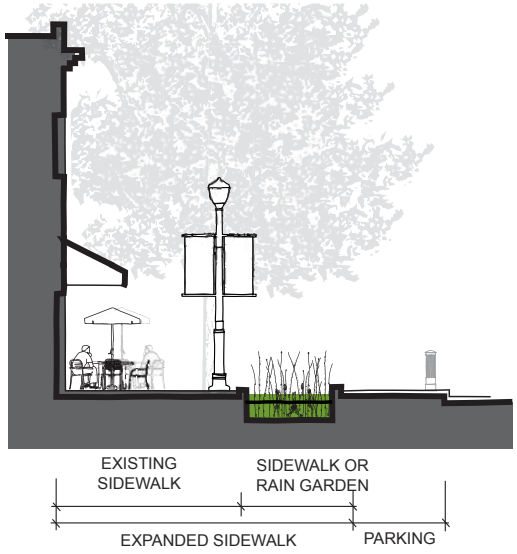
CENTER STREET PLAZA CONCEPT

Center Street presents an exceptional opportunity for an inviting pedestrian plaza in the heart of Downtown – "Berkeley's Living Room." The Plaza would occupy the one-block segment from Shattuck to Oxford, which connects BART to the UC campus and has one of the highest densities of foot trips in the East Bay. Existing amenities along the southern edge include mature street trees, outdoor dining, historic light poles, and complementary furnishings (see upper right). As planned, this segment of Center Street would be closed to regular traffic, and a "slow street" might be created in the near-term. Of special interest is the creation of a landscaped water feature that would reference Strawberry Creek (which goes into a culvert just east of the Plaza) and might even draw water from Strawberry Creek to make a more emphatic connection.

ECOLOGICAL FEATURES

Downtown streets and open spaces have the potential for becoming part of an advanced and integrated stormwater system that filters pollutants from urban runoff, reduces "downstream" flooding, and adds attractive landscaping that communicates Downtown's connection to nature – and the City's commitment to environmental sustainability.

"Rain gardens" have been introduced into urban settings in several urban settings, such as 12th Street in downtown Portland, Oregon (shown at right). Ecological features in Downtown, such as rain gardens and landscaped swales, would receive and filter rainwater that flows off of streets and contains oil and other pollutants. Drains set at the right elevation would allow rainwater to flow directly into the storm sewer system during major rains, so that not more than an inch of water would gather.



Detail Section Type

Downtown "rain gardens." *Portland, Oregon, has committed itself to sustainably manage street stormwater runoff by using landscaped stormwater planters (or "rain gardens") to capture, slow, and filter polluted "urban runoff" that flows off of streets. 7 - HOUSING AND COMMUNITY HEALTH & SERVICES

7. HOUSING AND COMMUNITY HEALTH & SERVICES

STRATEGIC STATEMENT

A Vibrant, Livable, and Sustainable Urban Neighborhood. Downtown has the potential for becoming a great place to reside. Significant housing growth has helped transform Downtown into a more vibrant neighborhood, and strengthened Downtown as a commercial and cultural center. Residents support Downtown's retail shops, restaurants, and services, and housing growth will improve the viability of Downtown businesses.

While many downtowns "roll up the sidewalks" at night and on weekends, housing provides around-the-clock activity and makes Downtown more inviting place at any hour. Streets and other public open spaces are safer when housing looks out over them and when businesses that serve residents stay open later. Housing also generates resident stakeholders who take an active interest in keeping their neighborhood safe and attractive.

Downtown's "livability" is paramount to its success as a vibrant neighborhood. The shops, restaurants, and services that residents support are also essential for making Downtown an attractive place to live, as are safe and inviting streets and open spaces. Living Downtown also gives easy access to theaters, cinemas, museums, and the East Bay's second largest transit hub.

Because Downtown residents consume far less energy and natural resources than people who live in other kinds of places in the Bay Area, increasing the number of people living Downtown plays a central role in implementing greenhouse gas emission targets set forth in Berkeley's Climate Action Plan. With anticipated housing growth, a household in Downtown can be expected to drive one-third as much as a household in urban neighborhoods with good bus service, such as the Elmwood. Furthermore, an average household in Downtown will drive less than one-eighth as much as one in suburban locations.[4] The more that transit and everyday needs are available on foot, the less that people need a car.

Besides reducing traffic and emissions, reduced vehicle use also makes housing in transit-rich locations more affordable. The average American spends 19.3 cents of every dollar on transportation, 95% of which goes toward the costs of owning and operating an automobile. Transportation spending for a household is second only to housing expenses, and is three times higher than health care expenditure.

Housing affordability also improves with decreased driving rates. The Bureau of Transportation Statistics estimates that walking and using transit saves typical households tens of thousands of dollars each year in auto-related

Facing Page: Downtown's Farmers' Market

Every Saturday, Downtown's Farmers' Market transforms Center Street into a festive, family-friendly, open-air market. The Market brings fresh locally-grown food to Berkeley residents and connects California's farmers directly to consumers. The Farmers' Market has been a tradition since 1981, and has been operated by the Ecology Center since 1987. Image courtesy Ivana Goldstein, www.ivanagoldstein.com

Figure HC-1: Residential Uses

Staff Survey 2006

costs, leaving more household income to spend on housing or other needs.

As density increases so does the need to provide livable settings to live. Adequate levels of interior daylight daylighting and high levels of urban amenities are important accompaniments to urban housing.

Residential Needs. In Berkeley, housing must respond to a full spectrum of needs and preferences. Berkeley's households vary considerably in size and income, as well as in the age and abilities of household members. The same person often needs different types of housing as they pass through the typical stages of life: single adult, through childrearing, and older "empty-nester."

Given demand for diverse forms of housing, what unique opportunities are presented by Downtown?

Downtown presents opportunities for increasing the availability of housing for a range of household types and incomes. Higher density apartment buildings are appropriate to Downtown and generally have smaller, comparatively more affordable units than housing in locations with lower densities. Downtown residents can live without a car thereby significantly reducing their overall costs for transportation and housing. Downtown can play an important role in housing Berkeley's workforce, such as teachers, nurses, and University staff who presently commute in from other places. Transit access and social services in Downtown make it a desirable for people with very low-income and fixed incomes, including those who are homeless or in transition.

Households with higher incomes will find Downtown increasingly attractive and add to Downtown's diversity. Demographic trends show that large numbers of Berkeleyans are reaching an age when they will seek housing that has fewer maintenance demands, less reliance on driving, and better access to cultural attractions and community life. With higher levels of discretionary income, housing for this demographic group will help fuel Downtown's retail revitalization and support cultural venues. Without growth in such housing, Berkeley Repertory Theater and other cultural stakeholders have expressed concern that their patron base will erode as Berkeley's aging "baby boomers" move to San Francisco or other locations where such housing is available.

Downtown Berkeley can also support more family-oriented housing, further strengthening Downtown as a neighborhood and destination – a sentiment expressed throughout the Downtown Area Plan process. To attract family housing, it will be important to give emphasize public improvements that enhance Downtown's safety, make open space and other amenities more available, and encourage the development of larger units.

Housing Affordability. Many moderate- and lower-income households are being priced out of the local housing market and members of Berkeley's workforce increasingly live elsewhere. The City must continue to take actions to create a stock of permanently affordable housing rented or sold at below-market rates to maintain the diversity that this community values so highly. While some housing needs can be met through the workings of the market, the City must take an active role to deliver housing for those with lower incomes and for people with special needs.

Until a recession began in 2009, Berkeley's housing prices continued to increase relative to household income. As prices were increasing, there was a steady loss of relatively affordable units. Market rents increased steadily between 1998 and 2008, growing by an average of five percent annually. In the third quarter of 2009,

market rents for all units ranged from nearly $900 for a studio apartment to $2,100 for a three-bedroom unit. Market rents exceeded what is considered to be affordable for households earning up to 80% of Berkeley's Area Median Income.

Ownership housing also increased in price until the recession, with the median price of a single family rising 48% from $520,000 in 2002 to $770,000 in 2008. The median price of condominiums rose 36% over the same period. Between 2002 and 2008, however, the median income of East Bay households rose just 12% to $86,000.

While many other Bay Area jurisdictions saw steep declines in the cost of housing following 2008, the underlying desirability of Berkeley as a place to live and the ongoing basic market demand provided by the presence of the University has meant that Berkeley's housing values and market rents have declined slightly or not at all. Meanwhile, many residents faced additional hardships associated with declining income or job loss.

Lack of affordability therefore continues to face both renters and potential homeowners, especially renters with lower incomes and aspiring first-time buyers. The Bay Area remains one of the most expensive places to live in the country. Berkeley's central location in the Bay Area, its reputation, and the relative abundance of well-paying jobs will continue to make Berkeley attractive as a place to reside and result in higher housing prices as demand exceeds supply. Past increases in home prices and rents have created a situation where many current Berkeley residents could not afford to live here if they were only now arriving. This is a particularly serious problem for those who must support themselves with low, often fixed, incomes, such as federal Supplemental Security Income (SSI) for persons with disabilities. Low-income households can spend nearly all of their incomes paying "fair market rent" for small apartment in Berkeley.

Inclusionary Housing. "Inclusionary housing" practices reserve a portion of all dwellings from new construction for low- and moderate-income households. While municipalities have established inclusionary requirements across the country, all inclusionary requirements for rental units were invalidated when the California's Supreme Court found such requirements to be in violation of California law in its 2009 "Palmer" decision.

Inclusionary requirements for condominiums still stand whereby a portion of units in a condominium project must be affordable to households with incomes not exceeding 80% of Berkeley's "Area Median Income" (AMI). Inclusionary units are subject to resale price restrictions tied to the Consumer Price Index.

California jurisdictions also must offer bonuses in exchange for affordable units provided voluntarily under the "density bonus" provisions of State law. The state's density bonus law gives development projects as much as 35% more dwelling units than the maximum that would normally be permitted under the zoning ordinance in exchange for affordable housing which must be provided in the project. The State density bonus provisions require the City to give an expansion of the normally-allowed building envelope in order to accommodate the additional units when requested by a developer. Maximum building heights and "green pathway" provisions in the Land Use chapter of the DAP have considered this possibility so as to limit the impacts of potential density bonuses.

Cities may also establish their own voluntary incentive programs to encourage affordable housing, such as by using the DAP's "Voluntary Green Pathway" entitlement process (Policy LU-2.3).

In 2010, City Council began to consider a possible "affordable housing impact fee" that would require developers to provide funding (or units) in proportion to the demand for affordable units created by their development projects. Any fees collected will be placed in the City's Housing Trust Fund (HTF) for the development of affordable housing. The HTF pools funds for affordable housing construction from a variety of sources, and makes these funds available to local affordable housing developers for the creation of very-low and low- income housing. Affordable housing developers use HTF commitments to leverage State and Federal resources. Starting in 2006, condominium developers have been allowed to pay a fee into the HTF in lieu of providing affordable units on-site. In 2009, the in-lieu fee for moderately priced project was roughly $200,000 per unit.

HTF subsidizes for very-low and low-income households succeed in creating deeply affordable housing that would not be created through private development. Furthermore, some nonprofit housing developers often supplement HTF financing with non-HTF financing for supportive social services to stabilize the lives of very low-income households and the homeless. Supportive services are generally provided within the housing development, and often treat substance abuse, teach job skills, and provide counseling.

While the HTF receives funds from some federal programs, such as Community Block Grants and HOME Partnership funds, these funds have not kept up with increased construction costs and are vulnerable to federal budget cuts. HTF activities will need to rely increasingly on developer impact and in-lieu fees" to meet the housing needs of disadvantaged communities.

Homelessness. Downtown Berkeley has a high concentration of homeless individuals relative to the rest of Alameda County. 86% of Berkeley's homeless persons are single adults, whereas half of the county's homeless are families (2008). In Berkeley, 64% of homeless persons are chronically homeless (with at least three homeless episodes within four years), compared with Alameda County's rate of 25%. In addition, an unusually large proportion of Berkeley's homeless population is male, and Berkeley is a destination for many transient teens.

Homelessness results for different reasons, including high housing costs, limited employment opportunities, inconsistent access to health care, personal factors (such as financial emergencies, evictions, and abusive environments), and disabilities (such as mental illness and substance abuse). Berkeley has joined a growing list of cities that employ "Housing First" strategies that combine housing with social services to stabilize individuals and support them as they find new opportunities. Unlike past programs, "Housing First" eliminates sobriety as a prerequisite, so that persons with substance abuse problems can be housed and find treatment.

An increasing proportion of HTF funds have been directed toward projects with supportive services, but supportive services need funding from non-housing sources.

Single Occupancy Hotels (SROs) in which single residents have their own room but share bath and kitchen facilities also provides a needed source of housing for very low income individuals. Most of Berkeley's SROs are located Downtown. Programs to retain SROs are important for serving homeless single adults, especially since it may be impossible to create new SROs. Housing grants and financing now favor the creation of permanent rather than transitional housing, and generally require that each unit have a bathroom and kitchen.

Social Services. Social services play a vital role in helping families and individuals gain and maintain economic self-sufficiency. Berkeley has made access to social services a priority and many are delivered in and around Downtown. Programs target: low-income residents, veterans, individuals needing job skills and placement assistance, young people, and individuals and families who are homeless or hungry.

Social services also address the needs of single and working parents, with childcare centers and programs that care for sick children so their parents can work. Many nonprofit providers deliver these services, and some are funded partly with City funds, such as community-based employment training and placement organizations. Berkeley's First Source program connects low-income Berkeley residents with local job opportunities. YouthWorks connects local youth with area businesses through summer and year-round training and apprenticeships. Berkeley High School students receive an array of service on campus, including health care, counseling, and college preparation services. The YMCA also offers: education and job training services for at-risk youth and teens, programs for the elderly, and support for families and individuals challenged by physical disabilities.

The City also delivers services in Downtown for persons with physical and mental disabilities, and persons recovering from drug and alcohol abuse. Berkeley has the highest concentration of people living with mental illnesses within the County of Alameda (factoring in both housed and homeless individuals). Berkeley is one of two California cities that provide public and mental health services (counties provide these services in all other jurisdictions), and is evidence of its commitment to those in need.

Many social service providers operate out of facilities distributed throughout Downtown. Some services are provided next to Civic Center Park in the Veterans Memorial Building, which is in need of seismic work to maintain safety. The Suitcase Clinic provides a drop-in health care clinic for homeless and low-income individuals.

UC Berkeley provides services to the community from locations in and near Downtown, and University Extension provides a clinic to help families with children whose learning difficulties stand in the way of academic progress (A searchable database of University programs can be viewed at http://calinthecommunity.berkeley.edu/).

Appropriate Behavior. Policies in the Downtown Area Plan address the perception by some people that Downtown is unsafe and that there is an excess of threatening, aggressive, and abusive behavior. There is broad agreement in the community that such behavior is unacceptable, whether it is from high school students, homeless youth, or persons with substance abuse problems. The perception and the reality of inappropriate behavior by some in Downtown demands community efforts that involves various City departments, the School District, the merchants, and the nonprofit agencies that provide services. Downtown community members must work together and agree on what behavior is unacceptable, and enforce standards of behavior. Much can be accomplished if merchants, residents, and other stakeholders, become better informed of ordinances and programs that are already in place – along with clear instructions and direct connections to agencies that can help.

There are also ways to improve perceptions of Downtown through direct City action. Street and sidewalk cleaning, and landscape maintenance, can occur frequently. Access to public restrooms can be improved. Public spaces can

be designed to invite all kinds of people instead of being appropriated by a few small groups. And the City can strengthen efforts to connect people with mental illness or substance abuse issues with programs that can help them.

Community Health. A 2006 City of Berkeley study showed significant disparities in the health of certain populations attributable, at least in part, to disparities in access to health services. Despite the City's efforts to make health care available for those who need it, African American and Hispanic households tend to have less access to health care services and poorer health. This is a citywide issue, but Downtown is centrally located and is the location for significant providers of health services, such as Herrick Hospital. Downtown also has more than its share of homeless and other at-risk populations. Downtown should continue to play an important role in providing health care services, and could provide an even bigger role in the future.

Herrick Health Facility. State seismic safety standards may require closure of Herrick Hospital (a division of Sutter Health) to close as a health facility, but it could serve other community health service needs and help to close Berkeley's health care gap. The city needs comprehensive health service planning in which the future of Herrick Hospital is factored and a coherent infrastructure for health services is retained.

UC Community Health Campus. The University is considering establishing a "Community Health Campus" at the former State of California Department of Health Services (DHS) site at Hearst and Shattuck. The University already provides many health services to the community, such as health clinics, an optometry clinic, social work, community-based research, community outreach, auditoriums available for community events, and other community services. Establishing a more accessible location in the Downtown Area presents unique advantages. Furthermore, bringing a broad array of services to a focused campus environment offers synergies among health service program providers, researchers, students and the community. A UC health campus could become an exceptional asset for Downtown, and could leverage economic development and other improvements.

GOALS, POLICIES & ACTIONS

GOAL HC-1: ENCOURAGE DOWNTOWN AS A THRIVING, LIVABLE, DIVERSE RESIDENTIAL NEIGHBORHOOD WITH A MIX OF SUPPORTIVE USES.

Policy HC-1.1: Neighborhood-Serving Uses. Encourage neighborhood-serving uses that let residents meet daily needs on foot (see Policy LU-1.1).

Policy HC-1.2: Sufficient Open Space. Provide sufficient usable open space for residents within Downtown and as part of new residential projects (see policies under Goals LU-2 and OS-3).

GOAL HC-2: MAINTAIN A GOOD QUALITY OF LIFE FOR RESIDENTS OF ALL AGES DURING THE DAY AND AT NIGHT IN DOWNTOWN AND IN SURROUNDING RESIDENTIAL AREAS.

Policy HC-2.1: Residential Daylight. Provide adequate natural light in residential units (see Policy HD-4.2).

Policy HC-2.2: Noise Mitigation. Evaluate and strengthen noise mitigation measures as appropriate to Downtown's active mixed-use environments. Recognize that Downtown's mixed-use areas are different from residential neighborhoods in its higher intensity of overall activity,

nighttime activity (such as restaurants and music venues), and residential and commercial uses placed in close proximity. Encourage use of best available technologies by improving standards for sound insulation and mechanical noise.

a) Evaluate existing noise standards and noise-related permitting for adequacy with regard to noise patterns in Downtown's unique urban environment. Consider revisions to strengthen the City's noise ordinance based on this evaluation.

b) Improve standards for sound insulation and for minimizing mechanical noise with best available technologies. Study the relationship between building form and materials and noise. Encourage use of best available technologies for sound insulation and mechanical noise. Consider amendments to the Downtown Design Guidelines to address noise-related issues.

c) Regularly monitor and analyze Downtown noise levels and their relationship to traffic, building form, nightclubs, loading, and the provision of urban services. The City shall create a noise map of the Downtown Area and surrounding blocks, and update the map regularly to assess changes in noise levels and the effectiveness of noise standards and mitigation measures. In addition, available data from prior years should be used to determine, if possible, changes in noise patterns and the reasons for them. Base on these analyzes, consider improvements to standards and mitigation measures.

d) Maintain adequate service as Downtown's population and service requests grow, through noise-related assessment, monitoring and enforcement provisions. Consider use of agreements with businesses and landowners acknowledging the noise ordinance and agreeing to comply with it.

Policy HC-2.3: Construction Noise. Minimize and mitigate noise and other disruptions attributable to construction activities.

a) The City shall be proactive in enforcing construction activity rules regarding noise and hours of work, due to the comparatively high level of expected ongoing construction activity in Downtown.

GOAL HC-3: OFFER DIVERSE HOUSING OPPORTUNITIES FOR PERSONS OF DIFFERENT AGES AND INCOMES, HOUSEHOLDS OF VARYING SIZE, AND PERSONS OF VARYING ABILITIES. GIVE DOWNTOWN A SIGNIFICANT ROLE IN MEETING BERKELEY'S CONTINUING NEED FOR ADDITIONAL HOUSING.

Policy HC-3.1: Growth with Preservation. Allow for significant housing development in the Downtown Area while simultaneously preserving the scale of existing residential areas.

a) Significantly increase the capacity for new housing development in Downtown, as provided for in the Land Use chapter.

b) Reduce development pressures in residential-only areas (see policies under Goal LU-4).

c) Consider ways to make standards and guidelines easier to understand and apply.

Policy HC-3.2: Affordable Housing & Supportive Services. Encourage the creation of new affordable housing projects for low- and very-low income housing, and the creation of associated supportive services (see policies under Goal-HC-5).

a) New development should pay a Housing Impact Fee consistent with citywide policy.

b) Residential development projects opting for the Voluntary Green Pathway shall provide affordable housing as described in Policy LU-2.3.

Policy HC-3.3: Larger Residential Units. Encourage larger residential units in the Downtown Area.

a) Consider standards, guidelines, and incentives to promote larger residential units.

Policy HC-3.4: Home Ownership. Encourage market-rate ownership housing (such as condominiums) to generate substantial new fees for the Housing Trust Fund. (The Housing Trust Fund finances deeply affordable units for homeless individuals/families and other low income households.) Also encourage home ownership opportunities to encourage long-term residents in the Downtown – especially low- and moderate-income households.

a) The City should work with lenders and developers to encourage "location-efficient mortgages," which recognize that transit- and pedestrian-oriented locations reduce household transportation cost, and make more household income available to leverage loans.

b) Consider fees on market-rate owner-occupied housing to raise funds for increasing the supply of affordable housing (see policies under Goal LU-2).

Policy HC-3.5: Senior & Disabled Housing. Encourage the creation of affordable housing for seniors and persons with disabilities, especially housing with supportive services, except for skilled nursing facilities that take little advantage of and contribute little to Downtown's pedestrian- and transit-oriented environment.

a) Evaluate possible policy tools and incentives for encouraging housing for persons who are elderly and/or have disabilities, especially those that incorporate supportive services. Apply the most promising tools and incentives to Downtown.

b) As citywide programs for creating housing for seniors and persons with disabilities are refined, consider incentives for projects that are near transit and supportive services.

Policy HC-3.6: UC Housing. Encourage the creation of faculty, staff, and student housing on properties presently owned by the University of California (see policies under Goal LU-6).

GOAL HC-4: PRESERVE EXISTING AFFORDABLE HOUSING DOWNTOWN, AND EXPAND THE SUPPLY OF AFFORDABLE HOUSING FOR LOW-INCOME, VERY LOW-INCOME AND WORKING-CLASS HOUSEHOLDS IN DOWNTOWN.

Policy HC-4.1: Prevent Displacement. Prevent displacement of existing affordable housing in the Downtown Area, except where replaced by an equivalent number of permanent similarly affordable dwelling units.

a) Enforce and consider ways to strengthen existing policies for the retention of existing rental housing for low-income residents.

b) Maintain and enhance City "acquisition and rehabilitation" efforts for affordable housing, while avoiding arbitrary or capricious displacement of tenants. Mitigate the negative effects of temporary or permanent reloca-

tion on tenants, and develop a plan for such mitigations in advance of implementation.

c) Consider incentives for the acquisition and rehabilitation of existing buildings by private owners, to maintain more affordable housing for low-income residents in Downtown.

d) Consider the use of the Housing Trust Fund and/or housing mitigation fees from office and other commercial projects for the renovation and retention of affordable housing.

e) Consider flexibility in development standards to make it easier to renovate and retain affordable rental units.

Policy HC-4.2: Affordable Housing & Supportive Services. Promote the creation of permanent affordable housing with supportive services in Downtown, especially for homeless individuals and families. Encourage provision of appropriate supportive services for tenants at all functional levels.

a) Identify opportunities to expand permanent housing with supportive services in Downtown.

b) Develop a model "net-zero energy" affordable housing and green demonstration project on the City-owned Berkeley Way parking lot site (see Policy ES-2.3). Provide a level of underground parking, if feasible, or contributions toward the construction of public parking at a nearby location, with the goal of not reducing the overall number of off-street parking spaces (see policies under Goal AC-3).

c) Develop programs and partnerships among service providers and non-profit housing developers for rehabilitating and converting existing SRO properties, and by using a permanent supportive housing model, such as Berkeley's "Housing First" program.

d) Identify sites and long-term funding to support the development and on-going provision of services for new permanent supportive housing to meet the needs of very low-income single individuals and engage owners of SRO properties to convert to permanent supportive housing.

e) Encourage the creation of "micro-units," very small apartments that may not include typical apartment features, such as a standard kitchen. Review development standards and inclusionary housing provisions to identify obstacles to the creation of micro-units, and consider whether such obstacles should be removed.

f) Explore options for expanding the range of affordable housing opportunities in the Downtown by encouraging innovative housing types, including limited equity cooperatives, co-housing, housing land trusts and other options.

g) Consider incentives for projects that provide a greater number of affordable units or that provide units at deeper affordability (50% or less of the Area Median Income).

GOAL HC-5: DELIVER IN DOWNTOWN EFFECTIVE AND COMPASSIONATE SERVICES FOR SENIORS, PARENTS AND YOUTH, AND PERSONS WITH SPECIAL NEEDS, INCLUDING INDIVIDUALS WHO ARE HOMELESS, HAVE PHYSICAL AND/OR MENTAL DISABILITIES, AND/OR SUFFER FROM SUBSTANCE ABUSE.

Policy HC-5.1: Youth Services. Serve youth in Downtown, and encourage their health, safety

and welfare. Expand recreation and other uses that serve youth (see policies under Goal ED-8).

a) Expand recreation and other uses that serve youth. Support internships for teens and young adults.

b) Encourage developers to hire local youth who are enrolled in State-approved construction apprenticeships programs with a proven record of success.

c) Work in partnerships with organizations and institutions (such as Berkeley High School, Berkeley City College, the YMCA, the Adult School, and UC Berkeley) to provide healthful activities, counseling, career planning, job training/placement, medical, and other beneficial services for teens and young adults – including parenting support programs.

d) Support initiatives where teens and young adults can contribute to Downtown through internships and civic activities. Encourage developers to hire local youth enrolled in state approved construction apprenticeships programs that have a proven record of success.

Policy HC-5.2: Training & Skill Building. Encourage life skills, job training, job referral and job placement through programs and facilities that focus on Downtown (see policies under Goal ED-8).

Policy HC-5.3: Senior Services. Serve seniors in Downtown, and encourage their health, safety and welfare.

a) Work in partnerships with community organizations and institutions to maintain the availability of appropriate senior services.

Policy HC-5.4: Social Services. Maintain and enhance prompt access to social services by Downtown residents and transient populations.

a) Evaluate existing and future social service needs and opportunities, both citywide and Downtown. Consider how services might be improved and how they might be accommodated in Downtown.

b) Seek funding to modernize the Veterans Memorial building and make it seismically safe. Consider its continued use for as a social service facility.

Policy HC-5.5: Communication Services. Ensure that persons in Downtown can access communication services, particularly during emergencies.

a) Work with telecommunications providers to ensure that public telephones are available and accessible throughout Downtown.

b) Work with telecommunications providers to consider emergency call boxes or other publicly accessible emergency response devices in Downtown, and to implement their installation if they convey substantial public benefit and are feasible.

GOAL HC-6: PROVIDE A SAFE, CLEAN AND ATTRACTIVE DOWNTOWN, IN PARTNERSHIP WITH THE COMMUNITY.

Policy HC-6.1: Safe Environments. Encourage safe environments by addressing unsafe conditions and inappropriate behavior (see policies under Goal OS-4).

a) Establish community-appropriate standards of behavior and maintain a shared

commitment among public and private stakeholders to enforce those standards, consistent with the citywide Public Commons for Everyone initiative.

b) Distribute public information summarizing existing ordinances pertaining to street behavior and provide clear instruction on how to report aggressive behavior, and unsanitary and unsafe conditions.

c) Engage merchants, other stakeholders, the Police Department, mental health and social service providers, and homeless advocates, in defining critical issues and actions. As part of this on-going process, monitor locations and conditions where aggressive, abusive and unsanitary behavior occurs frequently.

d) Provide adequate 24-hour public toilets in Downtown with clear signage, and provide for their ongoing maintenance, security, and frequent cleaning.

e) Establish easy mechanisms for direct communication between Downtown community stakeholders and police or other service personnel to encourage rapid response to unsafe conditions or inappropriate behavior.

f) Work in partnership with Berkeley High School and its students, parents, teachers, and staff, along with merchants, to define what constitutes appropriate behavior – for students and adults alike – and to encourage appropriate behavior in Downtown.

g) Encourage cooperative action between the City of Berkeley, the Berkeley Unified School District, and Berkeley High School staff. The existing joint committee of City and BUSD administrators should begin by considering inappropriate Downtown behavior and ways to address it.

h) Encourage collaboration among all of the public agencies in Downtown, including the City, BART Police, UC Police, and BHS Staff, to enforce standards.

i) Expand and create new opportunities for high school and other students to support and engage in community services, social programs, and problem solving.

Policy HC-6.2: Cleaning & Maintenance. Encourage a clean Downtown, with landscaping that is attractive and well-maintained (see policies under Goal OS-4).

a) Consider ways to expand the capacity for cleaning and landscape maintenance through better coordination, greater efficiency and increased funding (see policies under Goals LU-2 and OS-3). Give special attention to ways that cleaning and landscaping activities might be combined with expanding job training and social service opportunities.

Policy HC-6.3: Design for Public Safety. Promote safety in publicly accessible areas by encouraging active use of public areas, visual access, and adequate lighting (see policies under Goal OS-4).

GOAL HC-7: MAINTAIN AND EXPAND INTEGRATED HEALTH SERVICES AVAILABLE IN DOWNTOWN TO ADDRESS HEALTH INEQUITIES.

Policy HC-7.1 Health Services. Encourage the retention and expansion of effective health care and health-related services in Downtown, especially to address the needs of those who

would be most negatively affected by lack of accessible, centrally located health services.

a) The City should engage in an open, inclusive and transparent process for assessing the City's health services needs – and the role that the Downtown Area, due to its central location and accessibility, might play in meeting these needs. Among the issues that should be considered is care for acute and long-term chronic and life-threatening conditions, some of which have been addressed at the Herrick health facility site.

b) The City should encourage the owner of the Herrick site to include health services for the community as part of any redevelopment of the site (see Policy LU-8.1).

c) Encourage UC to move health services and programs that serve the general public into the Downtown Area (see Policy LU-8.2).

d) Encourage collaboration among all of the public, non-profit and for-profit agencies in Downtown that provide health-related services, including the City, the YMCA, nonprofit and for-profit health-related organizations, the University of California, various transportation agencies, and other service providers.

8 - ECONOMIC DEVELOPMENT

8. ECONOMIC DEVELOPMENT

STRATEGIC STATEMENT

Downtown is the heart of the city, where the community comes together to shop, to work or play, to eat or read, to exercise or just to walk. A thriving, economically successful Downtown is essential to the health of Berkeley, economically, socially and environmentally. To succeed, Downtown must build on its competitive advantages, especially its relationship to its cultural, educational, and historic assets.

Downtown's attributes and economic trends present opportunities for reinvigorating Downtown. City policies and efforts can encourage a diverse mix of complementary uses in Downtown. Continued demand for office and residential space can be expected, and new office and residential growth will bring higher levels of spending. Downtown's retail mix will continue to take shape around Downtown's synergies and central location. Downtown might also capitalize on unmet market demand for certain types of retailers.

Downtown opportunities also vary by subareas. Immediately around BART, exceptional regional access, higher development intensity, and heavy foot traffic, point toward retail that is more varied and with a regional clientele. Consequently, Shattuck deserves special emphasis for improvement and retail recruitment activities from University Avenue to Bancroft, as do adjacent side streets east of Shattuck. Along Addison Street and University Avenue, cultural uses will continue to bring activity to Downtown and support nearby businesses. Farther from BART but still within easy walking distance, the Downtown Area becomes progressively more residential. There is less intensity of activity and commercial activity tends to be more neighborhood-serving businesses. In these areas, a neighborhood-serving retail focus makes sense.

As Berkeley's symbolic heart, Downtown also plays as special role in providing services, goods, and cultural resources that meet the needs of Berkeleyans of all incomes, ethnicities, ages and household types. While Downtown has no direct freeway access, it enjoys some of the best transit access in the Bay Area. While cars are not the preferred mode for going Downtown, it is important to provide adequate parking for patrons of Downtown businesses, while simultaneously discouraging automobile commuters. Appropriate signage and pricing be used to use parking appropriately with an emphasis on short-term patrons. Berkeley can also take pride in creating a recognizable center for "green" businesses and cutting-edge practices for environmental sustainability.

Culture and the Arts. Downtown is a center for cultural and the arts. Downtown should build on its role as a destination for drama, music, films, and fine arts and support their health and growth. The Arts District has brought together a strong complement of theatre and music venues, and cultural destinations are located throughout Downtown. As a consequence, Downtown Berkeley has experienced a cultural renaissance in the past few years, with an explosion of music, theatre and art venues.

Facing Page: *Small business owners give character, life and vitality to Downtown. Local artist Lisa Esherick, created a series of oil paintings of Downtown's small business owners to celebrate their contributions as individuals and as a whole. Images used with permission.*

Major new contributors to the Downtown scene are on their way. As this Plan is adopted, the University Art Museum and Pacific Film Archive is well on its way to constructing a world-class building that is sure to become a sought-out destination. The Magnes Museum also has plans to relocate Downtown, to take advantage of Downtown's accessibility and be part of its large community of cultural uses.

Downtown is also fortunate to have exceptional architectural and historic assets. Moving forward, it will be important to build on the foundation that these assets represent, as Downtown's competitiveness depends on the unique sense of place that its historic and architectural treasures afford.

The contributions of the arts and culture cannot be overestimated. In Berkeley, there are more than 130 arts and cultural organizations that collectively form one of the City's largest employment sectors. The arts provide some 3,400 jobs, reach an annual audience of 1.7 million people, and have a combined budget of $70 million. Theater and music venues can also take some credit for the success of many restaurants and unique retailers in Downtown, and economic advisors to the DAP have recommended Downtown retail strategies build on these current strengths.

Retail Revitalization. Downtown continues to be a significant employment center and attracts tourists and visitors; it is no longer a major retail destination in the East Bay. Because of its distance from the freeway, dearth of large ground-floor retail space, and a perceived lack of convenient parking, economic advisors have indicated it is unlikely Downtown will attract a major "anchor" retailer or become a major regional retail center.

Downtown can increasingly serve Berkeleyans and visitors with attractive shops, diverse restaurants, amenities, and an appealing and lively urban environment. Downtown provides many needs that are not met in neighborhood commercial centers, and offers options for Berkeleyans to shop locally instead of in cities. Good transit connections between Berkeley residential neighborhoods and Downtown are an essential part of a sustainable Berkeley.

Downtown also offers opportunities to enjoy a blend of small shops, restaurants, and services, which are often unique. Downtown has many small retail spaces, as the median size of Downtown's 317 ground-floor spaces is only 1,460 square feet (2008). Downtown also has synergies among small retailers that make it a one-of-a-kind retail destination, such as a cluster of bookstores and game stores in the Shattuck Square area.

The quality and character of Downtown is essential for Downtown to compete with other destinations. In Downtown an array of local goods and services are available within a pedestrian-oriented district that has exceptional transit service, where a positive sense of place can be cultivated. It is important that visitors, residents, students and workers find clean, safe and well-designed streets and open spaces.

Residential Foundation. Downtown is also a growing residential neighborhood. Downtown residents and businesses are mutually supportive. Downtown shops and services make it possible for more people to meet their daily needs by walking, and the patronage of residents encourages healthy and successful local businesses.

The growth of Downtown into a great urban residential neighborhood is essential to Downtown's economic success. Housing supports Downtown businesses and contributes to the city's vitality – while also offering a car-free environment that helps minimize transportation-related greenhouse gases.

Downtown can be a model for integrating economic development and environmental protection. A “green” and sustainable Downtown should be integral to its economic development. Green means not only abundant tree canopy and attractive landscaping and open spaces but also the use of cutting-edge technologies that protect water quality, conserve resources and reduce energy consumption. Downtown should attract and support “green” businesses and should be promoted as a destination for visiting green businesses and seeing best environmental practices up close.

In addition to building on the strength of its existing commercial, residential, and institutional uses, Downtown must also build on the strength of its location. While relatively distant from a freeway, it has some of the best transit access in the Bay Area. While cars are not the preferred mode for going Downtown, it is important to provide adequate parking for patrons of Downtown businesses, while simultaneously discouraging automobile commuters. As part of an economic development program, it is also important that appropriate signage and pricing be used so that people can find parking easily and also so parking is used efficiently.

Downtown forms the heart of Berkeley’s community. Not only is it centrally located, but it is Berkeley’s symbolic center. As such, it should provide services, goods, and cultural resources to meet needs of Berkeleyans of all incomes and ethnicities, as well all ages and household types – families, the elderly, and students.

A Center of Employment and Education. Downtown is the heart of a “city of learning.” Downtown contains or is next to major educational anchors including the University of California, Berkeley City College, Berkeley High School, the Central Library, and a concentration of learning-related businesses and institutes.

Downtown is one of two major employment centers within Berkeley, the other being West Berkeley. Downtown’s professional, technical, government and service offices serve the community and the Bay Area. Jobs in Downtown range from entry-level opportunities to the highest levels of professional and academic achievement. Several job training and job placement programs are located Downtown.

Downtown has had a relatively low vacancy rate in offices and rental rates for offices are relatively high compared to many portions of the Bay Area. The low vacancy rate is partly because most of Downtown’s office space serves the needs of the University or Lawrence Berkeley National Laboratory. In light of its growing needs, the University’s plans to construct an additional 800,000 square feet of office, research and cultural space in and adjacent to the Downtown Area, and UC staff and employees will continue to make significant contributions toward Downtown’s economic vitality.

Because many businesses are eager to be near to the University and Lab, and because the University spins off new businesses, there is likely to be a strong continued demand for Downtown office space. A 2006 study indicated that, since 1997, 104 start-up companies began as spin-offs resulting research at the University and Lawrence Berkeley Lab; only 14 of these companies remained in Berkeley, however. The study suggested that 25 companies could have been retained if Berkeley had more medium- / large-sized space and policies that encouraged business retention. In spite of demand, there has been very little office development in Downtown Berkeley for many years and. until the recession there was limited office space available. As the economy recovers, it is likely that demand for office space in Downtown will pick up to address this type of need.

Berkeley's reputation and its adjacency to the University have attracted many non-profit organizations to Downtown. These non-profits represent a wide spectrum of concerns, including public policy, computer and internet technologies, cultural programs, community services, and job training and placement programs.

Building on Strengths. Downtown's commercial area is very large for a city of about 100,000 people. City policies and programs can help recruit retail uses that are complementary to existing uses or fill an unmet market niche. For Downtown, these include games, books, apparel, home furnishings, computers, electronics, bicycles, and shops or restaurants relating to cultural uses. In addition, new office and residential uses will bring higher levels of spending, while minimizing local and regional traffic impacts.

In order for an economic development strategy to "build on strengths," it must also emphasize targeted strategies that follow a fine-grain understanding of existing uses and characteristics in each subarea – resulting in healthier and more diverse retail. This does not necessarily mean establishing significantly different zoning use standards for different Downtown commercial areas, but perhaps establishing policies that recognize the importance of certain types of uses in certain locations. For example, the area around the BART station forms a distinctive core that is ideal for supporting a highly intensive mix of uses with vigorous retail especially along Shattuck Avenue.

GOALS, POLICIES & ACTIONS

GOAL ED-1: SERVE THE NEEDS OF THE NEIGHBORHOOD AND THE CITY. MAKE DOWNTOWN A MORE ATTRACTIVE REGIONAL DESTINATION, BY BUILDING ON DOWNTOWN'S UNIQUE BLEND OF CULTURAL, HISTORIC, ENTERTAINMENT, ART, EDUCATIONAL, AND COMMUNITY INSTITUTIONS – AND BY PROMOTING SUCCESSFUL RETAIL BUSINESSES AND OTHER ATTRACTIONS, WITH DAYTIME AND NIGHTTIME POPULATIONS TO SUPPORT THEM.

Policy ED-1.1: Shop Downtown. Encourage shopping Downtown, especially by Berkeley residents and UC faculty, staff, and students.

a) Work with the Downtown Berkeley Association (DBA), the Convention and Visitors Bureau, the Chamber of Commerce, UC Berkeley, the Berkeley Cultural Trust, and other stakeholders to market Downtown, support businesses, attract tenants, and promote effective merchandising.

b) Conduct surveys to identify retail businesses for which there may be market demand, such as retailers that would serve Berkeley residents and UC faculty, staff and students.

c) Maintain and enhance "Shop Berkeley" programs and events to encourage patronage of Downtown businesses, and to describe benefits from local independent businesses.

d) Enhance safety and cleanliness on Downtown streets (see policies under Goal HC-6).

Policy ED–1.2: Parking. Address parking availability problems associated with retail, restaurant, cultural, educational, entertainment, and hotel uses (see policies under Goal AC-3).

Policy ED-1.3: Retail, Restaurants & Cultural Uses. Support existing and encourage highly functional and viable new retail, restaurant, and cultural uses (such as theaters, music, museums, and galleries).

a) Reduce discretionary review and streamline permits, to the extent feasible, for retail, restaurant and cultural uses.

b) In new buildings, require ground-floor retail space with a minimum floor-to-ceiling height of 15 feet (see Policy HD-4.1).

c) Where continuous commercial and cultural uses are desirable (see "Figure LU-3: Public-Servicing Frontage"), strengthen standards to require and guidelines to encourage street-facing retail, restaurant, cultural, and acceptable alternatives, as part of new development and adaptive reuse.

d) To promote functional and viable retail, minimize street-level parking to the extent feasible (see Policies AC-3.3 & HD-4.1).

e) Focus economic development, historic preservation, street improvement, and maintenance resources toward subareas with the most opportunity for success and synergy.

- Work with retail stakeholders to regularly consider the extent and location of vacancies, and to recruit appropriate and complementary new tenants.

- Give special attention to Shattuck Avenue from Durant Street to University Avenue, and secondarily to segments of University Avenue, and Addison and Center Streets, between Shattuck and Oxford.

Policy ED-1.4: Rehabs & Reuse. Encourage the rehabilitation and reuse of existing buildings (see policies under Goals LU-2 & LU-4, and the chapter on Historic Preservation and Urban Design).

Policy ED-1.5: Local Businesses. Encourage the retention and creation of small businesses and locally-owned businesses (see Policy ED-9.1).

Policy ED-1.6: Larger Retail Spaces. Retain and attract larger retailers to promote Downtown as a destination.

a) Identify larger retail types that may do well in Downtown (such as for electronics, computers, appliances, and apparel).

b) Consider incentives to retain and encourage retail space exceeding 10,000 square feet.

c) Review and, if necessary, modify zoning provisions to discourage the subdivision of existing large spaces.

d) Encourage the University to create larger retail spaces along University and Shattuck Avenues (see Policies LU–6.1 and HD-5.1).

Policy ED-1.7: Entertainment & Culture. Strengthen Downtown as a prime regional destination for alternative and mainstream cinema, and live theater and music. Evaluate and enhance the theater- and cinema-going experience in subareas where they are concentrated.

a) Work to retain and expand cinemas, live theaters, and music venues.

b) Work with cinema, theater, and music venues to upgrade to state-of-the-art facilities.

c) Evaluate the experience of going to Downtown theaters, cinemas and music venues, and make enhancements to public safety and aesthetics. Adopt SOSIP recommendations such as pedestrian-scaled lighting for enhancing Downtown as a destination as

Figure ED-1: Historic Cinemas. *Downtown cinemas, along with music clubs and live theater, help make Downtown a regional destination for entertainment. The California Theater, built in 1914, and UA Theater, built in 1932, also help contribute to the special sense of place that distinguishes Downtown from other destinations. Staff photos*

Figure ED-2: Civic Destinations. *The YMCA and Central Branch Library are among Downtown's many civic destinations and help make Downtown welcoming to families. Staff photos*

part of the SOSIP (see policies under Goal OS-1). Give special attention to improving the theater-going experience near Shattuck and Kittredge Street and near Shattuck and Addison, as well as connections to nearby parking facilities.

d) Promote the arts and cultural events, programs and activities.

Policy ED-1.8: Families. Promote family-friendly uses, such as childcare and preschools, and cultural, recreational, and educational activities for children, such as the YMCA.

a) Consult with existing family-friendly businesses and organizations to determine what factors are critical to their retention and expansion. Consider incentives and programs that will support and retain existing family-friendly businesses and organizations.

b) Work with DBA, property owners, real estate brokers, and other Downtown stakeholders to recruit new family-friendly businesses and organizations to Downtown.

Policy ED-1.9: Educational Uses. Promote educational uses, and enhance Downtown as a center of learning.

a) Work with educational institutions to retain and expand lectures, instruction, and public events in Downtown. Such educational institutions include, but are not limited to: such as University of California, Berkeley Public Library, Berkeley High School, and Berkeley City College. Consider incentives and programs that might help encourage such activities.

b) Encourage public awareness of Downtown educational events and activities through publicity and City communications.

Policy ED-1.10: Conference Facilities. Seek to retain and expand meeting and conference facilities.

a) Support efforts by the Convention and Visitors Bureau and Downtown Berkeley Association to inventory and publicize available meeting and conference facilities.

b) Encourage the inclusion of meeting and conference spaces to serve the private sector and the general public within new office and institutional development projects.

c) Work with existing businesses and educational institutions to promote the use of suitable underutilized spaces as additional meeting and conference facilities.

Policy ED-1.11: Hotels. Encourage hotels in the heart of Downtown.

a) Allow greater building height for major hotels than is generally allowed, if the hotel project delivers significant additional public benefits (consistent with Policy LU-1.5).

b) Consider other incentives for major hotel projects, commensurate with the unique public benefits that hotels are likely to deliver.

c) Partner with hotel developers to seek State and/or Federal funding that may support hotel projects and/or associated public improvements.

d) Evaluate the impacts of hotels during the permit review process with respect to the impact of anticipated hotel employees on the demand for housing, transit and other public services, and measures that would be taken by the hotel to mitigate those impacts.

Policy ED-1.12: Signage. Improve public signage to make it more attractive and reduce "visual clutter," such as by eliminating unnecessary signs or avoiding unnecessary variety in style. Enhance and expand signage and other features to help visitors navigate Downtown, such as to find transit, public parking, or major destinations.

a) Seek ways to consolidate new and existing signs. Develop guidelines for the general appearance and placement of signs, possibly as part of the Streets & Open Space Improvements Plan (see Policy OS-1.1).

b) Develop a program of directional "wayfinding" signs and information kiosks which gives consideration to:

- the location of common destinations, especially cultural venues;
- points of interest, such as historic resources and environmental sustainability features;
- visitor arrival points, such as near BART and larger parking garages;
- transit stops and stations with real-time bus and BART train arrival times;
- signage showing real-time parking availability in larger garages (see Policy AC-3.1).

Policy ED–1.13: Parking. Address perceived parking availability problems associated with retail, restaurant, cultural, educational, entertainment, and hotel uses (see policies under Goals AC-1 and AC-3).

GOAL ED-2: MAINTAIN SAFE AND INVITING STREETS, PARKS & PLAZAS THAT CONTRIBUTE TO THE SUCCESS OF BUSINESSES AND THE WELL-BEING OF RESIDENTS.

Policy ED-2.1: Activity & Safety. To promote activity and safety on streets and other public open spaces, encourage outdoor dining, street fairs, outdoor merchandising and other private uses, as appropriate.

a) Review existing City policies and procedures that may pose barriers to outdoor dining and street fairs on public property. Also consider other private uses that could help enhance public spaces. Eliminate barriers to the extent possible, while also assuring that private users pay a fair share of public maintenance costs.

Policy ED-2.2: Public Conveniences. Establish new and enhance existing publicly accessible convenience facilities including restrooms, drinking fountains, and other amenities.

a) Make publicly accessible convenience facilities an integral part of planning for public streets and open space improvements (see Policy OS-4.1).

b) Maintain public restrooms to highest practical standards, through the allocation of adequate City resources and through public-private cooperation.

Policy ED 2.3: Clean Public Spaces. Promote clean and well-maintained streets, parks, and plazas (see policies under Goals OS-4 and HC-6).

GOAL ED-3: TO MAKE DOWNTOWN MORE ATTRACTIVE AND ECONOMICALLY SUCCESSFUL, ENCOURAGE PLACE-MAKING

Figure ED-3: Berkeley's Arts District. *The Arts District has spurred Downtown revitalization efforts by attracting people from around the Bay Area. Cultural organizations, private developers, and the City have worked together to attract venues for live performance, including Berkeley Repertory Theatre, Aurora Theater, The Jazzschool, Nevo School, and the Freight & Salvage Coffeehouse. Art galleries promoted by Berkeley's Civic Arts Program add to the mix.*

The Arts District was initially focused along a one-block segment of Addison Street that was improved to be more attractive and feature poetry and public art. Major new cultural uses are expanding the Art District beyond its original boundaries. The University of California Berkeley Art Museum and Pacific Film Archive and the Judah L. Magnes Museum are relocating to the Downtown, and adaptive reuse of the UC Theater may feature a major music club.

THROUGH THE PRESERVATION OF HISTORIC BUILDINGS, STREET AND OPEN SPACE IMPROVEMENTS, AND HIGH-QUALITY NEW CONSTRUCTION.

See "Historic Preservation & Urban Design" and "Streets & Open Space" chapters, and policies under Goal ED-1.

GOAL ED-4: ENSURE THAT UC BERKELEY IS A PARTNER IN PROMOTING A HEALTHY AND VITAL DOWNTOWN.

Policy ED-4.1: Guiding and Cooperating with UC Berkeley. Provide guidance to the University regarding actions that it can take regarding the Downtown Area Plan, and cooperate with the University in carrying out the Plan.

a) Work with the University to develop a summary of UC-related policies and implementing actions contained in the DAP. Review this summary regularly, and consider ways to implement the DAP more effectively.

b) Work toward the timely adoption of Zoning provisions and Downtown Design Guideline amendments in order to further guide UC development initiatives in the Downtown Area.

Policy ED-4.2: Community Uses & Economic Activity. Encourage the University to locate academic and related programs that have a strong community component and can encourage economic activity Downtown (see policies under Goal LU-6).

Policy ED-4.3: Downtown Retail. Encourage the University to use its development to strengthen Downtown retail (see policies under Goal LU-6).

a) Encourage the University to make development along Shattuck and University Avenue a near-term priority, because of its economic benefits to Downtown. Work with UC Berkeley staff and administrators to accelerate UC's current 10-year timetable for development in these locations.

Policy ED-4.4: Fair Compensation. UC Berkeley should fairly compensate the City for taxes lost when the University leases, buys, or occupies space that was previously occupied by private tenants.

a) The City should seek an agreement with the University to establish a mechanism such that if UC leases or occupies any space within private office/commercial development, or purchases land Downtown, it will provide to the City financial support equivalent to the taxes and/or fees that the City would receive if private users were leasing, occupying or owning the space.

GOAL ED-5: INCORPORATE SUSTAINABLE PRACTICES AS AN ESSENTIAL COMPONENT OF ECONOMIC DEVELOPMENT, AND ESTABLISH DOWNTOWN AS A RECOGNIZED CENTER FOR BUSINESSES AND INSTITUTIONS THAT ARE COMMITTED TO ENVIRONMENTAL SUSTAINABILITY.

Policy ED-5.1: Green Businesses. Encourage "green businesses" Downtown (see Policy ES-2.2).

a) Promote environmental business practices.

Policy ED-5.2: Public Awareness. Increase public awareness of environmental features and programs Downtown (see policies under Goals ES-1 and ES-2).

Policy ED-5.3: Local Food and Businesses. Promote strategies that connect Downtown residents, businesses and visitors with local sources of products, services, and healthful foods (see Policy ES-2.3).

Policy ED-5.4: Local Businesses. Encourage the retention and creation of small and locally-owned businesses (see Policies ES-2.3, ED-8.2, and ED-9.1).

GOAL ED-6: INVEST IN CIVIC IMPROVEMENTS (SUCH AS STREETS, OPEN SPACES, AND COMMUNITY FACILITIES) TO ENHANCE DOWNTOWN AS A PLACE TO LIVE, WORK, AND VISIT.

See policies in chapters on "Historic Preservation & Urban Design" and "Streets & Open Space".

GOAL ED-7: PROMOTE DOWNTOWN AS A REGIONAL CULTURAL CENTER AND VISITOR DESTINATION.

Policy ED-7.1: Culture & the Arts. Promote the arts and cultural events, programs, and activities, especially those that embrace diverse traditions and are accessible to persons of all economic means.

a) Support the Civic Arts Commission and cultural groups in Berkeley that support emerging local artists and cultural organizations.

b) Support Arts District stakeholders and other cultural groups that bring expressions of ethnic, religious, cultural, and minority institutions to Downtown.

c) Encourage long-term and affordable space for arts, culture, and other desirable uses that cannot pay market rents (see Policy LU-1.2).

d) Consider establishing facilities for outdoor public performances of music, drama, dance, poetry, or other performance arts (see policies under Goal OS-1).

Policy ED-7.2: Tourism & Visitors. Promote Downtown as a tourist and visitor destination (see policies under Goals ES-2, LU-1, AC-1, AC-3, HD-1, OS-1, OS-4, and other goals in this chapter).

GOAL ED-8: INCREASE THE NUMBER OF DOWNTOWN JOBS THAT GO TO BERKELEY RESIDENTS, AND SUPPORT THE DEVELOPMENT OF JOB SKILLS FOR BERKELEY RESIDENTS – ESPECIALLY BERKELEY'S YOUTH.

Policy ED-8.1: Job Development. Connect Downtown businesses with the employment needs of Berkeley residents, and address existing chronic unemployment and under-employment among local populations. A special emphasis should be placed on providing Berkeley youth with job skills and entry-level job opportunities (see policies under Goals LU-2 and HC-5).

a) Gather information on the types of employment available Downtown and make this information available to educational institutions and job training.

b) Encourage job training (such as employment counseling, referrals, placement, and retention) and the development of life skills (such as parenting, grooming, and personal finances) for Berkeley residents and homeless populations by working with Downtown's public and private institutions, nonprofit organizations, and businesses.

c) Strengthen citywide job referral and job placement programs for Berkeley's residents (such as "First Source"), and work

with Downtown business and job training organizations to help Berkeley residents obtain Downtown employment. Consider requiring construction firms and labor unions that work on public improvements to participate in on-the-job training for Berkeley residents, including Berkeley youth.

d) Support job placement and professional internship programs for youth in the Downtown Area, such as at the YMCA and Berkeley High School, and help these programs network with Downtown business organizations.

e) Consider incentives for developers and new businesses to provide on-the-job training and employment opportunities, and consider inclusion of job opportunities for Berkeley's workforce as part of City-developer negotiations.

f) Consider how job training opportunities might be joined with Downtown cleaning and landscaping activities.

g) Promote local hiring with Voluntary Green Pathway employment requirements (see Policy LU-2.3).

Policy ED-8.2: Business Opportunities. Serve the growth needs of existing Downtown businesses, and support start-up businesses Downtown, especially ones that capitalize on the proximity of UC Berkeley. Take advantage of Berkeley's existing workforce and its ethnic and cultural diversity (see policies in "Land Use" chapter and elsewhere in this chapter).

a) Encourage new office space Downtown by allowing appropriate uses and building heights (see policies in Land Use chapter).

b) Work with the University to encourage its faculty and recent graduates to locate new and/or existing businesses Downtown.

GOAL ED-9: ENCOURAGE LOCAL BUSINESSES THAT REPRESENT THE CITY'S DIVERSE ETHNIC, CULTURAL AND INCOME GROUPS.

Policy ED-9.1: Local Businesses. Encourage the retention and creation of small businesses and locally owned businesses.

a) Establish economic development strategies to retain existing small and locally owned businesses, and to encourage the establishment of new businesses with ownership structures that keep consumer dollars in the local economy.

b) Maintain and expand "Shop Berkeley" promotion and education efforts specific to Downtown.

c) Continue existing, and consider new, low-interest loans to encourage and support local small businesses in Downtown.

d) Provide training to small businesses for their improvement and to make Downtown a more effective business district.

e) Seek to recruit ethnically- and culturally-focused restaurants and other businesses in other cities to move to, or open another branch in, Downtown.

f) Seek to avoid arbitrary or capricious displacement of business tenants, and mitigate the negative effects of temporary or permanent relocation on businesses.

GOAL ED-10: SERVE THE HOUSING NEEDS OF ALL INCOME GROUPS AND PROVIDE A GROWING BASE OF RESIDENTS WHO SUPPORT A BROAD RANGE OF DOWNTOWN RETAIL AND OTHER BUSINESSES.

See policies in chapter on "Housing and Community Health & Services."

GOAL ED-11: PROVIDE ACCESS TO DOWNTOWN, WHICH SUPPORTS RETAIL, RESTAURANTS, ENTERTAINMENT, HOTELS AND CULTURAL USES.

See policies in chapter on "Access."

GOAL ED-12: INVEST RESOURCES DOWNTOWN TO SUPPORT CITY GOALS AND TO IMPROVE AND MAINTAIN A HIGH QUALITY OF ENVIRONMENT.

Policy ED-12.1: Revenues for Downtown. Significant capital investment in Downtown infrastructure and a continued commitment to maintenance of a quality environment is necessary in order for the Downtown to develop and remain a vital and vibrant place to work, live, shop, dine and recreate. The City must balance the needs of all neighborhoods and commercial areas of the City, while at the same time remaining committed to investing resources in the Downtown to meet these goals. Potential sources of funding for investment in the Downtown include parking meter revenue, transient occupancy tax and various development fees that could be assessed. Each year prior to the City Council reviewing and adopting its annual budget, the Council will be provided with a report of the revenues generated from various sources in the Downtown. As part of the annual budget adoption, the Council will commit a meaningful amount of resources to both capital investment and maintenance for the Downtown area (see policies under Goal LU-2).

a) Coordinate financing strategies for parking & transportation, streets & open space, and other public needs, to identify funding sources, estimate revenues, and prioritize improvements and programs.

23.204.130 C-DMU Downtown Mixed-Use District.

A. *District Purpose.* The purpose of the C-DMU district is to implement the vision and goals of the Downtown Area Plan (adopted 2012), which include: Environmental Sustainability, Land Use, Access, Historic Preservation and Urban Design, Streets and Open Space, Housing and Community Health and Services, and Economic Development.

B. *Allowed Land Use.*

1. *General.* See Table 23.204-1: Allowed Uses in the Commercial Districts.

2. *Automatic Teller Machines (ATM).* An ATM inside a non-bank building is allowed with an AUP.

3. *Banks and Financial Services, Retail.* Retail banks and financial services in the C-DMU require permits as follows:

(i) Under 7,500 square feet outside of the Arts District Overlay: Zoning Certificate.

(ii) All other retail banks and financial service uses: AUP.

4. *Media Production.* Recording studios are allowed with an AUP. Broadcast studios require a Use Permit.

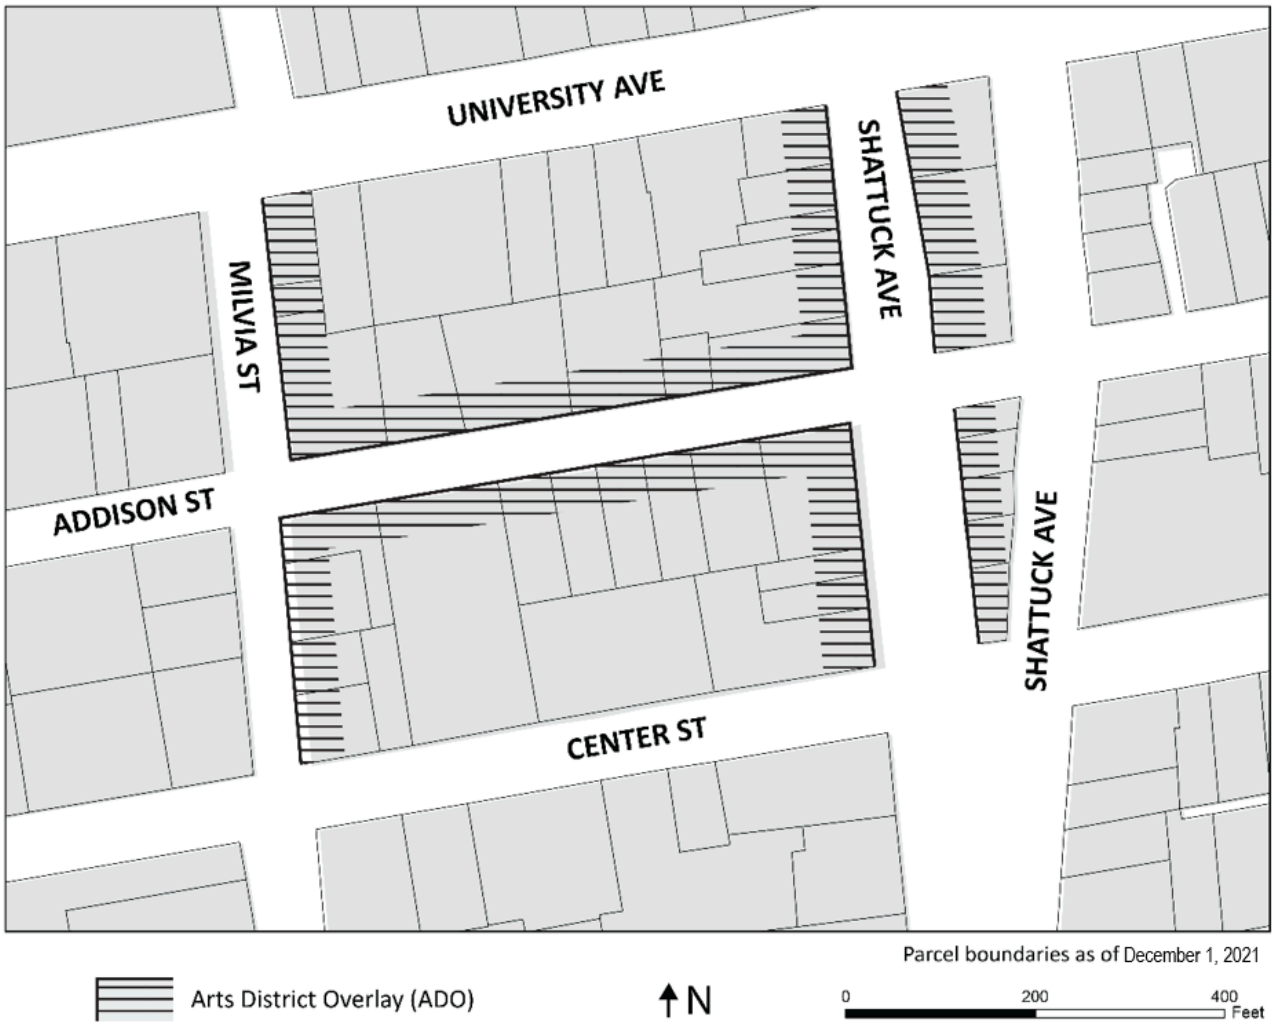
C. *Additional Permit Requirements.* See Section 23.204.030--Additional Permit Requirements.

D. *Arts Overlay District.*

1. *Purpose.* The purpose of the Downtown Arts District Overlay (ADO) is to create a core of cultural activities and supportive retail and commercial uses in the C-DMU district. The ADO is intended to generate more pedestrian vitality in the downtown, promote Berkeley's regional leadership in the arts, and encourage broader economic revitalization of the area. The types of uses which would enhance the Arts District include ground floor retail uses which would contribute to the cultural vitality of the area, seated food service, and uses which provide pedestrian scale and siting.

2. *Boundaries.* The boundaries of the ADO are shown in Figure 23.204-4: C-DMU Downtown Arts District Overlay Boundaries.

Figure 23.204-4. C-DMU DOWNTOWN ARTS DISTRICT OVERLAY BOUNDARIES



3. *Use Limitations; Findings.* Offices on the ground floor adjacent to a street frontage require an AUP. To approve the AUP, the Zoning Officer must find that:

(a) The project meets the purposes of the Arts Overlay District as set forth above; and

(b) The location, size, type, appearance, and signage of the proposed use will:

i. Animate and enhance the pedestrian experience on the street; and

ii. Be generally open to the public evenings and on weekends, whenever practicable.

E. *Development Standards.*

1. *Height.*

(a) *Height Limits.* Table 23.204-36: C-DMU Height Limits shows height limits in the C-DMU district, except as otherwise allowed by Paragraph 2 below. See Figure 23.204-5: C-DMU Sub-Areas for district sub-area boundaries.

Figure 23.204-5. C-DMU SUB-AREAS

Table 23.204-36. C-DMU HEIGHT LIMITS

SUB-AREA	MINIMUM	MAXIMUM	MAXIMUM WITH USE PERMIT
Core Area	50 ft.	60 ft.	75 ft.
Outer Core	40 ft.		
Corridor	40 ft.		
Buffer	No minimum	50 ft.	60 ft.

(b) *Parapet Walls.* For roofs with parapet walls, building height is measured to the top of the roof. Parapets may exceed the height limit by up to 5 feet as of right.

(c) *Minimum Height.* The minimum height standard applies to new buildings only, measured to the top of the plate. Theater and museum buildings are exempt.

2. *Increased Height Allowance.*

(a) *Allowed Height.* The ZAB may issue a Use Permit for up to five buildings that exceed the C-DMU height limits as shown in Table 23.204-38: C-DMU Increased Height Allowance.

Table 23.204-37. C-DMU INCREASED HEIGHT ALLOWANCE

Sub-Area	Number of Buildings	Height	
		Minimum	Maximum
Combined Core and Outer Core	2	75 ft.	120 ft.
Core	3	120 ft.	180 ft.

(b) *Application Process.*

i. Applications for any of the five buildings over 75 feet in height may be submitted on July 1, 2012. If no applications that satisfy the submittal requirements as determined by the Zoning Officer are submitted on that date, then the next deadline to submit applications will be no later than six months from that date, with application opportunity dates at six-month intervals until the first application has been submitted. Once the first application has been submitted, then the application opportunity date will occur once yearly on the anniversary of the date of the first submittal.

ii. A project shall secure a position as one of the five allowed buildings over 75 feet in height following final Use Permit approval. Such Use Permits shall include a condition of approval that establishes a schedule for: submittal of a building permit application, timely response to plan check comments, payment of building permit fees such that a building permit can be issued, and

beginning construction. The process for allowing extension of the timeline requirements, if any, shall be specified in the condition.

iii. Failure of a permit holder to strictly comply with the schedule established by the Use Permit is grounds for revocation of the Use Permit pursuant to Chapter 23.404.080 (Permit Revocation).

(c) *Community Benefit Required.*

i. To approve a Use Permit for increased building height under this section, the ZAB must find that the project will provide significant community benefits, either directly or by providing funding for such benefits to the satisfaction of the City, beyond what would otherwise be required by the City.

ii. Significant community benefits may include, but are not limited to affordable housing, supportive social services, green features, open space, transportation demand management features, job training, and/or employment opportunities.

iii. This community benefit requirements shall be included as conditions of approval and the owner shall enter into a written agreement with the City that shall be binding on all successors in interest.

3. *Setbacks.*

(a) *Basic Standards.* Table 23.204-38 shows minimum required lot line setbacks in the C-DMU district. Additional standards are listed in 23.204.130.3.d.

Table 23.204-38. C-DMU Setback Standards

PORTION OF BUILDING AT HEIGHT OF:	FRONT	MINIMUM INTERIOR SIDE		MINIMUM REAR
		65' AND LESS FROM LOT FRONTAGE	OVER 65' FROM LOT FRONTAGE	
Zero to 20 feet	No minimum. 5 ft. max.	No minimum		
21 feet to 75 feet	No minimum.	No minimum	5 ft.	
76 feet to 120 feet	15 ft. min.	5 ft.	15 ft.	
Over 120 feet	15 ft. min.	15 ft.		

(b) *Modifications to Standards.* The ZAB may modify the setback standards in Table 23.204-38 with a Use Permit upon finding that the modified setbacks will not unreasonably limit solar access or create significant increases in wind experienced on the public sidewalk.

(c) *Residential Transitions.* The setback standards in Table 23.204-38 shall not apply to commercial lots abutting or confronting residential zoning. Such lots shall comply with Section 23.304.030(C)(2)—Setbacks (Lots Adjacent to Residential Districts)

(d) *Additional Standards.*

i. For buildings over 120 feet in height, that portion of the building over 120 feet must be less than 120 feet in width when measured at the widest point on the diagonal in plan view.

ii. For a lot that abuts the interior side or rear lot line of a residentially-zoned lot, a new building shall be set back from the shared property line by 20 feet where the building exceeds 45 feet in height.

iii. For a lot that confronts a residentially-zoned lot, a new building shall be set back 10 feet from the street-facing property line where the building exceeds 45 feet in height, except that this provision shall not apply to lots confronting public uses with a residential zoning designation, such as Berkeley High School, Civic Center Park, and Fire Station 2. However, this provision will apply for all lots with frontage on the Martin Luther King Jr. Way right-of-way.

iv. For lots with frontage on the Shattuck Avenue right-of-way south of Durant Avenue, a new building shall be set back 15 feet from the Shattuck Avenue property line where the building exceeds 65 feet in height.

v. Architectural features such as eaves, cornices, canopies, awnings, bay windows, uncovered porches, balconies, fire escapes, stairs and landings may project up to five feet into required setbacks of this section so long as the surface area of such projections does not exceed 50 percent of the surface area of the side of the building on which the projections are located.

4. *Usable Open Space.* Table 23.204-39 shows minimum required usable open space in the C-DMU district.

Table 23.204-39. C-DMU USABLE OPEN SPACE REQUIREMENTS

	MINIMUM USABLE OPEN SPACE	SUPPLEMENTAL STANDARDS
Residential Uses	80 sq. ft./unit [1]	23.304.090—Usable Open Space
Non-Residential Uses	1 sq. ft. of privately-owned public open space per 50 sq. ft. of commercial floor area.	

Note:

[1] Each square foot of usable open space provided as privately-owned public open space is counted as two square feet of required on-site open space.

5. *Privately-Owned Public Open Space.*

(a) If a privately-owned public open space is indoors or enclosed, it shall include natural light in the form of windows, skylights, entryways, or other openings.

(b) Privately-owned public open space must be:

i. Clearly identified with signage in a publicly conspicuous location at street level indicating the area that is open to the public, the hours the space is open, and the party responsible for maintenance; and

ii. Separated from the grade of the public sidewalk by a height no greater than 3 vertical feet unless an AUP is obtained.

6. *Open Space Alternatives.*

(a) In lieu of providing the open space required by this section on-site, an applicant may either:

i. Pay an in-lieu fee to help fund the Streets and Open Space Improvement Plan (SOSIP); and/or

ii. Construct public improvement consistent with the SOSIP.

(b) Payment of a fee in lieu of providing publicly accessible open space requires a Use Permit. To allow payment of an in-lieu fee, the ZAB must find that the payment will support timely development of open space improvements that will serve the needs of project residents and other people living in and using the downtown.

(c) Construction of public improvements consistent with the SOSIP in lieu of open space requires a Use Permit. To allow construction of public improvements, the ZAB must find that the public improvements:

i. Will be located within the vicinity of the project and are consistent with the SOSIP;

ii. Will be coordinated with other ongoing or approved SOSIP or other right-of-way improvements in the vicinity, and will not create a hazardous situation or an unusual appearance in the downtown; and

iii. Will be finished before issuance of a certificate of occupancy for the project, unless otherwise allowed by the project conditions of approval.

7. *Ground Floor Street Frontage.*

(a) Special ground floor street frontage requirements in Paragraph (b) below apply to the following uses in the C-DMU district:

i. Insurance Agents, Title Companies, Real Estate Agents, Travel Agents.

ii. Office, Business and Professional.

iii. Group Class Instruction.

iv. Health and Fitness Facility.

(b) New ground floor uses listed in paragraph (a) above that are adjacent to a street frontage shall either:

i. Include a storefront window display; or

ii. Be transparent and provide pedestrian viewing at least 10 feet into the storefront area.

8. *Residential Entrance Limitations.* In new buildings constructed on public serving frontages, as shown in Figure 23.204-6, entrances to individual dwelling units and to living quarters in group living accommodations are not permitted on the street-facing side of the street-level floor.

F. *Streets and Open Space Improvement Plan (SOSIP) Fee.* In addition to any other requirement of this section, projects shall be subject to payment of an impact fee to implement the Streets and Open Space Improvement Plan.

G. *Green Building Provisions.*

1. *New Buildings.* Construction of any new building shall attain either:

(a) LEED Gold rating or higher as defined by the U.S. Green Building Council (USGBC); or

(b) Building performance equivalent to this rating, as determined by the Zoning Officer.

2. *Additions 20,000 Square Feet or Less.* Additions of 20,000 square feet or less shall be required to meet all applicable standards of the Stopwaste Small Commercial Checklist, or equivalent, as determined by the Zoning Officer. The rating shall be appropriate to the use type of the proposed construction.

3. *Additions More than 20,000 Square Feet.* Additions of more than 20,000 square feet shall attain either:

(a) LEED Gold rating or higher as defined by the U.S. Green Building Council (USGBC); or

(b) Building performance equivalent to this rating, as determined by the Zoning Officer.

H. *Environmental Impacts.* Projects that may create potentially significant environmental impacts as described in the Downtown Area Plan Final EIR shall be subject to the adopted Mitigation Monitoring Program for the Downtown Area Plan.

I. *Permit Findings.* To approve an AUP or Use Permit for a project in the C-DMU district, the review authority must make the findings in Section 23.406.040 (Use Permits) and find that the proposed use or structure:

1. Is compatible with the purposes of the district; and

2. Is compatible with the surrounding uses and buildings. (Ord. 7898-NS §§ 10, 11, 2024; Ord. 7890-NS §§ 19--24, 2023; Ord. 7835-NS § 4, 2022; Ord. 7830-NS § 4, 2022; Ord. 7810-NS § 7, 2022: Ord. 7787-NS § 2 (Exh. A), 2021)

The Berkeley Municipal Code is current through Ordinance 7933-NS, passed September 10, 2024.

Disclaimer: The City Clerk's Office has the official version of the Berkeley Municipal Code. Users should contact the City Clerk's Office for ordinances passed subsequent to the ordinance cited above.

To: Mark Rhoades; Mia Perkins
Subject: 2029 University Ave/Height waivers

Hi Mark,

Anne asked me to respond back to you in regards to the height question that you had asked.

Since the Base Project is at the maximum allowed for the district (75 feet), increased height allowance won't apply (5 dt buildings max) to this project. That section is for buildings that are over 75 feet (max 120) in their base project. However, considering that the proposed project at 256 feet height is above what the district allows, my read is that waivers for height over 75 and 120 feet are required.

Table 23.204-36. C-DMU HEIGHT LIMITS

SUB-AREA	MINIMUM	MAXIMUM	MAXIMUM WITH USE PERMIT
Core Area	50 ft.	60 ft.	75 ft.
Outer Core	40 ft.		
Corridor	40 ft.		
Buffer	No minimum	50 ft.	60 ft.

E. 1. (b) *Parapet Walls.* For roofs with parapet walls, building height is measured to the top of the roof. Parapets may exceed the height limit by up to 5 feet as of right.

(c) *Minimum Height.* The minimum height standard applies to new buildings only, measured to th top of the plate. Theater and museum buildings are exempt.

2. *Increased Height Allowance.*

(a) *Allowed Height.* The ZAB may issue a Use Permit for up to five buildings that exceed the C-DM height limits as shown in Table 23.204-38: C-DMU Increased Height Allowance.

Table 23.204-37. C-DMU INCREASED HEIGHT ALLOWANCE

Sub-Area	Number of Buildings	Height	
		Minimum	Maximum
Combined Core and Outer Core	2	75 ft.	120 ft.
Core	3	120 ft.	180 ft.

Sincerely,

_____

Re: Formal Development Project Applications for Multi-Family and Student Housing Developments at 2029 University Avenue (APN 057 205300801) (ZP#2024-0171 & ZP#2024-0182)

To Whom it May Concern:

As you know, this firm represents Laconia Development, LLC ("Laconia") in its applications for two alternative housing development projects at 2029 University Avenue in the City. One of these project alternatives proposes construction of 240 new residential apartment units in a single 23-story building, 18 of which would be affordable to moderate income households ("Project Alternative 1"). The other project alternative proposes construction of 160 new housing units which would provide housing for students in a single 23-story building. Twelve of these units would be deed-restricted affordable to very low income households, and 12 would be deed-restricted affordable to moderate income households ("Project Alternative 2"). The Project Alternatives are subject to the robust protections of the Housing Accountability Act ("HAA", Gov. Code, § 65589.5), Senate Bill 330 ("SB 330"), the Density Bonus Law ("DBL", Gov. Code, § 65915), and the Permit Streamlining Act ("PSA", Gov. Code, § 65920 et seq.)

On January 17, 2025, Laconia received notifications from the City that the development project applications for both Project Alternatives were incomplete. Enclosed with this letter, the Applicant hereby timely provides the information listed on the County's January 17 notices which are required to deem the Project applications complete under the PSA. Below we further address two key erroneous interpretations of state law included in the City's January 17, 2025 letters.

First, we note that the City's January 17 letters make the erroneous assertion that the City played a role in determining when the SB 330 Preliminary Application was "deemed complete" for purposes of establishing a vesting date under SB 330. This is wrong – as we communicated to you previously, SB 330 expressly precludes local agency input into the required contents or format of a Preliminary Application. For example, a local agency may not add to the state's 17-item Preliminary Application checklist set out in Government Code section 65941.1.[1] In addition, a local agency

[1] Gov. Code § 65941.1(b)(3) ("A checklist or form shall not require or request any information beyond that expressly identified in subdivision (a).").

has no role in determining the completeness of a Preliminary Application. [2] Thus, if the applicant provides the information required in Government Code section 65941.1(a), then the Preliminary Application is complete at the moment of filing, without any affirmative action by the City required or allowed. Here, Laconia submitted two complete Preliminary Applications for the Project Alternatives on December 10, 2024 and paid the corresponding "permit processing fee", the Project Alternatives obtained SB 330 vesting on that date without any affirmative action by the City required or allowed.

The City's January 17th letters also erroneously state - in contravention of SB 330, the HAA, and the PSA - that if the Project applications are not deemed complete after these resubmittals, the Project Alternatives would somehow automatically lose their SB 330 vesting. This plainly erroneous position conflicts with the language, spirit, and intent of state housing law. It has been squarely rejected multiple times by the Department of Housing and Community Development ("HCD") and the only court to have considered this issue so far.

As you know, SB 330 (Gov. Code § 65941.1.) allows an applicant for a housing development project to submit a "Preliminary Application" under state law. Submittal of a Preliminary Application vests an applicant's rights to proceed under the applicable development standards adopted and in effect at the time the Preliminary Application was submitted, even if those standards later change. (Gov. Code § 65589.5(o).)

Within 180 days after submittal of a Preliminary Application, the applicant must submit a formal development application. (Gov. Code § 65941.1(e)(1) (formerly (d)(1)).) Upon submittal of a formal development application, the process of determining whether a housing development application is complete begins as set forth in Government Code section 65943. Within 30 days of receiving the application materials, the City must determine in writing whether the application is complete. (Gov. Code § 65943(a).) Upon receipt of an incompleteness determination, the applicant may then resubmit the application, giving the City another 30-day period to make a completeness determination. (Gov. Code § 65943(b).) Government Code section 65941.1(e)(2) (formerly (d)(2)), requires an applicant to respond to a city's incompleteness determination by resubmitting the application materials as described in Section 65943(b) within 90 days, or else the Preliminary Application will expire. The PSA contemplates a potentially unlimited number of resubmission periods to make an application complete.

The City appears to interpret Section 65941.1(e)(2) to mean that if a formal application is not determined to be complete after one 90-day resubmission period – the Preliminary Application expires. Again, this is an erroneous interpretation of the law that has been squarely rejected by the California Department of Housing and Community Development (HCD) multiple times in recent months. This interpretation has also been rejected by the only court to have considered this statutory language

[2] Gov. Code § 65941.1(d)(3) ("This section shall not require an affirmative determination by a city, county, or city and county regarding the completeness of a preliminary application or a development application for purposes of compliance with this section.").

so far. (*See* HCD Notice of Potential Violation to the Town of Los Gatos, dated February 12, 2025; HCD Notice of Violation to the City of Beverly Hills, and Judgment Granting Petition for Writ of Mandate, Sup. Ct. of Cal., County. of Los Angeles, *Jha v. City of Los Angeles* (Case No. 23STCP03499), filed September 17, 2024; ("*Jha*").)

The *Jha* Court correctly reasoned that Gov. Code section 65941.1(e)(2)(then (d)(2)) cross-references the PSA, Gov. Code section 65943, which calls for an iterative completeness process in which the applicant is entitled to an unlimited number of 90-day windows to resubmit an application the jurisdiction determines to be incomplete. (*Jha* at 23-24.) As the Court held, "[t]he statute supports [the applicant's] reading that the submission and completeness evaluation for an application is an iterative process *with no limit on the number of submissions*." (*Id*.) (emphasis added). The Court further stressed that a court "'is not dealing with the PSA in a vacuum, but rather in its relation to the HAA,' and the Legislature has mandated the HAA must be interpreted to 'afford the fullest possible weight to the interest of, and the approval and provision of, housing.'" (*Id.* (quoting *Save Lafayette v. City of Lafayette* (2022) 85 Cal. App. 5th 842 855, and Gov. Code § 65589.5(a)(1)(L).))

Accordingly, although the City is obligated to deem the Project application complete with this resubmittal, it could constitute an actionable violation of the HAA if the City were to determine that the Project Alternatives' Preliminary Applications expired if the City were to determine the Project applications incomplete. (*See* Gov. Code section 65589.5(h)(6)(H) (defining disapproval to include "mak[ing] a written determination that a preliminary application described in subdivision (a) of Section 65941.1 has expired or that the applicant has otherwise lost its vested rights under the preliminary application for any reason other than those described in subdivisions (c) and (d) of Section 65941.1"); *see also* Gov. Code § 65589.5(h)(6)(D); (6)(F) (expanding definition of disapproval to include improper incompleteness determinations and courses of conduct intended to harass or delay).

With the above in mind, we look forward to working with the City to deliver one of the Project Alternatives, which will deliver critically needed affordable and market rate homes the community in a manner consistent with binding state housing law. If you have any questions about the above, please do not hesitate to contact me.

Very truly yours,

MILLER STARR REGALIA

Travis Brooks

Project:		2029 University (Multifamily) / ZP#2024-0181	
Incomplete Letter Recevied:		17-Jan-2025	
Section / Document	**Item #**	**Comment**	**Comment Response**
I. Permits Required	1	Use Permit per BMC Section 23.204.020(A) to construct a new multifamily development (Fee required)	Noted.
	2	Use Permit under BMC Section 23.204.030(A) to create new floor area of 10,000 square feet or more (Fee required)	Noted.
	3	Use Permit per BMC Section 23.204.130(E)(1) to increase the maximum building height limit to 75' (plus 5' parapet, by right) (Fee required)	Noted.
	4	Use Permit per BMC Section 23.204.130(E)(2)(a) to allow for an Increased Height Allowance for up to 2 buildings in the Outer Core District that can be a maximum of 120 feet exceeding the C-DMU height limits (75 ft.) (Fee required)	The provisions in BMC Section 23.204.130.E.2 do not apply to this project as this project is not one of the five designated buildings that are allowed to exceed the height limits in BMC Section 23.204.E.2(a). The height allowances for this project are per BMC Section 23.204.130.E.1(a), and a base project height of 75 Ft is allowed with a use permit in the Outer Core. The additional height allowance is per State Density Bonus law. This Use Permit should not be applied to the project.
	5	Use Permit per BMC Section 23.204.130(E)(3)(b) to modify front, side, and rear setback requirements (Fee required)	Noted.
	6	Use Permit, per BMC Section 23.204.130(E)(6)(b) to pay a fee in lieu of providing open space (Fee required at Building Permit Phase)	Noted.
	7	Administrative Use Permit per BMC Section 23.304.050(A) to exceed building height limits with rooftop architectural elements which exceed the maximum height limit for the district (Fee required)	Noted.
	8	Use Permit per BMC Section 23.326.070(A) to demolish a non-residential building (Fee required)	Noted.
	9	City Arborist Review Fees (Fee required)	Fees were paid on 3/24/25 in person at the cashier.
	10	City Traffic Engineer Review Fees (TBD)	Noted.
	11	Use Permit additional review time (Fee required)	Fees were paid on 3/24/25 in person at the cashier.
II. Waivers	1	Waiver of BMC Section 23.204.130(E)(4) for providing 1,048 square feet of Usable Open Space, where 19,200 square feet is required.	Please see page 6 in the revised Applicant Statement for waiver.
	2	Waiver of BMC Section 23.304.90 for Usable Open Space landscaped area to be 321 square feet where 7,680 square feet (40%) is required.	Please see page 6-7 in the revised Applicant Statement for wavier.
	3	Waiver of BMC Section 23.204130(E)(1)(a) to exceed building height limits—to be 256 ft.(TBD) while 75 ft. + 5 ft. parapet is the allowable height	Please see page 6 in the revised Applicant Statement for waiver.
	4	Waiver of BMC Section 23.204130(E)(2)(a) for constructing the third building in the Combined Core and Outer Core for a height of over 120 ft. while only a maximum of 2 buildings are allowed and only for a maximum height of 120 ft. (Please update application material accordingly)	The provisions in BMC Section 23.204.130.E.2(a) do not apply to this project as this project is not one of the five designated buildings that are allowed to exceed the height limits in 23.204-38. The height allowances for this project are per BMC Section 23.204.130.E.1(a), and a base project height of 75 Ft is allowed with a use permit in the Outer Core. The additional height allowance for this project is per State Density Bonus law. The addresses for the five designated buildings per BMC Section 23.204.130.E.2(a) are:1950-1998 Shattuck Avenue; 1951 Shattuck Avenue, 2190 Shattuck Avenue, 2128 Oxford Street, and 2121 Center Street.
	5	Waiver of BMC Section 23.204.130(E)(3)(d) for the building's width over 120 feet of height, to be about 139 ft. at the widest point (on the diagonal in plan review) where maximum width allowed is 120 feet.	Please see page 7 in the revised Applicant Statement for wavier.
III. Concessions		None.	The following concessions are requested: Hard Hats ordinance BMC Section 13.107.040 (Apprenticeship Requirements); Hard Hats ordinance BMC Section 13.107.050 (Healthcare Expenditures); Bird Safe Building ordiance BMC Section 23.304.150.C. Please see revised Applicant Statement for explanation of concession requests.

Project:		2029 University (Multifamily) / ZP#2024-0181	
Incomplete Letter Recevied:		17-Jan-2025	
Section / Document	**Item #**	**Comment**	**Comment Response**
IV. CEQA Review		Under the California Environmental Quality Act (CEQA), staff recommends a determination to the Zoning Adjustments Board (ZAB). The final determination is made by ZAB. Staff may require an environmental impact report (EIR), a negative declaration, or a mitigated negative declaration, depending on the type of project. Additional environmental reports will be required. Please note that in the case of a Categorical Exemption, reports relating to relating to traffic, noise, air quality, or water quality will be required.	Please see enclosed studies for wind, air quality, noise, and water quality. The wind study was prepared by RWDI and the AQ, noise, and water quality studies were prepared by First Carbon Solutions.
V. Zoning Project Submittal Requirements (Quantitative/Checklist)	Section 1C	**Payment of Application Fees:** • Please provide payment for the attached invoice.	Fees were paid on 3/24/25 in person at the cashier
	Section 2B	**Landscape and Usable Open Space Plan/Existing and Proposed Street Trees** • Please see the attached Arborist comments regarding street trees	City arborist will revise condition per email on Tue, Mar 11, 2025.
	Section 4D	**Phase II Site Assessment:** • Since the subject property is proposed to be redeveloped for residential use, due to significant soil contamination in the adjoining property, and because commercial/industrial ESLs were followed for remediation metrics, a Phase II is required by the City's Toxics Management Division.	The Phase I report is currently being revised. The Phase I consultant did not have the most recent plans when the Phase I investigation was performed.
	Section 4G	**G. Stormwater Requirements Checklist:** • The new form must be filled out. The one submitted is outdated. Please complete the attached worksheet instead. • Please fill out the attached PCB screening form prior to issuance of the demolition permit. Note that Each building to be demolished requires its own PCB form.	PCB screening form will be submitted during demo permit application phase.Please see new stormwater requirement checklist as part of this resubmittal.
	Section 6A	**WELO Landscape Requirements (TBD)**	Noted, no further action item identified.
	Section 6B	**Berkeley Energy Code and Berkeley Green Code**	Noted, no further action item identified.
	Section 6C	**Green Building Requirements:** • Please see the attached comments from Building and Safety, Green Building Program	Please see Green Building responses below.
	Section 7A	**Design Review** • Design Review comments will be provided by Anne Burns.	Noted.
	1	**Number of existing dwelling units:** A unit has been previously registered with the Rent Stabilization Board under 2035 University Avenue. Please provide clarification.	Per the email on February 13, 2025 from Berkeley Rent Stabilization Board staff, 2035 University Avenue is listed as a commercial unit and is exempt from rent control. The rent board's records do not have registered residential tenants associated with the address prior to the exemption claim. Rhoades Planning Group forwarded the email to the project planner on February 13, 2025.
	2	Option to provide BMR units (VLI and LI: 20% X 120 =24 (half of which has to be VLI/18 are VLIs 6 LIs are required in this option) Option to provide a combination of BMR units and In-lieu fee: 1. 120 (Number of Base units) X 20%= 24 (number of required VLI and LI units) 2. 18 VLI units are provided on site as Qualifying Units for State Density Bonus 3. 24 (AF units required) - 18 (VLIs provided for DB) = 6 LI units are required To pay an In-lieu Fee for the 4 remaining units: 6/24= 25% (25% of RUFA (calculated by applicant as 63,120 sq. ft.) = 15,780 sq. ft. X $56= $887,625 in-lieu fee is required per the applicant's calculations. Option to provide In-lieu fee: $56.25 X RUFA (63,120 sq. ft.) = Per Applicant's calculations)	Confirmed. Affordable Housing Fee changed from $927,260 to $929,559

	3	**Demolition ordinance (BMC23.323):** Per BMC 23.323.020 any units registered with the Rent Board must be replaced. Note that based on this ordinance, known-Income VLI units (<50%) must be replaced by ELI units (<30%). Any unknown-Income unit that is protected must be replace by VLI and LI units (half must be VLI)	Per the email on February 13, 2025 from Berkeley Rent Stabilization Board staff, 2035 University Avenue is listed as a commercial unit and is exempt from rent control. The rent board's records do not have registered residential tenants associated with the address prior to the exemption claim. Rhoades Planning Group forwarded the email to the project planner on February 13, 2025. No replacement units are required and no demolition findings are required for this project.
	4	**CHAS:** if the income levels of the existing tenants or tenants within the last five years are unknown, they must be replaced with “equivalent” units of affordability levels that are the same or lower than the income distribution of renters for City of Berkeley according to the United States Department of Housing and Urban Development’s Comprehensive Housing Affordability Strategy (CHAS) database.	Per the email on February 13, 2025 from Berkeley Rent Stabilization Board staff, 2035 University Avenue is listed as a commercial unit and is exempt from rent control. The rent board's records do not have registered residential tenants associated with the address prior to the exemption claim. Rhoades Planning Group forwarded the email to the project planner on February 13, 2025. No replacement units are required and no demolition findings are required for this project.
	5	**Required Findings:** Please include the following required findings in the Applicant stent [statement] Additional Permit Requirements (23.204.030(A)(2): C-DMU Findings. To approve a Use Permit for new floor area in the C-DMU district, the ZAB must find that: (a) The addition or new building is compatible with the visual character and form of the district; and (b) No designated landmark structure, structure of merit, or historic district in the vicinity would be adversely affected by the appearance or design of the proposed addition.	Per the email on February 13, 2025 from Berkeley Rent Stabilization Board staff, 2035 University Avenue is listed as a commercial unit and is exempt from rent control. The rent board's records do not have registered residential tenants associated with the address prior to the exemption claim. Rhoades Planning Group forwarded the email to the project planner on February 13, 2025. No replacement units are required and no demolition findings are required for this project.
VI. Zoning Project Analysis (Qualitative)	6	**Code Compliance per 23.204.130.E & BMC Section 23.304.050 & 23.322.090(A)(2)**	
		Usable Open Space, Minimum: Base Project complies (Roof Deck). Please revise Base plans to show a recreational roof deck that includes amenities and with 40% landscape areas. Proposed project does not comply/waiver required	Please see revised Plan Set, Sheet A0.2.
		Usable Open Space, Landscaped Area: Base Project does not comply/Please revise. Proposed project does not comply/waiver required	For Base Project, 9,600 sf UOS and 3,840 sf of landscaped area is provided to comply. Please see revised Plan Set, Sheet A0.2.
		Privately-Owned Public Open Space: N/A	N/A
		Open Space Alternatives: Not provided for the Proposed Project. Provide information re the required inlieu fee or public improvement consistent with the SOSIP	The Streets and Open Space Improvement Plan (SOSIPS) fee paid by the Applicant will be approximately $359,000. Please see page 2 of Revised Applicant Statement.
		Min. Building Height: Proposed Complies	Noted, no further action item identified.
		Max. Building Height: Proposed project does not comply. Waivers are requested. - Height must be measured to the top of the bricks over the roof - Proposed project requires the following waivers: 1) Waiver for going over 75 ft allowable height 2) Waiver for being the third building in the Combined Core and Outer Core for a height of over 120 ft. while only a maximum of 2 buildings are allowed and only for a maximum height of 120 ft. Please update application material accordingly	The provisions in BMC Section 23.204.130.E.2(a) do not apply to this project as this project is not one of the five designated buildings that are allowed to exceed the height limits in 23.204-38. The height allowances for this project are per BMC Section 23.204.130.E.1(a), and a base project height of 75 Ft is allowed with a use permit in the Outer Core. The additional height allowance for this project is per State Density Bonus law. The addresses for the five designated buildings per BMC Section 23.204.130.E.2(a) are:1950-1998 Shattuck Avenue; 1951 Shattuck Avenue, 2190 Shattuck Avenue, 2128 Oxford Street, and 2121 Center Street.

		Community Benefits: Per BMC 23.204.130(E)(2)(c) *Community Benefit is Required* To approve a Use Permit for increased building height under this section. Provide a Community Benefit Statement in the Applicant Statement.	The requirements in BMC 23.204.E.2(C) do not apply to this project as this project is not one of the five designated buildings that are allowed to exceed the height limits in 23.204-38. The addresses for the five designated buildings per BMC Section 23.204.130.E.2(a) are:1950-1998 Shattuck Avenue; 1951 Shattuck Avenue, 2190 Shattuck Avenue, 2128 Oxford Street, and 2121 Center Street.
		Setbacks: Proposed complies	Noted, no further action item identified.
		SOSIP: Required. Provide information about this requirement in the Applicant Statement.	The Streets and Open Space Improvement Plan (SOSIPS) fee paid by the Applicant will be approximately $359,000. Please see page 2 of Revised Applicant Statement.
		Green Building Provisions: Required. Provide information about this requirement in the Applicant Statement.	The project will comply with the requirements in BMC 23.304.130.G and will achieve a LEED Gold rating or equivalent for environmental sustainability. Please see page 9 of Revised Applicant Statement.
		Environmental Impacts: Required. See the attached Downtown Area Plan.	Noted.
		Auto Parking: -	Noted, no further action item identified.
		Bike Parking: 176 LT spaces are provided. Proposed project complies.	Noted, no further action item identified.
		Bike Parking: 8 provided/Proposed project complies with the ST requirements	Noted, no further action item identified.
		Per 23.304.050(A)/Allowed Projections Above Height Limits/Rooftop Elevator Equipment and Water Heaters Clarify this % and if non-compliant a waiver must be requested	Rooftop Elevator Equipment, Stair, and Water Heaters Room total to 1,167sf at 14.2% of the average floor area of all of the building's stories. See Sheet A0.1
	A	Please clarify what Code Section is "modification" referred to in the calculation of the Usable Open Space UOS?	Modification means the amount of reduction requested via waiver to reduce the required area of usable open space from 19,200sf to 2,055sf. See Sheet A0.1
	B	Please complete the Development Standards table below:	Please see Page 5 of Revised Applicant Statement for a completed Development Standards table.
	C	Please submit the setback table below:	Please see Page 6 of Revised Applicant Statement for a completed Setbacks table.
VII. Advisory	1	Note that only one Use Permit Entitlement can be exercised (23.404.060.C.1 (Exercised Defined). for this site.	Noted.
	2	Bike parking: Per BMC 23.322.090(A)(2), the following bike parking standards will apply:	
	a	Long-Term Parking and Short-Term Parking shall meet the design standards included in Appendix F of the 2017 Berkeley Bicycle Plan, or as subsequently amended by the Transportation Division.	Noted, no further action item identified.
	b	Per BMC 23.322.090.B for Bicycle Parking Standards, the following standards apply to required bicycle parking spaces in a non-residential district: 1. Bicycle parking spaces shall be located in either a locker, or in a rack suitable for secure locks, and shall require location approval by the City Traffic Engineer and Zoning Officer. 2. Bicycle parking shall be located in accordance to the Design Review Guidelines and other design specifications promulgated by the Transportation Division. (Ord. 7815-NS § 14, 2022: Ord. 7787-NS § 2 (Exh. A), 2021)	Noted, no further action item identified.
	3	Note that this project is subject to the Downtown Area Plan (See attached).	Noted, no further action item identified.
		Please submit responses to all requested items at once, and not incrementally. In your resubmittal, include a letter stating how you have addressed the incomplete items.	Noted. This response matrix serves as the letter stating how each incomplete item has been addressed.

Section / Document	**Item #**	**Comment**	**Comment Response**
Arborist Comments		**Replacement Planting** Please review the City's tree-planting standards and add one street tree at the northern corner of the property. Plant trees in accordance with the American National Standards Institute (ANSI) A300 (Part 6)- 2012, Planting and Transplanting which outlines items such as planting in planting pits twice the size of the root ball, leaving the tree 1 inch higher than natural grade, back filling the hole with native soil. Remove the nursery stake and replace with a two-stake system that encourages tree movement. Trees should be planted in the 24-inch box size. No root barrier, pavers, or tree grates should be used. Please use flexi-pave in the tree wells. I recommend planting one of the following species: Brisbane box (Lophostemon confertus), sour gum (Nyssa sylvatica), or sweetshade (Hymenosporum flavum).	City arborist will revise condition per email on Tue, Mar 11
Land Use Notes		**Green Building/Energy**	
		The building permit coversheet declaration pertaining to code compliance must reference the 2022 Mid-Cycle Energy and Green Code adopted by Berkeley City Council and effective July 1st, 2024.	Noted. The building permit coversheet will reference the 2022 Mid-Cycle Energy and Green Code adopted by Berkeley City Council and effective July 1st, 2024.
		Quantitative values for appliance fuel efficiency (for addition and altered exiting systems), e.g. Space Conditioning Heat Pump SEER2 or Heat Pump Water Heater UEF, Manual J Heating and Cooling Load Calculations, insulation R-values, window U-Value (max) and window Solar Heat Gain Coefficient SHGC (min) must be included in relevant architectural sheets and window & door schedules, and on architectural, plumbing, and mechanical sheets, matching those values stipulated in prescriptive or performance energy compliance documents.	Noted. The building permit set will include quantitative values for appliance fuel efficiency in relevant architectural sheets and window & door schedules, and on architectural, plumbing, and mechanical sheets, matching those values stipulated in prescriptive or performance energy compliance documents.
		Cement reductions in concrete mix design of at least 25% must be specified in structural sheets at building permit application based on the formula: [1 – ((cement)/(cement + amendment))] x 100 = the % cement reduction. Cement used in concrete is the largest single material source of embodied emissions in buildings and is responsible for 8% of global emissions. Replacing cement with alternatives, such as fly ash, slag, silica fume, or rice hull ash, can reduce total emissions for concrete by 50%.	Noted. The building permit set will include cement reductions in concrete mix design of at least 25% in structural sheets
		2022 Berkeley Green Code EV Charging Requirement	
		The current submission indicates zero new vehicle parking spaces serving residential occupancies. For a building permit application on or after July 1, 2024 any change in scope resulting in new parking serving new residential occupancies must demonstrate: [1] 20% of spaces as 'EV CAPABLE' with 1" raceway and 208/240V 40 ampere load capacity, [2] 25% of spaces as 'EV READY' with 208/240V 20 ampere circuit and receptacle [3] 5% of spaces as 'EV CHARGING STATIONS' with 208/240V 40 ampere supply equipment.	29 total parking spaces. The following information will be included in the building permit set. [6] 20% of spaces as 'EV CAPABLE' with 1" raceway and 208/240V 40 ampere load capacity, [7] 25% of spaces as 'EV READY' with 208/240V 20 ampere circuit and receptacle [2] 5% of spaces as 'EV CHARGING STATIONS' with 208/240V 40 ampere supply equipment.
		For a building permit application on or after July 1, 2024 any change in scope resulting in new parking serving new non- residential occupancies must demonstrate: [1] 20% of spaces as 'EV CAPABLE' with 1" raceway and 208/240V 40 ampere load capacity, [2] 10% of spaces as 'EV CHARGING STATIONS' with 208/240V 40 ampere supply equipment Values are rounded up to the nearest whole integer. Installed EV charging system components must comply with the requirements of CEC 625.	0 spaces are for new non-residential occupancies
		CEDA Design Assistance	
		The California Energy Design Assistance (CEDA) Program provides free energy design assistance and incentives for new construction and major alterations for commercial, public, multifamily (4+ stories), industrial, and agricultural projects. See this PG&E CEDA webpage as well as Willdan's CEDA webpage and area contact Jeff Glover, JGlover@willdan.com.	Noted. 		Please Contact PG&E Express connect as soon as possible to understand any special considerations for project electrical service.	Noted. Project team will contact PG&E
		WELO: Landscaping/Water Efficiency	

Project:		2029 University (Multifamily) / ZP#2024-0181	
Incomplete Letter Recevied:		17-Jan-2025	
Section / Document	**Item #**	**Comment**	**Comment Response**
		Landscaping must comply with the State's Model Water Efficient Landscape Ordinance (WELO), available at water.ca.gov/Programs/Water-Use-And-Efficiency, as revised in 2015. [CGBSC 4.304]	See Landscape sheet L5.01 for preliminary compliance calculations
		Provide a color-coded landscaping hydrozone map matching the WUCOLS plant materials categories by collocating planting materials by WUCOLS water use category VL, L, M, or H and assigning a unique color for each. [CGBSC 4.304] ADD OR AMEND AN EXISTING SHEET	To be completed with Landscape and Irrigation plans for Building Permit
		Locate a rain sensor in the landscaping design whose signal is specified as compatible with the master control valve. [CGBSC 4.304] ADD A SPECIFICATION OR LOCATE THE COMPONENT ON SHEET L5.01	See Landscape sheet notes on L5.01 for compliance
		Update plans to demonstrate a complying landscaping design	See updated Landscape sheets.
		The following is needed:	
		• Compliance with EBMUD Section 31: Water Efficiency Requirements	To be completed with final Landscape and Irrigation plans for Building Permit
		• Bay-Friendly Basics Landscape Checklist	To be completed with final Landscape and Irrigation plans for Building Permit
		Bird Safe Berkeley Municipal Code Section 23.304.150 effective 07/27/23 This multifamily project exceeds 10,000 GFA and 35 in Average Height feet and is a Covered Project. On each elevation, note the percentage of facade area consisting of transparent or reflective material, such as windows. Where Bird Safe Materials are required, please indicate the compliance option(s) selected (including all window schedule entries) and the product name(s), including threat factor rating where applicable, and material(s) used.	SDT Arch included % of windows on elevation drawings. See sheets A3.1 to A3.4
Design Review Comments (Anne Burns)	1	University Avenue is designated as a public-serving frontage in our Downtown Design Guidelines. It is recommended that 60% of that street-facing façade be visually open between 3' and 8' above grade, and there is also a recommendation for the spacing on publicly-accessible entrances. More active spaces are recommended near the sidewalk, as well as more visibility into these spaces. A link to the Downtown Design Guidelines is provided below. We will refer to these in our staff report when this project goes to the DRC. 120330_DBDesignGuidelines_ADDITIONAL GRAPHICS.indd	Current design has 39'-2" of visually open facade. While 60% is recommended, due to the required building functions, the frontage percentage is 40%
	2	Renderings on pages 1 and 7 of 15 of the applicant statement do not appear to be consistent with the renderings provided in the plan set. Update for consistency.	Renderings have been updated. Please see pages 1 and 7 of 16 in Revised Applicant Statement.
	3	Provide a night rendering that shows the general building design and proposed lighting at night, as well as how the garage openings on the second floor will be seen when lit.	SDT Arch produced night renderings to be included in plan set. See Sheet A3.11 and A3.12
	4	Building Sections – include adjacent structures where applicable	Done
	5	Encroachments – please confirm the extent of those proposed. Of course, any encroachments will require Public Works review and approval.	Awning over entry and lobby facade. Dashed awing outline on plan and section. See sheets A2.1 and A4.1
	6	We ask that you work with our Land Use Planning consultant, Darya Barar, as well as Public Works as you continue to finalize your street tree and overall streetscape improvement plans. Darya's email follows: dbarar@Bartlett.com	Noted.
	7	We recommend including more details to show railings, garage openings on the second floor, storefront windows, sun shading, residential windows (including any operability), material transitions, garage door design, and any architectural elements that help to show the quality and scale of the proposed design.	Additional exterior buildng details added to renderings. See Sheets A3.7 to A3.12
	8	Provide more information on proposed lighting and any dark sky measures proposed	Proposed exterior light fixtures are pointed downwards and turn off whenever possible, minimizing light pollution, sky glow, and hazardous risks to birds.
	9	Provide a clearer indication of proposed windows in plans so that they are consistent with the proposed elevations.	noted
	10	Colors and materials – provide more detailed information of the proposed materials, including photos of material samples and successful installations. As we have gone back to in-person meetings, we are looking forward to seeing a color and material board presented to the Design Review Committee.	We provided more detailed information of the proposed materials, including photos of material samples and successful installations on MAT sheet

Project:		2029 University (Multifamily) / ZP#2024-0181	
Incomplete Letter Recevied:		17-Jan-2025	
Section / Document	**Item #**	**Comment**	**Comment Response**
	11	We did note that you are complying with the City of Berkeley's bird safety requirements, but also ask that you let us know if you envision any bird safety treatment for the glass railing proposed on the 23rd Floor.	We envision bird safety treatment for the glass railing proposed on the 23rd Floor. Actual material is TBD to be worked out in building permit phase. Note concession request above.
	12	We are pleased that the proposed lobby is so visible from the sidewalk, but ask that you provide more detailed information about the colors, materials, details, and general programming of the lobby since such a key design element for the pedestrian experience.	We provided more detailed information about the colors, materials, details, and general programming of the lobby in the front elevation and in renderings. See Sheets A3.1 and A3.7 to A3.12
	13	We are including an invoice for the design review fees required for this application	Fees (including design reivew fees) were paid on 3/24/25 in person at the cashier

2029 University Avenue Development (Apartments)

Revised Applicant Statement

April 2, 2025

OVERVIEW AND PROJECT INTRODUCTION

The applicant team is pleased to submit this application package for a new 240 unit multifamily residential infill project located at 2029 University Avenue in Berkeley. This applicant statement includes:

1. **Project Description**
2. **Project Background**
3. **Compliance with General Plan and Zoning Code**
4. **Project Analysis**
5. **CEQA Analysis and Legislative Context**
6. **Required Findings**
7. **Community Outreach**
8. **Project Team Contact Information**

Figure 1. Proposed project at 2029 University Ave

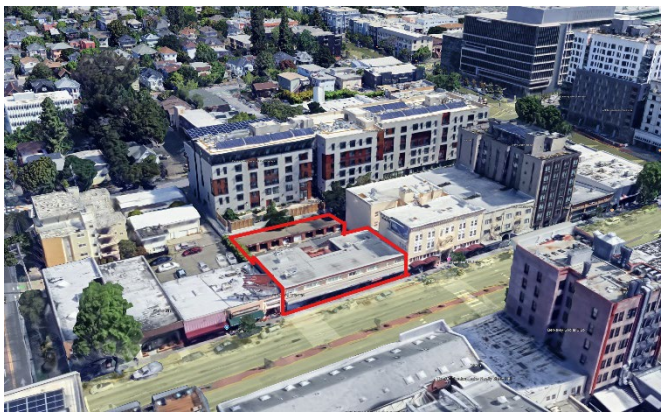

Figure 2. View of Project Site and Existing Building

Property Information

APN: 57-2053-8-1
Parcel Area: 12,385/.28 acres
General Plan Designation: Downtown
Zoning District: C-DMU Outer Core
Area Plan: Downtown Area Plan

1. **PROJECT DESCRIPTION**

The proposed project includes the demolition of the existing commercial building to construct 240 dwelling units with 280 bedrooms in a new 190,830 gross square foot building. The proposed housing development project is submitted pursuant to Senate Bill 330 (Gov. Code § 66300) and subject to the modifications and protections of State Density Bonus Law (Gov. Code § 65915) and the Housing Accountability Act (Gov. Code § 65589.5). The project includes 36 affordable units, which is 15% of the base project units for rent to Very-Low Income households (earning less than 50% of the Area Median Income (AMI) and 15% to Moderate Income households (earning less than 120% AMI). That affordability entitles the project to a 100% density bonus for a total of 240 units. An

Affordable Housing Mitigation Fee of approximately $882,281 will also apply to the project and be paid to the City of Berkeley. The Streets and Open Space Improvement Plan (SOSIPS) fee paid by the Applicant will be approximately $359,000.

The project site is a 12,385 square foot lot (0.28 acres) that is zoned C-DMU Downtown Outer Core a designation that aims to implement the vision and goals of the Downtown Area Plan which include environmental sustainability, great urban design, and economic development. (BMC § 23.204.130(A). The new residential development will have (80) Studios, (60) Jr-1-bedroom units, (60) 1-bedroom units, and (40) 2-bedroom units. The proposed project will add 280 bedrooms to Berkeley's housing stock to help alleviate the housing pressure near the University of California's Berkeley (UCB) campus. The project will have residential amenities such as rooftop decks, fitness center, lounges/work areas, and secure bicycle parking.

Unit Type	Unit Count
Studio	80
JR-Bedroom	60
1-Bedroom	60
2-Bedroom	40
Total	240

The existing commercial building has zero dwelling units, and the proposed project will construct 240 units. This will result in a net increase of 240 units with a total of 280 bedrooms. The project will be able to add 36 units to the City of Berkeley's deed-restricted affordable housing stock as well as increasing the residential density onsite. There will be no residential units on the ground floor, only residential amenity spaces.

The project site is on the north side of University Avenue between Milvia Street and Shattuck Avenue. 2029 University Avenue is approximately 0.3 miles west of the UCB campus. University Avenue is a transit and commercial corridor with a wide variety of goods and services. The location of this project will provide future residents with outstanding access to the campus and the downtown area.

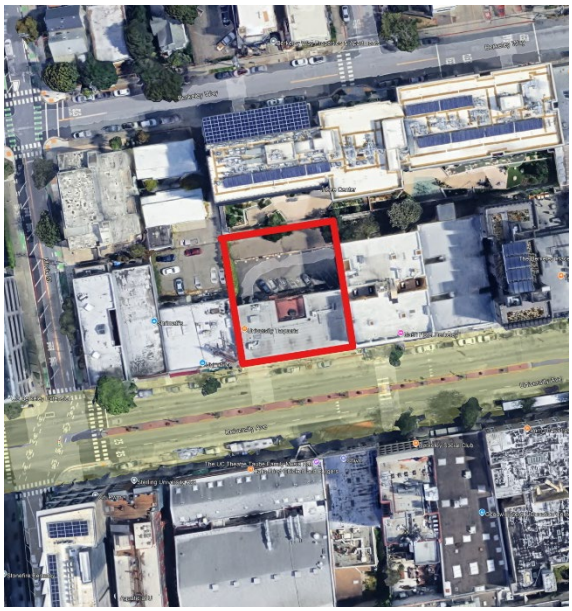

Figure 3. Aerial View of Neighborhood Vicinity

The site is highly accessible via public transit or active transportation. It is located 0.3 miles from the Downtown Berkeley BART station and is well served by multiple bus routes. The project will provide 29 parking spaces in a secure garage. The project will provide ample bicycle parking with 167 long term spaces for residents and 8 short term spaces for their guests. This proposed urban infill project is exceptionally well-suited for future residents to rely solely on sustainable modes of transportation. The building itself will be designed with solar PV.

The proposed project will provide open space, a deck on Level 23, that will have beautiful views of the Bay and Berkeley Hills. The ground floor of the project includes residential amenities such as a lobby, bike room, mail room, as well as the trash room, back of house service areas and utilities.

Key elements of the project include:

- 240 total units in 23 stories
- 18 units affordable to very low-income households @ 50% AMI & 18 units to moderate-income households @120% AMI.
- 167 total bicycle parking spaces, 29 vehicle parking spaces.
- Common Open Space at the roof deck.
- Lounges/work areas and a fitness room.
- Affordable Housing Mitigation Fee of approximately $882,281 paid to City of Berkeley Affordable Housing Trust Fund.

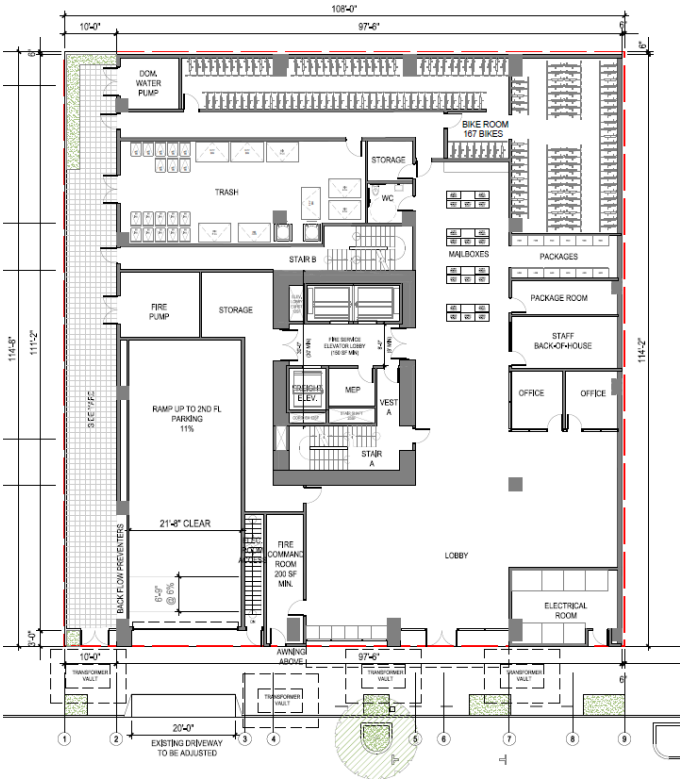

Figure 4: Ground Floor Plan

2. PROJECT BACKGROUND

Existing Conditions

The existing commercial building located at 2029 University Avenue will be demolished and replaced with a 23-story residential building that will increase the residential density along the University Avenue commercial corridor. The existing building is a two-story commercial structure with 9,401 square feet. There are five commercial spaces fronting University Avenue. The proposed project seeks to increase the residential density onsite from the current density of 0 dwelling units to the proposed project's 240 units, adding to the housing stock in the Downtown.

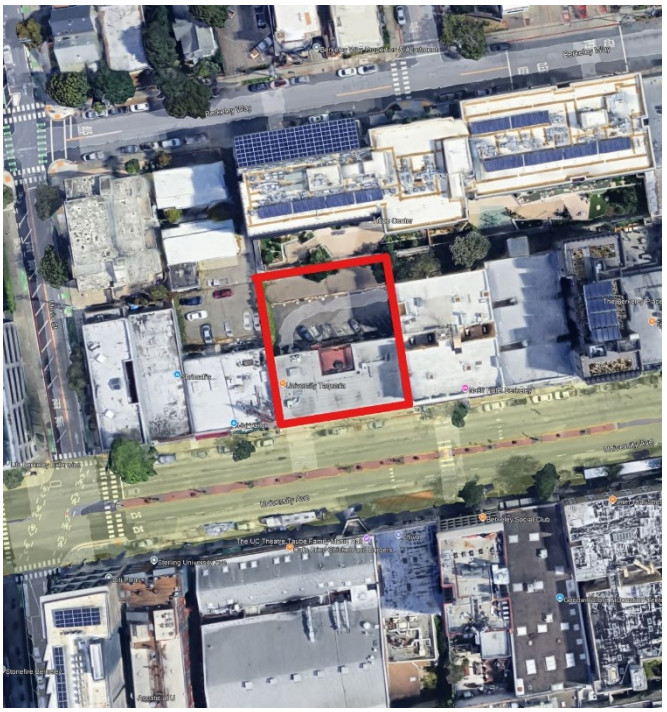

Figure 5. Aerial View of Project Site

Environmental Conditions

A Historic Resource Evaluation (HRE) was completed for this project in October 2023 (with a letter update for the report November 6, 2024). The evaluation was conducted by Caitlin Hibma of Left Coast Architectural History. The

HRE concluded that the existing commercial building and garage were built in 1953 and 1943, respectively.

The project does not appear on the California Environmental Protection Agency's (CalEPA) Cortese Lists. The project site does not contain any hazardous materials onsite. Refer to the Hazardous Waste and Substances Statement and the Phase I Environmental Site Assessment Report that is included as part of this project application packet for more information.

Table 2: Surrounding Uses and Zoning

Direction	Uses	Zoning
North	Commercial	C-DMU Buffer
East	Commercial	C-DMU Outer Core
South	Commercial	C-DMU Core
West	Commercial	C-DMU Outer Core

The project site does not have any protected, culverted, or historic creek beds on the property. As such, the Creek Protection Documentation required as part of the City of Berkeley's Zoning Project Application is not applicable to this project.

The proposed project should be deemed to be exempt from the CEQA Guidelines pursuant to Section 15332, Infill Development Projects section. The project meets each of criteria A through E of that section, as also noted in the CEQA discussion in Section 5 of this Applicant Statement.

3. PROJECT COMPLIANCE WITH GENERAL PLAN AND ZONING CODE

The City of Berkeley General Plan designates this project site as Downtown. The Downtown designation is characterized by pedestrian-oriented commercial development including retail and restaurant uses. This site is located in the outer core of the Downtown.

The proposed project site is zoned C-DMU outer core and will advance the goals of Berkeley's Downtown Area Plan by advancing residential infill development that is sustainable, close to transit, and will add to the economic vitality of the Downtown.

Figure 6: City of Berkeley Zoning Map

The proposed project will meet all of the zoning district development standard requirements except as modified pursuant to SDBL. The project complies with the C-DMU zone development standards for height (stories), FAR, front, interior side, rear setbacks, lot coverage, and vehicle and bicycle parking requirements. State Density Bonus Law waivers are required for the following zoning development standards: maximum building height (feet), setback maximum dimension above 120', maximum diagonal width of

120' for building's width over 120 feet of height, and residential open space. Table 3 identifies the applicable development standards and how the proposed project complies with them.

Table 3: Major Development Standards (C-DMU)

Standard		Existing	Addition / (Reduction)	Proposed Total	Permitted / Required

4. PROJECT ANALYSIS

Density Bonus Eligibility

The proposed project is eligible for the State Density Bonus because it:

a) Meets all objective development standards, and

b) Provides a sufficient number of units as affordable housing.

Table 5. Unit Breakdown (SDBL)

Project Proposals	Market Rate Units	Below Market Rate Units	Total Units
Base Project	102	18 (15% of base)	120
Density Bonus Project	222	18	240

The proposed base project that meets all objective standards includes 120 dwelling units, 18 of which are affordable for very low-income households (less than 50% AMI). These 18 affordable units comprise 15% of the proposed base project. The project is also providing 18 units (15% of base project) at Moderate Income levels (120% AMI). Per State Density Bonus Law, the project is eligible for a 100% density bonus. With this density bonus, the project is entitled to use an unlimited number of waivers and up to three concessions for development standards that impede the project's ability to utilize the density bonus or increase feasibility. The average unit size for the base project is 801 SF and density bonus project is 801 SF. The following Table 6 shows the waivers that are requested to be granted to accommodate the project. Without these waivers being granted, the proposed project could not physically be built.

Table 6: Waivers and Concessions Requested to Accommodate Density Bonus

Standard	Required	Proposed
Waivers Requested		
Building Height and *(per BMC Table 23.204-37)*	120'	256' & 23 stories
Setback-Max. Dimension Above 120' *(per BMC Table 23.204-38)*	120'	138'-11"
Residential Open Space *(per BMC Table 23.204-32)*	80 sf/unit (19,200 sf)	2,055 sf
Landscaped UOS	40% (8,22 sf)	27 sf

(per BMC 23.304.090.B.7)		
Maximum Diagonal Width of 120’ for Building’s Width over 120 feet of Height (per *BMC § 23.204.130(E)(3)(d)*)	120’	139'-6"
Concessions Requested		
Hard Hats ordinance Apprenticeship Requirements *(per BMC 13.07.040)*	Requirements in BMC 13.07.040	The estimated costs of the apprenticeship requirements in BMC 13.07.040 are approximately $1,893,000 which is not feasible for the project. Avoiding this requirement would result in actual and identifiable cost savings for the project.
Hard Hats Healthcare Expenditures *(per BMC 13.107.050)*	Requirements in BMC 13.07.050	The estimated costs of the healthcare expenditure requirements in BMC 13.07.050 are approximately $2,839,000 which is not feasible for the project. Avoiding this requirement would result in actual and identifiable costs savings for the project.
Bird Safe Building *(per BMC 23.304.150)*	Requirements in BMC 23.304.150	The estimated costs of the bird safe building requirements in BMC 23.304.150 are approximately $799,000 which is not feasible for the project. Avoiding this requirement would result in actual and identifiable costs savings for the project.

Project Design, Landscaping, Downtown Design Guidelines

The proposed project is located in the City of Berkeley's Downtown Plan Area and is within the Outer Core Sub-Area. The proposed project complies with many of the Downtown Design Guidelines. The project team has carefully designed the building to meet today's need for housing and to respect the architectural context and history of Berkeley's eclectic Downtown. The Downtown Design Guidelines do not contain objective standards and as such, are not applicable to the project.

Figure 7: Rendering of Proposed Project

There are many ways in which the proposed project is compatible and compliant with the goals and standards of the Downtown Area Plan.

Building Design

The proposed project is sited and articulated so as to continue the urban building fabric along University Avenue in Berkeley's downtown core area. The project is ideally located for a high-density development as it is located midblock of a major arterial street and walkable to BART, transit, groceries and services. The project will create much needed housing, especially additional affordable housing and will benefit Berkeley by providing a high-quality infill development.

The ground floor design maximizes visual transparency into the residential lobby and locates the back of house spaces towards the rear of the building. The 2nd floor garage façade is designed to be consistent with the street level visual appearance, giving the base of the 23-story building a strong civic scale. The building steps in at the 3rd level, allowing light and air into the residential units. On the 23rd level, the building steps back further to allow a sky garden that is connected to the residential lounge and fitness room.

Sustainable design within the landscape is a guiding principle throughout the project: the use of native plant species, sustainable materials, light colored pavements to mitigate urban heat island gain, maximizing water conservation and meeting or exceeding the City and State's Water Efficient Landscape Ordinance.

The new streetscape will blend seamlessly into the existing pedestrian network and the existing street tree will be protected in place.

The project's usable open space is provided at the roof level at the sky garden. Here, a range of gathering spaces are provided with low green roof plantings and raised metal planters with

medium-sized focal feature shrubs. Residents can meander amongst the plantings, gather with friends to enjoy the sweeping views of the East Bay Hills, City, and the San Francisco Bay.

Sustainability

The proposed project will comply with the Berkeley Energy Code (BMC Chapter 19.36) and the Berkeley Green Code (BMC Chapter 19.37), including providing a solar PV system, battery energy storage, electric vehicle charging, and low-carbon concrete requirements.
The proposed project will use Bird Safe Glass on windows up to 75 feet, in compliance with Berkeley's Bird Safe Building Ordinance.

The project site is very well-located for future residents to use sustainable modes of transportation. The proposed project is 0.3 miles from the Downtown Berkeley BART station and is adjacent to multiple AC Transit bus lines, as well as City of Berkeley bicycle routes. There will be minimal vehicle parking provided onsite (29 spaces) and ample bicycle parking. The proposed project will have a Transportation Demand Management (TDM) Program that will provide unlimited local bus passes to each unit and will comply with the TDM requirements in BMC Section 23.322.060.

The building is so close to goods and service that the project expects the majority of trips to be completed by active transportation or public transit modes. With the provision of free bus passes, the TDM Program will provide an additional incentive for future residents to use public transit. There are also two grocery stores nearby in a ½ - 1 mile walking distance. Therefore, the project contributes to Berkeley's Climate Action Plan goals of providing housing in locations close to goods and services, and oriented to use of public- and active-transportation, serving to reduce the City's overall per capita carbon footprint. The project will comply with the requirements in BMC 23.304.130.G and will achieve a LEED Gold rating or equivalent for environmental sustainability.

Project & Community Benefits

In addition to the in-lieu and mitigation fees, and community benefits, the following benefits of the proposed project. The proposed project will offer the following benefits to the City of Berkeley:

- Redevelop an underutilized parcel in the downtown area
- Provide 240 dwelling units of dense, transit-oriented housing.
- Provide 36 affordable dwelling units: 18 Very Low-Income Households (at <50% AMI) and 18 Moderate-Income Households (at 80% to 120% AMI)
- Encourage alternative modes of transportation – low parking ratio & 167 bicycle parking spaces.
- LEED Gold or equivalent, with a rooftop that is solar-ready.
- Units will be equipped with energy efficient appliances and low flow fixtures, and the site will be planted with drought tolerant landscaping that supports the project's stormwater management plan.

- Compliant with Bird Safe Glass requirements as per BMC 23.304.150.

5. CEQA OVERVIEW AND LEGISLATIVE CONTEXT

The housing crisis continues to have a significant impact on Californians across the state. The Government Code sections discussed below are state legislative efforts that recognize the severity of California's housing crisis and the difficulties associated with developing new housing at appropriately zoned, transit-oriented, and urbanized locations. These pieces of legislation are applicable to the proposed project:

- California Environmental Quality Act Class 32 Categorial Exemption (CEQA Guideline § 15332)
- Permit Streamlining Act (Gov. Code § 65920 et seq.)
- State Density Bonus Law (Gov. Code § 65915)
- Housing Accountability Act (Gov. Code § 65589.5)
- Housing Crisis Act of 2019 (Gov. Code § 66300)

CEQA, Infill Project
This project is eligible for a categorical exemption from CEQA. Because the proposed project is located in an urbanized area and because it is an infill development project, the CEQA Class 32 "Infill" Categorical Exemption applies.

Class 32 Exemption characteristics:

"(a) The project is consistent with the applicable general plan designation and all applicable general plan policies as well as with applicable zoning designation and regulations.
(b) The proposed development occurs within city limits on a project site of no more than five acres substantially surrounded by urban uses.
(c) The project site has no value as habitat for endangered, rare or threatened species.
(d) Approval of the project would not result in any significant effects relating to traffic, noise, air quality, or water quality.
(e) The site can adequately be served by all required utilities and public services."

This proposed infill project is consistent with the City of Berkeley's objective design and development standards with the use of State Density Bonus Law, so it is subject to the categorical exemption under CEQA. The proposed development occurs within the City of Berkeley, on a site that is 0.28 acres and 100% surrounded by urban uses. The project site is already fully developed with an existing commercial building, so the site has no value for endangered, rare, or threatened species.

In terms of CEQA, this project is environmentally benign as it will not result in any significant traffic, noise, air quality, or water quality impacts. The project will provide minimal (29 spaces) vehicle parking, so will not generate any significant traffic or air quality impacts. There will be residential noise which will not constitute an impact. The proposed project provides a

Stormwater Control Plan to protect water quality. The site is on an urbanized parcel that has existing service connections to all required utilities and public services.

Historic Resource Evaluation

The following Historic Resource Evaluation was provided by Caitlin Hibma of Left Coast Architectural History. The subject property is over 40 years old but does not have any significant associations with historically important events or noteworthy historical figures. The historic evaluation found that the property is not historically significant at either the local or State level and therefore does not qualify as an historic resource for purposes of the California Environmental Quality Act (CEQA).

Under the City of Berkeley's Landmarks Preservation Ordinance and its Landmark/Structure of Merit criteria, there is no specific age threshold or criteria. In sum, 2029 University Avenue has no potential cultural, historical, architectural or educational values or importance;

- Is not associated with any cultural or historical period or events;
- Is not a first, last, prototypical or important example of its type;
- Is not contemporary with any nearby landmarks.

Consequently, the property and building at 2029 University Avenue has no potential eligibility as a City of Berkeley Landmark or Structure of Merit.

SB 330/Housing Crisis Act

On December 10, 2024, an SB 330 Preliminary Application was submitted to the City of Berkeley that locked in the standards and fees applicable at the time of submission. The Housing Crisis Act (Gov. Code § 66300) prohibits a local agency from disapproving, or conditioning approval in a manner that renders infeasible, a housing development project that provides affordable housing. The act also requires that a development project must comply with applicable, objective general plan and zoning standards and criteria that were in effect at the time the application was deemed to be complete. The law also requires the city or county to consider and either approve or disapprove the housing development project within the 5 allowable public hearings under HCA, and consistent with the applicable timelines under the Permit Streamlining Act.

Permit Streamlining Act

The project is required to go through a completeness review under the Permit Streamlining Act ("PSA"), Government Code § 65920 et seq. The PSA imposes several relevant obligations on the City as it conducts its completeness review of the project's application.

First, the City is required to compile lists that include the information required for a complete submittal (Gov Code § 65940 et seq). The City has several checklists and application documents governing what needs to be included in planning applications. Second, Gov Code § 65943 spells out a jurisdiction's obligations after submittal:

> Not later than 30 calendar days after any public agency has received an application for a development project, the agency shall determine in writing whether the application is complete and shall immediately transmit the determination to the applicant for the development project. If the application is determined to be incomplete, the lead agency shall provide the applicant with an exhaustive list of items that were not complete. That list shall be limited to those items actually required on the lead agency's submittal requirement checklist. In any subsequent review of the application determined to be incomplete, the local agency shall not request the applicant to provide any new information that was not stated in the initial list of items that were not complete.

The section above requires a jurisdiction to:

1. Return a completeness determination within 30 days of submittal.
2. An incomplete determination must be exhaustive.
3. A jurisdiction's review must be limited to only those items found on the agency's submittal requirement checklist.
4. Subsequent completeness determinations may not request new information.

Lastly, if the City determines that the application is incomplete, the City is required to "specify those parts of the application which are incomplete and shall indicate the manner in which they can be made complete" (Gov Code § 65943).

Housing Accountability Act

The project is subject to the Housing Accountability Act (Gov. Code § 65589.5) which requires the City of Berkeley to approve the project because it is consistent with all objective standards. Under the Housing Accountability Act, the City is only permitted to reject a project if it can make findings based on a *preponderance* of evidence that the project would have a significant, unavoidable, and quantifiable impact on "objective, identified written public health or safety standards, policies, or conditions." (Gov. Code §65589.5(j)). The Legislature recently affirmed its expectation that these types of conditions "arise infrequently." (Ch. 243, Stats. 2018, § 1 (adding subdivision (a)(3) to Gov. Code § 65585.5)). Here, there is no evidence, let alone a preponderance of evidence, that the project would have any impact on public health and safety.

The following legislative findings (from Government Code § 65589.5(a)(2)) are instructive of how, and why, the City must interpret and implement these laws:

> California has a housing supply and affordability crisis of historic proportions. The consequences of failing to effectively and aggressively confront this crisis are hurting millions of Californians, robbing future generations of the chance to call California home, stifling economic opportunities for workers and businesses, worsening poverty and homelessness, and undermining the state's environmental and climate objectives…

> The Legislature's intent in enacting this section in 1982 and in expanding its provisions since then was to significantly increase the approval and construction of new housing for all economic segments of California's communities by meaningfully and effectively curbing the capability of local governments to deny, reduce the density for, or render infeasible housing development projects and emergency shelters. That intent has not been fulfilled…
>
> It is the policy of the state that this section should be interpreted and implemented in a manner to afford the fullest possible weight to the interest of, and the approval and provision of, housing.

The Housing Accountability Act (Gov. Code § 65589.5) also requires the City of Berkeley to approve the project. The project is protected under the Housing Accountability Act because it complies with the City's objective standards and criteria, as demonstrated in document 009-MSC of this application. The City is only permitted to reject a project under these circumstances if it can make findings based on a preponderance of evidence that the project would have a significant, unavoidable, and quantifiable impact on "objective, identified written public health or safety standards, policies, or conditions." (Gov. Code § 65589.5(j)). The Legislature recently affirmed its expectation that these types of conditions "arise infrequently." (Ch. 243, Stats. 2018, § 1 (adding subdivision (a)(3) to Gov. Code § 65585.5)). Here, there is no evidence, let alone a preponderance of evidence, that the project would have any impact on public health and safety.

A broad range of plaintiffs can sue to enforce the Housing Accountability Act, and the City would bear the burden of proof in any challenge (Gov. Code § 65589.5(k)). As recently reformed in the 2017 legislative session, the act makes attorney's fees and costs of suit presumptively available to prevailing plaintiffs, requires a minimum fine of $10,000 per housing unit for jurisdictions that fail to comply with the act within 60 days, and authorizes fines to be multiplied by five times if a court concludes that a local jurisdiction acted in bad faith when rejecting a housing development.

6. REQUIRED FINDINGS

This section outlines the proposed project's compliance with the required findings for approval of the requested Use Permits for this project.

1. Use Permit, under BMC §23.204.020(A), to allow multi-family residential building
2. Use Permit, under BMC § 23.204.030(A)(1)(a) to construct new floor area
3. Use Permit, under BMC § 23.326.070(A): Demolition of a Non-Residential Building
4. Administrative Use Permit, under BMC § 23.304.050(A) to construct rooftop architectural elements which exceed the height limit for the district

Use Permit Findings

<u>1. Use Permit, under BMC § 23.204.020(A), to allow a multi-family residential building</u>

Table 23.204-1: Allowed Uses in the Commercial Districts.

- Multi-Family Residential: UP(PH)

Response: The project will replace the existing underutilized commercial building with 240 new units that have a modern and sustainable design. The efficient project design will offer 280 bedrooms to help meet the demand for student-oriented and downtown-adjacent housing. The housing crisis is felt acutely here in Berkeley, with people paying extremely high rents to be able to live near campus or downtown because there are so few options available. The project at 2029 University Avenue will be able to offer 18 of the proposed units as affordable for very low-income households earning less than 50% of AMI and 18 units at moderate income households. This project will supply some of this badly needed housing at market rate and below market rate, offering amenities tailored to the downtown lifestyle.

2. Use Permit, under BMC § 23.204.030(A)(1)(a) to construct new floor area

Table 23.204-2: New Floor Area Permit Requirements

- C-DMU District, over 10,000 sq. ft. or more = UP(PH)

Response: Because this Use Permit does not have any objective standards in the required findings, the density bonus project assumes the Use Permit to construct new floor area. The construction, establishment, maintenance, and operation of the proposed project will not be detrimental to the health, safety, peace, morals, comfort, or general welfare of the neighborhood or the City as a whole. The project site is 12,385 SF and currently contains a 9,401 SF commercial building. The proposed project has 190,830 gross square feet and will significantly increase the intensity of development at this site by providing 240 units.

5. Use Permit, under BMC § 23.326.070(A): Demolition of a Non-Residential Building

A. Main Non-Residential Buildings. A main building used for non-residential purposes may be demolished with a Use Permit.

D. *Findings.* A Use Permit or an AUP for demolition of a non-residential building or structure may be approved only if the ZAB or the Zoning Officer finds that:

1. The demolition will not be materially detrimental to the commercial needs and public interest of any affected neighborhood or the City of Berkeley; and
2. The demolition:
   (a) Is required to allow a proposed new building or other proposed new use;
   (b) Will remove a building which is unusable for activities which are compatible with the purposes of the district in which it is located or which is infeasible to modify for such uses;
   (c) Will remove a structure which represents an inhabitable attractive nuisance to the public; or
   (d) Is required for the furtherance of specific plans or projects sponsored by the City of Berkeley or other local district or authority upon a demonstration that it is infeasible to obtain prior or concurrent approval for the new construction or new use which is contemplated by such specific plans or projects and that

adhering to such a requirement would threaten the viability of the plan or project.

Response: The demolition of this existing commercial building is necessary to allow the proposed new building to be constructed. The demolition of the existing two-story, 12,385 SF building will not be materially detrimental to the commercial needs and public interest of the affected neighborhood. In fact, an intention of the Downtown Mixed-Use District (C-DMU) is to implement the vision and goals of the Downtown Area Plan including environmental sustainability, urban design, and increase housing stock including affordable housing. (BMC § 23.204.130(A)) Though the existing property is a two-story building, it is an underutilized parcel with multiple vacant commercial tenant spaces. It is not a historically significant and will be replaced by a multi-family development with 240 dwelling units containing a total of 280 bedrooms.
The proposed project is both compatible with the zoning district's intent and will continue to maintain the present street frontage of the district. The proposed project will not interfere with the continuity of streetscape, and the design of the building will maintain the continuity of building facades along University Avenue. This is a true infill development project, which will redevelop an underutilized parcel containing a two-story, partially vacant commercial building into a vibrant multi-family residential address with an attractive pedestrian atmosphere.

6. Administrative Use Permit, under BMC § 23.304.050(A) to construct rooftop architectural elements which exceed the height limit for the district.

Response: Because this Administrative Use Permit does not have any required findings, the density bonus project assumes the AUP to construct rooftop architectural elements that exceed the C-DMU zone height limit.

Required Findings for Use Permits in the C-DMU Zone

E. *Permit Findings.* To approve an AUP or Use Permit for a project in the C-DMU district, the review authority must make the findings in Section 23.406.040 (Use Permits) and find that the proposed use or structure:

1. Is compatible with the purposes of the district;
2. Encourages and maintains the present street frontage of the district;
3. Does not interfere with the continuity of retail or compatible service facilities at the ground level;
4. Does not interrupt a continuous wall of building facades;
5. Is compatible in design and character with the district and the adjacent residential neighborhoods;
6. Does not generate traffic or parking demand significantly beyond the capacity of the district or significantly increase impacts on adjacent residential neighborhoods; and
7. Complies with the Southside Plan's adopted Mitigation Monitoring Program (MMP)

Response: The proposed project meets all the objective standards of the required findings for approving a Use Permit in the C-DMU zone. This SB 330 Housing Project is not subject to standards that are not objective. Items 1 and 5 are not objective standards, however the project does comply with them. Surrounding land uses include other multi-family residential developments of similar scale to the proposed project. The project is located within the C-DMU zone, which the City of Berkeley envisioned to support dense housing development near regional transit, shops, and amenities that the Downtown and campus areas provide.

The proposed project is both compatible with the zoning district's intent and will continue to maintain the present street frontage of the district. The proposed project will not interfere with the continuity of streetscape at the ground level, and the design of the building will maintain the continuity of facades along University Avenue.

This infill project is especially sustainable in its provision of housing opportunities so near to services and public transportation. The project is near the Downtown Berkeley BART Station and multiple AC Transit lines on University Avenue. Providing dense housing in close proximity to regional transit, bicycle routes, UC Berkeley campus, shops, and services will reduce vehicle miles traveled, air quality and greenhouse gas emissions impacts of the future residents.

The proposed project is not anticipated to generate significant traffic or parking demand because it is located in the City of Berkeley's Low Vehicle-Miles Traveled (VMT) Area. This Low VMT area includes the University Avenue commercial corridor because the VMTs per resident are an average of 15% less than the rest of the Bay Area. In addition, the proposed project will have a Transportation Demand Management Program. Future residents will not be eligible for Residential Parking Permits (RPP). The proposed project will comply with all objective standards in the Downtown Area Plan's adopted Mitigation Monitoring Program (MMP). As a result, the project would not be materially detrimental to the housing needs or public interest of the affected neighborhood and the City of Berkeley.

7. COMMUNITY OUTREACH

A neighborhood meeting was held on December 13, 2024 at 5:30PM. The meeting was held on Zoom. Nine people joined the meeting, five of which were from the project team and the other four from the general public. The project architect presented the project via a power point presentation, and one member of the public asked questions at the conclusion of the presentation. The questions were from the owner of Red Tomato Pizza located at 2017 University Avenue. His questions were regarding traffic control during construction. The team answered his questions and outlined the standard Conditions of Approval that are part of the Use Permit application approval.

Revised Applicant Statement

~~December 19~~ April 2, ~~2024~~2025

OVERVIEW AND PROJECT INTRODUCTION

The applicant team is pleased to submit this application package for a new 240 unit multifamily residential infill project located at 2029 University Avenue in Berkeley. This applicant statement includes:

1. **Project Description**
2. **Project Background**
3. **Compliance with General Plan and Zoning Code**
4. **Project Analysis**
5. **CEQA Analysis and Legislative Context**
6. **Required Findings**
7. **Community Outreach**
8. **Project Team Contact Information**

Figure 1. Proposed project at 2029 University Ave

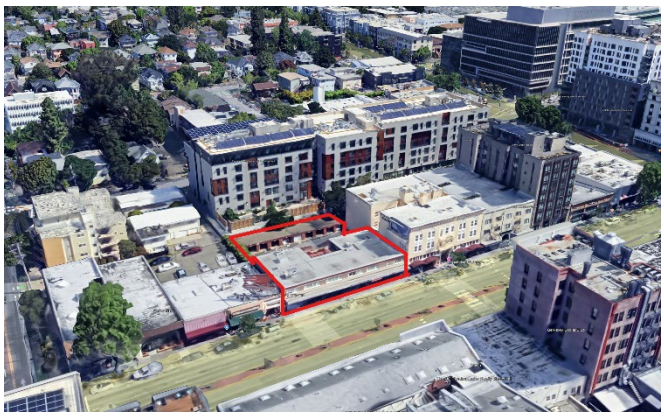

Figure 2. View of Project Site and Existing Building

Property Information

APN: 57-2053-8-1
Parcel Area: 12,385/.28 acres
General Plan Designation: Downtown
Zoning District: C-DMU Outer Core
Area Plan: Downtown Area Plan

1. **PROJECT DESCRIPTION**

The proposed project includes the demolition of the existing commercial building to construct 240 dwelling units with 280 bedrooms in a new 190,830~~78~~ gross square foot building. The proposed housing development project is submitted pursuant to Senate Bill 330 (Gov. Code § 66300) and subject to the modifications and protections of State Density Bonus Law (Gov. Code § 65915) and the Housing Accountability Act (Gov. Code § 65589.5). The project includes 36 affordable units, which is 15% of the base project units for rent to Very-Low Income households (earning less than 50% of the Area Median Income (AMI) and 15% to Moderate Income households (earning less than 120% AMI). That affordability entitles the project to a 100% density bonus for a total of 240 units. An

Affordable Housing Mitigation Fee of approximately $~~887,000~~882,281 will also apply to the project and be paid to the City of Berkeley. The Streets and Open Space Improvement Plan (SOSIPS) fee paid by the Applicant will be approximately $359,000.

The project site is a 12,385 square foot lot (0.28 acres) that is zoned C-DMU Downtown Outer Core a designation that aims to implement the vision and goals of the Downtown Area Plan which include environmental sustainability, great urban design, and economic development. (BMC § 23.204.130(A). The new residential development will have (80) Studios, (60) Jr-1-bedroom units, (60) 1-bedroom units, and (40) 2-bedroom units. The proposed project will add 280 bedrooms to Berkeley's housing stock to help alleviate the housing pressure near the University of California's Berkeley (UCB) campus. The project will have residential amenities such as rooftop decks, fitness center, lounges/work areas, and secure bicycle parking.

Unit Type	Unit Count
Studio	80
JR-Bedroom	60
1-Bedroom	60
2-Bedroom	40
Total	240

The existing commercial building has zero dwelling units, and the proposed project will construct 240 units. This will result in a net increase of 240 units with a total of 280 bedrooms. The project will be able to add 36 units to the City of Berkeley's deed-restricted affordable housing stock as well as increasing the residential density onsite. There will be no residential units on the ground floor, only residential amenity spaces.

The project site is on the north side of University Avenue between Milvia Street and Shattuck Avenue. 2029 University Avenue is approximately 0.3 miles west of the UCB campus. University Avenue is a transit and commercial corridor with a wide variety of goods and services. The location of this project will provide future residents with outstanding access to the campus and the downtown area.

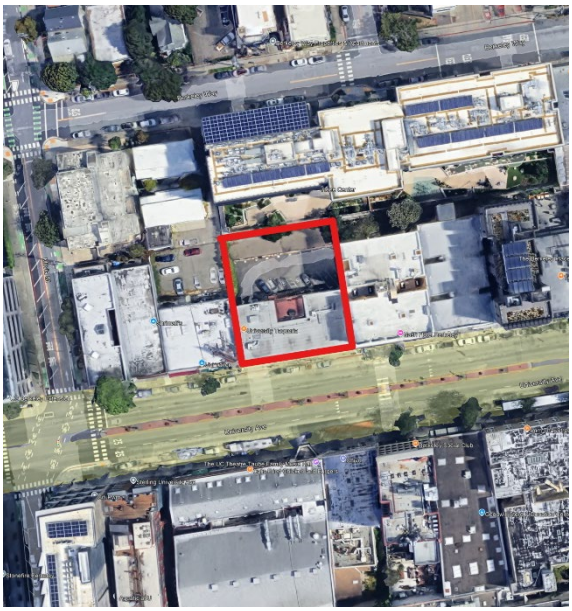

Figure 3. Aerial View of Neighborhood Vicinity

The site is highly accessible via public transit or active transportation. It is located 0.3 miles from the Downtown Berkeley BART station and is well served by multiple bus routes. The project will provide 29 parking spaces in a secure garage. The project will provide ample bicycle parking with ~~176~~ 167 long term spaces for residents and ~~10~~ 8 short term spaces for their guests. This proposed urban infill project is exceptionally well-suited for future residents to rely solely on sustainable modes of transportation. The building itself will be designed with solar PV.

The proposed project will provide open space, a deck on Level 23, that will have beautiful views of the Bay and Berkeley Hills. The ground floor of the project includes residential amenities such as a lobby, bike room, mail room, as well as the trash room, back of house service areas and utilities.

Key elements of the project include:

- 240 total units in 23 stories
- 18 units affordable to very low-income households @ 50% AMI & 18 units to moderate-income households @120% AMI.
- ~~186~~ 167 total bicycle parking spaces, 29 vehicle parking spaces.
- Common Open Space at the roof deck.
- Lounges/work areas and a fitness room.
- Affordable Housing Mitigation Fee of approximately $~~887,000~~ 882,281 paid to City of Berkeley Affordable Housing Trust Fund.

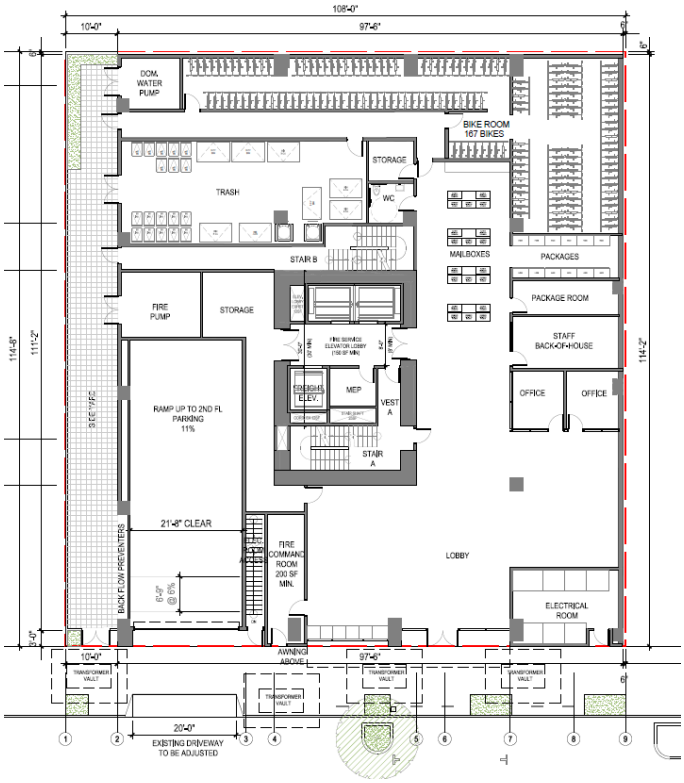

Figure 4: Ground Floor Plan

2. PROJECT BACKGROUND

Existing Conditions

The existing commercial building located at 2029 University Avenue will be demolished and replaced with a 23-story residential building that will increase the residential density along the University Avenue commercial corridor. The existing building is a two-story commercial structure with 9,401 square feet. There are five commercial spaces fronting University Avenue. The proposed project seeks to increase the residential density onsite from the current density of 0 dwelling units to the proposed project's 240 units, adding to the housing stock in the Downtown.

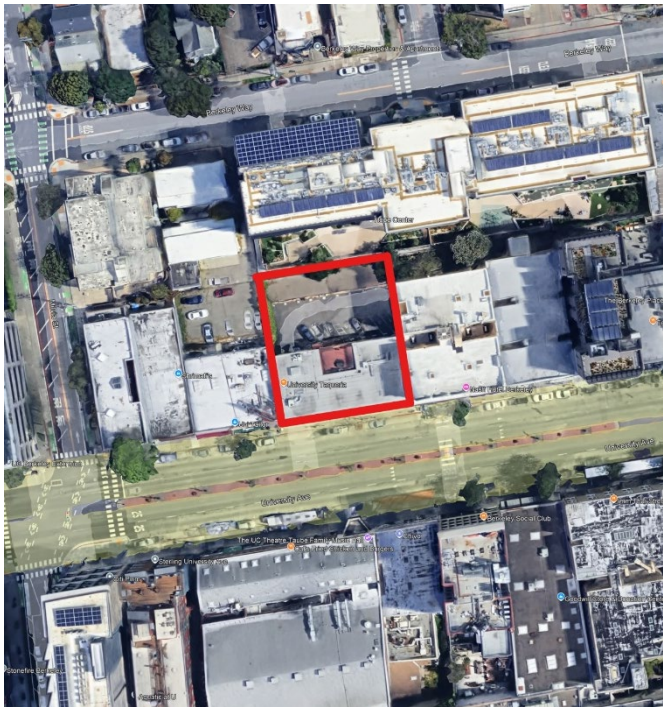

Figure 5. Aerial View of Project Site

Environmental Conditions

A Historic Resource Evaluation (HRE) was completed for this project in October 2023 (with a letter update for the report November 6,

2024). The evaluation was conducted by Caitlin Hibma of Left Coast Architectural History. The HRE concluded that the existing commercial building and garage were built in 1953 and 1943, respectively.

The project does not appear on the California Environmental Protection Agency's (CalEPA) Cortese Lists. The project site does not contain any hazardous materials onsite. Refer to the Hazardous Waste and Substances Statement and the Phase I Environmental Site Assessment Report that is included as part of this project application packet for more information.

Table 2: Surrounding Uses and Zoning

Direction	Uses	Zoning
North	Commercial	C-DMU Buffer
East	Commercial	C-DMU Outer Core
South	Commercial	C-DMU Core
West	Commercial	C-DMU Outer Core

The project site does not have any protected, culverted, or historic creek beds on the property. As such, the Creek Protection Documentation required as part of the City of Berkeley's Zoning Project Application is not applicable to this project.

The proposed project should be deemed to be exempt from the CEQA Guidelines pursuant to Section 15332, Infill Development Projects section. The project meets each of criteria A through E of that section, as also noted in the CEQA discussion in Section 5 of this Applicant Statement.

3. PROJECT COMPLIANCE WITH GENERAL PLAN AND ZONING CODE

The City of Berkeley General Plan designates this project site as Downtown. The Downtown designation is characterized by pedestrian-oriented commercial development including retail and restaurant uses. This site is located in the outer core of the Downtown.

The proposed project site is zoned C-DMU outer core and will advance the goals of Berkeley's Downtown Area Plan by advancing residential infill development that is sustainable, close to transit, and will add to the economic vitality of the Downtown.

Figure 6: City of Berkeley Zoning Map

The proposed project will meet all of the zoning district development standard requirements except as modified pursuant to SDBL. The project complies with the C-DMU zone development standards for height (stories), FAR, front, interior side, rear setbacks, lot coverage, and vehicle and bicycle parking requirements. State Density

Bonus Law waivers are required for the following zoning development standards: maximum building height (feet), setback maximum dimension above 120', maximum diagonal width of 120' for building's width over 120 feet of height, and residential open space. Table 3 identifies the applicable development standards and how the proposed project complies with them.

Table 3: Major Development Standards (C-DMU)

Municipal Code Standards		C-DMU Standard	Proposed	Compliance
Building Height	Main Building Height Maximum Outer Core	120 feet	256' & 23 stories	Compliant through SDBL
Setback-Maximum Dimension	Max dimension above 120'	120 feet	138'-11"	Compliant through SDBL
Lot Line Setbacks, Minimum	Front (University)	15 feet	Range: 0' to 27'-7"	Compliant w/use permit
	Rear	15 feet	Range: 6" to 10'-11"	Compliant w/use permit
	Interior Side	15 feet	Range: 8'-10" to 54'	Compliant w/use permit
	Interior Side	15 feet	Range: 8'-10" to 15'	Compliant w/use permit
Useable Open Space (UOS)	Per Dwelling Unit	80 square feet per Dwelling Unit 240 units = 19,200 square feet required	1,048 square feet	Compliant through SDBL
Landscaped UOS	40% of required UOS	40% of 19,200 SF = 7,680 SF required	321 SF	Compliant through SDBL
Parking	Automobile Parking	0	29	Compliant
	Long Term Bicycle Parking	1 space per 3 bedrooms (94)	176	Compliant
	Short Term Bicycle Parking	2, or 1 space per 40 bedrooms (7)	10	Compliant

Standard	Existing	Addition / (Reduction)	Proposed Total	Permitted / Required
Lot Area (sq. ft.)	12,682 sf	0 sf	12,682 sf	min: 12,682 sf

Gross Floor Area (sq. ft)		11,420 sf	179,410 sf	190,830 sf	max: N/A
Floor Area Ratio		0.92	14.13	15.05	max: N/A
Dwelling Units	Total	0	240	240	max: N/A
	Affordable	0	36	18 VLI, 18 MI	min: N/A
Building Height (ft. - in.)	Average	N/A	N/A	N/A	max: N/A
	Maximum	21'	235'	256' *	max: 75' w UP
	Stories	2	21	23	max: N/A

4. PROJECT ANALYSIS

Density Bonus Eligibility
The proposed project is eligible for the State Density Bonus because it:

a) Meets all objective development standards, and

b) Provides a sufficient number of units as affordable housing.

Table 4~~5~~. Unit Breakdown (SDBL)

Project Proposals	Market Rate Units	Below Market Rate Units	Total Units
Base Project	102	18 (15% of base)	120
Density Bonus Project	222	18	240

The proposed base project that meets all objective standards includes 120 dwelling units, 18 of which are affordable for very low-income households (less than 50% AMI). These 18 affordable units comprise 15% of the proposed base project. The project is also providing 18 units (15% of base project) at Moderate Income levels (120% AMI). Per State Density Bonus Law, the project is eligible for a 100% density bonus. With this density bonus, the project is entitled to use an unlimited number of waivers and up to three concessions for development standards that impede the project's ability to utilize the density bonus or increase feasibility. The average unit size for the base project is ~~795~~ 801 SF and density bonus project is ~~795~~ 801 SF. The following Table ~~5~~ 6 shows the waivers that are requested to be granted to accommodate the project. Without these waivers being granted, the proposed project could not physically be built.

Table ~~5~~6: Waivers and Concessions Requested to Accommodate Density Bonus

Standard	Required	Proposed
Waivers Requested		
Building Height and *(per BMC Table 23.204-37)*	120'	256' & 23 stories
Setback-Max. Dimension Above 120' *(per BMC Table 23.204-38)*	120'	138'-11"
Residential Open Space *(per BMC Table 23.204-32)*	80 sf/unit (19,200 sf)	~~1,048~~2,055 sf
Landscaped UOS *(per BMC 23.304.090.B.7)*	40% (8,22~~7,680~~ sf)	~~321~~ 27 sf
Maximum Diagonal Width of 120' for Building's Width over 120 feet of Height (per *BMC § 23.204.130(E)(3)(d)*)	120'	139'-6"
Concessions Requested		

Hard Hats ordinance Apprenticeship Requirements *(per BMC 13.07.040)*	Requirements in BMC 13.07.040	The estimated costs of the apprenticeship requirements in BMC 13.07.040 are approximately $1,893,000 which is not feasible for the project. Avoiding this requirement would result in actual and identifiable cost savings for the project.
Hard Hats Healthcare Expenditures *(per BMC 13.107.050)*	Requirements in BMC 13.07.050	The estimated costs of the healthcare expenditure requirements in BMC 13.07.050 are approximately $2,839,000 which is not feasible for the project. Avoiding this requirement would result in actual and identifiable costs savings for the project.
Bird Safe Building *(per BMC 23.304.150)*	Requirements in BMC 23.304.150	The estimated costs of the bird safe building requirements in BMC 23.304.150 are approximately $799,000 which is not feasible for the project. Avoiding this requirement would result in actual and identifiable costs savings for the project.

Project Design, Landscaping, Downtown Design Guidelines

The proposed project is located in the City of Berkeley's Downtown Plan Area and is within the Outer Core Sub-Area. The proposed project complies with many of the Downtown Design Guidelines. The project team has carefully designed the building to meet today's need for housing and to respect the architectural context and history of Berkeley's eclectic Downtown. The Downtown Design Guidelines do not contain objective standards and as such, are not applicable to the project.

Figure 7: Rendering of Proposed Project

There are many ways in which the proposed project is compatible and compliant with the goals and standards of the Downtown Area Plan.

Building Design

The proposed project is sited and articulated so as to continue the urban building fabric along University Avenue in Berkeley's downtown core area. The project is ideally located for a high-density development as it is located midblock of a major arterial street and walkable to BART, transit, groceries and services. The project will create much needed housing, especially additional affordable housing and will benefit Berkeley by providing a high-quality infill development.

The ground floor design maximizes visual transparency into the residential lobby and locates the back of house spaces towards the rear of the building. The 2nd floor garage façade is designed to be consistent with the street level visual appearance, giving the base of the 23-story building a strong civic scale. The building steps in at the 3rd level, allowing light and air into the residential units. On the 23rd level, the building steps back further to allow a sky garden that is connected to the residential lounge and fitness room.

Sustainable design within the landscape is a guiding principle throughout the project: the use of native plant species, sustainable materials, light colored pavements to mitigate urban heat island gain, maximizing water conservation and meeting or exceeding the City and State's Water Efficient Landscape Ordinance.

The new streetscape will blend seamlessly into the existing pedestrian network and the existing street tree will be protected in place.

The project's usable open space is provided at the roof level at the sky garden. Here, a range of gathering spaces are provided with low green roof plantings and raised metal planters with medium-sized focal feature shrubs. Residents can meander amongst the plantings, gather with friends to enjoy the sweeping views of the East Bay Hills, City, and the San Francisco Bay.

Sustainability

The proposed project will comply with the Berkeley Energy Code (BMC Chapter 19.36) and the Berkeley Green Code (BMC Chapter 19.37), including providing a solar PV system, battery energy storage, electric vehicle charging, and low-carbon concrete requirements.
The proposed project will use Bird Safe Glass on windows up to 75 feet, in compliance with Berkeley's Bird Safe Building Ordinance.

The project site is very well-located for future residents to use sustainable modes of transportation. The proposed project is 0.3 miles from the Downtown Berkeley BART station and is adjacent to multiple AC Transit bus lines, as well as City of Berkeley bicycle routes. There will be minimal vehicle parking provided onsite (29 spaces) and ample bicycle parking. The proposed project will have a Transportation Demand Management (TDM) Program that will provide unlimited local bus passes to each unit and will comply with the TDM requirements in BMC Section 23.322.060.

The building is so close to goods and service that the project expects the majority of trips to be completed by active transportation or public transit modes. With the provision of free bus passes, the TDM Program will provide an additional incentive for future residents to use public transit. There are also two grocery stores nearby in a ½ - 1 mile walking distance. Therefore, the project contributes to Berkeley's Climate Action Plan goals of providing housing in locations close to goods and services, and oriented to use of public- and active-transportation, serving to reduce the City's overall per capita carbon footprint. The project will comply with the requirements in BMC 23.304.130.G and will achieve a LEED Gold rating or equivalent for environmental sustainability.

Project & Community Benefits

In addition to the in-lieu and mitigation fees, and community benefits, the following benefits of the proposed project. The proposed project will offer the following benefits to the City of Berkeley:

- Redevelop an underutilized parcel in the downtown area
- Provide 240 dwelling units of dense, transit-oriented housing.
- Provide 36 affordable dwelling units: 18 Very Low-Income Households (at <50% AMI) and 18 Moderate-Income Households (at 80% to 120% AMI)
- Encourage alternative modes of transportation – low parking ratio & 167 bicycle parking spaces.
- LEED Gold or equivalent, with a rooftop that is solar-ready.
- Units will be equipped with energy efficient appliances and low flow fixtures, and the site will be planted with drought tolerant landscaping that supports the project's stormwater management plan.
- Compliant with Bird Safe Glass requirements as per BMC 23.304.150.

5. CEQA OVERVIEW AND LEGISLATIVE CONTEXT

The housing crisis continues to have a significant impact on Californians across the state. The Government Code sections discussed below are state legislative efforts that recognize the severity of California's housing crisis and the difficulties associated with developing new housing at appropriately zoned, transit-oriented, and urbanized locations. These pieces of legislation are applicable to the proposed project:

- California Environmental Quality Act Class 32 Categorial Exemption (CEQA Guideline § 15332)
- Permit Streamlining Act (Gov. Code § 65920 et seq.)
- State Density Bonus Law (Gov. Code § 65915)
- Housing Accountability Act (Gov. Code § 65589.5)
- Housing Crisis Act of 2019 (Gov. Code § 66300)

CEQA, Infill Project

This project is eligible for a categorical exemption from CEQA. Because the proposed project is located in an urbanized area and because it is an infill development project, the CEQA Class 32 "Infill" Categorical Exemption applies.

Class 32 Exemption characteristics:

"(a) The project is consistent with the applicable general plan designation and all applicable general plan policies as well as with applicable zoning designation and regulations.
(b) The proposed development occurs within city limits on a project site of no more than five acres substantially surrounded by urban uses.
(c) The project site has no value as habitat for endangered, rare or threatened species.
(d) Approval of the project would not result in any significant effects relating to traffic, noise, air quality, or water quality.
(e) The site can adequately be served by all required utilities and public services."

This proposed infill project is consistent with the City of Berkeley's objective design and development standards with the use of State Density Bonus Law, so it is subject to the categorical exemption under CEQA. The proposed development occurs within the City of Berkeley, on a site that is 0.28 acres and 100% surrounded by urban uses. The project site is already fully developed with an existing commercial building, so the site has no value for endangered, rare, or threatened species.

In terms of CEQA, this project is environmentally benign as it will not result in any significant traffic, noise, air quality, or water quality impacts. The project will provide minimal (29 spaces) vehicle parking, so will not generate any significant traffic or air quality impacts. There will be residential noise which will not constitute an impact. The proposed project provides a Stormwater Control Plan to protect water quality. The site is on an urbanized parcel that has existing service connections to all required utilities and public services.

Historic Resource Evaluation

The following Historic Resource Evaluation was provided by Caitlin Hibma of Left Coast Architectural History. The subject property is over 40 years old but does not have any significant associations with historically important events or noteworthy historical figures. The historic evaluation found that the property is not historically significant at either the local or State level and therefore does not qualify as an historic resource for purposes of the California Environmental Quality Act (CEQA).

Under the City of Berkeley's Landmarks Preservation Ordinance and its Landmark/Structure of Merit criteria, there is no specific age threshold or criteria. In sum, 2029 University Avenue has no potential cultural, historical, architectural or educational values or importance;

- Is not associated with any cultural or historical period or events;
- Is not a first, last, prototypical or important example of its type;

- Is not contemporary with any nearby landmarks.

Consequently, the property and building at 2029 University Avenue has no potential eligibility as a City of Berkeley Landmark or Structure of Merit.

SB 330/Housing Crisis Act

On December 10, 2024, an SB 330 Preliminary Application was submitted to the City of Berkeley that locked in the standards and fees applicable at the time of submission. The Housing Crisis Act (Gov. Code § 66300) prohibits a local agency from disapproving, or conditioning approval in a manner that renders infeasible, a housing development project that provides affordable housing. The act also requires that a development project must comply with applicable, objective general plan and zoning standards and criteria that were in effect at the time the application was deemed to be complete. The law also requires the city or county to consider and either approve or disapprove the housing development project within the 5 allowable public hearings under HCA, and consistent with the applicable timelines under the Permit Streamlining Act.

Permit Streamlining Act

The project is required to go through a completeness review under the Permit Streamlining Act ("PSA"), Government Code § 65920 et seq. The PSA imposes several relevant obligations on the City as it conducts its completeness review of the project's application.

First, the City is required to compile lists that include the information required for a complete submittal (Gov Code § 65940 et seq). The City has several checklists and application documents governing what needs to be included in planning applications. Second, Gov Code § 65943 spells out a jurisdiction's obligations after submittal:

> Not later than 30 calendar days after any public agency has received an application for a development project, the agency shall determine in writing whether the application is complete and shall immediately transmit the determination to the applicant for the development project. If the application is determined to be incomplete, the lead agency shall provide the applicant with an exhaustive list of items that were not complete. That list shall be limited to those items actually required on the lead agency's submittal requirement checklist. In any subsequent review of the application determined to be incomplete, the local agency shall not request the applicant to provide any new information that was not stated in the initial list of items that were not complete.

The section above requires a jurisdiction to:

1. Return a completeness determination within 30 days of submittal.
2. An incomplete determination must be exhaustive.
3. A jurisdiction's review must be limited to only those items found on the agency's submittal requirement checklist.
4. Subsequent completeness determinations may not request new information.

Lastly, if the City determines that the application is incomplete, the City is required to "specify those parts of the application which are incomplete and shall indicate the manner in which they can be made complete" (Gov Code § 65943).

Housing Accountability Act

The project is subject to the Housing Accountability Act (Gov. Code § 65589.5) which requires the City of Berkeley to approve the project because it is consistent with all objective standards. Under the Housing Accountability Act, the City is only permitted to reject a project if it can make findings based on a *preponderance* of evidence that the project would have a significant, unavoidable, and quantifiable impact on "objective, identified written public health or safety standards, policies, or conditions." (Gov. Code §65589.5(j)). The Legislature recently affirmed its expectation that these types of conditions "arise infrequently." (Ch. 243, Stats. 2018, § 1 (adding subdivision (a)(3) to Gov. Code § 65585.5)). Here, there is no evidence, let alone a preponderance of evidence, that the project would have any impact on public health and safety.

The following legislative findings (from Government Code § 65589.5(a)(2)) are instructive of how, and why, the City must interpret and implement these laws:

> California has a housing supply and affordability crisis of historic proportions. The consequences of failing to effectively and aggressively confront this crisis are hurting millions of Californians, robbing future generations of the chance to call California home, stifling economic opportunities for workers and businesses, worsening poverty and homelessness, and undermining the state's environmental and climate objectives…
>
> The Legislature's intent in enacting this section in 1982 and in expanding its provisions since then was to significantly increase the approval and construction of new housing for all economic segments of California's communities by meaningfully and effectively curbing the capability of local governments to deny, reduce the density for, or render infeasible housing development projects and emergency shelters. That intent has not been fulfilled…
>
> It is the policy of the state that this section should be interpreted and implemented in a manner to afford the fullest possible weight to the interest of, and the approval and provision of, housing.

The Housing Accountability Act (Gov. Code § 65589.5) also requires the City of Berkeley to approve the project. The project is protected under the Housing Accountability Act because it complies with the City's objective standards and criteria, as demonstrated in document 009-MSC of this application. The City is only permitted to reject a project under these circumstances if it can make findings based on a preponderance of evidence that the project would have a significant, unavoidable, and quantifiable impact on "objective, identified written public health

or safety standards, policies, or conditions." (Gov. Code § 65589.5(j)). The Legislature recently affirmed its expectation that these types of conditions "arise infrequently." (Ch. 243, Stats. 2018, § 1 (adding subdivision (a)(3) to Gov. Code § 65585.5)). Here, there is no evidence, let alone a preponderance of evidence, that the project would have any impact on public health and safety.

A broad range of plaintiffs can sue to enforce the Housing Accountability Act, and the City would bear the burden of proof in any challenge (Gov. Code § 65589.5(k)). As recently reformed in the 2017 legislative session, the act makes attorney's fees and costs of suit presumptively available to prevailing plaintiffs, requires a minimum fine of $10,000 per housing unit for jurisdictions that fail to comply with the act within 60 days, and authorizes fines to be multiplied by five times if a court concludes that a local jurisdiction acted in bad faith when rejecting a housing development.

6. REQUIRED FINDINGS

This section outlines the proposed project's compliance with the required findings for approval of the requested Use Permits for this project.

1. Use Permit, under BMC §23.204.020(A), to allow multi-family residential building
2. Use Permit, under BMC § 23.204.030(A)(1)(a) to construct new floor area
3. Use Permit, under BMC § 23.326.070(A): Demolition of a Non-Residential Building
4. Administrative Use Permit, under BMC § 23.304.050(A) to construct rooftop architectural elements which exceed the height limit for the district

Use Permit Findings

1. Use Permit, under BMC § 23.204.020(A), to allow a multi-family residential building

Table 23.204-1: Allowed Uses in the Commercial Districts.

- Multi-Family Residential: UP(PH)

Response: The project will replace the existing underutilized commercial building with 240 new units that have a modern and sustainable design. The efficient project design will offer 280 bedrooms to help meet the demand for student-oriented and downtown-adjacent housing. The housing crisis is felt acutely here in Berkeley, with people paying extremely high rents to be able to live near campus or downtown because there are so few options available. The project at 2029 University Avenue will be able to offer 18 of the proposed units as affordable for very low-income households earning less than 50% of AMI and 18 units at moderate income households. This project will supply some of this badly needed housing at market rate and below market rate, offering amenities tailored to the downtown lifestyle.

2. Use Permit, under BMC § 23.204.030(A)(1)(a) to construct new floor area

Table 23.204-2: New Floor Area Permit Requirements

- C-DMU District, over 10,000 sq. ft. or more = UP(PH)

Response: Because this Use Permit does not have any objective standards in the required findings, the density bonus project assumes the Use Permit to construct new floor area. The construction, establishment, maintenance, and operation of the proposed project will not be detrimental to the health, safety, peace, morals, comfort, or general welfare of the neighborhood or the City as a whole. The project site is 12,385 SF and currently contains a 9,401 SF commercial building. The proposed project has 190,~~878~~ 830 gross square feet and will significantly increase the intensity of development at this site by providing 240 units.

5. Use Permit, under BMC § 23.326.070(A): Demolition of a Non-Residential Building

A. Main Non-Residential Buildings. A main building used for non-residential purposes may be demolished with a Use Permit.

D. *Findings.* A Use Permit or an AUP for demolition of a non-residential building or structure may be approved only if the ZAB or the Zoning Officer finds that:

1. The demolition will not be materially detrimental to the commercial needs and public interest of any affected neighborhood or the City of Berkeley; and
2. The demolition:
   (a) Is required to allow a proposed new building or other proposed new use;
   (b) Will remove a building which is unusable for activities which are compatible with the purposes of the district in which it is located or which is infeasible to modify for such uses;
   (c) Will remove a structure which represents an inhabitable attractive nuisance to the public; or
   (d) Is required for the furtherance of specific plans or projects sponsored by the City of Berkeley or other local district or authority upon a demonstration that it is infeasible to obtain prior or concurrent approval for the new construction or new use which is contemplated by such specific plans or projects and that adhering to such a requirement would threaten the viability of the plan or project.

Response: The demolition of this existing commercial building is necessary to allow the proposed new building to be constructed. The demolition of the existing two-story, 12,385 SF building will not be materially detrimental to the commercial needs and public interest of the affected neighborhood. In fact, an intention of the Downtown Mixed-Use District (C-DMU) is to implement the vision and goals of the Downtown Area Plan including environmental sustainability, urban design, and increase housing stock including affordable housing. (BMC § 23.204.130(A)) Though the existing property is a two-story building, it is an underutilized parcel with multiple vacant commercial tenant spaces. It is not a historically significant and will be replaced by a multi-family development with 240 dwelling units containing a total of 280 bedrooms.

The proposed project is both compatible with the zoning district's intent and will continue to maintain the present street frontage of the district. The proposed project will not interfere with the continuity of streetscape, and the design of the building will maintain the continuity of

building facades along University Avenue. This is a true infill development project, which will redevelop an underutilized parcel containing a two-story, partially vacant commercial building into a vibrant multi-family residential address with an attractive pedestrian atmosphere.

6. Administrative Use Permit, under BMC § 23.304.050(A) to construct rooftop architectural elements which exceed the height limit for the district.

Response: Because this Administrative Use Permit does not have any required findings, the density bonus project assumes the AUP to construct rooftop architectural elements that exceed the C-DMU zone height limit.

Required Findings for Use Permits in the C-DMU Zone

E. *Permit Findings.* To approve an AUP or Use Permit for a project in the C-DMU district, the review authority must make the findings in Section 23.406.040 (Use Permits) and find that the proposed use or structure:

1. Is compatible with the purposes of the district;
2. Encourages and maintains the present street frontage of the district;
3. Does not interfere with the continuity of retail or compatible service facilities at the ground level;
4. Does not interrupt a continuous wall of building facades;
5. Is compatible in design and character with the district and the adjacent residential neighborhoods;
6. Does not generate traffic or parking demand significantly beyond the capacity of the district or significantly increase impacts on adjacent residential neighborhoods; and
7. Complies with the Southside Plan's adopted Mitigation Monitoring Program (MMP)

Response: The proposed project meets all the objective standards of the required findings for approving a Use Permit in the C-DMU zone. This SB 330 Housing Project is not subject to standards that are not objective. Items 1 and 5 are not objective standards, however the project does comply with them. Surrounding land uses include other multi-family residential developments of similar scale to the proposed project. The project is located within the C-DMU zone, which the City of Berkeley envisioned to support dense housing development near regional transit, shops, and amenities that the Downtown and campus areas provide.

The proposed project is both compatible with the zoning district's intent and will continue to maintain the present street frontage of the district. The proposed project will not interfere with the continuity of streetscape at the ground level, and the design of the building will maintain the continuity of facades along University Avenue.

This infill project is especially sustainable in its provision of housing opportunities so near to services and public transportation. The project is near the Downtown Berkeley BART Station and multiple AC Transit lines on University Avenue. Providing dense housing in close proximity

to regional transit, bicycle routes, UC Berkeley campus, shops, and services will reduce vehicle miles traveled, air quality and greenhouse gas emissions impacts of the future residents.

The proposed project is not anticipated to generate significant traffic or parking demand because it is located in the City of Berkeley's Low Vehicle-Miles Traveled (VMT) Area. This Low VMT area includes the University Avenue commercial corridor because the VMTs per resident are an average of 15% less than the rest of the Bay Area. In addition, the proposed project will have a Transportation Demand Management Program. Future residents will not be eligible for Residential Parking Permits (RPP). The proposed project will comply with all objective standards in the Downtown Area Plan's adopted Mitigation Monitoring Program (MMP). As a result, the project would not be materially detrimental to the housing needs or public interest of the affected neighborhood and the City of Berkeley.

7. COMMUNITY OUTREACH

A neighborhood meeting was held on December 13, 2024 at 5:30PM. The meeting was held on Zoom. Nine people joined the meeting, five of which were from the project team and the other four from the general public. The project architect presented the project via a power point presentation, and one member of the public asked questions at the conclusion of the presentation. The questions were from the owner of Red Tomato Pizza located at 2017 University Avenue. His questions were regarding traffic control during construction. The team answered his questions and outlined the standard Conditions of Approval that are part of the Use Permit application approval.

FCS
An ADEC Innovation

Memorandum

Date: January 31, 2025

To: Steve Heaton, Laconia Development LLC

From: Tsui Li, Senior Air Quality Scientist, FirstCarbon Solutions
Philip Ault, Director of Noise and Air Quality, FirstCarbon Solutions

Subject: Air Quality Impacts Analysis for the 2029 University Avenue Residential Project in Berkeley, California

FirstCarbon Solutions (FCS) performed an Air Quality analysis to assess the short-term and long-term impacts of the proposed 2029 University Avenue Residential Project (proposed project). The project site is located in the City of Berkeley (City), in Alameda County, California (Exhibit 1). FCS prepared this memorandum to present the findings of the Air Quality analysis.

The findings of this Air Quality Impacts Analysis show that the emissions from the proposed project's construction and operation will have a less than significant impact on the surrounding environment. The proposed project is anticipated to be categorically exempt (Class 32 Infill Exemption, Class 31 Exemption, and Statutory Residential Infill Exemption [Public Resources Code § 21159.24]) from California Environmental Quality Act (CEQA). This analysis concludes that the proposed project is eligible for the Class 32 Infill Exemption under CEQA.

PROJECT DESCRIPTION

The proposed project is located on an approximately 0.28-acre site on Assessor's Parcel Number (APN) 57-2053-8-1 (Exhibit 2). The project site currently consists of 13,031 square feet of existing non-landmarked commercial structures and carport and 7,320 square feet of hardscape. The project site is adjacent to residential uses and Berkeley Way to the north, University Avenue to the south, Nash Hotel Berkeley to the east, and mixed uses and Milvia Street to the west. Further out, the project site is surrounded by residential and commercial uses to the south, west, and north and is approximately 2.36 miles north of Interstate 580 (I-580) and approximately 1,000 feet west of University of California, Berkeley.

The City's General Plan designates the project site as "Downtown," which allows for a residential density of 40 to 100 dwelling units per acre. The City's Zoning Ordinance zones the project site as Downtown Mixed-Use District "C-DMU." The C-DMU zoning district permits residential uses with a Use Permit and retail uses with a Zoning Certificate. This designation permits the full range of housing types, including both schemes that are proposed by the project.

The proposed project includes demolition of the existing structures and hardscape on-site and construction of a multi-family apartment development or a student housing development.

FCS has reviewed the two design options (multi-family apartment development versus student housing development) for the purpose of determining a more impactful design to analyze as the worst-case scenario. The designs for the two proposed buildings are virtually identical with respect to the overall physical size and impact of the construction. The proposed project building (regardless of land use as a multi-family apartment or student housing) would be 23 stories with an additional basement on a 0.28-acre site. Either option would be described by the following: a total residential square footage area of up to 191,000 square feet, limited parking (interior to the building on the second floor) encompassing approximately 8,000 square feet, and landscaping of 500 square feet. Construction impacts would be almost identical given the site size and level of construction is similar for both options.

During operation, differences in impacts between the two land uses would result primarily from differences in the transportation patterns of the residents. Energy consumption for the two options would be similar based on nearly identical building size and envelope. Since the building design will be all electric, the building will not have any direct energy-related emissions from combustion sources of natural gas. Off-campus high-rise apartments are located close to universities, reduce the need for long commutes, and result in fewer vehicle trips with many students walking and biking to campus. Prior studies found that off-campus student housing apartments were found to have approximately a third of amount of traffic compared to a similarly sized, generic apartment building.[1] While Institute of Transportation Engineers (ITE) daily trip generation rates are not available for Off-Campus Student High-Rise Apartments, Peak AM and Peak PM hourly rates for this land use (ITE Code 227),[2] calculated based on trips per bedroom, corroborate this trend of lower traffic for student housing as compared to generic apartment buildings.

In summary, two building plans were considered: 240 multi-family apartment units or 160 student apartments (with 240 bedrooms). Based on the potential for the most vehicle trips, it was concluded that the multi-family apartment building would generate the maximum impacts for Air Quality, Greenhouse Gas Emissions, and Energy resources. The analysis below evaluates potential impacts from the proposed apartment site plan.

The following project parameters are relevant to the emissions and health risk modeling. The proposed project would be all electric. An emergency diesel generator is proposed. For the purpose of this analysis, the proposed emergency generator would not exceed 50 hours of emergency operation per year following BAAQMD Rule 9-8-330–Emergency Standby Engines, Hours of Operation. However, per applicant-provided information, this estimate is likely conservative and the actual annual usage hours would be lower (approximately 32 hours). Full project parameters can be found in the modeling input document in Attachment A.

Exhibit 3
Site Plan

As shown in Attachment A, a large portion of the construction equipment would be electric. For the diesel construction equipment, the applicant has committed to using equipment with Tier 4 engines as a Project Design Feature (PDF).

PDF AIR-1 Use of Tier 4 Construction Equipment

Prior to the issuance of any demolition, grading, or building permits (whichever occurs earliest), the project applicant and/or construction contractor shall prepare a construction operations plan that, during construction activities, requires all off-road diesel equipment with engines greater than 25 horsepower to meet particulate matter emissions standards for Tier 4 engines at minimum. The construction contractor shall maintain records documenting its efforts to comply with this requirement, including equipment lists. Off-road equipment descriptions and information shall include, but are not limited to, equipment type, equipment manufacturer, equipment identification number, engine model year, engine certification (Tier rating), horsepower, and engine serial number. The project applicant and/or construction contractor shall submit the construction operations plan and records of compliance to the City.

The proposed project is anticipated to be categorically exempt (Class 32 Infill Exemption, Class 31 Exemption, and Statutory Residential Infill Exemption [Public Resources Code § 21159.24]) from CEQA.

SETTING AND REGULATORY FRAMEWORK

Air Quality Regulatory Framework

The proposed project is in the City of Berkeley and within the jurisdiction of the Bay Area Air Quality Management District (BAAQMD), which regulates air quality in the San Francisco Bay Area Air Basin (Air Basin). Within the Air Basin, ambient air quality standards for ozone, carbon monoxide (CO), nitrogen dioxide (NO_2), sulfur dioxide (SO_2), particulate matter with an aerodynamic diameter of 2.5 microns and smaller ($PM_{2.5}$) and 10 microns and smaller (PM_{10}), and lead (Pb) have been established by both the California Environmental Protection Agency (Cal/EPA) and the United States Environmental Protection Agency (EPA).[3] California has also set standards for sulfate concentrations and atmospheric visibility.

The EPA and the California Air Resources Board (ARB) designate air basins, or specific areas within an air basin where ambient air quality standards are exceeded, as “nonattainment.” If standards are met, the area is designated as “attainment.” If there is inadequate or inconclusive data to make a definitive attainment designation, they are considered “unclassified.” National nonattainment areas are further designated as marginal, moderate, serious, severe, or extreme as a function of deviation from standards.

[3] The United States Environmental Protection Agency (EPA) has established National Ambient Air Quality Standards (NAAQS) for six of the most common air pollutants—carbon monoxide, lead, ground level ozone, particulate matter, nitrogen dioxide, and sulfur dioxide—known as “criteria” air pollutants (or simply “criteria pollutants”).

The Air Basin is classified as a nonattainment area for the State ozone and particulate matter standards and as nonattainment for federal ozone 8-hour and $PM_{2.5}$ 24-hour standards. This indicates that the BAAQMD has not achieved compliance with these State and federal standards in the Air Basin.

In addition to regulating criteria pollutants for attainment of State and federal standards, the ARB and BAAQMD regulate and control emissions of toxic air contaminants (TACs) to further protect human health. TACs are a class of pollutants that includes hundreds of chemicals hazardous to human health. Long-term exposure to TACs may cause more severe health effects, such as neurological damage, hormone disruption, developmental defects, and cancer. TAC emissions are highly localized and are emitted from mobile sources such as cars, trucks, and marine and rail sources as well as stationary and area sources. The ARB and BAAQMD addressed their emissions via mobile source strategies, stationary source permitting requirements, and health risk thresholds for new development under review in the CEQA process. The average cancer risk from TACs in the Bay Area has been reduced by 80 percent since 1990.[4] Diesel exhaust is the primary TAC contributor to health risk in the Bay Area.

For CEQA, the significance criteria established by the applicable air quality management district or air pollution control district may be relied upon to make the proposed project's significance impact determinations related to air quality from criteria pollutants and TACs.

Thresholds of Significance

The significance criteria established or recommended by the BAAQMD were used to make CEQA significance determinations related to the proposed project's impacts on air quality. The BAAQMD has adopted standards of significance for construction and operation. Table 1 shows the thresholds of significance. In developing the thresholds of significance for air pollutants, the BAAQMD considered the emission levels for which a project's individual emissions would be cumulatively considerable. If a project exceeds the identified significance thresholds, its emissions would be cumulatively considerable, resulting in significant adverse air quality impacts on the region's existing air quality conditions.

Table 1: BAAQMD Thresholds of Significance

Pollutant	Construction Thresholds Average Daily Emissions (pounds/day)	Operational Thresholds	
		Average Daily Emissions (pounds/day)	Average Daily Emissions (pounds/day)
Criteria Air Pollutants			
ROG	54	54	10
NO_X	54	54	10
PM_{10}	82 (exhaust)	82	15

Berkeley General Plan

The General Plan includes policies to avoid or minimize impacts resulting from planned development projects within the City of Berkeley. The following policies are specific to air quality and apply to the proposed project.

Policy EM-18 **Regional Air Quality Action.** Continue working with the Bay Area Air Quality Management District and other regional agencies to:

1) Improve air quality through pollution prevention methods.
2) Ensure enforcement of air emission standards.
3) Reduce local and regional traffic (the single largest source of air pollution in the City) and promote public transit.
4) Promote regional air pollution prevention plans for business and industry.
5) Promote strategies to reduce particulate pollution from residential fireplaces and wood-burning stoves.
6) Locate parking appropriately and provide adequate signage to reduce unnecessary "circling" and searching for parking.

Policy EM-19 **15 percent Emission Reduction: Global Warming Plan.** Make efforts to reduce local emissions by 15 percent by the year 2010. Continue to support and implement local emission reduction programs, such as the City of Berkeley Employee Fleet Bicycle Program, the Police Bicycle Program, and the actions recommended in the City of Berkeley Resource Conservation and Global Warming Abatement Plan.

Policy EM-21 **Alternative Fuels.** Work with the University of California, the Berkeley Unified School District, and other agencies to establish natural gas fueling and electric vehicle recharging stations accessible to the public.

Policy EM-22 **Public Awareness Increase.** Increase public awareness of air quality problems, rules, and solutions through use of City publications and networks. Action:

A. Work on a local and regional level to improve air quality for Berkeley residents and the region.

Policy T-19 **Air Quality Impacts.** Continue to encourage innovative technologies and programs such as clean-fuel, electric, and low-emission cars that reduce the air quality impacts of the automobile. (Also see Environmental Management Policies EM-18 through EM-22.)

Actions

A. Establish bicycle and low-emission vehicle preferred parking areas.
B. Install electric vehicle charging stations in all City-owned parking facilities Downtown and at major parking facilities and employment centers.
C. Where appropriate, install timed signals on major streets to allow traffic to move at a steady 25 miles an hour on major and collector streets, and a steady 15 or 20 miles an hour on neighborhood streets to minimize air quality impacts from "stop and go" traffic.

Policy T-29 **Infrastructure Improvements.** Facilitate mobility and the flow of traffic on major and collector streets (shown on the Vehicular Circulation Network map at the end of the Element), reduce the air quality impacts of congestion, improve pedestrian and bicycle access, and speed public transportation throughout the City by making improvements to the existing physical infrastructure.

Actions

A. Provide timely pavement maintenance and eliminate hazards on bicycle routes.
B. Designate or add transit-priority lanes or transit-only lanes.
C. Add or eliminate left turn lanes.
D. Establish commute period parking restrictions.
E. Regularly maintain pavement.
F. Improve freeway approaches and interchanges at Ashby Avenue (including removal of Potter Street ramp) and Gilman Street (to improve pedestrian and bicycle circulation to the waterfront and facilitate truck access to West Berkeley).
G. Complete the San Pablo Avenue Corridor Plan improvements designed in cooperation with the surrounding cities.
H. Time traffic signals on major transit corridors to give priority to and speed movement of transit vehicles.

City of Berkeley Standard Conditions of Approval

Approval and development of the proposed project would be subject to the City of Berkeley's Standard Conditions of Approval (COAs), pursuant to Municipal Code Section 23.406.040 and General Plan Policy EM-18, which requires that the BAAQMD emission standards be applied on all projects where the City is the Lead Agency under CEQA. In implementing Policy EM-18, the City has the following standard COAs relevant to air quality, which apply to all similar projects within the City and would apply to the proposed project. Unless otherwise discussed in this analysis, the proposed project will incorporate these Standard COAs.

Public Works—Apply BAAQMD-Recommended Measures During Construction

For all proposed projects, BAAQMD recommends implementing all the Basic Construction Mitigation Measures,[5] listed below to meet the Best Management Practices threshold for fugitive dust:

1. All exposed surfaces (e.g., parking areas, staging areas, soil piles, graded areas, and unpaved access roads) shall be watered two times per day.
2. All haul trucks transporting soil, sand, or other loose material off-site shall be covered.
3. All visible mud or dirt track-out onto adjacent public roads shall be removed using wet power vacuum street sweepers at least once per day. The use of dry power sweeping is prohibited.
4. All vehicle speeds on unpaved roads shall be limited to 15 miles per hour (mph).
5. All roadways, driveways, and sidewalks to be paved shall be completed as soon as possible. Building pads shall be laid as soon as possible after grading unless seeding or soil binders are used.

[5] Bay Area Air Quality Management District (BAAQMD) Basic Construction Mitigation Measures are considered standard construction measures and do not constitute any project-specific mitigation.

6. Idling times shall be minimized either by shutting equipment off when not in use or reducing the maximum idling time to 5 minutes (as required by the California Airborne Toxics Control Measure [ATCM] Title 13, Section 2485 of California Code of Regulations). Clear signage shall be provided for construction workers at all access points.
7. All construction equipment shall be maintained and properly tuned in accordance with manufacturer's specifications. All equipment shall be checked by a certified mechanic and determined to be running in proper condition prior to operation.
8. Post a publicly visible sign with the telephone number and person to contact at the City of Berkeley regarding dust complaints. This person shall respond and take corrective action within 48 hours. The BAAQMD's phone number shall also be visible to ensure compliance with applicable regulations.

Air Quality—Diesel Particulate Matter Controls During Construction

All off-road construction equipment used for projects with construction lasting more than 2 months shall comply with one of the following measures:

A. The project applicant shall prepare a Health Risk Assessment (HRA) that demonstrates the project's on-site emissions of diesel particulate matter during construction will not exceed health risk screening criteria after a screening-level HRA is conducted in accordance with current guidance from BAAQMD and Office of Environmental Health Hazard Assessment (OEHHA). The HRA shall be submitted to the Public Works Department for review and approval prior to the issuance of building permits.

B. All construction equipment shall be equipped with Tier 2 or higher engines and the most effective Verified Diesel Emission Control Strategies (VDECS) available for the engine type (Tier 4 engines automatically meet this requirement) as certified by the ARB. The equipment shall be properly maintained and tuned in accordance with manufacturer specifications.

C. In addition, a Construction Emissions Minimization Plan (Emissions Plan) shall be prepared that includes the following:
    1. An equipment inventory summarizing the type of off-road equipment required for each phase of construction, including the equipment manufacturer, equipment identification number, engine model year, engine certification (tier rating), horsepower, and engine serial number. For all VDECS, the equipment inventory shall also include the technology type, serial number, make, model, manufacturer, ARB verification number level, and installation date.
    2. A Certification Statement that the Contractor agrees to comply fully with the Emissions Plan and acknowledges that a significant violation of the Emissions Plan shall constitute a material breach of contract. The Emissions Plan shall be submitted to the Public Works Department for review and approval prior to the issuance of building permits.

Note: In accordance with this Standard COA, a construction HRA has been prepared and the findings are discussed in Impact AIR-3. The proposed project would use construction diesel equipment with Tier 4 engines, as specified in PDF AIR-1. As demonstrated in Table 6, the proposed project would result in less

than significant construction health risk impacts to nearby sensitive receptors. In addition, a Construction Emissions Minimization Plan would be prepared for the City's review and approval in accordance with this standard condition of approval.

Construction and Demolition Diversion

The project applicant shall divert debris according to proposed project's Construction Waste Management Plan and collect required documentation. The project applicant shall get construction debris receipts from sorting facilities in order to verify diversion requirements. Recycling and disposal receipts shall be uploaded if using Green Halo and submitted online for City review and approval prior to final inspection. Alternatively, the project applicant may complete the second page of the original Construction Waste Management Plan and present it, along with construction debris receipts, to the Building Inspector by the final inspection to demonstrate diversion rate compliance. The Zoning Officer may request summary reports at more frequent intervals, as necessary to ensure compliance with this requirement.

Low Carbon Concrete

The proposed project shall verify compliance with the Berkeley Green Code, located under Municipal Code Chapter 19.37, including the use of a concrete mix design with a cement reduction of at least 25 percent. Documentation on concrete mix design shall be available at all times at the construction site for review by City Staff.

AIR QUALITY EMISSIONS IMPACT ANALYSIS

According to CEQA Guidelines Appendix G, to determine whether impacts related to air quality are significant environmental effects, the following questions are analyzed and evaluated.

Impact AIR-1:	**Would the project conflict with or obstruct implementation of the applicable air quality plan?**

Less than significant impact. The project site is located in the San Francisco Bay Area Air Basin, where the BAAQMD regulates air quality. The EPA is responsible for identifying nonattainment and attainment areas for each criteria pollutant within the Air Basin. The Air Basin is designated nonattainment for State standards for 1-hour and 8-hour ozone, 24-hour respirable particulate matter (PM_{10}), annual PM_{10}, and annual fine particulate matter ($PM_{2.5}$).[6]

The BAAQMD has adopted several air quality policies and plans to address regional air quality standards, the most recent of which is the 2017 Clean Air Plan. The 2017 Clean Air Plan was adopted in April of 2017 and serves as the regional Air Quality Plan (AQP) for the Air Basin for attaining National Ambient Air Quality Standards (NAAQS). The primary goals of the 2017 Clean Air Plan are to protect public health and protect the climate. The 2017 Clean Air Plan acknowledges that the BAAQMD's two stated goals of

[6] Bay Area Air Quality Management District (BAAQMD). 2022. CEQA Air Quality Guidelines. April 20.

protection are closely related. As such, the 2017 Clean Air Plan identifies a wide range of control measures intended to decrease both criteria pollutants and greenhouse gas (GHG) emissions.[7]

The 2017 Clean Air Plan also accounts for projections of population growth provided by the Association of Bay Area Governments (ABAG) and Vehicle Miles Traveled (VMT) projections provided by the Metropolitan Transportation Commission (MTC) and identifies strategies to bring regional emissions into compliance with federal and State air quality standards. A project would be judged to conflict with or obstruct implementation of the 2017 Clean Air Plan if it would result in substantial new regional emissions not foreseen in the air quality planning process.

The BAAQMD does not provide a numerical threshold of significance for project-level consistency analysis with AQPs. Therefore, the following criteria will be used for determining a project's consistency with the AQP.

- **Criterion 1:** Does the project support the primary goals of the AQP?
- **Criterion 2:** Does the project include applicable control measures from the AQP?
- **Criterion 3:** Does the project disrupt or hinder the implementation of any AQP control measures?

Criterion 1

The primary goals of the 2017 Clean Air Plan, the current AQP to date, are to:

- Attain air quality standards;
- Reduce population exposure to unhealthy air and protect public health in the Bay Area; and
- Reduce GHG emissions and protect the climate.

A measure for determining whether the proposed project supports the primary goals of the AQP is if the proposed project would not result in an increase in the frequency or severity of existing air quality violations, cause or contribute to new violations, or delay timely attainment of air quality standards or the interim emission reductions specified in the air quality plans. This measure is determined by comparing project emissions to the significance thresholds identified by the BAAQMD for construction- and operation-related pollutants. These significance thresholds are applied in the evaluation of Impact AIR-2, below. As discussed under Impact AIR-2 and Impact AIR-3, the proposed project would not significantly contribute to cumulative nonattainment pollutant violations or expose sensitive receptors to substantial pollutant concentrations.

Fugitive dust control measures would be required to be implemented during the construction of the proposed project in order to reduce localized dust impacts. Impacts related to fugitive dust from the proposed project's construction would be potentially significant without the inclusion of sufficient dust control measures. City Standard COA "Public Works—Apply BAAQMD-Recommended Measures During

[7] A greenhouse gas (GHG) is any gaseous compound in the atmosphere that is capable of absorbing infrared radiation, thereby trapping and holding heat in the atmosphere. By increasing the heat in the atmosphere, greenhouse gases are responsible for the greenhouse effect, which ultimately leads to global warming.

Construction" requires the inclusion of Best Management Practices (BMPs) recommended by the BAAQMD to reduce potential impacts related to fugitive dust emissions from use of construction equipment.

Construction exhaust emissions can also result in potentially significant health risk impacts. To avoid this, the proposed project would be required to apply City Standard COA "Air Quality—Diesel Particulate Matter Controls During Construction," which would require the proposed project to prepare an HRA that demonstrates the proposed project's on-site construction-related diesel particulate matter (DPM) emissions will not exceed health risk screening criteria in accordance with current guidance from the BAAQMD and OEHHA, or require the proposed project to utilize construction equipment with Tier 2 or higher engines and the most effective VDECS available for the engine type. Per PDF AIR-1, the proposed project would use construction diesel equipment with Tier 4 engines, which have more stringent emissions requirements than Tier 2 and would satisfy this COA.

With the incorporation of the City standard COAs "Public Works—Apply BAAQMD-Recommended Measures During Construction" and PDF AIR-1, the proposed project would be consistent with Criterion 1.

Criterion 2

Another measure for determining whether a project is consistent with the AQP is to determine whether the project is inconsistent with the growth assumptions incorporated into the AQP and, thus, whether it would interfere with the region's ability to comply with federal and California air quality standards. The development of the AQP is based in part on the land use general plan determinations of the various cities and counties that constitute the Air Basin. The City's General Plan designates the project site as "Downtown," which allows for a residential density of 40 to 100 dwelling units per acre. The City's Zoning Ordinance zones the project site as Downtown Mixed-Use District "C-DMU." The C-DMU zoning district permits residential uses with a Use Permit.

As such, the proposed project falls within the land uses contemplated for development by the City. Considering this information, the proposed project would not directly or indirectly result in substantial unplanned population growth. Therefore, the overall development of the project site would generally be consistent with the growth assumptions incorporated into the Clean Air Plan.

The AQPs also assume adherence to all mandatory regulations to reduce air pollution. Therefore, to conform to the assumptions in the AQP, a project must be consistent with all applicable measures contained in the applicable AQP. The Clean Air Plan contains 85 control measures to reduce air pollutants and GHGs at the local, regional, and global levels. Along with the traditional stationary, area, mobile source, and transportation control measures, the Clean Air Plan contains several control measures designed to protect the climate, promote mixed-use, and compact development to reduce vehicle emissions and exposure to pollutants from stationary and mobile sources. The Clean Air Plan also includes an account of the implementation status of control measures identified in the 2010 Clean Air Plan.

Table 2 lists the Clean Air Plan policies relevant to the proposed project and evaluates the proposed project's consistency with the policies. As shown below, the proposed project would be consistent with applicable measures.

Table 2: Project Consistency with Applicable Clean Air Plan Control Measures

Control Measure	Project Consistency
Buildings Control Measures	
BL1: Green Buildings	**Consistent.** The proposed project would not conflict with the implementation of this measure. The proposed project would comply with the latest energy efficiency standards and incorporate applicable energy efficiency features designed to reduce project energy consumption. Furthermore, the proposed new residential building would be all electric and would not include natural gas plumbing.
BL2: Decarbonize Buildings	**Consistent.** The proposed new residential building would be all electric and would not include natural gas plumbing.
BL4: Urban Heat Island Mitigation	**Consistent.** The project site is currently developed with hardscape and structures. Therefore, the proposed project would not increase the urban heat island effect. The proposed project would incorporate landscaping, which would reduce the urban heat island effect.
Energy Control Measures	
EN1: Decarbonize Electricity Generation	**Consistent.** The proposed project would not conflict with the implementation of this measure. The proposed project would comply with the latest energy efficiency standards and incorporate applicable energy efficiency features designed to reduce project energy consumption. In addition, as a high-rise residential development, the proposed project would be required to comply with the standards contained in the 2022 California Building Standards Code (CBC), Title 24, Part 6, Subchapter 10, which includes rooftop solar panels. Furthermore, the proposed residential units would be all electric in design and would not include natural gas plumbing. The proposed project would be consistent with this measure.
EN2: Decrease Electricity Demand	**No conflict.** The proposed project would be required to conform to the energy efficiency requirements of the CBC, also known as Title 24, which was adopted to meet an Executive Order in the Green Building Initiative to improve the energy efficiency of buildings through aggressive standards. The 2022 Title 24 Standards are the current State building regulations, which went into effect on January 1, 2023. Proposed project buildings would be subject to the Title 24 Standards in effect at the time of building permit issuance. The proposed project would be all electric in design, consistent with the State's goal to phase out natural gas usage in new buildings. This would result in an increase in electricity use to replace natural gas usage. However, Senate Bill (SB) 100 requires that renewable energy and zero-carbon resources

Control Measure	Project Consistency
	supply 100 percent of electric retail sales by 2045, which means that the proposed project's electricity would come from increasingly renewable sources and entirely from renewable energy and zero-carbon resources by 2045. The proposed project's all electric design and SB 100's 100 percent renewable energy sources requirement would drastically reduce criteria pollutants from energy use, meeting the intent of this measure.
Natural and Working Lands Control Measures	
NW2: Urban Tree Planting	**Consistent.** The proposed project would provide trees along the frontage of the proposed project.
WA3: Green Waste Diversion	**Consistent.** The waste service provider for the proposed project will be required to meet the Assembly Bill (AB) 341, SB 939, and SB 1374 requirements that require waste service providers to divert green waste. All plant refuse generated during operations of the proposed project would be recycled off-site.
WA4: Recycling and Waste Reduction	**Consistent.** The waste service provider for the proposed project will be required to meet the AB 341, SB 939, and SB 1374 requirements that require waste to be recycled.
Stationary Control Measures	
SS36: Particulate Matter from Trackout	**Consistent.** Mud and dirt that may be tracked out onto the nearby public roads during construction activities shall be removed promptly by the Contractor based on the Bay Area Air Quality Management District's (BAAQMD's) requirements. City Standard COA "Public Works—Apply BAAQMD-Recommended Measures During Construction" requires the proposed project to implement Best Management Practices (BMPs) recommended by the BAAQMD for fugitive dust emissions during construction.
Transportation Control Measures	
TR9: Bicycle and Pedestrian Access and Facilities	**Consistent.** The proposed project would be directly accessible to sidewalks on University Avenue. The nearest bus stop is approximately 200 feet east of the site and serves five bus routes. In addition, the proposed project would be approximately 600 feet northwest of the Downtown Berkeley stop of the Bay Area Regional Transportation light rail system. The proposed project would also be located approximately 150 feet east of the Milvia Street, which is one of the bicycle boulevards that prioritize bicycle traveling and discourage cut-through vehicle traffic. In addition, the proposed project would provide 176 long-term and eight short-term bicycle parking spaces. Therefore, the proposed project would not conflict with and would be consistent with the BAAQMD's effort to encourage planning for bicycle and pedestrian facilities.
Source: Bay Area Air Quality Management District (BAAQMD). 2017. Final 2017 Clean Air Plan. April 19.	

In summary, the proposed project would not conflict with any applicable measures under the 2017 Clean Air Plan given the application of City Standard COA "Public Works—Apply BAAQMD-Recommended Measures During Construction"; therefore, the proposed project would be consistent with Criterion 2.

Criterion 3

The proposed project would not preclude extension of a transit line or bike path, propose excessive parking beyond parking requirements, or otherwise create an impediment or disruption to implementation of any AQP control measures. As shown in Table 2 above, the proposed project would incorporate several AQP control measures as project design features, such as utilizing asphalt which would be compliant with BAAQMD regulations, complying with energy efficiency standards contained in the 2022 CBC, and installing landscaping across the project site. Considering this information, the proposed project would not disrupt or hinder the implementation of any AQP control measures. The proposed project is therefore consistent with Criterion 3.

Summary

As discussed above, the proposed project would be consistent with all three criteria after incorporating the City's Standard COAs "Public Works—Apply BAAQMD-Recommended Measures During Construction" and PDF AIR-1. Thus, the proposed project would not conflict with the 2017 Clean Air Plan. Therefore, impacts associated with conflicting with or obstructing the 2017 Clean Air Plan would be less than significant.

Impact AIR-2:	**Would the project result in a cumulatively considerable net increase of any criteria pollutant for which the project region is nonattainment under an applicable federal or State ambient air quality standard?**

Less than significant impact. This impact is related to the cumulative effect of a project's criteria pollutant emissions. By its nature, air pollution is largely a cumulative impact resulting from emissions generated over a large geographic region. The nonattainment status of regional pollutants results from past and present development within the Air Basin, and this regional impact is a cumulative impact. Therefore, new development projects (such as the proposed project) within the Air Basin would contribute to this impact only on a cumulative basis. No single project would be sufficient in size, by itself, to result in nonattainment of regional air quality standards. Instead, a project's emissions may be individually limited, but cumulatively considerable when evaluated in combination with past, present, and future development projects.

Potential regional impacts could result in exceedances of State or federal standards for nitrogen oxide (NO_X), PM_{10} and $PM_{2.5}$, or CO. NO_X emissions are of concern because of potential health impacts from exposure to NO_X emissions during both construction and operation and as a precursor in the formation of airborne ozone. PM_{10} and $PM_{2.5}$ are of concern during construction because of the potential to emit exhaust emissions from the operation of off-road construction equipment and fugitive dust during earth-disturbing activities (construction fugitive dust). CO emissions are of concern during project operation

because operational CO hotspots are related to increases in on-road vehicle congestion and resulting health effects.

Reactive organic gas (ROG) emissions are also important because of their participation in the formation of ground level ozone. Ozone is a respiratory irritant and an oxidant that increases susceptibility to respiratory infections and that can cause substantial damage to vegetation and other materials. Elevated ozone concentrations result in reduced lung function, particularly during vigorous physical activity. This health problem is particularly acute in sensitive receptors such as the sick, elderly, and young children.

The cumulative analysis focuses on whether a specific project would result in cumulatively considerable emissions. According to Section 15064(h)(4) of the CEQA Guidelines, the existence of significant cumulative impacts caused by other projects alone does not constitute substantial evidence that the project's incremental effects would be cumulatively considerable. Rather, the determination of cumulative air quality impacts for construction and operational emissions is based on whether the proposed project would result in emissions that exceed the BAAQMD thresholds of significance for construction and operations on a project level. The thresholds of significance represent the allowable emissions each project can generate without resulting in a cumulatively considerable contribution to regional air quality impacts. Therefore, a project that would not exceed the BAAQMD thresholds of significance on the project level also would not be considered to result in a cumulatively considerable contribution to these regional air quality impacts. Construction and operational emissions are discussed separately below.

Construction Emissions

During construction, fugitive dust would principally be generated from demolition, site grading, and other earthmoving activities. The majority of fugitive dust would remain localized and would be deposited near the project site; however, the potential for impacts from fugitive dust exists. Exhaust emissions would also be generated from the operation of the off-road construction equipment and on-road construction vehicles.

Construction Fugitive Dust

PM_{10} and $PM_{2.5}$ (fugitive dust) is recognized to impact local communities. Construction-related activities, such as soil disturbance, grading, and material hauling can also result in fugitive dust emissions (e.g., $PM_{2.5}$ and PM_{10}). The BAAQMD does not have a numerical threshold for fugitive dust particulate matter emissions. Instead, the BAAQMD bases the determination of significance for fugitive dust on implementing effective control measures. In order for a project to have a less than significant criteria air pollutant impact related to construction-related fugitive dust emissions, it must implement all BAAQMD basic BMPs. The City applies BAAQMD BMPs as standard conditions to all projects, pursuant to General Plan Policy EM-18. These air pollution control measures shall be applied during construction activities as outlined in City Standard COA "Public Works—Apply BAAQMD-Recommended Measures During Construction." With the application of this condition, short-term construction fugitive dust impacts would be less than significant. In addition, the proposed project would comply with all applicable district rules, including Regulation 6, Rule 1 (General Requirements) and Regulation 6, Rule 6 (Prohibition of Trackout),

which require dust generating operations to limit particulate matter emissions. Therefore, project construction would have a less than significant impact with respect to fugitive dust.

Construction Air Pollutant Emissions: ROG, NO_X, Exhaust PM_{10}, and Exhaust $PM_{2.5}$

California Emissions Estimator Model (CalEEMod) Version 2022.1 was used to estimate the proposed project's construction emissions. CalEEMod provides a consistent platform for estimating construction and operational emissions from a wide variety of land use projects and is the model recommended by the BAAQMD for estimating project emissions. Estimated construction emissions are compared with the applicable thresholds of significance established by the BAAQMD to assess ROG, NO_X, exhaust PM_{10}, and exhaust $PM_{2.5}$ construction emissions to determine significance for this criterion.

For the purpose of this air quality analysis, construction of the proposed project is estimated to begin in March 26 with a 24-month duration, concluding in March 2028. Construction emissions would likely decrease if the construction schedule were deferred to later years because of improvements in technology and more stringent regulatory requirements. The duration of construction activity and associated equipment represents a reasonable approximation of the expected construction fleet as CEQA Guidelines require. The preliminary construction schedule is presented in Table 3.

Table 3: Preliminary Construction Schedule of Proposed Residential Use

Phase	Phase Start Date	Phase End Date	Working Days per Week	Total Number of Working Days
Demolition	3/2/2026	4/10/2026	5	30
Site Preparation and Grading	4/13/2026	4/24/2026	5	10
Earthwork and Foundations	4/27/2026	8/28/2026	5	90
Superstructure	8/31/2026	8/13/2027	5	250
Core + Interior Coating	4/26/2027	3/3/2028	5	225
Exterior Coating	10/4/2027	3/3/2028	5	110

The calculations of pollutant emissions from construction equipment account for the type of equipment, horsepower, and load factors of the equipment and the duration of equipment use. As discussed in greater detail in Impact AIR-3, the proposed project would be subject to City Standard COA "Air Quality–Diesel Particulate Matter Controls During Construction," which the proposed project would fulfill by using diesel equipment with Tier 4 engines. This only applies to diesel equipment; as stated in the project description, a large portion of the equipment list would be electric. This is included in the proposed project as PDF AIR-1.

Table 4 shows the estimated Air Pollutant emissions for the construction phase of the proposed project. As indicated in Table 4, construction emissions from all construction activities would be below the

recommended thresholds of significance; therefore, the proposed project's construction would have less than significant impact related to emissions of ROG, NO_X, exhaust PM_{10}, and exhaust $PM_{2.5}$.

Table 4: Construction Regional Pollutant Emissions

Parameter	Year	Air Pollutants (tons/year)

1. Calculated by dividing the pounds of emissions in 2026 by the number of nonoverlapping working days of construction in 2026 (219 workdays).
2. Calculated by dividing the pounds of emissions in 2027 by the number of nonoverlapping working days of construction in 2027 (261 workdays).
3. Calculated by dividing the pounds of emissions in 2028 by the number of nonoverlapping working days of construction in 2028 (45 workdays).
4. Calculated by dividing the total pounds of emissions by the total number of nonoverlapping working days of construction (525 workdays).

Source: California Emissions Estimator Model (CalEEMod) Output (see Attachment A).

In summary, the proposed project would not result in a cumulatively considerable net increase of any criteria pollutant during construction. Impacts would be less than significant.

Operational Emissions

Operational Air Pollutant Emissions: ROG, NO_X, PM_{10}, and $PM_{2.5}$

Operational emissions would include area, energy, mobile, and stationary sources. Area sources would include emissions from architectural coatings, consumer products, and landscape equipment. The new development and operations contemplated under the proposed project would be all electric in design, and the proposed project does not contemplate any substantial changes to the existing utility infrastructure in the Bancroft Hotel. Therefore, emissions from the combustion of natural gas are not applicable for the new residential portion of the proposed project.

Mobile sources include exhaust and road dust emissions from the vehicles that would travel to and from the project site. Traffic trip information is based on ITE Land Use 222–Multi-family High Rise (>10 floors and Close to Transit categories).

Regarding stationary sources, the proposed project would include the use of an emergency generator with a power rating above 50 horsepower. This analysis evaluates 50 hours of the emergency generator usage per BAAQMD Rule 9-8-330–Emergency Standby Engines, Hours of Operation. However, per applicant-provided information, this estimate is likely conservative and the actual annual usage hours would be lower (approximately 32 hours).

A detailed assessment of the criteria emissions estimated to occur due to existing operations are presented in Table 5. As shown in Table 5, the proposed project would not exceed any of the BAAQMD's thresholds of significance for regional daily operational emissions.

Table 5: Operational Regional Pollutant Emissions

Emissions Source	ROG	NO_X	PM_{10} Total	$PM_{2.5}$ Total
	Tons per Year			
Mobile	0.4921	0.3776	0.7657	0.1978
Area	0.9924	0.0119	0.0006	0.0005

Source: Attachment A.

Operational Carbon Monoxide Hotspot

The CO emissions from traffic generated by the proposed project are a concern at the local level because congested intersections can result in high localized concentrations of CO (referred to as a CO hotspot).

The BAAQMD screening criteria[8] were used to determine whether implementing the proposed project could result in local carbon monoxide emissions that exceed the thresholds of significance. If all the

[8] Bay Area Air Quality Management District (BAAQMD). 2022. CEQA Air Quality Guidelines. April 20.

following screening criteria are met, operation of the proposed project would result in a less than significant impact related to carbon monoxide:

- The project is consistent with an applicable congestion management program established by the county congestion management agency for designated roads or highways, the Regional Transportation Plan, and local congestion management agency plans.
- Project-generated traffic would not increase traffic volumes at affected intersections to more than 44,000 vehicles per hour.
- Project-generated traffic would not increase traffic volumes at affected intersections to more than 24,000 vehicles per hour where vertical and/or horizontal mixing is substantially limited (e.g., tunnel, parking garage, bridge underpass, natural or urban street canyon, below-grade roadway).

Consistency with an Applicable Congestion Management Program

In accordance with SB 743, transportation analysis under CEQA no longer uses delay-based metrics such as congestion to analyze project impacts. Instead, a project's VMT is analyzed. The City of Berkeley has VMT Screening criteria that exempts projects from the Transportation Impact Study requirement. The proposed project in a Transit Priority Area, meaning it is within 0.5 mile from rail stations or within 0.25 mile of bus stops with service every 15 minutes or less. In addition, the proposed project site is in an area where VMTs per resident is 15 percent below the average Bay Area resident. Given the proximity to public transit, Downtown Berkeley, and the UC Berkeley campus, and that the proposed project only includes limited parking (29 spaces), most of the building's future residents would choose alternative modes of transportation instead of vehicle travel. Therefore, the proposed project would have a less than significant VMT impact and would only contribute to a negligible amount of vehicular traffic.

Increase Traffic Volumes at Affected Intersections to No More Than 24,000 or 44,000 Vehicles Per Hour

According to the General Plan Transportation Element, the portion of University Avenue (east of Martin Luther King Jr. Way, which is immediately west of the project site) had an average daily trips (ADT) volume of 18,150 trips in 2000.[9] The hourly traffic volume would be a fraction of the 18,150 daily traffic trip volume. While no recent data is available, it can reasonably be expected that existing ADT on the portion of University Avenue in the project area are at least the same or slightly higher than in the year 2000. According to ITE Land Use 222–Multi-family High Rise (>10 floors and Close to Transit), the proposed project would generate less than four daily weekday trips and less than five daily weekends trips per dwelling unit. Given the low existing traffic volume and the proposed project's trip generation, the proposed project would not increase traffic volumes at affected intersections to more than 24,000 or 44,000 vehicles per hour.

[9] City of Berkeley General Plan. 2020. Environmental Management Element. Website: https://files.ceqanet.opr.ca.gov/261038-3/attachment/spYOcp5Ui-MVs3ZGdMQntFELot01DyjSpNiMI8oyvuOOaLQFR_b_y87v-MvLElFuf4OqokRiWqJuO83F0. Accessed January 23, 2025.

Increase Traffic Volumes Where Vertical and/or Horizontal Mixing Is Substantially Limited

CO hotspots can occur when a transportation facility's design or orientation prevents the adequate dispersion of CO emissions from vehicles, resulting in the accumulation of local CO concentrations. The design or orientation of a transportation facility that may prevent the dispersion of CO emissions include tunnels, parking garages, bridge underpasses, natural or urban canyons, below-grade roadways, or other features where vertical or horizontal atmospheric mixing is substantially limited. Adjacent roadways that would receive new vehicle trips generated by the proposed project do not include roadway segments where vertical or horizontal atmospheric mixing is substantially limited.

Therefore, based on the above criteria, the proposed project would not exceed the CO screening criteria and would have a less than significant impact related to CO.

In summary, the proposed project would have a less than significant construction and operation impact related to a cumulatively considerable net increase of any criteria pollutant.

Impact AIR-3:	**Would the project expose sensitive receptors to substantial pollutant concentrations?**

Less than significant impact. The BAAQMD defines a sensitive receptor as the following: "Facilities or land uses that include members of the population that are particularly sensitive to the effects of air pollutants, such as children, the elderly, and people with illnesses. Examples include schools, hospitals, and residential areas." In BAAQMD's 2022 CEQA Guidelines Appendix E: Recommended Methods for Screening and Modeling Local Risks, sensitive receptors have been expanded to include off-site workers and students. As specified by the BAAQMD, health risk and hazard impacts should be analyzed for sensitive receptors within a 1,000-foot radius of the project site.[10] The closest existing sensitive receptors to the project site include the following:

- Workers of the commercial uses immediately east and west of the project site;
- Residents at the residential uses immediately (approximately 30 feet) north of the project site and further east of the project site (approximately 120 feet); and
- Workers of the commercial uses south of University Avenue (approximately 75 feet).

The proposed project would result in a potentially significant impact on sensitive receptors if any of following criteria are met:

- **Criterion 1:** Construction and operation of the proposed project would result in cancer or non-cancer health risk levels of TACs and $PM_{2.5}$ concentrations that exceed the BAAQMD health risk significance thresholds.

[10] Bay Area Air Quality Management District (BAAQMD). 2022. CEQA Air Quality Guidelines. April 20.

- **Criterion 2:** The proposed project, in combination with existing sources of TAC and $PM_{2.5}$ emissions, would result in cancer or non-cancer health risk levels of TACs and $PM_{2.5}$ concentrations that exceed the cumulative BAAQMD health risk significance thresholds.
- **Criterion 3:** The proposed project would contribute to CO hot spots; those exposed to CO hotspots may have a greater likelihood of developing adverse health effects.

Criterion 1: Project Toxic Air Pollutants

Construction

An assessment was made of the potential health impacts on surrounding sensitive receptors resulting from TAC emissions during construction. The assessment is provided below, while Attachment A provides the detailed assumptions and modeling parameters.

DPM has been identified by the ARB as a carcinogenic substance. Major sources of DPM include off-road construction equipment, heavy-duty delivery and vendor trucks, and worker activities. For purposes of this analysis, DPM is represented as exhaust emissions of PM_{10}. $PM_{2.5}$ concentrations were calculated using the $PM_{2.5}$ emission rates using the dispersion modeling methods used for the PM_{10} and the HRA.

Estimation of Construction DPM Emissions

Construction DPM (represented as PM_{10} exhaust) and $PM_{2.5}$ emissions were estimated using CalEEMod, Version 2022.1, as described under Impact AIR-2. Construction was assumed to begin in March 2026 and conclude in March 2028. Project construction emissions were assumed to be distributed over the project site with a working schedule of 8 hours per day, 5 days per week. A large portion of the construction equipment would be electric. For diesel equipment, the proposed project would use equipment with Tier 4 engines and the analysis evaluates health risk impacts with the use of Tier 4 construction equipment (per PDF AIR-1).

Estimation of Cancer Risks

The BAAQMD has developed a set of guidelines for estimating cancer risks resulting from exposure to TACs.[11] Methodologies used in this analysis were followed in this analysis. The Hotspots Analysis and Reporting Program (HARP2) software was used to identify the cancer risk associated with DPM generated during construction activities. See Attachment A for specific input assumptions.

Estimation of Non-Cancer Chronic Hazards

An evaluation of the potential non-cancer effects of chronic chemical exposures was also conducted. Adverse health effects are evaluated by comparing the annual receptor concentration of each chemical compound with the appropriate reference exposure limit. Available reference exposure limits promulgated by OEHHA were considered in the assessment.

[11] Bay Area Air Quality Management District (BAAQMD). 2020. BAAQMD Health Risk Assessment Modeling Protocol. December.

Risk characterization for non-cancer health hazards from TACs is expressed as a hazard index (HI). The HI is a ratio of the predicted concentration of the proposed project's emissions to a concentration considered acceptable to public health professionals, termed the reference exposure limit. The HI assumes that chronic sub-threshold exposures adversely affect a specific organ or organ system (toxicological endpoint). For each discrete chemical exposure, target organs presented in regulatory guidance were used. Each chemical concentration or dose is divided by the appropriate toxicity reference exposure level to calculate the HI. For compounds affecting the same toxicological endpoint, this ratio is summed. Where the total equals or exceeds 1, a health hazard is presumed to exist. For purposes of this assessment, the TAC of concern is DPM, for which the OEHHA has defined a reference exposure limit of 5 micrograms per cubic meter ($\mu g/m^3$). The principal toxicological endpoint assumed in this assessment was through inhalation.

The area surrounding the project site contains a mix of high-density residential uses, commercial uses, and public uses within 1,000 feet of the proposed project boundary. See the Location of Maximum Exposed Receptor map within Attachment A for a depiction of receptors within the 1,000-foot buffer area and the location of the Maximally Exposed Individual Resident (MEIR). The estimated health and hazard impacts at the MEIR and Maximally Exposed Individual Worker (MEIW) are presented in Table 6, below. All other receptors would experience risks less than the MEIR that would decrease with increasing distance from the project site.

Project Operational Toxic Air Pollutants

Traffic generated by the proposed project would consist of mostly light-duty gasoline-powered vehicles, which are not a significant source of TAC and air pollutant emissions. However, the proposed project includes a new, on-site emergency generator in the proposed new residential building, which is a stationary operational emissions source of TACs during its operation. Since this proposed generator would be a standby emergency generator, its operation would be limited to testing and emergency hours and as such are not expected to be a significant source of TAC emissions to the surroundings. However, following BAAQMD Rule 9-8-330–Emergency Standby Engines, Hours of Operation, the proposed emergency generator would likely not exceed 50 hours of emergency operation per year. In addition, as a permitted source, the project applicant would be required to demonstrate operational emissions compliance with BAAQMD standards through a separately issued Engine Permit prior to operations per Rule 5-2 New Source Review for Toxics. In addition, the intermittent and infrequent use of the emergency generator would ensure that it would not generate a significant amount of localized TAC emissions over time.

Nonetheless, the California Air Pollution Control Officers Association (CAPCOA) Diesel Internal Combustion Engine (DICE) Risk Tool was used to perform a Screening Risk Assessment for operational emissions associated with the emergency generator for the proposed project. The DICE risk tool was designed to assist local Air Pollution Control Districts and Air Quality Management Districts in California with performing screening HRAs for toxic emissions from diesel internal combustion engines. This tool provides a user-friendly interface for entering project, engine, building, and receptor information, and it calculates potential health risks following the guidelines set by the ARB. Additionally, the tool ensures

consistency with the methodologies and procedures outlined in the OEHHA 2015 Air Toxic Hot Spots Program Guidance Manual and district HRA protocols. Users can perform customized HRAs based on specific project details and local conditions, and the tool generates detailed reports that include risk assessment results and supporting data. This alignment with OEHHA, BAAQMD, the CAPCOA, and ARB protocols helps ensure compliance with air quality regulations and protects public health by accurately assessing the impact of diesel engine emissions.

CalEEMod estimates of DPM (PM exhaust) and $PM_{2.5}$ emissions for a 300-horsepower generator are 3.62 pounds/year (Attachment A). Since the diesel generator is the single source of operational emissions of fine particulate exhaust; PM_{10}, $PM_{2.5,}$ and DPM emissions and concentrations are one-and-the-same.

The modeling results are shown in Table 6 below. Modeling parameters and output can be found in Attachment A.

Results

Table 6 summarizes the cancer risk and chronic HI results for project construction and operation at the MEIW and MEIR, which are a hotel use located approximately 45 feet east of the site and a multi-family 3-story building 120 feet east of the site, both on University Avenue. As shown in Table 6, the resultant cancer risk and chronic hazards from DPM and maximum annual $PM_{2.5}$ are below the BAAQMD thresholds of significance.

Table 6: Estimated Cancer Risks and Chronic Non-Cancer Hazards

	Cancer Risk Scenario[1]	Cancer Risk (risk per million)	Chronic Non-Cancer Hazard Index	Acute Non-Cancer Hazard Index	Maximum Annual $PM_{2.5}$ ($\mu g/m^3$)
Maximum Exposed Individual Resident[1]	Project Construction	5.24	<0.01	—	0.060
	Project Operation (Emergency Generator)	2.5	0.01	—	0.003
	Overall Project Risks to MEIR	**7.74**	**0.01**	**—**	**0.06**
Maximally Exposed Individual Worker[2]	Project Construction	0.53	<0.01	—	0.084
	Project Operation (Emergency Generator)	0.2	0.01	—	0.003
	Overall Project Risks to MEIW	**0.73**	**0.01**	**—**	**0.084**
Thresholds of Significance		**10**	**1**	**1**	**0.3**
Exceeds Individual Source Threshold?		**No**	**No**	**No**	**No**

Cancer Risk Scenario[1]	Cancer Risk (risk per million)	Chronic Non-Cancer Hazard Index	Acute Non-Cancer Hazard Index	Maximum Annual $PM_{2.5}$ ($\mu g/m^3$)

Notes:
$\mu g/m^3$ = micrograms per cubic meter
MEIR = Maximally Exposed Individual Resident
MEIW = Maximally Exposed Individual Worker
$PM_{2.5}$ = particulate matter less than 2.5 microns in diameter

1 The MEIR was found to be a 3-story multi-family residence receptor at 564279 UTM E and 4191894 UTM N, 40 meters east of the project site, on University Avenue.

2 The MEIW was found to be at the University Hotel at 564248 UTM E and 4191889 UTM N, 15 meters east of the project site, on University Avenue.

The project construction cancer risk, chronic non-cancer hazard, and PM2.5 concentration estimates reflect implementation of PDF AIR-1. For equipment that would be diesel powered, the proposed project would use equipment fitted with Tier 4 engine and the analysis evaluates health risk impacts with the use of Tier 4 construction equipment.

Risk was evaluated for Diesel Exhaust Particulate Matter which does not have an established Acute Reference Exposure Level Emissions

Both the MEIR and MEIW risks are based on the maximum residential and worker risk values to be conservative and account for variation and generator placement within the site.

Source: Attachment A.
Thresholds Source: Bay Area Air Quality Management District (BAAQMD). 2022. CEQA Air Quality Guidelines. April 20.

Therefore, construction and operation of the proposed project would not result in significant health impacts to nearby sensitive receptors.

Criterion 2: Cumulative Health Risk Assessment

The BAAQMD recommends assessing the potential cumulative impacts from sources of TACs within 1,000 feet of a proposed project. As a result, a cumulative HRA was performed that examined the cumulative impacts of the proposed project's construction and operation emissions and sources of TAC emissions within 1,000 feet of the proposed project. As previously discussed, the MEIR was determined to be a receptor at 120 feet east of the project site on University Avenue. As shown in Table 6, the MEIR would experience higher health risks than the MEIW. Therefore, the cumulative health impacts were estimated for the MEIR.

For a project-level analysis, the BAAQMD provides several tools for use in screening potential sources of TACs. This includes the Stationary Source Screening Map,[12] which provides all the stationary sources permitted by the Air District with risk and hazard estimates; Roadway Screening Data Layers providing estimated cancer risks, hazards, and $PM_{2.5}$ concentrations for all Bay Area highways and surface streets;

[12] Bay Area Air Quality Management District (BAAQMD). 2024. Stationary Source Screening Map. Website: https://baaqmd.maps.arcgis.com/apps/webappviewer/index.html?id=845658c19eae4594b9f4b805fb9d89a3. Accessed October 18, 2024.

and Rail and Railyard Screening Data Layers providing estimated cancer risks, hazards, and $PM_{2.5}$ concentrations from diesel locomotives and select railyards. The BAAQMD risk and hazard values for the permitted stationary sources are based on concentrations at the sources' centroid and are subsequently adjusted for distance from MEIR using the district's published decay factors.

The cumulative health risk results during project construction and operation, including health risks from the existing stationary sources, roadway, and rail data from the BAAQMD sources above, are summarized in Table 7. No rail sources were identified within 1,000 feet of the project site and the BAAQMD Railyard Screening Layers had no data for rail sources at the site. Outputs from the BAAQMD screening tools are documented in Attachment A, with the HRA results.

Table 7: Summary of the Cumulative Health Impacts at the MEIR

Source	Source Name/Type	Cancer Risk (per million)	Chronic Hazard Index	Maximum Annual $PM_{2.5}$ Concentration ($\mu g/m^3$)
Proposed Project	Diesel Equipment	7.74	0.01	0.06
Stationary Sources				
19070	Golden Bear Center–Generator	0.105	0.0000	0.000
21118	City of Berkeley Fire Station #2–Generator	0.68	0.000	0.000
17864	Peralta Community College District–Generator	1.66	0.017	0.000

59-118	UC Berkeley–Generator	0.28	0.000	0.001
59-63	UC Berkeley–Generator	0.36	0.000	0.001
Existing Roadways				
Existing Roadways		43.16	0.13	0.81
Cumulative Health Risks with Project				
Cumulative Total with Project		57.71	0.18	0.87
BAAQMD Cumulative Thresholds of Significance		**100**	**10**	**0.8**
Threshold Exceedance?		**No**	**No**	**Yes**

Source	Source Name/Type	Cancer Risk (per million)	Chronic Hazard Index	Maximum Annual $PM_{2.5}$ Concentration ($\mu g/m^3$)

Notes:
BAAQMD = Bay Area Air Quality Management District
$PM_{2.5}$ = particulate matter less than 2.5 microns in diameter
$\mu g/m^3$ = micrograms per cubic meter
BAAQMD = Bay Area Air Quality Management District
MEIR = Maximally Exposed Individual Receptor
TAC = toxic air contaminant

Project and stationary source risks and hazards are for diesel exhaust, which does not have an established Acute Reference Exposure Level.

Risks and Hazards have been adjusted using BAAQMD Decay factors considering the distance from the stationary source to the MEIR.

Source: Attachment A

As noted in Table 7, the cumulative impacts at the MEIR would exceed the BAAQMD's cumulative thresholds of significance for annual $PM_{2.5}$ concentrations with and without contributions from the proposed project. Although there is an existing cumulative impact, a project's contribution to a significant cumulative impact can be less than a cumulatively considerable contribution (it is less than 8 percent of the resulting $PM_{2.5}$ annual concentration of 0.87 $\mu g/m^3$) and thus not significant. The proposed project does not exceed the BAAQMD's single source threshold for $PM_{2.5}$ of 0.3 $\mu g/m^3$ or cancer risk of 10 in a million (see Table 6).

By using Tier 4 construction equipment (PDF AIR-1), the proposed project would implement its fair share of minimization measures. Therefore, the proposed project's health risk impacts related to $PM_{2.5}$ concentration are not considered cumulatively considerable. Therefore, the proposed project, along with cumulative sources of TAC emissions within 1,000 feet, would be below the BAAQMD's cumulative thresholds of significance and would not be cumulatively considerable or result in a significant impact.

Criterion 3: CO Hotspot

As discussed under Impact AIR-2, the proposed project's operational CO hotspot impact would be less than significant.

Summary

As discussed above, the proposed project would be consistent with all three criteria after incorporating the City Standard COAs "Public Works—Apply BAAQMD-Recommended Measures During Construction" and PDF AIR-1. In summary, the proposed project would not expose sensitive receptors to substantial pollutant concentrations during construction or operation. Impacts would be less than significant.

Impact AIR-4: Would the project result in other emissions (such as those leading to odors) adversely affecting a substantial number of people?

Less than significant impact. The ability to detect odors varies considerably among the populations and is subjective. The BAAQMD does not have a recommended odor threshold for construction activities. However, the BAAQMD recommends operational screening criteria based on the distance between receptors and types of sources known to generate odors.

Project construction would generate diesel exhaust and ROGs; however, these emissions would disperse rapidly from the project site and therefore would not create significant odors affecting a substantial number of people. As such, construction odor impacts would be less than significant.

Land uses typically associated with objectionable odors include wastewater treatments plants, compost facilities, landfills, solid waste transfer stations, fiberglass manufacturing facilities, paint/coating operations (e.g., auto body shops), dairy farms, petroleum refineries, asphalt batch plants, chemical manufacturing, and food manufacturing facilities, as shown in Table 8.[13]

Table 8: BAAQMD Odor Screening-level Distances Thresholds

Land Use/Type of Operation	Project Screening Distance
Wastewater Treatment Plant	2 miles
Wastewater Pumping Facilities	1 mile
Sanitary Landfill	2 miles
Transfer Station	1 mile
Composting Facility	1 mile
Petroleum Refinery	2 miles
Asphalt Batch Plant	2 miles
Chemical Manufacturing	2 miles
Fiberglass Manufacturing	1 mile
Painting/Coating Operations	1 mile
Rendering Plant	2 miles
Coffee Roaster	1 mile
Food Processing Facility	1 mile
Confined Animal Facility/Feed Lot/Dairy	1 mile
Green Waste and Recycling Operations	1 mile
Metal Smelting Plants	2 miles

[13] Bay Area Air Quality Management District (BAAQMD). 2022. BAAQMD CEQA Guidelines, Chapter 5 Project-level Air Quality Impacts, Table 5-4, Odor Screening Distances. April 20.

The proposed project would involve the development of residences whose operations could lead to odors from associated laundry cleaning, vehicle exhaust, outdoor cooking, and waste disposal. However, such odors generated by project operation would be small in quantity and duration and would not pose an objectionable odor impact to future and existing receptors.

The proposed project would also generate diesel exhaust associated with the operation of the emergency generator. However, operation of this generator would be infrequent, and odors associated with this emission would disperse rapidly from the project site and therefore would not create significant odors affecting a substantial number of people. As such, operational odor impacts would be less than significant.

Recommended Measures

Mitigation Measures

None required.

CONCLUSION

Based on the project analysis described above, the proposed project would result in less than significant impacts under CEQA related to air quality. In conclusion, the proposed project at 2029 University Avenue remains eligible for the Class 32 Categorical Exemption with respect to short-term (construction) and long-term (operational) air quality impacts.

Thank you for the opportunity to conduct an air quality impacts analysis. Please feel free to contact Phil Ault (559.930.6191 or pault@fcs-intl.com) should you have any questions.

Sincerely,

Philip Ault, Director of Noise and Air Quality
FirstCarbon Solutions
2999 Oak Road, Suite 250

Earthwork & Foundations	0.00	5,460	78.8	0.00	—

5.6.2. Construction Earthmoving Control Strategies

Control Strategies Applied	Frequency (per day)	PM10 Reduction	PM2.5 Reduction
Water Exposed Area	2	61%	61%
Water Demolished Area	2	36%	36%

5.7. Construction Paving

Land Use	Area Paved (acres)	% Asphalt
Apartments High Rise	—	0%
Enclosed Parking with Elevator	0.00	100%

5.8. Construction Electricity Consumption and Emissions Factors

kWh per Year and Emission Factor (lb/MWh)

Year	kWh per Year	CO2	CH4	N2O
2026	1,121	204	0.03	< 0.005
2027	1,485	204	0.03	< 0.005
2028	835	204	0.03	< 0.005

5.9. Operational Mobile Sources

5.9.1. Unmitigated

Land Use Type	Trips/Weekday	Trips/Saturday	Trips/Sunday	Trips/Year	VMT/Weekday	VMT/Saturday	VMT/Sunday	VMT/Year
Apartments High Rise	950	1,138	1,073	363,039	5,804	6,947	6,552	2,217,107
Enclosed Parking with Elevator	0.00	0.00	0.00	0.00	0.00	0.00	0.00	0.00

5.10. Operational Area Sources

5.10.1. Hearths

5.10.1.1. Unmitigated

Hearth Type	Unmitigated (number)
Apartments High Rise	—
Wood Fireplaces	0
Gas Fireplaces	0
Propane Fireplaces	0
Electric Fireplaces	0
No Fireplaces	240
Conventional Wood Stoves	0
Catalytic Wood Stoves	0
Non-Catalytic Wood Stoves	0
Pellet Wood Stoves	0

5.10.2. Architectural Coatings

Residential Interior Area Coated (sq ft)	Residential Exterior Area Coated (sq ft)	Non-Residential Interior Area Coated (sq ft)	Non-Residential Exterior Area Coated (sq ft)	Parking Area Coated (sq ft)
386775	128,925	0.00	0.00	—

5.10.3. Landscape Equipment

Season	Unit	Value
Snow Days	day/yr	0.00
Summer Days	day/yr	180

5.11. Operational Energy Consumption

5.11.1. Unmitigated

Electricity (kWh/yr) and CO2 and CH4 and N2O and Natural Gas (kBTU/yr)

Land Use	Electricity (kWh/yr)	CO2	CH4	N2O	Natural Gas (kBTU/yr)
Apartments High Rise	1,414,668	204	0.0330	0.0040	0.00
Enclosed Parking with Elevator	29,531	204	0.0330	0.0040	0.00

5.12. Operational Water and Wastewater Consumption

5.12.1. Unmitigated

Land Use	Indoor Water (gal/year)	Outdoor Water (gal/year)
Apartments High Rise	8,522,604	6,943
Enclosed Parking with Elevator	0.00	0.00

5.13. Operational Waste Generation

5.13.1. Unmitigated

Land Use	Waste (ton/year)	Cogeneration (kWh/year)
Apartments High Rise	178	—
Enclosed Parking with Elevator	0.00	—

5.14. Operational Refrigeration and Air Conditioning Equipment

5.14.1. Unmitigated

Land Use Type	Equipment Type	Refrigerant	GWP	Quantity (kg)	Operations Leak Rate	Service Leak Rate	Times Serviced
Apartments High Rise	Average room A/C & Other residential A/C and heat pumps	R-410A	2,088	< 0.005	2.50	2.50	10.0
Apartments High Rise	Household refrigerators and/or freezers	R-134a	1,430	0.12	0.60	0.00	1.00

5.16. Stationary Sources

5.16.1. Emergency Generators and Fire Pumps

Equipment Type	Fuel Type	Number per Day	Hours per Day	Hours per Year	Horsepower	Load Factor
Emergency Generator	Diesel	1.00	2.00	50.0	300	0.73

5.16.2. Process Boilers

Equipment Type	Fuel Type	Number	Boiler Rating (MMBtu/hr)	Daily Heat Input (MMBtu/day)	Annual Heat Input (MMBtu/yr)

5.17. User Defined

Equipment Type	Fuel Type

8. User Changes to Default Data

Screen	Justification
Characteristics: Utility Information	Utility Provider for Berkeley

Land Use	Site Plans for Most Intensive Proposed Use (Apartment Building) 2nd floor ground level parking 8 ksf total bldg area = 191 ksf
Construction: Construction Phases	Applicant Provided Schedule
Construction: Off-Road Equipment	Schedule and Equipment - Defaults and Applicant Provided
Operations: Energy Use	Calculational Method is from Measure E-15 of the CAPCOA Handbook for Analyzing Greenhouse Gas Emission Reductions, Assessing Climate Vulnerabilities, and Advancing Health and Equity. Additional electricity added to replace NG end uses for All-Electric Design
Operations: Vehicle Data	ITE Land Use 222 - Multifamily High Rise (>10 floors), Close to Transit
Operations: Hearths	No natural gas fireplaces or wood stoves
Operations: Generators + Pumps EF	PM10E and PM2.5 Emission factors adjusted to account for Level 3 VDECs (85% control of 0.15 g/bhp-hr EF). Tier 4 generator, if installed, would have lower emissions.
Construction: Dust From Material Movement	Applicant Provided
Construction: Architectural Coatings	Surface Area for Painting = 2.7 times the building square footage for residential land uses. 191,000 x 2.7 = 515,700 sqft 75% for interior surfaces = 386,775 sq ft 25% for exterior shell = 128,925 sq ft

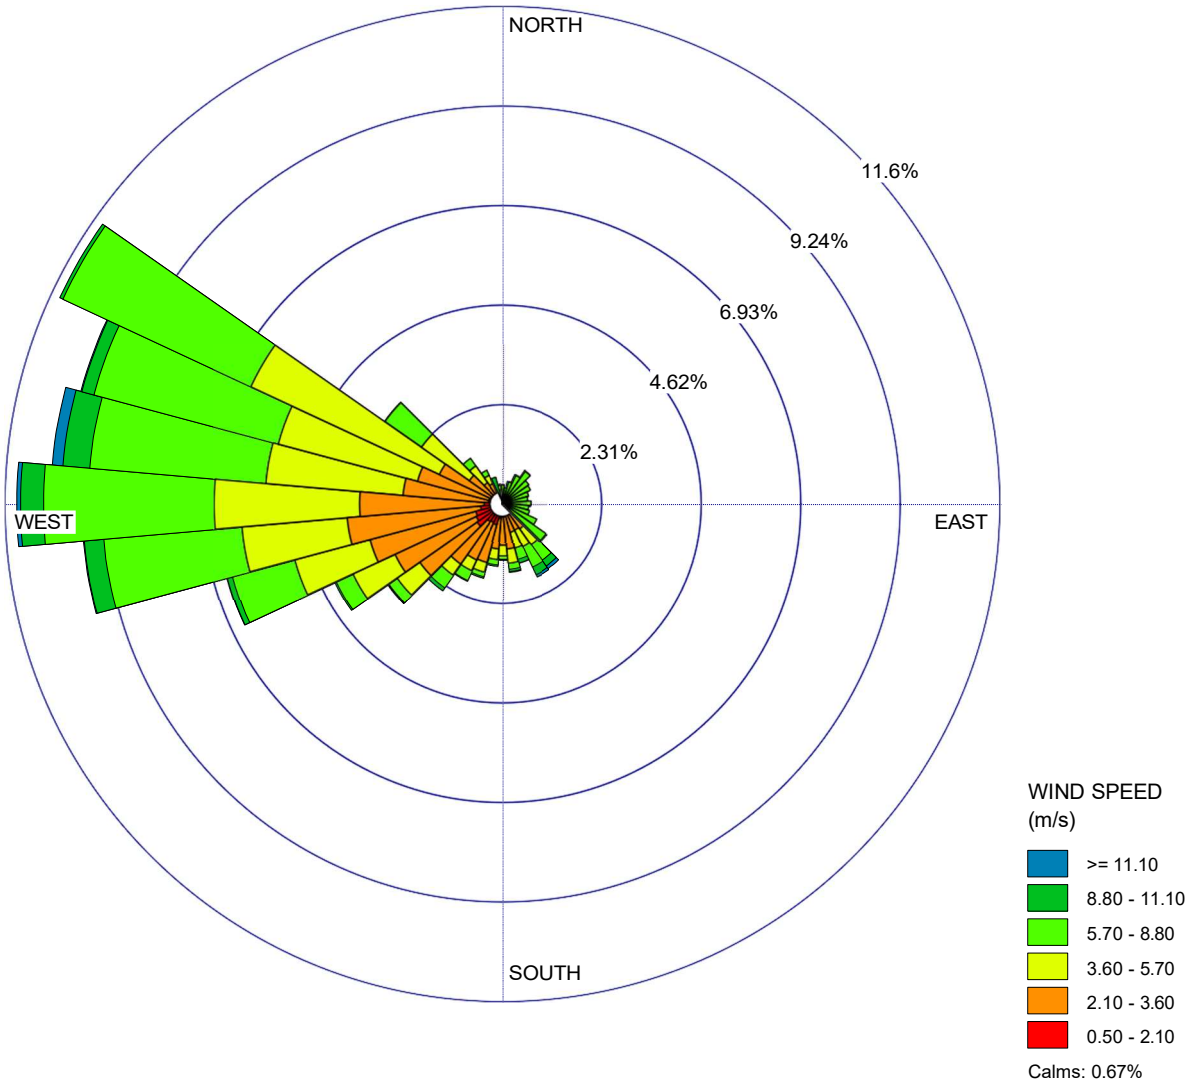
Wind Direction during Construction Hours

DISPLAY:
Wind Speed
Direction (blowing from)



COMMENTS:

Wind Rose is generated just for the hours with emissions when construction would occur or from 8 AM – 5 PM. This corresponds to the modeling hours in AERMOD.

DATA PERIOD:

Start Date: 1/1/2013 - 08:00
End Date: 12/31/2017 - 17:00

CALM WINDS:

0.67%

AVG. WIND SPEED:

4.55 m/s

How to Read a Wind Rose Diagram

The wind rose above shows the general wind direction and speed for the meteorological data set used in the AERMOD modeling for the project.'

The circular format of the wind rose shows the direction the winds blew from and the length of each "spoke" around the circle shows how often the wind blew from that direction.

CONSTRUCTION HEALTH RISK ASSESSMENT CALCULATIONS

2029 University Avenue Project

The HRA was conducted utilizing the CARB's Hot Spots Analysis and Reporting Program Version 2 (HARP2) to automatically calculate risks for the projects using OEHHA promulgated cancer potency and reference exposure levels. (HARP2) is the recommended model for calculating and presenting HRA results because it follows the district's risk assessment guidance methodology and is consistent with the Air District's Regulation 2-5. Since AERMOD was run with project emission rates to directly calculate potential DPM and PM2.5 concentrations, the Health Risk Assessment Standalone Tool (RAST) version of HARP2 was used.

The HRA follows BAAQMD CEQA Guidelines based on OEHHA Guidance. This risk assessment intake methodology addresses children's greater sensitivity and health impacts from early exposure to carcinogenic compounds. The chemical intake or dose describing the frequency and duration of the exposure is estimated using receptor's breathing rates, exposure duration, and exposure frequency. The calculations include the use of age-specific weighting factors, breathing rates, fraction of time at home, and reduced exposure durations.

These factors are described below, followed by a summary of the HARP2 HRA inputs and cancer and noncancer risk results for selected for each receptor group (i.e., resident, off-site worker, and student).

AERMOD Inputs — The AMS/EPA Regulatory Model (AERMOD) was utilized to predict the ground level concentrations resulting from the emissions of Diesel Particulate Matter (DPM) (represented as PM10 exhaust) and total PM2.5 from associated with construction activities. The modeling utilized Urban dispersion coefficients and BAAQMD-provided meteorological data from the Oakland Airport meteorological station (KOAK) from 2013 – 2017. The modeling included both emissions generated at the project site and those generated along the anticipated haul roads within approximately 1,000 ft of the site boundary. Diesel particulate emissions are characterized by an area source with a height of 5 meters to account for the height of the construction exhaust from the off-road equipment. Roadway emissions were modeled as line-volume sources or adjacent volume sources. PM2.5 emissions were modeled similarly, per BAAQMD guidance which permits PM2.5 Dust to be modeled along with PM2.5 Exhaust.

Emissions were modeled only during the hours of 8 AM – 5 PM (with a one-hour break for lunch) Monday to Friday. DPM Emission rates were obtained from CalEEMod using emissions from PM10 exhaust from diesel vehicles and off-road construction equipment exhaust. PM2.5 emissions were calculated for the maximum annual period (first year of construction) and includes PM2.5 from off-road construction equipment exhaust, material handling as well as on-road exhaust, brake and tire wear, and re-entrained road dust.

Age Sensitivity Factors – Studies have shown that young animals are more sensitive than adult animals to exposure to many carcinogens (OEHHA, 2009)[1]. Therefore, OEHHA developed age sensitivity factors (ASFs) to account for the increased sensitivity to carcinogens during early-in-life exposures. Accordingly, the cancer risk methodology applies different ASFs by age groups. The ASFs utilized a 10-fold multiplier in sensitivity for the third trimester and infants less than age 2, a 3-fold increase in sensitivity for children ages 2 to 16 years old, and a sensitivity factor of 1 for ages 16 and older.

Daily breathing rates (age-specific daily air intake) – For residential receptors, the HRA utilizes the 95th percentile breathing rates for the most sensitive age groups (less than 2 years of age) and 80th percentile for all other age groups. This approach jointly developed by ARB and CAPCOA[2] and adopted by BAAQMD[3] is referred to as the "Risk Management Policy" and was developed to consider the new science in risk assessment while providing a reasonable estimate of potential cancer risk for risk management decisions. and used in this HRA. The HRA uses 95th percentile 8-hour breathing rates for moderate intensity activities for worker and student exposure.[4]

Time at home – The time at home applies only applies to residential receptors. Residents are assumed to be at home 350 days per year, which assumes individuals are away for approximately 2 weeks of vacation. The fraction of time at home refers to the estimated amount of time residents stay at home during these 350 days. The HRA uses the OEHHA and BAAQMD recommended values of 73% time at home for 16-year-olds and above based on based on population and activity statistics. The HRA also assumes 100 percent time at home for receptors under age 16 to address exposures at local schools close to emitting sources. Even though infants and children may not be at their residence all the time, they are likely to remain in the neighborhood (at schools or neighbors) and would be exposed to similar levels of the pollutants.

Exposure Duration - OEHHA 2015 guidelines specify a 30-year residential exposure duration for estimating cancer risk at the maximum exposed individual resident (MEIR). This is based on studies showing that 30 years is a reasonable estimate of the 90th to 95th percentile of residency duration in the population. A 25-year standard exposure duration is the default to estimate cancer risk for off-site workers. However, risk assessors can use other exposure durations with proper justification and documentation. For example, short-term projects (e.g., construction projects) can now be evaluated for as short a duration as 6 months. The risks for the proposed project were assessed for the construction period from March 2026 to March 2028 over a construction schedule of 525 working days or 2 years.

Residential Cancer Risk

Cancer risk for individual resident receptors exposed to "Diesel Particulate Exhaust" (DPM) were calculated utilizing the "Risk Management Policy" option for inhalation, specifying that residents spend 100% time at home for ages less than 16 years old. Consistent with OEHHA guidance, the start of residential exposure was assumed to occur in the third trimester (-0.25 years) to accommodate the increased susceptibility of exposures in early life. As per OHEHHA and BAAQMD guidelines, the residential exposure starts with the unborn child at the third trimester or –0.25 years (when construction begins) and continues until the child is 1.75 years of age. Because there are no significant sources of TAC emissions during operations, the exposure assessment is limited to the 2-year project construction period.

Worker Cancer Risk

Cancer risk and the chronic hazard index were calculated for off-site workers based on the DPM concentration at identified off-site receptors. 8-hour breathing rates for moderate intensity activities of 230 L/kg-8 hrs (applicable to 16–70-year adults) were used to calculate the daily dose via the inhalation route to the worker. The analysis assumes a start age of 16 years and an exposure duration of 2 years.

Since the construction emissions were modeled as a non-continuous source, the worker adjustment factor was used to adjust for the proper exposure concentration. The worker adjustment factor (WAF) is used to determine the long-term concentration the worker is breathing during their work shift. Therefore, the long-term concentration is adjusted so it is based only on the hours when the worker is present. For this project, assuming the emitting source and worker's schedules are the same, the adjustment factor is 4.2 = (24 hours per day/8 hours per shift) x (7 days in a week/5 days in a work week).

Noncancer Chronic Health Risks

Chronic RELs are used to assess not only residential health impacts, but also worker health impacts.

Potential chronic noncancer health impacts use the long-term annual average concentration regardless of the emitting facility's schedule. As per OEHHA guidance, no adjustment factors were used to adjust this concentration for workers

HARP2 Inputs and Results

HARP2 Output files are included to document the HRA exposure parameters and risk results.

HARP2 inputs and results are included for the following receptor/exposure scenarios:

- Residential Cancer Risk – MEIR
- Non-Cancer Chronic Risk – MEIR
- Worker Cancer Risk – MEIW
- Worker Non-Cancer Chronic Risk - MEIW

HARP2 - HRACalc (dated 22118) 1/15/2025 9:47:32 AM - Output Log

HARP2 - HRACalc (dated 22118) 1/15/2025 9:50:39 AM - Output Log

GLCs loaded successfully
Pollutants loaded successfully
****
RISK SCENARIO SETTINGS

Receptor Type: Worker
Scenario: NCChronic
Calculation Method: Derived

****
EXPOSURE DURATION PARAMETERS FOR CANCER
Exposure duration are only adjusted for cancer assessments

****
PATHWAYS ENABLED

NOTE: Inhalation is always enabled and used for all assessments. The remaining pathways are only used for cancer and noncancer chronic assessments.

Inhalation: True
Soil: False
Dermal: False
Mother's milk: False
Water: False
Fish: False
Homegrown crops: False
Beef: False
Dairy: False
Pig: False
Chicken: False
Egg: False

****
INHALATION

Daily breathing rate: Moderate8HR

Worker Adjustment Factors
NOTE: The worker adjustment factors below are only used for cancer assessments. However, the GLC adjustment factor is also applied to 8-hr noncancer chronic assessments.
Worker adjustments factors enabled: YES
GLC adjustment factor: 4.2
Exposure frequency: 250

Fraction at time at home
NOTE: Exposure duration (i.e., start age, end age, ED, & FAH) are only adjusted for cancer assessments.

****
TIER 2 SETTINGS

Tier2 adjustments were used in this assessment. Please see the input file for details.
Tier2 - What was changed: ED or start age changed|
Calculating chronic risk
Chronic risk saved to: F:\Jobs\61010001\ConHRA\HARP2\CommercialChronicNCChronicRisk.csv
HRA ran successfully

*HARP - HRACalc v22118 1/15/2025 9:50:39 AM -
Chronic Risk - Input File: F:\Jobs\61010001\ConHRA\HARP2\CommercialChronicHRAInput.hra

OPERATIONAL HEALTH RISK ASSESSMENT CALCULATIONS – EMERGENCY GENERATOR

2029 University Avenue Project

The CAPCOA Diesel Internal Combustion Engine (DICE) Risk Tool was used to perform a Screening Risk Assessment for operational emissions associated with the emergency generator for the proposed project, The DICE risk tool, designed to assist local Air Pollution Control Districts and Air Quality Management Districts in California with performing screening health risk assessments (HRAs) for diesel particulate emissions from diesel internal combustion engines calculates potential health risks following the guidelines set by the California Air Resources Board (ARB). Additionally, the tool ensures consistency with the methodologies and procedures outlined in the Office of Environmental Health Hazard Assessment's (OEHHA) 2015 Air Toxic Hot Spots Program Guidance Manual and district HRA protocols. The tool provides detailed reports that include risk assessment results and supporting data. This alignment with OEHHA Guidance as well as the Bay Area Air Quality Management District (BAAQMD), the California Air Pollution Control Officers Association (CAPCOA), and CARB protocols helps ensure compliance with air quality regulations and protects public health by accurately assessing the impact of diesel engine emissions.

The operational HRA utilized the same methodology and AERMOD meteorological data set used for the Construction HRA (Oakland International Airport, KOAK), but in a screening mode – finding the maximum concentration at each distance from 10 – 4850 meters from the source. The emissions inputs were consistent with the CalEEMod stationary source calculations from an assumed Tier 3 300-hp generator (meeting the BAAQMD and ARB ATCM requirements) operating up to 50 hours per year. Release parameters were conservatively based on a horizontal release from the side of the building using defaults from DICE based on the default generator size of 300 hp. This type of release modeling will provide conservative results as compared to a vertical stack release and is typical for a high-rise building, as opposed to a stack on the roof of the building.

The screening model predicted a maximum residential cancer risk of 2.5 in a million and a maximum worker cancer risk of 0.2 in a million. The chronic hazard index at the construction maximally exposed individual resident and worker was predicted as 0.0 by the DICE model, denoting a Chronic HI of <0.05. Using the maximum predicted DPM concentrations from the output (0.0028 ug/m3) divided by the REL for Diesel PM, the maximum chronic HI for operation of the emergency generator would be 0.00056.

FCS
An ADEC Innovation

Memorandum

Date: January 31, 2025

To: Steve Heaton, Senior Vice President, Laconia Development, LLC

From: Sara Landucci, Noise Scientist, FirstCarbon Solutions
Philip Ault, Director of Noise and Air Quality, FirstCarbon Solutions

Subject: Noise Impacts Analysis for the 2029 University Avenue Project in Berkeley, California

At the request of Laconia Development LLC (project applicant), FirstCarbon Solutions (FCS), prepared this memorandum to summarize the findings of the Noise analysis prepared for the proposed 2029 University Avenue Project (proposed project). The project site is located in the City of Berkeley (City), in Alameda County, California.

PROJECT DESCRIPTION

Project Site

The proposed project is located on an approximately 0.28-acre site on Assessor's Parcel Number (APN) 57-2053-8-1. The project site currently consists of 13,031 square feet of existing non-landmarked commercial structures and carport, and 7,320 square feet of hardscape. The project site is adjacent to residential uses and Berkeley Way to the north, University Avenue to the south, Nash Hotel Berkeley to the east, and mixed-uses and Milvia Street to the west. Further out, the project site is surrounded by residential and commercial uses to the south, west, and north, and is approximately 2.36 miles north of Interstate 580 (I-580), and approximately 1,000 feet west of University of California, Berkeley.

The City's General Plan designates the project site as "Downtown," which allows for a residential density of 40 to 100 dwelling units per acre. The City's Zoning Ordinance zones the project site as Downtown Mixed-Use District "C-DMU." The C-DMU zoning district permits residential uses with a Use Permit and retail uses with a Zoning Certificate. This designation permits the full range of housing types, including both schemes that are proposed by the project.

Design Options

The project applicant is currently contemplating two design options for the project site: an apartment development and a student housing development. FCS has reviewed the two design options for the purpose of determining a more impactful design to analyze as the worse-case scenario. The designs for the two proposed buildings are virtually identical with respect to the overall physical size and impact of the construction. The proposed project building (regardless of land use as a multi-family apartment or student housing) would be 23 stories with an additional basement, on a 0.28-acre site. Either option would be described by the following: a total residential square footage area of up to 191,000 square feet, limited parking (interior to the building on the second floor) encompassing approximately 8,000 square feet, and landscaping of 500 square feet. Construction impacts would be almost identical given the site size and level of construction is similar for both options.

During operation, differences in impacts between the two land uses would result primarily from differences in the transportation patterns of the residents. Off-campus high-rise apartments are located close to universities, reduce the need for long commutes and result in fewer vehicle trips with many students walking and biking to campus. Prior studies found that off-campus student housing apartments were found to have approximately a third of amount of traffic compared to a similarly sized, generic apartment building.[1] While Institute of Transportation Engineers (ITE) daily trip generation rates are not available for Off-Campus Student High-Rise Apartments, Peak AM and Peak PM hourly rates for this land use (ITE Code 227)[2], calculated based on trips per bedroom, corroborate this trend of lower traffic for student housing as compared to generic apartment buildings.

In summary, the two building plans were considered: 240 multi-family apartment units or 160 student apartments (with 240 bedrooms). Based on the potential for the most vehicle trips, it was concluded that the multi-family apartment building would generate the maximum potential impacts for off-site sensitive noise receptors (Exhibit 1).

NOISE AND VIBRATION FUNDAMENTALS

A summary of the fundamentals of noise and vibration is provided as Attachment A to this document.

SETTING AND REGULATORY FRAMEWORK

Federal Regulations

Currently, no federal noise standards directly regulate environmental noise associated with temporary construction activities or the long-term operations of development projects.

Federal Transit Administration

Though not regulatory in nature, vibration impact criteria for buildings and other structures have been established by the Federal Transit Authority (FTA), as building and structural damages are generally the foremost concern when evaluating the impacts of construction-related vibrations. For the evaluation of the proposed project's construction-related vibration impacts, the following FTA vibration impact criteria, shown in Table 1, are used given the absence of applicable federal, State, and City standards specific to temporary construction activities and their potential to result in building and structural damages.[3]

Table 1: Federal Transit Administration Construction Vibration Impact Criteria

Building Category	PPV (in/sec)
I. Reinforced—Concrete, Steel or Timber (no plaster)	0.5
II. Engineered Concrete and Masonry (no plaster)	0.3
III. Nonengineered Timber and Masonry Buildings	0.2
IV. Buildings Extremely Susceptible to Vibration Damage	0.12

Notes:
PPV = peak particle velocity
VdB = vibration measured as root mean square (rms) velocity in decibels of 1 microinch per second
Source: Federal Transit Administration (FTA). 2018. Transit Noise and Vibration Impact Assessment Manual. September.

The FTA has also established criteria for the assessment of construction noise impacts. The FTA's day and nighttime criteria are shown in Table 2. To be discussed later, the City has adopted these criteria for

[3] Federal Transit Administration (FTA). 2018. Transit Noise and Vibration Impact Assessment Manual.

assessment of the proposed project's construction noise impacts. According to the FTA, exceedances of these criteria may result in adverse community reaction.

Table 2: Federal Transit Administration Construction Noise Impact Criteria

Land Use	$L_{eq\ equipment\ (8hr)}$[A]	
	Day	Night
Residential	80	70
Commercial	85	85
Industrial	90	90

Notes:
$L_{eq\ equipment\ (8hr)}$ = equipment noise level in L_{eq} over an 8-hour time period. The analysis assumes that the L_{eq} over this time period would be approximately equal to the L_{eq} over a single construction workday, from start to finish of that day's activities.

State Regulations

2017 General Plan Guidelines

The State of California's 2017 General Plan Guidelines propose county and city standards for acceptable exterior noise levels based on land use. These standards are incorporated into land use planning processes to prevent or reduce noise and land use incompatibilities. The State's suggested compatibility considerations between various land uses and exterior noise levels are not regulatory in nature but are recommendations intended to aid communities in determining their own noise-acceptability standards.

Assembly Bill 1307

Assembly Bill (AB) 1307 went into effect January 1, 2024. This bill clarifies that "for residential projects, the effects of noise generated by project occupants and their guests on human beings is not a significant effect on the environment." Therefore, this analysis does not address potential noise impacts from future occupants and their guests on sensitive receptors in the project vicinity.

Local Regulations

The project site is located within the City of Berkeley. The Berkeley General Plan and Berkeley Municipal Code (Municipal Code) contain guidelines, standards, and regulations for the control of noise.

Berkeley General Plan

The Environmental Management (EM) Element of the Berkeley General Plan serves as the City's noise element and contains several noise policies, which require that standard noise conditions be imposed on all planning decisions.[4] The Berkeley General Plan does not establish any quantitative noise standards or thresholds of significance, though Policy EM-47 includes residences, child care centers, hospitals, nursing homes, schools, and parks as noise-sensitive uses. The Berkeley General Plan includes the following noise-related policies:

Policy EM-43 **Noise Reduction:** Reduce significant noise levels and minimize new sources of noise.

Policy EM-44 **Noise Prevention and Elimination:** Protect public health and welfare by eliminating existing noise problems where feasible and by preventing significant future degradation of the acoustic environment.

Actions

A. Incorporate noise considerations into land use planning decisions.
B. Ensure the effective enforcement of City, State, and federal noise levels by appropriate City departments.
C. Coordinate with the California Occupational Safety and Health Administration (Cal-OSHA) to provide information on and enforcement of occupational noise requirements within the City of Berkeley.
D. Support federal and State legislation to lower allowable noise levels on all motor vehicles.

Policy EM-45 **Traffic Noise:** Work with local and regional agencies to reduce local and regional traffic, which is the single largest source of unacceptable noise in the City.

Policy EM-46 **Noise Mitigation:** Require operational limitations and all feasible noise buffering for new uses that generate significant noise impacts near residential, institutional, or recreational uses.

Policy EM-47 **Land Use Compatibility:** Ensure that noise-sensitive uses, including, but not limited to, residences, child care centers, hospitals, and nursing homes, are protected from detrimental noise levels.

[4] City of Berkeley. 2002. Berkeley General Plan.

Berkeley Municipal Code

The Municipal Code establishes a number of regulations that would apply to the proposed project's temporary construction activities and long-term operations. Section 13.40.050 contains the Municipal Code's exterior noise standards.

Section 13.40.050—Exterior Noise Standards (Applicable to Long-Term Operations)

A. Maximum permissible sound levels shall be determined by the zoning district of the property subject to the noise, not the property from which the noise originates.
   1. The noise standards for the various categories of land use in Table 13.40-1 [see Table 3] or 13.40-2 [see Table 4] shall, unless otherwise specifically indicated in other codes, apply to all such property within a designated zone.
   2. No person shall operate or cause to be operated any source of sound at any location within the incorporated City or allow the creation of any noise on property owned, leased, occupied or otherwise controlled by such person, which causes the sound level when measured on any other property to exceed:
      (a) The noise standard for that land use as specified in Table 13.40-1 [see Table 3] for a cumulative period of more than 30 minutes in any hour; or
      (b) The noise standard for that land use as specified in Table 13.40-1 [see Table 3] plus 5 dBA for a cumulative period of more than 15 minutes in any hour; or
      (c) The noise standard for that land use as specified in Table 13.40-1 [see Table 3] plus 10 dBA for a cumulative period of more than 5 minutes in any hour; or
      (d) The noise standard for that land use as specified in Table 13.40-1 [see Table 3] plus 15 dBA for a cumulative period of more than 1 minute in any hour; or
      (e) The noise standard for that land use as specified in Table 13.40-1 [see Table 3] plus 20 dBA for any period of time.

Table 3: Exterior Noise Limits—Levels not to be exceeded more than 30 minutes any hour

Zoning District	Time Period	Noise Level (dBA)
R-1, R-2, R-1A, R-2A, and ESR	7:00 a.m.—10:00 p.m.	55
	10:00 p.m.—7:00 a.m.	45
R-3 and above	7:00 a.m.—10:00 p.m.	60
	10:00 p.m.—7:00 a.m.	55
Commercial	7:00 a.m.—10:00 p.m.	65
	10:00 p.m.—7:00 a.m.	60
Industry	Anytime	70
Source: Municipal Code Table 13.40-1: Exterior Noise Limits.		

3. If the measured ambient noise level is greater than the level permissible within any of the noise limit categories above, the sound level when measured on any other property shall not exceed:
   (a) The ambient noise level for a cumulative period of more than 30 minutes in any hour; or
   (b) The ambient noise level plus 5 dBA for a cumulative period of more than 15 minutes in any hour; or
   (c) The ambient noise level plus 10 dBA for a cumulative period of more than 5 minutes in any hour; or
   (d) The ambient noise level plus 15 dBA for a cumulative period of more than 1 minute in any hour; or
   (e) The ambient noise level plus 20 dBA for any period of time.
4. If the measurement location is on a boundary between two different zones, the sound level limit applicable to the quieter noise zone shall apply.
5. If possible, the ambient noise level may be measured at the same location along the property line utilized in subsection A.2 of this section with the alleged offending noise source inoperative. If the intruding noise source is continuous and cannot reasonably be discontinued or stopped for a time period whereby the ambient noise level can be measured, the ambient noise level may be determined by traveling away from the noise source to a point where a steady state decibel reading is achieved. If this test is not possible, the noise level measured while the source is in operation shall be compared directly to the noise level standards.

B. The classification of additional areas of the community not listed in Table 13.40-1 [see Table 3] in terms of environmental noise zones shall be determined by the [Environmental Health Division] EHD. Industrial noise limits are intended primarily for use at the boundary of industrial zones rather than for noise reduction within the zone.

Section 13.40.060 contains the Municipal Code's interior noise standards.

Section 13.40.060–Interior Noise Standards (Applicable to Long-Term Operations)

A. Maximum Permissible Dwelling Interior Sound Levels
   1. The interior noise standards for multi-family residential dwellings as presented in Table 13.40-2 [see Table 4] shall apply, unless otherwise specifically indicated in other codes, within all such dwellings with windows in their normal seasonal configuration.

Table 4: Interior Noise Limits

Zoning District	Time Interval	Allowable Interior Noise Level (dBA)
All	10:00 p.m.–7:00 a.m.	40
	7:00 a.m.–10:00 p.m.	45
Source: Municipal Code Table 13.40-2: Interior Noise Limits.		

2. No person shall operate or cause to be operated within a multi-family dwelling unit any source of sound or allow the creation of any noise which causes the sound level when measured inside a neighboring dwelling unit to exceed:
   (a) The noise standard as specified in Table 13.40-2 [see Table 4] for a cumulative period of more than 5 minutes in any hour; or
   (b) The noise standard as specified in Table 13.40-2 [see Table 4] plus 5 dBA for a cumulative period of more than 1 minute in any hour; or
   (c) The noise standard as specified in Table 13.40-2 [see Table 4] plus 10 dBA for any period of time.
3. If the measured ambient noise level is greater than the level permissible within any of the noise limit categories above, the sound level when measured on the other property shall not exceed:
   (a) The ambient noise level for a cumulative period of more than 5 minutes in any hour; or
   (b) The ambient noise level plus 5 dBA for a cumulative period of more than 1 minute in any hour; or
   (c) The ambient noise level plus 10 dBA for any period of time.

Section 13.40.070(B)(7) contains regulations specific to construction and demolition activities.

Section 13.40.070(B)(7)–Construction/Demolition

(a) Operating or causing the operation of any tools or equipment used in construction, drilling, repair, alteration, or demolition work before 7:00 a.m. on a weekday (or before 9:00 a.m. on a weekend or holiday) or after 7:00 p.m. on a weekday (or after 8:00 p.m. on a weekend or holiday) such that the sound therefrom across a residential or commercial real property line violates Section 13.40.050 or 13.40.060, except for emergency work of public service utilities or by variance issued by the EHD. (This section shall not apply to the use of domestic power tools as specified in subsection B.11 of this section.)

(b) *Noise Restrictions at Affected Properties.* Where technically and economically feasible, construction activities shall be conducted in such a manner that the maximum sound levels at affected properties will not exceed those listed in the following schedule:

Mobile Equipment. Maximum sound levels for nonscheduled, intermittent, short-term operation (less than 10 days) of mobile equipment [see Table 5]:

Table 5: Mobile Equipment Noise Limits

Time Period	R-1, R-2 Residential	R-3 and above Multi-Family Residential	Commercial/ Industrial
Weekdays 7:00 a.m. to 7:00 p.m.	75 dBA	80 dBA	85 dBA
Weekends 9:00 a.m. to 8:00 p.m. and legal holidays	60 dBA	65 dBA	70 dBA
Notes: dBA = A-weighted decibel Source: Municipal Code Table 13.40-3.			

Stationary Equipment. Maximum sound levels for repetitively scheduled and relatively long-term operation (period of 10 days or more) of stationary equipment [see Table 6]:

Table 6: Stationary Equipment Noise Limits

Time Period	R-1, R-2 Residential	R-3 and above Multi-Family Residential	Commercial/ Industrial
Weekdays 7:00 a.m. to 7:00 p.m.	60 dBA	65 dBA	70 dBA
Weekends 9:00 a.m. to 8:00 p.m. and legal holidays	50 dBA	55 dBA	60 dBA
Source: Municipal Code Table 13.40-4.			

Section 13.40.070(B)(8) concerns vibrations.

Section 13.40.070(B)(8)–Vibration

Operating or permitting the operation of any device that creates a vibration, which annoys or disturbs at least two or more reasonable persons of normal sensitiveness who reside in separate residences (including apartments and condominiums) at or beyond the property boundary of the source, if on private property, or at least 150 feet (46 meters) from the source, if on a public space or public right-of-way.

Berkeley Standard Conditions of Approval

The City has established the following Standard Conditions of Approval that it imposes on projects, and which would be incorporated into construction of the proposed project:

Construction Hours (Residential Zoning Districts)

Construction activity shall be limited to between the hours of 8:00 a.m. and 6:00 p.m. on Monday through Friday, and between 9:00 a.m. and noon on Saturday. No construction-related activity shall occur on Sunday or any federal Holiday.

Construction Hours (Nonresidential Districts)

Construction activity shall be limited to between the hours of 7:00 a.m. and 6:00 p.m. on Monday through Friday, and between 9:00 a.m. and 4:00 p.m. on Saturday. No construction-related activity shall occur on Sunday or any federal Holiday.

Construction Hours (Exceptions)

It is recognized that certain construction activities, such as the placement of concrete, must be performed in a continuous manner and may require an extension of these work hours. Prior to initiating any activity that might require a longer period, the developer must notify the Zoning Officer and request an exception for a finite period of time. If the Zoning Officer approves the request, then two weeks prior to the

expanded schedule, the developer shall notify businesses and residents within 500 feet of the project site describing the expanded construction hours. A copy of such notice and methodology for distributing the notice shall be provided in advance to the City for review and approval. The project shall not be allowed more than 15 extended working days.

Construction Noise Reduction Program

The applicant shall develop a site-specific noise reduction program prepared by a qualified acoustical consultant to reduce construction noise impacts to the maximum extent feasible, subject to review and approval of the Zoning Officer. The noise reduction program shall include the time limits for construction listed above, as measures needed to ensure that construction complies with Berkeley Municipal Code Section 13.40.070. The noise reduction program should include, but shall not be limited to, the following available controls to reduce construction noise levels as low as practical:

A. Construction equipment should be well maintained and used judiciously to be as quiet as practical.

B. Equip all internal combustion engine-drive equipment with mufflers, which are in good condition and appropriate for the equipment.

C. Utilize “quiet” models of air compressors and other stationary noise sources where technology exists. Select hydraulically or electrically powered equipment and avoid pneumatically powered equipment where feasible.

D. Locate stationary noise-generating equipment as far as possible from sensitive receptors when adjoining construction sites. Construct temporary noise barriers or partial enclosures to acoustically shield such equipment where feasible.

E. Prohibit unnecessary idling of internal combustion engines.

F. If impact pile driving is required, pre-drill foundation pile holes to minimize the number of impacts required to seat the pile.

G. Construct solid plywood fences around construction sites adjacent to operational business, residences, or other noise-sensitive land uses where the noise control plan analysis determines that a barrier would be effective at reducing noise.

H. Erect temporary noise control blanket barriers, if necessary, along building façades facing construction sites. This mitigation would only be necessary if conflicts occurred which were irresolvable by proper scheduling. Noise control blanket barriers can be rented and quickly erected.

I. Route construction-related traffic along major roadways and away from sensitive receptors where feasible.

Construction Noise Management–Public Notice Required

At least 2 weeks prior to initiating any construction activities at the site, the applicant shall provide notice to businesses and residents within **500 feet** of the project site. This notice shall at a minimum provide the following: (1) project description, (2) description of construction activities, (3) daily construction schedule (i.e., time of day) and expected duration (number of months), (4) the name and phone number of the Project Liaison for the project that is responsible for responding to any local complaints, (5) commitment to notify neighbors at least 4 days in advance of authorized extended work hours and the reason for extended hours, and (6) that construction work is about to commence. The liaison would determine the cause of all construction-related complaints (e.g., starting too early, bad muffler, worker parking, etc.) and institute reasonable measures to correct the problem. A copy of such notice and methodology for distributing the notice shall be provided in advance to the City for review and approval.

Noise Reduction Plan

Applicants are required to develop a site-specific noise reduction program prepared by a qualified acoustical consultant to reduce construction noise impacts to the maximum extent feasible. The noise reduction program would include several elements that would reduce the exposure of sensitive receptors to construction noise, such as the following:

- Equipping all internal combustion engine-driven equipment with mufflers in good condition
- Pre-drilling foundation pile holes to minimize the use of pile drivers
- Installing solid plywood fences around construction sites adjacent to sensitive receptors
- Erecting temporary noise control blanket barriers along building façades facing construction sites.

HVAC Noise Reduction

Prior to the issuance of building permits, the project applicant shall submit plans that show the location, type, and design of proposed heating, ventilation, and air conditioning (HVAC) equipment. In addition, the applicant shall provide product specification sheets or a report from a qualified acoustical consultant showing that operation of the proposed HVAC equipment would meet the City’s exterior noise requirements in Municipal Code Section 13.40.050. The City’s Planning and Development Department shall review the submitted plans, including the selected HVAC equipment, to verify compliance with exterior noise standards.

Loading

All loading/unloading activities associated with deliveries to all uses shall be restricted to the hours of 7:00 a.m. to 10:00 p.m. daily.

Project Construction Website

The applicant shall establish a project construction website with the following information clearly accessible and updated monthly or more frequently as changes warrant:

- Contact information (i.e., “hotline” phone number, and email address) for the Project construction manager.
- Calendar and schedule of daily/weekly/monthly construction activities.
- The final Conditions of Approval, Mitigation Monitoring and Reporting Program, Transportation Construction Plan, Construction Noise Reduction Program, and any other reports or programs related to construction noise, air quality, and traffic.

Damage Due to Construction Vibration

The project applicant shall submit screening level analysis prior to, or concurrent with demolition building permit. If a screening level analysis shows that the proposed project has the potential to result in damage to structures, a Structural Engineer or other appropriate professional shall be retained to prepare a vibration impact assessment (assessment). The assessment shall take into account project-specific information such as the composition of the structures, location of the various types of equipment used during each phase of the project, as well as the soil characteristics in the project area, in order to determine whether project construction may cause damage to any of the structures identified as potentially impacted in the screening level analysis. If the assessment finds that the proposed project may cause damage to nearby structures, the Structural Engineer or other appropriate professional shall recommend design means and methods of construction that avoid the potential damage, if feasible. The assessment and its recommendations shall be reviewed and approved by the Building and Safety Division and the Zoning Officer. If there are no feasible design means or methods to eliminate the potential for damage, the Structural Engineer or other appropriate professional shall undertake an existing conditions study (study) of any structures (or, in case of large buildings, of the portions of the structures) that may experience damage. This study shall:

- Establish the baseline condition of these structures, including, but not limited to, the location and extent of any visible cracks or spalls; and
- Include written descriptions and photographs.

The baseline study shall be reviewed and approved by the Building and Safety Division and the Zoning Officer prior to issuance of a grading permit. Upon completion of the project, the structures (or in case of large buildings, of the portions of the structures) previously inspected will be resurveyed, and any new cracks or other changes shall be compared to the pre-construction conditions and a determination shall be made as to whether the proposed project caused the damage. The findings shall be submitted to the Building and Safety Division and the Zoning Officer for review. If it is determined that project construction has resulted in damage to the structure, the damage shall be repaired to the pre-existing condition by the project sponsor, provided that the property owner approves of the repair.

Existing Noise Conditions

Ambient Noise

The project site is surrounded by Nash Hotel Berkeley to the east, commercial uses to the west, commercial uses and University Avenue to the south, and commercial uses and Berkeley Way to the north. The dominant noise sources in the project vicinity include traffic on local roadways, primarily from traffic on University Avenue, which runs along the southern boundary of the project site.

An ambient noise monitoring effort was conducted to document daytime ambient noise levels on the project site. Short-term noise monitoring was conducted by FCS on December 19, 2024, between 12:04 p.m. and 12:36 p.m. The noise measurements were taken during the midday hours, as the midday hours typically have the highest daytime noise levels in urban environments. It should be noted that peak noise hours often vary slightly from peak traffic hours, as peak noise hours more closely align with high volume traffic that is still free flowing; while peak traffic hours often result in slower vehicle speeds due to the volume of traffic on the roadway. The measurements ranged between 49.8 dBA and 77.1 dBA equivalent sound level (L_{eq}) as shown in Table 7. The noise measurement data sheets are provided in Attachment B.

Table 7: Existing Ambient Noise Levels on the Project Site

Site ID #	Description	L_{eq}	L_{min}	L_{max}
ST-1	Equipment set up south of 2029 University Ave building in front of Lhasa Salon and behind one small urban tree and under brown lamp post with "Milvia Bicycle Boulevard Sign." Primary noise sources observed were University Avenue traffic, pedestrians talking along sidewalk, cars honking, music from small speaker in front of Vintage Thrift Dope Stuff Store on 2029 University Avenue property.	77.1	55.2	100.2
ST-2	Equipment set up northwest corner of the project site in central parking lot south of first and second carport garage to the west. Primary noise sources observed were University Avenue traffic, nearby HVAC system noise, music from Hope Center from residents.	50.6	46.8	62.8
ST-3	Equipment set up northeast corner of project site on center parking lot south of brick carport. Approximately 15 feet west of Hotel Nash, north of Berkeley Shade Co. Primary noise sources observed were University Ave traffic, nearby HVAC system noise, residential noise from Hope Center to the north.	49.8	46.0	59.9

Notes:
L_{eq} = equivalent sound level
L_{min} = minimum noise/sound level
L_{max} = maximum noise level
Source: FirstCarbon Solutions (FCS). 2024.

THRESHOLDS OF SIGNIFICANCE AND IMPACT ANALYSIS

Thresholds of Significance

According to California Environmental Quality Act (CEQA) Guidelines, Appendix G, to determine whether impacts related to noise and vibration are significant environmental effects, the following questions are analyzed and evaluated.

Would the proposed project:

a) Generate a substantial temporary or permanent increase in ambient noise levels in the vicinity of the project in excess of standards established in the local general plan or noise ordinance, or applicable standards of other agencies?

b) Generate excessive groundborne vibration or groundborne noise levels?

c) For a project located within the vicinity of a private airstrip or an airport land use plan or, where such a plan has not been adopted, within 2 miles of a public airport or public use airport, would the project expose people residing or working in the project area to excessive noise levels?

Background

As discussed in the project description above, the applicant is contemplating two project designs. The following analyzes the more intensive project of the two that would have greater potential noise impacts. Analyzing the more intensive project, or a worst-case scenario, would provide a conservative analysis for the less intensive project so that both project's impacts are sufficiently analyzed and disclosed. Based on the potential for the most vehicle trips, it was concluded that the multi-family apartment building would generate the maximum potential impacts for sensitive noise receptors.

Substantial Noise Increase in Excess of Standards

Construction Noise

For purposes of this analysis, a significant impact would occur if construction activities would generate a substantial temporary increase in ambient noise levels in the vicinity of the proposed project in excess of standards established in the local general plan or noise ordinance, or the applicable standards of other agencies. To quantitatively evaluate construction noise impacts pursuant to this standard, the City as Lead Agency has previously adopted the FTA's construction noise criteria for residential land uses shown in Table 2 in environmental review of similar mixed-use projects. The FTA's construction noise criteria is also consistent with the City's noise standards for mobile construction equipment at the property line in

multi-family residential zones since the project and the surrounding buildings are zoned as C-DMU Downtown Mixed-Use District (Table 5).

On-Site Construction Noise Impact

Construction of the proposed project would generate noise during the approximately 24-month schedule of demolition, grading, building construction, finishing, and other construction activities. The proposed project is anticipated to utilize a standard 5-day work week, and construction would occur during allowable daytime hours set forth by the City's Municipal Code and Standard Conditions of Approval.

The proposed project is surrounded by multiple noise-sensitive residential uses along University Avenue and Berkeley Way. The nearest receptors are the Nash Hotel Berkeley, a multi-story hotel located approximately 10 feet east of the project site at 2045 University Avenue and the Hope Center and an interim and permanent supportive housing development located approximately 20 feet north of the project site at 2012 Berkeley Way. The following analysis examines potential impacts to these two closest off-site sensitive receptors.

Construction is a dynamic process, and daily activities can vary widely, even within the same construction phase or subphase. The loudest phases of construction, due to the type of heavy equipment being used, is the demolition phase which would last approximately 30 days and the grading phase which would last approximately 10 days. Please note that no impact pile driving will be involved at any point during the construction of the project.

Demolition and Grading

Demolition for the proposed project would involve the demolition and removal of the site's existing buildings and related improvements. The majority of the proposed project's demolition activities would be characterized by an excavator and a loader demolishing structures and transferring debris to dumpsters or haul trucks for off-site removal. The majority of grading would also be characterized by these same vehicles excavating "cut" materials and transferring it to haul trucks for off-site removal. As an excavator and loader work across the approximately 0.28-acre project site, their construction noise levels at surrounding receptors would fluctuate depending on their distances from the receptors. Noise levels would be greater when these vehicles work near receptors and lower when farther away. Given these considerations, noise impacts associated with the proposed project's demolition and grading activities have been evaluated by modeling noise levels at receptors that would be associated with an excavator and a loader operating across a 100-foot by 100-foot parcel that approximates the proposed project's construction footprint. This modeling approach simulates noise levels that would result from the daily activities of an excavator and a loader working across the project site.

Table 8 shows the proposed project's estimated demolition phase-related noise levels at the Hope Center and Nash Hotel. As shown, noise levels for both sensitive receptors would be below the FTA's 80 dBA L_{eq} criteria that is utilized as the threshold of significance. **Therefore, impacts from on-site "Demolition and Grading" activities would be less than significant.**

Table 8: Construction Noise Levels—Demolition and Grading

Hope Center			
Equipment	**Noise Level (dBA L_{eq})**	**Usage %**	**Workday Noise Level (dBA L_{eq})**
Excavator	72.9	0.4	68.9
Loader	69.4	0.4	65.4
		Combined dBA L_{eq}	**70.5**
Nash Hotel			
Equipment	**Noise Level (dBA L_{eq})**	**Usage %**	**Workday Noise Level (dBA L_{eq})**
Excavator	79.5	0.4	75.5
Loader	76.0	0.4	72.0
		Combined dBA L_{eq}	**77.1**

Impact Summary

As shown above, the assessed construction activities would not expose the Hope Center or the Nash Hotel to construction noise levels that exceed the FTA's 80 dBA L_{eq} criteria. Other construction activities (i.e., the daily operations of other construction vehicles and equipment) would not result in greater daily noise impacts, and impacts at more distant receptors would be reduced. **Therefore, the analysis demonstrates that noise impacts from the proposed project's construction activities would be less than significant.**

Off-site Construction Noise Impact (Construction Traffic)

Haul truck trips, construction worker vehicle trips, and other construction-related trips would occur over the course of the proposed project's construction. Haul truck trips typically have the greatest potential to result in substantial off-site noise increases along nearby roadways. The previously discussed noise limits in Berkeley's Municipal Code have no applicability to road-legal trucks operating on public roads. Nevertheless, the following analysis demonstrates that the proposed project's haul trucks would have a nominal and less than significant impact on roadside noise levels in the vicinity of the project site.

According to the General Plan Transportation Element, the portion of University Avenue (east of Martin Luther King Jr., which is immediately east of the project site) had an Average Daily Traffic (ADT) volume of 18,150 trips in 2000.[5] While no recent data is available, it can reasonably be expected that existing ADT

[5] City of Berkeley General Plan. 2020. Environmental Management Element. Website: https://files.ceqanet.opr.ca.gov/261038-

on the portion of University Avenue in the project area are at least the same or slightly higher than in the year 2000. Typically, an approximate doubling of traffic volumes is required to cause 3 dBA noise increases, which are considered barely noticeable. Based on the results of the air quality analysis prepared for this project, the highest average daily trips that would be generated during any phase of construction would be 203 ADT. These construction trips would result in a less than 1 dBA increase in average daily traffic noise levels on this portion of University Avenue.

The proposed project's construction trucks would represent a small fraction of daily traffic, far below the numbers necessary to generate barely noticeable noise increases. **As such, the proposed project's haul trucks would not result in noticeable (much less substantial) noise increases along surrounding roadways, and this impact would be less than significant.**

Operational Noise Impacts

On-site Operational Noise Impact

For the purposes of this analysis, a significant impact would occur if the proposed project's on-site noise sources (mechanical equipment, parking lot operations, etc.) would generate a substantial permanent increase in ambient noise levels surrounding the proposed project. The Municipal Code includes quantitative noise limits that would apply to the proposed project's operational noise sources. Municipal Code Section 13.40.050 and Section 13.40.060 contain exterior and interior noise limits, respectively, that would apply to noise generated by the proposed project on-site. Therefore, the proposed project's noise impact from on-site operational sources would be considered significant if any of the following were to occur:

- Noise levels would exceed the exterior noise limits established by Municipal Code Section 13.40.050 (see Table 3 and accompanying criteria).
- Noise levels would exceed the interior noise limits established by Municipal Code Section 13.40.060 (see Table 4 and accompanying criteria).

The proposed project's on-site noise sources and their potential to result in significant noise impacts are discussed below. The only stationary noise source associated with this project would be new mechanical ventilation equipment operations. As demonstrated, the proposed project would not result in substantial sources of on-site noise, and this impact would be less than significant.

Mechanical Equipment

Noise levels from typical residential HVAC systems range up to 70 dBA at a distance of 3 feet.[6] The nearest receptors to the east and north are zoned site as Downtown Mixed-Use District "C-DMU." So the

3/attachment/spYOcp5Ui-MVs3ZGdMQntFELot01DyjSpNiMI8oyvuOOaLQFR_b_y87v-MvLElFuf4OqokRiWqJuO83F0. Accessed January 23, 2025.

[6] Based on specification data for market available systems approved for sale in California.

appropriate corresponding daytime exterior noise performance threshold identified in Table 3 is 60 dBA and a nighttime threshold of 55 dBA. Conservatively, these standards would apply to noise generated by the proposed project's HVAC system.

Proposed mechanical ventilation systems could be located as close as approximately 35 feet from the nearest residential-type land use property line. At this distance, with minimal shielding from the rooftop parapet, mechanical ventilation equipment operational noise levels would attenuate to 52 dBA L_{eq}. Given these conditions, there is no potential for the proposed project's daytime HVAC noise levels to exceed the minimum 60 dBA daytime standard at adjacent receptors. And given the height of the proposed project and its setbacks to adjacent receptors, it is also evident that the proposed project's HVAC noise levels would not exceed the 55 dBA nighttime exterior noise limit at these receptors either.

Furthermore, the City's Standard Conditions of Approval involving HVAC noise reduction would prevent exceedances of Municipal Code Section 13.40.050's daytime and nighttime exterior noise limits by the proposed project's HVAC equipment. Prior to the issuance of building permits, the project applicant would be required to submit plans showing the location, type, and design of the proposed project's HVAC equipment. The project applicant would also be required to submit HVAC product specification sheets demonstrating that HVAC equipment would achieve the Municipal Code's noise limits or provide an acoustical report demonstrating the same compliance. The City's Planning and Development Department would review these materials and verify the proposed project's compliance with the Municipal Code's noise limits before issuing building permits. **Therefore, the proposed project's HVAC systems would not result in exceedances of the Municipal Code's noise limits at nearby receptors.**

Regarding Municipal Code Section 13.40.060, the proposed project's exterior HVAC noise levels up to 60 dBA would not result in interior noise levels in excess of the minimum 40 dBA standard at surrounding residential receptors, as windows typically provide a minimum 20 dBA of exterior-to-interior noise reduction (and with modern construction, exterior-to-interior noise reduction is closer to 30 dBA or greater). Impacts to more distant noise-sensitive receptors would be reduced and are below Berkeley's Municipal Code noise limits.

Off-site Operational Noise Impact (Traffic)

For the purposes of this analysis, a development project would have a significant impact if off-site operational sources (i.e., traffic) would generate a substantial permanent increase in ambient noise levels surrounding the proposed site and any nearby roadways. The City has not adopted traffic-related noise thresholds for CEQA consideration, and neither the Berkeley General Plan nor the Municipal Code contain noise limits, standards, or other thresholds that would apply to traffic generated by the proposed project.

According to the General Plan Transportation Element, the portion of University Avenue (east of Martin Luther King Jr., which is immediately east of the project site) had an ADT volume of 18,150 trips in 2000. [7] While no recent data is available, it can reasonably be expected that existing ADT on the portion of University Avenue in the project area are at least the same or slightly higher than in the year 2000.

The proposed project is an infill development in a walkable neighborhood that is well-served by high-quality regional and local transit options. Based on these project specific conditions, the proposed project is expected to generate approximately 950 average daily trips on weekdays and up to 1,138 average daily trips on weekends. These project trip generation results represent a less than 10 percent increase in the average daily trips on this portion of University Avenue, based on the year 2000 traffic data. Therefore, project trips would result in a less than 1 dBA increase in average daily traffic noise levels on this portion of Bancroft Way.

Therefore, the proposed project would not come close to generating the approximate doubling of traffic necessary to increase existing ambient noise levels by 3 dBA, which represents a barely perceptible noise increase. Overall, the proposed project is the type of project that is encouraged by local, regional, and State planning agencies to reduce traffic levels and the environmental impacts (i.e., noise) associated therewith. **Given these considerations, the proposed project would not result in substantial permanent increases in roadways noise levels, and this impact would be less than significant.**

Mitigation Measures

None required.

EXCESSIVE GROUNDBORNE VIBRATION LEVELS

Construction Vibration Impacts

There are no federal, State, or City standards that would regulate the proposed project's vibration impacts from temporary construction activities, nor are there quantitative thresholds. Therefore, the criteria identified by the FTA in its 2018 Transit Noise and Vibration Impact Assessment manual are used where applicable and relevant to assist in evaluating the proposed project's vibration impacts to surrounding buildings. The proposed project's vibration impacts would be considered significant if any of the following were to occur:

- The proposed project would generate groundborne vibration levels in excess of the FTA criteria shown in Table 1.

[7] City of Berkeley General Plan. 2020. Environmental Management Element. Website: https://files.ceqanet.opr.ca.gov/261038-3/attachment/spYOcp5Ui-MVs3ZGdMQntFELot01DyjSpNiMI8oyvuOOaLQFR_b_y87v-MvLElFuf4OqokRiWqJuO83F0. Accessed January 23, 2025.

Construction of the proposed project would require a variety of large, steel-tracked earthmoving vehicles. According to the FTA, an excavator and similar heavy equipment can generate groundborne vibration levels up to 0.051 in/sec peak particle velocity (PPV) at a reference distance of 25 feet. At this distance and greater, there is no potential for groundborne vibration levels to exceed even the FTA's minimum 0.12 in/sec criteria for historic or fragile buildings. At distances less than 10 feet, groundborne vibrations from this equipment can exceed the FTA's 0.3 in/sec criteria for engineered concrete and masonry buildings that is applicable to most buildings abutting and surrounding the project site. Table 9 identifies the two closest adjacent buildings and the estimated groundborne vibration levels they could experience from construction of the proposed project.

Table 9: Construction-related Groundborne Vibration Levels

Receptor	Distance (feet)	Significance Criteria (in/sec PPV)	Groundborne Vibration Level (in/sec PPV)
Nash Hotel Berkeley	10	0.3	0.244
Hope Center	20	0.3	0.114
Notes: in/sec PPV = inches per second, peak particle velocity			

As shown, in the table above, groundborne vibration levels from heavy equipment operating on-site would not exceed FTA damage criteria for two of the adjacent buildings. As a result, the proposed project is expected to avoid damaging surrounding buildings. **Therefore, this impact would be less than significant.**

Operational Vibration Impacts

The proposed project would not contain any significant stationary sources of groundborne vibration, such as heavy equipment or industrial operations. Related vehicle travel (passenger vehicle trips, delivery trucks, etc.) also would not be considered a significant source of vibration, as vehicle travel rarely generates perceptible, much less substantial, groundborne vibration. **Therefore, this impact would be less than significant.**

EXCESSIVE NOISE LEVELS FROM AIRPORT ACTIVITY

A significant impact would occur if the proposed project would expose people residing or working in the project area to excessive noise levels for a project located within the vicinity of a private airstrip or an Airport Land Use Compatibility Plan or, where such a plan has not been adopted, within 2 miles of a public airport or public use airport.

The nearest airport to the project site is the Oakland International Airport located approximately 10.3 miles south of the project site. Because of the distance from and orientation of the airport runways, the

project site is located outside of the 65 dBA CNEL airport noise contours. While aircraft noise is occasionally audible on the project site from aircraft flyovers, aircraft noise associated with nearby airport activity would not expose people residing or working near the project site to excessive noise levels.

Therefore, implementation of the proposed project would not expose persons residing or working in the project vicinity to noise levels from airport activity that would be in excess of normally acceptable standards for residential land use development, **the project would result in no impact associated with airport noise.**

CONCLUSION

Based on the project understanding described above, the proposed project would result in less than significant impacts related to noise. Thank you for the opportunity to conduct this noise impact analysis. Please feel free to contact Phil Ault (559.930.6191 or pault@fcs-intl.com) should you have any questions.

Sincerely,

Philip Ault, Director of Noise and Air Quality

NOISE AND VIBRATION FUNDAMENTALS

Characteristics of Noise and Descriptors

Sound can be described in terms of its loudness (amplitude) and frequency (pitch). The standard unit of measurement for sound is the decibel, abbreviated dB. Because the human ear is not equally sensitive to sound at all frequencies, the A-weighted scale (dBA) is used to reflect the normal hearing sensitivity range of the human ear. Table 1 provides examples of A-weighted noise levels from common sources.

Although the terms “sound” and “noise” are often used synonymously, noise is commonly defined as sound that is either loud, unpleasant, unexpected, or undesired.[1] Because decibels are logarithmic units, they cannot be simply added or subtracted. For example, two cars each producing 60 dBA of noise would not produce a combined 120 dBA.

Table 1: A-Weighted Decibel Scale

Common Noise Sources	Sound Level, dBA
Near Jet Engine	130
Rock and Roll Band	110
Jet Flyover at 1,000 feet	100
Power Motor	90
Food Blender	80
Living Room Music	70
Human Voice at 3 feet	60
Residential Air Conditioner at 50 feet	50
Bird Calls	40
Quiet Living Room	30
Average Whisper	20
Rustling Leaves	10

Notes:
These noise levels are approximations intended for general reference and information use. They do not meet the standard required for detailed noise analysis but are provided for the reader to gain a rudimentary concept of various noise levels.

FCS
An ADEC Innovation

Table 2 briefly defines common noise measurement descriptors and other sound terminology used in this memorandum.

Table 2: Sound Terminology

Term	Definition
Sound	A vibratory disturbance created by a vibrating object which, when transmitted by pressure waves through a medium such as air, can be detected by a receiving mechanism such as the human ear or a microphone.
Noise	Sound that is loud, unpleasant, unexpected, or otherwise undesirable.
Ambient Noise	The composite of noise from all sources near and far in a given environment.
Decibel (dB)	A unitless measure of sound on a logarithmic scale which represents the squared ratio of sound pressure amplitude to a reference sound pressure. The reference pressure is 20 micropascals, representing the threshold of human hearing (0 dB).
A-Weighted Decibel (dBA)	An overall frequency-weighted sound level that approximates the frequency response of the human ear.
Equivalent Noise Level (L_{eq})	The average sound energy occurring over a specified time period. In effect, L_{eq} is the steady-state sound level that in a stated period would contain the same acoustical energy as the time-varying sound that actually occurs during the same period.
Maximum and Minimum Noise Levels (L_{max} and L_{min})	The maximum or minimum instantaneous sound level measured during a measurement period.
Day-Night Level (DNL or L_{dn})	The energy average of the A-weighted sound levels occurring during a 24-hour period, with 10 dB added to the A-weighted sound levels occurring between 10:00 p.m. and 7:00 a.m. (nighttime).
Community Noise Equivalent Level (CNEL)	The energy average of the A-weighted sound levels occurring during a 24-hour period, with 5 dB added to the A-weighted sound levels occurring between 7:00 p.m. and 10:00 p.m. and 10 dB added to the A- weighted sound levels occurring between 10:00 p.m. and 7:00 a.m.
Statistical Descriptor (L_X)	L_X is used to represent the noise level exceeded X% of a specified time period. For example, L_{90} represents the noise level that is exceeded 90% of a specified time period. L_{90} is commonly used to represent ambient or background steady-state noise levels.

EFFECTS OF ENVIRONMENTAL NOISE

The degree to which noise can impact an environment ranges from levels that interfere with speech and sleep to levels that can cause adverse health effects. Most human response to noise is subjective.

Factors that influence individual responses may include the intensity, frequency, and pattern of noise; the amount of background or existing noise present; and the nature of work or human activity that is exposed to intruding noise.

According to the National Institute of Health (NIH), extended or repeated exposure to sounds at or above 85 dB can cause hearing loss. Sounds of 75 dBA or less, even after continuous and repeated exposure, are unlikely to cause hearing loss.[2] The World Health Organization (WHO) reports that adults should not be exposed to sudden "impulse" noise events of 140 dB or greater. For children, this limit is 120 dB.[3]

Exposure to elevated nighttime noise levels can disrupt sleep, leading to increased levels of fatigue and decreased work or school performance. For the preservation of healthy sleeping environments, the WHO recommends that continuous interior noise levels should not exceed 30 dBA L_{eq} and that individual noise events of 45 dBA or higher be limited.[4]

Some epidemiological studies have shown a weak association between long-term exposure to noise levels of 65 to 70 dBA L_{eq} or greater and cardiovascular effects, including ischemic heart disease and hypertension. However, at this time, the relationship is largely inconclusive.

It is generally accepted that people with normal hearing sensitivity can barely perceive a 3 dBA change in noise levels, though if changes occur to the character of a sound (i.e., changes to the frequency content), then changes less than 3 dBA may be more noticeable.[5] Changes of 5 dBA may be readily perceptible, and changes of 10 dBA are perceived as a doubling in loudness.[6] However, few people are highly annoyed by daytime noise levels below 55 dBA.[7]

Loud noises, such as those from construction activities, can interfere with peoples' abilities to effectively communicate via speech, as well as other activities, resulting in annoyance or inconvenience. The EPA has found that a home interior noise level of 45 dBA L_{eq} generally protects speech and communication by

providing 100 percent intelligibility of speech sounds.[8] Other common daily activities that may be disrupted by elevated interior noise levels include watching television, listening to music, or activities requiring concentration (such as reading). The EPA has determined that, given the preservation of an indoor noise level associated with 100 percent speech intelligibility (i.e., 45 dBA L_{eq}), the average community reaction is not evident and "7 dBA below levels associated with significant complaints and threats of legal action." Any complaints and annoyance are dependent on "attitude and other non-level related factors."

NOISE ATTENUATION

Generally speaking, noise levels decrease, or "attenuate," as distances from noise sources to receivers increases. For each doubling of distance, noise from stationary or small, localized sources, commonly referred to as "point sources," may attenuate at a rate of 6 dBA for each doubling of distance. This attenuation is referred to as the inverse square law. For example, if a point source emits a noise level of 80 dBA at a reference distance of 50 feet, its noise level would be approximately 74 dBA at a distance of 100 feet, 68 dBA at a distance of 200 feet, etc. Noise emitted by "line" sources, such as highways, attenuates at the rate of 3 dBA for each doubling of distance.[9]

Factors such as ground absorption and atmospheric effects may also affect the propagation of noise. In particular, ground attenuation by non-reflective surfaces, such as soft dirt or grass, may contribute to increased attenuation rates of up to an additional 8-10 dBA per doubling of distance.[10]

Noise is most audible when traveling by direct line of sight, an unobstructed visual path between a noise source and a receiver. Barriers that break the line of sight between noise sources and receivers, such as walls and buildings, can greatly reduce source noise levels by allowing noise to reach receivers by diffraction only. Barriers can reduce source noise levels by up to 20 dBA, though it is generally infeasible for temporary barriers to reduce source noise levels by more than 15 dBA.[11] In cases where the noise path from source to receiver is direct but grazes the top of a barrier, noise attenuation of up to 5 dBA may still occur.[12]

CHARACTERISTICS OF VIBRATION AND DESCRIPTORS

Groundborne vibrations consist of rapidly fluctuating motions within the ground that have an average motion of zero. Vibrating objects in contact with the ground radiate vibration waves through various soil and rock strata to the foundations of nearby buildings.

Although groundborne vibration can be felt outdoors, it is typically only an annoyance to people indoors where the associated effects of the shaking of a building can be notable. When assessing annoyance from groundborne vibration, vibration is typically expressed as root mean square (rms) velocity in units of decibels of 1 microinch per second. To distinguish these vibration levels referenced in decibels from noise levels referenced in decibels, the unit is written as “VdB.”

In extreme cases, excessive groundborne vibration has the potential to cause structural damage to buildings. Common sources of groundborne vibration include construction activities such as blasting, pile driving, and operating heavy earthmoving equipment. However, construction vibration impacts on building structures are generally assessed in terms of peak particle velocity (PPV). For the purposes of this analysis, project-related impacts are expressed in terms of PPV. Typical vibration source levels from construction equipment are shown in Table 3.

Table 3: Vibration Levels of Construction Equipment

Construction Equipment	PPV at 25 Feet (inches/second)	rms Velocity in Decibels (VdB) at 25 Feet
Water Trucks	0.001	57

Notes:
PPV = peak particle velocity
VdB = velocity in decibels
rms = root mean square
Source: Compilation of scientific and academic literature, generated by Federal Transit Administration (FTA) and Federal Highway Administration (FHWA).

As vibration waves propagate from a source, the vibration energy decreases in a logarithmic nature and the vibration levels typically decrease by 6 VdB per doubling of the distance from the vibration source. As stated above, this drop-off rate can vary greatly depending on the soil type, but it has been shown to be effective enough for screening purposes, in order to identify potential vibration impacts that may need to be studied through actual field tests. The vibration level (calculated below as PPV) at a distance from a point source can generally be calculated using the vibration reference equation:

$$PPV = PPV_{ref} * (25/D)^n \text{ (in/sec)}$$

Where:

PPV_{ref} = reference measurement at 25 feet from vibration source
D = distance from equipment to property line
n = vibration attenuation rate through ground

According to Section 7 of the FTA Transit Noise and Vibration Impact Assessment Manual, an “n” value of 1.5 is recommended to calculate vibration propagation through typical soil conditions.[13]

Memorandum

Date: January 31, 2025

To: Steve Heaton, Laconia Development LLC

From: Tsui Li, Senior Air Quality Scientist and CEQA Project Manager, FirstCarbon Solutions
Philip Ault, Director of Noise and Air Quality, FirstCarbon Solutions

Subject: Water Quality Memorandum for the 2029 University Avenue Residential Project in Berkeley, California

At the request of Laconia Development LLC (project applicant), FirstCarbon Solutions (FCS) prepared this water quality memorandum to describe and summarize findings relating to water quality for the proposed 2029 University Avenue Residential Project (proposed project). The project site is located in the City of Berkeley (City), in Alameda County, California.

PROJECT DESCRIPTION

The proposed project is located on an approximately 0.28-acre site on Assessor's Parcel Number (APN) 57-2053-8-1 (Exhibit 2). The project site currently consists of 13,031 square feet of existing non-landmarked commercial structures and carport, and 7,320 square feet of hardscape. The project site is adjacent to residential uses and Berkeley Way to the north, University Avenue to the south, Nash Hotel Berkeley to the east, and mixed uses and Milvia Street to the west. Further out, the project site is surrounded by residential and commercial uses to the south, west, and north and is approximately 2.36 miles north of Interstate 580 (I-580) and approximately 1,000 feet west of University of California, Berkeley.

The City's General Plan designates the project site as "Downtown," which allows for a residential density of 40 to 100 dwelling units per acre. The City's Zoning Ordinance zones the project site as Downtown Mixed-Use District "C-DMU." The C-DMU zoning district permits residential uses with a Use Permit and retail uses with a Zoning Certificate. This designation permits the full range of housing types, including both schemes that are proposed by the project.

The project applicant is currently contemplating two design options for the project site: an apartment development and a student housing development. FCS has reviewed the two design options for the purpose of determining a more impactful design to analyze as the worst-case scenario. The designs for the two proposed buildings are virtually identical with respect to the overall physical size. The proposed project building (regardless of land use as a multifamily apartment or student housing) would be 23 stories with an additional basement, on a 0.28-acre site. Either option would be described by the following: a total residential square footage area of up to 191,000 square feet, limited parking (interior to the building on the second floor) encompassing approximately 8,000 square feet, and landscaping of 539 square feet. Therefore, the following analysis and findings would be applicable to both site designs.

Site Plan

WATER QUALITY ANALYSIS

The proposed project is in the City of Berkeley and within the jurisdiction of the San Francisco Bay Regional Water Quality Control Board (San Francisco Bay RWQCB), which implements the Water Quality Control Plan for the San Francisco Bay Basin (Basin Plan).[1] The Basin Plan designates beneficial uses for surface water bodies and groundwater that the California State Water Resources Control Board (State Water Board) will protect, as well as water quality objectives and strategies for achieving these objectives, such as discharge prohibitions to attain water quality goals. The Basin Plan identifies key pollutants of concern for monitoring and reduction in the San Francisco Bay, including pesticides, diazinon, mercury, polychlorinated biphenyls (PCBs), selenium, bacteria, pathogens, and sediment.[2] The San Francisco Bay RWQCB enforces the National Pollutant Discharge Elimination System (NPDES) permit system, Water Discharge Requirements (WDRs), Clean Water Act Section 401 water quality certifications, and other water quality-related approvals in the San Francisco Bay Area, including the project site.

The proposed project would be served with water and wastewater services provided by the East Bay Municipal Utility District (EBMUD). As part of their Annual Water Quality Report, EBMUD conducts water quality sampling for several contaminants at their Water Treatment Plants (WTPs), including those for Walnut Creek, Lafayette, Orinda, Sobrante, and Upper San Leandro.[3] The 2023 Annual Water Quality Report measured the EBMUD's water at WTPs for levels of microbiological pollutants, inorganic pollutants, disinfection byproducts, chloride, odor, dissolved solids, ionic compounds, sulfates, and other parameters of interest.[4] The EBMUD determined that water quality standards met or surpassed every public health requirement set by the State Water Board and the United States Environmental Protection Agency (EPA).[5]

The project site is located the East Bay Plain Subbasin groundwater basin, which is managed by the EBMUD Groundwater Sustainability Agency (GSA) and the City of Hayward GSA under the East Bay Plain Subbasin Groundwater Sustainability Plan (GSP).[6] As of 2023, 3,600 acre-feet of groundwater was extracted within the East Bay Plain Subbasin. Between 2015 and 2023, total water use within the East Bay Plain Subbasin ranged between 93,500 and 100,500 acre-feet per year, with approximately 3.7 percent of the supplied water being groundwater.[7]

The project site is currently occupied by retail commercial uses and is entirely covered with impervious surfaces. In addition, the area surrounding the project site is also mostly covered with impervious hardscaped surfaces, with stormwater drains connecting to the City's stormwater drainage system. The proposed project would construct 539 square feet of landscaping. As such, the proposed project would decrease impervious surfaces on-site by approximately 4 percent from existing conditions, decreasing the amount of stormwater runoff from the project site compared to existing conditions.[8]

Construction and operation of the proposed project would be subject to federal and State water quality regulations, which are enforced by the San Francisco Bay RWQCB. The City of Berkeley is a permittee under the Municipal Regional Stormwater NPDES Permit (MRP) Order R2-2009-0074, NPDES Permit No. CAS612008. In accordance with the MRP, the City establishes quality and monitoring requirements for discharging urban runoff. These requirements include the use of Best Management Practices (BMPs) for new and significant redevelopment projects, public education and outreach, industrial inspections, and guidance to the City's own Public Works staff to reduce or remove pollutant loads from urban runoff to the maximum extent practicable.

To comply with the MRP, the City requires that all development plans that replace or construct over 2,500 square feet, including the proposed project, meet standards contained in the C.3 and C.6 Stormwater Requirements Checklist.[9] In addition, the proposed project would comply with the State General Construction Permit, which requires the proposed project to submit a Storm Water Pollution Prevention Plan (SWPPP) to the City prior to the issuance of a building permit. As the proposed project would also construct over 500 square feet of landscaping, the proposed project would be required to comply with the State's Model Water Efficient Landscape Ordinance (MWELO), as well as the EBMUD's Section 31 Water Efficiency Requirements and MWELO Compliance document.

The proposed project would be required to comply with applicable regulations, policies, and actions relating to water quality contained in the City's General Plan, Downtown Area Plan, and Municipal Code. The proposed project would additionally be required to comply with the City's Standard Conditions of Approval (COAs) prior to the acquisition of a building permit. Conformance with existing permits and the application of existing local and State regulations would prevent water quality standard violations and increases in surface runoff. Local policies, actions, and regulations applicable to the proposed project and relevant to water quality include, but are not limited to, the following.

[8] The project site is approximately 0.28 acre or approximately 12,196 square feet. The proposed project would construct approximately 539 square feet of pervious surfaces across the ground floor and rooftop, resulting in an approximately 4 percent increase of pervious surfaces on-site.

[9] City of Berkeley. 2016. Stormwater Requirements Checklist. January 14.

General Plan Policies and Actions

Policy EM-5 "**Green" Buildings.** Promote and encourage compliance with "green" building standards.

Actions

A. Encourage, and where appropriate require, new construction and major remodel projects to be sited, designed, constructed, and operated to enhance the well-being of their occupants and to minimize present and future impacts on the community and the natural environment.
B. Encourage landscaping for water and energy efficiency.
C. Encourage buildings to incorporate renewable energy and energy- and water-efficient technologies.
D. Encourage use of recycled-content construction materials.
E. Encourage efforts to improve indoor air quality and to provide a comfortable and healthy environment.
F. Encourage reduction of construction and demolition waste.
G. Encourage construction of durable buildings.
H. Establish a green design assistance and green building certification program.

Policy EM-24 **Sewers and Storm Sewers.** Protect and improve water quality by improving the citywide sewer system.

Actions

E. Ensure that new development pays its fair share of improvements to the storm sewerage system necessary to accommodate increased flows from the development.

Policy EM-25 **Groundwater.** Protect local groundwater by promoting enforcement of State water quality laws that ensure nondegradation and beneficial use of groundwater.

Policy EM-26 **Water Conservation.** Promote water conservation through City programs and requirements.

Actions

A. Encourage drought-tolerant landscaping and low-flow irrigation systems.
B. Consider participation in the East Bay Municipal Utility District's East Bay-shore Recycled Water Project to make recycled water available for irrigation and other nonpotable uses.

Policy EM-31 **Landscaping.** Encourage drought-resistant, rodent-resistant, and fire-resistant plants to reduce water use, prevent erosion of soils, improve habitat, lessen fire danger, and minimize degradation of resources.

Downtown Area Plan Policies and Actions

Policy ES-4.3 **Water Conservation, Reuse and Retention.** Promote best practices for substantial water conservation, reuse, and retention as part of new construction, renovations, site improvements, and landscaping.

A. Require on-site water conservation and stormwater retention features, and establish development incentives for performance in this area.
B. Development projects should generate no new net rainwater runoff.
C. Work with East Bay Municipal Utility Districts to provide incentives for the installation and/or replacement of water fixtures for greater efficiency.
D. Encourage the use of innovative water conservation technologies, such as waterless urinals and water reuse, through the development of local guidelines and/or alternative building code requirements.
E. Encourage cisterns and devices to retain and make use of rainwater (see policies under Goals ES-5 and OS-2).
F. Encourage water recycling through the use of graywater for flushing toilets, irrigation, and other purposes, by working to reform existing regulations that may discourage such practices, and by developing guidelines to illustrate opportunities and design considerations.

Policy OS-2.5 **Water Conservation.** New landscaping and retrofits should incorporate effective water conservation and water reuse features.

A. Establish water conservation and recycling standards for new landscaping. Require use of drought-tolerant plants and advanced irrigation systems to substantially reduce water usage.

Policy ES-2.4 **Downtown Energy and Water Facilities.** Consider sustainable infrastructure that serves several parcels or blocks in Downtown and abutting areas.

Municipal Code Ordinances

Chapter 7.76–Clean Stormwater Fund

Municipal Code Chapter 7.76 requires that all property owners within the City connecting to the City's stormwater drainage system pay a fee for clean stormwater activities, which allows the City to raise the income and revenue necessary to improve the quality of stormwater discharged from the City's stormwater drainage system.

Chapter 17.16–Construction Requirements for Sanitary Sewers and Storm Drains

Municipal Code Chapter 17.16 establishes requirements for the connection and operation of new private development in the City to the City's sanitary sewer lines and storm drains.

Chapter 17.20–Reduction of Stormwater Pollution

Municipal Code Chapter 17.20 establishes requirements to eliminate non-stormwater discharges to the City's storm drain system as well as to reduce the contamination of stormwater by pollutants to the maximum extent practicable. Specifically, this chapter introduces required practices and mandatory compliance with federal, State, and City BMPs during construction and development activities.

1.1.1 - City Standard Conditions of Approval

As discussed above, approval and development of the proposed project would be subject to the City of Berkeley's Standard COAs, pursuant to the City's Municipal Code Section 23.406.040 and, as applicable here, the City's MRP. The City of Berkeley has the following Standard COAs relevant to water quality that would apply to the proposed project. Unless otherwise discussed, the proposed project is assumed to incorporate these COAs.

Stormwater Requirements

The applicant shall demonstrate compliance with the requirements of the City's NPDES permit as described in Municipal Code Chapter 17.20. The following conditions apply:

A. The project plans shall identify and show site-specific Best Management Practices (BMPs) appropriate to activities conducted on-site to limit to the maximum extent practicable the discharge of pollutants to the City's storm drainage system, regardless of season or weather conditions.

B. Trash enclosures and/or recycling area(s) shall be covered; no other area shall drain onto this area. Drains in any wash or process area shall not discharge to the storm drain system; these drains should connect to the sanitary sewer. Applicant shall contact the City of Berkeley and the East Bay Municipal Utility District (EBMUD) for specific connection and discharge requirements. Discharges to the sanitary sewer are subject to the review, approval, and conditions of the City of Berkeley and EBMUD.

C. Landscaping shall be designed with efficient irrigation to reduce runoff, promote surface infiltration, and minimize the use of fertilizers and pesticides that contribute to stormwater pollution. Where feasible, landscaping should be designed and operated to treat runoff. When and where possible, xeriscape and drought-tolerant plants shall be incorporated into new development plans.

D. Design, location, and maintenance requirements and schedules for any stormwater quality treatment structural controls shall be submitted to the Department of Public Works for review

with respect to reasonable adequacy of the controls. The review does not relieve the property owner of the responsibility for complying with Municipal Code Chapter 17.20 and future revisions to the City's overall stormwater quality ordinances. This review shall be conducted prior to the issuance of a building permit.

E. All paved outdoor storage areas must be designed to reduce/limit the potential for runoff to contact pollutants.

F. All on-site storm drain inlets/catch basins must be cleaned at least once a year immediately prior to the rainy season. The property owner shall be responsible for all costs associated with proper operation and maintenance of all storm drainage facilities (pipelines, inlets, catch basins, outlets, etc.) associated with the project, unless the City accepts such facilities by Council action. Additional cleaning may be required by City of Berkeley Public Works Engineering Dept.

G. All private or public projects that create and/or replace 10,000 square feet or more of impervious surface must comply with Provision C.3 of the Alameda County NPDES permit and must incorporate stormwater controls to enhance water quality. Permit submittals shall include a Stormwater Requirement Checklist and detailed information showing how the proposed project will meet Provision C.3 stormwater requirements, including (a) site design measures to reduce impervious surfaces, promote infiltration, and reduce water quality impacts; (b) Source Control Measures to keep pollutants out of stormwater runoff; (c) stormwater treatment measures that are hydraulically sized to remove pollutants from stormwater; (d) an Operations and Maintenance (O and M) agreement for all stormwater treatment devices and installations; and (e) engineering calculations for all stormwater devices (both mechanical and biological).

H. All on-site storm drain inlets must be labeled “No Dumping–Drains to Bay” or equivalent using methods approved by the City.

I. Most washing and/or steam cleaning must be done at an appropriately equipped facility that drains to the sanitary sewer. Any outdoor washing or pressure washing must be managed in such a way that there is no discharge or soaps or other pollutants to the storm drain. Sanitary connections are subject to the review, approval, and conditions of the sanitary district with jurisdiction for receiving the discharge.

J. Sidewalks and parking lots shall be swept regularly to prevent the accumulation of litter and debris. If pressure washed, debris must be trapped and collected to prevent entry to the storm drain system. If any cleaning agent or degreaser is used, wash water shall not discharge to the storm drains; wash waters should be collected and discharged to the sanitary sewer. Discharges to the sanitary sewer are subject to the review, approval, and conditions of the sanitary district with jurisdiction for receiving the discharge.

K. The applicant is responsible for ensuring that all contractors and sub-contractors are aware of and implement all stormwater quality control measures. Failure to comply with the approved construction BMPs shall result in the issuance of correction notices, citations, or a project stop work order.

Public Works

- All piles of debris, soil, sand, or other loose materials shall be covered at night and during rainy weather with plastic at least one-eighth millimeter thick and secured to the ground.
- The applicant shall ensure that all excavation takes into account surface and subsurface waters and underground streams so as not to adversely affect adjacent properties and right-of-way.
- The project sponsor shall maintain sandbags or other devices around the site perimeter during the rainy season to prevent on-site soils from being washed off-site and into the storm drain system. The project sponsor shall comply with all City ordinances regarding construction and grading.
- Prior to any excavation, grading, clearing, or other activities involving soil disturbance during the rainy season, the applicant shall obtain approval of an erosion prevention plan by the Building and Safety Division and the Public Works Department. The applicant shall be responsible for following these and any other measures required by the Building and Safety Division and the Public Works Department.

Summary of Impacts

Potential impacts related to the proposed project are identified and analyzed below in accordance with guidance questions contained in Appendix G of the California Environmental Quality Act (CEQA) Guidelines regarding water quality.

No streams or rivers are located on or immediately adjacent to the project site. Furthermore, according to the Federal Emergency Management Agency (FEMA) National Flood Hazard Layer (NFHL), the project site is not located within an area with flood risks.[10] The project site is also not located in a tsunami hazard area.[11] As stated above, water would be provided to the proposed project by the EBMUD. Water supplied within the East Bay Plain Subbasin by the EBMUD consists of approximately 3.7 percent groundwater.[12]

Since no portion of the project site is located on a shoreline susceptible to tsunamis or near streams or rivers, the proposed project would not result in substantial inundation by seiche, tsunami, or stream or river flooding and no impact would occur related to release of pollutants due to related inundation.

During construction activity, runoff carrying eroded soils and pollutants could enter storm drainage systems and enter nearby waterbodies, increasing sedimentation and degrading downstream water quality. The sediments could also seep into the associated groundwater table. This would represent a

[10] Federal Emergency Management Agency (FEMA). 2009. FEMA's National Flood Hazard Layer (NFHL) Viewer. Website: https://www.arcgis.com/apps/webappviewer/index.html?id=8b0adb51996444d4879338b5529aa9cd. Accessed December 27, 2024.

[11] California Department of Conservation. 2022. CGS Information Warehouse: Tsunami Hazard Area Map. Website: https://maps.conservation.ca.gov/cgs/informationwarehouse/ts_evacuation/. Accessed December 27, 2024.

[12] East Bay Municipal Utility District (EBMUD) and City of Hayward. 2024. East Bay Plain Subbasin Groundwater Sustainability Plan Water Year 2023 Annual Report. March.

potentially significant construction impact related to surface and groundwater quality. However, construction of the proposed project would be required to adhere to the MRP through the mandatory submission of a SWPPP, which would ensure that stormwater runoff during construction contains a less than significant level of pollutant load. In addition, the proposed project would be required to comply with the City's Standard COAs, which mandate that construction of the proposed project implement BMPs on-site to limit the discharge of stormwater pollutants to the maximum extent practicable.

As described above, the proposed project would decrease impervious surfaces on-site by approximately 4 percent from existing conditions, decreasing the amount of stormwater runoff from the project site compared to the existing project site, which is completely covered by impervious surfaces. Additionally, the proposed stormwater drainage system would be designed and constructed in accordance with the requirements of the City's NPDES permit described in Municipal Code Chapter 17.20. The proposed project would also comply with all applicable federal, State, and local regulations, policies, and actions pertaining to water quality. Operation of the proposed project would mandatorily comply with the City's Standard COAs, which require that the proposed project provide appropriate stormwater quality treatment, subject to review by the City's Public Works Department. As such, the proposed project would be consistent with stormwater requirements in Provision C.3 of the Alameda County NPDES permit. Moreover, the proposed project would mandatorily comply with Municipal Code Chapter 7.76, Clean Stormwater Fund, which requires that all property owners within the City connecting to the City's stormwater drainage system pay a fee to the City for the maintenance and improvement of the City's stormwater infrastructure.

Given the above, the proposed project would not substantially degrade water quality, violate any water quality standards, or substantially alter the existing drainage pattern of the project area such as to cause erosion and/or siltation on- and off-site, both during construction activities and operation of the proposed project. Furthermore, the proposed project would not create or contribute runoff water which would exceed the capacity of existing or planned stormwater drainage systems or provide substantial additional sources of polluted runoff, both during construction activities and during operation of the proposed project.

The project site does not contain any active groundwater wells, nor are any proposed. The proposed project would be serviced by the EBMUD for water supply. Furthermore, the proposed project would comply with all applicable federal, State, and local regulations, policies, and actions pertaining to water quality. As such, the proposed project would not result in any significant effects relating to groundwater.

In summary, the project site does not contain flood or tsunami hazards and is not adjacent to any streams or rivers. In addition, the proposed project would comply with all applicable federal, State, and local regulations, policies, and actions pertaining to water quality, including the San Francisco Bay RWQCB Basin Plan, subject to review and approval by the City's Public Works Department. As such, approval of the proposed project would not result in any significant effects relating to water quality, and impacts relating to water quality would be less than significant.

CONCLUSION

Based on the project understanding described above, the proposed project would result in less than significant impacts to water quality after incorporation of the City's Standard COAs, compliance with the federal and State regulations, and compliance with City's above-listed plans, policies, and regulations.

Thank you for the opportunity to conduct this water quality impacts analysis. Please feel free to contact Phil Ault (pault@fcs-intl.com) should you have any questions.

Sincerely,

Philip Ault, Associate Director

1. INTRODUCTION

Rowan Williams Davies & Irwin Inc. (RWDI) was retained to conduct a pedestrian wind assessment based on Computational Fluid Dynamics (CFD) simulations for the proposed project at 2029 University Avenue in Berkeley, CA. The objective of this assessment is to provide an evaluation of the potential pedestrian level wind impact of the proposed project on the surrounding environment.

The project site is located on the north side of University Avenue between Milvia Street and Shattuck Avenue. The project site is currently occupied by a low rise building and is surrounded by low- to mid-rise suburban neighbourhoods (Image 1).

The project consist of a 23-story residential building with a rooftop amenity terrace. Key areas of interest for this assessment include the main entrance to the building on University Avenue, sidewalks and the nearby properties (Image 3).

Following the CFD simulations, the updated building design was received on December 11, 2024. The new design includes two stories of parking garage now positioned above ground, adding two additional floors to the tower. The impact of the new design on the prediction of wind conditions is discussed in detail in Section 4.5 of the report.

1. INTRODUCTION

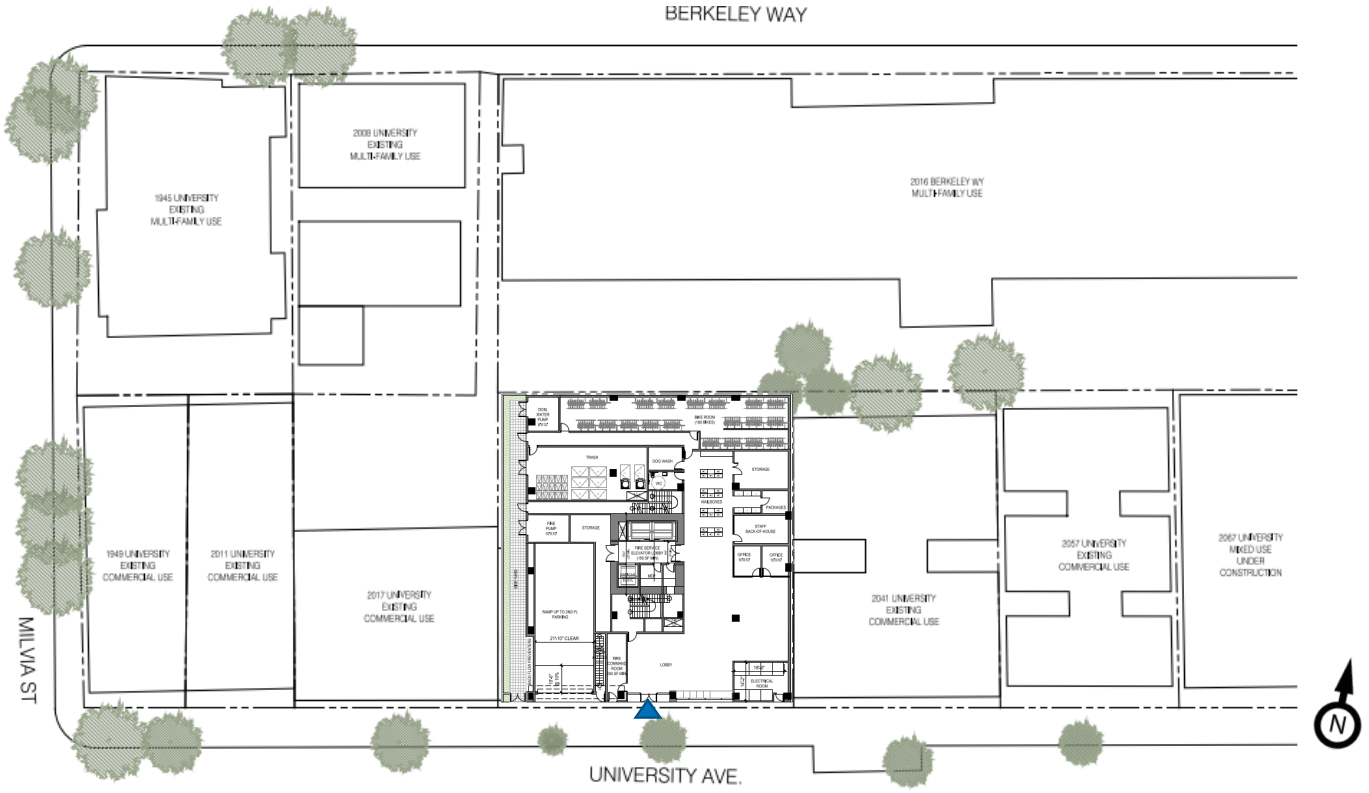

Image 3: Project Site Plan with Overlay of Ground Floor Plan

RWDI Project #2409847
December 19, 2024

2. METHODOLOGY

2.1 Objective

The objective of this assessment is to provide an evaluation of the potential impact of the proposed development on wind conditions in pedestrian areas on and around it based on Computational Fluid Dynamics (CFD) modeling. The assessment is based on the following:

- A review of the regional long-term meteorological data from Metropolitan Oakland International Airport;
- Original architectural plan and 3D model of the proposed project received on November 4 and November 6, 2024, and updated design received on November 26 and December 11, 2024;
- The use of *Orbital Stack*, an in-house CFD tool;
- RWDI's engineering judgment, experience, and expert knowledge of wind flows around buildings[1-3]; and,
- The Lawson wind comfort and safety criteria.

Note that other microclimate issues such as those relating to cladding and structural wind loads, door operability, air quality, noise, vibration, etc. are not part of the scope of this assessment

2.2 CFD for Wind Simulation

CFD is a numerical technique that can be used for simulating wind flows in complex environments. For this analysis, CFD techniques were used to generate a virtual wind tunnel where flows around the site and its surroundings were simulated in full scale. The computational domain that covered the site and its surroundings was divided into millions of small cells where calculations were performed, yielding a prediction of wind conditions across the entire study domain. CFD excels as a tool for wind modeling, presenting early design advice, comparing different design and site scenarios, resolving complex flow physics, and helping diagnose problematic wind conditions.

While the computational modeling method used in the current assessment does not explicitly simulate the transient behaviour of turbulent wind, its effects were estimated based on other calculated quantities. RWDI has found this approach to be appropriate for the assessment of typical wind comfort conditions. Wind safety issues, which relate to transient, higher-speed gusts, are discussed qualitatively, based on the CFD predictions and our extensive wind-tunnel experience for similar projects.

In order to quantify the transient behaviour of wind and refine any conceptual mitigation measures, a more detailed assessment would be required using either boundary-layer wind tunnel or transient computational modeling.

2. METHODOLOGY

2.3 Simulation Model

CFD simulations were completed for two scenarios:

- Existing: Existing site and surroundings (Image 5a), and
- Proposed: Proposed development with the existing surroundings (Image 5b).

The computer model of the proposed building is shown in Image 4, and the Existing and Proposed scenarios with the proximity model are shown in Images 5a and 5b, respectively. The 3D models were simplified to include only the necessary building and terrain details that would affect the local wind flows in the area and around the site. Landscaping and other smaller architectural and accessory features were not included in the computer model in order to provide more conservative wind conditions (as is the norm for this level of assessment).

The wind approaching the modelled area were simulated for 16 directions (starting at 0°, at 22.5° increments around the compass), accounting for the effects of the atmospheric boundary layer and terrain impacts. Wind data were obtained in the form of ratios of wind speeds at approximately 5 ft above concerned levels, to the mean wind speed at a reference height. The data was then combined with meteorological records obtained from Metropolitan Oakland International Airport to determine the wind speeds and frequencies in the simulated areas.

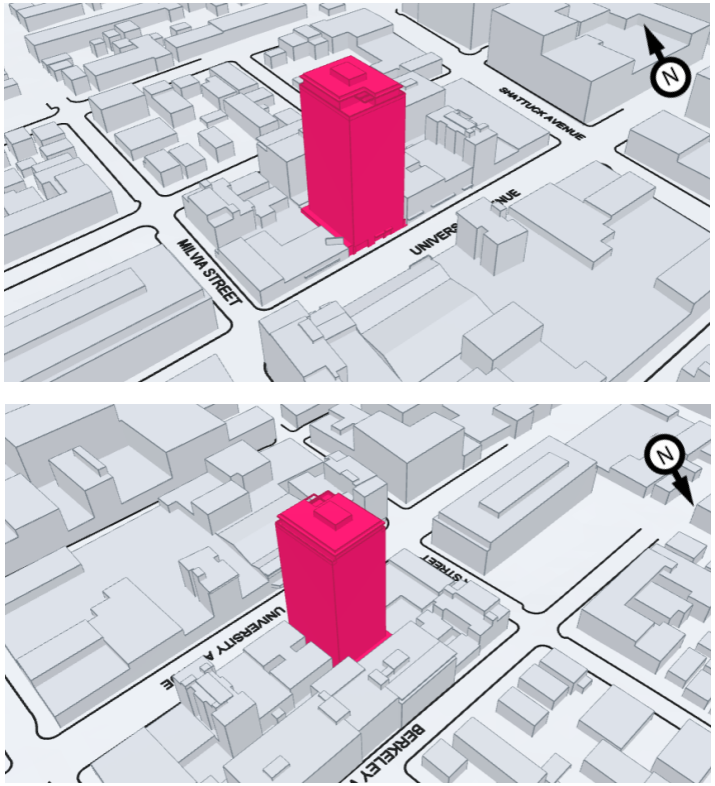

Image 4: Computer model of the proposed project

2. METHODOLOGY

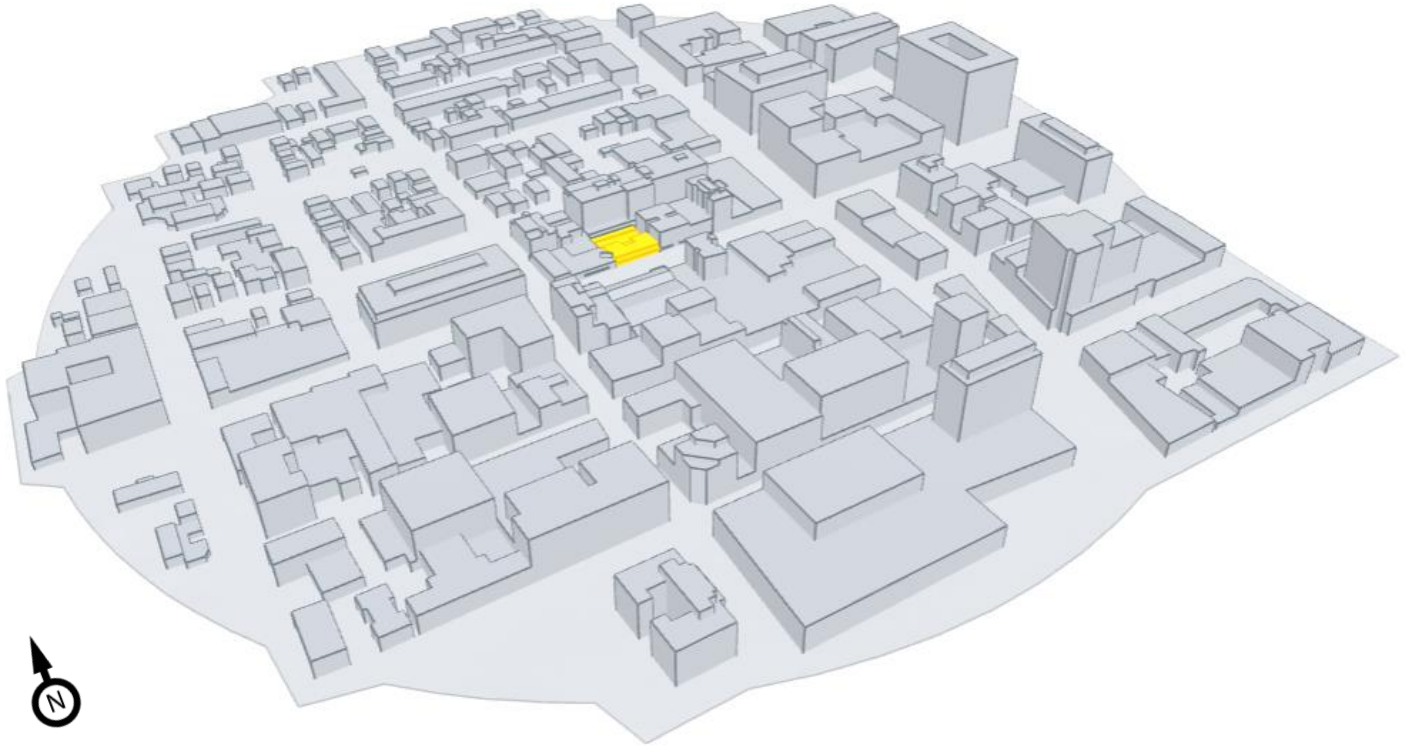

Image 5a: Computer model of the existing site and extended surroundings

2. METHODOLOGY

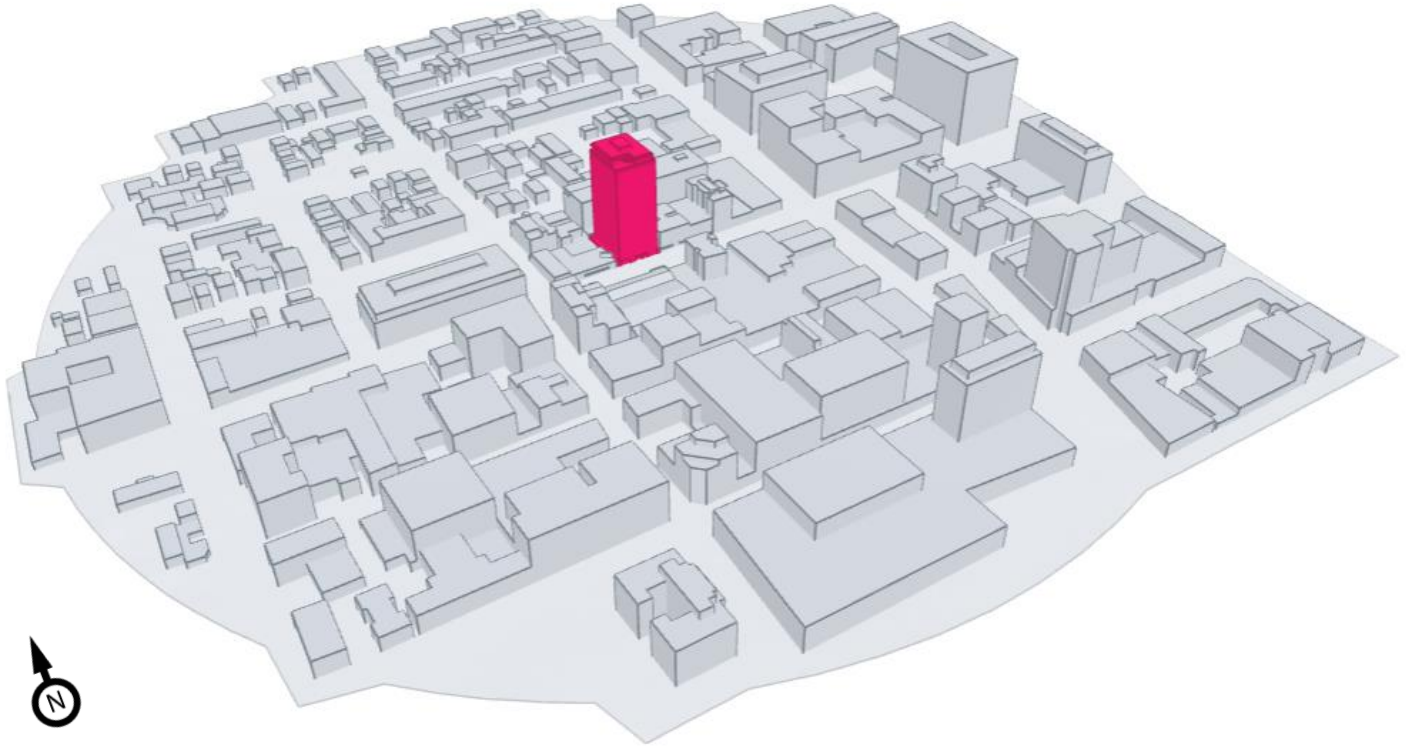

Image 5b: Computer model of the proposed project and extended surroundings

2. METHODOLOGY

2.4 Meteorological Data

Long-term wind data recorded at Metropolitan Oakland International Airport between 1990 and 2020 were analyzed for four seasonal periods – spring (March to May), summer (June to August), fall (September to November) and winter (December to February). Image 6 graphically depicts the directional distributions of wind frequencies and speeds for these periods.

Winds from the west-southwest through northwest directions are predominant throughout the year, as indicated by the wind roses. Winds from the southeast are also frequent during the winter. Moderate to strong winds of a mean speed greater than 15 mph measured at the airport (at an anemometer height of 30 ft) could potentially interact with tall buildings to result in a notable increase in ground-level wind speeds (yellow and red bands in Image 6).

Wind statistics were combined with the simulated data to predict the wind conditions at the project site and assessed against the wind criteria for pedestrian comfort.

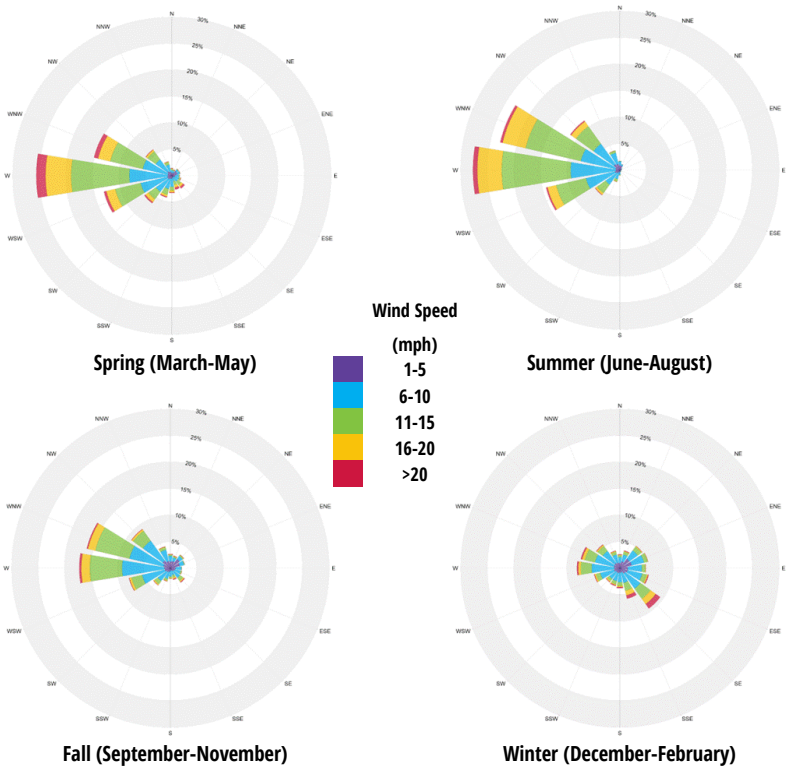

Image 6: Directional distribution of winds approaching Metropolitan Oakland International Airport from 1990 to 2020.

3. WIND CRITERIA

The pedestrian wind comfort criteria used in this study were developed by T.V. Lawson at Bristol University, UK. These criteria are well-established as the benchmark against which to assess the wind microclimate around buildings. Generally, wind conditions are considered acceptable if they produce conditions suitable for the intended activities in the area. The categories listed in the table below are based on these criteria.

3.1 Pedestrian Comfort

Pedestrian comfort is associated with common wind speeds conducive to different levels of human activity. Wind conditions are considered suitable for a given comfort category if the associated mean wind speeds are expected for at least 95% of the time (considering winds occurring for all hours of the day). These criteria for wind speeds represent average wind tolerance. They are sometimes subjective and regional differences in wind climate and thermal conditions as well as variations in age, health, clothing, etc. can also affect people's perception of the wind climate.

Comfort Category	GEM Speed (mph)	Description (Based on seasonal compliance of 95%)
Pedestrian Sitting	≤ 9	Low wind speed where, for example, one could read a newspaper without having it blown away
Pedestrian Standing	≤ 13.5	Comfortable for standing for a short time of exposure at main building entrances, bus stops, and other places
Pedestrian Walking	≤ 18	Wind speeds that would be acceptable for window shopping or strolling along a downtown street
Business Walking	≤ 22	Wind conditions where the objective is to walk from A to B or for cycling
Uncomfortable	> 22	Strong winds considered a nuisance for all pedestrian activities. Wind mitigation is typically recommended

3.2 Pedestrian Safety

Pedestrian safety is associated with excessive Gust Speeds that can adversely affect a person's balance and footing. These are usually infrequent events but deserve special attention due to the potential impact on pedestrian safety.

Safety Criterion		Gust Speed (mph)	Description (Based on a seasonal exceedance of 0.04% and annual exceedance of 0.022% of the time)
Exceeded	Frequent Pedestrian Area	> 33.5	Excessive gust speeds that can adversely affect a pedestrian's balance and footing.
	Infrequent Pedestrian Area	> 45	

4. RESULTS AND DISCUSSION

4.1 Wind Flow around Buildings

Wind generally tends to flow over buildings of uniform height, without disruption. Buildings that are taller than their surroundings tend to intercept and redirect winds around them. The mechanism in which winds are directed down the height of a building is called *Downwashing*. These flows subsequently move around exposed building corners, causing a localized increase in wind activity due to *Corner Acceleration*. Stepped massing, low roofs and canopies diffuse downwash and reduce the potential wind impact on the ground level. These flow patterns are illustrated in Image 7.

The proposed project, at 23-levels, is taller than the surrounding buildings. A building with such height in this surrounding context would be directly exposed to the prevailing westerly winds, and result in increased wind activity around it at grade level. This negative impact, however, is expected to be moderated by the low roofs of the adjacent buildings, which function similarly to stepped building massing or podiums, buffering the downwashing wind flows.

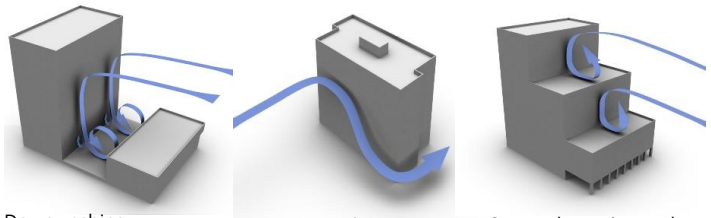

Image 7: General wind flow patterns

RWDI Project #2409847
December 19, 2024

4.2 Presentation of Results

The predicted seasonal wind comfort conditions for the Existing and Proposed scenarios are presented in Images 8 through 9. The results are presented as color contours of wind speeds calculated based on the wind criteria (Section 4). The contours represent wind speeds at a horizontal plane approximately 5 ft above the ground level.

The assessment against the safety criterion (Section 4) was conducted qualitatively based on the predicted wind conditions and our extensive experience with wind tunnel assessments.

Target Conditions

For the current development, wind speeds comfortable for pedestrian walking or business walking are appropriate for sidewalks and walkways where pedestrians are likely to be active and moving intentionally. Lower wind speeds comfortable for pedestrian standing are required for entrances and areas where people are expected to be engaged in passive activities.

4. RESULTS AND DISCUSSION

4.3 Existing Scenario

In the existing scenario, appropriate wind conditions that are comfortable for pedestrian sitting or pedestrian standing are observed on and around the existing site throughout the year (Image 8).

Wind speeds at all areas assessed also meet the pedestrian safety criterion.

4.4 Proposed Scenario

Although the introduction of a relatively tall building in a mid-rise context will result in an increase in wind speeds, the impact of this project on local wind conditions is expected to be limited and localized.

With the proposed project in place, wind conditions along the nearby sidewalks/walkways are expected to remain primarily the same levels as the existing conditions, i.e. comfortable for pedestrian sitting or pedestrian standing throughout the year (Image 9).

The most noticeable increase in wind speeds is observed on University Avenue near the southwest corner of the proposed building, where wind conditions suitable for pedestrian walking are predicted during spring, summer, and fall (see yellow areas in Images 9a through 9c). These wind conditions are still considered appropriate for pedestrian sidewalk uses. Similar conditions are also anticipated in an isolated area of the parking lot located at the north end of the project during the spring and summer (see Images 9a and 9b). These conditions are considered satisfactory for the intended use of the parking lot.

At the main lobby entrance of the proposed building, wind comfort conditions are anticipated to be suitable for pedestrian sitting or standing throughout the year, meeting the requirements for the intended activities at a main entrance.

Positively, wind speeds are expected to satisfy the pedestrian wind criterion around the project.

4. RESULTS AND DISCUSSION

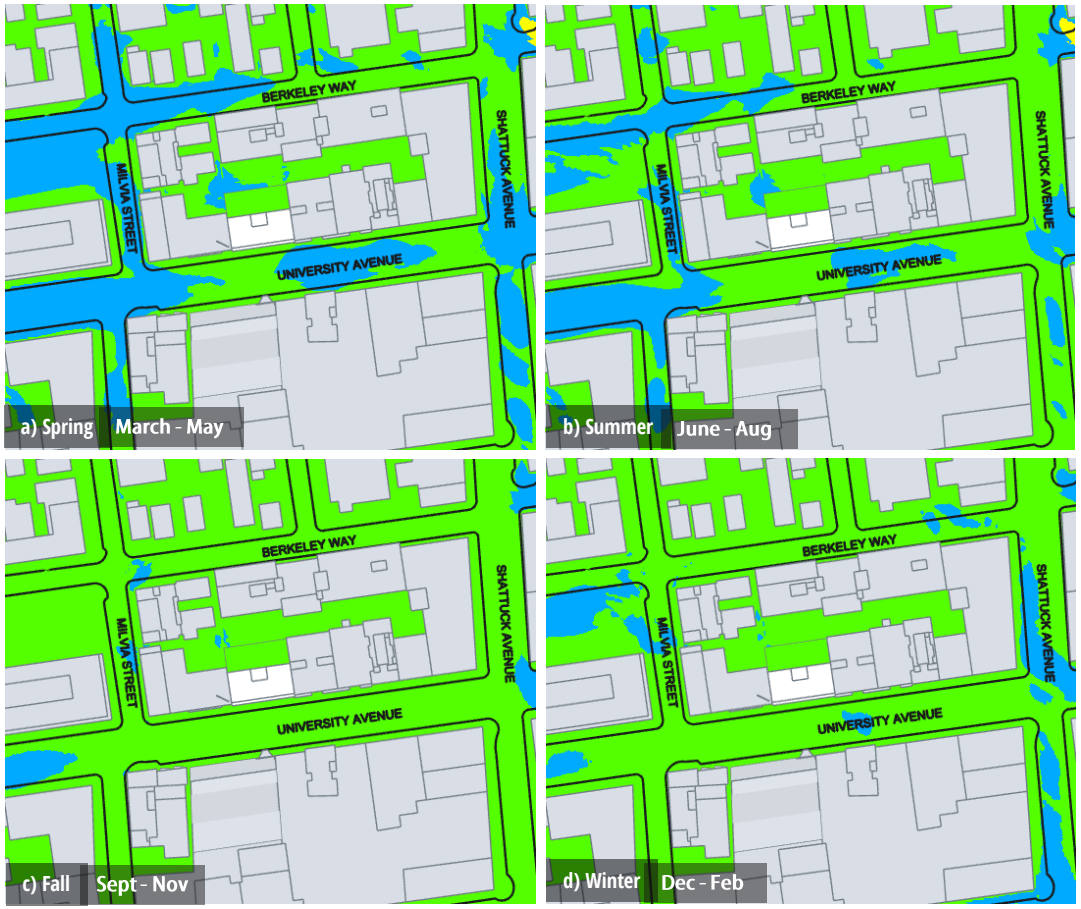

Image 8: Predicted wind conditions – Existing Scenario

RWDI Project #2409847

4. RESULTS AND DISCUSSION

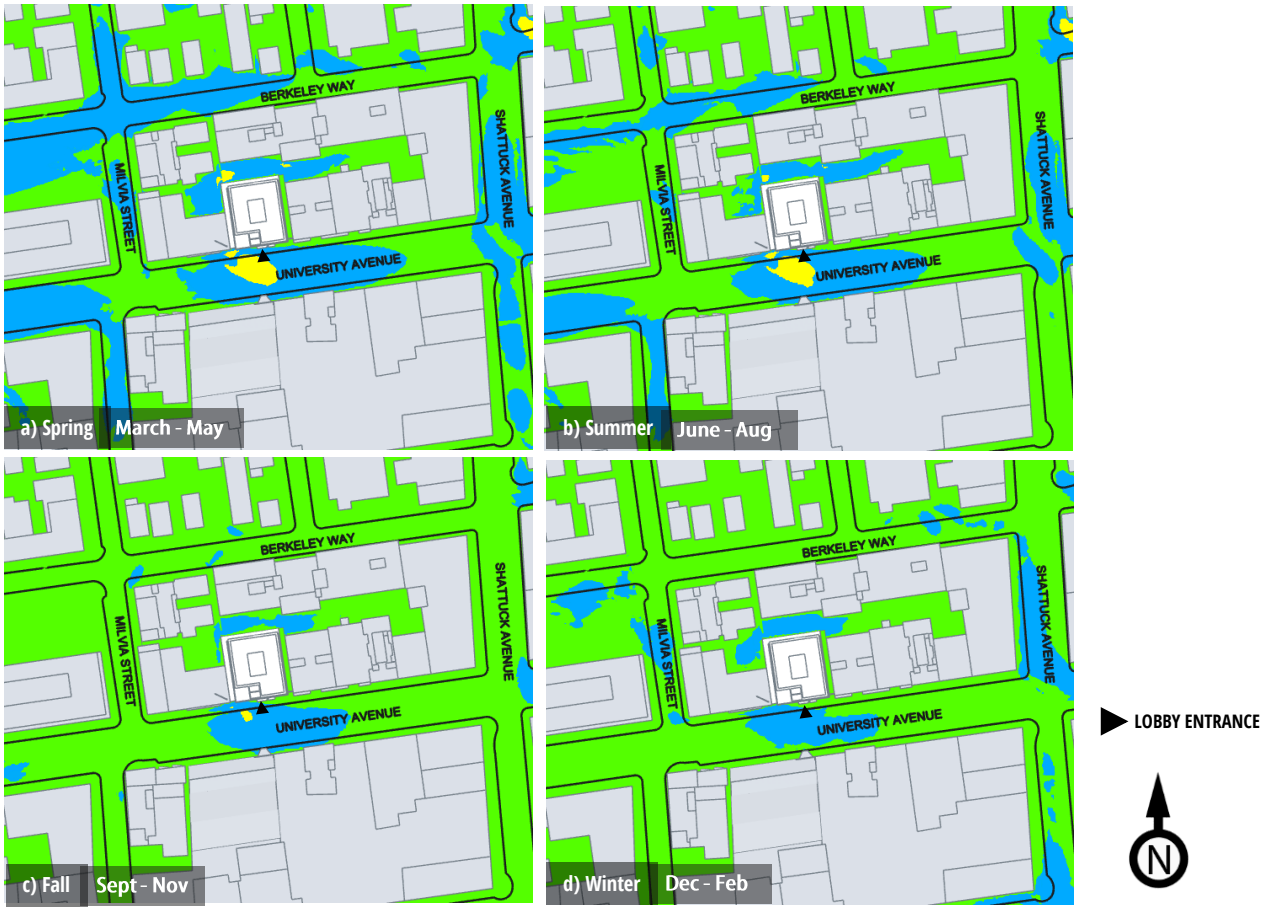

Image 9: Predicted wind conditions – Proposed Scenario

RWDI Project #2409847
December 19, 2024

4. RESULTS AND DISCUSSION

4.5 Updated Building Design

Following the CFD simulations, RWDI was made aware of a design modification which featured two stories of below-grade parking garage now positioned above-ground. This design modification resulted in the addition of two additional levels to the overall building height. While the increase in height to 23 levels is expected to slightly elevate wind speeds at ground level, the porous wall design of the two parking garage stories (see Image 10) is considered beneficial, as it relieves wind pressure on the west façade and mitigates the effects of corner acceleration around the west building corners. When combined with the proposed landscaping (Image 10), the new building design is not anticipated to significantly alter the wind conditions compared to those of the simulated building design herein.

Wind conditions suitable for pedestrian walking are still predicted on University Avenue near the southwest building corner, and the overall conclusions drawn from the current CFD simulations remain valid.

Image 10: Rendering of the Updated Building Design Indicating Porous Garage Walls and Street Landscaping

5. SUMMARY

RWDI was retained to provide an assessment of the potential pedestrian level wind impact of the proposed project at 2029 University Avenue in Berkeley, CA. Our assessment was based on computational modeling, simulation and analysis of wind conditions for the proposed development design, in conjunction with the local wind climate data and the Lawson wind criteria for pedestrian comfort and safety. Our findings are summarized as follows:

- Wind conditions in the existing scenario are appropriate for the intended pedestrian use at all areas assessed.
- The addition of the proposed project is expected to increase wind speeds at ground level, especially around the southwest building corner on University Avenue. However, appropriate wind comfort conditions are still predicted at all areas assessed including the main building entrance.
- Wind speeds that meet the pedestrian safety criterion are expected at all areas assessed in both the Existing and the Proposed scenarios.
- The updated building design, received after the CFD simulations, includes two additional garage stories above ground. Due to the incorporation of positive architectural and landscaping features, this increase in building height is not expected to alter the predictions made from the current CFD simulations.

6. DESIGN ASSUMPTIONS

The findings/recommendations in this report are based on the building geometry and architectural drawings communicated to RWDI, listed below. Should the details of the proposed design and/or geometry of the building change significantly, results may vary.

File Name	File Type	Date Received (mm/dd/yyyy)

Changes to the Design or Environment

It should be noted that wind comfort is subjective and can be sensitive to changes in building design and operation that are possible during the life of a building. In the event of changes to the design, construction, or operation of the building in the future, RWDI could provide an assessment of their impact on the discussions included in this report. It is the responsibility of others to contact RWDI to initiate this process.

7. STATEMENT OF LIMITATIONS

This report was prepared by Rowan Williams Davies & Irwin Inc. for Laconia Development LLC ("Client"). The findings and conclusions presented in this report have been prepared for the Client and are specific to the project described herein and authorized scope. The conclusions and recommendations contained in this report are based on the information available to RWDI when this report was prepared. Because the contents of this report may not reflect the final design of the Project or subsequent changes made after the date of this report, RWDI recommends that it be retained by Client to verify that the results and recommendations provided in this report have been correctly interpreted in the final design of the Project.

The conclusions and recommendations contained in this report have also been made for the specific purpose(s) set out herein. Should the Client or any other third party utilize the report and/or implement the conclusions and recommendations contained therein for any other purpose or project without the involvement of RWDI, the Client or such third party assumes any and all risk of any and all consequences arising from such use and RWDI accepts no responsibility for any liability, loss, or damage of any kind suffered by Client or any other third party arising therefrom.

Finally, it is imperative that the Client and/or any party relying on the conclusions and recommendations in this report carefully review the stated assumptions contained herein and to understand the different factors which may impact the conclusions and recommendations provided.

I.A.10 Development Type (check all that apply)	☒ Residential ☐ Commercial ☐ Industrial ☐ Mixed-Use ☐ Streets, Roads, etc. ☐ Detached Single Family Home ☐ Redevelopment[2]		
I.A.11 Project Description (Include any past or future phase of the project)	Demolition of existing building on-site and construct 240 residential unit building the will span a total of 23 floors.		
I.A.12 Total Project Area	0.28 acres	I.A.13 % Slope on Site	0.5%
I.A.14 Total Land Disturbance Area (Include all areas to be cleared, excavated, graded, and borrow and stockpile areas)	0.28 acres		

I.B. Is the project a "C.3 Regulated Project" per MRP Provision C.3.b or a Small Project per MRP Provision C.3.i

I.B.1 Complete the *Impervious and Pervious Surfaces Table*

Type of Impervious Surface[3]	a Pre-Project Impervious Area (sq ft)	b Existing Impervious Area to be Replaced (sq ft[4])	c New Impervious Area to be Created (sq ft)	d Post-Project Pervious Area (sq ft)
a. Impervious roof area(s)[5]	7,000	10,470	-	NA
b. Impervious sidewalks, patios, paths, driveways[6]	-	1,000	-	
c. Uncovered impervious parking[7]	5,400	-	-	
d. Streets (public)	-	-	-	
e. Streets (private)	-	-	-	
Totals	12,400	11,470	-	930

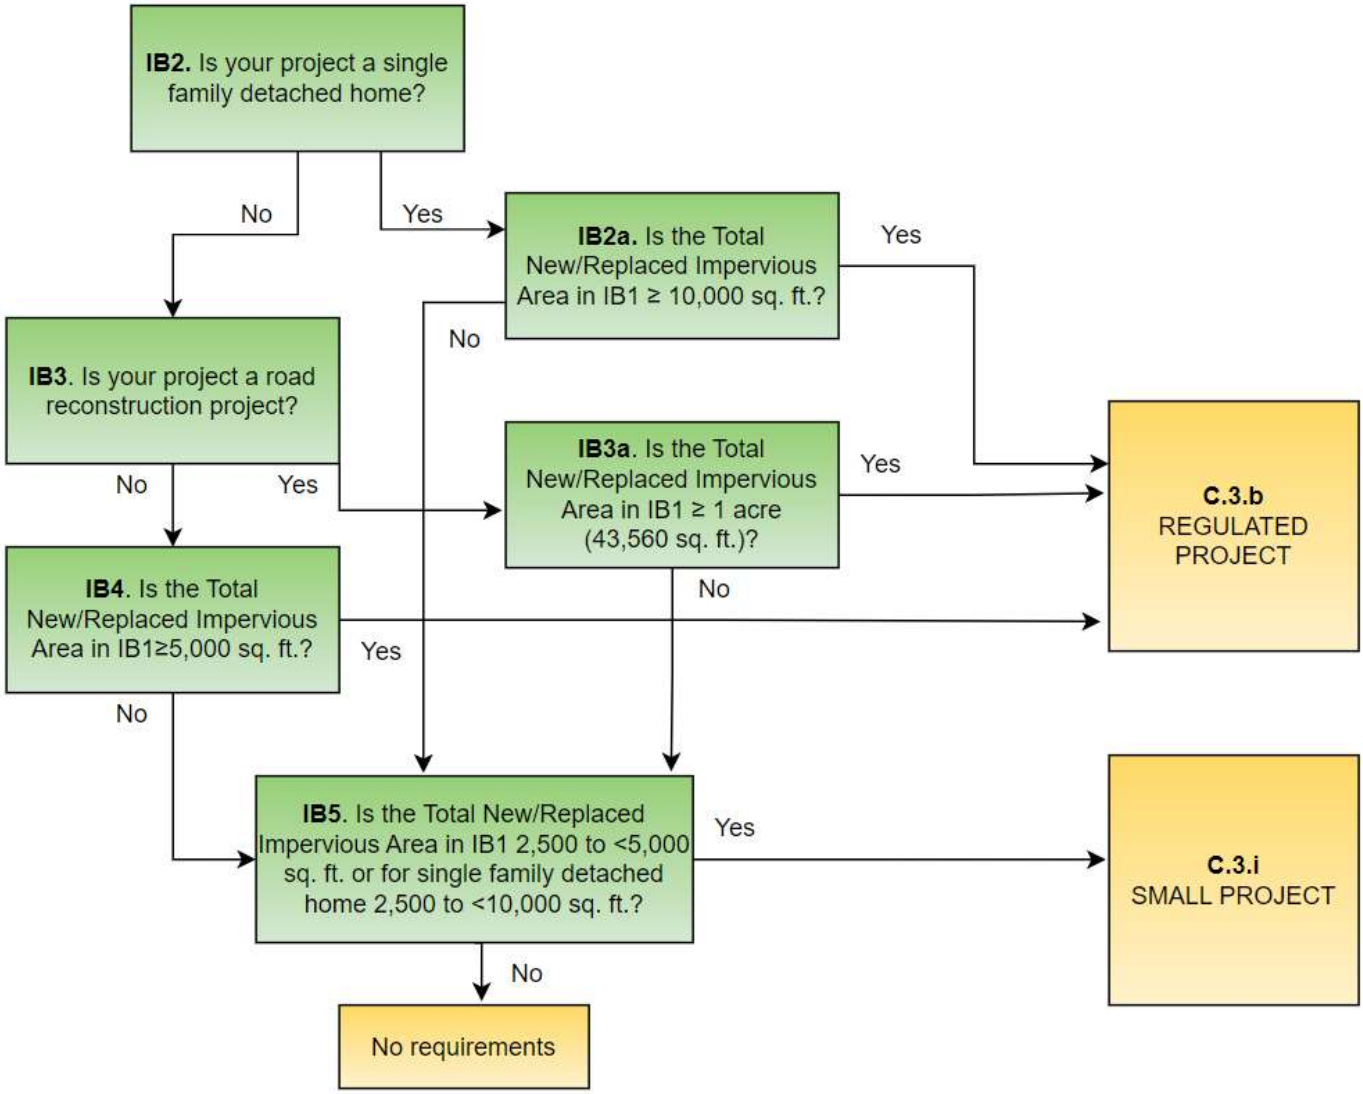
[1] Watershed is defined by the maps from the Alameda County Flood Control District at http://acfloodcontrol.org/resources/explore-watersheds
[2] As defined by MRP: creating, adding and/or replacing exterior existing impervious surface on a site where past development has occurred.
[3] A surface covering or pavement of a developed parcel of land that prevents the land's natural ability to absorb and infiltrate rainfall/stormwater.
[4] Replaced impervious area means any impervious area that is removed and replaced in kind or upgraded. See Chapter 2 of the *C.3 Technical Guidance.*
[5] Exclude green roofs.
[6] A gravel surface is an impervious surface, except when it is constructed as part of appropriately designed pervious pavement system.
[7] Uncovered parking includes top level of a parking structure unless drainage from the uncovered portion is connected to the sanitary sewer along with the covered portions of the parking structure.

Stormwater Requirements Checklist
Municipal Regional Stormwater Permit (MRP 3)
Stormwater Controls for Development Projects

Existing Impervious Area to remain in place		**NA**
Total New/Replaced Impervious Area *(sum columns b and c)*		11,470 sf

I.B. Is the project a "C.3 Regulated Project per MRP Provision C.3.b or a Small Project per MRP Provision C.3.i (cont'd)

	Yes	No	NA
I.B.2 Is your project a single family detached home? If Yes go to I.B.2.a; if NO go to I.B.3	☐	☒	☐
I.B.2.a Is the Total New/Replaced Impervious Area in I.B.1 ≥10,000 sq ft? If YES, your project is a C.3.b Regulated Project. (See I.D). If NO go to I.B.5.	☐	☐	☒
I.B.3 Is your project a road reconstruction project? If YES go to I.B.3.a; if NO go to I.B.4	☐	☒	☐
I.B.3.a Is the Total New/Replaced Impervious Area in I.B.1 ≥1 acre (43,560 sq ft)? If YES, your project is a C.3.b Regulated Project. (See I.D)	☐	☐	☒
I.B.4 Is the Total New/Replaced Impervious Area in I.B.1 ≥5,000 sq ft? If YES, your project is a C.3.b Regulated Project. If NO go to I.B.5	☒	☐	☐
I.B.5 Is the Total New/Replaced Impervious Area in I.B.1 2,500 to <5,000 sq ft or for single family detached home 2,500 to <10,000 sq ft? If Yes, your project is a C.3.i Small Project.	☐	☒	☐



Stormwater Requirements Checklist
Municipal Regional Stormwater Permit (MRP 3)
Stormwater Controls for Development Projects

I.C. Pervious Pavement Systems			
I.C.1 Will your project install 3,000 sq ft or more of pervious pavement systems (not including private-use patios at residences)? If **YES, stormwater treatment system inspection requirements (C.3.h) apply.** (Municipal staff – add this site to your list of sites needing a final inspection at the end of construction and on-going O&M inspections.)	☐	☒	☐
I.D. Projects not regulated by C.3 If your project is not regulated by C.3.b or C.3.i you are not subject to stormwater treatment requirements, however you are encouraged to incorporate site design and source control measures. The municipality may determine that source controls and site design measures are required for your project, if so, you must complete Section II and if required by the municipality, complete Sections III.A and III.B.			
I.E. C.3.i Small Projects If your project is regulated by C.3.i you are considered a "Small Project" and must implement site design (See III.A) and source control requirements (See III.B). You are not required to implement stormwater treatment requirements. You must complete Sections II, III.A, and III.B.			
I.F. C.3.b Regulated Projects If your project is a C.3.b regulated project, the project must include appropriate site design measures and source controls AND hydraulically-sized stormwater treatment measures. Hydromodification management may also be required. Complete Sections II, III, and V.			
II. Applicability C.6 Stormwater Requirements *All projects must complete Section II.*			
	Yes	No	
II.A Does the project disturb one acre or more of land? If YES you are required to obtain coverage under the State Construction Stormwater Permit, see https://www.waterboards.ca.gov/water_issues/programs/stormwater/construction.html. You must submit your WDID number and Stormwater Pollution Prevention Plan to the municipality before a building or grading permit will be issued. You do not need to complete Section IV.	☐	☒	
II.B Does the project disturb less than one acre of land? If NO, you are subject to MRP C.6 requirements. Complete Section IV to identify best management practices (BMPs) that will be in the erosion control plan and implemented during construction.	☒	☐	
II.C. Priority Inspection Factors	☐	☐	
II.C.1 Is the project 1 acre or more?	☐	☒	
II.C.2 Does the project require a grading permit?	☐	☐	
II.C.3 Is the project adjacent to a creek or waterway?	☐	☒	
II.C.4 Is the project in a municipally defined hillside development area or meet local hillside criteria?	☐	☒	
II.C.5 Does the project site have a slope of >15% and disturb ≥ 5,000 sq ft?	☐	☒	
II.C.6 Does the project involve demolition of a structure subject to the PCBs Building Demolition requirements? If yes the completion of the PCBs Building Material Demolition is required.	☒	☐	
(Municipal staff – refer projects answering YES to any questions in section II.C to construction site inspection staff to be added to their list of projects that require stormwater inspections at least monthly during the wet season (October 1 through April 30) and other times of the year as appropriate.)			

Stormwater Requirements Checklist
Municipal Regional Stormwater Permit (MRP 3)
Stormwater Controls for Development Projects

III. Implementation of C.3 Stormwater Requirements

C.3.b Regulated Projects must complete all of Section III.
C.3.i Small Projects must complete Sections III.A and III.B
Projects not regulated by C.3 must complete Sections III.A and III.B if directed by the municipality.

III.A Select Appropriate Site Design Measures

C.3.b Regulated Projects must implement appropriate and feasible site design measures.
C.3.i Small Projects must implement at least one of site design measures listed in items a-f.
Projects not regulated by C.3 are encouraged to implement appropriate site design measures and those directed by the municipality.

Site Design Measure	Plan Sheet #	Yes	No
a. Direct roof runoff into cisterns or rain barrels and use rainwater for irrigation or other non-potable use.		☐	☐
b. Direct roof runoff onto vegetated areas.	C2.0	☒	☐
c. Direct runoff from sidewalks, walkways, and/or patios onto vegetated areas.	C2.0	☒	☐
d. Direct runoff from driveways and/or uncovered parking lots onto vegetated areas.		☐	☒
e. Construct sidewalks, walkways, and/or patios with pervious pavement systems.[8]		☐	☒
f. Construct bike lanes, driveways, and/or uncovered parking lots with pervious pavement systems.[8]		☐	☒
g. Minimize land disturbance and impervious surface (especially parking lots).		☐	☒
h. Maximize permeability by clustering development and preserving open space.		☐	☒
i. Use micro-detention, including distributed landscape-based detention.		☐	☒
j. Protect sensitive areas, including wetland and riparian areas, and minimize changes to the natural topography.		☐	☒
k. Self-treating area (see Chapter 5 of the *C.3 Technical Guidance*)		☐	☒
l. Self-retaining area (see Chapter 5 of the *C.3 Technical Guidance*)		☐	☒

III.B Select Appropriate Source Control Measures

C.3.b Regulated Projects must select and implement appropriate source control measures.
C.3.i Small Projects and projects not regulated by C.3 are encouraged to select and implement appropriate source control measures and those directed by the municipality.

Features in the project?		Features requiring source controls	Source control measures (Refer to Local Source Control List for detailed requirements)	Measure included in project plans?		
Yes	No			Yes	NO	Plan Sheet #
☒	☐	Storm Drain	Mark on-site inlets with the words “No Dumping! Flows to Bay” or equivalent.	☐	☒	
☒	☐	Floor Drains	Plumb interior floor drains to sanitary sewer[9] [or prohibit].	☐	☒	
☒	☐	Parking garage	Plumb interior parking garage floor drains to sanitary sewer.[9]	☐	☒	
☒	☐	Landscaping	▪ Retain existing vegetation as practicable. ▪ Select diverse species appropriate to the site. Include plants that are pest- and/or disease-resistant, drought-tolerant, and/or attract beneficial insects. ▪ Minimize use of pesticides and quick-release fertilizers. ▪ Use efficient irrigation system; design to minimize runoff.	☐	☒	
☐	☒	Pool/Spa/ Fountain	Provide connection to the sanitary sewer to facilitate draining.[9]	☐	☒	
☐	☒	Food Service Equipment (non-residential)	Provide sink or other area for equipment cleaning, which is: ▪ Connected to a grease interceptor prior to sanitary sewer discharge.[9] ▪ Large enough for the largest mat or piece of equipment to be cleaned. ▪ Indoors or in an outdoor roofed area designed to prevent stormwater run-on and run-off and signed to require equipment washing in this area.	☐	☒	

[8] Use the specifications in the *C.3 Technical Guidance* or for small projects see the *BASMAA Pervious Paving Factsheet*. For these documents and others go to www.cleanwaterprogram.org and click on “Resources.”
[9] Any connection to the sanitary sewer system is subject to sanitary district approval.

Stormwater Requirements Checklist
Municipal Regional Stormwater Permit (MRP 3)
Stormwater Controls for Development Projects

Features in the project?		Features requiring source controls	Source control measures (Refer to Local Source Control List for detailed requirements)	Measure included in project plans?		
Yes	No			Yes	NO	Plan Sheet #
☐	☒	Refuse Areas	▪ Provide a roofed and enclosed area for dumpsters, recycling containers, etc., designed to prevent stormwater run-on and runoff. ▪ Connect any drains in or beneath dumpsters, compactors, and tallow bin areas serving food service facilities to the sanitary sewer.[9]	☐	☒	
☐	☒	Outdoor Process Activities [10]	Perform process activities either indoors or in roofed outdoor area, designed to prevent stormwater run-on and runoff, and to drain to the sanitary sewer.[9]	☐	☒	
☐	☒	Outdoor Equipment/ Materials Storage	▪ Cover the area or design to avoid pollutant contact with stormwater runoff. ▪ Locate area only on paved and contained areas. ▪ Roof storage areas that will contain non-hazardous liquids, drain to sanitary sewer[9], and contain by berms or similar.	☐	☒	
☐	☒	Vehicle/ Equipment Cleaning	▪ Roofed, pave and berm wash area to prevent stormwater run-on and runoff, plumb to the sanitary sewer,[9] and sign as a designated wash area. ▪ Commercial car wash facilities shall discharge to the sanitary sewer.[9]	☐	☒	
☐	☒	Vehicle/ Equipment Repair and Maintenance	▪ Designate repair/maintenance area indoors, or an outdoors area designed to prevent stormwater run-on and runoff and provide secondary containment. Do not install drains in the secondary containment areas. ▪ No floor drains unless pretreated prior to discharge to the sanitary sewer. [9] ▪ Connect containers or sinks used for parts cleaning to the sanitary sewer. [9]	☐	☒	
☐	☒	Fuel Dispensing Areas	▪ Fueling areas shall have impermeable surface that is a) minimally graded to prevent ponding and b) separated from the rest of the site by a grade break. ▪ Canopy shall extend at least 10 ft in each direction from each pump and drain away from fueling area.	☐	☒	
☐	☒	Loading Docks	▪ Cover and/or grade to minimize run-on to and runoff from the loading area. ▪ Position downspouts to direct stormwater away from the loading area. ▪ Drain water from loading dock areas to the sanitary sewer.[9] ▪ Install door skirts between the trailers and the building.	☐	☒	
☐	☒	Fire Sprinklers	Design for discharge of fire sprinkler test water to landscape or sanitary sewer.[9]	☐	☒	
☐	☒	Miscellaneous Drain or Wash Water	▪ Drain condensate of air conditioning units to landscaping. Large air conditioning units may connect to the sanitary sewer.[9] ▪ Roof drains shall drain to unpaved area where practicable. ▪ Drain boiler drain lines, roof top equipment, all wash water to sanitary sewer. [9]	☐	☒	
☐	☒	Architectural Copper	Discharge rinse water to sanitary sewer [9] or collect and dispose properly offsite. See flyer *Requirements for Architectural Copper*.	☐	☒	

[10] Businesses that may have outdoor process activities/equipment include machine shops, auto repair, industries with pretreatment facilities.

Stormwater Requirements Checklist
Municipal Regional Stormwater Permit (MRP 3)
Stormwater Controls for Development Projects

III.C Stormwater Treatment Measures
C.3.b Regulated Projects must select and implement stormwater treatment measures to manage the C.3.d numeric sizing criteria. Complete the applicable sections below.

Yes	No	
☐	☒	**III.C.1 Is the project a Special Project?** (See Appendix J of the *C.3 Technical Guidance* for Special Project criteria.) If YES, complete the Special Projects Worksheet and consult with municipal staff about the need to prepare a discussion of the feasibility and infeasibility of 100% LID treatment. Indicate the type of non-LID treatment to be used, the hydraulic sizing method*, and percentage of the amount of runoff specified in Provision C.3.d that is treated.

		Non-LID Treatment	Hydraulic Sizing Method (See Note 1)	% of C.3. Amount of Runoff Treated
		☐ Media filter		
		☐ Tree well filter		

☒	☐	**III.C.2 Is the project using biotreatment to treat the C.3.d amount of runoff?** (See the *C.3 Technical Guidance* for information on infiltration and rainwater harvesting[11] and use of stormwater.) If YES, indicate the biotreatment measures to be used, and the hydraulic sizing method:	
		Biotreatment Measures	Hydraulic sizing method (See Note 1)
		☐ Bioretention area	
		☒ Flow-through planter	Flow and Volume Design Basis
		☐ Other (specify):	

Note 1. Indicate which of the following Provision C.3.d.i hydraulic sizing methods were used:

1. Volume based approaches – Refer to Provision C.3.d.i.(1):
   1(a) Urban Runoff Quality Management approach, or
   1(b) 80% capture approach (recommended volume-based approach).
2. Flow-based approaches – Refer to Provision C.3.d.i.(2):
   2(a) 10% of 50-year peak flow approach,
   2(b) Percentile rainfall intensity approach, or
   2(c) 0.2-Inch-per-hour intensity approach (this is recommended flow-based approach AND the basis for the 4% rule of thumb described in Section 7.1 of the C.3 Technical Guidance).
3. Combination hydraulic sizing approach -- Refer to Provision C.3.d.i.(3):
   If a combination flow and volume design basis was used, indicate which flow-based and volume-based criteria were used.

III.D Hydromodification Management (HM) Requirements
C.3.b Regulated Projects must complete this section

	YES	NO
III.D.1 Does the project create and/or replace 1 acre (43,560 sq. ft.) or more of impervious area? If YES continue to item III.D.2. If NO, this project is not subject to the HM requirements.	☐	☒
III.D.2 Is the total impervious area increased from the pre-project condition? If YES continue to item III.D.3. If NO, this project is not subject to the HM requirements.	☐	☒
III.D.3 Is the site located in a tidally influenced/depositional area, or in the extreme eastern portion of the county that is not subject to HM requirements? (See HMP Susceptibility Map.) If NO continue to III.D.4. If YES the project is exempt from HM requirements. Attach map indicating project location. Skip to III.D.6 and check "NO".	☐	☒
III.D.4 Is the site located in a high slope zone or special consideration watershed, as shown on the HMP Susceptibility Map? If YES Project is subject to HM requirements. Attach map indicating project location. Skip to III.D.6 and check "YES.". If NO, continue to III.D.5.	☐	☒
III.D.5 For sites located in a white area on the HMP Susceptibility Map, has an engineer or qualified environmental professional determined that runoff from the project flows only through a hardened channel or enclosed pipe along its entire length before emptying into a waterway in the exempt area?	☐	☒

[11] The MRP no longer requires that a feasibility analysis of infiltration and rainwater harvesting be conducted. However, applicants using biotreatment are encouraged to maximize infiltration of stormwater if site conditions allow. If feasible and desired, infiltration and rainwater harvesting may be cost effective solutions depending on the project.

Stormwater Requirements Checklist
Municipal Regional Stormwater Permit (MRP 3)
Stormwater Controls for Development Projects

If YES, the project is exempt from HM requirements. Attach signed statement by qualified professional. Go to III.D.6 and check "NO." If NO, the project is subject to HM requirements. Attach map indicating project location. Go to Item G.6 and check "YES."	☐	☒

III.D.6 Is the project a Hydromodification Management Project?

☐ YES the project is subject to the *HM requirements in MRP Provision C.3.g.*

☒ NO, the project is not subject to the HM requirements.

- If the project is subject to the HM requirements, incorporate in the project flow duration stormwater control measures designed such that post-project stormwater discharge rates and durations match pre-project discharge rates and durations. The Bay Area Hydrology Model (BAHM) has been developed to size flow duration controls. See https://www.clearcreeksolutions.info/bahm-download-page. Guidance is provided the *C.3 Technical Guidance*.

IV. Implementation of C.6 Construction Phase Requirements

All projects must complete Section IV.

IV.A Select Appropriate Construction Phase BMPs[12]

BMP	Plan Sheet #	Yes	No
Attach the municipality's construction BMP plan sheet to project plans and require contractor to implement the applicable BMPs on the plan sheet.		☒	☐
Implement temporary erosion controls to stabilize all disturbed areas until permanent erosion controls are established.		☒	☐
Delineate with field markers clearing limits, easements, setbacks, sensitive or critical areas, buffer zones, trees, and drainage courses.		☒	☐
Provide notes, specifications, or attachments describing: ▪ Construction, operation and maintenance of erosion and sediment controls, include inspection frequency; ▪ Methods and schedule for grading, excavation, filling, clearing of vegetation, and storage and disposal of excavated or cleared material; ▪ Specifications for vegetative cover and mulch, include methods and schedules for planting and fertilization; ▪ Provisions for temporary and/or permanent irrigation.		☒	☐
Perform clearing and earth moving activities only during dry weather.		☒	☐
Use sediment controls or filtration to remove sediment when dewatering and obtain all necessary permits.		☒	☐
Protect all storm drain inlets in vicinity of site using drop inlet protection		☒	☐
Trap sediment on-site, using BMPs such as sediment basins or traps, earthen dikes or berms, silt fences, check dams, erosion control blankets, covers for soil stock piles, etc.		☒	☐
Divert on-site runoff around disturbed areas and construction materials; divert off-site runoff around the site (e.g., swales and dikes).		☒	☐
Protect adjacent properties and undisturbed areas from construction impacts using vegetative buffer strips, sediment barriers or filters, dikes, mulching, or other measures as appropriate.		☒	☐
No cleaning, fueling, or maintaining vehicles on-site, except in a designated area where wash water is contained for proper management and spill controls are in place.		☒	☐
Store, handle, and dispose of construction materials/wastes properly to prevent contact with stormwater.		☒	☐
Contractor shall train and provide instruction to all employees/subcontractors re: construction BMPs.		☒	☐
Control and prevent the discharge of all potential pollutants, including pavement cutting wastes, paints, concrete, petroleum products, chemicals, wash water or sediments, rinse water from architectural copper, and non-stormwater discharges to storm drains and watercourses.		☒	☐

[12] Additional information on Construction Phase BMPs can be found is MRP Provision C.6 and the California Stormwater Quality Association's Construction BMP Handbook.

V. Stormwater Treatment Measure and/HM Control Owner or Operator's Information *C.3.b Regulated Projects must complete Section V.*	
Name	Steve Heaton - Laconia Development LLC
Address	1981 North Broadway, Suite 350, Walnut Creek, CA 94596
Phone	925.858.3720
Email	sheaton@laconiallc.com
➢ *Applicant must call for inspection and receive inspection within 45 days of installation of treatment measures and/or hydromodification management controls.*	
Name of Applicant Completing Form	Joseph Young, P.E. | BKF Engineers
Signature	
Date	02/13/2025

VI. For Completion by Municipal Staff

(This section is only applicable for C.3.b Regulated Projects)

VI.1 Alternative Certification	**YES**	**NO**
Was the treatment system sizing and design reviewed by a qualified third-party professional that is not a member of the project team or agency staff?	☐	☐
Name of Reviewer:	☐	☐
VI.2 Confirm Operations and Maintenance (O&M) Submittal Complete for C.3.b Regulated Projects and HM Projects	☐	☐
VI.2.a Was the maintenance plan submitted?	☐	☐
VI.2.b Was the maintenance plan approved?	☐	☐
VI.2.c Was the maintenance agreement approved?	☐	☐

Date maintenance agreement was executed:	

VI.3 HM Controls (if required) Are the applicable items for HM compliance included in the plan submittal?			
Documentation for HM Compliance	**YES**	**NO**	**NA**
Site plans with pre- and post-project impervious surface areas, surface flow directions of entire site, locations of flow duration controls and site design measures per HM site design requirement	☐	☐	☐
Soils report or other site-specific document showing soil types at all parts of site	☐	☐	☐
If project uses the Bay Area Hydrology Model (BAHM), a list of model inputs.	☐	☐	☐
If project uses custom modeling, a summary of the modeling calculations with corresponding graph showing curve matching (existing, post-project, and post-project with HM controls curves), goodness of fit, and (allowable) low flow rate.	☐	☐	☐
If project uses the Impracticability Provision, a listing of all applicable costs and a brief description of the alternative HM project (name, location, date of start up, entity responsible for maintenance).	☐	☐	☐
If the project uses alternatives to the default BAHM approach or settings, a written description and rationale.	☐	☐	☐

- Municipal staff: Refer to the "Flow Duration Control Review Worksheet for HM Submittals" to review the documentation submitted for HM compliance.

PROJECT DESCRIPTION

PROJECT ADDRESS: 2029 University Ave. Berkeley, CA 94704 (APN: 57-2053-8-1)

SCOPE OF WORK:

THIS IS A ZONING APPLICATION FOR A HOUSING DEVELOPMENT, WHICH VESTS RIGHTS UNDER ZONING APPLICABLE AS OF THE SUBMITTAL DATE PER CALIFORNIA GOVERNMENT CODE SECTION 65941.1. THE PROJECT IS THE CONSTRUCTION OF A NEW 23-STORY (256'-0"), 240-UNIT HOUSING DEVELOPMENT WITH 190,830 SF OF NEW RESIDENTIAL USE AND PARKING GARAGE FOR UP TO 29 SPACES. THE PROJECT INCLUDES REMOVAL OF EXISTING NON-LANDMARKED 2-STORY COMMERCIAL STRUCTURE AND SURFACE PARKING. 15% (18 UNITS) OF THE BASE UNITS WILL BE AFFORDABLE TO VERY-LOW-INCOME HOUSEHOLDS, AND 15% (18 UNITS) OF THE BASE UNITS WILL BE AFFORDABLE TO MODERATE INCOME HOUSEHOLDS, MAKING THE PROJECT ELIGIBLE FOR A 100% DENSITY BONUS, WAIVERS, AND UP TO 3 CONCESSIONS AS A STATE DENSITY BONUS LAW DEVELOPMENT PER CALIFORNIA GOVERNMENT CODE § 65915.

THE PROPOSED PROJECT WILL COMPLY WITH THE BERKELEY ENERGY CODE (BMC CHAPTER 19.36) AND THE BERKELEY GREEN CODE (BMC CHAPTER 19.37), INCLUDING PROVIDING A SOLAR PV SYSTEM, BATTERY ENERGY STORAGE, ELECTRIC VEHICLE CHARGING, AND LOW-CARBON CONCRETE REQUIREMENTS

ZONING CODE SUMMARY

(BASED ON THE BERKELEY MUNICIPAL ZONING CODE)

ZONING: C-DMU OUTER CORE

BENCHMARK

THE ELEVATIONS SHOWN HEREON ARE BASED UPON THE VERTICAL DATUM OF 1988 AND WERE ESTABLISHED USING LEICA RTK NETWORK SMARTNET.

A TEMPORARY/SITE BENCHMARK IS SHOWN HEREON.

BASIS OF BEARINGS

THE COORDINATES SHOWN HEREON ARE BASED ON THE COORDINATE SYSTEM OF 1983, CCS83, ZONE 3, USING LEICA RTK NETWORK SMARTNET.

TOPOGRAPHIC NOTES

UNAUTHORIZED CHANGES & USES: THE PROFESSIONAL PREPARING THIS MAP WILL NOT BE RESPONSIBLE FOR, OR LIABLE FOR, UNAUTHORIZED CHANGES TO OR USES OF THIS MAP. CHANGES TO THIS MAP MUST BE REQUESTED IN WRITING AND MUST BE APPROVED BY THE PROFESSIONAL.

THE LOCATIONS OF EXISTING UNDERGROUND FACILITIES SHOWN ON THESE DRAWINGS ARE APPROXIMATE AND ARE BASED ON OBSERVED TOPOGRAPHIC SURFACE FEATURES AND AVAILABLE INFORMATION. THE PROFESSIONAL PREPARING THIS MAP ASSUMES NO RESPONSIBILITY FOR THE ACCURACY OF THESE FACILITIES OR FOR THE INADVERTENT OMISSION OF RELATED INFORMATION.

TOPOGRAPHIC INFORMATION SHOWN HEREON WAS OBTAINED FROM GROUND SURVEY CONDUCTED ON SEPTEMBER AND OCTOBER, 2023

TREE DIAMETERS ARE MEASURED AT CHEST HEIGHT (48").

SURVEYOR'S STATEMENT

THIS TOPOGRAPHIC SURVEY MAP WAS PREPARED BY ME OR UNDER MY DIRECTION.

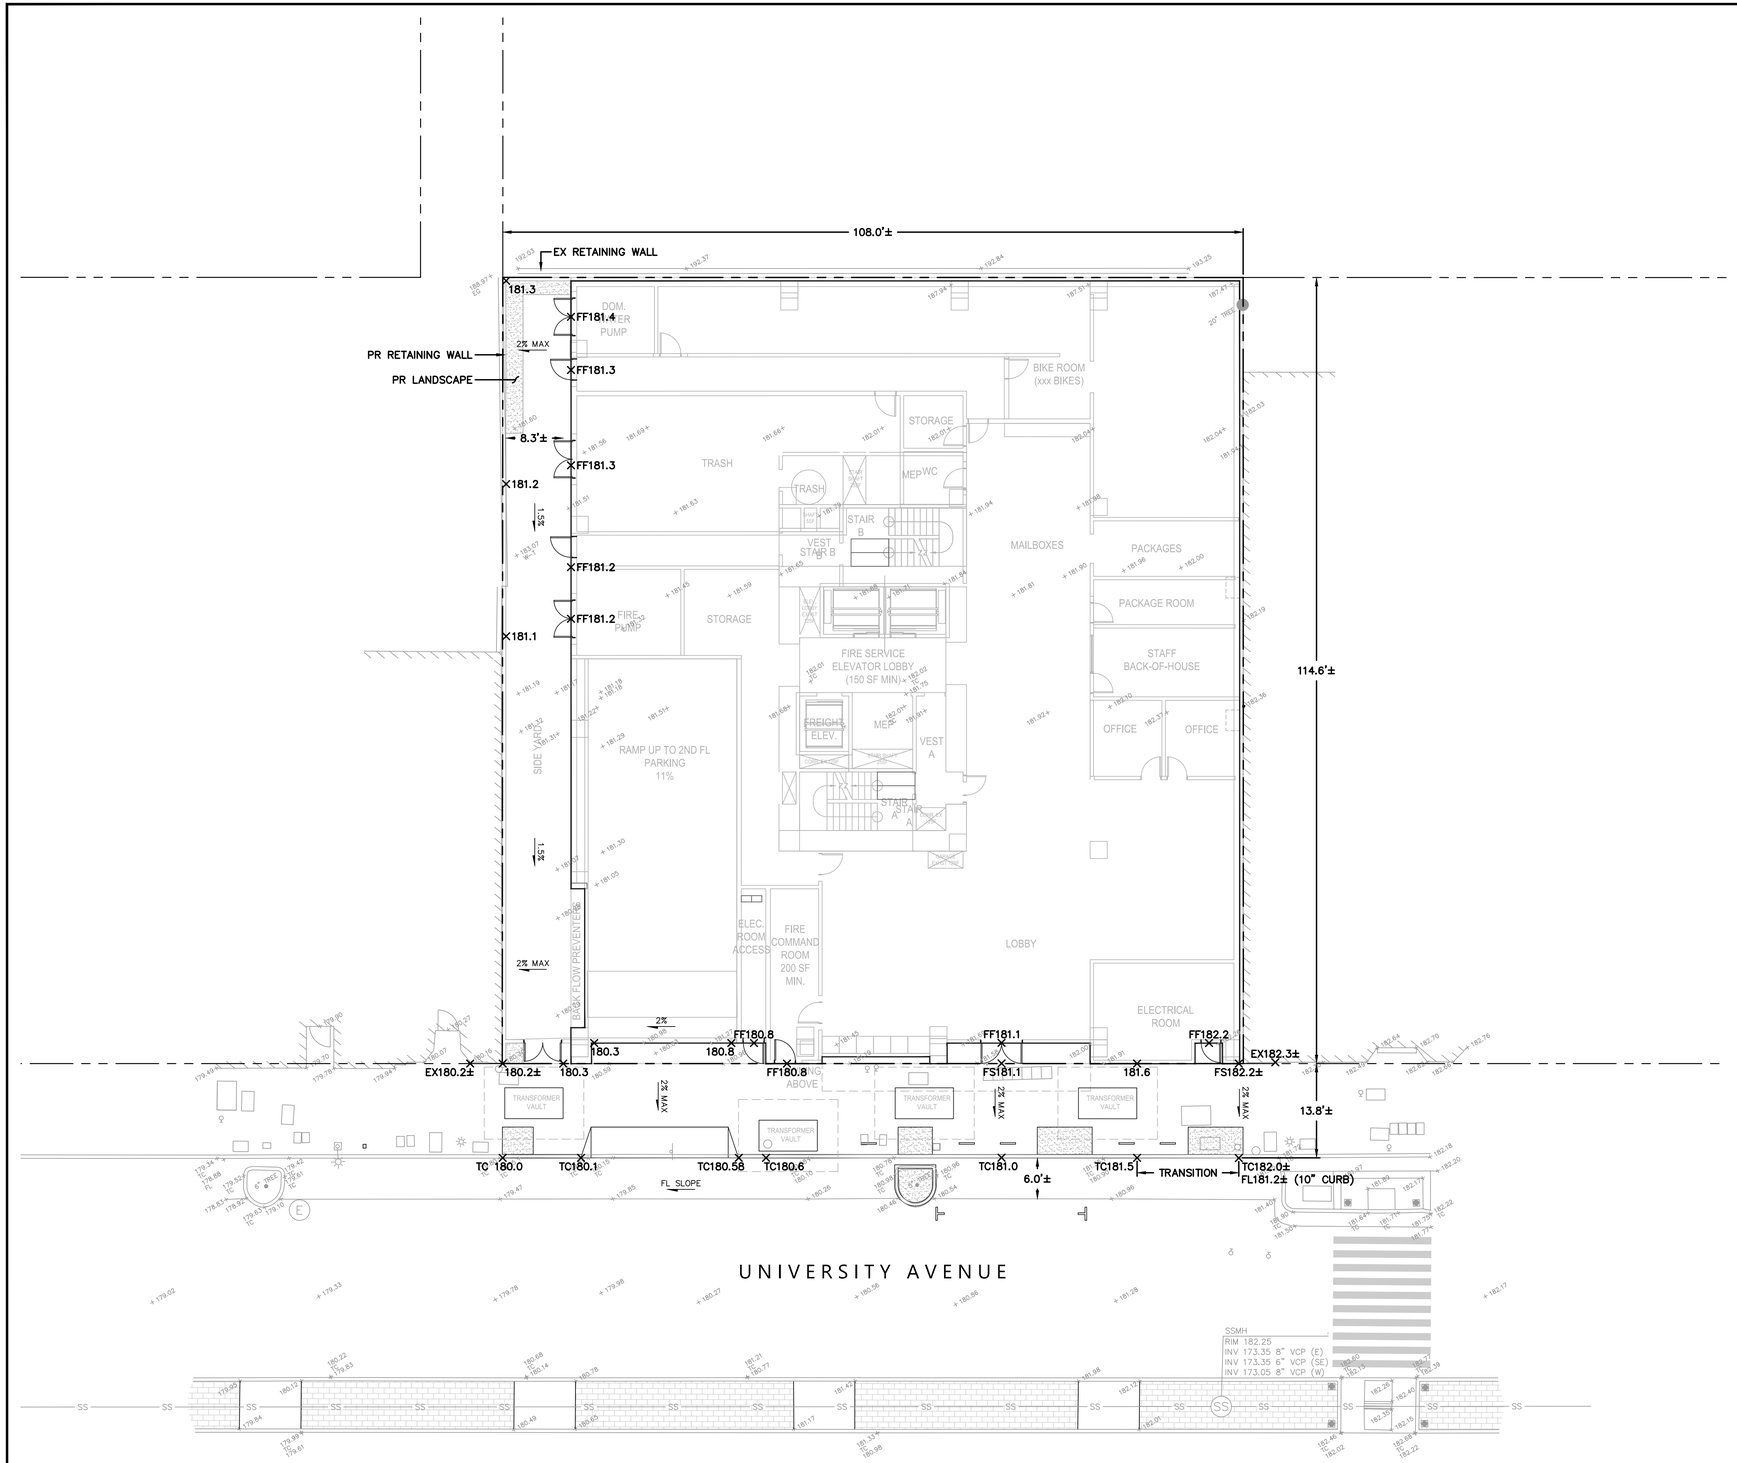
SECTIONS

A4.1



GENERAL NOTES

1. UTILITIES AND UNDERGROUND FACILITIES INDICATED ARE FOR INFORMATION ONLY. IT IS THE CONTRACTOR'S RESPONSIBILITY TO VERIFY THE LOCATION AND DEPTH WITH APPROPRIATE AGENCIES. NEITHER THE OWNER NOR THE CITY NOR THE DESIGN PROFESSIONAL ASSUMES RESPONSIBILITY THAT THE UTILITIES AND UNDERGROUND FACILITIES INDICATED WILL BE THE UTILITIES AND UNDERGROUND FACILITIES ENCOUNTERED.
2. BOUNDARY INFORMATION SHOWN ACCORDING TO A FIELD SURVEY PERFORMED BY BKF ENGINEERS ON JULY 26, 2024.
3. BASIS OF BEARINGS: THE BEARING OF N05°35'30"W BETWEEN FOUND CITY OF BERKELEY MONUMENTS ON SHATTUCK AVENUE AT THE INTERSECTIONS OF UNIVERSITY AVENUE AND ADDISON STREET AS SHOWN ON PARCEL MAP 6772 FILED ON JANUARY 18, 1995, IN BOOK 216 PAGE 41, WAS TAKEN AS THE BASIS OF BEARINGS OF THIS SURVEY.
4. BENCHMARK: THE ELEVATIONS SHOWN HEREON ARE BASED ON A FOUND CITY OF BERKELEY BENCHMARK, MONUMENT B0490, A 2" CITY OF BERKELEY BRASS DISK WITH PUNCH IN A MONUMENT WELL. ELEVATION 187.09 FEET (DATUM = CITY OF BERKELEY).
5. FIELD SURVEY DATE: JULY 24, 2024 BY BKF ENGINEERS
6. ALL GRADING SHALL BE PREFORMED IN SUCH A MANOR AS TO COMPLY WITH THE STANDARDS ESTABLISHED BY THE AIR QUALITY MAINTENANCE DISTRICT FOR AIRBORNE PARTICULATES (DUST).
7. ALL THE GRADING SHALL CONFORM TO APPROVED SPECIFICATIONS PRESENTED HEREON OR ATTACHED HERETO. ALL GRADING WORK SHALL BE OBSERVED AND APPROVED BY THE GEOTECHNICAL ENGINEER. THE GEOTECHNICAL ENGINEER SHALL BE NOTIFIED AT LEAST 48 HOURS BEFORE BEGINNING ANY GRADING. UNOBSERVED AND UNAPPROVED GRADING WORK SHALL BE REMOVED AND REDONE AT THE CONTRACTORS EXPENSE.

GENERAL PLANTING AND IRRIGATION NOTES

1. LANDSCAPE AND IRRIGATION PLANS SHALL COMPLY WITH THE CRITERIA OF THE CALIFORNIA MODEL WATER EFFICIENCY ORDINANCE AND APPLY THOSE CRITERIA FOR THE EFFICIENT USE OF WATER IN THE LANDSCAPE DESIGN PLAN.

2. LANDSCAPE AND IRRIGATION PLANS SHALL COMPLY WITH ALL APPLICABLE CITY CODES AND ORDINANCES.

3. ALL PLANTING AREAS SHALL BE TOP-DRESSED WITH A 3" LAYER OF ORGANIC, UN- DYED MULCH RECYCLED FROM LOCAL ORGANIC MATERIALS SUCH AS TREE TRIMMINGS, PLANT, OR CLEAN WOOD WASTE. COMPOST APPLICATION TO ACHIEVE A MINIMUM OF 6% ORGANIC MATTER IN SOIL COMPOSITION BASED ON MWELO SPECIFIED SOIL ANALYSIS RESULS FOR THE SITE SOIL PER [CGBSC 4.304].

4. 50% OF ALL SHRUBS AND GROUNDCOVER SHALL BE A MINIMUM OF 5-GALLON SIZE OR LARGER.

5. IRRIGATION SYSTEM IS TO BE A FULLY AUTOMATIC WEATHER-BASED SYSTEM USING LOW FLOW DRIP AND BUBBLER SYSTEM.

6. STREET TREES SHALL BE TIED INTO IRRIGATION SYSTEM.

7. 58% OF ALL PLANTS PROPOSED ARE NATIVE AND WILD-LIFE SUPPORTING.

8. PLANT SELECTION AND DESIGN TO COMPLY WITH BAY-AREA FRIENDLY BASICS LANDSCAPE CHECKLIST.

IRRIGATION SYSTEM DESIGN INTENT

1. THIS PLAN SHALL COMPLY WITH THE REQUIREMENTS OF THE STATE OF CALIFORNIA'S MODEL WATER EFFICIENT LANDSCAPE ORDINANCE (MWELO), CITY OF BERKELEY, AND EAST BAY MUNICIPAL UTILITY DISTRICT (EBMUD) WATER DISTRICT.

2. THE IRRIGATION SYSTEM SHALL BE DESIGNED TO PROVIDE THE MINIMUM AMOUNT OF WATER NECESSARY TO SUSTAIN GOOD PLANT HEALTH.

3. THE IRRIGATION SYSTEM IS TO BE A FULLY AUTOMATIC, WEATHER-BASED SYSTEM USING RAIN SENSOR, LOW FLOW DRIP, BUBBLER DISTRIBUTION, AND ROTOR WITH MATCHED PRECIPITATION RATE NOZZLES DESIGNED FOR HEAD-TO-HEAD COVERAGE.

4. ALL SELECTED COMPONENTS SHALL BE PERMANENT, COMMERCIAL GRADE, SELECTED FOR DURABILITY, VANDAL RESISTANCE AND MINIMUM MAINTENANCE REQUIREMENT, INSTALLED BELOW-GRADE, AND DESIGNED FOR 100% COVERAGE.

5. THE SYSTEM SHALL INCLUDE A MASTER CONTROL VALVE, RAIN SENSOR AND FLOW SENSING CAPABILITY CONNECTED TO THE IRRIGATION CONTROLLER WHICH WILL SHUT DOWN ALL OR PART OF THE SYSTEM IF LEAKS ARE DETECTED.

6. THE IRRIGATION SYSTEM SHALL BE DESIGNED TO DELIVER WATER TO HYDROZONES BASED ON MOISTURE REQUIREMENTS OF THE PLANT GROUPING.

7. COLOR CODED HYDROZONE LANDSACPING HYDROZONE MAP WITH GROUPING AND COLLOCATING PLANTING MATERIAS BY WUCOLS WATER USE CATEGORY VL, L, M, OR H, PER [CGBSC 4.304}, TO BE PROVIDED IN PERMIT DRAWINGS.

8. RAIN SENSOR AND CONTROLLER LOCATION TO BE PROVIDED IN PERMIT DRAWINGS.

LANDSCAPE AREA CALCULATION:

RE: Use Permit Application (ZP#2024-0181/Multifamily Proposal) Review for 2029 University Avenue

(APN: 057 205300801). Other addresses on parcel include: 2035 UNIVERSITY AV - [Primary] 2033 UNIVERSITY AV - [Primary] 2031 UNIVERSITY AV - [Primary] 2037 UNIVERSITY AV - [Primary] 2039 UNIVERSITY AV - [Primary] 2029 UNIVERSITY AV - [Primary]

On April 03, 2024, staff received application material submitted for the zoning permit application referenced above. The project is to demolish an existing two-story commercial building and ten parking garages on a 12,385 square-feet lot and to construct a 23-story approximately 190,830 ~~190,878~~ square-feet residential building (multifamily) containing 240 dwelling units including 18 VLI units (15%),18 MI units (15%) for a 100% density bonus (AB1287). The proposed project provides 29 off-street parking spaces, ~~176~~ 167 Long-term and 8 Short-Term bike parking spaces **An SB330 Preliminary Application (PLN2023-0093) for this project is deemed complete on January 9, 2025**.

This application is deemed **Incomplete** per the Zoning Project Submittal Requirements Checklist as of **May 2, 2025**. Since this Use Permit application has not been deemed Complete per the Zoning Project Submittal Requirements Checklist within the 90 days from the date that the first Incomplete letter was issued on January 17, 2025 (In this case by April 17, 2025), **the Pre-Application vesting date of January 9, 2025 would change to the date that the Use Permit Application will be deemed Complete**. Once the application is deemed complete, additional revisions may be required to allowed for the analytical review before the project can be scheduled for the ZAB Public Hearing.

Pursuant to Government Code Section 65944, once a public agency accepts an application complete, a public agency can request and obtain information that may be needed in order to comply with the provisions of CEQA (Division 13 commencing with Section 21000). The public agency may also request additional information to clarify, amplify, correct, or otherwise supplement the information required for the application. This may result in additional fees for zoning permits, CEQA review costs, and other processes/reviews, as needed based on the City's adopted fee schedule.

I. Permits required:

1) Use Permit per BMC Section 23.204.020(A) to construct a new multifamily development (Fee required)
2) Use Permit under BMC Section 23.204.030(A) to create new floor area of 10,000 square feet or more (Fee required)
3) Use Permit per BMC Section 23.204.130(E)(1) to increase the maximum building height limit to 75' (plus 5' parapet, by right) (Fee required)
4) Use Permit per BMC Section 23.204.130(E)(2)(a) to allow for an Increased Height Allowance for up to 2 buildings in the Outer Core District that can be a maximum of 120 feet exceeding the C-DMU height limits (75 ft.) (Fee required)
5) Use Permit per BMC Section 23.204.130(E)(3)(b) to modify front, side, and rear setback requirements (Fee required)
6) Use Permit, per BMC Section 23.204.130(E)(6)(b) to pay a fee in lieu of providing open space (Fee required at Building Permit Phase)
7) Administrative Use Permit per BMC Section 23.304.050(A) to exceed building height limits with rooftop architectural elements which exceed the maximum height limit for the district (Fee required)
8) Use Permit per BMC Section 23.326.070(A) to demolish a non-residential building
9) City Arborist Review Fees (Fee required)
10) City Traffic Engineer Review Fees (TBD)
11) Use Permit additional review time (Fee required)

II. Waivers:

1) Waiver of BMC Section 23.204.130(E)(4) for providing 2,055 ~~1,048~~ square feet of Usable Open Space, where 19,200 square feet is required.
2) Waiver of BMC Section 23.304.90 for Usable Open Space landscaped area to be 27 ~~321~~ square feet where 7,680 square feet (40%) is required.
3) Waiver of BMC Section 23.204130(E)(1)(a) to exceed building height limits—to be 256 ft. (TBD) while 75 ft. + 5 ft. parapet is the allowable height
4) Waiver of BMC Section 23.204130(E)(2)(a) for constructing the third building in the Combined Core and Outer Core for a height of over 120 ft. while only a maximum of 2 buildings are allowed and only for a maximum height of 120 ft.
5) Waiver of BMC Section 23.204.130(E)(3)(d) for the building's width over 120 feet of height, to be ~~139 ft.~~ 139'-6" at the widest point (on the diagonal in plan review) where maximum width allowed is 120 feet.

III. Concessions: ~~None~~ (This project is entitled to a maximum of 3 concessions)

1) Concession from the BMC 13.107.040 for Apprenticeship Requirements
2) Concession from the BMC 13.107.050 for Health Care Requirements
3) Concession from the BMC 23.304.150 for Bird Safe Building

IV. CEQA Review:

Under the California Environmental Quality Act (CEQA), staff recommends a determination to the Zoning Adjustments Board (ZAB). The final determination is made by ZAB. Staff may require an environmental impact report (EIR), a negative declaration, or a mitigated negative declaration, depending on the type of project. Additional environmental reports will be required.

A CEQA path recommendation by staff will be made within 30 days of a project being deemed complete. Please note that in the case of a Categorical Exemption, reports relating to relating to traffic, noise, air quality, or water quality will be required.

V. Zoning Project Submittal Requirements (Quantitative/Checklist):

Section 1:

C. Payment of Application Fees:

- Please provide payment for the attached invoice.

Section 2:

B. Landscape and Usable Open Space Plan/Existing and Proposed Street Trees

- Please see the attached Arborist comments regarding street trees
  Provide tree protection guidelines, in order to preserve the tree in the bulb-out.

Section 4:

D. Phase I & II Site Assessment:

- Please provide a Phase I per your comment in the response letter of 04/03/2025 in regards to revisions to Phase I.
- Since the subject property is proposed to be redeveloped for residential use, due to significant soil contamination in the adjoining property, and because commercial/industrial ESLs were followed for remediation metrics, a Phase II is requested by the City's Toxics Management Division.

Section 7:

A. Design Review

- Design Review comments for the resubmittal of 4/03/25 are provided by Anne Burns on 04/30/2025.

VI. Zoning Project Analysis (Qualitative):

1) Inclusionary Housing requirements (BMC 23.328):

Option to provide BMR units (VLI and LI:

20% X 80 =16 (half of which has to be VLI/12 are VLIs 4 LIs are required in this option)

Option to provide a combination of BMR units and In-lieu fee:

1. 80 (Number of Base units) X 20%= 16 (number of required VLI and LI units)
2. 12 VLI units are provided on site as Qualifying Units for State Density Bonus
3. 16 (AF units required) - 12 (VLIs provided for DB) = 4 LI units are required

To pay an In-lieu Fee for the 4 remaining units:

4/16= 25%

(25% of RUFA = X sq. ft. X $56= in-lieu fee is required

Option to provide In-lieu fee:

$56.25 X RUFA= in-lieu fee is required

2) Demolition ordinance (BMC23.323): Per BMC 23.323.020 any units registered with the Rent Board must be replaced.

Note that based on this ordinance, known-Income VLI units (<50%) must be replaced by ELI units (<30%). Any unknown-Income unit that is protected must be replace by VLI and LI units (half must be VLI)

3) CHAS: if the income levels of the existing tenants or tenants within the last five years are unknown, they must be replaced with "equivalent" units of affordability levels that are the same or lower than the income distribution of renters for City of Berkeley according to the United States Department of Housing and Urban Development's Comprehensive Housing Affordability Strategy (CHAS) database.

4) Code Compliance per 23.204.130.E & BMC Section 23.304.050 & 23.322.090(A)(2):

Required Development Standards		Base Project	Proposed Project	Notes
Usable Open Space, Minimum	80 sq. ft. per unit	80 sq. ft. X 120 units = 9600 sq. ft. required	80 sq. ft. X240 units= 19,200 sq. ft. required Proposed Project has provided	Base Project complies (Roof Deck) Please revise Base plans to show a recreational roof deck that includes

			2,055 ~~1,048~~ sq. ft., only.	amenities and with 40% landscape areas. Proposed Project does not comply/**Waiver required**
Usable Open Space, Landscaped area	40% of UOS	40% X 19,200 sq. ft. = 7,680 q. ft. 0 sq. ft. is provided where 2,560 sq. ft. is required. Please revise application	Project has only provided 27 ~~321~~ Sq. ft.	Base Project does not comply/ Please revise Proposed Project does not comply/**Waiver required**
Privately-Owned Public Open Space	Not required in a residential project	N/A	N/A	N/A
Open Space Alternatives	Per BMC 23.204.130 (E)(6)(a), In lieu of providing the open space required by this section on-site, an applicant may either: i. Pay an in-lieu fee to help fund the Streets and Open Space Improvement Plan (SOSIP); and/or ii. Construct public improvement consistent with the SOSIP.	N/A	In lieu of providing the open space required by this section on-site, an applicant may either: i. Pay an in-lieu fee to help fund the Streets and Open Space Improvement Plan (SOSIP); and/or ii. Construct public	Not provided for the Proposed Project. Provide information re the required in-lieu fee or public improvement consistent with the SOSIP

			improvement consistent with the SOSIP.	
Min. Building Height	40 ft.	75 ft. + 5 ft. parapets	256 ft.	Base Complies Proposed complies
Max. Building Height	75 with Use Permit +5 feet of parapets	75 ft. + 5 ft. parapets	256 ft.	Base Project complies Proposed project does not comply. Waivers are requested. 1)Waiver for being the third building in the Combined Core and Outer Core for a height of over 120 ft. while only a maximum of 2 buildings are allowed 2)Waiver for going over 120 feet in height while the allowed maximum height for maximum of two buildings in this district is 120 feet.
Community Benefits	See BMC Section 23.204.130 (E)(2)(c)	N/A	Statement from Applicant to provide community Benefits is missing	Per BMC 23.204.130 (E)(2)(c) *Community Benefit is Required* To approve a Use Permit for increased building

				height under this section Provide a Community Benefit Statement in the Applicant Statement. **Since a concession has been requested, please Remove Bird Safe Glass from the Community Benefit Statement**
Setbacks		Per BMC 23.204.130 (E) (3)(b), Use Permit option to modify setbacks is available	Per BMC 23.204.130 (E) (3)(b), Use Permit option to modify setbacks is available	Base project complies **Setbacks Do not comply. UP option available.**
Streets and Open Space Improvement Plan (SOSIP) Fee	Per BMC 23.204.130 (F), in addition to any other requirement of this section, projects shall be subject to payment of an impact fee to implement the Streets and Open Space Improvement Plan.	N/A	Statement from Applicant to provide SOSIP is missing	Required. Provide information about this requirement in the Applicant Statement. Fee amount: TBD
Auto Parking	N/A per AB2097	Provided 0 parking spaces	Provided 29 parking spaces	
Bike Parking	Residential Long-Term Bike Parking space required: One space per 3 bedrooms	complies	280/3=94 Residential Long-Term Bike Parking spaces are required	Base Project complies 167~~176~~ LT spaces are provided. Proposed project complies

	Residential Short-Term Bike Parking space required: One space per 40 bedrooms	complies	280/40=7 Residential Short-Term Bike Parking spaces are required	Base Project complies 8 provided/ Proposed project complies with the ST requirements.
Per 23.304.050(A)/ Allowed Projections Above Height Limits/Rooftop Elevator Equipment and Water Heaters	Building and site features, including but not limited to, mechanical penthouses, elevator equipment rooms and cupolas, domes, turrets and other architectural elements, may not exceed 15% of the average floor area of all of the building's stories. No tower or similar structure may be used as habitable space or for any commercial purpose, other than the mechanical needs of the building	N/A	Rooftop architectural elements changed from 1,066sf at 12.6% to 1,167sf at 14.4%	Under 15%, a waiver is not required. An AUP is applied for.

Please submit responses to all requested items at once, and not incrementally. In your resubmittal, **include a letter** stating how you have addressed the incomplete items.

Sincerely,

Nilu Karimzadegan, Senior Planner

Walnut Creek, California 94596

Subject: **Phase I Environmental Site Assessment**
2029-2039 University Avenue
Berkeley, California 94704
AEI Project No. 508101

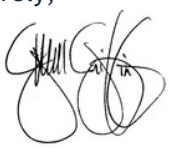
Dear Steve Heaton:

AEI Consultants is pleased to provide the *Phase I Environmental Site Assessment* of the above referenced property. This assessment was authorized and performed in accordance with the scope of services engaged.

When the original Phase I was prepared on 9/22/2023, plans for redeveloping the property had not been prepared yet. The 9/22/2023 Phase I indicated that if the property was redeveloped for residential use in the future, additional sampling and/or mitigation efforts may be required. Since that time, project plans have been prepared, and the residential units are designed so that they are 37 feet above grade and higher. A new Phase I has been prepared to reflect the project design and additional sampling and/or mitigation efforts are not required.

We appreciate the opportunity to provide services to you. If you have any questions concerning this report, or if we can assist you in any other matter, please contact me at (925) 746-6000 or ggriffin@aeiconsultants.com.

Sincerely,



Greg Griffin
Business Development Manager
AEI Consultants

EXECUTIVE SUMMARY

AEI Consultants (AEI) was retained by Laconia Development to conduct a Phase I ESA in conformance with AEI's contract and the scope and limitations of ASTM Standard Practice E1527-21 and the EPA Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), for the property located at 2029-2039 University Avenue, Berkeley, Alameda County, California (the "subject property"). Any exceptions to, or deletions from, this practice are described in Sections 1.4, 1.5, and 1.6 of this report.

Pertinent subject property information is noted below:

Property Information	
Site Address(es)	2029-2039 University Avenue, Berkeley, Alameda County, California 94704
Property ID (APN or Block/Lot)	57-2053-8-1
Location	North side of University Avenue
Site and Building Information	
Approximate Site Acreage/Source	0.28/Assessor
Number of Buildings	One
Building Construction Date(s)/Source	1952/Assessor
Building Square Footage (SF)/Source	12,385/Assessor
Number of Floors/Stories	Two
Basement or Subgrade Area(s)	None identified
Number of Units	Seven
Additional Improvements	Rear carport, asphalt-paved parking areas, and associated landscaping
Property Type	Retail - Strip Center
On-site Occupant(s)	JV Nails, Unity in Art, Lhasa Hair Salon, Vintage Thrift Dope Stuff, Berkeley Shade Co., Pesticide Action Network, Californians for Pesticide Reform, Incasa Coffee, Jerry Haag
Current On-site Operations/Use	Beauty salons, clothing store, thrift shop, window store, art gallery, and commercial offices
Current Use of Hazardous Substances	None identified
Regulatory Information	
Regulatory Database Listing(s)	HWTS, HAZNET

A chronological summary of historical subject property information is as follows:

Date Range	Subject Property Description and Occupancy (Historical Addresses)	Source(s)
Prior to 1890	Unknown use/Data failure; refer to Section 1.6.1	N/A
1890-1911	Residential dwellings	Sanborn maps
1911-1928	Unknown use/Data failure; refer to Section 1.6.1	N/A
1928-1939	Parking lot	Aerial photographs, sanborn maps, city directories
1945-1950	Car sale lot with a small office building and current carports, partially used for auto repair, tenants include Zane's Used Car Lot and Auto Repair (2035 University Avenue)	Aerial photographs, sanborn maps, city directories
1952-present	Current building constructed for commercial and retail use (2027-2039 University Street), identified occupants include various restaurants, beauty and nail salons, clothing stores, a window shop, and commercial offices	Aerial photographs, sanborn maps, city directories, agency records

The immediately surrounding properties consist of the following:

Direction	Tenant/Use (Address)	Regulatory Database Listing(s)
North	Residence (2009 Berkeley Way) Hope Center (2012-2020 Berkeley Way)	Yes; refer to Section 5.1
East	Nash Hotel Berkeley, with Nepalese Gift and Smoke Shop and Nash Cafe (2041-2049 University Avenue)	None identified
South	University Avenue followed by: UC Studios, Cafe Tibet: A Vegan Restaurant, Cal's Fried Chicken and Burgers, Mayor Tom Bates, The UC Theatre Taube Family Music Hall, Pupuseria y Restaurante Plantano, LAN Beauty Salon (2018-2048 University Avenue)	None identified
West	Uni Tailor, Red Tomato Pizza House, University Taqueria, El Burro Picante (2013-2021 University Avenue)	None identified

Findings and Opinions

Significant Data Gap(s) is defined by the current ASTM Standard E1527 as a data gap that affects the ability of the environmental professional to identify a recognized environmental condition.

AEI did not identify significant data gaps which affected our ability to identify RECs.

Recognized Environmental Condition (REC) is defined by the current ASTM Standard E1527 as (1) the presence of hazardous substances or petroleum products in, on, or at the subject property due to a release to the environment; (2) the likely presence of hazardous substances or petroleum products in, on, or at the subject property due to a release or likely release to the environment; or (3) the presence of hazardous substances or petroleum products in, on, or at the subject property under conditions that pose a material threat of a future release to the environment.

- AEI did not identify evidence of RECs during the course of this assessment.

Controlled Recognized Environmental Condition (CREC) is defined by the current ASTM Standard E1527 as a recognized environmental condition affecting the subject property that has been addressed to the satisfaction of the applicable regulatory authority or authorities with hazardous substances or petroleum products allowed to remain in place subject to implementation of required controls (for example, activity and use limitations or other property use limitations).

- AEI did not identify evidence of CRECs during the course of this assessment.

Historical Recognized Environmental Condition (HREC) is defined by the current ASTM Standard E1527 as a previous release of hazardous substances or petroleum products affecting the subject property that has been addressed to the satisfaction of the applicable regulatory authority or authorities and meeting unrestricted use criteria established by the applicable regulatory authority or authorities without subjecting the subject property to any controls (for example, activity and use limitations or other property use limitations).

- AEI did not identify evidence of HRECs during the course of this assessment.

Other Environmental Considerations include, but are not limited to, de minimis conditions and/or business environmental risks such as the presence of ACMs, LBP, radon, mold, and lead in drinking water, which can have a material environmental or environmentally-driven impact on the business associated with the current or planned use of a parcel of commercial real estate, not necessarily limited to those environmental issues required to be investigated in the ASTM Standard. These may also affect the liabilities and financial obligations of the client, the health and safety of site occupants, and the value and marketability of the subject property.

- The adjoining property to the north, 2012 Berkeley Way, identified as Bridge Housing Corporation, is associated with a Spills, Leaks, Investigations, and Cleanups (SLIC) site granted closure by Alameda County in 2022. Investigations revealed elevated lead in on-site soils. Soil vapor sampling was performed at the site in February, April, and May 2020. One soil vapor probe, SV-12, was installed approximately 15 to 20 feet north of the subject property and sampled in February 2020. Benzene was detected in temporary vapor probe SV-12 from 5 feet bgs at 5.9 ug/m3 and from 15 feet bgs at 28.4 ug/m3. A permanent soil vapor probe, SV-12A was subsequently installed and sampled in April and May 2020. Benzene was not detected in permanent vapor probe SV-12A from 5 feet bags in April or May 2020. Benzene detected from SV-12 in February 2020 were in excess of the Regional Board residential vapor intrusion ESL of 3.2 ug/mg3 and the detection from 15 feet bgs was in excess of the Regional Board commercial/industrial vapor intrusion ESL. Based on the laboratory analytical results from the February, April, and May 2020 soil vapor sampling events, Rincon concluded that the concentrations of VOCs detected in the April and May sampling events were consistent with or lower than the concentrations detected February 2020. In addition, Rincon indicated VOCs (other than benzene), were not present in sub-surface soil vapor at a concentration that would present a potential health risk for residential land uses. Additionally, the elevated levels of benzene have been attributed by the ACDEH to regional groundwater impacts. Therefore, Rincon contended that soil vapor mitigation engineering controls was not recommended as part of redevelopment of the adjoining property. Further, the April and May 2020 sampling data was provided to ACDEH in advance of this report. In a meeting on June 1, 2020, ACDEH indicated that they concur that a soil vapor barrier was not required; however, they recommended that trench dams be installed at the property line for all utilities entering the property from offsite to mitigate for potential vapor intrusion from off-site sources.

  In July 2021 soil containing lead at concentrations above the site clean-up goal of 80 mg/kg was excavated and disposed of off-site at a licensed disposal facility. Approximately 90 cubic yards were disposed of as Federal hazardous waste and approximately 900 cubic yards were disposed of as California hazardous waste. Confirmation soil samples were collected from the sidewalls and bottom of

the excavations and confirmed soil exceeding the clean-up goals was removed. An excavation was also performed in the area of vapor probes SV-12 and SV-12a. This excavation area is denoted as Cal Haz Area 4. On July 20 and July 21, 2020, Cal Haz 4 was excavated to a depth of 4 feet bgs, and initial confirmation soil samples (#85 through #115) were analyzed. One initial sidewall sample (#100) exceeded the site cleanup goal; therefore, one additional lateral excavation was advanced into the sidewall at that location. The concentration in the confirmation sample collected from the stepped-out sidewall (#101) was below the site clean-up goal; therefore, the remedial excavation was considered complete. Following remedial excavation and trench dam work, the ACDEH concluded that the residual subsurface contamination at the site presented a low risk to human health and the environment and granted for the current residential land use. The SLIC case was granted closure by the ACDEH in a letter dated June 29, 2022. Based on the closed regulatory status and excavation of lead and benzene-impacted soil to a depth of 4 feet bgs immediately north of the subject property, the closed SLIC case is not expected to represent a significant environmental concern at this time. However, as previously noted, petroleum impacts are attributed to a regional benzene plume. No details regarding this plume is available, and it is unclear if it is present beneath the subject property, but due to the historical use of the subject property primarily for retail, residential, and/or car park purposes, it is unlikely the subject property owner would be responsible for any future assessment or remediation activities. Additionally, shallow soil vapor samples collected from the subject property vicinity have consistently been below commercial/industrial ESLs (and non detect in the most recent sampling events). AEI understands the subject property is to be redeveloped for residential use; however, the buildings are designed with three levels of parking below the residential units. Based on the lower levels of the proposed building for parking, any impacts from the regional benzene plum would not represent a vapor intrusion concern to future occupants, and no further action appears warranted at this time.

- Due to the age of the subject property building, there is a potential that ACMs are present. The observed suspect ACMs at the subject property were in good condition at the time of the site reconnaissance and are not expected to pose a health and safety concern to the occupants of the subject property at this time. Based on the potential presence of ACMs, AEI recommends the implementation of an O&M Plan which stipulates that the repair and maintenance of damaged materials should be performed to protect the health and safety of the building occupants. In the event that building renovation or demolition activities are planned, a thorough asbestos survey to identify asbestos-containing building materials is required in accordance with the EPA NESHAP 40 CFR Part 61 prior to demolition or renovation activities that may disturb suspect ACMs.
- Due to the age of the subject property building, there is a potential that LBP is present. All observed painted surfaces were in good condition and are not expected to pose a health and safety concern to the occupants of the subject property at this time. Local regulations may apply to LBP in association with building demolition/renovations and worker/occupant protection. Actual material samples would need to be collected or an x-ray fluorescence (XRF) survey performed in order to determine if LBP is present. It should be noted that construction activities that disturb materials or paints containing any amount of lead may be subject to certain requirements of the OSHA lead standard contained in 29 CFR 1910.1025 and 1926.62.

CONCLUSIONS

We have performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM Standard Practice E1527-21, of 2029-2039 University Avenue, Berkeley, Alameda County, California, the *subject property*. Any exceptions to, or deletions from, this practice are described in Sections 1.4, 1.5, and 1.6 of this report.

This assessment has revealed no evidence of recognized environmental conditions, controlled recognized environmental conditions, or significant data gaps in connection with the subject property.

RECOMMENDATIONS

AEI recommends no further investigation for the subject property at this time.

1.0 INTRODUCTION

This report documents the methods and findings of the Phase I Environmental Site Assessment performed in conformance with AEI's contract and scope and limitations of ASTM Standard Practice E1527-21 and the EPA Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), for the property located at 2029-2039 University Avenue, Berkeley, Alameda County, California (Appendix A: Figures and Appendix B: Property Photographs).

1.1 Scope of Work

The purpose of the Phase I ESA is to assist the client in identifying potential RECs, in accordance with the most current ASTM E1527 Standard associated with the presence of any hazardous substances or petroleum products, their use, storage, and disposal at and in the vicinity of the subject property. Property assessment activities focused on: 1) a review of federal, state, tribal, and local databases that identify and describe underground fuel tank sites, leaking underground fuel tank sites, hazardous waste generation sites, and hazardous waste storage and disposal facility sites within the ASTM approximate minimum search distance; 2) a property and surrounding site reconnaissance, and interviews with the past and present owners and current occupants and operators to identify potential environmental contamination; and 3) a review of historical sources to help ascertain previous land use at the site and in the surrounding area.

1.2 Additional Services

Other Environmental Considerations such as ACMs, LBP, lead in drinking water, radon, mold, and wetlands can result in business environmental risks for property owners which may disrupt current or planned operations or cash flow and are generally beyond the scope of a Phase I assessment as defined by the current ASTM Standard E1527. Based upon the agreed-on scope of services this ESA did not include subsurface or other invasive assessments, business environmental risks, or other services not specifically identified and discussed herein.

1.3 Significant Assumptions

The following assumptions are made by AEI in this report. AEI relied on information derived from secondary sources including governmental agencies, the client, designated representatives of the client, property contact, property owner, property owner representatives, computer databases, and personal interviews. AEI has reviewed and evaluated the thoroughness and reliability of the information derived from secondary sources including government agencies, the client, designated representatives of the client, property contact, property owner, property owner representatives, computer databases, or personal interviews. It appears that all information obtained from outside sources and reviewed for this assessment is thorough and reliable. However, AEI cannot guarantee the thoroughness or reliability of this information.

Groundwater flow, unless otherwise specified by on-site well data or well data from the subject property or nearby sites, is inferred from contour information depicted on the USGS topographic maps. AEI assumes the property has been correctly and accurately identified by the client, designated representative of the client, property contact, property owner, and property owner's representatives.

1.4 LIMITATIONS

Property conditions, as well as local, state, tribal, and federal regulations can change significantly over time. Therefore, the recommendations and conclusions presented as a result of this assessment apply strictly to the environmental regulations and property conditions existing at the time the assessment was performed. Available information has been analyzed using currently accepted assessment techniques and it is believed that the inferences made are reasonably representative of the property. AEI makes no warranty, expressed or implied, except that the services have been performed in accordance with generally accepted environmental property assessment practices applicable at the time and location of the assessment.

Considerations identified by ASTM as beyond the scope of a Phase I ESA that may affect business environmental risk at a given property include the following: ACMs, radon, LBP, lead in drinking water, wetlands, regulatory compliance, cultural and historical resources, industrial hygiene, health and safety, ecological resources, endangered species, indoor air quality, mold, and high voltage lines. These environmental issues or conditions may warrant assessment based on the type of the property transaction; however, they are considered non-scope issues under the current ASTM Standard E1527.

If requested by the client, these non-scope issues are discussed herein. Otherwise, the purpose of this assessment is solely to satisfy one of the requirements for qualification of the innocent landowner defense, contiguous property owner or bona fide prospective purchaser under CERCLA. The current ASTM Standard E1527 and the United States EPA Standards and Practices for All Appropriate Inquiries (40 CFR Part 312) constitute the "all appropriate inquiry into the previous ownership and uses of the property consistent with good commercial or customary practice" as defined in:

1. 42 U.S.C. § 9601(35)(B), referenced in the current ASTM Standard E1527.
2. Sections 101(35)(B) (ii) and (iii) of CERCLA and referenced in the EPA Standards and Practices for All Appropriate Inquiries (40 CFR Part 312).
3. 42 U.S.C. § 9601(40) and 42 U.S.C. § 9607(q).

The Phase I Environmental Site Assessment is not, and should not be construed as, a warranty or guarantee about the presence or absence of environmental contaminants that may affect the property. Neither is the assessment intended to assure clear title to the property in question. The sole purpose of assessment into property title records is to ascertain a historical basis of prior land use. All findings, conclusions, and recommendations stated in this report are based upon facts, circumstances, and industry-accepted procedures for such services as they existed at the time this report was prepared (i.e., federal, state, and local laws, rules, regulations, market conditions, economic conditions, political climate, and other applicable matters). All findings, conclusions, and recommendations stated in this report are based on the data and information provided, current subject property use, and observations and conditions that existed on the date and time of the property reconnaissance.

Responses received from local, state, or federal agencies or other secondary sources of information after the issuance of this report may change certain facts, findings, conclusions, or circumstances to the report. A change in any fact, circumstance, or industry-accepted procedure upon which this report was based may adversely affect the findings, conclusions, and recommendations expressed in this report.

AEI's limited radon screening, if included, is intended to provide a preliminary screening to evaluate the potential presence of elevated radon concentrations at the site. The proposed scope is not intended to define the full extent of the presence of radon at the subject property. As such, the results should be used for lending purposes only. The recommendations and conclusions presented as a result of the limited preliminary radon screening apply strictly to the property conditions existing at the time the sampling was performed. The sample analytical results are only valid for the time, place, and condition of the site at the time of collection and AEI does not warrant that the results will be repeatable or are representative of past or future conditions.

1.5 Limiting Conditions/Deviations

The performance of this assessment was limited by the following:

- While additional assessments may have been conducted on the subject property, these documents must be provided for AEI's review in order for the information to be summarized/included in this report. Please refer to Section 6.3 for a summary of previous reports and other documentation provided to AEI during this assessment.
- The User did not complete the ASTM User Questionnaire or provide the User information to AEI. AEI assumes that qualification for the LLPs is being established by the User in documentation outside of this assessment.
- A key site manager was not identified during this assessment. Based on information obtained from other sources, including the owner representative, this limiting condition is not expected to alter the overall findings of this assessment.
- The Berkeley Toxic Substances Department, Berkeley Fire Department, Berkeley Building Department and theBerkeley Planning Department were contacted for information on the subject property in order to identify historical tenants/use, property development, and/or hazardous substance/petroleum product handling. However, based on the quality of information obtained from other sources including a review of historical sources and prior reports, this limitation is not expected to significantly alter the findings of this assessment.
- The owner of the window store at 2039 University Avenue was not present during the site visit and the building owner representative did not have a key, as a result AEI was unable to observe the interior of this unit. AEI observed all the other units. Due to the commercial nature of occupancy, this limited inspection method is expected to be adequate for the purposes of this assessment.
- Due to the large volume of materials within portions of the building, direct visual observation of many of the floor and wall areas of the building was not possible. Features may be present that were not observed during AEI’s field reconnaissance. Based on the quality of information obtained from other sources, this limitation is not expected to alter the overall findings of this assessment.

1.6 Data Failure and Data Gaps

According to the current ASTM Standard E1527, data gaps occur when the Environmental Professional is unable to obtain information required by the Standard, despite good faith efforts to gather such information. Pursuant to the current ASTM Standard E1527, only significant data gaps, defined as those that affect the ability of the Environmental Professional to identify RECs, need to be documented.

Data failure is one type of data gap. According to the current ASTM Standard E1527, data failure occurs when all of the standard historical sources that are reasonably ascertainable and likely to be useful have been reviewed and yet the objectives have not been met. Pursuant to the current ASTM Standard E1527, historical sources are required to document property use back to the property's first developed use or back to 1940, whichever is earlier, or periods of five years or greater.

1.6.1 Data Failure

The following data failure was identified during the course of this assessment:

Data Failure	As noted in Section 3.0, the earliest historical resource obtained during this assessment indicated that the subject property was developed with a residence. The lack of historical sources for the subject property dating back to first developed use represents historical data source failure. However, as it is assumed that the subject property would have been previously used for residential purposes, if not undeveloped, this data failure is not expected to significantly alter the findings of this assessment.
Information/Sources Consulted	Aerial photographs, Sanborn fire insurance maps, city directories, historical topographic maps, agency records, previous reports, interviews

Data Failure	As noted in Section 3.0, historical sources were not obtained at five-year intervals dating back to first developed use. However, it is assumed that during this time period the subject property would have been residential, if not undeveloped. Therefore, this data failure is not expected to significantly alter the findings of this assessment.
Information/Sources Consulted	Aerial photographs, Sanborn fire insurance maps, city directories, historical topographic maps, agency records, previous reports, interviews

1.6.2 Significant Data Gaps

AEI did not identify significant data gaps which affected our ability to identify RECs.

1.7 Reliance

All reports, both verbal and written, are for the benefit of Laconia Development . This report is for the purpose of evaluating the subject Property in connection with securing mortgage financing and has no other purpose. This report may not be relied upon by any other person or entity without the written consent of AEI either verbally or in writing. In the absence of a written agreement with AEI granting such rights, no third parties shall have rights of recourse or recovery whatsoever under any course of action against AEI, its officers, employees, vendors, successors or assigns.

Reliance is provided in accordance with Laconia Development and AEI's contract and Terms and Conditions dated March 25, 2025. The limitation of liability defined in the contracted terms is the aggregate limit of AEI's liability to the client and all relying parties.

2.0 SITE AND VICINITY DESCRIPTION

2.1 Site Location and Description

Property Information	
Site Address(es)	2029-2039 University Avenue, Berkeley, Alameda County, California 94704
Property ID (APN or Block/Lot)	57-2053-8-1
Location	North side of University Avenue
Site and Building Information	
Approximate Site Acreage/Source	0.28/Assessor
Number of Buildings	One
Building Construction Date(s)/Source	1952/Assessor
Building Square Footage (SF)/Source	12,385/Assessor
Number of Floors/Stories	Two
Basement or Subgrade Area(s)	None identified
Number of Units	Seven
Additional Improvements	Rear carport, asphalt-paved parking areas, and associated landscaping
Property Type	Retail - Strip Center
On-site Occupant(s)	JV Nails, Unity in Art, Lhasa Hair Salon, Vintage Thrift Dope Stuff, Berkeley Shade Co., Pesticide Action Network, Californians for Pesticide Reform, Incasa Coffee, Jerry Haag
Current On-site Operations/Use	Beauty salons, clothing store, thrift shop, window store, art gallery, and commercial offices
Current Use of Hazardous Substances	None identified
Regulatory Information	
Regulatory Database Listing(s)	HWTS, HAZNET

2.2 On-Site Utilities

Utility	Source/System Information
Heating System	Natural gas
Cooling System	Electricity
Potable Water	City of Berkeley through East Bay Municipal Utility District (EBMUD)
Sewage Disposal/Treatment	City of Berkeley through EBMUD/Sanitary Sewer

Utility source/system information listed in the table above is provided by online research and site observation, unless otherwise noted above.

2.3 Site and Vicinity Characteristics

The subject property is located in a mixed use commercial and residential area of Berkeley, California. The immediately surrounding properties consist of the following:

Direction	Tenant/Use (Address)	Regulatory Database Listing(s)
North	Residence (2009 Berkeley Way) Hope Center (2012-2020 Berkeley Way)	Yes; refer to Section 5.1
East	Nash Hotel Berkeley, with Nepalese Gift and Smoke Shop and Nash Cafe (2041-2049 University Avenue)	None identified
South	University Avenue followed by:	None identified

Direction	Tenant/Use (Address)	Regulatory Database Listing(s)
	UC Studios, Cafe Tibet: A Vegan Restaurant, Cal's Fried Chicken and Burgers, Mayor Tom Bates, The UC Theatre Taube Family Music Hall, Pupuseria y Restaurante Plantano, LAN Beauty Salon (2018-2048 University Avenue)	
West	Uni Tailor, Red Tomato Pizza House, University Taqueria, El Burro Picante (2013-2021 University Avenue)	None identified

2.4 PHYSICAL SETTING

Geologic Unit	Temescal formation: alluvial fan deposits comprising interfingering lenses of clayey gravel, sandy silty clay, and sand-clay-silt mixtures, age Pleistocene Source: USGS Geology Data
Soil Series	Soil Component Name: Tierra Soil Surface Texture: loam Hydrologic Group: Class D - Very slow infiltration rates. Soils are clayey, have a high water table, or are shallow to an impervious layer Soil Drainage Class: Moderately well drained Source: EDR GeoCheck®
Groundwater Flow Direction	Southwest Source: Topographic map interpretation
Estimated Depth to Groundwater	16 feet bgs Source: Final Report on sump and hydraulic hoist removal at 2009 Addison Street, located 350 feet south, found on GeoTracker
Surface waters on the subject property or adjoining sites	None
Additional Notes	None

Note: Groundwater flow direction can be influenced locally and regionally by the presence of local wetland features, surface topography, recharge and discharge areas, horizontal and vertical inconsistencies in the types and location of subsurface soils, and proximity to water pumping wells. Depth and gradient of the water table can change seasonally in response to variation in precipitation and recharge, and over time, in response to urban development such as storm water controls, impervious surfaces, pumping wells, cleanup activities, dewatering, seawater intrusion barrier projects near the coast, and other factors.

3.0 HISTORICAL RECORDS REVIEW

Reasonably ascertainable standard historical sources as outlined in the current ASTM Standard E1527 were used to determine previous uses and occupancies of the subject property that are likely to have led to RECs in connection with the subject property. A chronological summary of historical data found, including but not limited to aerial photographs, historical city directories, Sanborn fire insurance maps, historical topographic maps, and agency records, is as follows:

Date Range	Subject Property Description and Occupancy (Historical Addresses)	Source(s)
Prior to 1890	Unknown use/Data failure; refer to Section 1.6.1	N/A
1890-1911	Residential dwellings	Sanborn maps
1911-1928	Unknown use/Data failure; refer to Section 1.6.1	N/A
1928-1939	Parking lot	Aerial photographs, sanborn maps, city directories
1945-1950	Car sale lot with a small office building and current carports, partially used for auto repair, tenants include Zane's Used Car Lot and Auto Repair (2035 University Avenue)	Aerial photographs, sanborn maps, city directories
1952-present	Current building constructed for commercial and retail use (2027-2039 University Street), identified occupants include various restaurants, beauty and nail salons, clothing stores, a window shop, and commercial offices	Aerial photographs, sanborn maps, city directories, agency records

According to available historical sources, the subject property was occupied by Zane's Used Car Lot and Auto repair from at least 1945 until 1950, and auto repair operations were conducted in the western portion of the current car port building. The buildings were not present in 1939, and the subject property had been developed with the current improvements for retail use by 1952, indicating the auto repair/sales operations were only on-site for approximately 10 to 12 years. Based on the small quantities of hazardous materials typically associated with auto repair operations and short duration of use, this former tenant is not expected to represent a significant environmental concern.

If available, copies of historical sources are provided in Appendix D.

3.1 AERIAL PHOTOGRAPHS

AEI reviewed aerial photographs of the subject property and surrounding area. A search was made of the EDR collection of aerial photographs. Aerial photographs were reviewed for the following years (1939-2020, non-inclusive):

Year(s)	Subject Property Description	Adjoining Site Descriptions
1939	A parking lot	NORTH: Developed with residential buildings EAST: Developed with the existing structure SOUTH: Roadway followed by the existing structures WEST: Developed with the existing structure
1946, 1950	Parking lot with a small structure along the south property boundary and the existing carport	NORTH: No significant changes EAST: No significant changes SOUTH: No significant changes WEST: No significant changes

Year(s)	Subject Property Description	Adjoining Site Descriptions
1958, 1963, 1968, 1974, 1982, 1993, 1998, 2005, 2009, 2012, 2020	Developed with the existing buildings and parking area	NORTH: Parking lot with residential units to the northwest EAST: No significant changes SOUTH: No significant changes WEST: No significant changes

Subject property:

- No potential environmental concerns identified

Adjoining Site(s):

- No potential environmental concerns identified

3.2 Sanborn Fire Insurance Maps

Sanborn Fire Insurance maps were developed in the late 1800s and early 1900s for use as an assessment tool for fire insurance rates in urbanized areas. A search was made of the EDR collection of Sanborn Fire Insurance maps.

The following maps were reviewed (1890-1980, non-inclusive):

Year(s)	Subject Property Description (Listed Address)	Adjoining Site Descriptions
1890	Developed with two dwellings and associated stable and two associated sheds (14-16 University Avenue)	NORTH: Developed with multiple dwellings (42-48 Berkeley Way) EAST: Developed with a dwelling and an associated shed (13 University Avenue) SOUTH: University Avenue followed by two parcels of vacant land WEST: Vacant land (17 University Avenue, and 41 Berkeley Way)
1894	Developed with two dwellings with an associated stable and multiple associated sheds (2021-2025, 54 University Avenue)	NORTH: Three dwellings (2014-2020, 20 Berkeley Way) EAST: One dwelling (13-51 University Avenue) SOUTH: No significant change WEST: No significant change
1903	Developed with two dwellings with an associated stable and multiple associated sheds (2021-2025 University Avenue)	NORTH: Three dwellings (2014-2020 Berkeley Way) EAST: No significant change SOUTH: University Avenue followed by a wood yard with a storage building (2030 University Avenue) WEST: No significant change

Year(s)	Subject Property Description (Listed Address)	Adjoining Site Descriptions
1911	Developed with three dwellings with associated sheds and a garage (2021-2025 University Avenue)	NORTH: No significant change EAST: Dwelling with associated sheds (2033 University Avenue) SOUTH: University Avenue followed by a feed & fuel storage building, with three associated stables and an office (2030 University Avenue), as well as a Hay & Fuel storage building with three offices (2032-2046 University Avenue) WEST: No significant change
1929	Vacant land	NORTH: No significant change EAST: 48 room hotel building with four associated stores (2041-2049 University Avenue) SOUTH: University Avenue followed by a movie theatre with three stores and a machine shop (2018-2036 University Avenue), a Paint and wallpaper building with warehouse and storage rooms (2042-2046 University Avenue) WEST: Developed with the current building with five stores (2013-2021 University Avenue)
1950	Developed with an auto repair shop and a parking lot with an office (2035 University Avenue)	NORTH: Developed with five dwellings and a multifamily residential building (2008-2016 Berkeley Way) EAST: No significant change SOUTH: University Street followed by the existing building occupied by a movie theatre with three stores and a machine shop (2018-2036 University Avenue), and a building with two stores (2042-2044 University Avenue) WEST: Building now contains a tires store and a paints store (2013-2021 University Avenue)
1980	Developed with the existing structures, containing two garages on the north side and a building with six stores (2027-2039 University Avenue)	NORTH: Depicted with a parking lot and existing structures EAST: No significant change SOUTH: No significant change WEST: Building now contains an auto shop (2013-2021 University Avenue)

Subject property:

- Historical auto repair - refer to Section 3.0

Adjoining Site(s):

- According to Sanborn maps reviewed, the adjoining property to the south included a feed and fuel and a hay and fuel buildings as we as an oil tank in 1911. These features are not depicted in the 1903 or 1929 Sanborn maps. Due to the duration since use, any residual impacts would have likely degraded and not represent a significant

concern to the subject property. Based on this information and lack of a documented release, these features on the adjacent property are not expected to represent a significant environmental concern.

3.3 CITY DIRECTORIES

A search of historical city directories was conducted for the subject property utilizing EDR. Directories were reviewed in approximate five-year increments from 1920-2020, non-inclusive. Refer to the appendices for a complete list of historical subject property tenants identified by EDR.

The first listing for the subject property appeared in 1928.

The following table summarizes the potential tenants of concern at the subject property based on AEI's review of the historical city directories.

Subject Property

Year(s)	Address - Occupant Listed
1928	2039 University Avenue - Morsa Al Albt S Lily A Auto Park
1945, 1950	2035 University Avenue - Zanes Used Cars & Auto Repairs

If listed above, XXXX indicates that the address is valid but there is no occupancy information available.

The table below summarizes the search of historical city directories conducted for the adjoining sites. Refer to the appendices for a complete list of historical adjoining occupants identified during the review of city directories obtained from EDR.

Adjoining Sites

Direction	Address(es)	Potential Listings of Concern
North	2008-2020 Berkeley Way	None
East	2041-2049 University Avenue	None
South	2018-2048 University Avenue	None
West	2013-2021 University Avenue	2013 University Avenue - Woods F N Tires (1950) 2017 University Avenue - Installment Tire Dreeke Auto Tires Sold on Installment Plan (1928)

Subject property:

- Historical auto repair - Refer to Section 3.0

Adjoining Site(s):

- A tire shop was formerly located at the west adjoining property between 1928 and 1950. Based on the small quantities of hazardous materials typically associated with these operations and lack of a documented release, this former adjacent property is not expected to represent a significant environmental concern.

3.4 Historical Topographic Maps

AEI reviewed historical topographic maps utilizing EDR. Historical topographic maps were reviewed for the years 1895-2018. No additional historical information was obtained from available topographic maps.

3.5 Chain of Title

Based on the quality of information obtained from other sources, a chain of title search was not performed as part of this assessment.

4.0 REGULATORY AGENCY RECORDS REVIEW

Local and state agencies, such as environmental health departments, fire prevention bureaus, and building and planning departments are contacted to identify any current or previous reports of hazardous substance use, storage, and/or unauthorized releases that may have impacted the subject property. In addition, information pertaining to AULs, defined as legal or physical restrictions, or limitations on the use of, or access to, a site or facility, is requested.

4.1 Local Environmental Health Department and/or State Environmental Agency

Agency	Date Contacted	Method of Contact	Name & Title of Contact	Agency Response
Berkeley Toxic Substances Department (BTSD)	April 7, 2024	Online	N/A	Response pending, refer to Section 1.5

4.2 Fire Department

Agency	Date Contacted	Method of Contact	Name & Title of Contact	Agency Response
Berkeley Fire Department (BFD)	April 7, 2025	Online	N/A	Response pending, refer to Section 1.5

4.3 Building Department

Agency	Date Contacted	Method of Contact	Name & Title of Contact	Agency Response
Berkeley Building Department (BBD)	April 7, 2025	Online	N/A	Response pending, refer to Section 1.5

4.4 Planning Department

Agency	Date Contacted	Method of Contact	Name & Title of Contact	Agency Response
Berkeley Planning Department (BPD)	April 7, 2025	Online	N/A	Response pending, refer to Section 1.5

4.5 Assessor's Office

Agency	Date Contacted	Method of Contact	Name & Title of Contact	Agency Response
Alameda County Assessor's Office	April 7, 2025	Online	N/A	Information obtained is discussed below

Records Summary

APN	57-2053-8-1
Acreage	0.284 acres
Construction Date	1952
Building Square Footage	9,401 square feet
Current Owner	Not provided
Additional Information	None

4.6 Other Agencies Searched

Agency	Date Contacted	Method of Contact	Name & Title of Contact	Agency Response
CA State Water Resources Control Board (SWRCB) GeoTracker	April 8, 2025	Online	N/A	No subject property records on file
SWRCB GeoTracker PFAS Map	April 8, 2025	Online	N/A	No subject property records on file
SWRCB GeoTracker Historical Hazardous Substance Storage Information	April 8, 2025	Online	N/A	No subject property records on file
CA Department of Toxic Substances Control (DTSC) Hazardous Waste Tracking System (HWTS)	April 8, 2025	Online	N/A	Records discussed below
CA DTSC EnviroStor	April 8, 2025	Online	N/A	No subject property records on file
CalEPA Regulated Site Portal		Online	N/A	No subject property records on file
Bay Area Air Quality Management District (AQMD)	April 4, 2025	Online	Rochele Henderson, Public Records Officer	No subject property records on file

California DTSC HWTS Database Summary

Occupant	Year(s)	Hazardous Waste Generated	Amount (Tons)
KTK Property	1995-2000	Asbestos Containing Waste	0.598

Based on the nature of the listing, it is not considered a REC.

4.7 Oil and Gas Wells

Agency	Date Referenced	Resource	Oil or gas wells located within 500 feet of the subject property
California Department of Conservation Geologic Energy Management (CalGEM)	April 8, 2025	CalGEM Map	No

4.8 Oil and Gas Pipelines

Agency	Date Referenced	Resource	Pipelines located within 500 feet of the subject property
National Pipeline Mapping System (NPMS)	April 8, 2025	NPMS Public Map Viewer	No

5.0 REGULATORY DATABASE RECORDS REVIEW

AEI contracted EDR to conduct a search of publicly available information from federal, state, tribal, and local databases containing known and suspected sites of environmental contamination and sites of potential environmental significance. Data gathered during the current regulatory database search is compiled by EDR into one regulatory database report. Location information for listed sites is designated using geocoded information provided by federal, state, or local agencies and commonly used mapping databases with the exception of "Orphan" sites. Due to poor or inadequate address information, Orphan sites are identified but not geocoded/mapped by EDR, rather, information is provided based upon vicinity zip codes, city name, and state. The minimum search distance from the federal and state environmental records database listings specified in the current ASTM Standard E1527 is included in Section 5.1. A copy of the regulatory database report, which includes detailed descriptions of the databases noted below as well as the total number of sites identified, is included in Appendix C of this report.

In determining if a listed site is a potential environmental concern to the subject property, AEI generally applies the following criteria to classify the site as lower potential environmental concern: 1) the site only holds an operating permit (which does not imply a release), 2) the site's distance from, and/or topographic position relative to, the subject property, and/or 3) the site has recently been granted "No Further Action" by the appropriate regulatory agency.

Regulatory database listings associated with the subject property, adjoining site(s) and/or nearby sites of concern that were determined to warrant additional discussion, if any, are identified and further discussed in Section 5.1.

5.1 RECORDS SUMMARY

Database	Search Distance (Miles)	Subject Property	Adjoining Site(s)	Other Nearby Sites of Concern
Federal NPL (Superfund) sites	1.0			
Federal Delisted NPL sites	0.5			
Federal CERCLA removals/orders sites	0.5			
Federal CERCLA sites with NFRAP	0.5			
Federal RCRA facilities undergoing Corrective Action	1.0			
Federal RCRA TSD facilities	0.5

Facility Name	KTK Property
Address	2029 University Avenue
Distance & Direction	Subject Property
Hydrologic Position	N/A
Databases Listed	HWTS, HAZNET
Comments	The subject property is listed on the HWTS and HAZNET databases from 1995 to 2000, the listing is currently inactive. The HAZNET database shows the site generated asbestos-containing waste. Based on the nature of these listings, they are not expected to represent a REC.

Facility Name	Bridge Housing Corporation, 2012 Berkeley Way
Address	2012 Berkeley Way
Distance & Direction	Adjoining to the North
Hydrologic Position	Up to Cross-gradient
Databases Listed	CPS-SLIC, HWTS, HAZNET, RCRA NONGEN/NLR (2), E MANFEST
Comments	The property is listed on the CPS-SLIC database due to a cleanup. The case was opened in 2020 after ACDEH reviewed a June 26, 2018 Phase I and a 2020 Phase II from Rincon Consultants Inc. *Site Investigation Summary* In October 2018, Five soil borings were advanced and soil and soil vapor samples were collected at a depth of 5 feet below ground surface (bgs). The soil samples were analyzed for Volatile Organic Compounds (VOCs), Total Petroleum Hydrocarbons (TPH) and Title 22 metals and the soil vapor samples were analyzed for VOCs. Based on the laboratory analytical results, no further assessment of VOCs in soil vapor was warranted and no further assessment of VOCs or TPH in subsurface media was determined to be necessary. With the exception of lead, concentrations of metals detected in the soil did not exceed health risk screening levels or general background concentrations of metals in California soil. One soil sample contained lead at a concentration above the San Francisco Regional Water Quality Control Board Residential Environmental Screening Level (ESL) of 80 milligrams per kilogram (mg/kg). In June 2019, seven borings (RB1a, RB2a, RB3a, RB5a, RB6, RB7, and RB8) were advanced to a depth of 3 feet bgs. Soil samples were also collected from three borings advanced to 15 feet bgs as part of a geotechnical evaluation (GT1, GT2, and GT3). Soil samples were analyzed for Title 22 metals and select samples were analyzed for soluble lead for waste characterization purposes. Three samples contained lead at concentrations over the residential ESL (RB2a, RB3a, and RB6); however, other detected metals were below their respective ESLs or within typical background concentrations. Based on the analytical results, soil in the vicinity of RB3a and RB6 was classified as California Hazardous Waste for the purpose of disposal. The presence of lead in soil was attributed to the demolition of the former on-site structures (that based

on their age may likely have a history of lead-based paints), and/or from aerially deposited lead (ADL) associated with the former use of leaded gasoline in vehicles and nearby roadways.

In August 2019, six borings (RB3b, RB3c, RB3d, RB6a, RB6b, RB9, RB10, and RB11) were advanced to a depth of 5 feet bgs and soil samples were analyzed for total lead and select samples were analyzed for soluble lead for waste characterization purposes. Four samples contained lead over the residential ESL (RB3c, RB3d [two samples], and RB6b). Based on the analytical results, soil in the vicinity of RB6b was classified as California hazardous waste; soil south of RB3a in the vicinity of RB3d was classified as Federal-hazardous waste.

In October 2019, 10 soil borings (RB3E, RB3D-S1, RB3D-S2, RB3D-SW1, RB3D-W1, RB3D-NW1, RB3D-W2, RB3D-SW2, RB3D-W3, and RB3D-NW2) were advanced to a depth of up to 6 feet bgs and soil samples were analyzed for total lead and select samples were analyzed for soluble lead. Six samples contained lead above the residential ESL (RB3E, RB3D-S1, RB3D-S2, RB3D-SW1, RB3D-W2, and RB3D-SW2). Based on the analytical results, soils in the southeastern corner of the site in the vicinity of RB3D-SW1 are generally classified as California-hazardous waste.

Soil vapor sampling was performed at the site in February, April, and May 2020. One soil vapor probe, SV-12, was installed approximately 15 to 20 feet north of the subject property and sampled in February and April 2020. In February 2020, TPHg was detected in temporary vapor probe SV-12 from 5 feet bgs at 654 micrograms per cubic meter (ug/m3) and from 15 feet bgs at 13,497 ug/m3. In February 2020, benzene was detected in temporary vapor probe SV-12 from 5 feet bgs at 5.9 ug/m3 and from 15 feet bgs at 28.4 ug/m3. In April and May 2020, Benzene was not detected in permanent vapor probe SV-12A from 5 feet bgs. Figure 4 from the 2020 Soil Vapor Monitoring Report depicts the Benzene soil vapor plume undefined to the south toward the subject property in excess of 10 ug/m3. Benzene detected from SV-12 in February 2020 were in excess of the Regional Board residential vapor intrusion ESL of 3.2 ug/mg and the detection from 15 feet bgs was in excess of the Regional Board commercial/industrial vapor intrusion ESL.

Based on the laboratory analytical results from the February, April, and May 2020 soil vapor sampling events, Rincon concluded that the concentrations of VOCs detected in the April and May sampling events were consistent with or lower than the concentrations detected February 2020. In addition, Rincon indicated VOCs (other than benzene, which has been attributed by ACDEH to regional groundwater impacts) were not present in sub-surface soil vapor at a concentration that would present a potential health risk for residential land uses. Therefore, Rincon contended that soil vapor mitigation engineering controls was not recommended as part of redevelopment of the subject property. Further, the April and May 2020 sampling data was provided to the ACDEH in advance of this report. In a meeting on June 1, 2020, ACDEH indicated that they concur that a soil vapor barrier was not required; however, they recommended that trench dams be installed at the property line for all utilities entering the property from off-site to mitigate for potential vapor intrusion from off-site sources.

Corrective Action Summary
In July 2021 soil containing lead at concentrations above the site clean-up goal of 80 mg/kg was excavated and disposed of off-site at a licensed disposal facility. Approximately 90 cubic yards were disposed of as Federal hazardous

waste and approximately 900 cubic yards were disposed of as California-hazardous waste. Confirmation soil samples were collected from the sidewalls and bottom of the excavations and confirmed soil exceeding the clean-up goals was removed. An excavation was performed in the area of vapor probes SV-12 and SV-12a. This excavation area is denoted as Cal Haz Area 4. On July 20 and July 21, 2020, Cal Haz 4 was excavated to a depth of 4 feet bgs, and initial confirmation soil samples (#85 through #115) were analyzed. One initial sidewall sample (#100) exceeded the site cleanup goal; therefore, one additional lateral excavation was advanced into the sidewall at that location. The concentration in the confirmation sample collected from the stepped-out sidewall (#101) was below the site clean-up goal; therefore, the remedial excavation was considered complete.

In August 2020, a 3-foot diameter brick cylindrical cavity was encountered during construction activities and determined to be either a historical well or privy. The structure was excavated to the depth required for construction (i.e., 5 feet bgs) and the soil was disposed off-site as California-hazardous waste. Confirmation soil samples were collected from the excavation sidewalls and the bottom of the inside of the well/privy and analyzed for VOCs, semivolatile organic compounds (SVOCs), TPH, and metals. VOCs, SVOCs, and TPH were not detected. Lead from the sample taken within the well/privy exceeded the site clean-up goal; however, the concentrations in the excavation sidewall samples were below the clean-up goal. Other metals were either below their respective ESLs or within typical background ranges. Based on the analytical results, the lead-impacted soil was limited to the area within the well/privy structure. To demarcate the location of the well/privy, a 5-foot-by-5-foot piece of orange construction fencing was placed on the excavation bottom centered on the well/privy prior to backfilling of the excavation with clean soil sourced from on-site.

Four trench dams were installed at the property line for utilities coming from off-site to prevent potentially impacted soil vapor from off-site sources from migrating onto the site. Trench dams were installed from March 2021 through March 2022 and were constructed of slurry backfill.

Following remedial excavation and trench dam work, the ACDEH concluded that the residual subsurface contamination at the site presented a low risk to human health and the environment and granted for the current residential land use.

Based on the closed regulatory status and excavation of lead and benzene impacted soil to a depth of 4 feet bgs immediately north of the subject property, the closed SLIC case is not expected to represent a significant environmental concern at this time. However, as previously noted, petroleum impacts are attributed to a regional benzene plume. No details regarding this plume is available, and it is unclear if it is present beneath the subject property, but due to the historical use of the subject property primarily for retail, residential, and/or car park purposes, it is unlikely the subject property owner would be responsible for any future assessment or remediation activities. Additionally, shallow soil vapor samples collected from the subject property vicinity have consistently been below commercial/industrial ESLs (and non detect in the most recent sampling events). AEI understands the subject property is to be redeveloped for residential use; however, the buildings are designed with three levels of parking below the residential units. Based on the lower levels of the proposed building for

	parking, any impacts from the regional benzene plum would not represent a vapor intrusion concern to future occupants, and no further action appears warranted at this time. This site is listed on the HWTS and HAZNET databases in 2020, the listing is currently inactive, and the NAICS description is "Residential Remodels". The HAZNET database shows the site generated "Contaminated soil from site clean up". Details provided for the RCRA Non Generator (NONGEN)/No Longer Regulated (NLR) and E MANIFEST listings identified Bridge Housing Corporation as "not a generator, verified" in 2021. The NAICS Description provided for the business is "Residential Remodelers". The E MANFIEST listing shows the site generated "Contaminated soil from site clean-ups", and "Rq, Un3077, Environmentally Hazardous Substance, Solid N.O.S, (Lead, Soil) 9, Pg Iii". No violations were identified in connection with the RCRA listing. 2012 Berkeley Way was listed as a RCRA Non Generator (NONGEN)/No Longer Regulated (NLR) in 2020. Additional details provided indicate the facility formerly generated large quantities of hazardous wastes in 2020, including list lead. No violations were identified in connection with the RCRA listing.

Facility Name	Oscar's Cafe
Address	1890 Shattuck Ave
Distance & Direction	607 ft northeast
Hydrologic Position	Up-gradient
Databases Listed	LUST, CORTESE, CERS, UST FINDER RELEASE
Comments	This property is listed on the LUST database due to contamination of diesel, ethylbenzene, and gasoline. The site was historically developed with an auto station from at least 1933 to 1943. A limited Phase II subsurface soil and soil gas sampling was conducted at the subject property, where no soil ESLs for metals of hydrocarbons were exceeded. Two soil gas samples exceeded ESLs, after cleanup the case was closed in 2016. Based on the closure of the case, the limitation of contamination to soil, and the distance from the subject property, this listing is not expected to represent a REC. Additional listings: This facility was also listed on other database(s) as noted above; however, as these listings are not associated with a release, the radii prescribed by the current ASTM Standard E1527 standard does not require that these listings be specifically discussed. Notwithstanding, based on our review of available information, none of these listings appear to represent a REC at this time.

5.2 Vapor Migration

A vapor encroachment condition (VEC) is the presence or likely presence of Chemical(s) of Concern (COC) vapors in the vadose zone of the subject property caused by the release of vapors from contaminated soil and/or groundwater either on or near the subject property.

AEI conducted a limited screening for potential VECs that may affect the subject property. The VEC screening focused on the current and historical usage of the subject property and also utilized the aforementioned regulatory agency database report provided by EDR to evaluate identified Chemicals of Concern (COCs), including petroleum hydrocarbons.

Determination of AOC

To identify the area of concern (AOC) for contaminated sites with non-petroleum hydrocarbon COCs, AEI utilized the approximate minimum search distance defined by the current ASTM E2600 of 1,760 feet (1/3 mile) from the subject property boundary for COC-contaminated sites. For sites contaminated with petroleum hydrocarbon COCs, AEI utilized the AOC approximate minimum search distance of 528 feet (1/10 mile). The AOC was adjusted accordingly based on review of physical setting characteristics, known release information, property and land features, groundwater flow direction, and soil type, et al.

ASTM's Vapor Encroachment guidance indicates that when groundwater flow direction can be estimated or determined, the cross-gradient or downgradient radius distances can be significantly reduced. AEI calculated the reduced AOC distances when considering groundwater flow direction by utilizing the following default distances, which were determined using the Buonicore Methodology:

Non-petroleum hydrocarbon COCs:

- 1,760 feet in the upgradient direction
- 365 feet in the cross-gradient direction
- 100 feet in the downgradient direction

Petroleum hydrocarbon COCs if Light, Non-Aqueous Phase Liquid, (LNAPL, i.e. floating product) is suspected:

- 528 feet in the upgradient direction
- 165 feet in the cross-gradient direction
- 100 feet in the downgradient direction

Petroleum hydrocarbon COCs if LNAPL is *not* suspected:

- 528 feet in the upgradient direction
- 95 feet in the cross-gradient direction
- 30 feet in the downgradient position

Additional adjustment of the AOC may be conducted based on AEI's professional judgment.

5.3 PER- AND POLYFLUOROALKYL SUBSTANCES (PFAS)

As defined in Section 3.2.36 of the current ASTM Standard E1527, hazardous substance means "those substances defined as a hazardous substance pursuant to CERCLA 42 USC § 9601(14), as interpreted by EPA regulations and the courts." Hazardous substances that are not defined (or not yet defined) as hazardous substances under CERCLA are outside of the scope of the current ASTM Standard E1527.

On July 8, 2024, the Final EPA rule became effective that designates perfluorooctanoic acid (PFOA) and perfluorooctanesulfonic acid (PFOS) as CERCLA hazardous substances. Per the current ASTM Standard E1527, once this rule went into effect, these substances are evaluated within the scope of this standard, and a release or likely release of PFOA and/or PFOS is considered a REC.

Other than PFOA/PFOS, compounds classified as PFAS are not currently classified as hazardous substances under CERCLA, and thus the potential presence of PFAS (other than PFOA/PFOS) is outside of the scope of the current ASTM Standard E1527, and does not constitute a REC at this time. However, the report User should be aware that regulatory criteria and classifications are subject to change.

AEI's research of potential PFAS contamination focuses on the release/likely release of PFOA/PFOS. However, if additional information pertaining to other PFAS is identified, AEI will also assess/discuss these compounds, as deemed applicable/appropriate within the scope of this investigation.

It should be noted that AEI's screening of PFOA/PFOS and other PFAS is based solely on review of the resources cited within this report. Identification, or lack thereof, is not a warranty that PFOA/PFOS or other PFAS contamination is present or absent at a site. Additionally, it should be noted that given the evolving nature of science and regulatory oversight of PFOA/PFOS and other PFAS, additional sources of contamination may exist at the subject property, adjoining sites and/or other nearby sites that were not identified by the limited data and screening tools cited within this report.

5.3.1 PFAS-RELATED REGULATORY DATABASE LISTINGS

As an initial screening tool for potential PFAS contamination, AEI reviewed PFAS-related database listings from EDR.

Location	PFAS Database Listing Identified	PFAS Database Listing Not Identified	Comments
Subject Property		✔	N/A
Adjoining and/or Nearby Site(s)		✔	N/A

5.3.2 POTENTIAL ON-SITE PFAS SOURCES/CONCERNS

AEI researched the standard historical and regulatory sources cited within this report to determine if a release or likely release of PFOA/PFOS has occurred at the subject property.

A voluntary industry phaseout of PFOA and PFOS was first implemented in the late 1990s and was fully implemented for PFOS by 2002 and PFOA by 2015. Although PFOA and PFOS have been generally phased out since 2015, studies have found that precursor PFAS in wastewater treatment systems may form PFOA and PFOS. As such, even after 2015, the presence of PFAS in wastewater discharges is considered a likely source of PFOA and PFOS contamination.

Potential Source	Yes	No
Past or present industrial operations that potentially included the use of PFAS (if "yes" see *Potential PFAS Sources from Industrial Uses* section/table below)		✔
The use or discharge of AFFF (if "yes" see *Potential Sources of AFFF* section/table below)		✔
Electroplating (1950s-present) NOTE: Electroplating (specifically hard chromium plating) is an industrial activity where PFAS-containing mist suppressants may have been used		✔
Agricultural uses, specifically 1970s-present that included application of biosolids/WWTP sludge that potentially contained PFAS		✔
Wastewater treatment plant (WWTP) (1960s-present)		✔
Landfill operations / waste disposal areas (1960s-present)		✔
Mining / quarrying / oil production		✔
Commercial car wash (1989-2010)		✔
Dry cleaner and/or commercial laundry (1970s-2010)		✔

AEI did not identify any obvious potential sources of PFAS contamination originating from on-site operations/sources.

6.0 INTERVIEWS AND USER PROVIDED INFORMATION

6.1 INTERVIEWS

Pursuant to the current ASTM Standard E1527, the following interviews were performed during this assessment in order to obtain information indicating RECs in connection with the subject property.

6.1.1 OWNER AND KEY SITE MANAGER

Relation to Property	Name	Date Interviewed	Method of Contact	Year First Associated w/ Property	Notes
Owner Representative	Steve Heaton	April 10, 2025	In Person	Unknown	Interviewed; see Interview Summary table below
Key Site Manager	N/A	N/A	N/A	N/A	No Key Site Manager identified

INTERVIEW SUMMARY

Question	Owner (Representative)/Key Site Manager Response/ Comment
Are you aware of any known plans for site redevelopment or change in site use?	No
Do you have any knowledge of previous environmental investigations conducted on site?	Yes; refer to Section 6.3
Do you have any knowledge of USTs, clarifiers or oil/water separators, sumps, or other subsurface features?	No
Do you have any knowledge of current or past industrial operations and/or other operations which would involve the use of hazardous substances and/ or petroleum products?	No
Are you aware of any incidents of flooding, leaks, or other water intrusion, and/or complaints related to indoor air quality?	No
Are you aware of any pending, threatened, or past litigation relevant to hazardous substances or petroleum products in, on, at, or from the subject property?	No
Are you aware of any pending, threatened or past administrative proceedings relevant to hazardous substances or petroleum products in, on, at, or from the subject property?	No
Are you aware of any notices from any governmental entity regarding any possible violation of environmental laws or possible liability relating to hazardous substances or petroleum products?	No
Are you aware of any fire incidents requiring fire department response?	No

6.1.2 PAST OWNERS, OPERATORS, AND OCCUPANTS

AEI did not attempt to interview past owners, operators, and occupants of the subject property because information from these sources would likely be duplicative of information already obtained from other sources.

6.1.3 Interview with Others

Information obtained during interviews with local government officials is incorporated into the appropriate segments of this report.

6.2 User Provided Information

User provided information is intended to help identify the possibility of RECs in connection with the subject property. According to the current ASTM Standard E1527 and the EPA Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), certain items should be researched by the prospective landowner or grantee, and the results of such inquiries may be provided to the Environmental Professional. The responsibility for qualifying for LLPs by conducting the inquiries ultimately rests with the User, and providing the information to the Environmental Professional would be prudent if such information is available.

The User did not complete the ASTM User Questionnaire or provide the User information to AEI. AEI assumes that qualification for the LLPs is being established by the User in documentation outside of this assessment.

Question	Response/ Comment
1. Environmental liens that are filed or recorded against the property (40 CFR 312.25) Did a search of recorded land title records (or judicial records where appropriate) identify any environmental liens filed or recorded against the property under federal, tribal, state or local law?	Information not provided
2. Activity and use limitations that are in place on the property or that have been filed or recorded against the property (40 CFR 312.26(a)(1)(v) and vi)). Did a search of recorded land title records (or judicial records where appropriate) identify any AULs, such as engineering controls, land use restrictions or institutional controls that are in place at the property and/or have been filed or recorded against the property under federal, tribal, state or local law?	Information not provided
3. Specialized knowledge or experience of the person seeking to qualify for the LLP (40 CFR 312.28). Do you have any specialized knowledge or experience related to the property or nearby properties? For example, are you involved in the same line of business as the current or former occupants of the property or an adjoining property so that you would have specialized knowledge of the chemicals and processes used by this type of business?	Information not provided
4. Relationship of the purchase price to the fair market value of the property if it were not contaminated (40 CFR 312.29). Does the purchase price being paid for this property reasonably reflect the fair market value of the property? If you conclude that there is a difference, have you considered whether the lower purchase price is because contamination is known or believed to be present at the property?	Information not provided
5. Commonly known or reasonably ascertainable information about the property (40 CFR 312.30). Are you aware of commonly known or reasonably ascertainable information about the property that would help the environmental professional to identify conditions indicative of releases or threatened releases? For example: (a) Do you know the past uses of the property? (b) Do you know of specific chemicals that are present or once were present at the	Information not provided

Question	Response/ Comment
property? (c) Do you know of spills or other chemical releases that have taken place at the property? (d) Do you know of any environmental cleanups that have taken place at the property?	
6. The degree of obviousness of the presence or likely presence of contamination at the property, and the ability to detect the contamination by appropriate investigation (40 CFR 312.31). Based on your knowledge and experience related to the property, are there any obvious indicators that point to the presence or likely presence of contamination at the property?	Information not provided

6.3 Previous Reports and Other Provided Documentation

Documentation was provided to AEI by Mr. Steve Heaton during this assessment. A summary of this information follows:

Phase I Environmental Site Assessment (2029-2039 University Avenue, Berkeley, Ca), prepared by AEI Consultants (September 22, 2023)

- This report describes the subject property generally consistent with current conditions.
- The report identified the north-adjoining SLIC case as an OEC, as well as ACM and LBP due to building age.
- AEI did not recommend any additional investigation.

A copy of the report is included in the appendices.

6.4 Environmental Lien and AUL Search Information Reports

To meet the requirements of 40 CFR 312.20 and 312.25, a search for the existence of environmental liens and AULs that are filed or recorded against the subject property must be conducted. The current ASTM Standard E1527 recognizes two acceptable methods to meet this requirement:

- **Method 1** consists of a review of title documents by the User (or a title professional engaged by the User) for environmental liens and AULs.

  Note: this method must be completed by the User (or a title professional engaged by the User), and thus cannot be completed by AEI.

  Refer to Section 6.2 User Provided Information for information (if any) provided by the User via the User Questionnaire.

- **Method 2** consists of obtaining and relying on title search information reports designed to search for environmental liens and AULs.

Note: these reports are not included within the scope of the current ASTM E1527 Standard. Thus, these reports can only be obtained by a consultant if explicitly added to the agreed upon scope of work between the consultant and the client.

The inclusion of a title search information report designed to search for environmental liens and AULs was not part of AEI's approved scope of services.

7.0 SITE RECONNAISSANCE

Site Reconnaissance Date	April 10, 2025
AEI Site Assessor(s)	David Coyle
Property Escort(s)/ Relationship(s) to Property	Mr. Steve Heaton
Units/Areas Observed	2029-2037 University Avenue Representative interior common areas such as the front lobby, management office, common corridors, restrooms and electrical/ mechanical rooms Exterior areas: Parking area
Area(s) not accessed and reason(s)	2039 University Avenue, elevator room Refer to Section 1.5 for discussion of limiting conditions
Other Physical Constraints	Large volume of stored materials Refer to Section 1.5 for discussion of limiting conditions
General Observations	The property is improved with a two-story commercial structure occupied by a nail salon, art gallery, hair salon, thrift store, window store, and second-story commercial offices. In addition, a one-story carport structure is located along the north side of the subject property.

Reconnaissance Findings Summary

Feature	Observed on Subject Property (see Section 7.1)	Observed on Adjoining Property (see Section 7.2)
Regulated Hazardous Substances/Wastes and/or Petroleum Products in Connection with Property Use (including drums, totes, and intermediate bulk containers)		
Aboveground/Underground Hazardous Substance or Petroleum Product Storage Tanks (ASTs/USTs)		
Hazardous Substance and Petroleum Product Containers Not in Connection with Property Use		
Unidentified Substance Containers		
Electrical or Mechanical Equipment Likely to Contain Fluids	✔	
Interior Stains or Corrosion		
Strong, Pungent, or Noxious Odors		
Pools of Liquid		
Drains, Sumps, and Clarifiers	✔	✔
Pits, Ponds, and Lagoons		
Stained Soil or Pavement		
Stressed Vegetation		
Solid Waste Disposal or Evidence of Fill Materials		
Waste Water Discharges		
Wells		
Septic Systems or Cesspools		
Biomedical Wastes		
Other	✔	

7.1 Subject Property Reconnaissance Findings

During the site reconnaissance, AEI observed the items listed in the above Reconnaissance Findings Summary table, which are further discussed below.

7.1.1 Electrical or Mechanical Equipment Likely to Contain Fluids

Toxic PCBs were commonly used historically in electrical equipment such as transformers, fluorescent lamp ballasts, and capacitors. According to United States EPA regulation 40 CFR Part 761, there are three categories for classifying such equipment: <50 ppm of PCBs is considered "Non-PCB"; between 50 and 500 ppm is considered "PCB-Contaminated"; and >500 ppm is considered "PCB-Containing." Pursuant to 15 U.S.C. 2605(e)(2)(A), the manufacture, process, or distribution in commerce or use of any polychlorinated biphenyl in any manner other than in a totally enclosed manner was prohibited after January 1, 1977.

Elevators

The subject property building is equipped with a hydraulic elevator. The hydraulic fluid contained within elevator systems can potentially contain toxic PCBs. Based on the construction date of the building (pre-1978), the potential exists that hydraulic fluid within the equipment may have contained PCBs. The equipment room for the elevator, which is located insert location, was not accessible during AEI's site reconnaissance. Based on the regular maintenance of the equipment, the elevator is not a REC.

The elevator equipment room at the subject property was not accessible during AEI's site reconnaissance. However, based on the reported maintenance of the elevator equipment, this limitation is not expected to significantly alter the findings of this assessment.

7.1.2 Drains, Sumps, and Clarifiers

Two storm drains were observed in the parking area of the subject property. AEI did not observe evidence of hazardous substances or petroleum products in the vicinity of the drains. Based on the use of the drains solely for storm water runoff, the presence of the drains is not considered evidence of a REC.

7.1.3 Other

Cleaning supplies and detergents are stored in the maintenance closets of various units. All chemicals were packaged in consumer quantities. Based on the nature of these materials, the presence of cleaning supplies at the subject property is not considered evidence of a REC.

Approximately 40-gallons of maintenance products, such as paints, cleaners, lubricants, etc. were observed in the maintenance storage areas and closets. The containers were properly labeled and stored. No signs of spills or leaks were observed in conjunction with the containers. No significant staining or evidence of release of any of the materials was observed during the site reconnaissance. Based on the relatively small quantities observed and the lack of evidence of the mismanagement of these materials, the use of these materials on site is not considered evidence of a REC.

7.2 Adjoining Property Reconnaissance Findings

During the site reconnaissance, AEI observed the items listed in the above Reconnaissance Findings Summary table, which are further discussed below.

7.2.1 Drains, Sumps, and Clarifiers

Several storm drains were observed in the parking areas of the adjoining properties and adjoining roadways. AEI did not observe evidence of hazardous substances or petroleum products in the vicinity of the drains. Based on the use of the drains solely for storm water runoff, the presence of the drains is not considered evidence of a REC.

8.0 NON-ASTM SERVICES

8.1 ASBESTOS-CONTAINING BUILDING MATERIALS

Asbestos is the name for a group of naturally occurring silicate minerals that can be separated into fibers. The fibers are strong, durable, and resistant to heat and fire. They are also long, thin and flexible, so they can even be woven into cloth. Because of these qualities, asbestos has been used in thousands of consumer, industrial, maritime, automotive, scientific and building products. During the 20th century, some 30 million tons of asbestos have been used in industrial sites, homes, schools, shipyards and commercial buildings in the United States. Commercial use of ACM began in the early 1900s and peaked in the period between 1940 and into the 1970s. Common ACMs include pipe-covering, insulating cement, insulating block, refractory and boiler insulation materials, transite board, fireproofing spray, joint compound, vinyl floor tile, ceiling tile, mastics, roofing products, and duct insulation for HVAC applications. Inhalation of asbestos fibers can result in deleterious health effects.

The potential for ACM was evaluated based the United States EPA Guidance Document: Managing Asbestos in Place - A Building Owner's Guide to Operations and Maintenance Programs for Asbestos-Containing Materials (the Green Book). In 1973 the NESHAPS banned the use of most spray-applied surfacing ACM, specifically asbestos containing spray-on fireproofing and insulation. Subsequent revisions to this regulation in 1975 and 1978 effectively eliminated the use of friable pre-molded pipe, boiler, turbine, and duct insulation; and the spray application of friable asbestos-containing materials for all uses in buildings. In 1989 the EPA issued regulations to ban some asbestos-containing products and phase out most others over a multi-year period. The "Ban and Phase-Down" rule was challenged in court and the regulation remanded to the agency. As a result, any asbestos-containing products then "in commerce" would not be banned. Those not in commerce would be banned. Those materials "banned" could not be sold. It did not affect such materials already installed, or in use. Most US firms voluntarily ceased production of asbestos containing building materials not covered by the aforementioned Federal bans by the mid-1980s. In 1994, the OSHA determined that employers and building owners are required to treat installed thermal system installation and sprayed on and troweled-on surfacing materials, as well as vinyl or asphalt flooring material, as ACM in buildings constructed no later than 1980 until tested by laboratory analysis to prove otherwise.

The information below is for general informational purposes only and does not constitute an asbestos survey. In addition, the information is not intended to comply with federal, state or local regulations in regards to ACM.

Due to the age of the subject property building, there is a potential that ACMs are present. A limited list of typical suspect ACMs is included in the following table:

Material Type	Location
Plaster (acoustical and smooth)	Walls and ceilings
Ceiling tile	Ceiling systems
Thermal systems insulations, packings, and gaskets	Heating systems, cooling systems, domestic and heating and cooling piping, ductwork, and other equipment
Floor tile and associate mastics, flooring felts, and papers (under hardwood/other)	Floors
Vinyl sheet flooring and adhesives	Floors
Cove base and associated mastics	Walls
Ceramic tile adhesives and grouts	Walls, floors, and ceilings
All adhesives	Mirrors, wall coverings, construction, etc.

Grout and caulking	Windows and doors
Gypsum board, tape, and joint compound	Wall and ceiling systems
Insulation materials	Walls, ceilings, and attic spaces
Roofing materials (felts, rolled, shingle, flashings, adhesives, tar, and insulations)	Roof and parapet wall systems
Brick and block, mortars	Walls

The observed suspect ACMs at the subject property were in good condition at the time of the site reconnaissance and are not expected to pose a health and safety concern to the occupants of the subject property at this time. Based on the potential presence of ACMs, AEI recommends the implementation of an O&M Plan which stipulates that the repair and maintenance of damaged materials should be performed to protect the health and safety of the building occupants. In the event that building renovation or demolition activities are planned, a thorough asbestos survey to identify asbestos-containing building materials is required in accordance with the EPA NESHAP 40 CFR Part 61 prior to demolition or renovation activities that may disturb suspect ACMs.

8.2 Lead-Based Paint

Lead-based paint (LBP) is defined as any paint, varnish, stain, or other applied coating that has ≥1 mg/cm² (5,000 µg/g or 5,000 ppm) or more of lead by federal guidelines; state and local definitions may differ from the federal definitions in amounts ranging from 0.5 mg/cm² to 2.0 mg/cm². Section 1017 of the Housing and Urban Development (HUD) Guidelines, Residential Lead-Based Paint Hazard Reduction Act of 1992, otherwise known as "Title X," defines a LBP hazard as "any condition that causes exposure to lead that would result in adverse human health effects" resulting from lead-contaminated dust, bare, lead-contaminated soil, and/or lead-contaminated paint that is deteriorated or present on accessible, friction, or impact surfaces. Therefore, under Title X, intact LBP on most walls and ceilings would not be considered a "hazard," although the paint should be maintained and its condition monitored to ensure that it does not deteriorate and become a hazard. Additionally, Section 1018 of this law directed HUD and EPA to require the disclosure of known information on LBP and LBP hazards before the sale or lease of most housing built before 1978. Most private housing, public housing, or federally owned or subsidized housing is affected by this rule.

Under OSHA, lead-containing paint (LCP) is defined as any paint with any detectable amount of lead present in it. Therefore, all LBP is considered LCP. Conversely, LCP may not meet the criteria to be considered LBP in accordance with HUD guidelines or some states' definition of LBP.

It is important to note that LCP may create a lead hazard when being removed. The condition of these materials must be monitored when they are being disturbed. In the event LCP is subject to abrading, sanding, torching, and/or cutting during demolition or renovation activities, there may be regulatory issues that must be addressed.

The information below is for general informational purposes only and does not constitute a lead hazard evaluation. In addition, the information is not intended to comply with federal, state, or local regulations in regards to LBP.

In buildings constructed after 1978, it is unlikely that LBP is present; however, some paints utilized after 1978 will be LCP under OSHA. Structures built prior to 1978 and especially prior to the 1960s should be expected to contain LBP.

Due to the age of the subject property building, there is a potential that LBP is present. All observed painted surfaces were in good condition and are not expected to pose a health and safety concern to the occupants of the subject property at this time. Local regulations may apply to LBP in association with building demolition/renovations and worker/occupant protection. Actual material samples would need to be collected or an XRF survey performed in order to determine if LBP is present. It should be noted that construction activities that disturb materials or paints containing any amount of lead may be subject to certain requirements of the OSHA lead standard contained in 29 CFR 1910.1025 and 1926.62.

8.3 Naturally-Occurring Radon

Radon is a naturally-occurring, odorless, and invisible radioactive gas. According to the United States EPA, radon is the second leading cause of lung cancer. Natural radon levels vary and are closely related to geologic formations, soils, and foundation construction. Radon may enter buildings through basement sumps or other openings such as cracks and other holes in foundations.

US EPA Map

In 1993 the United States EPA prepared a map to assist National, State, and local organizations to target their resources and to implement radon-resistant building codes. The map identifies counties of the US with the greatest potential for elevated indoor radon levels based on indoor radon measurement data, geology, soil parameters, and foundation types. The map divides the country into three radon zones based on potential radon accumulation, but is not to be considered predictive of radon accumulation.

The 1993 EPA map identifies the following three radon zones:

- Zone 1 - Highest potential for radon accumulation; average indoor radon levels may be greater than 4 pCi/L
- Zone 2 - Moderate potential for radon accumulation; average indoor radon levels may be between 2 and 4 pCi/L
- Zone 3 - Low potential for radon accumulation; average indoor radon levels may be less than 2 pCi/L

It is important to note that elevated levels of radon can be found in all three zones, and the EPA and other agencies recommend site-specific testing to determine radon levels at a specific property. Therefore, while the map does give an indication of the propensity of radon gas accumulation in structures in a county, elevated radon levels may be found in all three radon zones.

It should also be noted that EPA's 1993 Map of Radon Zones, while useful, was based on limited data collected prior to 1993 and therefore may be supplemented with available state-developed or other data to further understand the radon potential for a specific area.

According to the US EPA, the radon zone level for the County is Zone 2, which has a moderate potential for radon accumulation.

California Department of Health Services Radon Database

According to additional data obtained from California Department of Health Services Radon Database, of 39 tests conducted in the subject property zip code (94704) in 2016, only one of the tests were above 4.0 pCi/L. While a relatively small percentage of the test results exceeded the EPA threshold, the majority of the locations sampled were below 4.0 pCi/L.

Radon sampling would be necessary to determine site-specific radon conditions. Radon sampling was not requested as part of this assessment.

8.4 Suspect Mold or Microbial Growth Conditions

Molds are simple microscopic organisms which can often be seen in the form of discoloration, frequently green, gray, white, brown, or black. When excessive moisture or water accumulates indoors, mold growth may occur, particularly if the moisture problem remains undiscovered or unaddressed. As such, interior areas of buildings characterized by poor ventilation and high humidity are the most common locations of mold growth. Building materials, including drywall, wallpaper, baseboards, wood framing, insulation, and carpeting, often play host to such growth. Mold spores primarily cause health problems through the inhalation of spores or the toxins they emit when they are present in large numbers. This can occur when there is active mold growth within places where people live or work.

Mold, if present, may or may not visually manifest itself. Neither the individual completing this inspection, nor AEI has any liability for the identification of mold-related concerns except as defined in applicable industry standards. In short, this Phase I ESA should not be construed as a mold survey or inspection.

This activity was not designed to discover all areas which may be affected by mold growth on the subject property. Rather, it is intended to give the client an indication if significant (based on observed areas) mold growth is present at the subject property. Potential areas of mold growth, such as in pipe chases, HVAC systems, and behind enclosed walls and ceilings, were not observed as part of this limited assessment.

AEI observed interior areas of the subject property building to identify the potential presence of mold. AEI did not note obvious visual or olfactory indications of the presence of suspect mold, nor did AEI observe obvious indications of significant water damage. As such, no bulk sampling of suspect surfaces was conducted as part of this assessment and no additional action with respect to suspect mold appears to be warranted at this time.

9.0 SIGNATURE OF ENVIRONMENTAL PROFESSIONALS

I declare that, to the best of my professional knowledge and belief, I meet the definition of Environmental Professional as defined in § 312.10 of 40 CFR Part 312.

I have the specific qualifications based on education, training, and experience to assess a property of the nature, history and setting of the subject property. I have developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

EXECUTIVE SUMMARY

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal RCRA generators

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 02/17/2025 has revealed that there are 3 RCRA-LQG sites within approximately 0.25 miles of the target property.

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 02/17/2025 has revealed that there are 10 RCRA-SQG sites within approximately 0.25 miles of the target property.

RCRA-VSQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

A review of the RCRA-VSQG list, as provided by EDR, and dated 02/17/2025 has revealed that there are 2 RCRA-VSQG sites within approximately 0.25 miles of the target property.

Lists of state- and tribal (Superfund) equivalent sites

RESPONSE: Identifies confirmed release sites where DTSC is involved in remediation, either in a lead or oversight capacity. These confirmed release sites are generally high-priority and high potential risk.

A review of the RESPONSE list, as provided by EDR, has revealed that there is 1 RESPONSE site within approximately 1 mile of the target property.

EXECUTIVE SUMMARY

Facility Id: 01720108

Lists of state- and tribal hazardous waste facilities

ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the ENVIROSTOR list, as provided by EDR, and dated 10/21/2024 has revealed that there are 4 ENVIROSTOR sites within approximately 1 mile of the target property.

CPS-SLIC: Cleanup Program Sites (CPS; also known as Site Cleanups [SC] and formerly known as Spills, Leaks, Investigations, and Cleanups [SLIC] sites) included in GeoTracker. GeoTracker is the Water Boards data management system for sites that impact, or have the potential to impact, water quality in California, with emphasis on groundwater.

A review of the CPS-SLIC list, as provided by EDR, has revealed that there are 5 CPS-SLIC sites within approximately 0.5 miles of the target property.

EXECUTIVE SUMMARY

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 02/17/2025 has revealed that there are 101 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

FUSRAP: DOE established the Formerly Utilized Sites Remedial Action Program (FUSRAP) in 1974 to remediate sites where radioactive contamination remained from Manhattan Project and early U.S. Atomic Energy Commission (AEC) operations.

A review of the FUSRAP list, as provided by EDR, and dated 03/03/2023 has revealed that there is 1 FUSRAP site within approximately 1 mile of the target property.

Equal/Higher Elevation	Address	Direction / Distance	Map ID	Page
UNIVERSITY OF CALIFO	1 CYCLOTRON ROAD	ENE 1/2 - 1 (0.933 mi.)	AT301	1752

Site Status: Eliminated from consideration under FUSRAP. The locations where AEC work was performed are now part of Lawrence Berkeley National Laboratory (Berkeley Lab).

EXECUTIVE SUMMARY

Site ID: CA 05

PFAS ECHO: Regulators and the public have expressed interest in knowing which regulated entities may be using PFAS. EPA has developed a dataset from various sources that show which industries may be handling PFAS. Approximately 120,000 facilities subject to federal environmental programs have operated or currently operate in industry sectors with processes that may involve handling and/or release of PFAS.

A review of the PFAS ECHO list, as provided by EDR, and dated 12/30/2024 has revealed that there are 3 PFAS ECHO sites within approximately 0.25 miles of the target property.

UST FINDER: EPA developed UST Finder, a web map application containing a comprehensive, state-sourced national map of underground storage tank (UST) and leaking UST (LUST) data. It provides the attributes and locations of active and closed USTs, UST facilities, and LUST sites from states and from Tribal lands and US territories . UST Finder contains information about proximity of UST facilities and LUST sites to: surface and groundwater public drinking water protection areas; estimated number of private domestic wells and number of people living nearby; and flooding and wildfires.

A review of the UST FINDER list, as provided by EDR, and dated 06/08/2023 has revealed that there are 2 UST FINDER sites within approximately 0.25 miles of the target property.

UST FINDER RELEASE: US EPA's UST Finder data is a national composite of leaking underground storage tanks. This data contains information about, and locations of, leaking underground storage tanks. Data was collected from state sources and standardized into a national profile by EPA's Office of Underground Storage Tanks, Office of Research and Development, and the Association of State and Territorial Solid Waste Management Officials.

A review of the UST FINDER RELEASE list, as provided by EDR, and dated 06/08/2023 has revealed that there are 43 UST FINDER RELEASE sites within approximately 0.5 miles of the target property.

E MANIFEST: EPA established a national system for tracking hazardous waste shipments electronically. This system, known as ?e-Manifest,? will modernize the nation?s cradle-to-grave hazardous waste tracking process while saving valuable time, resources, and dollars for industry and states.

A review of the E MANIFEST list, as provided by EDR, and dated 02/17/2025 has revealed that there are 75 E MANIFEST sites within approximately 0.25 miles of the target property.

DRYCLEANERS: A list of drycleaner related facilities that have EPA ID numbers. These are facilities with certain SIC codes: power laundries, family and commercial; garment pressing and cleaners' agents; linen supply; coin-operated laundries and cleaning; drycleaning plants except rugs; carpet and upholster cleaning; industrial launderers; laundry and garment services.

A review of the DRYCLEANERS list, as provided by EDR, has revealed that there is 1 DRYCLEANERS site within approximately 0.25 miles of the target property.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there are 9 EDR Hist Auto sites within approximately 0.125 miles of the target property.

EXECUTIVE SUMMARY

EDR Hist Cleaner: EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Cleaner list, as provided by EDR, has revealed that there are 13 EDR Hist Cleaner sites within approximately 0.125 miles of the target property.

Site History:	Alameda County Department of Environmental Health (ACDEH) has been providing regulatory environmental oversight for the investigation and cleanup activities associated with Cleanup Site Program Case No. RO0003411 since February 2020 subsequent to referral by the City of Berkeley Planning and Building Department. To redevelop the Site, environmental investigations are required to evaluate impacts to the subsurface from historic land use and develop corrective actions to reduce potential risk to construction workers, the surrounding community, and occupants of the new development. Subsurface investigations have been conducted to evaluate historical operations at the Site including but not limited to residential dwellings and various commercial configurations such as automobile service and

repair operations with associated former underground storage tanks, dry cleaning facilities and a fire station. Results of these subsurface investigations has identified chemicals of concern (COCs) in environmental media (soil and soil vapor). To address this contamination prior to development, proposed corrective actions include remedial soil excavation and off-Site disposal of impacted soil at a permitted disposal facility; and installation of vapor mitigation engineering controls to control potential vapor intrusion to indoor air of the proposed development and migration along new utility corridors. Proposed redevelopment of the Site includes a 6-story Lat-grade residential building with two elevators, a sump pump, and an outdoor courtyard compressed of landscaping and hardscaping. The 0.82-acre Site is currently operating as a City of Berkeley owned public parking lot located at 2012 Berkeley Way in Berkeley, Alameda County, California. The Site is located in the North Berkeley neighborhood, in a mixed commercial and residential area, and east of the intersection between Berkeley Way and Milvia Street. Properties in the Site vicinity include single-family homes, multi-family apartments, commercial buildings, and the University of California, Berkeley campus. Historically the Site was used for residential dwellings prior to 1958. Historical uses of adjacent or adjoining properties included dry cleaners, automotive repair, tire shop, and fire station with underground storage tanks (USTs). Redevelopment of the Site is scheduled to commence in April 2020 and includes a six-floor, slab-on-grade, multi-residence building with two elevators, a sump pump, and an outdoor courtyard comprised of landscaping and hardscaping. Multiple site investigations have been conducted in October 2018, and June, August, and October 2019 which included the assessment of soil and soil gas in the subsurface beneath the Site. Results of these subsurface investigations have identified residual impact from lead in soil at several select locations at the Site exceeding applicable San Francisco Bay Regional Water Quality Control Board (SFBRWQCB) Tier 1 Environmental Screening Levels (ESLs). The presence of lead in soil is likely associated with the demolition of the former on-Site structures (that based on their age may likely have a history of lead-based paints), and/or from aerially-deposited lead (ADL) associated with the former use of leaded gasoline in vehicles and nearby roadways. A Fact Sheet and invitation for public comment regarding environmental assessments conducted at the Site was distributed by ACDEH to the surrounding community on February 11, 2020. A public meeting was also conducted at the Berkeley public library on February 20, 2020. No participants from the general public attended the meeting. Additionally subsurface data gap assessment (DGA) investigations were conducted in late February 2020 to evaluate potential soil impacts from previously unassessed constituents, including polynuclear aromatic hydrocarbons (PAHs), polychlorinated biphenyls (PCBs), and asbestos which may have been associated with the historical structures identified onsite. Additional soil vapor samples were also advanced to further assess the potential for elevated soil vapor beneath the site. Shallow soil results indicated lead was detected in all analyzed samples at concentrations ranging from 2.5 micrograms per kilogram (mg/kg) to 94 mg/kg; however, the Residential ESL was only exceeded in one sample (RB]14 at 1 foot below ground surface [bgs]). PCBs and asbestos was not detected in soil. Based on the results of the DGA investigation a corrective action plan (CAP) was submitted to ACDEH for review on March 26, 2020. Remedial and corrective actions presented in the CAP

Environmental Interest/Information System:
THE EMISSION INVENTORY SYSTEM (EIS) MAINTAINS AN INVENTORY OF LARGE STATIONARY SOURCES AND VOLUNTARILY-REPORTED SMALLER SOURCES OF AIR POINT POLLUTANT EMITTERS. IT CONTAINS INFORMATION ABOUT FACILITY SITES AND THEIR PHYSICAL LOCATION, EMISSIONS UNITS, EMISSIONS PROCESSES, RELEASE POINTS, CONTROL APPROACHES, AND REGULATIONS. FACILITY INVENTORY DATA ARE KEPT SEPARATE FROM THE EMISSIONS DATA AND HAVE STABLE IDENTIFIERS TO IMPROVE CONTINUITY FROM YEAR TO YEAR AND TO HELP IDENTIFY DUPLICATE OR MISSING FACILITIES
The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS),EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), andToxic Release Inventory (TRI).
Registry ID: 110071755006

Site History:	Berkeley Repertory Theater (BRT) plans to expand its current facility at 2025 Addison Street in Berkeley, California, by purchasing and developing the adjacent property to the west. The property is currently owned by Williamson Properties, and consists of three contiguous parcels that have been vacated by their previous tenants. The businesses that most recently occupied the parcels included a car repair shop, a glass company, and an auto body shop.
