### **Item #1: 2026 City Council Referral Prioritization Process Using Re-Weighted Range Voting (RRV)**

1. Elizabeth Thomas

Office of the City Manager

ACTION CALENDAR

January 27, 2026

To: Honorable Mayor and Members of the City Council

From: Paul Buddenhagen, City Manager

Submitted by: Mark Numainville, City Clerk

Subject: 2026 City Council Referral Prioritization Process Using Re-Weighted Range Voting (RRV)

RECOMMENDATION

(1) Review the City Council raw scores for all outstanding City Council referrals; (2) Approve the removal of referrals that have been nominated for removal by the Council; and (3) Direct the City Manager to run the ranking algorithm and return to Council with a final ranked list of referrals for adoption.

FISCAL IMPACTS OF RECOMMENDATION

There are no direct fiscal impacts related to the review and approval of the referral list.

CURRENT SITUATION AND ITS EFFECTS

Through the December 2, 2025 City Council meeting, there were 53 outstanding long-term referrals to staff. The list does not include referrals that the City Manager has classified as short-term referrals or budget referrals.

The raw scores (0=low priority, 5=high priority) for each referral is shown in the RRV spreadsheet in Attachment 1. These scores will be run through the ranking algorithm to create the final ranked list of referrals.

During the scoring process, Councilmembers had the option to identify referrals that should be removed from the prioritization process. This year, eight referrals were marked for removal. A list of these referrals is in Attachment 2. During consideration of this item at the January 27 special meeting, the City Council may decide to remove additional referrals from the list if it so desires.

After the Council takes action to remove referrals, staff will apply the RRV formula to the raw scoring resulting in a prioritized list. These results will be presented to the Council at a special meeting on February 10 for adoption.

In 2025, city staff completed 27 long-term referrals and 4 short-term referrals. Currently there are 120 referrals still in progress. This is in addition to the 53 referrals to be ranked (or removed) in the 2026 RRV process.

## BACKGROUND

In 2016, the City Council adopted a system of Re-weighted Range Voting (RRV) to prioritize City Council referrals to staff. The RRV system enables City Council to provide direction to staff on which referrals are highest priority and should be completed first.

Reweighted Range Voting is a proportional representation voting system designed for a blend of fairness and consensus, meaning that it ensures some representation for minority views as well. It accomplishes this by reducing the influence of Councilmembers in proportion to the points they have awarded to the referrals prioritized thus far.

Under RRV, Each Councilmember rates every referral on a scale of zero to five. There is no limit to repeat scores (i.e. a Councilmember could give every referral a five). When the scores are tallied, the referral with the highest total score becomes the 1st priority. Once the first referral is assigned, the scores for the remaining referrals are reweighted based on how much influence each Councilmember has had up to that point (based on the score they assigned, 0 - 5). If a Councilmember assigns high scores to several referrals, they use up the strength of their weighted vote more quickly and exercise diminishing influence when the scores are reweighted for subsequent referrals. This guarantees equal influence throughout the full list. If a Councilmember did not score a referral, the default score was set to zero.

## ENVIRONMENTAL SUSTAINABILITY AND CLIMATE IMPACTS

There are no identifiable environmental effects or opportunities, or climate impacts, associated with the subject of this report.

## RATIONALE FOR RECOMMENDATION

This recommendation carries out the direction of the Council to implement a prioritization process for City Council referrals to staff.

## ALTERNATIVE ACTIONS CONSIDERED

Council may decide to forgo a prioritization process and continue the referral process with no structured tracking or prioritization of referrals.
