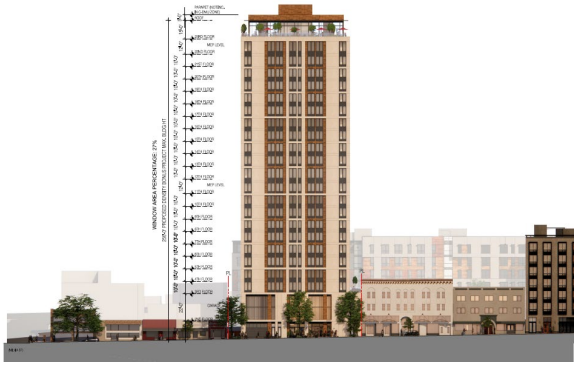
Zoning Adjustments Board Staff Report

APP # ZP2024-0181

November 13, 2025

Use Permit for a Project at 2029 University Avenue (Multifamily)



Project Facts	Project Description:
Applicant: Rhoades Planning Group **Property Owner:** Mohammad Talai & Kokab Talai **Project Address:** 2029 University Avenue **General Plan:** DT (Downtown Mixed-Use) **Area Plan:** Downtown Area Plan **Zoning:** C-DMU Outer Core (Downtown Mixed-Use district) **Site Size:** 12,385 square feet (0.28 acre) **CEQA:** Section 15332 ("In-Fill Development Projects") **Application Submittal Date:** December 19, 2024 **SB330 Pre-Application Vest Date:** January 9, 2025	**Use Permit #ZP2024-0181 to demolish an existing two-story commercial building and a ten-car garage structure on a 12,385-square-foot lot and to construct a 23-story (256-feet-tall plus a 5-foot parapet) approximately 190,830-square-foot residential building containing 240 dwelling units including 18 Very Low-Income (VLI), and 18 Moderate Income (MI) units for a 100% density bonus. The proposed project provides 29 off-street parking spaces, 167 Long-term and 8 Short-Term bike parking spaces.** **Zoning Permits Requested:**

LAND USE PLANNING

Zoning Adjustments Board Staff Report

Use Permit Application Completion Date:
May 22, 2025

Project Planner: Nilu Karimzadegan

1. **Demolition.** BMC Section 23.326.070(A) **"Demolitions of Non-Residential Buildings"** to demolish a non-residential building (UPPH)*
2. **New Construction.** BMC Section 23.204.020 (A) **"Allowed Land Uses"** to construct a new multi-family building (UPPH).
3. **New Floor Area.** BMC Section 23.204.030(A)(1) **"Floor Area Permit Requirements"** to create any residential addition within the within the C-DMU (UPPH).
4. **Height**. BMC Section 23.204.130(E)(1)(a) **"Height Limits"** to increase the maximum building height limit to 75' (plus 5' parapet, by right) (UPPH).
5. **Setbacks.** BMC Section 23.204.130(E)(3)(b) "**Modifications to Standards"** to modify front, side, and rear setback requirements (UPPH).
6. **Projections Above Height Limits.** BMC Section 23. 304.050 **"Allowed Projections Above Height Limit "**to allow for Projections Above Height Limit (AUP)

Density Bonus:

Waivers:

1. **Usable Open Space**. Waiver of BMC Section 23.204.140(E)(4) for providing 2,055 square feet of Usable Open Space, where 19,200 square feet is required.
2. **Landscaped Usable Open Space.** Waiver of BMC Section 23.304.90 for Usable Open Space landscaped area to be 27 (0.0014%) square feet where 7,680 square feet (40%) is required.
3. **Height.** Waiver of BMC Section 23.204130(E)(1)(a) to exceed building height limits—to be 256 feet, plus a 5-foot parapet while 75 feet (plus 5-foot parapet by right) is the allowable height with a Use Permit.
4. **Setbacks.** Waiver of BMC Section 23.204.130(E) to reduce the front side setback requirement to 0 feet, where 15 feet is the minimum, between 76 to 120 feet in height.
5. **Setbacks.** Waiver of BMC Section 23.204.130(E) to reduce the interior side setback requirement on the Floors 3 to 22 to 10 feet, where 15 feet is the minimum, between 76 to 120 feet over 65 feet from lot frontage.
6. **Setbacks.** Waiver of BMC Section 23.204.130(E) to reduce the rear setback requirement to 6.5 feet on the Floor 3-22, where 15 feet is the minimum, between 76 to 120 feet in height.

LAND USE PLANNING

Zoning Adjustments Board Staff Report

7. **Setbacks.** Waiver of BMC Section 23.204.130(E) to reduce the rear setback requirement to 6.5 feet on the Floor 3-22, where 15 feet is the minimum, over 120 feet in height.
8. **Building's width.** Waiver of BMC Section 23.204.130(E)(3)(d) for the building's width over 120 feet of height, to be 139 feet, 6 inches at the widest point (on the diagonal in plan review) where maximum width allowed is 120 feet.
9. **Projections Above Height Limits.** Waiver of BMC Section 23. 304.050 "Allowed Projections Above Height Limit "to allow for Projections Above Height Limit (AUP)

Concessions:

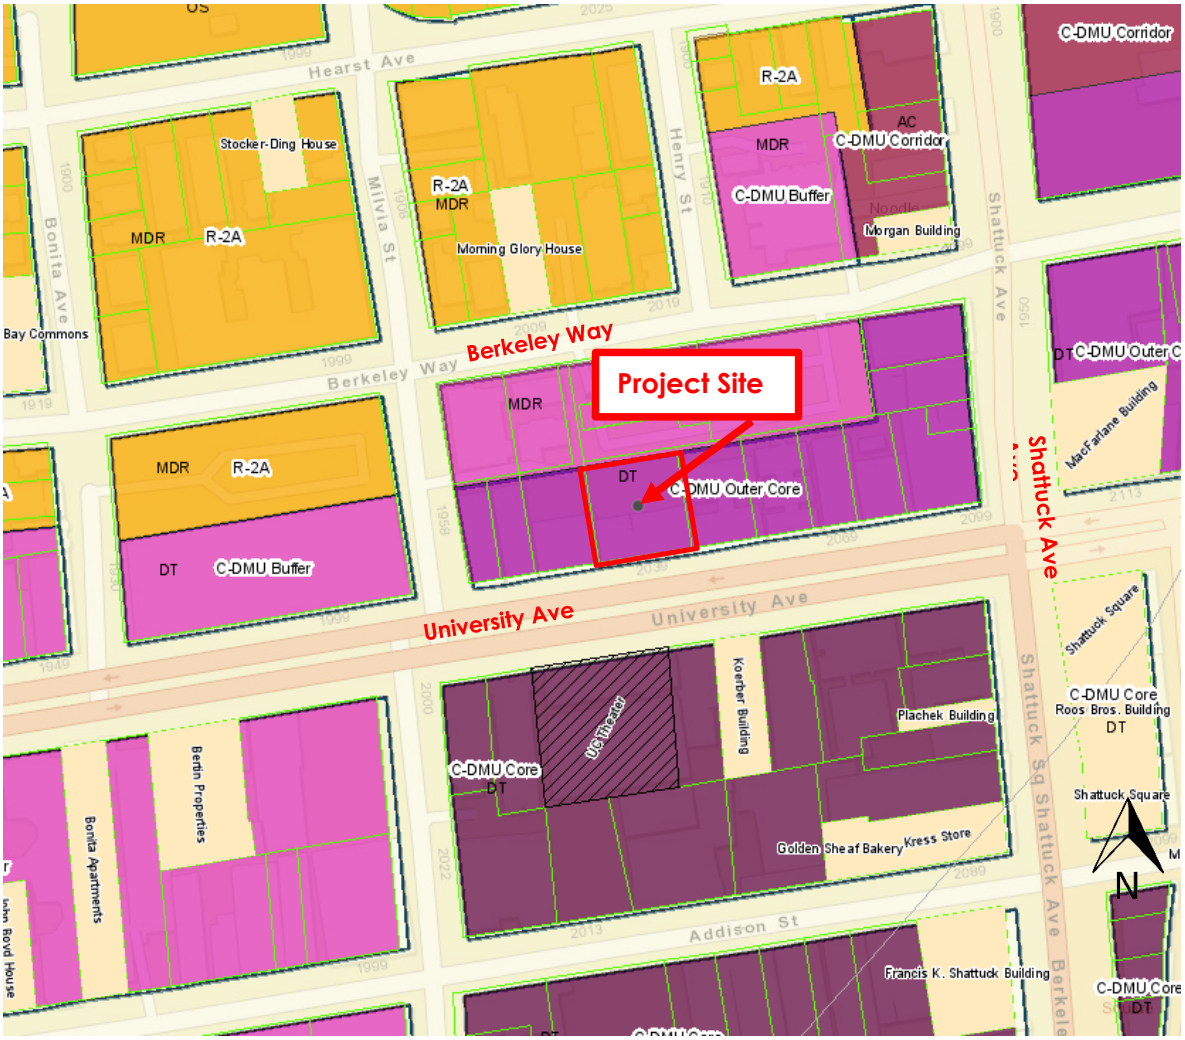
1. **Concession.** Exemption from the **"Apprenticeship Requirements"** in establishing Healthcare and Apprenticeship Standards for Private Development, as required by BMC Section 13.107.040
2. **Concession.** Exemption from the **"Health Care Expenditures"** in establishing Healthcare and Apprenticeship Standards for Private Development, as required by BMC Section 13.107.050
3. **Concession.** Exemption from the "**Bird Safe Building"** requirement as required by BMC 23.304.150

Staff Recommendation:

Staff recommends that the Zoning Adjustments Board (ZAB) determine that the project is categorically exempt from the provisions of the California Environmental Quality Act (CEQA, Public Resources Code Section 21000, et seq. and California Code of Regulations, Section15000, et seq.) pursuant to CEQA Guidelines Section 15332 ("In-Fill Development Projects") and approve ZP2025-0181 pursuant to Section 23.406.040(D) "Use Permits" and subject to the attached Findings and Conditions of Approval.

ZONING MAP

Figure 1: Vicinity and Zoning Districts Map



Comparison of Adjacent Properties			
Vicinity	**GP Land Use**	**Zoning**	**Current Use**
Subject Property	Downtown Mixed-Use (DT)	Downtown Mixed-Use District Outer Core Sub-Area (C-DMU Outer Core)	Retail spaces and parking lot

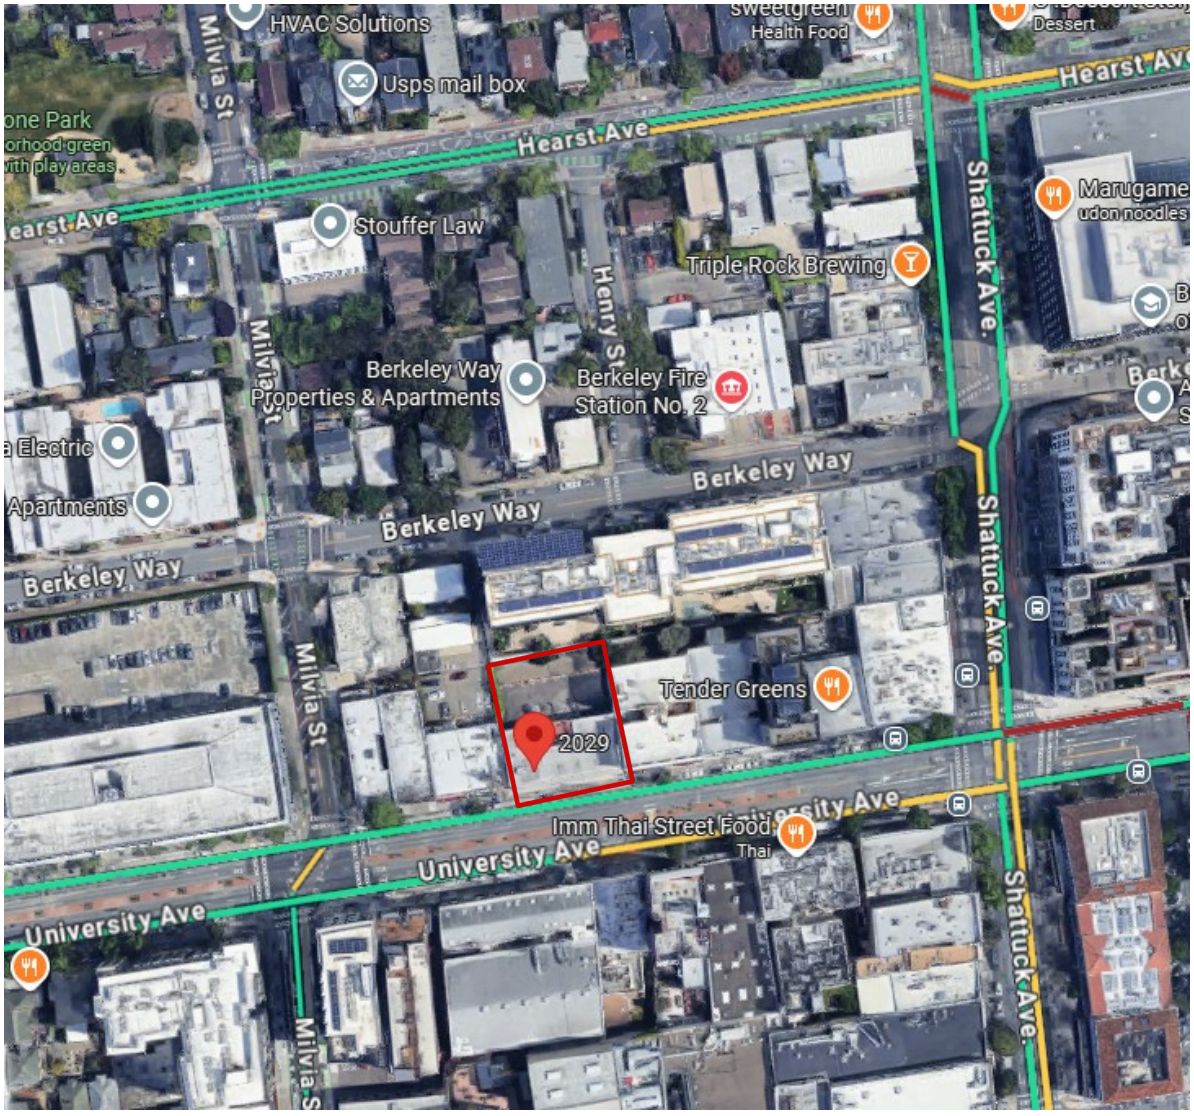
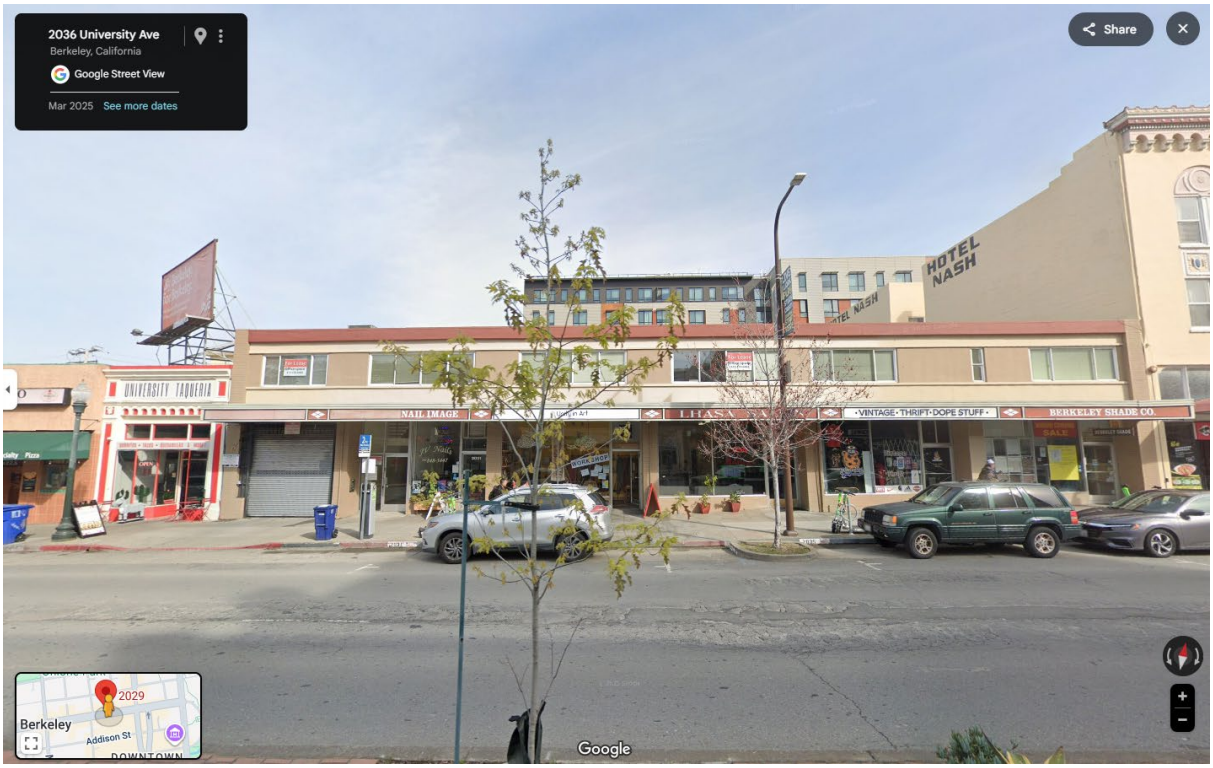
West	Avenue Commercial (AC)	Downtown Mixed-Use District Outer Core Sub-Area (C-DMU Outer Core)	Retail

AERIAL VIEW



Existing Site Plan

EXISTING STREET VIEW (UNIVERSITY AVENUE)



PROPOSED STREET VIEW (DURANT AVENUE)

BACKGROUND

Subject Site

The subject property is an approximately 12,385-square-foot, interior lot on the north side of the 2000-block of University Avenue, between Shattuck Avenue and Milvia Street. It is a rectangular flat, 114- feet-deep, 108 feet-wide parcel, with street frontage facing University Avenue to the south. It includes one, 9,401-square-foot, two-story non-residential building containing five commercial spaces in the front and a detached ten-car garage structure in the rear of the lot, both proposed to be demolished. A covered driveway connects the curb cut on University Avenue to the garage building in the rear.

Neighborhood/Area Description:

The project site is located along University Avenue, west of Shattuck Avenue within the Downtown Mixed-Use District (C-DMU), Outer Core Sub-Area, as identified in the City's Downtown Area Plan (DAP). The project site is surrounded primarily by commercial and multi-family residential/mixed-use buildings ranging in height from one story (2013 University Avenue) to eight stories (2067 University Avenue). The project site is located in an area where several modes of public transportation are available – multiple AC Transit bus lines on University Avenue, bike share station, and the Downtown Berkeley BART station, which is located 0.3 mile to the southeast of the site.

Community Meeting

Prior to submitting this application, the applicant installed a pre-application poster on site in December 2024 and invited interested neighborhood organizations as well as owners and occupants located within 300 feet of the project site to a project preview meeting on December 13, 2024 and attended by 9 individuals. At the conclusion of the presentation, one member of the public—the owner of Red Tomato Pizza at 2017 University Avenue, raised questions regarding traffic control during construction. The project team responded by explaining the standard Conditions of Approval associated with the Use Permit application.

On October 17, 2025, October 20, 2025 and October 30, 2025 staff received three emails from Christopher Kroll (Attachment 7) expressing concerns regarding the applicant's request for a concession from the City's Bird Safe Ordinance. In his email, Mr. Kroll emphasized the importance of bird safe glass, particularly for high rise developments such as the one proposed, and questioned the City's rationale for allowing an exemption from this requirement. In response, staff explained that State law supersedes local ordinances, and the California Department of Housing and Community Development (HCD) has advised that Density Bonus Law (DBL) concessions apply to City requirements that could increase project costs. Staff added that this HCD guidance is interpreted to include provisions such as the bird safe requirement. Under State law, the City cannot deny a housing project unless specific findings—can be made and Staff is not able to make those findings.

On October 30, 2025, the City mailed public hearing notices to property owners and occupants within 300 feet of the project site, and to interested neighborhood organizations. The City also posted notices within the neighborhood at nearby three locations.

No additional comments have been received in response to the public hearing notice at this time.

ANALYSIS

Project Scope

The proposed project would demolish the existing commercial building, to construct a 23-story, 256 feet, approximately 190,830-square-foot residential building with 240 units. The major components of this multifamily building are as follows:

- 240 dwellings (80 Studios, 60 Junior one-bedroom, 60 one-bedroom, 40 two-bedroom)
- 280 Bedrooms
- Ground Floor residential program includes the lobby, bike room, mail room, as well as the trash room, back of house service areas and utilities
- 2,905-square-foot Community spaces lounge/work area on Level 23
- 2,197-square-foot Fitness center on Level 23
- 2,055-square-foot roof deck Useable Open Space on Level 23
- 29 off-street parking spaces on Second Floor garage
- 167 Long-Term and 8 Short-Term Bicycle parking spaces

Findings

Draft findings for approval can be found in Attachment 2 to the staff report.

Base Project and Density Bonus

The applicant has requested a Density Bonus under the State Density Bonus Law (Govt. Code Section 65915). Under the City's Density Bonus procedures, the "base project[1]" is 120 units, as the maximum allowable density for the site. The base project and the resulting 23-story proposed project both have an average unit size of 801 square feet. By providing 18 Very Low Income and 18 Moderate Income units on site (30% percent of the 120-unit base density), the project is eligible for a 100 percent density bonus, or 120 additional units for a total of 240 units.

[1] Per the City's Density Bonus Procedures (DBP), the base project is the largest project allowed on the site that is fully compliant with district development standards (i.e. height, setbacks, usable open space, parking, etc.), or, the *maximum allowable density* for the site. The City uses the DBP to calculate the maximum allowable density for a site where there is no density standard in the zoning district, and to determine the number of units in the proposed project, which is the number of base project units plus the number of density bonus units that can be added according to the percentage of BMR units proposed, per Government Code, Section 65915(f).

Base Project Units [a]	Qualifying Units	Percent Density Bonus	Number of Density Bonus Units [a]	Proposed Project Units [a]
120	36 [18 VLI (15% of Base) + 18 MI (15% of Base)]	100	120	240

Notes:

a. Pursuant to Government Code 65915(q), all unit calculations are rounded up to the next whole number.

Abbreviations: % = percent

Concession and Waivers Pursuant to State Density Bonus Law (CA Govt. Code Section 65915)

The project is entitled to 3 concessions (or incentives) under Government Code Section 65915(d), and an unlimited number of waivers under Section 65915(e).

A **concession** is a modification of a development standard that reduces the cost of providing affordable housing. The applicant is requesting three concessions for the project: exemption from the "Apprenticeship Requirements" and from the "Health Care Expenditures" in the Establishing Healthcare and Apprenticeship Standards for Private Development ordinance, and Bird Safe Building requirements.

The City may only deny the concession if it finds that the concession would have a specific adverse impact upon public health and safety[2], or the physical environment, or on any real property listed in the California Register of Historical Resources, and there is no feasible method to satisfactorily mitigate or avoid the specific adverse impact without rendering the development unaffordable to low-income, very-low income, and moderate-income households, or if the concession would be contrary to State or Federal law. Staff believe such a finding cannot be made.

A waiver is a modification of a development standard that would otherwise physically preclude the construction of the project with the permitted density bonus and concessions. The applicant is requesting waivers from the following development standards: Setbacks, Usable Open Space, Usable Open Space landscaped area, building height, building's width over 120 feet in height and Projection Above Height Limit.

The City may only deny the waivers if it finds that the waivers would have a specific adverse impact upon public health and safety[3], or the physical environment, or on any real property listed in the California Register of Historical Resources, and there is no feasible method to satisfactorily mitigate or avoid the specific adverse impact without rendering the development unaffordable to low-income, very-low income, and moderate-income households, or if the waiver would be contrary to State or Federal law. Staff believe such a finding cannot be made.

Environmental Review

It is staff's recommendation to the Zoning Adjustments Board (ZAB) that the project is categorically exempt from the provisions of the California Environmental Quality Act (CEQA, Public Resources Code Section

[2] A "specific, adverse impact" means "a significant, quantifiable, direct, and unavoidable impact, based on objective, identified written public health or safety standards, policies, or conditions as they existed on the date the application was deemed complete."

[3] See footnote 2.

21000, et seq. and California Code of Regulations, Section 15000, et seq.) pursuant to Section 15332 ("Infill Development Project") of the CEQA Guidelines. The determination is made by ZAB. Specifically:

• The project is consistent with the applicable general plan designation and all applicable general plan policies as well as with applicable zoning designation and regulations.
• The project site is within city limits on a project site of fewer than five acres that is substantially surrounded by urban uses.
• The project site has no value as habitat for endangered, rare or threatened species.
• Approval of the project would not result in any significant effects relating to traffic, noise, air quality, or water quality.
• The site can be adequately served by all required utilities and public services.

Additionally, none of the exceptions to eligibility for a categorical exemption as listed under CEQA Guidelines Section 15300.2, apply to the project. The project is not located in an environmentally sensitive area; the cumulative impact of successive projects of the same type in the same place over time would not be significant; there are no "unusual circumstances" at the project site that would result in significant environmental effects; there are no designated scenic highways in the City of Berkeley and the project site is not in view of a state scenic highway; the site is not included on a list compiled pursuant to Section 65962.5 of the Government Code; and the project would not result in a substantial adverse change in the significance of a historical resource.

ADVISORY BODY REVIEW

Design Review Committee (DRC) Review: Preliminary Design Review

The Design Review Committee (DRC), conducted Preliminary Design Review at a meeting held on October 16, 2025 where it forwarded a favorable recommendation to the ZAB and provided the following direction for Final Design Review (FDR): *MOTION (Muszynski, Woo) VOTE (5-0-0-2) Gaffney, Tam - absent.*

Recommendations

Site Design / Neighborhood Context

- *West facade is most visible when traveling east on University Avenue - continue to develop this facade so not so static.*
- *Recommend some ground floor commercial space with some reorganization of the lobby space.*
- *Ground floor facade needs more warmth and interest and should feel more local.*

Exterior Finishes

- *Continue to develop color palette for FDR and consider adding more color. Terra cotta color proposed appears to be successful.*

Landscaping

- *Consider an additional outdoor area on roof at northwest corner, partially covered for more variety.*

- *Vary seating in lounge area and outdoor open space.*
- *Recommend more street trees where possible.*

Building Design / Details

- *Consider windows in bedrooms wherever possible.*
- *Minimize noise with parking lifts. Report on this at FDR.*
- *Consider parapet wall with a smaller glass segment for a stronger visual top.*
- *Consider thinner band at top of facade, not bottom, for a stronger presence.*
- *There was a strong objection to a concession to waive bird safe requirements.*
- *Recommend amenity space throughout floors, not just on the roof and ground floor.*
- *Glass railing at roof should be bird safe.*
- *Recommend operable windows, and larger where possible*

Landmarks Preservation Commission Review: Demolition Referral

The project would demolish two commercial buildings that are over 40 years old. The Historic Resource Evaluation (HRE) for the subject property was completed by Left Coast Architectural History on November 6, 2024 and determined that the building proposed for demolition does not meet the criteria for the California Register or a City of Berkeley Landmark or Structure of Merit. Pursuant to BMC Section 23.326.070(C), the proposed demolition was referred to the LPC for review prior to the consideration of the Use Permit. The LPC reviewed the demolition referral on September 4, 2024, and took no action.

POLICY CONSISTENCY

Housing Accountability Act

Pursuant to the Housing Accountability Act (HAA), California Government Code Section 65589.5(j), when a proposed housing development complies with the applicable, objective general plan and zoning standards, but a local agency proposes to deny the project or approve it only if the density is reduced, the agency must base its decision on written findings supported by substantial evidence that:

1. The development would have a specific adverse impact on public health or safety[4] unless disapproved, or approved at a lower density; and

2. There is no feasible method to satisfactorily mitigate or avoid the specific adverse impact, other than the disapproval, or approval at a lower density.

The project is a "housing development project" consisting of a residential only building. The Base Project includes Use Permits and/or Administrative Use Permits to modify height, setbacks and rooftop equipment allowances, and complies with applicable, objective general plan and zoning standards. Government Code Section 65589.5(j)(3) provides that a request for a density bonus "shall not constitute a valid basis on which to find a proposed housing development project is inconsistent, not in compliance, or not in conformity, with an applicable plan, program, policy, ordinance, standard, requirement, or other similar provision specified

[4] See footnote 2.

in this subdivision." Therefore, the City may not deny the Base Project or density bonus request or reduce the density with respect to those units without basing its decision on the written findings under Section 65589.5(j), above.

While the project may include other Use Permits or Administrative Use Permits to modify standards not associated with the base project, there are no objective criteria in the findings therefore the project still complies with the HAA. The ZAB has the discretion to approve, deny, or modify the request according to the zoning findings, provided the action does not reduce the project density or effectively deny the project by making it infeasible, unless the ZAB is also able to make the required findings for denial set forth under Section 65589.5(j), above.

Staff is not aware of specific adverse impacts that could occur with the construction of the project.

Housing Crisis Act of 2019 – Senate Bill (SB) 330

The Housing Crisis Act, also known as Senate Bill 330, seeks to boost homebuilding throughout the State with a focus on urbanized zones by expediting the approval process for and suspending or eliminating restrictions on housing development. A "housing development project" can include any of the following: residential units only; mixed use consisting of residential and nonresidential uses in which at least two-thirds of the square-footage is designated residential, and transitional or supportive housing. Sections of SB 330 that apply to the proposed project include the following:

1. **Government Code Section 65905.5(a)** states that if a proposed housing development project complies with the applicable, objective general plan and zoning standards in affect at the time an application is deemed complete, then the city shall not conduct more than five hearings in connection with the approval of that housing development project. This includes all public hearings in connection with the approval of the housing development project and any continuances of such public hearings. The City must consider and either approve or disapprove the project at any of the five hearings consistent with applicable timelines under the Permit Streamlining Act (Chapter 4.5 (commencing with Section 65920)).

   November 13, 2025, ZAB hearing represents the third public hearing for the proposed project since the project was deemed complete. The City can hold two additional public hearings on this project, if needed including any possible appeal to the City Council.

2. **Government Code Section 65913.10(a)** requires that the City determine whether the proposed development project site is a historic site at the time the application for the housing development project is deemed complete. The determination as to whether the parcel is a historic site must remain valid during the pendency of the housing development project, unless any archaeological, paleontological, or tribal cultural resources are encountered during any grading, site disturbance, or building alteration activities. Based on the conclusion provided on the Historic Resource Analysis prepared by Left Coast Architectural History dated November 6, 2024, the property at 2029-2039 University Avenue does not appear to be eligible for listing the California Register of Historical Resources or as a City of Berkeley Landmark or Structure of Merit. Therefore, it does not qualify as a historic resource for the purposes of the California Environmental Quality Act (CEQA).

   The project's SB 330 Preliminary Application(#PLN2024-0069) which vests local ordinances, policies, and standards, as well as the historic resource status of the site was complete on January 9, 2025. This means the housing development is vested under the provisions of SB330 with no historical designation status under the local register and therefore, the City will be precluded from imposing preservation-related conditions on the housing development project if it is approved.

3. **Government Code Section 65950(a)(5)** requires a public agency to approve or disapprove a project within 60 days from the determination that the project is exempt from the CEQA. At the November 13, 2025 public hearing, the application must be approved or disapproved by January 12, 2026.

   The project is scheduled for review by the Zoning Adjustments Board (ZAB) on November 13, 2025, at which time the Board may take action to approve, deny, or continue the application. If the Board votes to approve or deny the project, that decision will become final at the end of the 14-day appeal period, which begins once the ZAB Notice of Decision is issued—typically within one week of the hearing. If no appeal is filed during that period, the decision becomes effective and final. This timeline ensures that a final determination is made prior to the 60-day deadline, by January 12, 2026 deadline.

General Plan Consistency

The 2002 General Plan contains several policies applicable to the project, including the following:

1. **Policy LU-3 Infill Development:** Encourage infill development that is architecturally and environmentally sensitive, embodies principles of sustainable planning and construction, and is compatible with neighboring land uses and architectural design and scale.

   Evidence: The project would be compliant with the General Plan's Infill Development policy because it would repurpose an underutilized Site, with a residential project in a neighborhood that consists of both residential and commercial uses and designed to not conflict with the existing architectural character.

2. **Policy LU-7 Neighborhood Commercial Areas:** Require that new development be consistent with zoning standards and compatible with the scale, historic character, and surrounding uses in the area.

   Evidence: The project would be compatible with the General Plan's Neighborhood Commercial Area policy because the proposed residential use is compatible with the existing uses in the neighborhood, and a building design that does not conflict with scale or the historic character of the neighborhood.

3. **Policy UD-24 Area Character**: Regulate new construction and alterations to ensure that they are truly compatible with and, where feasible, reinforce the desirable design characteristics of the particular area they are in.

   Evidence: The project would be compatible with surrounding land uses, which consists primarily of Avenue Commercial and Downtown Mixed-use uses, featuring a diverse mix of commercial buildings containing various retail, dining establishments and residential uses. The surrounding neighborhoods consist of a mix of multi-family residences and commercial establishments. The project would reinforce the City's effort to redevelop underutilized sites in a way that would increase the quality of the built environment and provide new housing. The project would further improve the neighborhood character and quality of life by bringing in new residents and new business patrons along University Avenue in an area served by transit.

4. **Policy LU-23 Transit-Oriented Development:** Encourage and maintain zoning that allows greater commercial and residential density and reduced residential parking requirements in areas with above-average transit service such as the Elmwood District.

   Evidence: The project would help to encourage transit use and reduce greenhouse gas emissions by constructing additional housing in close proximity to transit, jobs, and basic goods and services.

5. **Policy LU-26 Neighborhood Quality of Life:** Maintain and improve High Density Residential and Avenue Commercial areas as pedestrian-friendly, visually attractive areas and ensure that Neighborhood Commercial areas fully serve neighborhood needs.

   Evidence: The construction of new high-density residential buildings underutilized Housing Opportunity Site provides much-needed housing while maintaining the character and vibrancy of the neighborhood.

6. **Policy H-19 Regional Housing Needs:** Encourage adequate housing production to meet City needs and the City's share of regional housing needs.

   Evidence: The project would provide 240 dwelling units, increasing the City's housing supply by adding new dwelling units in close proximity to goods, services and transit.

Date	Action
December 10, 2024	SB330 Preliminary Application Submitted
December 19, 2024	Use Permit Application submitted
January 9, 2025	SB330 Preliminary Application Complete
May 22, 2025	Use Permit Application Complete
May 22 to July 31, 2025	Application Processing
September 4, 2025	LPC demolition referral hearing/LPC took no action
October 16, 2025	Design Review Committee (DRC) review
October 30, 2025	Public hearing notices for ZAB Hearing on November 13, 2025 mailed/posted
November 13, 2025	ZAB Hearing

Notes:
a. Application processing reflects the project compliance review, including CEQA if applicable, after the application is deemed complete. Submittals are reviewed within 30 days of receipt, pursuant to the Permit Streamlining Act.

Table 2: Special Characteristics

Characteristic	Applicability	Explanation
Affordable Child Care Fee for qualifying non-residential projects (Per Resolution 66,618-N.S.)	No	This fee applies to net newly constructed nonresidential gross floor area over 7,500 square feet. The project does not include nonresidential gross floor area; therefore, this fee does not apply.
Affordable Housing Fee for qualifying non-residential projects (Per Resolution 66,617-N.S.)		
Affordable / Inclusionary Housing Requirements (BMC Chapter 23.328)	Yes	The project would provide more than 5,000 square feet of residential unit floor area and is part of a larger housing development project, therefore inclusionary housing provisions would apply. The project is a housing development project, as defined in BMC 23.328.020, and would provide at least 20 percent Below Market Rate (BMR) residential units. The project as a whole would provide 36 Below Market Rate (BMR) units including 18 Very Low-Income (VLI) and 18 Moderate-Income (MI) units.
Alcohol Sales/Service	No	The project is residential only and does not offer Alcoholic Beverage Service of distilled spirits, beer and wine.

Characteristic	Applicability	Explanation
Bird Safe Buildings (BMC Section 23.304.150)	No	The project is subject to these provisions because the proposed building meet the building size (10,000 square feet or greater) or height requirements (average of 35) which would trigger these requirements. However, as one of the three Concession this project is entitled to, it is requesting an Exemption from the Bird Safe Building requirements in BMC Section 23.304.150.
Coast Live Oak Trees (BMC Chapter 6.52)	No	There is no Coast Live Oak (*Quercus agrifolia*) tree on the project site.
Creeks	No	No creek or culvert, as defined by BMC Chapter 17.08, exists on or within 30 feet of the project site.
Density Bonus	Yes	The project would provide 18 Very Low-Income units, 18 Moderate Income units or 30 percent of the Base Project units, and qualifies for a 100 percent density bonus, or 120 bonus units. See Section III.B for discussion.
Hard Hats (BMC Chapter 13.107)	No	Pursuant to BMC Chapter 13.107 "Establishing Healthcare and Apprenticeship Standards for Private Development" projects within City limits consisting of construction of either a new building, addition to an existing building, alteration of existing floor area, or demolition of 50,000 square feet or more of floor area shall be subject to the requirements of this Chapter. However, the application utilizes two out of the three concessions that the project is entitled to, to be exempt from the two provisions of this requirement (Healthcare and Apprenticeship Standards for Private Development).
Historic Resources	No	The existing building is more than 40 years old. The historic resource evaluation (HRE) for the subject property was completed by Left Coast Architectural History on November 6, 2024 and determined that the building proposed for demolition does not meet the criteria for the California Register or a City of Berkeley Landmark or Structure of Merit. Pursuant to BMC Section 23.326.070(C), the proposed demolition was referred to the LPC for review prior to the consideration of the Use Permit. The LPC reviewed the demolition referral on September 4, 2024, and took no action.

Characteristic	Applicability	Explanation
Housing Accountability Act (HAA) (Gov't Code Section 65589.5(j))	Yes	The project meets the definition of a "Housing Development Project" per Government Code Section 65589.5(h)(2)[b]. The project complies with applicable, objective general plan and zoning standards, and thus section (j) of the Housing Accountability Act does apply, and the project cannot be denied at the density proposed unless the findings for denial can be made.
Housing Crisis Act of 2019 (SB 330)	Yes	The project meets the definition of a "Housing Development Project" per Government Code Section 65589.5(h)(2).b See Housing Crisis Act of 2019 – Senate Bill (SB) 330 of this report for additional discussion on the sections of SB 330 that apply to the project.
Opportunity Sites	Yes	2029 University Avenue is a 0.28 acre lot currently developed with a 2-story 9,401 square-foot non-residential building and a parking structure. It was identified as an opportunity site and is listed in the 2023-2031 Housing Element Update.
Public Art	Yes	Per BMC Chapter 23.316.020(B)(1), Percentage For Public Art on Private Projects applies to new multifamily residential projects of five or more dwelling units.
Rent Controlled Units	No	The project would not involve demolition of rent controlled dwelling units.
Residential Preferred Parking (RPP)	Yes	The site is located in RPP zone "E". However, the project is not eligible for RPP permits per BMC Section 14.72.080(C)(1) as no permits shall be issued to residents in newly constructed residential units.
Seismic Hazards (SHMA)	No	The project site is not located within an area susceptible to landslide/liquefaction/fault rupture as shown on the State Seismic Hazard Zones map[c].
Soil/Groundwater Contamination	No	The project site is not on the Cortese List [d], and Phase I report was prepared. Standard Conditions of Approval related to hazardous materials would apply.
Transit	Yes	The project site is located less than 100 feet to bus stops with service to several intersecting major bus routes, including AC Transit Lines 27, 51B,52, 604, 88, 800

Characteristic	Applicability	Explanation
Notes: a. BMC 23.328.020(E) defines a "Housing Development Project" for purposes of inclusionary housing requirements as “a development project, including a Mixed-Use Residential project involving the new construction of at least one Residential Unit. Projects with one or more buildings or projects including multiple contiguous parcels under common ownership or control shall be considered as a sole Housing Development Project and not as individual projects. [b] Government Code Section 65589.5(h)(2) “Housing development project” means a use consisting of any of the following: (A) residential units only, (B) mixed-use developments consisting of residential and nonresidential uses in which at least two-thirds of the square footage is designated for residential use, and (C) transitional or supportive housing. Government Code Section 65905.5(b)(3)(C) “Housing development project” includes a proposal to construct a single dwelling unit. This subparagraph shall not affect the interpretation of the scope of paragraph (2) of subdivision (h) of Section 65589.5. c. California Department of Conservation. DOC Maps: Geologic Hazards. Available: https://maps.conservation.ca.gov/geologichazards/ d. Cortese List is an annually updated list of hazardous materials sites complied pursuant Government Code Section 65962.5.

APP # ZP2024-0181

November 13, 2025

Use Permit for a Project at 2029 University Avenue (Multifamily)

Project Facts	Project Description:
Applicant: Rhoades Planning Group **Property Owner:** Mohammad Talai & Kokab Talai **Project Address:** 2029 University Avenue **General Plan:** DT (Downtown Mixed-Use) **Area Plan:** Downtown Area Plan **Zoning:** C-DMU Outer Core (Downtown Mixed-Use district) **Site Size:** 12,385 square feet (0.28 acre) **CEQA:** Section 15332 ("In-Fill Development Projects") **Application Submittal Date:** December 19, 2024	**Use Permit #ZP2024-0181 to demolish an existing two-story commercial building and a ten-car garage structure on a 12,385-square-foot lot and to construct a 23-story (256-feet-tall plus a 5-foot parapet) approximately 190,830-square-foot residential building containing 240 dwelling units including 18 Very Low-Income (VLI), and 18 Moderate Income (MI) units for a 100% density bonus. The proposed project provides 29 off-street parking spaces, 167 Long-term and 8 Short-Term bike parking spaces.** **Zoning Permits Requested:**

SB330 Pre-Application Vest Date: January 9, 2025 **Use Permit Application Completion Date:** May 22, 2025 **Project Planner:** Nilu Karimzadegan	1. **Demolition.** BMC Section 23.326.070(A) **"Demolitions of Non-Residential Buildings"** to demolish a non-residential building (UPPH)* 2. **New Construction.** BMC Section 23.204.020 (A) **"Allowed Land Uses"** to construct a new multi-family building (UPPH). 3. **New Floor Area.** BMC Section 23.204.030(A)(1) **"Floor Area Permit Requirements"** to create any residential addition within the within the C-DMU (UPPH). 4. **Height**. BMC Section 23.204.130(E)(1)(a) **"Height Limits"** to increase the maximum building height limit to 75' (plus 5' parapet, by right) (UPPH). 5. **Setbacks.** BMC Section 23.204.130(E)(3)(b) "**Modifications to Standards"** to modify front, side, and rear setback requirements (UPPH). 6. **Projections Above Height Limits.** BMC Section 23. 304.050 **"Allowed Projections Above Height Limit "**to allow for Projections Above Height Limit (AUP)
	Density Bonus:
	Waivers 1. **Usable Open Space**. Waiver of BMC Section 23.204.140(E)(4) for providing 2,055 square feet of Usable Open Space, where 19,200 square feet is required. 2. **Landscaped Usable Open Space.** Waiver of BMC Section 23.304.90 for Usable Open Space landscaped area to be 27 (0.0014%) square feet where 7,680 square feet (40%) is required. 3. **Height.** Waiver of BMC Section 23.204130(E)(1)(a) to exceed building height limits—to be 256 feet, plus a 5-foot parapet while 75 feet (plus 5-foot parapet by right) is the allowable height with a Use Permit. 4. **Setbacks.** Waiver of BMC Section 23.204.130(E) to reduce the front side setback requirement to 0 feet, where 15 feet is the minimum, between 76 to 120 feet in height. 5. **Setbacks.** Waiver of BMC Section 23.204.130(E) to reduce the interior side setback requirement on the Floors 3 to 22 to 10 feet, where 15 feet is the minimum, between 76 to 120 feet over 65 feet from lot frontage. 6. **Setbacks.** Waiver of BMC Section 23.204.130(E) to reduce the rear setback requirement to 6.5 feet on the Floor 3-22, where 15 feet is the minimum, between 76 to 120 feet in height.

	7. **Setbacks.** Waiver of BMC Section 23.204.130(E) to reduce the rear setback requirement to 6.5 feet on the Floor 3-22, where 15 feet is the minimum, over 120 feet in height. 8. **Building's width.** Waiver of BMC Section 23.204.130(E)(3)(d) for the building's width over 120 feet of height, to be 139 feet, 6 inches at the widest point (on the diagonal in plan review) where maximum width allowed is 120 feet. 9. **Projections Above Height Limits.** Waiver of BMC Section 23. 304.050 "Allowed Projections Above Height Limit "to allow for Projections Above Height Limit (AUP) **Concessions** 1. **Concession.** Exemption from the **"Apprenticeship Requirements"** in establishing Healthcare and Apprenticeship Standards for Private Development, as required by BMC Section 13.107.040 2. **Concession.** Exemption from the **"Health Care Expenditures"** in establishing Healthcare and Apprenticeship Standards for Private Development, as required by BMC Section 13.107.050 3. **Concession.** Exemption from the "**Bird Safe Building"** requirement as required by BMC 23.304.150
	Staff Recommendation:
	Staff recommends that the Zoning Adjustments Board (ZAB) determine that the project is categorically exempt from the provisions of the California Environmental Quality Act (CEQA, Public Resources Code Section 21000, et seq. and California Code of Regulations, Section15000, et seq.) pursuant to CEQA Guidelines Section 15332 ("In-Fill Development Projects") and approve ZP2025-0181 pursuant to Section 23.406.040(D) "Use Permits" and subject to the attached Findings and Conditions of Approval.

I. CEQA FINDINGS

As required by CEQA Section 15332 ("Infill Development Project") of the CEQA Guidelines, the ZAB finds that this project is categorically exempt from the provisions of the California Environmental Quality Act (CEQA, Public Resources Code Section 21000, et seq. and California Code of Regulations, Section 15000, et seq.) because:

- The project is consistent with the applicable general plan designation and all applicable general plan policies as well as with applicable zoning designation and regulations.
- The project site is within city limits on a project site of fewer than five acres that is substantially surrounded by urban uses.
- The project site has no value as habitat for endangered, rare or threatened species.
- Approval of the project would not result in any significant effects relating to traffic, noise, air quality, or water quality.
- The site can be adequately served by all required utilities and public services.

Additionally, none of the exceptions to eligibility for a categorical exemption as listed under CEQA Guidelines Section 15300.2, apply to the project.

Evidence: Though the project is located within the City's Environment Management Area (EMA), which are areas in the City of Berkeley known or suspected to have groundwater contamination, it is not located in an environmentally sensitive area; the cumulative impact of successive projects of the same type in the same place over time will not be significant; there are no "unusual circumstances" at the project site that will result in significant environmental effects; there are no designated scenic highways in the City of Berkeley and the project site is not in view of a state scenic highway; the site is not included on a list compiled pursuant to Section 65962.5 of the Government Code; and the project would not result in a substantial adverse change in the significance of a historical resource.

Prior to making the CEQA determination for the project, staff reviewed all of the evidence in the record, including the project application materials, plans and technical reports including Air Quality Analysis, Noise impacts Analysis, Water Quality Memorandum, Historic Resource Evaluation and Phase I Analysis.

Historic Resource Evaluation prepared by Left Coast Architectural History, dated October 18, 2023 concluded that based on their evaluation, the property is not historically significant at either the local or State level and therefore does not qualify as a historic resource for the purposes of the California Environmental Quality Act.

II. FINDINGS FOR APPROVAL

1) As required by **BMC Section 23.406.040 (E)(1)** ***"Findings for Approval"***, the ZAB finds that the the proposed project or use:

(a) Will not be detrimental to the health, safety, peace, morals, comfort, or general welfare of persons residing or visiting in the area or neighborhood of the proposed use;

Evidence: The project is consistent with all applicable C-DMU Outer Core District standards and qualifies for concessions and waivers for the listed district standards granted pursuant to State Density Bonus, Government Code, Section 65915.

(b) Will not be detrimental or injurious to property and improvements of the adjacent properties, the surrounding area or neighborhood, or to the general welfare of the City.

Evidence: The project will not be detrimental or injurious to adjacent properties, surrounding improvements, the neighborhood, or the general welfare of the city, it will enhance the immediate and surrounding areas by replacing an underutilized Housing Opportunity Site with a new development consisting of 240 units. This includes a significant affordable housing component: 18 units for Very Low-Income (VLI) households, and 18 for Moderate-Income (MI) households. By substantially increasing the housing supply and providing a range of affordability levels, the project contributes meaningfully to both local and regional housing needs. Additionally, the project complies with all applicable state and local objective planning standards.

Sunlight: The additional height above the district limits (75 feet with Use Permit plus 5 feet by-right parapet) from the density bonus will cast shadows in the affected directions further than if the project were limited to the base district height standards. The proposal will include waivers for additional height beyond the district height limits to accommodate the density bonus units and allow a 256-foot-tall (plus 5-foot parapet), 23-story building. Overall, the shadow impacts from the project will be reasonable and not detrimental.

According to the shadow studies submitted for the project, new shadow impacts will occur: a) in the winter months in the hours of after sunrise on the residential buildings on the north-west, around noon on the residential buildings on the north and in the hours of before sunset on the residential buildings on the north and north-east ; b) in the summer months in the hours of after sunrise on the residential buildings on the west, in the hours around noon on the residential buildings on the north and in the hours before sunset on the residential buildings on the east and southeast; and c) at the time of application preparation (March) in the hours of after sunrise on the residential buildings on the north-west, around noon on the residential buildings on the north, and in the hours of before sunset on the residential buildings on east. All other new shadows will impact non-residential buildings in the vicinity. The extent of the new shadow impact from the project on the site's adjacent areas will be limited to a few hours of the day during certain times of the year, will not be unreasonable for a development in the dense, Downtown Area plan that allows building heights up to 120 feet with 0 to 15-foot setbacks from property lines depending on the height and distance to lot frontage.

2) As required by **BMC Section 23.406.040 (E)(2)** ***"Findings for Approval",*** to approve the Use Permit, the ZAB must also make any other Use Permit findings specifically required by the Zoning Ordinance for the proposed project:

a) Pursuant to **BMC Section 23.326.070(D) "Demolition of Non-residential Buildings"** A Use Permit or an AUP for demolition of a main building used for non-residential purposes on any lot or an accessory building located on a lot in a non-residential district may be approved only if the ZAB or the Zoning Officer finds that:

1. The demolition will not be materially detrimental to the commercial needs and public interest of any affected neighborhood or the City of Berkeley; and

2. The demolition:

(a) Is required to allow a proposed new building or other proposed new use;

(b) Will remove a building which is unusable for activities which are compatible with the purposes of the district in which it is located or which is infeasible to modify for such uses;

(c) Will remove a structure which represents an uninhabitable attractive nuisance to the public; or

(d) Is required for the furtherance of specific plans or projects sponsored by the City of Berkeley or other local district or authority upon a demonstration by the applicant that it would be infeasible to obtain prior or concurrent approval for the new construction or new use. (Ord. 7924-NS § 1, 2024: Ord. 7787-NS § 2 (Exh. A), 2021)

Evidence: The proposed demolition is necessary to facilitate the construction of a new residential development consisting of 240 units on a designated Opportunity Site. This new use supports the City of Berkeley's housing goals and aligns with the public interest by contributing to the supply of housing in a high-priority area. The existing structure must be removed to accommodate the proposed project, satisfying the requirement that demolition is necessary to allow a new building or use, as outlined in Section 23.326.070(D)(2)(a).

b) As required by **Government Code Section 65915 (State Density Bonus),** the Zoning Adjustments Board finds that:

Under the City's methodology for implementing density bonuses, the base project consists of 120 units. The project will provide at least and 18 Very Low-Income (VLI) and 18 Moderate-Income (MI) BMR units on site qualifying units in the 120-unit base project, as more fully set forth in Condition "Number of Below Market Rate Units". The project is entitled to a density increase of 100 percent over the otherwise maximum allowable residential density under the Zoning Ordinance and General Plan Land Use Element, under the requirements of Government Code Section 65915(b) and (f), plus three concessions or incentives. This equates to a density bonus of up to 100% or 120 units above the base project, for a total of up to 240 units.

i. In accordance with Government Code Section 65915(d) and (k), the Zoning Adjustments Board hereby grants the following concessions in order to provide for affordable housing costs:

- **Concession 1.** Exemption from the Healthcare and Apprenticeship Standards for Private Development as required by BMC Section 13.107
- **Concession 2.** Exemption from the Prevailing Wage requirements as required by BMC Section 13.108A
- **Concession 3.** Exemption from the Bird Safe Building reequipments as required by BMC 23.304.150

In accordance with Government Code Section 65915(d), in order to allow construction of the proposed project with the density permitted under State law, the Zoning Adjustments Board grants the following concessions and finds that the approval of the concessions is required to provide for affordable rents, as provided in Government Code Section 65915(d)(1)(A) because: 1) approval of the concession would result in identifiable and actual cost reduction; 2) approval of the concession would not have a specific adverse impact upon public health and safety, or the physical environment, or on any real property listed in the California Register of Historical Resources; and 3) would not be contrary to State or Federal law.

ii. In accordance with Government Code Section 65915(e) the Zoning Adjustments Board hereby grants the following waivers to modify development standards as necessary to accommodate these density bonus units.

- **Usable Open Space**. Waiver of BMC Section 23.204.140(E)(4) for providing 2,055 square feet of Usable Open Space, where 19,200 square feet is required.
- **Landscaped Usable Open Space.** Waiver of BMC Section 23.304.90 for Usable Open Space landscaped area to be 27(0.0014%) square feet where 7,680 square feet (40%) is required.
- **Height.** Waiver of BMC Section 23.204130(E)(1)(a) to exceed building height limits—to be 256 feet, plus a 5-foot parapet while 75 ft. (plus 5-foot parapet by right) is the allowable height with a Use Permit.

- **Setbacks.** Waiver of BMC Section 23.204.130(E) to reduce the front side setback requirement to 0 feet, where 15 feet is the minimum, between 76 to 120 in height.
- **Setbacks.** Waiver of BMC Section 23.204.130(E) to reduce the interior side setback requirement on the Floors 3 to 22 to 10 feet, where 15 feet is the minimum, between 76 to 120 feet over 65 feet from lot frontage.
- **Setbacks.** Waiver of BMC Section 23.204.130(E) to reduce the rear setback requirement to 6.5 feet on the Floor 3-22, where 15 feet is the minimum, between 76 to 120 feet in height.
- **Setbacks.** Waiver of BMC Section 23.204.130(E) to reduce the rear setback requirement to 6.5 feet on the Floor 3-22, where 15 feet is the minimum, over 120 feet in height.
- **Building's width.** Waiver of BMC Section 23.204.130(E)(3)(d) for the building's width over 120 feet of height, to be 139'-6" at the widest point (on the diagonal in plan review) where maximum width allowed is 120 feet.
- **Projections Above Height Limits.** Waiver of BMC Section 23. 304.050 **"Allowed Projections Above Height Limit "**to allow for Projections Above Height Limit (AUP)

In accordance with Government Code Section 65915(e), in order to allow construction of the proposed project with the density permitted under State law, the Zoning Adjustments Board finds that the approval of waivers is required 1) to construct the proposed project at the density permitted under State law; 2) approval of requested waivers will not have a specific adverse impact upon public health and safety, or the physical environment, or on any real property listed in the California Register of Historical Resources; and 3) approval of the requested waivers will not be contrary to State or Federal law.

c) As required by the **Housing Accountability Act, Government Code Section 65589.5(j),** when a proposed housing development complies with applicable, objective general plan and zoning standards, a local agency may not deny the project or approve it with reduced density unless the agency makes written findings supported by substantial evidence that: (1) the development would have a specific adverse impact on public health or safety unless disapproved or approved at a lower density; and (2) there is no feasible method to satisfactorily mitigate or avoid the specific adverse impact, other than the disapproval or approval at a lower density.

Evidence: The project includes construction of "housing development project" with at least two-thirds of the floor area in residential use. Because the project complies with applicable, objective general plan and zoning standards, Section 65589.5(j) does apply to this project. No significant, quantifiable, direct and unavoidable impacts, based on objective, identified written public health or safety standards, polices, or conditions, have been identified.

3) As required by **BMC Section 23.406.040 (E)(3)** ***"Findings for Approval",*** the ZAB considers the following (a and b) in making findings:

(a) The proposed land use

Evidence: The proposed land use meets the findings for approval because the project's residential use is consistent with the purposes of the Downtown Mixed-Use areas as outlined in the General Plan's Land Use Element. This identifies the need to provide high-density residential development and residential units to meet the housing needs of the City of Berkeley on a transit-served site contributing to local and regional housing needs with the inclusion of applicable waivers and concessions allowed under the State Density Bonus law.

(b) The structure or addition that accommodates the use.

Evidence: The proposed construction of a twenty three-story residential project with its compliant Base Project with the undelaying zoning standards will accommodate the use because it will fulfill both the district purposes and contribute to local and regional housing needs and is consistent with the development standards of the C-DMU zoning district.

4) As required by **BMC Section 23.406.040 (E)(4)** ***"Findings for Approval",*** the ZAB makes the required findings based on the circumstances existing at the time a decision is made on the application.

Evidence: The application has been reviewed based on the current zoning standards, general plan policies, environmental conditions, and site context as of the date of the decision. The project is consistent with the allowed uses outlined in the C-DMU zone. Surrounding land uses and structures surrounding the site are based on current information.

5) As required by **BMC Section 23.406.040 (E)(5)** ***"Findings for Approval",*** the ZAB shall deny a Use Permit application if it determines that it is unable to make any of the required findings

Evidence: This finding does not apply because all required findings can be made based on submitted application material, documents and staff analysis.

LAND USE PLANNING

Conditions of Approval

November 13, 2025

Use Permit for a Project at 2029 University Avenue (Multifamily)

Project Facts	Project Description:
Applicant: Rhoades Planning Group **Property Owner:** Mohammad Talai & Kokab Talai **Project Address:** 2029 University Avenue **General Plan:** DT (Downtown Mixed-Use) **Area Plan:** Downtown Area Plan **Zoning:** C-DMU Outer Core (Downtown Mixed-Use district) **Site Size:** 12,385 square feet (0.28 acre) **CEQA:** Section 15332 ("In-Fill Development Projects") **Application Submittal Date:** December 19, 2024	**Use Permit #ZP2024-0181 to demolish an existing two-story commercial building and a ten-car garage structure on a 12,385-square-foot lot and to construct a 23-story (256-feet-tall plus a 5-foot parapet) approximately 190,830-square-foot residential building containing 240 dwelling units including 18 Very Low-Income (VLI), and 18 Moderate Income (MI) units for a 100% density bonus. The proposed project provides 29 off-street parking spaces, 167 Long-term and 8 Short-Term bike parking spaces.** **Zoning Permits Requested:**

SB330 Pre-Application Vest Date: January 9, 2025 **Use Permit Application Completion Date:** May 22, 2025 **Project Planner:** Nilu Karimzadegan	1. **Demolition.** BMC Section 23.326.070(A) **"Demolitions of Non-Residential Buildings"** to demolish a non-residential building (UPPH)* 2. **New Construction.** BMC Section 23.204.020 (A) **"Allowed Land Uses"** to construct a new multi-family building (UPPH). 3. **New Floor Area.** BMC Section 23.204.030(A)(1) **"Floor Area Permit Requirements"** to create any residential addition within the within the C-DMU (UPPH). 4. **Height**. BMC Section 23.204.130(E)(1)(a) **"Height Limits"** to increase the maximum building height limit to 75' (plus 5' parapet, by right) (UPPH). 5. **Setbacks.** BMC Section 23.204.130(E)(3)(b) "**Modifications to Standards"** to modify front, side, and rear setback requirements (UPPH). 6. **Projections Above Height Limits.** BMC Section 23. 304.050 **"Allowed Projections Above Height Limit "**to allow for Projections Above Height Limit (AUP)
	Density Bonus:
	Waivers: 1. **Usable Open Space**. Waiver of BMC Section 23.204.140(E)(4) for providing 2,055 square feet of Usable Open Space, where 19,200 square feet is required. 2. **Landscaped Usable Open Space.** Waiver of BMC Section 23.304.90 for Usable Open Space landscaped area to be 27 (0.0014%) square feet where 7,680 square feet (40%) is required. 3. **Height.** Waiver of BMC Section 23.204130(E)(1)(a) to exceed building height limits—to be 256 feet, plus a 5-foot parapet while 75 feet (plus 5-foot parapet by right) is the allowable height with a Use Permit. 4. **Setbacks.** Waiver of BMC Section 23.204.130(E) to reduce the front side setback requirement to 0 feet, where 15 feet is the minimum, between 76 to 120 feet in height. 5. **Setbacks.** Waiver of BMC Section 23.204.130(E) to reduce the interior side setback requirement on the Floors 3 to 22 to 10 feet, where 15 feet is the minimum, between 76 to 120 feet over 65 feet from lot frontage. 6. **Setbacks.** Waiver of BMC Section 23.204.130(E) to reduce the rear setback requirement to 6.5 feet on the Floor 3-22,

	where 15 feet is the minimum, between 76 to 120 feet in height. 7. **Setbacks.** Waiver of BMC Section 23.204.130(E) to reduce the rear setback requirement to 6.5 feet on the Floor 3-22, where 15 feet is the minimum, over 120 feet in height. 8. **Building's width.** Waiver of BMC Section 23.204.130(E)(3)(d) for the building's width over 120 feet of height, to be 139 feet, 6 inches at the widest point (on the diagonal in plan review) where maximum width allowed is 120 feet. ~~9.~~ **Projections Above Height Limits.** Waiver of BMC Section 23. 304.050 "Allowed Projections Above Height Limit "to allow for Projections Above Height Limit (AUP) **Concessions:** 1. **Concession.** Exemption from the **"Apprenticeship Requirements"** in establishing Healthcare and Apprenticeship Standards for Private Development, as required by BMC Section 13.107.040 2. **Concession.** Exemption from the **"Health Care Expenditures**" in establishing Healthcare and Apprenticeship Standards for Private Development, as required by BMC Section 13.107.050 3. **Concession.** Exemption from the "**Bird Safe Building"** requirement as required by BMC 23.304.150
	Staff Recommendation:
	Staff recommends that the Zoning Adjustments Board (ZAB) determine that the project is categorically exempt from the provisions of the California Environmental Quality Act (CEQA, Public Resources Code Section 21000, et seq. and California Code of Regulations, Section15000, et seq.) pursuant to CEQA Guidelines Section 15332 ("In-Fill Development Projects") and approve ZP2025-0181 pursuant to Section 23.406.040(D) "Use Permits" and subject to the attached Findings and Conditions of Approval.

I. STANDARD CONDITIONS OF APPROVAL FOR ALL PROJECTS

Pursuant to Berkeley Municipal Code (BMC) Title 23 Zoning Ordinance and Title 13 Public Peace, Morals, and Welfare, the following conditions, as well as all other applicable provisions of the Zoning Ordinance, apply to this Permit:

1. **Conditions and the Downtown Mitigation Monitoring and Reporting Program Shall be Printed on Plans.** The conditions of this Permit shall be printed on the *second* sheet of each plan set submitted for a building permit pursuant to this Use Permit, under the title 'Use Permit Conditions.' *Additional sheets* may also be used if the *second* sheet is not of sufficient size to list all of the conditions. The sheet(s) containing the conditions shall be of the same size as those sheets containing the construction drawings.
2. **Compliance Required (BMC Section 23.102.050).** All land uses and structures in Berkeley must comply with the Zoning Ordinance and all applicable City ordinances and regulations. Compliance with the Zoning Ordinance does not relieve an applicant from requirements to comply with other federal, state, and City regulations that also apply to the property.
3. **Approval Limited to Proposed Project and Replacement of Existing Uses (BMC Sections 23.404.060(B)(1) and (2)):**
   - **A.** This Permit authorizes only the proposed project described in the application. In no way does an approval authorize other uses, structures or activities not included in the project description.
   - **B.** When the City approves a new use that replaces an existing use, any prior approval of the existing use becomes null and void when permits for the new use are exercised (e.g., building permit or business license issued). To re-establish the previously existing use, an applicant must obtain all permits required by the Zoning Ordinance for the use.
4. **Conformance to Approved Plans (BMC Section 23.404.060(B)(4)).** All work performed under an approved permit shall comply with the approved plans and any conditions of approval.
5. **Exercise and Expiration of Permits (BMC Section 23.404.060(C)):**
   - **A.** A permit authorizing a land use is exercised when both a valid City business license is issued (if required) and the land use is established on the property.
   - **B.** A permit authorizing construction is exercised when both a valid City building permit (if required) is issued and construction has lawfully begun.
   - **C.** The Zoning Officer may declare a permit lapsed if it is not exercised within one year of its issuance, except if the applicant has applied for a building permit or has made a substantial good faith effort to obtain a building permit and begin construction. The Zoning Officer may declare a permit lapsed only after 14 days written notice to the applicant. A determination that a permit has lapsed may be appealed to the ZAB in accordance with BMC Chapter 23.410, Appeals and Certification.

D. A permit declared lapsed shall be void and of no further force and effect. To establish the use or structure authorized by the lapsed permit, an applicant must apply for and receive City approval of a new permit.

6. **Permit Remains Effective for Vacant Property (BMC Section 23.404.060(D)).** Once a Permit for a use is exercised and the use is established, the permit authorizing the use remains effective even if the property becomes vacant. The same use as allowed by the original permit may be re-established without obtaining a new permit, except as set forth in Standard Condition #5 above.
7. **Permit Modifications (BMC Section 23.404.070).** No change in the use or structure for which this Permit is issued is permitted unless the Permit is modified by the Board. The Zoning Officer may approve changes to plans approved by the Board, consistent with the Board's policy adopted on May 24, 1978, which reduce the size of the project.
8. **Permit Revocation (BMC Section 23.404.080).** The City may revoke or modify a discretionary permit for completed projects due to: 1) violations of permit requirements; 2) Changes to the approved project; and/or 3) Vacancy for one year or more. However, no lawful residential use can lapse, regardless of the length of time of the vacancy. Proceedings to revoke or modify a permit may be initiated by the Zoning Officer, Zoning Adjustments Board (ZAB), or City Council referral.
9. **Pay Transparency Acknowledgement (BMC Section 13.104.030).** Prior to the issuance of a building permit for any Project subject to this Chapter:

   A. A Responsible Representative of the Permittee shall certify under penalty of perjury that the Permittee has reviewed Chapter 13.104 of the Berkeley Municipal Code, and will be responsible for demonstrating compliance with this Chapter.

   B. The Permittee shall provide to the City a Contractor Pay Transparency Acknowledgment on a form approved by the City for this purpose. A Responsible Representative of the Permittee shall certify under penalty of perjury that the Contractor and all Qualifying Subcontractors performing work on the Project will comply with BMC Chapter 13.104 and with Labor Code sections 226(a) and 2810.5 for each employee who works on the Project.

10. **Pay Transparency Attestations following Project Completion (BMC Section 13.104.040).** Within 10 days of the approved final inspection of any Project subject to this Chapter, each Permittee shall provide to the City for each Contractor and Qualifying Subcontractor a Pay Transparency Attestation on a form approved by the City. On each Pay Transparency Attestation, a Responsible Representative of the Contractor or Qualifying Subcontractor shall attest under penalty of perjury that the Contractor or Qualifying Subcontractor complied with BMC Chapter 13.104 and Labor Code sections 226(a) and 2810.5 for each employee who performed work on the Project. The City will maintain Pay Transparency Attestation forms for period of at least three years after their date of receipt by the City
11. **Posting of Wage Theft Ordinance (BMC Section 13.104.050).** Each day work is performed on the Project, each Permittee shall post, and keep posted in a conspicuous location where it may be easily read by employees during the hours of the workday, a notice that: (A) contains the text of BMC Chapter 13.104; (B) explains that workers can report violations of Labor Code sections 226 and 2810.5 to the Labor Commissioner of the State of California; and (C) provides current contact information, including office address, telephone number, and email address of the Labor Commissioner of the State of California.
12. **Wage Theft Prevention Conditions of Approval (BMC Section 13.104.060).** The requirements of BMC Sections 13.104.030 through 13.104.050 shall be included as conditions of approval of any Use Permit or Zoning Certificate for any Project that is subject to this Chapter. Failure to comply with the requirements of any provision of this Chapter shall be grounds for issuance of an administrative citation under BMC Chapter 1.28 and/or the revocation or modification of any Use Permit issued for the Project under BMC Chapter 23.404.
13. **Hold Harmless.** The permittee agrees as a condition of approval of this application to indemnify, protect, defend with counsel selected by the City, and hold harmless, the City, and any agency or instrumentality thereof, and its elected and appointed officials, officers, employees and agents, from and against any and all liabilities, claims, actions, causes of action, proceedings, suits, damages, judgments, liens, levies, costs and expenses of whatever nature, including reasonable attorney's fees and disbursements (collectively, "Claims") arising out of or in any way relating to the approval of this application, any actions taken by the City related to this entitlement, or any environmental review conducted under the California Environmental Quality Act, Public Resources Code Section 210000 et seq., for this entitlement and related actions. The indemnification shall include any Claims that may be asserted by any person or entity, including the permittee, arising out of or in connection with the approval of this application, whether or not there is concurrent, passive or active negligence on the part of the City, and any agency or instrumentality thereof, and its elected and appointed officials, officers, employees and agents. The permittee's duty to defend the City shall not apply in those instances when the permittee has asserted the Claims, although the permittee shall still have a duty to indemnify, protect and hold harmless the City.

II. ADDITIONAL CONDITIONS IMPOSED BY THE ZONING ADJUSTMENTS BOARD

Pursuant to BMC Section 23.404.050(H) Conditions of Approval, the Zoning Adjustments Board attaches the following additional conditions to this Permit:

Prior to Submittal of Any Building Permit:

14. **Project Liaison.** The applicant shall include in all building permit plans and post onsite the name and telephone number of an individual empowered to manage construction-related complaints generated from the project. The individual's name, telephone number, and responsibility for the project shall be posted at the project site for the duration of the project in a location easily visible to the public. The individual shall record all complaints received and actions taken in response, and submit written reports of such complaints and actions to the project planner on a weekly basis. Please designate the name of this individual below:

    ☐ **Project Liaison** _____

    Name Phone #

15. **Address Assignment.** The applicant shall file an "Address Assignment Request Application" with the Permit Service Center (1947 Center Street) for any address change or new address associated with this Use Permit. The new address(es) shall be assigned in accordance with BMC Section 16.28.030 Assignment and Installation of Numbers, and, except for new buildings on vacant lots, entered into the City's database after the building permit is issued but prior to final inspection.

16. **Construction Noise Reduction Program.** The applicant shall develop a site-specific noise reduction program prepared by a qualified acoustical consultant to reduce construction noise impacts to the maximum extent feasible, subject to review and approval of the Zoning Officer. The noise reduction program shall include the time limits for construction listed above, as measures needed to ensure that construction complies with BMC Section 13.40.070, Prohibited Acts. The noise reduction program should include, but shall not be limited to, the following available controls to reduce construction noise levels as low as practical:

    A. Construction equipment should be well maintained and used judiciously to be as quiet as practical.

    B. Equip all internal combustion engine-driven equipment with mufflers, which are in good condition and appropriate for the equipment.

    C. Utilize "quiet" models of air compressors and other stationary noise sources where technology exists. Select hydraulically or electrically powered equipment and avoid pneumatically powered equipment where feasible.

    D. Locate stationary noise-generating equipment as far as possible from sensitive receptors when adjoining construction sites. Construct temporary noise barriers or partial enclosures to acoustically shield such equipment where feasible.

    E. Prohibit unnecessary idling of internal combustion engines.

F. If impact pile driving is required, pre-drill foundation pile holes to minimize the number of impacts required to seat the pile.

G. Construct solid plywood fences around construction sites adjacent to operational business, residences or other noise-sensitive land uses where the noise control plan analysis determines that a barrier would be effective at reducing noise.

H. Erect temporary noise control blanket barriers, if necessary, along building facades facing construction sites. This mitigation would only be necessary if conflicts occurred which were irresolvable by proper scheduling. Noise control blanket barriers can be rented and quickly erected.

I. Route construction related traffic along major roadways and away from sensitive receptors where feasible.

17. **Damage Due to Construction Vibration.** The project applicant shall submit screening level analysis prior to, or concurrent with demolition building permit. If a screening level analysis shows that the project has the potential to result in damage to structures, a structural engineer or other appropriate professional shall be retained to prepare a vibration impact assessment (assessment). The assessment shall consider project specific information such as the composition of the structures, location of the various types of equipment used during each phase of the project, as well as the soil characteristics in the project area, in order to determine whether project construction may cause damage to any of the structures identified as potentially impacted in the screening level analysis. If the assessment finds that the project may cause damage to nearby structures, the structural engineer or other appropriate professional shall recommend design means and methods of construction that to avoid the potential damage, if feasible. The assessment and its recommendations shall be reviewed and approved by the Building and Safety Division and the Zoning Officer. If there are no feasible design means or methods to eliminate the potential for damage, the structural engineer or other appropriate professional shall undertake study of existing conditions (study) of any structures (or, in case of large buildings, of the portions of the structures) that may experience damage.

    This study shall establish the baseline condition of these structures, including, but not limited to, the location and extent of any visible cracks or spalls; and include written descriptions and photographs.

    The study shall be reviewed and approved by the Building and Safety Division and the Zoning Officer prior to issuance of a grading permit. Upon completion of the project, the structures (or, in case of large buildings, of the portions of the structures) previously inspected will be resurveyed, and any new cracks or other changes shall be compared to pre-construction conditions and a determination shall be made as to whether the proposed project caused the damage. The findings shall be submitted to the Building and Safety Division and the Zoning Officer for review. If it is determined that project construction has resulted in damage to the structure, the damage shall be repaired to the pre-existing condition by the project sponsor, provided that the property owner approves of the repair

18. **Compliance with Conditions of Approval and Environmental Mitigations.** The building permit application is subject to verification of compliance of these Conditions of Approval and the adopted Downtown Area Plan Mitigation Monitoring and Reporting Program (Attachment 5 to Staff Report). The applicant shall be responsible for demonstrating compliance with all conditions of approval and mitigation measures per the timeline set forth by this use permit. The applicant shall deposit $10,000 with the City, or less with the approval of the Zoning Officer, to pay for the cost of monitoring compliance with these Conditions of Approval and other applicable conditions and regulations. Should compliance-monitoring expenses exceed the initial deposit, the applicant shall deposit additional funds to cover such additional expenses upon the request of the Zoning Officer; any unused deposit will be refunded to the applicant.

Prior to Issuance of Any Building & Safety Permit (Demolition or Construction)

19. **Demolition.** Demolition of the existing building cannot commence until a complete application is submitted for the replacement building. In addition, all plans presented to the City to obtain a permit to allow the demolition are subject to these conditions.
20. **Construction Noise Management -** Public Notice Required. At least two weeks prior to initiating any construction activities at the site, the applicant shall provide notice to businesses and residents within 500 feet of the project site. This notice shall at a minimum provide the following: (1) project description, (2) description of construction activities during extended work hours and reason for extended hours, (3) daily construction schedule (i.e., time of day) and expected duration (number of months), (4) the name and phone number of the Project Liaison for the project that is responsible for responding to any local complaints, and (5) that construction work is about to commence. The liaison would determine the cause of all construction-related complaints (e.g., starting too early, bad muffler, worker parking, etc.) and institute reasonable measures to correct the problem. A copy of such notice and methodology for distributing the notice shall be provided in advance to the City for review and approval.
21. **Construction Phases.** The applicant shall provide the Zoning Officer with a schedule of major construction phases with start dates and expected duration, a description of the activities and anticipated noise levels of each phase, and the name(s) and phone number(s) of the individual(s) directly supervising each phase. The Zoning Officer or his/her designee shall have the authority to require an on-site meeting with these individuals as necessary to ensure compliance with these conditions. The applicant shall notify the Zoning Officer of any changes to this schedule as soon as possible.
22. **Construction and Demolition Diversion.** Applicant shall submit a Construction Waste Management Plan that meets the requirements of BMC Chapter 19.37 including 100 percent diversion of asphalt, concrete, excavated soil and land-clearing debris and a minimum of 65 percent diversion of other nonhazardous construction and demolition waste.
23. **Toxics.** The applicant shall contact the Toxics Management Division (TMD) at 1947 Center Street or (510) 981-7470 to determine which of the following documents are required and timing for their submittal:

A. **Phase I and Phase II Environmental Site Assessment (ESA) (per ASTM 1527).** A recent Phase I ESA (less than 2 years old) shall be submitted to the Toxics Management Division for developments for: all new commercial, industrial and mixed-use developments and all improvement projects that require work 5 or more feet below grade, and all new residential buildings with more than four dwelling units located in the Environmental Management Area (or EMA). The EMA can be viewed at: City of Berkeley Community GIS Portal (arcgis.com)

B. Depending on the findings in the Phase I, a Phase II or additional investigation may be necessary. Any available soils and groundwater analytical data available for projects listed in this section must also be submitted to TMD.

C. **Environmental Site Clearance.** The applicant shall provide environmental screening clearance from either the San Francisco Bay Regional Water Quality Control Board (RWQCB), Department of Toxic Substances Control (DTSC), or the Alameda County Department of Environmental Health's Local Oversight Program (LOP). Clearance from one of these regulatory agencies will ensure that the property meets development investigation and cleanup standards for the specific use proposed on the property. Environmental screening clearance shall be submitted to the City of Berkeley's Toxics Management Division prior to issuance of any building permits.

D. **Soil and Groundwater Management Plan.** A site-specific Soil and Groundwater Management Plan (SGMP) shall be submitted to Toxics Management Division (TMD) for all non-residential projects, and residential or mixed-use projects with more than four dwelling units, that: (1) are in the Environmental Management Area (EMA), as shown on the most recent City of Berkeley EMA map, and (2) propose any excavations deeper than 5 feet below grade or if significant soils removal is anticipated. The SGMP shall be submitted to the TMD with the project's building permit application and shall be approved by TMD prior to issuance of the building permit.

The SGMP shall comply with the hazardous materials and waste management standards required by BMC Section 15.12.100, the stormwater pollution prevention requirements of San Francisco Bay Regional Water Quality Control Board's Order No. R2-2009-0074, California hazardous waste generator regulations (Title 22 California Code of Regulations (CCR) 66260 et seq.), and the East Bay Municipal Utility District's Ordinance 311, and shall include the following:

i. procedures for soil and groundwater management including identification of pollutants and disposal methods;

ii. procedures to manage odors, dust and other potential nuisance conditions expected during development;

iii. notification to TMD within 24 hours of the discovery of any previously undiscovered contamination; and

iv. the name and phone number of the individual responsible for implementing the SGMP and who will respond to community questions or complaints.

TMD may require additional information or impose additional conditions as deemed necessary to protect human health and the environment. All requirements of the approved SGMP shall be deemed conditions of approval.

E. Demolitions & Renovations – Building Materials Survey. A hazardous materials survey for building materials and plans on hazardous materials and hazardous waste removal and disposal is required and must be prepared by qualified professionals, and submitted to the Toxics Management Division (TMD) prior to issuance of the building permit.

i. The survey shall include the identification of all materials to be disturbed for lead-based paints, PCB containing equipment and caulking, hydraulic fluids, refrigerants, treated wood, and mercury containing devices (including fluorescent light bulbs and mercury switches), asbestos and other hazardous materials and chemicals.

ii. If asbestos is identified, Bay Area Air Quality Management District Regulation 11-2-401.3 a notification must be made and the J number must be made available to the City of Berkeley Permit Service Center. Contractors must follow state regulations where there is asbestos-related work involving 100 square feet or more of asbestos containing material (8 Cal. Code Regs. §1529, §341.6 et seq.)

iii. The report to the TMD shall include, in addition to the survey, plans on hazardous materials and hazardous waste removal and disposal that comply with State and Federal codes including California Code of Regulations (CCR) 66260 et seq.

iv. Documentation evidencing disposal of hazardous waste in compliance with the survey shall be submitted to TMD within 30 days of the completion of the demolition.

Please note, the PCB Screening Form required by Public Works, Engineering, is a separate requirement and does not address the PCB identification requirement of the Toxics Management Division.

F. Hazardous Materials Business Plan. A Hazardous Materials Business Plan (HMBP) in compliance with BMC Section 15.12.040 and California Health & Safety Code, Chapter 6.95 Div. 20, shall be submitted to the Toxics Management Division through the California Environmental Reporting System: http://cers.calepa.ca.gov/ for chemicals used or stored on site during construction that exceed reporting thresholds. The reporting is required if your facility stores or handles hazardous materials in aggregate quantities equal to or greater than 55 gallons for liquids, 500 pounds for solids, or 200 cubic feet of compressed gases, or generates any quantity of hazardous waste. This includes welding gases, emergency generator fuel, paints, etc.

Additionally, the business occupant must submit an HMBP within 30 days of starting operations.

G. Petroleum Storage. An (SPCC) Plan is required to be prepared and implemented for facilities with any one of the following:

i. aggregate aboveground petroleum storage capacities of 1,320 gallons or more stored in aboveground storage containers, tanks, oil-filled equipment, or

ii. one or more tank(s) in an underground area (TIUGA) with petroleum storage capacities of 55 gallons or greater. More information on TIUGAs can be found here: https://osfm.fire.ca.gov/divisions/pipeline-safety-and-cupa/certified-unified-program-agency-cupa/aboveground-petroleum-storage-act/tank-in-an-underground-area-tiuga/

The SPCC plan must be prepared prior to beginning operations and you must submit facility information to Toxics Management Division (TMD) through the California Environmental Reporting System: http://cers.calepa.ca.gov/. The SPCC plan will be reviewed during the site inspection and shall not be submitted in CERS or to the TMD.

Prior to Issuance of Any Building (Construction) Permit

24. **Final Design Review.** The Project requires approval of a Final Design Review application by the Design Review Committee.

25. **HVAC Noise Reduction.** Prior to the issuance of building permits, the project applicant shall submit plans that show the location, type, and design of proposed heating, ventilation, and cooling (HVAC) equipment. In addition, the applicant shall provide product specification sheets or a report from a qualified acoustical consultant showing that operation of the proposed HVAC equipment will meet the City's exterior noise requirements in BMC Section 13.40.050. The City's Planning and Development Department shall review the submitted plans, including the selected HVAC equipment, to verify compliance with exterior noise standards.

26. **Interior Noise Levels.** Prior to issuance of a building permit, the applicant shall submit a report to the Building and Safety Division and the Zoning Officer by a qualified acoustic engineer certifying that the interior residential portions of the project will achieve interior noise levels of no more than 45 Ldn (Average Day-Night Levels). If the adopted Building Code imposes a more restrictive standard for interior noise levels, the report shall certify compliance with this standard.

27. **Streets and Open Space Improvement Plan.** Street Frontage Improvements. Consistent with the Downtown Streets and Open Space Improvement Plan (SOSIP) (or subsequent iterations as adopted by the City), the developer shall construct improvements along University Avenue to the centerline. Such improvements shall be included with the building permit submittal, designed and constructed as directed by the Public Works Engineering, Public Works Transportation, and Fire Departments, and constructed prior to certificate of occupancy.

28. **Green Building Certification.** The applicant shall submit documentation demonstrating that the building will attain LEED Gold or higher,or attain a building performance equivalent to this rating that has been approved by the Zoning Officer for this project. Documentation shall include proof of payment of the registration/application fee to the organization administering the green building certification system (e.g. USGBC/GBCI for LEED, Build It Green for GreenPoint Rated, etc.), a copy of the updated green building checklist that reflects anticipated points, and a statement from the appropriate project team professional (e.g. LEED Accredited Professional, GreenPoint Rater, etc.) verifying that the project is on track for certification at the required level or above. The submitted green building checklist must be a type that is appropriate for the project and a version that is being accepted by the organization granting the green building certification at the time of building permit application. Whenever applicable, measures from the green building checklist shall be incorporated and noted on site plans.

29. **Solar Photovoltaic (Solar PV) and Battery Energy Storage Systems (ESS).** A solar PV system shall be installed, subject to specific limited exceptions, as specified by the Berkeley Energy Code (BMC Chapter 19.36). Energy storage system (ESS) readiness (new single-family, duplex, and townhouse homes) or ESS installation (new multifamily and most nonresidential buildings) shall be completed as specified by BMC Chapter 19.36. Location of the solar PV system and the ESS, if applicable, shall be noted on the construction plans. (Project required to meet applicable code at time of building permit application, if different from above.)

30. **Electric Vehicle (EV) Charging.** At least 10 percent of the project parking spaces for residential parking shall have installed Level 2 (40 amp) electric vehicle (EV) charging stations~~,~~ and at least 40 percent shall have installed low power Level 2 EV charging receptacles (20 amp), or any more stringent EV charging requirements as specified by the Berkeley Green Code (BMC Chapter 19.37). Required Level 2 charging stations and low power Level 2 EV charging receptacles shall be installed, maintained, and made available for building resident use. EV charging station installations, EV charging receptacles, and EV Capable spaces shall be noted on the construction plans. Public access parking spaces shall provide any applicable mandatory accessibility provisions. (Project required to meet applicable code at time of building permit application, if different from above.)

31. **Water Efficient Landscaping.** Landscaping, totaling 500 square feet of more of new landscaping or 2,500 square feet or more of renovated irrigated area, shall comply with the State's Model Water Efficient Landscape Ordinance (MWELO). MWELO-compliant landscape documentation including a planting, grading, and irrigation plan shall be included in site plans. Water budget calculations are also required for landscapes of 2,500 square feet or more and shall be included in site plans. The reference evapotranspiration rate (ETo) for Berkeley is 41.8.

32. **Recycling and Organics Collection.** Applicant shall provide recycling and organics collection areas for occupants, clearly marked on plans, which comply with the Alameda County Organics Reduction and Recycling Ordinance (2021-02). Contact the Zero Waste Division at RecyclingProgram@berkeleyca.gov.

33. **Public Works ADA.** Plans submitted for building permit shall include replacement of sidewalk, curb, gutter, and other streetscape improvements, as necessary to comply with current City of Berkeley standards for accessibility.

AFFORDABLE HOUSING REQUIREMENTS – RESIDENTIAL PROJECTS

34. **Affordable Housing Compliance Plan.** The final Affordable Housing Compliance Plan ("AHCP") must be certified by the Zoning Officer and the Department of Health, Housing, and Community Services prior to the issuance of Building Permit. Projects that receive approval from the Building Official for multiple phase construction permits must have the final AHCP certified prior to the issuance of the phase one building permit.

Below Market Rate Units., 18 Very-Low Income and 18 Moderate Income Units shall be provided in the project. All affordable units provided pursuant to the Density Bonus section of the permit findings shall be designated as BMR Units. All BMR units are required to comply with the stricter of the State Density Bonus Law (Government Code Section 65915), BMC Section 23.328.030(A) Affordable Housing Requirements and BMC Section 23.326.030 Elimination if Dwelling Units through Demolition. All affordable units provided as replacement units pursuant to Section I.V, Demolition, of the permit findings, shall be designated as BMR Units. Any Extremely Low-Income replacement units provided shall be classified as Very-Low Income units to fulfill State Density Bonus Law.

Affordability Level	Proposed Below Market Rate (BMR) Units Covering All Replacement Requirements		Total BMR units in the project
	State Density Bonus Law (Gov. Code Section 65915)	BMC Chapter 23.328 (Inclusionary Housing)	
Extremely Low-Income (30% AMI)	-	-	-
Very Low-Income (50% AMI)	**18**	**18**	**18**[1]
Low-Income (80% AMI)	-	-	-

[1] These units must satisfy all but not limited to equivalency, size, unit distribution and affordability in perpetuity requirements under the Inclusionary and Demolition Ordinances

Moderate-Income (x%)	**18**	**-**	**18**[2]
Total			**36**

35. **Regulatory Agreement.** If BMR units are provided, the owner shall enter into a Regulatory Agreement that implements Government Code Section 65915 BMC Section 23.328.030, and other provisions for BMR units included in this Use Permit. The Regulatory Agreement may include any terms and affordability standards determined by the City to be necessary to ensure such compliance. The Regulatory Agreement will secure the property's obligation to comply with the requirements for providing BMR units as defined by BMC Chapter 23.328 and State Density Bonus Law (Government Code Section 65915) The applicant shall submit the Regulatory Agreement to the Department of Health, Housing, and Community Services for review and approval. All BMR units are required to comply with the Regulatory Agreement and the BMR Administrative Guidelines. Regulatory Agreements must be executed prior to the issuance of Building Permit, or, in the case of projects that receive approval from the Building Official for multiple phase construction permits, prior to the issuance of the phase one building permit.

36. **Payment of Affordable Housing In-Lieu Fee.** The Affordable Housing In-Lieu Fee shall be paid as required by BMC Section 23.328.030(B) and Resolution 70,698 N.S. The fee for this project is $985,488.55 Any adjustments to the fee and the final fee amount will be determined prior to building permit issuance as part of the Affordable Housing Compliance Plan approval. The In-Lieu Fee shall be paid prior to the issuance of the first Certificate of Occupancy, or if no Certificate of Occupancy is required, prior to the final inspection of the Project. Nothing in these conditions shall be interpreted to prohibit, or to require modification of the Use Permit or Regulatory Agreement to allow, the provision of additional BMR units, or additional affordability, then are required in the foregoing provisions.

[2] These units must be affordable for 55 years and satisfy equivalency requirements per the State Density Bonus law.

Prior to Demolition or Start of Construction:

37. **Construction Meeting.** The applicant shall request of the Zoning Officer an on-site meeting with City staff and key parties involved in the early phases of construction (e.g., applicant, general contractor, foundation subcontractors) to review these conditions and the construction schedule. The general contractor or applicant shall ensure that all subcontractors involved in subsequent phases of construction aware of the conditions of approval.

38. **Transportation Construction Plan.** The applicant and all persons associated with the project are hereby notified that a Transportation Construction Plan (TCP) may be required, particularly for the following activities:

    A. Alterations, closures, or blockages to sidewalks, pedestrian paths or vehicle travel lanes (including bicycle lanes);

    B. Storage of building materials, equipment, dumpsters, debris anywhere in the public ROW;

    C. Provision of exclusive contractor parking on-street; or

    D. Significant truck activity.

    Please contact the Office of Transportation at (510) 981-7010, or 1947 Center Street, and ask to speak to a traffic engineer. In addition to other requirements of the Traffic Engineer, this plan shall include the locations of material and equipment storage, trailers, worker parking, a schedule of site operations that may block traffic, and provisions for traffic control. The TCP shall be stamped and signed by a registered engineer prior to submittal. The TCP shall be consistent with any other requirements of the construction phase. A current copy of this Plan shall be available at all times at the construction site for review by City Staff.

39. **Construction/No Parking Permits.** Contact the Permit Service Center (PSC) at 1947 Center Street or 981-7500 for details on obtaining Construction/No Parking Permits (and associated signs and accompanying dashboard permits). Please note that the Zoning Officer and/or Traffic Engineer may limit off-site parking of construction-related vehicles if necessary to protect the health, safety or convenience of the surrounding neighborhood.

During Construction:

40. **Construction Hours.** Construction activity shall be limited to between the hours of 7:00 AM and 6:00 PM on Monday through Friday, and between 9:00 AM and 4:00 PM on Saturday. No construction-related activity shall occur on Sunday or any Federal Holiday.

41. **Construction Hours- Exceptions.** It is recognized that certain construction activities, such as the placement of concrete, must be performed in a continuous manner and may require an extension of these work hours. Prior to initiating any activity that might require a longer period, the developer must notify the Zoning Officer and request an exception for a finite period of time. If the Zoning Officer approves the request, then two weeks prior to the expanded schedule, the developer shall notify businesses and residents within 500 feet of the project site describing the expanded construction hours. A copy of such notice and methodology for distributing the notice shall be provided in advance to the City for review and approval. The project shall not be allowed more than 15 extended working days.

42. **Project Construction Website.** The applicant shall establish a project construction website with the following information clearly accessible and updated monthly or more frequently as changes warrant.

A. Contact information (i.e. "hotline" phone number, and email address) for the project construction manager

B. Calendar and schedule of daily/weekly/monthly construction activities

C. The final Conditions of Approval, Mitigation Monitoring and Reporting Program, Transportation Construction Plan, Construction Noise Reduction Program, and any other reports or programs related to construction noise, air quality, and traffic.

43. **Public Works - Implement Bay Area Air District (BAAD)-**Recommended Measures during Construction. For all proposed projects, BAAD recommends implementing all the Basic Construction Mitigation Measures, listed below to meet the best management practices threshold for fugitive dust:

A. All exposed surfaces (e.g., parking areas, staging areas, soil piles, graded areas, and unpaved access roads) shall be watered two times per day.

B. All haul trucks transporting soil, sand, or other loose material off-site shall be covered.

C. All visible mud or dirt track-out onto adjacent public roads shall be removed using wet power vacuum street sweepers at least once per day. The use of dry power sweeping is prohibited.

D. All vehicle speeds on unpaved roads shall be limited to 15 mph.

E. All roadways, driveways, and sidewalks to be paved shall be completed as soon as possible. Building pads shall be laid as soon as possible after grading unless seeding or soil binders are used.

F. Idling times shall be minimized either by shutting equipment off when not in use or reducing the maximum idling time to 5 minutes (as required by the California airborne toxics control measure Title 13, Section 2485 of California Code of Regulations [CCR]). Clear signage shall be provided for construction workers at all access points.

G. All construction equipment shall be maintained and properly tuned in accordance with manufacturer specifications. All equipment shall be checked by a certified visible emissions evaluator.

H. Post a publicly visible sign with the telephone number and person to contact at the lead agency regarding dust complaints. This person shall respond and take corrective action within 48 hours. The Air District's phone number shall also be visible to ensure compliance with applicable regulations.

44. **Air Quality - Diesel Particulate Matter Controls during Construction.** All off-road construction equipment used for projects with construction lasting more than 2 months shall comply with one of the following measures:

A. The project applicant shall prepare a health risk assessment that demonstrates the project's on-site emissions of diesel particulate matter during construction will not exceed health risk screening criteria after a screening-level health risk assessment is conducted in accordance with current guidance from BAAD and OEHHA. The health risk assessment shall be submitted to the Land Use Planning Division for review and approval prior to the issuance of building permits; or

B. All construction equipment shall be equipped with Tier 2 or higher engines and the most effective Verified Diesel Emission Control Strategies (VDECS) available for the engine type (Tier 4 engines automatically meet this requirement) as certified by the California Air Resources Board (CARB). The equipment shall be properly maintained and tuned in accordance with manufacturer specifications.

C. In addition, a Construction Emissions Minimization Plan (Emissions Plan) shall be prepared that includes the following:

i. An equipment inventory summarizing the type of off-road equipment required for each phase of construction, including the equipment manufacturer, equipment identification number, engine model year, engine certification (tier rating), horsepower, and engine serial number. For all VDECS, the equipment inventory shall also include the technology type, serial number, make, model, manufacturer, CARB verification number level, and installation date.

ii. A Certification Statement that the Contractor agrees to comply fully with the Emissions Plan and acknowledges that a significant violation of the Emissions Plan shall constitute a material breach of contract. The Emissions Plan shall be submitted to the Public Works Department for review and approval prior to the issuance of building permits.

45. **Construction and Demolition Diversion.** Divert debris according to your plan and collect required documentation. Get construction debris receipts from sorting facilities in order to verify diversion requirements. Upload recycling and disposal receipts if using Green Halo and submit online for City review and approval prior to final inspection. Alternatively, complete the Construction Waste Management Plan and present it, along with your construction debris receipts, to the Building Inspector by the final inspection to demonstrate diversion rate compliance. The Zoning Officer may request summary reports at more frequent intervals, as necessary to ensure compliance with this requirement.

46. **Low-Carbon Concrete.** The project shall maintain compliance with the Berkeley Green Code (BMC Chapter 19.37) including use of concrete mix design with a cement reduction of at least 25 percent. Documentation on concrete mix design shall be available at all times at the construction site for review by City Staff. (Project required to meet applicable code at time of building permit application, if different from above.)

47. **Avoid Disturbance of Nesting Birds.** Initial site disturbance activities, including vegetation and concrete removal, shall be prohibited during the general avian nesting season (February 1 to August 30), if feasible. If nesting season avoidance is not feasible, the applicant shall retain a qualified biologist to conduct a preconstruction nesting bird survey to determine the presence/absence, location, and activity status of any active nests on or adjacent to the project site. The extent of the survey buffer area surrounding the site shall be established by the qualified biologist to ensure that direct and indirect effects to nesting birds are avoided. To avoid the destruction of active nests and to protect the reproductive success of birds protected by the MBTA and CFGC, nesting bird surveys shall be performed not more than 14 days prior to scheduled vegetation and concrete removal. In the event that active nests are discovered, a suitable buffer (typically a minimum buffer of 50 feet for passerines and a minimum buffer of 250 feet for raptors) shall be established around such active nests and no construction shall be allowed inside the buffer areas until a qualified biologist has determined that the nest is no longer active (e.g., the nestlings have fledged and are no longer reliant on the nest). No ground-disturbing activities shall occur within this buffer until the qualified biologist has confirmed that breeding/nesting is completed and the young have fledged the nest. Nesting bird surveys are not required for construction activities occurring between August 31 and January 31.

48. **Archaeological Resources (*Ongoing throughout demolition, grading, and/or construction*).** Pursuant to CEQA Guidelines section 15064.5(f), "provisions for historical or unique archaeological resources accidentally discovered during construction" should be instituted. Therefore:

A. In the event that any prehistoric or historic subsurface cultural resources are discovered during ground disturbing activities, all work within 50 feet of the resources shall be halted and the project applicant and/or lead agency shall consult with a qualified archaeologist, historian or paleontologist to assess the significance of the find.

B. If any find is determined to be significant, representatives of the project proponent and/or lead agency and the qualified professional would meet to determine the appropriate avoidance measures or other appropriate measure, with the ultimate determination to be made by the City of Berkeley. All significant cultural materials recovered shall be subject to scientific analysis, professional museum curation, and/or a report prepared by the qualified professional according to current professional standards.

C. In considering any suggested measure proposed by the qualified professional, the project applicant shall determine whether avoidance is necessary or feasible in light of factors such as the uniqueness of the find, project design, costs, and other considerations.

D. If avoidance is unnecessary or infeasible, other appropriate measures (e.g., data recovery) shall be instituted. Work may proceed on other parts of the project site while mitigation measures for cultural resources is carried out.

E. If significant materials are recovered, the qualified professional shall prepare a report on the findings for submittal to the Northwest Information Center.

49. **Human Remains (*Ongoing throughout demolition, grading, and/or construction*).** In the event that human skeletal remains are uncovered at the project site during ground-disturbing activities, all work shall immediately halt and the Alameda County Coroner shall be contacted to evaluate the remains, and following the procedures and protocols pursuant to Section 15064.5 (e)(1) of the CEQA Guidelines. If the County Coroner determines that the remains are Native American, the City shall contact the California Native American Heritage Commission (NAHC), pursuant to subdivision (c) of Section 7050.5 of the Health and Safety Code, and all excavation and site preparation activities shall cease within a 50-foot radius of the find until appropriate arrangements are made. If the agencies determine that avoidance is not feasible, then an alternative plan shall be prepared with specific steps and timeframe required to resume construction activities. Monitoring, data recovery, determination of significance and avoidance measures (if applicable) shall be completed expeditiously.

50. **Paleontological Resources (*Ongoing throughout demolition, grading, and/or construction*).** In the event of an unanticipated discovery of a paleontological resource during construction, excavations within 50 feet of the find shall be temporarily halted or diverted until the discovery is examined by a qualified paleontologist (per Society of Vertebrate Paleontology standards [SVP 1995,1996]). The qualified paleontologist shall document the discovery as needed, evaluate the potential resource, and assess the significance of the find. The paleontologist shall notify the appropriate agencies to determine procedures that would be followed before construction is allowed to resume at the location of the find. If the City determines that avoidance is not feasible, the paleontologist shall prepare an excavation plan for mitigating the effect of the project on the qualities that make the resource important, and such plan shall be implemented. The plan shall be submitted to the City for review and approval.

51. **Archeological Resources (*Ongoing throughout demolition, grading, and/or construction*).**

A. *Qualified Archeologist.* The project applicant shall retain a qualified archeologist prior to excavations or ground disturbance that will exceed three feet in depth. The Qualified Paleontologist shall direct all mitigation measures related to paleontological resources. A qualified professional archeologist is defined by the SVP standards as an individual preferably with an M.S. or Ph.D. in paleontology or geology who is experienced with paleontological procedures and techniques, who is knowledgeable in the geology of California, and who has worked as a paleontological mitigation project supervisor for a least two years (SVP 2010).

B. *Worker Environmental Awareness Program (WEAP).* Prior to ground disturbance, the applicant shall incorporate information on archeological resources into the Project's Worker Environmental Awareness Training (WEAP) materials, or a stand-alone Archeological Resources WEAP shall be submitted to the Department of Planning and Development at the City of Berkeley. The qualified paleontologist or his or her designee shall conduct training for construction personnel regarding the appearance of fossils and the procedures for notifying archeological staff should fossils be discovered by construction staff. The Archeological WEAP training shall be fulfilled simultaneously with the overall WEAP training, or at the first preconstruction meeting at which a qualified archeologist attends prior to ground disturbance. Printed literature (handouts) shall accompany the initial training.

Following the initial WEAP training, all new workers and contractors must be trained prior to conducting ground disturbance work.

C. *Archeological Monitoring.* The extent of required archeological monitoring for the project shall be determined by the qualified archeologist based on an evaluation of the previously undisturbed geologic units exposed during ground disturbing activity. The Qualified Archeologist shall conduct and initial spot check and evaluation of geologic conditions for ground disturbing activity for excavations between 5-10 feet below ground surface (BGS). The evaluation shall be based on field evidence including lithology of geologic units and results of micro-screening or other inspections for fossil resources. If the archeologist determines that geologic units exposed between 5-10 feet BGS have high archeological sensitivity, then full-time monitoring shall be conducted for the duration of ground disturbing activity. If sediments between 5-10 feet BGS are determined to not be archeological sensitive, spot checks should be conducted again for ground disturbance between 10-15 feet BGS and again for ground disturbance between 15-20 feet BGS, and again to the full depth of ground disturbance. If spot checks indicate low or no archeological sensitivity, or if full time monitoring results in no fossil discoveries once the full depth of ground disturbance has been reached, archeological monitoring can be discontinued for the remainder of project activity. Monitoring shall be reinstated if any new ground disturbances are required to depths exceeding previous depths of previous work, and reduction or suspension shall be reconsidered by the Qualified Archeologist at that time.

D. In the event of a fossil discovery by the archeological monitor or construction personnel, all work in the immediate vicinity of the find shall cease. A Qualified Archeologist shall evaluate the find before restarting construction activity in the area. If it is determined that the fossil(s) is (are) scientifically significant, the Qualified Archeologist shall complete the following conditions to mitigate impacts to significant fossil resources:

   1) *Salvage of Fossils.* If fossils are discovered, the archeological monitor shall have the authority to halt or temporarily divert construction equipment within 50 feet of the find until the monitor and/or lead archeologist evaluate the discovery and determine if the fossil may be considered significant. Typically, fossils can be safely salvaged quickly by a single archeologist and not disrupt construction activity. In some cases, larger fossils (such as complete skeletons or large mammal fossils) require more extensive excavation and longer salvage periods. In this case, the Construction Contractor may be requested to supply heavy equipment and an operator to assist in the rapid removal of a large fossil specimen(s) or sediment sample(s). Bulk matrix sampling may be necessary to recover small invertebrates or micro-vertebrates from within archeologically- sensitive Quaternary alluvial deposits.

   2) *Preparation and Curation of Recovered Fossils.* Once salvaged, significant fossils shall be identified to the lowest possible taxonomic level, prepared to a curation-ready condition, and curated in a scientific institution with a permanent archeological collection (such as the UCMP), along with all pertinent field notes, photos, data, and maps. Fossils of undetermined significance at the time of collection may also warrant curation at the discretion of the Qualified Archeologist.

E. *Final Archeological Mitigation Report.* Upon completion of ground disturbing activity (and curation of fossils if necessary) the Qualified Archeologist shall prepare a final report describing the results of the archeological monitoring efforts associated with the project. The

report shall include a summary of the field and laboratory methods, an overview of the project geology and paleontology, a list of taxa recovered (if any), an analysis of fossils recovered (if any) and their scientific significance, and recommendations. The report shall be submitted to the Department of Planning and Development at the City of Berkeley. If the monitoring efforts produced fossils, then a copy of the report shall also be submitted to the designated museum repository.

52. **Halt Work/Unanticipated Discovery of Tribal Cultural Resources.** In the event that cultural resources of Native American origin are identified during construction, all work within 50 feet of the discovery shall be redirected. The project applicant and project construction contractor shall notify the City Planning Department within 24 hours. The City will again contact any tribes who have requested consultation under AB 52, as well as contact a qualified archaeologist, to evaluate the resources and situation and provide recommendations. If it is determined that the resource is a tribal cultural resource and thus significant under CEQA, a mitigation plan shall be prepared and implemented in accordance with State guidelines and in consultation with Native American groups. If the resource cannot be avoided, additional measures to avoid or reduce impacts to the resource and to address tribal concerns may be required.

53. **Stormwater Requirements.** The applicant shall demonstrate compliance with the requirements of the City's National Pollution Discharge Elimination System (NPDES) permit as described in BMC Section 17.20. The following conditions apply:

A. The project plans shall identify and show site-specific Best Management Practices (BMPs) appropriate to activities conducted on-site to limit to the maximum extent practicable the discharge of pollutants to the City's storm drainage system, regardless of season or weather conditions.

B. Trash enclosures and/or recycling area(s) shall be covered; no other area shall drain onto this area. Drains in any wash or process area shall not discharge to the storm drain system; these drains should connect to the sanitary sewer. Applicant shall contact the City of Berkeley and EBMUD for specific connection and discharge requirements. Discharges to the sanitary sewer are subject to the review, approval and conditions of the City of Berkeley and EBMUD.

C. Landscaping shall be designed with efficient irrigation to reduce runoff, promote surface infiltration and minimize the use of fertilizers and pesticides that contribute to stormwater pollution. Where feasible, landscaping should be designed and operated to treat runoff. When and where possible, xeriscape and drought tolerant plants shall be incorporated into new development plans.

D. Design, location and maintenance requirements and schedules for any stormwater quality treatment structural controls shall be submitted to the Department of Public Works for review with respect to reasonable adequacy of the controls. The review does not relieve the property owner of the responsibility for complying with BMC Chapter 17.20 and future revisions to the City's overall stormwater quality ordinances. This review shall be shall be conducted prior to the issuance of a Building Permit.

E. All paved outdoor storage areas must be designed to reduce/limit the potential for runoff to contact pollutants.

F. All on-site storm drain inlets/catch basins must be cleaned at least once a year immediately prior to the rainy season. The property owner shall be responsible for all costs associated with proper operation and maintenance of all storm drainage facilities (pipelines, inlets, catch basins, outlets, etc.) associated with the project, unless the City accepts such facilities by Council action. Additional cleaning may be required by City of Berkeley Public Works Engineering Dept.

G. All private or public projects that create and/or replace 5,000 square feet or more of impervious surface must comply with Provision C.3 of the Alameda County NPDES permit and must incorporate stormwater controls to enhance water quality. Permit submittals shall include a Stormwater Requirement Checklist and detailed information showing how the proposed project will meet Provision C.3 stormwater requirements, including a) Site design measures to reduce impervious surfaces, promote infiltration, and reduce water quality impacts; b) Source Control Measures to keep pollutants out of stormwater runoff; c) Stormwater treatment measures that are hydraulically sized to remove pollutants from stormwater; d) an O & M (Operations and Maintenance) agreement for all stormwater treatment devices and installations; and e) Engineering calculations for all stormwater devices (both mechanical and biological). (Project required to meet applicable code at time of building permit application, if different from above.)

H. All on-site storm drain inlets must be labeled “No Dumping – Drains to Bay” or equivalent using methods approved by the City.

I. Most washing and/or steam cleaning must be done at an appropriately equipped facility that drains to the sanitary sewer. Any outdoor washing or pressure washing must be managed in such a way that there is no discharge or soaps or other pollutants to the storm drain. Sanitary connections are subject to the review, approval and conditions of the sanitary district with jurisdiction for receiving the discharge.

J. All loading areas must be designated to minimize “run-on” or runoff from the area. Accumulated waste water that may contribute to the pollution of stormwater must be drained to the sanitary sewer or intercepted and pretreated prior to discharge to the storm drain system. The property owner shall ensure that BMPs are implemented to prevent potential stormwater pollution. These BMPs shall include, but are not limited to, a regular program of sweeping, litter control and spill cleanup.

K. Sidewalks and parking lots shall be swept regularly to prevent the accumulation of litter and debris. If pressure washed, debris must be trapped and collected to prevent entry to the storm drain system. If any cleaning agent or degreaser is used, wash water shall not discharge to the storm drains; wash waters should be collected and discharged to the sanitary sewer. Discharges to the sanitary sewer are subject to the review, approval and conditions of the sanitary district with jurisdiction for receiving the discharge.

L. The applicant is responsible for ensuring that all contractors and sub-contractors are aware of and implement all stormwater quality control measures. Failure to comply with the approved construction BMPs shall result in the issuance of correction notices, citations, or a project stop work order.

54. **Public Works.** Subject to approval of the Public Works Department, the applicant shall repair any damage to public streets and/or sidewalks by construction vehicles traveling to or from the project site.
55. **Public Works.** All piles of debris, soil, sand, or other loose materials shall be covered at night and during rainy weather with plastic at least one-eighth millimeter thick and secured to the ground.
56. **Public Works.** The applicant shall ensure that all excavation accounts for surface and subsurface waters and underground streams so as not to adversely affect adjacent properties and rights-of-way.
57. **Public Works.** The project sponsor shall maintain sandbags or other devices around the site perimeter during the rainy season to prevent on-site soils from being washed off-site and into the storm drain system. The project sponsor shall comply with all City ordinances regarding construction and grading.
58. **Public Works.** Prior to any excavation, grading, clearing, or other activities involving soil disturbance during the rainy season the applicant shall obtain approval of an erosion prevention plan by the Building and Safety Division and the Public Works Department. The applicant shall be responsible for following these and any other measures required by the Building and Safety Division and the Public Works Department.
59. **Public Works.** The removal or obstruction of any fire hydrant shall require the submission of a plan to the City's Public Works Department for the relocation of the fire hydrant during construction.
60. **Public Works / Building and Safety.** If underground utilities leading to adjacent properties are uncovered and/or broken, the contractor involved shall immediately notify the Public Works Department and the Building & Safety Division, and carry out any necessary corrective action to their satisfaction.

Prior to Final Inspection or Issuance of Occupancy Permit:

61. **Compliance with Conditions and Environmental Mitigations.** The project shall conform to the plans and statements in the Use Permit. The developer is responsible for providing sufficient evidence to demonstrate compliance with the requirements throughout the implementation of this Use Permit. Occupancy is subject to verification of compliance to the Mitigation Monitoring and Reporting Program.
62. All landscape, site and architectural improvements shall be completed per the attached approved drawings dated October 2, 2025.
63. **Percent for Public Art.** Consistent with BMC Section 23.316, the applicant shall either pay the required in-lieu fee or provide the equivalent amount in a financial guarantee to be released after installation of the On-Site Publicly Accessible Art.

64. **Streets and Open Space Improvement Plan.** Impact Fee: As required by BMC Section 23.204.130(F), the project shall pay an impact fee to implement the Streets and Open Space Improvement Plan (SOSIP) per the fee schedule adopted by the Council by resolution. The City shall deposit this payment into the Downtown Streets and Open Space Improvement Fund (SOSIF), or its equivalent, to pay for the design and construction of the SOSIP Major Projects. The fee shall apply to the project's "Gross Floor Area" as defined in BMC Section 23.106.030, less any existing Gross Floor Area removed as part of the project.

    At the City's discretion, the City Manager or her designee may reduce the required SOSIP Impact Fee, on a $1 to $1 ratio, as a credit for constructing all or a portion of a Major SOSIP Improvement Project beyond the frontage improvements already required by this Permit. The first half of this fee shall be paid prior to issuance of a building permit, and the second half shall be paid prior to issuance of a certificate of occupancy.

65. **Transportation Demand Management.** Prior to issuance of a Certificate of Occupancy, the property owner shall facilitate a site inspection by Land Use Division staff to confirm that the physical improvements required in BMC Section 23.322.060 have been installed. A Parking and Transportation Demand Management (PTDM) compliance report documenting that the programmatic measures required in BMC Section 23.322.060 are implemented shall be submitted to the Land Use Division prior to occupancy, and on an annual basis thereafter, which demonstrates that the project is compliant with the applicable requirements in this section:

A. New construction that results in an off-street total of more than 25 publicly available parking spaces shall install dynamic signage to Transportation Division specifications, including real-time garage occupancy signs at the entries and exits to the parking facility with vehicle detection capabilities and enabled for future connection to the regional 511 Travel Information System; or equivalent, as determined by the Land Use Division in consultation with the Transportation Division. The information panels shall be shown in the construction drawings and shall be installed prior to occupancy.

B. For any new building with residential units or structures converted to a residential use, required parking spaces shall be leased or sold separate from the rental or purchase of dwelling units for the life of the dwelling units. The property owner shall notify all residents of this restriction in leases and/or contracts, and shall provide sample leases and/or contracts including such notification to the project planner prior to issuance of Certificate of Occupancy or final inspection.

C. the property owner shall provide transportation benefits at no cost to every employee, residential unit, and/or group living accommodation resident, one pass for unlimited local bus transit service; or (subject to the review and approval of the Zoning Officer in consultation with the Transportation Division) a functionally equivalent transit benefit in an amount at least equal to the price of a non-discounted adult monthly local bus pass. A notice describing these transportation benefits shall be posted in a location or locations visible to all employee and residents.

D. For residential structures constructed or converted from a non-residential use that provide off-street parking, vehicle sharing spaces shall be provided in the amounts shown in BMC Table 23.322-6, to be offered to vehicle sharing service providers at no cost, for as long as providers request the spaces, and otherwise consistent with BMC Section 23.322.060(D).

66. "(23.322.060 CDMU Only)" Car Sharing Spaces. At least ___1____car share spaces shall be provided within the parking garage for the life of the building. In addition, these car share spaces are subject to the following requirements:

A. At least 90 days prior to issuance of a certificate of occupancy, the property owner shall do one of the following if necessary to ensure that car share spaces are provided at this site: 1) purchase 2 cars for the use of a vehicle sharing service provider, or VSSP (e.g., City CarShare or Zipcar), or 2) provide a monthly subsidy to offset the costs to a VSSP to provide for the management of the cars at this site.

B. Prior to issuance of a certificate of occupancy, the property owner shall provide one of the following: 1) a signed agreement with a VSSP to manage shared vehicles at the site, or 2) a plan to provide on-site management. If the vehicle sharing spaces are managed by a VSSP, these spaces shall be accessible to all VSSP members in the same manner and during the same hours as other vehicles offered by the VSSP.

67. Green Building Certification. The applicant shall submit updated documentation demonstrating that the building will attain LEED Gold or higher, or attain a building performance equivalent to this rating that has been approved by the Zoning Officer for this project. Documentation expected at this stage includes proof of submission of the final application materials and payment of the certification fee. If this submission has not yet occurred, a detailed explanation and timeline indicating when it will it happen must be submitted to the Zoning Officer for review and approval. Once awarded by the organization administering the green building certification system, the applicant shall forward a copy of the certification award to the Zoning Officer.

At All Times:

68. Compliance with Approved Plan. The project shall conform to the plans and statements in the Use Permit.

69. Exterior Lighting. All exterior lighting shall be energy efficient where feasible; and shielded and directed downward and away from property lines to prevent excessive glare beyond the subject property.

70. Rooftop Projections. No additional rooftop or elevator equipment shall be added to exceed the approved maximum roof height without submission of an application for a Use Permit Modification, subject to Board review and approval.

71. Design Review. Signage and any other exterior modifications, including but not limited to landscaping and lighting, shall be subject to Design Review approval.

72. Drainage Patterns. The applicant shall establish and maintain drainage patterns that do not adversely affect adjacent properties and rights-of-way. Drainage plans shall be submitted for approval of the Building & Safety Division and Public Works Department, if required.

73. Electrical Meter. Only one electrical meter fixture may be installed per dwelling unit.

74. **Loading.** All loading/unloading activities associated with deliveries to all uses shall be restricted to the hours of 7:00 a.m. to 10:00 p.m. daily.

75. **Residential Permit Parking.** No Residential Permit Parking (RPP) permits shall be issued to project residents, nor shall commercial placards be issued to non-residential occupants and/or users of the site. The Finance Department, Customer Service Center shall add these addresses to the list of addresses ineligible for RPP permits. The property owner shall notify all tenants of rental units, and/or buyers of condominium units, of this restriction in leases and/or contracts.

76. **Parking to be Leased or Sold Separately.** All residential parking spaces shall be leased or sold separate from the rental or purchase of dwelling units.

77. **Required Bike Parking.** Secure and on-site bike parking for at least 167 Long-term bicycles shall be provided for the life of the building.

78. **Residential Electric Vehicle (EV) Charging.** Required Level 2 charging stations and low power Level 2 EV charging receptacles, as specified by the Berkeley Green Code (BMC Chapter 19.37) shall be maintained in good working condition and made available for building resident use. (Project required to meet applicable code at time of building permit application, if different from above.)

79. **Tenant Notification.** The developer shall provide tenant notification, via a lease rider or deed covenant, that each dwelling unit is located in a mixed-use area that includes commercial, food service, and entertainment uses, and that each occupant shall not seek to impede their lawful operation.

PROJECT DESCRIPTION

PROJECT ADDRESS: 2029 University Ave. Berkeley, CA 94704 (APN: 57-2053-8-1)

SCOPE OF WORK:

THIS IS A ZONING APPLICATION FOR A HOUSING DEVELOPMENT, WHICH VESTS RIGHTS UNDER ZONING APPLICABLE AS OF THE SUBMITTAL DATE PER CALIFORNIA GOVERNMENT CODE SECTION 65941.1. THE PROJECT IS THE CONSTRUCTION OF A NEW 23-STORY (256'-0"), 240-UNIT HOUSING DEVELOPMENT WITH 190,830 SF OF NEW RESIDENTIAL USE AND PARKING GARAGE FOR UP TO 29 SPACES. THE PROJECT INCLUDES REMOVAL OF EXISTING NON-LANDMARKED 2-STORY COMMERCIAL STRUCTURE AND SURFACE PARKING. 15% (18 UNITS) OF THE BASE UNITS WILL BE AFFORDABLE TO VERY-LOW-INCOME HOUSEHOLDS, AND 15% (18 UNITS) OF THE BASE UNITS WILL BE AFFORDABLE TO MODERATE INCOME HOUSEHOLDS, MAKING THE PROJECT ELIGIBLE FOR A 100% DENSITY BONUS, WAIVERS, AND UP TO 3 CONCESSIONS AS A STATE DENSITY BONUS LAW DEVELOPMENT PER CALIFORNIA GOVERNMENT CODE § 65915.

THE PROPOSED PROJECT WILL COMPLY WITH THE BERKELEY ENERGY CODE (BMC CHAPTER 19.36) AND THE BERKELEY GREEN CODE (BMC CHAPTER 19.37), INCLUDING PROVIDING A SOLAR PV SYSTEM, BATTERY ENERGY STORAGE, ELECTRIC VEHICLE CHARGING, AND LOW-CARBON CONCRETE REQUIREMENTS

ZONING CODE SUMMARY

(BASED ON THE BERKELEY MUNICIPAL ZONING CODE)

BENCHMARK

THE ELEVATIONS SHOWN HEREON ARE BASED UPON THE VERTICAL DATUM OF 1988 AND WERE ESTABLISHED USING LEICA RTK NETWORK SMARTNET.

A TEMPORARY/SITE BENCHMARK IS SHOWN HEREON.

BASIS OF BEARINGS

THE COORDINATES SHOWN HEREON ARE BASED ON THE COORDINATE SYSTEM OF 1983, CCS83, ZONE 3, USING LEICA RTK NETWORK SMARTNET.

TOPOGRAPHIC NOTES

UNAUTHORIZED CHANGES & USES: THE PROFESSIONAL PREPARING THIS MAP WILL NOT BE RESPONSIBLE FOR, OR LIABLE FOR, UNAUTHORIZED CHANGES TO OR USES OF THIS MAP. CHANGES TO THIS MAP MUST BE REQUESTED IN WRITING AND MUST BE APPROVED BY THE PROFESSIONAL.

THE LOCATIONS OF EXISTING UNDERGROUND FACILITIES SHOWN ON THESE DRAWINGS ARE APPROXIMATE AND ARE BASED ON OBSERVED TOPOGRAPHIC SURFACE FEATURES AND AVAILABLE INFORMATION. THE PROFESSIONAL PREPARING THIS MAP ASSUMES NO RESPONSIBILITY FOR THE ACCURACY OF THESE FACILITIES OR FOR THE INADVERTENT OMISSION OF RELATED INFORMATION.

TOPOGRAPHIC INFORMATION SHOWN HEREON WAS OBTAINED FROM GROUND SURVEY CONDUCTED ON SEPTEMBER AND OCTOBER, 2023

TREE DIAMETERS ARE MEASURED AT CHEST HEIGHT (48").

SURVEYOR'S STATEMENT

THIS TOPOGRAPHIC SURVEY MAP WAS PREPARED BY ME OR UNDER MY DIRECTION.

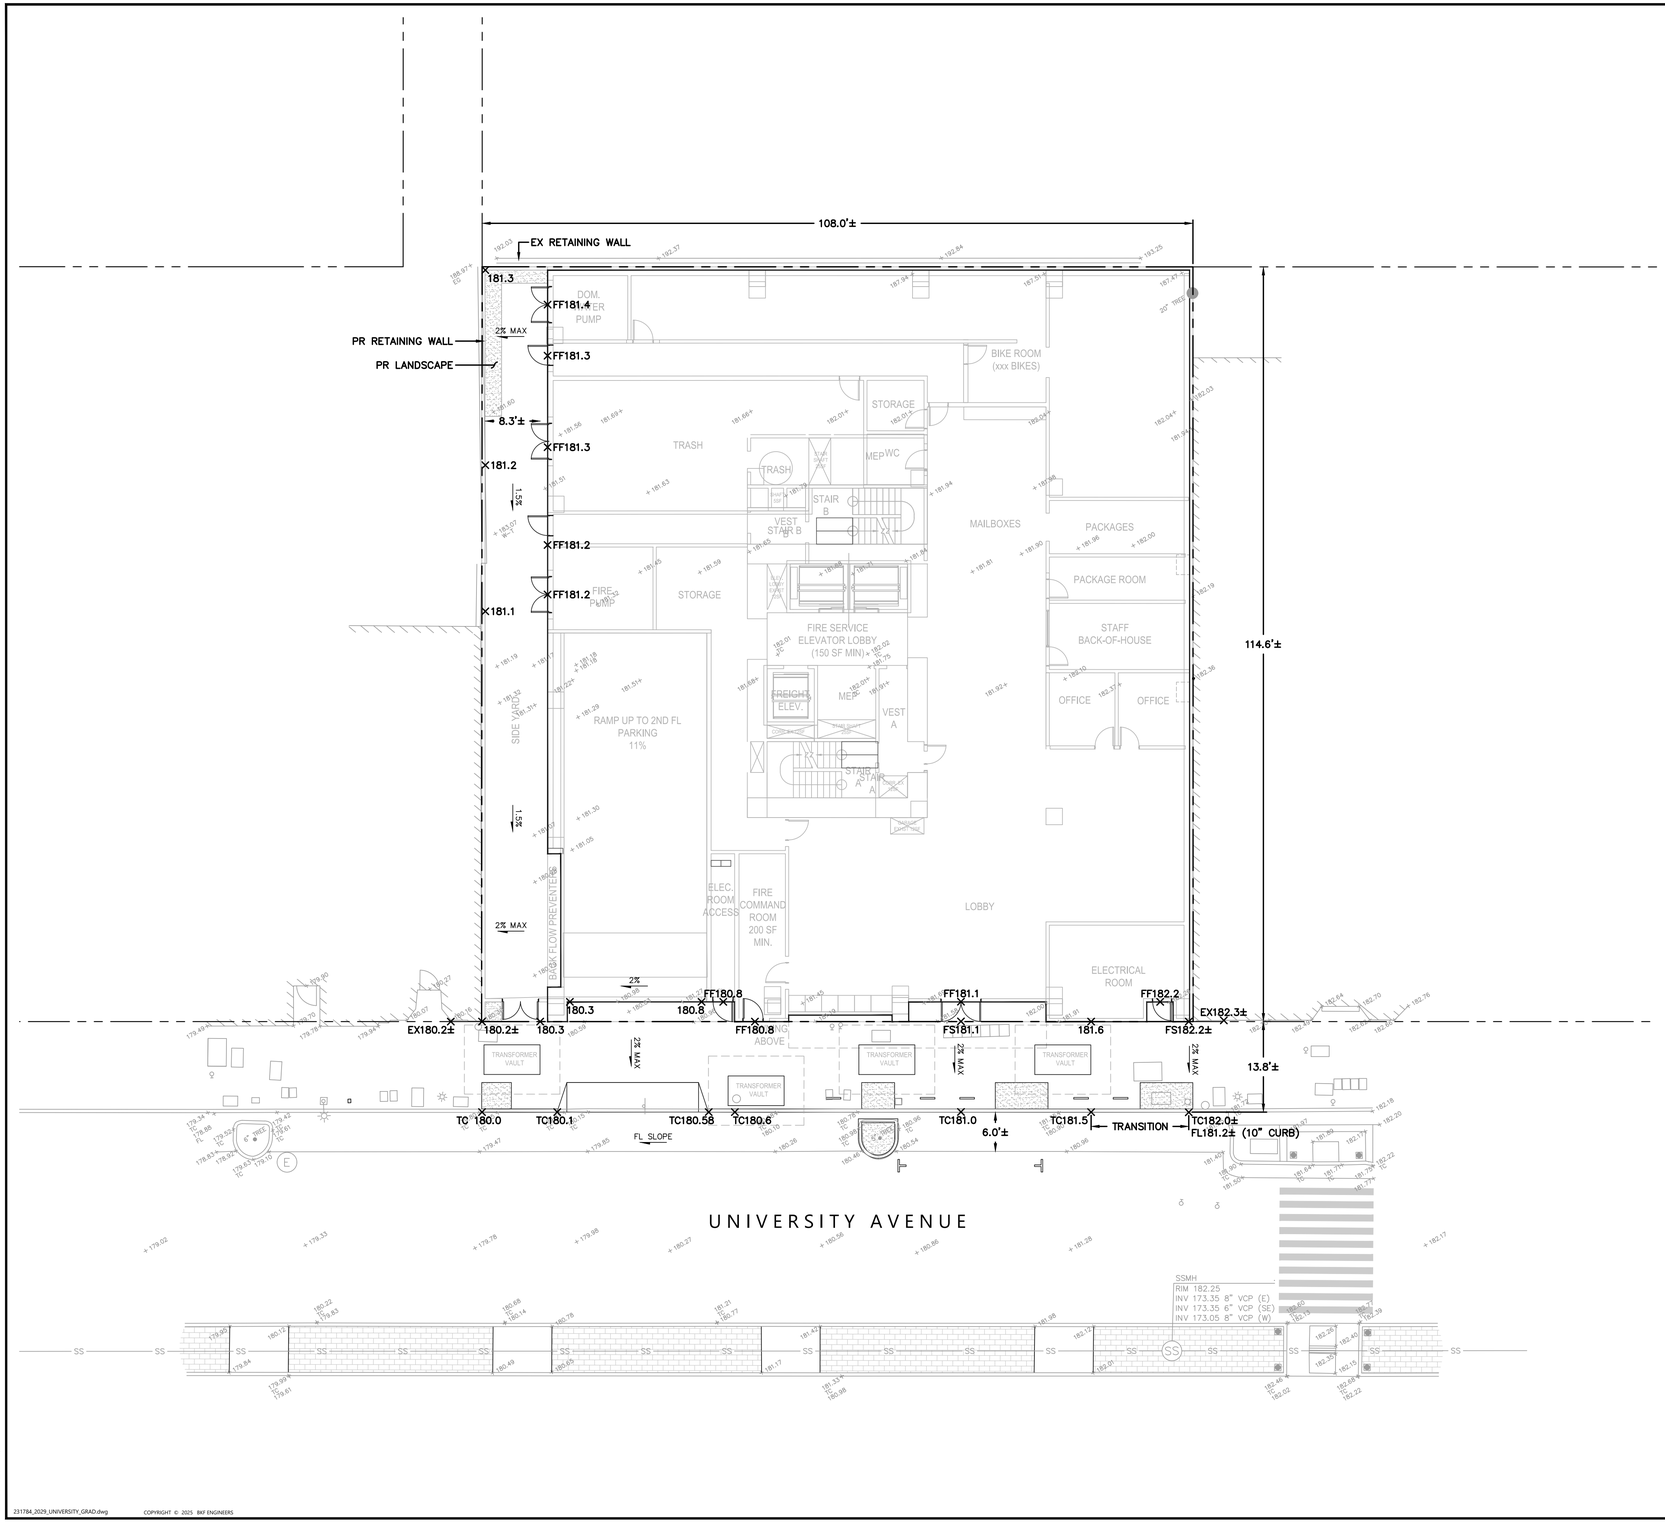
SECTIONS

A4.1



GENERAL NOTES

1. UTILITIES AND UNDERGROUND FACILITIES INDICATED ARE FOR INFORMATION ONLY. IT IS THE CONTRACTOR'S RESPONSIBILITY TO VERIFY THE LOCATION AND DEPTH WITH APPROPRIATE AGENCIES. NEITHER THE OWNER NOR THE CITY NOR THE DESIGN PROFESSIONAL ASSUMES RESPONSIBILITY THAT THE UTILITIES AND UNDERGROUND FACILITIES INDICATED WILL BE THE UTILITIES AND UNDERGROUND FACILITIES ENCOUNTERED.
2. BOUNDARY INFORMATION SHOWN ACCORDING TO A FIELD SURVEY PERFORMED BY BKF ENGINEERS ON JULY 26, 2024.
3. BASIS OF BEARINGS: THE BEARING OF N05°35'30"W BETWEEN FOUND CITY OF BERKELEY MONUMENTS ON SHATTUCK AVENUE AT THE INTERSECTIONS OF UNIVERSITY AVENUE AND ADDISON STREET AS SHOWN ON PARCEL MAP 6772 FILED ON JANUARY 18, 1995, IN BOOK 216 PAGE 41, WAS TAKEN AS THE BASIS OF BEARINGS OF THIS SURVEY.
4. BENCHMARK: THE ELEVATIONS SHOWN HEREON ARE BASED ON A FOUND CITY OF BERKELEY BENCHMARK, MONUMENT B0490, A 2" CITY OF BERKELEY BRASS DISK WITH PUNCH IN A MONUMENT WELL. ELEVATION 187.09 FEET (DATUM = CITY OF BERKELEY).
5. FIELD SURVEY DATE: JULY 24, 2024 BY BKF ENGINEERS
6. ALL GRADING SHALL BE PREFORMED IN SUCH A MANOR AS TO COMPLY WITH THE STANDARDS ESTABLISHED BY THE AIR QUALITY MAINTENANCE DISTRICT FOR AIRBORNE PARTICULATES (DUST).
7. ALL THE GRADING SHALL CONFORM TO APPROVED SPECIFICATIONS PRESENTED HEREON OR ATTACHED HERETO. ALL GRADING WORK SHALL BE OBSERVED AND APPROVED BY THE GEOTECHNICAL ENGINEER. THE GEOTECHNICAL ENGINEER SHALL BE NOTIFIED AT LEAST 48 HOURS BEFORE BEGINNING ANY GRADING. UNOBSERVED AND UNAPPROVED GRADING WORK SHALL BE REMOVED AND REDONE AT THE CONTRACTORS EXPENSE.

NATIVE SCREENING SHRUBS

SHRUBS

GROUNDCOVER

DENOTES POLLINATOR PLANT SPECIES

GENERAL PLANTING AND IRRIGATION NOTES

1. LANDSCAPE AND IRRIGATION PLANS SHALL COMPLY WITH THE CRITERIA OF THE CALIFORNIA MODEL WATER EFFICIENCY ORDINANCE AND APPLY THOSE CRITERIA FOR THE EFFICIENT USE OF WATER IN THE LANDSCAPE DESIGN PLAN.

2. LANDSCAPE AND IRRIGATION PLANS SHALL COMPLY WITH ALL APPLICABLE CITY CODES AND ORDINANCES.

3. ALL PLANTING AREAS SHALL BE TOP-DRESSED WITH A 3" LAYER OF ORGANIC, UN- DYED MULCH RECYCLED FROM LOCAL ORGANIC MATERIALS SUCH AS TREE TRIMMINGS, PLANT, OR CLEAN WOOD WASTE. COMPOST APPLICATION TO ACHIEVE A MINIMUM OF 6% ORGANIC MATTER IN SOIL COMPOSITION BASED ON MWELO SPECIFIED SOIL ANALYSIS RESULS FOR THE SITE SOIL PER [CGBSC 4.304].

4. 50% OF ALL SHRUBS AND GROUNDCOVER SHALL BE A MINIMUM OF 5-GALLON SIZE OR LARGER.

5. IRRIGATION SYSTEM IS TO BE A FULLY AUTOMATIC WEATHER-BASED SYSTEM USING LOW FLOW DRIP AND BUBBLER SYSTEM.

6. STREET TREES SHALL BE TIED INTO IRRIGATION SYSTEM.

7. 58% OF ALL PLANTS PROPOSED ARE NATIVE AND WILD-LIFE SUPPORTING.

8. PLANT SELECTION AND DESIGN TO COMPLY WITH BAY-AREA FRIENDLY BASICS LANDSCAPE CHECKLIST.

IRRIGATION SYSTEM DESIGN INTENT

1. THIS PLAN SHALL COMPLY WITH THE REQUIREMENTS OF THE STATE OF CALIFORNIA'S MODEL WATER EFFICIENT LANDSCAPE ORDINANCE (MWELO), CITY OF BERKELEY, AND EAST BAY MUNICIPAL UTILITY DISTRICT (EBMUD) WATER DISTRICT.

2. THE IRRIGATION SYSTEM SHALL BE DESIGNED TO PROVIDE THE MINIMUM AMOUNT OF WATER NECESSARY TO SUSTAIN GOOD PLANT HEALTH.

3. THE IRRIGATION SYSTEM IS TO BE A FULLY AUTOMATIC, WEATHER-BASED SYSTEM USING RAIN SENSOR, LOW FLOW DRIP, BUBBLER DISTRIBUTION, AND ROTOR WITH MATCHED PRECIPITATION RATE NOZZLES DESIGNED FOR HEAD-TO-HEAD COVERAGE.

4. ALL SELECTED COMPONENTS SHALL BE PERMANENT, COMMERCIAL GRADE, SELECTED FOR DURABILITY, VANDAL RESISTANCE AND MINIMUM MAINTENANCE REQUIREMENT, INSTALLED BELOW-GRADE, AND DESIGNED FOR 100% COVERAGE.

5. THE SYSTEM SHALL INCLUDE A MASTER CONTROL VALVE, RAIN SENSOR AND FLOW SENSING CAPABILITY CONNECTED TO THE IRRIGATION CONTROLLER WHICH WILL SHUT DOWN ALL OR PART OF THE SYSTEM IF LEAKS ARE DETECTED.

6. THE IRRIGATION SYSTEM SHALL BE DESIGNED TO DELIVER WATER TO HYDROZONES BASED ON MOISTURE REQUIREMENTS OF THE PLANT GROUPING.

7. COLOR CODED HYDROZONE LANDSACPING HYDROZONE MAP WITH GROUPING AND COLLOCATING PLANTING MATERIAS BY WUCOLS WATER USE CATEGORY VL, L, M, OR H, PER [CGBSC 4.304}, TO BE PROVIDED IN PERMIT DRAWINGS.

8. RAIN SENSOR AND CONTROLLER LOCATION TO BE PROVIDED IN PERMIT DRAWINGS.

EXISTING TREE PROTECTION NOTES

1. PRIOR TO AND DURING DEMOLITION, GRADING AND CONSTRUCTION, THE EXISTING TREE ON THE DRAWINGS SHALL BE PROTECTED BY FENCING INSTALLED OUTSIDE THE EXISTING DRIPLINE OF THE TREE, OR AS OTHERWISE SHOWN ON THE DRAWINGS. FENCING MAY OCCUR AT THE COMBINED DRIPLINES OF GROVES OF TREES.

2. EXISTING TREE DRIPLINES ARE SHOWN DIAGRAMMATICALLY ON THE PLANS; TREE PROTECTION FENCING INDICATED AT THEIR PERIMETER IS LIKEWISE DIAGRAMMATIC. THE LENGTH OF ALL TREE PROTECTION FENCING IS TO BE MEASURED IN THE FIELD ACCORDING TO THE TRUE SHAPE AND DIAMETER OF TREE DRIPLINES.

3. FENCING SHALL BE SIX FOOT HIGH CHAIN LINK WITH STEEL POSTS EMBEDDED IN THE GROUND. ALL FENCE SECTIONS SHALL BE CLEARLY MARKED WITH A SIGN STATING, "TREE PROTECTION ZONE."

4. FENCING SHALL REMAIN IN PLACE THROUGHOUT THE CONSTRUCTION PERIOD UNTIL FINAL LANDSCAPE INSPECTION BY THE DEPARTMENT OF COMMUNITY DEVELOPMENT.

5. 3" DEEP MULCH IS TO BE PLACED BENEATH THE DRIPLINE OF ALL TREES SHOWN TO BE PROTECTED WITH FENCING.

6. NO GRADING OR CONSTRUCTION WORK SHALL OCCUR WITHIN THE DRIPLINE OF EXISTING TREES, WHETHER SHOWN WITH TREE PROTECTION FENCING OR NOT. IF EXCAVATION WITHIN THE DRIPLINE IS NECESSARY, THE CONTRACTOR SHALL HAND DIG UNDER THE DIRECTION OF A CERTIFIED ARBORIST. CONTRACTOR TO NOTIFY AND COORDINATE WITH CERTIFIED ARBORIST AT LEAST 72 HOURS PRIOR TO ANY WORK BEING DONE IN DRIPLINE. THE CONTRACTOR SHALL HAVE A CERTIFIED ARBORIST ON SITE TO MONITOR ALL ROOT PRUNING AND BRANCH PRUNING OF EXISTING TREES.

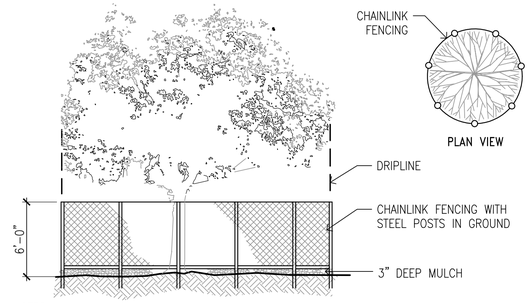
7. NO STOCKPILING/STORAGE OF FILL, ETC., SHALL TAKE PLACE UNDERNEATH OR WITHIN FIVE FEET OF THE DRIPLINE OF THE EXISTING TREES.

8. FOR ALL TREES TO REMAIN, NO OIL, GASOLINE, CHEMICALS, LIQUID WASTER, OR OTHER HARMFUL MATERIALS SHALL BE DEPOSITED, DISPOSED OR STORED WITHIN THE DRIPLINE OF THE TREES OR IN DRAINAGE CHANNELS, SWALES, OR AREAS THAT MAY LEAD TO THE DRIPLINE WHETHER SHOWN WITH TREE PROTECTION FENCING OR NOT. LIKEWISE, NO EQUIPMENT MAY BE WASHED WITHIN THE DRIPLINE OR DRAINAGE CHANNEL OF ANY TREE.

9. NO EQUIPMENT MAY BE STORED WITHIN OR BENEATH THE DRIPLINES OF THE EXISTING TREES.

10. THE CONTRACTOR IS REQUIRED TO WATER, FERTILIZE, AND ATTEND TO ALL MAINTENANCE NEEDS OF ANY EXISTING TREES, SHRUBS AND TURF TO REMAIN WHERE AFFECTED BY CONSTRUCTION WORK IN ORDER TO MAINTAIN HEALTHY GROWTH THROUGHOUT THE CONSTRUCTION PERIOD.

11. UNAUTHORIZED TREE REMOVAL IS SUBJECT TO REPLACEMENT EQUAL TO THE APPRAISED VALUE OF THE TREE LOST.



NOTES

1. NO EXISTING TREE MAY BE PRUNED WITHOUT PRIOR APPROVAL BY THE CITY ARBORIST.
2. NO EQUIPMENT MAY BE STORED WITHIN OR BENEATH THE DRIPLINES OF THE EXISTING TREES.
3. NO OIL, GASOLINE, CHEMICALS, OR OTHER HARMFUL MATERIALS SHALL BE DEPOSITED OR DISPOSED WITHIN THE DRIPLINE OF THE TREES OR IN DRAINAGE CHANNELS, SWALES, OR AREAS THAT MAY LEAD TO THE DRIPLINE.
4. NO STOCKPILING/STORAGE OF FILL, ETC, SHALL TAKE PLACE UNDERNEATH OR WITHIN FIVE FEET OF THE DRIPLINE OF THE EXISTING TREES.

IRRIGATION DESIGN INTENT

1. THIS PLAN SHALL COMPLY WITH THE REQUIREMENTS OF THE STATE OF CALIFORNIA'S MODEL WATER EFFICIENT LANDSCAPE ORDINANCE (MWELO), CITY OF BERKELEY, AND EAST BAY MUNICIPAL DISTRICT (EBMUD) WATER DISTRICT.
2. THE IRRIGATION SYSTEM SHALL BE DESIGNED TO PROVIDE THE MINIMUM AMOUNT OF WATER NECESSARY TO SUSTAIN GOOD PLANT HEALTH.
3. THE IRRIGATION SYSTEM IS TO BE A FULLY AUTOMATIC, WEATHER-BASED SYSTEM USING RAIN SENSOR, LOW FLOW DRIP, BUBBLER DISTRIBUTION, AND ROTOR WITH MATCHED PRECIPITATION RATE NOZZLES DESIGNED FOR HEAD-TO-HEAD COVERAGE.
4. ALL SELECTED COMPONENTS SHALL BE PERMANENT, COMMERCIAL GRADE, SELECTED FOR DURABILITY, VANDAL RESISTANCE AND MINIMUM MAINTENANCE REQUIREMENT, INSTALLED BELOW-GRADE, AND DESIGNED FOR 100% COVERAGE.
5. THE SYSTEM SHALL INCLUDE A MASTER CONTROL VALVE AND FLOW SENSING CAPABILITY WHICH WILL SHUT DOWN ALL OR PART OF THE SYSTEM IF LEAKS ARE DETECTED.
6. THE IRRIGATION SYSTEM SHALL BE DESIGNED TO DELIVER WATER TO HYDROZONES BASED ON MOISTURE REQUIREMENTS OF THE PLANT GROUPING.

EXHIBIT B

MITIGATION MONITORING AND REPORTING PROGRAM
Project Name: All (*) **Responsibility: CoB (City of Berkeley)**

Mitigation Measure or Continuing Best Practice	Question for Checklist	Responsible for Implementation*	Phase/When Implemented*
Aesthetics & Visual Quality			
DAP MM AES-1: Conduct Site-Specific Visual Analysis for Buildings Proposed between Shattuck Avenue and Oxford Street. In order to reduce development-related impacts on existing views of the Berkeley Hills for observers traveling east along east-west streets in the Downtown Area, the City should require site-specific visual analysis for proposed buildings that have the potential to affect existing view corridors to determine the extent to which such structures may interfere with existing views of the Berkeley Hills, and should consider whether stepping back such buildings is feasible and would result in a substantial reduction in impact. ***(Significant Unavoidable Impact [1])***	a) Has the project conducted site-specific visual analysis for buildings proposed between Shattuck Avenue and Oxford Street as required by the zoning and green pathway regulations, as applicable, in order to reduce development-related impacts on existing views of the Berkeley Hills? b) Has the project considered whether stepping back such buildings is feasible and would result in a substantial reduction in impact; have the plans been modified to reduce the impact to the satisfaction of the City?	CoB	P
DAP MM AES-2: Evaluate Shadow Effects for Proposed Structures near the Eastern Edge of the Downtown Area. The extent of the impact on the Crescent will depend on the location, height and bulk of structures to the southwest. While the impact may be significant, it is not possible to determine with any certainty the level of impact. Accordingly, all structures with a proposed height of 85 feet or more to be located within an area bounded by Addison Street on the north, Oxford Street on the east, Allston Way on the south, and Shattuck Avenue/Shattuck Square on the west shall be evaluated in a site-specific basis to determine the extent to which such buildings may cast shadows within the Crescent. Modifications to building heights, bulk or location should be considered as a way to reduce such shadowing. ***(Significant Unavoidable Impact)***	a) Has the proposed structure with a proposed height of 85 feet or more located within an area bounded by Addison Street on the north, Oxford Street on the east, Allston Way on the south, and Shattuck Avenue/Shattuck Square on the west been evaluated in a site-specific basis to determine the extent to which it may cast shadows within the Crescent? b) Have modifications to building heights, bulk or location been considered as a way to reduce such shadowing; have the plans been modified to reduce the impact to the satisfaction of the City?	CoB	P

[1] When the Checklist indicates that Significant and Unavoidable Impacts shall be reduced or appropriately mitigated to the satisfaction of the City, it is recognized that while the impact may still be Significant and Unavoidable, the project meets the standards of the zoning ordinance and is otherwise acceptable.

* Key: CoB = City of Berkeley. While it is the applicant's responsibility to mitigate the identified impacts, it is the City's responsibility through zoning review, plan check and inspection to verify compliance. During operations, compliance is verified during inspections and response to complaints. As needed, the City requires assignment of a mitigation monitor.
P=Planning; O=Operations; W=Working Drawings; C=Construction

EXHIBIT B

MITIGATION MONITORING AND REPORTING PROGRAM
Project Name: All (*) **Responsibility: CoB (City of Berkeley)**

Mitigation Measure or Continuing Best Practice	Question for Checklist	Responsible for Implementation*	Phase/When Implemented*
Air Quality			
DAP MM AIR-1: None listed in draft DAP ***(Significant Unavoidable Impact)*** Impact AIR-1: Conflict with Clean Air Plan (CAP). Development anticipated under the Downtown Area Plan would increase population and employment at a greater rate than assumed when preparing the latest update to the CAP. This could lead to greater regional emissions of nonattainment air pollutants (or their precursors) than assumed in the CAP.	N/A		
DAP MM AIR-2: Buffer Toxics Air Contaminants (TAC) and Odor Emission Sources and Sensitive Land Uses. Consider potential air pollution and odor impacts from future development that may emit pollution and/or odors when locating (a) air pollution sources, and (b) residential and other pollution-sensitive land uses in the vicinity of air pollution sources (which may include areas where buses idle, diesel generators, parking garage vents, restaurants, and other similar uses). Buffer sensitive residential and other pollution-sensitive receptors from TACs whenever possible, and if buffering is not feasible, apply appropriate mitigation to reduce impacts, such as air filtration systems or other technologies. ***(Significant Unavoidable Impact)***	a) Have the potential impacts on surrounding uses been considered when a project that may emit pollution and/or odors, including but not limited to restaurants, parking garage vents and diesel generators, is proposed? b) Has the project taken into consideration potential air pollution and odor impacts, including but not limited to restaurants, parking garage vents and diesel generators, when locating residential and other pollution-sensitive land users in the vicinity of air pollution sources? c) If buffering is not feasible, have appropriate mitigation measures been incorporated into the project to reduce the impact on sensitive receptors?	CoB	P
DAP MM AIR-3: Implement BAAQMD Recommended Measures to Control PM10 Emissions during Construction. Measures to reduce diesel particulate matter and PM10 from construction are recommended to ensure that short-term health impacts to nearby sensitive receptors are avoided. Dust (PM10) Control Measures: • Water all active construction areas at least twice daily and more often during windy periods. Active areas adjacent to residences should be kept damp at all times. • Cover all hauling trucks or maintain at least two feet of freeboard. • Pave, apply water at least twice daily, or apply (non-toxic) soil stabilizers on all unpaved access roads, parking areas, and staging areas. • Sweep daily (with water sweepers) all paved access roads, parking areas, and staging areas and sweep streets daily (with water sweepers) if visible soil material is deposited onto the adjacent roads. • Hydroseed or apply (non-toxic) soil stabilizers to inactive construction areas (i.e., previously-graded areas that are inactive for 10 days or more). • Enclose, cover, water twice daily, or apply (non-toxic) soil binders to exposed stockpiles. • Limit traffic speeds on any unpaved roads to 15 mph. • Replant vegetation in disturbed areas as quickly as possible. • Suspend construction activities that cause visible dust plumes to extend beyond the construction site.	Do conditions of approval, if applicable, and construction plans or related agreements require that the specified BAAQMD recommended measures to control particulate matter PM (10) and diesel emissions during construction will be implemented?	CoB	P W C

* Key: CoB = City of Berkeley. While it is the applicant's responsibility to mitigate the identified impacts, it is the City's responsibility through zoning review, plan check and inspection to verify compliance. During operations, compliance is verified during inspections and response to complaints. As needed, the City requires assignment of a mitigation monitor.
P=Planning; O=Operations; W=Working Drawings; C=Construction

EXHIBIT B

MITIGATION MONITORING AND REPORTING PROGRAM
Project Name: All (*) **Responsibility: CoB (City of Berkeley)**

Mitigation Measure or Continuing Best Practice	Question for Checklist	Responsible for Implementation*	Phase/When Implemented*
Measures to Reduce Diesel Particulate Matter and PM2.5 • Clear signage at all construction sites will be posted indicating that diesel equipment standing idle for more than five minutes shall be turned off. This would include trucks waiting to deliver or receive soil, aggregate, or other bulk materials. Rotating drum concrete trucks could keep their engines running continuously as long as they were onsite or adjacent to the construction site. • Opacity is an indicator of exhaust particulate emissions from off-road diesel powered equipment. The project shall ensure that emissions from all construction diesel powered equipment used on the project site do not exceed 40 percent opacity for more than three minutes in any one hour. Any equipment found to exceed 40 percent opacity (or Ringelmann 2.0) shall be repaired immediately. • The contractor shall install temporary electrical service whenever possible to avoid the need for independently powered equipment (e.g. compressors). • Properly tune and maintain equipment for low emissions. ***(Impact Avoided or Mitigated to a Less Than Significant Level)***			
Cultural & Historic Resources			
DAP MM CUL-1: None listed in draft DAP ***(Significant Unavoidable Impact)*** Impact CUL-1: Demolition of Historic Resources. Despite the substantial protections in place in City policy, it is possible that development anticipated under the Project could result in the demolition of historic resources located within the Downtown Area. Were demolition of historic resources to occur, this would represent a significant and unavoidable impact associated with the Project.	N/A		
DAP MM CUL-2: Establish Parameters for Compatible Infill Development in the Downtown Area within Updated Design Guidelines. Using the Secretary of the Interior's "Standards" as a starting point (in compliance with DAP Policy HD-1-1a), the Design Guidelines for future development in the Downtown Area should be updated to ensure that new construction respects the authentic character, significance and integrity of the existing building stock in areas that may have the potential for designation as historic districts. Specific guidelines that could be added for this purpose include, but are not limited to, the following: • Consider the difference in character of individual blocks. The scale of buildings change within the potential historic district(s) and new construction should reflect the appropriate scale per block. • Priorities for new construction and additions include: build-to-the-street, particularly at corners; construct infill buildings at vacant or underutilized sites along major streets; and modify non-historic buildings so that they contribute visual interest and quality. • Construct new buildings, of compatible design with the surrounding neighborhood.	a) Do the approved Downtown Design Guidelines address the suggested issues to ensure that new construction respects the authentic character, significance and integrity of the existing building stock in areas that may have the potential for designation as historic districts? b) Is the proposed project consistent with the Guidelines and mitigation?	CoB	P

* Key: CoB = City of Berkeley. While it is the applicant's responsibility to mitigate the identified impacts, it is the City's responsibility through zoning review, plan check and inspection to verify compliance. During operations, compliance is verified during inspections and response to complaints. As needed, the City requires assignment of a mitigation monitor.

EXHIBIT B

MITIGATION MONITORING AND REPORTING PROGRAM
Project Name: All (*) **Responsibility: CoB (City of Berkeley)**

Mitigation Measure or Continuing Best Practice	Question for Checklist	Responsible for Implementation*	Phase/When Implemented*
• Encourage creative and innovative contemporary designs for new buildings in the downtown. • Streetscape plays an important role in drawing individuals to a particular area of the city. Use signage, lighting, and paving to improve the pedestrian experience. • Build consistently with the street wall, particularly at corner sites. Continue dominant rhythms for structural bays, bay windows, large pilasters, and other repeating vertical elements. Also, continue dominant cornice lines, such as between ground floors and upper stories, and at the top of facades that meet a street. • Design new buildings to respond to the existing building context within a block, and provide continuity to the overall streetscape. Frequently, a new building will be inserted on a site between two existing buildings of disparate scale and design. • Set back upper floors where taller buildings are permitted, so that dominant roof and cornice lines remain generally consistent in the Downtown, as seen from the street. • Explore options for multi-use buildings, combining residential, commercial, and other compatible uses where appropriate. • Provide multi-tenant retail space and other active publicly-accessible uses at the street level. These should be accessible directly from the sidewalk, rather than through common interior lobbies. • Provide easy-to-locate building entrances on all street-facing facades. Where a building extends through an entire block or is located at a corner, connect its entrances with signage and lighting to distinguish them from storefronts • Use vertically proportioned windows. Group such windows in sets where a horizontally proportioned window opening is desired, especially for the expression of structural bays. ***(Impact Avoided or Mitigated to a Less Than Significant Level)***			
DAP MM CUL-3: Halt Work/Archaeological Evaluation/Site-Specific Mitigation. If archaeological resources are uncovered during construction activities, all work within 50 feet of the discovery shall be redirected until a qualified archaeologist can be contacted to evaluate the situation, determine if the deposit qualifies as an archaeological resource, and provide recommendations. If the deposit does not qualify as an archaeological resource, then no further protection or study is necessary. If the deposit does qualify as an archaeological resource, then the impacts to the deposit shall be avoided by project activities. If the deposit cannot be avoided, adverse impacts to the deposit must be mitigated. Mitigation may include, but is not limited to, archaeological data recovery. Upon completion of the archaeologist's assessment, a report should be prepared documenting the methods, findings and recommendations. The report should be submitted to the City, the project proponent and the NWIC. ***(Impact Avoided or Mitigated to a Less Than Significant Level)***	a) Do conditions of approval, if applicable, and construction plans or related agreements require conformance with the mitigation measure? b) Have archaeological resources been uncovered during construction activities? If yes: - Has all work within 50 feet of the discovery been redirected until a qualified archaeologist could be contacted to evaluate the situation, determine if the deposit qualifies as an archaeological resource, and provide recommendations? - If the deposit does qualify as an archaeological resource, have impacts to the deposit been avoided or mitigated by project activities? - Was the archaeologist's assessment or report documenting the methods, findings and recommendations been prepared and submitted to the City, the project proponent and NWIC?	CoB	W C

* Key: CoB = City of Berkeley. While it is the applicant's responsibility to mitigate the identified impacts, it is the City's responsibility through zoning review, plan check and inspection to verify compliance. During operations, compliance is verified during inspections and response to complaints. As needed, the City requires assignment of a mitigation monitor.

MITIGATION MONITORING AND REPORTING PROGRAM
Project Name: All (*) **Responsibility: CoB (City of Berkeley)**

Mitigation Measure or Continuing Best Practice	Question for Checklist	Responsible for Implementation*	Phase/When Implemented*
DAP MM CUL-4: Halt Work/Paleontological Evaluation/Site-Specific Mitigation. Should paleontological resources be encountered during construction or site preparation activities, such works shall be halted in the vicinity of the find. A qualified paleontologist shall be contacted to evaluate the nature of the find and determine if mitigation is necessary. All feasible recommendations of the paleontologist shall be implemented. Mitigation may include, but is not limited to, in-field documentation and recovery of specimen(s), laboratory analysis, the preparation of a report detailing the methods and findings of the investigation, and curation at an appropriate paleontological collection facility. ***(Impact Avoided or Mitigated to a Less Than Significant Level)***	a) Do conditions of approval, if applicable, and construction plans or related agreements require conformance with mitigation measures? b) Was work halted if paleontological resources were discovered during construction? If yes: - was a qualified paleontologist contacted to evaluate the find and determine if further mitigation is necessary? - If mitigations were deemed necessary by the paleontologist, were all feasible measures implemented?	CoB	W C
DAP MM CUL-5: Halt Work/Coroner's Evaluation/Native American Heritage Consultation/Compliance with Most Likely Descendent Recommendations. If human remains are encountered during construction activities, all work within 50 feet of the remains should be redirected and the County Coroner notified immediately. At the same time, an archaeologist shall be contacted to assess the situation. If the human remains are of Native American origin, the Coroner must notify the Native American Heritage Commission within 24 hours of this identification. The Native American Heritage Commission will identify a Native American Most Likely Descendant (MLD) to inspect the site and provide recommendations for the proper treatment of the remains and any associated grave goods. The archaeologist shall recover scientifically-valuable information, as appropriate and in accordance with the recommendations of the MLD. Upon completion of the archaeologist's assessment, a report should be prepared documenting methods and results, as well as recommendations regarding the treatment of the human remains and any associated archaeological materials. The report should be submitted to the City, the project proponent and the NWIC. ***(Impact Avoided or Mitigated to a Less Than Significant Level)***	a) Do conditions of approval, if applicable, and construction plans or related agreements require conformance with mitigation measures? b) Was work halted if any human remains were found at the construction site? If yes: - was the county coroner notified immediately and an archaeologist contacted to assess the situation? - If the human remains were of Native American origin, was an archaeologist's report prepared and submitted to the City, the Project Proponent and the NWIC?	CoB	W C

* Key: CoB = City of Berkeley. EXHIBIT B

MITIGATION MONITORING AND REPORTING PROGRAM
Project Name: All (*) **Responsibility: CoB (City of Berkeley)**

Mitigation Measure or Continuing Best Practice	Question for Checklist	Responsible for Implementation*	Phase/When Implemented*
Noise			
DAP MM NOI-1: Site-Specific Noise Studies, Site Planning, Noise Control Treatments. Future residential units proposed under the DAP would be exposed to outdoor noise levels in excess of 60 L_{dn} and indoor levels in excess of 45 L_{dn}, which would exceed the City's and state's established land use compatibility thresholds. In areas where residential development would be exposed to an L_{dn} of greater than 60 dBA, site-specific noise studies should be conducted to determine the area of impact and to present appropriate mitigation measures, which may include the following: • Utilize site planning to minimize noise in shared residential outdoor activity areas by locating these areas behind the buildings, in courtyards, or orienting the terraces to alleyways rather than streets, whenever possible. • The California Building Code and the City of Berkeley require project-specific acoustical analyses to achieve interior noise levels of 45 dBA L_{dn} or lower in residential units exposed to exterior noise levels greater than 60 dBA L_{dn}. Building sound insulation requirements would need to include the provision of forced-air mechanical ventilation in noise environments exceeding 70 dBA L_{dn} so that windows could be kept closed at the occupant's discretion to control noise. • Special building construction techniques (e.g., sound-rated windows and building facade treatments) may be required where exterior noise levels exceed 65 dBA L_{dn}. These treatments include, but are not limited to, sound rated windows and doors, sound rated exterior wall assemblies, acoustical caulking, etc. The specific determination of what treatments are necessary will be conducted on a unit-by-unit basis during project design. Results of the analysis, including the description of the necessary noise control treatments, will be submitted to the City along with the building plans and approved prior to issuance of a building permit. Feasible construction techniques such as these would adequately reduce interior noise levels to 45 dBA L_{dn} or lower. ***(Significant Unavoidable Impact)***	In areas where residential development would be exposed to L(dn) exceeding 60 dBA, were site specific noise studies conducted to determine the area of impact and to present mitigation measures, and were appropriate mitigation measures incorporated into the proposed project to reduce noise levels?	CoB	P W
DAP MM NOI-2: Site-Specific Noise Studies, Activities Scheduling. The following measures should be implemented to reduce noise exposure of Downtown Area residents to noise associated with nearby commercial activities: • Noise levels at residential property lines from commercial development should be maintained not in excess of the Berkeley Municipal Code Limits. The approvals of the commercial development should require a noise study demonstrating how the business (including loading docks, refuse areas, and ventilation systems) would meet, and be consistent with, the City's noise standards. • Ensure that noise-generating activities, such as maintenance activities and loading and unloading activities are limited to the hours of 7:00 AM to 9:00 PM. ***(Impact Avoided or Mitigated to a Less Than Significant Level)***	a) As needed, have proposed commercial projects provided a noise study demonstrating how the business (including loading docks, refuse areas, and ventilation systems) would meet the City's noise standards? b) Are noise levels at residential property lines from commercial development maintained so as not to exceed Berkeley Municipal Code limits? c) Have noise generating activities, such as maintenance, refuse collection and loading dock functions been limited to the hours of 7:00 AM to 9:00 PM?	CoB	P O

* Key: CoB = City of Berkeley. While it is the applicant's responsibility to mitigate the identified impacts, it is the City's responsibility through zoning review, plan check and inspection to verify compliance. During operations, compliance is verified during inspections and response to complaints. As needed, the City requires assignment of a mitigation monitor.

EXHIBIT B

MITIGATION MONITORING AND REPORTING PROGRAM
Project Name: All (*) **Responsibility: CoB (City of Berkeley)**

Mitigation Measure or Continuing Best Practice	Question for Checklist	Responsible for Implementation*	Phase/When Implemented*
DAP MM NOI-3: Site-Specific Noise Analysis, Noise Barriers, Pavement Modifications, Traffic Calming, Sound Insulation. Where anticipated noise levels would exceed City of Berkeley standards for interior noise, methods available to mitigate Project-related noise level increases would need to be studied on a case-by-case basis as individual development projects are proposed at receivers that would be considered noise impacted along Shattuck Avenue between University Avenue and Allston Way, and along Allston Way between Shattuck Avenue and Oxford Street. Since these increases in noise levels are related to the closure of Center Street and the elimination of travel lanes on Shattuck Avenue assumed under the DAP, retaining existing travel lane configurations in the Downtown Area street network would reduce this impact to a level of less than significant. The Project no longer includes reduction of lanes on Shattuck to one through lane in each direction. However, closure of Center Street is included in the DAP 2012 (see Figure AC-3). If the proposed Center Street modification takes place, additional noise reduction methods could include the following: • Installing traffic calming measures to slow traffic. Typically, each 5 mph reduction in travel speeds equates to 1 dBA of noise reduction. • Affected residences could be provided building sound insulation such as sound-rated windows and doors on a case-by-case basis as a method of reducing noise levels in interior spaces. ***(Significant Unavoidable Impact)***	If Center Street is closed and noise levels along Shattuck Avenue between University Avenue and Allston Way, and along Allston Way between Shattuck Avenue and Oxford Street are expected to exceed COB standards for interior noise, have impacts been studied and mitigations provided to reduce noise levels?	CoB	P W C
DAP MM NOI-4: Site-Specific Noise Analysis, Noise Barriers, Pavement Modifications, Traffic Calming, Sound Insulation. Where anticipated noise levels would exceed City of Berkeley standards for interior noise, methods available to mitigate Project-related noise level increases would need to be studied on a case-by-case basis as individual development projects are proposed at receivers that would be considered noise impacted along Shattuck Avenue between University Avenue and Allston Way, along Allston Way between Shattuck Avenue and Oxford Street, and along Durant Avenue between Milvia Street and Shattuck Avenue. Since these increases in noise levels are related to the closure of Center Street and the elimination of travel lanes on Shattuck Avenue assumed in the EIR, retaining existing travel lane configurations in the Downtown Area street network would reduce this impact to a level of less than significant. The DAP 2012 no longer includes reducing Shattuck to one through lane in each direction; however, it does include the potential closure of Center Street to most traffic. At the time a proposed project for closing Center Street is developed, noise reduction methods could include the following: • Installing traffic calming measures to slow traffic. Typically, each 5 mph reduction in travel speeds equates to 1 dBA of noise reduction. • Affected residences could be provided building sound insulation such as sound-rated windows and doors on a case-by-case basis as a method of reducing noise levels in interior spaces. ***(Significant Unavoidable Impact)***	If Center Street is closed and noise levels along Shattuck Avenue between University Avenue and Allston Way, along Allston Way between Shattuck Avenue and Oxford Street, and along Durant Avenue between Milvia Street and Shattuck Avenue are expected to exceed COB standards for interior noise, have impacts been studied and mitigations provided to reduce noise levels? MITIGATION MONITORING AND REPORTING PROGRAM
Project Name: All (*) **Responsibility: CoB (City of Berkeley)**

Mitigation Measure or Continuing Best Practice	Question for Checklist	Responsible for Implementation*	Phase/When Implemented*
DAP MM NOI-5: Develop Site-Specific Noise Reduction Programs and Implement Noise Abatement Measures during Construction. Prior to the issuance of building permits, the applicant shall develop a site specific noise reduction program prepared by a qualified acoustical consultant to reduce construction noise impacts to the maximum extend feasible, subject to review and approval of the Zoning Officer. The noise reduction program shall include appropriate times limits for construction (7 AM to 7 PM on weekdays and between the hours of 9:00 AM and 8:00 PM on weekends or holidays) as well as technically and economically feasible controls to meet the requirements of the Berkeley Municipal Code. The noise reduction program should include, but shall not be limited to, the following available controls to reduce construction noise levels as low as practical. • Construction equipment should be well maintained and used judiciously to be as quiet as practical. • Equip all internal combustion engine-driven equipment with mufflers, which are in good condition and appropriate for the equipment. • Utilize "quiet" models of air compressors and other stationary noise sources where technology exists. Select hydraulically or electrically powered equipment and avoid pneumatically powered equipment where feasible. • Locate stationary noise-generating equipment as far as possible from sensitive receptors when adjoining construction sites. Construct temporary noise barriers or partial enclosures to acoustically shield such equipment where feasible. • Prohibit unnecessary idling of internal combustion engines. If impact pile driving is required, pre-drill foundation pile holes to minimize the number of impacts required to seat the pile. • Construct solid plywood fences around construction sites adjacent to operational business, residences or other noise-sensitive land uses where the noise control plan analysis determines that a barrier would be effective at reducing noise. • Erect temporary noise control blanket barriers, if necessary, along building facades facing construction sites. This mitigation would only be necessary if conflicts occurred which were irresolvable by proper scheduling. Noise control blanket barriers can be rented and quickly erected. • Route construction related traffic along major roadways and away from sensitive receptors where feasible. • Businesses, residences or other noise-sensitive land uses within 500 feet of construction sites should be notified of the construction schedule in writing prior to the beginning of construction. Designate a "construction liaison" that would be responsible for responding to any local complaints about construction noise. The liaison would determine the cause of the noise complaints (e.g., starting too early, bad muffler, etc.) and institute reasonable measures to correct the problem. Conspicuously post a telephone number for the liaison at the construction site. ***(Significant Unavoidable Impact)***	a) Do conditions of approval, if applicable, and construction plans or related agreements require conformance with mitigation measures, including provision of a site-specific noise reduction program prepared by a qualified acoustical consultant to reduce construction nose impacts? b) Has a construction liaison been identified to address local complaints?	CoB	W C

Mitigation Measure or Continuing Best Practice	Question for Checklist	Responsible for Implementation*	Phase/When Implemented*
DAP MM NOI-6 Avoidance of Pile-Driving/Site-Specific Vibration Studies/ Monitoring/Contingency Planning. The following measures are recommended to reduce vibration from construction activities: • Avoid impact pile-driving where possible. Drilled piles causes lower vibration levels where geological conditions permit their use. • Avoid using vibratory rollers and tampers near sensitive areas. • In areas where project construction is anticipated to include vibration-generating activities, such as pile-driving in close proximity to existing structures, site-specific vibration studies should be conducted to determine the area of impact and to present appropriate mitigation measures that may include the following: - Identification of sites that would include vibration compaction activities such as pile-driving and that have the potential to generate groundborne vibration, and the sensitivity of nearby structures to groundborne vibration. Vibration limits should be applied to all vibration-sensitive structures located within 200 feet of the project. A qualified structural engineer should conduct this task. - Development of a vibration monitoring and construction contingency plan to identify structures where monitoring would be conducted, set up a vibration monitoring schedule, define structure-specific vibration limits, and address the need to conduct photo, elevation, and crack surveys to document before and after construction conditions. - Construction contingencies would be identified for when vibration levels approached the limits. - At a minimum, vibration monitoring should be conducted during initial demolition activities and during pile driving activities. Monitoring results may indicate the need for more or less intensive measurements. - When vibration levels approach limits, suspend construction and implement contingencies to either lower vibration levels or secure the affected structures. - Conduct post-survey on structures where either monitoring has indicated high levels or complaints of damage has been made. Make appropriate repairs or compensation where damage has occurred as a result of construction activities. ***(Significant Unavoidable Impact)***	a) Does the project avoid the use of pile driving? b) Does the project avoid the use of vibratory rollers and tampers near sensitive areas? c) In areas where vibration inducing activities cannot be avoided, has a site specific vibration study been conducted to present appropriate mitigation measures and have mitigations been provided to minimize impacts to the satisfaction of the City?	CoB	W C

* Key: CoB = City of Berkeley. Mitigation Measure or Continuing Best Practice	Question for Checklist	Responsible for Implementation*	Phase/When Implemented*
Transportation & Traffic			
DAP MM TRA-1: Modify Lane Configuration at Martin Luther King Jr. Way/Hearst Avenue Intersection. A lane should be added for left turns in the westbound direction, changing the right lane to throughright. Implementation of this mitigation would still result in LOS F in the PM peak hour, but delay would be reduced to 131.2s, eliminating the significant DAP-related impact. The implementation of this mitigation measure requires re-striping of Hearst Avenue east of Martin Luther King Jr. Way to accommodate the new lane, eliminating the bike lane in part of the block; or the acquisition of additional right-of-way on this segment of Hearst Avenue to accommodate the new lane and maintain the bike lane. This measure is not anticipated to cause significant impacts to pedestrian traffic. ***(Significant Unavoidable Impact)***	Has lane reconfiguration been implemented at MLK and Hearst Ave intersection? If not, has the project proponent contributed to such improvement and/or have other measures been taken to mitigate the traffic impact to the satisfaction of the City?	CoB	O
DAP MM TRA-10: Modify Lane Configurations at Oxford Street/University Avenue Intersection. The existing eastbound lane configuration should be maintained. This mitigation measure will result in change of LOS to D in the AM peak hour, with delay of 40.2s. Proposed lane reduction on University could be maintained west of the intersection. The implementation of this mitigation measure requires the maintenance of the eastbound lane configuration. This measure is not anticipated to cause significant impacts to pedestrian traffic. ***(Significant Unavoidable Impact)***	Has lane reconfiguration been implemented at University Ave. and Oxford St. intersection? If not, has the project proponent contributed to such improvement and/or have other measures been taken to mitigate the traffic impact to the satisfaction of the City?	CoB	O
DAP MM TRA-11: Modify Lane Configurations at Oxford Street/Allston Way Intersection and Alter Signal Cycle Timing. One lane should be added in the southbound direction, changing the lane configuration to two through and one right turn lane. One lane should be added to the northbound direction, changing the configuration to one left turn and two through lanes. One lane should be added in the eastbound direction, changing the configuration to one left turn lane and one right turn lane. Cycle length should beincreased to 25s and to provide a protected left turn signal phase in the northbound direction. This mitigation measure would result in change of LOS to C in the Pm peak hour, with delay of 33.6s. On Oxford Street, the implementation of this mitigation measure would require the removal of 5 of the parking spaces in the southbound direction and the restriping of the segment in the block north of Allston Way. In the northbound direction there is the need to use the median space, as well as re-stripe the roadway. On Allston Way, the addition of the extra lane would require the loss of 4 on-street parking spaces on the south side of the street, as well as re-striping. This measure is not anticipated to cause significant impacts to pedestrian traffic. The loss of onstreet parking spaces on Oxford Street and Allston Way is not anticipated to generate significant impacts. ***(Significant Unavoidable Impact)***	a) Has lane reconfiguration been implemented at Oxford St. and Allston Way intersection? If not, has the project proponent contributed to such improvement and/or have other measures been taken to mitigate the traffic impact to the satisfaction of the City? b) Has signal cycle timing been altered to meet LOS level standards?	CoB	O

* Key: CoB = City of Berkeley. MITIGATION MONITORING AND REPORTING PROGRAM
Project Name: All (*) **Responsibility: CoB (City of Berkeley)**

Mitigation Measure or Continuing Best Practice	Question for Checklist	Responsible for Implementation*	Phase/When Implemented*
DAP MM TRA-13: Incorporate Emergency Access Lane in Design for Center Street Pedestrian Corridor. In order to maintain adequate emergency access to buildings located along Center Street between Shattuck Avenue and Oxford Street, the design of the proposed Center Street pedestrian corridor shall be required to incorporate a clear area, a minimum of 20 feet in width, where permanent and temporary structures, landscaping, and other physical features are prohibited. This area shall be designated as an emergency access lane, and must be accessible from both Shattuck Avenue and Oxford Street. ***(Impact Avoided or Mitigated to a Less Than Significant Level)***	Have emergency access lanes been incorporated in the design for the Center St. pedestrian corridor?	CoB	O
DAP MM TRA-14a: Install Class 2 Bike Lanes on Milvia Street between University Avenue and Allston Way. This mitigation measure may result in the loss of on-street parking stalls along Milvia Street in order to accommodate the bike lanes. Up to 35 on-street parking stalls could be impacted by this mitigation measure. As noted in the parking demand discussion, sufficient public parking capacity is anticipated in the Year 2030 With Project condition, so the loss of these parking stalls would not be anticipated to cause a significant impact. This mitigation measure would also not preclude the implementation of the traffic mitigation measures at the University Avenue/Milvia Street intersection and the Center Street/Milvia Street intersection. ***(Significant Unavoidable Impact)***	Have Class 2 bike lanes been installed on Milvia St between University Ave. and Allston Way? If not, has the project proponent contributed to such improvement and/or have other measures been taken to mitigate the traffic impact to the satisfaction of the City?	CoB	O
DAP MM TRA-14b: Install Traffic Calming Devices. Traffic calming devices should be installed on Milvia Street either between University Avenue and Allston Way or immediately north and south of this segment to discourage through vehicle traffic from traveling on this section of the roadway. Traffic calming devices could include speed humps, turn restrictions/prohibitions, or other measures determined by the City of Berkeley. ***(Significant Unavoidable Impact)***	Have traffic calming devices been installed on Milvia St. between University Ave and Allston Way to discourage through traffic? If not, has the project proponent contributed to such improvement and/or have other measures been taken to mitigate the traffic impact to the satisfaction of the City?	CoB	O
DAP MM TRA-2: Modify Lane Configuration at Martin Luther King Jr. Way/Allston Way Intersection. The eastbound lane configuration should be changed, turning the existing through-left lane to left turn only and the right lane to a throughright. A right turn lane to Martin Luther King Jr. Way in the southbound direction should be added, changing the through-right lane to through only. This mitigation measure would result in changing the LOS to D, with delay of 49.8s. The implementation of this mitigation measure requires re-striping of Allston Way west of Martin Luther King Jr. Way to accommodate the lane changes, and the acquisition of right-of-way north of Allston Way to accommodate the southbound right turn lane. This measure is not anticipated to cause significant impacts to pedestrian traffic. ***(Significant Unavoidable Impact)***	Has lane reconfiguration been implemented at MLK and Allston Way Intersection? If not, has the project proponent contributed to such improvement and/or have other measures been taken to mitigate the traffic impact to the satisfaction of the City?	CoB	O

* Key: CoB = City of Berkeley. While it is the applicant's responsibility to mitigate the identified impacts, it is the City's responsibility through zoning review, plan check and inspection to verify compliance. Project Name: All (*) **Responsibility: CoB (City of Berkeley)**

Mitigation Measure or Continuing Best Practice	Question for Checklist	Responsible for Implementation*	Phase/When Implemented*
DAP MM TRA-3: Modify Lane Configuration at Milvia Street/University Avenue Intersection. A right turn lane should be added to University Avenue to the eastbound direction and one left turn lane should be added to University Avenue in the westbound direction. In the eastbound direction, the configuration of lanes would be one through-left lane, one through and one right turn lane. In the westbound direction, the configuration of lanes would be one left turn lane, one through lane and one through-right lane. This mitigation measure would change LOS to B, with delay of 14.9s in the AM peak hour, and to LOS C with delay of 25.8s in the PM peak hour. The implementation of this mitigation measure requires the removal of the median east of the intersection in order to accommodate the extra lane, and the restriping of University Avenue on both sides of Milvia Street. This measure is not anticipated to cause significant impacts to pedestrian traffic, but a right turn on green only with an advance stop bar can be implemented on University Avenue to avoid conflicts with pedestrians crossing Milvia Street. This measure would increase pedestrian safety and does not change the LOS of the intersection. The implementation of a bicycle waiting area placed ahead of the cars waiting to turn right can reduce the conflicts through bicycle flows and right-turn vehicle movements on Milvia Street in the southbound direction. This measure requires re-striping of Milvia Street. ***(Significant Unavoidable Impact)***	Has lane reconfiguration been implemented at Milvia St. and University Ave. intersection? If not, has the project proponent contributed to such improvement and/or have other measures been taken to mitigate the traffic impact to the satisfaction of the City?	CoB	O
DAP MM TRA-4: Modify Lane Configuration at Milvia Street/Center Street Intersection. One left turn lane should be added to Milvia Street in the northbound and southbound directions, changing the lane configuration to one through-right and one left turn lane. This mitigation measure would result in change of LOS to C, with delay of 24.0s in the PM peak hour. The implementation of this mitigation measure requires the removal of onstreet parking spaces in the northbound and southbound directions to accommodate the left turn, and the re-striping of Milvia Street on both sides of Center Street. This measure is not anticipated to cause significant impacts to pedestrian traffic. Milvia Street would remain a Bicycle Boulevard and sufficient traffic lane width would be provided for bicycles and vehicles to make through movements at this intersection. This improvement would result in the loss of about eight on-street parking spaces, but is not anticipated to generate significant impact with regard to parking. ***(Significant Unavoidable Impact)***	Has lane reconfiguration been implemented at Milvia St. and Center St. intersection? If not, has the project proponent contributed to such improvement and/or have other measures been taken to mitigate the traffic impact to the satisfaction of the City?	CoB	O

* Key: CoB = City of Berkeley. MITIGATION MONITORING AND REPORTING PROGRAM
Project Name: All (*) **Responsibility: CoB (City of Berkeley)**

Mitigation Measure or Continuing Best Practice	Question for Checklist	Responsible for Implementation*	Phase/When Implemented*
DAP MM TRA-5: Modify Lane Configuration at Shattuck Avenue/Center Street. The significant impact at this intersection can only be mitigated by restoring Shattuck Avenue to provide two traffic lanes in the northbound direction. The proposed mitigation measure would add one lane to Shattuck Avenue in the northbound direction, changing lane configuration to one left turn lane and two through lanes. This mitigation measure would result in change of LOS to D, with delay of 42.6s in the PM peak hour. The implementation of this mitigation measure would require the removal of the parking spaces in the northbound direction of Shattuck Avenue, the reconfiguration of the southeast sidewalk, and the re-striping of Shattuck Avenue in the block south of Center Street. This improvement would result in the loss of about eight on-street parking spaces, but is not anticipated to generate significant impact with regard to parking. ***(Impact Avoided or Mitigated to a Less Than Significant Level)***	Has lane reconfiguration been implemented at Shattuck Ave. and Center St. intersection? If not, has the project proponent contributed to such improvement and/or have other measures been taken to mitigate the traffic impact to the satisfaction of the City?	CoB	O
DAP MM TRA-6: Modify Lane Configurations at Shattuck Avenue/Allston Way Intersection. The existing number of lanes (three) in the northbound and southbound directions should be maintained, changing lane configurations to one left turn lane, one through lane and one right turn lane. One right turn lane should be added to the westbound direction, changing the existing lane to a through-left only. This mitigation measure would change the forecast LOS to D, with delay of 37.6s in the PM peak hour. The proposed mitigation measure would maintain the single through lane concept of the Shattuck Boulevard plan, but would widen the street cross section by providing a right turn lane in the northbound and southbound directions. On Allston Way, the implementation of the proposed mitigation measure requires the removal of on-street parking to accommodate the new lane configuration. This measure is not anticipated to cause significant impacts to pedestrian traffic. The anticipated loss of six on-street parking spaces on Alston Way and none spaces on Shattuck Avenue is not expected to generate significant impacts. ***(Significant Unavoidable Impact)***	Has lane reconfiguration been implmented at Shattuck Ave and Allston Way intersection? If not, has the project proponent contributed to such improvement and/or have other measures been taken to mitigate the traffic impact to the satisfaction of the City?	CoB	O
DAP MM TRA-7: Modify Lane Configurations at Shattuck Avenue/ Bancroft Way Intersection. The existing number of lanes in the southbound direction should be maintained, changing lane configuration to one through lane and one through-right lane. This mitigation measure would result in change of LOS to D, with delay of 37.6s in the PM peak hour. The proposed mitigation measure would not maintain the single through concept of the Shattuck Boulevard plan. On Shattuck Avenue, the implementation of this mitigation measure would require the reconfiguration of the parking spaces and sidewalk in the southbound direction and the restriping of the segment of the block north of Bancroft Way. This measure is not anticipated to cause significant impacts to pedestrian traffic. ***(Impact Avoided or Mitigated to a Less Than Significant Level)***	Has lane reconfiguration been implemented at Shattuck Ave and Bancroft Way intersection? If not, has the project proponent contributed to such improvement and/or have other measures been taken to mitigate the traffic impact to the satisfaction of the City?	CoB	O

* Key: CoB = City of Berkeley. Mitigation Measure or Continuing Best Practice	Question for Checklist	Responsible for Implementation*	Phase/When Implemented*
DAP MM TRA-8: Modify Lane Configurations at Shattuck Avenue/Durant Avenue Intersection. The existing number of lanes in the northbound direction should be maintained, changing the lane configuration to one left turn lane, one through and one right turn lane. This mitigation measure will result in change of LOS to B in the AM peak hour (17.8s delay). LOS C is achieved in the PM peak hour (21.6s delay) applying the mitigation measures described above plus a20s increase in cycle time. On Shattuck Avenue, the implementation of this mitigation measure would require the reconfiguration of the parking spaces and sidewalk in the northbound direction and the re-striping of the segment in the block south of Durant Avenue. This measure is not anticipated to cause significant impacts to pedestrian traffic. ***(Impact Avoided or Mitigated to a Less Than Significant Level)***	Has lane reconfiguration been implemented at Shattuck Ave. and Durant Ave intersection? If not, has the project proponent contributed to such improvement and/or have other measures been taken to mitigate the traffic impact to the satisfaction of the City?	CoB	O
DAP MM TRA-9: Maintain Existing Lane Geometry in the Westbound Direction. The DAP-proposed lane reduction on Hearst Avenue would be maintained to the west of the intersection, with the lane reduction occurring in a transition to the west of the intersection. Add one lane in southbound direction, changing lane configuration to one left-turn, one through and one through-right lane. Change the eastbound direction lane configuration to one through-left lane one through-right lane. Maintain split signal phasing for eastbound and westbound directions. Add a right turn only lane to the northbound direction and provide right turn overlap signal phasing for this movement. The right turn only lane would not be a free-right turn, but a striped, exclusive right turn lane adjacent to the northbound through lanes. Change northbound and southbound signal phasing to protected + permitted for left turns. This mitigation measure would change LOS to D in the AM peak hour (54.9 seconds delay). In the PM peak hour, the 2030 LOS is improved to LOS D, with delay reduced from 166.4 seconds With Project to 54.4 seconds. On Oxford Street, the implementation of this mitigation measure requires the removal of seven parking spaces in the southbound direction and the re-striping of the segment in the block north of Hearst Avenue. On Hearst Avenue, existing configuration should be maintained in both directions. This measure is not anticipated to cause significant impacts to pedestrian traffic. The loss of on-street parking spaces on Oxford is not anticipated to generate significant impacts. ***(Significant Unavoidable Impact)***	a) Has lane reconfiguration been implemented at Oxford St. and Hearst Ave. intersection? If not, has the project proponent contributed to such improvement and/or have other measures been taken to mitigate the traffic impact to the satisfaction of the City? b) Has signal cycle timing been adjusted to meet LOS AM and PM peak hour targets?	CoB	O

ZONING ADJUSTMENTS BOARD

NOTICE OF PUBLIC HEARING

2029 University Avenue

Use Permit #ZP2024-0181 to demolish an existing two-story commercial building and a ten-car garage structure on a 12,385-square-foot lot and to construct a 23-story (256-feet-tall plus a 5-foot parapet) approximately 190,830-square-foot residential building containing 240 dwelling units including 18 Very Low-Income (VLI), and 18 Moderate Income (MI) units for a 100% density bonus. The proposed project provides 29 off-street parking spaces, 167 Long-term and 8 Short-Term bike parking spaces.

The Zoning Adjustments Board of the City of Berkeley will hold a public hearing on the above matter, pursuant to Zoning Ordinance, Section 23.404.050 (Public Hearings and Decisions)

When: Thursday, November 13, 2025, 7:00 pm
Where: Berkeley Unified School District meeting room, 1231 Addison Street, (wheelchair accessible) with remote/hybrid option (via Zoom).

Please visit: https://berkeleyca.gov/your-government/boards-commissions/zoning-adjustments-board and click on the hearing date to access the most up-to-date meeting information, or call the Land Use Planning division (510) 981-7410.

PUBLIC ADVISORY**: **THIS MEETING WILL BE CONDUCTED IN A HYBRID MODEL WITH BOTH IN-PERSON ATTENDANCE AND VIRTUAL PARTICIPATION AVAILABLE FOR MEMBERS OF THE PUBLIC.

For in-person attendees, face coverings or masks that cover both the nose and mouth are encouraged. If you're feeling sick, please do not attend the meeting in-person as a public health precaution.

Currently, there are no physical distancing requirements in place by the State of California or the Local Health Officer for an indoor event similar to a Commission meeting. However, all attendees are requested to be respectful of the personal space of other attendees. An area of the public seating area will be designated as "distanced seating" to accommodate persons that need to distance for personal health reasons.

Land Use Planning Division
1947 Center Street, Second Floor, Berkeley, CA 94704 Tel: 510.981.7410 TDD: 510.981.7474
E-mail: zab@berkeleyca.gov

A. Land Use Designations:

- General Plan: DT– Downtown Mixed-Use
- Zoning: C-DMU Outer Core (Downtown Mixed-Use district)

B. Zoning Permits Required:

1. **Demolition.** BMC Section 23.326.070(A) **"Demolitions of Non-Residential Buildings"** to demolish a non-residential building (UPPH)*
2. **New Construction.** BMC Section 23.204.020 (A) **"Allowed Land Uses"** to construct a new multi-family building (UPPH).
3. **New Floor Area.** BMC Section 23.204.030(A)(1) **"Floor Area Permit Requirements"** to create any residential addition within the within the C-DMU (UPPH).
4. **Height**. BMC Section 23.204.130(E)(1)(a) **"Height Limits"** to increase the maximum building height limit to 75' (plus 5' parapet, by right) (UPPH).
5. **Setbacks.** BMC Section 23.204.130(E)(3)(b) "**Modifications to Standards"** to modify front, side, and rear setback requirements (UPPH).
6. **Projections Above Height Limits.** BMC Section 23. 304.050 **"Allowed Projections Above Height Limit "**to allow for Projections Above Height Limit (AUP)

C. Concessions and Waivers Requested Pursuant to State Density Bonus Law (California Government Code Section 65915):

Concessions:

1. **Concession.** Exemption from the **"Apprenticeship Requirements"** in establishing Healthcare and Apprenticeship Standards for Private Development, as required by BMC Section 13.107.040
2. **Concession.** Exemption from the **"Health Care Expenditures**" in establishing Healthcare and Apprenticeship Standards for Private Development, as required by BMC Section 13.107.050
3. **Concession.** Exemption from the "**Bird Safe Building"** requirement as required by BMC 23.304.150

Waivers:

1. **Usable Open Space**. Waiver of BMC Section 23.204.140(E)(4) for providing 2,055 square feet of Usable Open Space, where 19,200 square feet is required.
2. **Landscaped Usable Open Space.** Waiver of BMC Section 23.304.90 for Usable Open Space landscaped area to be 27 (0.0014%) square feet where 7,680 square feet (40%) is required.
3. **Height.** Waiver of BMC Section 23.204130(E)(1)(a) to exceed building height limits—to be 256 feet, plus a 5-foot parapet while 75 feet (plus 5-foot parapet by right) is the allowable height with a Use Permit.
4. **Setbacks.** Waiver of BMC Section 23.204.130(E) to reduce the front setback requirement to 0 feet, where 15 feet is the minimum, between 76 to 120 feet in height.
5. **Setbacks.** Waiver of BMC Section 23.204.130(E) to reduce the interior side setback requirement on the Floors 3 to 22 to 10 feet, where 15 feet is the minimum, between 76 to 120 feet over 65 feet from lot frontage.

6. **Setbacks.** Waiver of BMC Section 23.204.130(E) to reduce the rear setback requirement to 6.5 feet on the Floor 3-22, where 15 feet is the minimum, between 76 to 120 feet in height.
7. **Setbacks.** Waiver of BMC Section 23.204.130(E) to reduce the rear setback requirement to 6.5 feet on the Floor 3-22, where 15 feet is the minimum, over 120 feet in height.
8. **Building's width.** Waiver of BMC Section 23.204.130(E)(3)(d) for the building's width over 120 feet of height, to be 139 feet, 6 inches at the widest point (on the diagonal in plan review) where maximum width allowed is 120 feet.
9. **Projections Above Height Limits.** Waiver of BMC Section 23. 304.050 "Allowed Projections Above Height Limit "to allow for Projections Above Height Limit (AUP)

D. CEQA Recommendation: Categorically exempt pursuant to Section 15332 of the CEQA Guidelines ("In-Fill Development Projects").

E. Project Recommendation: Approve Use Permit #ZP2024-0181 pursuant to BMC Section 23.406.040(D)

F. Parties Involved:

- Applicant Rhoades Planning Group
- Property Owner Mohammad Talai & Kokab Talai

Further Information:
All application materials are available online at:
https://aca.cityofberkeley.info/CitizenAccess/Welcome.aspx.

The Zoning Adjustments Board final agenda and staff reports will be available online 6 days prior to this meeting at: https://berkeleyca.gov/your-government/boards-commissions/zoning-adjustments-board.

Questions about the project should be directed to the project planner, Nilu Karimzadegan at (510) 981-7430 or NKarimzadegan@berkeleyca.gov

Written comments or a request for a Notice of Decision should be directed to the Zoning Adjustments Board Secretary at zab@berkeleyca.gov.

Communication Disclaimer:
Communications to Berkeley boards, commissions or committees are public record and will become part of the City's electronic records, which are accessible through the City's website. **Please note: e-mail addresses, names, addresses, and other contact information are not required, but if included in any communication to a City board, commission or committee, will become part of the public record.** If you do not want your e-mail address or any other contact information to be made public, you may deliver communications via U.S. Postal Service or in person to the secretary of the relevant board, commission or committee. If you do not want your contact information included in the public record, please do not include that information in your communication. Please contact the secretary to the relevant board, commission or committee for further information.

Written Comments, Communications, and Reports:

Written comments must be directed to the ZAB Secretary at the Land Use Planning Division (Attn: ZAB Secretary), or via e-mail to: zab@berkeleyca.gov. All materials will be made available via the Zoning Adjustments Board Agenda page online at this address: https://berkeleyca.gov/your-government/boards-commissions/zoning-adjustments-board

All persons are welcome to attend the hearing and will be given an opportunity to address the Board. Comments may be made verbally at the public hearing and/or in writing before the hearing. The Board may limit the time granted to each speaker.

Correspondence received by 5:00 PM, eight days before this public hearing, will be provided with the agenda materials provided to the Board. Note that if you submit a hard copy document of more than 10 pages, or in color, or with photos, you must provide 15 copies. Correspondence received after this deadline will be conveyed to the Board in the following manner:

- **Correspondence received by 5:00 PM, two days before** this public hearing, will be conveyed to the Board in a Supplemental Communications and Reports #1, which is released around noon one day before the public hearing.
- **Correspondence received by 12:00 PM, the day of** this public hearing, will be conveyed to the Board in a Supplemental Communications and Reports #2, which is released around noon the day of the public hearing.
- **Correspondence received after 12:00 PM, the day of** this public hearing will be saved in the project administrative record.

Accessibility Information / ADA Disclaimer:
To request a disability-related accommodation(s) to participate in the meeting, including auxiliary aids or services, please contact the Disability Services specialist at 981-6342 (V) or 981-6345 (TDD) at least three business days before the meeting date.

SB 343 Disclaimer:
Any writings or documents provided to a majority of the Commission regarding any item on this agenda will be made available to the public. Please contact the Land Use Planning Division (zab@berkeleyca.gov) to request hard-copies or electronic copies.

Notice Concerning Your Legal Rights:
If you object to a decision by the Zoning Adjustments Board regarding a land use permit project, the following requirements and restrictions apply:

1. If you challenge the decision of the City in court, you may be limited to raising only those issues you or someone else raised at the public hearing described in this notice.
2. You must appeal to the City Council within 14 days after the Notice of Decision of the action of the Zoning Adjustments Board is mailed. It is your obligation to notify the Land Use Planning Division in writing of your desire to receive a Notice of Decision when it is completed.
3. Pursuant to Code of Civil Procedure Section 1094.6(b) and Government Code Section 65009(c)(1), no lawsuit challenging a City Council decision, as defined by Code of Civil Procedure Section 1094.6(e), regarding a use permit, variance or other permit may be filed more than 90 days after the date the decision becomes final, as defined in Code of Civil Procedure Section 1094.6(b). Any lawsuit not filed within that 90-day period will be barred.
4. Pursuant to Government Code Section 66020(d)(1), notice is hereby given to the applicant that the 90-day protest period for any fees, dedications, reservations, or other exactions included in any permit approval begins upon final action by the City, and that any challenge must be filed within this 90-day period.
5. If you believe that this decision or any condition attached to it denies you any reasonable economic use of the subject property, was not sufficiently related to a legitimate public purpose, was not sufficiently proportional to any impact of the project, or for any other reason constitutes a “taking” of property for public use without just compensation under the California or United States Constitutions, the following requirements apply:
    a. That this belief is a basis of your appeal.
    b. Why you believe that the decision or condition constitutes a "taking" of property as set forth above.
    c. All evidence and argument in support of your belief that the decision or condition constitutes a “taking” as set forth above. If you do not do so, you will waive any legal right to claim that your property has been taken, both before the City Council and in court.

Subject: Re: 2029 University Avenue DRC Meeting 10/16/2025

Thanks so much for getting back to me. And I will watch the video at some time but it is a long video.

I would appreciate your saving me some time by telling me:

- where in state law it says that the City must concede to a developer's request to remove conditions on a permit? Concessions: Government Code Section 65915(d) and (k)
  what part of the law is the density bonus contained within? **Government Code Section 65915 (Codes Display Text)**

  TITLE 7. PLANNING AND LAND USE [65000 - 66499.58]
  DIVISION 1. PLANNING AND ZONING [65000 - 66342]
  CHAPTER 4.3. Density Bonuses and Other Incentives [65915 - 65918]

- you refer to HCD guidance -- but what state law section requires local governments to agree to developer requests on concessions based on "project costs"? Concessions: Government Code Section 65915(d) and (k)
- Is the developer required to prove his/her contention that bird safe glass, etc would

make the project "not pencil out" or whatever term is used? If not, why not? A Court of Appeal held that the state's density bonus law (Gov't Code § 65915) does not require applicants to submit financial information to support requests for incentives or waivers and preempted a city ordinance that required such financial documentation to show that a project would not be "economically feasible" without the requested incentives. *Schreiber v. City of Los Angeles*, 69 Cal. App. 5th 549 (2021).

- can the City choose which concessions to give the developer when concessions are requested for density bonus projects? If not, why not? No, per Government Code Section 65915(d)

Thanks so much for your help so I can understand why tall buildings can be approved in Berkeley without even the minimum bird safe glass provisions included within the recently adopted BSG ordinance.

> I appreciate your thoughtful reasoning and the time you took to communicate your points with Staff.
> However, this matter is beyond the City's control, as State law supersedes local ordinances. The California Department of Housing and Community Development (HCD) has advised that Density Bonus Law (DBL) concessions apply to City requirements that could increase project costs. This HCD guidance is interpreted to include provisions such as the bird-safe building standards. Under State law, the City cannot deny a housing project unless specific findings—can be made. Staff has not been able to make those findings.
>
> I recommend watching the ZAB hearing for the project at 2425 Durant Avenue, which took place last Thursday, October 9. Similar concerns were raised regarding the concessions associated with that project. Viewing the video of the meeting would be worthwhile, as it provides helpful context and insight into staff recommendations and ZAB members' reasoning behind these decisions.
>
> Agenda: https://berkeleyca.gov/your-government/boards-commissions/zoning-adjustments-board
> (Staff Report for this project has a Density Bonus Section including a waiver and concession section)

Video: https://berkeley.granicus.com/player/clip/5518?publish_id=5c02a586-a957-11f0-8df7-005056a89546&redirect=true

2029 University Avenue is tentatively schedule for the ZAB meeting of 11/13/25. Staff reports will be available on the ZAB agenda page on 11/6/25.

I hope this is helpful and let me know if you have other questions,

Sincerely,

Subject: Re: 2029 University Avenue DRC Meeting 10/16/2025

Hello Nilu

Thanks for the response. I understand that because of the low income units this building gets a density bonus.

What I don't understand is why the City would choose to give one of the largest new buildings proposed for construction downtown a pass on complying with the bird safe glass ordinance. The City talks about new tall buildings promoting sustainability but we are experiencing a massive die off of animal species across the globe. Bird species are among the heaviest hit and have declined in large numbers in recent decades. Tall buildings in downtown areas play a major role in the deaths of migrating birds.

A recent study coauthored by the Audubon chapter NYC Bird Alliance found

that over one billion birds in the U.S. die each year from window collisions due to reflective glass and artificial light at night.

The builder has already received the benefit of additional floors to make money from this building. Does the Planning Department believe that the alleged financial viability of this building is more important than implementing an existing ordinance to aid in the protection of migrating birds at a time of ever increasing massive die offs. Were there not other "concessions" that could have been offered to the developer?

What is the value of the City's commitment to the bird safe glass ordinance if it can so easily be avoided with the City's blessing? This is not sustainable development.

Finally I assume this will all be discussed in the staff report. Which ZAB meeting is this proposed development now scheduled for?

> This project includes 15% Very-Low Income and 15% Moderate-Income units, in accordance with the State's Density Bonus Law, making it eligible for three concessions. These concessions are granted to support the financial feasibility of the project and do not require the applicant to provide a detailed rationale to the City. In their statement, the applicant simply notes that the concessions are necessary to ensure the project's financial viability.

RHOADES PLANNING GROUP

Memorandum

To: City of Berkeley Zoning Adjustments Board
From: Rhoades Planning Group
Date: November 13, 2025
Re: 2029 University Avenue Infill Development

The attached letter from Travis Brooks of Miller Starr Regalia lays out the legal requirements for the City's consideration of concessions pursuant to State Density Bonus Law, and particularly how it applies to the labor and bird safe glass concessions requested for the project at 2029 University Avenue. These concessions will save the project significant money and will help to offset the costs of building the below market rate units provided by the proposal and consistent with the findings for concessions pursuant to SDBL.

These costs are significant and are shown in the table below. In addition, it is important to also understand these costs with respect to the significant City/Municipal fees required for the project, which are shown in the table following the concessions cost savings table. Even with the concessions the City/Municipal fees represent more than 5% of the project's total costs, which we believe is one of the highest for a housing project in California.

CONCESSION REQUEST - PROJECT COST REDUCTION	
Apprenticeship	$ 1,893,000
Health Care	$ 2,839,000
Bird Safe Glass	$ 400,000
Total	**$ 5,132,000**

REQUIRED CITY FEES AND MITIGATION COSTS	
Permitting & Plan Check Costs	$ 3,484,773
Plan Check Acceleration Fee for Building Permit First Phase	$ 100,000
PG&E Power Connection & Capacity Charge	$ 329,412
EBMUD Water & Sewer Connection & Capacity Charge	$ 1,640,746
Cable & Phone (AT&T, Comcast, & Sonic) Connection	$ 235,294
Berkeley Unified School District Costs	$ 667,472
Streets and Open Space Improvement Plan Costs	$ 427,719
In-Lieu Art Costs	$ 391,326
In-Lieu Affordable Housing Costs	$ 929,559
Permit Expediter	$ 30,000
City Fee Contingency	$ 200,000
Total	**$ 8,436,301**

Berkeley, CA 94704

Re: Proposed Multi-Family and/or Student Housing Development At 2029 University Avenue (APN 057 2-5300801, ZP# 2024-0171 & ZP#2024-0182)
Suitability of Incentive and Concession Requests to Modify HARD HATS And Bird Glass Ordinance Requirements

Dear Honorable Members Of The Zoning Adjustments Board:

This office represents Laconia Development, LLC ("Laconia") in its applications for two alternative housing development projects at 2029 University Avenue in the City. One of these project alternatives proposes construction of 240 new residential apartment units in a single 23-story building, 18 of which would be deed-restricted affordable to very low income households and 18 of which would be deed-restricted affordable to moderate income households (total affordable units: 36) ("Project Alternative 1"). The other project alternative proposes construction of 160 new housing units which would provide housing for students in a single 23-story building. Twelve of these units would be deed-restricted affordable to very low income households, and 12 would be deed-restricted affordable to moderate income households (total affordable units: 24) ("Project Alternative 2").

Both Alternatives would deliver much needed housing to the community and represent meaningful progress addressing the City and state's pernicious housing shortage. The Alternatives are subject to the robust protections of the Housing Accountability Act ("HAA", Gov. Code, § 65589.5), Senate Bill 330 ("SB 330"), and the Density Bonus Law ("DBL", Gov. Code, § 65915).

As part of its project applications, Laconia appropriately requested three DBL incentives: two to reduce or eliminate certain provisions of the City's HARD HATS Ordinance ("HARD HATS Ordinance"), and one to eliminate certain provisions of the City's Bird Safe Glass Ordinance ("Bird Glass Ordinance").

The HARD HATS Ordinance sets forth labor and employment criteria for project workers, which significantly exceed those required by state and federal law. The Bird Glass Ordinance mandates costly glass requirements not required by state or federal

law. Granting of the requested incentives will result in significant reductions in project costs, which will help Laconia provide up to 36 affordable units and will increase the likelihood that the project receives the funding necessary to allow it to actually be built. Importantly, the incentives *will not* result in "any significant and unavoidable health and safety impacts" as that phrase is narrowly defined by state law. As a result, the City is required to grant the incentives.

Despite the above, we understand that parties with an economic interest in seeing the incentives not granted may claim that the incentives which relate to the HARD HATS Ordinance are somehow "novel and unorthodox" and would result in vaguely described impacts upon public health and safety. These claims are completely baseless. Project opponents have not, and cannot, identify any of the narrowly defined and rare "significant and unavoidable health and safety impacts" that would justify denial of the incentives.

I. Laconia Appropriately Seeks To Reduce / Modify Parts Of The HARD HATS and Bird Glass Ordinances, Which Are "Reduction(s) In Site Development Standards…" Or Other Regulatory Incentive(s) Providing Significant Cost Reductions.

For similar projects, opponents have inaccurately claimed that requested incentives from the HARD HATS Ordinance are "novel or unorthodox". However, the HARD HATS (and Bird Glass) provisions are exactly the sort of costly "development standards" the DBL requires local agencies to eliminate when incentives are requested. The purpose of such incentives is to provide cost reductions that enable construction of affordable housing.

Under the DBL, housing development projects providing qualifying levels of affordable housing are entitled to request varying numbers of incentives and/or concessions. (Gov. Code § 65915 subd. (d).)

The relevant incentives in this case are **"reduction(s) in site development standards**" as specified in Gov. Code § 65915 subd. (k), emph. added.
Development standards that may be reduced or modified by way of an incentive are broadly defined as including:

> **"a site or construction condition**, **including, but not limited to**, a height limitation, a setback requirement, a floor area ratio, an onsite open-space requirement, a minimum lot area per unit requirement, or a parking ratio that applies to a residential development pursuant to **any ordinance, general plan element, specific plan, charter, or other local condition, law, policy, resolution, or regulation that is adopted by the local government or that is enacted by the local government's electorate exercising its local initiative or referendum power,**

> **whether that power is derived from the California Constitution, statute, or the charter or ordinances of the local government."**

(Gov. Code § 65915 subd. (o)(2), emph. added.)

Here, the relevant HARD HATS and Bird Glass Ordinance provisions certainly fall under the DBL's broad definition of "development standards" which include "any ordinance or other local condition, law, policy, resolution, or regulation…" adopted by the City. There is no state building code or federal law requiring Laconia or the City to comply with the relevant provisions of the HARD HATS or Bird Glass Ordinance. Here, Laconia is requesting incentives/concessions so that it will not have to strictly comply with these particular policies, which significantly exceed those required in most cities and counties in the state.

II. The City Is Required To Grant The Requested Incentives And Any Failure To Do So Would Result In An Actionable Violation Of State Housing Law.

Under the DBL, when an applicant requests an incentive or concession, a local agency ***"shall"*** grant the concession or incentive unless a city makes a written finding based on substantial evidence that:

> (A) The concession or incentive does not result in identifiable and actual cost reductions…
>
> (B) The concession or incentive would have a specific, adverse impact… upon public health and safety….
>
> (C) The concession or incentive would be contrary to state or federal law.

(Gov. Code, § 65915(d)(1).)

In considering an incentive request, a city is required to interpret the DBL **"liberally in favor of producing the maximum number of total housing units."** (Gov. Code § 65915, subd. (r).) Where a city refuses to grant a requested incentive or concession in violation of the DBL, an applicant can initiate judicial proceedings to reverse a city's refusal and typically will recover reasonable attorney's fees and costs. (Gov. Code § 65915(f)(3).)

With regard to item (A) above, the requested incentives will result in millions of dollars in cost reductions. As the court in *Schreiber v. City of Los Angeles* (2021) 69 Cal.App.5th 549 recognized, an incentive ***is presumed*** to result in cost reductions that satisfy the DBL, and a local agency has the burden of proof to overcome such presumption. The millions of dollars of cost savings which result from these incentives mean that the City obviously cannot overcome the presumption.

Regarding item (B) above, to deny Laconia's incentives the City would need to identify a "… specific, adverse impact" upon public health or safety. (Gov. Code § 65915, subd.(d)(1)(B), § 65589.5(d)(2) .)

A "specific adverse impact" upon the public health or safety is narrowly defined as:

> "a significant, quantifiable, direct, and unavoidable impact, based on objective, identified written public health or safety standards, or conditions as they existed on the date the application was deemed complete." (Gov. Code § 65915, subd. (d)(2).)

The DBL and HAA's definition of a "specific, adverse impact" upon public health or safety is purposely narrow. As the Department of Housing and Community Development recognizes:

> **[t]he [Housing Accountability Act] considers that such impacts would be rare**: "It is the intent of the Legislature that the conditions that would have a specific, adverse impact upon the public health and safety, as described in paragraph (2) of subdivision (d) and paragraph (1) of subdivision (j), arise infrequently." (Gov. Code, § 65589.5, subd. (a)(3).)

(HCD, Housing Accountability Act Technical Assistance, September 15, 2020, at p. 20.)

First, we note that the standards for which the incentives are requested are not "public health or safety standards." They are requests that seek to force higher costs onto development projects which are attempting, in difficult economic times, to fulfill the mandate of the state of California to build more housing including affordable housing. Neither the HARD HATS Ordinance nor the Bird Glass Ordinance are intended to address any quantifiable and direct impact on public health or safety – in the same way, for example, that occupational safety, fire, hazardous materials regulations, or building codes do.

Project opponents similarly have not and cannot identify "a significant, quantifiable, direct, and unavoidable impact" on health or safety. There neither is, nor can there be, any evidence that not providing the specific impositions in the HARD HATS Ordinance will result in quantifiable, direct, or unavoidable health and safety impacts.

Finally, with regard to item (C) above, granting the requested incentives will not in any way violate state or federal law.

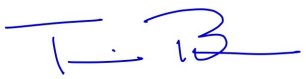
In sum, the City is required to grant the requested incentives and any failure to do so will result in violations of state housing law.

III. Conclusion.

Laconia looks forward to working with the City to deliver the much needed new homes proposed by the Project Alternatives consistent with the binding provisions of state housing law. Should you have any questions regarding the above, please do not hesitate to contact me directly.

Very truly yours,

MILLER STARR REGALIA



Travis Brooks

BERKELEY ZAB - ZONING ADJUSTMENTS BOARD MEETING

NOVEMBER 13, 2025

SO NOW WE ARE GOING TO, I KNOW WE HAVE, SINCE WE HAVE A PRESENTATION FROM STAFF, LATER WE ARE GOING TO DO THAT AFTER THE UNIVERSITY PROJECT. IF ANYONE SAW THAT ON THE AGENDA, THAT'S STILL HAPPENING. IT WILL JUST BE AFTERWARDS. SO WE ARE GOING TO DO SOMETHING, SINCE THIS PROJECT IS UNIQUE AND THERE ARE TWO PROJECTS, WHAT STAFF AND I HAVE DISCUSSED IS PRESENTING THEM AS ONE PROJECT. BUT GIVING BOTH THE APPLICANT AND ANYONE TO SPEAK A LITTLE BIT MORE TIME SINCE IT IS TWO PROJECTS. IT JUST SEEMS LIKE THE MOST LOGICAL WAY TO DO THAT, OTHERWISE, YOU KNOW, IF ANYONE DOES OBJECT THOUGH, I WILL OPEN THAT UP. WE WILL GIVE EVERYONE A LIjordanmTTLE MORE TIME; WE WANT TO BE THOROUGH AND HEAR FROM EVERYONE. NILU WILL BE DOING OUR STAFF PRESENTATION.

SHE WILL BE PRESENTING BOTH IN TANDEM. AND I'LL LET HER TAKE THAT ONE AWAY.

>> GOOD EVENING. MY NAME IS NILU KARIMZADEGAN. THE PROJECTS BEFORE YOU ARE 2029 UNIVERSITY AVENUE. I WOULD LIKE TO NOTE FOR THE RECORD THAT THERE ARE TWO TYPOS IN THE ZAB REPORTS WHICH REQUIRE CORRECTIONS. THE FIRST IS THE SB 330 APP COMPLETION DATE IS DECEMBER 10TH 2024 AND NOT JANUARY 9, 2025. AND THEN THE SECOND TYPO IS THAT ON PAGE 7 OF THE FINDINGS DOCUMENT, FOR BOTH ZP2024-0181 AND ZP2024-0182, SOUTHSIDE PREVAILING WAGES ARE INCLUDED AS ONE CONCESSION. THAT'S AN ERROR. EVERYWHERE ELSE ON THE APPLICATION AND ZAB REPORTS WE HAVE THREE CONCESSIONS. AND THEY INCLUDE APPRENTICESHIP REQUIREMENTS PER BMC 13.107.14D, HEALTHCARE, 107.050 AND BIRD-SAFE BUILDING PER SECTION 23.304.150. AND NOW I MOVE ON TO THE PRESENTATION. AS YOU CAN SEE THERE ARE TWO SEPARATE PERMIT NUMBERS AND PROJECT SCHEMES PROPOSED FOR THIS SITE. ZP2024-0181 AND ZP2024-0182. TWO DIFFERENT APPLICATIONS ARE SUBMITTED FOR THIS SITE. IN ORDER TO PROVIDE THE DEVELOPER WITH THE MAXIMUM FLEXIBILITY IN IDENTIFYING EQUITY PARTNERS AND SECURING PROJECT FINANCING. IN THIS PRESENTATION I WILL GO OVER BOTH OF THE PROJECT SCOPES, PROJECT TIMELINE, CEQA RECOMMENDATION, DENSITY BONUS INFORMATION, HOUSING ACCOUNTABILITY ACT AND STAFF RECOMMENDATION. THE PROJECT SITE IS LOCATED ALONG UNIVERSITY AVENUE, WEST OF SHATTUCK AVENUE WITHIN THE DOWNTOWN MIXED USE

DISTRICT OR CDU OUTER CORE AND WITHIN THE CITY'S DOWNTOWN AREA PLAN. THE PROJECT SITE IS SURROUNDED BY COMMERCIAL AND MULTI-FAMILY RESIDENTIAL AND MIXED USE BUILDINGS RANGING IN HEIGHT FROM ONE STORY TO EIGHT STORIES IN HEIGHT. BOTH PROJECT SCOPES PROPOSE TO DEMOLISH THE EXISTING TWO STORY COMMERCIAL BUILDING AND 10-CAR GARAGE STRUCTURE ON A 12,000 885 SQUARE FOOT LOT AND CONSTRUCT A 23 STORY, 256 FEET TALL, APPROXIMATELY 191,000 SQUARE FOOT RESIDENTIAL BUILDING. IN THE UPCOMING SLIDES, I WILL BE DESCRIBING THE TWO PROPOSED SCHEMES. WHICH APPROXIMATELY HAVE THE SAME BUILDING ENVELOPE. THE MULTI-FAMILY ORIENTED SCHEME WOULD BE CONTAINING 240 DWELLING UNITS INCLUDING 18 VERY LOW INCOME AND 18 MODERATE INCOME UNITS FOR 100% DENSITY BONUS. THE STUDENT ORIENTED SCHEME WOULD BE CONTAINING 160 DWELLING UNITS, INCLUDING 12 VERY LOW INCOME AND 12 MODERATE INCOME UNITS FOR 100% DENSITY BONUS. SHARED PROGRAM IN BOTH SCHEMES ARE THE GROUND FLOOR RESIDENTIAL, INCLUDING THE LOBBY, BIKE ROOM, MAIL ROOM, TRASH ROOM, AND UTILITIES. ON THE 23RD LEVEL, THERE'S A COMMUNITY SPACE, A FITNESS CENTER, AND A ROOF DECK. THERE ARE 29 OFF-STREET PARKING SPACES ON THE SECOND FLOOR GARAGE AND 167 LONG TERM BIKE PARKING SPACES. AS I NOTED EARLIER, BUILDING ENVELOPES ARE APPROXIMATELY THE SAME. UNITS ARE LARGER WITHIN THE STUDENT-ORIENTED DESIGN. MAKING THIS SCHEME INCLUDE LESS TOTAL NUMBER OF UNITS, 160 UNITS IN THE STUDENT-ORIENTED SCHEME VERSUS 240 UNITS IN THE MULTI-FAMILY SCHEME. OTHER PROGRAM

DIFFERENCES IN THE TWO SCHEMES ARE THE UNIT TYPES. NUMBER OF BEDROOMS. DENSITY BONUS NUMBERS AND NUMBER OF SHORT-TERM BIKE PARKING SPACES. MULTI-FAMILY SCHEME HAS 240 DWELLINGS, OUT OF WHICH 80 ARE STUDIOS. 60 UNITS ARE JUNIOR ONE BEDROOM. 60 ARE ONE BEDROOMS AND 40 ARE TWO BEDROOMS. AND THAT IS FOR A TOTAL OF 280 BEDROOMS. THERE ARE EIGHT SHORT-TERM BICYCLE SPACES IN THIS SCHEME. FOR THE STUDENT ORIENTED DESIGN WE HAVE 160 DWELLINGS, THAT INCLUDES 60 STUDIOS, 21 BEDROOMS, 23 BEDROOMS AND 64 BEDROOMS FOR A TOTAL OF 380 BEDROOMS. THERE ARE TEN SHORT-TERM BIKE PARKING SPACES IN THIS SCHEME. THE PROJECT WAS SUBMITTED LAST DECEMBER; THE USE PERMIT WAS DEEMED COMPLETE IN MAY OF 2025. DEMOLITION REFERRAL WAS REVIEWED AT LPC ON DECEMBER 4TH AND THEY TOOK NO ACTION. BOTH PROJECT DESIGNS WERE REVIEWED BY DRC ON OCTOBER 16TH AND THEY MADE A FAVORABLE RECOMMENDATION TO ZAB. THE ZAB MEETING TONIGHT WILL BE THE THIRD MEETING OUT OF THE FIVE, PER SB 330. TWO MEETINGS ARE LEFT. AND OUT OF THE TWO, ONE IS RESERVED FOR POTENTIAL CITY COUNCIL APPEAL. STAFF RECOMMENDATION TO THE ZONING ADJUSTMENTS BOARD THAT THE PROJECT IS EXEMPT FROM CEQA PER 15332 FOR IN-FILL DEVELOPMENT PROJECTS. UNDER THE CITY'S DENSITY BONUS PROCEDURE, THE BASE PROJECT FOR THE STUDENT-ORIENTED DESIGN IS 80 UNITS. AS MAXIMUM ALLOWABLE DENSITY FOR THE SITE BY PROVIDING 12 VERY LOW INCOME AND 12 MODERATE INCOME UNITS ON SITE, WHICH IS 30% OF THE 80 UNIT BASE DENSITY, THE PROJECT IS ELIGIBLE FOR 100% DENSITY OR 80

ADDITIONAL UNIT FOR TOTAL 160. THE BASE PROJECT FOR THE MULTI-FAMILY SCHEME IS 120 UNITS. AS THE MAXIMUM ALLOWABLE DENSITY FOR THE SITE. AND BY PROVIDING 18 VERY LOW INCOME AND 18 MODERATE INCOME UNITS ON SITE, WHICH IS 30% OF THE BASE, THE PROJECT IS ELIGIBLE FOR 100% DENSITY BONUS, OR 120 ADDITIONAL UNITS FOR A TOTAL OF 240 UNITS. THIS PROJECT IS REQUESTING THREE CONCESSIONS AND A NUMBER OF WAIVERS. A CONCESSION IS A MODIFICATION OF A DEVELOPMENT STANDARD THAT REDUCES THE COST OF PROVIDING AFFORDABLE HOUSING PER GOVERNMENT CODE SECTION 65915(D)(K). CONCESSIONS UNDER DENSITY BONUS ARE LIMITED IN NUMBER DEPENDING ON THE NUMBER OF AFFORDABLE UNITS PROVIDED. PER GOVERNMENT CODE SECTION 659.15 D, 2, CONSIDER. THREE CONCESSIONS ARE ALLOWED FOR THIS PROJECT AND THEY INCLUDE THE EXEMPTION FROM THE APPRENTICESHIP REQUIREMENT, EXEMPTION FROM THE HEALTHCARE EXPENDITURE AND EXEMPTION FROM THE BIRD-SAFE BUILDING REQUIREMENTS. A WAIVER IS A MODIFICATION OF A DEVELOPMENT STANDARD THAT WOULD OTHERWISE PHYSICALLY PRECLUDE THE CONSTRUCTION OF THE PROJECT WITH THE PERMITTED DENSITY BONUS AND CONCESSIONS. THE APPLICANT IS REQUESTING WAIVERS FROM SETBACKS, USABLE OPEN SPACE, USABLE OPEN SPACE LANDSCAPE AREA, BUILDING HEIGHT AND BUILDING WITH OVER 120 FEET IN HEIGHT, AND PROJECTIONS ABOVE HEIGHT LIMIT. JUST A QUICK SUMMARY THAT, OR REMINDER THAT PER THE HOUSING ACCOUNTABILITY ACT WHEN A HOUSING PROJECT COMPLIES WITH OBJECTIVE ZONING STANDARDS, THE CITY CAN

ONLY DENY OR APPROVE IT WITH REDUCED DENSITY IF IT MAKES THE FINDING THAT THE DEVELOPMENT HAS SPECIFIC ADVERSE IMPACT ON PUBLIC HEALTH OR SAFETY, AND IF THERE IS NO FEASIBLE METHOD TO MITIGATE OR AVOID THE SPECIFIC ADVERSE IMPACT. STAFF IS UNABLE TO MAKE THESE FINDINGS. BECAUSE OF PROJECTS COMPATIBILITY WITH THE ZONING ORDINANCE, GENERAL PLAN AND STATE POLICIES, STAFF RECOMMENDS THAT THE ZONING ADJUSTMENTS BOARD, ONE, FIND THAT THE PROJECT IS CATEGORICALLY EXEMPT FROM CEQA PER SECTION 15332 AND TO APPROVE BOTH USE PERMITS, ZP2024-0181 AND ZP2024-0182, SUBJECT TO FINDING AND CONDITIONS OF APPROVAL ATTACHED TO THE STAFF REPORT. THANK YOU.

>> CHAIR GAFFNEY: WONDERFUL. THANK YOU SO MUCH. DOES ANYONE FROM THE COMMISSION HAVE ANY QUESTIONS FOR STAFF RIGHT NOW? THIS ISN'T YOUR ONLY OPPORTUNITY, BUT FEEL FREE. IT DOESN'T LOOK LIKE WE NECESSARILY DO. SO WE ARE GOING TO GO TO THE APPLICANT PRESENTATION THEN. WE ARE GOING TO GIVE YOU MORE TIME SINCE ITS TWO PROJECTS. YOU CAN GO UP TO 10 MINUTES. I DON'T KNOW IF YOU NEED THAT MUCH, BUT I KNOW YOU HAVE MEMOS YOU PROVIDED US, SO WE ARE EXCITED TO HEAR FROM YOU.

>> I THINK WE HAVE IT. GOOD EVENING, MEMBERS OF THE ZAB, MADAM CHAIR AND STAFF. FIRST, THANK YOU ALL FOR GIVING US THE OPPORTUNITY TO PRESENT THE PROJECT TONIGHT. ISIAH IS GOING TO GO OVER SOME PROJECT DETAILS AND I WILL GO OVER THE FIRST COUPLE SLIDES AND HE WILL HELP US CLOSE OUT. WE SHOULDN'T NEED MORE

THAN THE FIVE MINUTES ALLOTTED. BUT ALSO THANKS STAFF FOR THE GOOD WORK IN GETTING US HERE AND WORKING WITH US ON THE DOCUMENTATION FOR THE INFILL EXEMPTION. I WILL NOT GO OVERALL THE INFORMATION THAT STAFF HAS ALREADY GONE OVER. THIS IS A UNIQUE PRESENTATION TO YOU TONIGHT. I BELIEVE IT MIGHT BE THE FIRST TIME YOU HAVE EVER CO-ENTITLED A PROJECT. IN THIS DAY AND AGE WHERE HOUSING HAS GOTTEN MORE AND MORE COSTLY TO BUILD, WHAT WE ARE TRYING TO DO HERE IS SET THIS PROJECT UP FOR THE MOST SUCCESS POSSIBLE. WE DON'T KNOW WHAT THE CAPITAL MARKETS WILL BE DOING A YEAR FROM NOW OR SIX MONTHS FROM NOW. WE ARE HOPING INTEREST RATES WILL CONTINUE TO FALL, BUT COSTS DO CONTINUE TO RISE, SO YOU SEE A MORE OR LESS STANDARD STYLE APARTMENT COMPLEX WITH UNITS LIKE THAT. AND YOU HAVE THE STUDENT-ORIENTED HOUSING PROJECT. THIS PROJECT IS IN THE OUTER CORE OF THE DOWNTOWN. NOW, I DON'T KNOW, ALMOST 15-YEAR-OLD DOWNTOWN PLAN. THE PROJECT PROVIDES A NUMBER OF AMENITIES FOR RESIDENTS. IT DOES HAVE A SMALL FOOTPRINT FOR THE OPEN SPACE ON THE ROOF BUT IT'S LOCATED RIGHT THERE IN ALMOST THE CORE OF THE DOWNTOWN AND CLOSE TO LOTS OF OTHER AMENITIES. WE ARE LESS THAN HALF A MILE FROM THE B.A.R.T. STATION DOWN SHATTUCK AVENUE, THERE'S A FULL SERVICE GROCERY STORE AND TRADER JOE'S TWO BLOCKS WEST OF US. THIS MIGHT BE THE MOST IMPORTANT SLIDE OF THIS PRESENTATION. AND I PUT IT HERE ON PURPOSE BECAUSE WE ALL NEED TO UNDERSTAND WHAT THE COSTS ARE THAT ARE FACING OUR HOUSING PROJECTS THESE DAYS. THE CITY'S

FEES ALONE FOR THIS PROJECT ARE GOING TO BE MORE THAN 5% OF THE PROJECT COSTS WHICH IS EXTRAORDINARY IN CALIFORNIA. GENERALLY SPEAKING WE SEE THEM LESS THAN 3% OF PROJECT COST. SO THIS PROJECT WITH CITY FEES, CITY MITIGATIONS, UTILITY COSTS AND SCHOOL DISTRICT FEES IS $8.5 MILLION BEFORE IT PUTS A SHOVEL IN THE GROUND. THAT'S A VERY, VERY HIGH NUMBER. I ALSO INCLUDED THE VALUE OF THE CONCESSIONS WE HAVE REQUESTED DOWN BELOW. SO THAT YOU CAN SEE WHAT THOSE COSTS ARE AS WELL. NOBODY WANTS TO SAY NO TO THE UNIONS. I GREW UP IN A UNION HALL. BUT WE HAVE TO BUILD HOUSING. AND WE HAVE TO GIVE THIS PROJECT THE BEST OPPORTUNITY THAT IT CAN HAVE TO GET FINANCED. AND WHEN IT COMES TIME TO SUBMIT THE BUILDING PERMIT ORZ PREPARE THE BUILDING PERMITS WHICH WILL COST ANOTHER $1 MILLION, THE APPLICANT WILL DECIDE IS THIS GOING TO BE STUDENT-ORIENTED AND COMPETE WITH ALL THE PROJECTS AS APPROVED AND BUILT OR GO BACK AND REFLECT THE STYLE OF SOMETHING MORE LIKE 15 YEARS AGO WHERE WE WERE LOOKING AT STANDARD APARTMENT PROJECTS. THAT CHOICE WILL HAVE TO BE MADE AT THAT POINT. AND AT THAT POINT WHEN A CONTRACTOR IS SELECTED THEN THE DEVELOPER WILL MAKE THEIR CHOICES ABOUT WHICH UNIONS, SOME, ALL, MAY, OR MAY NOT WORK ON THE PROJECT. BUT THE CONTRACTOR WILL BE QUALIFIED. THE CONTRACTOR WILL BE INSURED. GO AHEAD, ISIAH, TAKE IT.

>> THANK YOU, MARK. I'M ISIAH STACKHOUSE, NICE TO BE WITH YOU HERE TONIGHT. LOOKING AT THE GROUND LEVEL SITE PLAN WITH ENTRY

LOBBY RIGHT IN THE MIDDLE OF THE BUILDING, COMING BACK THERE'S A LEASING OFFICE, MAIL ROOM, A VERY LARGE BIKE ROOM. AND THEN TO THE LEFT HERE IS THE RAMP USING THE EXISTING CURB CUT THAT COMES UP TO THE SECOND FLOOR PARKING. AGAIN, THIS IS THE FLOOR PLAN FOR BOTH OPTIONS. THERE'S ALSO A STAIR DOWN TO UTILITY BASEMENT LEVEL WHERE WE HAVE LOCATED ALL OF THE UTILITIES THAT ARE ALLOWED TO GO IN THE BASEMENT THAT AREN'T LIFE SAFETY RELATED. THIS HAS BEEN THOROUGHLY STUDIED. WE HAD A CONSULTANT RUN ALL THE TURN TESTS ON IT. BOTH BUILDINGS UTILIZE THE SAME CORE. WE'VE BEEN WORKING WITH AN ENGINEER FOR CLOSE TO A YEAR NOW TO FULLY ENGINEER THE CORE FOR BOTH BUILDINGS AND THE M.E.P. SYSTEMS. COMING TO THE TYPICAL FLOOR PLAN, WE ARE UTILIZING THE SAME STRUCTURAL CORE. SAME SETBACKS FOR BOTH BUILDINGS. AND REALLY WHAT WE HAVE DONE IS TO SORT OF CHANGE THE DEMISING WALLS TO BE EITHER, THE APARTMENT VERSION HERE, WHICH HAS STUDIOS, ONE’S, AND TWO'S, PRIMARILY. VERSUS THE STUDENT VERSION, WHICH HAS SOME LARGER, UP TO FOUR BEDROOM UNITS. BOTH OF THEM WE'VE UTILIZED THE SAME DESIGN TECHNIQUE WHERE WE HAVE SETBACK AREAS WE WILL SEE IN THE ELEVATIONS. BUT SETBACK AREAS AND THESE LARGER LIVING ROOMS WHERE WE HAVE STEPPED THE BUILDING IN AND TURNED IT TO TERRACOTTA. THIS IS TOP FLOOR PLAN WITH THE LANDSCAPE. WE'VE GOT A ROOF DECK THAT FULLY WRAPS THE PROJECT. A LARGE FITNESS ROOM. AND THEN A LARGE MULTI-PURPOSE ROOM WITH A KITCHEN AT THE FRONT FOR A LOUNGE INTO FLEXIBLE WORKSPACE HERE.

HERE IS THE ELEVATIONS. SO AGAIN, BECAUSE THE FLOOR PLANS ARE SLIGHTLY DIFFERENT, THE ELEVATIONS REFLECT WHAT'S HAPPENING INSIDE EACH VERSION. BUT EACH OF THEM IS THE EXACT SAME HEIGHT. HAS THE EXACT SAME GROUND FLOOR IN LEVEL 2, THE EXACT SAME TOP AND AGAIN, SAME SETBACKS, SAME OVERALL HEIGHT. IT'S A VERY SUSTAINABLE PROJECT. IT HAS STORM WATER MANAGEMENT CONTROL, DROUGHT TOLERANT LANDSCAPING, LOW-FLOW WATER FEATURES. GREAT ENERGY FEATURES. IT'S REALLY A TRANSIT-ORIENTED DEVELOPMENT DREAM WITH LOW PARKING RATIO, LOTS OF BIKE AND INCREDIBLE PEDESTRIAN ENVIRONMENT. THAT'S A VIEW OF THE LOBBY THERE. THANK YOU. THAT CONCLUDES OUR PRESENTATION. BUT WE ARE HERE FOR ANY QUESTIONS AND WE CAN GO BACK INTO ANYTHING IN MORE DETAIL.

>> THEN THE HANDOUTS THAT YOU WERE PRESENTED TONIGHT, KIND OF FOLLOWS THE LAST TWO MEETINGS THAT I'VE BEEN HERE WITH YOU. LAST TIME I PROVIDED YOU WITH MY OWN MEMO ON CONCESSIONS AND STATE LAW RELEVANCE. THIS TIME, PROJECT ATTORNEYS PROVIDED PROBABLY A BETTER LETTER THAN MINE FOR YOUR REVIEW. AND ON THE COVER OF THAT IS A MEMO FROM US THAT REITERATES THE COST SAVINGS FOR THE CONCESSIONS. SO WITH THAT, WE ARE HAPPY TO ANSWER ANY QUESTIONS THAT YOU HAVE.

>> CHAIR GAFFNEY: WONDERFUL. THANK YOU SO MUCH FOR YOUR PRESENTATION. I GUESS I WILL START US OFF WITH A QUESTION REAL FAST. I WAS GOING TO ASK ABOUT THE PARKING AND WHAT MADE YOU DECIDE TO DO PARKING IN THIS PROJECT BEING SO CLOSE TO PUBLIC

TRANSIT?

>> THAT'S FAIR. YOU KNOW, MOST PROJECTS, ESPECIALLY THOSE THAT ARE STUDENT ORIENTED HAVE CHOSEN TO GO GENERALLY CAR-FREE. THIS DEVELOPER BELIEVES THERE SHOULD BE PARKING SPACES FOR BUILDING EMPLOYEES, BUILDING MANAGERS AND SMALL HANDFUL FOR FOLKS WHO MIGHT NEED TO RENT OR LEASE THEM BECAUSE OF THEIR JOBS, THE AFFORDABLE HOUSING HOUSEHOLDS, ET CETERA. SO UP LIKE MOST, THIS HAS SOME. THERE'S AN EXISTING CURB CUT HERE, SO WE AREN'T IMPOSING A NEW CURB CUT WHERE THERE HASN'T BEEN ONE HISTORICALLY.

>> CHAIR GAFFNEY: OKAY.

>> AND IT'S ON THE SECOND FLOOR BECAUSE IT'S A LOT LESS EXPENSIVE THAN PUTTING IT DOWN IN THE BASEMENT.

>> CHAIR GAFFNEY: THANK YOU. ANYONE HAVE ANY MORE QUESTIONS FOR THE APPLICANT? COMMISSIONER SANDERSON?

>> D. SANDERSON: I HAVE A QUESTION ON THE MEMO THAT YOU DISTRIBUTED TODAY. ON THE CITY MUNICIPAL FEES REPRESENT MORE THAN 5% OF THE PROJECT'S TOTAL COSTS. SO YOU ARE REFERRING TO THE SECOND BOX, SECOND TABLE ON YOUR MEMO? AND NOT THE VALUE OF THE CONCESSIONS?

>> YEAH, LET ME CLARIFY. SO THESE ARE BOTH TABLES. THE FIRST TABLE UP THERE, THE LONGER ONE ARE CITY AND UTILITY FEES AND MITIGATION COSTS, THAT'S $8.5 MILLION. THAT'S 5% OF THE PROJECT'S COSTS. A LITTLE MORE. THE CONCESSION REQUESTS BELOW

ARE ADDITIONAL $5.1 MILLION. WITH THE ADDITION OF THOSE WOULD PUT THE TOTAL PROJECT COST AT MORE THAN 10%, JUST THOSE LINE ITEMS THAT YOU SEE.

>> D. SANDERSON: OKAY, THAT'S WHAT I WAS TRYING TO FIGURE OUT. THANK YOU.

>> CHAIR GAFFNEY: GOOD TO CLARIFY THAT. ANYONE ELSE? YEAH, COMMISSIONER THOMPSON?

>> M. THOMPSON: THIS IS KIND OF OBVIOUS, BUT CAN YOU JUST EXPLAIN WHAT APPRENTICESHIP AND HEALTHCARE MEANS?

>> THE APPRENTICESHIP IS SKILLED AND TRAINED WORKFORCE. I THINK IT'S PROBABLY ONE OF THE MOST IMPORTANT THINGS THAT THE UNIONS PROVIDE FOR THE WORKFORCE. THEY WILL BE ABLE TO EXPLAIN IT MUCH BETTER THAN I CAN. BUT PEOPLE ARE BROUGHT IN AS TRAINEES, ESSENTIALLY. THEY SPEND A YEAR OR TWO OR THREE IN THAT FUNCTION UNTIL THEY BECOME JOURNEY LEVEL LABORERS. SO WHAT YOU HAVE, ADDITIONAL PEOPLE ON THE SITE BECAUSE THEY ARE LESS SKILLED. AND YEAH, THAT'S HOW I UNDERSTAND THE APPRENTICESHIP PROGRAM. AND THEN WAS THERE ANOTHER QUESTION?

>> M. THOMPSON: AND THE HEALTHCARE ALSO?

>> HEALTHCARE IS SIMILAR. MAKING SURE THAT, THERE'S BASICALLY THREE LEGS THAT THE UNION STOOLS, PREVAILING WAGE. IT'S INSURANCE FOR WORKERS AND FAMILIES. AND IT'S THE APPRENTICESHIP PROGRAMS. SO THE INSURANCE, I'M NOT SURE EXACTLY WHAT ALL OF THE HEALTHCARE IS PROVIDED GENERALLY WITH THE TRADES COUNCIL

PARTICIPANTS. BUT THE CONTRACTORS THAT MY CLIENT WILL BE USING ALSO PROVIDE INSURANCE FOR THEIR LABORERS. IT'S PROBABLY NOT THE SAME LEVEL OR QUALITY AS WHAT THE UNIONS PROVIDE. AND PART OF THAT IS WHAT YOU SEE IN THE COST DIFFERENCE RIGHT THERE.

>> CHAIR GAFFNEY: ALL RIGHT, THANK YOU. COMMISSIONER PALMATIER?

>> S. PALMATIER: SO AS YOU ARE DEVELOPING A PROJECT, SUCH AS THIS, AND YOUR PROJECT IS ENTITLED TO DIFFERENT CONCESSIONS, CAN YOU EXPLAIN THE PROCESS WHICH WITH YOU GO THROUGH TO DECIDE WHICH CONCESSIONS YOU ARE GOING TO PUT INTO THE APPLICATION?

>> USUALLY IT'S RELATIVELY STRAIGHT FORWARD. WHAT ARE THE THING THAT'S ARE GOING TO COST THE MOST MONEY FOR THE PROJECT. SO THAT'S WHAT YOU SEE HERE.

>> CHAIR GAFFNEY: DOES THAT SATISFY YOUR QUESTION?

>> S. PALMATIER: SURE. I MEAN, I CAN UNDERSTAND THE RATIONALE APPLIED. CAN YOU EXPLAIN HOW YOU GET ESTIMATES FOR THESE COSTS?

>> OUR CLIENT HAS WORKED WITH UNION AND NON-UNION CONTRACTORS. AND THESE ARE THE COSTS THAT THEY'VE PUT TOGETHER BASED ON THEIR UNION CONTRACTOR PROJECTS IN THE PAST.

>> S. PALMATIER: SO THEY ARE ESTIMATES BASED UPON PRIOR INFORMATION.

>> LEARNED EXPERIENCE.

>> S. PALMATIER: THANK YOU.

>> CHAIR GAFFNEY: ONE FOLLOW-UP QUESTION. HOW MANY CONCESSIONS ARE ALLOWED, THERE'S A LIMITED NUMBER YOU CAN ASK FOR.

>> THIS PROJECT GETS THREE. IT WOULD ONLY GET TWO BUT IT'S GOING FOR THE ADDITIONAL TRANCHE OF DENSITY BONUS, WHICH GETS THE ADDITIONAL CONCESSION. IF WE HAD MORE WE WOULD PROBABLY GO AFTER SOSIP AND ART BUT WE DON'T.

>> CHAIR GAFFNEY: THANK YOU FOR CLARIFYING THAT. COMMISSIONER THOMPSON?

>> M. THOMPSON: THIS MIGHT BE A QUESTION FOR STAFF. BUT HAS THERE BEEN ANY PRECEDENCE OF THE PERMITTING AND PLAN CHECK COSTS? HAS THERE BEEN ANY CONCESSION OF THAT OR ANY REDUCTION OF THAT? IS THAT A POSSIBILITY?

>> NO.

>> CHAIR GAFFNEY: IS THAT A QUESTION FOR STAFF? IS THAT EVEN SOMETHING THAT IS ALLOWED, IS THAT AN ALLOWED CONCESSION?

>> NO.

>> WE HAVE BEEN INFORMED BY THE CITY ATTORNEY IN THE PAST THAT THE CITY'S FEES, NEITHER THE HOUSING OR PLAN CHECK AND ACTUAL LABOR FEES ARE NOT AVAILABLE FOR CONCESSION.

>> LIKEWISE, THERE'S A VERY LARGE EB MUD FEE FOR UTILITIES BUT THAT'S NOT A PLANNING-RELATED FEE.

>> CHAIR GAFFNEY: THANK YOU FOR CLARIFYING. COMMISSIONER DUFFY?

>> Y. DUFFY: I HAVE A QUESTION FOR STAFF. DO YOU BELIEVE IT'S WITHIN THE ZONING PURVIEW TO BE ABLE TO DISCUSS AND DETERMINE CONCESSIONS AND WAIVERS? OR DO YOU THINK THAT CAN AND SHOULD AND NEED TO HAPPEN AT THE STAFF LEVEL ONLY WITH THE CITY ATTORNEY?

>> SO STAFF DOES REVIEW WAIVERS AND CONCESSION REQUESTS. AND USUALLY MAKES DETERMINATIONS, IF YOU WILL, ON THEIR OWN. SOMETIMES WE WILL CONSULT WITH THE CITY ATTORNEY FOR CONCESSIONS LIKE THIS WHERE IT HASN'T BEEN REQUESTED BEFORE. SO IN THIS CASE, FOR HARDHATS AND SOUTHSIDE PREVAILING WAGES FOR THE OTHER PROJECTS THAT HAVE COME BEFORE THIS ONE, WE HAVE CONSULTED WITH THE CITY ATTORNEY ON THOSE.

>> Y. DUFFY: THANK YOU.

>> CHAIR GAFFNEY: DO YOU HAVE A FOLLOW-UP, COMMISSIONER SANDERSON? GOOD CONVERSATIONS.

>> D. SANDERSON: I THINK PART OF YOUR QUESTION WAS WHETHER WE ARE --

>> Y. DUFFY: EQUIPPED.

>> D. SANDERSON: RESTRICTED FROM DISCUSSING THEM. OR MAY WE DISCUSS THESE?

>> YOU CAN DISCUSS THEM. THE ONUS IS ON THE CITY TO PROVE THAT A CONCESSION HAS A SPECIFIC ADVERSE IMPACT ON PUBLIC HEALTH AND SAFETY BEFORE WE CAN MAKE THAT FINDING TO DENY A REQUEST FOR A CONCESSION OR A WAIVER. IT'S A VERY HIGH BAR TO ACHIEVE. AND TO MY KNOWLEDGE, I DON'T THINK IT'S BEEN DONE BEFORE. SO WE GENERALLY DON'T, I MEAN WE CAN DISCUSS IT, BUT I GUESS IT'S VERY DIFFICULT TO DENY SOMETHING LIKE THAT.

>> IF I MIGHT ADD TO THAT, IT'S NOT JUST A FINDING ON HEALTH AND SAFETY. THERE HAS TO BE AN ALREADY-ADOPTED BY THE CITY COUNCIL,

SET OF OBJECTIVE HEALTH AND SAFETY STANDARDS AGAINST WHICH YOU WOULD MEASURE THIS. THE STATE LAW ITSELF ON THE CONCESSIONS SAYS THESE ARE RARE FINDINGS THAT WOULD BE MADE UNDER THE STATE LAW.

>> CHAIR GAFFNEY: THANK ALL FOR CLARIFYING THAT. HEARING WHAT WE ARE UP AGAINST ON THESE VOTES IS VERY IMPORTANT. SO I APPRECIATE ALL THE CLARIFYING QUESTIONS. AND OF COURSE, I KNOW WE ALL ARE AT LEAST SPEAKING FOR MYSELF, THEY ARE NOT THE GREATEST, BUT ALSO WE HAVE TO DETERMINE LEGAL, IT'S ALL ABOUT LEGALITY. BUT OF COURSE, WE DEFINITELY WANT TO HEAR, DO WE HAVE ANY MORE QUESTIONS FOR STAFF?

>> Y. DUFFY: A FOLLOW-UP, IF THAT'S OKAY. SO JUST TO REITERATE AND BE CLEAR, HAS STAFF FOUND ANY REASON TO DENY THE CONCESSIONS BEING REQUESTED TODAY?

>> NO.

>> Y. DUFFY: THANK YOU.

>> CHAIR GAFFNEY: WONDERFUL. AND WITH THAT WE WILL MOVE ONTO PUBLIC COMMENT. BECAUSE OF COURSE WE DO WANT TO HEAR FROM EVERYONE, THIS IS AN INCREDIBLY IMPORTANT ISSUE THAT'S COMING UP ON MANY PROJECTS. WE ARE GOING TO START WITH IN-PERSON. I CURRENTLY HAVE FOUR GREEN CARDS. BUT YOU CAN COME UP, IF YOU WISH TO SPEAK FEEL FREE TO COME AND FILL OUT THOSE GREEN CARDS AND I WILL CALL ON EVERYONE ONLINE AFTER I'M DONE WITH IN-PERSON. SO NOW IS A GREAT TIME TO RAISE YOUR HAND. WE WILL BE GIVING EVERYONE FOUR MINUTES TO SPEAK. I KNOW IT'S ON TWO

PROJECTS. SO WE WANT TO MAKE SURE THAT'S FAIR AND EVERYONE IS HEARD. WE WILL PUT A TIMER ON THE SCREEN FOR FOUR MINUTES AND I WILL GIVE A GENTLE REMINDER WHEN IT'S AROUND THAT TIME. DO TRY TO WRAP UP AROUND THEN. ALL RIGHT. WE ARE GOING TO FIRST START WITH DAVID. IF YOU WANT TO COME ON UP HERE, DAVID. PERFECT.
>> GOOD EVENING, CHAIR, MEMBERS OF THE BERKELEY ZONING ADJUSTMENTS BOARD. MY NAME IS DANIEL GREG. HORRIBLE WRITING, RIGHT? I'M THE SENIOR ORGANIZER FOR LOCAL, CARPENTERS IN NORTHERN CALIFORNIA, 4,000-5,000 HERE IN ALAMEDA COUNTY. I WANT TO THANK STAFF FOR CORRECTING THE RECORD FOR WHAT HAPPENED AT THE OCTOBER 9TH MEETING. I THINK THERE'S GOING TO BE A LOT OF THAT AS THESE THINGS GO ON AND THE PROJECT APPLICANT MAKES STATEMENT THAT ARE GENERALLY UNTRUE. ALSO AT THE OCTOBER 19TH MEETING THERE WAS A LOT OF CONFLATION BETWEEN UNION WORKERS, PROJECT LABOR AGREEMENTS AND THE LABOR STANDARD CONCESSIONS THAT WERE PROPOSED. THESE LABOR PROTECTIONS FOR WORKERS ARE NOT JUST FOR UNION WORKERS. IT'S FOR ANY WORKERS BUILDING THE PROJECT AND CENTERED AROUND PREVAILING WAGE, APPRENTICESHIP STANDARDS AND HEALTHCARE. IT'S UNFORTUNATE WE FIND OURSELVES HERE WITNESSING THE DISMANTLING. IT USED TO BE AN UNSPOKEN SECRET THAT A HOUSING PROJECT THAT DIDN'T INCLUDE STANDARDS OR UNION REPRESENTATION DIDN'T INCLUDE HEALTHCARE. NOW IT'S WRITTEN RIGHT INTO THE APPLICATION. CAN ANYONE IN THIS ROOM SAY WITH A STRAIGHT FACE THAT CONSTRUCTION WORKERS DO NOT DESERVE HEALTHCARE OR THE NEED

FOR ADDITIONAL UNITS SHOULD COME AT THE COST, EXPENSE AND WELFARE OF THE WORKERS BUILDING THE UNITS? LACONIA WANTS A LICENSE FROM THE CITY OF BERKELEY TO DRIVE UP HEALTHCARE PREMIUMS FOR ALL OF US, WHO DO ENJOY BENEFITS OF EMPLOYER-PROVIDED HEALTHCARE COSTS. KAISER WILL PASS ON THE COSTS. THIS SHOULD LEAVE A BAD TASTE IN EVERYONE'S MOUTH. WE ASK THE BOARD TO DENY THE LABOR BOARD CONCESSIONS TONIGHT.

>> CHAIR GAFFNEY: THANK YOU, DANIEL. SORRY FOR GETTING YOUR NAME WRONG INITIALLY. DID WE PUT FOUR MINUTES ON THE TIMER? ONLY HAS THREE. JUST KNOW YOU HAVE A MINUTE LONGER, JUST SO THAT IS CLEAR. MAURICIO, YOU ARE UP NEXT. YOU WILL HAVE YOUR FOUR MINUTES.

>> GOOD EVENING, MADAM CHAIR, COMMISSIONERS, I’M AN ORGANIZER FOR LOCAL 713, ALAMEDA COUNTY. ESPECIALLY BERKELEY. FOR THE PAST FEW YEARS WE HAVE SEEN MORE CARPENTERS LIVING IN BERKELEY COMING INTO THE HALL FOR MEMBERSHIP. WHEN WE ASK THEM WHY THEY SIMPLY SAY IT'S THE WAGES, IT'S THE BENEFITS. THIS IS HOW I'M GOING TO SUPPORT MY FAMILY. BERKELEY'S CONTINUED GROWTH AS AWE CITY BENEFITS NOT ONLY THE PEOPLE WHO WILL LIVE AND WORK HERE, BUT ALSO THOSE WHO BUILD AND MAINTAIN THIS COMMUNITY. RESPONSIBLE DEVELOPMENT HELPS RECRUIT THE PEOPLE IN THE CITY DESPERATELY NEEDS TO BUILD HIGH QUALITY JOBS WITH HIGH LABOR STANDARDS. OUR REQUEST FOR THIS PROJECT IS CLEAR. WE ARE ASKING FOR THIS PROJECT TO HAVE HEALTHCARE REQUIREMENTS AND APPRENTICESHIPS. FOR

THE WORKERS WHO WILL BUILD IT. WE ARE ASKING FOR THIS PROJECT TO MAINTAIN IN THE SPIRIT OF HARDHATS THE LABOR STANDARDS THAT THE COMMUNITY INTENDS FOR BERKELEY'S GROWTH. THE CONCESSIONS ARE THE STATE DENSITY BONUS LAW, STATE DENSITY BONUS BY LAW ARE MEANT TO ALLOW PROJECTS TO ELIMINATE REQUIREMENTS THAT WILL UNNECESSARILY BURDEN THE PRODUCTION OF AFFORDABLE HOUSING. THE INTENT IS NOT MEANT TO UNDERMINE THE HEALTH AND SAFETY OF WORKERS WHO BUILD THESE PROJECTS. OR UNDERMINE OUR ABILITY TO CONTINUE TO RECRUIT AND TRAIN THE NEXT GENERATION OF CARPENTERS. FOR THOSE THAT DON'T KNOW, THE CARPENTERS ON SITE, CONSTRUCTION WORKERS ON SITE WERE SIX MONTHS TO A YEAR. IF THERE'S ANOTHER JOB TO MOVE ONTO AFTER THAT, THEY MOVE ON AFTER THAT, IF NOT THEY GET TWO CHECKS AND LAID OFF AND BACK TO MAKING $0 AN HOUR. IF THEY GET HURT AND DON'T HAVE HEALTHCARE THEY ARE COMING OUT OF POCKET THOUSANDS OF DOLLARS. OFTEN TIMES THEY CAN'T AFFORD IT. THOSE BILLS KEEP STACKING. I HAVE HEARD THE STORIES AND TALKED TO INDIVIDUALS WHO HAVE TO FILE FOR BANKRUPTCY BECAUSE THEY CAN'T AFFORD THE HEALTHCARE BILLS. IF THEIR WIFE IS GOING INTO LABOR OR KIDS GET HURT AND THEY DON'T HAVE THE HEALTHCARE WITH THE LABOR STANDARDS IN PLACE, THEN THOSE MEDICAL BILLS WILL CONTINUE TO SKYROCKET. WE ASK THE BOARD MEMBERS TO ENSURE THAT HEALTHCARE APPRENTICESHIP REQUIREMENTS ARE UPHELD FOR THIS PROJECT SO BERKELEY'S GROWTH TRULY BENEFITS THE COMMUNITY. NOT JUST THOSE WITH POWER AND MONEY IN THEIR POCKETS. THANK YOU, HAVE A GREAT

NIGHT.

>> CHAIR GAFFNEY: THANK YOU SO MUCH, MAURICIO. ALL RIGHT. TIM. COME ON UP, TIM.

>> YES, THANK YOU VERY MUCH. MY NAME IS TIM FRANK; I'M REPRESENTING THE BUILDING AND CONSTRUCTION TRADES COUNCIL OF ALAMEDA COUNTY. WE ARE ASKING YOU TO DENY THE CONCESSIONS. WE ARE NOT ASKING YOU TO TURN DOWN THE PROJECT. WE WOULD LOVE TO SEE THIS PROJECT BUILT. BUT WE BELIEVE IT NEEDS TO BE BUILT UNDER CONDITIONS THAT ARE SAFE, AND IT NEEDS TO BE BUILT UNDER CONDITIONS THAT ARE FAIR TO THE WORKERS. AND THE CONCESSIONS THAT THE PROJECT APPLICANT IS ASKING FOR DOES NOT, IS NOT, WOULD NOT COMPLY WITH THOSE REQUIREMENTS. SO, WHAT YOU HAVE TO UNDERSTAND ABOUT THIS IS THIS IS WHAT WE SEE IN THREE PROJECTS THAT HAVE BEEN BROUGHT BEFORE YOU IN THE LAST MONTH AND A HALF. THE FIRST EXAMPLES ANYWHERE IN THE STATE WHERE WE HAVE SEEN THE DENSITY BONUS CONCESSIONS USED TO ASK FOR WAIVERS OF LABOR STANDARDS. AND WE HAVE PRESENTED YOU INFORMATION THAT DOCUMENTS THE HEALTH AND SAFETY BENEFITS OF THE PREVAILING WAGE, THE HEALTH SAFETY BENEFITS OF APPRENTICESHIP AND HEALTHCARE. THEY ARE QUANTIFIABLE, THERE'S RESEARCH BACKING THIS. SO THE QUANTIFIABLE WHAT YOU ARE ASKED TO FIND, THE STAFF COULD FIND, BASED ON THE INFORMATION, THE FINDINGS YOU MAY NEED. WE BELIEVE YOU WANT TO. BUT THE COUNCIL SENT A STRONG SIGNAL IT WANTED BUILDINGS TO BE BUILT UNDER CONDITIONS THAT WERE SAFE, BUILT

UNDER CONDITIONS THAT WOULD PROVIDE FOR THE HEALTH AND WELFARE OF THE FAMILIES OF THE WORKERS WHO ARE BUILDING THEM. AND THE HARDHATS ORDINANCE PROVIDES THAT GUARANTEE. AND THE APPLICANT HERE IS ASKING TO WAIVE THOSE STANDARDS. AND MARK HAS SAID THAT HE THINKS WE SHOULD NOT WORRY, THAT THE CONTRACTOR WILL BE QUALIFIED. BUT THE CONCESSIONS HE IS ASKING FOR GIVE US GREAT REASON TO BE CONCERNED. THE FACT THEY ARE SAYING, IN ORDER TO BUILD THIS THEY NEED TO USE A CONTRACTOR THAT IS NOT PROVIDING EMPLOYEES THE TRAINING THAT HELPS MAKE THE PEOPLE BEHIND SAFE WORKERS. THEY CAN GO TO A JOB SITE AND BE SAFE THEMSELVES, WORK AROUND OTHERS AND NOT HURT OTHERS. BUT THE CONTRACTORS HE WANTS TO USE AREN'T PAYING FOR THAT KIND OF TRAINING THAT WOULD HELP PROVIDE A SAFE WORK SITE. IF YOU LOOK AT THE RECORD IN BERKELEY, REMEMBER LIBRARY GARDENS WHERE YOU SAW ALL OF THOSE IRISH STUDENTS THAT PERISHED AT THE HANDS, BECAUSE OF UNQUALIFIED WORKERS THAT HAD DONE WORK ON THE BALCONY AND IT WAS NON-UNION WORKERS THAT WERE NOT TRAINED THAT DID NOT PROPERLY BUILD THAT STRUCTURE. AND IT POSED A HEALTH AND SAFETY RISK FOR THE COMMUNITY. LOOK AT 1190 ADDISON, THE SITE WHERE AN IRON WORKER WAS KILLED. A NON UNION DROPPED BY A NON-UNION CARPENTER DROPPING A TOOL FROM ABOVE. THAT'S THE HEALTH AND SAFETY THREAT WE ARE TRYING TO ALLEVIATE THROUGH THE USE OF SKILLED WORKERS WHO ARE PROPERLY PAID AND HAVE APPROPRIATE HEALTHCARE BENEFITS. AND WHEN THEY TELL YOU THEY ARE GOING TO ACHIEVE THE LEVEL OF

SAVINGS THEY ARE CLAIMING, AND THAT SOMEHOW THESE QUALIFIED CONTRACTORS ARE GOING TO BE PROVIDING HEALTHCARE, HAVE TO ASK YOURSELF, HOW ARE THEY GOING TO GET THE SPECIFIC NUMBERS THEY WERE LOOKING FOR, THEY TOLD YOU THEY WOULD GET FOR THIS PROJECT IF THEY ARE NOT SUBSTANTIALLY DENYING THE FAMILIES THE HEALTH BENEFITS THEY DESERVE. AND THAT THE CITY OF BERKELEY HAS, THROUGH POLICY, SAID THEY ARE OWED. AND WE THINK THIS IS A CLEAR QUESTION FOR THE COUNCIL. WE WOULD LOVE TO SEE YOU DENY THE CONCESSIONS. AND I REALIZE THAT THE STAFF HASN'T GIVEN YOU THE FINDINGS YOU NEED.

>> CHAIR GAFFNEY: YOU NEED TO WRAP UP IN ONE OR TWO MORE SENTENCES. SORRY.

>> RIGHT. SO I MEAN, YOU JUST HAVE, I DO NOT BELIEVE THAT THE STAFF HAS ACTUALLY DONE A VERY COMPLETE REVIEW OF THIS QUESTION AND WOULD LOVE TO SEE A MORE RIGOROUS ANALYSIS PROVIDED TO JUSTIFY CONCESSIONS THAT WE DO NOT BELIEVE HAVE A FAIR BASIS IN EITHER LAW OR MORAL GROUNDING.

>> CHAIR GAFFNEY: THANK YOU SO MUCH, TIM. WE DO HEAR ALL YOU GUYS AND THIS IS A VERY DIFFICULT ISSUE. THANK YOU SO MUCH FOR COMING OUT HERE AND VOICING ALL OF THIS. KAY, YOU ARE UP NEXT.

>> HI THERE, MY NAME IS KAY MATUN, I'M AN EAST BAY RESIDENT AND A UNION CARPENTER AT LOCAL 628. I CAN SPEAK ON THE BENEFITS OF APPRENTICESHIP. CONSTRUCTION JOB SITE IS A DANGEROUS PLACE. AND WITH APPRENTICESHIP WE ARE PROVIDED TRAINING CLASSES. A SET OF

REQUIREMENTS THAT COMPANIES HAVE TO MEET IN TRAINING. IT MAKES EVERYONE ON THE JOB SITE SAFER. IT PROVIDES A FUTURE FOR THE CONSTRUCTION INDUSTRY SO THERE ARE SKILLED AND TRAINED INDIVIDUALS IN THE FUTURE. YOU'RE NOT, YOU KNOW, SELLING YOURSELF SHORT NOW TO JUST WIND UP WITH NO ONE WHO KNOWS HOW TO BUILD THINGS IN THE FUTURE. IT ALSO PROVIDES A LOT OF OPPORTUNITY FOR PEOPLE WHO HAVEN'T WORKED IN THE INDUSTRY WHO ARE GETTING INTO IT. IT ALLOWS FOR INCREASED DIVERSITY IN THE WORKFORCE AS WELL. AND I THINK EVERYONE IS PROBABLY AWARE OF CONCERNS OVER RISING HEALTHCARE COSTS RECENTLY. I UNDERSTAND THE VOLATILITY OF THE MARKET AND THE EXPENSE OF BUILDING MATERIALS. BUT DENYING HEALTHCARE AND TO WORKERS THAT ARE PART OF THE COMMUNITY CAN ONLY BE A NEGATIVE IMPACT FURTHER ON. THOSE COSTS ARE JUST GOING TO BE PASSED TO THE COMMUNITY. AND POLICIES LIKE THE 2023 HELPING ACHIEVE RESPONSIBLE DEVELOPMENT WITH HEALTHCARE AND APPRENTICESHIP TRAINING ORDINANCE SHOWS THE CITY OF BERKELEY IS SERIOUS ABOUT SUPPORTING RESPONSIBLE HOUSING DEVELOPMENT. RECENTLY STATE SENATOR AND FORMER MAYOR OF BERKELEY JESSE ARREGUIN WEIGHED IN ON ANOTHER PROJECT AT 2425 DURANT AVENUE. WHICH REQUESTED AND GRANTED SIMILAR LABOR CONCESSIONS. AND HE SAID THAT CALLING, CALLED THE USE OF STATE DENSITY BONUS LAW TO AVOID LABOR STANDARDS A "SUBVERSION OF THE WILL OF THE COUNCIL IN ADOPTING SUCH LABOR POLICIES." HE ALSO STATED IT'S ALSO NOT JUSTIFIED BY ANY COST SAVINGS THAT WOULD ACTUALLY RESULT IN

INCREASED DENSITY. THE STATE DENSITY BONUS LAW ALSO STATES THAT THE CONCESSIONS GRANTED TO THE DEVELOPER MUST ALSO PROVIDE BENEFITS TO A LOCAL COMMUNITY. AND AS I'VE STATED I CAN'T SEE HOW DENYING WORKERS HEALTHCARE OR APPRENTICESHIP IN THE TRADES BENEFITS THE CITY OF BERKELEY. I BELIEVE IT IS THE RESPONSIBILITY OF THIS BOARD TO ENSURE THIS PROJECT ALIGNS WITH THE GOALS OF THE BERKELEY COMMUNITY AND THE INTENT OF CITY AND STATE LAW. THANK YOU.

>> CHAIR GAFFNEY: THANK YOU SO MUCH, KAY. APPRECIATE ALL OF YOU GUYS COMING OUT HERE AND VOICING, YEAH, THE SITUATION. AND HELPING US GET CLARITY. WE DO NOT HAVE ANY MORE CARDS IN PERSON. SO WE ARE GOING TO MOVE ONLINE NOW. IT LOOKS LIKE WE AT LEAST HAVE ONE HAND. NOW IS THE TIME TO RAISE YOUR HAND. BUT KELLY, YOU ARE, GOING TO RECOGNIZE YOU NOW, AND YOU WILL HAVE FOUR MINUTES TO SPEAK. I CAN'T ALLOW HER TO TALK FOR SOME REASON. YOU SHOULD BE ALLOWED TO TALK.

>> OKAY, CAN YOU HEAR ME NOW?

>> CHAIR GAFFNEY: WE CAN HEAR YOU, YES.

>> OKAY, SO THERE'S A FEW QUESTIONS THAT I HAVE AND I HOPE THAT ZAB BOARD WILL FOLLOW-UP WITH THIS. I WOULD LIKE TO KNOW FROM STAFF, HAVE THEY VALIDATED THE PROJECT FEES IN THE LIST FROM THE DEVELOPER AND WHAT DOCUMENTATION WAS PROVIDED WITH THIS LIST TO SUBSTANTIATE THEM? I'M CONFUSED AS TO WHY WITH 100% BONUS YOU ARE PAYING IN-LIEU AFFORDABLE HOUSING COST OF $929,559. THAT

DOESN'T SEEM TO MAKE SENSE WHEN YOU'VE GOT 100% DENSITY BONUS. I AGREE WITH THE OTHER SPEAKERS THAT DENYING COVERAGE FOR HEALTHCARE -- I DON'T SEE HOW THAT CAN PASS AS NOT BEING, I DON'T SEE HOW THE DENIAL OF HEALTHCARE CAN BE DECLARED NOT TO BE AN IMPACT ON THE HEALTH AND SAFETY OF LABOR AND THE PUBLIC. THIS JUST DOESN'T MAKE ANY SENSE AT ALL. UNDER ANY CIRCUMSTANCES. THERE'S NO BENEFIT TO THE COMMUNITY TO DENY HEALTHCARE. I WOULD LIKE TO KNOW HOW THE $400,000 BIRD-SAFE GLASS COST WAS REACHED. THE IMPACT TO NATURE AND DEATH TO BIRDS FROM COLLISION WITH GLASS WILL BE FELT FOR THE ENTIRE LIFE OF THE BUILDING. THIS IS A HAZARD AND THAT GLASS, CLEAR TRANSPARENT RAILING AT THE TOP OF THE BUILDING IS VERY HAZARDOUS TO BIRDS, ESPECIALLY SINCE WILL HAVE GREENERY AND TREES ON THE OTHER SIDE OF THAT. WE HAVE LOST MORE THAN 30% OF BIRDS IN NORTH AMERICA FROM 1970 TO 2020. THIS IS A HUGE IMPACT ON NATURE THAT WE REALLY SHOULD BE CONSIDERING. AND SO, JUST TERRIBLY DISAPPOINTING THAT THESE CONCESSIONS ARE BEING REQUESTED. AND I THINK THEY SHOULD BE EMBARRASSED FOR ASKING FOR THEM AND THEY SHOULD BE DENIED, IF THERE'S ANYWAY POSSIBLE TO DO IT. AND CERTAINLY, EVERYTHING SHOULD HAVE A LOT OF DOCUMENTATION TO COME WITH IT. THANK YOU.

>> CHAIR GAFFNEY: THANK YOU SO MUCH, KELLY. WE ARE, IT DOESN'T LOOK LIKE THERE IS ANY OTHER SPEAKERS. SO STAFF, DO YOU HAVE ANY FOLLOW-UP THEN ON KELLY'S QUESTIONS? BECAUSE I DO WANT TO MAKE SURE.

>> I THINK IF I UNDERSTOOD THE QUESTION ABOUT THE IN-LIEU FEE, THAT'S FOR THE INCLUSIONARY ORDINANCE. 20% OF THE RESIDENTIAL UNIT FLOOR AREA HAS TO BE EITHER PROVIDED IN FORM OF UNITS OR PAID IN-LIEU AND THE APPLICANT CHOSE TO PAY THE IN-LIEU FEE. IF THEY WERE TO PROVIDE THE UNITS IT WOULD HAVE BEEN SIX LOW-INCOME UNITS BUT THE APPLICANT CHOSE TO PAY THAT $900,000 OVER, I DON'T HAVE THE EXACT AMOUNT. BUT THE AMOUNT THAT IS PROVIDED ON THE STAFF REPORT. AND THEN IN TERMS OF THE CONCESSION, BY LAW, WE CAN'T REQUIRE ANY DOCUMENTATION. THEY CAN REQUEST IT WITH THE JUSTIFICATION THAT IS TO LOWER THE COST. DID I ANSWER?

>> CHAIR GAFFNEY: YEAH, THAT SEEMS LIKE ALL THE KELLY'S QUESTION. I WAS THINKING OF MY OWN. BUT I WILL WAIT FOR THAT. WE HAVE OUR APPLICANT WHO CAN RESPOND. WE ARE OUT OF OUR PUBLIC HEARING. GO AHEAD, APPLICANT.

>> THANKS AND JUST QUICKLY, I THINK, ZAB AND STAFF. FIRST ON THE AFFORDABLE QUESTION, THE SECOND TRANCHE OF MODERATE INCOME UNITS DON'T COUNT TOWARDS THE CITY'S AFFORDABLE HOUSING MITIGATION FEE REQUIREMENT. SO IT'S ONLY THE VERY LOW INCOME UNITS THAT COUNT, THAT'S WHY THERE'S ALMOST A $1 MILLION DOLLAR CHECK WRITTEN TO THE HOUSING TRUST FUND. ON THE HARDHATS, I'M PERPLEXED AND A LITTLE ANGRY AT OUR FORMER CITY COUNCIL. THEY ADOPTED A SET OF STANDARDS THAT PUT ENORMOUS COST PRESSURE ON HOUSING DEVELOPMENT IN BERKELEY. WE HAVE BEEN WORKING OUR ASSES OFF FOR THE LAST 30 YEARS TO GET HOUSING BUILT IN THIS TOWN. I'VE DEDICATED MOST OF

MY CAREER TO IT. TO PLACE A REQUIREMENT ON HOUSING THAT ALL OF THE SUDDEN YOU BELIEVE IS GOING TO BE ABSORBED BY THE COST OF BUILDING IT IS PREPOSTEROUS. IT'S ABSOLUTELY PREPOSTEROUS. THERE IS NO SUPPORT GIVEN BY THE CITY TO HELP THIS HAPPEN. THERE'S NO FUND AVAILABLE ANYWHERE TO HELP IT HAPPEN. THIS PROJECT WITH WHATEVER LABOR COMPONENT BUILDS IT IS GOING TO BE BUILT RESPONSIBLY AND IT'S GOING TO BE BUILT ACCORDING TO THE LAWS. AND THAT'S WHERE MY ANGER LAW IS WITH OUR FORMER CITY COUNCIL. THEY SET THE UNIONS UP FOR FAILURE. THEY ARE HERE TONIGHT BLAMING ME. THIS IS NOT MY PROBLEM. THIS IS THE PROBLEM LEVIED ON THIS UNION, THESE UNIONS BY OUR FORMER CITY COUNCIL. AND THERE ISN'T ANYTHING THAT WE CAN DO ABOUT IT, EXCEPT HOPE THAT WHEN WE GET TO THE POINT WHERE THE CAPITAL MARKETS ALLOW THIS PROJECT TO PROCEED, WE CAN PUT AS MUCH UNION LABOR ON IT AS POSSIBLE. AS MUCH AS POSSIBLE. BUT THAT DECISION ISN'T GOING TO BE MADE TONIGHT. IT'S NOT GOING TO BE MADE OVER THIS ENTITLEMENT. THE STATE LAWS ON THIS ARE CLEAR, REGARDLESS OF STATE DENSITY BONUS LAW. BUT STATE DENSITY BONUS LAW, AGAIN, MR. FRANK IS INCORRECT. THERE IS NO ALREADY-ADOPTED HEALTH AND SAFETY STANDARD IN THE CITY OF BERKELEY THAT GETS TO THIS POINT. THERE'S NO FINDING FOR YOU TO MAKE ON THAT OBJECTIVE STANDARD. SO, AGAIN, I'M HAPPY TO ANSWER WHAT QUESTIONS YOU MAY HAVE. BUT WE WOULD LIKE TO MOVE ON AND GET THIS HOUSING BUILT.

>> CHAIR GAFFNEY: THANK YOU, MARK. DOES ANYONE HAVE ANY

QUESTIONS BEFORE WE CLOSE THE PUBLIC HEARING FOR STAFF OR FOR THE APPLICANT? LOOKS LIKE WE ARE GOOD. SO, OKAY. WE WILL VOTE TO CLOSE THE PUBLIC HEARING NOW. ALL THOSE IN FAVOR SAY AYE. ALL THOSE OPPOSED SAY NAY? ALL RIGHT; WE HAVE CLOSED THE PUBLIC HEARING. NOW IT IS TIME FOR DISCUSSION AMONGST THE COMMISSION. AND I KNOW THERE'S OBVIOUSLY, I KNOW WE HAVE HAD THIS DISCUSSION BEFORE. SO I KNOW THAT IS PART OF WHAT IS GOING ON TODAY. I WAS NOT THERE FOR THAT, SO THIS HAS ALL BEEN VERY INTERESTING FOR ME, SO I KIND OF APPRECIATE IT. SO I GUESS MAYBE I WILL START OFF A LITTLE BIT. FROM MY UNDERSTANDING AND FROM ALL THE PRESENTATIONS IS SOMETHING WHERE OUR HANDS ARE JUST TIED DUE TO THE WAY THE STATE HAS PHRASED THIS. FOR THAT REASON, IT DOES MAKE IT VERY HARD FOR US TO DENY THIS, EVEN IF WE DON'T THINK IT SHOULD BE OBVIOUSLY HEALTHCARE IS INCREDIBLY IMPORTANT. AND I GUESS I WILL START OFF BY SAYING, THE PARKING THAT I BROUGHT UP BRIEFLY. IT SEEMS IF WE ARE ASKING FOR THESE MAJOR CONCESSIONS AND ESPECIALLY ON THE BASIS OF HOUSING, TAKING UP TWO FLOORS OF, WHAT COULD BE HOUSING AND ALSO RENTAL INCOME TO GO TO, THAT COULD HELP PAY FOR THOSE COSTS. I KNOW IT OBVIOUSLY WOULDN'T OFFSET IT COMPLETELY. BUT WHEN WE ARE TALKING ABOUT THE BASIS OF HOUSING, GIVING UP ANY SPACE TO CARS IN AN AREA THAT IS ORIENTED TO PUBLIC TRANSIT MAKES IT HARD PILL TO SWALLOW FOR THIS. I WILL OPEN IT UP TO THE REST OF THE BOARD. I KNOW EVERYONE ELSE IS ELOQUENT. ANYBODY WANT TO SAY ANYTHING? I KNOW IT'S KIND OF

REPETITIVE BUT IT'S IMPORTANT.

>> D. SANDERSON: YEAH, I GUESS, I'M REALLY DISTURBED ABOUT HOW THIS LAW IS APPLIED. THE DENSITY BONUS LAW. WE CAN'T ASK FOR WHAT THEIR RETURN ON INVESTMENT IS, WE CAN'T ASK FOR A PRO FOR MA. WE HAVE NO WAY OF KNOWING WHAT THE PROFIT MARGIN IS FOR THIS BUILDING AND WE DON'T HAVE A RIGHT TO ASK. SO THAT LEAVES US WITH ASKING THE APPLICANT, IS THERE ANYTHING ELSE LIKE PARKING THEY CAN CUT THAT WOULD ALLOW THEM TO NOT HAVE TO ASK FOR SO MANY CONCESSIONS. AND BASICALLY, THIS IS THE ANSWER. SO I'M, YOU KNOW, I HAVE ALWAYS HAD AN ISSUE WITH THE CITY OF BERKELEY WHEN THEY ADOPT AN ORDINANCE THAT THEY DON'T CALCULATE THE IMPACT ON HOUSING COSTS. AS MUCH AS WE ARE SUPPOSED TO BE IN FAVOR OF HOUSING, BERKELEY HAS YET TO CALCULATE THE DOLLAR IMPACT ON HOUSING. IT'S NEVER IN THE ANALYSIS, IT'S NEVER IN THE STAFF REPORTS. AND SOMEHOW IT'S JUST SUPPOSED TO MAGICALLY GET HOOKED ONTO HOUSING AND DEVELOPERS WHO MAKE MILLIONS OF DOLLARS, YOU KNOW, WILL BE ABLE TO ABSORB IT. I THINK THAT UNFORTUNATELY, I HAVE TO, I WILL APPROVE THE PROJECT AS PROPOSED. BUT IT MAKES ME FURIOUS THAT STATE LAW AND LEGAL INTERPRETATIONS ARE PUTTING US IN THIS POSITION WHERE WE HAVE NO WAY TO UNDERSTAND HOW THE APPLICANT REALLY CAME TO THIS CONCLUSION. I HAVE NO IDEA BUT I SUSPECT THE ESTIMATED COSTS ARE CORRECT. BUT I JUST HAVE TO TAKE IT ON FACE VALUE THAT'S WHAT IT IS. AND IT JUST MAKES ME SICK. BUT I DON'T SEE ANY OTHER ALTERNATIVE. THANK YOU.

>> CHAIR GAFFNEY: THANK YOU, COMMISSIONER SANDERSON. I ALSO AM FEELING THAT THAT'S VERY WELL SAID AND I FEEL VERY SIMILARLY IN THIS SITUATION. DOES ANYBODY HAVE ANY FOLLOW-UP? COMMISSIONER ALLEN?

>> S. ALLEN: THIS IS JUST, I DON'T KNOW, FOOD FOR THOUGHT. IF WE ARE LOOKING AT NUMBERS, BIRD-SAFE GLASS AT $400,000, IF I COULD CHOOSE BETWEEN IN-LIEU ART COSTS AND BIRD-SAFE GLASS, I WOULD CHOOSE BIRD-SAFE GLASS. IF YOU FIND MONEY LATER, IT'S EASY TO ADD IT TO ART SCULPTURE OR SOMETHING ELSE, IT'S UNLIKELY YOU WOULD GO BACK AND REPLACE THE GLASS ON THE BUILDING OR A PORTION OF THE BUILDING. I REQUEST THAT YOU CONSIDER THAT.

>> CHAIR GAFFNEY: I THINK THAT'S A WONDERFUL POINT, THANK YOU SO MUCH, COMMISSIONER ALLEN. IT'S INTERESTING, HOW WE PICK, HOW THE APPLICANT PICKS CONCESSIONS AND WAIVERS. AND I APPRECIATE SEEING THIS COST BREAKDOWN BECAUSE IT CAN BRING UP THINGS LIKE THAT. WE KNOW KELLY AND EVERYONE HAS BEEN WORKING VERY HARD ON BIRD-SAFE GLASS AND IT IS LIVES TOO. APPLICANT, I GUESS TECHNICALLY WE WOULD HAVE TO OPEN THE PUBLIC HEARING. ALL THOSE IN FAVOR OF OPENING THE PUBLIC HEARING, SAY AYE. ALL THOSE OPPOSED SAY NAY. APPLICANT, WOULD YOU MIND SPEAKING TO THAT, WE WOULD REALLY LIKE TO KNOW. I THINK THAT'S A GREAT POINT.

>> WHAT IS THE QUESTION PRECISELY AGAIN?

>> D. SANDERSON: WOULD YOU CONSIDER SWAPPING YOUR CONCESSION, ONE OF THEM TO NOT HAVE THE BIRD-SAFE GLASS AS A CONCESSION, BUT

RATHER THE IN-LIEU ART COSTS AS A CONCESSION.

>> THE SHORT ANSWER IS NO. WE TALKED EXTENSIVELY ABOUT IT. I APPRECIATE DOWN LINE YOU HAVE MADE A CHOICE AND THERE'S NOT GOING TO BE ANY GOING BACK. WE FEEL THIS PARTICULAR LOCATION; IT HAS THE HOPE CENTER AND OTHER PROJECTS COMING AROUND IT. WE DON'T FEEL JUST AT THAT LEVEL THIS PROJECT WILL BE SUBJECT TO THE KINDS OF BIRD STRIKING WITH A LARGER BUILDING SET OFF BY ITSELF SOMEWHERE. SO.

>> D. SANDERSON: OKAY, THANK YOU.

>> CHAIR GAFFNEY: ALL RIGHT, THANK YOU. I KNOW THAT ISN'T QUITE WHAT KELLY WOULD SAY. BUT WE WILL TAKE THAT. VOTE TO CLOSE THE PUBLIC HEARING. ALL THOSE IN FAVOR SAY AYE. AND THOSE OPPOSED SAY NAY? ANY OTHER DISCUSSION? COMMISSIONER PALMATIER?

>> S. PALMATIER: I THINK THERE'S A -- I HAVE ONE QUESTION AND THEN A FEW COMMENTS. WE HAVE HEARD FROM STAFF THAT WE ARE NOT ALLOWED TO REQUEST A PRO FORMA PER STATE LAW; I WOULD BE CURIOUS FOR THE RECORD WHAT GOVERNMENT CODE PROHIBITS THAT?

>> IT'S GOVERNMENT CODE 65915(K).

>> S. PALMATIER: THANK YOU. SO AS FOR MY COMMENTS, I WANTED TO THANK THOSE WHO SPOKE AT THE PUBLIC HEARING. I RECOGNIZE THAT ON BOTH SIDES OF THE AISLE, WE HAVE PEOPLE WHO ARE WORKING TO MAKE HOUSING A REALITY IN BERKELEY. I WANT TO THANK BOTH SIDES FOR ALL THE WORK YOU ARE DOING. I ALSO JUST WANT TO THANK THE RHOADES PLANNING GROUP AND OTHERS FOR BEING WILLING TO SHARE

COST INFORMATION AND BEING WILLING TO ANSWER OUR QUESTIONS. I RECOGNIZE THAT THIS IS FOR EVERYONE IN THIS ROOM, THIS IS A FRUSTRATING POSITION TO BE IN. AND THAT WE HAVE QUESTIONS BECAUSE THIS IS AN UNTESTED USE CASE. SO THERE ARE QUESTIONS THAT COME UP, AND I APPRECIATE STAFF'S FLEXIBILITY IN ANSWERING THOSE FOR US. AND SO I JUST WANTED TO THANK ALL THOSE IN THE ROOM.

>> CHAIR GAFFNEY: THANK YOU, COMMISSIONER PALMATIER. THAT IS VERY IMPORTANT. AND I KNOW, IT IS, IT'S TOUGH. WE KNOW HOW HIGH COSTS ARE, BUT HOW IMPORTANT.

>> D. SANDERSON: I WOULD LIKE TO MAKE A MOTION THAT THESE TWO PROJECTS, DIFFERENCE IN 181 AND 182 BE APPROVED AS PROPOSED.

>> S. PALMATIER: I'LL SECOND THAT.

>> CHAIR GAFFNEY: ALL RIGHT. DOES ANYBODY HAVE ANYTHING ELSE TO COMMENT ON BEFORE WE TAKE A VOTE? YES, COMMISSIONER THOMPSON. AND THEN I WILL LAY OUT HOW THE VOTE IS GOING TO GO.

>> M. THOMPSON: WELL, YOU KNOW WHAT. NO, I CHANGED MY MIND, THANK YOU.

>> CHAIR GAFFNEY: NO WORRIES. THAT IS ALLOWED. SO WE ARE GOING TO DO, THIS IS A UNIQUE CASE WHERE WE PRESENTED IT TOGETHER AS ONE BUT WE ARE GOING TO VOTE SEPARATE. ITEM B FIRST, THE MULTI-FAMILY. AND THEN WE WILL VOTE ON ITEM C, THE STUDENT-ORIENTED. JUST SO THAT IS CLEAR. THAT'S WHY. DOES THE MOTION NEED TO BE RESHAPED AT ALL FOR THAT?

>> CLERK: NO, I HAVE IT DOWN. SO I HAVE MOTION BY COMMISSIONER SANDERSON AND A SECOND FROM COMMISSIONER PALMATIER TO APPROVE THE 2029 UNIVERSITY AVENUE MULTI-FAMILY PROJECT. WHEN I CALL YOUR NAME, PLEASE STATE YOUR VOTE. COMMISSIONER DUFFY?

>> Y. DUFFY: YES.

>> CLERK: CHAIR GAFFNEY?

>> CHAIR GAFFNEY: YES.

>> CLERK: COMMISSIONER THOMPSON?

>> M. THOMPSON: NO.

>> CLERK: COMMISSIONER PALMATIER?

>> S. PALMATIER: YES.

>> CLERK: COMMISSIONER ALLEN?

>> S. ALLEN: YES.

>> CLERK: COMMISSIONER SANDERSON?

>> D. SANDERSON: YES.

>> CLERK: THANK YOU.

>> CHAIR GAFFNEY: ALL RIGHT, THE MOTION DOES PASS. YOU HAVE YOUR USE PERMIT 14 DAYS AFTER THE NOTICE OF DECISION IS MAILED UNLESS IT'S APPEALED. I DO WANT TO THANK EVERYONE FOR COMING HERE AND SPEAKING. AND I AM CERTAINLY LOOKING FORWARD TO THE CITY COUNCIL WHERE THIS COULD BE TAKEN UP. AND THEY WILL HAVE MORE OF AN OPPORTUNITY TO DIG IN. NOT FOR THIS PROJECT BUT HARDHATS. THERE WAS A PROJECT APPEALED TO THE CITY COUNCIL. THAT WAS CONFUSING. THANK YOU FOR CLARIFYING. I KNOW THIS IS AN ISSUE NOT ON THIS

PROJECT. THIS PROJECT HASN'T BEEN APPEALED YET. BUT WE WILL BE HEARING A SIMILAR CASE AT CITY COUNCIL AND ENCOURAGE EVERYONE HERE TO GO SPEAK TO THAT. THANK YOU ALL.

>> CLERK: EXCUSE ME.

>> CHAIR GAFFNEY: THANK YOU, SORRY. YEP. OKAY. I DO SEE NOW. THANK YOU SO MUCH.

>> CLERK: SO WE WILL TAKE A SECOND VOTE. THIS IS GOING TO BE FOR 2029 UNIVERSITY AVENUE, THE STUDENT-ORIENTED PROJECT. AND WE HAD A MOTION BY COMMISSIONER SANDERSON AND A SECOND BY COMMISSIONER PALMATIER. SO WHEN I CALL YOUR NAME PLEASE STATE YOUR VOTE. COMMISSIONER DUFFY?

>> Y. DUFFY: YES.

>> CLERK: CHAIR GAFFNEY?

>> CHAIR GAFFNEY: YES.

>> CLERK: COMMISSIONER THOMPSON?

>> M. THOMPSON: NO.

>> CLERK: COMMISSIONER PALMATIER?

>> S. PALMATIER: YES.

>> CLERK: COMMISSIONER ALLEN?

>> S. ALLEN: YES.

>> CLERK: COMMISSIONER SANDERSON

>> D. SANDERSON: YES.

>> CLERK: THANK YOU.

Re: Formal Development Project Applications for two Alternative Housing Development Projects Proposed at 2029 University Avenue (APNs 57-2053-8-1)

To Whom it May concern:

Our client, Laconia Development, LLC ("Laconia"), submitted two Preliminary Applications pursuant to Senate Bill 330 on December 10, 2024 for alternative housing development projects proposed at 2029 University Avenue in the City. As required by Senate Bill 330, the Applicant hereby timely files two corresponding Formal Applications for these projects pursuant to Government Code section 65941.1(d), the provisions of the Planning and Zoning Laws generally, and in particular Government Code sections 65940, 65941, and 65941.5. These Formal Applications are also applications for development permits under Government Code section 65943. Finally, as discussed below, the projects will invoke the benefits of the state Density Bonus Law (Gov. Code § 65915 et seq., ("DBL")).

Project Descriptions

1. Project Alternative 1

As more fully described in the plan sets submitted with this letter, one of the projects proposes construction of 240 new residential apartment units in a single 23-story building ("Project 1") on approximately .28 acres at 2029 University Ave in the City (APN 57-2053-8-1) ("Project Site"). Project 1 would incorporate 29 garage parking spaces and proposes approximately 190,878 square feet of residential construction. The project would remove an existing commercial building.

Fifteen percent of Project 1's base units – 18 of them – would be deed-restricted affordable to very low income households and 15 percent – 18 units – would be deed-restricted affordable to moderate income households. These affordable units qualify

Project 1 for various benefits under DBL, including a 100% density bonus, unlimited waivers, and 3 incentives/concessions, as discussed below.

When taking into account the available DBL density bonus, waivers and incentives and concessions, Project 1 is consistent with the applicable, objective development standards set out in the Project Site's Downtown General Plan land use designation, as well as its C-DMU Outer Core zoning.

2. Project Alternative 2

The second project proposes construction of 160 new housing units, which will provide housing for students, with approximately 189,650 square feet of residential construction in a single 23-story building ("Project 2"). Like Project 1, Project 2 would incorporate up to 29 garage parking spaces and remove an existing commercial building.

Fifteen percent of Project 2's base units – 12 of them – would be deed-restricted affordable to very low income households, and 15 percent – 12 units – would be deed-restricted affordable to moderate income households.

Like Project 1, when taking into account available Density Bonus Law density bonus, waivers and incentives and concessions, Project 2 is consistent with the applicable, objective development standards within the Project Site's Downtown General Plan land use designation, as well as its C-DMU Outer Core zoning.

Senate Bill 330

Signed into law on October 9, 2019, by Governor Newsom and effective January 1, 2020, SB 330 declared a statewide housing emergency. The bill places restrictions on certain types of development standards, amends the Housing Accountability Act ("HAA") (Gov. Code § 65589.5), and makes changes to local approval processes and the Permit Streamlining Act (Gov. Code § 65920 *et seq*.). During the housing emergency period, as extended until 2030 by Senate Bill 8, all cities are subject to specified project review requirements and timelines regarding applications for housing developments. These changes include a prohibition on applying new zoning regulations and development standards or listing the project as a local historic landmark after a project's application is submitted, except under certain specified circumstances. Housing developments that meet all applicable objective general plan and zoning standards may only be subjected to a limited number of public hearings, including continuances and appeal hearings.

1. Preliminary Application

SB 330 allows an applicant to submit a Preliminary Application for any "housing development project," meaning a project that is at least two-thirds residential by square footage. (Gov. Code § 65941.1). A Preliminary Application is separate and distinct from, and does not require as much detail as, a traditional development application—i.e., a "Formal Application." SB 330 precludes local agency input into

the required contents of a Preliminary Application. For example, the local agency may not add to the 17-item checklist.[1] In addition, the local agency has no role in determining the completeness of a Preliminary Application.[2] Thus, if the applicant complies with the checklist, then the Preliminary Application is complete at the moment of filing—and vested rights accrue at that moment—without any affirmative action by the City required or allowed.

Moreover, the state Department of Housing and Community Development, along with every city and county in California, is required to develop a checklist that complies with the requirements of SB 330. (Gov. Code §§ 65941.1(b)(1) and (b)(2)). The checklist may not require or even request anything beyond what SB 330 requires. (Gov. Code § 65941.1(b)(3)).

If an applicant submits a Formal Application within 180 days of submitting a Preliminary Application, then the zoning, design, subdivision, and fee requirements in effect at the time the Preliminary Application was submitted shall remain in effect for the remainder of the entitlement and permitting process, with certain limited exceptions.[3]

This is the earliest form of vested rights provided in the state Planning and Zoning Law and it is completely applicant controlled.

2. Consistency with General Plan and Zoning

SB 330 provides that a housing development project "shall be deemed consistent, compliant, and in conformity with an applicable plan, program, policy, ordinance, standard, requirement, or other similar provision if there is substantial evidence that would allow a reasonable person to conclude that the housing development project is consistent, compliant, or in conformity." (Gov. Code § 65905.5(c)(1)). It also provides that a proposed housing development project "is not inconsistent with the applicable zoning standards and criteria, and shall not require a rezoning, if the housing development project is consistent with the objective general plan standards and

[1] Gov. Code § 65941.1(b)(3) ("A checklist or form shall not require or request any information beyond that expressly identified in subdivision (a).").
[2] Gov. Code § 65941.1(d)(3) ("This section shall not require an affirmative determination by a city, county, or city and county regarding the completeness of a preliminary application or a development application for purposes of compliance with this section.").
[3] Exceptions to this rule include: (1) development impact fees, application and permit processing fees, capacity or connection fees, or other charges may be annually adjusted based on a published cost index (Gov. Code § 65589.5(o)(2)(A)); (2) where the requirement is necessary to avoid an adverse impact to public health or safety as defined in state law (Gov. Code § 65589.5(o)(2)(B)); (3) where the requirement is necessary to avoid or lessen an impact under CEQA (Gov. Code § 65589.5(o)(2)(C)); (4) where the project does not commence construction within two and one-half years of the project's site permit being issued (Gov. Code § 65589.5(o)(2)(D)); and (5) where the project increases by more than 20 percent in the number of units or total square footage beyond the preliminary application, except as the project may be revised using a density bonus (Gov. Code § 65589.5(o)(2)(E)).

criteria, but the zoning for the project site is inconsistent with the general plan." (Gov. Code § 65905.5(c)(2)).

3. Early Statutory Vested Rights

As noted above, the filing of a Preliminary Application provides the earliest form of vested rights established in California law. Subject to certain limited exceptions, SB 330 provides that a housing development project shall be subject only to the ordinances, policies, and standards adopted and in effect when a Preliminary Application was submitted. (Gov. Code § 65589.5(o)). An applicant for a housing development project may bring legal action to enforce the HAA if a local agency requires or attempts to require a housing development project to comply with an ordinance, policy, and standards (which includes those relating to development impact fees, capacity or connection fees, or permit processing fees), not adopted and in effect when a Preliminary Application was submitted. (*See* Gov. Code § 65589.5(k)(1)(a)(i)(III) and § 65589.5(o)(4)).

4. Limited Public Hearings

Under SB 330, housing development projects that comply with applicable objective general plan and zoning standards are subject to a maximum of five public hearings[4] prior to final action by the City. (Gov. Code § 65905.5(a)). The City must consider and either approve or disapprove the project at one of these five hearings, after which no further hearings may be held in connection with project approval. (*Id.*).

Housing Accountability Act

As a brief reminder to the City, the Projects are also protected by the Housing Accountability Act (Gov. Code § 65589.5; "HAA"), a housing production statute that seeks "to significantly increase the approval and construction of new housing for all economic segments of California's communities by meaningfully and effectively curbing the capability of local governments to deny, reduce the density for, or render infeasible housing development projects . . . ." (§ 65589.5(a)(2)(K)). Moreover, the HAA expresses the state's policy that this statute "be interpreted and implemented in a manner to afford the fullest possible weight to the interest of, and the approval and provision of, housing." (Gov. Code § 65589.5(a)(2)(L)).

As relevant here, subdivision (j) of the HAA directs that a decision to disapprove or reduce the density of a project that complies with "applicable, objective general plan, zoning, and subdivision standards and criteria, including design review standards" must be based on written findings supported by a preponderance of the evidence that (1) the project would have "a specific, adverse impact upon the public health or safety" *and* (2) that there is no feasible method to satisfactorily mitigate or avoid this adverse

[4] The term "hearing" is broadly defined to include informational hearings, hearings at which the project is continued to another date, sub-committee hearings, and appeal hearings. (Gov. Code § 65905.5(b)(2)).

impact. (Gov't Code § 65589.5(j)(1)). The HAA defines a "specific, adverse impact" to mean "a significant, quantifiable, direct, and unavoidable impact, based on objective, identified written public health or safety standards, policies, or conditions as they existed on the date the application was deemed complete." (Gov't Code § 65589.5(j)(1)(A)).

Section 65589.5(j) requires cities to determine whether a project complies with the applicable, *objective* general plan, zoning, subdivision, and design standards. The HAA defines the term "objective" to mean "involving no personal or subjective judgment by a public official and being uniformly verifiable by reference to an external and uniform benchmark or criterion available and knowable by both the development applicant or proponent and the public official." (Gov. Code § 65589.5(h)(8)). Cities must make this determination based on a "reasonable person" standard. (Gov. Code § 65589.5(f)(4)).

Accordingly, if a project complies with applicable, objective general plan, zoning, subdivision, and design standards in the eyes of a reasonable person, the project cannot be disapproved or conditioned on a lower density unless, based on a preponderance of the evidence in the record, it would have a "specific, adverse impact" upon public health or safety and there is no feasible way to mitigate that impact. If a city's disapproval or conditional approval is challenged in court, the burden is on the City to prove its decision conformed to all the conditions specified in the HAA. (Gov. Code § 65589.6).

The courts have explained that the HAA's findings constitute the "only" grounds for a lawful disapproval of a housing development project. (*North Pacifica, LLC v. City of Pacifica* (N.D.Cal. 2002) 234 F.Supp.2d 1053, 1059-60, disapproved on other grounds in *North Pacifica LLC v. City of Pacifica* (2008) 526 F.3d 478; see also *Sequoyah Hills Homeowners Assn. v. City of Oakland* (1993) 23 Cal.App.4th 704, 715-16). Moreover, the HAA creates such a "substantial limitation" on the government's discretion to deny a permit that it amounts to a constitutionally protected property interest. (*North Pacifica, LLC v. City of Pacifica*, *supra*, 234 F.Supp.2d at 1059).

Density Bonus Law

The Projects are also protected by the DBL (Gov. Code §§ 65915-65918), a housing production statute that is required to be interpreted liberally in favor of producing the maximum number of total housing units. (Gov. Code § 65915(r)).

By incorporating 15 percent of project units as affordable to very-low income households and 15 percent of project units affordable to moderate-income households, both Projects are eligible for a 100% density bonus, 3 incentives or concessions, and unlimited waivers or reductions of development standards (Gov. Code §§ 65915(b), (d), (e), (v)).

CEQA

Finally, as infill projects proposed on a site less than 5 acres in size that are consistent with the applicable general plan and zoning regulations, the applicant fully anticipates that the Projects will qualify for a Class 32 urban infill exemption under the California Environmental Quality Act ("CEQA") (14 CCR § 15332.). To this end, Laconia's consultants will prepare appropriate studies where necessary to confirm that: (1) the Project Site has no value as a habitat for endangered, rare or threatened species; (2) that approval of the Projects would not result in any significant effects relating to traffic, noise, air quality, or water quality; and (3) that the site can adequately be served by all required utilities and public services. Substantial evidence will also be provided to confirm that none of the exceptions to the categorical exemptions set out in CEQA Guideline 15300.2 apply.

Conclusion

Laconia is pleased to work in cooperation with the City in providing much needed housing to the community consistent with the applicable, objective provisions of the General Plan and zoning, pursuant to critical state laws that are designed to facilitate housing production. We would be happy to discuss the Projects or these Formal Applications with you at any time.

Very truly yours,

MILLER STARR REGALIA

Travis Brooks

ZONING PROJECT APPLICATION SUBMITTAL REQUIREMENTS

PROJECT INFORMATION

Project Address(es):

Unit(s)/Suite(s) #:

Assessor Parcel Number(s):

The Zoning Project Submittal Requirements packet describes all of the materials required to submit a complete Zoning Project Application to the Land Use Division of the Planning and Development Department.

The checklist on pages 1-2 of this packet must be completed, signed, and submitted with the Application. You must initial each Section and check each box that corresponds to an item submitted for review.

Staff will verify that the minimum submittal requirements have been included within 30 days of receiving an application submittal, per Government Code Section 65943 (30-Day Review Period). Applications that are missing the materials will be deemed incomplete and not accepted for permit processing review. During the permit processing review, you may be required to clarify, amplify, correct, or supplement the information listed in the submittal requirements per Government Code Section 65944 (Agency Acceptance of Applications).

Section 1 is a checklist of materials required for all projects. Sections 2-7 are checklists of materials that may be required based on the project type or location.

Each submittal requirement on the checklist is described further in this packet, starting on page 3. Each description identifies whether an item is required, and indicates how to prepare each document, drawing, material, and/or report. Hyperlinked forms and instructions are also online under Land Use at **https://berkeleyca.gov/construction-development/permits-design-parameters/permit-types/permit-forms**.

All documents, reports and plans must be provided in digital format, unless requested in hard copy. Printed plans are required prior to public meetings and/or hearings. See the **Guide to Submitting a Zoning Project Application** for details on how to submit, review timing, and digital plans and document.

ZONING PROJECT APPLICATION SUBMITTAL REQUIREMENTS

SECTION 1 - REQUIRED FOR ALL PROJECTS	
	A. **ZONING PROJECT APPLICATION PACKET** 1. **Zoning Project Application Form** 2. **Zoning Project Submittal Requirements** (Checklist on pages 1 and 2)
	B. **APPLICANT STATEMENT/REQUEST TO WAIVE A SUBMITTAL REQUIREMENT** **Submit** a written statement (in a separate document) that briefly describes the proposed project and how it satisfies the findings required by the Zoning Ordinance, as well as any request to waive a submittal requirement. For applications to modify a prior permit, **submit** the following information 1. Describe the proposed changes from the approved project 2. Clearly list and describe all changes from the approved project and the basis for the change
	C. **PAYMENT OF LAND USE PLANNING APPLICATION FEES** **Submit** required fees to the cashier in the Permit Service Center or pay through the Online Permit Portal. Review of your application will not begin until the fees are paid in full. **If supplemental technical studies are required, a Peer Review deposit will be required (e.**g., Traffic Impact Analysis, Geotechnical Report, Arborist Report).
	D. **HAZARDOUS WASTE AND SUBSTANCES STATEMENT** — **Required for all projects,** pursuant to Government Code Section 65928.
	E. **TABULATION FORM** **Required for all projects.** **Submit** the form as a separate document, completely filling out each column, using the applicable development standards of the Zoning Ordinance as a guide.
	F. **PRE-APPLICATION YELLOW POSTER** **Required for all Projects** **Install** the poster prior to submittal, and submit color photos that clearly show the poster installed at the front of the site and that clearly show the sign content. Yellow Poster Instructions Small Project Sample Poster and fillable PDF template Large Project Sample Poster and fillable PDF template (Large poster required for projects that include four or more stories, State Density Bonus, Floor Area Ratio greater than 2.0, or more than 10,000 square feet gross floor area.)

INFORMATION CITY OF BERKELEY **LAND USE PLANNING**

ZONING PROJECT APPLICATION SUBMITTAL REQUIREMENTS

SECTION 1 - REQUIRED FOR ALL PROJECTS

G. PRE-APPLICATION NEIGHBORHOOD CONTACT AND OUTREACH INSTRUCTIONS

Required for the following projects:

- **All projects located in a Residential District, and all non-residential projects that abut a Residential District are required to contact all abutting and confronting residential occupants and residential property owners to advise them of the proposed development prior to submitting a zoning project application.**
- **All projects of community or neighborhood interest, which consist of the following:**
  i. Any project in a Residential District that would create 6 or more bedrooms on a parcel within ½ mile of the UC Campus (or the area confined by Grant Avenue on the west, Derby Street on the south, and Rose Street on the north), or
  ii. Any project in a Non-Residential District that includes three or more stories, State Density Bonus, Floor Area Ratio greater than 2.0, or more than 10,000 square feet gross floor area.
  iii. Are required to contact all property owners, residents, and neighborhood organizations within 300 feet of the project site to advise them of the proposed development.
- **All residential projects that propose to alter an existing dwelling unit or eliminate a dwelling unit that is subject to the Rent Ordinance (BMC Chapter 13.76) through demolition, including elimination of a dwelling unit through** conversion, are required to provide all sitting tenants notice of the application no later than the date the application is submitted to the City.

INFORMATION CITY OF BERKELEY **LAND USE PLANNING**

ZONING PROJECT APPLICATION SUBMITTAL REQUIREMENTS

SECTION 2 - PLANS REQUIRED FOR ALL DEVELOPMENT PROJECTS INVOLVING NEW STRUCTURES, ADDITIONS, DEMOLITIONS, OR EXTERIOR ALTERATIONS

PLAN SET (I.E. ARCHITECTURAL DRAWINGS) **– GENERAL REQUIREMENTS**

1. **All plans (items A – I) must be included in a single plan set, fully dimensioned, and include:**

— Name of person preparing plans (licensed architect required for certain projects, see Item 3 below)

— Dates of preparation and revision

— Project address

— Graphic scale (see Item 2 below for minimum scales)

— North arrow

— Legend describing all symbols and notations

— Building Code construction and occupancy types

Notes: For applications to modify a prior permit, the plans must clearly show the approved and modified project, and you must "cloud" all changes from the approved project.

For plan resubmittals during review, provide the date of revision on all sheets and "cloud" all changes to previous information. Plan resubmittals must include the full plan set, not individual plan sheets. Staff cannot collate or update your plans for you.

2. **Electronic Plans Requirements:**

See the **Zoning Project Application Guide to Submitting** for digital plans and document standards.

Note that these plans are often released to the public on paper no larger than 8½" x 11", and that you must format your plans so that all images and text are legible at this size.

Hard copy plan sets may be required by the project planner, if necessary to facilitate project review.

Design Review Committee, Landmarks Preservation Commission, and Use Permit applications only, 12 copies of 11" x 17" or 12" x 18" plan sets must be submitted at least two weeks prior to the public meeting or hearing.

3. **Architect or Engineer Required for Certain Projects**

Plans that require preparation by a licensed California architect or engineer under the California Architects Practice Act (Business and Professions Code Sections 5537 and 6737) shall bear the architect or engineer's stamp and signature on each sheet. **This requirement may be waived for projects involving only minor alterations or repairs; consult with a planner. For further information, visit www.cab.ca.gov**

4. **Change of Use**

Applications that ***only*** propose to **change the type of activity or use** occurring within the building must submit the following site-related information:

— **Site Plan** showing the following:

a. Property lines and lot dimensions

b. Existing and proposed building footprint(s), dimensions, setbacks (required, existing and proposed), and projections such as eaves, balconies and bays. Show all buildings , including garages, sheds, etc.

c. Driveways and parking spaces with dimensions, location of handicapped parking spaces, bicycle racks, and security gates.

— **Floor Plans** showing the following:

d. All floors, including mezzanines, basements, and attics

e. Use of all rooms (existing and proposed), per the California Building Code

f. For buildings with multiple commercial tenant spaces, label the use of each tenant space within the subject building

Note: *For changes to existing buildings, provide separate plans for existing and proposed conditions, or if changes are limited, used dashed lines for demolished features and solid lines for new features.*

INFORMATION CITY OF BERKELEY **LAND USE PLANNING**

ZONING PROJECT APPLICATION SUBMITTAL REQUIREMENTS

SECTION 2 - PLANS REQUIRED FOR ALL DEVELOPMENT PROJECTS INVOLVING NEW STRUCTURES, ADDITIONS, DEMOLITIONS, OR EXTERIOR ALTERATIONS

A. SITE PLAN

Required for all projects.
The Site Plan must show the following:

- Property lines and lot dimensions
- Existing and proposed building footprint(s) (dimensioned), setbacks (required, existing and proposed), and projections such as eaves, balconies, and bays. Show all accessory structures, such as garages, sheds, etc.
- Delineation of proposed additions, if any, with shading, hatching or another appropriate method
- Any portions of neighboring buildings within 20 feet of property lines, including the building-to-building separation (measured in feet)
- Pathway(s) from the residential structure to the public right of way
- Driveways and parking spaces with dimensions, location of ADA spaces, and security gates
- Trash/solid waste storage area
- Bicycle racks (short-term bicycle parking) subject to the Berkeley Bicycle Plan – Appendix F – Facility Design Toolbox
- Utility meters / boxes / equipment for all wet and dry utilities – including above-ground and under-ground, in conformance with utility company standards, including on the site and in the public right of way (subject to approval by the Public Works Department).
- Decks, patios, hot tubs, and all unenclosed accessory structures

Note: The City of Berkeley Community GIS Portal is an online resource indicating site features and characteristics listed above, which are required to be shown on the Site Plan

B. LANDSCAPE AND USABLE OPEN SPACE PLAN

Required for all projects
The Landscape Plan must show the following:

- Fully dimension all areas that qualify as existing and proposed Usable Open Space, in compliance with the applicable zoning district development standard and BMC Section 23.304.090; and
- Any existing landscaping to remain and to be removed
- All proposed landscaping, including all existing and proposed trees, including street trees (indicate species, trunk diameter, drip line), hedge rows, and ground cover
- All paved areas and surface treatments
- Fences and retaining walls (materials and height)
- Significant natural features such as creeks (indicate banks or culvert outline), and prominent landforms.

C. LOT COVERAGE DIAGRAM AND CALCULATIONS

Required for all residential Projects (or the residential portion of a mixed-use project).

- **Submit** the Lot Coverage Diagram and calculations, using the Site Plan as a base map, which must show the fully dimensioned diagrams to depict existing and proposed lot coverage in compliance with the applicable zoning district development standard and BMC Section 23.106.020.

D. FLOOR PLANS

Required for all projects
The Floor Plan (s) must show the following

- All floors, including mezzanines, basements, and attics
- Trash room pursuant to Public Works Department requirements
- Long-Term Bicycle parking, showing location of lockers or racks suitable for secure locks and subject to the Berkeley Bicycle Plan – Appendix F – Facility Design Toolbox
- Use of all rooms (existing and proposed), per the California Building Code
- For changes to existing buildings, provide separate plans for existing and proposed conditions, or if changes are limited, use dashed lines for demolished features and solid lines for new features.

INFORMATION CITY OF BERKELEY **LAND USE PLANNING**

ZONING PROJECT APPLICATION SUBMITTAL REQUIREMENTS

SECTION 2 - REQUIRED FOR ALL DEVELOPMENT PROJECTS INVOLVING NEW STRUCTURES, ADDITIONS, DEMOLITIONS, OR EXTERIOR ALTERATIONS

E. BUILDING ELEVATIONS

Required for all projects.

The Elevations must show the following:

- All exterior features and openings, including finishes and materials
- Existing and proposed building height (as defined in BMC Sections 23.106.090), see Instructions linked below), finished floor elevations, and existing and finished grades (within five feet of the building).
- Adjacent features such as fences, landscaping, and other buildings and property lines.
- For changes to existing buildings, provide separate elevations for existing and proposed conditions, or if changes are limited, used dashed lines for demolished features and solid lines for new features.

Height Instructions –Average Building Height*

(Residential districts, except R-S, R-SMU, and R-BMU)

Height Instructions –Maximum Building Height*

(Hillside Overlay, R-S, R-SMU, and R-BMU, Commercial, and Manufacturing districts)

*In the Hillside Overlay ("H"), both average and maximum building height apply.

F. STREET STRIP ELEVATION

Required for any new main buildings.

Submit a street elevation exhibit showing existing conditions on the parcel and the proposed project in elevation view; include at least two (2) parcels on either side of the subject parcel on a single sheet. Minimum scale is 1/8" = 1'.

G. SECTION DRAWINGS

Required for the following projects:

- **New main buildings in the "H" District.**
- **Additions exceeding 14 feet in average height in the "H" District.**

Submit drawings that show adjacent uphill or downhill buildings where views may be affected. Minimum scale is 1/8" = 1'. Show existing and proposed finished grades.

H. BOUNDARY AND/OR TOPOGRAPHIC SURVEY

Required for the following projects:

- **Any new main building.**
- **Expansions of a building footprint or the creation of accessory building/structures less than two feet from, or within, a required setback.**

Submit a survey meeting the following requirements:

1. Wet-stamped, signed by a licensed CA surveyor or appropriately licensed civil engineer
2. Minimum scale of 1/10" = 1'
3. All property lines, curb and sidewalk, spot elevations, existing structures, building dimensions, and setbacks to all property lines
4. For projects in the "H" District, survey must be no more than five years old and must show contour lines with minimum 5-foot intervals.

I. CONCEPTUAL GRADING PLAN

Required for projects with more than 50 cubic yards of cut and/or fill.

Submit a survey meeting the following requirements:

1. Prepared by a licensed surveyor, architect or engineer
2. Estimated quantities and locations of cut and fill
3. Existing and final elevations

INFORMATION CITY OF BERKELEY **LAND USE PLANNING**

ZONING PROJECT APPLICATION SUBMITTAL REQUIREMENTS

SECTION 3 - SUPPORTING DOCUMENTS, STUDIES, GRAPHICS, AND DEPICTIONS

A. SITE PHOTOGRAPHS

Required for all projects.

Submit one set of exterior photos, that meet the following requirements:

1. Use captions or a key indicating the location (perspective) of each photo.
2. Provide an adequate number of photos to show entire project site and all adjacent buildings for context. Where possible, take wide-angle shots showing project site and adjacent buildings together.

B. SHADOW STUDY

Required for the following projects:

- **Buildings exceeding 14 feet in average height, located in or adjacent to a residential (R) district (excluding ADUs)**
- **Additions exceeding 14 feet in average height on sites adjacent to a residential use**
- **Projects in either the C-T or C-DMU District, requiring a Use Permit to increase the maximum building height/number of stories**

Shadow Study Instructions

C. STORY POLE PLAN

Required for the following projects:

- **New main buildings exceeding 14 feet in average height in the "H" District (excluding ADUs)**
- **Additions exceeding 14 feet in average height in the "H" District**

Story Pole Instructions

D. ARBORIST REPORT

Required for projects involving any construction activity (including excavation, trenching, demolition, paving, storage of materials, and parking of vehicles) within the drip line of a Coast Live Oak (quercus agrifolia) tree with a circumference of at least 18 inches at 4 feet above the ground (or at least 26 inches aggregate circumference for a multi-stemmed tree). Submit

1. A report by a certified arborist assessing the project's impacts on the affected tree(s) (tree may be located either on- or off-site) and recommending preservation measures both during and after construction, as applicable.
2. Deposit of $500 for the first two hours of peer review of report (additional funds may be required for more complicated projects or site visits)

Tree Protection Instructions

Coast Live Oak Tree Ordinance

E. STRUCTURAL EVALUATION

Required for any project that is not a demolition, but is removing between 25 and 49 percent of a main building's exterior wall and between 25 and 49 percent of a main building's roof framing (including in-kind replacement of existing framing), in order to confirm the feasibility of retaining the remaining portions of any wall and roof.

A Structural Evaluation is not required for projects requesting a Use Permit for demolition.

Submit a demolition diagram that indicates the percentage of each wall and roof that is proposed to be replaced or removed, as well as a report by an independent, fully credentialed structural engineer that evaluates whether, in the operator's opinion, retention of structural elements not proposed for removal is actually feasible.

F. PARKING SURVEY

Required for projects requesting a waiver of any required off-street vehicular parking spaces pursuant to the Zoning Ordinance, located in a Commercial or Manufacturing District (C, M, MM, or MU) .

Parking Survey Instructions

INFORMATION CITY OF BERKELEY **LAND USE PLANNING**

ZONING PROJECT APPLICATION SUBMITTAL REQUIREMENTS

SECTION 3 - SUPPORTING DOCUMENTS, STUDIES, GRAPHICS, AND DEPICTIONS

G. TRANSPORTATION DEMAND MANAGEMENT (TDM) AND BICYCLE PARKING SUPPLEMENTAL APPLICATION

Required projects creating five or more new dwelling units or Group Living Accommodation rooms

TDM required for projects creating 10 or more dwelling units outside of the C-DMU. (Not required for projects where 50 percent of total units are affordable, ADUs, projects located in ES-R, or projects on properties in the Hillside overlay on narrow streets 26-feet wide or less.)

Bicycle parking required for projects creating five or more new dwelling units and/or Group Living Accommodation rooms.

TDM Program and Bicycle Parking Supplemental Application

H. PHOTO SIMULATIONS

Required for a project creating any of the following:

- **Wireless telecommunications projects**
- **A "Large Scale Development Project," which consists of project located in a non-residential district that proposes any of the following:**
  - Density Bonus under Section 65919 of California State Law,
  - Three or more stories in height,
  - Floor Area Ratio more than 2.00, or
  - 10,000 square feet or more of gross floor area.

Photo Simulation Instructions

I. PUBLIC ART DECLARATION

Required for any of the following projects:

- **A new commercial or industrial building**
- **A project that creates five or more dwelling units**
- **An addition of more than 10,000 square feet to any commercial or industrial building**

Public Art Allocation Declaration form

J. BIRD SAFE REQUIREMENTS

Required for any of the following projects:[1]

Nonresidential projects: New construction/addition

Nonresidential Projects: New or replacement windows on existing buildings, unless all facades are Lower Hazard Facades

Residential and Mixed-Use Projects: New construction/addition of 10,000 sq. ft. or more AND more than 35 feet average height

Residential Mixed-Use Projects: New or replacement windows on existing buildings of 10,000 sq. ft. or more AND more than 35 ft. average height unless all facades are Lower Hazard Facades

- **Complete Bird Safe Building Requirements Attestation**
- **For projects that include Lower Hazard Facades, diagrams and calculations that show the percentage of façade area consisting of transparent or reflective material, such as windows or High-Risk Features (as defined in BMC Section 23.304.150)**

[1] Certain projects are exempt. See BMC 23.304.150

See Bird Safe Building Requirements Information and Submittal Checklist.

INFORMATION CITY OF BERKELEY **LAND USE PLANNING**

ZONING PROJECT APPLICATION SUBMITTAL REQUIREMENTS

SECTION 4 - ENVIRONMENTAL REVIEW

A. CREEK PROTECTION DOCUMENTATION

Required for any project within 40 feet of the centerline of an open creek, and/or within 25 feet of a culverted creek, that is protected by the Creeks Ordinance

Creek Protection Instructions

Note: Applies even if a protected creek or culvert has not yet been identified by the City.

B. HISTORIC RESOURCE EVALUATION

Required for:

- **Demolition of a non-residential building 40 or more years old, subject to referral to the Landmarks Preservation Commission in accordance with BMC Section 23.326**
- **Demolition/Substantial Change of any building 40 or more years old subject to environmental review pursuant to CEQA**

Submit: State of California Department of Parks and Recreation (DPR) 523 forms. Evaluation(s) to include references to development history documentation (including but not limited to photographs, building permits, Sanborn maps, and directory listings); completed by a qualified historian, architectural historian or historic architect. Provide supplemental information in accordance with the Landmarks Preservation Ordinance criteria (BMC Section 3.24.110).

Waiver for residential additions/alterations: The Environmental Review Officer may waive this requirement for residential addition and alteration proposals after determining that the project complies with preservation standards and environmental practices OR that qualified sources other than an HRE can provide the relevant information.

California guidelines (Instructions for Recording Historical Features)

C. GEOTECHNICAL AND SEISMIC HAZARD INVESTIGATIONN

Required for all development projects intended for human occupancy located in a State-designated Seismic Hazard Zone, as defined by the California Seismic Hazards Mapping Act and Alquist-Priolo Earthquake Fault Zoning Act, as shown on the State's Environmental Constraints Map.

Exemptions:

For projects located in any State-designated Seismic Hazard Zone (PRC 2693, i.e. liquefaction, landslide, and earthquake shaking):

- Single-family wood-frame or steel-frame dwellings to be built on parcels of land for which geologic reports have been approved pursuant to an approved subdivision map;
- A single-family wood-frame or steel-frame dwelling not exceeding two stories when that dwelling is not part of a development of four or more dwellings; or
- Alterations or additions to any structure within a seismic hazard zone which do not exceed either 50 percent of the value of the structure or 50 percent of the existing floor area of the structure.

If located in the Alquist-Priolo Fault Zone (PRC 2621.6 and 2621.7):

- Single-family wood-frame or steel-frame dwellings to be built on parcels of land for which geologic reports have been approved pursuant to an approved subdivision map;
- A single-family wood-frame or steel-frame dwelling not exceeding two stories when that dwelling is not part of a development of four or more dwellings; and
- Alterations or additions to any structure if the value of the alteration or addition does not exceed 50 percent of the value of the structure; or
- Conversion of an existing apartment complex into a condominium

Submit the following:

1. Geotechnical report satisfying the California Building Code and requirements of Special Publication 117A (for landslide and liquefaction zones) and/or California Geological Survey Note 49 (for fault zones); and
2. Deposit of $1,500 for peer review of report (additional funds may be required for more complicated projects.

INFORMATION CITY OF BERKELEY **LAND USE PLANNING**

ZONING PROJECT APPLICATION SUBMITTAL REQUIREMENTS

SECTION 4 - ENVIRONMENTAL REVIEW

D. PHASE I OR II SITE ASSESSMENT

Required for any project that includes the following:

— **Excavation of 5 or more feet below grade**
— **A site with a history of soil and/or groundwater contamination (see the Hazardous Waste and Substances Statement)**
— **A site within an Environmental Management Area (see Community GIS Portal)**

Submit: A recent Page I and/or Phase II Site Assessment (less than 2 years old)

Note: Depending on the findings in the Phase I, a Phase II or additional investigation may be necessary in order to determine the appropriate environmental review pathway under CEQA. If the Phase II indicates the exceedance of Environmental Screening Levels, clearance from one of the following agencies must be submitted prior to final action on a zoning permit application:

- San Francisco Bay Regional Water Quality Control Board (RWQCB)
- Department of Toxic Substances Control (DTSC)
- Alameda County Department of Environmental Health's Local Oversight Program (LOP)

Contact the Toxics Management Division (510) 981-7460 for more information.

E. TRANSPORTATION IMPACT STUDY

Required for projects that do not meet at least one of the City's screening criteria for determining if detailed VMT or vehicular parking analysis is necessary.

Consult with the Transportation Division for a copy of the screening criteria and thresholds at (510) 981-7010

F. STATE GENERAL CONSTRUCTION PERMIT

Required for projects disturbing one acre or more of soil (or less than one acre if part of a larger development plan that disturbs one acre or more).

Submit a copy of the Notice of Intent (NOI) submitted for the State General Construction Permit, and Storm Water Pollution Prevention Plan (SWPPP) prior to building permit issuance.

Construction Stormwater General Permits

G. STORMWATER REQUIREMENTS CHECKLIST

Required for projects creating or replacing 2,500 square feet or more of impervious surface, including single-family dwellings. Includes new buildings, additions, and alterations to existing roofs that affect drainage; does not include maintenance/re-surfacing of existing impervious surfaces.

INFORMATION CITY OF BERKELEY **LAND USE PLANNING**

ZONING PROJECT APPLICATION SUBMITTAL REQUIREMENTS

SECTION 5 - REQUIRED FOR PROJECTS SUBJECT TO AFFORDABLE HOUSING REQUIREMENTS

A. AFFORDABLE HOUSING COMPLIANCE PLAN (PRELIMINARY)

Required for Housing Development Projects with more than 5,000 square feet of residential unit floor area

Submit following:

1. Completed Affordable Housing Compliance Plan

2. Affordable Housing Compliance Plan Sheet(s) (in the plan set)

- Residential Unit Floor Area Diagrams (BMC Section 23.328.020 Definitions)
- On-site Below Market Rate unit calculations
- In-Lieu Fee calculations

See BMC 23.328 Inclusionary Housing and the Affordable Housing Compliance Plan Application for additional information.

B. ANTI-DISCRIMINATION HOUSING POLICIES

Required for a project creating any of the following:

— **Five or more new dwelling units and/or five or more live/work units**

— **New dwelling units and/or live/work units on lots whose size and zoning designation is such to allow construction of five or more dwelling units**

— **One to four (new dwelling units and/or five or more live/work units, which are added to an existing one to four-unit property developed after August 14, 1986, and the resulting number of units totals five or more**

— **Additional condominium units, resulting in five or more condominium units converted and/or created after August 14, 1986 on the site**

Submit a written statement answering the following questions and provide the requested documentation, if applicable:

– Does the applicant or sponsor, including the applicant or sponsor's parent company, subsidiary, or any other business or entity with an ownership share of at least 30 percent of the applicant's company, engage in the business of developing real estate, owning properties, or leasing or selling individual dwelling units in states or jurisdictions outside of California?

– If the answer to (1) is yes, which?

– If the answer to (1) is yes, does the applicant or sponsor, as defined in (1), have policies in individual states that prohibit discrimination based on sexual orientation, gender identity, and/or gender expression in the sale, lease, or financing of any dwelling units enforced on every property in the state or states where the applicant or sponsor has an ownership or financial interest?

– If the answer to (1) is yes, does the applicant or sponsor, as defined in (1), have a national policy that prohibits discrimination based on sexual orientation and gender identity in the sale, lease, or financing of any dwelling units enforced on every property in the United States where the applicant or sponsor has an ownership or financial interest in property?

– If the answer to (3) or (4) is yes, please provide a copy of that policy or policies as part of this application.

The Land Use Division will not accept an application as complete unless the applicant provides a response to this section. The processing of and recommendations or determinations made by the Land Use Division regarding an application will be unaffected by the applicant's response to this section.

ZONING PROJECT APPLICATION SUBMITTAL REQUIREMENTS

SECTION 5 - REQUIRED FOR PROJECTS SUBJECT TO AFFORDABLE HOUSING REQUIREMENTS

C. DENSITY BONUS ELIGIBILITY STATEMENT

Required for projects requesting a density bonus pursuant to Government Code Section 65915

Submit the following information:

1. A written statement that includes the following information:

a. Number of "base project" units

b. Number and percent of affordable units and level of affordability

c. Percent density bonus requested and allowed pursuant to Government Code Section 65915

d. Waivers or modifications of development standards necessary to physically accommodate "density bonus" units (e.g., increased height or FAR, reduced setbacks or parking, etc.)

e. Explanation of why each waiver or modification is needed to accommodate "density bonus" units

f. If the project is requesting an incentive or concession, describe each incentive or concession being requested in addition to (or instead of) waivers or modifications necessary to accommodate density bonus

2. Plans showing a "base project" that complies with all applicable Zoning Ordinance requirements. For staff to effectively review your density bonus project, a combination of diagrams, compliance tables and calculation tables must be included in the project plan set:

a. Base Project and Proposed Project diagrams, per floor

b. Base Project and Proposed Project development standards compliance tables

c. Residential floor area calculations and diagrams (per floor; can be combined with Base Project and Proposed Project diagrams)

d. Maximum allowable residential density calculation table

e. Usable open space and lot coverage diagrams and calculations

f. Base Project, Density Bonus, and Proposed Project residential floor area table

Your project planner can provide examples of preferred diagram and table formats.

State Density Bonus - Procedures

D. AREA OF POTENTIAL EFFECTS (APE) STATEMENT

Required for projects seeking federal funds (either directly or through the City of Berkeley Housing Trust Fund).

Submit a statement identifying the project's "Area of Potential Effects" as defined in federal regulations (36 CFR Part 800). Contact the Housing Department at (510) 981-5400 for more information and requirements.

INFORMATION CITY OF BERKELEY **LAND USE PLANNING**

ZONING PROJECT APPLICATION SUBMITTAL REQUIREMENTS

SECTION 6 - LANDSCAPE AND GREEN BUILDING REQUIREMENTS

A. WELO LANDSCAPE REQUIREMENTS

Required for projects with either:

- **500 square feet or more of new, or**
- **2,500 square feet or more of renovated irrigated area.**

These projects must comply with water efficient landscaping as specified in the Model Water Efficient Landscape Ordinance (MWELO) and East Bay Municipal Utility District (EBMUD) Water Efficiency Review: Section 31 Regulations and MWELO Compliance, and all applicable measures in the Bay Friendly Basics checklist.

Submit WELO-compliant landscape documentation including a planting, grading, and irrigation plan. Water budget calculations are also required for landscapes of 2,500 square feet or more. The reference evapotranspiration rate (ETo) for Berkeley is 41.8.

See Green Building requirements.

B. BERKELEY ENERGY CODE AND BERKELEY GREEN CODE

Required for newly constructed buildings (buildings that have never before been used or occupied for any purpose).

Submit the following:

1. A statement, and corresponding features on plans, that the proposed project is designed to comply with the Berkeley Energy Code (BMC Chapter 19.36) and Berkeley Green Code (BMC Chapter 19.37) including solar PV system, battery energy storage, electric vehicle charging, and low-carbon concrete requirements. Note that for building permit submittal, quantitative values for appliance fuel efficiency must be included in relevant building permit architectural sheets, and window and door schedules, and on architectural, plumbing, and mechanical sheets, matching those values stipulated in prescriptive or performance energy compliance documents.

Note: Carefully consider the Building Code prior to submitting a Use Permit application. Per the standard Conditions of Approval for all development projects, only the Zoning Adjustments Board may approve a modification to the use or structure for which the Permit is issued, except that the Zoning Officer may approve changes that do not expand, intensify, or substantially change the use or building.

The California Energy Design Assistance (CEDA) Program provides free energy design assistance, financial incentives, and operational energy savings to new commercial, public, multifamily (4 stories or more), industrial, and agricultural buildings. CEDA application must occur while a project is in early design phases.

See Green Building requirements.

C. GREEN BUILDING REQUIREMENTS

Required for newly constructed buildings and additions of more than 20,000 square feet for projects located in the Commercial-Downtown Mixed-Use District (C-DMU).

Submit a completed LEED Checklist / Scorecard (typically for commercial projects), showing that the proposed project is on track for LEED Gold certification or above, or a completed GreenPoint Rated (GPR) Checklist (for residential and most mixed-use projects), showing that the proposed project is on track for GPR Silver certification or above.

See Green Building requirements.

DRAWINGS PROTECTED BY COPYRIGHT STATEMENT

Effective January 1, 2023, (State Government Code, Section 65103.5 (e), SB 1214), if an official copy of architectural drawings are submitted to the Land Use Division of the Planning and Development Department as part of a zoning permit application, the design professional (or the owner of the copyright if different from the design professional) may submit a separate "site plan" or "massing diagram" for posting online or for distribution to the public.

If a separate "site plan" or "massing diagram" is not submitted in addition to the official architectural plans, permission is deemed granted to the Land Use Division to post online or to provide to the public copies of the architectural drawings without the restrictions that would otherwise apply.

A massing diagram and a site plan are defined as follows per Government Code Section 65103.5 (f): "Massing diagram" means a document that displays the three-dimensional form of a building and describes the general profile, bulk, setbacks, and size of the building, but does not contain specific architectural detail.

"Site plan" means a document for a project that is drawn to scale and displays all of the following: property lines, setback lines, topographic lines, easements, drainage, utilities, lighting, driveways, surrounding streets and traffic flow, parking lots and parking spaces, landscaped areas, setback distance between buildings and property lines, outline of existing and proposed buildings and structures, distance between buildings, and ground sign location.

PLEASE CHECK ONE OF THE FOLLOWING (required):

☑ **My application includes a separate "site plan" or "massing diagram," defined in Government Code Section 65103.5(f), for posting online or for distribution to the public.**

☐ **Permission is granted to make publicly available the submitted architectural drawings without restriction to posting online or distribution to the public.**

Under penalty of perjury, I certify that:

(1) the application materials are true and complete to the best of my knowledge; and
(2) if provided, the attached paper and electronic copies of this application are the same; and
(3) I agree to pay all expenses associated with this application

2029 University Avenue Development (Apartments)

Applicant Statement

December 19, 2024

OVERVIEW AND PROJECT INTRODUCTION

The applicant team is pleased to submit this application package for a new 240 unit multifamily residential infill project located at 2029 University Avenue in Berkeley. This applicant statement includes:

1. **Project Description**
2. **Project Background**
3. **Compliance with General Plan and Zoning Code**
4. **Project Analysis**
5. **CEQA Analysis and Legislative Context**
6. **Required Findings**
7. **Community Outreach**
8. **Project Team Contact Information**

Figure 1. Proposed project at 2029 University Ave

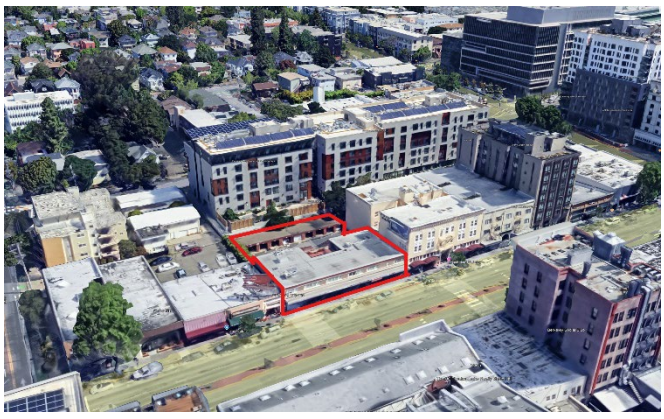

Figure 2. View of Project Site and Existing Building

Property Information

APN: 57-2053-8-1
Parcel Area: 12,385/.28 acres
General Plan Designation: Downtown
Zoning District: C-DMU Outer Core
Area Plan: Downtown Area Plan

1. **PROJECT DESCRIPTION**

The proposed project includes the demolition of the existing commercial building to construct 240 dwelling units with 280 bedrooms in a new 190,878 gross square foot building. The proposed housing development project is submitted pursuant to Senate Bill 330 (Gov. Code § 66300) and subject to the modifications and protections of State Density Bonus Law (Gov. Code § 65915) and the Housing Accountability Act (Gov. Code § 65589.5). The project includes 36 affordable units, which is 15% of the base project units for rent to Very-Low Income households (earning less than 50% of the Area Median Income (AMI) and 15% to Moderate Income households (earning less than 120% AMI). That affordability entitles the project to a 100% density bonus for a total of 240 units. An

Affordable Housing Mitigation Fee of approximately $887,000 will also apply to the project and be paid to the City of Berkeley.

The project site is a 12,385 square foot lot (0.28 acres) that is zoned C-DMU Downtown Outer Core a designation that aims to implement the vision and goals of the Downtown Area Plan which include environmental sustainability, great urban design, and economic development. (BMC § 23.204.130(A). The new residential development will have (80) Studios, (60) Jr-1-bedroom units, (60) 1-bedroom units, and (40) 2-bedroom units. The proposed project will add 280 bedrooms to Berkeley's housing stock to help alleviate the housing pressure near the University of California's Berkeley (UCB) campus. The project will have residential amenities such as rooftop decks, fitness center, lounges/work areas, and secure bicycle parking.

Unit Type	Unit Count
Studio	80
JR-Bedroom	60
1-Bedroom	60
2-Bedroom	40
Total	240

The existing commercial building has zero dwelling units, and the proposed project will construct 240 units. This will result in a net increase of 240 units with a total of 280 bedrooms. The project will be able to add 36 units to the City of Berkeley's deed-restricted affordable housing stock as well as increasing the residential density onsite. There will be no residential units on the ground floor, only residential amenity spaces.

The project site is on the north side of University Avenue between Milvia Street and Shattuck Avenue. 2029 University Avenue is approximately 0.3 miles west of the UCB campus. University Avenue is a transit and commercial corridor with a wide variety of goods and services. The location of this project will provide future residents with outstanding access to the campus and the downtown area.

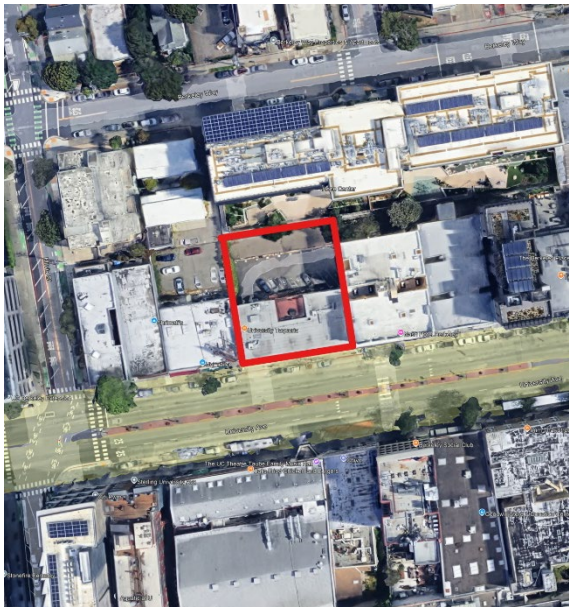

Figure 3. Aerial View of Neighborhood Vicinity

The site is highly accessible via public transit or active transportation. It is located 0.3 miles from the Downtown Berkeley BART station and is well served by multiple bus routes. The project will provide 29 parking spaces in a secure garage. The project will provide ample bicycle parking with 176 long term spaces for residents and 10 short term spaces for their guests. This proposed urban infill project is exceptionally well-suited for future residents to rely solely on sustainable modes of transportation. The building itself will be designed with solar PV.

The proposed project will provide open space, a deck on Level 23, that will have beautiful views of the Bay and Berkeley Hills. The ground floor of the project includes residential amenities such as a lobby, bike room, mail room, as well as the trash room, back of house service areas and utilities.

Key elements of the project include:

- 240 total units in 23 stories
- 18 units affordable to very low-income households @ 50% AMI & 18 units to moderate-income households @120% AMI.
- 186 total bicycle parking spaces, 29 vehicle parking spaces.
- Common Open Space at the roof deck.
- Lounges/work areas and a fitness room.
- Affordable Housing Mitigation Fee of approximately $887,000 paid to City of Berkeley Affordable Housing Trust Fund.

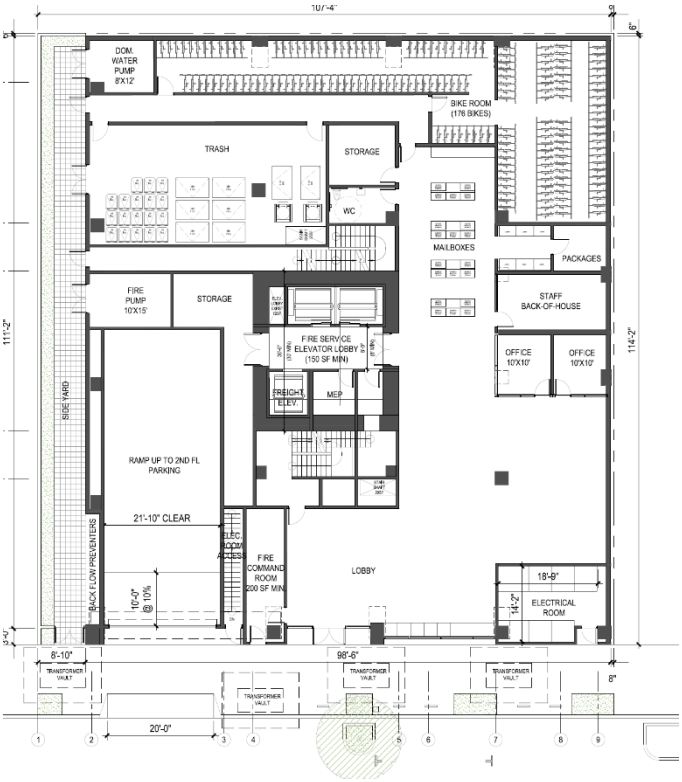

Figure 4: Ground Floor Plan

2. PROJECT BACKGROUND

Existing Conditions

The existing commercial building located at 2029 University Avenue will be demolished and replaced with a 23-story residential building that will increase the residential density along the University Avenue commercial corridor. The existing building is a two-story commercial structure with 9,401 square feet. There are five commercial spaces fronting University Avenue. The proposed project seeks to increase the residential density onsite from the current density of 0 dwelling units to the proposed project's 240 units, adding to the housing stock in the Downtown.

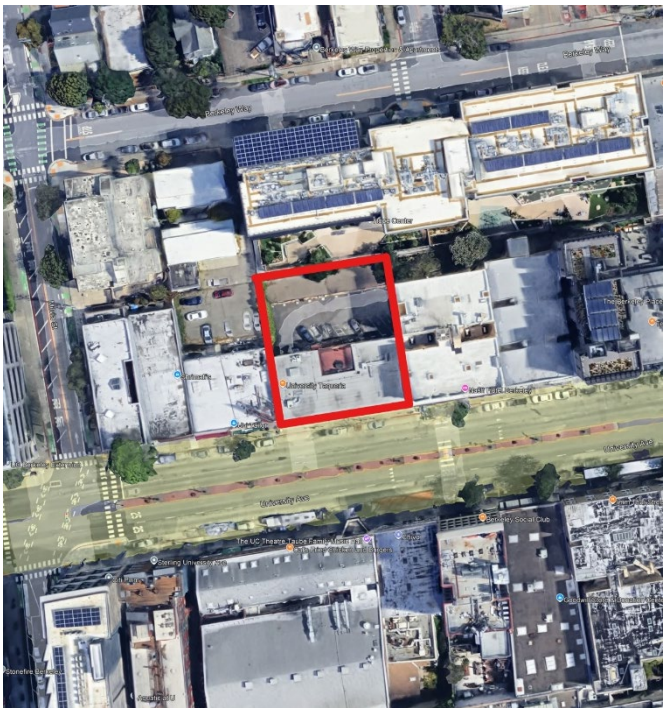

Figure 5. Aerial View of Project Site

Environmental Conditions

A Historic Resource Evaluation (HRE) was completed for this project in October 2023 (with a letter update for the report November 6, 2024). The evaluation was conducted by Caitlin Hibma of Left Coast Architectural History. The

HRE concluded that the existing commercial building and garage were built in 1953 and 1943, respectively.

The project does not appear on the California Environmental Protection Agency's (CalEPA) Cortese Lists. The project site does not contain any hazardous materials onsite. Refer to the Hazardous Waste and Substances Statement and the Phase I Environmental Site Assessment Report that is included as part of this project application packet for more information.

Table 2: Surrounding Uses and Zoning

Direction	Uses	Zoning
North	Commercial	C-DMU Buffer
East	Commercial	C-DMU Outer Core
South	Commercial	C-DMU Core
West	Commercial	C-DMU Outer Core

The project site does not have any protected, culverted, or historic creek beds on the property. As such, the Creek Protection Documentation required as part of the City of Berkeley's Zoning Project Application is not applicable to this project.

The proposed project should be deemed to be exempt from the CEQA Guidelines pursuant to Section 15332, Infill Development Projects section. The project meets each of criteria A through E of that section, as also noted in the CEQA discussion in Section 5 of this Applicant Statement.

3. PROJECT COMPLIANCE WITH GENERAL PLAN AND ZONING CODE

The City of Berkeley General Plan designates this project site as Downtown. The Downtown designation is characterized by pedestrian-oriented commercial development including retail and restaurant uses. This site is located in the outer core of the Downtown.

The proposed project site is zoned C-DMU outer core and will advance the goals of Berkeley's Downtown Area Plan by advancing residential infill development that is sustainable, close to transit, and will add to the economic vitality of the Downtown.

Figure 6: City of Berkeley Zoning Map

The proposed project will meet all of the zoning district development standard requirements except as modified pursuant to SDBL. The project complies with the C-DMU zone development standards for height (stories), FAR, front, interior side, rear setbacks, lot coverage, and vehicle and bicycle parking requirements. State Density Bonus Law waivers are required for the following zoning development standards: maximum

building height (feet), setback maximum dimension above 120', and residential open space. Table 3 identifies the applicable development standards and how the proposed project complies with them.

Table 3: Major Development Standards (C-DMU)

Municipal Code Standards		**C-DMU Standard**	**Proposed**	**Compliance**
Building Height	Main Building Height Maximum Outer Core	120 feet	256' & 23 stories	Compliant through SDBL
Setback-Maximum Dimension	Max dimension above 120'	120 feet	138'-11"	Compliant through SDBL
Lot Line Setbacks, Minimum	Front (University)	15 feet	Range: 0' to 27'-7"	Compliant w/use permit
	Rear	15 feet	Range: 6" to 10'-11"	Compliant w/use permit
	Interior Side	15 feet	Range: 8'-10" to 54'	Compliant w/use permit
	Interior Side	15 feet	Range: 8'-10" to 15'	Compliant w/use permit
Useable Open Space (UOS)	Per Dwelling Unit	80 square feet per Dwelling Unit 240 units = 19,200 square feet required	1,048 square feet	Compliant through SDBL
Landscaped UOS	40% of required UOS	40% of 19,200 SF = 7,680 SF required	321 SF	Compliant through SDBL
Parking	Automobile Parking	0	29	Compliant
	Long Term Bicycle Parking	1 space per 3 bedrooms (94)	176	Compliant
	Short Term Bicycle Parking	2, or 1 space per 40 bedrooms (7)	10	Compliant

4. PROJECT ANALYSIS

Density Bonus Eligibility
The proposed project is eligible for the State Density Bonus because it:

a) Meets all objective development standards, and

b) Provides a sufficient number of units as affordable housing.

Table 4. Unit Breakdown (SDBL)

Project Proposals	Market Rate Units	Below Market Rate Units	Total Units
Base Project	102	18 (15% of base)	120
Density Bonus Project	222	18	240

The proposed base project that meets all objective standards includes 120 dwelling units, 18 of which are affordable for very low-income households (less than 50% AMI). These 18 affordable units comprise 15% of the proposed base project. The project is also providing 18 units (15% of base project) at Moderate Income levels (120% AMI). Per State Density Bonus Law, the project is eligible for a 100% density bonus. With this density bonus, the project is entitled to use an unlimited number of waivers and up to three concessions for development standards that impede the project's ability to utilize the density bonus or increase feasibility. The average unit size for the base project is 795 SF and density bonus project is 795 SF. The following Table 5 shows the waivers that are requested to be granted to accommodate the project. Without these waivers being granted, the proposed project could not physically be built.

Table 5: Waivers Requested to Accommodate Density Bonus

Standard	Required	Proposed
Waivers Requested		
Building Height and *(per BMC Table 23.204-37)*	120'	256' & 23 stories
Setback-Max. Dimension Above 120' *(per BMC Table 23.204-38)*	120'	138'-11"
Residential Open Space *(per BMC Table 23.204-32)*	80 sf/unit (19,200 sf)	1,048 sf
Landscaped UOS *(per BMC 23.304.090.B.7)*	40% (7,680 sf)	321 sf

Project Design, Landscaping, Downtown Design Guidelines
The proposed project is located in the City of Berkeley's Downtown Plan Area and is within the Outer Core Sub-Area. The proposed project complies with many of the Downtown Design Guidelines. The project team has carefully designed the building to meet today's need for housing and to respect the architectural context and history of Berkeley's eclectic Downtown.

The Downtown Design Guidelines do not contain objective standards and as such, are not applicable to the project.

There are many ways in which the proposed project is compatible and compliant with the goals and standards of the Downtown Area Plan.

Figure 7: Rendering of Proposed Project

Building Design

The proposed project is sited and articulated so as to continue the urban building fabric along University Avenue in Berkeley's downtown core area. The project is ideally located for a high-density development as it is located midblock of a major arterial street and walkable to BART, transit, groceries and services. The project will create much needed housing, especially additional affordable housing and will benefit Berkeley by providing a high-quality infill development.

The ground floor design maximizes visual transparency into the residential lobby and locates the back of house spaces towards the rear of the building. The 2nd floor garage façade is designed to be consistent with the street level visual appearance, giving the base of the 23-story building a strong civic scale. The building steps in at the 3rd level, allowing light and air into the residential units. On the 23rd level, the building steps back further to allow a sky garden that is connected to the residential lounge and fitness room.

Sustainable design within the landscape is a guiding principle throughout the project: the use of native plant species, sustainable materials, light colored pavements to mitigate urban heat island gain, maximizing water conservation and meeting or exceeding the City and State's Water Efficient Landscape Ordinance.

The new streetscape will blend seamlessly into the existing pedestrian network and the existing street tree will be protected in place.
The project's usable open space is provided at the roof level at the sky garden. Here, a range of gathering spaces are provided with low green roof plantings and raised metal planters with medium-sized focal feature shrubs. Residents can meander amongst the plantings, gather with friends to enjoy the sweeping views of the East Bay Hills, City, and the San Francisco Bay.

Sustainability

The proposed project will comply with the Berkeley Energy Code (BMC Chapter 19.36) and the Berkeley Green Code (BMC Chapter 19.37), including providing a solar PV system, battery energy storage, electric vehicle charging, and low-carbon concrete requirements.

The proposed project will use Bird Safe Glass on windows up to 75 feet, in compliance with Berkeley's Bird Safe Building Ordinance.

The project site is very well-located for future residents to use sustainable modes of transportation. The proposed project is 0.3 miles from the Downtown Berkeley BART station and is adjacent to multiple AC Transit bus lines, as well as City of Berkeley bicycle routes. There will be minimal vehicle parking provided onsite (29 spaces) and ample bicycle parking. The proposed project will have a Transportation Demand Management (TDM) Program that will provide unlimited local bus passes to each unit and will comply with the TDM requirements in BMC Section 23.322.060.

The building is so close to goods and service that the project expects the majority of trips to be completed by active transportation or public transit modes. With the provision of free bus passes, the TDM Program will provide an additional incentive for future residents to use public transit. There are also two grocery stores nearby in a ½ - 1 mile walking distance. Therefore, the project contributes to Berkeley's Climate Action Plan goals of providing housing in locations close to goods and services, and oriented to use of public- and active-transportation, serving to reduce the City's overall per capita carbon footprint.

5. CEQA OVERVIEW AND LEGISLATIVE CONTEXT

The housing crisis continues to have a significant impact on Californians across the state. The Government Code sections discussed below are state legislative efforts that recognize the severity of California's housing crisis and the difficulties associated with developing new housing at appropriately zoned, transit-oriented, and urbanized locations. These pieces of legislation are applicable to the proposed project:

- California Environmental Quality Act Class 32 Categorial Exemption (CEQA Guideline § 15332)
- Permit Streamlining Act (Gov. Code § 65920 et seq.)
- State Density Bonus Law (Gov. Code § 65915)
- Housing Accountability Act (Gov. Code § 65589.5)
- Housing Crisis Act of 2019 (Gov. Code § 66300)

CEQA, Infill Project

This project is eligible for a categorical exemption from CEQA. Because the proposed project is located in an urbanized area and because it is an infill development project, the CEQA Class 32 "Infill" Categorical Exemption applies.

<u>Class 32 Exemption characteristics:</u>

"(a) The project is consistent with the applicable general plan designation and all applicable general plan policies as well as with applicable zoning designation and regulations.

(b) The proposed development occurs within city limits on a project site of no more than five acres substantially surrounded by urban uses.
(c) The project site has no value as habitat for endangered, rare or threatened species.
(d) Approval of the project would not result in any significant effects relating to traffic, noise, air quality, or water quality.
(e) The site can adequately be served by all required utilities and public services."

This proposed infill project is consistent with the City of Berkeley's objective design and development standards with the use of State Density Bonus Law, so it is subject to the categorical exemption under CEQA. The proposed development occurs within the City of Berkeley, on a site that is 0.28 acres and 100% surrounded by urban uses. The project site is already fully developed with an existing commercial building, so the site has no value for endangered, rare, or threatened species.

In terms of CEQA, this project is environmentally benign as it will not result in any significant traffic, noise, air quality, or water quality impacts. The project will provide minimal (29 spaces) vehicle parking, so will not generate any significant traffic or air quality impacts. There will be residential noise which will not constitute an impact. The proposed project provides a Stormwater Control Plan to protect water quality. The site is on an urbanized parcel that has existing service connections to all required utilities and public services.

Historic Resource Evaluation

The following Historic Resource Evaluation was provided by Caitlin Hibma of Left Coast Architectural History. The subject property is over 40 years old but does not have any significant associations with historically important events or noteworthy historical figures. The historic evaluation found that the property is not historically significant at either the local or State level and therefore does not qualify as an historic resource for purposes of the California Environmental Quality Act (CEQA).

Under the City of Berkeley's Landmarks Preservation Ordinance and its Landmark/Structure of Merit criteria, there is no specific age threshold or criteria. In sum, 2029 University Avenue has no potential cultural, historical, architectural or educational values or importance;

- Is not associated with any cultural or historical period or events;
- Is not a first, last, prototypical or important example of its type;
- Is not contemporary with any nearby landmarks.

Consequently, the property and building at 2029 University Avenue has no potential eligibility as a City of Berkeley Landmark or Structure of Merit.

SB 330/Housing Crisis Act

On December 10, 2024, an SB 330 Preliminary Application was submitted to the City of Berkeley that locked in the standards and fees applicable at the time of submission. The Housing Crisis

Act (Gov. Code § 66300) prohibits a local agency from disapproving, or conditioning approval in a manner that renders infeasible, a housing development project that provides affordable housing. The act also requires that a development project must comply with applicable, objective general plan and zoning standards and criteria that were in effect at the time the application was deemed to be complete. The law also requires the city or county to consider and either approve or disapprove the housing development project within the 5 allowable public hearings under HCA, and consistent with the applicable timelines under the Permit Streamlining Act.

Permit Streamlining Act

The project is required to go through a completeness review under the Permit Streamlining Act ("PSA"), Government Code § 65920 et seq. The PSA imposes several relevant obligations on the City as it conducts its completeness review of the project's application.

First, the City is required to compile lists that include the information required for a complete submittal (Gov Code § 65940 et seq). The City has several checklists and application documents governing what needs to be included in planning applications. Second, Gov Code § 65943 spells out a jurisdiction's obligations after submittal:

> Not later than 30 calendar days after any public agency has received an application for a development project, the agency shall determine in writing whether the application is complete and shall immediately transmit the determination to the applicant for the development project. If the application is determined to be incomplete, the lead agency shall provide the applicant with an exhaustive list of items that were not complete. That list shall be limited to those items actually required on the lead agency's submittal requirement checklist. In any subsequent review of the application determined to be incomplete, the local agency shall not request the applicant to provide any new information that was not stated in the initial list of items that were not complete.

The section above requires a jurisdiction to:

1. Return a completeness determination within 30 days of submittal.
2. An incomplete determination must be exhaustive.
3. A jurisdiction's review must be limited to only those items found on the agency's submittal requirement checklist.
4. Subsequent completeness determinations may not request new information.

Lastly, if the City determines that the application is incomplete, the City is required to "specify those parts of the application which are incomplete and shall indicate the manner in which they can be made complete" (Gov Code § 65943).

Housing Accountability Act

The project is subject to the Housing Accountability Act (Gov. Code § 65589.5) which requires the City of Berkeley to approve the project because it is consistent with all objective standards.

Under the Housing Accountability Act, the City is only permitted to reject a project if it can make findings based on a *preponderance* of evidence that the project would have a significant, unavoidable, and quantifiable impact on "objective, identified written public health or safety standards, policies, or conditions." (Gov. Code §65589.5(j)). The Legislature recently affirmed its expectation that these types of conditions "arise infrequently." (Ch. 243, Stats. 2018, § 1 (adding subdivision (a)(3) to Gov. Code § 65585.5)). Here, there is no evidence, let alone a preponderance of evidence, that the project would have any impact on public health and safety.

The following legislative findings (from Government Code § 65589.5(a)(2)) are instructive of how, and why, the City must interpret and implement these laws:

> California has a housing supply and affordability crisis of historic proportions. The consequences of failing to effectively and aggressively confront this crisis are hurting millions of Californians, robbing future generations of the chance to call California home, stifling economic opportunities for workers and businesses, worsening poverty and homelessness, and undermining the state's environmental and climate objectives…
>
> The Legislature's intent in enacting this section in 1982 and in expanding its provisions since then was to significantly increase the approval and construction of new housing for all economic segments of California's communities by meaningfully and effectively curbing the capability of local governments to deny, reduce the density for, or render infeasible housing development projects and emergency shelters. That intent has not been fulfilled…
>
> It is the policy of the state that this section should be interpreted and implemented in a manner to afford the fullest possible weight to the interest of, and the approval and provision of, housing.

The Housing Accountability Act (Gov. Code § 65589.5) also requires the City of Berkeley to approve the project. The project is protected under the Housing Accountability Act because it complies with the City's objective standards and criteria, as demonstrated in document 009-MSC of this application. The City is only permitted to reject a project under these circumstances if it can make findings based on a preponderance of evidence that the project would have a significant, unavoidable, and quantifiable impact on "objective, identified written public health or safety standards, policies, or conditions." (Gov. Code § 65589.5(j)). The Legislature recently affirmed its expectation that these types of conditions "arise infrequently." (Ch. 243, Stats. 2018, § 1 (adding subdivision (a)(3) to Gov. Code § 65585.5)). Here, there is no evidence, let alone a preponderance of evidence, that the project would have any impact on public health and safety.

A broad range of plaintiffs can sue to enforce the Housing Accountability Act, and the City would bear the burden of proof in any challenge (Gov. Code § 65589.5(k)). As recently

reformed in the 2017 legislative session, the act makes attorney's fees and costs of suit presumptively available to prevailing plaintiffs, requires a minimum fine of $10,000 per housing unit for jurisdictions that fail to comply with the act within 60 days, and authorizes fines to be multiplied by five times if a court concludes that a local jurisdiction acted in bad faith when rejecting a housing development.

6. REQUIRED FINDINGS

This section outlines the proposed project's compliance with the required findings for approval of the requested Use Permits for this project.

1. Use Permit, under BMC §23.204.020(A), to allow multi-family residential building
2. Use Permit, under BMC § 23.204.030(A)(1)(a) to construct new floor area
3. Use Permit, under BMC § 23.326.070(A): Demolition of a Non-Residential Building
4. Administrative Use Permit, under BMC § 23.304.050(A) to construct rooftop architectural elements which exceed the height limit for the district

Use Permit Findings

1. Use Permit, under BMC § 23.204.020(A), to allow a multi-family residential building

Table 23.204-1: Allowed Uses in the Commercial Districts.

- Multi-Family Residential: UP(PH)

Response: The project will replace the existing underutilized commercial building with 240 new units that have a modern and sustainable design. The efficient project design will offer 280 bedrooms to help meet the demand for student-oriented and downtown-adjacent housing. The housing crisis is felt acutely here in Berkeley, with people paying extremely high rents to be able to live near campus or downtown because there are so few options available. The project at 2029 University Avenue will be able to offer 18 of the proposed units as affordable for very low-income households earning less than 50% of AMI and 18 units at moderate income households. This project will supply some of this badly needed housing at market rate and below market rate, offering amenities tailored to the downtown lifestyle.

2. Use Permit, under BMC § 23.204.030(A)(1)(a) to construct new floor area

Table 23.204-2: New Floor Area Permit Requirements

- C-DMU District, over 10,000 sq. ft. or more = UP(PH)

Response: Because this Use Permit does not have any objective standards in the required findings, the density bonus project assumes the Use Permit to construct new floor area. The construction, establishment, maintenance, and operation of the proposed project will not be detrimental to the health, safety, peace, morals, comfort, or general welfare of the neighborhood or the City as a whole. The project site is 12,385 SF and currently contains a 9,401 SF commercial building. The proposed project has 190,878 gross square feet and will significantly increase the intensity of development at this site by providing 240 units.

5. Use Permit, under BMC § 23.326.070(A): Demolition of a Non-Residential Building

A. Main Non-Residential Buildings. A main building used for non-residential purposes may be demolished with a Use Permit.

D. *Findings.* A Use Permit or an AUP for demolition of a non-residential building or structure may be approved only if the ZAB or the Zoning Officer finds that:

1. The demolition will not be materially detrimental to the commercial needs and public interest of any affected neighborhood or the City of Berkeley; and
2. The demolition:
   (a) Is required to allow a proposed new building or other proposed new use;
   (b) Will remove a building which is unusable for activities which are compatible with the purposes of the district in which it is located or which is infeasible to modify for such uses;
   (c) Will remove a structure which represents an inhabitable attractive nuisance to the public; or
   (d) Is required for the furtherance of specific plans or projects sponsored by the City of Berkeley or other local district or authority upon a demonstration that it is infeasible to obtain prior or concurrent approval for the new construction or new use which is contemplated by such specific plans or projects and that adhering to such a requirement would threaten the viability of the plan or project.

Response: The demolition of this existing commercial building is necessary to allow the proposed new building to be constructed. The demolition of the existing two-story, 12,385 SF building will not be materially detrimental to the commercial needs and public interest of the affected neighborhood. In fact, an intention of the Downtown Mixed-Use District (C-DMU) is to implement the vision and goals of the Downtown Area Plan including environmental sustainability, urban design, and increase housing stock including affordable housing. (BMC § 23.204.130(A)) Though the existing property is a two-story building, it is an underutilized parcel with multiple vacant commercial tenant spaces. It is not a historically significant and will be replaced by a multi-family development with 240 dwelling units containing a total of 280 bedrooms.

The proposed project is both compatible with the zoning district's intent and will continue to maintain the present street frontage of the district. The proposed project will not interfere with the continuity of streetscape, and the design of the building will maintain the continuity of building facades along University Avenue. This is a true infill development project, which will redevelop an underutilized parcel containing a two-story, partially vacant commercial building into a vibrant multi-family residential address with an attractive pedestrian atmosphere.

6. Administrative Use Permit, under BMC § 23.304.050(A) to construct rooftop architectural elements which exceed the height limit for the district.

Response: Because this Administrative Use Permit does not have any required findings, the density bonus project assumes the AUP to construct rooftop architectural elements that exceed the C-DMU zone height limit.

Required Findings for Use Permits in the C-DMU Zone

E. *Permit Findings.* To approve an AUP or Use Permit for a project in the C-DMU district, the review authority must make the findings in Section 23.406.040 (Use Permits) and find that the proposed use or structure:

1. Is compatible with the purposes of the district;
2. Encourages and maintains the present street frontage of the district;
3. Does not interfere with the continuity of retail or compatible service facilities at the ground level;
4. Does not interrupt a continuous wall of building facades;
5. Is compatible in design and character with the district and the adjacent residential neighborhoods;
6. Does not generate traffic or parking demand significantly beyond the capacity of the district or significantly increase impacts on adjacent residential neighborhoods; and
7. Complies with the Southside Plan's adopted Mitigation Monitoring Program (MMP)

Response: The proposed project meets all the objective standards of the required findings for approving a Use Permit in the C-DMU zone. This SB 330 Housing Project is not subject to standards that are not objective. Items 1 and 5 are not objective standards, however the project does comply with them. Surrounding land uses include other multi-family residential developments of similar scale to the proposed project. The project is located within the C-DMU zone, which the City of Berkeley envisioned to support dense housing development near regional transit, shops, and amenities that the Downtown and campus areas provide.

The proposed project is both compatible with the zoning district's intent and will continue to maintain the present street frontage of the district. The proposed project will not interfere with the continuity of streetscape at the ground level, and the design of the building will maintain the continuity of facades along University Avenue.

This infill project is especially sustainable in its provision of housing opportunities so near to services and public transportation. The project is near the Downtown Berkeley BART Station and multiple AC Transit lines on University Avenue. Providing dense housing in close proximity to regional transit, bicycle routes, UC Berkeley campus, shops, and services will reduce vehicle miles traveled, air quality and greenhouse gas emissions impacts of the future residents.

The proposed project is not anticipated to generate significant traffic or parking demand because it is located in the City of Berkeley's Low Vehicle-Miles Traveled (VMT) Area. This Low VMT area includes the University Avenue commercial corridor because the VMTs per resident are an average of 15% less than the rest of the Bay Area. In addition, the proposed project will have a Transportation Demand Management Program. Future residents will not be eligible for

Residential Parking Permits (RPP). The proposed project will comply with all objective standards in the Downtown Area Plan's adopted Mitigation Monitoring Program (MMP). As a result, the project would not be materially detrimental to the housing needs or public interest of the affected neighborhood and the City of Berkeley.

7. COMMUNITY OUTREACH

A neighborhood meeting was held on December 13, 2024 at 5:30PM. The meeting was held on Zoom. Nine people joined the meeting, five of which were from the project team and the other four from the general public. The project architect presented the project via a power point presentation, and one member of the public asked questions at the conclusion of the presentation. The questions were from the owner of Red Tomato Pizza located at 2017 University Avenue. His questions were regarding traffic control during construction. The team answered his questions and outlined the standard Conditions of Approval that are part of the Use Permit application approval.

4. Anti-Discriminatory House Statement

1. Does the applicant or sponsor, including the applicant or sponsor's parent company, subsidiary, or any other business or entity with an ownership share of at least 30% of the applicant's company, engage in the business of developing real estate, owning properties, or leasing or selling individual dwelling units in states or jurisdictions outside of California?
   Yes

2. If the answer to (1) is yes, which?
   Washington State, Hawaii

3. If the answer to (1) is yes, does the applicant or sponsor, as defined in (1), have policies in individual states that prohibit discrimination based on sexual orientation, gender identity, and/or gender expression in the sale, lease, or financing of any dwelling units enforced on every property in the state or states where the applicant or sponsor has an ownership or financial interest?
   Laconia always hires 3rd party property management companies who practice equal housing opportunity policies.

4. If the answer to (1) is yes, does the applicant or sponsor, as defined in (1), have a national policy that prohibits discrimination based on sexual orientation and gender identity in the sale, lease, or financing of any dwelling units enforced on every property in the United States where the applicant or sponsor has an ownership or financial interest in property?
   Please see answer to (3)

5. If the answer to (3) or (4) is yes, please provide a copy of that policy or policies as part of this application.
   Please see the link below to the equal housing policies for Greystar, the property management company we plan to work with at 2029 University Avenue.

AFFORDABLE HOUSING COMPLIANCE PLAN

planning@berkeleyca.gov • Phone (510) 981-7410, TDD (510) 981-7450

Planning and Development
1947 Center St, 2nd Floor
Berkeley, CA 94704

Affordable Housing Requirements

BERKELEY MUNICIPAL CODE CHAPTER 23.328

Berkeley Municipal Code (BMC) Chapter 23.328, Inclusionary Housing, requires Housing Development Projects[1] with more than 5,000 square feet of residential unit floor area to include at least 20 percent of the Residential Units[2] as permanently affordable units. All affordable units provided in the project will be established and monitored within the City's Below Market Rate (BMR) housing program, and are referred to as BMR Units. The housing development project must provide one of the following to comply with the City's Inclusionary Housing regulations:

A. Requirement to construct BMR units on-site

B. Option to pay an In-Lieu Fee

C. Combination of on-site BMR units and In-Lieu Fee

D. Other options allowed by the Chapter

Each option is described in more detail below.

A. REQUIREMENT TO CONSTRUCT AFFORDABLE UNITS

Projects must provide 20 percent of the total residential units as on-site BMR units. BMR units must have the same proportion of bedroom counts (except no affordable unit can have more than three bedrooms) and average unit size as the market rate units. BMR units must be reasonably dispersed throughout the project, be comparable to market-rate units in quality, and have access to the same amenities and common areas as market-rate units.

B. OPTION TO PAY AN IN-LIEU FEE

Applicants have the option to pay an In-Lieu Fee instead of providing the required BMR units.
The In-Lieu Fee applies to the residential unit floor area within the project (base project only if utilizing State Density Bonus provisions). The fee[3] is assessed on a square-foot basis according to the schedule listed in the table. The full fee must be paid prior to obtaining the Certificate of Occupancy, or, if a Certificate of Occupancy is not required, prior to the initial occupancy of the project. The fee is automatically adjusted every two years, beginning July 1, 2025, based on changes to the California Construction Cost Index.

Affordable Housing In-Lieu Fee Schedule

SQUARE FEET OF RESIDENTIAL UNIT FLOOR AREA	FEE PER SQUARE FOOT *(April 1, 2023 – June 30, 2025)*
12,000 square feet or more	$56.25
11,000-11,999 square feet	$53.75
10,000-10,999 square feet	$51.25
9,000-9,999 square feet	$48.75
8,000-8,999 square feet	$46.25
7,000-7,999 square feet	$43.75
6,000-6,999 square feet	$41.25
5,000-5,999 square feet	$38.75

NOTES

[1] **HOUSING DEVELOPMENT PROJECT** means a development project, including a Mixed-Use Residential project **(as defined in 23.502.020(M)(13)**, involving the new construction of at least one Residential Unit. Projects with one or more buildings or projects including multiple contiguous parcels under common ownership or control shall be considered as a sole Housing Development Project and not as individual projects **(BMC 23.328.020(E))**.

[2] **RESIDENTIAL UNIT** means any Dwelling Unit, any Live/Work Unit, or any bedroom of a Group Living Accommodation (GLA) except a GLA in a University-recognized fraternity, sorority or co-op; provided, however, that for purposes of this Chapter, "Residential Unit" shall not include any Accessory Dwelling Unit or Junior Accessory Dwelling Unit **(BMC 23.328.020(I))**.

[3] Resolution 70,698-N.S.

Planning and Development
1947 Center St, 2nd Floor
Berkeley, CA 94704

APPLICATION CITY OF BERKELEY **LAND USE PLANNING**

AFFORDABLE HOUSING COMPLIANCE PLAN

planning@berkeleyca.gov • Phone **(510) 981-7410,** TDD **(510) 981-7450**

C. COMBINATION OF BMR UNITS AND IN-LIEU FEE

Projects may provide less than the required 20 percent total residential units as on-site BMR units by paying a pro-rated In-Lieu Fee based on the schedule above. The fee amount per square foot is based on the total residential unit floor area of the project.

Formula to calculate the pro-rated in-lieu fee:

The Fee Per Square Foot *multiplied by* the **Total Residential Unit Floor Area** of a Housing Development Project, *multiplied by* the **Percentage of the Applicable Requirement Remaining** after accounting for any on-site Affordable Units provided.

For projects that utilize a State Density Bonus, only the base project is used in the pro-rated fee. Formula to determine the Base Project Residential Unit Floor Area:

The Final Residential Unit Floor Area (for the whole project) *divided by* **One** *plus* **the Density Bonus percentage taken. (Final Project Residential Unit Floor Area/(1+DB%))**

D. OTHER OPTIONS ALLOWED BY BMC CHAPTER 23.328 – APPROVED AT THE CITY'S DISCRETION

Applicants may elect to fulfill the requirement to construct affordable housing via one of the options below. Unlike options A through C above, these options are approved at the City's discretion.

Alternative Unit Size Mix

In lieu of providing 20 percent of total residential units as on-site BMR units, an Applicant may propose an alternative mix of two-bedroom and/or three-bedroom BMR unit-types that comprise at least 20 percent of the residential unit floor area in the project.

Option to Dedicate Land

Affordable Housing requirements may be satisfied by dedicating land instead of constructing BMR units within the Housing Development Project if all the following criteria are met:

- The site is suitable for development of the Affordable Units
- Infrastructure to serve the dedicated site, including, but not limited to, streets and public utilities, are available at the property line and have adequate capacity to serve the maximum allowable residential density permitted under zoning regulations
- The site has been evaluated for the presence of hazardous materials
- The value of the site upon the date of the dedication is equal to or greater than the In-Lieu Fee that would otherwise be required.

APPLICATION CITY OF BERKELEY **LAND USE PLANNING**

AFFORDABLE HOUSING COMPLIANCE PLAN

Affordable Housing Compliance Plan Form

You are required to submit an Affordable Housing Compliance Plan (AHCP) for Housing Development Projects[4] that are subject to the affordable housing requirements of BMC Chapter 23.328, Inclusionary Housing. The AHCP is an enforceable commitment that identifies the number and type of affordable, or Below Market rate (BMR) units, the amount of In-Lieu Fees, and/or the parcels of land (or portions thereof) that will be provided and/or paid by the applicant to comply with those requirements.

The Department of Planning and Development's Land Use Division and the Department of Health, Housing, and Community Services use the information from this form and the related sheets to confirm which provisions of the City's affordable housing requirements apply to your project, and if the project complies.

Please complete the entire form. If a section doesn't apply, enter "n/a." If selecting the option to provide an alternative unit size mix or option to dedicate land, please complete the entire AHCP form and staff will contact you to discuss approval for these discretionary options.

You may be asked to revise this form to reflect the approved project during the permit review process and/or required plan sheets.

The Preliminary AHCP is required with a Zoning Permit or Zoning Certificate application. It is intended to provide estimates to the Applicant and City, and inform conditions of approval on discretionary zoning permits. See the **applicable pre-application and/or zoning submittal requirements** to determine if a Preliminary AHCP is needed for your project.

The Final AHCP is required with the first building permit application for construction, and will include the total fee amount due for projects electing to pay an In-Lieu Fee. The In-Lieu Fee can be paid any time prior to the issuance of the project's Certificate of Occupancy or Temporary Certificate of Occupancy (as applicable).

APPLICATION CITY OF BERKELEY **LAND USE PLANNING**

AFFORDABLE HOUSING COMPLIANCE PLAN

3.B. OPTION TO PAY AN IN-LIEU FEE

Housing Development Projects may provide less than the required number of on-site BMR units and pay a proportionately reduced In-Lieu Fee, calculated as follows:

The Fee Per Square Foot
multiplied by
the **Total Residential Unit Floor Area**
of a Housing Development Project,
multiplied by
the **Percentage of the Applicable Requirement Remaining** after accounting for any on-site Affordable Units provided.

Projects that do not provide any Affordable Units on-site will have an applicable requirement multiplier of one.

The in-lieu fee for Density Bonus Projects is calculated using the base project residential unit floor area only:

The Base Project Residential Unit Floor Area (BP RUFA)
is equal to:
the Final Residential Unit Floor Area (FP RUFA)
divided by
One plus the Density Bonus percentage taken (DB %)

BP RUFA = FP RUFA / (1+DB%)

AFFORDABLE HOUSING FEE DUE

Per Square Foot Fee
based on Total Residential Unit Floor Area, see Fee Schedule on Page 1) (Base Project only for density bonus projects)

X

Total Residential Unit Floor Area (square feet)
(Base Project only for density bonus projects)

X

In Lieu Fee percentage calculation*:
(Affordable Units required – affordable units provided) / Affordable Units required)

(*projects that provide no on-site Affordable Units have a multiplier of 1)

APPLICATION CITY OF BERKELEY **LAND USE PLANNING**

AFFORDABLE HOUSING COMPLIANCE PLAN

SECTION 4 REQUIRED PLAN SHEETS (LAND USE ENTITLEMENT PLANS AND BUILDING PERMIT PLANS)

REQUIRED AHCP PLAN SHEETS

In addition to completing this form, the land use entitlement and building permit plans for your housing development project must demonstrate compliance with the applicable affordable housing provisions. If your project includes a discretionary zoning permit, the entitlement plans must include a Preliminary AHCP plan sheet(s), and all building permits for construction must include a Final AHCP plan sheet(s).

What needs to be in the plans to demonstrate compliance with the City's affordable housing regulations?

The applicable AHCP plan sheets with the applicable information (listed below) must be in sequential pages near the beginning of your plan set and labeled as "Preliminary or Final Affordable Housing Compliance Plan Sheet." Having this information together in the plans will make locating the information easier during project and plan review, and provide transparency to the public. A sample plan set page is attached for reference (see Exhibit A). You will receive corrections from your zoning reviewer if information is not displayed properly in the plan set.

ALL PROJECTS: APPLICABILITY AND REQUIREMENTS OF BMC CHAPTER 23.328 INCLUSIONARY HOUSING

- Residential unit floor area diagrams* showing the floor area that is included and excluded from calculation. Diagrams must be consistent with and separate from the architectural floor plans and include:
  - Schematic diagrams of each floor or level, including mezzanines
  - Indicate floor area by use with shading, color, and/or callouts
  - Dimension all areas of the project that qualify as residential unit floor area, and provide the square footage of each area
  - Tabulation of the total residential unit floor area according to the diagrams
- Calculation of the number of required and proposed BMR units (Base Project only for density bonus)
- Calculation of 100% In-Lieu fee (provide even if on-site units are proposed)

* Diagrams should reflect the whole project (base and bonus), and provide a calculation of the Base Project Residential Unit Floor Area (RUFA) for projects that utilize state density bonus. *(See page 5)*

ON-SITE BELOW MARKET RATE (BMR) UNITS (ALL OR COMBINATION)

Any on-site BMR units
(BMC 23.328.030(A) Requirement to Construct Affordable Units

- Unit summary table by floor of BMR and market-rate units, with bedroom counts
- Alternate mix of unit types, if applicable
  - Calculations for 20 percent of residential unit floor area (must be a mix of affordable units that are either two- or three-bedrooms)

IN-LIEU FEE (ALL OR COMBINATION)

Payment in-lieu of providing some or all required affordable units on-site (BMC Section 23.328.030(B) Option to Pay In-Lieu)

In-Lieu Fee per Resolution No. 70,698-N.S. calculated as follows: the fee per square foot multiplied by the total Residential Unit Floor Area of a Housing Development Project, multiplied by the percentage of the applicable requirement remaining after accounting for any on-site Affordable Units provided. Projects that do not provide any Affordable Units on-site will have an applicable requirement multiplier of one. *(See page 5)*

The In-Lieu Fee per square foot is based on the residential unit floor area of the project (base project only if utilizing State Density Bonus provisions). *(See page 5)*

STAFF ADMINISTRATION USE ONLY

APPLICATION CITY OF BERKELEY **LAND USE PLANNING**

AFFORDABLE HOUSING COMPLIANCE PLAN

EXAMPLE OF AN AFFORDABLE HOUSING COMPLIANCE PLAN SHEET

Example Affordable Housing Compliance Plan Sheet / Residential Unit Floor Area Diagrams / Calculations*

Affordable Housing requirements:

Total number of residential units in the example project: 17 (DU + L/W + GLA)
Total RUFA in the example project: 15, 375 sq. ft.

Option I: Providing the required number of BMR units (No in-lieu fee)
Total number of affordable units (VLI or LI): 4 (20% X 17 units = 3.4 Rounded up to 4)

Option II: Providing full in-lieu payment
15, 375 sq. ft. (RUFA) X $56.25= $864,843.75

Option III: Providing a combination of BMR units and in-lieu fee
((Required BMRs – Number of BMRs provided)/Total number of BMRS required) = X%
X% x (Total RUFA sq. ft.) = Y sq. ft.
Y sq. ft. X $56.25= $Z (Total In-Lieu fee required)

*For reference and illustrative purposes only

PROJECT DESCRIPTION

PROJECT ADDRESS: 2029 University Ave. Berkeley, CA 94704 (APN: 57-2053-8-1)

SCOPE OF WORK:

THIS IS A ZONING APPLICATION FOR A HOUSING DEVELOPMENT, WHICH VESTS RIGHTS UNDER ZONING APPLICABLE AS OF THE SUBMITTAL DATE PER CALIFORNIA GOVERNMENT CODE SECTION 65941.1. THE PROJECT IS THE CONSTRUCTION OF A NEW 23-STORY (256'-0"), 240-UNIT HOUSING DEVELOPMENT WITH 190,878 SF OF NEW RESIDENTIAL USE AND PARKING GARAGE FOR UP TO 29 SPACES. THE PROJECT INCLUDES REMOVAL OF EXISTING NON-LANDMARKED 2-STORY COMMERCIAL STRUCTURE AND SURFACE PARKING. 15% (18 UNITS) OF THE BASE UNITS WILL BE AFFORDABLE TO VERY-LOW-INCOME HOUSEHOLDS, AND 15% (18 UNITS) OF THE BASE UNITS WILL BE AFFORDABLE TO MODERATE INCOME HOUSEHOLDS, MAKING THE PROJECT ELIGIBLE FOR A 100% DENSITY BONUS, WAIVERS, AND UP TO 3 CONCESSIONS AS A STATE DENSITY BONUS LAW DEVELOPMENT PER CALIFORNIA GOVERNMENT CODE § 65915.

THE PROPOSED PROJECT WILL COMPLY WITH THE BERKELEY ENERGY CODE (BMC CHAPTER 19.36) AND THE BERKELEY GREEN CODE (BMC CHAPTER 19.37), INCLUDING PROVIDING A SOLAR PV SYSTEM, BATTERY ENERGY STORAGE, ELECTRIC VEHICLE CHARGING, AND LOW-CARBON CONCRETE REQUIREMENTS

ZONING CODE SUMMARY

(BASED ON THE BERKELEY MUNICIPAL ZONING CODE)

BENCHMARK

THE ELEVATIONS SHOWN HEREON ARE BASED UPON THE VERTICAL DATUM OF 1988 AND WERE ESTABLISHED USING LEICA RTK NETWORK SMARTNET.

A TEMPORARY/SITE BENCHMARK IS SHOWN HEREON.

BASIS OF BEARINGS

THE COORDINATES SHOWN HEREON ARE BASED ON THE COORDINATE SYSTEM OF 1983, CCS83, ZONE 3, USING LEICA RTK NETWORK SMARTNET.

TOPOGRAPHIC NOTES

UNAUTHORIZED CHANGES & USES: THE PROFESSIONAL PREPARING THIS MAP WILL NOT BE RESPONSIBLE FOR, OR LIABLE FOR, UNAUTHORIZED CHANGES TO OR USES OF THIS MAP. CHANGES TO THIS MAP MUST BE REQUESTED IN WRITING AND MUST BE APPROVED BY THE PROFESSIONAL.

THE LOCATIONS OF EXISTING UNDERGROUND FACILITIES SHOWN ON THESE DRAWINGS ARE APPROXIMATE AND ARE BASED ON OBSERVED TOPOGRAPHIC SURFACE FEATURES AND AVAILABLE INFORMATION. THE PROFESSIONAL PREPARING THIS MAP ASSUMES NO RESPONSIBILITY FOR THE ACCURACY OF THESE FACILITIES OR FOR THE INADVERTENT OMISSION OF RELATED INFORMATION.

TOPOGRAPHIC INFORMATION SHOWN HEREON WAS OBTAINED FROM GROUND SURVEY CONDUCTED ON SEPTEMBER AND OCTOBER, 2023

TREE DIAMETERS ARE MEASURED AT CHEST HEIGHT (48").

SURVEYOR'S STATEMENT

THIS TOPOGRAPHIC SURVEY MAP WAS PREPARED BY ME OR UNDER MY DIRECTION.

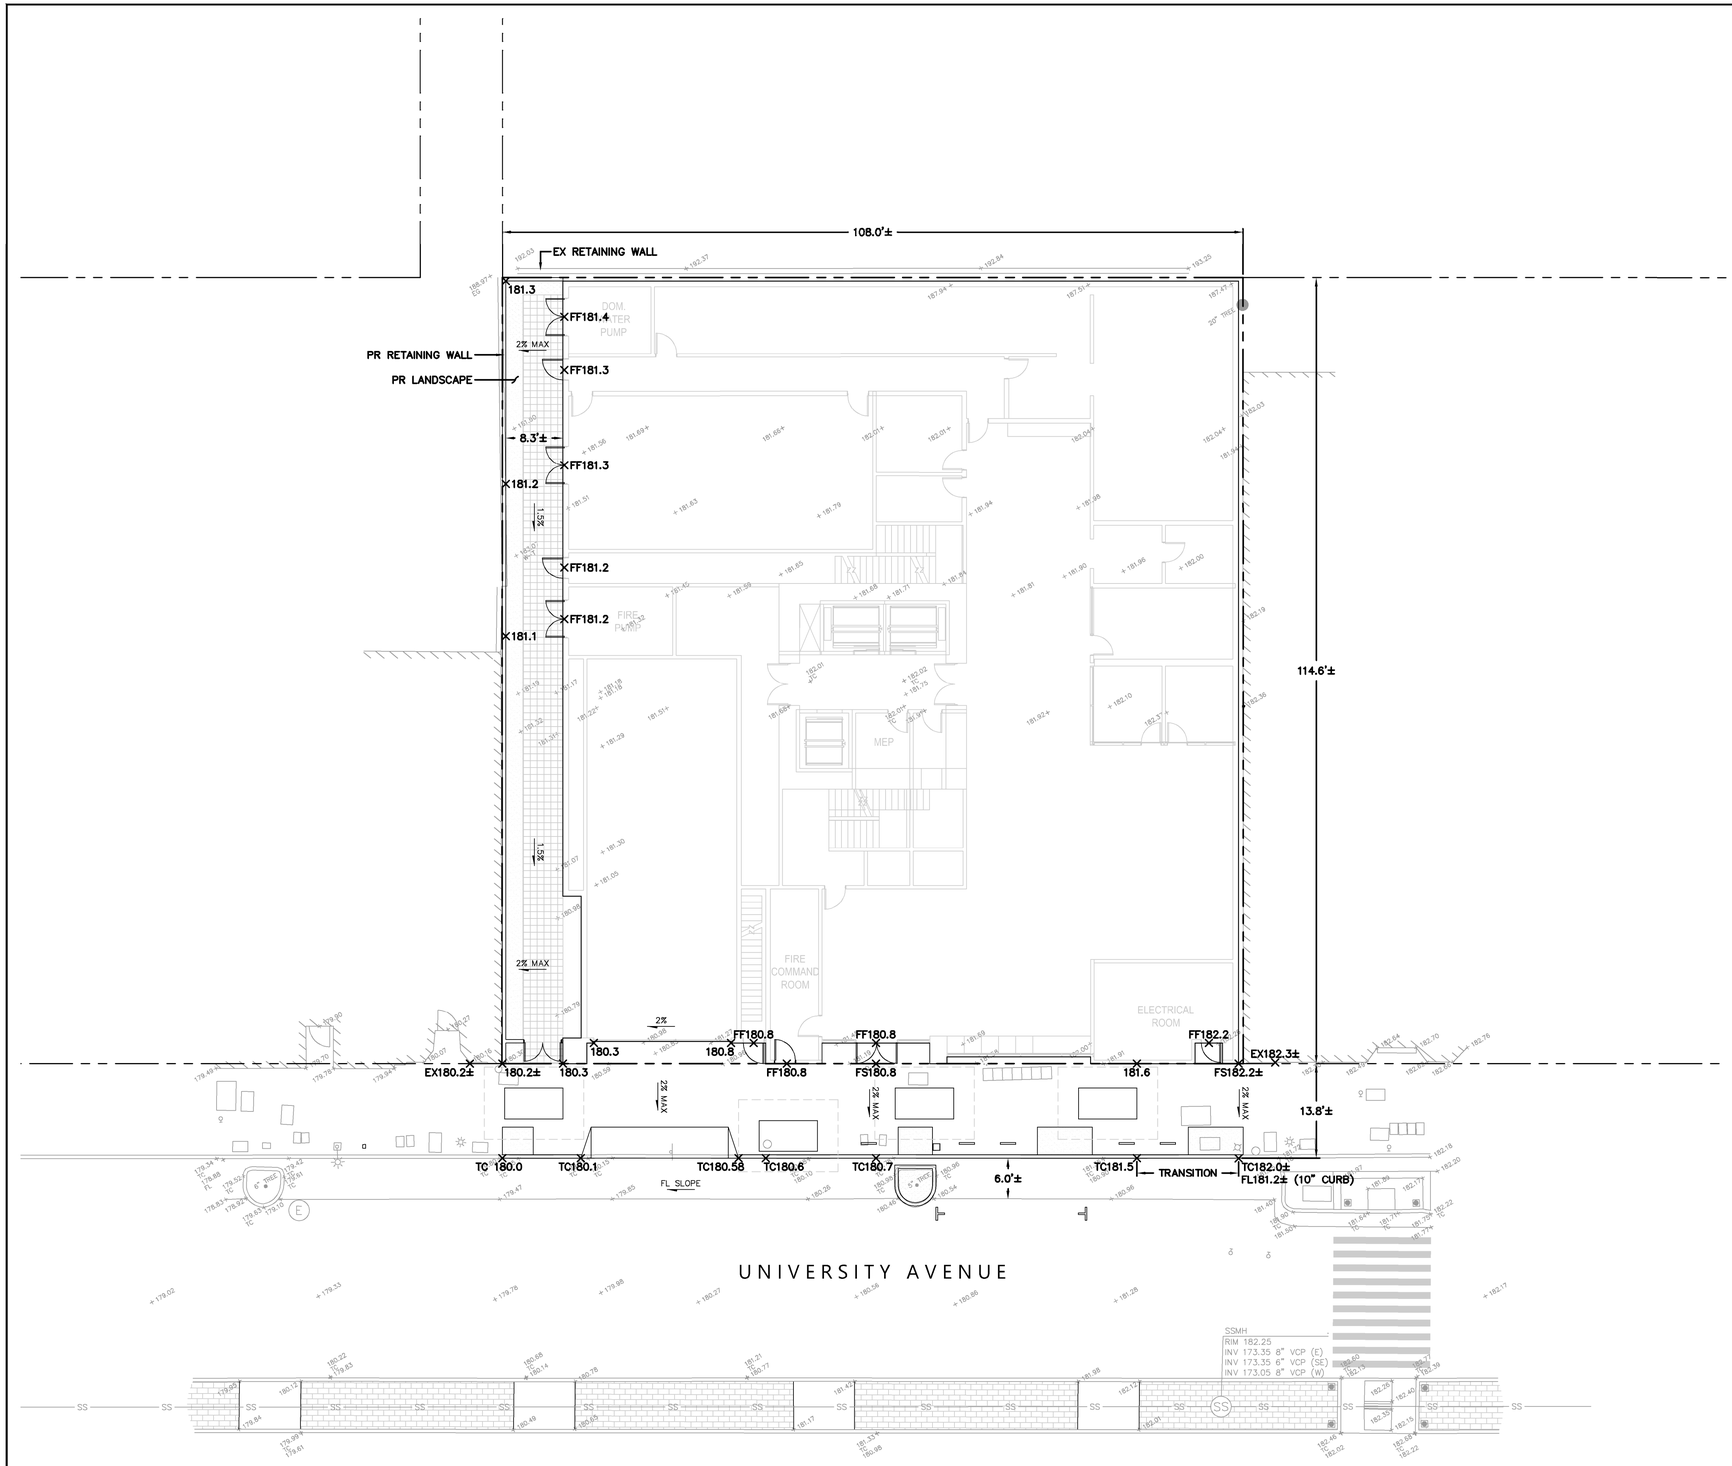
A4.1



GENERAL NOTES

1. UTILITIES AND UNDERGROUND FACILITIES INDICATED ARE FOR INFORMATION ONLY. IT IS THE CONTRACTOR'S RESPONSIBILITY TO VERIFY THE LOCATION AND DEPTH WITH APPROPRIATE AGENCIES. NEITHER THE OWNER NOR THE CITY NOR THE DESIGN PROFESSIONAL ASSUMES RESPONSIBILITY THAT THE UTILITIES AND UNDERGROUND FACILITIES INDICATED WILL BE THE UTILITIES AND UNDERGROUND FACILITIES ENCOUNTERED.
2. BOUNDARY INFORMATION SHOWN ACCORDING TO A FIELD SURVEY PERFORMED BY BKF ENGINEERS ON JULY 26, 2024.
3. BASIS OF BEARINGS: THE BEARING OF N05°35'30"W BETWEEN FOUND CITY OF BERKELEY MONUMENTS ON SHATTUCK AVENUE AT THE INTERSECTIONS OF UNIVERSITY AVENUE AND ADDISON STREET AS SHOWN ON PARCEL MAP 6772 FILED ON JANUARY 18, 1995, IN BOOK 216 PAGE 41, WAS TAKEN AS THE BASIS OF BEARINGS OF THIS SURVEY.
4. BENCHMARK: THE ELEVATIONS SHOWN HEREON ARE BASED ON A FOUND CITY OF BERKELEY BENCHMARK, MONUMENT B0490, A 2" CITY OF BERKELEY BRASS DISK WITH PUNCH IN A MONUMENT WELL. ELEVATION 187.09 FEET (DATUM = CITY OF BERKELEY).
5. FIELD SURVEY DATE: JULY 24, 2024 BY BKF ENGINEERS
6. ALL GRADING SHALL BE PREFORMED IN SUCH A MANOR AS TO COMPLY WITH THE STANDARDS ESTABLISHED BY THE AIR QUALITY MAINTENANCE DISTRICT FOR AIRBORNE PARTICULATES (DUST).
7. ALL THE GRADING SHALL CONFORM TO APPROVED SPECIFICATIONS PRESENTED HEREON OR ATTACHED HERETO. ALL GRADING WORK SHALL BE OBSERVED AND APPROVED BY THE GEOTECHNICAL ENGINEER. THE GEOTECHNICAL ENGINEER SHALL BE NOTIFIED AT LEAST 48 HOURS BEFORE BEGINNING ANY GRADING. UNOBSERVED AND UNAPPROVED GRADING WORK SHALL BE REMOVED AND REDONE AT THE CONTRACTORS EXPENSE.

DENOTES POLLINATOR PLANT SPECIES

GENERAL PLANTING AND IRRIGATION NOTES

1. LANDSCAPE AND IRRIGATION PLANS SHALL COMPLY WITH THE CRITERIA OF THE CALIFORNIA MODEL WATER EFFICIENCY ORDINANCE AND APPLY THOSE CRITERIA FOR THE EFFICIENT USE OF WATER IN THE LANDSCAPE DESIGN PLAN.

2. LANDSCAPE AND IRRIGATION PLANS SHALL COMPLY WITH ALL APPLICABLE CITY CODES AND ORDINANCES.

3. ALL PLANTING AREAS SHALL BE TOP-DRESSED WITH A 3" LAYER OF ORGANIC, UN- DYED MULCH RECYCLED FROM LOCAL ORGANIC MATERIALS SUCH AS TREE TRIMMINGS, PLANT, OR CLEAN WOOD WASTE. COMPOST APPLICATION TO ACHIEVE A MINIMUM OF 6% ORGANIC MATTER IN SOIL COMPOSITION BASED ON MWELO SPECIFIED SOIL ANALYSIS RESULS FOR THE SITE SOIL PER [CGBSC 4.304].

4. 50% OF ALL SHRUBS AND GROUNDCOVER SHALL BE A MINIMUM OF 5-GALLON SIZE OR LARGER.

5. IRRIGATION SYSTEM IS TO BE A FULLY AUTOMATIC WEATHER-BASED SYSTEM USING LOW FLOW DRIP AND BUBBLER SYSTEM.

6. STREET TREES SHALL BE TIED INTO IRRIGATION SYSTEM.

7. 58% OF ALL PLANTS PROPOSED ARE NATIVE AND WILD-LIFE SUPPORTING.

8. PLANT SELECTION AND DESIGN TO COMPLY WITH BAY-AREA FRIENDLY BASICS LANDSCAPE CHECKLIST.

IRRIGATION SYSTEM DESIGN INTENT

1. THIS PLAN SHALL COMPLY WITH THE REQUIREMENTS OF THE STATE OF CALIFORNIA'S MODEL WATER EFFICIENT LANDSCAPE ORDINANCE (MWELO), CITY OF BERKELEY, AND EAST BAY MUNICIPAL UTILITY DISTRICT (EBMUD) WATER DISTRICT.

2. THE IRRIGATION SYSTEM SHALL BE DESIGNED TO PROVIDE THE MINIMUM AMOUNT OF WATER NECESSARY TO SUSTAIN GOOD PLANT HEALTH.

3. THE IRRIGATION SYSTEM IS TO BE A FULLY AUTOMATIC, WEATHER-BASED SYSTEM USING RAIN SENSOR, LOW FLOW DRIP, BUBBLER DISTRIBUTION, AND ROTOR WITH MATCHED PRECIPITATION RATE NOZZLES DESIGNED FOR HEAD-TO-HEAD COVERAGE.

4. ALL SELECTED COMPONENTS SHALL BE PERMANENT, COMMERCIAL GRADE, SELECTED FOR DURABILITY, VANDAL RESISTANCE AND MINIMUM MAINTENANCE REQUIREMENT, INSTALLED BELOW-GRADE, AND DESIGNED FOR 100% COVERAGE.

5. THE SYSTEM SHALL INCLUDE A MASTER CONTROL VALVE, RAIN SENSOR AND FLOW SENSING CAPABILITY CONNECTED TO THE IRRIGATION CONTROLLER WHICH WILL SHUT DOWN ALL OR PART OF THE SYSTEM IF LEAKS ARE DETECTED.

6. THE IRRIGATION SYSTEM SHALL BE DESIGNED TO DELIVER WATER TO HYDROZONES BASED ON MOISTURE REQUIREMENTS OF THE PLANT GROUPING.

7. COLOR CODED HYDROZONE LANDSACPING HYDROZONE MAP WITH GROUPING AND COLLOCATING PLANTING MATERIAS BY WUCOLS WATER USE CATEGORY VL, L, M, OR H, PER [CGBSC 4.304}, TO BE PROVIDED IN PERMIT DRAWINGS.

8. RAIN SENSOR AND CONTROLLER LOCATION TO BE PROVIDED IN PERMIT DRAWINGS.

2029 University Apartments Project
in the
City of Berkeley

TRAFFIC IMPACT ANALYSIS

1) EXECUTIVE SUMMARY

The 2029 University Apartments Project would involve construction of a twenty-three story building with a total of 240 studios and one and two bedroom apartments. An alternative plan for student housing would include 160 apartments with a mixture of studios, one-bedroom, three-bedroom, and four-bedroom apartments. The only driveway to the project will be from University Avenue, which will provide access to a parking garage with 39 parking spaces. The site currently has an existing two-story commercial building with 11,200 square feet of space that would be demolished as part of the project. However, at the time the traffic counts were conducted only 5,800 square feet of building space was occupied. The existing building has 19 off-site parking spaces, so the proposed project would only result in an increase of 10 spaces on the site. **Figure 1** shows the location of the project and the surrounding roadway network. **Figure 2** shows the ground floor site plan for the project**.** Based on the trip generation forecasts the project would generate a net increase of about 15 vehicle trips during the AM and PM peak hours. The project would have a less than significant impact on vehicle miles traveled (VMT) according to the City's adopted standards.[1] A detailed review of the project's design and an analysis conducted according to the City's guidelines indicated there would be no significant traffic or transportation impacts according to the City's significance criteria.

2) INTRODUCTION

This traffic impact report describes the transportation and circulation conditions both with and without the proposed project. The study presents information on the roadway network, the pedestrian and transit conditions, and provides an analysis of the effects on transportation facilities associated with the project. This study also describes the regulatory setting; the criterion used for determining the significance of environmental impacts; and summarizes potential environmental impacts and appropriate improvement measures when necessary. This study has been conducted in accordance with the requirements and methodologies set forth by the City of Berkeley, Alameda County, Caltrans, and the applicable provisions of CEQA.

3) ENVIRONMENTAL SETTING

This section of the report describes the roadways, traffic conditions and other existing transportation characteristics in the vicinity of the project. The primary basis for the traffic operations portion of the analysis is the peak hour level of service at the key study intersections. In this report, these peak commute hours will be identified as the AM and PM peak hours.

3.1 Project Study Intersections

To provide a baseline for identification of impacts on the local roadway network, existing traffic operating conditions have been determined for the key local intersections that may be affected by the project. For this analysis three study intersections were selected in coordination with City staff based on the City's Guidelines for Development of Traffic Impact Reports and their potential to be impacted by the proposed project. The three study intersections are:

1. *University Avenue at Milvia Street*
2. *University Avenue at the Project Entrance*
3. *University Avenue at Shattuck Avenue*

3.2 Traffic Analysis Scenarios

The study intersections were evaluated for the following four scenarios:

- Scenario 1: *Existing Conditions* – Level of Service (LOS) based on existing peak hour volumes and existing intersection configurations.

- Scenario 2: *Existing Plus Project* – Existing traffic volumes plus trips from the proposed project.

- Scenario 3: *Baseline (No Project) Conditions* – The Baseline scenario is based on Existing Conditions plus a 20% increase to the existing traffic volumes to account for approved projects and background traffic growth.

- Scenario 4: *Baseline Plus Project Conditions* – This scenario is based on the Baseline traffic volumes plus the trips that would be generated by the proposed project.

3.3 Existing Roadway Network

As shown on **Figure 1**, the roads that would be primarily affected by the project are Shattuck Avenue, University Avenue, Addison Street, Milvia Street, and Berkeley Way. The following is a brief description of these roadways:

- **Shattuck Avenue** – Shattuck Avenue is a four-lane arterial roadway extending south from Vine Street to terminate to the south at Telegraph Avenue in the City of Oakland. It serves school, residential and commercial traffic and is an important north-south travel route. It is designated as a major street and a primary transit route in the City's General Plan.

- **University Avenue –** University Avenue is a major four-lane arterial roadway in the City of Berkeley. It extends east from the Marina area and terminates at the UC Berkeley Campus. There are traffic signals at all major intersections and these generally have additional turn lanes. It is designated as a major street and a primary transit route in the City's General Plan. There is a raised median for most of its length.

- **Milvia Street** – Milvia Street is a two-lane collector street extending north from Russell Road to Yolo Avenue. It serves school, residential and commercial traffic and is designated as an important north-south bicycle boulevard.

3.4 Accident History

Caltrans has established restrictions on the use of multi-way stop signs and the California Manual of Uniform Traffic Control Devices (MUTCD) provides detailed guidance on when multi-way stop applications and traffic signals are appropriate.[1] Caltrans' guidelines state that a traffic signal or all-way stop control shall be considered if: "*Five or more reported crashes, of types susceptible to correction by a traffic control signal, have occurred within a 12-month period, each crash involving personal injury or property damage apparently exceeding the applicable requirements for a reportable crash*". A detailed review of the accident history in the study area (back to 2018) was conducted using data available from the California Highway Patrol's Statewide Integrated Traffic Records System (SWITRS). This data is included in the technical appendix and verifies the existing accident history in the area alone would not warrant installation of additional traffic signals, multi-way stop control, or other safety measures.

3.5 Intersection Analysis Methodology

Existing operational conditions at the study intersection were evaluated according to the requirements set forth by the City of Berkeley. Analysis of traffic operations was conducted using the 6th Edition of the *Highway Capacity Manual* (*HCM*) Level of Service (LOS) methodology with Synchro software.[2]

Level of service is an expression, in the form of a scale, of the relationship between the capacity of an intersection (or roadway segment) to accommodate the volume of traffic and the traffic moving through it at any given time. The level of service scale describes traffic flow with six ratings ranging from A to F, with "A" indicating relatively free flow of traffic and "F" indicating

[1] *California MUTCD*, Chapter 2B, Caltrans, Sacramento, CA, November 7, 2014.
[2] *6th Edition of the Highway Capacity Manual*, Transportation Research Board, Washington D.C., 2016.

stop-and-go traffic characterized by traffic jams. As the amount of traffic moving through a given intersection or roadway segment increases, the traffic flow conditions that motorists experience rapidly deteriorate as the capacity of the intersection or roadway segment is reached. Under such conditions, there is general instability in the traffic flow, which means that relatively small incidents (e.g., momentary engine stall) can cause considerable fluctuations in speeds and delays that lead to traffic congestion. This near-capacity situation is labeled level of service (LOS) E. Beyond LOS E, the intersection or roadway segment capacity has effectively been exceeded, and arriving traffic will exceed the ability of the intersection to accommodate it. **Table 1** summarizes the relationship between LOS, average control delay, and the volume to capacity ratio at signalized intersections. **Table 2** summarizes the relationship between LOS and delay at unsignalized intersections.

For signalized intersections, The City of Berkeley's LOS standards are based on the average delay for the entire intersection. The *HCM* methodology determines the capacity of each lane group approaching the intersection. The LOS is then based on average control delay (in seconds per vehicle) for the various movements within the intersection. A combined weighted average control delay and LOS are presented for the intersection. A summary of the HCM results and copies of the detailed HCM LOS calculations are included in the appendix to this report.

For unsignalized (all-way stop controlled and two-way stop controlled) intersections, the average control delay and LOS operating conditions are calculated by approach (e.g., northbound) and movement (e.g., northbound left-turn) for those movements that are subject to delay. Operating conditions for unsignalized intersections are presented for the worst approach.

TABLE 1
SIGNALIZED INTERSECTION LEVEL OF SERVICE DEFINITIONS

Level of Service	Description of Operations	Average Delay (sec/veh)	Volume to Capacity Ratio
A	Insignificant Delays: No approach phase is fully used and no vehicle waits longer than one red indication.	≤ 10	< 0.60
B	Minimal Delays: An occasional approach phase is fully used. Drivers begin to feel restricted.	> 10 to 20	> 0.61 to 0.70
C	Acceptable Delays: Major approach phase may become fully used. Most drivers feel somewhat restricted.	> 20 to 35	> 0.71 to 0.80
D	Tolerable Delays: Drivers may wait through no more than one red indication. Queues may develop but dissipate rapidly without excessive delays.	> 35 to 55	> 0.81 to 0.90
E	Significant Delays: Volumes approaching capacity. Vehicles may wait through several signal cycles and long vehicle queues from upstream.	> 55 to 80	> 0.91 to 1.00
F	Excessive Delays: Represents conditions at capacity, with extremely long delays. Queues may block upstream intersections.	> 80	> 1.00

SOURCES: *Highway Capacity Manual, Sixth Edition*, Transportation Research Board, 2016.

TABLE 2
UNSIGNALIZED INTERSECTION LEVEL OF SERVICE DEFINITIONS

Level of Service	Description of Operations	Average Delay (seconds/vehicle)
A	No delay for stop-controlled approaches.	0 to 10
B	Operations with minor delays.	> 10 to 15
C	Operations with moderate delays.	> 15 to 25
D	Operations with some delays.	> 25 to 35
E	Operations with high delays and long queues.	> 35 to 50
F	Operation with extreme congestion, with very high delays and long queues unacceptable to most drivers.	> 50

SOURCE: *Highway Capacity Manual, Sixth Edition*, Transportation Research Board, 2016.

3.6 Existing Intersection Capacity Conditions

The existing intersection geometry at the project study intersections is presented in **Figure 3**. The existing traffic volumes at these intersections for the weekday AM and PM peak hours are presented in **Figure 4**. Traffic counts at the intersection were conducted in November of 2024 when UC Berkeley was in session. **Table 3** summarizes the associated LOS computation results for the existing weekday AM and PM peak hour conditions at these intersections. As shown in **Table 3**, all of the study intersections currently have acceptable conditions (LOS D or better). Please note the detailed LOS calculations are included in the appendix to this report**.**

NOTES: HCM LOS results are presented in terms of average intersection delay in seconds per vehicle.

3.7 Pedestrian and Bicycle Facilities

Bicycle paths, lanes and routes are typical examples of bicycle transportation facilities, which are defined by Caltrans as being in one of the following five classes:

Class I – Provides a completely separated facility designed for the exclusive use of bicyclists and pedestrians with crossing points minimized.
Class II – Provides a restricted right-of-way designated lane for the exclusive or semi-exclusive use of bicycles with through travel by motor vehicles or pedestrians prohibited, but with vehicle parking and cross-flows by pedestrians and motorists permitted.
Class III – Provides a right-of-way designated by signs or permanent markings and shared with pedestrians and motorists.
Class IV – Provides an adjacent bike lane or bikeway that is physically separated from motor vehicle traffic.

In the vicinity of the project Hearst Avenue and Milvia Street are Class II bike routes with bike lanes. Milvia Street is also designated as a bicycle boulevard. There are sidewalks in most areas and there are also marked crosswalks, pedestrian push buttons, and pedestrian signals

provided at all nearby signalized intersections. In general, the overall network of sidewalks and crosswalks in the study area provides pedestrians with safe routes to BART and nearby transit stops.

3.8 Transit Service

The Downtown Berkeley BART station is located less than 1,000 feet from the project site. This station is located on the Richmond-Fremont Line which connected to other destinations in the Bay Area at the MacArthur Station. There is also direct service to Downtown San Francisco as well as continuing service to Milbrae. There is also extensive bus transit service provided by Alameda-Contra Costa County Transit (AC Transit) at the BART Station. In addition to local bus routes 6, 12, 51B, 70 and 604, the following special lines operate less than a block from the project:

> **800:** (All Nighter) Richmond BART to Market St. and Van Ness Ave, S.F., via Macdonald Ave, San Pablo Ave, University Ave, Telegraph Ave and downtown Oakland. Returns via Market St. and West Oakland BART.
> **851:** (All Nighter) Downtown Berkeley to Fruitvale BART via Southside Berkeley (UC campus), College Ave., Broadway, downtown Oakland, Webster St., Santa Clara Ave., Broadway, and Fruitvale Ave.
> **F:** (Transbay) UC Campus to Transbay Temporary Terminal, San Francisco via Shattuck Ave, Adeline St and 40th St.

Please note the nearest bus stops are located a half block from the project site at Shattuck Avenue and University Avenue.

4) REGULATORY CONTEXT

Existing policies, laws and regulations that apply to the proposed project are summarized below.

4.1 State

The California Department of Transportation (Caltrans) has jurisdiction over State highways and any improvements to these roadways would require Caltrans' approval.

4.2 Local

City of Berkeley General Plan - The Transportation and Circulation Element the City of Berkeley General Plan addresses the location and extent of existing and planned transportation routes, terminals, and other local public utilities and facilities. The General Plan identifies roadway and transit goals and policies that have been adopted to ensure that the transportation system of the City will have adequate capacity to serve planned growth. These goals and policies are intended to provide a plan and implementation measures for an integrated, multi-

modal transportation system that will safely and efficiently meet the transportation needs of all economic and social segments of the City.

4.3 Significance Criteria

It is important to note that this project has not been found to have any significant impacts according to CEQA and the CEQA criteria at the bottom of this section are presented for informational purposes only. In addition, the level of service criteria described below are based on the City's General Plan standards, not CEQA, and any proposed improvement measures are intended to address the City standards. Traffic improvements to improve traffic operations at the project study intersections are not considered to be required mitigations under CEQA. The City's General Plan states that the traffic from a project could cause an intersection to exceed City standards if the LOS at the intersection is reduced from LOS A, B, C, or D to LOS E (with the addition of two (2) seconds of average delay) for signalized intersections.

Improvement measures to improve the LOS should be considered at intersections that exceed this service level threshold. Exceptions to the LOS D standard arise when the project is not expected to add more than two seconds at an intersection going from LOS D to LOS E or more than three seconds of delay at an intersection that is already operating at LOS E. In addition, improvement measures would also need to be considered if a project would increase the volume to capacity (V/C) ratio by more than 0.01 at a signalized intersection that is already operating at LOS F. For unsignalized intersections, additional considerations are involved, including the number of vehicles on the critical approach, vehicles contributed by the proposed project, and signal warrant analysis. At an unsignalized intersection, improvement measures are required if a movement is LOS F, the peak hour signal warrant is met, and a minimum of 10 vehicles are added to the critical movement. This project has not been found to have any significant impacts but according to CEQA guidelines, a project could have a significant impact if it would:

- Conflict with a plan, ordinance or policy establishing measures of effectiveness for the performance of the circulation system, including transit, roadway, bicycle and pedestrian facilities.
- Would the project conflict with or be inconsistent with CEQA Guidelines Section 15064.3 subdivision (b)?
- Substantially increase hazards due to a geometric design feature (e.g., sharp curves or dangerous intersections) or incompatible uses (e.g. farm equipment).
- Result in inadequate emergency vehicle access.

5) IMPACT ANALYSIS AND IMPROVEMENT MEASURES

5.1 Project Trip Generation

As noted above, the proposed project would involve construction of a twenty-three story building with a total of 240 apartments. An alternative plan for student housing would include 160 apartments with a mixture of studios, one-bedroom, three-bedroom, and four-bedroom apartments. With the three-bedroom and four-bedroom units are counted as two each, the student housing plan actually comes out with the exact same trip generation (i.e., an equivalent of 240 apartment units when the larger units are accounted for). The site currently has an existing two-story commercial building with 11,200 square feet of space that would be demolished as part of the project. However, at the time the traffic counts were conducted only 5,800 square feet of building space was occupied. The resulting trip generation calculations are shown in **Table 4**. The trip generation rates are based on the ITE rates for high-rise apartments in the center city core, close to rail transit (Land Use Code 222), for retail/restaurant uses (Land Use Code 822), and for office space (Land Use Code 710) taken from the 11th Edition of the Institute of Transportation Engineers (ITE) Trip Generation Manual. As shown in **Table 4**, the project would generate a net increase of about 15 vehicle trips during the AM and PM peak hours.

5.2 Project Trip Distribution

The trip distribution assumptions have been based on the existing traffic count data including daily directional volume and peak-hour turning movements, the Alameda County travel demand model, and knowledge of the surrounding area such as commute patterns and the overall land use patterns in the area. **Figure 5** shows the project traffic that would be added at the project study intersections.

5.3 Existing Plus Project Intersection Capacity Conditions

This scenario evaluates the existing conditions with the addition of traffic from the proposed project. A comparison of the capacity calculations for the conditions with the addition of traffic from the project is shown in **Table 5**. **Figure 6** presents the existing plus project volumes used in the analysis. The corresponding LOS analysis calculation sheets are presented in the Traffic Analysis Appendix. As shown in **Table 5**, all of the study intersections would continue to have acceptable conditions (LOS D or better) during the weekday AM and PM peak hours.

5.4 Baseline Intersection Capacity Conditions

For background conditions the pre-Covid volumes from traffic counts taken in 2018 were used. These were substantially higher than the existing traffic counts and represent a conservative estimate of post-pandemic conditions. **Figure 7** presents the resulting baseline volumes at each of the project study intersections **Table 6** summarizes the LOS results for the Baseline and Baseline Plus Project weekday AM and PM peak hour conditions. The corresponding LOS analysis calculation sheets are presented in the *Traffic Analysis Appendix*. As shown in **Table 6**, all of the study intersections currently have acceptable conditions (LOS D or better) during the weekday AM and PM peak hours.

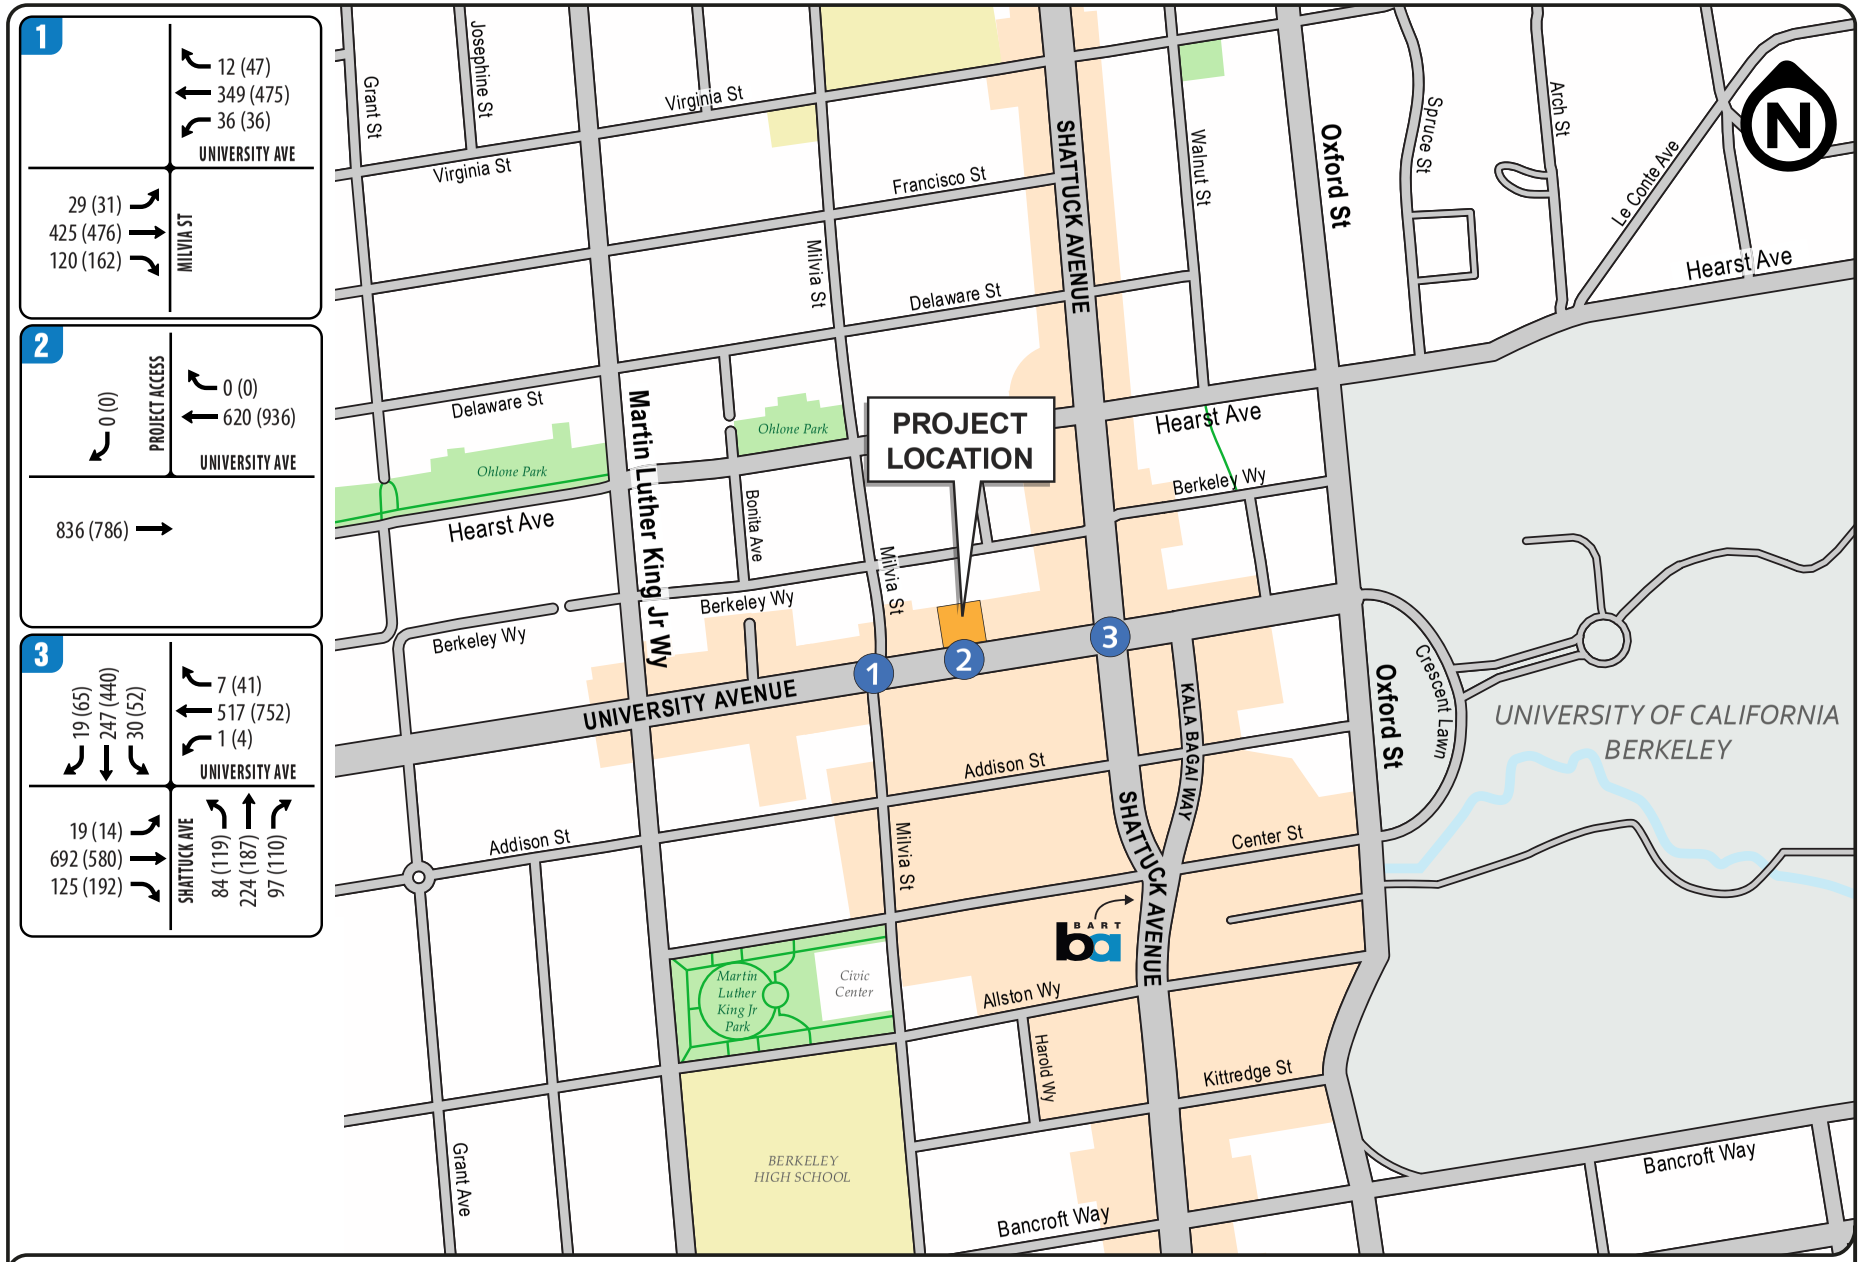

FIGURE 7 | BASELINE AM(PM) PEAK HOUR TRAFFIC VOLUMES
TRAFFIC IMPACT ANALYSIS
2029 University Apartments Project
City of Berkeley

Abrams Associates
TRAFFIC ENGINEERING, INC.

5.5 Baseline *Plus Project* Intersection Capacity Conditions

The Baseline plus proposed project traffic forecasts were developed by adding project-related traffic to the baseline traffic volumes. **Table 6** summarizes the LOS results for the Baseline Plus Project weekday AM and PM peak hour conditions (i.e. the existing roadway network). **Figure 8** presents the resulting baseline plus project volumes at each of the project study intersections. Please note that the corresponding LOS analysis calculation sheets are presented in the appendix. As shown in **Table 6**, all of the study intersections would continue to have acceptable conditions (LOS D or better) during the weekday AM and PM peak.

5.6 Internal Circulation and Access

No site circulation or access issues have been identified that would cause any traffic safety issues or any unusual traffic congestion or delay. The project driveway would be restricted to right-in and right-out traffic only. The existing raised median on University Avenue would help ensure there are no illegal left turns in or out of the project driveway. Accident records for surrounding streets within a block of the project site and for each of the study intersections are included in the technical appendix to this report. Per City of Berkeley guidelines, the project will need to maintain a minimum five foot by five-foot sight distance triangle at the garage entrance/exit. It is expected the project will also be required to provide visual and/or audio warning devices that alert pedestrians when vehicles are exiting the driveway.

5.7 Parking

This section discusses the City of Berkeley's zoning and estimated parking demand for the project. Section 23.322.030 of the Berkeley Municipal Code specifies that no parking spaces are required for residential uses within commercial districts, and a maximum of 0.5 spaces per unit may be provided. The proposed project is proposing to provide 29 spaces. The existing building has 19 off-site parking spaces, so the proposed project would only result in an increase of 10 spaces on the site. It should also be noted that that according to the City's bicycle parking standards the standard apartment version of the project would require 94 long term bicycle parking spaces and also 7 short term spaces. The student housing version of the project would require 176 long term bicycle parking spaces and also 10 short term spaces. The project is proposing to provide 176 long-term bicycle parking spaces while also providing another 10 short-term bicycle parking spaces provided with bicycle racks. A review of sight distance at the project driveway indicates that on-street parking should be prohibited on University Avenue for approximately 50 feet to the east of the project driveway to maintain adequate sight distance. The project is not currently proposing to include any on-street passenger or commercial loading spaces.

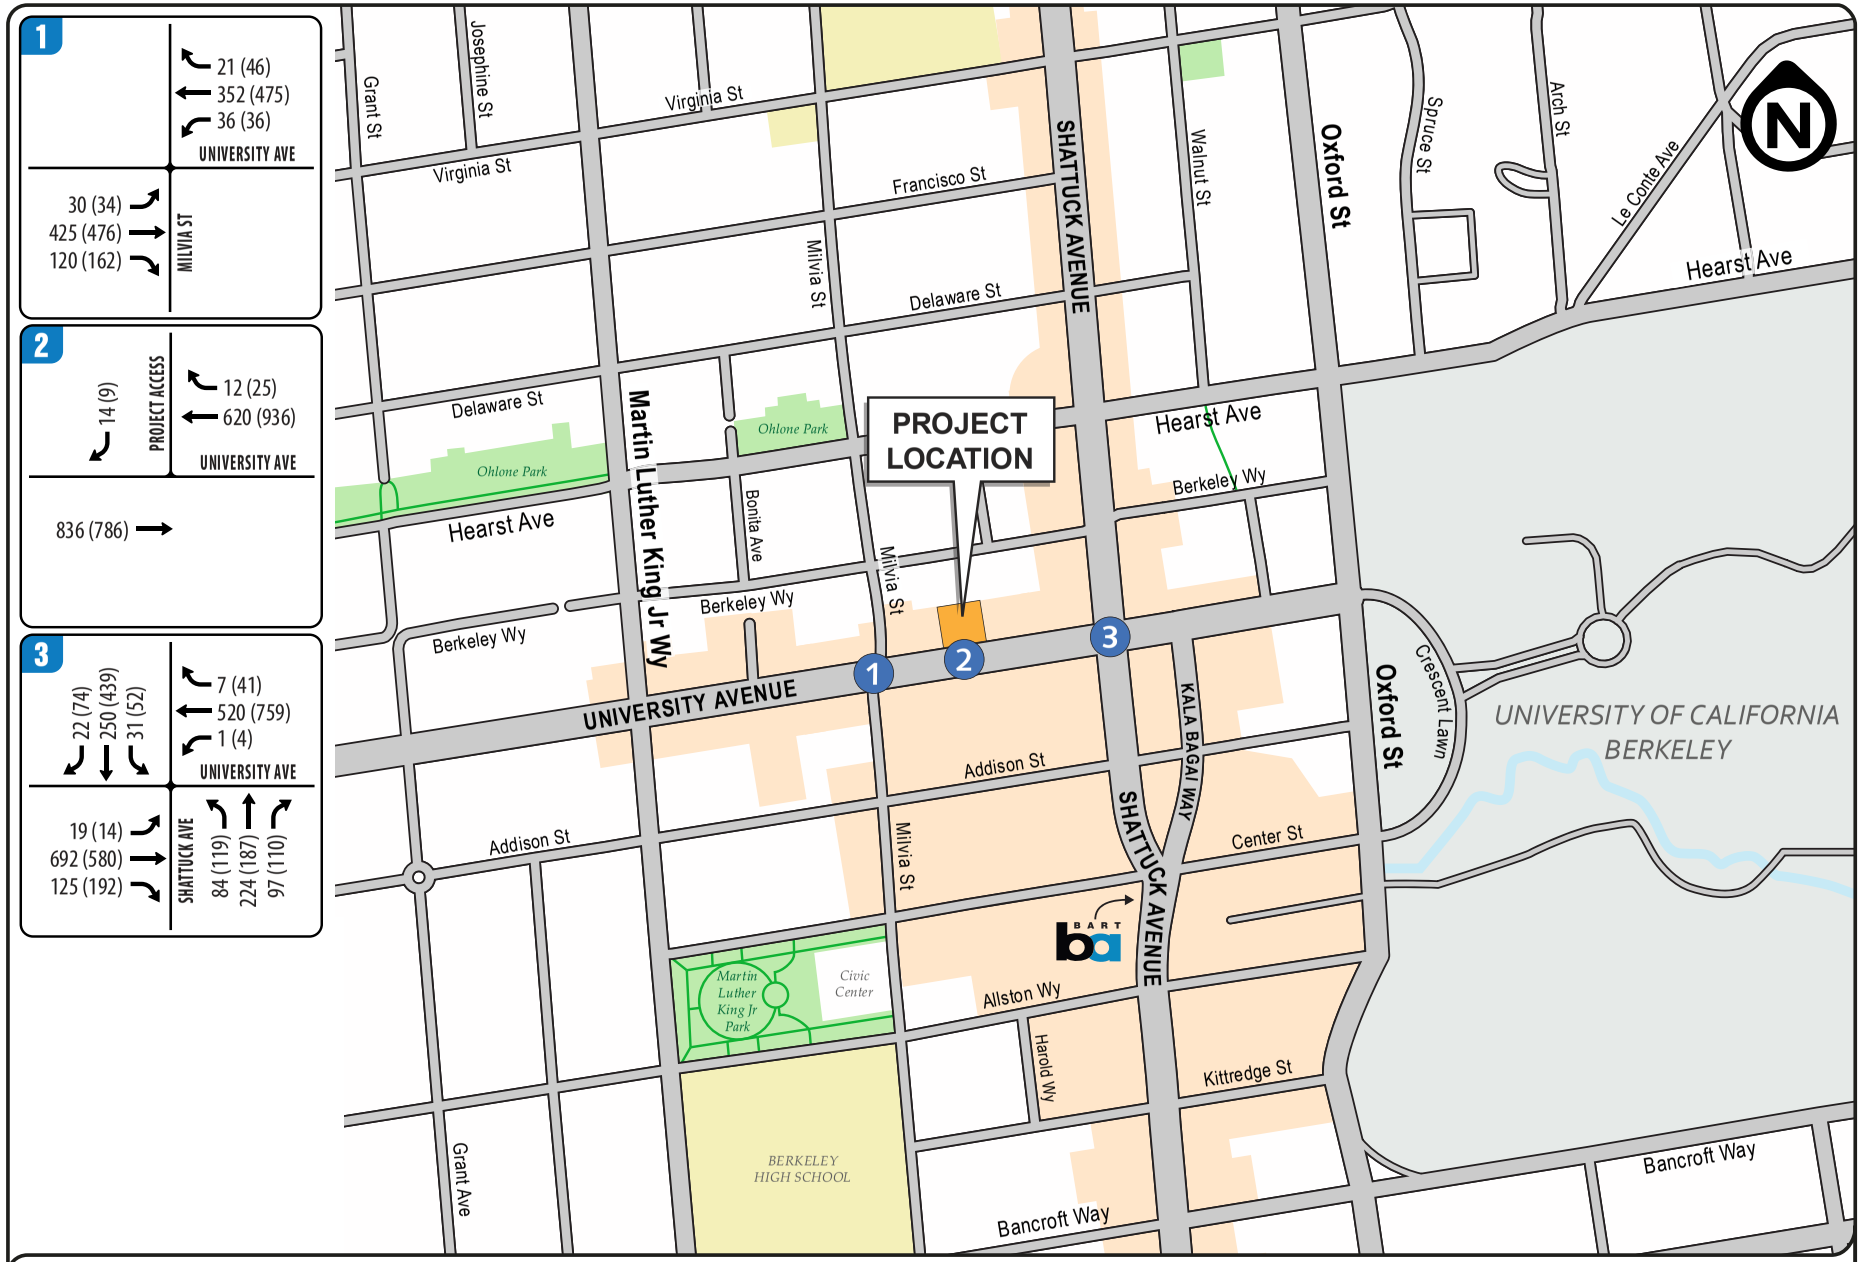

FIGURE 8 | BASELINE PLUS PROJECT AM(PM) PEAK HOUR TRAFFIC VOLUMES
TRAFFIC IMPACT ANALYSIS
2029 University Apartments Project
City of Berkeley

Abrams Associates
TRAFFIC ENGINEERING, INC.

Parking Demand in Berkeley - For this location on a major bus route the parking demand would be less than the typical ITE rate in the Parking Generation Manual. This is based on many of the same characteristics that are discussed in the trip generation section. The availability of transit, the use of bicycles, and the attractiveness of walking in a mixed-use environment clearly results in reduced vehicle trip generation and an associated reduction in the need for parking. Since Berkeley has numerous opportunities for public transportation and the apartment residents are not all expected to have personal vehicles, it is anticipated that a substantial portion of all travel will occur by walking, bicycling, and through the use of public transit. Please note in addition to being less than two blocks from a BART station there are bus stops near the site that include access to local routes as well as transbay and all-nighter bus routes.

Summary of Findings on Parking - Based on these the above factors, the residential parking would meet the City's zoning requirements, subject to approval by the City. With an approved use permit the zoning could allow the project to proceed with the proposed 29 space parking garage. The following are considerations that may affect the parking demand and shortfall:

1) The availability of transit has been shown to result in a significant reduction in the demand for parking and the project is being required to provide one free monthly transit pass for each apartment unit.[1] The Downtown Berkeley BART station is located less than three blocks from the site. This station is located on the Richmond-Fremont Line which connects to other destinations in the Bay Area, including San Francisco, at the MacArthur Station. There is also extensive bus transit service provided by Alameda-Contra Costa County (AC) Transit at the BART Station. Please note the nearest bus stops are less than a block from the site at Shattuck Avenue and University Avenue. Therefore, for this project it is anticipated that a higher portion of travel will occur by walking and through the use of public transit.[2] As a result, it is also expected that some of the apartment residents will forego owning a car, or having an extra car, because of the close proximity to transit, downtown amenities, and UC Berkeley.[3]

2) The project is proposing to provide to provide 176 long-term bicycle parking spaces plus another 8 short-term bicycle parking spaces that would be provided on-street with bicycle racks.

3) There are numerous existing car sharing locations in the area.

[2] *Trip and Parking Generation at Transit-Oriented Developments: Five US Case Studies*, University of Utah, Salt Lake City, UT, 2016.
[3] *Effects of TOD on Housing, Parking, and Travel*, Transportation Research Board, Washington D.C., 2010.

5.8 Pedestrian and Bicycle Conditions

The proposed project would not generate a significant increase in pedestrian traffic in the area (in comparison to the existing volumes) given the size of the proposed project. Based on ITE data and data from MTC's Bay Area Travel Survey for projects within 1/2 mile of a BART station during the peak commute hours the project would be forecast to generate approximately 42 transit trips, 19 bicycle trips and 65 pedestrian trips. In addition to the relatively low increase in vehicle trip generation, the proposed project would not be forecast to significantly impact or change the design of any existing pedestrian facilities and should not create any new safety problems in the area. California Highway Patrol accident records (SWITRS) for surrounding streets within a block of the project site and for each of the study intersections are included in the technical appendix to this report. A detailed review of pedestrian and bicycle collisions in the area was conducted to assist the City in the review of potential improvements.

The proposed project would not be forecast to significantly impact any existing bicycle facilities. The project will add some pedestrians and bicyclists who will utilize sidewalks and bicycle facilities in the area. Please note there are existing sidewalks and crosswalks along the route from the project to the BART station. In relation to the existing conditions, the proposed project would not cause substantial changes to the pedestrian or bicycle traffic in the area and would not substantially impact or require changes to the design of any existing bicycle or pedestrian facilities.

With respect to planned pedestrian and bicycle facilities in the project area, the City's Pedestrian Plan has identified the nearby segment of University Avenue from San Pablo Avenue to Oxford Street as a priority street segment for improvements due to the high number of pedestrian accidents. At the nearby study intersection of University Avenue at Shattuck Avenue proposed improvements in the Pedestrian Plan include restricting right turns on red, median refuges for pedestrians, curb extensions, a hardened centerline, an all-way pedestrian crossing (a.k.a. pedestrian scramble), and widening of the sidewalk at the existing bus stops. At the study intersection of University Avenue at Milvia Street proposed improvements in the Pedestrian Plan include restricting right turns on red, improving sightlines, median refuges for pedestrians, curb extensions, and realigning of the intersection. The City's Pedestrian Plan identifies a rectangular rapid flashing beacon (RRFB) for the mid-block crosswalk on University Avenue between Milvia Street and Shattuck Avenue.

In the project study area the City's Bicycle Plan identifies a protected intersection at University Avenue and Milvia Street. Protected intersections typically require the use of bicycle signals to isolate bicycle movements from conflicting vehicle movements. Bicycle signal phases can be added to the traffic signals to isolate bicycle movements from conflicting vehicle movements. The Bicycle Plan also specifies that University Avenue, Oxford Street, Shattuck Avenue, should be studied for potential cycletracks and Addison Street should be studied for a potential bicycle boulevard.

5.9 Transit

The proposed project would not interfere with any existing bus routes and would not remove or relocate any existing bus stops. The proposed Project also would not conflict with any transit plans or goals of the City of Berkeley. Based on the analysis of intersection operations and roadway segment speeds the project is not forecast to cause a degradation of the level of service (or a substantial increase in delay) on any roadway segments currently being utilized by bus transit in the area and, as such, no adverse effects to transit are expected. However, it is recommended that bus stop shelters and improved lighting be installed at the two bus stops adjacent to the project site on University Avenue and Shattuck Avenue, consistent with the recommendations in the AC Transit Multimodal Corridor Guidelines.[1]

5.10 Vehicle Miles Traveled

The vehicle miles traveled (VMT) in an area is one performance measure that can be used to quantify potential changes in travel from a project. VMT is a particularly useful metric for evaluating the impacts of growth on greenhouse gas (GHG) emissions because it can be used to estimate fuel consumption by motor vehicles. Increases in VMT cause proportional increases in greenhouse gas emissions and air pollution. The Office of Planning and Research (OPR) released their final guidelines in a Technical Advisory on Evaluating Transportation Impacts in CEQA, dated December 2018. This analysis is based on the City of Berkeley's adopted guidelines as set forth in a staff report to the planning commission on September 2, 2020.[2]

VMT is typically estimated using an area-wide travel demand model from a regional transportation agency that calculates VMT based on the number of vehicles multiplied by the typical distance traveled by each vehicle originating from or driving to a certain area. The volume of traffic and distance traveled depends on land use types, density, and location as well as the existing and planned future supporting transportation system, including availability of public transportation. A travel demand model attempts to represent this relationship when forecasting vehicle trips and VMT. This analysis uses the Alameda County Transportation Commission (ACTC) Travel Demand Model data on VMT per capita for various areas within the City of Berkeley. The Travel Demand Model divides areas within ACTC's jurisdiction into transportation analysis zones, or TAZs. The residents of the Project would be expected to have similar VMT as other developments in the same TAZ. The VMT per resident and per employee estimated by the ACTC Travel Model for the Project's TAZ would therefore be assumed represent the approximate VMT that would be generated by the Project as well.

As per Attachment 1 of the September 2, 2020 Planning Commission staff report, the proposed project is located in a transit priority area (TPA) and also is within an area with an average VMT per resident that is at least 15% below the respective Bay Area averages. OPR's 2018

[1] *AC Transit Multimodal Corridor Guidelines*, AC Transit, Oakland, CA, April, 2018.
[2] *General Plan Amendment: Vehicle Miles Traveled (VMT) for Transportation Impact Analysis under the California Environmental Quality Act (CEQA)*, Planning Commission Staff Report, Planning and Development Department, City of Berkeley, September 2, 2020.

Technical Advisory also states the following: "*Presumption of Less Than Significant Impact Near Transit Stations - Proposed CEQA Guideline Section 15064.3, subdivision (b)(1), states that lead agencies generally should presume that certain projects (including residential, retail, and office projects, as well as projects that are a mix of these uses) proposed within ½ mile of an existing major transit stop or an existing stop along a high quality transit corridor will have a less-than-significant impact on VMT*." However, the City of Berkeley VMT analysis guidelines specify that the presumption of a less-than-significant VMT impact might not be appropriate if the project:

- Has a floor area ratio (FAR) of less than 0.75.
- Includes more than 200,000 square feet of office or commercial space.
- Includes more parking supply than the project's estimated demand
- Is inconsistent with the City's General Plan, an applicable Specific Plan, or an applicable Sustainable Communities Strategy (as determined by the City, with input from the MTC).
- Replaces affordable residential units with market-rate residential units.
- Has project-specific or location-specific information that indicates that the project will generate significant levels of VMT.

None of the above factors would apply to the proposed project. The project is located less than 1,000 feet from the Downtown Berkeley BART station and is near bus stops for numerous bus lines at the nearby intersection of Shattuck Avenue and University Avenue. The project also meets the other screening criteria described above and therefore, subject to City approval, this project would be assumed to have a less than significant impact on VMT in the area.

6) SUMMARY OF IMPACTS AND IMPROVEMENT MEASURES

TR-1 The project would contribute to the existing safety problems at the following intersection:

University Avenue at Shattuck Avenue (Intersection #3)

The addition of traffic from the proposed project would contribute to the safety problems at this intersection in the plus project scenarios. The past five years of reliable data (from the California Highway Patrol database) indicates there have been at least 22 reported accidents at this intersection, including three involving bicycles and three involving pedestrians. Although the safety problems at this intersection (and along the adjacent segment of University Avenue) would exist regardless of whether or not the proposed project is implemented, with implementation of the recommended improvement measures below the proposed project could improve safety in the area.

Improvement Measure #1

The improvements listed below are not currently included in the City's 5-year capital improvement program so funding has not yet been identified. Prior to construction of the identified improvements, the project would mitigate its potential contribution to safety impacts at this intersection by paying a proportionate share of the construction costs. The intersection improvement measures proposed to maintain safety with the proposed project include the following:

IM 1a *University Avenue at Shattuck Avenue* – To prevent illegal U-turns to access the project driveway it is recommended that the existing raised median on University Avenue just west of the project site be extended to Shattuck Avenue. The raised median is recommended to be constructed adjacent to the eastbound left turn lane on the University Avenue approach to Shattuck Avenue. As part of this improvement, it is also recommended that a median refuge for pedestrians be provided for the western crosswalk across University Avenue at Shattuck Avenue, as proposed in the City's Pedestrian Plan.

IM 1b *University Avenue Mid-Block Crosswalk – Payment of a proportionate share of the cost to install rapid rectangular flashing beacons (RRFB's) for the existing University Avenue mid-block crosswalk between Shattuck Avenue and Milvia Street, meeting the City's requirements.*

TR-2 Demolition and construction activities associated with the proposed project would result in an increase in traffic to and from the site and would require an appropriate construction management plan developed and approved by the City of Berkeley, consistent with the already existing and broadly applicable standard conditions that apply to projects similar in nature.

The increase in traffic as a result of demolition and construction activities associated with the proposed project has been quantified assuming single phase construction period of 24 months.

Traffic Control Plan

The Traffic Control Plan would indicate how parking for construction workers would be provided during construction and ensure a safe flow of traffic in the project area during construction. Each phase will be subject to a Traffic Control Plan and oversight by the City Engineer and construction traffic is not forecast to exceed the post construction traffic conditions created by the proposed project. As a result, the potential construction traffic impacts have been adequately addressed through the project impact analysis. The goal of the conditional requirements of the City is to make construction impacts less than significant. There is some increase in traffic associated with all construction projects, however the required traffic management plan is intended to ensure the effects of construction are acceptable to the City. Therefore, the demolition and construction activities associated with the proposed project or its individual phases would be expected to result in a ***less-than-significant*** impact.

Mitigation Measure(s)
None required.

TR-3 Impacts related to site access and circulation.

Based on a review of the proposed site plan it was determined that the internal garage circulation should function well and should not cause any safety or operational problems. The project site design has been required to conform to City design standards and is not expected to create any significant impacts to pedestrians or bicyclists. The project driveway would be restricted to right-in and right-out traffic only. The existing raised median on University Avenue would help ensure there are no illegal left turns in or out of the project driveway. A review of sight distance at the project driveway indicates that on-street parking should be prohibited on University Avenue for approximately 50 feet to the east of the project driveway to maintain adequate sight distance. With these recommended improvement measures the impacts related to site access and circulation would be ***less-than-significant***.

Improvement Measure #2

Prior to construction of the identified improvements, the project would mitigate its potential sight distance/driveway safety impacts by prohibiting parking for approximately

50 feet to the east of the project driveway parking *(or alternatively, designate a loading zone in this area). The improvement measure proposed to maintain safety at the project driveway includes the following:*

IM 2a *University Avenue at the Project Driveway* – Prohibit on-street parking (or designate a loading zone) on the north side of University Avenue for approximately 50 feet to the east of the project driveway to maintain adequate sight distance.

TR-4 Impacts regarding emergency vehicle access on and surrounding the proposed project site.

Sufficient emergency access is determined by factors such as number of access points, roadway width, and proximity to fire stations. The land use plan for the proposed project would be subject to approval of the fire department. All lane widths adjacent to the project would meet the minimum width that can accommodate an emergency vehicle; therefore, the width of the roadways would be adequate. Therefore, the development of the proposed project is expected to have ***less-than-significant*** impacts regarding emergency vehicle access.

Mitigation Measure(s)
None required.

PLANNING & DEVELOPMENT

Stormwater Requirements Checklist

Municipal Regional Stormwater Permit (MRP 2.0)
Stormwater Controls for Development Projects

City of Berkeley
Public Works Dept.
Engineering Division

I. Applicability of C.3 and C.6 Stormwater Requirements

I.A. Enter Project Data *(For "C.3 Regulated Projects," data will be reported in the municipality's stormwater Annual Report.)*

I.A.1 Project Name: 2029 University Apartment

I.A.2 Project Address (include cross street): 2029 University Avenue, Berkeley, Ca

I.A.3 Project APN: 057-2053-008-01

I.A.4 Project Watershed[1]: Strawberry Creek

I.A.5 Applicant Name: Laconia Development (c/o: Rhoades Planning Group)

I.A.6 Date Submitted: 12/19/2024

I.A.7 Applicant Address: 1981 North Broadway, Suite 350, Walnut Creek, CA 94596

I.A.8 Applicant Phone: 925.858.3720

I.A.9 Applicant Email Address: sheaton@laconiallc.com

I.A.10 Development type (check all that apply):

- ☒ Residential ☐ Commercial ☐ Industrial ☐ Mixed-Use ☐ Streets, Roads, etc.
- ☐ 'Redevelopment' as defined by MRP: creating, adding and/or replacing exterior existing impervious surface on a site where past development has occurred[2]
- ☐ 'Special land use categories' as defined by MRP: (1) auto service facilities[3], (2) retail gasoline outlets, (3) restaurants[3], (4) uncovered parking area (stand-alone or part of a larger project)

I.A.11 Project Description[4]: (Also note any past or future phases of the project.) Demolition of existing building on-site and construct 23 story residential unit building

I.A.12 Total Area of Site: 0.28 acres

I.A.13 Slope on Site: 0.5 %

I.A.14 Total Area of land disturbed during construction (include clearing, grading, excavating and stockpile area: .28 acres.

I.B. Is the project a "C.3 Regulated Project" per MRP Provision C.3.b?

I.B.1. Enter the amount of impervious surface[4] created and/or replaced by the project (if the total amount is 5,000 sq.ft. or more):

Table of Impervious and Pervious Surfaces

Type of Impervious Surface	a Pre-Project Impervious Surface (sq.ft.)	b Existing Impervious Surface to be Replaced[7] (sq.ft.)	C New Impervious Surface to be Created[7] (sq.ft.)	d Post-project pervious surface (sq.ft.)
Roof area(s) – excluding any portion of the roof that is vegetated ("green roof")	7,000	10,470	-	N/A
Impervious[5] sidewalks, patios, paths, driveways	-	1,000	-	
Impervious[5] uncovered parking[6]	5,400	-	-	
Streets (public)		-	-	
Streets (private)		-	-	
Totals:	12,400	11,470	-	930
Area of Existing Impervious Surface to remain in place	-	N/A		
Total New Impervious Surface *(sum of totals for columns b and c):*	11,470			

[1] Watershed is defined by the maps from the Alameda County Flood Control District at http://acfloodcontrol.org/resources/explore-watersheds
[2] Roadway projects that replace existing impervious surface are subject to C.3 requirements only if one or more lanes of travel are added.
[3] Standard Industrial Classification (SIC) codes are in Section 2.3 of the C.3 Technical Guidance (download at www.cleanwaterprogram.org)
[4] Project description examples: 5-story office building, industrial warehouse, residential with five 4-story buildings for 200 condominiums, etc.
[5] Per the MRP, pavement that meets the following definition of pervious pavement is NOT an impervious surface. Pervious pavement is defined as pavement that stores and infiltrates rainfall at a rate equal to immediately surrounding unpaved, landscaped areas, or that stores and infiltrates the rainfall runoff volume described in Provision C.3.d.
[6] Uncovered parking includes top level of a parking structure.
[7] "Replace" means to install new impervious surface where existing impervious surface is removed. "Create" means to install new impervious surface where there is currently no impervious surface.

I.B. Is the project a "C.3 Regulated Project" per MRP 2.0 Provision C.3.b? (continued)

		Yes	No	NA
I.B.2	In Item I.B.1, does the Total New Impervious Surface equal 10,000 sq.ft. or more? *If YES, skip to Item I.B.5 and check "Yes." If NO, continue to Item I.B.3.*	☒	☐	☐
I.B.3	Does the Item I.B.1 Total New Impervious Surface equal 5,000 sq.ft. or more, but less than 10,000 sq.ft? *If YES, continue to Item I.B.4. If NO, skip to Item I.B.5 and check "No."*	☐	☐	☒
I.B.4	Is the project a "Special Land Use Category" per Item I.A.10? For uncovered parking, check YES only if there is 5,000 sq.ft or more uncovered parking. *If NO, go to Item I.B.5 and check "No." If YES, go to Item I.B.5 and check "Yes."*	☐	☐	☒
I.B.5	Is the project a C.3 Regulated Project? *If YES, go to Item I.B.6; if NO, continue to Item I.C.*	☒	☐	☐
I.B.6	Does the total amount of Replaced impervious surface equal 50 percent or more of the Pre-Project Impervious Surface? *If YES, stormwater treatment requirements apply to the whole site; if NO, these requirements apply only to the impervious surface created and/or replaced.*	☒	☐	☐
I.B.7	Is the project installing a total of 3,000 sq.ft. or more (excluding private-use patios in single family homes, townhomes, or condominiums) of new pervious pavement systems? (Pervious pavement systems include pervious concrete, pervious asphalt, pervious pavers and grid pavers etc. and are described in the C3 Technical Guidance at www.cleanwaterprogram.org) If YES, stormwater treatment system inspection requirements (C.3.h) apply; (Municipal staff – add this site to your list of sites needing a final inspection at the end of construction and on-going O&M inspections.) If NO, inspection requirements only apply if there are other treatment systems installed on the project.	☐	☒	☐

I.C. Projects that are NOT C.3 Regulated Projects

If you answered NO to Item I.B.5, or the project creates/replaces less than 5,000 sq. ft. of impervious surface, then the project is NOT a C.3 Regulated Project, and stormwater treatment is not required, BUT the municipality may determine that source controls and site design measures are required. Skip to Section II.

I.D. Projects that ARE C.3 Regulated Projects

If you answered YES to Item I.B.5, then the project is a C.3 Regulated Project. The project must include appropriate site design measures and source controls AND hydraulically-sized stormwater treatment measures. Hydromodification management may also be required; refer to Section II to make this determination. If final discretionary approval was granted on or after **DECEMBER 1, 2011**, Low Impact Development (LID) requirements apply, except for "Special Projects." See Section II.

I.E. Identify C.6 Construction-Phase Stormwater Requirements

		Yes	No
I.E.1	Does the project disturb 1.0 acre (43,560 sq.ft.) or more of land? (See Item I.A.14). *If Yes, obtain coverage under the state's Construction General Permit at https://smarts.waterboards.ca.gov/smarts/faces/SwSmartsLogin.jsp. Submit to the municipality a copy of your Notice of Intent and Storm Water Pollution Prevention Plan (SWPPP) before a grading or building permit is issued.*	☐	☒
I.E.2	Is the site a "High Priority Site" that disturbs less than 1.0 acre (43,560 sq.ft.) of land? (Municipal staff will make the final determination.) "High Priority Sites" are sites having any of the following criteria: ▪ that require a grading permit, ▪ are adjacent to a creek, ▪ or are otherwise high priority for stormwater protection during construction (see MRP 2.0 Provision C.6.e.ii.(2)(c))	☒	☐
I.E.3	Is the site a "Hillside Site" that disturbs 5,000 sq.ft. or more, but less than 1.0 acre (43,560 sq.ft.) of land? (Municipal staff will make the final determination.) ▪ "Hillside Sites" are located on hillsides, as indicated on a jurisdictional map of hillside development areas or as indicated by meeting jurisdictional hillside development criteria. ▪ If no map or criteria exist, then Hillside Sites are sites with a slope of 15% or more (see I.A.13 above and MRP 2.0 Provision C.6.e.ii.(2)(b)).	☐	☒

- NOTE TO APPLICANT: All projects require appropriate stormwater best management practices (BMPs) during construction. Refer to the Section II to identify appropriate construction BMPs.

- NOTE TO MUNICIPAL STAFF: If the answer is "Yes" to I.E.1, I.E.2, OR I.E.3, refer this project to construction site inspection staff to be added to their list of projects that require stormwater inspections at least monthly during the wet season (October 1 through April 30) and other times of the year as appropriate.

II. Implementation of Stormwater Requirements

II.A. Complete the appropriate sections for the project. For non-C.3 Regulated Projects, Sections II.B, II.C, and II.D apply. For C.3 Regulated Projects, all sections of Section II apply.

II.B. Select Appropriate Site Design Measures

- *Required for C.3 Regulated Projects.*
- *Starting December 1, 2012, projects that create and/or replace 2,500 - 10,000 sq.ft. of impervious surface, and stand-alone single family homes that create/replace 2,500 sq.ft. or more of impervious surface, must include one of Site Design Measures a through f.*[8]
- *All other projects are encouraged to implement site design measures, which may be required at municipality discretion.*
- *Consult with municipal staff about requirements for your project.*

II.B.1 Is the site design measure included in the project plans?

Yes	No	Plan Sheet No.	
☐	☒		a. Direct roof runoff into cisterns or rain barrels and use rainwater for irrigation or other non-potable use.
☒	☐		b. Direct roof runoff onto vegetated areas.
☒	☐		c. Direct runoff from sidewalks, walkways, and/or patios onto vegetated areas.
☐	☒		d. Direct runoff from driveways and/or uncovered parking lots onto vegetated areas.
☐	☒		e. Construct sidewalks, walkways, and/or patios with pervious surfaces. Use the specifications in the C3 Technical Guidance (Version 4.1) or for small projects see the BASMAA Pervious Paving Factsheet. For these documents and others go to www.cleanwaterprogram.org and click on "Resources."
☐	☒		f. Construct bike lanes, driveways, and/or uncovered parking lots with pervious surfaces. Use the specifications in the C3 Technical Guidance (Version 4.1) or for small projects see the BASMAA Pervious Paving Factsheet. For these documents and others go to the program website at: www.cleanwaterprogram.org and click on "Resources."
☐	☒		g. Minimize land disturbance and impervious surface (especially parking lots).
☐	☒		h. Maximize permeability by clustering development and preserving open space.
☐	☒		i. Use micro-detention, including distributed landscape-based detention.
☐	☒		j. Protect sensitive areas, including wetland and riparian areas, and minimize changes to the natural topography.
☐	☒		k. Self-treating area (see Section 4.1 of the C.3 Technical Guidance)
☐	☒		l. Self-retaining area (see Section 4.2 of the C.3 Technical Guidance)
☐	☒		m. Plant or preserve interceptor trees (Section 4.5, C.3 Technical Guidance)

[8] See MRP Provision C.3.a.i(6) for non-C.3 Regulated Projects, C.3.c.i(2)(a) for Regulated Projects, C.3.i for projects that create/replace 2,500 to 10,000 sq.ft. of impervious surface and stand-alone single family homes that create/replace 2,500 sq.ft. or more of impervious surface.

II.C. Select appropriate source controls *(Applies to C.3 Regulated Projects; encouraged for other projects. Consult municipal staff.[9])*

Are these features in project?		Features that require source control measures	Source control measures (Refer to Local Source Control List for detailed requirements)	Is source control measure included in project plans?		
Yes	No			Yes	No	Plan Sheet No.
☒	☐	Storm Drain	Mark on-site inlets with the words "No Dumping! Flows to Bay" or equivalent.	☐	☒	
☒	☐	Floor Drains	Plumb interior floor drains to sanitary sewer[10] [or prohibit].	☐	☒	
☒	☐	Parking garage	Plumb interior parking garage floor drains to sanitary sewer.[9]	☐	☒	
☒	☐	Landscaping	▪ Retain existing vegetation as practicable. ▪ Select diverse species appropriate to the site. Include plants that are pest- and/or disease-resistant, drought-tolerant, and/or attract beneficial insects. ▪ Minimize use of pesticides and quick-release fertilizers. ▪ Use efficient irrigation system; design to minimize runoff.	☐	☒	
☐	☒	Pool/Spa/Fountain	Provide connection to the sanitary sewer to facilitate draining.[9]	☐	☒	
☐	☒	Food Service Equipment (non-residential)	Provide sink or other area for equipment cleaning, which is: ▪ Connected to a grease interceptor prior to sanitary sewer discharge. [9] ▪ Large enough for the largest mat or piece of equipment to be cleaned. ▪ Indoors or in an outdoor roofed area designed to prevent stormwater run-on and run-off, and signed to require equipment washing in this area.	☐	☒	
☐	☒	Refuse Areas	▪ Provide a roofed and enclosed area for dumpsters, recycling containers, etc., designed to prevent stormwater run-on and runoff. ▪ Connect any drains in or beneath dumpsters, compactors, and tallow bin areas serving food service facilities to the sanitary sewer.[9]	☐	☒	
☐	☒	Outdoor Process Activities [11]	Perform process activities either indoors or in roofed outdoor area, designed to prevent stormwater run-on and runoff, and to drain to the sanitary sewer.[9]	☐	☒	
☐	☒	Outdoor Equipment/ Materials Storage	▪ Cover the area or design to avoid pollutant contact with stormwater runoff. ▪ Locate area only on paved and contained areas. ▪ Roof storage areas that will contain non-hazardous liquids, drain to sanitary sewer[9], and contain by berms or similar.	☐	☒	
☐	☒	Vehicle/ Equipment Cleaning	▪ Roofed, pave and berm wash area to prevent stormwater run-on and runoff, plumb to the sanitary sewer[9], and sign as a designated wash area. ▪ Commercial car wash facilities shall discharge to the sanitary sewer.[9]	☐	☒	
☐	☒	Vehicle/ Equipment Repair and Maintenance	▪ Designate repair/maintenance area indoors, or an outdoors area designed to prevent stormwater run-on and runoff and provide secondary containment. Do not install drains in the secondary containment areas. ▪ No floor drains unless pretreated prior to discharge to the sanitary sewer. [9] ▪ Connect containers or sinks used for parts cleaning to the sanitary sewer. [9]	☐	☒	
☐	☒	Fuel Dispensing Areas	▪ Fueling areas shall have impermeable surface that is a) minimally graded to prevent ponding and b) separated from the rest of the site by a grade break. ▪ Canopy shall extend at least 10 ft in each direction from each pump and drain away from fueling area.	☐	☒	
☐	☒	Loading Docks	▪ Cover and/or grade to minimize run-on to and runoff from the loading area. ▪ Position downspouts to direct stormwater away from the loading area. ▪ Drain water from loading dock areas to the sanitary sewer.[9] ▪ Install door skirts between the trailers and the building.	☐	☒	
☐	☒	Fire Sprinklers	Design for discharge of fire sprinkler test water to landscape or sanitary sewer.[9]	☐	☒	
☐	☒	Miscellaneous Drain or Wash Water	▪ Drain condensate of air conditioning units to landscaping. Large air conditioning units may connect to the sanitary sewer.[9] ▪ Roof drains shall drain to unpaved area where practicable. ▪ Drain boiler drain lines, roof top equipment, all washwater to sanitary sewer [9].	☐	☒	
☐	☒	Architectural Copper	▪ Discharge rinse water to sanitary sewer [9], or collect and dispose properly offsite. See flyer "Requirements for Architectural Copper."	☐	☒	

[9] See MRP Provision C.3.a.i(7) for non-C.3 Regulated Projects and Provision C.3.c.i(1) for C.3 Regulated Projects.
[10] Any connection to the sanitary sewer system is subject to sanitary district approval.
[11] Businesses that may have outdoor process activities/equipment include machine shops, auto repair, industries with pretreatment facilities.

II.D. Implement Construction Best Management Practices (BMPs) *(Applies to all projects – see Provision C.6 for more details.)*

Yes	No	Best Management Practice (BMP)
☒	☐	Attach the municipality's construction BMP plan sheet to project plans and require contractor to implement the applicable BMPs on the plan sheet.
☒	☐	Temporary erosion controls to stabilize all denuded areas until permanent erosion controls are established.
☐	☒	Delineate with field markers clearing limits, easements, setbacks, sensitive or critical areas, buffer zones, trees, and drainage courses.
☒	☐	Provide notes, specifications, or attachments describing the following: ▪ Construction, operation and maintenance of erosion and sediment controls, include inspection frequency; ▪ Methods and schedule for grading, excavation, filling, clearing of vegetation, and storage and disposal of excavated or cleared material; ▪ Specifications for vegetative cover & mulch, include methods and schedules for planting and fertilization; ▪ Provisions for temporary and/or permanent irrigation.
☒	☐	Perform clearing and earth moving activities only during dry weather.
☒	☐	Use sediment controls or filtration to remove sediment when dewatering and obtain all necessary permits.
☒	☐	Protect all storm drain inlets in vicinity of site using sediment controls such as berms, fiber rolls, or filters.
☒	☐	Trap sediment on-site, using BMPs such as sediment basins or traps, earthen dikes or berms, silt fences, check dams, soil blankets or mats, covers for soil stock piles, etc.
☒	☐	Divert on-site runoff around exposed areas; divert off-site runoff around the site (e.g., swales and dikes).
☒	☐	Protect adjacent properties and undisturbed areas from construction impacts using vegetative buffer strips, sediment barriers or filters, dikes, mulching, or other measures as appropriate.
☒	☐	Limit construction access routes and stabilize designated access points.
☒	☐	No cleaning, fueling, or maintaining vehicles on-site, except in a designated area where washwater is contained and treated.
☒	☐	Store, handle, and dispose of construction materials/wastes properly to prevent contact with stormwater.
☒	☐	Contractor shall train and provide instruction to all employees/subcontractors re: construction BMPs.
☐	☒	Control and prevent the discharge of all potential pollutants, including pavement cutting wastes, paints, concrete, petroleum products, chemicals, washwater or sediments, rinse water from architectural copper, and non-stormwater discharges to storm drains and watercourses.

PROJECTS THAT ARE NOT C.3 REGULATED PROJECTS STOP HERE!

II.E. Biotreatment, Infiltration and Rain Water Harvesting and Use.

MRP 2.0 no longer requires that a feasibility analysis of infilration and rainwater harvesting be conducted. However, applicants using biotreatment are encouraged to maximize infiltration of stormwater if site conditions allow. If feasible and desired, infiltration and rainwater harvesting may be cost effective solutions depending on the project.

II.F. Stormwater Treatment Measures (Applies to C.3 Regulated Projects)

II.F.1 Check the applicable box and indicate the treatment measures to be included in the project.

Yes	No	
☐	☒	Is the project a Special Project? (See Appendix K of the C.3 Technical Guidance for criteria.) If Yes, complete the Special Projects Worksheet (go to the program website at: www.cleanwaterprogram.org and click on "Resources") and consult with municipal staff about the need to prepare a discussion of the feasibility and infeasibility of 100% LID treatment. Indicate the type of non-LID treatment to be used, the hydraulic sizing method*, and percentage of the amount of runoff specified in Provision C.3.d that is treated: Non-LID Treatment — Hydraulic sizing method* — % of C.3.d amount of runoff treated ☐ Media filter ☐ Tree well filter
☒	☐	Is the project using biotreatment to treat the C.3.d amount of runoff? For more information on infiltration and rainwater harvesting and use of stormwater, refer to the C3 Technical Guidance downloadable at the program website: www.cleanwaterprogram.org If Yes, indicate the biotreatment measures to be used, and the hydraulic sizing method: Biotreatment Measures — Hydraulic sizing method* ☐ Bioretention area ☒ Flow-through planter — **Flow and Volume Design Basis**Flow = 0.2-inch-per-hour Intensity ApproachVolume = 80% Capture Approach ☐ Other (specify):
☐	☒	Is the project using infiltration or rainwater harvesting/use? For more information on infiltration and rainwater harvesting and use of stormwater, refer to the C3 Technical Guidance downloadable at the program website: www.cleanwaterprogram.org If Yes, indicate the measures to be used, and hydraulic sizing method: LID Treatment Measure (non-biotreatment) — Hydraulic sizing method* ☐ Rainwater harvesting and use ☐ Bioinfiltration[12] ☐ Infiltration trench ☐ Other (specify):_____

***Hydraulic Sizing Method:** Indicate which of the following Provision C.3.d.i hydraulic sizing methods were used:

1. Volume based approaches – Refer to Provision C.3.d.i.(1):
   1(a) Urban Runoff Quality Management approach, or
   1(b) 80% capture approach (recommended volume-based approach).

2. Flow-based approaches – Refer to Provision C.3.d.i.(2):
   2(a) 10% of 50-year peak flow approach,
   2(b) Percentile rainfall intensity approach, or
   2(c) 0.2-Inch-per-hour intensity approach (this is recommended flow-based approach AND the basis for the 4% rule of thumb described in Section 5.1 of the C.3 Technical Guidance).

3. Combination hydraulic sizing approach -- Refer to Provision C.3.d.i.(3):
   If a combination flow and volume design basis was used, indicate which flow-based and volume-based criteria were used.

[12] See Section 6.1 of the C.3 Technical Guidance for conditions in which bioretention areas provide bioinfiltration.

II.G. Is the project a Hydromodification Management[13] (HM) Project? (Complete this section for C.3 Regulated Projects)

II.G.1 Does the project create and/or replace 1 acre (43,560 sq. ft.) or more of impervious surface? (Refer to Item I.B.1.)

- ☐ Yes. *Continue to Item II.G.2.*
- ☒ No. *The project is NOT required to incorporate HM measures. Skip to Item II.G.6 and check "No."*

II.G.2 Is the total impervious area increased over the pre-project condition? (Refer to Item I.B.1.)

- ☐ Yes. *Continue to Item II.G.3.*
- ☐ No. *The project is NOT required to incorporate HM measures. Skip to Item II.G.6 and check "No."*

II.G.3 Is the site located in a tidally influenced/depositional area, or in the extreme eastern portion of the county that is not subject to HM requirements? *(See HMP Susceptibility Map in Appendix I of the C.3 Technical Guidance.)*

- ☐ Yes. *Project is exempt from HM requirements. Attach map indicating project location. Skip to II.G.6 and check "No".*
- ☐ No. *Continue to II.G.4.*

II.G.4 Is the site located in a high slope zone or special consideration watershed, as shown on the HMP Susceptibility Map?

- ☐ Yes. *Project is subject to HM requirements. Attach map indicating project location. Skip to II.G.6 and check "Yes."*
- ☐ No. *Continue to II.G.5.*

II.G.5 For sites located in a white area on the HMP Susceptibility Map, has an engineer or qualified environmental professional determined that runoff from the project flows only through a hardened channel or enclosed pipe along its entire length before emptying into a waterway in the exempt area?

- ☐ Yes. *Project is exempt from HM requirements. Attach signed statement by qualified professional. Go to II.G.6 and check "No."*
- ☐ No. *Project is subject to HM requirements. Attach map indicating project location. Go to Item G.6 and check "Yes."*

II.G.6 Is the project a Hydromodification Management Project?

- ☐ Yes. *The project is subject to HM requirements in Provision C.3.g of the Municipal Regional Stormwater Permit.*
- ☒ No. *The project is EXEMPT from HM requirements.*
- ☐ HM requirements are impracticable. *(Attach documentation needed to comply with the impracticability provision in MRP Attachment B.)*

➢ *If the project is subject to the HM requirements, incorporate in the project flow duration stormwater control measures designed such that post-project stormwater discharge rates and durations match pre-project discharge rates and durations. The Bay Area Hydrology Model (BAHM) has been developed to size flow duration controls. See www.bayareahydrologymodel.org. Guidance is provided in Chapter 7 of the C.3 Technical Guidance.*

II.H Stormwater Treatment Measure and/HM Control Owner or Operator's Information:

Name: Steve Heaton - Laconia Developement LLC

Address: 1981 North Broadway, Suite 350, Walnut Creek, CA 94596

Phone: 925.858.3720 Email: sheaton@laconiallc.com

➢ *Applicant must call for inspection and receive inspection within 45 days of installation of treatment measures and/or hydromodification management controls.*

Name of applicant completing the form: Joseph Young, P.E. - BKF Engineers

Signature: _____ Date: 12/16/2024

[13] Hydromodification is the modification of a stream's hydrograph, caused in general by increases in flows and durations that result when land is developed (made more impervious). The effects of hydromodification include, but are not limited to, increased bed and bank erosion, loss of habitat, increased sediment transport and deposition, and increased flooding. Hydromodification management control measures are designed to reduce these effects.

III. For Completion By Municipal Staff

III.1 Alternative Certification: Was the treatment system sizing and design reviewed by a qualified third-party professional that is not a member of the project team or agency staff?

☐ Yes ☐ No Name of Reviewer_____

III.2. Confirm Operations and Maintenance (O&M) Submittal:

The following questions apply to C.3 Regulated Projects and Hydromodification Management Projects.

		Yes	No	N/A
III.2.a	Was maintenance plan submitted?	☐	☐	☐
III.2.b	Was maintenance plan approved?	☐	☐	☐
III.2.c	Was maintenance agreement submitted? (Date executed:_____)	☐	☐	☐

- *Attach the executed maintenance agreement as an appendix to this checklist.*

III.3 Incorporate HM Controls (if required)

Are the applicable items for HM compliance included in the plan submittal?

Yes	No	NA	Documentation for HM Compliance
☐	☐	☐	Site plans with pre- and post-project impervious surface areas, surface flow directions of entire site, locations of flow duration controls and site design measures per HM site design requirement
☐	☐	☐	Soils report or other site-specific document showing soil types at all parts of site
☐	☐	☐	If project uses the Bay Area Hydrology Model (BAHM), a list of model inputs.
☐	☐	☐	If project uses custom modeling, a summary of the modeling calculations with corresponding graph showing curve matching (existing, post-project, and post-project with HM controls curves), goodness of fit, and (allowable) low flow rate.
☐	☐	☐	If project uses the Impracticability Provision, a listing of all applicable costs and a brief description of the alternative HM project (name, location, date of start up, entity responsible for maintenance).
☐	☐	☐	If the project uses alternatives to the default BAHM approach or settings, a written description and rationale.

- *Municipal staff: Refer to the "Flow Duration Control Review Worksheet for HM Submittals" to review the documentation submitted for HM compliance.*

III.4 Annual Operations and Maintenance (O&M) Submittals:

For C.3 Regulated Projects and Hydromodification Management Projects, indicate the dates on which the Applicant submitted annual reports for project O&M: _____

III.5 Comments:

III.6 Notes:

Section I Notes:_____

Section II Notes:_____

Section III Notes:_____

III.7 Project Close-Out:

III.7.a Were final Conditions of Approval met? ☐ ☐

III.7.b	Was initial inspection of the completed treatment/HM measure(s) conducted? (Date of inspection:_____)	☐	☐	☐
III.7.c	Was maintenance plan submitted? (Date executed:_____)	☐	☐	☐
III.7.d	Was project information provided to staff responsible for O&M verification inspections? (Date provided to inspection staff:_____)	☐	☐	☐

Name of staff confirming project is closed out:_____

Signature:_____ Date:_____

Name of O&M staff receiving information:_____

Signature:_____ Date:_____

Appendices

Appendix A: O&M Agreement
Appendix B: O&M Annual Report Form

GreenPointRATED

NEW HOME RATING SYSTEM, VERSION 9.1

MULTIFAMILY

The GreenPoint Rated checklist tracks green features incorporated into the home. GreenPoint Rated is administered by Build It Green, a non-profit whose mission is to promote healthy, energy and resource efficient buildings.
The minimum requirements of GreenPoint Rated are: verification of 50 or more points; Earn the following minimum points per category: Commuity (2) Energy (25), Indoor Air Quality/Health (6), Resources (6), and Water (6); and meet the prerequisites depending on State. For California: CALGreen Mandatory H6.1, J5.1, J6, O1. Outside California: ICC 700 Mandatory Measures, H6.1, J5.1, O1.

The criteria for the green building practices listed below are described in the GreenPoint Rated New Home Rating Manual v9.0. For more information please visit **www.builditgreen.org/greenpointrated**
Build It Green is not a code enforcement agency.

A home is only GreenPoint Rated if all features are verified by a Certified GreenPoint Rater and submitted through Build It Green.

New Home Multifamily Version 9.1

2029 University Avenue Community Meeting

Friday December 13th at 5:30PM

Location: The meeting will be held exclusively via Zoom

Please join the project team for a discussion regarding the proposed project located at 2029 University Avenue. The meeting will be virtual on Zoom. Please go to www.zoom.com and use the following: Meeting ID: 867 7360 3965 ; Passcode:373221. The meeting can also be accessed with the following phone numbers: 1-408-638-0968 or 1-669-444-9171 and enter the meeting ID and passcode above. We look forward to speaking with you on December 13th.

Sincerely,
Laconia Development

6 November 2024

To Whom It May Concern:

Left Coast Architectural History authored a Historic Resource Evaluation of the property at 2029-2039 University Avenue, Berkeley in October 2023. This letter is to confirm that the report is still valid as of November 2024 and that none of the findings or determinations have changed in the interim.

As always, Left Coast Architectural History is happy to answer questions or provide additional information, if needed.

Sincerely,

Caitlin Hibma
Principal/Architectural Historian
Left Coast Architectural History

P.O. Box 70415, Richmond, CA. 94807 • (415) 745-1906 • caitlin@leftcoastarchitecturalhistory.com

18 October 2023

To Whom It May Concern:

Left Coast Architectural History has completed a Historic Resource Evaluation of the property at 2029-2039 University Avenue, Berkeley. The attached California Department of Parks & Recreation (DPR) 523 series forms present a physical description of the property, a record of its history, and evaluation according to California Register of Historical Resources significance and integrity criteria, and City of Berkeley Landmark and Structure of Merit criteria.

The study found that the Art Moderne style commercial building and utilitarian garage on the property date to 1951 and 1943, respectively, and were constructed by the Williamson Property Company. The Williamson family, in association with their property management company, owned the property for much of its history. The property has been occupied by many small local businesses, but does not appear to have any significant associations with historically important events or noteworthy historical figures. The property does not exhibit high architectural merit nor associations with important architects or builders. These points are elaborated upon in detail on the attached forms.

The evaluation concludes that the property is not historically significant at either the local or State level and therefore does not qualify as a historic resource for the purposes of the California Environmental Quality Act.

Left Coast Architectural History is happy to answer questions or provide additional assistance, as needed.

Sincerely,

Caitlin Paige Hibma

***P3a. Description:** (Describe resource and its major elements. Include design, materials, condition, alterations, size, setting, and boundaries)

The property at 2029-2039 University Avenue sits on a rectangular parcel on the north side of University Avenue, between Milvia Street and Shattuck Avenue. Topography in the area is flat and the parcel is fronted by a public sidewalk. A two-story commercial building sits at the front of the lot with no setback from the sidewalk (south lot line) and spans the lot from east to west lot lines. At the rear of the building is an asphalt paved surface parking lot that spans the parcel east to west, while a one-story garage spans the rear of the lot and sits at the north lot line.

Commercial Building
The Art Moderne style commercial building at the front of the lot is two stories, has a rectangular plan, and is capped by a flat roof. The exterior walls are clad primarily with smooth stucco, while Roman brick veneer clads the first story (Cont.)

In June 1940, the subject property was purchased by the Williamson family, consisting of Jessie S. Williamson and her adult children; Harry B. and Melvin Williamson, and Bernice (Williamson) Ellis. Jessie Williamson's 1948 obituary notes that she was married to Luther Williamson, "pioneer real estate man in the East Bay." (*San Francisco Examiner*, 23 July 1948) He and his sons founded the Williamson Property Company in the 1920s, which developed and managed properties throughout Berkeley (many along University Avenue), including commercial buildings, hotels, apartment houses, and the U.C. Theater (across the street from the subject property), as well as many smaller business and residential properties. Jessie Williamson and her children operated the Williamson Property Company after Luther's passing in 1936. ("Woman GOP Leader Fails to Leave Will," *Oakland Tribune,* 6 August 1948) On her own account, Jessie Williamson twice served as the California committeewoman to the Republican National Convention (1944 and 1948), and served on the State social welfare board to which she was appointed in 1943 by Governor Earl Warren. She was president of the San Francisco District of the California Federation of Women's Clubs and sat on the Berkeley Recreation Commission. (*San Francisco Examiner*, 23 July 1948.)

When Jessie Williamson died in 1948, the family business was carried on by her sons. The 1950 census lists Harry B. Williamson as the proprietor of a property management company, and Melvin Williamson as the proprietor of a contracting firm; both aspects of the Williamson Property Company. Bernice was employed as a social worker, but appears to have owned a share of the family business. Harry Williamson's 1990 obituary noted his continued work in property development and management and also noted that he restored historic buildings; renovating the Nash, Stark, University, and Camponelli hotels (the first located next door to the subject property). ("Harry B. Williamson, noted Berkeley developer, contractor," *Oakland Tribune,* 16 September 1990.) (Continued)

(This space reserved for official comments.)

P3a. Description: (continued)

of the front (south) facade. The primary window types are aluminum frame, plate glass, storefront assemblies; and sliding vinyl or vinyl-clad aluminum sashes.

The primary facade faces south onto University Avenue. The first story is clad with Roman brick veneer and is organized into six structural bays. The leftmost bay is dominated by a vehicular entrance with a roll-up metal door. The five bays to the right each feature storefronts. The second bay from the left features a recessed, fully glazed, aluminum frame entry assembly on its left side that provides access to a stairwell to the second story. On the right is a narrow storefront assembly set at a slight angle that features an aluminum frame, plate glass display window and a fully glazed aluminum door with a transom sash above. All of the other storefronts are more distinctly angled with the right side more recessed than the left. Each storefront features a two-part, plate glass, aluminum frame display window on the left and a fully-glazed aluminum door topped by a large transom sash on the right. A projecting box canopy spans the facade between the first and second stories. It has a paneled fascia that bears painted signage and has a slightly corbelled molding at the top edge.

The second story of the primary facade is clad with smooth stucco, but has projecting pilasters clad with Roman brick at either side. It features six, horizontally-oriented, vinyl or vinyl-clad aluminum sash, sliding windows that are somewhat regularly spaced across the facade and generally correlate to the structural bays below. A seventh small, vertically oriented, double hung window is located to the left of the rightmost window. Continuous bands of projecting trim span the facade at the sill and headers of the windows. The leftmost and rightmost windows have three-part sliding sashes, while the windows in between have two sliding sashes. The facade terminates in a flat roofline with a simple box cornice.

The rear facade faces north onto the property's parking lot and is clad entirely with stucco. The first story features rear entrances that correspond to each of the ground floor shop spaces and have solid doors. At the far right side of the rear facade is the opening of a vehicular drive-through that corresponds to the garage entrance on the primary facade. Near the center of the first story, an exterior stair that parallels the facade, accesses a recessed deck at the second story. Within the deck there are multiple sets of sliding glass doors and at each end of the main facade are sliding, vinyl or vinyl-clad aluminum sash windows.

The east and west facades abut neighboring buildings and are not visible, except where the west facade rises slightly above the roofline of the neighboring building. There, it consists of an unfinished and unfenestrated concrete block wall surface.

Garage

The garage building at the rear of the lot is one story and has a long narrow rectangular plan. It is clad with brick veneer and topped by a flat roof. Ten single-car garage openings are regularly spaced along the southern facade. Side and rear facades appear to be unfenestrated and unadorned, as they abut neighboring buildings and site walls.

B10. Significance: (continued)

The subject parcel went by the address of 2031 University Avenue at the time the Williamsons purchased it, and prior to 1943 was occupied primarily by a surface parking lot. (1950 Sanborn map) In July 1943, Harry B. Williamson had a reinforced concrete retaining wall constructed along the rear (north) property line and the following month, integrated the retaining wall into the construction of the current brick-clad, concrete garage building that spans the rear of the lot. (Building permits 54420 and 54612, BAHA archives.) The 1950 Sanborn map illustrates this garage and labels it as an “auto repair” facility. The address for the property is given as 2035 University Avenue on the Sanborn map. From 1947 into 1950, the *Berkeley Daily Gazette* ran advertisements for a business called Zane's located at 2035 University Avenue, which dealt in used automobile sales.

On 2 January 1951, the *Berkeley Daily Gazette* reported that a building permit had been issued for construction of a store and apartment building at 2035 University Avenue, to cost $40,000. As constructed, it included five small shop spaces on the first floor and a residential unit on the second. A newspaper article reporting on rapid development along University Avenue noted that the building “houses five firms in the most efficient manner, utilizing existing frontage to the best advantage of each company. It adds a pleasing new face to the avenue.” The article listed the first retail tenants of the building as Louis Prince Violins (2031 University), W.J. Milligan Imports (2033 University), the Preview Maternity Shop (2035 University), R.E. Geddes & Co. realty (2037 University), and Hoo Chong & Co. (2039 University).

The second floor apartment was initially occupied as a residence by Harry B. and Helen Williamson, and their teenage son and nephew. Newspapers note several parties, dances, and club meetings that the Williamsons held at their home from 1951 to at least 1963. It is not known when the Williamsons vacated the second floor apartment, but it was later used as offices. Harry Williamson lived until 1990 and it is conceivable that he resided in the apartment until then, while the change in use appears to have happened sometime prior to 1995. At that time the current entry and stairs to the upper story were inserted within the building's westernmost shop space and the second floor offices and commercial areas (noted to be existing) were remodeled. (Building permit 95-942) It is unknown where the primary entry to the second floor was located prior to 1995, but the rear exterior stair may have been used to access the upstairs unit.

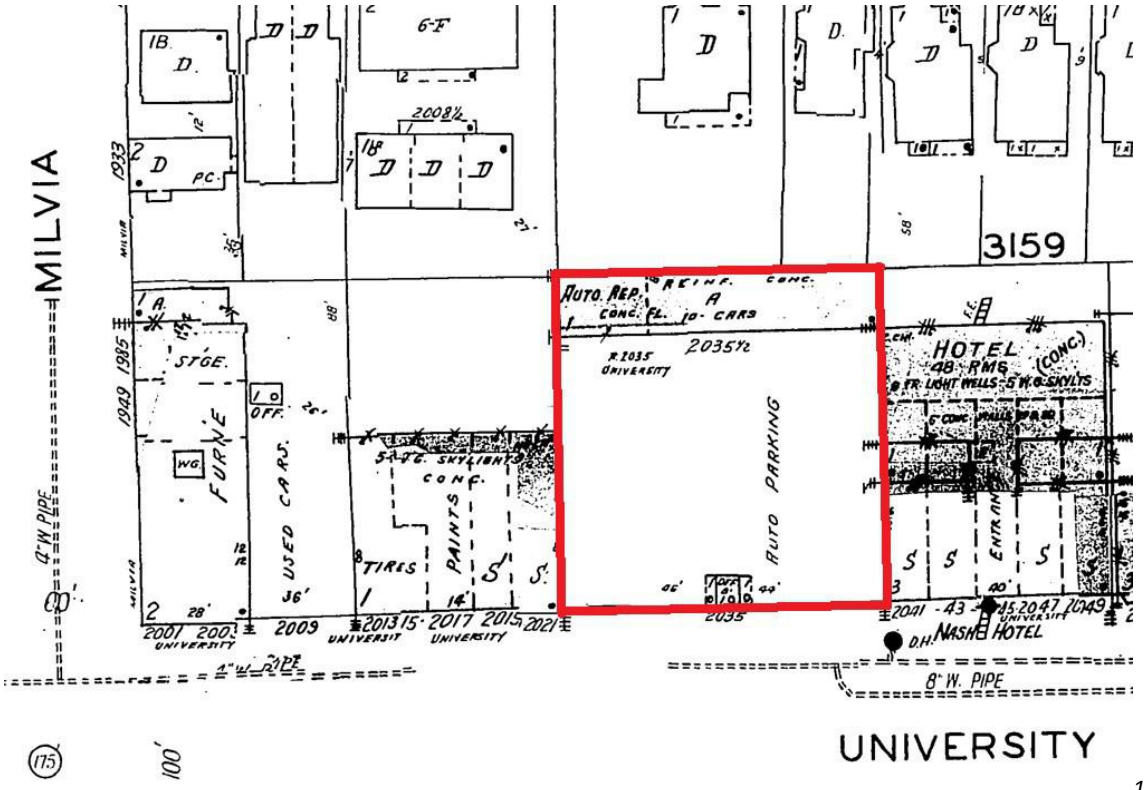
B10. Significance: (continued)



1950 Sanborn Fire

Insurance map. Subject property outlined in red.

In the space addressed 2031 University, Louis Prince Violins quickly became the Berkeley Violin Center during 1951, but may have been the same business under two different names. It specialized in the sale and repair of violins and other stringed instruments. Newspapers indicate that the business was put up for sale in 1969, and link it to business owner Mary Bettencourt. Bettencourt's name continued to be associated with the business in later years, however; so she appears to have retracted the sale offer and stayed in business until about 1980. The following year, newspaper ads place Ifshin Violins at 2031 University Avenue. The identical, and unusual, business type suggests that Mary Bettencourt sold her established violin business, which became Ifshin Violins. Ifshin Violins remained in the shop until 2008 and is now located in El Cerrito. (Ifshinviolins.net) The shop space was then occupied by Nail Image salon until 2011, and J.V. Nail salon from that time to the present. (City of Berkeley Planning records)

W.J. Milligan Imports, located at 2033 University, was mentioned briefly in newspapers in connection with a lawsuit in 1955, but remained at the subject address until at least 1957, when newspapers reported that the store had been robbed. (*Oakland Tribune*, 16 March 1955. *Berkeley Daily Gazette*, 14 January 1957.) The business likely stayed at the address after that, although it is unknown for how long. The next tenant is not known until 2001, when Fantasy T-Shirt, a shirt silkscreening business, moved into the shop. Babette Cafe was briefly present around 2022, and the shop now houses Honey T.V., a t-shirt and accessories shop. (City of Berkeley Planning records)

Preview Maternity Shop was frequently advertised in newspapers during its tenancy in the shop at 2035 University Avenue. It remained until 1968 and in 1969, the same shop space was occupied by Dorothé Maternity, suggesting a name change or buy-out, but a continuation of the same business type. It is unknown how long Dorothé Maternity remained in the shop. From 1990 to 1993, the space was occupied by an office supplies retailer. It then became Dalys Hou Yee Best clothing, toys, and gifts store. In 2007, Mirage Imports, a clothing, jewelry, gifts, and tobacco shop, occupied the storefront. Lhasa Salon moved into the space in 2010 and remains today. (City of Berkeley Planning records)

R.E. Geddes & Co. was a real estate agency that was present at 2037 University until 1964. After that time, there continued to be a real estate agency in the same shop space, although it was called Summit Realty, again suggesting a name change or buy-out. Summit Realty remained until at least 1983. In 1976, there was some mention in newspapers of a Hufbaur Gallery at the same address, but only briefly and it does not seem to have displaced the realty office; the two operations may have shared the space.

CONTINUATION SHEET **Trinomial**

Page 5 **of** 16 ***Resource Name or #** (Assigned by recorder) 2029-2039 University Avenue, Berkeley, CA
*Recorded by: Caitlin Hibma/Left Coast Architectural History *Date: Oct. 2023 ☒ Continuation ☐ Update

B10. Significance: (continued)

World Travel Center of California, a travel agency, was located in the space until 1997, and was followed by two successor travel agencies that may have been related. In 2000, a Tibetan and Himalayan jewelry and clothing story moved into the storefront and the shop is now occupied by Second Hand Hustle. (City of Berkeley Planning records)

Hoo Chong & Co. was an Asian gifts, furnishings and antiques shop. The establishment at 2039 University Avenue was a branch of a business that had been established in Downtown Berkeley for many years previously, according to its grand opening advertisement. It remained at the property until 1965. In 1966, a business dealing with electronics occupied the space and there is mention in newspapers of a warehouse use in 1977. In 1980, Berkeley Shade Co. opened in the space and remains today, selling window shades and coverings. (City of Berkeley Planning records)

As noted, Harry B. Williamson died 1990 and owned the property until that time. It was then inherited by the "heirs of the estate of Harry B. Williamson," as noted on a 1995 Planning Department record. By the 2000s, the property was owned by K&K Properties and/or P.K. Properties. These appear to be property management companies with little information available regarding their operations.

Architectural Style

The commercial building at 2029-2039 University Avenue is an example of the Art Moderne style. The Art Moderne style was popular primarily in the 1930s and 1940s, making the subject building a very late example. The style was applied to a wide variety of building types, from residences to industrial buildings. It was characterized by overall asymmetry and a horizontal emphasis, flat roofs, horizontal groupings of windows, smooth wall surfaces (usually stucco) with horizontal bands of raised or incised trim (known as "speedlines"), flat canopies, railings with horizontal members, rounded corners, and geometric details. Corner windows and glass block were common, as were porthole windows, which made direct reference to the transportation-related industrial design of cars, ships, trains, and airplanes that inspired the style. Sometimes referred to as Streamline Moderne, it drew on the influences of the motor age and the evolution of streamline design that increased air stream efficiency around moving vehicles, but also had an appealing and strikingly modern aesthetics.

The building at 2029-2039 University Avenue has basic, but not overly expressive, characteristics of the Art Moderne style, including basic horizontality, boxy massing, a flat roof and roofline, a flat canopy spanning the primary facade (although a later alteration, it may have replicated an earlier version), horizontally oriented second-story windows unified by continuous trim along top and bottom, and a simple box cornice. The siding is partially smooth stucco, but also includes Roman brick veneer, which is not typical of the Art Moderne style, but is a notable Midcentury building material and does have a fine-grain horizontal emphasis. Likewise, although the angled storefront bays are not typically Art Moderne, they are modernistic and fit the overall aesthetic. The building qualifies as an Art Moderne style design, but is a simple, late example and, therefore, not considered to be a prime example of the style.

The garage at the rear of the lot is strictly utilitarian and demonstrates no specific architectural style.

Architects & Builders

No original building permit or other records were found that identify an architect, designer, or builder associated with the main building at 2029-2039 University Avenue. The building permit for the garage at the rear of the lot indicates that Harry B. Williamson was the builder. Based on the fact that the Williamson Property Company appears to have included a contracting/building division, as well as property management services, it seems likely that the building was designed and constructed in-house, by staff of the Williamson Property Company.

Alterations

The following building permits and other records are on file with the City of Berkeley Department of Planning & Development and Berkeley Architectural Heritage Association. They provide documentation of the property's development over time:

Date	Permit #	Description of Work
07/13/43	54420	Reinforced concrete retaining wall built at rear of lot.
08/20/43	54612	One-story garage constructed spanning rear of lot (earlier retaining wall became back and side walls of garage).
04/11/51	69287	"Shadelite" marquee installed over stores.
05/23/95	95-942	Modify existing retail space at 2031 University (westernmost storefront) to provide an entry lobby and stair to 2029 University (upper floor). Remodel existing offices, commercial areas, and restrooms at 2029 University.

*Recorded by: Caitlin Hibma/Left Coast Architectural History *Date: Oct. 2023 ☒ Continuation ☐ Update

B10. Significance: (continued)

01/26/96	96-204	Modify the existing canopy. Number of signs is limited to one sign on the face of new canopy and one hanging sign, etc.

Additional observations:

- Windows replaced at second story of primary and rear facade. Original material unknown, replaced with vinyl or vinyl-clad aluminum sliding sashes. Date unknown, possibly 1980s based on material.
- Roll-up metal garage door installed at drive-through. Likely open or with wood door originally. Date unknown.
- Transom windows above some storefront entries modified. Single fixed lites replaced with louvers, fan insert, or sliding sash in three instances. Date unknown.

California Register Evaluation
The California Register of Historical Resources (California Register) is an inventory of significant architectural, archaeological, and historical resources in the State of California. In order for a property to be eligible for listing in the California Register, it must be found significant under one or more criteria relating to historically significant events, people, architects or architectural merit, or information potential. The following provides an evaluation of the historic significance of 2029-2039 University Avenue:

Criterion 1 (Event): *Associated with events that have made a significant contribution to the broad patterns of local or regional history or the cultural heritage of California or the United States.*

No specific events of historical importance are known to have occurred at the property. As a primarily commercial property located in Downtown Berkeley, the property fits the general, organic patterns of development in the area, which echoed patterns that occurred throughout the Bay Area. Built in 1951, the property is a relative late-comer to the Downtown environment, however, and simply reflects a Midcentury surge in development, spurred by economic prosperity following World War II. Aside from some initial residential use on the second story, the property served primarily modest retail functions throughout its history and into the present day. It does not stand out as noteworthy within the development or continuing history of Berkeley's Downtown.

The property does not appear to be eligible for listing in the California Register under Criterion 1.

Criterion 2 (Persons): Associated with the lives of persons important to local, California or national history.

The property was owned by the Williamson Property Company and, subsequently, the Williamson family throughout the historic period and into the 1990s. Matriarch Jessie Williamson was active in politics and social causes, but her activities do not relate to the subject property or her involvement with the family business. Harry B. Williamson and his family occupied a second floor apartment in the building for a time. While the Williamsons appeared to be prominent and active real state developers in Berkeley, there are numerous properties that are better associated with the Williamson name. Both the U.C. Theater and the Nash Hotel, adjacent and across the street from the subject property, were Williamson projects and have greater name recognition. At the same time the building at 2029-2039 University Avenue was being constructed, the Williamsons were developing a large U-Save supermarket in Downtown Berkeley, which got extensive press, while the subject property got little. The Williamsons do not appear to rise to the level of influence that would qualify them as important historical figures and the subject property is also not a strongly representative of their real estate development work. Later owning parties were property management companies without specific individuals identified with them. Likewise, most of the tenant businesses at the property did not have specific names associated with them. For those that did, those individuals were simply local small business owners, without significant influence or accomplishments to their names.

The property does not appear to be eligible for listing in the California Register under Criterion 2.

Criterion 3 (Architecture): *Embodies the distinctive characteristics of a type, period, region or method of construction or represents the work of a master or possesses high artistic values.*

The building at 2029-2039 University Avenue was designed as a Art Moderne commercial building. It exhibits basic, but not overly expressive, characteristics of the style, including basic horizontality, boxy massing, a flat roof and roofline, a flat canopy spanning the primary facade (although a later alteration), horizontally oriented second-story windows unified by continuous trim along top and bottom, and a simple box cornice. The siding is partially smooth stucco, but also includes Roman brick veneer, which is not typical of the Art Moderne style, but is a notable Midcentury building material and does have a somewhat fine-grain horizontal emphasis. Likewise, although the angled storefront bays are not typically Art Moderne, they are modernistic and fit the overall aesthetic. The building qualifies as an Art Moderne style design, but is a simple and late example and, therefore, not considered to be a prime example of the style. The garage at the rear is utilitarian and does not exhibit any particular style.

Page 7 **of** 16 ***Resource Name or #** (Assigned by recorder) 2029-2039 University Avenue, Berkeley, CA
*Recorded by: Caitlin Hibma/Left Coast Architectural History *Date: Oct. 2023 ☒ Continuation ☐ Update

B10. Significance: (continued)
Neither building appears to have been architect designed, but were likely designed and constructed by staff of the Williamson Property Company.

The property does not appear to be eligible for listing in the California Register under Criterion 3.

Criterion 4 (Information Potential): *Has yielded, or has the potential to yield, information important to the prehistory or history of the local area, California or the nation.*

Criterion 4 is typically concerned with archaeological investigation. Where buildings or architectural elements are concerned, Criterion 4 typically relates to rare construction types, of which 2029-2039 University Avenue is not an example.

The property does not appear to be eligible for individual listing in the California Register under Criterion 4.

Berkeley Landmark Evaluation
Berkeley Landmarks are designated historical resources within the City of Berkeley. Resources may be designated as Landmarks if they meet one or more of five criteria similar to those used for the California Register, but which elaborate on areas of significance. The following provides an evaluation of the historic significance of 2029-2039 University Avenue according to local significance criteria:

1. Architectural Merit:
a-c. Property that is the first, last, only or most significant architectural property of its type in the region; Properties that are prototypes of or outstanding examples of periods, styles, architectural movements or construction, or examples of the more notable works of the best surviving work in a region of an architect, designer or master builder; Architectural examples worth preserving for the exceptional values they add as part of the neighborhood fabric.

The property does not hold the status of first, last, or only of its type or style in the region, nor is it a significant or outstanding example of its type or style. The main building is a basic and not overly expressive example of the Art Moderne style and is not considered to be a prime example. The garage at the rear is utilitarian and does not exhibit any particular style. Neither building appears to have been architect designed, but were likely designed and constructed by staff of the Williamson Property Company. Thus, the property does not appear to have the high architectural merit or association with a master architect or builder that would qualify it as a Berkeley Landmark under this criterion.

2. Cultural value: Structures, sites and areas associated with the movement or evolution of religious, cultural, governmental, social and economic developments of the City

Neither the construction of the buildings at 2029-2039 University Avenue, nor their subsequent ownership, occupancy, and use history, were influenced by religious, cultural, governmental, social, or economic events or developments in the area. The building was built and primarily used for commercial purposes and housed small local businesses. Although economic activity was the building's most obvious cultural contribution, it does not appear to have been associated with any significant movements or events within Berkeley's economic history.

3. Educational value: Structures worth preserving for their usefulness as an educational force

The property at 2029-2039 University Avenue does not appear to have any use as an educational tool. The building and garage are modest commercial and utilitarian structures that do not convey noteworthy patterns of use or strong relationships to important aspects of neighborhood or city history. The property does not have any potential to convey lessons on history, as it is not associated with any important events nor is it physically illustrative of the lives, work, or activities of its owners/tenants. It therefore does not appear to have the high educational value that would qualify it as a Berkeley Landmark under this criterion.

4. Historic value: Preservation and enhancement of structures, sites and areas that embody and express the history of Berkeley/Alameda County/California/United States. History may be social, cultural, economic, political, religious or military.

The property at 2029-2039 University Avenue generally reflects the organic commercial growth of Downtown Berkeley, but dates to the mid-twentieth century, so is late to that context. It does not have any strong associations outside of general development patterns in the neighborhood. Neither the construction of the main building or garage, nor their later history, was influenced by specific social, cultural, economic, political, religious, or military events or developments in the area. No specific events of significance occurred at the property; therefore, it does not appear to have the high historic value that would qualify it as a Berkeley Landmark under this criterion.

5. Any property which is listed on the National Register described in Section 470A of Title 16 of the United States Code.

State of California — The Resources Agency	Primary #
DEPARTMENT OF PARKS AND RECREATION	HRI#
CONTINUATION SHEET	Trinomial

Page 8 **of** 16 ***Resource Name or #** (Assigned by recorder) 2029-2039 University Avenue, Berkeley, CA
*Recorded by: Caitlin Hibma/Left Coast Architectural History *Date: Oct. 2023 ☒ Continuation ☐ Update

B10. Significance: (continued)

The property at 2029-2039 University Avenue is not listed in the National Register of Historic Places and therefore does not qualify as a Berkeley Landmark under this criterion.

Berkeley Structure of Merit

Berkeley Structures of Merit are designated historical resources within the City of Berkeley. Resources may be designated as Structures of Merit if they meet general and/or specific criteria. An evaluation follows:

1. General criteria shall be architectural merit and/or cultural, educational, or historic interest or value. If upon assessment of a structure, the commission finds that the structure does not currently meet the criteria as set out for a landmark, but it is worthy of preservation as part of a neighborhood, a block or a street frontage, or as part of a group of buildings which includes landmarks, that structure may be designated a structure of merit.

As assessed under Berkeley Landmark criteria, the property at 2029-2039 University Avenue does not possess great architectural merit or cultural, educational, or historic value. It is a common element of Berkeley's mid-twentieth century commercial development and is not an outstanding or noteworthy example thereof. Visual observation of buildings around the property does not indicate any historically significant cohesive or thematically representative grouping within which the buildings at 2029-2039 University Avenue would play a meaningful role. Therefore, the property does not appear to qualify as a Structure of Merit under the General Criteria.

Specific Criteria

a. The age of the structure is contemporary with (1) a designated landmark within its neighborhood, block, street frontage, or group of buildings, or (2) an historic period or event of significance to the City, or to the structure's neighborhood, block, street frontage, or group of buildings.

There are no Berkeley Landmarks of Structures of Merit on the same block as the 2029-2039 University Avenue; however, there are approximately a dozen on surrounding blocks and many others throughout Downtown Berkeley. Among the dozen closest to the subject property, construction dates range from 1886 to 1933, meaning that none are contemporary with the 1951 building at 2029-2039 University Avenue. The property is not otherwise associated with any major event or historic period specific to Downtown or citywide history.

b. The structure is compatible in size, scale, style, materials or design with a designated landmark structure within its neighborhood, block, street frontage, or group of buildings.

Among the dozen Landmarks closest to the subject property, a number take the form of one to two story commercial blocks of similar size and scale as the subject property, but differ widely in style and overall design. The size and scale, as well as materials, are common to countless Downtown commercial buildings and so do not place the subject property and the similar Landmarks in any unique or definable category of their own. The Art Moderne architecture of the subject property sets it firmly apart from any Landmarks which are in earlier and more ornate styles, ranging from Victorian to Art Deco.

c. The structure is a good example of architectural design.

The main building is a basic and not overly expressive example of the Art Moderne style and is not considered to be a prime example. The garage at the rear is utilitarian and does not exhibit any particular style. Neither building appears to have been architect designed, but were likely designed and constructed by staff of the Williamson Property Company.

d. The structure has historical significance to the City and/or to the structure's neighborhood, block, street frontage, or group of buildings.

The property at 2029-2039 University Avenue reflects the organic commercial growth of Downtown Berkeley in the mid-twentieth century, but does not have any strong associations outside of general development patterns in the neighborhood. Neither the construction of the main building or garage, nor their later history, was influenced by noteworthy social, cultural, economic, political, religious, or military events or developments in the area.

Integrity

In order to qualify for historic designation, a property must possess significance under the aforementioned criteria *and* have historic integrity. The property at 2029-2039 University Avenue does not appear to possess the historic significance necessary to qualify for designation; therefore, an analysis of its integrity is not required.

*Recorded by: Caitlin Hibma/Left Coast Architectural History *Date: Oct. 2023 ☒ Continuation ☐ Update

B10. Significance: (continued)

Conclusion

Based on the above analysis, the property at 2029-2039 University Avenue does not appear to be eligible for listing the California Register of Historical Resources or as a City of Berkeley Landmark or Structure of Merit. Therefore, it does not qualify as a a historic resource for the purposes of the California Environmental Quality Act (CEQA).

EXECUTIVE SUMMARY

AEI Consultants (AEI) was retained by Laconia Development to conduct a Phase I ESA in conformance with AEI's contract and the scope and limitations of ASTM Standard Practice E1527-21 and the EPA Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), for the property located at 2029-2039 University Avenue, Berkeley, Alameda County, California (the "subject property"). Any exceptions to, or deletions from, this practice are described in Sections 1.4, 1.5, and 1.6 of this report.

Pertinent subject property information is noted below:

Property Information	
Site Address(es)	2029-2039 University Avenue, Berkeley, Alameda County, California 94704
Property ID (APN or Block/Lot)	57-2053-8-1
Location	North side of University Street, bound by Shattuck Avenue to the east and Milvia Street to the west
Property Type	Retail - Strip Center
Site and Building Information	
Approximate Site Acreage/Source	2.84/Alameda County Assessor
Number of Buildings	One
Building Construction Date(s)/Source	1952/Alameda County Assessor
Building Square Footage (SF)/Source	11,200/Client provided
Number of Floors/Stories	Two
Basement or Subgrade Area(s)	None identified
Number of Units	Six
Additional Improvements	Rear carport, asphalt-paved parking areas, and associated landscaping
On-site Occupant(s)	See Tenant Information list below
Current On-site Operations/Use	Beauty salons, clothing store, thrift shop, window store, and commercial offices
Current Use of Hazardous Substances	None identified
Regulatory Information	
Regulatory Database Listing(s)	HAZNET, HWTS

Tenant Information

Subject Property Address/Unit	Tenant	Use	Accessed
2029 University Avenue/ Suites 200, 203, 206	Pesticide Action Network, Incasa Coffee, Californians for Pesticide Reform, Jerry Haag Urban Planner	Upstairs Offices	Yes
2031 University Avenue	JV Nails	Beauty Salon	Yes
2033 University Avenue	Honey TV	Clothing Store	Yes
2035 University Avenue	Lhasa Hair Salon	Beauty Salon	Yes
2037 University Avenue	Vintage Thrift Dope Stuff	Thrift Shop	Yes
2039 University Avenue	Berkeley Shade Co.	Window Store	Yes

A chronological summary of historical subject property information is as follows:

Date Range	Subject Property Description and Occupancy (Historical Addresses)	Source(s)
Prior to 1890	Unknown use/Data failure; refer to Section 1.6.1	Sanborn maps, aerial photographs, city directories, agency records
1890-1911	Residential dwellings	Sanborn maps
1928-1939	Parking lot	Sanborn maps, city directories, aerial photographs
1945-1950	Car sale lot with a small office building and current carports, partially used for auto repair, tenants include Zane's Used Car Lot and Auto Repair	Aerial photographs, Sanborn maps
1952-Present	Current building constructed for commercial and retail use (2025-2039 University Street), identified tenants include various restaurants, beauty and nail salons, clothing stores, a violin shop, hardware store, tailor, window shop, and commercial offices	Aerial photographs, city directories, Sanborn maps, client-provided information, site observation

The immediately surrounding properties consist of the following:

Direction	Tenant/Use (Address)	Regulatory Database Listing(s)
North	Residences (2008 Berkeley Way) Hope Center, Berkeley Way Apartments (2012-2022 Berkeley Way)	Yes; refer to Section 5.1
East	Nash Hotel, Sushi Go Go, Gentle Hair Cuts, Nash Café, Nepalese Gift and Smoke Shop (2041-2049 University Avenue)	None identified
South	University Avenue followed by: Black Lives Matter, Jayakarta Restaurant, UC Studios Apartments, Fast Imaging Center, Café Tibet, Stone Room Rock Shop (2018-2030 University Avenue) UC Theater (2036 University Avenue) Platano Restaurant, LAN Beauty Salon, Residences (2042-2048 University Avenue)	None identified
West	Uni Tailor, Red Tomato Pizza House, University Taqueria (2013-2021 University Avenue)	None identified

Findings and Opinions

Significant Data Gap(s) is defined by the current ASTM Standard E1527 as a data gap that affects the ability of the environmental professional to identify a recognized environmental condition.

AEI did not identify significant data gaps which affected our ability to identify RECs.

Recognized Environmental Condition (REC) is defined by the current ASTM Standard E1527 as the (1) the presence of hazardous substances or petroleum products in, on, or at the subject property due to a release to the environment; (2) the likely presence of hazardous substances or petroleum products in, on, or at the subject property due to a release or likely release to

the environment; or (3) the presence of hazardous substances or petroleum products in, on, or at the subject property under conditions that pose a material threat of a future release to the environment.

- AEI did not identify evidence of RECs during the course of this assessment.

Controlled Recognized Environmental Condition (CREC) is defined by the current ASTM Standard E1527 as a recognized environmental condition affecting the subject property that has been addressed to the satisfaction of the applicable regulatory authority or authorities with hazardous substances or petroleum products allowed to remain in place subject to implementation of required controls (for example, activity and use limitations or other property use limitations).

- AEI did not identify evidence of CRECs during the course of this assessment.

Historical Recognized Environmental Condition (HREC) is defined by the current ASTM Standard E1527 as a previous release of hazardous substances or petroleum products affecting the subject property that has been addressed to the satisfaction of the applicable regulatory authority or authorities and meeting unrestricted use criteria established by the applicable regulatory authority or authorities without subjecting the subject property to any controls (for example, activity and use limitations or other property use limitations).

- AEI did not identify evidence of HRECs during the course of this assessment.

Other Environmental Considerations (OEC) warrant discussion, but do not qualify as RECs as defined by the current ASTM Standard E1527. These include, but are not limited to, de minimis conditions and/or environmental considerations such as the presence of ACMs, LBP, radon, mold, and lead in drinking water, which can affect the liabilities and financial obligations of the client, the health and safety of site occupants, and the value and marketability of the subject property. A de minimis condition is defined by the ASTM Standard as a condition that generally does not present a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies.

- The adjoining property to the north, 2012 Berkeley Way, identified as Bridge Housing Corporation, is associated with a Spills, Leaks, Investigations, and Cleanups (SLIC) site granted closure by Alameda County in 2022. Investigations revealed elevated lead in on-site soils. Soil vapor sampling was performed at the site in February, April, and May 2020. One soil vapor probe, SV-12, was installed approximately 15 to 20 feet north of the subject property and sampled in February 2020. Benzene was detected in temporary vapor probe SV-12 from 5 feet bgs at 5.9 ug/m3 and from 15 feet bgs at 28.4 ug/m3. A permanent soil vapor probe, SV-12A was subsequently installed and sampled in April and May 2020. Benzene was not detected in permanent vapor probe SV-12A from 5 feet bags in April or May 2020. Benzene detected from SV-12 in February 2020 were in excess of the Regional Board residential vapor intrusion ESL of 3.2 ug/mg3 and the detection from 15 feet bgs was in excess of the Regional Board commercial/industrial vapor intrusion ESL. Based on the laboratory analytical results

from the February, April, and May 2020 soil vapor sampling events, Rincon concluded that the concentrations of VOCs detected in the April and May sampling events were consistent with or lower than the concentrations detected February 2020. In addition, Rincon indicated VOCs (other than benzene), were not present in sub-surface soil vapor at a concentration that would present a potential health risk for residential land uses. Additionally, the elevated levels of benzene have been attributed by the ACDEH to regional groundwater impacts. Therefore, Rincon contended that soil vapor mitigation engineering controls was not recommended as part of redevelopment of the adjoining property. Further, the April and May 2020 sampling data was provided to ACDEH in advance of this report. In a meeting on June 1, 2020, ACDEH indicated that they concur that a soil vapor barrier was not required; however, they recommended that trench dams be installed at the property line for all utilities entering the property from off-site to mitigate for potential vapor intrusion from off-site sources.

In July 2021 soil containing lead at concentrations above the site clean-up goal of 80 mg/kg was excavated and disposed of off-site at a licensed disposal facility. Approximately 90 cubic yards were disposed of as Federal hazardous waste and approximately 900 cubic yards were disposed of as California hazardous waste. Confirmation soil samples were collected from the sidewalls and bottom of the excavations and confirmed soil exceeding the clean-up goals was removed. An excavation was also performed in the area of vapor probes SV-12 and SV-12a. This excavation area is denoted as Cal Haz Area 4. On July 20 and July 21, 2020, Cal Haz 4 was excavated to a depth of 4 feet bgs, and initial confirmation soil samples (#85 through #115) were analyzed. One initial sidewall sample (#100) exceeded the site cleanup goal; therefore, one additional lateral excavation was advanced into the sidewall at that location. The concentration in the confirmation sample collected from the stepped-out sidewall (#101) was below the site clean-up goal; therefore, the remedial excavation was considered complete. Following remedial excavation and trench dam work, the ACDEH concluded that the residual subsurface contamination at the site presented a low risk to human health and the environment and granted for the current residential land use. The SLIC case was granted closure by the ACDEH in a letter dated June 29, 2022. Based on the closed regulatory status and excavation of lead and benzene-impacted soil to a depth of 4 feet bgs immediately north of the subject property, the closed SLIC case is not expected to represent a significant environmental concern at this time. However, as previously noted, petroleum impacts are attributed to a regional benzene plume. No details regarding this plume is available, and it is unclear if it is present beneath the subject property, but due to the historical use of the subject property primarily for retail, residential, and/or car park purposes, it is unlikely the subject property owner would be responsible for any future assessment or remediation activities. Additionally, as shallow soil vapor samples collected from the subject property vicinity have consistently been below commercial/ industrial ESLs (and non detect in the most recent sampling events), it does not appear that the potential benzene impacts represent a vapor intrusion risk to subject property occupants, and no further action appears warranted at this time. However, if the subject property is redeveloped for residential use in the future, additional sampling and/or mitigation efforts may be required.

- Due to the age of the subject property building, there is a potential that ACMs are present. The observed suspect ACMs at the subject property were in good condition at the time of the site reconnaissance and are not expected to pose a health and safety concern to the occupants of the subject property at this time. Based on the

potential presence of ACMs, AEI recommends the implementation of an O&M Plan which stipulates that the repair and maintenance of damaged materials should be performed to protect the health and safety of the building occupants. In the event that building renovation or demolition activities are planned, a thorough asbestos survey to identify asbestos-containing building materials is required in accordance with the EPA NESHAP 40 CFR Part 61 prior to demolition or renovation activities that may disturb suspect ACMs.

- Due to the age of the subject property building, there is a potential that LBP is present. All observed painted surfaces were in good condition and are not expected to pose a health and safety concern to the occupants of the subject property at this time. Local regulations may apply to LBP in association with building demolition/renovations and worker/occupant protection. Actual material samples would need to be collected or an x-ray fluorescence (XRF) survey performed in order to determine if LBP is present. It should be noted that construction activities that disturb materials or paints containing any amount of lead may be subject to certain requirements of the OSHA lead standard contained in 29 CFR 1910.1025 and 1926.62.

CONCLUSIONS

We have performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM Standard Practice E1527-21, of 2029-2039 University Avenue, Berkeley, Alameda County, California, the *subject property*. Any exceptions to, or deletions from, this practice are described in Sections 1.4, 1.5, and 1.6 of this report.

This assessment has revealed no evidence of recognized environmental conditions, controlled recognized environmental conditions, or significant data gaps in connection with the subject property.

RECOMMENDATIONS

AEI recommends no further investigation for the subject property at this time.

1.0 INTRODUCTION

This report documents the methods and findings of the Phase I Environmental Site Assessment performed in conformance with AEI's contract and scope and limitations of ASTM Standard Practice E1527-21 and the EPA Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), for the property located at 2029-2039 University Avenue, Berkeley, Alameda County, California (Appendix A: Figures and Appendix B: Property Photographs).

1.1 Scope of Work

The purpose of the Phase I ESA is to assist the client in identifying potential RECs, in accordance with the most current ASTM E1527 Standard associated with the presence of any hazardous substances or petroleum products, their use, storage, and disposal at and in the vicinity of the subject property. Property assessment activities focused on: 1) a review of federal, state, tribal, and local databases that identify and describe underground fuel tank sites, leaking underground fuel tank sites, hazardous waste generation sites, and hazardous waste storage and disposal facility sites within the ASTM approximate minimum search distance; 2) a property and surrounding site reconnaissance, and interviews with the past and present owners and current occupants and operators to identify potential environmental contamination; and 3) a review of historical sources to help ascertain previous land use at the site and in the surrounding area.

1.2 Additional Services

Other Environmental Considerations such as ACMs, LBP, lead in drinking water, radon, mold, and wetlands can result in business environmental risks for property owners which may disrupt current or planned operations or cash flow and are generally beyond the scope of a Phase I assessment as defined by the current ASTM Standard E1527. Based upon the agreed-on scope of services this ESA did not include subsurface or other invasive assessments, business environmental risks, or other services not specifically identified and discussed herein.

1.3 Significant Assumptions

The following assumptions are made by AEI in this report. AEI relied on information derived from secondary sources including governmental agencies, the client, designated representatives of the client, property contact, property owner, property owner representatives, computer databases, and personal interviews. AEI has reviewed and evaluated the thoroughness and reliability of the information derived from secondary sources including government agencies, the client, designated representatives of the client, property contact, property owner, property owner representatives, computer databases, or personal interviews. It appears that all information obtained from outside sources and reviewed for this assessment is thorough and reliable. However, AEI cannot guarantee the thoroughness or reliability of this information.

Groundwater flow, unless otherwise specified by on-site well data or well data from the subject property or nearby sites, is inferred from contour information depicted on the USGS topographic maps. AEI assumes the property has been correctly and accurately identified by the client, designated representative of the client, property contact, property owner, and property owner's representatives.

1.4 LIMITATIONS

Property conditions, as well as local, state, tribal, and federal regulations can change significantly over time. Therefore, the recommendations and conclusions presented as a result of this assessment apply strictly to the environmental regulations and property conditions existing at the time the assessment was performed. Available information has been analyzed using currently accepted assessment techniques and it is believed that the inferences made are reasonably representative of the property. AEI makes no warranty, expressed or implied, except that the services have been performed in accordance with generally accepted environmental property assessment practices applicable at the time and location of the assessment.

Considerations identified by ASTM as beyond the scope of a Phase I ESA that may affect business environmental risk at a given property include the following: ACMs, radon, LBP, lead in drinking water, wetlands, regulatory compliance, cultural and historical resources, industrial hygiene, health and safety, ecological resources, endangered species, indoor air quality, mold, and high voltage lines. These environmental issues or conditions may warrant assessment based on the type of the property transaction; however, they are considered non-scope issues under the current ASTM Standard E1527.

If requested by the client, these non-scope issues are discussed herein. Otherwise, the purpose of this assessment is solely to satisfy one of the requirements for qualification of the innocent landowner defense, contiguous property owner or bona fide prospective purchaser under CERCLA. The current ASTM Standard E1527 and the United States EPA Standards and Practices for All Appropriate Inquiries (40 CFR Part 312) constitute the "all appropriate inquiry into the previous ownership and uses of the property consistent with good commercial or customary practice" as defined in:

1. 42 U.S.C. § 9601(35)(B), referenced in the current ASTM Standard E1527.
2. Sections 101(35)(B) (ii) and (iii) of CERCLA and referenced in the EPA Standards and Practices for All Appropriate Inquiries (40 CFR Part 312).
3. 42 U.S.C. § 9601(40) and 42 U.S.C. § 9607(q).

The Phase I Environmental Site Assessment is not, and should not be construed as, a warranty or guarantee about the presence or absence of environmental contaminants that may affect the property. Neither is the assessment intended to assure clear title to the property in question. The sole purpose of assessment into property title records is to ascertain a historical basis of prior land use. All findings, conclusions, and recommendations stated in this report are based upon facts, circumstances, and industry-accepted procedures for such services as they existed at the time this report was prepared (i.e., federal, state, and local laws, rules, regulations, market conditions, economic conditions, political climate, and other applicable matters). All findings, conclusions, and recommendations stated in this report are based on the data and information provided, current subject property use, and observations and conditions that existed on the date and time of the property reconnaissance.

Responses received from local, state, or federal agencies or other secondary sources of information after the issuance of this report may change certain facts, findings, conclusions, or circumstances to the report. A change in any fact, circumstance, or industry-accepted procedure upon which this report was based may adversely affect the findings, conclusions, and recommendations expressed in this report.

AEI's limited radon screening, if included, is intended to provide a preliminary screening to evaluate the potential presence of elevated radon concentrations at the site. The proposed scope is not intended to define the full extent of the presence of radon at the subject property. As such, the results should be used for lending purposes only. The recommendations and conclusions presented as a result of the limited preliminary radon screening apply strictly to the property conditions existing at the time the sampling was performed. The sample analytical results are only valid for the time, place, and condition of the site at the time of collection and AEI does not warrant that the results will be repeatable or are representative of past or future conditions.

1.5 Limiting Conditions/Deviations

The performance of this assessment was limited by the following:

- While additional assessments may have been conducted on the subject property, these documents must be provided for AEI's review in order for the information to be summarized/included in this report. Please refer to Section 6.3 for a summary of previous reports and other documentation provided to AEI during this assessment.
- The User did not complete the ASTM User Questionnaire or provide the User information to AEI. AEI assumes that qualification for the LLPs is being established by the User in documentation outside of this assessment.
- Due to the large volume of materials within portions of the buildings, direct visual observation of many of the floor and wall areas of the building was not possible. Features may be present that were not observed during AEI's field reconnaissance. Based on the quality of information obtained from other sources, this limitation is not expected to alter the overall findings of this assessment.
- The Berkeley Building and Safety Department and Berkeley Planning and Developmentwere contacted for information on the subject property in order to identify historical tenants/use, property development, and/or hazardous substance/ petroleum product handling. Due to the time frame of this assessment, records were not available for review. However, based on the quality of information obtained from other sources, including the regulatory database, this limitation is not expected to significantly alter the findings of this assessment.

1.6 Data Failure and Data Gaps

According to the current ASTM Standard E1527, data gaps occur when the Environmental Professional is unable to obtain information required by the Standard, despite good faith efforts to gather such information. Pursuant to the current ASTM Standard E1527, only significant data gaps, defined as those that affect the ability of the Environmental Professional to identify RECs, need to be documented.

Data failure is one type of data gap. According to the current ASTM Standard E1527, data failure occurs when all of the standard historical sources that are reasonably ascertainable and likely to be useful have been reviewed and yet the objectives have not been met. Pursuant to the current ASTM Standard E1527, historical sources are required to document property use back to the property's first developed use or back to 1940, whichever is earlier, or periods of five years or greater.

1.6.1 Data Failure

The following data failure was identified during the course of this assessment:

Data Failure	As noted in Section 3.0, the earliest historical resource obtained during this assessment indicated that the subject property was developed with a residence. The lack of historical sources dating back to 1940 represents historical data source failure. However, as it is assumed that the subject property would have been previously used for residential purposes, if not undeveloped, this data failure is not expected to significantly alter the findings of this assessment.
Information/Sources Consulted	Aerial photographs, city directories, Sanborn fire insurance maps, agency records

Data Failure	As noted in Section 3.0, historical sources were not obtained at five-year intervals dating back to first developed use. However, it is assumed that during this time period the subject property would have been residential, if not utilized as a parking lot. Therefore, this data failure is not expected to significantly alter the findings of this assessment.
Information/Sources Consulted	Aerial photographs, city directories, Sanborn fire insurance maps, agency records

1.6.2 Significant Data Gaps

AEI did not identify significant data gaps which affected our ability to identify RECs.

1.7 Reliance

All reports, both verbal and written, are for the benefit of Laconia Development . This report has no other purpose and may not be relied upon by any other person or entity without the written consent of AEI. Either verbally or in writing, third parties may come into possession of this report or all or part of the information generated as a result of this work. In the absence of a written agreement with AEI granting such rights, no third parties shall have rights of recourse or recovery whatsoever under any course of action against AEI, its officers, employees, vendors, successors or assigns.

Reliance is provided in accordance with AEI's contract and Terms and Conditions executed by Laconia Development on September 11, 2023. The limitation of liability defined in the Terms and Conditions is the aggregate limit of AEI's liability to the client and all relying parties.

2.0 SITE AND VICINITY DESCRIPTION

2.1 SITE LOCATION AND DESCRIPTION

Property Information	
Site Address(es)	2029-2039 University Avenue, Berkeley, Alameda County, California 94704
Property ID (APN or Block/Lot)	57-2053-8-1
Location	North side of University Street, bound by Shattuck Avenue to the east and Milvia Street to the west
Property Type	Retail - Strip Center
Site and Building Information	
Approximate Site Acreage/Source	2.84/Alameda County Assessor
Number of Buildings	One
Building Construction Date(s)/Source	1952/Alameda County Assessor
Building Square Footage (SF)/Source	11,200/Client provided
Number of Floors/Stories	Two
Basement or Subgrade Area(s)	None identified
Number of Units	Six
Additional Improvements	Rear carport, asphalt-paved parking areas, and associated landscaping
On-site Occupant(s)	See Tenant Information list below
Current On-site Operations/Use	Beauty salons, clothing store, thrift shop, window store, and commercial offices
Current Use of Hazardous Substances	None identified
Regulatory Information	
Regulatory Database Listing(s)	HAZNET, HWTS

Tenant Information

Subject Property Address/Unit	Tenant	Use	Accessed
2029 University Avenue/ Suites 200, 203, 206	Pesticide Action Network, Incasa Coffee, Californians for Pesticide Reform, Jerry Haag Urban Planner	Upstairs Offices	Yes
2031 University Avenue	JV Nails	Beauty Salon	Yes
2033 University Avenue	Honey TV	Clothing Store	Yes
2035 University Avenue	Lhasa Hair Salon	Beauty Salon	Yes
2037 University Avenue	Vintage Thrift Dope Stuff	Thrift Shop	Yes
2039 University Avenue	Berkeley Shade Co.	Window Store	Yes

2.2 ON-SITE UTILITIES

Utility	Source/System Information
Heating System	Natural gas
Cooling System	Electricity
Potable Water	City of Berkeley through East Bay Municipal Utility District (EBMUD)
Sewage Disposal/Treatment	City of Berkeley through EBMUD/Sanitary Sewer

Utility source/system information listed in the table above is provided by Ms. Sima Talai, Property Owner, unless otherwise noted above.

2.3 Site and Vicinity Characteristics

The subject property is located in a mixed commercial, retail, and residential area of Berkeley, California. The immediately surrounding properties consist of the following:

Direction	Tenant/Use (Address)	Regulatory Database Listing(s)
North	Residences (2008 Berkeley Way) Hope Center, Berkeley Way Apartments (2012-2022 Berkeley Way)	Yes; refer to Section 5.1
East	Nash Hotel, Sushi Go Go, Gentle Hair Cuts, Nash Café, Nepalese Gift and Smoke Shop (2041-2049 University Avenue)	None identified
South	University Avenue followed by: Black Lives Matter, Jayakarta Restaurant, UC Studios Apartments, Fast Imaging Center, Café Tibet, Stone Room Rock Shop (2018-2030 University Avenue) UC Theater (2036 University Avenue) Platano Restaurant, LAN Beauty Salon, Residences (2042-2048 University Avenue)	None identified
West	Uni Tailor, Red Tomato Pizza House, University Taqueria (2013-2021 University Avenue)	None identified

2.4 Physical Setting

Geologic Unit: Description/Source	Temescal Formation (Qtc): alluvial fan deposits comprising interfingering lenses of clayey gravel, sandy silty clay, and sand-clay-silt mixtures , age Pleistocene/USGS and United States Department of the Interior
Soil Series: Description/Source	Urban Land-Tierra Complex (2 to 5 percent slopes: the Urban Land designation indicates that more than 85 percent of the original soils have been disturbed or covered by paved surfaces, buildings or other structures; due to the variability of the soil material, on-site investigation would be required to determine the specific soil composition at the subject property/USDA Soil Survey
Groundwater Flow Direction/Source	Southwest toward San Francisco Bay/Topographic map interpretation
Estimated Depth to Groundwater/Source	13.5 to 19.5 feet bgs/Geotracker: (Groundwater monitoring for nearby property, 2009 Addison Street, located approximately 350 feet south of subject property)
Surface waters on the subject property or adjoining sites	None
Additional notes	None

Note: Groundwater flow direction can be influenced locally and regionally by the presence of local wetland features, surface topography, recharge and discharge areas, horizontal and vertical inconsistencies in the types and location of subsurface soils, and proximity to water pumping wells. Depth and gradient of the water table can change seasonally in response to variation in precipitation and recharge, and over time, in response to urban development such as storm water controls, impervious surfaces, pumping wells, cleanup activities, dewatering, seawater intrusion barrier projects near the coast, and other factors.

3.0 HISTORICAL RECORDS REVIEW

Reasonably ascertainable standard historical sources as outlined in the current ASTM Standard E1527 were used to determine previous uses and occupancies of the subject property that are likely to have led to RECs in connection with the subject property. A chronological summary of historical data found, including but not limited to aerial photographs, historical city directories, Sanborn fire insurance maps, and agency records, is as follows:

Date Range	Subject Property Description and Occupancy (Historical Addresses)	Source(s)
Prior to 1890	Unknown use/Data failure; refer to Section 1.6.1	Sanborn maps, aerial photographs, city directories, agency records
1890-1911	Residential dwellings	Sanborn maps
1928-1939	Parking lot	Sanborn maps, city directories, aerial photographs
1945-1950	Car sale lot with a small office building and current carports, partially used for auto repair, tenants include Zane's Used Car Lot and Auto Repair	Aerial photographs, Sanborn maps
1952-Present	Current building constructed for commercial and retail use (2025-2039 University Street), identified tenants include various restaurants, beauty and nail salons, clothing stores, a violin shop, hardware store, tailor, window shop, and commercial offices	Aerial photographs, city directories, Sanborn maps, client-provided information, site observation

According to available historical sources, the subject property was occupied by Zane's Used Car Lot and Auto repair from at least 1945 until 1950, and auto repair operations were conducted in the western portion of the current car port building. The buildings were not present in 1939, and the subject property had been developed with the current improvements for retail use by 1952, indicating the auto repair/sales operations were only on-site for approximately 10 years. Based on the small quantities of hazardous materials typically associated with auto repair operations and short duration of use, this former tenant is not expected to represent a significant environmental concern.

If available, copies of historical sources are provided in Appendix D.

3.1 AERIAL PHOTOGRAPHS

AEI reviewed aerial photographs of the subject property and surrounding area. A search was made of the EDR collection of aerial photographs. Aerial photographs were reviewed for the following years (1939-2020, non-inclusive):

Year(s)	Subject Property Description	Adjoining Site Descriptions
1939, 1946, 1950	A parking lot, a small structure along south property boundary and the existing carport are visible by 1946	NORTH: Residential buildings EAST: Existing structure SOUTH: Roadway followed by existing structures WEST: Existing structure

Year(s)	Subject Property Description	Adjoining Site Descriptions
1958, 1963, 1968, 1974, 1982, 1993, 1998, 2005, 2009, 2012, 2020	Depicted with existing improvements	NORTH: Parking lot with residential dwellings to the northwest EAST: No significant changes SOUTH: No significant changes WEST: No significant changes

Subject property:

- No potential environmental concerns identified

Adjoining Site(s):

- No potential environmental concerns identified

3.2 Sanborn Fire Insurance Maps

Sanborn Fire Insurance maps were developed in the late 1800s and early 1900s for use as an assessment tool for fire insurance rates in urbanized areas. A search was made of the EDR collection of Sanborn Fire Insurance maps.

The following maps were reviewed (1890-1980, non-inclusive):

Year(s)	Subject Property Description (Listed Address)	Adjoining Site Descriptions
1890, 1894	Depicted with two dwellings and associated out buildings (14-16 University Avenue in 1890 and 54, 2021, 2025 University Avenue in 1894)	NORTH: Residential dwellings EAST: Residential dwellings SOUTH: University Avenue followed by a residential dwelling, hay barn, buggy house, water tank, and unimproved lots WEST: Depicted with unimproved land
1903	No significant changes depicted (2021, 2025 University Avenue)	NORTH: No significant changes EAST: No significant changes SOUTH: Depicted with University Avenue followed by a residential dwelling, wood yard with office and feed structure, larger structure labeled "hay, wood, and coal", the C.C. Water Company Yard with outbuilding and water tank, and an unimproved lot WEST: No significant changes
1911	No significant changes with exception that an additional residential dwelling and auto parking structure are depicted along north property boundary (2021, 2021.5, 2025 University Avenue)	NORTH: No significant changes EAST: No significant changes SOUTH: Depicted with University Avenue followed by a residential dwelling, feed and fuel structure, hay and fuel structure with offices, rooms, a storefront, and the People's Water Co. Pump House with oil tank along

Year(s)	Subject Property Description (Listed Address)	Adjoining Site Descriptions
		northern site boundary, several underground pipes are depicted emanating from the 2050 University Street site to University Avenue WEST: No significant changes
1929	Depicted with two unimproved lots (no assigned addresses)	NORTH: Depicted with a residential dwelling and boarding house EAST: Depicted with existing structure, occupied by four storefronts and a hotel with 48 rooms SOUTH: Depicted with University Street followed by existing structures, occupied by the UC Theater, a machine shop, a glazing shop, four storefronts, warehouse, storage, restaurant, and pump house WEST: Depicted with existing structure, occupied by five storefronts
1950	Depicted with an auto parking lot with an office and the existing carport structure along north property boundary which is occupied by an auto repair facility on west end (assigned address 2035 University Avenue)	NORTH: Additional residential buildings EAST: No significant changes SOUTH: Depicted with University Street followed by existing structures, occupied by the UC Theater, a machine shop, seven storefronts, and entrance passages WEST: Depicted with existing structure, occupied by two storefronts, a paint shop, and tire shop
1980	Depicted with existing structures, the south structure occupied by five storefronts and a passage, the north structure is used for parking of automobiles (addressed 2025-2039 University Avenue)	NORTH: Depicted with a parking lot and existing structures to northwest (occupied by residences) EAST: No significant changes SOUTH: Depicted with University Street followed by existing structures, occupied by the UC Theater, seven storefronts, a hotel, office, and entrance passages WEST: Depicted with existing structure, occupied by three storefronts and auto top shop

Subject property:

- Historical auto repair - Refer to Section 3.0

Adjoining Site(s):

- According to Sanborn maps reviewed, the adjoining property to the south included a feed and fuel and a hay and fuel buildings as we as an oil tank in 1911. These features are not depicted in the 1903 or 1929 Sanborn maps. Due to the duration since use, any residual impacts would have likely degraded and not represent a significant concern to the subject property. Based on this information and lack of a documented release, these features on the adjacent property are not expected to represent a significant environmental concern.

3.3 CITY DIRECTORIES

A search of historical city directories was conducted for the subject property utilizing EDR. Directories were reviewed in approximate five-year increments from 1920-2020, non-inclusive. The first listing for the subject property appeared in 1928. The following table summarizes the results of the city directory search for the subject property.

Subject Property

Year(s)	Address - Occupant Listed
1920, 1925, 1926	Subject property not listed
1928	2039 University Avenue - Albert Lily Morsa Auto Park
1932, 1933, 1938, 1940, 1943	Subject property not listed
1945	2035 University Avenue - Zane's Used Car Lot
1946	Subject property not listed
1950	2035 University Avenue - Zane's Used Car Lot and Auto Repairs
1951, 1954	Subject property not listed
1955	2029 University Avenue - Harry Williamson 2031 University Avenue - Prince Louis Rare Violins 2033 University Avenue - JW Milligan Imports 2035 University Avenue - Preview Maternity Shops 2037 University Avenue - Commercial Offices 2039 University Avenue - Hoo Chong & Co.
1956, 1959, 1960, 1962, 1965, 1967	Subject property not listed
1970	2029 University Avenue - Harry Williamson 2031 University Avenue - Berkeley Violin Center 2033 University Avenue - Custom Hi-Fi of Berkeley 2035 University Avenue - Dorothe Maternity Fashions 2037 University Avenue - Commercial Offices
1973	Subject property not listed
1975	2031 University Avenue - Berkeley Violin Center 2039 University Avenue - Basic Tool & Supply Co.
1976, 1979	Subject property not listed
1980	2029 University Avenue - Harry Williamson 2031 University Avenue - Berkeley Violin Center 2033 University Avenue - Leather Etc. 2035 University Avenue - Dorothe Maternity 2037 University Avenue - Commercial Offices 2039 University Avenue - Berkeley Shade Co.
1982, 1984	Subject property not listed
1986	2029 University Avenue - Harry Williamson

Year(s)	Address - Occupant Listed
	2031 University Avenue - Monterey Tailors 2033 University Avenue - Fantasy Escorts, Fantasy Foods, Fantasy Toys, Fantasy T-Shirts 2035 University Avenue - Berkeley Violin Center 2037 University Avenue - Commercial Offices 2039 University Avenue - Berkeley Shade Co.
1991	2029 University Avenue - Harry Williamson 2031 University Avenue - Monterey Tailors 2033 University Avenue - Fantasy T-Shirts 2035 University Avenue - Berkeley Violin Center 2037 University Avenue - Commercial Offices 2039 University Avenue - Berkeley Shade Co., Berkeley Shakespeare Festival
1992	2029 University Avenue - Harry Williamson 2031 University Avenue - Monterey Tailors 2033 University Avenue - Fantasy T-Shirts 2035 University Avenue - Berkeley Violin Center 2037 University Avenue - Commercial Offices 2039 University Avenue - Berkeley Shade Co.
1993	Subject property not listed
1995	2029 University Avenue - Occupant Unknown 2031 University Avenue - Monterey Tailors 2033 University Avenue - Fantasy T-Shirts 2035 University Avenue - Berkeley Violin Center 2037 University Avenue - Commercial Offices 2039 University Avenue - Berkeley Shade Co.
1996	2029 University Avenue - Commercial offices 2033 University Avenue - Fantasy T-Shirts 2037 University Avenue - Commercial Offices 2039 University Avenue - Berkeley Shade Co.
2000	2029 University Avenue - Commercial offices and occupant unknown 2031 University Avenue - Nail Image Complete Nail Care for Men and Women 2033 University Avenue - Fantasy T-Shirts

Year(s)	Address - Occupant Listed

The table below summarizes the search of historical city directories conducted for the adjoining sites. Refer to the appendices for a complete list of historical adjoining occupants identified during the review of city directories obtained from EDR.

Adjoining Sites

Direction	Address(es)	Potential Listings of Concern
North	2008-2020 Berkeley Way	None identified
East	2041-2049 University Avenue	None identified
South	2018-2048 University Avenue	None identified
West	2013-2021 University Avenue	PDreeke Auto Tires Sold on Installment Plan (2017 University Avenue, 1928) FN Woods Tires (2013 University Avenue, 1950)

Subject property:

- Historical auto repair - Refer to Section 3.0

Adjoining Site(s):

- A tire shop was formerly located at the adjacent property to the west between 1928 and 1950. Based on the small quantities of hazardous materials typically associated with these operations and lack of a documented release, this former adjacent property is not expected to represent a significant environmental concern.

3.4 Historical Topographic Maps

The subject property is located in a historically urban area. Due to the lack of additional pertinent information typically obtained during review of topographic maps in such areas, historical topographic maps were not reviewed as part of this assessment.

3.5 Chain of Title

Based on the quality of information obtained from other sources, a chain of title search was not performed as part of this assessment.

4.0 REGULATORY AGENCY RECORDS REVIEW

Local and state agencies, such as environmental health departments, fire prevention bureaus, and building and planning departments are contacted to identify any current or previous reports of hazardous substance use, storage, and/or unauthorized releases that may have impacted the subject property. In addition, information pertaining to AULs, defined as legal or physical restrictions, or limitations on the use of, or access to, a site or facility, is requested.

4.1 Local Environmental Health Department and/or State Environmental Agency

Agency	Date Contacted	Method of Contact	Name & Title of Contact	Agency Response
Alameda County Department of Environmental Health (ACDEH)	September 13, 2023	Email	ACDEH Staff	No records on file; refer to Berkeley Toxics

Agency	Date Contacted	Method of Contact	Name & Title of Contact	Agency Response
California Environmental Protection Agency (CalGEM)	September 24, 2023	Online	N/A	No records on file

4.2 Fire Department

Agency	Date Contacted	Method of Contact	Name & Title of Contact	Agency Response
City of Berkeley Toxics Management Division/Berkeley Fire Department (BTMD/ BFD)	September 13, 2023	Online	Cynthia McClellan	No hazardous substances records on file

4.3 Building Department

Agency	Date Contacted	Method of Contact	Name & Title of Contact	Agency Response
Berkeley Building and Safety Department (BBSD)	September 13, 2023	Online	Tiana Alnas-Benson	Response pending, refer to Section 1.5

Records Summary - EDR Lightbox Building Permits

Year(s)	Owner/Applicant	Description of Permit and Building Use
1995	None specified	Modify existing retail space at 2031, provide entry lobby and stair to 2029 University Avenue
1996	None specified	Modify existing canopy awning
2006	None specified	New meter for house meter
2007	None specified	Install new gas water heater and 2 new shampoo sinks for new hair salon
2019	Collins Roofing	Re-roof
2019	None specified	Install 28lb glass base underlayment and a certain modified bitumen

Evidence indicating current or prior use or storage of hazardous substances was not identified in the building permits available via EDR Lightbox.

4.4 Planning Department

Agency	Date Contacted	Method of Contact	Name & Title of Contact	Agency Response
Berkeley Planning and Development (BPDD)	September 13, 2023	Online	Tiana Alnas-Benson	No evidence indicating the existence of AULs on file for the subject property

4.5 Assessor's Office

Agency	Date Contacted	Method of Contact	Name & Title of Contact	Agency Response
Alameda County Assessor's Office	September 24, 2023	Online	N/A	Information obtained is discussed below

Records Summary

APN	57-2053-8-1
Acreage	2.84 acres
Construction Date	Not provided
Building Square Footage	Not provided
Current Owner	Not provided
Additional Information	According to information provided by the property owner, current ownership is vested in Mohammad, Kashani, Kobab Talai Etal since 2017, the building comprises 11,200 square feet in area, and was constructed in 1952.

4.6 Other Agencies Searched

Agency	Date Contacted	Method of Contact	Name & Title of Contact	Agency Response
CA State Water Resources Control Board (SWRCB) GeoTracker	September 24, 2023	Online	N/A	No records on file
SWRCB GeoTracker Historical Hazardous Substance Storage Information	September 24, 2023	Online	N/A	No records on file
CA Department of Toxic Substances Control (DTSC) Hazardous Waste Tracking System (HWTS)	September 24, 2023	Online	N/A	Records discussed below
CA DTSC EnviroStor	September 24, 2023	Online	N/A	No records on file
Bay Area Air Quality Management District (BAAQMD)	September 13, 2023	Online	Rochele Henderson, Public Records Section	No records on file

KTK Property, 2029 University Avenue, manifested 0.598 tons of asbestos-containing material in 1995, likely related to interior partition improvements. Based on the nature of the waste, the generation of hazardous waste at the subject property is not expected to represent a significant environmental concern.

4.7 Oil and Gas Wells

Agency	Date Referenced	Resource	Oil or gas wells located within 500 feet of the subject property
California Geologic Energy Management Division (CalGEM)	September 24, 2023	CalGEM Map	No

4.8 Oil and Gas Pipelines

Agency	Date Referenced	Resource	Pipelines located within 500 feet of the subject property
National Pipeline Mapping System (NPMS)	September 24, 2023	NPMS Public Map Viewer	No

4.9 State Environmental Superliens

In accordance with our approved scope of services, AEI did not assess whether the subject property is subject to any state environmental superliens.

4.10 State Property Transfer Laws

In accordance with our approved scope of services, AEI did not assess whether the subject property is subject to any state property transfer laws.

5.0 REGULATORY DATABASE RECORDS REVIEW

AEI contracted EDR to conduct a search of publicly available information from federal, state, tribal, and local databases containing known and suspected sites of environmental contamination and sites of potential environmental significance. Data gathered during the current regulatory database search is compiled by EDR into one regulatory database report. Location information for listed sites is designated using geocoded information provided by federal, state, or local agencies and commonly used mapping databases with the exception of "Orphan" sites. Due to poor or inadequate address information, Orphan sites are identified but not geocoded/mapped by EDR, rather, information is provided based upon vicinity zip codes, city name, and state. The minimum search distance from the federal and state environmental records database listings specified in the current ASTM Standard E1527 is included in Section 5.1. A copy of the regulatory database report, which includes detailed descriptions of the databases noted below as well as the total number of sites identified, is included in Appendix C of this report.

In determining if a listed site is a potential environmental concern to the subject property, AEI generally applies the following criteria to classify the site as lower potential environmental concern: 1) the site only holds an operating permit (which does not imply a release), 2) the site's distance from, and/or topographic position relative to, the subject property, and/or 3) the site has recently been granted "No Further Action" by the appropriate regulatory agency.

Regulatory database listings associated with the subject property, adjoining site(s) and/or nearby sites of concern that were determined to warrant additional discussion, if any, are identified and further discussed in Section 5.1.

5.1 RECORDS SUMMARY

Database	Search Distance (Miles)	Subject Property	Adjoining Site(s)	Other Nearby Sites of Concern
Federal NPL (Superfund) sites	1.0			
Federal Delisted NPL sites	0.5			
Federal CERCLA removals/orders sites	0.5			
Federal CERCLA sites with NFRAP	0.5			
Federal RCRA facilities undergoing Corrective Action	1.0			
Federal RCRA TSD facilities	0.5			
Federal RCRA generators (LQG, SQG, VSQG)	SP/ADJ		✔	
Federal RCRA NonGen/NLR sites	SP/ADJ		✔	
Federal IC/EC sites	SP			
Federal ERNS sites	SP			
State/tribal "Superfund" equivalent sites	1.0			
State/tribal hazardous waste facilities	0.5		✔	
State/tribal landfill and solid waste disposal facilities	0.5			
State/tribal leaking storage tanks	0.5			
State/tribal registered storage tanks	SP/ADJ			
State/tribal voluntary cleanup sites	0.5			

Database	Search Distance (Miles)	Subject Property	Adjoining Site(s)	Other Nearby Sites of Concern
State/tribal IC/EC registries	SP			
State/tribal brownfield sites	0.5			
Orphans	N/A			
Additional Environmental Record lists	SP/ADJ	✔	✔	

Facility Name	KTK Property
Address	2029 University Avenue, Berkeley
Distance & Direction	Subject Property
Hydrologic Position	N/A
Databases Listed	HAZNET, HWTS
Comments	TK Property, 2029 University Avenue, manifested 0.598 tons of asbestos-containing material waste in 1995, likely related to interior partition improvement discussed in Section 4.3. The waste is indicated as having been disposed of off-site at a landfill. Based on the nature of the waste, these listings are not expected to represent a significant environmental concern.

Facility Name	Bridge Housing Corporation, 2012 Berkeley Way
Address	2012 Berkeley Way, Berkeley
Distance & Direction	Adjoining to the north and northeast
Hydrologic Position	Up to cross-gradient
Databases Listed	CPS-SLIC, RCRA-LQG, HAZNET, HWTS, RCRA NONGEN/NLR
Comments	Closed CPS-SLIC Site Bridge Housing Corporation is associated with a Spills, Leaks, Investigations, and Cleanups (SLIC) site granted closure by Alameda County in 2022. The following case history is based on information available on the Geotracker database, including the case closure summary. Environmental investigations were required to evaluate impacts to the subsurface from historic land use and develop corrective actions relating to the recent development of 2012-2020 Berkeley Way. *Site Investigation Summary* A Phase II ESA was performed by Rincon in October 2018. Five soil borings (RB1/SV1) were advanced to a depth of 5 feet below ground surface (bgs) and soil and soil vapor samples were collected. The soil samples were analyzed for volatile organic compounds (VOCs), total petroleum hydrocarbons (TPH), and Title 22 metals and the soil vapor samples were analyzed for VOCs. Based on the laboratory analytical results, no further assessment of VOCs in soil vapor was warranted and no further assessment of VOCs or TPH in subsurface media was determined to be necessary. With the exception of lead, concentrations of metals detected in the soil did not exceed health risk screening levels or general background concentrations of metals in California soil. One soil sample contained lead at a concentration above the San Francisco Regional Water Quality Control Board Residential Environmental Screening Level (ESL) of 80 milligrams per kilogram (mg/kg). In June 2019, seven borings (RB1a, RB2a, RB3a, RB5a, RB6, RB7, and RB8) were advanced to a depth of 3 feet bgs. Soil samples were also collected from three borings advanced to 15 feet bgs as part of a geotechnical evaluation (GT1,

GT2, and GT3). Soil samples were analyzed for Title 22 metals and select samples were analyzed for soluble lead for waste characterization purposes. Three samples contained lead at concentrations over the residential ESL (RB2a, RB3a, and RB6); however, other detected metals were below their respective ESLs or within typical background concentrations. Based on the analytical results, soil in the vicinity of RB3a and RB6 was classified as California Hazardous Waste for the purpose of disposal. The presence of lead in soil was attributed to the demolition of the former on-site structures (that based on their age may likely have a history of lead-based paints), and/or from aerially-deposited lead (ADL) associated with the former use of leaded gasoline in vehicles and nearby roadways.

In August 2019, six borings (RB3b, RB3c, RB3d, RB6a, RB6b, RB9, RB10, and RB11) were advanced to a depth of 5 feet bgs and soil samples were analyzed for total lead and select samples were analyzed for soluble lead for waste characterization purposes. Four samples contained lead over the residential ESL (RB3c, RB3d [two samples], and RB6b). Based on the analytical results, soil in the vicinity of RB6b was classified as California hazardous waste; soil south of RB3a in the vicinity of RB3d was classified as Federal-hazardous waste.

In October 2019, 10 soil borings (RB3E, RB3D-S1, RB3D-S2, RB3D-SW1, RB3D W1, RB3D-NW1, RB3D-W2, RB3D-SW2, RB3D-W3, and RB3D-NW2) were advanced to a depth of up to 6 feet bgs and soil samples were analyzed for total lead and select samples were analyzed for soluble lead. Six samples contained lead above the residential ESL (RB3E, RB3D-S1, RB3D-S2, RB3D SW1, RB3D-W2, and RB3D-SW2). Based on the analytical results, soils in the southeastern corner of the site in the vicinity of RB3D-SW1 are generally classified as California-hazardous waste.

Soil vapor sampling was performed at the site in February, April, and May 2020. One soil vapor probe, SV-12, was installed approximately 15 to 20 feet north of the subject property and sampled in February and April 2020. In February 2020, TPHg was detected in temporary vapor probe SV-12 from 5 feet bgs at 654 micrograms per cubic meter (ug/m3) and from 15 feet bgs at 13,497 ug/m3. In February 2020, benzene was detected in temporary vapor probe SV-12 from 5 feet bgs at 5.9 ug/m3 and from 15 feet bgs at 28.4 ug/m3. In April and May 2020, Benzene was not detected in permanent vapor probe SV-12A from 5 feet bgs. Figure 4 from the 2020 Soil Vapor Monitoring Report depicts the Benzene soil vapor plume undefined to the south toward the subject property in excess of 10 ug/m3. Benzene detected from SV-12 in February 2020 were in excess of the Regional Board residential vapor intrusion ESL of 3.2 ug/mg and the detection from 15 feet bgs was in excess of the Regional Board commercial/ industrial vapor intrusion ESL.

Based on the laboratory analytical results from the February, April, and May 2020 soil vapor sampling events, Rincon concluded that the concentrations of VOCs detected in the April and May sampling events were consistent with or lower than the concentrations detected February 2020. In addition, Rincon indicated VOCs (other than benzene, which has been attributed by ACDEH to regional groundwater impacts) were not present in sub-surface soil vapor at a concentration that would present a potential health risk for residential land uses. Therefore, Rincon contended that soil vapor mitigation engineering controls was not recommended as part of redevelopment of the subject property. Further, the April and May 2020 sampling data was provided to the ACDEH in advance of this report. In a meeting on June 1, 2020, ACDEH indicated that they concur that a soil vapor barrier was not required; however,

they recommended that trench dams be installed at the property line for all utilities entering the property from off-site to mitigate for potential vapor intrusion from off-site sources.

Corrective Action Summary

In July 2021 soil containing lead at concentrations above the site clean-up goal of 80 mg/kg was excavated and disposed of off-site at a licensed disposal facility. Approximately 90 cubic yards were disposed of as Federal hazardous waste and approximately 900 cubic yards were disposed of as California hazardous waste. Confirmation soil samples were collected from the sidewalls and bottom of the excavations and confirmed soil exceeding the clean-up goals was removed. An excavation was performed in the area of vapor probes SV-12 and SV-12a. This excavation area is denoted as Cal Haz Area 4. On July 20 and July 21, 2020, Cal Haz 4 was excavated to a depth of 4 feet bgs, and initial confirmation soil samples (#85 through #115) were analyzed. One initial sidewall sample (#100) exceeded the site cleanup goal; therefore, one additional lateral excavation was advanced into the sidewall at that location. The concentration in the confirmation sample collected from the stepped-out sidewall (#101) was below the site clean-up goal; therefore, the remedial excavation was considered complete.

In August 2020, a 3-foot diameter brick cylindrical cavity was encountered during construction activities and determined to be either a historical well or privy. The structure was excavated to the depth required for construction (i.e., 5 feet bgs) and the soil was disposed off-site as California-hazardous waste. Confirmation soil samples were collected from the excavation sidewalls and the bottom of the inside of the well/privy and analyzed for VOCs, semivolatile organic compounds (SVOCs), TPH, and metals. VOCs, SVOCs, and TPH were not detected. Lead from the sample taken within the well/privy exceeded the site clean-up goal; however, the concentrations in the excavation sidewall samples were below the clean-up goal. Other metals were either below their respective ESLs or within typical background ranges. Based on the analytical results, the lead-impacted soil was limited to the area within the well/privy structure. To demarcate the location of the well/privy, a 5-foot-by-5-foot piece of orange construction fencing was placed on the excavation bottom centered on the well/privy prior to backfilling of the excavation with clean soil sourced from on-site.

Four trench dams were installed at the property line for utilities coming from off-site to prevent potentially impacted soil vapor from off-site sources from migrating onto the site. Trench dams were installed from March 2021 through March 2022 and were constructed of slurry backfill.

Following remedial excavation and trench dam work, the ACDEH concluded that the residual subsurface contamination at the site presented a low risk to human health and the environment and granted for the current residential land use.

Based on the closed regulatory status and excavation of lead and benzene-impacted soil to a depth of 4 feet bgs immediately north of the subject property, the closed SLIC case is not expected to represent a significant environmental concern at this time. However, as previously noted, petroleum impacts are attributed to a regional benzene plume. No details regarding this plume is available, and it is unclear if it is present beneath the subject property, but due to the historical use of the subject property primarily for

	retail, residential, and/or car park purposes, it is unlikely the subject property owner would be responsible for any future assessment or remediation activities. Additionally, as shallow soil vapor samples collected from the subject property vicinity have consistently been below commercial/industrial ESLs (and non detect in the most recent sampling events), it does not appear that the potential benzene impacts represent a vapor intrusion risk to subject property occupants, and no further action appears warranted at this time. However, if the subject property is redeveloped for residential use in the future, additional sampling and/or mitigation efforts may be required. Other listings Separate to the closed SLIC case, Bridge Housing Corporation is listed as having manifested 1,395 tons of contaminated soil from site cleanup in 2020, likely related to excavation activities discussed above. 2012 Berkeley Way is listed as a large-quantity generator (RCRA-LQG) of RCRA waste filed in 2020 and is not associated with records of evaluations or violations. Per the RCRA-LQG listing, the facility is associated with lead waste, likely related to excavation activities discussed above.

5.2 Vapor Migration

A vapor encroachment condition (VEC) is the presence or likely presence of Chemical(s) of Concern (COC) vapors in the vadose zone of the subject property caused by the release of vapors from contaminated soil and/or groundwater either on or near the subject property.

AEI conducted a limited screening for potential VECs that may affect the subject property. The VEC screening focused on the current and historical usage of the subject property and also utilized the aforementioned regulatory agency database report provided by EDR to evaluate identified Chemicals of Concern (COCs), including petroleum hydrocarbons.

Determination of AOC

To identify the area of concern (AOC) for contaminated sites with non-petroleum hydrocarbon COCs, AEI utilized the approximate minimum search distance defined by the current ASTM E2600 of 1,760 feet (1/3 mile) from the subject property boundary for COC-contaminated sites. For sites contaminated with petroleum hydrocarbon COCs, AEI utilized the AOC approximate minimum search distance of 528 feet (1/10 mile). The AOC was adjusted accordingly based on review of physical setting characteristics, known release information, property and land features, groundwater flow direction, and soil type, et al.

ASTM's Vapor Encroachment guidance indicates that when groundwater flow direction can be estimated or determined, the cross-gradient or downgradient radius distances can be significantly reduced. AEI calculated the reduced AOC distances when considering groundwater flow direction by utilizing the following default distances, which were determined using the Buonicore Methodology:

Non-petroleum hydrocarbon COCs:

- 1,760 feet in the upgradient direction
- 365 feet in the cross-gradient direction

- 100 feet in the downgradient direction

Petroleum hydrocarbon COCs if Light, Non-Aqueous Phase Liquid, (LNAPL, i.e. floating product) is suspected:

- 528 feet in the upgradient direction
- 165 feet in the cross-gradient direction
- 100 feet in the downgradient direction

Petroleum hydrocarbon COCs if LNAPL is *not* suspected:

- 528 feet in the upgradient direction
- 95 feet in the cross-gradient direction
- 30 feet in the downgradient position

Additional adjustment of the AOC may be conducted based on AEI's professional judgment.

Conclusions

AEI did not identify evidence of a VEC.

5.3 Emerging Contaminants

As defined in Section 3.2.36 of the current ASTM Standard E1527, hazardous substance means "those substances defined as a hazardous substance pursuant to CERCLA 42 USC § 9601(14), as interpreted by EPA regulations and the courts." There are some substances that non-environmental professionals and others may assume to be hazardous substances that are not defined (or not yet defined) as hazardous substances under CERCLA, through interpretation by EPA regulations and the courts. These substances may include: (i) some substances that occur naturally or through biological digestion (for example, methane), and (ii) substances about which human understanding is evolving (for example, per- and polyfluoroalkyl substances, also known as "PFAS"). These and any other "emerging contaminants," where they are not identified as a hazardous substance by CERCLA, as interpreted by EPA regulations and the courts, are not included in the scope of this standard. Some of these substances may be considered a "hazardous substance" (or equivalent) under applicable state laws. In those instances, where a Phase I ESA is performed to satisfy both federal and state requirements, or as directed by the user of the report, it is permissible to include analysis and/or discussion of these substances, in the same manner as any other Non-Scope Consideration. If and when such emerging contaminants are defined to be a hazardous substance under CERCLA, as interpreted by EPA regulations and the courts, such substances shall be evaluated within the scope of this standard.

It should be noted that AEI's limited PFAS screening is based solely on review of the resources cited. Identification, or lack thereof, is not a warranty that PFAS contamination is present or absent at a site. Additionally, it should be noted that given the evolving nature of science and regulatory oversight of PFAS, additional sources of PFAS contamination may exist at the subject property, adjoining sites and/or other nearby sites not identified by the limited screening tools reviewed.

5.3.1 PFAS-Related Regulatory Database Listings

As an initial screening tool for potential PFAS contamination, AEI reviewed PFAS-related database listings from EDR.

Source	Subject Property Identified	Adjoining Site(s) Identified	Other Nearby Site(s) of Concern Identified	Comments
EDR PFAS Regulatory Database Listing(s)				No listings warranting discussion were identified

6.0 INTERVIEWS AND USER PROVIDED INFORMATION

6.1 INTERVIEWS

Pursuant to the current ASTM Standard E1527, the following interviews were performed during this assessment in order to obtain information indicating RECs in connection with the subject property.

6.1.1 OWNER AND KEY SITE MANAGER

Relation to Property	Name	Date Interviewed	Method of Contact	Year First Associated w/ Property	Notes
Owner/Owner Representative	Talai Mohammad E & Kokab S Trs & Kashani Mans Etal	September 22, 2023	In Person	2017	Owner is acting Key Site Manager; see Interview Summary table below
Key Site Manager	Ms. Sima Talai	September 22, 2023	In Person	2017	Interviewed; see Interview Summary table below

INTERVIEW SUMMARY

Question	Owner (Representative)/Key Site Manager Response/ Comment
Do you have any knowledge of USTs, clarifiers or oil/water separators, sumps, or other subsurface features?	No
Do you have any knowledge of previous environmental investigations conducted on site?	No
Do you have any knowledge of current or past industrial operations and/or other operations which would involve the use of hazardous substances and/ or petroleum products?	No
Are you aware of any known plans for site redevelopment or change in site use?	No
Are you aware of any pending, threatened, or past litigation relevant to hazardous substances or petroleum products in, on, at, or from the subject property?	No
Are you aware of any pending, threatened or past administrative proceedings relevant to hazardous substances or petroleum products in, on, at, or from the subject property?	No
Are you aware of any notices from any governmental entity regarding any possible violation of environmental laws or possible liability relating to hazardous substances or petroleum products?	No
Are you aware of any incidents of flooding, leaks, or other water intrusion, and/or complaints related to indoor air quality?	No

According to information provided by the property owner, current ownership is vested in Mohammad, Kashani, Kobab Talai Etal since 2017, the building comprises 11,200 square feet in area, and was constructed in 1952. Ms. Talai was not aware of any environmental conditions or former tenants of concern associated with the site.

6.1.2 Past Owners, Operators, and Occupants

AEI did not attempt to interview past owners, operators, and occupants of the subject property because information from these sources would likely be duplicative of information already obtained from other sources.

6.1.3 Interview with Others

Information obtained during interviews with local government officials is incorporated into the appropriate segments of this report.

6.2 User Provided Information

User provided information is intended to help identify the possibility of RECs in connection with the subject property. According to the current ASTM Standard E1527 and the EPA Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), certain items should be researched by the prospective landowner or grantee, and the results of such inquiries may be provided to the Environmental Professional. The responsibility for qualifying for LLPs by conducting the inquiries ultimately rests with the User, and providing the information to the Environmental Professional would be prudent if such information is available.

The User did not complete the ASTM User Questionnaire or provide the User information to AEI. AEI assumes that qualification for the LLPs is being established by the User in documentation outside of this assessment.

Question	Response/ Comment
1. Environmental liens that are filed or recorded against the property (40 CFR 312.25) Did a search of recorded land title records (or judicial records where appropriate) identify any environmental liens filed or recorded against the property under federal, tribal, state or local law?	Information not provided
2. Activity and use limitations that are in place on the property or that have been filed or recorded against the property (40 CFR 312.26(a)(1)(v) and vi)). Did a search of recorded land title records (or judicial records where appropriate) identify any AULs, such as engineering controls, land use restrictions or institutional controls that are in place at the property and/or have been filed or recorded against the property under federal, tribal, state or local law?	Information not provided
3. Specialized knowledge or experience of the person seeking to qualify for the LLP (40 CFR 312.28). Do you have any specialized knowledge or experience related to the property or nearby properties? For example, are you involved in the same line of business as the current or former occupants of the property or an adjoining property so that you would have specialized knowledge of the chemicals and processes used by this type of business?	Information not provided
4. Relationship of the purchase price to the fair market value of the property if it were not contaminated (40 CFR 312.29). Does the purchase price being paid for this property reasonably reflect the fair market value of the property? If you conclude that there is a difference, have you considered whether the lower purchase price is because contamination is known or believed to be present at the property?	Information not provided

Question	Response/ Comment
5. Commonly known or reasonably ascertainable information about the property (40 CFR 312.30). Are you aware of commonly known or reasonably ascertainable information about the property that would help the environmental professional to identify conditions indicative of releases or threatened releases? For example: (a) Do you know the past uses of the property? (b) Do you know of specific chemicals that are present or once were present at the property? (c) Do you know of spills or other chemical releases that have taken place at the property? (d) Do you know of any environmental cleanups that have taken place at the property?	Information not provided
6. The degree of obviousness of the presence or likely presence of contamination at the property, and the ability to detect the contamination by appropriate investigation (40 CFR 312.31). Based on your knowledge and experience related to the property, are there any obvious indicators that point to the presence or likely presence of contamination at the property?	Information not provided

6.3 Previous Reports and Other Provided Documentation

No prior reports or other relevant documentation in association with the subject property was made available to AEI during the course of this assessment.

6.4 Environmental Lien and AUL Search

In accordance with our approved scope of services, an environmental lien search was not performed as part of this assessment.

7.0 SITE RECONNAISSANCE

Site Reconnaissance Date	September 22, 2023
AEI Site Assessor(s)	Adrian Angel
Property Escort(s)/ Relationship(s) to Property	Mr. Sima Talai/Property Owner
Units/Areas Observed	See Tenant Information table in Section 2.1
Area(s) not accessed and reason(s)	None
Other Physical Constraints	• Volume of stored materials Refer to Section 1.5 for discussion of limiting condition(s)
General Observations	The subject property is presently improved with a two-story commercial structure occupied by a nail salon, hair salon, clothing store, thrift shop, window store, and second-story commercial offices. In addition, the subject property is improved with a one-story carport structure along the north property boundary and a rear parking lot. The subject property structure was constructed in 1952, while the carport structure is visible as early as 1946 in aerial photographs.

Reconnaissance Findings Summary

Feature	Observed on Subject Property (see Section 7.1)	Observed on Adjoining Property (see Section 7.2)
Regulated Hazardous Substances/Wastes and/or Petroleum Products in Connection with Property Use (including drums, totes, and intermediate bulk containers)		
Aboveground/Underground Hazardous Substance or Petroleum Product Storage Tanks (ASTs/USTs)		
Hazardous Substance and Petroleum Product Containers Not in Connection with Property Use		
Unidentified Substance Containers		
Electrical or Mechanical Equipment Likely to Contain Fluids	✔	
Interior Stains or Corrosion		
Strong, Pungent, or Noxious Odors		
Pools of Liquid		
Drains, Sumps, and Clarifiers	✔	✔
Pits, Ponds, and Lagoons		
Stained Soil or Pavement	✔	
Stressed Vegetation		
Solid Waste Disposal or Evidence of Fill Materials		
Waste Water Discharges		
Wells		
Septic Systems or Cesspools		
Biomedical Wastes		
Other	✔	

7.1 SUBJECT PROPERTY RECONNAISSANCE FINDINGS

During the site reconnaissance, AEI observed the items listed in the above Reconnaissance Findings Summary table, which are further discussed below.

7.1.1 Electrical or Mechanical Equipment Likely to Contain Fluids

Toxic PCBs were commonly used historically in electrical equipment such as transformers, fluorescent lamp ballasts, and capacitors. According to United States EPA regulation 40 CFR Part 761, there are three categories for classifying such equipment: <50 ppm of PCBs is considered "Non-PCB"; between 50 and 500 ppm is considered "PCB-Contaminated"; and >500 ppm is considered "PCB-Containing." Pursuant to 15 U.S.C. 2605(e)(2)(A), the manufacture, process, or distribution in commerce or use of any polychlorinated biphenyl in any manner other than in a totally enclosed manner was prohibited after January 1, 1977.

Elevators

The subject property building is equipped with a hydraulic elevator. The hydraulic fluid contained within elevator systems can potentially contain toxic PCBs. Based on the construction date of the building (pre-1978), the potential exists that hydraulic fluid within the equipment may have contained PCBs. The equipment for the elevator is located on the second floor. No evidence of stains or leaks was observed at the base of the equipment during the site reconnaissance. The elevator is reportedly maintained by Otis. Based on the good condition and regular maintenance of the elevator, it is not expected to represent a significant environmental concern.

7.1.2 Drains, Sumps, and Clarifiers

Storm drains were observed in the parking area of the subject property. AEI did not observe evidence of hazardous substances or petroleum products in the vicinity of the drains. Based on the use of the drains solely for storm water runoff, the presence of the drains is not expected to represent a significant environmental concern.

7.1.3 Stained Soil and Pavement

Minor amounts of oily surface staining were observed in the parking lot and carport. The staining appears to be from leaking vehicles and is surficial in nature. Based on the small size and the surficial nature of the staining, it is not expected to represent a significant environmental concern.

7.1.4 Other

Building maintenance supplies (paints, lacquers, cleaning detergents, etc.) are stored in the subject property building and carport structure. All chemicals were packaged in consumer quantities. Based on the nature of these materials, the presence of cleaning supplies at the subject property is not expected to represent a significant environmental concern.

7.2 Adjoining Property Reconnaissance Findings

During the site reconnaissance, AEI observed the items listed in the above Reconnaissance Findings Summary table, which are further discussed below.

7.2.1 Drains, Sumps, and Clarifiers

Several storm drains were observed in the parking areas of the adjoining properties and adjoining roadways. AEI did not observe evidence of hazardous substances or petroleum products in the vicinity of the drains. Based on the use of the drains solely for storm water runoff, the presence of the drains is not expected to represent a significant environmental concern.

8.0 NON-ASTM SERVICES

8.1 ASBESTOS-CONTAINING BUILDING MATERIALS

Asbestos is the name for a group of naturally occurring silicate minerals that can be separated into fibers. The fibers are strong, durable, and resistant to heat and fire. They are also long, thin and flexible, so they can even be woven into cloth. Because of these qualities, asbestos has been used in thousands of consumer, industrial, maritime, automotive, scientific and building products. During the 20th century, some 30 million tons of asbestos have been used in industrial sites, homes, schools, shipyards and commercial buildings in the United States. Commercial use of ACM began in the early 1900s and peaked in the period between 1940 and into the 1970s. Common ACMs include pipe-covering, insulating cement, insulating block, refractory and boiler insulation materials, transite board, fireproofing spray, joint compound, vinyl floor tile, ceiling tile, mastics, roofing products, and duct insulation for HVAC applications. Inhalation of asbestos fibers can result in deleterious health effects.

The potential for ACM was evaluated based the United States EPA Guidance Document: Managing Asbestos in Place - A Building Owner's Guide to Operations and Maintenance Programs for Asbestos-Containing Materials (the Green Book). In 1973 the NESHAPS banned the use of most spray-applied surfacing ACM, specifically asbestos containing spray-on fireproofing and insulation. Subsequent revisions to this regulation in 1975 and 1978 effectively eliminated the use of friable pre-molded pipe, boiler, turbine, and duct insulation; and the spray application of friable asbestos-containing materials for all uses in buildings. In 1989 the EPA issued regulations to ban some asbestos-containing products and phase out most others over a multi-year period. The "Ban and Phase-Down" rule was challenged in court and the regulation remanded to the agency. As a result, any asbestos-containing products then "in commerce" would not be banned. Those not in commerce would be banned. Those materials "banned" could not be sold. It did not affect such materials already installed, or in use. Most US firms voluntarily ceased production of asbestos containing building materials not covered by the aforementioned Federal bans by the mid-1980s. In 1994, the OSHA determined that employers and building owners are required to treat installed thermal system installation and sprayed on and troweled-on surfacing materials, as well as vinyl or asphalt flooring material, as ACM in buildings constructed no later than 1980 until tested by laboratory analysis to prove otherwise.

The information below is for general informational purposes only and does not constitute an asbestos survey. In addition, the information is not intended to comply with federal, state or local regulations in regards to ACM.

Due to the age of the subject property building, there is a potential that ACMs are present. A limited list of typical suspect ACMs is included in the following table:

Material Type	Location
Plaster (acoustical and smooth)	Walls and ceilings
Ceiling tile	Ceiling systems
Thermal systems insulations, packings, and gaskets	Heating systems, cooling systems, domestic and heating and cooling piping, ductwork, and other equipment
Floor tile and associate mastics, flooring felts, and papers (under hardwood/other)	Floors
Vinyl sheet flooring and adhesives	Floors
Cove base and associated mastics	Walls
Ceramic tile adhesives and grouts	Walls, floors, and ceilings
All adhesives	Mirrors, wall coverings, construction, etc.

Grout and caulking	Windows and doors
Gypsum board, tape, and joint compound	Wall and ceiling systems
Insulation materials	Walls, ceilings, and attic spaces
Roofing materials (felts, rolled, shingle, flashings, adhesives, tar, and insulations)	Roof and parapet wall systems
Brick and block, mortars	Walls

The observed suspect ACMs at the subject property were in good condition at the time of the site reconnaissance and are not expected to pose a health and safety concern to the occupants of the subject property at this time. Based on the potential presence of ACMs, AEI recommends the implementation of an O&M Plan which stipulates that the repair and maintenance of damaged materials should be performed to protect the health and safety of the building occupants. In the event that building renovation or demolition activities are planned, a thorough asbestos survey to identify asbestos-containing building materials is required in accordance with the EPA NESHAP 40 CFR Part 61 prior to demolition or renovation activities that may disturb suspect ACMs.

8.2 Lead-Based Paint

Lead-based paint (LBP) is defined as any paint, varnish, stain, or other applied coating that has ≥1 mg/cm² (5,000 µg/g or 5,000 ppm) or more of lead by federal guidelines; state and local definitions may differ from the federal definitions in amounts ranging from 0.5 mg/cm² to 2.0 mg/cm². Section 1017 of the Housing and Urban Development (HUD) Guidelines, Residential Lead-Based Paint Hazard Reduction Act of 1992, otherwise known as "Title X," defines a LBP hazard as "any condition that causes exposure to lead that would result in adverse human health effects" resulting from lead-contaminated dust, bare, lead-contaminated soil, and/or lead-contaminated paint that is deteriorated or present on accessible, friction, or impact surfaces. Therefore, under Title X, intact LBP on most walls and ceilings would not be considered a "hazard," although the paint should be maintained and its condition monitored to ensure that it does not deteriorate and become a hazard. Additionally, Section 1018 of this law directed HUD and EPA to require the disclosure of known information on LBP and LBP hazards before the sale or lease of most housing built before 1978. Most private housing, public housing, or federally owned or subsidized housing is affected by this rule.

Under OSHA, lead-containing paint (LCP) is defined as any paint with any detectable amount of lead present in it. Therefore, all LBP is considered LCP. Conversely, LCP may not meet the criteria to be considered LBP in accordance with HUD guidelines or some states' definition of LBP.

It is important to note that LCP may create a lead hazard when being removed. The condition of these materials must be monitored when they are being disturbed. In the event LCP is subject to abrading, sanding, torching, and/or cutting during demolition or renovation activities, there may be regulatory issues that must be addressed.

The information below is for general informational purposes only and does not constitute a lead hazard evaluation. In addition, the information is not intended to comply with federal, state, or local regulations in regards to LBP.

In buildings constructed after 1978, it is unlikely that LBP is present; however, some paints utilized after 1978 will be LCP under OSHA. Structures built prior to 1978 and especially prior to the 1960s should be expected to contain LBP.

Due to the age of the subject property building, there is a potential that LBP is present. All observed painted surfaces were in good condition and are not expected to pose a health and safety concern to the occupants of the subject property at this time. Local regulations may apply to LBP in association with building demolition/renovations and worker/occupant protection. Actual material samples would need to be collected or an XRF survey performed in order to determine if LBP is present. It should be noted that construction activities that disturb materials or paints containing any amount of lead may be subject to certain requirements of the OSHA lead standard contained in 29 CFR 1910.1025 and 1926.62.

8.3 Naturally-Occurring Radon

Radon is a naturally-occurring, odorless, and invisible radioactive gas. According to the United States EPA, radon is the second leading cause of lung cancer. Natural radon levels vary and are closely related to geologic formations, soils, and foundation construction. Radon may enter buildings through basement sumps or other openings such as cracks and other holes in foundations.

US EPA Map

In 1993 the United States EPA prepared a map to assist National, State, and local organizations to target their resources and to implement radon-resistant building codes. The map identifies counties of the US with the greatest potential for elevated indoor radon levels based on indoor radon measurement data, geology, soil parameters, and foundation types. The map divides the country into three radon zones based on potential radon accumulation, but is not to be considered predictive of radon accumulation.

The 1993 EPA map identifies the following three radon zones:

- Zone 1 - Highest potential for radon accumulation; average indoor radon levels may be greater than 4 pCi/L
- Zone 2 - Moderate potential for radon accumulation; average indoor radon levels may be between 2 and 4 pCi/L
- Zone 3 - Low potential for radon accumulation; average indoor radon levels may be less than 2 pCi/L

It is important to note that elevated levels of radon can be found in all three zones, and the EPA and other agencies recommend site-specific testing to determine radon levels at a specific property. Therefore, while the map does give an indication of the propensity of radon gas accumulation in structures in a county, elevated radon levels may be found in all three radon zones.

It should also be noted that EPA's 1993 Map of Radon Zones, while useful, was based on limited data collected prior to 1993 and therefore may be supplemented with available state-developed or other data to further understand the radon potential for a specific area.

According to the US EPA, the radon zone level for the County is Zone 2, which has a moderate potential for radon accumulation.

Radon sampling would be necessary to determine site-specific radon conditions. Radon sampling was not requested as part of this assessment.

8.4 Suspect Mold or Microbial Growth Conditions

Molds are simple microscopic organisms which can often be seen in the form of discoloration, frequently green, gray, white, brown, or black. When excessive moisture or water accumulates indoors, mold growth may occur, particularly if the moisture problem remains undiscovered or unaddressed. As such, interior areas of buildings characterized by poor ventilation and high humidity are the most common locations of mold growth. Building materials, including drywall, wallpaper, baseboards, wood framing, insulation, and carpeting, often play host to such growth. Mold spores primarily cause health problems through the inhalation of spores or the toxins they emit when they are present in large numbers. This can occur when there is active mold growth within places where people live or work.

Mold, if present, may or may not visually manifest itself. Neither the individual completing this inspection, nor AEI has any liability for the identification of mold-related concerns except as defined in applicable industry standards. In short, this Phase I ESA should not be construed as a mold survey or inspection.

This activity was not designed to discover all areas which may be affected by mold growth on the subject property. Rather, it is intended to give the client an indication if significant (based on observed areas) mold growth is present at the subject property. Potential areas of mold growth, such as in pipe chases, HVAC systems, and behind enclosed walls and ceilings, were not observed as part of this limited assessment.

AEI observed interior areas of the subject property building to identify the potential presence of mold. AEI did not note obvious visual or olfactory indications of the presence of mold, nor did AEI observe obvious indications of significant water damage. As such, no bulk sampling of suspect surfaces was conducted as part of this assessment and no additional action with respect to suspect mold appears to be warranted at this time.

9.0 SIGNATURE OF ENVIRONMENTAL PROFESSIONALS

We declare that, to the best of our professional knowledge and belief, we meet the definition of Environmental Professional as defined in § 312.10 of 40 CFR Part 312.

We have the specific qualifications based on education, training, and experience to assess a property of the nature, history and setting of the subject property. We have developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E1527 - 21), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E2247 - 16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E1528 - 22) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

EXECUTIVE SUMMARY

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal RCRA facilities undergoing Corrective Action

CORRACTS: CORRACTS is a list of handlers with RCRA Corrective Action Activity. This report shows which nationally-defined corrective action core events have occurred for every handler that has had corrective action activity.

A review of the CORRACTS list, as provided by EDR, and dated 07/24/2023 has revealed that there is 1 CORRACTS site within approximately 1 mile of the target property.

Lists of Federal RCRA generators

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 07/24/2023 has revealed that there are 4 RCRA-LQG sites within approximately 0.25 miles of the target property.

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 07/24/2023 has revealed that there are

EXECUTIVE SUMMARY

Lists of state- and tribal (Superfund) equivalent sites

RESPONSE: Identifies confirmed release sites where DTSC is involved in remediation, either in a lead or oversight capacity. These confirmed release sites are generally high-priority and high potential risk.

A review of the RESPONSE list, as provided by EDR, has revealed that there is 1 RESPONSE site within approximately 1 mile of the target property.

Equal/Higher Elevation	Address	Direction / Distance	Map ID	Page

Lists of state- and tribal hazardous waste facilities

ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the ENVIROSTOR list, as provided by EDR, and dated 04/24/2023 has revealed that there are 4 ENVIROSTOR sites within approximately 1 mile of the target property.

EXECUTIVE SUMMARY

Lists of state and tribal leaking storage tanks

LUST: Leaking Underground Storage Tank (LUST) Sites included in GeoTracker. GeoTracker is the Water Boards data management system for sites that impact, or have the potential to impact, water quality in California, with emphasis on groundwater.

A review of the LUST list, as provided by EDR, has revealed that there are 53 LUST sites within approximately 0.5 miles of the target property.

EXECUTIVE SUMMARY

CPS-SLIC: Cleanup Program Sites (CPS; also known as Site Cleanups [SC] and formerly known as Spills, Leaks, Investigations, and Cleanups [SLIC] sites) included in GeoTracker. GeoTracker is the Water Boards data management system for sites that impact, or have the potential to impact, water quality in California, with emphasis on groundwater.

A review of the CPS-SLIC list, as provided by EDR, has revealed that there are 5 CPS-SLIC sites within approximately 0.5 miles of the target property.

Lists of state and tribal registered storage tanks

UST: The Underground Storage Tank database contains registered USTs. USTs are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA). The data come from the State Water Resources Control Board's Hazardous Substance Storage Container Database.

A review of the UST list, as provided by EDR, has revealed that there are 3 UST sites within approximately 0.25 miles of the target property.

Local Lists of Registered Storage Tanks

SWEEPS UST: Statewide Environmental Evaluation and Planning System. This underground storage tank listing was updated and maintained by a company contacted by the SWRCB in the early 1990's. The listing is no longer updated or maintained. The local agency is the contact for more information on a site on the SWEEPS list.

A review of the SWEEPS UST list, as provided by EDR, and dated 06/01/1994 has revealed that there are 13 SWEEPS UST sites within approximately 0.25 miles of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 07/24/2023 has revealed that there are 85 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

FUSRAP: DOE established the Formerly Utilized Sites Remedial Action Program (FUSRAP) in 1974 to remediate sites where radioactive contamination remained from Manhattan Project and early U.S. Atomic Energy Commission (AEC) operations.

A review of the FUSRAP list, as provided by EDR, and dated 03/03/2023 has revealed that there is 1 FUSRAP site within approximately 1 mile of the target property.

Equal/Higher Elevation	Address	Direction / Distance	Map ID	Page
UNIVERSITY OF CALIFO	1 CYCLOTRON ROAD	ENE 1/2 - 1 (0.933 mi.)	AO234	1168
Site Status: Eliminated from consideration under FUSRAP. The locations where AEC work was performed are now part of Lawrence Berkeley National Laboratory (Berkeley Lab). Site ID: CA 05				

PFAS ECHO: Regulators and the public have expressed interest in knowing which regulated entities may be using PFAS. EPA has developed a dataset from various sources that show which industries may be handling PFAS. Approximately 120,000 facilities subject to federal environmental programs have operated or currently operate in industry sectors with processes that may involve handling and/or release of PFAS.

A review of the PFAS ECHO list, as provided by EDR, and dated 03/30/2023 has revealed that there are 2 PFAS ECHO sites within approximately 0.25 miles of the target property.

EXXONMOBIL OIL CORPO		WSW 1/8 - 1/4 (0.190 mi.)	Q146	642

Cortese: The sites for the list are designated by the State Water Resource Control Board (LUST), the Integrated Waste Board (SWF/LS), and the Department of Toxic Substances Control (Cal-Sites).

A review of the Cortese list, as provided by EDR, and dated 06/14/2023 has revealed that there are 45 Cortese sites within approximately 0.5 miles of the target property.

EXECUTIVE SUMMARY

DRYCLEANERS: A list of drycleaner related facilities that have EPA ID numbers. These are facilities with certain SIC codes: power laundries, family and commercial; garment pressing and cleaners' agents; linen supply; coin-operated laundries and cleaning; drycleaning plants except rugs; carpet and upholster cleaning; industrial launderers; laundry and garment services.

A review of the DRYCLEANERS list, as provided by EDR, has revealed that there is 1 DRYCLEANERS site within approximately 0.25 miles of the target property.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station,

EXECUTIVE SUMMARY

service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there are 9 EDR Hist Auto sites within approximately 0.125 miles of the target property.

EDR Hist Cleaner: EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Cleaner list, as provided by EDR, has revealed that there are 13 EDR Hist Cleaner sites within approximately 0.125 miles of the target property.

RWQCB Region:	SAN FRANCISCO BAY RWQCB (REGION 2)
Site History:	Alameda County Department of Environmental Health (ACDEH) has been providing regulatory environmental oversight for the investigation and cleanup activities associated with Cleanup Site Program Case No. RO0003411 since February 2020 subsequent to referral by the City of Berkeley Planning and Building Department. To redevelop the Site, environmental investigations are required to evaluate impacts to the subsurface from historic land use and develop corrective actions to reduce potential risk to construction workers, the surrounding community, and occupants of the new development. Subsurface investigations have been conducted to evaluate historical operations at the Site including but not limited to residential dwellings and various commercial configurations such as automobile service and repair operations with associated former underground storage tanks, dry cleaning facilities and a fire station. Results of these subsurface investigations has identified chemicals of concern (COCs) in environmental media (soil and soil vapor). To address this contamination prior to development, proposed corrective actions include remedial soil excavation and off-Site disposal of impacted soil at a permitted disposal facility; and installation of vapor mitigation engineering controls to control potential vapor intrusion to indoor air of the proposed development and migration along new utility corridors. Proposed redevelopment of the Site includes a 6-story Lat-grade residential building with two elevators, a sump pump, and an outdoor courtyard compressed of landscaping and hardscaping. The 0.82-acre Site is currently operating as a City of Berkeley owned public parking lot located at 2012 Berkeley Way in Berkeley, Alameda County, California. The Site is located in the North Berkeley neighborhood, in a mixed commercial and residential area, and east of the intersection between Berkeley Way and Milvia Street. Properties in the Site vicinity include single-family homes, multi-family apartments, commercial buildings, and the University of California, Berkeley campus. Historically the Site was used for residential dwellings prior to 1958. Historical uses of adjacent or adjoining properties included dry cleaners, automotive repair, tire shop, and fire station with underground storage tanks (USTs). Redevelopment of the Site is scheduled to commence in April 2020 and includes a six-floor, slab-on-grade, multi-residence building with two elevators, a sump pump, and an outdoor courtyard comprised of landscaping and hardscaping. Multiple site investigations have been conducted in October 2018, and June, August, and October 2019 which included the assessment of soil and soil gas in the subsurface beneath the Site. Results of these subsurface investigations have identified residual impact from lead in soil at several select locations at the Site exceeding applicable San Francisco Bay Regional

Water Quality Control Board (SFBRWQCB) Tier 1 Environmental Screening Levels (ESLs). The presence of lead in soil is likely associated with the demolition of the former on-Site structures (that based on their age may likely have a history of lead-based paints), and/or from aerially-deposited lead (ADL) associated with the former use of leaded gasoline in vehicles and nearby roadways. A Fact Sheet and invitation for public comment regarding environmental assessments conducted at the Site was distributed by ACDEH to the surrounding community on February 11, 2020. A public meeting was also conducted at the Berkeley public library on February 20, 2020. No participants from the general public attended the meeting. Additionally subsurface data gap assessment (DGA) investigations were conducted in late February 2020 to evaluate potential soil impacts from previously unassessed constituents, including polynuclear aromatic hydrocarbons (PAHs), polychlorinated biphenyls (PCBs), and asbestos which may have been associated with the historical structures identified onsite. Additional soil vapor samples were also advanced to further assess the potential for elevated soil vapor beneath the site. Shallow soil results indicated lead was detected in all analyzed samples at concentrations ranging from 2.5 micrograms per kilogram (mg/kg) to 94 mg/kg; however, the Residential ESL was only exceeded in one sample (RB]14 at 1 foot below ground surface [bgs]). PCBs and asbestos was not detected in soil. Based on the results of the DGA investigation a corrective action plan (CAP) was submitted to ACDEH for review on March 26, 2020. Remedial and corrective actions presented in the CAP include remedial excavation of lead impacted soil via targeted remedial excavations prior to planned grading activities.

Eval Source: CERS,

Eval General Type: Other/Unknown
Eval Date: 06-01-2016
Violations Found: Yes
Eval Type: Other, not routine, done by local agency
Eval Notes: Non-Inspection related violation: Failed to submit annual Hazardous Materials Business Plan for FY17 (PM)
Eval Division: Berkeley City Toxics Management Division
Eval Program: HMRRP
Eval Source: CERS,

Eval General Type: Compliance Evaluation Inspection
Eval Date: 03-03-2022
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: Toxics Management Division (TMD) was on site for a routine hazardous materials and Hazardous Materials Business Plan (HMBP) and Stormwater (SW) inspections. Consent to enter and conduct inspection activities was provided by Scott Hall. Fire extinguishers were current as of July 2021 and TMD observed eyewash station. Business Activities in CERS is not completely filled out and may be inaccurate; Fire to determine best CERS contact. Emergency response plan is using outdated template; facility must discard current Emergency Response plan and upload new template to CERS. Employee training records were provided to inspector prior to inspection. The following materials were observed in amounts that meet or exceed the minimum volumes required for disclosure as outlined in the Health and Safety Code: - 3x 5gal = 15gal citrus solvent - 2x 5gal = 10gal dishwashing soap - 3x 1 liter = .80 gal

RWQCB Region:	SAN FRANCISCO BAY RWQCB (REGION 2)
Site History:	Berkeley Repertory Theater (BRT) plans to expand its current facility at 2025 Addison Street in Berkeley, California, by purchasing and developing the adjacent property to the west. The property is currently owned by Williamson Properties, and consists of three contiguous parcels that have been vacated by their previous tenants. The businesses that most recently occupied the parcels included a car repair shop, a glass company, and an auto body shop.

Hazardous Waste Summary:
Waste Code: F037
Waste Description: Petroleum Refinery Primary Oil/Water/Solids Separation Sludge - Any Sludge Generated From The Gravitational Separation Of Oil/Water/Solids During The Storage Or Treatment Of Process Wastewaters And Oily Cooling Wastewaters From Petroleum Refineries. Such Sludges Include, But Are Not Limited To, Those Generated In Oil/Water/Solids Separators; Tanks And Impoundments; Ditches And Other Conveyances; Sumps; And Storm Water Units Receiving Dry Weather Flow. Sludges Generated In Storm Water Units That Do Not Receive Dry Weather Flow, Sludges Generated In Aggressive Biological Treatment Units As Defined In Section 261.31(B)(2) (Including Sludges Generated In One Or More Additional Units After Wastewaters Have Been Treated In Aggressive Biological Treatment Units), And K051 Wastes Are Exempted From This Listing.

Environmental Interest/Information System:
The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different

Map ID
Direction
Distance
Elevation | Site | MAP FINDINGS | Database(s) | EDR ID Number EPA ID Number

AUTOMOTIVE UNLIMITED (Continued) **1000335045**

systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS),EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), andToxic Release Inventory (TRI).
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Violation Description: Failure to complete and electronically submit hazardous material inventory information for all reportable hazardous materials on site at or above reportable quantities.
Violation Notes: Returned to compliance on 04/02/2018. Hazardous materials inventory does not include the correct federal hazard categories. Corrective action: Check Safety Data Sheets for hazards of each chemical onsite and update the federal hazard categories on cerss.calepa.ca.gov
Violation Division: Berkeley City Toxics Management Division
Violation Program: HMRRP
Violation Source: CERS,

Evaluation:
Eval General Type: Compliance Evaluation Inspection
Eval Date: 11-19-2021
Violations Found: No
Eval Type: Routine done by local agency
Eval Notes: Toxics Management Division (TMD) was on site to conduct routine Hazardous Materials Business Plan (HMBP), Hazardous Waste Generator (HWG), and Stormwater (SW) inspections. TMD observed fire extinguishers current as of September 2021, exit map posted, spill kit, and HazCom pictograms displayed. NFPA placard warning of hazards is located on door outside of compressed gas storage room. 3 years of employee training records were current and readily available to inspector. EPA ID# CAL000100721 was current at time of inspection. Per operator, all activities generating hazardous waste have ceased for the time being. TMD to inquire if company still wishes to report as a HWG.
Eval Division: Berkeley City Toxics Management Division

Military DOD Site:	No
Facility Project Subtype:	Not reported
RWQCB Region:	SAN FRANCISCO BAY RWQCB (REGION 2)
Site History:	The subject property (Site) is located on the northwest corner of Shattuck and Hearst Avenues in Berkeley, Alameda County, California, consists of an approximately 6,700 square foot parcel (APN 57-2050-005), currently developed with a 1,200 square foot, wood framed restaurant in the southeast corner of the site with an asphalt paved parking lot on the north and west sides. The subject property building is currently occupied by a restaurant called Oscar s. The subject property is listed in the database summary as a Historic Auto Station under the name of W.R. Morely Shell in the years 1933 and 1943. No other information regarding the service station is provided Limited Phase II subsurface soil and soil gas sampling was conducted at the subject property in conjunction with the Phase I assessment. The objective of the subsurface investigation was to evaluate whether any residual concentrations of fuel hydrocarbons exist in soil from the former service station land use at the property from the 1930s through the 1950s. With the exception of soil sample S-7-B3 that contained 350 mg/kg TVHg (total volatile hydrocarbons as gasoline), no soil ESL established for metals or petroleum hydrocarbons were exceeded. The sample S-10-B3 from 10 feet bgs was collected three feet deeper than sample S-7-B3, only contained 16 mg/kg TVHg, which suggests a rapid attenuation of hydrocarbons with depth. The lack of BTEX (benzene toulene ethylene and xylenes) in soil samples (except for trace amounts) can be attributed to the age of the spill. Maximum concentrations of on Site soil gas samples reached up to 13,000,000 μg/m3 TVHg, and soil gas sample SV-2 contained 390,000 μg/m3 TVHg. Both of these results exceed the ESL of 29,000 μg/m3 established for gasoline range hydrocarbons in shallow soil in a commercial setting (Water Board, 2008).

Click Here for FRS Facility Detail Report:

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

safety procedures in the event of a release or threatened release of a hazardous material or failure to document and maintain training records for a minimum of three years.

Violation Notes: Requested training records of Michael Avillar, Azul, and Felix Smith. Michael is with the stock room of Berkeley City College, Azul is an educator, and Felix is with Facilities for Peralta. Felix is new and attended only the 3/9/23 training. Michael attended the 2021 and 2023 training. Azul had no training records. Please note, all hazardous materials handlers are required to receive annual training. Please ensure Azul is trained, and moving forward, ensue all hazmat handlers receive annual training, and that trainings are logged.

Site ID: 11834
Site Name: Berkeley City College
Violation Date: 01-30-2019
Citation: HSC 6.95 25508(a)(1) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(1)
Violation Description: Failure to complete and electronically submit hazardous material inventory information for all reportable hazardous materials on site at or above reportable quantities.
Violation Notes: Returned to compliance on 04/11/2019. Hazardous materials inventory must be updated to include the federal hazard categories. Inventory entries done as categories should include the names of the chemicals being stored in the "Component Name" sections. "Max daily" on inventory should reflect the maximum amount of chemical stored onsite, not the usage. Max daily should not be less than the largest container. Chemicals that are extremely hazardous(EHS), such as formaldehyde, should be reported on the inventory. Corrective action: Update the inventory and resubmit on CERS.calepa.ca.gov

training. Azul had no training records. Please note, all hazardous materials handlers are required to receive annual training. Please ensure Azul is trained, and moving forward, ensue all hazmat handlers receive annual training, and that trainings are logged.

Violation Division: Berkeley City Toxics Management Division
Violation Program: HMRRP
Violation Source: CERS,

Site ID: 11834
Site Name: Berkeley City College
Violation Date: 01-30-2019
Citation: HSC 6.95 25508(a)(1) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(1)
Violation Description: Failure to complete and electronically submit hazardous material inventory information for all reportable hazardous materials on site at or above reportable quantities.
Violation Notes: Returned to compliance on 04/11/2019. Hazardous materials inventory must be updated to include the federal hazard categories. Inventory entries done as categories should include the names of the chemicals being stored in the "Component Name" sections. "Max daily" on inventory should reflect the maximum amount of chemical stored onsite, not the usage. Max daily should not be less than the largest container. Chemicals that are extremely hazardous(EHS), such as formaldehyde, should be reported on the inventory. Corrective action: Update the inventory and resubmit on CERS.calepa.ca.gov

Violation Description:	Failure to keep a copy of each properly signed manifest for at least three years from the date the waste was accepted by the initial transporter. The manifest signed at the time the waste was accepted for transport shall be kept until receiving a signed copy from the designated facility which received the waste.
Violation Notes:	Returned to compliance on 03/10/2023. Observation: Operator was only able to produce manifests dated 2/4/2020 and 5/11/2022 for a 30-gallon drum of non-RCRA petroleum distillates. Corrective Action: Operator must maintain hazardous waste manifests for a minimum of three years. Please schedule pickup and submit a copy of the next manifest via email.

FLAMINGO CLEANERS (Continued) **S121740005**

Violation Description: Failure to send hazardous waste offsite for treatment, storage, or disposal within 180 days (or 270 days if waste is transported over 200 miles) for a generator who generates less than 1000 kilogram per month if all of the following conditions are met: (1) The quantity of hazardous waste accumulated onsite never exceeds 6,000 kilograms. (2) The generator complies with the requirements of 40 Code of Federal Regulations section 262.34(d), (e) and (f). (3) The generator does not hold acutely hazardous waste or extremely hazardous waste in an amount greater than one kilogram for more than 90 days.
Violation Notes: Returned to compliance on 11/26/2019. Observation: Accumulation start date on Hazardous Waste drum is 8/28/2019. Waste must be shipped off within 180 days after accumulating 27 gallons of waste, or within one year - whichever comes first. Corrective Action: Ship off hazardous waste and provide copy of manifest to Toxics Management Division.

Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: Arrived on site to conduct a routine Hazardous Waste Generator (HWG) inspection of Flamingo Cleaners. Met with Jung Culverwell, Business Owner. Culverwell stated that she only operates the dry cleaning machines once a week and has transitioned to doing more clothing alterations since the pandemic. Facility currently has the incorrect EPA ID Number listed in CERS (CAD981580269), which was associated with the previous owner of the business and expired on 6/30/2015.The correct EPA ID Number for this facility is CAL000449472 and expired on 6/30/2022. Facility has been shipping hazardous waste offsite with an inactive EPA ID number, so Culverwell was instructed to complete the electronic verification questionnaire through the hazardous waste tracking system to reactivate the EPA ID number immediately. Observed a 55-gallon drum of petroleum distillates (dry cleaning waste) by the hazardous waste storage area by the back door of the facility. The drum had a hazardous waste [Truncated]

Eval Notes: On site to conduct routine inspection of Hazardous Materials Business Plan and Hazardous Waste following accepted CERS submittal. Business was sold in 2017 and is under new ownership. Met with Jung Am Culverwell and got consent to inspect and photograph. Fire extinguishers are current as of January 2019 and nitrogen gas is seismically braced. Operator states the facility does not have a fire/smoke alarm. Backyard area contains storm drain. Sump pump from basement empties into sump pump; if chemicals release inside of store, this creates a potential stormwater threat. Toxics Management Division recommends you do not spray outdoor area with hose, but rather sweep and empty into garbage to prevent stormwater contamination. Observed: - ironing spray 20 oz x 23 = 3.6 gallons - chlorox colors detergent 1 gal x 10 = 10 gal - sodium hydroxide 1 gal x 6 = 6 gallons - detergent 1 gal x 7 = 7 gallons - detergent 28 lbs x 1 = 28 lbs - 55 gallon drum of hazardous waste 30 [Truncated]

Eval Notes: Arrived on site for an unannounced routine Hazardous Materials Business Plan (HMBP) inspection of Flamingo Cleaners. Met with Jung Culverwell, Business Owner. Began inspection by reviewing the Business Owner Operator Identification information submitted to CERS. Culverwell confirmed that all information listed was correct and up to date. Culverwell then escorted me through the facility to verify the hazardous materials inventory. Inventory appeared to match what was reported in CERS. Concluded inspection by reviewing documentation. Facility's site map is adequate and contains all the required components. Facility's Emergency Response/Contingency Plan was submitted on the latest template. Culverwell has no other employees so employee training records were not applicable. Culverwell is familiar with emergency response protocols and maintains MSDS sheets for the chemicals she uses. Observed various emergency response equipment including a first aid kit and fire extinguisher [Truncated]

Violation Date:	11-07-2022
Citation:	22 CCR 15 66265.55 - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.55
Violation Description:	Failure to have at least one employee either on the facility premises or on call (i.e., available to respond to an emergency by reaching the facility within a short period of time) with the responsibility for coordinating all emergency response measures.
Violation Notes:	Returned to compliance on 11/09/2022. Observation: In the Business Owner/Operator section of the facility's CERS submittal, Salma Price is listed as the Primary Emergency and Environmental Contact. Salma no longer works at this facility. Corrective Action: Update the emergency contact information with the current personnel's information through cers.calepa.ca.gov within 30 days of report issuance.
Violation Division:	Berkeley City Toxics Management Division
Violation Program:	HW
Violation Source:	CERS,

Site ID:	573808
Site Name:	One Medical Group, Inc. Berkeley
Violation Date:	11-07-2022
Citation:	40 CFR 1 262.34(d)(5)(ii) - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 262.34(d)(5)(ii)
Violation Description:	Failure to post the following information next to the telephone: (A) The name and telephone number of the emergency coordinator; (B) Location of fire extinguishers and spill control material, and, if present, fire alarm; and (C) The telephone number of the fire department, unless the facility has a direct alarm.
Violation Notes:	Returned to compliance on 11/09/2022. Observation: The Emergency Response Posting was missing the contact information of the local agency, Berkeley Toxics Management Division. Corrective Action: Please include the phone number for Berkeley Toxics Management Division (510)981-7460 on the emergency response posting and send a copy via email to nkim@cityofberkeley.info within 30 days of report issuance.
Violation Division:	Berkeley City Toxics Management Division

ONE MEDICAL GROUP INC BERKELEY (Continued) **S124925702**

Eval Notes: Arrived onsite to conduct a routine Hazardous Waste Generator (HWG) inspection of One Medical Group, Inc. Berkeley. Met with Andres Miranda-Katz, office manager, and Daniela Avila-Baca, shift lead. Began inspection by reviewing Business Owner Operator Information. Salma Price is currently listed as the primary emergency and environmental contact, but no longer works at this location. Instructed operator to update the emergency contact information with the latest information. Observed an Emergency Response Posting next to the phones at the reception desk at the front of the facility. The posting was missing the contact information for Berkeley Toxics Management Division (TMD), the designated CUPA. Instructed operator to include TMD as one of the contacts in the emergency response posting. Operator then escorted me to the hazardous waste accumulation area in the back of the facility. The only hazardous waste that the facility has generated thus far is a 5-gallon of [Truncated]

RWQCB Region: SAN FRANCISCO BAY RWQCB (REGION 2)
Site History: Site corrective measures implemented during construction of redeveloped property. Existing use is retail/residential. Exposure mitigated by continuous dewatering and treatment of groundwater, covered surfaces, separation of residential occupancies with intervening ground floor retail and garage.

Violation Source:	CERS,

Site ID:	79179
Site Name:	UC GAS&FOOD
Violation Date:	07-11-2022
Citation:	23 CCR 16 2641(h) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2641(h)
Violation Description:	Failure to have an approved UST Monitoring Plan.
Violation Notes:	Returned to compliance on 09/24/2022. Observation: Tank information and monitoring plan is incorrect in the following ways: Tank Information - Tanks 1, 2, 3, and 4: - ball float valve should be checked "no" - audible/visual alarms are required per LG 150-3, confirm existence of them and check "yes" if they are functioning. Currently, box is checked "no" - vent piping in transition sump should be checked "no" ? what does this mean - containment sump should be checked "no," this is a direct-bury - corrosion protection must have "yes" selected for one option but all are currently selected "no"; select yes to "isolation" - vent/vapor recovery: if this is steel, it must have cathodic protection. confirm material type. Monitoring Plan:

UC GAS&FOOD (Continued) **S121792096**

- Secondary containment fields must all be deleted - this is a single wall system so these fields should be blank - In-tank Probe Model number is incorrect; please confirm and revise. - Leak test frequency - is it continuous? Confirm. - Facility does not conduct [Truncated]

Violation Division: Berkeley City Toxics Management Division
Violation Program: UST
Violation Source: CERS,

Site ID: 79179
Site Name: UC GAS&FOOD
Violation Date: 07-11-2022
Citation: 23 CCR 16 2666(c) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2666(c)
Violation Description: Failure of the line leak detector (LLD) monitoring single-walled pressurized piping to meet the following requirements: Monitored at least hourly with the capability of detecting a release of 3.0 gallons per hour leak at 10 pounds per square inch and shut down the pump when a leak is detected or when the LLD fails or is disconnected.
Violation Notes: Returned to compliance on 09/24/2022. Observation: Diesel tank could not pass Line Lead Detector test multiple times on-site, until finally passing. TMD recommends servicing. This is considered corrected on-site.

Violation Program: UST
Violation Source: CERS,

Site ID: 79179
Site Name: UC GAS&FOOD
Violation Date: 01-08-2019
Citation: 23 CCR 16 2636(f)(4) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2636(f)(4)
Violation Description: Failure to meet one or more of the following monitoring requirements in lieu of the requirement to be tightness tested every 12 months: The monitoring system maintains all product piping outside the dispenser to be fail-safe and shut down the pump when a leak is detected. The monitoring system shuts down the pump or stops flow when a leak is detected in the under dispenser containment (UDC).
Violation Notes: Returned to compliance on 01/10/2019. The diesel sump sensor which monitors the diesel piping and the sensors in UDC 7-8, 9-10, and 11-12 did not shut down the pump when the sensors were tested in liquid. Service technician reprogrammed the panel and tested the sensors to confirm positive shutdown.

equipment that does not use flow restrictors on vent piping to meet overfill prevention equipment requirements when the overfill prevention equipment is installed, repaired, or replaced on and after October 1, 2018. For USTs installed before October 1, 2018, perform an inspection by October 13, 2018 and every 36 months thereafter. For USTs installed on and after October 1, 2018, perform an inspection at installation and every 36 months thereafter. Inspected within 30 days after a repair to the overfill prevention equipment. Inspected using an applicable manufacturer guidelines, industry codes, engineering standards, or a method approved by a professional engineer. Inspected by a certified UST service technician. Maintain records of overfill prevention equipment inspection for 36 months.

Violation Notes: Returned to compliance on 10/05/2021. Flapper valve in Diesel tank was heavily corroded and broken. Corrective action: replace flapper valve
Violation Division: Berkeley City Toxics Management Division
Violation Program: UST
Violation Source: CERS,

Site ID: 79179
Site Name: UC GAS&FOOD
Violation Date: 07-11-2022
Citation: 23 CCR 16 2716(e) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2716(e)
Violation Description: For designated operator (DO) monthly inspections conducted before October 1, 2018, failure to comply with one or more of the following requirements: Be performed by an ICC certified DO. Inspect monthly alarm history report, check that alarms are documented and responded to appropriately, and attach a copy. Inspect for the presence of liquid/debris in spill containers. Inspect for the presence of liquid/debris in under dispenser containment (UDC) and ensure that the monitoring equipment is positioned correctly. Inspect for liquid or debris in containment sumps where an alarm occurred with no service visit. Check that all testing and maintenance has been completed and documented. Verify that all facility employees have been trained in accordance with 23 CCR 2715(c). For designated operator (DO) 30 day inspections conducted on and after October 1, 2018, failure to conduct the designated UST operator visual inspection at least once every 30 days.
Violation Notes: Returned to compliance on 07/20/2022. Observation: Designated Operator (DO) report was not in 12 point font. DO report was not signed. DO reports were dated 5/20/2022 and 6/20/2022, meaning 31 days passed between reports instead of 30. Corrected prior to report issuance.

Eval Division: Berkeley City Toxics Management Division
Eval Program: HW
Eval Source: CERS,

Eval General Type: Other/Unknown
Eval Date: 07-11-2022
Violations Found: Yes
Eval Type: Other, not routine, done by local agency
Eval Notes: Toxics Management Division (TMD) was on-site to conduct routine Hazardous Materials Business Plan (HMBP), Underground Storage Tank (UST), and SW (Stormwater) inspections. TMD conducted a Hazardous Waste Generator (HWG) screening inspection as a result of hazardous waste discovered on-site. EPA ID# CAL000206357 was inactive at time of inspection. It was determined this site generates and stores hazardous waste. Site must report as hazardous waste generator.
Eval Division: Berkeley City Toxics Management Division
Eval Program: HW
Eval Source: CERS,

Eval General Type: Compliance Evaluation Inspection
Eval Date: 07-21-2016
Violations Found: No
Eval Type: Routine done by local agency
Eval Notes: Routine annual UST, HMBP, and Storm water inspection. UST contractor present for the inspection. No reported Hazardous waste generated.
Eval Division: Berkeley City Toxics Management Division
Eval Program: HMRRP
Eval Source: CERS,

Eval General Type: Compliance Evaluation Inspection
Eval Date: 07-07-2020
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: Met Bill and Tony of UST Compliance to conduct the annual monitoring certification. Reviewed the DO reports and DO training record. Training last occurred 6/23/20.
Eval Division: Berkeley City Toxics Management Division
Eval Program: UST
Eval Source: CERS,

Eval General Type: Compliance Evaluation Inspection
Eval Date: 07-09-2018
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: Not reported

Hazardous Waste Summary:

Waste Code: F003
Waste Description: The Following Spent Nonhalogenated Solvents: Xylene, Acetone, Ethyl Acetate, Ethyl Benzene, Ethyl Ether, Methyl Isobutyl Ketone, N-Butyl Alcohol, Cyclohexanone, And Methanol; All Spent Solvent Mixtures/Blends Containing, Before Use, Only The Above Spent Nonhalogenated Solvents; And All Spent Solvent Mixtures/Blends Containing, Before Use, One Or More Of The Above Nonhalogenated Solvents, And A Total Of Ten Percent Or More (By Volume) Of One Or More Of Those Solvents Listed In F001, F002, F004, And F005; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

Waste Code: F006
Waste Description: Wastewater Treatment Sludges From Electroplating Operations, Except From The Following Processes: (1) Sulfuric Acid Anodizing Of Aluminum; (2) Tin Plating On Carbon Steel; (3) Zinc Plating (Segregated Basis) On Carbon Steel; (4) Aluminum Or Zinc-Aluminum Plating On Carbon Steel; (5) Cleaning/Stripping Associated With Tin, Zinc, And Aluminum Plating On Carbon Steel; And (6) Chemical Etching And Milling Of Aluminum.

Waste Code: F037
Waste Description: Petroleum Refinery Primary Oil/Water/Solids Separation Sludge - Any Sludge Generated From The Gravitational Separation Of Oil/Water/Solids During The Storage Or Treatment Of Process Wastewaters And Oily Cooling Wastewaters From Petroleum Refineries. Such Sludges Include, But Are Not Limited To, Those Generated In Oil/Water/Solids Separators; Tanks And Impoundments; Ditches And Other Conveyances; Sumps; And Storm Water Units Receiving Dry Weather Flow. Sludges Generated In Storm Water Units That Do Not Receive Dry Weather Flow, Sludges Generated In Aggressive Biological Treatment Units As Defined In Section 261.31(B)(2) (Including Sludges Generated In One Or More Additional Units After Wastewaters Have Been Treated In Aggressive

ENERGY BIOSCIENCES BUILDING (Continued) **1023966984**

Biological Treatment Units), And K051 Wastes Are Exempted From This Listing.

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Waste Code: D038
Waste Description: Pyridine

Waste Code: D039
Waste Description: Tetrachloroethylene

Waste Code: D040
Waste Description: Trichlorethylene

Waste Code: F002
Waste Description: The Following Spent Halogenated Solvents: Tetrachloroethylene, Methylene Chloride, Trichloroethylene, 1,1,1-Trichloroethane, Chlorobenzene, 1,1,2-Trichloro-1,2,2-Trifluoroethane, Ortho-Dichlorobenzene, Trichlorofluoromethane, And 1,1,2, Trichloroethane; All Spent Solvent Mixtures/Blends Containing, Before Use, A Total Of Ten Percent Or More (By Volume) Of One Or More Of The Above Halogenated Solvents Or Those Solvents Listed In F001, F004, And F005; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

Waste Code: F003
Waste Description: The Following Spent Nonhalogenated Solvents: Xylene, Acetone, Ethyl Acetate, Ethyl Benzene, Ethyl Ether, Methyl Isobutyl Ketone, N-Butyl Alcohol, Cyclohexanone, And Methanol; All Spent Solvent Mixtures/Blends Containing, Before Use, Only The Above Spent Nonhalogenated Solvents; And All Spent Solvent Mixtures/Blends Containing, Before Use, One Or More Of The Above Nonhalogenated Solvents, And A Total Of Ten Percent Or More (By Volume) Of One Or More Of Those Solvents Listed In F001, F002, F004, And F005; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

Waste Code: F004
Waste Description: The Following Spent Nonhalogenated Solvents: Cresols, Cresylic Acid, And Nitrobenzene; And The Still Bottoms From The Recovery Of These Solvents; All Spent Solvent Mixtures/Blends Containing, Before Use, A Total Of Ten Percent Or More (By Volume) Of One Or More Of The Above Nonhalogenated Solvents Or Those Solvents Listed In F001, F002, And F005; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

Waste Code: F005
Waste Description: The Following Spent Nonhalogenated Solvents: Toluene, Methyl Ethyl Ketone, Carbon Disulfide, Isobutanol, Pyridine, Benzene, 2-Ethoxyethanol, And 2-Nitropropane; All Spent Solvent Mixtures/Blends Containing, Before Use, A Total Of Ten Percent Or More (By Volume) Of One Or More Of The Above Nonhalogenated Solvents Or Those Solvents Listed In F001, F002, Or F004; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

Click Here for FRS Facility Detail Report:

Environmental Interest/Information System:
THE EMISSION INVENTORY SYSTEM (EIS) MAINTAINS AN INVENTORY OF LARGE STATIONARY SOURCES AND VOLUNTARILY-REPORTED SMALLER SOURCES OF AIR POINT POLLUTANT EMITTERS. IT CONTAINS INFORMATION ABOUT FACILITY SITES AND THEIR PHYSICAL LOCATION, EMISSIONS UNITS, EMISSIONS PROCESSES, RELEASE POINTS, CONTROL APPROACHES, AND REGULATIONS. FACILITY INVENTORY DATA ARE KEPT SEPARATE FROM THE EMISSIONS DATA AND HAVE STABLE IDENTIFIERS TO IMPROVE CONTINUITY FROM YEAR TO YEAR AND TO HELP IDENTIFY DUPLICATE OR MISSING FACILITIES
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.
