Subject: FY 2023 Fourth Quarter Investment Report: Ended June 30, 2023

## SUMMARY

The City's investment policy requires that a quarterly investment report be submitted to the City Council on the status of the investment portfolio. The report includes all investments managed by the City of Berkeley and provides information on the types, values (par, book, and market), term, and yield of each security.

- The return on pooled investments for the quarter ended June 30, 2023 was 3.06\%, 5 basis points more than the 3.01\% earned by the State Local Agency Investment Fund (State LAIF), which is the benchmark for investment performance used by the City. The return on pooled investments of $3.06 \%$ for the quarter ended June 30, 2023 was 30 basis points more than the rate of $2.76 \%$ earned in the quarter ended March 31, 2023.
- The average return on all Retiree Medical Trust Fund investments was $5.08 \%$ for the quarter ended June 30, 2023.

## CURRENT SITUATION AND ITS EFFECTS

Attached is a summary of the quarterly report for fiscal year 2023 Fourth Quarter ending June 30, 2023 representing the status of the City's investment portfolio. The report includes all investments managed by the City of Berkeley and provides information on the values (par, book, and market), term, and yield of each security.

Summary information by type of security and detailed information on each security is provided on Exhibit 2-A. An evaluation of portfolio performance for this accounting period compared to the previous three accounting periods is also included in Attachment 1.

## A. Portfolio Results

As a result of the differences in the investment policies of different cities, including responsible investing policies, maturity restrictions, investment restrictions, etc., it was difficult for the City of Berkeley to come up with a reasonable performance measure for pooled cash investments. In order to provide some measure of the relative performance of the City's investment returns, many years ago the City established the State Local Agency Investment Fund (LAIF) as the performance measure to be reported in the quarterly investment reports, since many local governments invested significant portions of their investment portfolios in LAIF.

LAIF was intended to be a reference point to compare the City's investment performance against, rather than a true performance measure, since most cities typically earn a yield higher than LAIF in normal interest rate environments, and because LAIF's average maturity of its investments is generally shorter than that of most cities. As a result, past City Councilmembers requested that information about the rates earned by other California cities be included in the quarterly investment reports for comparison purposes, despite the differences in the investment policies of the various cities.

1. Liquidity of Portfolio:

The average investment in the pooled portfolio matures in 1,286 days as of June 30, 2023. This is 36 days less than the 1,322 maturity days as of March 31, 2023.
2. Comparison of Results to Performance Measures - Pooled investments: Quarter Ended June 30, 2023
The City's yield on investments for the quarter ended June 30, 2023 was $3.06 \%$, an increase of 30 basis points (.30\%) from the 2.76 earned during the quarter ended March 31, 2023. The average yield on a 91-day Treasury bill at the end of the quarter ended June 30, 2023 was $5.28 \%$, an increase of 59 basis points ( $0.59 \%$ ) from the $4.69 \%$ at the end of the previous quarter, primarily as a result of the Feds raising the Federal Funds rate by $.25 \%$ on March 23, 2023 and $.25 \%$ on May 3, 2023.

As summarized in Table 1, staff's overall results were above the performance measure for the quarter by 5 basis points. Staff's performance was above the performance measure in April by approximately 11 basis points (+.11\%); over the performance measure in May by approximately 7 basis points (+.07\%); and, was under the performance measure in June by approximately 2 basis points (-.02\%). The performance measure for the return on investments is compared to the rate of return of the State LAIF.

3. Investment Results-Retiree Health Insurance Funds:

Average interest rates earned on the retiree health insurance trust funds for the quarter ended March 31, 2023 compared to the quarter ended June 30 2023, were as follows:

Table 2

| EARNED INTEREST RATES |  |  |
| :--- | ---: | :---: |
| For Quarter Ended 3/31/2023 Compared To 6/30/2023 |  |  |

The rates earned on these plans are expected to continue to increase, as staff plans to use the investment authority granted by Council to purchase long-term bonds as rates move higher.

Details related to retiree health trust fund investments are in Attachment 3, Exhibits 3A, 3-B, and 3-C of this report.

## B. Discussion of Interest Rate Environment and Outlook

In its June 14, 2023 statement, the Federal Open Market Committee said recent indicators suggest that economic activity has continued to expand at a modest pace. Job gains have been robust in recent months, the unemployment rate has remained low, but inflation remains elevated.

The U. S. banking system is sound and resilient. Tighter credit conditions for households and businesses are likely to weigh on economic activity, hiring, and inflation. The extent of these effects is uncertain. The Committee remains highly attentive to inflation risks.

## Yield Trend

The Committee seeks to achieve maximum employment and inflation at the rate of 2 percent over the longer run. In support of these goals, the Committee decided to maintain the target range for the federal funds rate at 5 to $5-1 / 4 \%$-percent. Holding the target range steady at this meeting allows the Committee to assess additional information and its implications for monetary policy. In determining the extent of additional policy changes that may be appropriate to return inflation to 2 percent over time, the Committee will take into account the cumulative tightening of monetary policy, the lags with which monetary policy affects economic activity and inflation, and economic and financial developments. In addition, the Committee will continue to reduce its holdings of Treasury securities and agency debt and mortgage-backed securities, as described in its previously announced plans. The Committee is strongly committed to returning inflation to its 2 percent objective.

In assessing the appropriate stance of monetary policy, the Committee will continue to monitor the implications of incoming information for its economic outlook. The Committee would be prepared to adjust its stance of monetary policy as appropriate if risks emerge that could impede the attainment of the Committee's goals. The Committee's assessments will take into account a wide range of information, including readings on labor market conditions, inflation pressures and inflation expectations, and financial and international developments.

Since the Federal Reserve change its zero-interest rate policy in March 2017 to combat high inflation, the Federal Reserve Board has raised the Federal Funds rate 11 times for a total of $5.25 \%-5.50 \%$, as follows:

Table 3

| DATE | RATE CHANGE | FEDERAL FUNDS RATE |

Since the rate hike on March 23, 2023, there were three regional bank failures (Silicon Valley Bank, Signature Bank and First Republic Bank), and several other regional banks are under significant pressure. Therefore, it is likely that the Fed will be extremely cautious before raising the Federal Funds rates much higher. In addition, these developments have resulted in (1) banks' raising their lending standards and reducing the number of loans granted; (2) mortgage rates rising to 8\%; and (3) an increase in the probability of a significant slowdown in the US economy in 2023. Berkeley has already started feeling the effects of the Feds monetary tightening in the form of a substantial slowdown in the sales of real properties in the third and fourth quarters of FY 2023.

## Change in Strategy

Prior to the Fed's change in monetary policy starting March 17, 2022, staff's basic strategy consisted of not purchasing any Agency or Medium-Term corporate note securities with a maturity beyond three years, unless the securities were step-up securities (i.e., securities whose interest rates increased periodically, if they were not called). After the Feds changed to a tighter monetary policy in March 2022, the City's investment strategy changed to extending the investment maturities of securities purchased beyond three years and locking in rates. This should result in an increase in interest income during FY 2023 and beyond.

As a result of the Fed's tightening of the money supply by sharply increasing short-term interest rates and through its program of selling Agency and Mortgage-Backed securities from its Balance Sheet, there is an increasing probability of a downturn or recession in the US in late 2023 or early 2024, which could give the Feds an incentive to start reducing the Federal Funds rate in 2024, if the inflation rate continues to decline. That would result in short-term rates declining from current high levels and result in the City earning less interest income on the short-term portion of the investment portfolio.

On the other hand, the projected US budget deficit of $\$ 1.8$ trillion and the Fed's program of selling $\$ 95$ billion of Agency and Mortgage-Backed securities per month (or $\$ 1.14$ trillion per year) will significantly increase the supply of these bonds at a time when demand for them is declining (as the Fed sells $\$ 1.14$ trillion each year from its Balance Sheet, instead of purchasing them as it did before this program began). This additional huge supply of bonds will overwhelm demand for Treasury Bonds and put further upward pressure on medium and long-term interest rates. This will keep medium-term and long-
term interest rates high at least through CY 2024 and the City will continue to earn high rates on the longer-term portion of the investment portfolio.

On a long-term basis, the City's earned rate is expected to be above the City's benchmark (State LAIF) and the City's return is expected to be comparable to rates earned by most other cities in California. A sample of rates earned by Northern and Southern California cities is reflected in table 3 below (previously only Northern California cities were included):

## Table 4

## BACKGROUND

- Pooled Investments

Short-term cash is invested primarily in government sponsored enterprises (referred to as Federal Agency securities) notes, medium-term corporate notes and municipal securities for periods of one to ten years. Additional cash is invested in a money market fund or overnight securities to meet the liquidity needs of the City.

In some cases, the City may have investments with a current market value that is greater or less than the recorded cost. These changes in market value are due to fluctuations in the market and have no effect on yield, as the City does not intend to sell securities prior to maturity.

- Retiree Health Trust Fund Investments

The City agreed to provide retiree Health insurance coverage for fire, police and miscellaneous employees under certain terms and conditions. An actuarial study commissioned by the City many years ago determined that, in addition to City Contributions, an average rate of return of $7 \%$ on miscellaneous employees trust fund assets invested must be achieved to fund the retiree health benefit at the desired 70\% level. Primarily as a result of the Federal Reserve Board's decision to keep short-term
rates near zero from 2008 to March 2020, the average rate currently earned is significantly below that 7\% level. City Finance Department staff manages these investment portfolios.
