Dear Berkeley planning department:

I'm writing to demand that the proposal to tear down the historic United Artists theater in downtown Berkeley undergo a full review under the California Environmental Quality Act (CEQA). It would be highly unethical for the city to grant a CEQA exemption to the developer.

The UA Berkeley is a paragon of Art Deco architecture that is arguably the finest theater ever built in the city. Constructed during the Great Depression by Hollywood icons Charlie Chaplin and Mary Pickford, the UA is on the California Register of Historical Resources and was found eligible for the National Register. It is also a city landmark, thanks to an LPC decision earlier this year. Without a doubt, the building is a cultural and historical resource under the CEQA statute; demolishing it would be a "substantial adverse change" requiring extensive CEQA review.

If the city granted the developer a blanket exemption, it would be denying the public a multifaceted process under which it could learn more about the cultural resource status of the theater, be provided the opportunity to submit comment, and have the chance to attend at least one public meeting on the topic (within the SB 330 meeting cap).

The developer proposes to retain a portion of the facade and lobby while destroying the grand four-story theater itself—a palatial venue that entertained Berkeley moviegoers for 91 years! Its destruction would be a monumental blow to the city's historic fabric; it warrants extensive review under CEQA.

Building more housing is vitally important, but it does not have to cost Berkeley one of its most magnificent historic buildings. It is unacceptable that Berkeley is allowing all of its downtown cinemas to be destroyed.

Thank You For Your Consideration,

Sincerely,

WARNING: This is not a City of Berkeley email. Do not click links or attachments unless you trust the sender and know the content is safe.

Hello. I am writing as a historic preservationist, a community member, and former administrative director of the Oakland Heritage Alliance. It has come to my attention that the city is considering offering a blankent exemption to the CEQA review process for a developer who is highly likely to raize the UA Berkeley movie theater, a known historical and cultural resource under state law and a National Register-eligible property and city landmark. This MUST NOT be allowed to go forward. The CEQA review is critical for historic structures of this import, and the community must be allowed to weigh in during a public hearing. I strongly urge you to consider options for creative reuse of this important structure, with Oakland's Fox as a prime example of what restoring a historic theater can do to reenergize and strengthen downtown areas that have been subject to urban sprawl and diminishing public activity. Please commit to preserving Berkeley's historic cultural resources.

Sincerely,

Carla Lease Scofield

Subject: CEQA review of 2274 Shattuck Avenue project / The Historic UA Theatre

WARNING: This is not a City of Berkeley email. Do not click links or attachments unless you trust the sender and know the content is safe.

Dear Berkeley Planning Department:

I'm writing to express my concern over the fact that the proposal to tear down the historic United Artists theater in downtown Berkeley will apparently now fail to undergo a full review under the California Environmental Quality Act (CEQA).

It's my feeling, but also my opinion, that to grant a CEQA exemption to the developer is a terrible mistake. It's a mistake that will occur quickly, and one that can never be undone once this iconic structure is sacrificed to smaller scale, more fluid concerns of the current moment. Development of housing is vitally important, but that goal can be met without desecrating a magnificent piece of Berkeley's history and allowing one of the last downtown cinemas to be destroyed. The developer proposes to retain a portion of the facade and lobby while gutting the grand four-story theater itself, proving only that the cosmetic value of the theater is what has attracted them to the property. Killing the UA in order to have their project wear its face is foolish and wasteful at best, immoral at worst. Of course my preference would be for that process to be stopped, for the developer to find a more appropriate property for housing development; but at the very least it seems prudent to let the public become more broadly aware of this and let the decision makers take more time to consider the consequences before the deed is done and the jewel is smashed.

Everyone copied here is aware of the history of the theater, and of the value of the structure to cinephiles and lovers of history and Art Deco architecture. It's also valuable to this 1988 graduate of UC Berkeley, who has attended countless screenings there over the last several decades as part of her film education and regular cultural participation in what once was a thriving commercial district on Shattuck Avenue, now doomed to become rows of empty housing and bar/restaurants.

BPD, please allow a process to take place, under which the public can learn about the cultural resource status of the theater, be provided the opportunity to submit comment, and have the chance to attend at least one public meeting on the topic (within the SB 330 meeting cap). The building is a cultural and historical resource under the CEQA statute, and demolishing it represents a "substantial adverse change" requiring extensive CEQA review.

History cycles. Give this piece of history a chance to survive and shine in the future.

Thank you for your consideration.

Respectfully,

Anne Stone
Oakland, CA

(Also apparently doomed to become rows of empty high-rise housing and bar/restaurants with bars in the windows)

Dear Berkeley Planning Department, I hope this message finds you well.

I am writing to express my strong concern regarding the proposal to tear down the historic United Artists Theater in downtown Berkeley.

I urge you to ensure that this proposal undergoes a thorough review under the California Environmental Quality Act (CEQA) and that no CEQA exemption is granted to the developer.

The UA Theater, built during the Great Depression by Hollywood legends Charlie Chaplin and Mary Pickford, holds a special place in our community.

It is listed on the California Register of Historical Resources, found eligible for the National Register, and was recently designated a city landmark by the LPC.

This building is undeniably a cultural and historical treasure under the CEQA statute, and its demolition would constitute a “substantial adverse change” that warrants extensive CEQA review.

It is essential that the city adhere to the law and not grant any special exemptions to the developer.

Preserving this magnificent theater is not just about following legal requirements; it’s about honoring our community’s heritage and cultural identity.

Thank you for your attention to this matter.

I trust you will give it the careful consideration it deserves.

Best,
Adam Wooley
Berkeley, CA 94705

Greetings~

Please follow the guidelines required and do not grant an exemption to the developer at 2274 Shattuck Ave. This is our community's beloved theater. I have heard from many neighbors as I've been canvassing that they are crushed by the fact that our downtown has no more movie theaters.

For you to grant a CEQA exemption to this development would be a slap in the face to our community. Please don't do that. There's absolutely no need to. Follow the protocol required. Our community deserves that.

Constructed during the Great Depression by Hollywood icons Charlie Chaplin and Mary Pickford, the UA is on the California Register of Historical Resources and was found eligible for the National Register. It is also a city landmark, thanks to an LPC decision earlier this year. Without a doubt, the building is a cultural and historical resource under the CEQA statute; demolishing nearly all of it would be a "substantial adverse change" requiring extensive CEQA review.

The city must follow the law—no special breaks for the developer. This magnificent theater and the public deserve no less.

Thank you for acting in the best interest of our community and *not* prioritizing developers.

With gratitude~

Subject: UA THEATER must have CEQA review

WARNING: This is not a City of Berkeley email. Do not click links or attachments unless you trust the sender and know the content is safe.

PLEASE DO NOT EXEMPT 2274 Shattuck Avenue from a CEQA review!

Background: UA Berkeley is on the state historic registry (National Register-eligible and now a city landmark), and considered a historical and cultural resource **under state law.** This means that the proposal to demolish the theater is supposed to undergo an **extensive review process under the California Environmental Quality Act (CEQA)**.

It's profitable to build here because people want to live here! There are the amenities of good schools, easy BART/AC Transit access, terrific food, and cultural activities at the university. **Nonetheless, the City continues to give developers carte blanche sweetheart deals.**

DO NOT EXEMPT 2274 Shattuck Avenue from a CEQA review.

Thank you.

WARNING: This is not a City of Berkeley email. Do not click links or attachments unless you trust the sender and know the content is safe.

Hello,
I am totally opposed to any developer getting the right to build on this site without adequate input from the community about saving the UUA theater. It seems that Berkeley City planning is willing to forsake most of its long term residents for short term real estate money. I find it outrageous that the city insists on building totally unaffordable units that very few who live and work in Berkeley could afford.

You have already changed the entire vibe of downtown: it will be walkable to BART for folks in the expensive condos, but all the residents that frequent downtown to go to the movies, will no longer be there. This will hurt all of the small businesses that have survived the pandemic.

As a 35 year resident of Berkeley, it has been horrible to watch the planning dept prioritize expensive condos over affordable units for the people that serve us: police, fire, teachers, etc.

You have not given adequate opportunity for the community to weigh in on this project. You have not listened to the feedback that you have received from so many people about this project. Save the UUA theater!!!!

Hello

As a Berkeley resident I was distressed to hear that a developer is pressuring the city to ignore the city's requirement of CEQA review for their proposed development which would destroy the historic theater.

I am not a preservation absolutist but this exemption would set a bad precedent. And alternatives to demolition should be carefully considered.

Dear Director Klein and Berkeley Planning Department:

I am writing to demand that the proposal to tear down the historic United Artists theater in downtown Berkeley undergo a full review under the California Environmental Quality Act (CEQA). It would be highly unethical for the city to grant a CEQA exemption to the developer.

As a board member and member of the preservation committee of the Art Deco Society of California, I am concerned about the UA Berkeley as an irreplaceable historical resource.

As a 49-year resident, taxpayer and voter in Berkeley, I see the reflexive approval of any proposal for housing, on any site, to be a tragic mistake. The residents of Berkeley need more than beds, or we will become a bedroom community instead of the vibrant city we all love.

I understand the pressure the city is under to comply with state housing mandates (even though Berkeley is already the most densely populated city in the Bay Area). However, there are numerous other sites for apartments; there is only one UA Theatre. Please look past its current condition -- the building needs structural work, but could be restored to functionality as a theater and community space, with original features that could never be reproduced at any price. Please preserve spaces for the arts in our “downtown arts district.”

The UA is on the California Register of Historical Resources and was found eligible for the National Register. It is also a city landmark, thanks to an LPC decision earlier this year. Without a doubt, the building is a cultural and historical resource under the CEQA statute; demolishing it would be a "substantial adverse change" requiring extensive CEQA review.

If the city granted the developer a blanket exemption, it would be denying the public a multifaceted process under which it could learn more about the cultural resource status of the theater, be provided the opportunity to submit comment, and have the chance to attend at least one public meeting on the topic (within the SB 330 meeting cap).

The developer proposes to retain a portion of the facade and lobby while destroying the grand four-story theater itself—a palatial venue that entertained Berkeley moviegoers for 91 years! Its destruction would be a monumental blow to the city's historic fabric; it warrants extensive review under CEQA.

Building more housing is vitally important, but it does not have to cost Berkeley one of its most magnificent historic buildings. It is unacceptable that Berkeley is allowing all of its downtown cinemas to be destroyed.

Thank you for your consideration.

Sincerely,

Alice Jurow

Dear Berkeley planning department:

I'm writing to demand that the proposal to tear down the historic United Artists theater in downtown Berkeley undergo review under the California Environmental Quality Act (CEQA). The city must NOT grant a CEQA exemption to the developer.

Constructed during the Great Depression by Hollywood icons Charlie Chaplin and Mary Pickford, the UA is on the California Register of Historical Resources and was found eligible for the National Register. It is also a city landmark, thanks to an LPC decision earlier this year. Without a doubt, the building is a cultural and historical resource under the CEQA statute; demolishing nearly all of it would be a "substantial adverse change" requiring extensive CEQA review.

The city must follow the law—no special breaks for the developer. This magnificent theater and the public deserve no less. Thank you for your consideration.

Sincerely,

Negeene Mosaed

Resident of district 5

WARNING: This is not a City of Berkeley email. Do not click links or attachments unless you trust the sender and know the content is safe.

Dear Ms Gong,

I'm writing to demand that the proposal to tear down the historic United Artists theater in downtown Berkeley undergo a full review under the California Environmental Quality Act (CEQA). It would be highly unethical for the city to grant a CEQA exemption to the developer.

I have come to Berkeley specifically to see films at The UA Berkeley because it is such a beautiful theater both exterior and interior—a work of art itself!

It is so sad to see Berkeley destroying the art and architecture created by craftsman who took pride in their work and succumbing to the generic quotidian banality of today's architecture. Oakland managed to save the Paramount Theater. Berkeley should be able to save the UA Theater.

The proposed 17 story building will be completely out of context to the rest of the low rise commercial buildings on the street and in the neighborhood.

In addition where will all the new tenants be parking their cars? Somehow I do not think they will all be biking and public transiting.

A disappointed former Oakland resident,
Diane Peers

I'm writing to demand that the proposal to tear down the historic United Artists theater in downtown Berkeley undergo a full review under the California Environmental Quality Act (CEQA). It would be highly unethical for the city to grant a CEQA exemption to the developer.

The UA Berkeley is a paragon of Art Deco architecture that is arguably the finest theater ever built in the city. Constructed during the Great Depression by Hollywood icons Charlie Chaplin and Mary Pickford, the UA is on the California Register of Historical Resources and was found eligible for the National Register. It is also a city landmark, thanks to an LPC decision earlier this year. Without a doubt, the building is a cultural and historical resource under the CEQA statute; demolishing it would be a "substantial adverse change" requiring extensive CEQA review.
If the city granted the developer a blanket exemption, it would be denying the public a multifaceted process under which it could learn more about the cultural resource status of the theater, be provided the opportunity to submit comment, and have the chance to attend at least one public meeting on the topic (within the SB 330 meeting cap).
The developer proposes to retain a portion of the facade and lobby while destroying the grand four-story theater itself—a palatial venue that entertained Berkeley moviegoers for 91 years! Its destruction would be a monumental blow to the city's historic fabric; it warrants extensive review under CEQA.
Building more housing is vitally important, but it does not have to cost Berkeley one of its most magnificent historic buildings. It is unacceptable that Berkeley is allowing a ll of its downtown cinemas to be destroyed.
Thank you for your consideration.
Sincerely,

the development proposal for 2274 Shattuck Ave. must undergo CEQA review, not exemption for the developer! Whose City Council is this? Ours or theirs? Not only is it a State and City landmark of importance, but we no longer have any movie theaters downtown or on Solano. That's really bad for most citizens (and in the long run it will also be bad for business downtown).

WARNING: This is not a City of Berkeley email. Do not click links or attachments unless you trust the sender and know the content is safe.

I have been a resident of Berkeley since 1962, and I am a voter! I DEMAND that the city adhere to CEQA laws when considering giving an exemption to a developer in the proposed demolition of the historic and beautiful UA Theater. As a citizen and taxpayer, I am YOUR BOSS! You will NOT demolish that theater! I am sick and tired of our city management—Mayor and Council—genuflecting to developers, as opposed to listening to the desires of its citizens and protecting the historic architectural beauty of our city. Students, new transplants to Berkeley, and others have a right to see some of our historic downtown architecture. We have historic homes, but we have fewer commercial buildings that also show beautiful architecture.

Berkeley has a long history, and part of that history includes notable architecture. A building such as the UA Theater can be repurposed for cultural activities, similar to Oakland's Paramount Theater. As a musician, I can tell you that often, musical groups end up performing in Berkeley's churches, because there is no decent size theatre-type venue. Don't make the mistake San Francisco made when tearing down the beautiful Fox Theatre (and it was magnificent—I remember going there as a child, admiring the ornate lobby, listening to the theatre organ). It was replaced by a piece of garbage. Those San Franciscans who experienced the Fox try to explain to newcomers what it was like, and how much excitement and glamour that theatre added to the city. There is genuine regret that the Fox was demolished.

A number of years ago, I attended a professional conference in Atlanta, GA. A colleague showed me around the city. It's always interesting going to cities and seeing their historic architectural sites. The East Coast has many buildings dating back to the late 18th/early 19th century. Atlanta was founded in 1837, so I expected to see buildings from the late 1830s on. There were none from that early period. I asked my colleague why. He asked if I'd read 'Gone With The Wind' and the part about the burning of Atlanta. All buildings before Civil War times had been destroyed! I can imagine how early Atlanta might have looked, but there were no buildings to show it. Berkeleyans have a right to keep some of their historic buildings, especially when they still can be used!

May 24, 2024

Jordan Klein, Director
Department of Planning and Development
City of Berkeley

Re: Request for CEQA Exemption for 2274 Shattuck Avenue

Dear Mr. Klein,

I read with interest the March 4, 2024 letter from HansonBridgett for the developers for the proposed 2274 Shattuck Avenue project, requesting exemption from CEQA review. The letter claims that AB 1633 makes this exemption mandatory for eligible infill residential projects.

Is the project truly eligible? Or is this exemption prohibited by Section 15300.2 of the CEQA Guidelines, which bars exemptions if the project has significant effects to historical resources?

The letter cites two reports, "2274 Shattuck Avenue Historic Resource Evaluation Memorandum" and "2274 Shattuck Avenue Project Impacts Analysis Memorandum" to support a request that the City should find the project exempt from CEQA review.

These documents were commissioned by the project developers, for their benefit. Each reads like the standard "nothing to see here" pseudo-evaluation that accompanies project applications seeking destruction of historic resources.

Developer-commissioned reports are *opinions* – not by an impartial body conducting unbiased investigation and analysis, but by a company working on behalf of the developers – whose aim is to profit from the land beneath the historic resource. In most cases they wish to clear-cut the site to fully maximize profit.

Therefore the conclusions rendered in these "evaluations" are not valid to overturn a historic resource determination previously secured in the interest of the public, such as the listing of this site in the California Register of Historic Resources.

One final note: over the past several years, the Bay Area has been experiencing a real estate bubble larger than the bubble of the 2000s, which deflated between 2008 and 2012. When bubbles deflate, some projects that are in the works fail, and many that have not begun construction are cancelled. Apparently several other projects proposed by these developers have already been postponed or terminated. It would be a tragedy if the developers were allowed to demolish the UA Theater, with no intention of actually building the project.

Please do your part to prevent this tragedy from occurring.

Sincerely,

Gale Garcia

WARNING: This is not a City of Berkeley email. Do not click links or attachments unless you trust the sender and know the content is safe.

Dear Berkeley planning department:

We, the Cal Historic Preservation Club, is a Berkeley student club that raises student awareness on the need to preserve historic architecture. We are writing to you to kindly request that the proposal to tear down the historic United Artists theater in downtown Berkeley undergo a full review under the California Environmental Quality Act (CEQA). Since the UA theater is a historic and cultural resource, we may not agree that it's the best option for the city to grant a CEQA exemption to the developer.

The UA Berkeley is a paragon of Art Deco architecture that is commendable and one of the finest in Berkeley. Constructed during the Great Depression by Hollywood icons Charlie Chaplin and Mary Pickford, the UA is on the California Register of Historical Resources and was found eligible for the National Register. It is also a city landmark, thanks to an LPC decision earlier this year. Without a doubt, the building is a cultural and historical resource under the CEQA statute; demolishing it would be a “substantial adverse change” requiring extensive CEQA review.

If the city granted the developer a blanket exemption, it runs the risk of denying the public a multifaceted process under which it could learn more about the cultural resource status of the theater, be provided the opportunity to submit comment, and have the chance to attend at least one public meeting on the topic (within the SB 330 meeting cap).

The developer proposes to retain a portion of the facade and lobby while destroying the grand four-story theater itself—a palatial venue that entertained Berkeley moviegoers for 91 years! Its destruction would be a monumental blow to the city’s historic fabric; it warrants extensive review under CEQA.

Keep in mind that Save the UA is just one initiative, we are not opposing all housing developments throughout Berkeley. Building more housing is vitally important, and we are seeing Berkeley approve new housing at the fastest rate in its recent decades but it does not have to cost Berkeley one of its most magnificent historic buildings.

Thank you for your consideration.

Sincerely,

UC Berkeley (Cal) Historic Preservation Club

To: Berkeley Planning Department

I urge you not to grant the developer of the United Artists Theater a sweetheart deal and a total exemption from a broad public review under the California Environmental Quality Act (CEQA).

Berkeley movie theaters represent an incredible cultural and architectural legacy. We are now down to one nonprofit and one commercial theater. The decline in theater venues here should concern everyone. Their role in film culture is undeniable.

Berkeley Historical Society presently has an exhibit “Berkeley and the Movies.” It charts the many decades of film experience and contributions from Berkeley to the history of film. Berkeley does not deserve to lose its most significant movie palace.

The UA Theater is the premiere theater building in Berkeley and deserves widespread support for its preservation - both its exterior and interior. Are we to be reduced to gathering in front of our many empty storefronts to approximate the rich cultural experience that was formerly found by attending a movie showing?

The public needs the opportunity to comment on this proposed loss to our cultural and historic resources. Not only do present residents need cultural venues, but added residents in high rise buildings also we need them. If the developer is Patrick Kennedy, when is it enough? Hasn’t Berkeley given him many benefits over many decades?

Cultural venues are needed in Berkeley, and creativity abounds in Berkeley. The future of the UA Theater could include more than film, but other uses. We have only to look to the preservation of the UC Theater as a concert venue and the ongoing viability of many other movie theaters to see this is absolutely possible.

Sincerely,

Harvey Smith
Berkeley Resident

Hello,

Please preserve the beautiful historic, UA Theater. I urge you to require the developer to go through the normal channels for seeking the necessary permits, and to do so in a manner that allows time for public comments.

with respect,

Austin Willacy

Subject: Stop the demolition of the historic UA theater

WARNING: This is not a City of Berkeley email. Do not click links or attachments unless you trust the sender and know the content is safe.

Dear Berkeley city staff, ZAB, and City Council,

I'm writing to demand that city staff, the Zoning Adjustments Board, and the City Council take action to prevent the destruction of the historic United Artists theater at 2274 Shattuck Ave. in downtown Berkeley. It is unacceptable to let a developer retain a fraction of the facade and lobby while tearing down the palatial four-story theater itself.

Built in 1932, the UA is on the California Register of Historical Resources, is National Register-eligible, and is also now a city landmark, thanks to an LPC decision earlier this year. Without a doubt, the building is a cultural and historical resource under the CEQA statute; the proposal to demolish it is a "substantial adverse change" requiring extensive CEQA review. The city must insist that all oversight laws and processes are followed and not give baseless exemptions to the developer.

Constructed during the Great Depression by Hollywood icons Charlie Chaplin and Mary Pickford, the UA Berkeley is arguably the finest theater ever built in the city and one of the few Art Deco movie palaces of its kind in the state that could be preserved. Despite being converted to a multiplex 50 years ago, the theater is resplendent with Art Deco architectural detail, decor, and furnishings; it has been relatively well-maintained over the decades, its historic features surviving various retrofits thanks to local preservationists who insisted the original auditorium be preserved behind false walls. The Historical Resource Evaluation on the UA, paid for by the developer, is not an honest and credible assessment; it would be unethical for city officials to consider this document the final word on the status of this landmark property.

The UA presents a tremendous opportunity for Berkeley. It has the potential to be restored as a glorious, midsize live performance venue like Oakland's Paramount, galvanizing an economic and cultural renaissance in the downtown. The many cities in the Bay Area and nationwide that have chosen to preserve their historic theaters never regret doing so. Another option is for the UA to remain a historic multiplex theater that serves a public eager to resume moviegoing after the pandemic. The future possibilities for this splendid building are numerous—but not if complacent city leaders allow a developer to level it into oblivion.

Berkeley citizens are watching with alarm as a mass extinction event for movie theaters unfolds: The Shattuck Cinemas has been freshly demolished while the beloved art deco California and the most valuable of them all, the UA, sit on the precipice of ruin. This all goes against the city's Downtown Area Plan, which was the product of over 200 public meetings and explicitly calls for the retention and support of downtown cinemas. This plan is still in effect.

Building more housing is no doubt vitally important, but it does not have to cost Berkeley one of its most magnificent landmark buildings in the UA. City officials must maintain control over land use decisions, fostering downtown development that maintains a mix of arts and culture and commerce alongside residential growth.

The UA Berkeley served as a community hub and entertainment venue for 91 years, and that tradition should continue. Its destruction would be an irreparable blow to the city's historic and cultural fabric that leaders must avoid at all costs.

Thank you for your consideration.

RE: CEQA review of 2274 Shattuck Ave. project

Dear Berkeley Planning Department:

I'm writing to demand that the proposal to tear down the historic United Artists theater in downtown Berkeley undergo a full review under the California Environmental Quality Act (CEQA). It would be highly unethical for the city to grant the developer a CEQA exemption.

The UA Berkeley is a paragon of Art Deco architecture, arguably the finest theater ever built in the city. Constructed during the Great Depression by Hollywood icons Charlie Chaplin and Mary Pickford, the UA is on the California Register of Historical Resources and was found eligible for the National Register. It is also a city landmark, thanks to an earlier LPC decision. Without a doubt, the building is a cultural and historical resource under the CEQA statute; demolishing it would be a "substantial adverse change" requiring extensive CEQA review.

If the city granted the developer a blanket exemption, it would be denying the public a multifaceted process under which it could learn more about the cultural resource status of the theater, be provided the opportunity to submit comment, and have the chance to attend at least one public meeting on the topic (within the SB 330 meeting cap).

The developer proposes to retain a portion of the facade and lobby while destroying the grand four-story theater itself—a palatial venue that entertained Berkeley moviegoers for 91 years! Its destruction would be a monumental blow to the city's historic fabric, warranting extensive review under CEQA.

Building more housing is vitally important, but it does not have to cost Berkeley one of its most magnificent historic buildings. It is unacceptable that Berkeley is allowing all of its downtown cinemas to be destroyed.

Thank you for your consideration.

Sincerely,
Nhu Miller
Berkeley, California

Dear Berkeley planning department:

I'm writing to demand that the proposal to tear down the historic United Artists theater in downtown Berkeley undergo review under the California Environmental Quality Act (CEQA). The city must NOT grant a CEQA exemption to the developer.

Our city is undergoing a radical transformation. Almost everyone of our city council members -- and certainly our mayor -- panders to commercial developers. Their money is the lifeblood of their aspiration for higher office. As a result, the city is being developed at an unprecedented rate, leaving us with vacant storefronts and historic (>40%) residential vacancies. Please do not let developers thumb their collective nose at the laws that were put in place to protect the history and character of our city, destroying yet another priceless landmark.

Constructed during the Great Depression by Hollywood icons Charlie Chaplin and Mary Pickford, the UA is on the California Register of Historical Resources and was found eligible for the National Register. It is also a city landmark, thanks to an LPC decision earlier this year. Without a doubt, the building is a cultural and historical resource under the CEQA statute; demolishing nearly all of it would be a "substantial adverse change" requiring extensive CEQA review.

The city must follow the law—no special breaks for the developer. This magnificent theater and the public deserve no less. Thank you for your consideration.

Sincerely,
Bill Press,
Resident of District 4, Berkeley

Hello,
I want to add my support to the many people who urge you go forward with the CEQA process concerning the UA Theater.
Downtown Berkeley has been losing one of its most precious resources, the wealth and variety of movie theaters. Make every effort to protect the UA, which is rightfully on the state historic registry.
With the disappearence of movie theaters, local restaurants also suffer and die.
The quality of life in downtown Berkeley has suffered greatly.
Please do everything you can to keep it from continuing.
Thank you,
Linda Moss

Dear Berkeley city staff, ZAB, and City Council,

If our beloved city can find the funds to buy the Spengers Parking lot in the name of an ancient tribe which left no artifacts other than a shell mound, surely we can find some funds to preserve an important piece of the build environment. Constructed during the Great Depression by Hollywood icons Charlie Chaplin and Mary Pickford, the UA Berkeley is arguably the finest theater ever built in the city and one of the few Art Deco movie palaces of its kind in the state that could be preserved. There is only one commercial theater left in the city, not downtown. You are letting the cultural attractions that bring people to our dear city and get them out on the streets at night. Do you want to encourage every denizen of the hamster cages you are permitting to stay inside and watch streaming television. C'mon, show some leadership.

The city must insist that all oversight laws and processes are followed and not give baseless exemptions to the developer.

Constructed during the Great Depression by Hollywood icons Charlie Chaplin and Mary Pickford, the UA Berkeley is arguably the finest theater ever built in the city and one of the few Art Deco movie palaces of its kind in the state that could be preserved. Despite being converted to a multiplex 50 years ago, the theater is resplendent with Art Deco architectural detail, decor, and furnishings; it has been relatively well-maintained over the decades, its historic features surviving various retrofits thanks to local preservationists who insisted the original auditorium be preserved behind false walls. The Historical Resource Evaluation on the UA, paid for by the developer, is not an honest and credible assessment; it would be unethical for city officials to consider this document the final word on the status of this landmark property.

The UA presents a tremendous opportunity for Berkeley. It has the potential to be restored as a glorious, midsize live performance venue like Oakland's Paramount, galvanizing an economic and cultural renaissance in the downtown. The many cities in the Bay Area and nationwide that have chosen to preserve their historic theaters never regret doing so. Another option is for the UA to remain a historic multiplex theater that serves a public eager to resume moviegoing after the pandemic. The future possibilities for this splendid building are numerous—but not if complacent city leaders allow a developer to level it into oblivion.

Berkeley citizens are watching with alarm as a mass extinction event for movie theaters unfolds: The Shattuck Cinemas has been freshly demolished while the beloved art deco California and the most valuable of them all, the UA, sit on the precipice of ruin. This all goes against the city's Downtown Area Plan, which was the product of over 200 public meetings and explicitly calls for the retention and support of downtown cinemas. This plan is still in effect.

Building more housing is no doubt vitally important, but it does not have to cost Berkeley one of its most magnificent landmark buildings in the UA. City officials must maintain control over land use decisions, fostering downtown development that maintains a mix of arts and

culture and commerce alongside residential growth.

The UA Berkeley served as a community hub and entertainment venue for 91 years, and that tradition should continue. Its destruction would be an irreparable blow to the city's historic and cultural fabric that leaders must avoid at all costs.

Thank you for your consideration.

Dear Berkeley city staff, ZAB, and City Council,

I'm writing to demand that city staff, the Zoning Adjustments Board, and the City Council take action to prevent the destruction of the historic United Artists theater at 2274 Shattuck Ave. in downtown Berkeley. It is unacceptable to let a developer retain a fraction of the facade and lobby while tearing down the palatial four-story theater itself.

Built in 1932, the UA is on the California Register of Historical Resources, is National Register-eligible, and is also now a city landmark, thanks to an LPC decision earlier this year. Without a doubt, the building is a cultural and historical resource under the CEQA statute; the proposal to demolish it is a "substantial adverse change" requiring extensive CEQA review. The city must insist that all oversight laws and processes are followed and not give baseless exemptions to the developer.

It is unacceptable to let a developer retain a fraction of the facade and lobby while tearing down the palatial four-story theater itself.

Built in 1932, the UA is on the California Register of Historical Resources, is National Register-eligible, and is also now a city landmark, thanks to an LPC decision earlier this year. Without a doubt, the building is a cultural and historical resource under the CEQA statute; the proposal to demolish it is a "substantial adverse change" requiring extensive CEQA review. The city must insist that all oversight laws and processes are followed and not give baseless exemptions to the developer.

Constructed during the Great Depression by Hollywood icons Charlie Chaplin and Mary Pickford, the UA Berkeley is arguably the finest theater ever built in the city and one of the few Art Deco movie palaces of its kind in the state that could be preserved. Despite being converted to a multiplex 50 years ago, the theater is resplendent with Art Deco architectural detail, decor, and furnishings; it has been relatively well-maintained over the decades, its historic features surviving various retrofits thanks to local preservationists who insisted the original auditorium be preserved behind false walls. The Historical Resource Evaluation on the UA, paid for by the developer, is not an honest and credible assessment; it would be unethical for city officials to consider this document the final word on the status of this landmark property.

The UA presents a tremendous opportunity for Berkeley. It has the potential to be restored as a glorious, midsize live performance venue like Oakland's Paramount, galvanizing an economic and cultural renaissance in the downtown. The many cities in the Bay Area and nationwide that have chosen to preserve their historic theaters never regret doing so. Another option is for the UA to remain a historic multiplex theater that serves a public eager to resume moviegoing after the pandemic. The future possibilities for this splendid building are numerous—but not if complacent city leaders allow a developer to level it into oblivion.

Berkeley citizens are watching with alarm as a mass extinction event for movie theaters unfolds: The Shattuck Cinemas has been freshly demolished while the beloved art deco California and the most valuable of them all, the UA, sit on the precipice of ruin. This all goes against the city's Downtown Area Plan, which was the product of over 200 public meetings and explicitly calls for the retention and support of downtown cinemas. This plan is still in effect.

Building more housing is no doubt vitally important, but it does not have to cost Berkeley one of its most magnificent landmark buildings in the UA. City officials must maintain control over land use decisions, fostering downtown development that maintains a mix of arts and culture and commerce alongside residential growth.

The UA Berkeley served as a community hub and entertainment venue for 91 years, and that tradition should continue. Its destruction would be an irreparable blow to the city's historic and cultural fabric that leaders must avoid at all costs.

Thank you for your consideration.

Subject: Stop the demolition of the historic UA theater

Dear Berkeley city staff, ZAB, and City Council,

I just drove past the UA theater yesterday and teared up, which considering all that is going on in the world, is a little silly but this theater and not just its facade is so much a part of the city of Berkeley and its great quality of life that to lose it now seems cruel and shortsighted.
The plan for the theater strikes me as emblematic of the horrendous and cold aesthetic of what we're facing and about to face as a people. And believe me, I'm all for housing... but housing that people on the street can afford, not housing for executives that fly in for a week or two, etc. Why are cities consistently kowtowing to the people who could afford to live anywhere instead of the absolute need for housing and services for our most vulnerable. And with the passage of Care Court all our cities and counties need that kind of housing now and fast. Yet in the process, do we need to sacrifice our basic edifices and cultural gathering places that keep us sane? I have no interest in letting the things I love most about a city life, such as a movie theater, be torn away without a fight.
Thus, I'm writing to demand that city staff, the Zoning Adjustments Board, and the City Council prevent the destruction of the vital and aesthetically critical United Artists theater at 2274 Shattuck Avenue in downtown Berkeley. It is unacceptable to let a developer retain a fraction of the facade and lobby while tearing down the palatial four-story theater itself. WE NEED CULTURAL SPACES.
And we need to preserve the gorgeous and irreplaceable art deco interior for succeeding generations of audiences to appreciate and enjoy for many more decades. To let this go is the folly of many other cities whose atmospheres and cultural contributions are woeful, isolated and provincial at best. The UA offers a place to view thoughtfully made films that inform a broadminded community largely educated at one of the world's finest universities. We have BAMFA but they cannot and should not do that all alone.

Berkeley is a beacon for culture and independence and beauty. It is a great north star and we are letting that slip away if we kowtow to an aesthetic that offers only facade, nostalgia and a cold exterior that puts too much demand on existing infrastructure as well as keeps people from enjoying the theatrical experience within walking distance. If we remove this theater as a theater, we simply won't have that anymore and that is a profoundly shortsighted shame.

Built in 1932, the UA is on the California Register of Historical Resources, is National Register-eligible, and is also now a city landmark, thanks to an LPC decision earlier this year. Without a doubt, the building is a cultural and historical resource under the CEQA statute; the proposal to demolish it is a "substantial adverse change" requiring extensive CEQA review. The city must insist that all oversight laws and processes are followed and not give baseless exemptions to the developer.

Constructed during the Great Depression by Hollywood icons Charlie Chaplin and Mary Pickford, and Douglas Fairbanks as the United Artists, it stood for what artists could accomplish independent of studios which controlled their work. That is a major part of California history that really matters. It's not just trivia but an example of the fortitude applied by artists who were united to forge work that was exceptional. We can't forget that is what United Artists originally stood for during the Great Depression that hit the nation so hard. The UA Berkeley is arguably the finest theater ever built in the city and one of the few Art Deco movie palaces of its kind in the state that could be preserved. It is on par with the beloved Paramount in Oakland which thrives as a destination spot for theater and art deco and design lovers all over the world.

Despite being converted to a multiplex, the theater is resplendent with Art Deco architectural detail, decor, and furnishings; it has been relatively well-maintained over the decades, its historic features surviving various retrofits thanks to local preservationists who insisted the original auditorium be preserved behind false walls.

"The Historical Resource Evaluation on the UA," paid for by the developer, is not an honest and credible assessment; it would be unethical for city officials to consider this document the final word on the status of this landmark property. Anyone entering the lobby can see its value as a cultural landmark that deserves full preservation and as a unique place to enjoy theater as a full audience. It has great value to the community as a whole!

The UA presents a tremendous opportunity for Berkeley. It has the potential to be restored as a glorious, midsize live performance venue like Oakland's Paramount, galvanizing an economic and cultural renaissance in the downtown. The many cities in the Bay Area and nationwide that have chosen to preserve their historic theaters never regret doing so. Also, the UA could remain a historic multiplex theater that serves a public eager to resume movie-going after the pandemic. We all need to get out of the house! The future possibilities for this splendid building are numerous—but only if city leaders are strong and visionary and see it's great potential for a great city. We don't need more hollowing out meaningful structures for private interests and profits that will not serve the city as a whole.

Berkeley citizens are watching with alarm as a mass extinction event for movie theaters unfolds: The Shattuck Cinemas has been freshly demolished while the beloved art deco California and the most valuable of them all, the UA, sit on the precipice of ruin. This all goes against the city's Downtown Area Plan, which was the product of over 200 public meetings and explicitly calls for the retention and support of downtown cinemas. This plan is still in effect.

Building more housing is no doubt vitally important, but it does not have to cost Berkeley one of its most magnificent landmark buildings in the UA. City officials must maintain control over land use decisions, fostering downtown development that maintains a mix of arts and culture and commerce alongside residential growth.

The UA Berkeley is an important and entertainment venue that can take audiences from the last century into the next one with the joy and wonder such a unique palace provides. That location for public gathering must continue. It is in the heart of Berkeley and its destruction would be an irreparable blow to the city's historic and cultural fabric. That location provides vitality for residents and breathes a quality of life and could more so if preserved properly as a valued center for audience entertainment and community gathering. How could we possibly allow it to disappear now when it made its first appearance in a time when homelessness was even worse and we realized the people needed places to refresh and revitalize their minds and bodies while gathering together in splendor that few of us could ever have on our own. That is what Berkeley is all about. Please keep the UA and give it the love it and the city of Berkeley the love found in such an theatrical marvel.

Thank you for considering the vitality of a gathering space for all.

Without a doubt, the building is a cultural and historical resource under the CEQA statute; the proposal to demolish it is a "substantial adverse change" requiring extensive CEQA review. The city must insist that all oversight laws and processes are followed and not give baseless exemptions to the developer.

Constructed during the Great Depression by Hollywood icons Charlie Chaplin and Mary Pickford, the UA Berkeley is arguably the finest theater ever built in the city and one of the few Art Deco movie palaces of its kind in the state that could be preserved. Despite being converted to a multiplex 50 years ago, the theater is resplendent with Art Deco architectural detail, decor, and furnishings; it has been relatively well-maintained over the decades, its historic features surviving various retrofits thanks to local preservationists who insisted the original auditorium be preserved behind false walls. The Historical Resource Evaluation on the UA, paid for by the developer, is not an honest and credible assessment; it would be unethical for city officials to consider this document the final word on the status of this landmark property.

The UA presents a tremendous opportunity for Berkeley. It has the potential to be restored as a glorious, midsize live performance venue like Oakland's Paramount, galvanizing an economic and cultural renaissance in the downtown. The many cities in the Bay Area and nationwide that have chosen to preserve their historic theaters never regret doing so. Another option is for the UA to remain a historic multiplex theater that serves a public eager to resume moviegoing after the pandemic. The future possibilities for this splendid building are numerous—but not if complacent city leaders allow a developer to level it into oblivion.

Berkeley citizens are watching with alarm as a mass extinction event for movie theaters unfolds: The Shattuck Cinemas has been freshly demolished while the beloved art deco California and the most valuable of them all, the UA, sit on the precipice of ruin. This all goes against the city's Downtown Area Plan, which was the product of over 200 public meetings and explicitly calls for the retention and support of downtown cinemas. This plan is still in effect.

Building more housing is no doubt vitally important, but it does not have to cost Berkeley one of its most magnificent landmark buildings in the UA. City officials must maintain control over land use decisions, fostering downtown development that maintains a mix of arts and culture and commerce alongside residential growth.

The UA Berkeley served as a community hub and entertainment venue for 91 years, and that tradition should continue. Its destruction would be an irreparable blow to the city's historic and cultural fabric that leaders must avoid at all costs.

Thank you for your consideration.

Subject: Stop the demolition of the historic UA theater

Dear Berkeley city staff, ZAB, and City Council,

I'm writing to demand that city staff, the Zoning Adjustments Board, and the City Council take action to prevent the destruction of the historic United Artists theater at 2274 Shattuck Ave. in downtown Berkeley. It is unacceptable to let a developer retain a fraction of the facade and lobby while tearing down the palatial four-story theater itself.

Built in 1932, the UA is on the California Register of Historical Resources, is National Register-eligible, and is also now a city landmark, thanks to an LPC decision earlier this year. Without a doubt, the building is a cultural and historical resource under the CEQA statute; the proposal to demolish it is a "substantial adverse change" requiring extensive CEQA review. The city must insist that all oversight laws and processes are followed and not give baseless exemptions to the developer.

Subject: Stop the demolition of the historic UA theater

Dear Berkeley city staff, ZAB, and City Council,

If our beloved city can find the funds to buy the Spengers Parking lot in the name of an ancient tribe which left no artifacts other than a shell mound, surely we can find some funds to preserve an important piece of the build environment. Constructed during the Great Depression by Hollywood icons Charlie Chaplin and Mary Pickford, the UA Berkeley is arguably the finest theater ever built in the city and one of the few Art Deco movie palaces of its kind in the state that could be preserved. There is only one commercial theater left in the city, not downtown. You are letting the cultural attractions that bring people to our dear city and get them out on the streets at night. Do you want to encourage every denizen of the hamster cages you are permitting to stay inside and watch streaming television. C'mon, show some leadership.

Property Name: 2274 Shattuck Avenue – United Artists Theaters
Page 1 of 8

The current survey update of 2274 Shattuck Avenue was conducted as part of a proposed project to develop the property for a new residential development. Caitlin Hibma from Left Coast Architectural History conducted site visits of the property on September 18 and November 15, 2023. The information provided herein is derived from a memorandum she prepared in December 2003, with supplemental research providing missing and additional information on the property's historic development.

Historical Resources Status

In 1978, Historic Resources Inventory documentation prepared by Betty Marvin of Berkeley Architectural Heritage Association recommended 2274 Shattuck Avenue, also known as United Artists Theaters, eligible for listing in the National Register of Historic Places (NRHP). It was assigned a National Register Status Code (now known as California Historical Resource Status Code) "3" indicating it appeared eligible for listing in the NRHP.

In 2004-2005, the property was evaluated for the Alameda-Contra Costa County Transit East Bay Rapid Transit Project by JRP Historical Consulting and was documented on a DPR 523 Continuation Sheet. It was field checked and noted that, "it does not appear to have undergone any alteration that would warrant a change in its National Register status code." It was assigned a California Historical Resource Status Code "3S," which indicates it appears eligible for NR individually through survey evaluation. A subsequent Finding of Effect documentation prepared for the project as part of the Section 106 process summarized that the building was significant under Criterion A as a locally operated movie theater and Criterion C for its Art Deco architecture. As a result of this project, the building was designated in the California Register of Historical Resources on March 15, 2006.

In 2015, the property was evaluated as part of the Shattuck Avenue Commercial Corridor Historic Context and Survey by Archives & Architecture and was recorded on a full set of DPR 523 forms. Its evaluation found that it was historically significant to important development patterns in the downtown core and for its Art Deco architecture. It was assigned a California Historical Resource Code of "2S2" indicating it was individually determined eligible for NR by consensus through Section 106 process and listed in the CRHR and "5B" indicating it is locally significant both individually and as a contributor to a multi-component resource, as part of the Shattuck Avenue Commercial Corridor Historic District. The local historic district has not been formally adopted by the City of Berkeley.

As detailed further below, the building retains the same appearance documented and described in 2004-2005 to support its 2006 CRHR designation. There have been no visible alterations and no evidence to suggest that it would no longer be eligible for listing in the CRHR. As a result of its eligibility for the NRHP and listing in the CRHR, the subject property is a qualifying historical resource pursuant to

the California Environmental Quality Act (CEQA) and as defined by Section 15064.5 of the CEQA Guidelines.

Current Survey

As of December 2023, the theater building has an L-shaped plan and is approximately two to four stories high with flat and bow-truss roof forms. The L-shaped plan consists of a two-story east-west ell that fronts on Shattuck Avenue, and a three to four story north-south ell that fronts on Bancroft Way. A separate, unrelated building is located within the interior angle of the L-shaped plan. View of the roof shows that a demising wall separates the two-story atrium and lobby portions of the east-west ell, which is separated from the north south ell by a demising wall and change in height from two to three stories. The majority of the north-south ell is three-stories and the generally rectangular footprint of the ell narrows toward the south end, where it rises to four stories at the extreme southern end to accommodate the theater's fly loft.

The primary facade faces Shattuck Avenue (east), without setback from the sidewalk. Its mass is two stories high, with parapet ornamentation that rises to approximately three to four stories. The margins of the first story are clad with non-original, large-dimension, marble tile that incorporates inset non-original poster display cases. The majority of the first story is spanned and enclosed by a non-original extruded aluminum frame storefront assembly that includes glazed entry doors on either side and an integral ticket window at the center. Above the first story is a non-original illuminated sign-board marquee that is flat and projects minimally from the face of the building. The upper primary facade is the only portion of the original facade to remain intact and features flat vertically-oriented panels that step upward toward the center. The panels have corbelled edges and feature low bas reliefs depicting half-arch, fountain, and other geometric motifs, as well as human figures and the words “Artistry” and “Unity.” The upper facade is clad with smooth painted plaster that is in deteriorated condition.

The Bancroft Way facade (south) is physically and visually separate from the Shattuck Way facade, as it faces a different direction and street frontage, making the theater's Shattuck Avenue and Bancroft Way frontages appear unrelated. The Bancroft Way facade consists of a monolithic, flat, four-story plane of unfinished board form concrete. The concrete is adorned only with vertical bands of incised lines, which terminate in subtle chevron forms at the roofline. Between the vertical bands, the roofline is very slightly corbelled. There is a low projecting bay with a service entrance approached by concrete steps on the left side of the facade. On the right side, is another projecting bay with a chain link-gated service entrance. Two metal pedestrian doors are located on the left side of the main portion of the facade, which is otherwise completely unfenestrated.

Page 3 of 8

Major spaces of the interior consist of a now-enclosed atrium, vestibule, and double-height lobby within the east-west ell. The north-south ell contains two stories of auditorium space, as well as former lounge rooms, and backstage/fly loft space. The auditorium space was once a large single-screen theater, but now consists of four small auditoriums (two over two) and a "void space" (unused space at upper front of original auditorium space, forward of mezzanine). The two lounges and backstage space have also been converted into small auditoriums. In most spaces original finishes and decorative elements have been removed or painted over.

Alterations

The two charts provide a list of alterations, outlining changes that have been made to the theater since it was constructed in 1932, as researched by Caitlin Hibma.

Date	Alteration	Source
1932	Theater built.	Permit
1940s (1943-1954)	Main lobby concession stand added. (Not included in original plans; presumably not original.)	S. Coleman reminiscence (BAHA)
1940s (1946-1965)	Original "United Artists" blade sign removed and replaced with Streamline Moderne "UA" version, Deco box marquee remained.	Historic photos
1940s	Lobby redecorated, decorative painting using scrolling foliate motifs introduced.	Gary Parks (FB)
Mid-1960s	Art Deco painted and/or plaster decorative elements on the ceiling in the main lobby removed or painted over; comparison of 1932 images to today show that bands of painted or plasterwork scallop and chevron patterns on lobby ceiling are now gone. Evidence of other painted patterns and motifs exist throughout the building and may have been painted over in 1940s, mid- 1960s, or other periods of remodeling noted below.	Carlo Chaney (FB)
1973	Single large auditorium "twinned;" divided into two smaller auditoriums. Subdivision involved and resulted in: • Suspended ceiling installed at mezzanine level; the dividing wall between the two auditoriums - font to back - does not continue above	Permit Deduced

Date	Alteration	Source
	approximately mezzanine level within void space suggesting that ceiling was installed at mezzanine level and that mezzanine was closed off/unused for a time. Void space and remaining decorative features have been obscured from view since this time. • Stage closed off, orchestra pit demolished, new partition walls/screens installed forward of orchestra pit. • Proscenium and other ornamental features and decorative painting(including lower portions of decorative organ grilles) obscured and partially destroyed up to level of new suspended ceiling. • Suspension wires for new ceiling were punched through decorative plaster work – including suspended sunburst ceiling ornament radiating from the proscenium – within void space, heavily damaging it.	
1973	Deco box marquee and Streamline Moderne blade sign removed. Flat sign board marquee (listing 2 movies) and short "UA Cinemas" projecting sign installed.	Permit, historic photo
1973	Organ removed. (Lower portions of decorative organ grilles removed to level of suspended ceiling, see above.)	Gary Parks (FB)
1973	Original theater seats replaced.	Permit
1974	Split upper level into two separate theaters. Mezzanine space divided down center resulting in 4 auditoriums; two at first floor, two at second floor. Reopening mezzanine as two additional auditoriums involved and resulted in: • Partition wall/screens installed at location of mezzanine railing. • Dividing wall between auditorium spaces continued up to original ceiling (does not continue within void space). • Majority of ornamental features and decorative painting within mezzanine auditoriums removed or painted over.	Permit
1974	Installation of wall/screens at mezzanine railing location resulted in void space at upper front of original auditorium space. Some decorative plaster work is still visible in this space but is heavily damaged and decorative painting has been painted over. Both plaster work and decorative painting are removed, damaged, or obscured throughout the rest of the original auditorium space.	Observed/deduced
ca. 1974	Flat sign board marquee enlarged (to list 4 movies for 4 auditoriums). Short projecting "UA Cinemas" sign removed, not replaced.	Historic photo.
1975	HVAC equipment and duct work installed. Ventilation ducting profuse in void area; resulted in severe damage and partial destruction of remaining ornamental plaster work.	Permit Deduced

Subject: 2274 Shattuck Avenue Project Impact Analysis
2274 Shattuck Avenue, Berkeley, California 94704

Dear Ms. Gong:

Rincon Consultants, Inc. (Rincon) was retained by the City of Berkeley (City) to conduct a historical resources impacts assessment for a proposed project at 2274 Shattuck Avenue, also known as the United Artists Theater, in Berkeley, California. The proposed project includes demolition of most of the former theater building for construction of a 17-story mixed-use commercial and residential building with 227 units. The building was previously determined eligible for listing in the National Register of Historic Places (NRHP) and is listed in the California Register of Historical Resources (CRHR). It has also been identified as a contributing building to the potential City of Berkeley Shattuck Avenue Commercial Corridor Historic District. As a result of its eligibility for the NRHP and listing in the CRHR, the subject property is a qualifying historical resource pursuant to the California Environmental Quality Act (CEQA) and as defined by Section 15064.5 of the CEQA Guidelines.

The current assessment was prepared to determine if the project conforms with the Secretary of the Interior's Standards for Rehabilitation (Standards) and would result in an impact to a historical resource.[1] Pursuant to Section 15064.5(b)(3) of the CEQA Guidelines, a project that is found to comply with the Standards generally mitigates impacts to a historical resources to a less than significant level. Methods for the current assessment included a review of project plans and relevant historic documentation and preparation of this memorandum to present the results.

The impacts assessment was conducted by Architectural Historian Project Manager JulieAnn Murphy with oversight from Cultural Resources Director Steven Treffers, both of whom meet the Secretary of the Interior's Professional Qualification Standards (PQS) for architectural history and history (36 CFR Part 61). With over 10 years of experience in historic preservation, Ms. Murphy has extensive experience with CEQA compliance reviews and historical resources assessments.

Project Description

The proposed project includes demolition of the theater portion of the 1932 United Artists building that fronts Bancroft Way and construction of a 17-story mixed-use building with 227 dwelling units (Figure 1). The residential tower portion of the building would have a stucco exterior finish with recessed aluminum windows, metal fin details, and metal spandrels. The top story would have a roof

[1] Kay Weeks and Anne Grimmer, *The Secretary of the Interior's Standards for the Treatment of Historic Properties with Guidelines for Preserving, Rehabilitating, Restoring, and Reconstructing Historic Buildings*. National Park Service, Washington, D.C., 2017.

deck with a glass railing. The Bancroft elevation would have a secondary residential entrance as well as a vehicular entrance for an accessible parking spot (Figure 2).

The one-story, double-volume portion of the building that formerly served as the theater entry on Shattuck Avenue would be partially retained. The existing storefront entry would be reconfigured for two entries – one to the residential tower offices and lobby and one for a proposed ground floor café. The existing marquee would be removed and replaced with a new awning with a simple, painted stucco finish. The bas relief details of the Art Deco façade above the marquee would be painted, while the rest of the façade would be finished in white stucco. A new vertical dimensional letter sign would be installed at the center of the decorative elevation (Figure 3).

Figure 2 Proposed Bancroft Way Elevation

Figure 3 Proposed Primary Elevation Changes

Standards for Rehabilitation

CEQA Section 21084.1 requires a lead agency to determine whether a project may have a significant effect on the environment, which includes historical resources. Impacts to a historical resource occur when there is a substantial adverse change in the significance of a resource such that it is materially impaired. Material impairment is defined as demolition or alteration "in an adverse manner [of] those characteristics of an historical resource that convey its historical significance and that justify its inclusion in, or eligibility for inclusion in, the [CRHR]." Under Section 10564.5(b)(3) of the CEQA Guidelines, a project that is found to conform with the Secretary's Standards is generally found to not result in significant impacts to historical resources under CEQA.

The Secretary's Standards make broad-brush recommendations for maintaining, repairing, and replacing historic materials, as well as designing new additions or making alterations. They cannot, in and of themselves, be used to make essential decisions about which features of a historic property should be saved and which might be changed. Rather, they provide philosophical consistency to the work. There are Secretary's Standards for four distinct, but interrelated, approaches to the treatment of historic properties: preservation, rehabilitation, restoration, and reconstruction.

The Secretary's Rehabilitation Standards are the most applicable treatment and have been utilized in the review of the current project. The Secretary's Standards for Rehabilitation state:

1. A property will be used as it was historically or be given a new use that requires minimal change to its distinctive materials, features, spaces, and spatial relationships.
2. The historic character of a property will be retained and preserved. The removal of distinctive materials or alteration of features, spaces, and spatial relationships that characterize a property will be avoided.
3. Each property will be recognized as a physical record of its time, place, and use. Changes that create a false sense of historical development, such as adding conjectural features or elements from other historic properties, will not be undertaken.
4. Changes to a property that have acquired historic significance in their own right will be retained and preserved.
5. Distinctive materials, features, finishes, and construction techniques or examples of craftsmanship that characterize a property will be preserved.
6. Deteriorated historic features will be repaired rather than replaced. Where the severity of deterioration requires replacement of a distinctive feature, the new feature will match the old in design, color, texture, and, where possible, materials. Replacement of missing features will be substantiated by documentary and physical evidence.
7. Chemical or physical treatments, if appropriate, will be undertaken using the gentlest means possible. Treatments that cause damage to historic materials will not be used.
8. Archeological resources will be protected and preserved in place. If such resources must be disturbed, mitigation measures will be undertaken.
9. New additions, exterior alterations, or related new construction will not destroy historic materials, features, and spatial relationships that characterize the property. The new work shall be differentiated from the old and will be compatible with the historic materials, features, size, scale and proportion, and massing to protect the integrity of the property and its environment.

10. New additions and adjacent or related new construction will be undertaken in such a manner that, if removed in the future, the essential form and integrity of the historic property and its environment would be unimpaired.

Historical Resources Status

In 1978, Historic Resources Inventory documentation prepared by Betty Marvin of Berkeley Architectural Heritage Association recommended 2274 Shattuck Avenue, also known as United Artists Theaters, eligible for listing in the NRHP. It was assigned a National Register Status Code (now known as California Historical Resource Status Code) "3" indicating it appeared eligible for listing in the NRHP.

In 2004-2005, the property was evaluated for the Alameda-Contra Costa County Transit East Bay Rapid Transit Project by JRP Historical Consulting and was documented on a DPR 523 Continuation Sheet. It was field checked and noted that, "it does not appear to have undergone any alteration that would warrant a change in its National Register status code." It was assigned a California Historical Resource Status Code "3S," which indicates it appears eligible for NRHP individually through survey evaluation. A subsequent Finding of Effect documentation prepared for the project as part of the Section 106 process summarized that the building was significant under Criterion A as a locally operated movie theater and Criterion C for its Art Deco architecture. As a result of this project, the building was designated in the CRHR on March 15, 2006.

In 2015, the property was evaluated as part of the Shattuck Avenue Commercial Corridor Historic Context and Survey by Archives & Architecture and was recorded on a full set of DPR 523 forms. Its evaluation found that it was historically significant to important development patterns in the downtown core and for its Art Deco architecture. It was assigned a California Historical Resource Code of "2S2" indicating it was individually determined eligible for the NRHP by consensus through Section 106 process and listed in the CRHR and "5B" indicating it is locally significant both individually and as a contributor to a multi-component resource, as part of the Shattuck Avenue Commercial Corridor Historic District. The local historic district has not been formally adopted by the City of Berkeley.

The building retains the same appearance documented and described in 2004-2005 to support its 2006 CRHR designation. There have been no visible alterations and no evidence to suggest that it would no longer be eligible for listing in the CRHR. As a result of its eligibility for the NRHP and listing in the CRHR, the subject property is a qualifying historical resource pursuant to the California Environmental Quality Act (CEQA) and as defined by Section 15064.5 of the CEQA Guidelines.

Character Defining Features

The intent of the Standards is to provide for the long-term preservation of a property's significance through the preservation of its historic materials and features. These historic materials and features are commonly referred to as character-defining features and are indispensable in a historic property's ability to convey the reasons for its historical significance. To ensure a proposed project's compliance with the Standards, a historic property's character-defining features should therefore be identified and preserved as part of the final design.

According to Preservation Brief 17, *Architectural Character: Identifying the Visual Aspects of Historic Buildings as an Aid to Preserving Their Character*, there is a three-step process to identifying character-defining features.[2] Step 1 involves assessing the distinguishing physical aspects of the exterior of the

[2] Lee H. Nelson, *Architectural Character: Identifying the Visual Aspects of Historic Buildings as an Aid to Preserving Their Character*, Preservation Brief No. 17. U.S. Department of the Interior, National Park Service, Technical Preservation Services.

building as a whole, including its setting, shape and massing, orientation, roof and roof features, projections, and openings. Step 2 looks at the building more closely—at materials, trim, secondary features, and craftsmanship. Step 3 encompasses the interior, including individual spaces, relations or sequences of spaces (floor plan), surface finishes and materials, exposed structure, and interior.

The building was recommended eligible for inclusion in the NRHP and is listed in the CRHR. Its historical significance derives from its role in the Depression-era development of Downtown Berkeley, specifically as a purpose-built entertainment venue for motion pictures and for its distinctive Art Deco design. No period of significance was identified when the building was added to the CRHR in 2006. The 2015 evaluation prepared for the Shattuck Avenue Commercial Corridor Historic District identified the building's period of significance as 1932, beginning with the building's date of constriction, and ending in 1958 to coincide with the proposed District's end of period of significance. This study recommends the period of significance from 1932, when the building was originally constructed, until 1973, when the original single-screen theater was subdivided for multiple screens, resulting in several functional and aesthetic changes to the building.

The building's character-defining features include the following:

- Irregular lot shape
- Two-part massing with theater entrance portion and theater auditorium portion
- Sheer form concrete wall with vertical speed stripes along Bancroft Way
- Recessed main entry with original tile floor
- Stepped Art Deco upper façade with tower plume on Shattuck Avenue
- Bas relief detailing of "Artistry" and "Unity" on upper façade

Project Impacts Analysis

The proposed project includes substantial demolition of the building for the construction of a 17-story residential tower to house 227 dwelling units. As detailed above, other changes include updating the one-story, double volume theater entry portion of the building for a café and residential lobby and offices at the interior and retaining and updating the Art Deco exterior. The following presents a Standards and impacts analysis of the proposed project.

Rehabilitation Standard No. 1

A property shall be used for its historic purpose or be placed in a new use that requires minimal change to the defining characteristics of the building and its site and environment.

The proposed project includes demolition of the former theater auditorium portion of the building to accommodate the construction of a 17-story residential building. Though the introduction of residential use in a former commercial building is generally compatible with Standard No. 1, the proposed demolition of approximately 75 percent of the building requires more than minimal change and would interfere with the building's character-defining features. Demolition is not considered a rehabilitation treatment under the Standards and is generally only acceptable as part of rehabilitation to remove non-historic additions or material. The proposed project would result in the removal of the building's distinctive two-part massing as well as the sheer form concrete wall with vertical speed stripes along Bancroft Way. Rehabilitation Standard No. 1 is not satisfied.

Rehabilitation Standard No. 2
The historic character of a property shall be retained and preserved. The removal of historic materials or alteration of features and spaces that characterize a property shall be avoided.

The historic character of 2274 Shattuck Avenue is comprised of the physical characteristics that reflect its significance as a building that represents the development of Downtown Berkeley during the Great Depression and for its Art Deco design. The proposed project includes retaining and updating the Shattuck Avenue elevation. The proposed work includes removing the non-historic storefront system (installed in 1989, after the period of significance) for new entries and removal of the non-historic marquee (installed in 1974, after the period of significance). It also includes retaining the character-defining Art Deco detailing, like the bas relief artwork and is consistent with Standard No. 2.

Constructed as a purpose-built entertainment venue for motion pictures, one of the essential spaces that characterizes the property is its theater auditorium. Its proposed removal is not consistent with the guidance and Rehabilitation Standard No. 2 is not satisfied.

Rehabilitation Standard No. 3
Each property shall be recognized as a physical record of its time, place, and use. Changes that create a false sense of historical development, such as adding conjectural features or architectural elements from other buildings, will not be undertaken.

The proposed project does not include the addition of conjectural features or architectural elements from other buildings. Rehabilitation Standard No. 3 is not applicable.

Rehabilitation Standard No. 4
Most properties change over time; those changes that have acquired historic significance in their own right shall be retained and preserved.

The marquee was installed in 1974, and though outside the building's period of significance, is 50 years old, the age when resources are generally accepted as historic-age. Unlike the original marquee which it replaced, the existing marquee is a mass-produced installment and does not appear to have been manufactured specifically for this building. Furthermore, it has been updated several times since its installation with additional panels and lighting. The building is significant for its role in the role in the Depression-era development of Downtown Berkeley and for its distinctive Art Deco design. The marquee is not related to either significant theme. Its proposed removal is compliant with Rehabilitation Standard No. 4.

Rehabilitation Standard No. 5
Distinctive features, finishes, and construction techniques or examples of craftsmanship that characterize a historic property shall be preserved.

As described above, many of the building's distinctive features are related to its Art Deco design. The proposed retention and rehabilitation of the Shattuck Avenue elevation is consistent with Rehabilitation Standard No. 5.

Other distinctive features, however, are related to its historic use as a movie theater. The proposed demolition that will result in the loss of the theater auditorium will result in the loss of a distinctive feature that characterizes the property and conveys its historical and architectural significance. It will also result in the loss of the form concrete wall, which demonstrates the building's construction. Rehabilitation Standard No. 5 is not met.

Rehabilitation Standard No. 6
Deteriorated historic features shall be repaired rather than replaced. Where the severity of

deterioration requires replacement of a distinctive feature, the new feature shall match the old in design, color, texture, and other visual qualities and, where possible, materials. Replacement of missing features shall be substantiated by documentary, physical, or pictorial evidence.

The proposed scope of work includes removal of existing, non-historic features like the marque, exterior cladding, and storefront system. The presence and/or condition of historic features beneath existing features is unknown. The exact treatment and approach for these project elements has not yet been determined, but could conceptually be in accordance with Rehabilitation Standard No. 6 if completed by qualified professionals and in accordance with National Park Service (NPS) guidance.

Rehabilitation Standard No. 7
Chemical or physical treatments, such as sandblasting, that cause damage to historic materials shall not be used. The surface cleaning of structures, if appropriate, shall be undertaken using the gentlest means possible.

The proposed scope of work includes removing existing paint finish on the Shattuck Avenue elevation for a new, white painted finish. Plan documents note that work will be undertaken "via approved methods that do not damage the existing stucco". Information for this analysis did not include additional details on the proposed method. This work could conceptually be in accordance with Rehabilitation Standard No. 7 if completed by qualified professionals and in accordance with National Park Service (NPS) guidance.

Rehabilitation Standard No. 8
Significant archeological resources affected by a project shall be protected and preserved. If such resources must be disturbed, mitigation measures shall be undertaken.

Because the proposed project includes ground-disturbing activities, there is a chance of encountering archaeological resources. Provisions required by the California Environmental Quality Act (CEQA) would ensure that archaeological resources, if encountered, are treated appropriately. There is nothing to suggest that work cannot be completed in accordance with Rehabilitation Standard No. 8.

Rehabilitation Standard No. 9
New additions, exterior alterations, or related new construction shall not destroy historic materials that characterize the property. The new work shall be differentiated from the old and shall be compatible with the massing, size, scale, and architectural features to protect the historic integrity of the property and its environment.

As proposed, the project includes the demolition of the former theater auditorium for a 17-story residential building. As described above, demolition is not a rehabilitation treatment and is generally only acceptable as part of rehabilitation to remove non-historic additions or material under the Standards. The proposed demolition of the theater auditorium and its replacement with a new addition is not consistent with Rehabilitation Standard No. 9.

While the proposed new residential tower is consistent with the Standards in that it would be differentiated from the historic through the use of compatible, yet distinctive materials, it is not compatible with the massing, size, and scale of the historic building. Guidance from Preservation Brief 14, *New Exterior Additions to Historic Buildings: Preservation Concerns* explains that large additions to historic buildings are seldom found to be compatible.[3] Though the design is consistent with NPS

[3] Anne E. Grimmer and Kay D. Weeks. *New Exterior Additions to Historic Buildings: Preservation Concerns*, Preservation Brief No. 14. U.S. Department of the Interior, National Park Service, Technical Preservation Services.

guidance that suggests that new large additions can be successful if they read as a separate volume, as proposed here, the scale, massing, and proportions of the addition still need to be compatible with the historic building. A 17-story tower addition to a one-story, double volume building is not consistent with the existing scale, massing, and proportions. The proposed project is not consistent with Rehabilitation Standard No. 9.

Rehabilitation Standard No. 10
New additions and adjacent or related new construction will be undertaken in such a manner that if removed in the future, the essential form and integrity of the historic property and its environment would be unimpaired.

Because the proposed addition requires the demolition of a substantial portion of the building, the essential form and integrity of the historic property would be lost to accommodate the new addition. The proposed project is not consistent with Rehabilitation Standard No. 10.

Conclusions

As detailed above, several elements of the proposed project are not consistent with the Secretary of the Interior's Standards for Rehabilitation. Although the alteration of the character-defining features should typically be avoided, their alteration does not automatically amount to a substantial adverse change causing material impairment. Pursuant to Section 15064.5(b) of the CEQA Guidelines, material impairment of a historical resource occurs when a property is altered such that it is no longer able to convey its historical significance. The proposed project would result in material impairment. Though several aspects of its distinctive Art Deco design are proposed to be retained, the proposed demolition of the former theater auditorium would result in loss of integrity of design, materials, workmanship, feeling and association. It would no longer reflect its historic significance for its role in the Depression-era development of Downtown Berkeley, specifically as a purpose-built entertainment venue for motion pictures. The proposed project would result in a substantial adverse change and it would no longer retain its architectural and historic identity for which it is significant, resulting in a ***significant and unavoidable impact to historical resources*** pursuant to CEQA. Should you have any questions or comments regarding this report, please do not hesitate to contact me at 925-326-1159 or at jmurphy@rinconconsultants.com.

RE: 2274 Shattuck Avenue - AB 1633/Class 32 CEQA Exemption (ZP2023-0079)

The following is a brief summary of the legal authorities and substantial evidence that support the applicant's request for Class 32 CEQA exemption under AB 1633 (Gov. Code § 65589.5(h).)

1. A California Register designation, for CEQA purposes, does not apply *de facto* to the entirety of the building. CEQA requires analysis of the potential impacts of the proposed project to the *character defining features* of the property.

Legal Authorities:

Pub. Res. Code § 21084.1:
A project that may cause a ***substantial adverse change*** in the significance of an ***historical resource*** is a project that may have a significant effect on the environment.

CEQA Guidelines 15064.5:
"(a) For purposes of this section, the term "***historical resources***" shall include… A resource listed in… the California Register of Historical Resources.
…
(b) A project… that may cause a substantial adverse change in the significance of an historical resource is a project that may have a significant effect on the environment.

> (1) ***Substantial adverse change*** in the significance of an historical resource means physical ***demolition***, destruction, relocation, or alteration of the resource or its immediate surroundings ***such that the significance of an historical resource would be materially impaired***.

> (2) The significance of an historical resource is ***materially impaired*** when a project:
>
> (A) Demolishes or ***materially alters in an adverse manner*** those ***physical characteristics of an historical resource that convey its historical significance*** and that justify its inclusion in… the California Register.

Interior features of a building that are not visible to the public cannot be evaluated under CEQA. *Martin v. San Francisco*. The Historic Resources Evaluation (HRE) took a conservative approach and evaluated the site's latent interior features. The HRE concluded that, overall, the site has lost historical integrity, however the Shattuck façade contributes to the proposed Shattuck Avenue Commercial Corridor.

2. Under CEQA, a City may find a project exempt even if the property is listed on the California Register and portions of the property are proposed for demolition.

As noted above, the inquiry under CEQA is whether demolition would cause a substantial adverse change to the property such that the significance of the historical resource would be materially impaired. CEQA does not categorically state that any demolition would cause a significant impact on a listed historical resource.

In addition, if an architectural historian determines that a project is consistent with the Secretary of Interior (SOI) standards, that finding supports a CEQA exemption.

Legal Authorities:

CEQA Guidelines 15064.5(b)(3)
Generally, ***a project that follows the Secretary of the Interior's Standards… shall be considered as mitigated to a level of less than a significant impact on the historical resource***.

Historic Architecture All. v. City of Laguna Beach (2024) 96 Cal.App. 5th 186:
Substantial evidence supported the CEQA exemption, based on the finding that the ***project was consistent with SOI Standards***.
→ same rationale applies to projects listed on California Register.

4. Under AB 1633, a City must find a project exempt if the applicant provides substantial evidence (i.e., expert testimony or report) to support the exemption.

Prior to AB1633, under the traditional substantial evidence test, if there was a disagreement among experts, the lead agency would have discretion to choose between the two competing reports to determine whether a CEQA exemption was viable.

AB 1633 changes the standard of review for high-density infill residential projects. If substantial evidence supports a CEQA exemption for high-density housing project, but the City does not determine the project to be exempt, the refusal to apply a CEQA exemption constitutes an abuse of discretion. ***Expert peer reviews therefore have no legal effect on AB1633 projects*.**

Legal Authorities:

> Gov. Code § 65589.5(h)(6):
> "Abuse of discretion" means that [there is substantial evidence in the record before the local agency that the housing development project is eligible for an exemption sought by the applicant] but the local agency does not determine that the project is exempt from [CEQA].

5. Here, the HRE and Project Impact Analysis establish that the proposed project would not cause a substantial adverse change to the remaining physical characteristics that convey the site's historical significance.

- The HRE concluded that the theater has lost nearly all of its historical integrity. BAHA, four out of five LPC members who attended site tours, and all others who viewed the site concur.

- The upper portion of the Shattuck façade contributes to proposed Shattuck Avenue Commercial Corridor (this is consistent with the 2015 survey finding that "The theater is a Contributor to the [proposed] Shattuck Avenue Downtown Historic District."

- The HRE and Project Impact Analysis constitute substantial evidence to support a finding that the proposed project will *not* cause a *substantial change* in the significance of a historical resource. **I.e., demolition of the theater, and other portions of the site that no longer have historical integrity, does not constitute a significant impact under CEQA**.

- The Project Impact Analysis establishes that the proposed project is consistent with SOI standards. The proposed project would restore and preserve the upper portion of the Shattuck façade.

- The LPC also confirmed the HRE's findings when it refused to designate the Bancroft façade, theater walls and roof as historical features.

- The 2015 evaluation suggested the Bancroft façade had potentially eligible features, however, this finding was inconsistent with the 1978 report, which served as the main basis for listing property on the California Register in 2006. The HRE reviewed this discrepancy and concluded that the Bancroft façade does not exhibit sufficiently ornate or exuberant features and therefore does not convey the site's Art Deco intent.

- The 2023 HRE is the only detailed, site specific historical analysis of the property. The 1978 report did not follow the current methodology for architectural historians; the 2005 and 2015 surveys largely borrowed from the 1978 report with cursory review of the site.

Based on the above and the letter submitted on March 4, the project is exempt from CEQA as a matter of law under AB 1633, pursuant to the Class 32 and 31 exemptions.

WARNING: This is not a City of Berkeley email. Do not click links or attachments unless you trust the sender and know the content is safe.

Dear Berkeley city staff, ZAB, and City Council,

I'm writing to BEG that city staff, the ZAB, and the City Council take action to prevent the destruction of the historic United Artists theater at 2274 Shattuck Ave. in downtown Berkeley. It is unacceptable to let a developer retain a fraction of the facade and lobby while tearing down the palatial four-story theater itself.

Built in 1932, the UA is on the California Register of Historical Resources, is National Register-eligible, and is also now a city landmark, thanks to an LPC decision earlier this year. Without a doubt, the building is a cultural and historical resource under the CEQA statute; the proposal to demolish it is a "substantial adverse change" requiring extensive CEQA review. The city must insist that all oversight laws and processes are followed and not give baseless exemptions to the developer.

Constructed during the Great Depression by Hollywood icons Charlie Chaplin and Mary Pickford, the UA Berkeley is arguably the finest theater ever built in the city and one of the few Art Deco movie palaces of its kind in the state that could be preserved. Despite being converted to a multiplex 50 years ago, the theater is resplendent with Art Deco architectural detail, decor, and furnishings; it has been relatively well-maintained over the decades, its historic features surviving various retrofits thanks to local preservationists who insisted the original auditorium be preserved behind false walls. The Historical Resource Evaluation on the UA, paid for by the developer, is not an honest and credible assessment; it would be unethical for city officials to consider this document the final word on the status of this landmark property.

The UA presents a tremendous opportunity for Berkeley. It has the potential to be restored as a glorious, midsize live performance venue like Oakland's Paramount, galvanizing an economic and cultural renaissance in the downtown. The many cities in the Bay Area and nationwide that have chosen to preserve their historic theaters never regret doing so. Another option is for the UA to remain a historic multiplex theater that serves a public eager to resume moviegoing after the pandemic. The future possibilities for this splendid building are numerous—but not if complacent city leaders allow a developer to level it into oblivion.

Berkeley citizens are watching with alarm as a mass extinction event for movie theaters unfolds: The Shattuck Cinemas has been freshly demolished while the beloved Art Deco California and the most valuable of them all, the UA, sit on the precipice of ruin. This all goes against the city's Downtown Area Plan, which was the product of over 200 public meetings and explicitly calls for the retention and support of downtown cinemas. This plan is still in effect.

Building more housing is no doubt vitally important, but it does not have to cost Berkeley one of its most magnificent landmark buildings in the UA. City officials must maintain control over land use decisions, fostering downtown development that maintains a mix of arts and

culture and commerce alongside residential growth.

The UA Berkeley served as a community hub and entertainment venue for 91 years, and that tradition should continue. Its destruction would be an irreparable blow to the city's historic and cultural fabric that leaders must avoid at all costs.

Thank you for your consideration.

Dear Berkeley City Planners:

As a Berkeley resident, I find the buildings that I walk past each day very important. The atmosphere of the city is greatly affected by the look of the architecture, and there is also the question of the atmosphere that we literally breathe. The residents of California, by requiring a review before a building is demolished, per the California Environmental Quality Act (CEQA), are recognizing that changes to architecture can affect much more than the look of the building.

Please do not exempt the plan to change the UA Theatre on Shattuck Ave., a large development project, from a review per CEQA guidelines. Any mistakes in that busy area could affect a high number of people.

Thank you,

Christine U'Ren

Dear Secretary Crane (or to whom it may concern):

I am a Berkeley resident and attended part of the February meeting about the UA cinema demolition. I was glad to see in Berkeleyside that you at least voted to landmark the marquee of the UA (I missed the vote counting). I'm hoping this means Panoramic/Patrick Kennedy must preserve the original shape of the central column of the decorative facade. It's good that Panoramic's plan at least preserves the Artistry/Unity bas-reliefs, but turning the central column into a block without the graceful Art Deco curves, as their mockup shows, destroys much of the charm of the marquee. Can you tell me what the landmark decision means for this portion of the building?

I also wanted to express my concern about the evaluation made by Left Coast Architectural History. As one of the commission members pointed out, the evaluator used "uniqueness" as a prime factor in determining her valuation of the UA, even though that is not part of what she was commissioned to investigate. She announced at the meeting that she felt the Berkeley Public Library ticked off the boxes for community service, entertainment, and Art Deco styling, and that, since it is in the same block as the UA, it's not necessary to keep both buildings. I find this logic appalling. First of all, the two buildings, although they may both be classified as Art Deco, do not look at all the same. Second, there's a difference between a library and a cinema, in terms of public offerings. Third, there is no reason on Earth that a town or even a block cannot support two Art Deco buildings at the same time. Part of a city council's duties, in my opinion, is the consideration of how buildings in a downtown work *together*, and it's obvious that it makes no sense to require that each building represent a different architectural movement.

I don't think you should continue to use Left Coast as an architectural advisor.

I am copying BAHA on this message, because I understand they are advising Mr. Kennedy on the development.

Thank you; I look forward to your answer.

WARNING: This is not a City of Berkeley email. Do not click links or attachments unless you trust the sender and know the content is safe.

How could you even consider letting yet another giant apartment building destroy Berkeley's history and culture? Berkeley needs more housing just like NYC needs it. It is not Berkeley's responsibility to house every person in Northern California. It used to be a nice small town and it's become a metroplolis of massive apartment buildings, traffic and sterility. As a lifelong resident/worker/UCB graduate I am saddened by the lack of historic preservation and concern for culture and quaintness. This is no longer my old hometown. As pro-developers, you probably consider it "progress" but I consider it "erasure".

Sadly,

WARNING: This is not a City of Berkeley email. Do not click links or attachments unless you trust the sender and know the content is safe.

Dear Anne, Sharon, Planning Dep't, ZAB, and City Council,

I'm writing to request that you do everything within your power to save the historic UA Berkeley theatre.

My name is Diana Naparst and I'm a Berkeley resident. I grew up in Berkeley and since childhood have been to the UA Theater countless times, as well as to all the other wonderful movie theatres that used to populate the downtown area. I am a true cinephile, in large part because of that formative experience of attending films at theatres. The UA is the last standing movie theatre in downtown, and as such must be preserved as a venue for culture – whether a return to being a multi-plex or a live performance venue such as the Paramount or what is taking place at the Castro Theater in SF. When that happens, it will truly revitalize downtown Berkeley and especially that stretch of Shattuck, which has lost so much of its vibrance since all the movie theatres shut down.

If the UA were to be demolished, The Elmwood would be the only one remaining movie theatre in the entire city of Berkeley – which would be a disgrace considering Berkeley's rich history as a showplace of film.

I would appreciate a response to this email, with any updates on your plans regarding the UA Theater.

Thank you,
Diana

"In the name of daybreak and the eyelids of morning and the wayfaring moon and the night when it departs, I swear I will not dishonor my soul with hatred, but offer myself humbly as a guardian of nature, a healer of misery, a messenger of wonder and an architect of peace." -- Diane Ackerman

Subject: Save the United Artists Theater- No developer exemption to CEQA
Date: Saturday, August 17, 2024 3:42:49 PM

WARNING: This is not a City of Berkeley email. Do not click links or attachments unless you trust the sender and know the content is safe.

To Ms/Mr Klein, Gong, Brown, and Hersch:

I'm writing to urge you to require that the developer, Panoramic, be required to submit to the CEQA review. The developer's proposal would destroy the internal theater itself, that should be protected as an historical landmark.

My understanding is that CEQA review allows more time and resources for expert and citizen evaluation of the proposal to demolish the theater. It takes more time to consider the ramifications of destroying what is considered a historic and cultural resource under state law. There could potentially be a public CEQA meeting. If the exemption is granted and citizens are denied this process, then the theater is much more likely to be destroyed.
The city already informed the developer that the project should undergo CEQA review, in January. To grant the developer an exemption now would be unfair and unethical and represent a total reversal by the city in favor of the developer — it should not go back on its commitment to enforce and oversee the CEQA evaluation process.
—The public deserves transparency. An exemption to CEQA would deny the public a chance to learn more about the historic and cultural resources that stand to be lost if this theater is demolished. This theater and citizens deserve a public CEQA meeting and further expert evaluation of the development proposal.

Rather than destroying the heart of the theater, it would have great potential. The UA Berkeley could be restored as a glorious mid-size theater featuring live performance and film, like the Paramount in Oakland.
I hope that you will decide in favor of a longer process in which the public has the opportunity for more input.

Sincerely,
Wendy Stock

WARNING: This is not a City of Berkeley email. Do not click links or attachments unless you trust the sender and know the content is safe.

Dear Ms. Gong,

The United Artists (UA) Theatre is one of the four most significant 1930s Art Deco theatres in the greater Bay Area. The other three have been restored. The UA is a landmark whose proposed demolition requires a full CEQA evaluation under state law. While now a resident of Alameda County, who is in Berkeley often for cultural events, I once was on the Board of the Preservation Action Council of San Jose, and I am familiar with this required process in such cases.

I have worked professionally on the restorations of a good dozen theatres in the greater Bay Area. I know what is meant when I say that the UA is unique among them. Don't let the dull multiplex partitions, wall fabric and maze of modern hallways fool you. There is an auditorium behind them that is 80 to 90% intact and potentially useable again.

Claims that the building is in poor structural condition are simply not true. All buildings in the Bay Area of such vintage require some degree of seismic strengthening, of course, but this is a steel reinforced concrete structure. It is not flimsy.

CEQA Review for the United Artists Theatre. It is required, because it is the principled thing to do.

Sincerely,
Gary Lee Parks

Dear Berkeley city staff, ZAB, and City Council,

I am a Berkeley resident for 30 years. I teach film at two colleges and write about films.

I'm writing to demand that city staff, the Zoning Adjustments Board, and the City Council take action to prevent the destruction of the historic United Artists theater at 2274 Shattuck Ave. in downtown Berkeley. It is unacceptable to let a developer retain a fraction of the facade and lobby while tearing down the palatial four-story theater itself.

Built in 1932, the UA is on the California Register of Historical Resources, is National Register-eligible, and is also now a city landmark, thanks to an LPC decision earlier this year. Without a doubt, the building is a cultural and historical resource under the CEQA statute; the proposal to demolish it is a "substantial adverse change" requiring extensive CEQA review. The city must insist that all oversight laws and processes are followed and not give baseless exemptions to the developer.

Constructed during the Great Depression by Hollywood icons Charlie Chaplin and Mary Pickford, the UA Berkeley is arguably the finest theater ever built in the city and one of the few Art Deco movie palaces of its kind in the state that could be preserved. Despite being converted to a multiplex 50 years ago, the theater is resplendent with Art Deco architectural detail, decor, and furnishings; it has been relatively well-maintained over the decades, its historic features surviving various retrofits thanks to local preservationists who insisted the original auditorium be preserved behind false walls. The Historical Resource Evaluation on the UA, paid for by the developer, is not an honest and credible assessment; it would be unethical for city officials to consider this document the final word on the status of this landmark property.

The UA presents a tremendous opportunity for Berkeley. It has the potential to be restored as a glorious, midsize live performance venue like Oakland's Paramount, galvanizing an economic and cultural renaissance in the downtown. The many cities in the Bay Area and nationwide that have chosen to preserve their historic theaters never regret doing so. Another option is for the UA to remain a historic multiplex theater that serves a public eager to resume moviegoing after the pandemic. The future possibilities for this splendid building are numerous—but not if complacent city leaders allow a developer to level it into oblivion.

Berkeley citizens are watching with alarm as a mass extinction event for movie theaters unfolds: The Shattuck Cinemas has been freshly demolished while the beloved art deco California and the most valuable of them all, the UA, sit on the precipice of ruin. This all goes against the city's Downtown Area Plan, which was the product of over 200 public meetings and explicitly calls for the retention and support of downtown cinemas. This plan is still in effect.

Building more housing is no doubt vitally important, but it does not have to cost Berkeley one

of its most magnificent landmark buildings in the UA. City officials must maintain control over land use decisions, fostering downtown development that maintains a mix of arts and culture and commerce alongside residential growth.

The UA Berkeley served as a community hub and entertainment venue for 91 years, and that tradition should continue. Its destruction would be an irreparable blow to the city's historic and cultural fabric that leaders must avoid at all costs.

Thank you for your consideration.

Subject:	No CEQA exemption for developer of 2274 Shattuck Ave!
Date:	Saturday, August 24, 2024 2:25:47 PM

WARNING: This is not a City of Berkeley email. Do not click links or attachments unless you trust the sender and know the content is safe.

Greetings. As a longtime Berkeley resident and lover of the art of film, I write to urge a full CEQA evaluation for the UA Theater building, the last remaining commercial theater building in downtown Berkeley and a state and local historical landmark, eligible for the National Register of Historic Buildings.

People who don't attend films, or value theaters with the big screens necessary to appreciate films fully, were quick to assume that the decline in movie attendance during covid, concomitant with the advent of streaming services, meant the end of the viability of movie theaters. But many people are discovering that streaming services are more expensive and less satisfactory than promised, and that films continue to be made that cannot adequately be viewed on a home screen. And they are remembering the pleasures of going out for entertainment. As UC Berkeley increases enrollment, there are ever more students looking for entertainment and the pleasures of seeing movies in a movie theater.

Berkeley NEEDS the UA Theatre! The city decisions that have given preference to new residential buildings, most of which include only a few units for middle and low income renters, over the diverse, affordable cultural resource that our downtown movie theaters once embodied, are extremely shortsighted. They're providing more housing for people who can afford it in downtown Berkeley, with less for them to do in terms of affordable entertainment and now no venues for the art of film, apart from the UCB Pacific Film Archive, an academic venue which nonetheless sells out screenings that invite a broader audience.

I write to urge that the city council, the planning department, and Zoning Adjustments Board support city planner Sharon Gong in requiring the developer of the 2274 Shattuck Avenue to undergo a full CEQA evaluation. And I urge all concerned with the health and vibrancy of the city of Berkeley to commit to save the movie theater as designed for use by the residents of Berkeley and surrounding cities.

The United Artists Theater opening in Berkeley in 1932 with Mary Pickford and Bing Crosby in attendance was a great event. The Art Deco design and interior decor were lavish, fitting for a movie palace to help bring people pleasure during the Depression. We need to protect the architectural treasures of earlier periods as well as ensure equally significant structures into the future if Berkeley is to achieve and maintain its stature as a city that provides a rich and diverse culture for its residents.

Sincerely,
Charlene M. Woodcock

WARNING: This is not a City of Berkeley email. Do not click links or attachments unless you trust the sender and know the content is safe.

Dear City of Berkeley councilmembers, city attorney, board members and staff,

As a Berkeley homeowner, independent businessperson, and Cal graduate, I am writing to urge you NOT to allow a CEQA exemption for the developer that intends to destroy our historic UA Theater on Shattuck Avenue.

Please note these irrefutable points in defense of protecting this last—and most architecturally sublime—of the three downtown theaters that have been shut down (two of which are now beyond resurrection).

- The city's Downtown Area Plan calls for the "retention" and "support" of downtown cinemas. Do not abandon this crucial cultural anchor—and architectural gem—at the heart of our city.
- CEQA is still in effect in California and applies in this case. Project planner Sharon Gong told the developer as much in a letter in January.
- The UA is a landmark building whose proposed demolition requires a full CEQA evaluation under state law. It would be unconscionable to give CEQA exemptions to a developer. The public deserves a transparent CEQA process.
- Despite what the developer purports, several experts in theater restoration in the Bay Area and in Los Angeles confirm (from visits they have made to the UA), the theater can be restored to its original glory as an art-deco palace on par with Oakland's Paramount and Fox theaters, which have been key in revitalizing that city's downtown.
- Berkeley has only one remaining theater (at the border with Oakland), and downtown is virtually a ghost town. Where can students (and the rest of Berkeley citizens looking for an affordable night of entertainment) go, if not to the movies?
- Yes, Berkeley needs *affordable and low-income* housing, but not a soaring 17-story apartment complex (with only 10% "affordable" units) that will destroy the last remaining true architectural gem in the city...one that when restored will bring a resurgence of culture and excitement to our downtown. For years now, uptown Oakland has become the "there there," while Berkeley has ignored its forward-looking Downtown Plan to the detriment of its cultural offerings, its architectural aesthetic, and its civic pride.

Thank you for doing the right thing for your current and future residents, business owners, and visitors. We still have an invaluable treasure lying just under the surface of a few walls at the (slowly beating) heart of our downtown.

RE: Response to AB 1633 Notice for Use Permit #ZP2023-0079 – 2274 Shattuck Avenue

Dear Mr. Baral,

The City of Berkeley has received the AB 1633 Notice of CEQA Exemption prepared by Hanson Bridgett, LLC, dated March 4, 2024, with the attached technical reports (Traffic Impact Analysis, Historic Resource Evaluation, Project Impacts Analysis, and Air Quality, Noise, and Water Quality reports). With this letter, staff is fulfilling its obligation to provide a determination on the AB 1633 Notice within 180 days, plus the extension of time in the Tolling Agreement executed on September 3, 2024.

Staff has determined that this project meets the criteria for a Categorical exemption pursuant to CEQA Guidelines, Section 15332, "In-Fill Development Projects" (Class 32).

Next Steps

1. ZAB Decision. Pursuant to Government Code Section 65950, the project shall be approved or disapproved within 60 days of staff's determination that the project is exempt from CEQA (December 3, 2024). However, the Berkeley Municipal Code requires the permit application to undergo Preliminary Design Review (DRCP2023-0008) at a public meeting before the Design Review Committee (DRC) prior to a decision on the use permit (ZP2023-0079) by the Zoning Adjustments Board (ZAB). The earliest that the design review application can be scheduled for DRC review is November 21, 2024. Following the DRC review, the earliest that the permit application can be scheduled for a decision hearing before the ZAB is December 14, 2024.

   Pursuant to Government Code Section 65957, the project applicant and lead agency may extend the time limit once, up to 90 days, by mutual written agreement. To meet the time limits afforded by Section 65950, staff is recommending a time extension agreement to allow the DRC meeting to occur on November 21 and ZAB hearing to occur on December 14.

   Please provide written confirmation that you agree to an extension of the time limit set forth in Government Code section 65950.

2. Notice of Exemption. The City will be filing the Notice of Exemption (NOE) for projects that go to the ZAB or City Council. Filing the NOE starts a 35-day statute of limitations period on legal challenges to the agency's decision that a project is exempt from CEQA. If the NOE is not filed, a 180- day statute of limitations applies. The NOE needs to be filed with the State Clearinghouse and with the County Clerk's office. The City will post with the State Clearinghouse, but the posting with the County Clerk's office can be done by either the City or the applicant. If the City completes the posting, there is a fee of $920. Otherwise, the applicant can file with the County and provide the $50 filing fee directly to the County. The NOE is filed after the use permit becomes effective.

   Please complete the attached form to state your preference and return it to me via email.

Note that additional information may be required to correct, clarify, or amplify the materials submitted in the application, to prepare the project for a ZAB decision hearing. Please provide the information requested by staff in a timely manner in order to maintain the discussed project schedule.

Please feel free to contact me with any questions regarding this letter or your application.

Sincerely,

Sharon Gong

Project Address/Permit # (ZP): _____

Subject: Private Projects – Filing Notice of Exemption (NOE) form with the Alameda County Clerk-Recorder

---

Following decision-maker approval of a project exempt from the provisions of the California Environmental Quality Act (CEQA), a NOE may be filed with the Alameda County Clerk-Recorder. It is strongly recommended that the NOE be filed in a timely manner. The filing of a NOE starts a 35-day statute of limitations period on legal challenges to the agency's decision that the project is exempt from the provisions of CEQA. If the NOE is not filed a 180-day statute of limitations will apply, refer to CEQA Guidelines Section 15062(d). Please note that recent legislation requires the City to file the NOE with the State Clearinghouse in the Office of Planning and Research.

Please review the attached NOE and indicate how you would like to proceed with filing by selecting one of the options below:

- ☐ **Berkeley Planning & Development to file the NOE**: Within 30-days of deeming the project complete, the Applicant will be invoiced for the NOE filing fee, refer to the current fee schedule linked here. Please note that Berkeley Planning staff will schedule the public hearing once all outstanding fees are paid. Once the project receives final approval and after the 15-day appeal period expires, Berkeley Planning staff will file the NOE with the Alameda County Clerk-Recorder and the State Clearinghouse.
- ☐ **Applicant to file the NOE**: Applicant shall submit a copy to the Alameda County Clerk-Recorder in accordance with CEQA Guidelines Section 15062 after the project receives final approval and the 14-day appeal period expires. The Office of the County Clerk-Recorder is located at 1106 Madison Street, Oakland, CA 94607. The Clerk will stamp the NOE, return the original set, and post the NOE for a period of 30 days. Once recorded, the applicant shall provide a stamped copy to the Berkeley Planning staff person assigned to the project. Refer to Alameda County Clerk-Recorder's website linked here for more information on hours of operation, fees, and payment methods.

Applicant Name (please print): _____

Applicant Signature: _____

Date: _____

Please note that categorical exemptions are not subject to the California Department of Fish and Wildlife environmental document filing fee and do not require a no effect determination (Cal. Code Regs., tit. 14, §§ 15260-15333; Fish & Game Code §711.4, subd. (d)(1)).

Please note that recent legislation requires the City to file the NOE with the State Clearinghouse in the Office of Planning and Research.

Please review the attached NOE and indicate how you would like to proceed with filing by selecting one of the options below:

- ☐ **Berkeley Planning & Development to file the NOE**: Within 30-days of deeming the project complete, the Applicant will be invoiced for the NOE filing fee, refer to the current fee schedule linked here. Please note that Berkeley Planning staff will schedule the public hearing once all outstanding fees are paid. Once the project receives final approval and after the 15-day appeal period expires, Berkeley Planning staff will file the NOE with the Alameda County Clerk-Recorder and the State Clearinghouse.
- ☒ **Applicant to file the NOE**: Applicant shall submit a copy to the Alameda County Clerk-Recorder in accordance with CEQA Guidelines Section 15062 after the project receives final approval and the 14-day appeal period expires. The Office of the County Clerk-Recorder is located at 1106 Madison Street, Oakland, CA 94607. The Clerk will stamp the NOE, return the original set, and post the NOE for a period of 30 days. Once recorded, the applicant shall provide a stamped copy to the Berkeley Planning staff person assigned to the project. Refer to Alameda County Clerk-Recorder's website linked here for more information on hours of operation, fees, and payment methods.

Applicant Name (please print): Isaiah Stackhouse, Principal, Trachtenberg Architects

Applicant Signature: Isaiah Stackhouse

Date: 10.08.2024

Please note that categorical exemptions are not subject to the California Department of Fish and Wildlife environmental document filing fee and do not require a no effect determination (Cal. Code Regs., tit. 14, §§ 15260-15333; Fish & Game Code §711.4, subd. (d)(1)).

	PROJECT: 2274 Shattuck Avenue, Use Permit #ZP2023-0079 To demolish the commercial building (preserving and renovating the front façade and lobby), and construct a 17-story (183 feet, plus five-foot parapet), 214,032-square-foot, mixed-use building with 227 dwelling units (including 23 Very Low-Income Density Bonus qualifying units). **CEQA RECOMMENDATION:** Categorically exempt pursuant to Section 15332 of the CEQA Guidelines ("Infill Development Projects").
Submit written comments: Land Use Division Attn: ZAB Secretary 1947 Center Street, Second Floor Berkeley, CA 94704 or via e-mail: **zab@berkeleyca.gov**	**All persons are welcome to attend the hearing virtually or in person. Comments may be made verbally at the public hearing and/or in writing before the hearing.** If your contact information is included in any communication to the Board, it will become part of the public record, and will be accessible on the City Website. All **application materials** are available by searching the address or permit number under the Zoning tab at https://aca.cityofberkeley.info/CitizenAccess/Welcome.aspx. **Draft agenda** posted online 14 days before the hearing. **Final agenda with Zoom link and staff reports** posted online six days before the hearing. Visit https://berkeleyca.gov/your-government/boards-commissions/zoning-adjustments-board and click on the hearing date to access the most up-to-date meeting information, or call the Land Use Planning division (510) 981-7410. **Disability-related accommodation(s) requests** to participate in the meeting, including auxiliary aids or services, please contact the Disability Services specialist at 981-6418(V) or 981-6347(TDD) at least three business days before the meeting date.
Post and Mail Date: **November 26, 2024**	
NOTICE CONCERNING YOUR LEGAL RIGHTS: If you challenge the decision of the City in court, you may be limited to raising only those issues you or someone else raised at the public hearing.

WARNING: This is not a City of Berkeley email. Do not click links or attachments unless you trust the sender and know the content is safe.

Dear Berkeley city staff, ZAB, and City Council,

I'm writing to demand that city staff, the Zoning Adjustments Board, and the City Council take action to prevent the destruction of the historic United Artists theater at 2274 Shattuck Ave. in downtown Berkeley. It is unacceptable to let a developer retain a fraction of the facade and lobby while tearing down the palatial four-story theater itself.

Built in 1932, the UA is on the California Register of Historical Resources, is National Register-eligible, and is also now a city landmark, thanks to an LPC decision earlier this year. Without a doubt, the building is a cultural and historical resource under the CEQA statute; the proposal to demolish it is a "substantial adverse change" requiring extensive CEQA review. The city must insist that all oversight laws and processes are followed and not give baseless exemptions to the developer.

Constructed during the Great Depression by Hollywood icons Charlie Chaplin and Mary Pickford, the UA Berkeley is arguably the finest theater ever built in the city and one of the few Art Deco movie palaces of its kind in the state that could be preserved. Despite being converted to a multiplex 50 years ago, the theater is resplendent with Art Deco architectural detail, decor, and furnishings; it has been relatively well-maintained over the decades, its historic features surviving various retrofits thanks to local preservationists who insisted the original auditorium be preserved behind false walls. The Historical Resource Evaluation on the UA, paid for by the developer, is not an honest and credible assessment; it would be unethical for city officials to consider this document the final word on the status of this landmark property.

The UA presents a tremendous opportunity for Berkeley. It has the potential to be restored as a glorious, midsize live performance venue like Oakland's Paramount, galvanizing an economic and cultural renaissance in the downtown. The many cities in the Bay Area and nationwide that have chosen to preserve their historic theaters never regret doing so. Another option is for the UA to remain a historic multiplex theater that serves a public eager to resume moviegoing after the pandemic. The future possibilities for this splendid building are numerous—but not if complacent city leaders allow a developer to level it into oblivion.

Berkeley citizens are watching with alarm as a mass extinction event for movie theaters unfolds: The Shattuck Cinemas has been freshly demolished while the beloved art deco California and the most valuable of them all, the UA, sit on the precipice of ruin. This all goes against the city's Downtown Area Plan, which was the product of over 200 public meetings and explicitly calls for the retention and support of downtown cinemas. This plan is still in effect.

Building more housing is no doubt vitally important, but it does not have to cost Berkeley one of its most magnificent landmark buildings in the UA. City officials must maintain control over land use decisions, fostering downtown development that maintains a mix of arts and

culture and commerce alongside residential growth.

The UA Berkeley served as a community hub and entertainment venue for 91 years, and that tradition should continue. Its destruction would be an irreparable blow to the city's historic and cultural fabric that leaders must avoid at all costs.

Thank you for your consideration.

WARNING: This is not a City of Berkeley email. Do not click links or attachments unless you trust the sender and know the content is safe.

Dear Berkeley city staff, ZAB, and City Council,

As someone who has lived in Berkeley for over 50 years I'm writing to demand that city staff, the Zoning Adjustments Board, and the City Council take action to prevent the destruction of the historic United Artists theater at 2274 Shattuck Ave. in downtown Berkeley. It is unacceptable to let a developer retain a fraction of the facade and lobby while tearing down the palatial four-story theater itself.

Built in 1932, the UA is on the California Register of Historical Resources, is National Register-eligible, and is also now a city landmark, thanks to an LPC decision earlier this year. Without a doubt, the building is a cultural and historical resource under the CEQA statute; the proposal to demolish it is a "substantial adverse change" requiring extensive CEQA review. The city must insist that all oversight laws and processes are followed and not give baseless exemptions to the developer.

Constructed during the Great Depression by Hollywood icons Charlie Chaplin and Mary Pickford, the UA Berkeley is arguably the finest theater ever built in the city and one of the few Art Deco movie palaces of its kind in the state that could be preserved. Despite being converted to a multiplex 50 years ago, the theater is resplendent with Art Deco architectural detail, decor, and furnishings; it has been relatively well-maintained over the decades, its historic features surviving various retrofits thanks to local preservationists who insisted the original auditorium be preserved behind false walls. The Historical Resource Evaluation on the UA, paid for by the developer, is not an honest and credible assessment; it would be unethical for city officials to consider this document the final word on the status of this landmark property.

The UA presents a tremendous opportunity for Berkeley. It has the potential to be restored as a glorious, midsize live performance venue like Oakland's Paramount, galvanizing an economic and cultural renaissance in the downtown. The many cities in the Bay Area and nationwide that have chosen to preserve their historic theaters never regret doing so. Another option is for the UA to remain a historic multiplex theater that serves a public eager to resume moviegoing after the pandemic. The future possibilities for this splendid building are numerous—but not if complacent city leaders allow a developer to level it into oblivion.

Berkeley citizens are watching with alarm as a mass extinction event for movie theaters unfolds: The Shattuck Cinemas has been freshly demolished while the beloved art deco California and the most valuable of them all, the UA, sit on the precipice of ruin. This all goes against the city's Downtown Area Plan, which was the product of over 200 public meetings and explicitly calls for the retention and support of downtown cinemas. This plan is still in effect.

Building more housing is no doubt vitally important, but it does not have to cost Berkeley one of its most magnificent landmark buildings in the UA. City officials must maintain control

over land use decisions, fostering downtown development that maintains a mix of arts and culture and commerce alongside residential growth.

The UA Berkeley served as a community hub and entertainment venue for 91 years, and that tradition should continue. Its destruction would be an irreparable blow to the city's historic and cultural fabric that leaders must avoid at all costs.

Thank you for your consideration.

Dear Berkeley city staff, ZAB, and City Council,

I'm writing to demand that city staff, the Zoning Adjustments Board, and the City Council take action to prevent the destruction of the historic United Artists theater at 2274 Shattuck Ave. in downtown Berkeley. It is unacceptable to let a developer retain a fraction of the facade and lobby while tearing down the palatial four-story theater itself.

Built in 1932, the UA is on the California Register of Historical Resources, is National Register-eligible, and is also now a city landmark, thanks to an LPC decision earlier this year. Without a doubt, the building is a cultural and historical resource under the CEQA statute; the proposal to demolish it is a "substantial adverse change" requiring extensive CEQA review. The city must insist that all oversight laws and processes are followed and not give baseless exemptions to the developer.

Constructed during the Great Depression by Hollywood icons Charlie Chaplin and Mary Pickford, the UA Berkeley is arguably the finest theater ever built in the city and one of the few Art Deco movie palaces of its kind in the state that could be preserved. Despite being converted to a multiplex 50 years ago, the theater is resplendent with Art Deco architectural detail, decor, and furnishings; it has been relatively well-maintained over the decades, its historic features surviving various retrofits thanks to local preservationists who insisted the original auditorium be preserved behind false walls. The Historical Resource Evaluation on the UA, paid for by the developer, is not an honest and credible assessment; it would be unethical for city officials to consider this document the final word on the status of this landmark property.

The UA presents a tremendous opportunity for Berkeley. It has the potential to be restored as a glorious, midsize live performance venue like Oakland's Paramount, galvanizing an economic and cultural renaissance in the downtown. The many cities in the Bay Area and nationwide that have chosen to preserve their historic theaters never regret doing so. Another option is for the UA to remain a historic multiplex theater that serves a public eager to resume moviegoing after the pandemic. The future possibilities for this splendid building are numerous—but not if complacent city leaders allow a developer to level it into oblivion.

This all goes against the city's Downtown Area Plan, which was the product of over 200 public meetings and explicitly calls for the retention and support of downtown cinemas. This plan is still in effect.

Building more housing is no doubt vitally important, but it does not have to cost Berkeley one of its most magnificent landmark buildings in the UA. City officials must maintain control over land use decisions, fostering downtown development that maintains a mix of arts and

culture and commerce alongside residential growth.

The UA Berkeley served as a community hub and entertainment venue for 91 years, and that tradition should continue. Its destruction would be an irreparable blow to the city's historic and cultural fabric that leaders must avoid at all costs.

Thank you for your consideration.

Dear Berkeley city staff, ZAB, and City Council,

I'm writing to demand that city staff, the Zoning Adjustments Board, and the City Council take action to prevent the destruction of the historic United Artists theater at 2274 Shattuck Ave. in downtown Berkeley. It is unacceptable to let a developer retain a fraction of the facade and lobby while tearing down the palatial four-story theater itself.

Built in 1932, the UA is on the California Register of Historical Resources, is National Register-eligible, and is also now a city landmark, thanks to an LPC decision earlier this year. Without a doubt, the building is a cultural and historical resource under the CEQA statute; the proposal to demolish it is a "substantial adverse change" requiring extensive CEQA review. The city must insist that all oversight laws and processes are followed and not give baseless exemptions to the developer.

Constructed during the Great Depression by Hollywood icons Charlie Chaplin and Mary Pickford, the UA Berkeley is arguably the finest theater ever built in the city and one of the few Art Deco movie palaces of its kind in the state that could be preserved. Despite being converted to a multiplex 50 years ago, the theater is resplendent with Art Deco architectural detail, decor, and furnishings; it has been relatively well-maintained over the decades, its historic features surviving various retrofits thanks to local preservationists who insisted the original auditorium be preserved behind false walls. The Historical Resource Evaluation on the UA, paid for by the developer, is not an honest and credible assessment; it would be unethical for city officials to consider this document the final word on the status of this landmark property.

The UA presents a tremendous opportunity for Berkeley. It has the potential to be restored as a glorious, midsize live performance venue like Oakland's Paramount, galvanizing an economic and cultural renaissance in the downtown. The many cities in the Bay Area and nationwide that have chosen to preserve their historic theaters never regret doing so. Another option is for the UA to remain a historic multiplex theater that serves a public eager to resume moviegoing after the pandemic. The future possibilities for this splendid building are numerous—but not if complacent city leaders allow a developer to level it into oblivion.

Berkeley citizens are watching with alarm as a mass extinction event for movie theaters unfolds: The Shattuck Cinemas has been freshly demolished while the beloved art deco California and the most valuable of them all, the UA, sit on the precipice of ruin. This all goes against the city's Downtown Area Plan, which was the product of over 200 public meetings and explicitly calls for the retention and support of downtown cinemas. This plan is still in effect.

WARNING: This is not a City of Berkeley email. Do not click links or attachments unless you trust the sender and know the content is safe.

Dear Berkeley city staff, ZAB, and City Council,

I'm writing to demand that city staff, the Zoning Adjustments Board, and the City Council take action to prevent the destruction of the historic United Artists theater at 2274 Shattuck Ave. in downtown Berkeley. It is unacceptable to let a developer retain a fraction of the facade and lobby while tearing down the palatial four-story theater itself.

Built in 1932, the UA is on the California Register of Historical Resources, is National Register-eligible, and is also now a city landmark, thanks to an LPC decision earlier this year. Without a doubt, the building is a cultural and historical resource under the CEQA statute; the proposal to demolish it is a "substantial adverse change" requiring extensive CEQA review. The city must insist that all oversight laws and processes are followed and not give baseless exemptions to the developer.

Constructed during the Great Depression by Hollywood icons Charlie Chaplin and Mary Pickford, the UA Berkeley is arguably the finest theater ever built in the city and one of the few Art Deco movie palaces of its kind in the state that could be preserved. Despite being converted to a multiplex 50 years ago, the theater is resplendent with Art Deco architectural detail, decor, and furnishings; it has been relatively well-maintained over the decades, its historic features surviving various retrofits thanks to local preservationists who insisted the original auditorium be preserved behind false walls. The Historical Resource Evaluation on the UA, paid for by the developer, is not an honest and credible assessment; it would be unethical for city officials to consider this document the final word on the status of this landmark property.

The UA presents a tremendous opportunity for Berkeley. It has the potential to be restored as a glorious, midsize live performance venue like Oakland's Paramount, galvanizing an economic and cultural renaissance in the downtown. The many cities in the Bay Area and nationwide that have chosen to preserve their historic theaters never regret doing so. Another option is for the UA to remain a historic multiplex theater that serves a public eager to resume moviegoing after the pandemic. The future possibilities for this splendid building are numerous—but not if complacent city leaders allow a developer to level it into oblivion.

Berkeley citizens are watching with alarm as a mass extinction event for movie theaters unfolds: The Shattuck Cinemas has been freshly demolished while the beloved art deco California and the most valuable of them all, the UA, sit on the precipice of ruin. This all goes against the city's Downtown Area Plan, which was the product of over 200 public meetings and explicitly calls for the retention and support of downtown cinemas. This plan is still in effect.

Building more housing is no doubt vitally important, but it does not have to cost Berkeley one of its most magnificent landmark buildings in the UA. City officials must maintain control over land use decisions, fostering downtown development that maintains a mix of arts and

culture and commerce alongside residential growth.

The UA Berkeley served as a community hub and entertainment venue for 91 years, and that tradition should continue. Its destruction would be an irreparable blow to the city's historic and cultural fabric that leaders must avoid at all costs.

Thank you for your consideration.

It is unacceptable to let a developer retain a fraction of the facade and lobby while tearing down the palatial four-story theater itself.

I have treasured the Shattuck Cinemas as a venue for independent films since my college days in 1962-64. Now it is gone. The California is going. There really is no substitute for the movie theater experience. You must keep the UA Theater! It's the last one of all the wonderful movie venues Berkeley has had. Please save the UA!

Built in 1932, the UA is on the California Register of Historical Resources, is National Register-eligible, and is also now a city landmark, thanks to an LPC decision earlier this year. Without a doubt, the building is a cultural and historical resource under the CEQA statute; the proposal to demolish it is a "substantial adverse change" requiring extensive CEQA review. The Historical Resource Evaluation on the UA, paid for by the developer, is not an honest and credible assessment; it would be unethical for city officials to consider this document the final word on the status of this landmark property.

The UA presents a tremendous opportunity for Berkeley. It has the potential to be restored as a glorious, midsize live performance venue like Oakland's Paramount, galvanizing an economic and cultural renaissance in the downtown. The many cities in the Bay Area and nationwide that have chosen to preserve their historic theaters never regret doing so. Another option is for the UA to remain a historic multiplex theater that serves a public eager to resume moviegoing after the pandemic. The future possibilities for this splendid building are numerous—but not if complacent city leaders allow a developer to level it into oblivion.

Berkeley citizens are watching with alarm as a mass extinction event for movie theaters unfolds: The Shattuck Cinemas has been freshly demolished while the beloved art deco California and the most valuable of them all, the UA, sit on the precipice of ruin. This all goes against the city's Downtown Area Plan, which was the product of over 200 public meetings and explicitly calls for the retention and support of downtown cinemas. This plan is still in effect.

Building more housing is no doubt vitally important, but it does not have to cost Berkeley one of its most magnificent landmark buildings in the UA. City officials must maintain control over land use decisions, fostering downtown development that maintains a mix of arts and

culture and commerce alongside residential growth.

The UA Berkeley served as a community hub and entertainment venue for 91 years, and that tradition should continue. Its destruction would be an irreparable blow to the city's historic and cultural fabric that leaders must avoid at all costs.

Thank you for your consideration.

Dear Berkeley city staff, ZAB, and City Council,

I'm writing to demand that city staff, the Zoning Adjustments Board, and the City Council take action to prevent the destruction of the historic United Artists theater at 2274 Shattuck Ave. in downtown Berkeley. It is unacceptable to let a developer retain a fraction of the facade and lobby while tearing down the palatial four-story theater itself.

Built in 1932, the UA is on the California Register of Historical Resources, is National Register-eligible, and is also now a city landmark, thanks to an LPC decision earlier this year. Without a doubt, the building is a cultural and historical resource under the CEQA statute; the proposal to demolish it is a "substantial adverse change" requiring extensive CEQA review. The city must insist that all oversight laws and processes are followed and not give baseless exemptions to the developer.

Constructed during the Great Depression by Hollywood icons Charlie Chaplin and Mary Pickford, the UA Berkeley is arguably the finest theater ever built in the city and one of the few Art Deco movie palaces of its kind in the state that could be preserved. Despite being converted to a multiplex 50 years ago, the theater is resplendent with Art Deco architectural detail, decor, and furnishings; it has been relatively well-maintained over the decades, its historic features surviving various retrofits thanks to local preservationists who insisted the original auditorium be preserved behind false walls. The Historical Resource Evaluation on the UA, paid for by the developer, is not an honest and credible assessment; it would be unethical for city officials to consider this document the final word on the status of this landmark property.

Subject: Stop the demolition of the historic UA theater

WARNING: This is not a City of Berkeley email. Do not click links or attachments unless you trust the sender and know the content is safe.

Dear Berkeley city staff, ZAB, and City Council,

I'm writing to demand that city staff, the Zoning Adjustments Board, and the City Council take action to prevent the destruction of the historic United Artists theater at 2274 Shattuck Ave. in downtown Berkeley. It is unacceptable to let a developer retain a fraction of the facade and lobby while tearing down the palatial four-story theater itself.

Built in 1932, the UA is on the California Register of Historical Resources, is National Register-eligible, and is also now a city landmark, thanks to an LPC decision earlier this year. Without a doubt, the building is a cultural and historical resource under the CEQA statute; the proposal to demolish it is a "substantial adverse change" requiring extensive CEQA review. The city must insist that all oversight laws and processes are followed and not give baseless exemptions to the developer.

Constructed during the Great Depression by Hollywood icons Charlie Chaplin and Mary Pickford, the UA Berkeley is arguably the finest theater ever built in the city and one of the few Art Deco movie palaces of its kind in the state that could be preserved. Despite being converted to a multiplex 50 years ago, the theater is resplendent with Art Deco architectural detail, decor, and furnishings; it has been relatively well-maintained over the decades, its historic features surviving various retrofits thanks to local preservationists who insisted the original auditorium be preserved behind false walls. The Historical Resource Evaluation on the UA, paid for by the developer, is not an honest and credible assessment; it would be unethical for city officials to consider this document the final word on the status of this landmark property.

The UA presents a tremendous opportunity for Berkeley. It has the potential to be restored as a glorious, midsize live performance venue like Oakland's Paramount, galvanizing an economic and cultural renaissance in the downtown. The many cities in the Bay Area and nationwide that have chosen to preserve their historic theaters never regret doing so. Another option is for the UA to remain a historic multiplex theater that serves a public eager to resume moviegoing after the pandemic. The future possibilities for this splendid building are numerous—but not if complacent city leaders allow a developer to level it into oblivion.

Berkeley citizens are watching with alarm as a mass extinction event for movie theaters unfolds: The Shattuck Cinemas has been freshly demolished while the beloved art deco California and the most valuable of them all, the UA, sit on the precipice of ruin. This all goes against the city's Downtown Area Plan, which was the product of over 200 public meetings and explicitly calls for the retention and support of downtown cinemas. This plan is still in effect.

Building more housing is no doubt vitally important, but it does not have to cost Berkeley one of its most magnificent landmark buildings in the UA. City officials must maintain control over land use decisions, fostering downtown development that maintains a mix of arts and culture and commerce alongside residential growth.

The UA Berkeley served as a community hub and entertainment venue for 91 years, and that tradition should continue. Its destruction would be an irreparable blow to the city's historic and cultural fabric that leaders must avoid at all costs.

Thank you for your consideration.

Subject: question about zoning board agenda

WARNING: This is not a City of Berkeley email. Do not click links or attachments unless you trust the sender and know the content is safe.

Hello,

Please see the attached document from the city attorney's office. This is an agreement between the city and the developer extending a deadline on the city's decision on whether to grant an exemption to CEQA requested by the developer of 2274 Shattuck Ave.

Here's my question: In the second paragraph of the Recitals section, it says "The City is also of the position that a CEQA exemption must be formally made by the Zoning Appeals Board."

So, will the CEQA exemption be going in the ZAB agenda and, if so, when will that happen? A rough estimate is fine. And would this be an action item on the agenda or in another part of the agenda?

Thanks very much. Feel free to email me or call me at 415-202-4181.

best,
Laura

L²

TOLLING AGREEMENT

This Tolling Agreement ("Agreement") shall be deemed effective as of September 4, 2024, by and between the City of Berkeley (the "City"), and 2274 Shattuck QOZB, LLC and its agents, employees, officers, shareholders, and affiliated companies ("Panoramic"). The City and Panoramic shall be referred to herein collectively as "the Parties" and individually as a "Party." There are no other parties to this Agreement.

RECITALS

1. Panoramic has submitted a request for CEQA exemption pursuant to Government Code section 65589(h) ("AB 1633") for a proposed high-density infill residential project located at 2274 Shattuck Avenue. The AB 1633 request was submitted to the City on March 4, 2024.

2. The City's effective deadline to respond to Panoramic's AB 1633 request fell on September 3, 2024. The City is also of the position that a CEQA exemption determination must formally be made by the Zoning Appeals Board. As such, the City's response to Panoramic's AB 1633 exemption request will extend beyond the 180-day deadline set forth by AB 1633 and, as of September 4, 2024.

3. The Parties agree to enter into this Agreement to allow the City to continue processing Panoramic's AB 1633 request, and to attempt to avoid litigation under the Housing Accountability Act.

In consideration of the foregoing, the Parties hereby agree and stipulate as follows:

AGREEMENT

1. The foregoing recitals are incorporated herein by reference.

2. For the period from September 3, 2024 through and including October 4, 2024 ("Tolling Period"), the running of time shall be tolled for purposes of **the 180-day administrative deadline for the City to respond to Panoramic in response to Panoramic's AB 1633 request.** For purposes of all statutes of limitations and defenses relating to the passage of time, whether legal or equitable, that may be applicable with respect to any actual or potential claim(s) that may be asserted by Panoramic against the City in connection with Panoramic's AB 1633 request, the determination of the passage of time shall exclude the Tolling Period. This Agreement shall expire at 11:59 p.m. on October 4, 2024, and the 90-day statute of limitations for filing an action to enforce the Housing Accountability Act, if applicable, would commence on the date the City issues its response to Panoramic's AB 1633 request or October 5, 2024, whichever is sooner. The Parties to this Agreement do not waive, and hereby specifically reserve, their rights to assert all defenses, including without limitation, any rights and defenses existing prior to September 4, 2024, and subsequent to October 4, 2024.

3. Panoramic agrees not to file any lawsuit, complaint or petition for writ of mandate with regard to the subject matter of this Agreement during the Tolling Period of this Agreement.

4. By entering into this Agreement, City does not admit that a valid claim exists against the City, and this Agreement shall not be offered or received into evidence, nor shall it be admissible in any judicial or administrative proceeding, except for the purpose of enforcing the

terms of the Tolling Period and the Agreement.

5. Except as specifically provided or limited herein, the Parties reserve any and all rights and defenses that they have or may have under the law.

6. This Agreement is entered pursuant to California Code of Civil Procedure section 360.5.

7. The provisions of this Agreement shall comprise all of the terms, conditions, agreements, and representations of the Parties regarding this matter.

8. The Parties agree that the terms of this Agreement have not been changed, modified, or expanded by any oral agreements or representations entered into or made prior to or at the execution of this Agreement.

9. This Agreement may be amended only by written agreement of the Parties.

10. This Agreement may be extended only by mutual agreement of the Parties. Any such extension shall be memorialized in writing.

11. This Agreement shall inure only to the benefit of the Parties hereto, and not to any other persons, organizations, or other entities who may file a lawsuit related to subject of this Agreement. The Parties agree that this Agreement shall not benefit any third parties.

12. Any further notices shall be delivered to:

a. City:
City Attorney's Office
City of Berkeley
2180 Milvia Street
Berkeley, CA 94704
Attn: Sara Stephens, Deputy City Attorney

b. Panoramic:
Hanson Bridgett LLP
425 Market Street, 25th Floor
San Francisco, CA 94105
Attn: Robin Baral, Senior Counsel

13. Each of the Parties represents and warrants that it has the authority to execute this Agreement.

14. This Agreement may be executed in counterparts. Executed copies sent by facsimile or electronic mail shall be deemed to be the equivalent of signed originals.

In witness whereof, the Parties have caused this Agreement to be executed by their duly authorized representative as of the effective date referenced above.

The many cities in the Bay Area and nationwide that have chosen to preserve their historic theaters never regret doing so. Another option is for the UA to remain a historic multiplex theater that serves a public eager to resume moviegoing after the pandemic. The future possibilities for this splendid building are numerous—but not if complacent city leaders allow a developer to level it into oblivion.

Berkeley citizens are watching with alarm as a mass extinction event for movie theaters unfolds: The Shattuck Cinemas has been freshly demolished while the beloved art deco California and the most valuable of them all, the UA, sit on the precipice of ruin. This all goes against the city's Downtown Area Plan, which was the product of over 200 public meetings and explicitly calls for the retention and support of downtown cinemas. This plan is still in effect.

Building more housing is no doubt vitally important, but it does not have to cost Berkeley one of its most magnificent landmark buildings in the UA. City officials must maintain control over land use decisions, fostering downtown development that maintains a mix of arts and

culture and commerce alongside residential growth.

The UA Berkeley served as a community hub and entertainment venue for 91 years, and that tradition should continue. Its destruction would be an irreparable blow to the city's historic and cultural fabric that leaders must avoid at all costs.

Thank you for your consideration.

Dear Berkeley city staff, ZAB, and City Council,

I'm writing to demand that city staff, the Zoning Adjustments Board, and the City Council take action to prevent the destruction of the historic United Artists theater at 2274 Shattuck Ave. in downtown Berkeley. It is unacceptable to let a developer retain a fraction of the facade and lobby while tearing down the palatial four-story theater itself.

Built in 1932, the UA is on the California Register of Historical Resources, is National Register-eligible, and is also now a city landmark, thanks to an LPC decision earlier this year. Without a doubt, the building is a cultural and historical resource under the CEQA statute; the proposal to demolish it is a "substantial adverse change" requiring extensive CEQA review. The city must insist that all oversight laws and processes are followed and not give baseless exemptions to the developer.

Constructed during the Great Depression by Hollywood icons Charlie Chaplin and Mary Pickford, the UA Berkeley is arguably the finest theater ever built in the city and one of the few Art Deco movie palaces of its kind in the state that could be preserved. Despite being converted to a multiplex 50 years ago, the theater is resplendent with Art Deco architectural detail, decor, and furnishings; it has been relatively well-maintained over the decades, its historic features surviving various retrofits thanks to local preservationists who insisted the original auditorium be preserved behind false walls. The Historical Resource Evaluation on the UA, paid for by the developer, is not an honest and credible assessment; it would be unethical for city officials to consider this document the final word on the status of this landmark property.

The UA presents a tremendous opportunity for Berkeley. It has the potential to be restored as a glorious, midsize live performance venue like Oakland's Paramount, galvanizing an economic and cultural renaissance in the downtown. The many cities in the Bay Area and nationwide that have chosen to preserve their historic theaters never regret doing so. Another option is for the UA to remain a historic multiplex theater that serves a public eager to resume moviegoing after the pandemic. The future possibilities for this splendid building are numerous—but not if complacent city leaders allow a developer to level it into oblivion.

I'm unable to attend the ZAB meeting this evening. I want to register my extreme disappointment with recent developments in downtown Berkeley, which have left us with almost NO common space, little retail, and no cinemas save the PFA.

I know the developer maintains that the United Artists building is irreparable and unfit to serve as a cultural venue. I don't believe this is the case. I urge you to INSIST on a full CEQA review of this architectural and cultural treasure and not let it go the way of other historic sites in downtown Berkeley.

Thank you.

Dear Berkeley city staff, ZAB, and City Council,

I am the founder of the group, Save the United Artists Berkeley.

Our group is concerned that the developer, Patrick Kennedy is misleading the city in regards to the condition of the theater. He will not let outside experts weigh in on his stance that the theaters in irreparable damage. It was operating until one year ago. In addition, Allen Michaan who owns and operates the Grand Theater in Oakland, is of the firm opinion that it would be very doable to fix the wall facade facing Bancroft.

I am also writing to demand that city staff, the Zoning Adjustments Board, and the City Council take action to prevent the destruction of the historic United Artists theater at 2274 Shattuck Ave. in downtown Berkeley. It is unacceptable to let a developer retain a fraction of the facade and lobby while tearing down the palatial four-story theater itself.

To: Members of the Design Review Committee
From: Phyllis Orrick
Re: 2274 Shattuck
11/20/24

Dear Committee members,

I am writing to urge you to approve the proposed development at 2274 Shattuck at once so this project can continue to move forward as intended under SB 330.

Opponents have argued that this site should be preserved as a historic building, but there is no practical, safe or affordable way for that to happen, as demonstrated by in-depth structural and historical analyses of the building.

Unfortunately, a faux “grassroots” Facebook group (many of whose members are from out of town and some of whom don’t even live in this country, not to mention the scores who appear to be bots or manufactured personas) tried to dredge up support and used false information to try to undercut this project when it came before theLandmark Preservation Commission (LPC).

Despite an extreme overreach by staff that requested landmarking the entire structure, even the LPC dialed back the preservation portion to what the developer had proposed. Additionally, the City agrees with over 10 third-party consultant reports that the project should be exempt from CEQA. The existing building poses a health and safety risk to the public. The project complies with SB 330 and SB 1633.

There is a way to honor the history of the theater while also building badly-needed housing, and this proposal aims to do just that.

To wit:

- The developer has agreed to restore and renovate the façade on Shattuck. The developer has also agreed to restore the lobby and not replace the lobby with housing.
- This project will provide 227 affordable-by-design units which are suitable for students, young professionals, and families. The project also provides 23 very low-income affordable units.
- This project will contribute more than $7M in Building Permit and Impact Fees to the City of Berkeley. It will also contribute ~$2M annually to the property tax base.

It’s long past time for this project to break ground. Please support it so that we can move forward.

Regards,

Phyllis Orrick

WARNING: This is not a City of Berkeley email. Do not click links or attachments unless you trust the sender and know the content is safe.

Dear Berkeley city staff, ZAB, and City Council,

I'm writing to demand that city staff, the Zoning Adjustments Board, and the City Council take action to prevent the destruction of the historic United Artists theater at 2274 Shattuck Ave. in downtown Berkeley. It is unacceptable to let a developer retain a fraction of the facade and lobby while tearing down the palatial four-story theater itself.

Built in 1932, the UA is on the California Register of Historical Resources, is National Register-eligible, and is also now a city landmark, thanks to an LPC decision earlier this year. Without a doubt, the building is a cultural and historical resource under the CEQA statute; the proposal to demolish it is a "substantial adverse change" requiring extensive CEQA review. The city must insist that all oversight laws and processes are followed and not give baseless exemptions to the developer.

Constructed during the Great Depression by Hollywood icons Charlie Chaplin and Mary Pickford, the UA Berkeley is arguably the finest theater ever built in the city and one of the few Art Deco movie palaces of its kind in the state that could be preserved. Despite being converted to a multiplex 50 years ago, the theater is resplendent with Art Deco architectural detail, decor, and furnishings; it has been relatively well-maintained over the decades, its historic features surviving various retrofits thanks to local preservationists who insisted the original auditorium be preserved behind false walls. The Historical Resource Evaluation on the UA, paid for by the developer, is not an honest and credible assessment; it would be unethical for city officials to consider this document the final word on the status of this landmark property.

The UA presents a tremendous opportunity for Berkeley. It has the potential to be restored as a glorious, midsize live performance venue like Oakland's Paramount, galvanizing an economic and cultural renaissance in the downtown. The many cities in the Bay Area and nationwide that have chosen to preserve their historic theaters never regret doing so. Another option is for the UA to remain a historic multiplex theater that serves a public eager to resume moviegoing after the pandemic. The future possibilities for this splendid building are numerous—but not if complacent city leaders allow a developer to level it into oblivion.

Berkeley citizens are watching with alarm as a mass extinction event for movie theaters unfolds: The Shattuck Cinemas has been freshly demolished while the beloved art deco California and the most valuable of them all, the UA, sit on the precipice of ruin. This all goes against the city's Downtown Area Plan, which was the product of over 200 public meetings and explicitly calls for the retention and support of downtown cinemas. This plan is still in effect.

Building more housing is no doubt vitally important, but it does not have to cost Berkeley one of its most magnificent landmark buildings in the UA. City officials must maintain control over land use decisions, fostering downtown development that maintains a mix of arts and

culture and commerce alongside residential growth.

The UA Berkeley served as a community hub and entertainment venue for 91 years, and that tradition should continue. Its destruction would be an irreparable blow to the city's historic and cultural fabric that leaders must avoid at all costs.

Thank you for your consideration.

Subject: 2274 Shattuck -- Regal Apartments -- Letter to ZAB members from Panoramic Interests

WARNING: This is not a City of Berkeley email. Do not click links or attachments unless you trust the sender and know the content is safe.

[Sharon -- Could you kindly forward this to all the ZAB members? Many thanks.]

Dear ZAB members –

My name is Patrick Kennedy, and I own Panoramic Interests, the development firm proposing to redevelop the site at 2274 Shattuck Ave. (aka the UA Regal Theater).

The project at 2274 Shattuck will be coming before you next Thursday, December 12, 2024. I'd be happy to give you a tour beforehand. I'd also like to highlight several key points outlined in greater detail in the lengthy submission by the Planning Department.

1. The once-grand Regal UA Theater has undergone multiple and radical alternations in its 92-year history, including a gutting remodel that changed it from an ornate, expansive single-screen theater to a utilitarian, seven-screen multiplex. Almost all of its significant architectural features have been altered, damaged, or destroyed. (*See* Exhibit 1.)
2. The architectural historian who conducted the Historic Resource Evaluation stated in her report, **"...[T]he building's loss of integrity by serial alterations, damage, and destruction of its most important interior and exterior features ... would make it ineligible for listing on the California Register and National Register of Historic Places today."** [Emphasis added.] Historic Resource Evaluation, Dec. 7, 2023.
3. Panoramic Interests offered to let the existing theater operator, Cineworld Theaters, stay in the space rent-free for at least two more years. Cineworld declined the offer and chose to close the operation, citing a lack of business.
4. No seismic renovations of the structure have been done in the 92 years since its completion in 1932. There is no evidence of any seismic upgrades in the 43 building permits.
5. The building is a Non-Ductile Concrete structure. The City of Berkeley has determined that such structures "...have performed poorly in recent earthquakes and have resulted in catastrophic collapses." (City of Berkeley 2019 Local Hazard Mitigation Plan.)
6. The structural engineer evaluating the building stated: "The condition of the structural components in the building -- exposed rebar rusting in the concrete walls, evidence of water moisture intrusion in the ceilings and load-bearing wall ... make the building increasingly vulnerable over time." The engineer

also noted that the structure presents a seismic hazard to neighboring buildings and "...strongly suggest[ed] that you file a demolition permit for the theater portion of the building." (*See* Exhibit 2)

7. Panoramic requested a categorical exemption for an EIR under AB 1633, a new law also used by two other projects in Berkeley. Staff approved the Class 32 In-fill exemption after a closed session with the City Council and City Attorney.
8. Panoramic's development plan includes restoring the historic facade and lobby of the original theater and incorporating both into the residential development. (*See* Exhibit 3.)
9. The residential development provides funds for the restoration of the facade and lobby.

As you know, I can take no more than three on a tour at a time. Please let me know if you're interested.

Many thanks for your consideration.

San Francisco, CA 94104

Re: UA Regal Theater, Berkeley
Seismic Risk

Dear Mr. Walsh:

You are in receipt of our Recommissioning Report, dated January 16, 2024, describing the seismic hazard at the former UA Regal Theater.[1] Our report stated: "We observed numerous conditions that make the building – and its former single-screen auditorium, in particular – unsafe for occupancy in its present condition."[2]

To briefly summarize, proximity to the Hayward Fault raises significant concerns for recommissioning the site, due to the following:

1. In the 92 years since its completion in 1932, there have been no seismic renovations of the structure, nor evidence of any seismic upgrades in the 33 building permits on record.

2. The building is a Non-Ductile Concrete (NDC) structure, a condition that poses serious risk to adjacent buildings as well. As the City of Berkeley's 2019 Local Hazard Mitigation Plan notes, NDC buildings "have performed very poorly in recent earthquakes, and have resulted in catastrophic collapses."[3]

3. Structural and non-structural components of the building, and their attachments, are significantly degraded – evidenced by exposed rebar rusting in concrete walls[4], water/moisture intrusion in the ceilings and load-bearing walls, as well significant penetrations of heavy plaster ornamentation by HVAC cabling, all of which make the building increasingly vulnerable and of high risk to human occupancy over time.[5]

Given these facts, the seismic hazard that the theater presents to neighboring buildings, and the lack of a clear remedy to address the rusted rebar and significant water damage, we strongly suggest that you move to file a demolition permit for the auditorium.

Sincerely,
Diarmuid Mac Neill

President

1. INTRODUCTION

Rowan Williams Davies & Irwin Inc. (RWDI) was retained to conduct a pedestrian wind assessment for the proposed project at 2274 Shattuck Avenue in Berkeley, CA. The objective of this assessment is to provide an evaluation of the potential impact of the proposed development on pedestrian-level wind conditions.

The project site is located in downtown Berkeley, west of Shattuck Avenue, between Kittredge Street and Bancroft Way (Image 1), and is surrounded by mid-rise buildings in all directions.

The project will consist of a 17-story mixed-use development with a main entrance link on Shattuck Avenue (Image 2). In addition to sidewalks and properties near the project site, key areas of interest for this assessment include main building entrances and amenities at grade (Image 3).

Image 1: Aerial view of the existing site and surroundings (Source: Google Maps).

Image 2: Conceptual rendering of the proposed project (east side).

1. INTRODUCTION

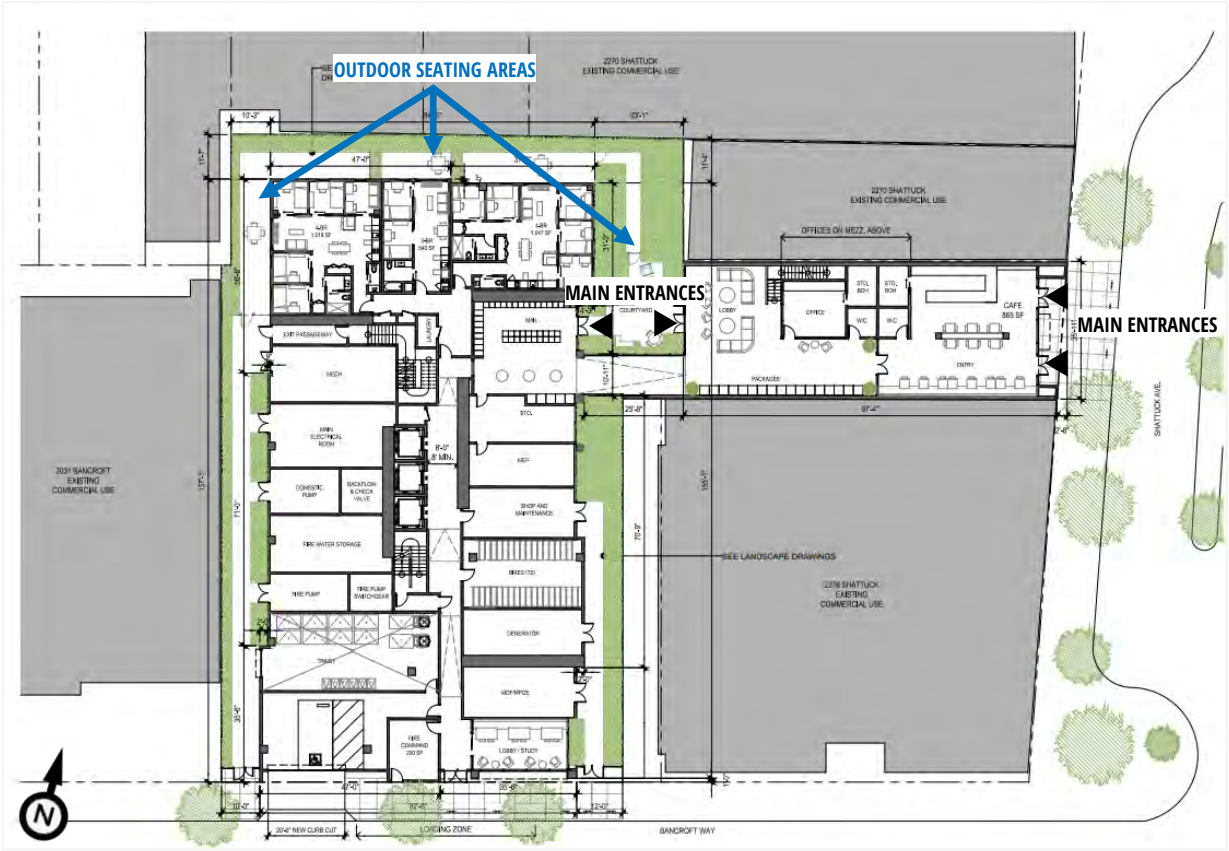

Image 3: Site plan highlighting the location of the main entrances and outdoor seating areas at grade (landscaping not included in simulations).

2. METHODOLOGY

2.1 Objective

The objective of this assessment is to provide an evaluation of the potential impact of the proposed development on wind conditions in pedestrian areas on and around it based on Computational Fluid Dynamics (CFD). The assessment is based on the following:

- A review of the regional long-term meteorological data from the Metropolitan Oakland International Airport;
- 3D model and architectural drawings of the proposed project received on June 21, 2023;
- The use of *Orbital Stack*, an in-house CFD tool;
- RWDI's engineering judgment, experience, and expert knowledge of wind flows around buildings[1-3]; and,
- The Lawson wind comfort and safety criteria.

Note that other microclimate issues such as those relating to cladding and structural wind loads, door operability, air quality, snow impact, noise, vibration, etc. are not part of the scope of this assessment

2.2 CFD for Wind Simulation

Computational Fluid Dynamics (CFD) is a numerical technique that can be used for simulating wind flows in complex environments. For this analysis, CFD techniques were used to generate a virtual wind tunnel where flows around the site and its surroundings were simulated in full scale. The computational domain that covered the site and its surroundings was divided into millions of small cells where calculations were performed, yielding a prediction of wind conditions across the entire study domain. CFD excels as a tool for wind modeling, presenting early design advice, comparing different design and site scenarios, resolving complex flow physics, and helping diagnose problematic wind conditions.

While the computational modeling method used in the current assessment does not explicitly simulate the transient behavior of turbulent wind, its effects were estimated based on other calculated quantities. RWDI has found this approach to be appropriate for the assessment of typical wind comfort conditions. Wind safety issues, which relate to transient, higher-speed gusts, are discussed qualitatively, based on the CFD predictions and our extensive wind-tunnel experience for similar projects.

In order to quantify the transient behavior of wind and refine any conceptual mitigation measures, a more detailed assessment would be required using either boundary-layer wind tunnel or more detailed transient computational modeling.

2. METHODOLOGY

2.3 Simulation Model

CFD simulations were completed for two scenarios:

- **Existing**: Existing site and surroundings.
- **Proposed**: Proposed building and existing surroundings

The computer model of the proposed building is shown in Image 4, and the Existing and Proposed configurations with the proximity model are shown in Images 5a and 5b, respectively. The 3D models were simplified to include only the necessary building and terrain details that would affect the local wind flows in the area and around the site. Landscaping and other smaller architectural and accessory features were not included in the computer model in order to provide more conservative wind conditions (as is the norm for this level of assessment).

The wind approaching the modelled area were simulated for 16 directions (starting at 0°, at 22.5° increments around the compass), accounting for the effects of the atmospheric boundary layer and terrain impacts. Wind data were obtained in the form of ratios of wind speeds at 5 ft above levels of interest, to the mean wind speed at a reference height. The data was then combined with meteorological records obtained from Metropolitan Oakland International Airport to determine the wind speeds and frequencies in the simulated areas.

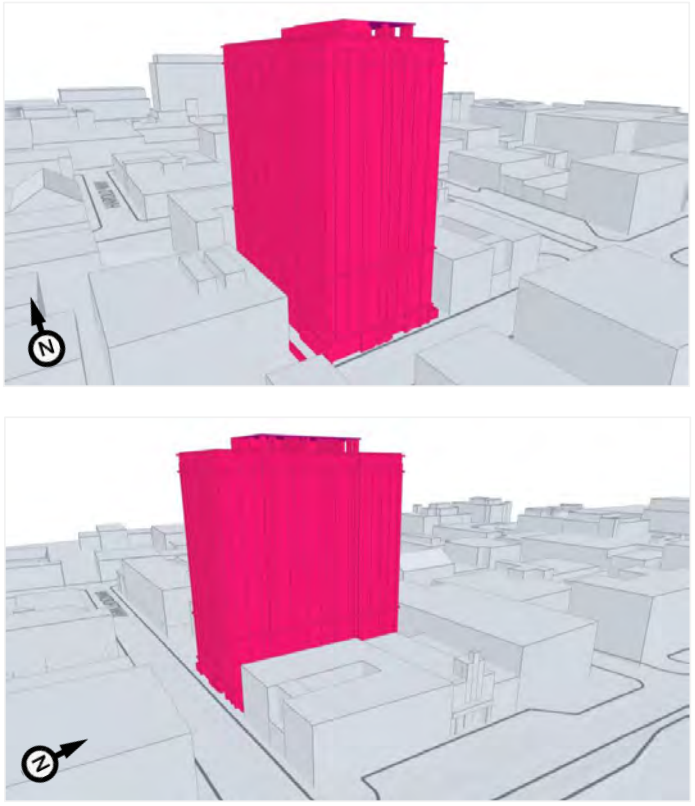

Image 4: Computational model of the proposed project.

2. METHODOLOGY

Image 5a: Computational model of the existing site and extended surroundings.

2. METHODOLOGY

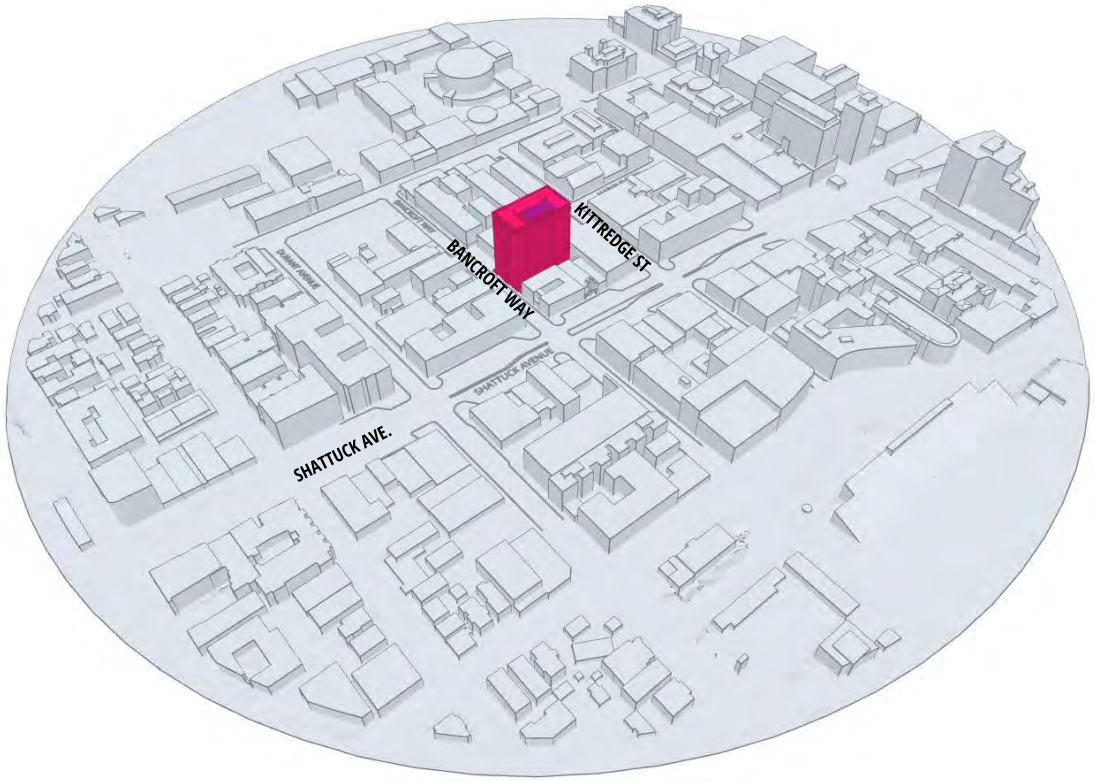

Image 5b: Computational model of the proposed building and extended surroundings.

3. METEOROLOGICAL DATA

Long-term wind data recorded at Metropolitan Oakland International Airport between 1990 and 2020 were analyzed for four seasonal periods – spring (March to May), summer (June to August), fall (September to November) and winter (December to February). Image 6 graphically depicts the directional distributions of wind frequencies and speeds for these periods.

Winds from the west-southwest through northwest directions are predominant throughout the year, as indicated by the wind roses. Winds from the southeast are also frequent during the winter. Moderate to strong winds of a mean speed greater than 15 mph measured at the airport (at an anemometer height of 30 ft) could potentially interact with tall buildings to result in a notable increase in ground-level wind speeds. (yellow and red bands in Image 6).

Wind statistics were combined with the simulated data to predict the wind conditions at the project site and assessed against the wind criteria for pedestrian comfort.

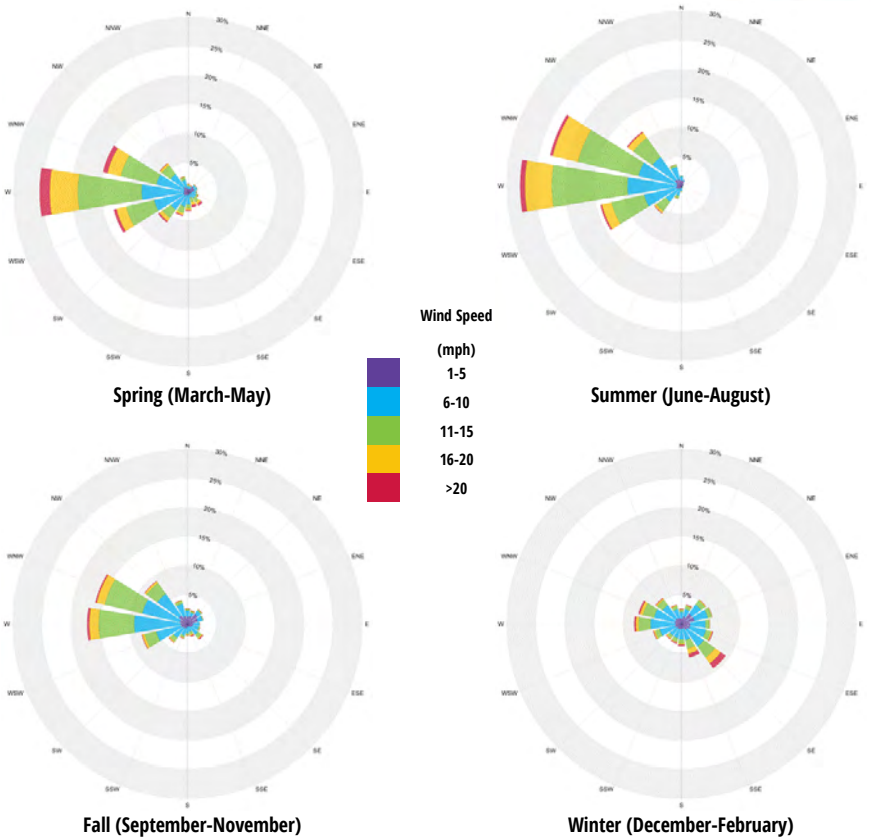

Image 6: Directional distribution of winds approaching Metropolitan Oakland International Airport from 1990 to 2020.

4. WIND CRITERIA

The pedestrian wind comfort criteria used in this study were developed by T.V. Lawson at Bristol University, UK. These criteria are well-established as the benchmark against which to assess the wind microclimate around buildings. Generally, wind conditions are considered acceptable if they produce conditions suitable for the intended activities in the area. The categories listed in the table below are based on these criteria.

4.1 Pedestrian Comfort

Pedestrian comfort is associated with common wind speeds conducive to different levels of human activity. Wind conditions are considered suitable for a given comfort category if the associated mean wind speeds are expected for at least 95% of the time (considering winds occurring for all hours of the day). These criteria for wind speeds represent average wind tolerance. They are sometimes subjective and regional differences in wind climate and thermal conditions as well as variations in age, health, clothing, etc. can also affect people's perception of the wind climate.

Comfort Category	GEM Speed (mph)	Description (Based on seasonal compliance of 95%)
Pedestrian Sitting	≤ 9	Low wind speed where, for example, one could read a newspaper without having it blown away
Pedestrian Standing	≤ 13.5	Comfortable for standing for a short time of exposure at main building entrances, bus stops, and other places
Pedestrian Walking	≤ 18	Wind speeds that would be acceptable for window shopping or strolling along a downtown street
Business Walking	≤ 22	Wind conditions where the objective is to walk from A to B or for cycling
Uncomfortable	> 22	Strong winds considered a nuisance for all pedestrian activities. Wind mitigation is typically recommended

4.2 Pedestrian Safety

Pedestrian safety is associated with excessive Gust Speeds that can adversely affect a person's balance and footing. These are usually infrequent events but deserve special attention due to the potential impact on pedestrian safety.

Safety Criterion		Gust Speed (mph)	Description (Based on a seasonal exceedance of 0.04% and annual exceedance of 0.022% of the time)
Exceeded	Frequent Pedestrian Area	> 33.5	Excessive gust speeds that can adversely affect a pedestrian's balance and footing.
	Infrequent Pedestrian Area	> 45	

5. RESULTS AND DISCUSSION

5.1 General Wind Flow Mechanisms

Wind tends to flow over buildings of uniform height, without disruption. Buildings that are taller than their surroundings tend to intercept and redirect winds around them and to the ground level. The mechanism in which winds are directed down the height of a building is called *Downwashing*. These flows subsequently move around exposed building corners and in the gaps between buildings (Corner Acceleration and *Channeling Effect*). Podiums, canopies, and large trees can help reduce the impact of these effects at ground level. These flow patterns are illustrated in Image 7.

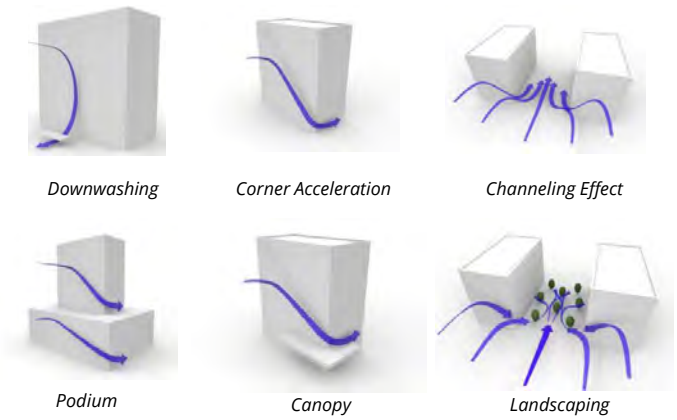

Image 7: Generalized wind flow patterns

5.2 Presentation of Results

The results of the assessment are presented and discussed in detail in Sections 5.3 and 5.4. The graphical presentation is in the form of color contours of wind speeds calculated based on the wind comfort criteria described in Section 4.1, at 5 ft above the ground (Images 8 through 11).

The assessment against the Safety Criterion (Section 4.2) was conducted qualitatively based on the predicted wind conditions and our extensive experience with wind tunnel assessments.

Target Conditions

Wind speeds that meet the criterion for "Pedestrian Walking" or "Business Walking" are appropriate for sidewalks and walkways where pedestrians are likely to be active and moving intentionally. Lower wind speeds that meet the criterion for "Pedestrian Standing" are suitable for entrances and areas where people are expected to be engaged in passive activities. Calm wind speeds that meet the criterion for "Pedestrian Sitting" are desired in areas where prolonged periods of passive activities are anticipated, such as outdoor amenity areas.

(b) PROPOSED

COMFORT: PEDESTRIAN SITTING | PEDESTRIAN STANDING | PEDESTRIAN WALKING | BUSINESS WALKING | UNCOMFORTABLE

▶ MAIN ENTRANCE

Image 11: Predicted wind conditions at grade level – Winter

5. RESULTS AND DISCUSSION

5.3 Existing Scenario

The existing building on site is low-rise and does not redirect winds to create any notable wind impact at grade. Wind conditions on and around the site meet the criterion for "Pedestrian Sitting" or "Pedestrian Standing" throughout the year (Images 8a, 9a, 10a, and 11a) . Wind speeds at all areas near the project site are predicted to meet the Safety Criterion.

5.4 Proposed Scenario

The proposed building is taller than its immediate surroundings in the prevailing wind directions (west-southwest through north-northwest) and has a broad west-facing façade. As a result, winds intercepted by the western façade of the tower at high elevations are expected to 'downwash' to ground level and accelerate around building corners. Wind speeds at grade are expected to be higher than in the Existing Scenario. This effect is expected to be moderated by the low roofs of the adjacent buildings to the west, which act as a horizontal break for downwashing winds (see Image 7). No safety exceedances are predicted in the Proposed Scenario.

5.4.1 Sidewalks and nearby areas

Wind conditions in the spring and summer are anticipated meet the criterion for "Pedestrian Standing" on most sidewalks around the site (Images 8b and 9b). Higher wind speeds that meet the criterion for "Pedestrian Walking" or "Business Walking" are expected along a segment of Bancroft Way, which may be considered appropriate.

In the fall and winter, wind speeds are generally lower. Wind conditions that meet the criterion for "Pedestrian Standing" are still predicted for most locations around the project site, with increased wind speeds that meet the criterion for " Pedestrian Walking" occurring around the southwest corner of the building (Images 10b and 11b).

5.4.2 Entrances

Wind conditions at all main entrances are expected meet the criterion for "Pedestrian Sitting" in all seasons, which is appropriate.

5.4.3 Outdoor amenities at grade

Wind conditions on the north and northeast sides of the building are anticipated to meet the criterion for "Pedestrian Standing" or "Pedestrian Walking", depending on the season. These speeds are adequate for pedestrians passing by but higher than ideal for outdoor seating areas. We note that the simulations were conducted without landscaping, and the addition of tall landscaping elements to these areas would help to improve wind conditions locally. Other methods for improving wind comfort conditions may include installing tall wind screens or planters near sitting areas (perpendicular to the façade), and/or installing overhead structures (canopies/trellises) around the northwest corner of the building. RWDI can help guide the placement of wind control features if desired, and as the programming of the outdoor seating spaces evolves.

6. SUMMARY

RWDI was retained to provide an assessment of the potential pedestrian level wind impact of the proposed project at 2274 Shattuck Avenue in Berkeley, CA. The assessment was based on computational modeling, simulation and analysis of wind conditions for the proposed development design, in conjunction with the local wind climate data and the RWDI wind criteria for pedestrian comfort and safety. Findings from the assessment are summarized as follows:

1. The existing site is occupied by a low-rise building, and wind speeds onsite are generally calm and suitable for pedestrian use.
2. After the construction of the proposed building wind speeds on the sidewalks around the site are anticipated to remain appropriate for pedestrian use throughout the year.
3. Wind speeds at all main entrances are expected to be appropriate yearlong.
4. The Safety Criterion is predicted to be met within the area considered in this assessment.
5. Wind speeds at the outdoor seating spaces on the north and northeast sides of the building are expected to be higher than ideal for passive uses. Recommendations are provided to improve wind conditions in these areas.

7. DESIGN ASSUMPTIONS

The findings/recommendations in this report are based on the building geometry and architectural drawings communicated to RWDI on June 21, 2023, listed below. Should the details of the proposed design and/or geometry of the building change significantly, results may vary.

File Name	File Type	Date Received (mm/dd/yyyy)
2023.05.22 - 2201 - 2274 Shattuck Zoning Drawings	.PDF	06/21/2023
2201 - 2023.06.21 - Sketchup Model	.SKP	06/21/2023

Changes to the Design or Environment

It should be noted that wind comfort is subjective and can be sensitive to changes in building design and operation that are possible during the life of a building. These could be, for example: outdoor programming, operation of doors, elevators, and shafts pressurizing the tower, changes in furniture layout, etc.. In the event of changes to the design, construction, or operation of the building in the future, RWDI could provide an assessment of their impact on the discussions included in this report. It is the responsibility of Others to contact RWDI to initiate this process.

8. STATEMENT OF LIMITATIONS

This report was prepared by Rowan Williams Davies & Irwin Inc. for Hanson Bridget LLP ("Client"). The findings and conclusions presented in this report have been prepared for the Client and are specific to the project described herein and authorized scope. The conclusions and recommendations contained in this report are based on the information available to RWDI when this report was prepared. Because the contents of this report may not reflect the final design of the Project or subsequent changes made after the date of this report, RWDI recommends that it be retained by Client to verify that the results and recommendations provided in this report have been correctly interpreted in the final design of the Project.

The conclusions and recommendations contained in this report have also been made for the specific purpose(s) set out herein. Should the Client or any other third party utilize the report and/or implement the conclusions and recommendations contained therein for any other purpose or project without the involvement of RWDI, the Client or such third party assumes any and all risk of any and all consequences arising from such use and RWDI accepts no responsibility for any liability, loss, or damage of any kind suffered by Client or any other third party arising therefrom.

Finally, it is imperative that the Client and/or any party relying on the conclusions and recommendations in this report carefully review the stated assumptions contained herein and to understand the different factors which may impact the conclusions and recommendations provided.

Re: Agenda Item No. 6: 2274 Shattuck Avenue Project (Use Permit #ZP2023-0079)

Dear Zoning Adjustments Board Chairperson Duffy, Vice Chairperson Gaffney, Board Members, Ms. Gong:

These comments are submitted on behalf of East Bay Residents for Responsible Development ("East Bay Residents" or "EBRRD") regarding Agenda Item 6, the 2274 Shattuck Avenue Project (Use Permit #ZP2023-0079 APN: 57-2028-3) ("Project") proposed by Isaiah Stackhouse ("Applicant").[1] The Project proposes to demolish the commercial building with the preservation and renovation the front façade and lobby, and construct a 17-story (183 feet, plus 5-foot parapet), 214,032-square-foot, mixed-use residential building with 227 dwelling units (including 23 Very Low-Income Density Bonus qualifying units), and one parking

[1] City of Berkeley, Zoning Adjustments Board, Staff Report for Board Action (Dec. 12, 2024) 2274 Shattuck Avenue Use Permit #ZP2023-0079. Available at: https://berkeleyca.gov/sites/default/files/documents/2024-12-12_ZAB_Item%206_2274%20Shattuck%20-%20Packet.pdf (hereinafter "Staff Report").

printed on recycled paper

space. The Project is located on the east side of Shattuck Avenue within the Downtown Mixed-Use Commercial District (C-DMU), Corridor Sub-Area, as identified in the City's Downtown Area Plan ("DAP").

In response to the Applicant's request for a CEQA exemption,[2] Berkeley City Staff have determined that the Project meets the criteria for a Categorical Exemption pursuant to CEQA Guidelines, Section 15332, "In-Fill Development Projects" ("Infill Exemption").[3] The Applicant also requested that the Project be approved pursuant to a Class 31 CEQA exemption for Historical Resource Restoration/Rehabilitation.[4]

East Bay Residents reviewed the AB 1633 Letter, the Staff Report, its technical appendices and reference documents with assistance of EBRRD's expert noise consultant Deborah Jue of Wilson Ihrig, whose comments and qualifications are attached. Ms. Jue's Comments ("Jue Comments") and Ms. Jue's CV are attached hereto as **Exhibit A.**

EBRRD's review of the record demonstrates that neither the Applicant nor the City have presented substantial evidence to support the claimed CEQA exemptions. To the contrary, a CEQA exemption is inapplicable to the Project because there is substantial evidence in the record demonstrating that the Project has potentially significant, unmitigated impacts from noise and vibration to nearby sensitive receptors including residents in the multi-family apartment buildings located immediately to the west and south of the project boundary, as well as to the northeast of the project site, and students at Berkeley High School located approximately 450 west of the Project site, and Washington Elementary School.[5]

Moreover, the Project is not subject to a CEQA categorical exemption because the Project site is a historical resource pursuant to state and local law. CEQA provides an explicit exception to CEQA exemptions for projects which cause a substantial adverse change in the significance of a historical resource. The Project site historically operated as a single-screen, 1,800-seat theater under the United

---

[2] Letter from Hanson Bridgett LLP to Sharon Gong, Senior Planner, City of Berkeley, 2274 Shattuck Avenue – AB 1633 Notice of CEQA Exemption, (March 4, 2024) p. 134 of 320 (hereinafter "AB 1633 Letter")
[3] Letter from Sharon Gong, Senior Planner, City of Berkeley, to Robin Baral, Senior Counsel, Hanson Bridgett LLP, Response to AB 1633 Notice for Use Permit #ZP2023-0079 – 2274 Shattuck Avenue (Oct. 4, 2024).
[4] Staff Report, p. 107 of 142.
[5] AB 1633 Letter, p. 134 of 320.

Artists marquee.[6] More recently it operated as Regal Cinemas, which vacated the property in early 2023.[7] The Project would involve the demolition of all but the front façade and lobby of the existing United Artists movie theater, which was found eligible for listing on the National Register of Historic Places (NAHP) in 2004, was listed in the California Register of Historical Resources ("CRHR") in 2006, and was designated as a City Landmark in 2024.[8] While the Project's SB 330 application predated the City Landmark determination,[9] it did not predate the National and State designations, nor does SB 330 vesting excuse the City from its duty under CEQA to evaluate whether the Project would adversely impact the historic resource. Here, Project construction would cause a substantial adverse change in the significance of any historical resource. The Project is therefore not subject to a CEQA exemption pursuant to CEQA Guidelines Section 15300.2 subdivision (f).[10]

The ZAB should remand the Project to Staff to prepare a legally adequate environmental impact report ("EIR") to adequately analyze and mitigate the Project's potentially significant environmental impacts before the Project can lawfully be approved.

I. STATEMENT OF INTEREST

East Bay Residents for Responsible Development is an unincorporated association of individuals and labor organizations that may be adversely affected by the potential impacts associated with Project development. The association includes labor organizations UA Plumbers and Pipefitters Local 342, International Brotherhood of Electrical Workers Local 595, Sheet Metal Workers Local 104, Sprinkler Fitters Local 483, and their members and their families who live and/or work in the City of Berkeley and Alameda County.

The individual members of EBRRD live, work, and raise their families in the City of Berkeley and Alameda County. They would be directly affected by the Project's impacts. Individual members may also work on the Project itself. They will therefore be first in line to be exposed to any health and safety hazards that may exist on the Project site.

[8] Staff Report, p. 16.
[9] Staff Report, pp. 16-17.
[10] 14 CCR § 14300.2(f) ("[a] categorical exemption shall not be used for a project which may cause a substantial adverse change in the significance of a historical resource.").

The organizational members of EBRRD also have an interest in enforcing the City's planning and zoning laws and the State's environmental laws that encourage sustainable development and ensure a safe working environment for its members. Environmentally detrimental projects can jeopardize future jobs by making it more difficult and more expensive for business and industry to expand in the region, and by making it less desirable for businesses to locate and people to live there. Indeed, continued degradation can, and has, caused restrictions on growth that reduce future employment opportunities. Finally, EBRRD's members are concerned about projects that present environmental and land use impacts without providing countervailing economic and community benefits.

II. THE PROJECT IS NOT EXEMPT FROM CEQA BECAUSE THERE IS SUBSTANTIAL EVIDENCE OF POTENTIALLY SIGNIFICANT, UNMITIGATED ENVIRONMENTAL IMPACTS WHICH REQUIRE MITIGATION

A. The Project Does Not Qualify for An AB 1633 CEQA Exemption

The Project does not qualify for a CEQA exemption pursuant to AB 1633 because the record lacks substantial evidence to support the exemption and there is substantial evidence demonstrating that the Project has significant, unmitigated impacts which preclude reliance on an exemption. The Applicant's AB 1633 Letter asserted that AB 1633 required the City find the Project exempt within 90 days.[11] The City has done so, but neither Applicant's AB 1633 Letter nor the City's CEQA determination are supported by substantial evidence. The City is therefore not required to approve the Project under an exemption pursuant to AB 1633.

AB 1633 requires approval of an exemption where there is substantial evidence in the record that the Project qualifies for an exemption and is not subject to any exceptions.[12] Here, the Project does not qualify for an exemption because the Applicant's AB 1633 Letter lacks substantial evidence to support a conclusion that the Project's noise and historical resources impacts are less than significant, and the City has not corrected the errors. The ZAB therefore has discretion to deny the Applicant's proposed exemptions and prepare an EIR because there is substantial evidence in the record that the Project is not subject to the exemptions.

[11] Staff Report, p. 108 of 142.
[12] Gov. Code § 65589.5(h)(6)(D)(i)(IV).

First, a CEQA exemption is inapplicable to the Project because the Applicant's noise analysis is incomplete and unsupported. In particular, the noise analysis omits significant sources of noise. For example, the noise analysis failed to analyze the heating, ventilation, and air conditioning ("HVAC") system required for a project of this size, and failed to analyze noise impacts from demolition equipment, backup generators, compressors, deliveries.[13] Ms. Jue explains that the omission of these significant sources of noise resulted in underestimated noise impacts.[14] The Applicant's noise analysis therefore contains significant errors and omissions which do not provide substantial evidence to support the exemption determination.

Second, there is substantial evidence in the record demonstrating that the Project has potentially significant impacts from noise and vibration to nearby sensitive receptors. Ms. Jue explains that these receptors include residents in the multi-family apartment buildings located immediately to the west and south of the project boundary, as well as to the northeast of the project site, and students at Berkeley High School located approximately 450 west of the Project site, and Washington Elementary School.[15]

Third, substantial evidence supports a fair argument that the Project results in a substantial adverse change in the significance of a historical resource, the historic U.A. Theater, precluding the ZAB's reliance on a CEQA exemption for Project approval. Neither AB 1633 nor SB 330 limit the City's obligation to assess the impact of a proposed project on cultural resources under CEQA and to impose measures to mitigate any adverse impact on cultural resources.[16] In this case, additional mitigation measures or alterations in the Project are necessary to mitigate the adverse impact on cultural resources associated with Project construction.

The City must comply with CEQA before approving the Project. The ZAB should remand the Project to staff to prepare an EIR to address these impacts.

---

[15] AB 1633 Letter, p. 134 of 320.
[16] See Gov. Code § 65913.10(c).) https://berkeleyca.gov/sites/default/files/legislative-body-meeting-attachments/2024-02-01_LPC_Late%20Communications_2274%20Shattuck.pdf.

B. The Project Does Not Qualify for the Infill Exemption Due to Significant Noise and Vibration Impacts

In order to approve the Project under an Infill Exemption, the City must determine, based on substantial evidence, that approval of the Project would not result in any significant effects on the environment. Exemptions must be narrowly construed and are not to be expanded beyond the scope of their plain language.[17] CEQA Guidelines Section 15332 provides an exemption from CEQA for "benign infill projects that are consistent with the General Plan and Zoning requirements" of a municipality and that satisfy the following criteria:[18]

(a) The project is consistent with the applicable general plan designation and all applicable general plan policies as well as with applicable zoning designation and regulations.
(b) The proposed development occurs within city limits on a project site of no more than five acres substantially surrounded by urban uses.
(c) The project site has no value as habitat for endangered, rare or threatened species.
(d) Approval of the project would not result in any significant effects relating to traffic, noise, air quality, or water quality.
(e) The site can be adequately served by all required utilities and public services.

The Project fails to meet the requirements of Section 15332(d) because the Project will result in significant impacts from noise and vibration to nearby sensitive receptors. The Project's construction noise and vibration impacts will adversely impact nearby sensitive receptors including residents in the multi-family apartment buildings located immediately to the west and south of the project boundary, as well as to the northeast of the project site, and students at Berkeley High School located approximately 450 west of the Project site, and Washington Elementary School.[19] For the reasons detailed herein and in EBRRD's expert consultant reports attached hereto, the Project fails to qualify for the Infill Exemption.

[17] *Castaic Lake Water Agency v. City of Santa Clarita* (1995) 41 Cal.App.4th 1257.
[18] 14 CCR § 15332.
[19] AB 1633 Letter, p. 134 of 320.

Pile driving and construction of the Project will generate significant noise and vibration impacts.[20] Construction of the 17-story building will necessarily require pile driving.[21] The AB 1633 Letter from the Applicant provides that "Construction of the foundation for this project will utilize cast-in-place concrete piles. No pile driving will be involved at any point during the construction of the project."[22] Expert evidence presented by Deborah Jue demonstrates that a Project of this size would necessarily require pile driving to ensure the structural stability of the Project's foundation. Substantial evidence in Deborah Jue's comments demonstrate that noise from pile driving ranges from 95 to 101 dBA Leq. Table 1 presents the noise from impact and vibratory pile driving that may result from construction of the Project. Construction noise would be significant at nearby residences, and the record lacks substantial evidence demonstrating that the Project's noise control plan would reduce this impact.[23] Ms. Jue explains that the construction noise plan must include specific noise control measures such as sound curtains, off-site noise control, and possibly alternate daytime accommodations.[24] She concludes that, even with additional mitigation, noise and vibration impacts could remain significant as sound curtains are unlikely to provide more than 5 or 10 dBA reduction.[25] The City cannot rely on an the Infill Exemption due to significant, unmitigated noise impacts.

Table 1 Pile Driving Noise at Near Distances

Receptor	Distance, ft (center/near)	Pile Driving Noise Level, dBA Leq	Criteria, dBA Leq	Significant?
K Street Flats[1]	150 90	85 – 91 90 – 96	70	**Yes** **Yes**
2030 Bancroft Way	180 65	84 – 90 93 – 99	70	**Yes** **Yes**
Note 1: Assumes No shielding from the Public Library to the K Street Flats				

The Downtown Area Plan Noise mitigation measures do not reduce the noise impacts from Project construction to less than significant levels. DAP MM NOI-3 provides that "Affected residents could be provided building sound insulation such

[20] Jue Comments, p. 2.
[21] *Id.*
[22] AB 1633 Letter, p. 289 of 320.
[23] Jue Comments, p. 2.
[24] *Id.*
[25] *Id.*

as sound-rated windows and doors…as a method of reducing noise levels in interior spaces."[26] These measures are not included in the Project, and are necessary to reduce significant noise impacts. The measures included in MM NOI-4 and MM NOI-5 are likewise not included in Project features and as demonstrated in Deborah Jue's comments, would not sufficiently reduce Project construction and operational noise and vibration impacts to less than significant levels.

Moreover, Ms. Jue's comments demonstrate that the Noise Impact Analysis failed to adequately quantify construction noise beyond pile driving.[27] Ms. Jue's comments provide substantial evidence that when the noise analysis is conducted with the correct distances to sensitive receptors, for example, 65 ft to 2030 Bancroft Way, the construction noise impacts are significant.[28] Ms. Jue recommends feasible mitigation to reduce construction noise impacts, including sound barriers, buffer distances, and exclusion of specific activities and equipment.[29]

Additionally, Ms. Jue's comments provide that the Noise Impact Analysis underestimates the Project's construction noise impacts by failing to include noise associated with demolition equipment, backup generators, compressors, deliveries.[30] This is a significant omission resulting in a severe underestimation of construction noise impacts associated with the development of the Project.

The Project also results in significant operational noise impacts, which the Noise Impact Analysis fails to identify. Ms. Jue's comments demonstrate that the analysis of the HVAC systems relies on noise from a typical residential HVAC system, omitting impacts associated with the high-rise structure.[31] These kinds of structures require HVAC systems that are much larger than the "typical" residential HVAC systems referenced in the Noise Impact Analysis.[32] Large, air-cooled chillers can have a sound power level 90 to 110 dBA; contained within a reverberant mechanical room with standard louvers the noise reaching the nearest neighbor at 2030 Bancroft Way from two chillers could reach 50 to 70 dBA during constant operation, which could represent up to a 35 dBA increase over the baseline

[26] Downtown Area Plan, Mitigation Monitoring and Reporting Program, p. 7 of 18.
[27] Jue Comments, p. 2.
[28] Jue Comments, p. 2.

[30] *Id.*
[31] *Id.* at 3.
[32] *Id.*

environment during the nighttime. Ms. Jue's comments provide substantial evidence that this kind of increase would contribute to sleep disturbance for nearby sensitive receptors, which would result in a significant impact.[33]

If there is substantial evidence that a proposed project may have a significant effect on the environment, the agency must prepare an environmental impact report pursuant to CEQA before approving project.[34] Significant noise impacts preclude reliance on a CEQA exemption, including specifically the Infill Exemption. Here, there is substantial evidence that noise and vibration from construction of the Project will result in a significant effect on the environment. The ZAB cannot rely on a CEQA exemption to approve the Project, and must remand the Project to Staff to prepare a legally adequate EIR before the Project can be approved.

C. The Project is Subject to an Exception to a CEQA Categorical Exemption Because the Project Will Cause Substantial Adverse Change in the Significance of a Historical Resource

A project proposed pursuant to any CEQA categorical exemption, including a Class 31 or Class 32 exemption, must undergo environmental review if the project "may cause a substantial adverse change in the significance of a historical resource."[35] Here, substantial evidence in the record demonstrates that the Project will result in a substantial adverse change in the significance of the historical resource, the former U.A. Theater.

A resource is historical if it is "listed in, or determined to be eligible by the State Historical Resources Commission, for listing in the California Register of Historical Resources."[36] A resource is presumptively historical if it is included in a local register of historical resources, or identified as significant in a historical resource survey, absent a preponderance of evidence to the contrary.[37]

"Generally, a resource shall be considered by the lead agency to be 'historically significant' if the resource meets the criteria for listing on the California Register of Historical Resources including the following:

(A) Is associated with events that have made a significant contribution to the broad patterns of California's history and cultural heritage;

[37] *Id.* at § 15064.5, subd. (a)(2).

(B) Is associated with the lives of persons important in our past;
(C) Embodies the distinctive characteristics of a type, period, region, or method of construction, or represents the work of an important creative individual, or possesses high artistic values; or
(D) Has yielded, or may be likely to yield, information important in prehistory or history."[38]

"Substantial adverse change in the significance of an historical resource means physical demolition, destruction, relocation, or alteration of the resource or its immediate surroundings such that the significance of an historical resource would be materially impaired."[39] Material impairment of a historical resource occurs when a project "[d]emolishes or materially alters in an adverse manner those physical characteristics of an historical resource that convey its historical significance" and entitle it to be included in the California Register of Historical Resources or similar local registers.[40]

If a resource is determined to be a historical resource, "the fair argument standard applies to the question whether the proposed project 'may cause a substantial adverse change in the significance of an historical resource'...."[41] The fair argument standard "presents a legal question, i.e., the sufficiency of the evidence to support a fair argument" that the project would have a significant environmental impact.[42] "[U]nder this standard, deference to the agency's determination is not appropriate and its decision [not to conduct further environmental review] can be upheld only when there is no credible evidence to the contrary."[43] "The fair argument standard thus creates a low threshold for requiring an EIR, reflecting the legislative preference for resolving doubts in favor of environmental review."[44]

Substantial evidence supports a fair argument that construction of the Project will result in a significant adverse impact to a historic resource. On March 15, 2006, the California Office of Historic Preservation formally designated the property to the California Register based on the National Register finding that was

[38] *Id.* at § 15064.5, subd. (a)(3).

made by the 1978 HRI documentation and reiterated by the BRT Project documentation.[45] In the Office of Historic Preservation's Built Environment Resources Directory, the property now bears a status code of "2S2" indicating that it is an "Individual property determined eligible for the National Register by a consensus through the Section 106 process. Listed in the California Register."[46] The Project site is therefore a historical resource pursuant to CEQA.

The Project's remaining components are significant and warrant preservation. The Historic Preservation Commission concluded that the Project was a City Landmark because they determined that the property met the following criteria:

1. Architectural Merit:
    a. Property that is the first, last, only or most significant architectural property of its type in the region;
    b. Properties that are prototypes of or outstanding examples of periods, styles, architectural movements or construction, or examples of the more notable works of the best surviving work in a region of an architect, designer or master builder;
    c. Architectural examples worth preserving for the exceptional values they add as part of the neighborhood fabric.[47]
2. Cultural value: Structures, sites and areas associated with the movement or evolution of religious, cultural, governmental, social and economic developments of the City.
3. Educational value: Structures worth preserving for their usefulness as an educational force.
4. Historic value: Preservation and enhancement of structures, sites and areas that embody and express the history of Berkeley/Alameda County/California/United States. History may be social, cultural, economic, political, religious or military.[48]

While the Staff Report states that the City may not consider the City Landmark designation as a CEQA factor since it post-dated the Applicant's SB 330 Application, the City must still evaluate whether the Project would result in

---

[45] Notice of Exemption, Attachment 2, Historic Resources Evaluation, p. 49 of 320.
[46] *Id.*
[47] P. 17 of 63.
[48] City of Berkeley, Landmarks Preservation Commission Staff Report, 2274 Shattuck Avenue – United Artists Theater Demolition Referral: Use Permit (#ZP2023-0079) p. 9 of 63; 17 of 63. Available at: https://berkeleyca.gov/sites/default/files/documents/2024-02-01_LPC_Item%207_2274%20Shattuck_Demolition_Staff%20Report%20and%20Attachment.pdf.

substantial adverse effects to the significance of the resource. Here, the Project would impact the significant of the UA Theater as a listed California Historic Resource, as well as by being inconsistent with the Secretary of the Interior's Standards for Rehabilitation.[49]

First, the Project will not comply with Standard 1.[50] Standard 1 requires that "A property will be used as it was historically or be given a new use that requires minimal change to its distinctive materials, features, spaces and spatial relationships."[51] The Project will not be used as a theater as it was historically.[52] The Project also requires substantial change to convert the theater into a 17-story high-rise mixed use residential building.

Second, the Project will not comply with Standard 4. Standard 4 requires that "Changes to a property that have acquired historic significance in their own right will be retained and preserved."[53] Only the upper façade is being maintained, the other features of the façade and the building that have acquired historical significance in their own right will be demolished.

Third, the Project will not comply with Standard 9. Standard 9 requires that "New additions, exterior alterations or related new construction will not destroy historic materials, features and spatial relationships that characterize the property. The new work will be differentiated from the old and will be compatible with the historic materials, features, size, scale and proportion, and massing to protect the integrity of the property and its environment."[54] The design of the Project, with its modern features and massive scale, is not compatible with the size, scale and proportion of the historical property. The incompatibility of the scale is visible the project rendering below.[55]

[53] Code of Federal Regulations, Title 36, Chapter 1, Part 68.3 (b).
[54] *Id.*
[55] Staff Report, p. 83 of 142.

The Project Applicant attests that "[g]iven the project's eligibility for a Class 31 exemption, and the findings in the [Project Impact Analysis], the Project cannot legally be deemed to have a significant impact on historical resources."[56] This is not correct. If the ZAB determines that that implementation of the Project **will not** be consistent with the Secretary of Interior's Standards for Rehabilitation pursuant to the SOI Standards for the Treatment of Historic Properties with Guidelines for Preserving, Rehabilitating, Restoring, & Reconstructing Historic Buildings (1995, rev. 2017), then ZAB may determine that the Project does not qualify for a CEQA Exemption.

Substantial evidence presented herein and, in the record, supports a fair argument that the Project results in a significant impact to historical resources, precluding reliance on a CEQA exemption for Project approval. The ZAB should remand the Project to Staff to prepare a legally adequate EIR analyzing the Project's significant environmental impacts before the Project can be approved.

[56] Staff Report, p. 115 of 142.

III. CONCLUSION

Without providing community benefits or workforce standards, the Project would be precisely the type of project that the City has declared to be contrary to the general welfare. This Project should not be approved until the ZAB is presented with substantial evidence demonstrating that the Project will comply with the zoning ordinance and General Plan by providing employment opportunities for a local skilled construction workforce.

The ZAB should remand the Project to prepare a legally adequate environmental impact report ("EIR") to adequately analyze and mitigate the Project's potentially significant environmental impacts with respect to water quality, public health, air quality and greenhouse gas emissions before the Project can lawfully be approved.

Thank you for considering our comments. Please place this comment letter in the record of proceedings for this matter.

Sincerely,

Kelilah D. Federman

SUBJECT: 2274 Shattuck Project Staff Report, Comments on the Noise and Vibration Analysis

Dear Ms. Federman,

Per your request, I have reviewed the subject matter documents for the 2274 Shattuck Avenue Project (Project) Staff Report in Berkeley, California. The Staff Report includes the Applicant's filing (Attachment 3) which includes a Noise Impact Analysis as its Attachment 5 (Noise Memo). The project would demolish existing structures while retaining the historic façade along Shattuck Avenue and construct a 17 story high rise building. The project is subject to Berkeley's Downtown Area Plan.

Wilson Ihrig, Acoustical Consultants, has practiced exclusively in the field of acoustics since 1966. During our 58 years of operation, we have prepared hundreds of noise studies for Environmental Impact Reports and Statements. We have one of the largest technical laboratories in the acoustical consulting industry. We also utilize industry-standard acoustical programs such as Roadway Construction Noise Model (RCNM), SoundPLAN, and CADNA. In short, we are well qualified to prepare environmental noise studies and review studies prepared by others.

Project Does Not Qualify for Class 32 Exemption

The Project is subject to a Class 32 Exemption approval by the Zoning Adjustments Board. In order to approve the Project under a Class 32 Exemption, the ZAB must find that (a) The project is consistent with the applicable general plan designation and all applicable general plan policies as well as with applicable zoning designation and regulations. (b) The proposed development occurs within city limits on a project site of no more than five acres substantially surrounded by urban uses. (c) The project site has no value as habitat for endangered, rare or threatened species. (d) Approval of the project would not result in any significant effects relating to traffic, noise, air quality, or water quality. (e) The site can be adequately served by all required utilities and public services.

As described below, there would be significant noise impacts associated with the project, and the conditions of item (d) would not be met.

Pile Driving Would Generate Significant Noise and Vibration Impacts

The Noise Memo claims that no pile driving will be done (p. 10) but provides no evidence to substantiate this assertion and its claim that cast-in-place concrete piles will be sufficient to support a 17-story structure. Neither the Staff Report nor the Applicant's filing contains any mention of the foundation requirements. Pile driving would generate significant noise and vibration impacts. The FTA guidance referenced in the Noise Memo indicates that the typical noise from pile driving ranges from 95 to 101 dBA Leq. Table 1 presents the noise from impact and vibratory pile driving. Construction noise would be significant at nearby residences, and

the construction noise plan must include specific noise control measures such as sound curtains, off-site noise control, and possibly alternate daytime accommodations. Even so, these impacts could remain significant and unavoidable as sound curtains are unlikely to provide more than 5 or 10 dBA reduction. An explicit mitigation or condition to exclude impact and vibratory piles would be necessary.

Table 1 Pile Driving Noise at Near Distances

Receptor	Distance, ft (center/near)	Pile Driving Noise Level, dBA Leq	Criteria, dBA Leq	Significant?
K Street Flats[1]	150 90	85 – 91 90 – 96	70	**Yes** **Yes**
2030 Bancroft Way	180 65	84 – 90 93 – 99	70	**Yes** **Yes**
Note 1: Assumes No shielding from the Public Library to the K Street Flats				

Vibration from pile driving could be 0.17 to 1.518 in/sec PPV at a distance of 25 ft, which are much higher than grading equipment considered in the Noise Memo. At the closest building (the Berkeley Public Library which is less than 10 ft from the nearest edge of the Project footprint), pile driving would exceed the 0.3 in/sec criteria and be significant. See Table 2. An explicit mitigation or condition to exclude impact and vibratory piles would be necessary.

Table 2 Impact Pile Driving Near Distances

Receptor	Distance, ft (near)	Pile Driving Vibration (PPV in/sec)	Criteria, PPV in/sec	Significant?
Berkeley Public Library	15 <10	0.366 - 3.266 0.672 – 6.000	0.3	**Yes** **Yes**

Construction of a High Rise Would Generate Significant Noise Impacts

The Noise Memo conducted their construction noise analysis by averaging the moving sources (excavators and graders) over the entire site; but, these calculations should also be done for the closest distances, which is 65 ft to 2030 Bancroft Way. See Table 3. Construction noise would be significant at 2030 Bancroft Way, and the construction noise plan must include specific noise control measures such as sound barriers, buffer distances, and exclusion of specific activities and equipment.

Demolition equipment, backup generators, compressors, deliveries, etc. should also be identified in the analysis, as much of this activity could be staged on Bancroft Way.

Table 3 Grading Construction Noise at Near Distances

Receptor	Distance, ft (center/near)	Construction Noise Level, dBA Leq	Criteria, dBA Leq	Significant?
2030 Bancroft Way	180 65	66.8 75.6	70	No **Yes**
Adapted from Noise Memo, Table 6				

The Noise Memo lacks any discussion of the noise from erecting a high rise, which includes a tower crane, arc welding, construction elevators, equipment delivery, etc. These activities would rise above the Berkeley Public Library building, and the noise could be comparable to or higher than grading and would be significant.

Noise Analysis Lacks Adequate Baseline Noise Data

The Noise Memo references the Berkeley General Plan from 2002 and references the L_{dn} which is a 24-hour noise metric. The Noise Memo lacks any validation of this noise data, and it provides no documentation of existing nighttime conditions. In particular, there is no data to document the noise levels toward the center of the block where traffic noise is shielded by buildings. Without this current data the Noise Memo lacks the basis to draw conclusions regarding substantial, and potentially significant increases in the noise environment caused by the Project. Nighttime environments in the Bay Area that are shielded from traffic could be on the order of 35 to 45 dBA on an hourly Leq basis.

Noise from Operation of a High Rise is Potentially Significant

The Noise Memo applies noise from "typical residential heating, ventilation, and air conditioning (HVAC) systems", omitting any acknowledgement that this would be a high-rise structure, with additional needs for common areas and non-residential areas. The project plans show several mechanical rooms on the ground floor (Drawing A0.3B, p. 64 of 142) which appears to be contrary to the floor plan shown in the previous page (Drawing A0.3A, p. 63 of 142). There is no additional MEP space shown on the roof or at an intermediate floor or mezzanine and based on our experience with high rise projects the MEP space allocated in the drawings is inadequate. These kinds of structures require HVAC systems that are much larger than the "typical" referenced in the Noise Memo. Large, air-cooled chillers can have a sound power level 90 to 110 dBA; contained within a reverberant mechanical room with standard louvers the noise reaching the nearest neighbor at 2030 Bancroft Way from two chillers could reach 50 to 70 dBA during constant operation, which could represent a up to a 35 dBA increase over the baseline environment during the nighttime. This kind of increase would contribute to sleep disturbance which would be significant.

Conclusions

The noise and vibration analysis for the project contains substantial omissions errors. Correcting these issues would identify that Project would generate additional significant noise impacts and warrant an Environmental Impact Report (EIR) that includes mitigation measures to manage the anticipated impacts and full disclosure of any impacts that would remain significant.

Please feel free to contact me with any questions on this information.

Very truly yours,

DEBORAH JUE

Principal

Since joining Wilson Ihrig in 1990, Ms. Jue has been involved in with many projects from environmental assessments and entitlements, through design development, construction documents and construction administration support. As an acoustical consultant, she has provided noise measurement, analysis and recommendations to control noise and vibration both at the interior of the project and at the neighboring properties. She has authored many reports concerning compliance with the requirements of California Noise Insulation Standards, Title 24, local Noise Elements, environmental assessments and Federal noise criteria, and is well aware of the additional design and construction technique requirements to achieve industry standards. Ms. Jue has authored or provided input for many environmental documents and technical studies in accordance with NEPA and California's CEQA regulations, most of them related to surface transportation, and she gives presentations to public officials when necessary to explain construction noise problems, noise mitigation goals, and noise control methods. She can develop construction noise and vibration criteria to address vibration damage potential to nearby buildings and sensitive structures, and vibration annoyance or disruption potential for occupants of nearby buildings.

ZONING ADJUSTMENTS BOARD

NOTICE OF DECISION

DATE OF BOARD DECISION: December 12, 2024
DATE NOTICE MAILED: December 30, 2024
APPEAL PERIOD EXPIRATION: January 13, 2025
EFFECTIVE DATE OF PERMIT (Barring Appeal or Certification)[1]: January 21, 2025

2274 Shattuck Avenue

Use Permit #ZP2023-0079 to demolish the commercial building (preserving and renovating the front façade and lobby), and construct a 17-story (183 feet, plus 5-foot parapet), 214,032-square-foot, mixed-use residential building with 227 dwelling units (including 23 Very Low-Income Density Bonus qualifying units), and one ADA parking space.

The Zoning Adjustments Board of the City of Berkeley, after conducting a public hearing, **APPROVED** the following permits:

A. Zoning Permits Required:

- Use Permit under BMC Section 23.326.070(A) to demolish a non-residential building
- Use Permit under BMC Section 23.204.020(A) to construct a new mixed-use residential development
- Use Permit under BMC Section 23.204.020(A) to construct dwelling units
- Use Permit under BMC Section 23.204.030(B)(1) to create new floor area of 10,000 square feet or more
- Use Permit under BMC Section 23.204.130(E)(1) to exceed the maximum building height limit, up to 75 feet (plus 5-foot parapet, by right)
- Use Permit under BMC Section 23.04.130(E)(3)(b) to modify front and side setback requirements
- Administrative Use Permit under BMC Section 23.304.050(A) to exceed building height limits with rooftop architectural elements which exceed the maximum height limit for the district

[1] Pursuant to BMC Section 23.410.050(C), the City Council Certifications, the City Council may take an action to review ZAB's decision on a Use Permit or Variance. This action is called certification and has the same effect as an appeal. Any member of the City Council may initiate the certification process of a ZAB decision during the 14-day appeal period after the notice of the ZAB's decision is issued. However, the Council's deadline to certify a project is suspended or tolled when the Council is on recess. Therefore, in all cases where the 14-day appeal period is scheduled to end during a Council recess, the certification deadline is extended to and through the day before the next regularly scheduled City Council meeting following any recess. *Extension of the certification deadline has no effect on the appeal deadline.*

B. **Concessions and Waivers Requested Pursuant to State Density Bonus Law (California Government Code Section 65915):**
   - Concession – none.
   - Waiver of BMC Section 23.04.130(E)(1) to exceed building height limits – to be 183 feet to roof (plus 5-foot parapet, by right), where 75 feet is the limit (plus 5-foot parapet by right)
   - Waiver of BMC Section 23.204.130(E)(3)(b) to waive front and side setback minimums
   - Waiver of BMC Section 23.204.130(E)(3) to increase front setback maximum to 7-foot, 1 inch, where 5 feet maximum is required, at 0-20-foot building height;
   - Waiver of BMC Section 23.204.130(E)(3)(b)(i) to exceed 120 feet in width in diagonal measurement above 120 feet in height – to be 178 feet, 9 inches in width, where 120 feet is required
   - Waiver of BMC Section 23.204.130(E)(4) to reduce the usable open space requirement – to provide 7,737 square feet, where 18,160 square feet is required
   - Waiver of BMC Section 23.322.090(A) to provide 72 long term residential bicycle parking, where 210 is required

APPLICANT: Isaiah Stackhouse, 2421 Fourth St., Berkeley, CA 94710

PROPERTY OWNER: 2274 Shattuck QOZB, LLC, C/O JP Walsh, 2539 Telegraph Avenue, Suite 101, Berkeley CA 94704

INTERESTED PARTIES: Alex Stukan, Adams Broadwell Joseph & Cardozo, 601 Gateway Blvd., Suite 1000, South San Francisco, CA 94080-7037

ENVIRONMENTAL REVIEW STATUS: Categorically exempt pursuant to Section 15332 of the CEQA Guidelines (“Infill Development Projects”).

ATTEST:
Samantha Updegrave, Zoning Adjustments Board Secretary

PUBLICATION OF NOTICE:

Pursuant to BMC Section 23.404.050, this notice shall be mailed to the applicant at the mailing address stated in the application and to any person who requests such notification by filing a written request with the Zoning Officer on or before the date of the Board action. This notice shall also be filed with the City Clerk. In addition, the notice shall be forwarded to the Zoning Adjustments Board and to the Main Library. The notice shall also be posted at a bulletin board at the Zoning Counter. The City Clerk shall make the notice available to interested members of the Council and the public.

FURTHER INFORMATION:

Questions about the project should be directed to the project planner, Sharon Gong, at (510) 981-7429 or sgong@berkeleyca.gov. All project application materials, including full-size plans, may be viewed online at: https://aca.cityofberkeley.info/CitizenAccess/Welcome.aspx. or in the Permit Service Center at the Zoning Counter at 1947 Center Street, Third Floor, during normal office hours.

TO APPEAL THIS DECISION (see Section 23.410 of the Berkeley Municipal Code):

To appeal a decision of the Zoning Adjustments Board to the City Council you must:

1. Submit a letter clearly and concisely setting forth the grounds for the appeal to the City Clerk, located at 2180 Milvia Street, 1st Floor, Berkeley. The City Clerk's telephone number is (510) 981-6900.
2. Submit the required appeal fee (checks and money orders payable to "City of Berkeley"):
   A. The fee for persons other than the applicant is $1,500. This fee may be reduced to $500 if the appeal is signed by persons who lease or own at least 50 percent of the parcels or dwelling units within 300 feet of the project site, or at least 25 such persons (not including dependent children), whichever is less.
   B. The fee for all appeals by Applicants is $6,000.
3. The appeal must be received prior to 5:00 p.m. on the "APPEAL PERIOD EXPIRATION" date shown on page 1 (if the close of the appeal period falls on a weekend or holiday, then the appeal period expires the following business day).

If no appeal is received, the permit will be issued on the first business day following expiration of the appeal period, and the project may proceed at that time.

NOTICE CONCERNING YOUR LEGAL RIGHTS:

If you object to this decision, the following requirements and restrictions apply:

1. If you challenge this decision in court, you may be limited to raising only those issues you or someone else raised at the public hearing described in this notice, or in written correspondence delivered to the Zoning Adjustments Board at, or prior to, the public hearing.
2. You must appeal to the City Council within fourteen (14) days after the Notice of Decision of the action of the Zoning Adjustments Board is mailed. It is your obligation to notify the Land Use Planning Division in writing of your desire to receive a Notice of Decision when it is completed.
3. Pursuant to Code of Civil Procedure Section 1094.6(b) and Government Code Section 65009(c)(1), no lawsuit challenging a City Council decision, as defined by Code of Civil Procedure Section 1094.6(e), regarding a use permit, variance or other permit may be filed more than ninety (90) days after the date the decision becomes final, as defined in Code of Civil Procedure Section 1094.6(b). Any lawsuit not filed within that ninety (90) day period will be barred.
4. Pursuant to Government Code Section 66020(d)(1), notice is hereby given to the applicant that the 90-day protest period for any fees, dedications, reservations, or other exactions included in any permit approval begins upon final action by the City, and that any challenge must be filed within this 90-day period.
5. If you believe that this decision or any condition attached to it denies you any reasonable economic use of the subject property, was not sufficiently related to a legitimate public purpose, was not sufficiently proportional to any impact of the project, or for any other reason constitutes a “taking” of property for public use without just compensation under the California or United States Constitutions, your appeal of this decision must include the following information:
   A. That this belief is a basis of your appeal.
   B. Why you believe that the decision or condition constitutes a "taking" of property as set forth above.
   C. All evidence and argument in support of your belief that the decision or condition constitutes a “taking” as set forth above.

   If you do not do so, you will waive any legal right to claim that your property has been taken, both before the City Council and in court.

ATTACHMENT 1

FINDINGS AND CONDITIONS

DECEMBER 12, 2024

2274 Shattuck Avenue

Use Permit #ZP2023-0079 to demolish the commercial building (preserving and renovating the front façade and lobby), and construct a 17-story (183 feet, plus 5-foot parapet), 214,032-square-foot, mixed-use residential building with 227 dwelling units (including 23 Very Low-Income Density Bonus qualifying units), and one ADA parking space.

ZONING PERMITS REQUIRED

- Use Permit under BMC Section 23.326.070(A) to demolish a non-residential building
- Use Permit under BMC Section 23.204.020(A) to construct a new mixed-use residential development
- Use Permit under BMC Section 23.204.020(A) to construct dwelling units
- Use Permit under BMC Section 23.204.030(B)(1) to create new floor area of 10,000 square feet or more
- Use Permit under BMC Section 23.204.130(E)(1) to exceed the maximum building height limit, up to 75 feet (plus 5-foot parapet, by right)
- Use Permit under BMC Section 23.04.130(E)(3)(b) to modify front and side setback requirements
- Administrative Use Permit under BMC Section 23.304.050(A) to exceed building height limits with rooftop architectural elements which exceed the maximum height limit for the district

CONCESSIONS/WAIVERS UNDER GOVERNMENT CODE SECTION 65915-65918

- Concession – none.
- Waiver of BMC Section 23.04.130(E)(1) to exceed building height limits – to be 183 feet to roof (plus 5-foot parapet, by right), where 75 feet is the limit (plus 5-foot parapet by right)
- Waiver of BMC Section 23.204.130(E)(3)(b) to waive front and side setback minimums
- Waiver of BMC Section 23.204.130(E)(3) to increase front setback maximum to 7-foot, 1 inch, where 5 feet maximum is required, at 0-20-foot building height
- Waiver of BMC Section 23.204.130(E)(3)(b)(i) to exceed 120 feet in width in diagonal measurement above 120 feet in height – to be 178 feet, 9 inches in width, where 120 feet is required
- Waiver of BMC Section 23.204.130(E)(4) to reduce the usable open space requirement – to provide 7,737 square feet, where 18,160 square feet is required
- Waiver of BMC Section 23.322.090(A) to provide 72 long term residential bicycle parking, where 210 is required

I. CEQA FINDINGS

A. On October 4, 2024, the City determined that the project is categorically exempt from the provisions of CEQA under Section 15332 ("Infill Development Projects") of the CEQA Guidelines, pursuant to Assembly Bill (AB) 1633. (See Exhibit A.)

The project applicant filed an AB 1633 Notice with the City on March 4, 2024 and attached technical reports that supported the project's eligibility for a Class 32 Categorical Exemption from CEQA and the inapplicability of any Exceptions to the exemption (CEQA Guidelines, Section 15300.2). Submitted technical reports included the following: Traffic Impact Analysis, Historic Resources Evaluation, Project Impacts Analysis, Air Quality Impacts Analysis, Noise Impact Analysis, and Water Quality Impact Analysis. All technical reports were peer reviewed by a CEQA consultant, and were revised or supplemented for adequacy.

B. Upon review of all evidence on the record, the City determined that the project is categorically exempt from the provisions of the California Environmental Quality Act (CEQA, Public Resources Code §21000, et seq. and California Code of Regulations, §15000, et seq.) pursuant to Section 15332 ("Infill Development Projects") of the CEQA Guidelines.

The project meets the requirements under CEQA Guidelines Section 15332, as follows:

1. The project is consistent with the applicable General Plan designation and policies, and with the applicable zoning designation and regulations.
2. The project occurs within the Berkeley City limits on a project site of no more than five acres, and is surrounded by urban uses.
3. The parcels within the project site have previously been developed and have no value as habitat for endangered, rare or threatened species.
4. The project would not result in any significant effects relating to traffic, noise, air quality or water quality. The Traffic Impact Analysis prepared for the project was reviewed by the City Transportation Division which concurred with the findings of less than significant impacts. City Standard Conditions would address potential impacts related to traffic, noise, air quality, and water quality.
5. The site can be adequately served by all required utilities and public services.

C. Furthermore, none of the exceptions in CEQA Guidelines Section 15300.2 apply, as follows: (a) the site is not located in an environmentally sensitive area, (b) there are no cumulative impacts, (c) there are no significant effects on the environment due to unusual circumstances, (d) the project is not located near a scenic highway, (e) the project site is not located on a hazardous waste site pursuant to Government Code Section 65962.5, and (f) the project would not cause a substantial adverse change in the significance of any historical resource.

II. HOUSING ACCOUNTABILITY ACT FINDINGS

A. The Housing Accountability Act, Government Code Section 65589.5(j) requires that when a proposed housing development complies with applicable, objective general plan and zoning standards, a local agency may not deny the project or approve it with reduced density unless the agency makes written findings supported by substantial evidence that: (1) the development would have a specific adverse impact on public health or safety unless disapproved or approved at a lower density; and (2) there is no feasible method to satisfactorily mitigate or avoid the specific adverse impact, other than the disapproval or approval at a lower density.

B. The project includes construction of 227 dwelling units. Because the base project complies with applicable, objective general plan and zoning standards, §65589.5(j) does apply to this project. No significant, quantifiable, direct and unavoidable impacts, based on objective, identified written public health or safety standards, polices, or conditions, have been identified.

III. DENSITY BONUS FINDINGS

A. Pursuant to Government Code Section 65915, the Zoning Adjustments Board finds that:

1. Under the City's methodology for implementing density bonuses, the "base project" consists of 151 units;
2. The project will provide at least 23 Very Low-Income (VLI) qualifying units in the 151-unit "base project";
3. The project is entitled to a density increase of 50 percent over the otherwise maximum allowable residential density under the Zoning Ordinance and General Plan Land Use Element, under the requirements of Government Code Section 65915(b) and (f), plus three concessions or incentives. This equates to a density bonus of 76 units above the Base Project, for a total of 227 units.

B. In accordance with Government Code Section 65915(e) the Zoning Adjustments Board hereby grants the following waivers to modify development standards as necessary to accommodate these density bonus units:

1. Waiver of BMC Section 23.04.130(E)(1) to exceed building height limits – to be 183 feet to roof (plus 5-foot parapet, by right), where 75 feet is the limit (plus 5-foot parapet by right)
2. Waiver of BMC Section 23.204.130(E)(3)(b) to waive front and side setback minimums
3. Waiver of BMC Section 23.204.130(E)(3) to increase front setback maximum to 7-foot, 1 inch, where 5 feet maximum is required, at 0-20-foot building height
4. Waiver of BMC Section 23.204.130(E)(3)(b)(i) to exceed 120 feet in width in diagonal measurement above 120 feet in height – to be 178 feet, 9 inches in width, where 120 feet is required
5. Waiver of BMC Section 23.204.130(E)(4) to reduce the usable open space requirement – to provide 7,737 square feet, where 18,160 square feet is required
6. Waiver of BMC Section 23.322.090(A) to provide 72 long term residential bicycle parking, where 210 is required

D. In accordance with Government Code Section 65915(e), in order to allow construction of the proposed project with the density permitted under State law, the Zoning Adjustments Board finds approval of waivers is required 1) construct the proposed project at the density permitted under State law; 2) approval of requested waivers will not have a specific adverse impact upon

public health and safety, or the physical environment, or on any real property listed in the California Register of Historical Resources; and 3) approval of the requested waivers will not be contrary to State or Federal law.

IV. FINDINGS FOR APPROVAL

A. As required by Section 23.406.040(E) of the BMC, the project, under the circumstances of this particular case existing at the time at which the application is granted, will not be detrimental to the health, safety, peace, morals, comfort, and general welfare of the persons residing or working in the neighborhood of such proposed use or be detrimental or injurious to property and improvements of the adjacent properties, the surrounding area or neighborhood, or to the general welfare of the City because:

1. The project is consistent with all applicable C-DMU District standards and qualifies for waivers and concessions for the listed district standards granted pursuant to State Density Bonus, Government Code, Section 65915;
2. New shadow impacts will occur: a) in the summer months in the hours after sunrise on the residential buildings at 2120 Bancroft Way and 2020 Kittredge Street to the west, and in the hours before sunset on the mixed-use residential buildings at 2295 and 2319 Shattuck Avenue to the east; and b) in the winter months in the hours after sunrise on the residential buildings at 2020 Kittredge Street to the west, and in the hours before sunset on the mixed-use residential building at 2231 Shattuck Avenue to the east. All other new shadows will impact commercial buildings in the vicinity. The extent of the new shadow impact from the project on the site's adjacent areas will not be unreasonable for a development in the dense, downtown district that allows building heights up to 60-foot, with zero to five-foot setbacks from property lines, by right.
3. The project will be subject to the City's standard conditions of approval regarding construction noise and air quality, waste diversion, toxics, and stormwater requirements, which will ensure that the project will not be detrimental to the health, safety, peace, morals, comfort or general welfare of persons residing or working in the area or neighborhood of such proposed use or be detrimental or injurious to property and improvements of the adjacent properties, the surrounding area or neighborhood or to the general welfare of the City.

V. OTHER FINDINGS FOR APPROVAL

A. As required by BMC Section 23.326.070(A), in order to approve a Use Permit to demolish a commercial structure, the Zoning Adjustments Board finds that:

1. Although proposed demolition of the majority of the existing movie theater building will replace the existing commercial building with a mixed-use residential building that would reduce the amount of commercial floor area on the site, the project will not be materially detrimental to the commercial needs and public interest of the neighborhood because the movie theater business ceased operations in February 2023, and the new project will contain a ground-floor café, to bring more services to residents and workers in the vicinity.
2. The existing structure to be demolished is a 23,289-square-foot movie theater. This commercial use will be replaced by a 865-square-foot café and 227 new residential units, including 23 very low-income affordable units. The demolition is required in order to allow the proposed mixed-use residential project to be built.

3. The LPC reviewed the demolition referral for the project and did not recommend against the demolition permit.

B. As required by BMC Section 23.204.130(I) of the, the Zoning Adjustments Board finds that the proposed use or structure:

1. *Is compatible with the purposes of the district to implement the vision and goals of the Downtown Area Plan (DAP)*:

   a. Environmental Sustainability and Access: The project will be a high-density development in proximity to regional transit, shops and amenities, and will provide more housing in the Downtown to increase access to local services and amenities by foot, by bicycle and via transit, while promoting public transit as an efficient and attractive choice through its location and through its Transportation Demand Management measures and other associated Conditions of Approval. The project is designed to achieve GreenPoint Rated Silver certification, which is equivalent to LEED Gold, and satisfies this DAP requirement. The project will also comply with the State's Model Water Efficient Landscape Ordinance (MWELO), and will feature a number of native plant species in its landscape palette.
   b. Land Use: The mixed-use residential project, which includes 23 VLI units, will add affordable housing to the Downtown area. The rehabilitated movie theater front façade and café (repurposed from a theater lobby) will contribute to the area's vitality, livability, sustainability, and character. New street trees and landscaping along Bancroft Way will add to the cultivation of the Downtown as an attractive residential neighborhood.
   c. Housing and Community Health and Services: The project will involve construction of a mixed-use residential building with a total of 227 dwelling units, including 23 VLI units. The project will expand the supply of affordable housing and contribute to a thriving, livable, diverse residential neighborhood with a mix of supportive uses in Downtown.
   d. Economic Development: The project will introduce 227 new residential units, in a mix of unit sizes – studio, two-bedroom and four-bedroom units – and 23 very low-income units to the neighborhood, to help broaden the range of household incomes in the area and contribute to diversifying housing opportunities for households of different ages, incomes, varying sizes, and abilities in the Downtown, while preserving the character of the Downtown Historic neighborhood through the rehabilitation of the UA Theater façade.
   e. Historic Preservation and Urban Design: The 2274 Shattuck building, also known as the United Artists Theater, is an historic resource listed in the CRHR and was found to be eligible for NAHP designation, as well as a contributor to the Shattuck Avenue Commercial Corridor Historic District. The LPC designated the building a City Landmark in February 2024, with the upper portion of the Shattuck Avenue building façade as the distinguishing features to be preserved and restored . The project will demolish the entire building, excepting the Shattuck Avenue façade and theater lobby, which will be rehabilitated and repurposed.
   f. Streets and Open Space: The project will include new street trees along Bancroft Way and 7,737 square feet of private open space in the form of private patios, ground-floor common space and a roof deck for residents, that will comply with the State's MWELO requirements. In addition, the project will be required to contribute to the Streets and Open Space Improvement Plan (SOSIP) fund via Condition of Approval.

2. *Is compatible with surrounding uses and buildings:* Uses on properties surrounding the project site include retail, the Berkeley Public Library, restaurants, retail and offices, and multi-family residential. The project features primarily a multi-family residential use with a ground-floor café, a similar mixture of uses that already exists on the site and in the vicinity. Thus, the project will not introduce new land uses that do not already exist in the Downtown, and will further the vision and goals of the DAP. The DRC provided a favorable recommendation of the project with conditions for further design refinement, and deemed the project consistent with DAP design guidelines.

C. As required by Section 23.304.050(A) of the BMC, the Zoning Adjustments Board finds that the proposed rooftop equipment, which exceeds the district height limit, does not exceed 15 percent the average floor area of the building's floors. None of the equipment structures will be used as habitable or commercial space. The project will include mechanical and staircase/elevator penthouses and an architectural frame totaling 1,891 square feet on the roof that will extend 15 feet over the roof height. These areas represent 15 percent of the 12,659-square-foot average of all the floor areas.

D. As required by BMC Section 23.204.130(E), the Zoning Adjustments Board finds that:

1. The setback encroachment in the Base Project will result in a minimal contribution to new shadow impact relative to the increase in shadow impact from the Density Bonus project height and reduced setbacks that are requested as waivers. Thus, the setback reduction the Base Project will not unreasonably limit solar access.

2. A Wind and Comfort Impact Analysis was prepared in March, 2022 for an approved use permit at 2190 Shattuck, a site that is one block to the east of the subject site, for a 25-story building proposal with zero to five-foot setbacks up to 268 feet in height, that concluded that the building will not cause significant additional wind impact on the street level at Shattuck Avenue and Allston Way. Based on that study, the project, which consists of a 17-story building with similar setback reductions up to 183 feet in height, will also result in insignificant changes to wind patterns on the sidewalk at the site along Shattuck Avenue or Bancroft Way.

VI. STANDARD CONDITIONS OF APPROVAL FOR ALL PROJECTS

The following conditions, as well as all other applicable provisions of the Zoning Ordinance, apply to this Permit:

1. **Conditions Shall be Printed on Plans.** The conditions of this Permit shall be printed on the *second* sheet of each plan set submitted for a building permit pursuant to this Use Permit, under the title 'Use Permit Conditions.' *Additional sheets* may also be used if the *second* sheet is not of sufficient size to list all of the conditions. The sheet(s) containing the conditions shall be of the same size as those sheets containing the construction drawings.

2. **Compliance Required (BMC Section 23.102.050).** All land uses and structures in Berkeley must comply with the Zoning Ordinance and all applicable City ordinances and regulations. Compliance with the Zoning Ordinance does not relieve an applicant from requirements to comply with other federal, state, and City regulations that also apply to the property.

3. **Approval Limited to Proposed Project and Replacement of Existing Uses (BMC Sections 23.404.060(B)(1) and (2)):**

A. This Permit authorizes only the proposed project described in the application. In no way does an approval authorize other uses, structures or activities not included in the project description.

B. When the City approves a new use that replaces an existing use, any prior approval of the existing use becomes null and void when permits for the new use are exercised (e.g., building permit or business license issued). To re-establish the previously existing use, an applicant must obtain all permits required by the Zoning Ordinance for the use.

4. **Conformance to Approved Plans (BMC Section 23.404.060(B)(4)).**
All work performed under an approved permit shall comply with the approved plans and any conditions of approval.

5. **Exercise and Expiration of Permits (BMC Section 23.404.060(C)):**

A. A permit authorizing a land use is exercised when both a valid City business license is issued (if required) and the land use is established on the property.

B. A permit authorizing construction is exercised when both a valid City building permit (if required) is issued and construction has lawfully begun.

C. The Zoning Officer may declare a permit lapsed if it is not exercised within one year of its issuance, except if the applicant has applied for a building permit or has made a substantial good faith effort to obtain a building permit and begin construction. The Zoning Officer may declare a permit lapsed only after 14 days written notice to the applicant. A determination that a permit has lapsed may be appealed to the ZAB in accordance with Chapter 23.410 (Appeals and Certification).

D. A permit declared lapsed shall be void and of no further force and effect. To establish the use or structure authorized by the lapsed permit, an applicant must apply for and receive City approval of a new permit.

6. **Permit Remains Effective for Vacant Property (BMC Section 23.404.060(D)).** Once a Permit for a use is exercised and the use is established, the permit authorizing the use remains effective even if the property becomes vacant. The same use as allowed by the original permit may be re-established without obtaining a new permit, except as set forth in Standard Condition #5 above.

7. **Permit Modifications (BMC Section 23.404.070).** No change in the use or structure for which this Permit is issued is permitted unless the Permit is modified by the Board. The Zoning Officer may approve changes to plans approved by the Board, consistent with the Board's policy adopted on May 24, 1978, which reduce the size of the project.

8. **Permit Revocation (BMC Section 23.404.080).** The City may revoke or modify a discretionary permit for completed projects due to: 1) violations of permit requirements; 2) Changes to the approved project; and/or 3) Vacancy for one year or more. However, no lawful residential use can lapse, regardless of the length of time of the vacancy. Proceedings to revoke or modify a permit may be initiated by the Zoning Officer, Zoning Adjustments Board (ZAB), or City Council referral.

9. **Pay Transparency Acknowledgement (BMC Section 13.104.030).** Prior to the issuance of a building permit for any Project subject to this Chapter:

A. A Responsible Representative of the Permittee shall certify under penalty of perjury that: (1) the Permittee has reviewed Chapter 13.104 of the Berkeley Municipal Code; and (2) the Permittee will be responsible for demonstrating compliance with this Chapter.

B. The Permittee shall provide to the City a Contractor Pay Transparency Acknowledgment on a form approved by the City for this purpose. A Responsible Representative of the Permittee shall certify under penalty of perjury that the Contractor and all Qualifying Subcontractors performing work on the Project will comply with Chapter 13.104 of the Berkeley Municipal Code and with Labor Code sections 226(a) and 2810.5 for each employee who works on the Project.

10. **Pay Transparency Attestations following Project Completion (BMC Section 13.104.040).** Within 10 days of the approved final inspection of any Project subject to this Chapter, each Permittee shall provide to the City for each Contractor and Qualifying Subcontractor a Pay Transparency Attestation on a form approved by the City. On each Pay Transparency Attestation, a Responsible Representative of the Contractor or Qualifying Subcontractor shall attest under penalty of perjury that the Contractor or Qualifying Subcontractor complied with Chapter 13.104 of the Berkeley Municipal Code and Labor Code sections 226(a) and 2810.5 for each employee who performed work on the Project. The City will maintain Pay Transparency Attestation forms for period of at least three years after their date of receipt by the City.

11. **Posting of Wage Theft Ordinance (BMC Section 13.104.050).** Each day work is performed on the Project, each Permittee shall post, and keep posted in a conspicuous location where it may be easily read by employees during the hours of the workday, a notice that: (A) contains the text of Chapter 13.104 of the Berkeley Municipal Code; (B) explains that workers can report violations of Labor Code sections 226 and 2810.5 to the Labor Commissioner of the State of California; and (C) provides current contact information, including office address, telephone number, and email address of the Labor Commissioner of the State of California.

12. **Wage Theft Prevention Conditions of Approval (BMC Section 13.104.060).** The requirements of Sections 13.104.030 through 13.104.050 shall be included as conditions of approval of any Use Permit or Zoning Certificate for any Project that is subject to this Chapter. Failure to comply with the requirements of any provision of this Chapter shall be grounds for issuance of an administrative citation under Chapter 1.28 and/or the revocation or modification of any Use Permit issued for the Project under BMC Chapter 23.404.

13. **Hold Harmless.** The permittee agrees as a condition of approval of this application to indemnify, protect, defend with counsel selected by the City, and hold harmless, the City, and any agency or instrumentality thereof, and its elected and appointed officials, officers, employees and agents, from and against any and all liabilities, claims, actions, causes of action, proceedings, suits, damages, judgments, liens, levies, costs and expenses of whatever nature, including reasonable attorney's fees and disbursements (collectively, "Claims") arising out of or in any way relating to the approval of this application, any actions taken by the City related to this entitlement, or any environmental review conducted under the California Environmental Quality Act, Public Resources Code Section 210000 et seq., for this entitlement and related actions. The indemnification shall include any Claims that may be asserted by any person or entity, including the permittee, arising out of or in connection with the approval of this application, whether or not there is concurrent, passive or active negligence on the part of the City, and any agency or instrumentality thereof, and its elected and appointed officials, officers, employees and agents. The permittee's duty to defend the City shall not apply in those instances when the permittee has asserted the Claims, although the permittee shall still have a duty to indemnify, protect and hold harmless the City.

VII. ADDITIONAL CONDITIONS IMPOSED BY THE ZONING ADJUSTMENTS BOARD

Pursuant to BMC 23.404.050(H), the Zoning Adjustments Board attaches the following additional conditions to this Permit:

Prior to Submittal of Any Building Permit:

14. **Project Liaison.** The applicant shall include in all building permit plans and post onsite the name and telephone number of an individual empowered to manage construction-related complaints generated from the project. The individual's name, telephone number, and responsibility for the project shall be posted at the project site for the duration of the project in a location easily visible to the public. The individual shall record all complaints received and actions taken in response, and submit written reports of such complaints and actions to the project planner on a weekly basis. Please designate the name of this individual below:

☐ **Project Liaison** _____

Name Phone #

15. **Address Assignment.** The applicant shall file an "Address Assignment Request Application" with the Permit Service Center (1947 Center Street) for any address change or new address associated with this Use Permit. The new address(es) shall be assigned in accordance with BMC 16.28.030, and, except for new buildings on vacant lots, entered into the City's database after the building permit is issued but prior to final inspection.

16. **Construction Noise Reduction Program.** The applicant shall develop a site-specific noise reduction program prepared by a qualified acoustical consultant to reduce construction noise impacts to the maximum extent feasible, subject to review and approval of the Zoning Officer. The noise reduction program shall include the time limits for construction listed above, as measures needed to ensure that construction complies with BMC Section 13.40.070. The noise reduction program should include, but shall not be limited to, the following available controls to reduce construction noise levels as low as practical:

A. Construction equipment should be well maintained and used judiciously to be as quiet as practical.

B. Equip all internal combustion engine-driven equipment with mufflers, which are in good condition and appropriate for the equipment.

C. Utilize “quiet” models of air compressors and other stationary noise sources where technology exists. Select hydraulically or electrically powered equipment and avoid pneumatically powered equipment where feasible.

D. Locate stationary noise-generating equipment as far as possible from sensitive receptors when adjoining construction sites. Construct temporary noise barriers or partial enclosures to acoustically shield such equipment where feasible.

E. Prohibit unnecessary idling of internal combustion engines.

F. If impact pile driving is required, pre-drill foundation pile holes to minimize the number of impacts required to seat the pile.

G. Construct solid plywood fences around construction sites adjacent to operational business, residences or other noise-sensitive land uses where the noise control plan analysis determines that a barrier would be effective at reducing noise.

H. Erect temporary noise control blanket barriers, if necessary, along building facades facing construction sites. This mitigation would only be necessary if conflicts occurred which were irresolvable by proper scheduling. Noise control blanket barriers can be rented and quickly erected.

I. Route construction related traffic along major roadways and away from sensitive receptors where feasible.

17. **Damage Due to Construction Vibration.** The project applicant shall submit screening level analysis prior to, or concurrent with demolition building permit. If a screening level analysis shows that the project has the potential to result in damage to structures, a structural engineer or other appropriate professional shall be retained to prepare a vibration impact assessment (assessment). The assessment shall consider project specific information such as the composition of the structures, location of the various types of equipment used during each phase of the project, as well as the soil characteristics in the project area, in order to determine whether project construction may cause damage to any of the structures identified as potentially impacted in the screening level analysis. If the assessment finds that the project may cause damage to nearby structures, the structural engineer or other appropriate professional shall recommend design means and methods of construction that to avoid the potential damage, if feasible. The assessment and its recommendations shall be reviewed and approved by the Building and Safety Division and the Zoning Officer. If there are no feasible design means or methods to eliminate the potential for damage, the structural engineer or other appropriate professional shall undertake study of existing conditions (study) of any structures (or, in case of large buildings, of the portions of the structures) that may experience damage.

1. This study shall establish the baseline condition of these structures, including, but not limited to, the location and extent of any visible cracks or spalls; and include written descriptions and photographs.
2. The study shall be reviewed and approved by the Building and Safety Division and the Zoning Officer prior to issuance of a grading permit. Upon completion of the project, the structures (or, in case of large buildings, of the portions of the structures) previously inspected will be resurveyed, and any new cracks or other changes shall be compared to pre-construction conditions and a determination shall be made as to whether the proposed project caused the damage. The findings shall be submitted to the Building and Safety Division and the Zoning Officer for review. If it is determined that project construction has resulted in damage to the structure, the damage shall be repaired to the pre-existing condition by the project sponsor, provided that the property owner approves of the repair.

18. **Compliance with Conditions of Approval and Environmental Mitigations.** The building permit application is subject to verification of compliance of these Conditions of Approval and the DAP Mitigation Monitoring and Reporting Program (Attachment 4). The applicant shall be responsible for demonstrating compliance with all conditions of approval and mitigation measures per the timeline set forth by this use permit. The applicant shall deposit $10,000 with the City, or less with the approval of the Zoning Officer, to pay for the cost of monitoring compliance with these Conditions of Approval and other applicable conditions and regulations. Should compliance-monitoring expenses exceed the initial deposit, the applicant shall deposit additional funds to cover such additional expenses upon the request of the Zoning Officer; any unused deposit will be refunded to the applicant.

Prior to Issuance of Any Building & Safety Permit (Demolition or Construction)

19. **Demolition.** Demolition of the existing building cannot commence until a complete application is submitted for the replacement building. In addition, all plans presented to the City to obtain a permit to allow the demolition are subject to these conditions.
20. **Construction Noise Management -** Public Notice Required. At least two weeks prior to initiating any construction activities at the site, the applicant shall provide notice to businesses and residents within 500 feet of the project site. This notice shall at a minimum provide the following: (1) project description, (2) description of construction activities during extended work hours and reason for extended hours, (3) daily construction schedule (i.e., time of day) and expected duration (number of months), (4) the name and phone number of the Project Liaison for the project that is responsible for responding to any local complaints, and (5) that construction work is about to commence. The liaison would determine the cause of all construction-related complaints (e.g., starting too early, bad muffler, worker parking, etc.) and institute reasonable measures to correct the problem. A copy of such notice and methodology for distributing the notice shall be provided in advance to the City for review and approval.

21. **Construction Phases.** The applicant shall provide the Zoning Officer with a schedule of major construction phases with start dates and expected duration, a description of the activities and anticipated noise levels of each phase, and the name(s) and phone number(s) of the individual(s) directly supervising each phase. The Zoning Officer or his/her designee shall have the authority to require an on-site meeting with these individuals as necessary to ensure compliance with these conditions. The applicant shall notify the Zoning Officer of any changes to this schedule as soon as possible.

22. **Construction and Demolition Diversion.** Applicant shall submit a Construction Waste Management Plan that meets the requirements of BMC Chapter 19.37 including 100 percent diversion of asphalt, concrete, excavated soil and land-clearing debris and a minimum of 65 percent diversion of other nonhazardous construction and demolition waste.

23. **Toxics.** The applicant shall contact the Toxics Management Division (TMD) at 1947 Center Street or (510) 981-7470 to determine which of the following documents are required and timing for their submittal:

    A. **Phase I and Phase II Environmental Site Assessment (ESA) (per ASTM 1527).** A recent Phase I ESA (less than 2 years old) shall be submitted to the Toxics Management Division for developments for: all new commercial, industrial and mixed-use developments and all improvement projects that require work 5 or more feet below grade, and all new residential buildings with more than four dwelling units located in the Environmental Management Area (or EMA). The EMA can be viewed at: City of Berkeley Community GIS Portal (arcgis.com)

    B. Depending on the findings in the Phase I, a Phase II or additional investigation may be necessary. Any available soils and groundwater analytical data available for projects listed in this section must also be submitted to TMD.

    C. **Environmental Site Clearance.** The applicant shall provide environmental screening clearance from either the San Francisco Bay Regional Water Quality Control Board (RWQCB), Department of Toxic Substances Control (DTSC), or the Alameda County Department of Environmental Health's Local Oversight Program (LOP). Clearance from one of these regulatory agencies will ensure that the property meets development investigation and cleanup standards for the specific use proposed on the property. Environmental screening clearance shall be submitted to the City of Berkeley's Toxics Management Division prior to issuance of any building permits.

    D. **Soil and Groundwater Management Plan**. A site-specific Soil and Groundwater Management Plan (SGMP) shall be submitted to Toxics Management Division (TMD) for all non-residential projects, and residential or mixed-use projects with more than four dwelling units, that: (1) are in the Environmental Management Area (EMA), as shown on the most recent City of Berkeley EMA map, and (2) propose any excavations deeper than 5 feet below grade or if significant soils removal is anticipated. The SGMP shall be submitted to the TMD with the project's building permit application and shall be approved by TMD prior to issuance of the building permit.

The SGMP shall comply with the hazardous materials and waste management standards required by BMC Section 15.12.100, the stormwater pollution prevention requirements of San Francisco Bay Regional Water Quality Control Board's Order No. R2-2009-0074, California hazardous waste generator regulations (Title 22 California Code of Regulations (CCR) 66260 et seq.), and the East Bay Municipal Utility District's Ordinance 311, and shall include the following:

i. procedures for soil and groundwater management including identification of pollutants and disposal methods;

ii. procedures to manage odors, dust and other potential nuisance conditions expected during development;

iii. notification to TMD within 24 hours of the discovery of any previously undiscovered contamination; and

iv. the name and phone number of the individual responsible for implementing the SGMP and who will respond to community questions or complaints.

TMD may require additional information or impose additional conditions as deemed necessary to protect human health and the environment. All requirements of the approved SGMP shall be deemed conditions of approval.

E. Demolitions & Renovations – Building Materials Survey. A hazardous materials survey for building materials and plans on hazardous materials and hazardous waste removal and disposal is required and must be prepared by qualified professionals, and submitted to the Toxics Management Division (TMD) prior to issuance of the building permit.

i. The survey shall include the identification of all materials to be disturbed for lead-based paints, PCB containing equipment and caulking, hydraulic fluids, refrigerants, treated wood, and mercury containing devices (including fluorescent light bulbs and mercury switches), asbestos and other hazardous materials and chemicals.

ii. If asbestos is identified, Bay Area Air Quality Management District Regulation 11-2-401.3 a notification must be made and the J number must be made available to the City of Berkeley Permit Service Center. Contractors must follow state regulations where there is asbestos-related work involving 100 square feet or more of asbestos containing material (8 Cal. Code Regs. §1529, §341.6 et seq.)

iii. The report to the TMD shall include, in addition to the survey, plans on hazardous materials and hazardous waste removal and disposal that comply with State and Federal codes including California Code of Regulations (CCR) 66260 et seq.

iv. Documentation evidencing disposal of hazardous waste in compliance with the survey shall be submitted to TMD within 30 days of the completion of the demolition.

Please note, the PCB Screening Form required by Public Works, Engineering, is a separate requirement and does not address the PCB identification requirement of the Toxics Management Division.

F. Hazardous Materials Business Plan. A Hazardous Materials Business Plan (HMBP) in compliance with BMC Section 15.12.040 and California Health & Safety Code, Chapter 6.95 Div. 20, shall be submitted to the Toxics Management Division through the California Environmental Reporting System: http://cers.calepa.ca.gov/ for chemicals used or stored on site during construction that exceed reporting thresholds. The reporting is required if your facility stores or handles hazardous materials in aggregate quantities equal to or greater than 55 gallons for liquids, 500 pounds for solids, or 200 cubic feet of compressed gases, or generates any quantity of hazardous waste. This includes welding gases, emergency generator fuel, paints, etc.

Additionally, the business occupant must submit an HMBP within 30 days of starting operations.

G. Petroleum Storage. An (SPCC) Plan is required to be prepared and implemented for facilities with any one of the following:

i. aggregate aboveground petroleum storage capacities of 1,320 gallons or more stored in aboveground storage containers, tanks, oil-filled equipment, or

ii. one or more tank(s) in an underground area (TIUGA) with petroleum storage capacities of 55 gallons or greater. More information on TIUGAs can be found here: https://osfm.fire.ca.gov/divisions/pipeline-safety-and-cupa/certified-unified-program-agency-cupa/aboveground-petroleum-storage-act/tank-in-an-underground-area-tiuga/

The SPCC plan must be prepared prior to beginning operations and you must submit facility information to Toxics Management Division (TMD) through the California Environmental Reporting System: http://cers.calepa.ca.gov/. The SPCC plan will be reviewed during the site inspection and shall not be submitted in CERS or to the TMD.

Prior to Issuance of Any Building (Construction) Permit

24. Historic Resource Inventory. The Applicant shall prepare and submit an Historic Resource Inventory to the Land Use Planning Division prior to Final Design Review (FDR).

25. Final Design Review. The Project requires approval of an FDR application by the Design Review Committee (DRC). The DRC shall review and consider the incorporation of the Historic Resource Inventory submitted by applicant.

26. Percent for Public Art. Consistent with BMC Section 23.316, the applicant shall either pay the required in-lieu fee or provide the equivalent amount in a financial guarantee to be released after installation of the On-Site Publicly Accessible Art.

27. Affordable Housing Mitigation Fee. Consistent with BMC Section 22.20.065, and fee resolution applicable to this project, the applicant shall provide a schedule, consistent with a schedule approved by the City Manager or her designee, outlining the timeframe for payment of the AHMF, and they shall pay this fee.

28. **HVAC Noise Reduction.** Prior to the issuance of building permits, the project applicant shall submit plans that show the location, type, and design of proposed heating, ventilation, and cooling (HVAC) equipment. In addition, the applicant shall provide product specification sheets or a report from a qualified acoustical consultant showing that operation of the proposed HVAC equipment will meet the City's exterior noise requirements in BMC Section 13.40.050. The City's Planning and Development Department shall review the submitted plans, including the selected HVAC equipment, to verify compliance with exterior noise standards.

29. **Interior Noise Levels.** Prior to issuance of a building permit, the applicant shall submit a report to the Building and Safety Division and the Zoning Officer by a qualified acoustic engineer certifying that the interior residential portions of the project will achieve interior noise levels of no more than 45 Ldn (Average Day-Night Levels). If the adopted Building Code imposes a more restrictive standard for interior noise levels, the report shall certify compliance with this standard.

30. **Streets and Open Space Improvement Plan.** Street Frontage Improvements. Consistent with the Downtown Streets and Open Space Improvement Plan (SOSIP) (or subsequent iterations as adopted by the City), the developer shall construct improvements along Oxford Street and Center Street to the centerline. Such improvements shall be included with the building permit submittal, designed and constructed as directed by the Public Works Engineering, Public Works Transportation, and Fire Departments, and constructed prior to certificate of occupancy.

31. **Streets and Open Space Improvement Plan.** Impact Fee: As required by BMC Section 23.204.130(F), the project shall pay an impact fee to implement the Streets and Open Space Improvement Plan (SOSIP) per the fee schedule adopted by the Council by resolution. The City shall deposit this payment into the Downtown Streets and Open Space Improvement Fund (SOSIF), or its equivalent, to pay for the design and construction of the SOSIP Major Projects. The fee shall apply to the project's "Gross Floor Area" as defined in BMC Section 23.106.030, less any existing Gross Floor Area removed as part of the project.

    At the City's discretion, the City Manager or her designee may reduce the required SOSIP Impact Fee, on a $1 to $1 ratio, as a credit for constructing all or a portion of a Major SOSIP Improvement Project beyond the frontage improvements already required by this Permit. The first half of this fee shall be paid prior to issuance of a building permit, and the second half shall be paid prior to issuance of a certificate of occupancy.

32. **Green Building Certification.** The applicant shall submit documentation demonstrating that the building will attain LEED Gold or higher, or attain a building performance equivalent to this rating that has been approved by the Zoning Officer for this project. Documentation shall include proof of payment of the registration/application fee to the organization administering the green building certification system (e.g. USGBC/GBCI for LEED, Build It Green for GreenPoint Rated, etc.), a copy of the updated green building checklist that reflects anticipated points, and a statement from the appropriate project team professional (e.g. LEED Accredited Professional, GreenPoint Rater, etc.) verifying that the project is on track for certification at the required level or above. The submitted green building checklist must be a type that is appropriate for the project and a version that is being accepted by the organization granting the green building certification at the time of building permit application. Whenever applicable, measures from the green building checklist shall be incorporated and noted on site plans.

33. **Solar Photovoltaic (Solar PV) and Battery Energy Storage Systems (ESS).** A solar PV system shall be installed, subject to specific limited exceptions, as specified by the Berkeley Energy Code (BMC Chapter 19.36). Energy storage system (ESS) readiness (new single-family, duplex, and townhouse homes) or ESS installation (new multifamily and most nonresidential buildings) shall be completed as specified by BMC Chapter 19.36. Location of the solar PV system and the ESS, if applicable, shall be noted on the construction plans. (Project required to meet applicable code at time of building permit application, if different from above.)

34. **Nonresidential Electric Vehicle (EV) Charging.** At least 10 percent of project parking spaces for nonresidential use shall have installed Level 2 (40 amp) electric vehicle (EV) charging stations and/or DC Fast Charging Stations, and least 40 percent shall be "EV Capable" equipped with raceway, electrical panel service capacity, and an electrical system to support future Level 2 (40 amp) EV charging stations, or any more stringent EV charging requirements, as specified by the Berkeley Green Code (BMC Chapter 19.37). EV charging station installations and EV Capable spaces shall be noted on the construction plans. Public access parking spaces shall provide any applicable mandatory accessibility provisions. (Project required to meet applicable code at time of building permit application, if different from above.)

35. **Water Efficient Landscaping.** Landscaping, totaling 500 square feet of more of new landscaping or 2,500 square feet or more of renovated irrigated area, shall comply with the State's Model Water Efficient Landscape Ordinance (MWELO). MWELO-compliant landscape documentation including a planting, grading, and irrigation plan shall be included in site plans. Water budget calculations are also required for landscapes of 2,500 square feet or more and shall be included in site plans. The reference evapotranspiration rate (ETo) for Berkeley is 41.8.

36. **Recycling and Organics Collection.** Applicant shall provide recycling and organics collection areas for occupants, clearly marked on plans, which comply with the Alameda County Organics Reduction and Recycling Ordinance (2021-02). Contact the Zero Waste Division's Recycling Program Manager, Julia A. Heath, at jheath@berkeleyca.gov.

37. **Public Works ADA.** Plans submitted for building permit shall include replacement of sidewalk, curb, gutter, and other streetscape improvements, as necessary to comply with current City of Berkeley standards for accessibility.

BELOW MARKET RATE UNITS

38. **Affordable Housing Mitigation Fee (AHMF).** Consistent with BMC 22.20.065 and fee resolution No. 68,074-N.S., the applicant shall provide a schedule, consistent with a schedule approved by the City Manager or her designee, outlining the timeframe for payment of the AHMF, or provide an alternative to the fee payment as permitted by the BMC. Payment of the AHMF may be reduced if paid prior to the building permit per resolution No. 68,074-N.S., and shall be paid no later than prior to the issuance of a certificate of occupancy for the project.

As indicated on the development application, the applicant shall provide below market rate rental dwelling units ("BMR Units") – 23 VLI units, in perpetuity – and will be required to pay the AHMF as calculated in BMC Section 22.20.065(D). The applicant may elect to avoid the AHMF by providing, for the life of the project, a number of units equal to 20 percent of the total units in the project at rental rates affordable to Low-Income and Very Low-Income Households in accordance with the BMC. The applicant may also elect to provide BMR units below 20 percent of total units for a reduced AHMF as calculated in BMC Section 22.20.065(D). The applicant must contact and coordinate with the Department of Health, Housing and Community Services (HHCS) via email to affordablehousing@berkeleyca.gov for review and approval. The final number of affordable onsite units must be declared prior to issuance of the first building permit for the project.

39. **Number of Below Market Rate Units.** The project shall provide below market rate rental dwelling units ("BMR Units") – 23 VLI units, in perpetuity – which are required to comply with the State Density Bonus Law (Government Code Section 65915) and BMC Section 22.20.065. The BMR Units shall be designated in the Regulatory Agreement and shall be reasonably dispersed throughout the project; be of the same size and contain, on average, the same number of bedrooms as the non-BMR units in the project; and be comparable with the design or use of non-BMR units in terms of appearance, materials and finish quality. The designation of BMR Units shall conform to the addresses assigned to the building by the City.

40. **Affordable Housing: Regulatory Agreement.** Prior to the issuance of a building permit, the applicant shall enter into a Regulatory Agreement that implements Government Code Section 65915 and this Use Permit should they elect to provide BMR units to avoid or reduce their AHMF obligation. The Regulatory Agreement shall include any terms and affordability standards determined by the City to be necessary to ensure such compliance. The maximum qualifying household income for very low income BMR Units shall be 50 percent of Area Median Income (AMI), and their maximum housing payment shall be 30 percent of 50 percent of AMI. The maximum qualifying household income for Low Income BMR units shall be 80 percent of Area Median Income (AMI), and their maximum housing payment shall be 30 percent of 80 percent of AMI for Low-Income households, as set forth in the following paragraphs of this condition. If the BMR units are occupied by Very Low-Income tenants receiving a rental subsidy through the Section 8 or Shelter Plus Care programs, the rent received by the project sponsor may exceed the restricted rent to the payment standards allowed under those programs so long as the rent allowed under the payment standards is not greater than the market rents charged for comparable units in the development. The applicant shall submit the Regulatory Agreement to the Department of Health, Housing and Community Services (HHCS) via email to affordablehousing@berkeleyca.gov for review and approval.

41. **Affordable Housing: Below Market Rate Program.** In addition, affordable units must adhere to the administrative guidelines for the City's Below Market Rate program. These guidelines can be found online at https://berkeleyca.gov/community-recreation/affordable-housing-berkeley/below-market-rate-rental-information-owners-and.The guidelines are updated annually by HHCS and posted online. Please note the following key provisions from the guidelines:

    A. Maximum rent shall be adjusted for the family size appropriate for the unit pursuant to

    B. California Health & Safety Code Section 50052.5 (h).

C. Rent shall include a reasonable allowance for utilities, as published and updated by the

D. Berkeley Housing Authority, including garbage collection, sewer, water, electricity, gas, and other heating, cooking and refrigeration fuels. Such allowance shall take into account the cost of an adequate level of service. Utilities do not include telephone service. Rent also includes any separately charged fees or service charges assessed by the lessor which are required of all tenants, other than security deposits.

E. BMR units will be provided for the life of the project under Section 22.20.065.

F. Determination of Area Median Income (AMI):

- The AMI shall be based on the income standards for the Oakland Primary Metropolitan Statistical Area reported by the United States Department of Housing and Urban Development (HUD). In the event HUD discontinues establishing such income standards, AMI shall be based on income standards determined by the California State Department of Housing and Community Development (HCD). If such income standards are no longer in existence, the City will designate another appropriate source or method for determining the median household income.
- The applicable AMI for the purpose of determining the allowable rent for each unit (but not for the purpose of determining eligibility for occupancy of an inclusionary unit) shall be determined in accordance with the following table:

Unit Size	AMI Standard
Studio unit	AMI for a one-person household
One-bedroom unit	AMI for a two-person household
Two-bedroom unit	AMI for a three-person household
Three-bedroom unit	AMI for a four-person household

42. **Affordable Housing.** Nothing in these conditions shall be interpreted to prohibit, or to require modification of the Use Permit or Regulatory Agreement to allow, the provision of additional BMR units, or additional affordability, then are required in the foregoing provisions.

43. **Affordable Housing.** Dwellings that are approved as rental units, but in which a condo map is approved prior to issuance of an occupancy permit, shall be subject to the affordability requirements within BMC 23.328 in effect on March 31, 2023. (A) Residential housing projects for the construction of five or more Dwelling Units; (B) Residential housing projects for the construction of one to four new Dwelling Units, when such Units are added to an existing one to four-unit property, which has been developed after August 14, 1986, and the resulting number of units totals five or more. All Units in such a property are subject to the requirements of this chapter; (C) Residential housing projects proposed on lots whose size and zoning designation is such to allow construction of five or more Dwelling Units.

44. **Affordable Housing – Density Bonus.** If a density bonus was granted for the project, the regulatory agreement shall reflect the number of qualifying units set forth in Section 65915(f)(4) that are needed to support the bonus that was granted.

Prior to Demolition or Start of Construction:

45. **Construction Meeting.** The applicant shall request of the Zoning Officer an on-site meeting with City staff and key parties involved in the early phases of construction (e.g., applicant, general contractor, foundation subcontractors) to review these conditions and the construction schedule. The general contractor or applicant shall ensure that all subcontractors involved in subsequent phases of construction aware of the conditions of approval.

46. **Transportation Construction Plan.** The applicant and all persons associated with the project are hereby notified that a Transportation Construction Plan (TCP) may be required, particularly for the following activities:

    A. Alterations, closures, or blockages to sidewalks, pedestrian paths or vehicle travel lanes (including bicycle lanes);

    B. Storage of building materials, equipment, dumpsters, debris anywhere in the public ROW;

    C. Provision of exclusive contractor parking on-street; or

    D. Significant truck activity.

    Please contact the Office of Transportation at (510) 981-7010, or 1947 Center Street, and ask to speak to a traffic engineer. In addition to other requirements of the Traffic Engineer, this plan shall include the locations of material and equipment storage, trailers, worker parking, a schedule of site operations that may block traffic, and provisions for traffic control. The TCP shall be stamped and signed by a registered engineer prior to submittal. The TCP shall be consistent with any other requirements of the construction phase. A current copy of this Plan shall be available at all times at the construction site for review by City Staff.

47. **Construction/No Parking Permits.** Contact the Permit Service Center (PSC) at 1947 Center Street or 981-7500 for details on obtaining Construction/No Parking Permits (and associated signs and accompanying dashboard permits). Please note that the Zoning Officer and/or Traffic Engineer may limit off-site parking of construction-related vehicles if necessary to protect the health, safety or convenience of the surrounding neighborhood.

During Construction:

48. **Construction Hours.** Construction activity shall be limited to between the hours of 7:00 AM and 6:00 PM on Monday through Friday, and between 9:00 AM and 4:00 PM on Saturday. No construction-related activity shall occur on Sunday or any Federal Holiday.

49. **Construction Hours- Exceptions.** It is recognized that certain construction activities, such as the placement of concrete, must be performed in a continuous manner and may require an extension of these work hours. Prior to initiating any activity that might require a longer period, the developer must notify the Zoning Officer and request an exception for a finite period of time. If the Zoning Officer approves the request, then two weeks prior to the expanded schedule, the developer shall notify businesses and residents within 500 feet of the project site describing the expanded construction hours. A copy of such notice and methodology for distributing the notice shall be provided in advance to the City for review and approval. The project shall not be allowed more than 15 extended working days.

50. **Project Construction Website.** The applicant shall establish a project construction website with the following information clearly accessible and updated monthly or more frequently as changes warrant.

    A. Contact information (i.e. “hotline” phone number, and email address) for the project construction manager

    B. Calendar and schedule of daily/weekly/monthly construction activities

    C. The final Conditions of Approval, Mitigation Monitoring and Reporting Program, Transportation Construction Plan, Construction Noise Reduction Program, and any other reports or programs related to construction noise, air quality, and traffic.

51. **Public Works - Implement Bay Area Air Quality Management District (BAAQMD)-** Recommended Measures during Construction. For all proposed projects, BAAQMD recommends implementing all the Basic Construction Mitigation Measures, listed below to meet the best management practices threshold for fugitive dust:

    A. All exposed surfaces (e.g., parking areas, staging areas, soil piles, graded areas, and unpaved access roads) shall be watered two times per day.

    B. All haul trucks transporting soil, sand, or other loose material off-site shall be covered.

    C. All visible mud or dirt track-out onto adjacent public roads shall be removed using wet power vacuum street sweepers at least once per day. The use of dry power sweeping is prohibited.

    D. All vehicle speeds on unpaved roads shall be limited to 15 mph.

    E. All roadways, driveways, and sidewalks to be paved shall be completed as soon as possible. Building pads shall be laid as soon as possible after grading unless seeding or soil binders are used.

    F. Idling times shall be minimized either by shutting equipment off when not in use or reducing the maximum idling time to 5 minutes (as required by the California airborne toxics control measure Title 13, Section 2485 of California Code of Regulations [CCR]). Clear signage shall be provided for construction workers at all access points.

    G. All construction equipment shall be maintained and properly tuned in accordance with manufacturer specifications. All equipment shall be checked by a certified visible emissions evaluator.

H. Post a publicly visible sign with the telephone number and person to contact at the lead agency regarding dust complaints. This person shall respond and take corrective action within 48 hours. The Air District's phone number shall also be visible to ensure compliance with applicable regulations.

52. Air Quality - Diesel Particulate Matter Controls during Construction. All off-road construction equipment used for projects with construction lasting more than 2 months shall comply with one of the following measures:

A. The project applicant shall prepare a health risk assessment that demonstrates the project's on-site emissions of diesel particulate matter during construction will not exceed health risk screening criteria after a screening-level health risk assessment is conducted in accordance with current guidance from BAAQMD and OEHHA. The health risk assessment shall be submitted to the Land Use Planning Division for review and approval prior to the issuance of building permits; or

B. All construction equipment shall be equipped with Tier 2 or higher engines and the most effective Verified Diesel Emission Control Strategies (VDECS) available for the engine type (Tier 4 engines automatically meet this requirement) as certified by the California Air Resources Board (CARB). The equipment shall be properly maintained and tuned in accordance with manufacturer specifications.

C. In addition, a Construction Emissions Minimization Plan (Emissions Plan) shall be prepared that includes the following:

i. An equipment inventory summarizing the type of off-road equipment required for each phase of construction, including the equipment manufacturer, equipment identification number, engine model year, engine certification (tier rating), horsepower, and engine serial number. For all VDECS, the equipment inventory shall also include the technology type, serial number, make, model, manufacturer, CARB verification number level, and installation date.

ii. A Certification Statement that the Contractor agrees to comply fully with the Emissions Plan and acknowledges that a significant violation of the Emissions Plan shall constitute a material breach of contract. The Emissions Plan shall be submitted to the Public Works Department for review and approval prior to the issuance of building permits.

53. Construction and Demolition Diversion. Divert debris according to your plan and collect required documentation. Get construction debris receipts from sorting facilities in order to verify diversion requirements. Upload recycling and disposal receipts if using Green Halo and submit online for City review and approval prior to final inspection. Alternatively, complete the Construction Waste Management Plan and present it, along with your construction debris receipts, to the Building Inspector by the final inspection to demonstrate diversion rate compliance. The Zoning Officer may request summary reports at more frequent intervals, as necessary to ensure compliance with this requirement.

54. **Low-Carbon Concrete.** The project shall maintain compliance with the Berkeley Green Code (BMC Chapter 19.37) including use of concrete mix design with a cement reduction of at least 25 percent. Documentation on concrete mix design shall be available at all times at the construction site for review by City Staff. (Project required to meet applicable code at time of building permit application, if different from above.)

55. **Avoid Disturbance of Nesting Birds.** Initial site disturbance activities, including vegetation and concrete removal, shall be prohibited during the general avian nesting season (February 1 to August 30), if feasible. If nesting season avoidance is not feasible, the applicant shall retain a qualified biologist to conduct a preconstruction nesting bird survey to determine the presence/absence, location, and activity status of any active nests on or adjacent to the project site. The extent of the survey buffer area surrounding the site shall be established by the qualified biologist to ensure that direct and indirect effects to nesting birds are avoided. To avoid the destruction of active nests and to protect the reproductive success of birds protected by the MBTA and CFGC, nesting bird surveys shall be performed not more than 14 days prior to scheduled vegetation and concrete removal. In the event that active nests are discovered, a suitable buffer (typically a minimum buffer of 50 feet for passerines and a minimum buffer of 250 feet for raptors) shall be established around such active nests and no construction shall be allowed inside the buffer areas until a qualified biologist has determined that the nest is no longer active (e.g., the nestlings have fledged and are no longer reliant on the nest). No ground-disturbing activities shall occur within this buffer until the qualified biologist has confirmed that breeding/nesting is completed and the young have fledged the nest. Nesting bird surveys are not required for construction activities occurring between August 31 and January 31.

56. **Archaeological Resources (*Ongoing throughout demolition, grading, and/or construction*).** Pursuant to CEQA Guidelines section 15064.5(f), “provisions for historical or unique archaeological resources accidentally discovered during construction” should be instituted. Therefore:

    A. In the event that any prehistoric or historic subsurface cultural resources are discovered during ground disturbing activities, all work within 50 feet of the resources shall be halted and the project applicant and/or lead agency shall consult with a qualified archaeologist, historian or paleontologist to assess the significance of the find.

    B. If any find is determined to be significant, representatives of the project proponent and/or lead agency and the qualified professional would meet to determine the appropriate avoidance measures or other appropriate measure, with the ultimate determination to be made by the City of Berkeley. All significant cultural materials recovered shall be subject to scientific analysis, professional museum curation, and/or a report prepared by the qualified professional according to current professional standards. There shall be no destructive or invasive testing on sacred items, burial goods and Native American human remains (invasive procedures include photography of cultural materials).

    C. In considering any suggested measure proposed by the qualified professional, the project applicant shall determine whether avoidance is necessary or feasible in light of factors such as the uniqueness of the find, project design, costs, and other considerations.

D. If avoidance is unnecessary or infeasible, other appropriate measures (e.g., data recovery) shall be instituted. Work may proceed on other parts of the project site while mitigation measures for cultural resources is carried out.

E. If significant materials are recovered, the qualified professional shall prepare a report on the findings for submittal to the Northwest Information Center.

57. Human Remains (*Ongoing throughout demolition, grading, and/or construction*). In the event that human skeletal remains are uncovered at the project site during ground-disturbing activities, all work shall immediately halt and the Alameda County Coroner shall be contacted to evaluate the remains, and following the procedures and protocols pursuant to Section 15064.5 (e)(1) of the CEQA Guidelines. If the County Coroner determines that the remains are Native American, the City shall contact the California Native American Heritage Commission (NAHC), pursuant to subdivision (c) of Section 7050.5 of the Health and Safety Code, and all excavation and site preparation activities shall cease within a 50-foot radius of the find until appropriate arrangements are made. If the agencies determine that avoidance is not feasible, then an alternative plan shall be prepared with specific steps and timeframe required to resume construction activities. Monitoring, data recovery, determination of significance and avoidance measures (if applicable) shall be completed expeditiously.

58. Paleontological Resources (*Ongoing throughout demolition, grading, and/or construction*). In the event of an unanticipated discovery of a paleontological resource during construction, excavations within 50 feet of the find shall be temporarily halted or diverted until the discovery is examined by a qualified paleontologist (per Society of Vertebrate Paleontology standards [SVP 1995,1996]). The qualified paleontologist shall document the discovery as needed, evaluate the potential resource, and assess the significance of the find. The paleontologist shall notify the appropriate agencies to determine procedures that would be followed before construction is allowed to resume at the location of the find. If the City determines that avoidance is not feasible, the paleontologist shall prepare an excavation plan for mitigating the effect of the project on the qualities that make the resource important, and such plan shall be implemented. The plan shall be submitted to the City for review and approval.

59. Halt Work/Unanticipated Discovery of Tribal Cultural Resources. In the event that cultural resources of Native American origin are identified during construction, all work within 50 feet of the discovery shall be redirected. The project applicant and project construction contractor shall notify the City Planning Department within 24 hours. The City will again contact any tribes who have requested consultation under AB 52, as well as contact a qualified archaeologist, to evaluate the resources and situation and provide recommendations. If it is determined that the resource is a tribal cultural resource and thus significant under CEQA, a mitigation plan shall be prepared and implemented in accordance with State guidelines and in consultation with Native American groups. If the resource cannot be avoided, additional measures to avoid or reduce impacts to the resource and to address tribal concerns may be required.

60. Stormwater Requirements. The applicant shall demonstrate compliance with the requirements of the City's National Pollution Discharge Elimination System (NPDES) permit as described in BMC Section 17.20. The following conditions apply:

A. The project plans shall identify and show site-specific Best Management Practices (BMPs) appropriate to activities conducted on-site to limit to the maximum extent practicable the discharge of pollutants to the City's storm drainage system, regardless of season or weather conditions.

B. Trash enclosures and/or recycling area(s) shall be covered; no other area shall drain onto this area. Drains in any wash or process area shall not discharge to the storm drain system; these drains should connect to the sanitary sewer. Applicant shall contact the City of Berkeley and EBMUD for specific connection and discharge requirements. Discharges to the sanitary sewer are subject to the review, approval and conditions of the City of Berkeley and EBMUD.

C. Landscaping shall be designed with efficient irrigation to reduce runoff, promote surface infiltration and minimize the use of fertilizers and pesticides that contribute to stormwater pollution. Where feasible, landscaping should be designed and operated to treat runoff. When and where possible, xeriscape and drought tolerant plants shall be incorporated into new development plans.

D. Design, location and maintenance requirements and schedules for any stormwater quality treatment structural controls shall be submitted to the Department of Public Works for review with respect to reasonable adequacy of the controls. The review does not relieve the property owner of the responsibility for complying with BMC Chapter 17.20 and future revisions to the City's overall stormwater quality ordinances. This review shall be shall be conducted prior to the issuance of a Building Permit.

E. All paved outdoor storage areas must be designed to reduce/limit the potential for runoff to contact pollutants.

F. All on-site storm drain inlets/catch basins must be cleaned at least once a year immediately prior to the rainy season. The property owner shall be responsible for all costs associated with proper operation and maintenance of all storm drainage facilities (pipelines, inlets, catch basins, outlets, etc.) associated with the project, unless the City accepts such facilities by Council action. Additional cleaning may be required by City of Berkeley Public Works Engineering Dept.

G. All private or public projects that create and/or replace 10,000 square feet or more of impervious surface must comply with Provision C.3 of the Alameda County NPDES permit and must incorporate stormwater controls to enhance water quality. Permit submittals shall include a Stormwater Requirement Checklist and detailed information showing how the proposed project will meet Provision C.3 stormwater requirements, including a) Site design measures to reduce impervious surfaces, promote infiltration, and reduce water quality impacts; b) Source Control Measures to keep pollutants out of stormwater runoff; c) Stormwater treatment measures that are hydraulically sized to remove pollutants from stormwater; d) an O & M (Operations and Maintenance) agreement for all stormwater treatment devices and installations; and e) Engineering calculations for all stormwater devices (both mechanical and biological). (Project required to meet applicable code at time of building permit application, if different from above.)

H. All on-site storm drain inlets must be labeled “No Dumping – Drains to Bay” or equivalent using methods approved by the City.

I. Most washing and/or steam cleaning must be done at an appropriately equipped facility that drains to the sanitary sewer. Any outdoor washing or pressure washing must be managed in such a way that there is no discharge or soaps or other pollutants to the storm drain. Sanitary connections are subject to the review, approval and conditions of the sanitary district with jurisdiction for receiving the discharge.

J. All loading areas must be designated to minimize "run-on" or runoff from the area. Accumulated waste water that may contribute to the pollution of stormwater must be drained to the sanitary sewer or intercepted and pretreated prior to discharge to the storm drain system. The property owner shall ensure that BMPs are implemented to prevent potential stormwater pollution. These BMPs shall include, but are not limited to, a regular program of sweeping, litter control and spill cleanup.

K. Restaurants, where deemed appropriate, must be designed with a contained area for cleaning mats, equipment and containers. This contained wash area shall be covered or designed to prevent run-on or run-off from the area. The area shall not discharge to the storm drains; wash waters should drain to the sanitary sewer, or collected for ultimate disposal to the sanitary sewer. Employees shall be instructed and signs posted indicating that all washing activities shall be conducted in this area. Sanitary connections are subject to the review, approval and conditions of the waste water treatment plant receiving the discharge.

L. Sidewalks and parking lots shall be swept regularly to prevent the accumulation of litter and debris. If pressure washed, debris must be trapped and collected to prevent entry to the storm drain system. If any cleaning agent or degreaser is used, wash water shall not discharge to the storm drains; wash waters should be collected and discharged to the sanitary sewer. Discharges to the sanitary sewer are subject to the review, approval and conditions of the sanitary district with jurisdiction for receiving the discharge.

M. The applicant is responsible for ensuring that all contractors and sub-contractors are aware of and implement all stormwater quality control measures. Failure to comply with the approved construction BMPs shall result in the issuance of correction notices, citations, or a project stop work order.

61. **Public Works.** Subject to approval of the Public Works Department, the applicant shall repair any damage to public streets and/or sidewalks by construction vehicles traveling to or from the project site.

62. **Public Works.** All piles of debris, soil, sand, or other loose materials shall be covered at night and during rainy weather with plastic at least one-eighth millimeter thick and secured to the ground.

63. **Public Works.** The applicant shall ensure that all excavation accounts for surface and subsurface waters and underground streams so as not to adversely affect adjacent properties and rights-of-way.

64. **Public Works.** The project sponsor shall maintain sandbags or other devices around the site perimeter during the rainy season to prevent on-site soils from being washed off-site and into the storm drain system. The project sponsor shall comply with all City ordinances regarding construction and grading.

65. **Public Works.** Prior to any excavation, grading, clearing, or other activities involving soil disturbance during the rainy season the applicant shall obtain approval of an erosion prevention plan by the Building and Safety Division and the Public Works Department. The applicant shall be responsible for following these and any other measures required by the Building and Safety Division and the Public Works Department.

66. **Public Works.** The removal or obstruction of any fire hydrant shall require the submission of a plan to the City's Public Works Department for the relocation of the fire hydrant during construction.

67. **Public Works / Building and Safety.** If underground utilities leading to adjacent properties are uncovered and/or broken, the contractor involved shall immediately notify the Public Works Department and the Building & Safety Division, and carry out any necessary corrective action to their satisfaction.

Prior to Final Inspection or Issuance of Occupancy Permit:

68. **Compliance with Conditions and Environmental Mitigations.** The project shall conform to the plans and statements in the Use Permit. The developer is responsible for providing sufficient evidence to demonstrate compliance with the requirements throughout the implementation of this Use Permit. Occupancy is subject to verification of compliance to the Mitigation Monitoring and Reporting Program.

69. All landscape, site and architectural improvements shall be completed per the attached approved drawings dated **December 8, 2023**.

70. **Number of Below Market Rate Units.** Should the Applicant elect to provide BMR units prior to receiving a building permit for the Project, they are entitled to eliminate or receive a proportional reduction in the AHMF consistent with BMC Section 22.20.065. The BMR Units shall be designated in the Regulatory Agreement; comply with the City's BMR administrative guidelines; shall be reasonably dispersed throughout the project; be of the same size and contain, on average, the same number of bedrooms as the non-BMR units in the project; and be comparable with the design or use of non-BMR units in terms of appearance, materials and finish quality. The designation of BMR Units shall conform to the addresses assigned to the building by the City. Any additional BMR units the applicant may choose to provide must also conform with these conditions.

71. **Transportation Demand Management.** Prior to issuance of a Certificate of Occupancy, the property owner shall facilitate a site inspection by Land Use Division staff to confirm that the physical improvements required in BMC Section 23.322.060 have been installed. A Parking and Transportation Demand Management (PTDM) compliance report documenting that the programmatic measures required in BMC Section 23.322.060 are implemented shall be submitted to the Land Use Division prior to occupancy, and on an annual basis thereafter, which demonstrates that the project is compliant with the applicable requirements in this section:

A. For new structures or additions over 20,000 square feet, the property owner shall provide transportation benefits at no cost to every employee, residential unit, and/or group living accommodation resident, one pass for unlimited local bus transit service; or (subject to the review and approval of the Zoning Officer in consultation with the Transportation Division) a functionally equivalent transit benefit in an amount at least equal to the price of a non-discounted adult monthly local bus pass. A notice describing these transportation benefits shall be posted in a location or locations visible to all employee and residents.

72. **Green Building Certification.** The applicant shall submit updated documentation demonstrating that the building will attain LEED Gold or higher, or attain a building performance equivalent to this rating that has been approved by the Zoning Officer for this project. Documentation expected at this stage includes proof of submission of the final application materials and payment of the certification fee. If this submission has not yet occurred, a detailed explanation and timeline indicating when it will it happen must be submitted to the Zoning Officer for review and approval. Once awarded by the organization administering the green building certification system, the applicant shall forward a copy of the certification award to the Zoning Officer.

At All Times:

73. **Compliance with Approved Plan.** The project shall conform to the plans and statements in the Use Permit.
74. **Exterior Lighting.** All exterior lighting shall be energy efficient where feasible; and shielded and directed downward and away from property lines to prevent excessive glare beyond the subject property.
75. **Rooftop Projections.** No additional rooftop or elevator equipment shall be added to exceed the approved maximum roof height without submission of an application for a Use Permit Modification, subject to Board review and approval.
76. **Design Review.** Signage and any other exterior modifications, including but not limited to landscaping and lighting, shall be subject to Design Review approval.
77. **Drainage Patterns.** The applicant shall establish and maintain drainage patterns that do not adversely affect adjacent properties and rights-of-way. Drainage plans shall be submitted for approval of the Building & Safety Division and Public Works Department, if required.
78. **Electrical Meter.** Only one electrical meter fixture may be installed per dwelling unit.
79. **Loading.** All loading/unloading activities associated with deliveries to all uses shall be restricted to the hours of 7:00 a.m. to 10:00 p.m. daily.
80. **Residential Permit Parking.** No Residential Permit Parking (RPP) permits shall be issued to project residents, nor shall commercial placards be issued to non-residential occupants and/or users of the site. The Finance Department, Customer Service Center shall add these addresses to the list of addresses ineligible for RPP permits. The property owner shall notify all tenants of rental units, and/or buyers of condominium units, of this restriction in leases and/or contracts.
81. **Required Bike Parking.** Secure and on-site bike parking for a minimum of 72 bicycles shall be provided for the life of the building.

82. **Nonresidential Electric Vehicle (EV) Charging.** Required Level 2 charging stations and DC Fast Charge stations, as specified by the Berkeley Green Code (BMC Chapter 19.37) shall be maintained in *good working condition and made available for building occupant and/or visitor* use. (Project required to meet applicable code at time of building permit application, if different from above.)

83. **Tenant Notification.** The developer shall provide tenant notification, via a lease rider or deed covenant, that each dwelling unit is located in a mixed-use area that includes commercial, food service, and entertainment uses, and that each occupant shall not seek to impede their lawful operation.

84. **Guaranteed Ride Home.** If qualifying for participation in the Alameda County Guaranteed Ride Home program (or successor program), shall participate in the "Guarantee Ride Home" program to reduce employee single occupant vehicle trips by providing alternate means of leaving work in an emergency. Enrollment shall be encouraged by providing Guarantee Ride Home information to all employees. An affidavit/statement indicating number of participating employees shall be provided annually to the Transportation Division Manager

85. **Transit Subsidy Condition.** If 10 or more employees, the business operator shall reimburse employees the maximum non-taxable cost of commuting to and from work on public transportation (e.g., monthly passes) if they so commute, and a notice informing employees of the availability of such subsidy shall be permanently displayed in the employee area as per BMC Chapter 9.88.

GENERAL PLANTING AND IRRIGATION NOTES

1. LANDSCAPE AND IRRIGATION PLANS SHALL COMPLY WITH THE CRITERIA OF THE CALIFORNIA MODEL WATER EFFICIENCY ORDINANCE AND APPLY THOSE CRITERIA FOR THE EFFICIENT USE OF WATER IN THE LANDSCAPE DESIGN PLAN.

2. LANDSCAPE AND IRRIGATION PLANS SHALL COMPLY WITH ALL APPLICABLE CITY CODES AND ORDINANCES.

3. ALL PLANTING AREAS SHALL BE TOP-DRESSED WITH A 3" LAYER OF ORGANIC, UN- DYED MULCH RECYCLED FROM LOCAL ORGANIC MATERIALS SUCH AS TREE TRIMMINGS, PLANT, OR CLEAN WOOD WASTE. COMPOST APPLICATION TO ACHIEVE A MINIMUM OF 6% ORGANIC MATTER IN SOIL COMPOSITION BASED ON MWELO SPECIFIED SOIL ANALYSIS RESULS FOR THE SITE SOIL PER [CGBSC 4.304].

4. 50% OF ALL SHRUBS AND GROUNDCOVER SHALL BE A MINIMUM OF 5-GALLON SIZE OR LARGER.

5. IRRIGATION SYSTEM IS TO BE A FULLY AUTOMATIC WEATHER-BASED SYSTEM USING LOW FLOW DRIP AND BUBBLER SYSTEM.

6. STREET TREES SHALL BE TIED INTO IRRIGATION SYSTEM.

7. 75% OF ALL PLANTS PROPOSED ARE NATIVE AND WILD-LIFE SUPPORTING.

8. PLANT SELECTION AND DESIGN TO COMPLY WITH BAY-AREA FRIENDLY BASICS LANDSCAPE CHECKLIST.

IRRIGATION SYSTEM DESIGN INTENT

1. THIS PLAN SHALL COMPLY WITH THE REQUIREMENTS OF THE STATE OF CALIFORNIA'S MODEL WATER EFFICIENT LANDSCAPE ORDINANCE (MWELO), CITY OF BERKELEY, AND EAST BAY MUNICIPAL UTILITY DISTRICT (EBMUD) WATER DISTRICT.

2. THE IRRIGATION SYSTEM SHALL BE DESIGNED TO PROVIDE THE MINIMUM AMOUNT OF WATER NECESSARY TO SUSTAIN GOOD PLANT HEALTH.

3. THE IRRIGATION SYSTEM IS TO BE A FULLY AUTOMATIC, WEATHER-BASED SYSTEM USING RAIN SENSOR, LOW FLOW DRIP, BUBBLER DISTRIBUTION, AND ROTOR WITH MATCHED PRECIPITATION RATE NOZZLES DESIGNED FOR HEAD-TO-HEAD COVERAGE.

4. ALL SELECTED COMPONENTS SHALL BE PERMANENT, COMMERCIAL GRADE, SELECTED FOR DURABILITY, VANDAL RESISTANCE AND MINIMUM MAINTENANCE REQUIREMENT, INSTALLED BELOW-GRADE, AND DESIGNED FOR 100% COVERAGE.

5. THE SYSTEM SHALL INCLUDE A MASTER CONTROL VALVE, RAIN SENSOR AND FLOW SENSING CAPABILITY CONNECTED TO THE IRRIGATION CONTROLLER WHICH WILL SHUT DOWN ALL OR PART OF THE SYSTEM IF LEAKS ARE DETECTED.

6. THE IRRIGATION SYSTEM SHALL BE DESIGNED TO DELIVER WATER TO HYDROZONES BASED ON MOISTURE REQUIREMENTS OF THE PLANT GROUPING.

7. COLOR CODED HYDROZONE LANDSACPING HYDROZONE MAP WITH GROUPING AND COLLOCATING PLANTING MATERIAS BY WUCOLS WATER USE CATEGORY VL, L, M, OR H, PER [CGBSC 4.304}, TO BE PROVIDED IN PERMIT DRAWINGS.

8. RAIN SENSOR AND CONTROLLER LOCATION TO BE PROVIDED IN PERMIT DRAWINGS.

LANDSCAPE AREA CALCULATION:

	LANDSCAPE AREA
LEVEL 1:	2,559 SF
ROOF LEVEL:	1,525 SF
TOTAL:	4,084 SF (69%)

STORMWATER TREATMENT AREA:

REQUIRED STORMWATER TREATMENT AREA= 4% OF THE ROOF AREA (16810 SF) = 672 SF

PROPOSED STORMWATER TREATMENT AREA= 762 SF

BIKE PARKING CALCULATIONS:

(1) COMMERCIAL BIKE PARKING STALL

(16) SHORT TERM RESIDENTIAL BIKE PARKING STALLS

TOTAL SHORT TERM BIKE PARKING STALLS REQUIRED: 17 STALLS
TOTAL SHORT TERM BIKE PARKING STALLS PROVIDED: 18 STALLS (9 BIKE RACKS)

Mark Numainville, Berkeley City Clerk
Adena Ishii, Mayor
and Members of the Berkeley City Council

Subject: Appeal of Use Permit #ZP2023-0079

Mr. Numainville, Mayor Ishii, and Councilmembers:

On behalf of unincorporated association Save the UA Berkeley, I appeal the Zoning Adjustments Board decision of December 12, 2024. ZAB approved Use Permit #ZP2023-0079 for the project at 2274 Shattuck Avenue. Despite the project's substantial proposed demolition of the historic 1932 Berkeley United Artists movie theater, ZAB relied on a categorical exemption from CEQA. In compliance with the ZAB approval, this appeal is being filed before 5 p.m. on January 13, 2025.

As I have not appeared before this Council for many years, by way of brief re-introduction my law practice has focused on CEQA issues for over 40 years in matters often involving historic resources. These include academic, legislative, administrative, and judicial forums. Some of the fifty published cases in which I have represented CEQA petitioners in trial and appellate courts include *Sierra Club v. County of Fresno, Friends of the San Mateo College Gardens v. San Mateo County Community College District, Berkeley Hillside Preservation v. City of Berkeley, Sierra Club v. San Joaquin LAFCO, and Friends of Sierra Madre v. City of Sierra Madre, at the California Supreme Court, and Save the Capitol, Save the Trees v. California Department of General Services, Preservation Action Council of San Jose v. City of San Jose, Pocket Protectors v. City of Sacramento, Protect Niles v. City of Fremont, and Stanislaus Natural Heritage Project v. County of Stanislaus, at the Courts of Appeal.*

As the Council knows, CEQA review is of particular importance when projects substantially impact historic resources, many of which are adaptively reused after analysis of feasible mitigation measures and alternatives. While fundamental project objectives may often be achieved while avoiding significant impacts, no CEQA analysis at all occurs when projects proceed via categorical exemption. For this project, for example, there was no consideration of potential alteration to provide substantial housing without significant demolition — such as a ground level expansion or a steel frame structure rising high above the theater — as there was no CEQA process.

To ensure review of options for mitigation measures or alternatives when appropriate, specific *exceptions* apply to categorial exemptions, including one that applies here:

> CEQA Guidelines, § 15300.2 (f):
> **Historical Resources**. A categorical exemption shall not be used for a project which may cause a substantial adverse change in the significance of a historical resource.

AB 1633 does not exempt CEQA compliance for this project under the facts. Under state law, UA Berkeley qualifies as a "mandatory" historic resource vis-à-vis its intact listing in the California Register of Historical Resources. (Public Resources Code, § 21084.1.) The ZAB approval of the use permit accurately recites the undisputed fact that the theater structure is a historic resource. Its California Register listing and eligibility for the National Register of Historic Places remain undisturbed by actions of the City's Landmarks Preservation Commission, and the State of California formally recognizes that the historic status encompasses more than the façade.

The substantial demolition of UA Berkeley would cause a substantial adverse change in its historic significance. Save the UA Berkeley will reference expert evidence before ZAB that the historic resource exemption *exception* cited above applies, without contrary substantial evidence, and that this appeal should be granted.

Other grounds for appeal include that the categorical exemption is not consistent with the Downtown Plan as required, including policies for protection and expansion of historic theaters that specifically reference UA Berkeley. Further, as the project description relied upon in ZAB's review is not finite or stable, it is inadequate for consideration for categorical exemption, per the applicant's recent public assertions that the application will be substantially modified.

Save the UA Berkeley also asserts a potential due process violation in the ZAB proceedings based on a representation in a letter to ZAB on December 10, 2024 (Supplemental Communications, #6); to wit: "the City approved the Class 32 categorical exemption in October of 2024 *after deliberation by the City Council* and in consultation with the City Attorney." (Italics added.) To the best of appellant's knowledge there has been no public review before any City Council deliberation regarding the subject categorical exemption. It appears that ZAB was also not provided with all relevant City reports from architectural historians regarding the UA Berkeley.

Save the UA Berkeley looks forward to presenting its appeal.

Thank you.

Sincerely,

Susan Brandt-Hawley

Subject: 2274 Shattuck Avenue: My thoughts about why we're appealing and how it could have been avoided

WARNING: This is not a City of Berkeley email. Do not click links or attachments unless you trust the sender and know the content is safe.

Hi Ms. Gong and Mr. Klein -

I am writing to you with regards to the recent appeal that was filed against the Zoning Permit that was issued by ZAB for 2274 Shattuck Avenue on December 12th.

While I was not directly part of the appeal process myself, I have helped in drumming up support for public comment in defense of the UA.

I wanted to take a moment to detail to you what the issue is here. Cinema is not like other retail uses. Going to the movies is unique in that it is popular, affordable, and accessible to all. Going to the movies also usually involves going to a restaurant, a bar, and/or one's local bookstore. Movie theaters are purpose-built and that's why there aren't many of them around the Bay Area. There are many un-activated bedroom communities (some high-density) throughout the Bay Area. There aren't many mixed-use, transit-accessible communities that have such a concentration on culture. Cinema is an integral part of that and I feel it must be defended in our Downtown.

I am a Berkeley High alum and as such, I am highly familiar with Downtown Berkeley. It has access to BART, it hosts many theaters and performance venues, and was intended as an Entertainment Zone. This was all spelled out in the Downtown Area Plan, which the General Plan grants authority.

I have been wrestling with the idea of potentially stalling housing in the defense of a cinema that is currently vacant and has seismic concerns that must be addressed.

I never imagined I'd see the day I'd be a NIMBY with regards to housing. It weighs on me.

However, the economics of operating a cinema will return for Downtown Berkeley, especially with thousands of additional residents. The economics of constructing a purpose-built cinema will not. However, I'll add that two additional Alamo Drafthouse Cinemas are currently in the pipeline in the South Bay. A case in point that the economics of cinema are rebounding.

Movie ticket sales are half what they were in 2002. But they have not dropped to zero and they will not. See above paragraph.

The issue we're faced with now is that Berkeley's response to the pandemic had a detrimental effect on downtown. However, the collateral damage should not have been the demolition of three cinemas. The Downtown Area Plan very clearly compels the City to preserve existing cinema and to promote access to mainstream cinema downtown.

Now we're down to one remaining theater. Unfortunately, it's the largest one and it has the seismic concerns. But it uniquely is the only one that was listed on the California Register of Historic Places. That fact - combined with the preservation changes Panoramic Interests has proposed - preclude it from a Categorical Exemption. You are aware of this, as the peer-reviewed studies you commissioned from HRE over the summer (both attached) concluded the same.

It brings me no joy to support the efforts to bring about a CEQA appeal. I have been a housing YIMBY for my entire adult life and I worked for market-rate housing developers.

However, I believe this all could have been avoided if you had informed Panoramic Interests that they were in violation of the policies that were clearly (and objectively!) set forth in the Downtown Area Plan within 60 days of the project application being deemed complete. At that point, Panoramic Interests could have addressed the issue through a creative community benefit. They would have benefitted from knowing where you stood on that issue within that timeframe, too, so as I'm sure they had arrows in their quiver for how to mitigate the impact to the community. The idea that immediately came to my mind is providing a conditional donation to the Pacific Film Archives for them to offer extended hours on Friday and Saturday for more mainstream showings or to switch out their 7 PM showings for more mainstream showings. They have a wonderful facility, but all of their film is esoteric. There are other approaches to preserving cinema access, too, but I won't list them here.

I believe that this could have been avoided, too, if you had shared with ZAB, the City Attorney, and the Public the Rincon Consultants peer-review you commissioned. I still do not understand why they were not provided to ZAB.

It's unfortunate that supporters of cinema access feel that we have been put in a position to wield a CEQA process to try to enforce what was envisioned in the Downtown Area Plan. I'll add that the updated Housing Element did not change this in the context of 2274 Shattuck. I so wish more had been done earlier to collaborate with Panoramic Interests while they were in the entitlement phase to be able to ensure continuing access to cinema downtown and to be more thoughtful about the scope of some of the preservation. There are many examples of how redevelopments have paid homage to historical heritage through many different approaches. Consider, for example, the archival gallery there is at the entrance to the San Francisco Ferry Building.

Anyway, I wanted to articulate to you why we are in this spot and help provide context for what we're trying to defend in our Downtown. I am hoping for an outcome that promotes housing while also ensuring that the intentions for Cinema Downtown are ultimately supported.

Thanks for your consideration. I'll be in touch in the coming weeks.
--
Best regards,
Madeleine Roberts Rich

Subject: 2274 Shattuck Avenue HRE and Project Impact Analysis Peer Review

Dear Ms. Gong:

The City of Berkeley (City) retained Rincon Consultants, Inc. (Rincon) to conduct a peer review of the Historic Resources Evaluation (HRE) memorandum prepared for 2274 Shattuck Avenue by Left Coat Architectural History (December 2023) and the report titled *2274 Shattuck Avenue Project Impacts Analysis* prepared by Left Coast Architectural History (March 2024). The peer review presented below assesses reporting accuracy and adequacy relative to the field and research methods and evaluation results using industry-accepted best practice and guidance provide by the National Park Service (NPS) and the California Office of Historic Preservation (OHP). The peer review was limited to the HRE memorandum and the impacts analysis report and did not involve field work, recordation, or reevaluation of any resources. We understand that the purpose of the peer review is to support the California Environmental Quality Act (CEQA) environmental review process for a proposed 17-story mixed-use commercial and residential development.

Rincon Architectural Historian JulieAnn Murphy, MSHP, conducted the peer review, with oversight by Cultural Resources Director Steven Treffers. Both Ms. Murphy and Mr. Treffers meet the Secretary of the Interior's Professional Qualification Standards for architectural history and history (36 CFR Part 61).

Summary of Previous Reports

HRE Memorandum

In December 2023, Caitlin Hibma of Left Coast Architectural History prepared an evaluation of the building at 2274 Shattuck Avenue (APN 57-208-3). The evaluation was completed for the project applicant, who proposes to redevelop the property with a 17-story mixed-use commercial and residential development that would include retaining the building façade and the lobby portion of the building. Hibma meets the Secretary of the Interior's Professional Qualification Standards for architectural history.

The evaluation noted that 2274 is a two-to-four-story commercial building constructed in 1932 for use as a United Artists movie theater, and was designed by Walker & Eisen Architects with Clifford A. Balch. Hibma outlined that the building was the subject of three previous evaluations – a 1978 survey that produced a Historic Resource Inventory Form (precursor to the current form) and resulted in the assignment of a "3" National Register Status Code, suggesting eligibility for listing in the National Register of Historic Places (NRHP); a 2005 updated Department of Parks and Recreation (DPR) Series 523 Form prepared as part of a Section 106 review of the National Historic Preservation Act that determined the property was eligible for listing in the NRHP under Criteria A and C and resulted in a

2S2 status code, indicating NRHP eligibility and listing in the CRHR; and a 2015 evaluation as part of the potential Shattuck Avenue Commercial Corridor Historic Context Survey which affirmed the 2S2 status code and further recommended the building as a contributor to the establishment of the potential Shattuck Avenue Commercial Corridor Historic District.

The HRE then asserted that the previous evaluations did not comprehensively analyze the present condition of the building under the current professional standards and are, therefore, inadequate for CEQA determinations and for local planning decisions. It then provided an updated evaluation, finding that it did appear architecturally significant under CRHR Criterion 3 for its Art Deco design, but that it no longer retains sufficient integrity to support listing. It was also recommended ineligible for listing as a City of Berkeley Landmark and as a City of Berkeley Structure of Merit for a lack of historical and architectural significance. The HRE does not make any conclusions regarding the property's previously identified status as a contributor to the Shattuck Avenue Commercial Corridor Historic District.

2274 Shattuck Avenue Project Impacts Analysis

In March 2024, Caitlin Hibma of Left Coast Architectural History prepared a memorandum report to assess the impact of the redevelopment project on historical resources. Though Hibma previously recommended the property ineligible as a historical resource due, in part, to diminished integrity, the property is listed in the CRHR and is an identified contributor to the potential Shattuck Avenue Commercial Corridor Historic District. Additionally, the Berkeley Landmark Preservation Commission (LPC) subsequently approved a City of Berkeley Landmark application in February 2024. The provisions of the Landmark only extend to the upper Shattuck Avenue façade, above the exiting non-historic marquee.[1]

The analysis considers the project's compliance with Secretary of the Interior's Standards for Rehabilitation (Standards), the Berkeley LPC's permit application review standards, and the Berkeley Downtown Design Guidelines. The memorandum outlines the current historical status; provides a list of the character-defining features of the building according to the Landmark designation; a review of the proposed project; a Standards analysis; a Berkeley Municipal Code compliance analysis; and a Downtown Berkeley Design Guidelines compliance analysis. The proposed project was concluded to be compliant with Standards 1 through 10. It was also resolved to be compliant with the applicable provisions of the Berkeley Municipal Code and consistent with the relevant Downtown Berkeley Design Guidelines. The memorandum report concludes that the proposed project would not result in an impact to a historical resource pursuant to CEQA.

Peer Review

HRE Memorandum

The HRE memorandum generally follows the accepted standard format of historical resource evaluation reporting guidelines and includes an introduction, executive summary, methodology, regulatory context, a review of previous evaluations, and evaluative findings. The information summarized in the architectural descriptions reflected the site's existing conditions, including a comprehensive list of alterations, at their time of recordation, accurately.

[1] The City of Berkeley Landmark application was forwarded to the Berkeley City Council for notice of decision on March 19, 2024. The building's Landmark status does not extend to the current project application because it predated the Landmark designation.

As stated in the HRE memorandum, it is an update to previous survey and evaluation efforts. It accurately outlines the previous findings noting it was found eligible for listing in the NRHP in 1978; its eligibility was affirmed in 2004 and was subsequently listed in the CRHR by consensus through the Section 106 process; and it was further identified as a contributor to the potential Shattuck Avenue Commercial Corridor Historic District in 2015.

As outlined by the Office of Historic Preservation (OHP) in *Instructions for Recording Historical Resources*, it is important to update information about historical resources to ensure accuracy. The HRE memorandum argues that an update was necessary because the past documentation and evaluations relied on the 1978 documentation, which does not accurately describe alterations and was not completed according to current evaluation standards. OHP guidance provides that updates "may amplify or correct information about a resource, or simply confirm that the existing record remains accurate at the time of a subsequent field examination" (OHP 1995). It further instructs that documentation for historical resources should be updated under the following conditions:

- When it is reevaluated;
- When changes occur to the resource or its setting;
- When erroneous information needs correcting; and/or
- When additional information is necessary for planning decisions.

The effort to update the historical resource record with accurate information is generally consistent with OHP guidance. The HRE memorandum continues, providing a detailed description of the existing conditions, and includes a comprehensive list of the alterations that have occurred since it was constructed, augmenting and correcting missing information in the original and subsequent records. It then continues to include an updated evaluation for its inclusion in the NRHP, CRHR, City of Berkeley Landmark, and City of Berkeley Structure of Merit.

It recommended the building ineligible for listing in the NRHP or CRHR under Criterion A/1, B/2, and D/4. It further argues that because the Art Deco theater building is a well-represented type and style locally and nationally, is modest in comparison to other theaters locally and nationally, and it has lost its integrity that it is not eligible for listing in the NRHP under Criterion C for its architecture. It continues that it did appear eligible for listing in the CRHR as originally constructed, but that alterations have resulted in loss of integrity necessary for listing and it is therefore ineligible for listing in the CRHR under Criterion 3. It finds that the property is also not eligible for listing as City of Berkeley Landmark or as a Structure of Merit for lack of historical significance and for a lack of architectural significance due, in part, to the changes that have occurred to the building resulting in the removal of original features and design elements.

Though updating the historical resource record is consistent with OHP guidance, a reevaluation for eligibility for listing in the CRHR, in this case, was not necessary because the property is already listed in the CRHR and is considered a historical resource as defined in PRC Section 5024.1(g) and is, therefore, a historical resource under CEQA. The property was listed in the CRHR in 2005 through a consensus determination, meaning that the determination was arrived at through an agreement between the federal lead agency and OHP. Changes outlined in the HRE memorandum that have occurred since its listing in 2006 are relatively minor and are limited to interior updates. Its overall appearance and condition, based on photographs provided in the DPR form which helped to inform OHP's determination of eligibility, has remained largely unchanged since it was listed in 2006. The HRE memorandum's conclusion that the property is not a historical resource, therefore, not supported.

The update does provide additional and current information about the building, but it was not recorded on a DPR Form. Per OHP instructions, the updated physical description, current photographs, and

additional alteration information should be recorded on a DPR Continuation Sheet (DPR L) and submitted to the Northwest Information Center (NWIC) to be added to the property's existing record in the California Historical Resources Information Center (CHRIS).

2274 Shattuck Avenue Project Impacts Analysis

The project impact analysis report generally follows the accepted format for an impact analysis and provides an introduction and methodology section, a review of existing designations, a list of character-defining features, a description of the proposed project, and an analysis of the proposed project. The analysis provides the regulatory context including the definitions of substantial adverse change and material impairment provided in Section 15064.5 of the CEQA Guidelines and accurately provides that, per the Guidelines, a project that follows the Secretary of the Interior's Standards for the Treatment of Historic Properties shall be considered as mitigated to a level of less than significant on the historical resource. It then continues to provide an in-depth discussion of the project's conformance with the Secretary of the Interior's Standards for Rehabilitation (Standards), which were identified as the most applicable of the four treatment standards.

The subsequent discussion of the project's compliance with the Standards includes a Standard-by-Standard review of the proposed project, asserting that the project will successfully meet all ten of the Standards. As described, however, the project proposes demolition of more than half of the building. Demolition is not a rehabilitation treatment and is generally only acceptable as part of rehabilitation to remove non-historic additions or material. The analysis provided erroneously relies on the presumption that the only portions of the building that are historic are limited to what was identified in the March 2024 City of Berkeley Landmark nomination, which includes only the upper portion of the Shattuck Avenue façade, above the non-historic marquee. The building's current status, however, and its reason for being a historical resource pursuant to CEQA, is tied to its listing in the CRHR, which extends to the whole building. As clarified in *National Register Bulletin 15:-How to Apply the National Register Criteria for Evaluation,* for which the CRHR is based, "parts of buildings, such as interiors, facades, or wings are not eligible independent of the rest of the existing building" (NPS 1997). The Standards analysis, therefore, cannot disqualify the proposed treatment of the rear portion of the building.

Compliance with the Standards, however, is not the only way to demonstrate that a project would avoid causing a substantial adverse change in the significance of a historical resource. The argument provided would be strengthened by acknowledging the aspects of the project that are not Standards-compliant and would benefit from being reframed to analyze if the proposed changes to 2274 Shattuck Avenue amount to substantial adverse change. The project impacts discussion is recommended to be revised and analyzed to consider if the changes proposed to the historical resource (the whole building) would result in material impairment as defined in Section 15064.5 (b)(2)(A) of the CEQA Guidelines.

The analysis continues to a discussion of the proposed project's conformity with the Berkeley Municipal Code provisions for the treatment of historic resources, noting that they do not apply to the current application because it is an SB330 application, and that the analysis is provided as an informative item. The analysis provides a clear discussion of the impact of the project as it relates to the Landmark designation, which only applies to the upper portion of the Shattuck Avenue elevation. The discussion of the impact of the project to the potential Shattuck Avenue Commercial Corridor Historic District, provides a thorough discussion of the impact of the project to the district as it relates to the portion of the building which is included in the Landmark designation. Similar to the Standards analysis, however, there is nothing in the district record to suggest that the whole building is not included as a contributor to the district. It is recommended that the analysis, if required for the project

application, be updated to acknowledge the demolition of a portion of the building and any potential impact to the building as a contributor to the proposed district.

Finally, the analysis continues to a discussion of the proposed project's conformance with the Downtown Berkeley Design Guidelines. Similar to the Berkeley Municipal Code provisions for the treatment of historic resources, the design standards are noted as not applicable because the project is pursuing a SB330 application. The discussion provides a thorough and robust analysis of the relevant guidelines as it relates to the portion of the building included in the Landmark designation. The whole building was previously identified as being subject to the Downtown Berkeley Design Guidelines. As such, it is recommended that, if a requirement of the project application, that the discussion be updated to include all the applicable guidelines as outlined in the "Procedures" portion of the guidelines, including those that discuss roof forms, site design, and special sites, buildings, and subareas in order to adequately address the proposed project's conformance with the Downtown Berkeley Design Guidelines.

Conclusion

In summary, the HRE Memorandum provides useful updated information on the current condition of the building and additional information on the building's alterations. It is recommended that that information be provided on DPR Continuation Sheets and submitted to the NWIC to update the current record, as recommended by OHP guidance. The updated evaluation provided, however, was not necessary to determine if the building is a historical resource pursuant to CEQA since the building is listed in the CRHR. The *2274 Shattuck Avenue Project Impacts Analysis* generally follows the best practices and industry-accepted guidance for the impacts analysis reporting. However, the analysis discussion is limited to the portion of the building which was recently identified as City of Berkeley Landmark. The building's historical status, however, is established by its listing in the CRHR, which applies to the whole building. It is recommended, therefore, that the analysis provided in *2274 Shattuck Avenue Project Impacts Analysis* be revised to include a discussion of the project's impacts to the historical resource.

Should you have any questions regarding this memorandum, please do not hesitate to contact me at 510-834-4455 or jmurphy@rinconconsultants.com.

Sincerely,
Rincon Consultants, Inc.

Subject: 2274 Shattuck Avenue Project Impact Analysis
2274 Shattuck Avenue, Berkeley, California 94704

Dear Ms. Gong:

Rincon Consultants, Inc. (Rincon) was retained by the City of Berkeley (City) to conduct a historical resources impacts assessment for a proposed project at 2274 Shattuck Avenue, also known as the United Artists Theater, in Berkeley, California. The proposed project includes demolition of most of the former theater building for construction of a 17-story mixed-use commercial and residential building with 227 units. The building was previously determined eligible for listing in the National Register of Historic Places (NRHP) and is listed in the California Register of Historical Resources (CRHR). It has also been identified as a contributing building to the potential City of Berkeley Shattuck Avenue Commercial Corridor Historic District. As a result of its eligibility for the NRHP and listing in the CRHR, the subject property is a qualifying historical resource pursuant to the California Environmental Quality Act (CEQA) and as defined by Section 15064.5 of the CEQA Guidelines.

The current assessment was prepared to determine if the project conforms with the Secretary of the Interior's Standards for Rehabilitation (Standards) and would result in an impact to a historical resource.[1] Pursuant to Section 15064.5(b)(3) of the CEQA Guidelines, a project that is found to comply with the Standards generally mitigates impacts to a historical resources to a less than significant level. Methods for the current assessment included a review of project plans and relevant historic documentation and preparation of this memorandum to present the results.

The impacts assessment was conducted by Architectural Historian Project Manager JulieAnn Murphy with oversight from Cultural Resources Director Steven Treffers, both of whom meet the Secretary of the Interior's Professional Qualification Standards (PQS) for architectural history and history (36 CFR Part 61). With over 10 years of experience in historic preservation, Ms. Murphy has extensive experience with CEQA compliance reviews and historical resources assessments.

Project Description

The proposed project includes demolition of the theater portion of the 1932 United Artists building that fronts Bancroft Way and construction of a 17-story mixed-use building with 227 dwelling units (Figure 1). The residential tower portion of the building would have a stucco exterior finish with recessed aluminum windows, metal fin details, and metal spandrels. The top story would have a roof

[1] Kay Weeks and Anne Grimmer, *The Secretary of the Interior's Standards for the Treatment of Historic Properties with Guidelines for Preserving, Rehabilitating, Restoring, and Reconstructing Historic Buildings*. National Park Service, Washington, D.C., 2017.

deck with a glass railing. The Bancroft elevation would have a secondary residential entrance as well as a vehicular entrance for an accessible parking spot (Figure 2).

The one-story, double-volume portion of the building that formerly served as the theater entry on Shattuck Avenue would be partially retained. The existing storefront entry would be reconfigured for two entries – one to the residential tower offices and lobby and one for a proposed ground floor café. The existing marquee would be removed and replaced with a new awning with a simple, painted stucco finish. The bas relief details of the Art Deco façade above the marquee would be painted, while the rest of the façade would be finished in white stucco. A new vertical dimensional letter sign would be installed at the center of the decorative elevation (Figure 3).

Figure 2 Proposed Bancroft Way Elevation

Figure 3 Proposed Primary Elevation Changes

Standards for Rehabilitation

CEQA Section 21084.1 requires a lead agency to determine whether a project may have a significant effect on the environment, which includes historical resources. Impacts to a historical resource occur when there is a substantial adverse change in the significance of a resource such that it is materially impaired. Material impairment is defined as demolition or alteration "in an adverse manner [of] those characteristics of an historical resource that convey its historical significance and that justify its inclusion in, or eligibility for inclusion in, the [CRHR]." Under Section 10564.5(b)(3) of the CEQA Guidelines, a project that is found to conform with the Secretary's Standards is generally found to not result in significant impacts to historical resources under CEQA.

The Secretary's Standards make broad-brush recommendations for maintaining, repairing, and replacing historic materials, as well as designing new additions or making alterations. They cannot, in and of themselves, be used to make essential decisions about which features of a historic property should be saved and which might be changed. Rather, they provide philosophical consistency to the work. There are Secretary's Standards for four distinct, but interrelated, approaches to the treatment of historic properties: preservation, rehabilitation, restoration, and reconstruction.

The Secretary's Rehabilitation Standards are the most applicable treatment and have been utilized in the review of the current project. The Secretary's Standards for Rehabilitation state:

1. A property will be used as it was historically or be given a new use that requires minimal change to its distinctive materials, features, spaces, and spatial relationships.
2. The historic character of a property will be retained and preserved. The removal of distinctive materials or alteration of features, spaces, and spatial relationships that characterize a property will be avoided.
3. Each property will be recognized as a physical record of its time, place, and use. Changes that create a false sense of historical development, such as adding conjectural features or elements from other historic properties, will not be undertaken.
4. Changes to a property that have acquired historic significance in their own right will be retained and preserved.
5. Distinctive materials, features, finishes, and construction techniques or examples of craftsmanship that characterize a property will be preserved.
6. Deteriorated historic features will be repaired rather than replaced. Where the severity of deterioration requires replacement of a distinctive feature, the new feature will match the old in design, color, texture, and, where possible, materials. Replacement of missing features will be substantiated by documentary and physical evidence.
7. Chemical or physical treatments, if appropriate, will be undertaken using the gentlest means possible. Treatments that cause damage to historic materials will not be used.
8. Archeological resources will be protected and preserved in place. If such resources must be disturbed, mitigation measures will be undertaken.
9. New additions, exterior alterations, or related new construction will not destroy historic materials, features, and spatial relationships that characterize the property. The new work shall be differentiated from the old and will be compatible with the historic materials, features, size, scale and proportion, and massing to protect the integrity of the property and its environment.

10. New additions and adjacent or related new construction will be undertaken in such a manner that, if removed in the future, the essential form and integrity of the historic property and its environment would be unimpaired.

Historical Resources Status

In 1978, Historic Resources Inventory documentation prepared by Betty Marvin of Berkeley Architectural Heritage Association recommended 2274 Shattuck Avenue, also known as United Artists Theaters, eligible for listing in the NRHP. It was assigned a National Register Status Code (now known as California Historical Resource Status Code) "3" indicating it appeared eligible for listing in the NRHP.

In 2004-2005, the property was evaluated for the Alameda-Contra Costa County Transit East Bay Rapid Transit Project by JRP Historical Consulting and was documented on a DPR 523 Continuation Sheet. It was field checked and noted that, "it does not appear to have undergone any alteration that would warrant a change in its National Register status code." It was assigned a California Historical Resource Status Code "3S," which indicates it appears eligible for NRHP individually through survey evaluation. A subsequent Finding of Effect documentation prepared for the project as part of the Section 106 process summarized that the building was significant under Criterion A as a locally operated movie theater and Criterion C for its Art Deco architecture. As a result of this project, the building was designated in the CRHR on March 15, 2006.

In 2015, the property was evaluated as part of the Shattuck Avenue Commercial Corridor Historic Context and Survey by Archives & Architecture and was recorded on a full set of DPR 523 forms. Its evaluation found that it was historically significant to important development patterns in the downtown core and for its Art Deco architecture. It was assigned a California Historical Resource Code of "2S2" indicating it was individually determined eligible for the NRHP by consensus through Section 106 process and listed in the CRHR and "5B" indicating it is locally significant both individually and as a contributor to a multi-component resource, as part of the Shattuck Avenue Commercial Corridor Historic District. The local historic district has not been formally adopted by the City of Berkeley.

The building retains the same appearance documented and described in 2004-2005 to support its 2006 CRHR designation. There have been no visible alterations and no evidence to suggest that it would no longer be eligible for listing in the CRHR. As a result of its eligibility for the NRHP and listing in the CRHR, the subject property is a qualifying historical resource pursuant to the California Environmental Quality Act (CEQA) and as defined by Section 15064.5 of the CEQA Guidelines.

Character Defining Features

The intent of the Standards is to provide for the long-term preservation of a property's significance through the preservation of its historic materials and features. These historic materials and features are commonly referred to as character-defining features and are indispensable in a historic property's ability to convey the reasons for its historical significance. To ensure a proposed project's compliance with the Standards, a historic property's character-defining features should therefore be identified and preserved as part of the final design.

According to Preservation Brief 17, *Architectural Character: Identifying the Visual Aspects of Historic Buildings as an Aid to Preserving Their Character*, there is a three-step process to identifying character-defining features.[2] Step 1 involves assessing the distinguishing physical aspects of the exterior of the

[2] Lee H. Nelson, *Architectural Character: Identifying the Visual Aspects of Historic Buildings as an Aid to Preserving Their Character*, Preservation Brief No. 17. U.S. Department of the Interior, National Park Service, Technical Preservation Services.

building as a whole, including its setting, shape and massing, orientation, roof and roof features, projections, and openings. Step 2 looks at the building more closely—at materials, trim, secondary features, and craftsmanship. Step 3 encompasses the interior, including individual spaces, relations or sequences of spaces (floor plan), surface finishes and materials, exposed structure, and interior.

The building was recommended eligible for inclusion in the NRHP and is listed in the CRHR. Its historical significance derives from its role in the Depression-era development of Downtown Berkeley, specifically as a purpose-built entertainment venue for motion pictures and for its distinctive Art Deco design. No period of significance was identified when the building was added to the CRHR in 2006. The 2015 evaluation prepared for the Shattuck Avenue Commercial Corridor Historic District identified the building's period of significance as 1932, beginning with the building's date of constriction, and ending in 1958 to coincide with the proposed District's end of period of significance. This study recommends the period of significance from 1932, when the building was originally constructed, until 1973, when the original single-screen theater was subdivided for multiple screens, resulting in several functional and aesthetic changes to the building.

The building's character-defining features include the following:

- Irregular lot shape
- Two-part massing with theater entrance portion and theater auditorium portion
- Sheer form concrete wall with vertical speed stripes along Bancroft Way
- Recessed main entry with original tile floor
- Stepped Art Deco upper façade with tower plume on Shattuck Avenue
- Bas relief detailing of "Artistry" and "Unity" on upper façade

Project Impacts Analysis

The proposed project includes substantial demolition of the building for the construction of a 17-story residential tower to house 227 dwelling units. As detailed above, other changes include updating the one-story, double volume theater entry portion of the building for a café and residential lobby and offices at the interior and retaining and updating the Art Deco exterior. The following presents a Standards and impacts analysis of the proposed project.

Rehabilitation Standard No. 1

A property shall be used for its historic purpose or be placed in a new use that requires minimal change to the defining characteristics of the building and its site and environment.

The proposed project includes demolition of the former theater auditorium portion of the building to accommodate the construction of a 17-story residential building. Though the introduction of residential use in a former commercial building is generally compatible with Standard No. 1, the proposed demolition of approximately 75 percent of the building requires more than minimal change and would interfere with the building's character-defining features. Demolition is not considered a rehabilitation treatment under the Standards and is generally only acceptable as part of rehabilitation to remove non-historic additions or material. The proposed project would result in the removal of the building's distinctive two-part massing as well as the sheer form concrete wall with vertical speed stripes along Bancroft Way. Rehabilitation Standard No. 1 is not satisfied.

Rehabilitation Standard No. 2
The historic character of a property shall be retained and preserved. The removal of historic materials or alteration of features and spaces that characterize a property shall be avoided.

The historic character of 2274 Shattuck Avenue is comprised of the physical characteristics that reflect its significance as a building that represents the development of Downtown Berkeley during the Great Depression and for its Art Deco design. The proposed project includes retaining and updating the Shattuck Avenue elevation. The proposed work includes removing the non-historic storefront system (installed in 1989, after the period of significance) for new entries and removal of the non-historic marquee (installed in 1974, after the period of significance). It also includes retaining the character-defining Art Deco detailing, like the bas relief artwork and is consistent with Standard No. 2.

Constructed as a purpose-built entertainment venue for motion pictures, one of the essential spaces that characterizes the property is its theater auditorium. Its proposed removal is not consistent with the guidance and Rehabilitation Standard No. 2 is not satisfied.

Rehabilitation Standard No. 3
Each property shall be recognized as a physical record of its time, place, and use. Changes that create a false sense of historical development, such as adding conjectural features or architectural elements from other buildings, will not be undertaken.

The proposed project does not include the addition of conjectural features or architectural elements from other buildings. Rehabilitation Standard No. 3 is not applicable.

Rehabilitation Standard No. 4
Most properties change over time; those changes that have acquired historic significance in their own right shall be retained and preserved.

The marquee was installed in 1974, and though outside the building's period of significance, is 50 years old, the age when resources are generally accepted as historic-age. Unlike the original marquee which it replaced, the existing marquee is a mass-produced installment and does not appear to have been manufactured specifically for this building. Furthermore, it has been updated several times since its installation with additional panels and lighting. The building is significant for its role in the role in the Depression-era development of Downtown Berkeley and for its distinctive Art Deco design. The marquee is not related to either significant theme. Its proposed removal is compliant with Rehabilitation Standard No. 4.

Rehabilitation Standard No. 5
Distinctive features, finishes, and construction techniques or examples of craftsmanship that characterize a historic property shall be preserved.

As described above, many of the building's distinctive features are related to its Art Deco design. The proposed retention and rehabilitation of the Shattuck Avenue elevation is consistent with Rehabilitation Standard No. 5.

Other distinctive features, however, are related to its historic use as a movie theater. The proposed demolition that will result in the loss of the theater auditorium will result in the loss of a distinctive feature that characterizes the property and conveys its historical and architectural significance. It will also result in the loss of the form concrete wall, which demonstrates the building's construction. Rehabilitation Standard No. 5 is not met.

Rehabilitation Standard No. 6
Deteriorated historic features shall be repaired rather than replaced. Where the severity of

deterioration requires replacement of a distinctive feature, the new feature shall match the old in design, color, texture, and other visual qualities and, where possible, materials. Replacement of missing features shall be substantiated by documentary, physical, or pictorial evidence.

The proposed scope of work includes removal of existing, non-historic features like the marque, exterior cladding, and storefront system. The presence and/or condition of historic features beneath existing features is unknown. The exact treatment and approach for these project elements has not yet been determined, but could conceptually be in accordance with Rehabilitation Standard No. 6 if completed by qualified professionals and in accordance with National Park Service (NPS) guidance.

Rehabilitation Standard No. 7
Chemical or physical treatments, such as sandblasting, that cause damage to historic materials shall not be used. The surface cleaning of structures, if appropriate, shall be undertaken using the gentlest means possible.

The proposed scope of work includes removing existing paint finish on the Shattuck Avenue elevation for a new, white painted finish. Plan documents note that work will be undertaken "via approved methods that do not damage the existing stucco". Information for this analysis did not include additional details on the proposed method. This work could conceptually be in accordance with Rehabilitation Standard No. 7 if completed by qualified professionals and in accordance with National Park Service (NPS) guidance.

Rehabilitation Standard No. 8
Significant archeological resources affected by a project shall be protected and preserved. If such resources must be disturbed, mitigation measures shall be undertaken.

Because the proposed project includes ground-disturbing activities, there is a chance of encountering archaeological resources. Provisions required by the California Environmental Quality Act (CEQA) would ensure that archaeological resources, if encountered, are treated appropriately. There is nothing to suggest that work cannot be completed in accordance with Rehabilitation Standard No. 8.

Rehabilitation Standard No. 9
New additions, exterior alterations, or related new construction shall not destroy historic materials that characterize the property. The new work shall be differentiated from the old and shall be compatible with the massing, size, scale, and architectural features to protect the historic integrity of the property and its environment.

As proposed, the project includes the demolition of the former theater auditorium for a 17-story residential building. As described above, demolition is not a rehabilitation treatment and is generally only acceptable as part of rehabilitation to remove non-historic additions or material under the Standards. The proposed demolition of the theater auditorium and its replacement with a new addition is not consistent with Rehabilitation Standard No. 9.

While the proposed new residential tower is consistent with the Standards in that it would be differentiated from the historic through the use of compatible, yet distinctive materials, it is not compatible with the massing, size, and scale of the historic building. Guidance from Preservation Brief 14, *New Exterior Additions to Historic Buildings: Preservation Concerns* explains that large additions to historic buildings are seldom found to be compatible.[3] Though the design is consistent with NPS

[3] Anne E. Grimmer and Kay D. Weeks. *New Exterior Additions to Historic Buildings: Preservation Concerns*, Preservation Brief No. 14. U.S. Department of the Interior, National Park Service, Technical Preservation Services.

guidance that suggests that new large additions can be successful if they read as a separate volume, as proposed here, the scale, massing, and proportions of the addition still need to be compatible with the historic building. A 17-story tower addition to a one-story, double volume building is not consistent with the existing scale, massing, and proportions. The proposed project is not consistent with Rehabilitation Standard No. 9.

Rehabilitation Standard No. 10
New additions and adjacent or related new construction will be undertaken in such a manner that if removed in the future, the essential form and integrity of the historic property and its environment would be unimpaired.

Because the proposed addition requires the demolition of a substantial portion of the building, the essential form and integrity of the historic property would be lost to accommodate the new addition. The proposed project is not consistent with Rehabilitation Standard No. 10.

Conclusions

As detailed above, several elements of the proposed project are not consistent with the Secretary of the Interior's Standards for Rehabilitation. Although the alteration of the character-defining features should typically be avoided, their alteration does not automatically amount to a substantial adverse change causing material impairment. Pursuant to Section 15064.5(b) of the CEQA Guidelines, material impairment of a historical resource occurs when a property is altered such that it is no longer able to convey its historical significance. The proposed project would result in material impairment. Though several aspects of its distinctive Art Deco design are proposed to be retained, the proposed demolition of the former theater auditorium would result in loss of integrity of design, materials, workmanship, feeling and association. It would no longer reflect its historic significance for its role in the Depression-era development of Downtown Berkeley, specifically as a purpose-built entertainment venue for motion pictures. The proposed project would result in a substantial adverse change and it would no longer retain its architectural and historic identity for which it is significant, resulting in a ***significant and unavoidable impact to historical resources*** pursuant to CEQA. Should you have any questions or comments regarding this report, please do not hesitate to contact me at 925-326-1159 or at jmurphy@rinconconsultants.com.

Subject: Save the Historic Art Deco Berkeley United Artists Theater!

WARNING: This is not a City of Berkeley email. Do not click links or attachments unless you trust the sender and know the content is safe.

Dear Berkeley Mayor, Berkeley City Council, and City Commissioners:

I am a native of Berkeley. Born and raised in the City of Berkeley. I treasure the beautiful, architecturally significant, and historical buildings found throughout Berkeley which are part of the City's heritage and unique character.

I strongly PROTEST the deliberate destruction of many of the irreplaceable iconic structures in Berkeley in the *mistaken belief* that high rise apartment buildings will solve the lack of affordable housing and reduce the increasing number of homeless on our streets.

It appears that Development Interests are dominating, and perhaps controlling, the City of Berkeley's planning process, programming, and projects. While I applaud appropriate infill and higher density housing, it is tragic that these sound urban planning principals are being used to destroy our iconic and architecturally significant historical buildings.

The Berkeley United Artist Theater is a paragon of Art Deco architecture that, if destroyed, can never be replaced. It was found eligible for the National Register of Historic Places and it is on the California Register of Historical Resources. The City of Berkeley recognizes it as an "architecturally significant" building and a "structure of merit." Its loss could be deemed a "substantial adverse change" *requiring extensive CEQA review under the law.*

The City informed the developer in January 2024 that the project should undergo CEQA review. Furthermore, the City's Downtown Area Plan, which is still in effect, calls for the "retention" and "support" of downtown cinemas. Instead, the City has allowed the beloved Shattuck Cinemas to be demolished, and the art deco California Theater now has final approval to be razed. The Berkeley United Artist Theater is the last of the downtown theaters that could be saved. It is the most historically and architecturally valuable of the three—its art should be preserved!

To grant the developer an exemption to CEQA now, raises significant questions regarding the integrity, honesty, and ethics of our Planning Department and City Government. As stated above, it appears that development interests are controlling our City planning process, programming, and projects, at the negative expense of Berkeley Citizens and the community.

The public deserves transparency. An exemption to CEQA would deny the public a chance to learn about the historic and cultural resources that stand to be lost if the Berkeley United Artist Theater is demolished. This theater and the citizens and community deserve a public CEQA report and further expert evaluation of the development proposal.

I urge you to SAVE the historic art deco of the Berkeley United Artists Theater. I urge you to seriously consider ways to retrofit the existing theater building in such a way as to save and incorporate the beautiful existing Art Deco exteriors and interiors while also providing for new residential apartments. I am sure the apartment residents would appreciate being surrounded by the beautiful historical art deco designs.

Sincerely,

Laura Fujii

From: Zoning Adjustments Board (ZAB)
Subject: FW: CEQA and the UA Theater, 2274 Shattuck

From: Arlene Owseichik <bigpicturedesign@icloud.com>
Sent: Monday, January 27, 2025 1:34 PM
To: Zoning Adjustments Board (ZAB) <Planningzab@berkeleyca.gov>
Subject: CEQA and the UA Theater, 2274 Shattuck

WARNING: This is not a City of Berkeley email. Do not click links or attachments unless you trust the sender and know the content is safe.

Dear ZAB,

I am a long time Berkeley resident, lover of history and architecture. I have been befuddled for almost two years that folks on the City Council, the Preservation Commission, and the Zoning Board have not taken a stand to prevent the demolition of the UA Theater at 2274 Shattuck.

The building was an Art Deco masterpiece when it opened in 1932. We believe architectural elements still exist under the remodel in the 1970's when the theater became a multi-plex.

The UA is on the California Register of Historical Resources. It is National Register-eligible and is also now a city landmark. The building is a cultural and historical resource under the CEQA statute. It could become Berkeley's version of the Oakland Paramount, a multi-purpose venue and community gathering place.

www.savetheuaberkeley.org recently filed an appeal to the decision to bypass CEQA. We urge you to consider this appeal and follow the laws regarding CEQA.

Why has the developer been granted an exemption from CEQA? Why was the Zoning board not aware of the reports filed by the Rincon Group, whom the city hired, that declared the property to be of historic significance?

Why is everyone so chummy with Patrick Kennedy at the expense of Berkeley history? What depth does a 17 story "dorm" bring to downtown?

The Shattuck Cinemas were demolished and now a vacant hole sits in the middle of our main thoroughfare. What if the same thing happens with the UA property?

We hear the drumbeat to build more housing! There are other places where that building could be built on Shattuck that are centrally located, near transportation and the University.

Once the UA is gone, such a building will never again be built in Berkeley. What a loss for current and future generations.

Sincerely,
Arlene Oweichik

RE: 2274 Shattuck Avenue – Appeal ZAB Decision Use Permit #ZP2023-0079

Dear Appellant:

This will acknowledge receipt of your appeal of the Zoning Adjustments Board decision of December 12, 2024, approving the following permits:

A. Zoning Permits Required:
   - Use Permit under BMC Section 23.326.070(A) to demolish a non-residential building
   - Use Permit under BMC Section 23.204.020(A) to construct a new mixed-use residential development
   - Use Permit under BMC Section 23.204.020(A) to construct dwelling units
   - Use Permit under BMC Section 23.204.030(B)(1) to create new floor area of 10,000 square feet or more
   - Use Permit under BMC Section 23.204.130(E)(1) to exceed the maximum building height limit, up to 75 feet (plus 5-foot parapet, by right)
   - Use Permit under BMC Section 23.04.130(E)(3)(b) to modify front and side setback requirements
   - Administrative Use Permit under BMC Section 23.304.050(A) to exceed building height limits with rooftop architectural elements which exceed the maximum height limit for the district

B. Concessions and Waivers Requested Pursuant to State Density Bonus Law (California Government Code Section 65915):
   - Concession – none
   - Waiver of BMC Section 23.04.130(E)(1) to exceed building height limits – to be 183 feet to roof (plus 5-foot parapet, by right), where 75 feet is the limit (plus 5-foot parapet by right)
   - Waiver of BMC Section 23.204.130(E)(3)(b) to waive front and side setback minimums
   - Waiver of BMC Section 23.204.130(E)(3) to increase front setback maximum to 7- foot, 1 inch, where 5 feet maximum is required, at 0-20-foot building height

- Waiver of BMC Section 23.204.130(E)(3)(b)(i) to exceed 120 feet in width in diagonal measurement above 120 feet in height – to be 178 feet, 9 inches in width, where 120 feet is required
- Waiver of BMC Section 23.204.130(E)(4) to reduce the usable open space requirement – to provide 7,737 square feet, where 18,160 square feet is required
- Waiver of BMC Section 23.322.090(A) to provide 72 long term residential bicycle parking, where 210 is required

Your appeal has been referred to the Planning Department.

The Planning Department will transmit to Council a statement setting forth the reasons for the Zoning Adjustments Board decision. This report, as well as a copy of the appeal, will appear on the Council agenda of **April 22, 2025**.

This meeting of the Council will commence at 6:00 p.m. and will be held in the School District Board Room located at 1231 Addison Street. The meeting will be conducted in a hybrid model with both in-person attendance and virtual participation. Once posted, the agenda for this meeting will include a link for public participation using Zoom video technology, as well as any health and safety requirements for in-person attendance.

Pursuant to the City Council Rules of Procedure, this appeal will appear on the City Council's agenda as a public hearing. Time shall be provided for five-minute presentations each by the appellant and applicant. Where the appellant is not the applicant, the appellants collectively shall have five minutes to comment and the applicant shall have five minutes to comment. Where the appellant is the applicant, the applicant/appellant shall have five minutes to comment and the persons supporting the action of the board or commission on appeal shall have five minutes to comment.

After the conclusion of the five-minute comment periods, members of the public may comment on the appeal pursuant to the Rules of Procedure in effect for the Council meeting.

The Council will then deliberate and determine to do one of three things: 1) continue the public hearing; 2) based on the record of the Council's consideration and hearing, reverse or affirm, wholly or partly, or modify any decision, determination, condition or requirement of the Board's original action; or 3) remand the matter to the Board to reconsider the application, or any revisions thereto submitted after the Board's action.

Communications to the City Council that are received by the City Clerk pursuant to the following deadlines will be accepted and distributed as follows:

Submission Deadline	Distributed	Packet
April 9, 2025, by 5:00 p.m. (Wednesday)	Eight days before the meeting (Monday)	Agenda Packet
April 15, 2025, by 5:00 p.m. (Tuesday)	Five days before the meeting (Thursday)	Supplemental 1
April 21, 2025, 12:00 p.m. (Monday)	By 5:00 pm the day before the meeting (Monday)	Supplemental 2

Communications should be submitted directly to the City Clerk to ensure receipt by all Councilmembers. Electronic communications may be submitted to council@berkeleyca.gov for immediate distribution to the Mayor, each City Councilmember, and the City Clerk for inclusion in the official record. Please note that for communications submitted in hardcopy, if the communication includes maps or photos or any other material not reproducible on a copy machine, fifteen copies should be provided to the City Clerk.

Please note that Berkeley's Lobbyist Registration Act (Berkeley Municipal Code Chapter 2.09) is effective beginning on January 1, 2020. Information and resources regarding the Lobbyist Registration Act are available from the City's website at: https://berkeleyca.gov/your-government/lobbyist-registration

If you have any additional questions regarding this matter, please do not hesitate to contact me at (510) 981-6908.

A copy of the staff report and a City Council agenda will be available from this office upon request after 4:00 p.m. on Monday, April 14, 2025 or can be viewed on our website at: https://berkeleyca.gov/your-government/city-council/city-council-agendas.

Sincerely,

Mark Numainville
City Clerk

Subject: 2274 Shattuck: Seeking your conclusions about the Rincon Consultants peer reviews you commissioned

WARNING: This is not a City of Berkeley email. Do not click links or attachments unless you trust the sender and know the content is safe.

Hi Ms. Brown and Ms. Gong -

I would like to request your explanation of why you granted the 2274 Shattuck Avenue project an Urban Infill exemption despite the fact that per California Public Resources Code 21084(e), it clearly states that sites that are on the the California Register of Historical Resources shall not be granted any categorical exemptions whatsoever if a project will cause a "substantial adverse change to the significance of an historical resource".

You commissioned two peer reviews of Panoramic Interests' historical resource analysis. These peer reviews were done over the summer by Rincon Consultants, and - despite our groups' requests - they were not provided to the public until after you issued your CEQA exemption in early October (both reports attached).

To refresh your memory, here were their conclusions:

June 21, 2024:
"In summary, the HRE Memorandum provides useful updated information on the current condition of the building and additional information on the building's alterations. It is recommended that that information be provided on DPR Continuation Sheets and submitted to the NWIC to update the current record, as recommended by OHP guidance. The updated evaluation provided, however, was not necessary to determine if the building is a historical resource pursuant to CEQA since the building is listed in the CRHR. The 2274 Shattuck Avenue Project Impacts Analysis generally follows the best practices and industry-accepted guidance for the impacts analysis reporting. However, the analysis discussion is limited to the portion of the building which was recently identified as City of Berkeley Landmark. The building's historical status, however, is established by its listing in the CRHR, which applies to the whole building. It is recommended, therefore, that the analysis provided in 2274 Shattuck Avenue Project Impacts Analysis be revised to include a discussion of the project's impacts to the historical resource."

August 2, 2024:
"As detailed above, several elements of the proposed project are not consistent with the Secretary of the Interior's Standards for Rehabilitation. Although the alteration of the character-defining features should typically be avoided, their alteration does not automatically amount to a substantial adverse

change causing material impairment. Pursuant to Section 15064.5(b) of the CEQA Guidelines, material impairment of a historical resource occurs when a property is altered such that it is no longer able to convey its historical significance. The proposed project would result in material impairment. Though several aspects of its distinctive Art Deco design are proposed to be retained, the proposed demolition of the former theater auditorium would result in loss of integrity of design, materials, workmanship, feeling and association. It would no longer reflect its historic significance for its role in the Depression-era development of Downtown Berkeley, specifically as a purpose-built entertainment venue for motion pictures. The proposed project would result in a substantial adverse change and it would no longer retain its architectural and historic identity for which it is significant, resulting in a significant and unavoidable impact to historical resources pursuant to CEQA."

Please provide me with an explanation of how you considered these conclusions yet decided otherwise in your CEQA decision. I would also like to request to hear your legal basis for providing an Urban Infill categorical exemption, despite this being on the California Register of Historic Resources.

Lastly, I would like to know why the Rincon Consultants peer reviews were withheld from the ZAB and the public before their December 12th meeting. All we could find is in the staff report for ZAB, there were sentences on pages 17 and 34 that went along the lines of: ""All technical reports were peer reviewed by a CEQA consultant, and were revised or supplemented for adequacy."

Please explain. One of our colleagues was forced to provide print-outs of both peer reviews to each ZAB member right before the meeting. They had not seen these reports.

Subject: 2274 Shattuck Avenue HRE and Project Impact Analysis Peer Review

Dear Ms. Gong:

The City of Berkeley (City) retained Rincon Consultants, Inc. (Rincon) to conduct a peer review of the Historic Resources Evaluation (HRE) memorandum prepared for 2274 Shattuck Avenue by Left Coat Architectural History (December 2023) and the report titled *2274 Shattuck Avenue Project Impacts Analysis* prepared by Left Coast Architectural History (March 2024). The peer review presented below assesses reporting accuracy and adequacy relative to the field and research methods and evaluation results using industry-accepted best practice and guidance provide by the National Park Service (NPS) and the California Office of Historic Preservation (OHP). The peer review was limited to the HRE memorandum and the impacts analysis report and did not involve field work, recordation, or reevaluation of any resources. We understand that the purpose of the peer review is to support the California Environmental Quality Act (CEQA) environmental review process for a proposed 17-story mixed-use commercial and residential development.

Rincon Architectural Historian JulieAnn Murphy, MSHP, conducted the peer review, with oversight by Cultural Resources Director Steven Treffers. Both Ms. Murphy and Mr. Treffers meet the Secretary of the Interior's Professional Qualification Standards for architectural history and history (36 CFR Part 61).

Summary of Previous Reports

HRE Memorandum

In December 2023, Caitlin Hibma of Left Coast Architectural History prepared an evaluation of the building at 2274 Shattuck Avenue (APN 57-208-3). The evaluation was completed for the project applicant, who proposes to redevelop the property with a 17-story mixed-use commercial and residential development that would include retaining the building façade and the lobby portion of the building. Hibma meets the Secretary of the Interior's Professional Qualification Standards for architectural history.

The evaluation noted that 2274 is a two-to-four-story commercial building constructed in 1932 for use as a United Artists movie theater, and was designed by Walker & Eisen Architects with Clifford A. Balch. Hibma outlined that the building was the subject of three previous evaluations – a 1978 survey that produced a Historic Resource Inventory Form (precursor to the current form) and resulted in the assignment of a "3" National Register Status Code, suggesting eligibility for listing in the National Register of Historic Places (NRHP); a 2005 updated Department of Parks and Recreation (DPR) Series 523 Form prepared as part of a Section 106 review of the National Historic Preservation Act that determined the property was eligible for listing in the NRHP under Criteria A and C and resulted in a

2S2 status code, indicating NRHP eligibility and listing in the CRHR; and a 2015 evaluation as part of the potential Shattuck Avenue Commercial Corridor Historic Context Survey which affirmed the 2S2 status code and further recommended the building as a contributor to the establishment of the potential Shattuck Avenue Commercial Corridor Historic District.

The HRE then asserted that the previous evaluations did not comprehensively analyze the present condition of the building under the current professional standards and are, therefore, inadequate for CEQA determinations and for local planning decisions. It then provided an updated evaluation, finding that it did appear architecturally significant under CRHR Criterion 3 for its Art Deco design, but that it no longer retains sufficient integrity to support listing. It was also recommended ineligible for listing as a City of Berkeley Landmark and as a City of Berkeley Structure of Merit for a lack of historical and architectural significance. The HRE does not make any conclusions regarding the property's previously identified status as a contributor to the Shattuck Avenue Commercial Corridor Historic District.

2274 Shattuck Avenue Project Impacts Analysis

In March 2024, Caitlin Hibma of Left Coast Architectural History prepared a memorandum report to assess the impact of the redevelopment project on historical resources. Though Hibma previously recommended the property ineligible as a historical resource due, in part, to diminished integrity, the property is listed in the CRHR and is an identified contributor to the potential Shattuck Avenue Commercial Corridor Historic District. Additionally, the Berkeley Landmark Preservation Commission (LPC) subsequently approved a City of Berkeley Landmark application in February 2024. The provisions of the Landmark only extend to the upper Shattuck Avenue façade, above the exiting non-historic marquee.[1]

The analysis considers the project's compliance with Secretary of the Interior's Standards for Rehabilitation (Standards), the Berkeley LPC's permit application review standards, and the Berkeley Downtown Design Guidelines. The memorandum outlines the current historical status; provides a list of the character-defining features of the building according to the Landmark designation; a review of the proposed project; a Standards analysis; a Berkeley Municipal Code compliance analysis; and a Downtown Berkeley Design Guidelines compliance analysis. The proposed project was concluded to be compliant with Standards 1 through 10. It was also resolved to be compliant with the applicable provisions of the Berkeley Municipal Code and consistent with the relevant Downtown Berkeley Design Guidelines. The memorandum report concludes that the proposed project would not result in an impact to a historical resource pursuant to CEQA.

Peer Review

HRE Memorandum

The HRE memorandum generally follows the accepted standard format of historical resource evaluation reporting guidelines and includes an introduction, executive summary, methodology, regulatory context, a review of previous evaluations, and evaluative findings. The information summarized in the architectural descriptions reflected the site's existing conditions, including a comprehensive list of alterations, at their time of recordation, accurately.

[1] The City of Berkeley Landmark application was forwarded to the Berkeley City Council for notice of decision on March 19, 2024. The building's Landmark status does not extend to the current project application because it predated the Landmark designation.

As stated in the HRE memorandum, it is an update to previous survey and evaluation efforts. It accurately outlines the previous findings noting it was found eligible for listing in the NRHP in 1978; its eligibility was affirmed in 2004 and was subsequently listed in the CRHR by consensus through the Section 106 process; and it was further identified as a contributor to the potential Shattuck Avenue Commercial Corridor Historic District in 2015.

As outlined by the Office of Historic Preservation (OHP) in *Instructions for Recording Historical Resources*, it is important to update information about historical resources to ensure accuracy. The HRE memorandum argues that an update was necessary because the past documentation and evaluations relied on the 1978 documentation, which does not accurately describe alterations and was not completed according to current evaluation standards. OHP guidance provides that updates "may amplify or correct information about a resource, or simply confirm that the existing record remains accurate at the time of a subsequent field examination" (OHP 1995). It further instructs that documentation for historical resources should be updated under the following conditions:

- When it is reevaluated;
- When changes occur to the resource or its setting;
- When erroneous information needs correcting; and/or
- When additional information is necessary for planning decisions.

The effort to update the historical resource record with accurate information is generally consistent with OHP guidance. The HRE memorandum continues, providing a detailed description of the existing conditions, and includes a comprehensive list of the alterations that have occurred since it was constructed, augmenting and correcting missing information in the original and subsequent records. It then continues to include an updated evaluation for its inclusion in the NRHP, CRHR, City of Berkeley Landmark, and City of Berkeley Structure of Merit.

It recommended the building ineligible for listing in the NRHP or CRHR under Criterion A/1, B/2, and D/4. It further argues that because the Art Deco theater building is a well-represented type and style locally and nationally, is modest in comparison to other theaters locally and nationally, and it has lost its integrity that it is not eligible for listing in the NRHP under Criterion C for its architecture. It continues that it did appear eligible for listing in the CRHR as originally constructed, but that alterations have resulted in loss of integrity necessary for listing and it is therefore ineligible for listing in the CRHR under Criterion 3. It finds that the property is also not eligible for listing as City of Berkeley Landmark or as a Structure of Merit for lack of historical significance and for a lack of architectural significance due, in part, to the changes that have occurred to the building resulting in the removal of original features and design elements.

Though updating the historical resource record is consistent with OHP guidance, a reevaluation for eligibility for listing in the CRHR, in this case, was not necessary because the property is already listed in the CRHR and is considered a historical resource as defined in PRC Section 5024.1(g) and is, therefore, a historical resource under CEQA. The property was listed in the CRHR in 2005 through a consensus determination, meaning that the determination was arrived at through an agreement between the federal lead agency and OHP. Changes outlined in the HRE memorandum that have occurred since its listing in 2006 are relatively minor and are limited to interior updates. Its overall appearance and condition, based on photographs provided in the DPR form which helped to inform OHP's determination of eligibility, has remained largely unchanged since it was listed in 2006. The HRE memorandum's conclusion that the property is not a historical resource, therefore, not supported.

The update does provide additional and current information about the building, but it was not recorded on a DPR Form. Per OHP instructions, the updated physical description, current photographs, and

additional alteration information should be recorded on a DPR Continuation Sheet (DPR L) and submitted to the Northwest Information Center (NWIC) to be added to the property's existing record in the California Historical Resources Information Center (CHRIS).

2274 Shattuck Avenue Project Impacts Analysis

The project impact analysis report generally follows the accepted format for an impact analysis and provides an introduction and methodology section, a review of existing designations, a list of character-defining features, a description of the proposed project, and an analysis of the proposed project. The analysis provides the regulatory context including the definitions of substantial adverse change and material impairment provided in Section 15064.5 of the CEQA Guidelines and accurately provides that, per the Guidelines, a project that follows the Secretary of the Interior's Standards for the Treatment of Historic Properties shall be considered as mitigated to a level of less than significant on the historical resource. It then continues to provide an in-depth discussion of the project's conformance with the Secretary of the Interior's Standards for Rehabilitation (Standards), which were identified as the most applicable of the four treatment standards.

The subsequent discussion of the project's compliance with the Standards includes a Standard-by-Standard review of the proposed project, asserting that the project will successfully meet all ten of the Standards. As described, however, the project proposes demolition of more than half of the building. Demolition is not a rehabilitation treatment and is generally only acceptable as part of rehabilitation to remove non-historic additions or material. The analysis provided erroneously relies on the presumption that the only portions of the building that are historic are limited to what was identified in the March 2024 City of Berkeley Landmark nomination, which includes only the upper portion of the Shattuck Avenue façade, above the non-historic marquee. The building's current status, however, and its reason for being a historical resource pursuant to CEQA, is tied to its listing in the CRHR, which extends to the whole building. As clarified in *National Register Bulletin 15:-How to Apply the National Register Criteria for Evaluation,* for which the CRHR is based, "parts of buildings, such as interiors, facades, or wings are not eligible independent of the rest of the existing building" (NPS 1997). The Standards analysis, therefore, cannot disqualify the proposed treatment of the rear portion of the building.

Compliance with the Standards, however, is not the only way to demonstrate that a project would avoid causing a substantial adverse change in the significance of a historical resource. The argument provided would be strengthened by acknowledging the aspects of the project that are not Standards-compliant and would benefit from being reframed to analyze if the proposed changes to 2274 Shattuck Avenue amount to substantial adverse change. The project impacts discussion is recommended to be revised and analyzed to consider if the changes proposed to the historical resource (the whole building) would result in material impairment as defined in Section 15064.5 (b)(2)(A) of the CEQA Guidelines.

The analysis continues to a discussion of the proposed project's conformity with the Berkeley Municipal Code provisions for the treatment of historic resources, noting that they do not apply to the current application because it is an SB330 application, and that the analysis is provided as an informative item. The analysis provides a clear discussion of the impact of the project as it relates to the Landmark designation, which only applies to the upper portion of the Shattuck Avenue elevation. The discussion of the impact of the project to the potential Shattuck Avenue Commercial Corridor Historic District, provides a thorough discussion of the impact of the project to the district as it relates to the portion of the building which is included in the Landmark designation. Similar to the Standards analysis, however, there is nothing in the district record to suggest that the whole building is not included as a contributor to the district. It is recommended that the analysis, if required for the project

application, be updated to acknowledge the demolition of a portion of the building and any potential impact to the building as a contributor to the proposed district.

Finally, the analysis continues to a discussion of the proposed project's conformance with the Downtown Berkeley Design Guidelines. Similar to the Berkeley Municipal Code provisions for the treatment of historic resources, the design standards are noted as not applicable because the project is pursuing a SB330 application. The discussion provides a thorough and robust analysis of the relevant guidelines as it relates to the portion of the building included in the Landmark designation. The whole building was previously identified as being subject to the Downtown Berkeley Design Guidelines. As such, it is recommended that, if a requirement of the project application, that the discussion be updated to include all the applicable guidelines as outlined in the "Procedures" portion of the guidelines, including those that discuss roof forms, site design, and special sites, buildings, and subareas in order to adequately address the proposed project's conformance with the Downtown Berkeley Design Guidelines.

Conclusion

In summary, the HRE Memorandum provides useful updated information on the current condition of the building and additional information on the building's alterations. It is recommended that that information be provided on DPR Continuation Sheets and submitted to the NWIC to update the current record, as recommended by OHP guidance. The updated evaluation provided, however, was not necessary to determine if the building is a historical resource pursuant to CEQA since the building is listed in the CRHR. The *2274 Shattuck Avenue Project Impacts Analysis* generally follows the best practices and industry-accepted guidance for the impacts analysis reporting. However, the analysis discussion is limited to the portion of the building which was recently identified as City of Berkeley Landmark. The building's historical status, however, is established by its listing in the CRHR, which applies to the whole building. It is recommended, therefore, that the analysis provided in *2274 Shattuck Avenue Project Impacts Analysis* be revised to include a discussion of the project's impacts to the historical resource.

Should you have any questions regarding this memorandum, please do not hesitate to contact me at 510-834-4455 or jmurphy@rinconconsultants.com.

Sincerely,
Rincon Consultants, Inc.

Subject: 2274 Shattuck Avenue Project Impact Analysis
2274 Shattuck Avenue, Berkeley, California 94704

Dear Ms. Gong:

Rincon Consultants, Inc. (Rincon) was retained by the City of Berkeley (City) to conduct a historical resources impacts assessment for a proposed project at 2274 Shattuck Avenue, also known as the United Artists Theater, in Berkeley, California. The proposed project includes demolition of most of the former theater building for construction of a 17-story mixed-use commercial and residential building with 227 units. The building was previously determined eligible for listing in the National Register of Historic Places (NRHP) and is listed in the California Register of Historical Resources (CRHR). It has also been identified as a contributing building to the potential City of Berkeley Shattuck Avenue Commercial Corridor Historic District. As a result of its eligibility for the NRHP and listing in the CRHR, the subject property is a qualifying historical resource pursuant to the California Environmental Quality Act (CEQA) and as defined by Section 15064.5 of the CEQA Guidelines.

The current assessment was prepared to determine if the project conforms with the Secretary of the Interior's Standards for Rehabilitation (Standards) and would result in an impact to a historical resource.[1] Pursuant to Section 15064.5(b)(3) of the CEQA Guidelines, a project that is found to comply with the Standards generally mitigates impacts to a historical resources to a less than significant level. Methods for the current assessment included a review of project plans and relevant historic documentation and preparation of this memorandum to present the results.

The impacts assessment was conducted by Architectural Historian Project Manager JulieAnn Murphy with oversight from Cultural Resources Director Steven Treffers, both of whom meet the Secretary of the Interior's Professional Qualification Standards (PQS) for architectural history and history (36 CFR Part 61). With over 10 years of experience in historic preservation, Ms. Murphy has extensive experience with CEQA compliance reviews and historical resources assessments.

Project Description

The proposed project includes demolition of the theater portion of the 1932 United Artists building that fronts Bancroft Way and construction of a 17-story mixed-use building with 227 dwelling units (Figure 1). The residential tower portion of the building would have a stucco exterior finish with recessed aluminum windows, metal fin details, and metal spandrels. The top story would have a roof

[1] Kay Weeks and Anne Grimmer, *The Secretary of the Interior's Standards for the Treatment of Historic Properties with Guidelines for Preserving, Rehabilitating, Restoring, and Reconstructing Historic Buildings*. National Park Service, Washington, D.C., 2017.

deck with a glass railing. The Bancroft elevation would have a secondary residential entrance as well as a vehicular entrance for an accessible parking spot (Figure 2).

The one-story, double-volume portion of the building that formerly served as the theater entry on Shattuck Avenue would be partially retained. The existing storefront entry would be reconfigured for two entries – one to the residential tower offices and lobby and one for a proposed ground floor café. The existing marquee would be removed and replaced with a new awning with a simple, painted stucco finish. The bas relief details of the Art Deco façade above the marquee would be painted, while the rest of the façade would be finished in white stucco. A new vertical dimensional letter sign would be installed at the center of the decorative elevation (Figure 3).

Figure 2 Proposed Bancroft Way Elevation

Figure 3 Proposed Primary Elevation Changes

Standards for Rehabilitation

CEQA Section 21084.1 requires a lead agency to determine whether a project may have a significant effect on the environment, which includes historical resources. Impacts to a historical resource occur when there is a substantial adverse change in the significance of a resource such that it is materially impaired. Material impairment is defined as demolition or alteration "in an adverse manner [of] those characteristics of an historical resource that convey its historical significance and that justify its inclusion in, or eligibility for inclusion in, the [CRHR]." Under Section 10564.5(b)(3) of the CEQA Guidelines, a project that is found to conform with the Secretary's Standards is generally found to not result in significant impacts to historical resources under CEQA.

The Secretary's Standards make broad-brush recommendations for maintaining, repairing, and replacing historic materials, as well as designing new additions or making alterations. They cannot, in and of themselves, be used to make essential decisions about which features of a historic property should be saved and which might be changed. Rather, they provide philosophical consistency to the work. There are Secretary's Standards for four distinct, but interrelated, approaches to the treatment of historic properties: preservation, rehabilitation, restoration, and reconstruction.

The Secretary's Rehabilitation Standards are the most applicable treatment and have been utilized in the review of the current project. The Secretary's Standards for Rehabilitation state:

1. A property will be used as it was historically or be given a new use that requires minimal change to its distinctive materials, features, spaces, and spatial relationships.
2. The historic character of a property will be retained and preserved. The removal of distinctive materials or alteration of features, spaces, and spatial relationships that characterize a property will be avoided.
3. Each property will be recognized as a physical record of its time, place, and use. Changes that create a false sense of historical development, such as adding conjectural features or elements from other historic properties, will not be undertaken.
4. Changes to a property that have acquired historic significance in their own right will be retained and preserved.
5. Distinctive materials, features, finishes, and construction techniques or examples of craftsmanship that characterize a property will be preserved.
6. Deteriorated historic features will be repaired rather than replaced. Where the severity of deterioration requires replacement of a distinctive feature, the new feature will match the old in design, color, texture, and, where possible, materials. Replacement of missing features will be substantiated by documentary and physical evidence.
7. Chemical or physical treatments, if appropriate, will be undertaken using the gentlest means possible. Treatments that cause damage to historic materials will not be used.
8. Archeological resources will be protected and preserved in place. If such resources must be disturbed, mitigation measures will be undertaken.
9. New additions, exterior alterations, or related new construction will not destroy historic materials, features, and spatial relationships that characterize the property. The new work shall be differentiated from the old and will be compatible with the historic materials, features, size, scale and proportion, and massing to protect the integrity of the property and its environment.

10. New additions and adjacent or related new construction will be undertaken in such a manner that, if removed in the future, the essential form and integrity of the historic property and its environment would be unimpaired.

Historical Resources Status

In 1978, Historic Resources Inventory documentation prepared by Betty Marvin of Berkeley Architectural Heritage Association recommended 2274 Shattuck Avenue, also known as United Artists Theaters, eligible for listing in the NRHP. It was assigned a National Register Status Code (now known as California Historical Resource Status Code) "3" indicating it appeared eligible for listing in the NRHP.

In 2004-2005, the property was evaluated for the Alameda-Contra Costa County Transit East Bay Rapid Transit Project by JRP Historical Consulting and was documented on a DPR 523 Continuation Sheet. It was field checked and noted that, "it does not appear to have undergone any alteration that would warrant a change in its National Register status code." It was assigned a California Historical Resource Status Code "3S," which indicates it appears eligible for NRHP individually through survey evaluation. A subsequent Finding of Effect documentation prepared for the project as part of the Section 106 process summarized that the building was significant under Criterion A as a locally operated movie theater and Criterion C for its Art Deco architecture. As a result of this project, the building was designated in the CRHR on March 15, 2006.

In 2015, the property was evaluated as part of the Shattuck Avenue Commercial Corridor Historic Context and Survey by Archives & Architecture and was recorded on a full set of DPR 523 forms. Its evaluation found that it was historically significant to important development patterns in the downtown core and for its Art Deco architecture. It was assigned a California Historical Resource Code of "2S2" indicating it was individually determined eligible for the NRHP by consensus through Section 106 process and listed in the CRHR and "5B" indicating it is locally significant both individually and as a contributor to a multi-component resource, as part of the Shattuck Avenue Commercial Corridor Historic District. The local historic district has not been formally adopted by the City of Berkeley.

The building retains the same appearance documented and described in 2004-2005 to support its 2006 CRHR designation. There have been no visible alterations and no evidence to suggest that it would no longer be eligible for listing in the CRHR. As a result of its eligibility for the NRHP and listing in the CRHR, the subject property is a qualifying historical resource pursuant to the California Environmental Quality Act (CEQA) and as defined by Section 15064.5 of the CEQA Guidelines.

Character Defining Features

The intent of the Standards is to provide for the long-term preservation of a property's significance through the preservation of its historic materials and features. These historic materials and features are commonly referred to as character-defining features and are indispensable in a historic property's ability to convey the reasons for its historical significance. To ensure a proposed project's compliance with the Standards, a historic property's character-defining features should therefore be identified and preserved as part of the final design.

According to Preservation Brief 17, *Architectural Character: Identifying the Visual Aspects of Historic Buildings as an Aid to Preserving Their Character*, there is a three-step process to identifying character-defining features.[2] Step 1 involves assessing the distinguishing physical aspects of the exterior of the

[2] Lee H. Nelson, *Architectural Character: Identifying the Visual Aspects of Historic Buildings as an Aid to Preserving Their Character*, Preservation Brief No. 17. U.S. Department of the Interior, National Park Service, Technical Preservation Services.

building as a whole, including its setting, shape and massing, orientation, roof and roof features, projections, and openings. Step 2 looks at the building more closely—at materials, trim, secondary features, and craftsmanship. Step 3 encompasses the interior, including individual spaces, relations or sequences of spaces (floor plan), surface finishes and materials, exposed structure, and interior.

The building was recommended eligible for inclusion in the NRHP and is listed in the CRHR. Its historical significance derives from its role in the Depression-era development of Downtown Berkeley, specifically as a purpose-built entertainment venue for motion pictures and for its distinctive Art Deco design. No period of significance was identified when the building was added to the CRHR in 2006. The 2015 evaluation prepared for the Shattuck Avenue Commercial Corridor Historic District identified the building's period of significance as 1932, beginning with the building's date of constriction, and ending in 1958 to coincide with the proposed District's end of period of significance. This study recommends the period of significance from 1932, when the building was originally constructed, until 1973, when the original single-screen theater was subdivided for multiple screens, resulting in several functional and aesthetic changes to the building.

The building's character-defining features include the following:

- Irregular lot shape
- Two-part massing with theater entrance portion and theater auditorium portion
- Sheer form concrete wall with vertical speed stripes along Bancroft Way
- Recessed main entry with original tile floor
- Stepped Art Deco upper façade with tower plume on Shattuck Avenue
- Bas relief detailing of "Artistry" and "Unity" on upper façade

Project Impacts Analysis

The proposed project includes substantial demolition of the building for the construction of a 17-story residential tower to house 227 dwelling units. As detailed above, other changes include updating the one-story, double volume theater entry portion of the building for a café and residential lobby and offices at the interior and retaining and updating the Art Deco exterior. The following presents a Standards and impacts analysis of the proposed project.

Rehabilitation Standard No. 1

A property shall be used for its historic purpose or be placed in a new use that requires minimal change to the defining characteristics of the building and its site and environment.

The proposed project includes demolition of the former theater auditorium portion of the building to accommodate the construction of a 17-story residential building. Though the introduction of residential use in a former commercial building is generally compatible with Standard No. 1, the proposed demolition of approximately 75 percent of the building requires more than minimal change and would interfere with the building's character-defining features. Demolition is not considered a rehabilitation treatment under the Standards and is generally only acceptable as part of rehabilitation to remove non-historic additions or material. The proposed project would result in the removal of the building's distinctive two-part massing as well as the sheer form concrete wall with vertical speed stripes along Bancroft Way. Rehabilitation Standard No. 1 is not satisfied.

Rehabilitation Standard No. 2
The historic character of a property shall be retained and preserved. The removal of historic materials or alteration of features and spaces that characterize a property shall be avoided.

The historic character of 2274 Shattuck Avenue is comprised of the physical characteristics that reflect its significance as a building that represents the development of Downtown Berkeley during the Great Depression and for its Art Deco design. The proposed project includes retaining and updating the Shattuck Avenue elevation. The proposed work includes removing the non-historic storefront system (installed in 1989, after the period of significance) for new entries and removal of the non-historic marquee (installed in 1974, after the period of significance). It also includes retaining the character-defining Art Deco detailing, like the bas relief artwork and is consistent with Standard No. 2.

Constructed as a purpose-built entertainment venue for motion pictures, one of the essential spaces that characterizes the property is its theater auditorium. Its proposed removal is not consistent with the guidance and Rehabilitation Standard No. 2 is not satisfied.

Rehabilitation Standard No. 3
Each property shall be recognized as a physical record of its time, place, and use. Changes that create a false sense of historical development, such as adding conjectural features or architectural elements from other buildings, will not be undertaken.

The proposed project does not include the addition of conjectural features or architectural elements from other buildings. Rehabilitation Standard No. 3 is not applicable.

Rehabilitation Standard No. 4
Most properties change over time; those changes that have acquired historic significance in their own right shall be retained and preserved.

The marquee was installed in 1974, and though outside the building's period of significance, is 50 years old, the age when resources are generally accepted as historic-age. Unlike the original marquee which it replaced, the existing marquee is a mass-produced installment and does not appear to have been manufactured specifically for this building. Furthermore, it has been updated several times since its installation with additional panels and lighting. The building is significant for its role in the role in the Depression-era development of Downtown Berkeley and for its distinctive Art Deco design. The marquee is not related to either significant theme. Its proposed removal is compliant with Rehabilitation Standard No. 4.

Rehabilitation Standard No. 5
Distinctive features, finishes, and construction techniques or examples of craftsmanship that characterize a historic property shall be preserved.

As described above, many of the building's distinctive features are related to its Art Deco design. The proposed retention and rehabilitation of the Shattuck Avenue elevation is consistent with Rehabilitation Standard No. 5.

Other distinctive features, however, are related to its historic use as a movie theater. The proposed demolition that will result in the loss of the theater auditorium will result in the loss of a distinctive feature that characterizes the property and conveys its historical and architectural significance. It will also result in the loss of the form concrete wall, which demonstrates the building's construction. Rehabilitation Standard No. 5 is not met.

Rehabilitation Standard No. 6
Deteriorated historic features shall be repaired rather than replaced. Where the severity of

deterioration requires replacement of a distinctive feature, the new feature shall match the old in design, color, texture, and other visual qualities and, where possible, materials. Replacement of missing features shall be substantiated by documentary, physical, or pictorial evidence.

The proposed scope of work includes removal of existing, non-historic features like the marque, exterior cladding, and storefront system. The presence and/or condition of historic features beneath existing features is unknown. The exact treatment and approach for these project elements has not yet been determined, but could conceptually be in accordance with Rehabilitation Standard No. 6 if completed by qualified professionals and in accordance with National Park Service (NPS) guidance.

Rehabilitation Standard No. 7
Chemical or physical treatments, such as sandblasting, that cause damage to historic materials shall not be used. The surface cleaning of structures, if appropriate, shall be undertaken using the gentlest means possible.

The proposed scope of work includes removing existing paint finish on the Shattuck Avenue elevation for a new, white painted finish. Plan documents note that work will be undertaken "via approved methods that do not damage the existing stucco". Information for this analysis did not include additional details on the proposed method. This work could conceptually be in accordance with Rehabilitation Standard No. 7 if completed by qualified professionals and in accordance with National Park Service (NPS) guidance.

Rehabilitation Standard No. 8
Significant archeological resources affected by a project shall be protected and preserved. If such resources must be disturbed, mitigation measures shall be undertaken.

Because the proposed project includes ground-disturbing activities, there is a chance of encountering archaeological resources. Provisions required by the California Environmental Quality Act (CEQA) would ensure that archaeological resources, if encountered, are treated appropriately. There is nothing to suggest that work cannot be completed in accordance with Rehabilitation Standard No. 8.

Rehabilitation Standard No. 9
New additions, exterior alterations, or related new construction shall not destroy historic materials that characterize the property. The new work shall be differentiated from the old and shall be compatible with the massing, size, scale, and architectural features to protect the historic integrity of the property and its environment.

As proposed, the project includes the demolition of the former theater auditorium for a 17-story residential building. As described above, demolition is not a rehabilitation treatment and is generally only acceptable as part of rehabilitation to remove non-historic additions or material under the Standards. The proposed demolition of the theater auditorium and its replacement with a new addition is not consistent with Rehabilitation Standard No. 9.

While the proposed new residential tower is consistent with the Standards in that it would be differentiated from the historic through the use of compatible, yet distinctive materials, it is not compatible with the massing, size, and scale of the historic building. Guidance from Preservation Brief 14, *New Exterior Additions to Historic Buildings: Preservation Concerns* explains that large additions to historic buildings are seldom found to be compatible.[3] Though the design is consistent with NPS

[3] Anne E. Grimmer and Kay D. Weeks. *New Exterior Additions to Historic Buildings: Preservation Concerns*, Preservation Brief No. 14. U.S. Department of the Interior, National Park Service, Technical Preservation Services.

guidance that suggests that new large additions can be successful if they read as a separate volume, as proposed here, the scale, massing, and proportions of the addition still need to be compatible with the historic building. A 17-story tower addition to a one-story, double volume building is not consistent with the existing scale, massing, and proportions. The proposed project is not consistent with Rehabilitation Standard No. 9.

Rehabilitation Standard No. 10
New additions and adjacent or related new construction will be undertaken in such a manner that if removed in the future, the essential form and integrity of the historic property and its environment would be unimpaired.

Because the proposed addition requires the demolition of a substantial portion of the building, the essential form and integrity of the historic property would be lost to accommodate the new addition. The proposed project is not consistent with Rehabilitation Standard No. 10.

Conclusions

As detailed above, several elements of the proposed project are not consistent with the Secretary of the Interior's Standards for Rehabilitation. Although the alteration of the character-defining features should typically be avoided, their alteration does not automatically amount to a substantial adverse change causing material impairment. Pursuant to Section 15064.5(b) of the CEQA Guidelines, material impairment of a historical resource occurs when a property is altered such that it is no longer able to convey its historical significance. The proposed project would result in material impairment. Though several aspects of its distinctive Art Deco design are proposed to be retained, the proposed demolition of the former theater auditorium would result in loss of integrity of design, materials, workmanship, feeling and association. It would no longer reflect its historic significance for its role in the Depression-era development of Downtown Berkeley, specifically as a purpose-built entertainment venue for motion pictures. The proposed project would result in a substantial adverse change and it would no longer retain its architectural and historic identity for which it is significant, resulting in a ***significant and unavoidable impact to historical resources*** pursuant to CEQA. Should you have any questions or comments regarding this report, please do not hesitate to contact me at 925-326-1159 or at jmurphy@rinconconsultants.com.

Subject: Stop the demolition of the historic UA theater

WARNING: This is not a City of Berkeley email. Do not click links or attachments unless you trust the sender and know the content is safe.

Dear Berkeley city staff, ZAB, and City Council,

I'm writing to demand that city staff, the Zoning Adjustments Board, and the City Council take action to prevent the destruction of the historic United Artists theater at 2274 Shattuck Ave. in downtown Berkeley. It is unacceptable to let a developer retain a fraction of the facade and lobby while tearing down the palatial four-story theater itself.

Built in 1932, the UA is on the California Register of Historical Resources, is National Register-eligible, and is also now a city landmark, thanks to an LPC decision earlier this year. Without a doubt, the building is a cultural and historical resource under the CEQA statute; the proposal to demolish it is a "substantial adverse change" requiring extensive CEQA review. The city must insist that all oversight laws and processes are followed and not give baseless exemptions to the developer.

Constructed during the Great Depression by Hollywood icons Charlie Chaplin and Mary Pickford, the UA Berkeley is arguably the finest theater ever built in the city and one of the few Art Deco movie palaces of its kind in the state that could be preserved. Despite being converted to a multiplex 50 years ago, the theater is resplendent with Art Deco architectural detail, decor, and furnishings; it has been relatively well-maintained over the decades, its historic features surviving various retrofits thanks to local preservationists who insisted the original auditorium be preserved behind false walls. The Historical Resource Evaluation on the UA, paid for by the developer, is not an honest and credible assessment; it would be unethical for city officials to consider this document the final word on the status of this landmark property.

The UA presents a tremendous opportunity for Berkeley. It has the potential to be restored as a glorious, midsize live performance venue like Oakland's Paramount, galvanizing an economic and cultural renaissance in the downtown. The many cities in the Bay Area and nationwide that have chosen to preserve their historic theaters never regret doing so. Another option is for the UA to remain a historic multiplex theater that serves a public eager to resume moviegoing after the pandemic. The future possibilities for this splendid building are numerous—but not if complacent city leaders allow a developer to level it into oblivion.

Berkeley citizens are watching with alarm as a mass extinction event for movie theaters unfolds: The Shattuck Cinemas has been freshly demolished while the beloved art deco California and the most valuable of them all, the UA, sit on the precipice of ruin. This all goes against the city's Downtown Area Plan, which was the product of over 200 public meetings and explicitly calls for the retention and support of downtown cinemas. This plan is still in effect.

Building more housing is no doubt vitally important, but it does not have to cost Berkeley one of its most magnificent landmark buildings in the UA. City officials must maintain control over land use decisions, fostering downtown development that maintains a mix of arts and culture and commerce alongside residential growth.

The UA Berkeley served as a community hub and entertainment venue for 91 years, and that tradition should continue. Its destruction would be an irreparable blow to the city's historic and cultural fabric that leaders must avoid at all costs.

Architecture is part of what makes a community, not more ticky tacky housing. Let the generations to come view that art AND function. can co-exist...should co-exist. Do not destroy this beauty, it is a treasure and should be treated as such.

Thank you for your consideration.

Commission Zoning Adjustments Board Berkeley,

I am writing to urge you to approve the proposed housing development at 2274 Shattuck, ASAP and with urgency.

Opponents have argued that this site should be preserved as a historic building, but there is no practical, safe, or affordable way for that to happen, as demonstrated by in-depth structural and historical analyses of the building. The interior of the building has been renovated extensively, such that it resembles a modern-day, utilitarian multiplex. Only the façade and lobby retain their original architectural features, and the developer has proposed restoring and preserving those features.

Despite an extreme overreach by staff that requested landmarking the entire structure, even the Landmarks Preservation Commission dialed back the preservation portion to cover only the façade and lobby, as the developer had proposed. The existing building is seismically unsound and poses a health and safety risk to the public, but the housing development proposed at the site could address these issues.

There is a way to honor the history of the theater while also building badly-needed housing, and this proposal aims to do just that.

This project will provide 227 affordable-by-design units which are suitable for students, young professionals, and families. The project also provides 23 very low-income affordable units. It will contribute more than $7M in Building Permit and Impact Fees to the City of Berkeley, and it will also contribute ~$2M annually to the property tax base.

It’s long past time for this project to break ground. Please support it so that we can move forward.

Sincerely,

Eric Johnson

Subject: Please approve housing development proposed for 2274 Shattuck

WARNING: This is not a City of Berkeley email. Do not click links or attachments unless you trust the sender and know the content is safe.

Commission Zoning Adjustments Board Berkeley,

I urge you to approve the proposed housing development at 2274 Shattuck without further delay.

While some have argued for preserving this site as a historic building, in-depth structural and historical analyses have demonstrated that this is neither practical nor affordable. The building's interior has been heavily renovated, leaving only the façade and lobby with original architectural significance. The developer's proposal appropriately honors this history by committing to restore and preserve these elements.

Even the Landmarks Preservation Commission, despite an initial overreach by staff recommending landmarking the entire structure, agreed to limit preservation efforts to the façade and lobby, aligning with the developer's plan. Importantly, the existing building is seismically unsound and poses public safety risks—issues this project will resolve.

This development will deliver 227 affordable-by-design housing units, including 23 designated for very low-income residents. It also offers substantial economic benefits, generating over $7 million in building permit and impact fees and approximately $2 million annually in property taxes for Berkeley.

The proposal strikes a balance between honoring the site's history and addressing Berkeley's critical housing needs. It is time to move this project forward to improve safety, housing availability, and the city's economic vitality.

Thank you for your consideration. Please support this vital project.

Sincerely,
Sarah Bell

Re: item #6 on 12/12 agenda (2274 Shattuck Ave.)
Include two attachments: June 21 and Aug. 2 reports from Rincon Consultants

Dec. 10, 2024

Dear members of the Berkeley Zoning Adjustments Board:

I'm urging you to follow state law and not vote to destroy the United Artists theater in downtown Berkeley, the magnificent art deco theater that closed in February 2023 after operating for 91 years. This palatial theater was built by Hollywood giants Charlie Chaplin and Mary Pickford; it's the last theater standing from the original United Artists chain that could be preserved.

I fear that your board will rubber-stamp approval of the housing project DESPITE ample evidence the theater is a "historical resource" under state law. At the start of this year, the city outlined CEQA review according to the facts, and it is now allowing the developer an end-run about this landmark California law with no apparent basis. Fearing lawsuits from developers doesn't justify not following the law.

From the Aug. 2 "peer review" report from Rincon Consultants, which strongly raises the question of whether the city is following the law in granting the categorical CEQA exemption under AB 1633:

"Though several aspects of its distinctive Art Deco design are proposed to be retained, the proposed demolition of the former theater auditorium would result in loss of integrity of design, materials, workmanship, feeling and association. It would no longer reflect its historic significance for its role in the Depression-era development of Downtown Berkeley, specifically as a purpose-built entertainment venue for motion pictures. The proposed project would result in a substantial adverse change and it would no longer retain its architectural and historic identity for which it is significant, resulting in a significant and unavoidable impact to historical resources pursuant to CEQA.

While building housing is important, the state housing fast-track laws passed since 2017 have swung the pendulum too far -- they have robbed cities of local control over planning and inhibit citizen input. But the city of Berkeley has also been part of the problem. This housing project has arrived on your agenda after months of actions by the city planning department that were nontransparent, underhanded, and arguably plain secretive. For instance, our group was told for months (in winter and spring) that the project was "on hold" when fact the developer had demanded the categorical CEQA exemption, showing the project was very much in the works. We were not told about the exemption request until months after it happened, even though we asked if such a thing had happened. It was not posted to the public records archive in a timely matter.

Also, May through October, our group was calling on the city to get a peer review evaluation of the developer's HRE. (Please note that hundreds of citizens sent letters saying the developer's biased HRE could not be considered the final say on the historic status of the theater.) We were not notified that two reports were obtained and that the reports' conclusions disagreed with the developer and supported the theater being a historical resource under CEQA. These reports weren't made public; they weren't posted in a timely manner to the city's records archive.

They were only made public in early October, AFTER the city decided to grant the developer the fateful categorical exemption to CEQA, ensuring, city officials say, your rubberstamp of the project.

So, something is majorly WRONG when a supposedly public board has no choice but to approve a major housing project that will result in the destruction of a landmark theater that is a historic resource under CEQA. Something is wrong when this is the first time the project has gone before ZAB, when this project has not been properly vetted before the public.

What do ZAB members think about their loss of power to shape planning? Are you a public board in name only? Even if you favor housing construction, why not speak out about this over-reach by the state?

People are watching as city officials like you preside over the loss of historic movie theaters and do nothing to invigorate a lifeless downtown. The city center can't be, as one LPC member quipped, just "a pile of bedrooms."

Sincerely,
Laura Linden

Subject: 2274 Shattuck Avenue Project Impact Analysis
2274 Shattuck Avenue, Berkeley, California 94704

Dear Ms. Gong:

Rincon Consultants, Inc. (Rincon) was retained by the City of Berkeley (City) to conduct a historical resources impacts assessment for a proposed project at 2274 Shattuck Avenue, also known as the United Artists Theater, in Berkeley, California. The proposed project includes demolition of most of the former theater building for construction of a 17-story mixed-use commercial and residential building with 227 units. The building was previously determined eligible for listing in the National Register of Historic Places (NRHP) and is listed in the California Register of Historical Resources (CRHR). It has also been identified as a contributing building to the potential City of Berkeley Shattuck Avenue Commercial Corridor Historic District. As a result of its eligibility for the NRHP and listing in the CRHR, the subject property is a qualifying historical resource pursuant to the California Environmental Quality Act (CEQA) and as defined by Section 15064.5 of the CEQA Guidelines.

The current assessment was prepared to determine if the project conforms with the Secretary of the Interior's Standards for Rehabilitation (Standards) and would result in an impact to a historical resource.[1] Pursuant to Section 15064.5(b)(3) of the CEQA Guidelines, a project that is found to comply with the Standards generally mitigates impacts to a historical resources to a less than significant level. Methods for the current assessment included a review of project plans and relevant historic documentation and preparation of this memorandum to present the results.

The impacts assessment was conducted by Architectural Historian Project Manager JulieAnn Murphy with oversight from Cultural Resources Director Steven Treffers, both of whom meet the Secretary of the Interior's Professional Qualification Standards (PQS) for architectural history and history (36 CFR Part 61). With over 10 years of experience in historic preservation, Ms. Murphy has extensive experience with CEQA compliance reviews and historical resources assessments.

Project Description

The proposed project includes demolition of the theater portion of the 1932 United Artists building that fronts Bancroft Way and construction of a 17-story mixed-use building with 227 dwelling units (Figure 1). The residential tower portion of the building would have a stucco exterior finish with recessed aluminum windows, metal fin details, and metal spandrels. The top story would have a roof

[1] Kay Weeks and Anne Grimmer, *The Secretary of the Interior's Standards for the Treatment of Historic Properties with Guidelines for Preserving, Rehabilitating, Restoring, and Reconstructing Historic Buildings*. National Park Service, Washington, D.C., 2017.

deck with a glass railing. The Bancroft elevation would have a secondary residential entrance as well as a vehicular entrance for an accessible parking spot (Figure 2).

The one-story, double-volume portion of the building that formerly served as the theater entry on Shattuck Avenue would be partially retained. The existing storefront entry would be reconfigured for two entries – one to the residential tower offices and lobby and one for a proposed ground floor café. The existing marquee would be removed and replaced with a new awning with a simple, painted stucco finish. The bas relief details of the Art Deco façade above the marquee would be painted, while the rest of the façade would be finished in white stucco. A new vertical dimensional letter sign would be installed at the center of the decorative elevation (Figure 3).

Figure 3 Proposed Primary Elevation Changes

Standards for Rehabilitation

CEQA Section 21084.1 requires a lead agency to determine whether a project may have a significant effect on the environment, which includes historical resources. Impacts to a historical resource occur when there is a substantial adverse change in the significance of a resource such that it is materially impaired. Material impairment is defined as demolition or alteration "in an adverse manner [of] those characteristics of an historical resource that convey its historical significance and that justify its inclusion in, or eligibility for inclusion in, the [CRHR]." Under Section 10564.5(b)(3) of the CEQA Guidelines, a project that is found to conform with the Secretary's Standards is generally found to not result in significant impacts to historical resources under CEQA.

The Secretary's Standards make broad-brush recommendations for maintaining, repairing, and replacing historic materials, as well as designing new additions or making alterations. They cannot, in and of themselves, be used to make essential decisions about which features of a historic property should be saved and which might be changed. Rather, they provide philosophical consistency to the work. There are Secretary's Standards for four distinct, but interrelated, approaches to the treatment of historic properties: preservation, rehabilitation, restoration, and reconstruction.

The Secretary's Rehabilitation Standards are the most applicable treatment and have been utilized in the review of the current project. The Secretary's Standards for Rehabilitation state:

1. A property will be used as it was historically or be given a new use that requires minimal change to its distinctive materials, features, spaces, and spatial relationships.
2. The historic character of a property will be retained and preserved. The removal of distinctive materials or alteration of features, spaces, and spatial relationships that characterize a property will be avoided.
3. Each property will be recognized as a physical record of its time, place, and use. Changes that create a false sense of historical development, such as adding conjectural features or elements from other historic properties, will not be undertaken.
4. Changes to a property that have acquired historic significance in their own right will be retained and preserved.
5. Distinctive materials, features, finishes, and construction techniques or examples of craftsmanship that characterize a property will be preserved.
6. Deteriorated historic features will be repaired rather than replaced. Where the severity of deterioration requires replacement of a distinctive feature, the new feature will match the old in design, color, texture, and, where possible, materials. Replacement of missing features will be substantiated by documentary and physical evidence.
7. Chemical or physical treatments, if appropriate, will be undertaken using the gentlest means possible. Treatments that cause damage to historic materials will not be used.
8. Archeological resources will be protected and preserved in place. If such resources must be disturbed, mitigation measures will be undertaken.
9. New additions, exterior alterations, or related new construction will not destroy historic materials, features, and spatial relationships that characterize the property. The new work shall be differentiated from the old and will be compatible with the historic materials, features, size, scale and proportion, and massing to protect the integrity of the property and its environment.

10. New additions and adjacent or related new construction will be undertaken in such a manner that, if removed in the future, the essential form and integrity of the historic property and its environment would be unimpaired.

Historical Resources Status

In 1978, Historic Resources Inventory documentation prepared by Betty Marvin of Berkeley Architectural Heritage Association recommended 2274 Shattuck Avenue, also known as United Artists Theaters, eligible for listing in the NRHP. It was assigned a National Register Status Code (now known as California Historical Resource Status Code) "3" indicating it appeared eligible for listing in the NRHP.

In 2004-2005, the property was evaluated for the Alameda-Contra Costa County Transit East Bay Rapid Transit Project by JRP Historical Consulting and was documented on a DPR 523 Continuation Sheet. It was field checked and noted that, "it does not appear to have undergone any alteration that would warrant a change in its National Register status code." It was assigned a California Historical Resource Status Code "3S," which indicates it appears eligible for NRHP individually through survey evaluation. A subsequent Finding of Effect documentation prepared for the project as part of the Section 106 process summarized that the building was significant under Criterion A as a locally operated movie theater and Criterion C for its Art Deco architecture. As a result of this project, the building was designated in the CRHR on March 15, 2006.

In 2015, the property was evaluated as part of the Shattuck Avenue Commercial Corridor Historic Context and Survey by Archives & Architecture and was recorded on a full set of DPR 523 forms. Its evaluation found that it was historically significant to important development patterns in the downtown core and for its Art Deco architecture. It was assigned a California Historical Resource Code of "2S2" indicating it was individually determined eligible for the NRHP by consensus through Section 106 process and listed in the CRHR and "5B" indicating it is locally significant both individually and as a contributor to a multi-component resource, as part of the Shattuck Avenue Commercial Corridor Historic District. The local historic district has not been formally adopted by the City of Berkeley.

The building retains the same appearance documented and described in 2004-2005 to support its 2006 CRHR designation. There have been no visible alterations and no evidence to suggest that it would no longer be eligible for listing in the CRHR. As a result of its eligibility for the NRHP and listing in the CRHR, the subject property is a qualifying historical resource pursuant to the California Environmental Quality Act (CEQA) and as defined by Section 15064.5 of the CEQA Guidelines.

Character Defining Features

The intent of the Standards is to provide for the long-term preservation of a property's significance through the preservation of its historic materials and features. These historic materials and features are commonly referred to as character-defining features and are indispensable in a historic property's ability to convey the reasons for its historical significance. To ensure a proposed project's compliance with the Standards, a historic property's character-defining features should therefore be identified and preserved as part of the final design.

According to Preservation Brief 17, *Architectural Character: Identifying the Visual Aspects of Historic Buildings as an Aid to Preserving Their Character*, there is a three-step process to identifying character-defining features.[2] Step 1 involves assessing the distinguishing physical aspects of the exterior of the

[2] Lee H. Nelson, *Architectural Character: Identifying the Visual Aspects of Historic Buildings as an Aid to Preserving Their Character*, Preservation Brief No. 17. U.S. Department of the Interior, National Park Service, Technical Preservation Services.

building as a whole, including its setting, shape and massing, orientation, roof and roof features, projections, and openings. Step 2 looks at the building more closely—at materials, trim, secondary features, and craftsmanship. Step 3 encompasses the interior, including individual spaces, relations or sequences of spaces (floor plan), surface finishes and materials, exposed structure, and interior.

The building was recommended eligible for inclusion in the NRHP and is listed in the CRHR. Its historical significance derives from its role in the Depression-era development of Downtown Berkeley, specifically as a purpose-built entertainment venue for motion pictures and for its distinctive Art Deco design. No period of significance was identified when the building was added to the CRHR in 2006. The 2015 evaluation prepared for the Shattuck Avenue Commercial Corridor Historic District identified the building's period of significance as 1932, beginning with the building's date of constriction, and ending in 1958 to coincide with the proposed District's end of period of significance. This study recommends the period of significance from 1932, when the building was originally constructed, until 1973, when the original single-screen theater was subdivided for multiple screens, resulting in several functional and aesthetic changes to the building.

The building's character-defining features include the following:

- Irregular lot shape
- Two-part massing with theater entrance portion and theater auditorium portion
- Sheer form concrete wall with vertical speed stripes along Bancroft Way
- Recessed main entry with original tile floor
- Stepped Art Deco upper façade with tower plume on Shattuck Avenue
- Bas relief detailing of "Artistry" and "Unity" on upper façade

Project Impacts Analysis

The proposed project includes substantial demolition of the building for the construction of a 17-story residential tower to house 227 dwelling units. As detailed above, other changes include updating the one-story, double volume theater entry portion of the building for a café and residential lobby and offices at the interior and retaining and updating the Art Deco exterior. The following presents a Standards and impacts analysis of the proposed project.

Rehabilitation Standard No. 1

A property shall be used for its historic purpose or be placed in a new use that requires minimal change to the defining characteristics of the building and its site and environment.

The proposed project includes demolition of the former theater auditorium portion of the building to accommodate the construction of a 17-story residential building. Though the introduction of residential use in a former commercial building is generally compatible with Standard No. 1, the proposed demolition of approximately 75 percent of the building requires more than minimal change and would interfere with the building's character-defining features. Demolition is not considered a rehabilitation treatment under the Standards and is generally only acceptable as part of rehabilitation to remove non-historic additions or material. The proposed project would result in the removal of the building's distinctive two-part massing as well as the sheer form concrete wall with vertical speed stripes along Bancroft Way. Rehabilitation Standard No. 1 is not satisfied.

Rehabilitation Standard No. 2
The historic character of a property shall be retained and preserved. The removal of historic materials or alteration of features and spaces that characterize a property shall be avoided.

The historic character of 2274 Shattuck Avenue is comprised of the physical characteristics that reflect its significance as a building that represents the development of Downtown Berkeley during the Great Depression and for its Art Deco design. The proposed project includes retaining and updating the Shattuck Avenue elevation. The proposed work includes removing the non-historic storefront system (installed in 1989, after the period of significance) for new entries and removal of the non-historic marquee (installed in 1974, after the period of significance). It also includes retaining the character-defining Art Deco detailing, like the bas relief artwork and is consistent with Standard No. 2.

Constructed as a purpose-built entertainment venue for motion pictures, one of the essential spaces that characterizes the property is its theater auditorium. Its proposed removal is not consistent with the guidance and Rehabilitation Standard No. 2 is not satisfied.

Rehabilitation Standard No. 3
Each property shall be recognized as a physical record of its time, place, and use. Changes that create a false sense of historical development, such as adding conjectural features or architectural elements from other buildings, will not be undertaken.

The proposed project does not include the addition of conjectural features or architectural elements from other buildings. Rehabilitation Standard No. 3 is not applicable.

Rehabilitation Standard No. 4
Most properties change over time; those changes that have acquired historic significance in their own right shall be retained and preserved.

The marquee was installed in 1974, and though outside the building's period of significance, is 50 years old, the age when resources are generally accepted as historic-age. Unlike the original marquee which it replaced, the existing marquee is a mass-produced installment and does not appear to have been manufactured specifically for this building. Furthermore, it has been updated several times since its installation with additional panels and lighting. The building is significant for its role in the role in the Depression-era development of Downtown Berkeley and for its distinctive Art Deco design. The marquee is not related to either significant theme. Its proposed removal is compliant with Rehabilitation Standard No. 4.

Rehabilitation Standard No. 5
Distinctive features, finishes, and construction techniques or examples of craftsmanship that characterize a historic property shall be preserved.

As described above, many of the building's distinctive features are related to its Art Deco design. The proposed retention and rehabilitation of the Shattuck Avenue elevation is consistent with Rehabilitation Standard No. 5.

Other distinctive features, however, are related to its historic use as a movie theater. The proposed demolition that will result in the loss of the theater auditorium will result in the loss of a distinctive feature that characterizes the property and conveys its historical and architectural significance. It will also result in the loss of the form concrete wall, which demonstrates the building's construction. Rehabilitation Standard No. 5 is not met.

Rehabilitation Standard No. 6
Deteriorated historic features shall be repaired rather than replaced. Where the severity of

deterioration requires replacement of a distinctive feature, the new feature shall match the old in design, color, texture, and other visual qualities and, where possible, materials. Replacement of missing features shall be substantiated by documentary, physical, or pictorial evidence.

The proposed scope of work includes removal of existing, non-historic features like the marque, exterior cladding, and storefront system. The presence and/or condition of historic features beneath existing features is unknown. The exact treatment and approach for these project elements has not yet been determined, but could conceptually be in accordance with Rehabilitation Standard No. 6 if completed by qualified professionals and in accordance with National Park Service (NPS) guidance.

Rehabilitation Standard No. 7
Chemical or physical treatments, such as sandblasting, that cause damage to historic materials shall not be used. The surface cleaning of structures, if appropriate, shall be undertaken using the gentlest means possible.

The proposed scope of work includes removing existing paint finish on the Shattuck Avenue elevation for a new, white painted finish. Plan documents note that work will be undertaken "via approved methods that do not damage the existing stucco". Information for this analysis did not include additional details on the proposed method. This work could conceptually be in accordance with Rehabilitation Standard No. 7 if completed by qualified professionals and in accordance with National Park Service (NPS) guidance.

Rehabilitation Standard No. 8
Significant archeological resources affected by a project shall be protected and preserved. If such resources must be disturbed, mitigation measures shall be undertaken.

Because the proposed project includes ground-disturbing activities, there is a chance of encountering archaeological resources. Provisions required by the California Environmental Quality Act (CEQA) would ensure that archaeological resources, if encountered, are treated appropriately. There is nothing to suggest that work cannot be completed in accordance with Rehabilitation Standard No. 8.

Rehabilitation Standard No. 9
New additions, exterior alterations, or related new construction shall not destroy historic materials that characterize the property. The new work shall be differentiated from the old and shall be compatible with the massing, size, scale, and architectural features to protect the historic integrity of the property and its environment.

As proposed, the project includes the demolition of the former theater auditorium for a 17-story residential building. As described above, demolition is not a rehabilitation treatment and is generally only acceptable as part of rehabilitation to remove non-historic additions or material under the Standards. The proposed demolition of the theater auditorium and its replacement with a new addition is not consistent with Rehabilitation Standard No. 9.

While the proposed new residential tower is consistent with the Standards in that it would be differentiated from the historic through the use of compatible, yet distinctive materials, it is not compatible with the massing, size, and scale of the historic building. Guidance from Preservation Brief 14, *New Exterior Additions to Historic Buildings: Preservation Concerns* explains that large additions to historic buildings are seldom found to be compatible.[3] Though the design is consistent with NPS

[3] Anne E. Grimmer and Kay D. Weeks. *New Exterior Additions to Historic Buildings: Preservation Concerns*, Preservation Brief No. 14. U.S. Department of the Interior, National Park Service, Technical Preservation Services.

guidance that suggests that new large additions can be successful if they read as a separate volume, as proposed here, the scale, massing, and proportions of the addition still need to be compatible with the historic building. A 17-story tower addition to a one-story, double volume building is not consistent with the existing scale, massing, and proportions. The proposed project is not consistent with Rehabilitation Standard No. 9.

Rehabilitation Standard No. 10
New additions and adjacent or related new construction will be undertaken in such a manner that if removed in the future, the essential form and integrity of the historic property and its environment would be unimpaired.

Because the proposed addition requires the demolition of a substantial portion of the building, the essential form and integrity of the historic property would be lost to accommodate the new addition. The proposed project is not consistent with Rehabilitation Standard No. 10.

Conclusions

As detailed above, several elements of the proposed project are not consistent with the Secretary of the Interior's Standards for Rehabilitation. Although the alteration of the character-defining features should typically be avoided, their alteration does not automatically amount to a substantial adverse change causing material impairment. Pursuant to Section 15064.5(b) of the CEQA Guidelines, material impairment of a historical resource occurs when a property is altered such that it is no longer able to convey its historical significance. The proposed project would result in material impairment. Though several aspects of its distinctive Art Deco design are proposed to be retained, the proposed demolition of the former theater auditorium would result in loss of integrity of design, materials, workmanship, feeling and association. It would no longer reflect its historic significance for its role in the Depression-era development of Downtown Berkeley, specifically as a purpose-built entertainment venue for motion pictures. The proposed project would result in a substantial adverse change and it would no longer retain its architectural and historic identity for which it is significant, resulting in a ***significant and unavoidable impact to historical resources*** pursuant to CEQA. Should you have any questions or comments regarding this report, please do not hesitate to contact me at 925-326-1159 or at jmurphy@rinconconsultants.com.

Subject: 2274 Shattuck Avenue HRE and Project Impact Analysis Peer Review

Dear Ms. Gong:

The City of Berkeley (City) retained Rincon Consultants, Inc. (Rincon) to conduct a peer review of the Historic Resources Evaluation (HRE) memorandum prepared for 2274 Shattuck Avenue by Left Coat Architectural History (December 2023) and the report titled *2274 Shattuck Avenue Project Impacts Analysis* prepared by Left Coast Architectural History (March 2024). The peer review presented below assesses reporting accuracy and adequacy relative to the field and research methods and evaluation results using industry-accepted best practice and guidance provide by the National Park Service (NPS) and the California Office of Historic Preservation (OHP). The peer review was limited to the HRE memorandum and the impacts analysis report and did not involve field work, recordation, or reevaluation of any resources. We understand that the purpose of the peer review is to support the California Environmental Quality Act (CEQA) environmental review process for a proposed 17-story mixed-use commercial and residential development.

Rincon Architectural Historian JulieAnn Murphy, MSHP, conducted the peer review, with oversight by Cultural Resources Director Steven Treffers. Both Ms. Murphy and Mr. Treffers meet the Secretary of the Interior's Professional Qualification Standards for architectural history and history (36 CFR Part 61).

Summary of Previous Reports

HRE Memorandum

In December 2023, Caitlin Hibma of Left Coast Architectural History prepared an evaluation of the building at 2274 Shattuck Avenue (APN 57-208-3). The evaluation was completed for the project applicant, who proposes to redevelop the property with a 17-story mixed-use commercial and residential development that would include retaining the building façade and the lobby portion of the building. Hibma meets the Secretary of the Interior's Professional Qualification Standards for architectural history.

The evaluation noted that 2274 is a two-to-four-story commercial building constructed in 1932 for use as a United Artists movie theater, and was designed by Walker & Eisen Architects with Clifford A. Balch. Hibma outlined that the building was the subject of three previous evaluations – a 1978 survey that produced a Historic Resource Inventory Form (precursor to the current form) and resulted in the assignment of a "3" National Register Status Code, suggesting eligibility for listing in the National Register of Historic Places (NRHP); a 2005 updated Department of Parks and Recreation (DPR) Series 523 Form prepared as part of a Section 106 review of the National Historic Preservation Act that determined the property was eligible for listing in the NRHP under Criteria A and C and resulted in a

2S2 status code, indicating NRHP eligibility and listing in the CRHR; and a 2015 evaluation as part of the potential Shattuck Avenue Commercial Corridor Historic Context Survey which affirmed the 2S2 status code and further recommended the building as a contributor to the establishment of the potential Shattuck Avenue Commercial Corridor Historic District.

The HRE then asserted that the previous evaluations did not comprehensively analyze the present condition of the building under the current professional standards and are, therefore, inadequate for CEQA determinations and for local planning decisions. It then provided an updated evaluation, finding that it did appear architecturally significant under CRHR Criterion 3 for its Art Deco design, but that it no longer retains sufficient integrity to support listing. It was also recommended ineligible for listing as a City of Berkeley Landmark and as a City of Berkeley Structure of Merit for a lack of historical and architectural significance. The HRE does not make any conclusions regarding the property's previously identified status as a contributor to the Shattuck Avenue Commercial Corridor Historic District.

2274 Shattuck Avenue Project Impacts Analysis

In March 2024, Caitlin Hibma of Left Coast Architectural History prepared a memorandum report to assess the impact of the redevelopment project on historical resources. Though Hibma previously recommended the property ineligible as a historical resource due, in part, to diminished integrity, the property is listed in the CRHR and is an identified contributor to the potential Shattuck Avenue Commercial Corridor Historic District. Additionally, the Berkeley Landmark Preservation Commission (LPC) subsequently approved a City of Berkeley Landmark application in February 2024. The provisions of the Landmark only extend to the upper Shattuck Avenue façade, above the exiting non-historic marquee.[1]

The analysis considers the project's compliance with Secretary of the Interior's Standards for Rehabilitation (Standards), the Berkeley LPC's permit application review standards, and the Berkeley Downtown Design Guidelines. The memorandum outlines the current historical status; provides a list of the character-defining features of the building according to the Landmark designation; a review of the proposed project; a Standards analysis; a Berkeley Municipal Code compliance analysis; and a Downtown Berkeley Design Guidelines compliance analysis. The proposed project was concluded to be compliant with Standards 1 through 10. It was also resolved to be compliant with the applicable provisions of the Berkeley Municipal Code and consistent with the relevant Downtown Berkeley Design Guidelines. The memorandum report concludes that the proposed project would not result in an impact to a historical resource pursuant to CEQA.

Peer Review

HRE Memorandum

The HRE memorandum generally follows the accepted standard format of historical resource evaluation reporting guidelines and includes an introduction, executive summary, methodology, regulatory context, a review of previous evaluations, and evaluative findings. The information summarized in the architectural descriptions reflected the site's existing conditions, including a comprehensive list of alterations, at their time of recordation, accurately.

[1] The City of Berkeley Landmark application was forwarded to the Berkeley City Council for notice of decision on March 19, 2024. The building's Landmark status does not extend to the current project application because it predated the Landmark designation.

As stated in the HRE memorandum, it is an update to previous survey and evaluation efforts. It accurately outlines the previous findings noting it was found eligible for listing in the NRHP in 1978; its eligibility was affirmed in 2004 and was subsequently listed in the CRHR by consensus through the Section 106 process; and it was further identified as a contributor to the potential Shattuck Avenue Commercial Corridor Historic District in 2015.

As outlined by the Office of Historic Preservation (OHP) in *Instructions for Recording Historical Resources*, it is important to update information about historical resources to ensure accuracy. The HRE memorandum argues that an update was necessary because the past documentation and evaluations relied on the 1978 documentation, which does not accurately describe alterations and was not completed according to current evaluation standards. OHP guidance provides that updates "may amplify or correct information about a resource, or simply confirm that the existing record remains accurate at the time of a subsequent field examination" (OHP 1995). It further instructs that documentation for historical resources should be updated under the following conditions:

- When it is reevaluated;
- When changes occur to the resource or its setting;
- When erroneous information needs correcting; and/or
- When additional information is necessary for planning decisions.

The effort to update the historical resource record with accurate information is generally consistent with OHP guidance. The HRE memorandum continues, providing a detailed description of the existing conditions, and includes a comprehensive list of the alterations that have occurred since it was constructed, augmenting and correcting missing information in the original and subsequent records. It then continues to include an updated evaluation for its inclusion in the NRHP, CRHR, City of Berkeley Landmark, and City of Berkeley Structure of Merit.

It recommended the building ineligible for listing in the NRHP or CRHR under Criterion A/1, B/2, and D/4. It further argues that because the Art Deco theater building is a well-represented type and style locally and nationally, is modest in comparison to other theaters locally and nationally, and it has lost its integrity that it is not eligible for listing in the NRHP under Criterion C for its architecture. It continues that it did appear eligible for listing in the CRHR as originally constructed, but that alterations have resulted in loss of integrity necessary for listing and it is therefore ineligible for listing in the CRHR under Criterion 3. It finds that the property is also not eligible for listing as City of Berkeley Landmark or as a Structure of Merit for lack of historical significance and for a lack of architectural significance due, in part, to the changes that have occurred to the building resulting in the removal of original features and design elements.

Though updating the historical resource record is consistent with OHP guidance, a reevaluation for eligibility for listing in the CRHR, in this case, was not necessary because the property is already listed in the CRHR and is considered a historical resource as defined in PRC Section 5024.1(g) and is, therefore, a historical resource under CEQA. The property was listed in the CRHR in 2005 through a consensus determination, meaning that the determination was arrived at through an agreement between the federal lead agency and OHP. Changes outlined in the HRE memorandum that have occurred since its listing in 2006 are relatively minor and are limited to interior updates. Its overall appearance and condition, based on photographs provided in the DPR form which helped to inform OHP's determination of eligibility, has remained largely unchanged since it was listed in 2006. The HRE memorandum's conclusion that the property is not a historical resource, therefore, not supported.

The update does provide additional and current information about the building, but it was not recorded on a DPR Form. Per OHP instructions, the updated physical description, current photographs, and

additional alteration information should be recorded on a DPR Continuation Sheet (DPR L) and submitted to the Northwest Information Center (NWIC) to be added to the property's existing record in the California Historical Resources Information Center (CHRIS).

2274 Shattuck Avenue Project Impacts Analysis

The project impact analysis report generally follows the accepted format for an impact analysis and provides an introduction and methodology section, a review of existing designations, a list of character-defining features, a description of the proposed project, and an analysis of the proposed project. The analysis provides the regulatory context including the definitions of substantial adverse change and material impairment provided in Section 15064.5 of the CEQA Guidelines and accurately provides that, per the Guidelines, a project that follows the Secretary of the Interior's Standards for the Treatment of Historic Properties shall be considered as mitigated to a level of less than significant on the historical resource. It then continues to provide an in-depth discussion of the project's conformance with the Secretary of the Interior's Standards for Rehabilitation (Standards), which were identified as the most applicable of the four treatment standards.

The subsequent discussion of the project's compliance with the Standards includes a Standard-by-Standard review of the proposed project, asserting that the project will successfully meet all ten of the Standards. As described, however, the project proposes demolition of more than half of the building. Demolition is not a rehabilitation treatment and is generally only acceptable as part of rehabilitation to remove non-historic additions or material. The analysis provided erroneously relies on the presumption that the only portions of the building that are historic are limited to what was identified in the March 2024 City of Berkeley Landmark nomination, which includes only the upper portion of the Shattuck Avenue façade, above the non-historic marquee. The building's current status, however, and its reason for being a historical resource pursuant to CEQA, is tied to its listing in the CRHR, which extends to the whole building. As clarified in *National Register Bulletin 15:-How to Apply the National Register Criteria for Evaluation,* for which the CRHR is based, "parts of buildings, such as interiors, facades, or wings are not eligible independent of the rest of the existing building" (NPS 1997). The Standards analysis, therefore, cannot disqualify the proposed treatment of the rear portion of the building.

Compliance with the Standards, however, is not the only way to demonstrate that a project would avoid causing a substantial adverse change in the significance of a historical resource. The argument provided would be strengthened by acknowledging the aspects of the project that are not Standards-compliant and would benefit from being reframed to analyze if the proposed changes to 2274 Shattuck Avenue amount to substantial adverse change. The project impacts discussion is recommended to be revised and analyzed to consider if the changes proposed to the historical resource (the whole building) would result in material impairment as defined in Section 15064.5 (b)(2)(A) of the CEQA Guidelines.

The analysis continues to a discussion of the proposed project's conformity with the Berkeley Municipal Code provisions for the treatment of historic resources, noting that they do not apply to the current application because it is an SB330 application, and that the analysis is provided as an informative item. The analysis provides a clear discussion of the impact of the project as it relates to the Landmark designation, which only applies to the upper portion of the Shattuck Avenue elevation. The discussion of the impact of the project to the potential Shattuck Avenue Commercial Corridor Historic District, provides a thorough discussion of the impact of the project to the district as it relates to the portion of the building which is included in the Landmark designation. Similar to the Standards analysis, however, there is nothing in the district record to suggest that the whole building is not included as a contributor to the district. It is recommended that the analysis, if required for the project

application, be updated to acknowledge the demolition of a portion of the building and any potential impact to the building as a contributor to the proposed district.

Finally, the analysis continues to a discussion of the proposed project's conformance with the Downtown Berkeley Design Guidelines. Similar to the Berkeley Municipal Code provisions for the treatment of historic resources, the design standards are noted as not applicable because the project is pursuing a SB330 application. The discussion provides a thorough and robust analysis of the relevant guidelines as it relates to the portion of the building included in the Landmark designation. The whole building was previously identified as being subject to the Downtown Berkeley Design Guidelines. As such, it is recommended that, if a requirement of the project application, that the discussion be updated to include all the applicable guidelines as outlined in the "Procedures" portion of the guidelines, including those that discuss roof forms, site design, and special sites, buildings, and subareas in order to adequately address the proposed project's conformance with the Downtown Berkeley Design Guidelines.

Conclusion

In summary, the HRE Memorandum provides useful updated information on the current condition of the building and additional information on the building's alterations. It is recommended that that information be provided on DPR Continuation Sheets and submitted to the NWIC to update the current record, as recommended by OHP guidance. The updated evaluation provided, however, was not necessary to determine if the building is a historical resource pursuant to CEQA since the building is listed in the CRHR. The *2274 Shattuck Avenue Project Impacts Analysis* generally follows the best practices and industry-accepted guidance for the impacts analysis reporting. However, the analysis discussion is limited to the portion of the building which was recently identified as City of Berkeley Landmark. The building's historical status, however, is established by its listing in the CRHR, which applies to the whole building. It is recommended, therefore, that the analysis provided in *2274 Shattuck Avenue Project Impacts Analysis* be revised to include a discussion of the project's impacts to the historical resource.

Should you have any questions regarding this memorandum, please do not hesitate to contact me at 510-834-4455 or jmurphy@rinconconsultants.com.

Dear ZAB Members,

I am very disappointed to hear that you are seriously considering approving the granting of the categorical exemption to the United Artists Theater. It did not comply with the Downtown Area plan, which should have prevented a categorical exemption from being granted in the first place. However, City Planner Sharon Gong's lack of communication of the violation of the Berkeley Downtown Area Plan (the standards protecting the cinemas were objective, by the way) in the required timeframe should still not have qualified the theater for a categorical exemption. That's because categorical exemptions to CEQA shall not apply to properties listed on the California Register of Historical Resources. The protections to the facade as proposed are insufficient.

While I admire the efforts to build more housing in Berkeley, it is also important to protect the very purpose of Downtown Berkeley as it was envisioned and planned for in the extensive city planning process that created the Downtown Area Plan. Removing the last remaining theater - that is historically protected - will, I'm afraid, be detrimental to the vibrancy of Downtown. The cost of building the additional housing at this particular site is too significant of one and I'm afraid the project as planned would irreparably harm the land uses throughout Downtown that are interconnected and currently very vulnerable.

This project merits a CEQA review to assess the change to the land use and to the historical resource.

Thank you,

Madeleine Roberts Rich

Dear ZAB,
It is beyond disappointing that the City of Berkeley has not stood up against the demolition of the UA Theater on Shattuck.
Tonight you will plant what could be the last nail in the coffin by allowing the developer to bypass a CEQA review, even though peer review studies commissioned this year state that the UA is a “historic resource.”
The UA Theater was the bell of the ball for Downtown Berkeley; an Art Deco masterpiece. There were multi page spreads in the local newspapers touting its majesty when it opened in 1932. The remodel in the 1970’s was done carefully so as not to destroy the original architectural details such as an orchestra pit, fanciful moldings, a ceiling starburst, painted murals, etc. Theater historians have stated that the interior is not beyond repair.
It is a downright shame that Berkley does not fight to keep its historical buildings.
And, what happened to the designated Arts District mapped out by the City Council a few years ago which included this property?
You are in an SB33 chokehold, afraid to take any risk.
Yes, housing is important, but very few of the proposed apartments will be affordable. It will be housing for Cal students.
The future of downtown will be nothing but apartments! More boring high rise buildings.
The developer thinks he is doing a great public service by keeping the marquee and the grand lobby. In my opinion, facadism is a joke. Who cares? It is throwing the baby out with the bath water.
Berkeley is known around the world for its beauty, forward thinking, intelligence and culture. Too bad these attributes aren’t being used to save its landmark downtown theatre as many cities around the country have done.

Sincerely,
Arlene Owseichik
Berkeley Resident

Berkeley Zoning Adjustments
1947 Center Street, 2nd Floor
Berkeley, CA 94704

Dear Berkeley Zoning Adjustments Board,

As a full-time MBA student at UC Berkeley, I am writing to express my strong support for the proposed development project at 2274 Shattuck Avenue. This project is crucial for addressing the severe housing shortage that students like myself face in Berkeley.

The difficulty of finding suitable student housing in Berkeley is a pressing issue that I have experienced firsthand. Many of my fellow classmates have been forced to couch surf while juggling their studies, simply because they couldn't secure housing before the academic year began. This situation is not only stressful but also detrimental to their academic performance and overall well-being.

The proposed development at 2274 Shattuck Avenue offers a much-needed solution to this problem. With 227 new housing units, including 23 designated as affordable for low-income residents, this project will significantly increase the housing stock available to students and local residents alike. As someone who has struggled to find a place to live in Berkeley, I can attest to the urgent need for more housing options in the area.

While I understand the concerns raised by groups like Save the UA Berkeley regarding the preservation of the United Artists Theater, I believe that addressing the housing crisis should take precedence over maintaining an underutilized movie theater. The developer's commitment to restoring and renovating the facade on Shattuck Avenue and the lobby demonstrates a thoughtful approach to preserving the building's historical elements while meeting the city's critical housing needs. This housing development will provide immediate and tangible benefits to Berkeley residents, particularly students struggling to find affordable housing options.

In conclusion, I urge you to support this vital project at 2274 Shattuck Avenue. By approving this development, you will be taking a significant step towards alleviating the housing crisis that affects so many Berkeley students and residents. The benefits of providing 227 new housing units, including affordable options, far outweigh the preservation of an unused theater space. Let's prioritize the pressing needs of Berkeley's current and future residents by moving forward with this essential housing development.

Sincerely,
Kendenn Rose
Full-time MBA Student, UC Berkeley

>EDITED TEXT IS BELOW THE LINE<
————————————————————

To the Members of the Zoning Adjustment Board,

My name is Samuel Siegel, I am a UC Berkeley alumnus; researcher, urban designer, planner, preservationist, and historian who is a member of "Save the United Artists Theatre Berkeley."

I am writing in protest and condemnation of the Zoning Adjustment Board's decision to grant the United Artists Theater at 2274 Shattuck Avenue a full exemption from undergoing the California Environmental Quality Act's Environmental Impact Review process.

The city has consistently ignored the outcry of thousands of its citizens and community members who are demanding this historic 1932 theatre be saved. Designed by Clifford Balch of the Los Angeles architecture firm Walker & Eisen, featuring interior decor from the Heinsbergen Decorating Company of Los Angeles, and opened in a grand ceremony with United Artists founders Charlie Chaplin, Mary Pickford, and Douglas Fairbanks in attendance—it is an irreplaceable Art Deco treasure.

Berkeley's own peer review experts, The Rincon Group, stated in two reports that—despite the review limitations and fast-tracking procedures of SB 33 and AB 1633—the United Artists Berkeley should NOT be exempted from an EIR, underscoring that the UA is recognized as a property of historic interest on both state and national registers.

As a trained planner and designer, I am well aware that a CEQA review will not prevent this abhorrent project from going forward, but an EIR would reveal what a unique and nearly fully intact example of Art Deco architecture the UA Berkeley is, showing the world what exactly the city is bending over backwards to allow to be removed from the face of this earth. Truly, a crime against architecture, history, and heritage.

The developer has gone to great lengths to obfuscate the historic and architectural significance of this theatre from the public. Their reason for doing so is simple: revealing the majesty of what they are callously proposing to destroy would undoubtedly result in further outcry, and heavens forbid, the developer not getting their way.

A full investigation into the significance of the structure may have attracted monied interest groups eager to buy the theatre and save it from destruction, rather than allowing this issue to wallow in relative obscurity as municipal officials and real estate interests collaborated to elevate luxury housing above invaluable architectural heritage.

From the beginning of the UA's history, the City of Berkeley has never once looked into ways to safeguard this landmark, despite cities across California and the nation doing just that. The artistry and materials used in Art Deco cinema palaces such as the UA Berkeley can never be duplicated again.

What reason should the Landmarks Preservation Committee or Zoning Adjustment Board even exist if not to preserve such an architecturally and historically significant structure as the UA Berkeley? It is a clear dereliction of their respective duties to the people of the City of Berkeley and the State of California.

The wanton destruction of the UA Berkeley will leave California's most famous college town with but a single, small commercial movie theater in the form of the Elmwood Theatre on College Avenue, following the unprecedented and entirely avoidable losses of the historic California Theatre and the former Hink's Department Store which had served as the Shattuck Cinemas for decades.

Do not allow these tragedies to be repeated again.

With minimal due diligence on the part of the ZAB regarding the project at 2274 Shattuck Avenue, the City of Berkeley could be home to a grandiose and iconic major event venue akin to the Paramount and Fox Theatres in Oakland; the Castro, Golden Gate, Curran, Geary, and Orpheum Theatres in San Francisco; and the Pantages, El Capitan, United Artists, Orpheum, and Egyptian Theatres in Los Angeles, the last of which was purchased by Netflix in 2020 and reopened on 9 November of last year following an extensive and extremely successful restoration project.

The UA Berkeley could EASILY be adaptively re-used as a multipurpose artistic and cultural entertainment venue for orchestral performances, concerts, comedy shows, ballets and operas, modern/historic/international film screenings and festivals, stage plays, lectures, public events, and more.

In fact, for inspiration as to the proper path ahead, the ZAB need look no further than Westwood Village—another California college town with its own large UC campus—where an ownership consortium headed by Director Jason Reitman is spearheading a transformation of the 1931 Fox Westwood Village Theatre through a combination of historic preservation and adaptive re-use involving seismic upgrades, restoration work, the addition of new screening rooms, and the conversion of adjoining retail space into lounges, film memorabilia museums, and restaurants.

In doing so, the previously struggling theatre will become the beating heart of the Westwood and UCLA communities; a home to modern, historic, and international film screenings and premieres, rotating film history exhibits, bustling lounges and restaurants, and—with the potential co-programming of the adjacent Fox Bruin Theatre—film festivals as well.

Yet at no time did any city official examine such creative means to spare the UA from demolition. Is the City of Berkeley really so lacking in imagination that it can see no future for the UA Berkeley apart from being leveled for a generic luxury apartment tower? In a place home to so many great artists, academics, and thinkers over the decades…I think not. For the sake of those that came before you and those that will follow in your footsteps, do not disgrace your own legacy and do not condemn future generations to mediocrity.

The City fought extensively to preserve Ohlone sacred grounds from developers despite multiple complications with historical records due to extensive changes to the site, yet it can't be bothered to lift a finger to save the largest and grandest theatre ever built in Berkeley city limits?

A theatre that, beneath readily removable modifications, remains mostly intact and has extensive documentation to highlight both its historic significance and enable its restoration? The notion is preposterous and absurd. So much so, that to demolish it would require circumventing the law and hiding the truth, which quite clearly seems to be the case here.

To the members of the Zoning Adjustment Board, I implore you, serve the interests of the people of the City of Berkeley and the State of California, not corporate greed. Take a stand against California's imperfect housing laws that both fail to provide for truly affordable housing and fail to preserve our built heritage and historic spaces and places.

As echoed by Henry David Thoreau and Martin Luther King Junior, if a law is unjust, one has not only the right, but the moral obligation to oppose it.

Per the states' recent housing laws, in the City of Berkeley alone, low-income rates for affordable housing are based upon a median income of $100,000; and beyond a gutted and clearly ineffective CEQA EIR process susceptible to developer interference and municipal collusion, no specialized protections exist for any professionally recognized architectural, historic, and culturally significant resources endangered by housing developments, whether allegedly "affordable" or otherwise.

But *you* can make a difference. *You* can seize this moment and stand against a flawed system and a self-serving developer seeking to manipulate SB 33 and AB 1633 to deprive Berkeley of a community space, grand entertainment venue, and a historical cultural asset.

Do your due diligence as planners, stand in solidarity with the people's best interests, take a bold act of civil disobedience and DENY the approval of the project at 2274 Shattuck Avenue. Instruct the developer to either pursue an alternative that preserves the theatre in its entirety, or to sell it to someone who will.

You serve the PEOPLE of Berkeley, not developers. There is no reason whatsoever why this project must necessitate the destruction of the theatre. It is possible to both preserve the UA Berkeley *and* allow for high-rise housing construction.

If you refuse to stand up to this blatant abuse of the law and deny the project outright, then at the very least pursue a middle course between your prior lackadaisical attitude towards preservation and submission to wealthy developers, and your sworn duty to safeguard Berkeley's past, serve its present, and provide for its future. What better way to do so than by adaptively re-using this historic Art Deco theatre into an exciting entertainment and cultural venue?

This compromise can exist in two forms of conditional approval.

(1) Approve the project with a stipulation that the developer provide a secondary site within city limits upon which the entire theatre can be disassembled and relocated to, while granting further zoning exemptions allowing for additional increases to the project's height.

(2) Approve a land swap between 2274 Shattuck and a property owned by the City of Berkeley; whereupon the city will sell the theatre to a preservation consortium while allowing the developer to construct an augmented project at the alternate site via additional height from 2274 Shattuck's air rights, or a special zoning exemption.

It is heartbreaking and criminal that no city officials cared enough to save this iconic building born out of the fruits of Charlie Chaplin, Mary Pickford, and Douglas Fairbanks' work. Should the UA Berkeley be demolished, it will forever be a stain on Berkeley's legacy, and the city officials in office today will all go down in history as the people that allowed and enabled the destruction of an Art Deco masterpiece.

Regards,
Sam Siegel, M.U.R.P.

Commission Zoning Adjustments Board Berkeley,

I am writing to urge you to approve the proposed housing development at 2274 Shattuck, ASAP and with urgency.

Opponents have argued that this site should be preserved as a historic building, but there is no practical, safe, or affordable way for that to happen, as demonstrated by in-depth structural and historical analyses of the building. The interior of the building has been renovated extensively, such that it resembles a modern-day, utilitarian multiplex. Only the façade and lobby retain their original architectural features, and the developer has proposed restoring and preserving those features.

Despite an extreme overreach by staff that requested landmarking the entire structure, even the Landmarks Preservation Commission dialed back the preservation portion to cover only the façade and lobby, as the developer had proposed. The existing building is seismically unsound and poses a health and safety risk to the public, but the housing development proposed at the site could address these issues.

There is a way to honor the history of the theater while also building badly-needed housing, and this proposal aims to do just that.

This project will provide 227 affordable-by-design units which are suitable for students, young professionals, and families. The project also provides 23 very low-income affordable units. It will contribute more than $7M in Building Permit and Impact Fees to the City of Berkeley, and it will also contribute ~$2M annually to the property tax base.

It’s long past time for this project to break ground. Please support it so that we can move forward.

Sincerely,

Justin Truong

December 11, 2024

Dear ZAB members,

Re: 2274 Shattuck Avenue

I understand our need and imperative to provide new housing. I have not formally raised objections over the past two decades to any of the many housing projects that have been built or are currently being planned.

However, I am troubled by the City of Berkeley's intent to apply exemption 15332, the Class 32 Infill Exemption, from the requirements of CEQA to the planned development at 2274 Shattuck Avenue. The first criterion for this exemption does not apply: (a) The project is consistent with the applicable general plan designation and all applicable general plan policies as well as with applicable zoning designation and regulations.

Berkeley's General Plan specifically references the various area plans, including the Downtown Area Plan (DAP). Together, these plans do function as our General Plan. They identify community priorities and are intended to guide development decisions within the City.

The City is simply parsing the language of state law to apply the term "general plan" narrowly and selectively. Since when do we abandon or discard our area plans when it's convenient for a developer?

This is exactly the type of situation where CEQA was intended to be applied. We've identified what we value in our urban environment, we enacted policies to protect it, and yet we find ourselves poised to ignore those values and policies and to destroy the last of the commercial movie theaters in our downtown.

I refer you to Policy ED-1.7 of the Downtown Area Plan and to Figure ED-1 which specifically references the United Artists Theatre.

The alternatives analysis of CEQA must be applied. We must seriously explore alternatives to the demolition of a unique purposefully built space to experience the magic of film. We've just gone through a pandemic when all businesses involving the gathering of people were impacted. This vulnerability has been used to devalue and destroy cinema spaces in the downtown.

I remember the last movie I saw in the UA Theater space in late January 2023. In the dark, I entered the life on the big screen. I cried and laughed with friends and strangers alike. I remembered the bitter loss of a spouse and chuckled at the angry crankiness of the new widower depicted in the film because that was once me. You just can't get that experience lying in bed watching a film on your laptop at home.

I ask that you Stop. Think.

Sincerely,

Jill Korte

WARNING: This is not a City of Berkeley email. Do not click links or attachments unless you trust the sender and know the content is safe.

Dear Berkeley city staff, ZAB, and City Council,

I'm writing to demand that city staff, the Zoning Adjustments Board, and the City Council take action to prevent the destruction of the historic United Artists theater at 2274 Shattuck Ave. in downtown Berkeley. It is unacceptable to let a developer retain a fraction of the facade and lobby while tearing down the palatial four-story theater itself.

Built in 1932, the UA is on the California Register of Historical Resources, is National Register-eligible, and is also now a city landmark, thanks to an LPC decision earlier this year. Without a doubt, the building is a cultural and historical resource under the CEQA statute; the proposal to demolish it is a "substantial adverse change" requiring extensive CEQA review. The city must insist that all oversight laws and processes are followed and not give baseless exemptions to the developer.

Constructed during the Great Depression by Hollywood icons Charlie Chaplin and Mary Pickford, the UA Berkeley is arguably the finest theater ever built in the city and one of the few Art Deco movie palaces of its kind in the state that could be preserved. Despite being converted to a multiplex 50 years ago, the theater is resplendent with Art Deco architectural detail, decor, and furnishings; it has been relatively well-maintained over the decades, its historic features surviving various retrofits thanks to local preservationists who insisted the original auditorium be preserved behind false walls. The Historical Resource Evaluation on the UA, paid for by the developer, is not an honest and credible assessment; it would be unethical for city officials to consider this document the final word on the status of this landmark property.

The UA presents a tremendous opportunity for Berkeley. It has the potential to be restored as a glorious, midsize live performance venue like Oakland's Paramount, galvanizing an economic and cultural renaissance in the downtown. The many cities in the Bay Area and nationwide that have chosen to preserve their historic theaters never regret doing so. Another option is for the UA to remain a historic multiplex theater that serves a public eager to resume moviegoing after the pandemic. The future possibilities for this splendid building are numerous—but not if complacent city leaders allow a developer to level it into oblivion.

Berkeley citizens are watching with alarm as a mass extinction event for movie theaters unfolds: The Shattuck Cinemas has been freshly demolished while the beloved art deco California and the most valuable of them all, the UA, sit on the precipice of ruin. This all goes against the city's Downtown Area Plan, which was the product of over 200 public meetings and explicitly calls for the retention and support of downtown cinemas. This plan is still in effect.

Building more housing is no doubt vitally important, but it does not have to cost Berkeley one of its most magnificent landmark buildings in the UA. City officials must maintain control over land use decisions, fostering downtown development that maintains a mix of arts and culture and commerce alongside residential growth.

The UA Berkeley served as a community hub and entertainment venue for 91 years, and that tradition should continue. Its destruction would be an irreparable blow to the city's historic and cultural fabric that leaders must avoid at all costs.

Thank you for your consideration.

To the Berkeley Zoning Adjustments Board,

My name is Anastasia Rose Ellis. I am head of the group "Save the United Artists Theater" along with my partner Laura Linden. Our group protests the Zoning Adjustment Board's (hereinafter "ZAB") decision to grant the United Artists Theater (hereinafter the "UA") a full exemption from undergoing the California Environmental Quality Act (hereinafter "CEQA") environmental review process (hereinafter "EIR.")

Our group is pro-affordable housing. We are not NIMBY. Yet the city has ignored the outcry a couple thousand of its citizens and community members who have demanded this 1932 Art Deco property be saved.

Despite the current SB33 and AB 1633 legislation, Berkeley's own peer review experts, The Rincon Group, stated in two reports that the building should NOT be exempted from an EIR. The Rincon group underscored that UA is recognized as a property of historic interest on both the state and national registers.

We understand the CEQA review will not stop the building project from going forward, but an EIR would reveal to the world what a truly unique and almost fully intact example of Art Deco that the United Artists is. The developer has gone to great lengths to hide and obfuscate these facts from the public. This might result in interest groups raising the money to buy the theater and save it from destruction.

From the beginning of this theater's history, Berkeley's has never looked into to finding ways to keep this landmark safe, even though cities and towns all over the country have done and are doing just that. The artistry and materials used in art deco buildings can never be duplicated again.

Throughout our efforts to landmark the UA, the Landmark Preservation Committee (hereinafter "LPC") and ZAB have gone out of their way to muddy the process and divulge the least amount of information to us possible. Indeed we have been treated with disdain and in one case ridicule from various members of the city's personnel.

There seems little to no reason to have an LPC committee or a zoning board if Berkeley refuses to preserve their most important property.

LPC member Steve Finacom said at the final hearing for the UA, and I paraphrase; "If we do not save the UA, we might as well lock our office door and throw away the key. Downtown Berkeley will be nothing but a bunch of bedrooms."

Berkeley will now have just one small commercial movie theater when it could have an equivalent of the Oakland Paramount in its downtown area. This building could be used as a multipurpose center for culture and arts, for the symphony, ballet, film and public events.

At no time did any Berkeley city official look at creative ways to keep this building from demolition. Berkeley certainly went to bat for the Ohlone sacred ground and rightly so, it was saved from developers. No one was crying NIMBY for that rescue mission.

We understand Berkeley has to follow current state laws for affordable housing. You all know this is not truly affordable for low income residents when the rates are based on a medium income of $100,000. What city will say that enough is enough. It's time to stand up and demand the housing laws take into account our precious historic properties, in particular our Art Deco movie theaters, of which very few are left.

It is heartbreaking and criminal that none of city officials cared enough to save this public building built by Charlie Chaplin, Mary Pickford, and Douglas Fairbanks. Berkeley's city officials will all go down in history as the people that allowed the destruction of this Art Deco masterpiece.

Re: Agenda Item No. 6: 2274 Shattuck Avenue Project (Use Permit #ZP2023-0079)

Dear Zoning Adjustments Board Chairperson Duffy, Vice Chairperson Gaffney, Board Members, Ms. Gong:

These comments are submitted on behalf of East Bay Residents for Responsible Development ("East Bay Residents" or "EBRRD") regarding Agenda Item 6, the 2274 Shattuck Avenue Project (Use Permit #ZP2023-0079 APN: 57-2028-3) ("Project") proposed by Isaiah Stackhouse ("Applicant").[1] The Project proposes to demolish the commercial building with the preservation and renovation the front façade and lobby, and construct a 17-story (183 feet, plus 5-foot parapet), 214,032-square-foot, mixed-use residential building with 227 dwelling units (including 23 Very Low-Income Density Bonus qualifying units), and one parking

[1] City of Berkeley, Zoning Adjustments Board, Staff Report for Board Action (Dec. 12, 2024) 2274 Shattuck Avenue Use Permit #ZP2023-0079. Available at: https://berkeleyca.gov/sites/default/files/documents/2024-12-12_ZAB_Item%206_2274%20Shattuck%20-%20Packet.pdf (hereinafter "Staff Report").

printed on recycled paper

space. The Project is located on the east side of Shattuck Avenue within the Downtown Mixed-Use Commercial District (C-DMU), Corridor Sub-Area, as identified in the City's Downtown Area Plan ("DAP").

In response to the Applicant's request for a CEQA exemption,[2] Berkeley City Staff have determined that the Project meets the criteria for a Categorical Exemption pursuant to CEQA Guidelines, Section 15332, "In-Fill Development Projects" ("Infill Exemption").[3] The Applicant also requested that the Project be approved pursuant to a Class 31 CEQA exemption for Historical Resource Restoration/Rehabilitation.[4]

East Bay Residents reviewed the AB 1633 Letter, the Staff Report, its technical appendices and reference documents with assistance of EBRRD's expert noise consultant Deborah Jue of Wilson Ihrig, whose comments and qualifications are attached. Ms. Jue's Comments ("Jue Comments") and Ms. Jue's CV are attached hereto as **Exhibit A.**

EBRRD's review of the record demonstrates that neither the Applicant nor the City have presented substantial evidence to support the claimed CEQA exemptions. To the contrary, a CEQA exemption is inapplicable to the Project because there is substantial evidence in the record demonstrating that the Project has potentially significant, unmitigated impacts from noise and vibration to nearby sensitive receptors including residents in the multi-family apartment buildings located immediately to the west and south of the project boundary, as well as to the northeast of the project site, and students at Berkeley High School located approximately 450 west of the Project site, and Washington Elementary School.[5]

Moreover, the Project is not subject to a CEQA categorical exemption because the Project site is a historical resource pursuant to state and local law. CEQA provides an explicit exception to CEQA exemptions for projects which cause a substantial adverse change in the significance of a historical resource. The Project site historically operated as a single-screen, 1,800-seat theater under the United

---

[2] Letter from Hanson Bridgett LLP to Sharon Gong, Senior Planner, City of Berkeley, 2274 Shattuck Avenue – AB 1633 Notice of CEQA Exemption, (March 4, 2024) p. 134 of 320 (hereinafter "AB 1633 Letter")
[3] Letter from Sharon Gong, Senior Planner, City of Berkeley, to Robin Baral, Senior Counsel, Hanson Bridgett LLP, Response to AB 1633 Notice for Use Permit #ZP2023-0079 – 2274 Shattuck Avenue (Oct. 4, 2024).
[4] Staff Report, p. 107 of 142.
[5] AB 1633 Letter, p. 134 of 320.

Artists marquee.[6] More recently it operated as Regal Cinemas, which vacated the property in early 2023.[7] The Project would involve the demolition of all but the front façade and lobby of the existing United Artists movie theater, which was found eligible for listing on the National Register of Historic Places (NAHP) in 2004, was listed in the California Register of Historical Resources ("CRHR") in 2006, and was designated as a City Landmark in 2024.[8] While the Project's SB 330 application predated the City Landmark determination,[9] it did not predate the National and State designations, nor does SB 330 vesting excuse the City from its duty under CEQA to evaluate whether the Project would adversely impact the historic resource. Here, Project construction would cause a substantial adverse change in the significance of any historical resource. The Project is therefore not subject to a CEQA exemption pursuant to CEQA Guidelines Section 15300.2 subdivision (f).[10]

The ZAB should remand the Project to Staff to prepare a legally adequate environmental impact report ("EIR") to adequately analyze and mitigate the Project's potentially significant environmental impacts before the Project can lawfully be approved.

I. STATEMENT OF INTEREST

East Bay Residents for Responsible Development is an unincorporated association of individuals and labor organizations that may be adversely affected by the potential impacts associated with Project development. The association includes labor organizations UA Plumbers and Pipefitters Local 342, International Brotherhood of Electrical Workers Local 595, Sheet Metal Workers Local 104, Sprinkler Fitters Local 483, and their members and their families who live and/or work in the City of Berkeley and Alameda County.

The individual members of EBRRD live, work, and raise their families in the City of Berkeley and Alameda County. They would be directly affected by the Project's impacts. Individual members may also work on the Project itself. They will therefore be first in line to be exposed to any health and safety hazards that may exist on the Project site.

[8] Staff Report, p. 16.
[9] Staff Report, pp. 16-17.
[10] 14 CCR § 14300.2(f) ("[a] categorical exemption shall not be used for a project which may cause a substantial adverse change in the significance of a historical resource.").

The organizational members of EBRRD also have an interest in enforcing the City's planning and zoning laws and the State's environmental laws that encourage sustainable development and ensure a safe working environment for its members. Environmentally detrimental projects can jeopardize future jobs by making it more difficult and more expensive for business and industry to expand in the region, and by making it less desirable for businesses to locate and people to live there. Indeed, continued degradation can, and has, caused restrictions on growth that reduce future employment opportunities. Finally, EBRRD's members are concerned about projects that present environmental and land use impacts without providing countervailing economic and community benefits.

II. THE PROJECT IS NOT EXEMPT FROM CEQA BECAUSE THERE IS SUBSTANTIAL EVIDENCE OF POTENTIALLY SIGNIFICANT, UNMITIGATED ENVIRONMENTAL IMPACTS WHICH REQUIRE MITIGATION

A. The Project Does Not Qualify for An AB 1633 CEQA Exemption

The Project does not qualify for a CEQA exemption pursuant to AB 1633 because the record lacks substantial evidence to support the exemption and there is substantial evidence demonstrating that the Project has significant, unmitigated impacts which preclude reliance on an exemption. The Applicant's AB 1633 Letter asserted that AB 1633 required the City find the Project exempt within 90 days.[11] The City has done so, but neither Applicant's AB 1633 Letter nor the City's CEQA determination are supported by substantial evidence. The City is therefore not required to approve the Project under an exemption pursuant to AB 1633.

AB 1633 requires approval of an exemption where there is substantial evidence in the record that the Project qualifies for an exemption and is not subject to any exceptions.[12] Here, the Project does not qualify for an exemption because the Applicant's AB 1633 Letter lacks substantial evidence to support a conclusion that the Project's noise and historical resources impacts are less than significant, and the City has not corrected the errors. The ZAB therefore has discretion to deny the Applicant's proposed exemptions and prepare an EIR because there is substantial evidence in the record that the Project is not subject to the exemptions.

[11] Staff Report, p. 108 of 142.
[12] Gov. Code § 65589.5(h)(6)(D)(i)(IV).

First, a CEQA exemption is inapplicable to the Project because the Applicant's noise analysis is incomplete and unsupported. In particular, the noise analysis omits significant sources of noise. For example, the noise analysis failed to analyze the heating, ventilation, and air conditioning ("HVAC") system required for a project of this size, and failed to analyze noise impacts from demolition equipment, backup generators, compressors, deliveries.[13] Ms. Jue explains that the omission of these significant sources of noise resulted in underestimated noise impacts.[14] The Applicant's noise analysis therefore contains significant errors and omissions which do not provide substantial evidence to support the exemption determination.

Second, there is substantial evidence in the record demonstrating that the Project has potentially significant impacts from noise and vibration to nearby sensitive receptors. Ms. Jue explains that these receptors include residents in the multi-family apartment buildings located immediately to the west and south of the project boundary, as well as to the northeast of the project site, and students at Berkeley High School located approximately 450 west of the Project site, and Washington Elementary School.[15]

Third, substantial evidence supports a fair argument that the Project results in a substantial adverse change in the significance of a historical resource, the historic U.A. Theater, precluding the ZAB's reliance on a CEQA exemption for Project approval. Neither AB 1633 nor SB 330 limit the City's obligation to assess the impact of a proposed project on cultural resources under CEQA and to impose measures to mitigate any adverse impact on cultural resources.[16] In this case, additional mitigation measures or alterations in the Project are necessary to mitigate the adverse impact on cultural resources associated with Project construction.

The City must comply with CEQA before approving the Project. The ZAB should remand the Project to staff to prepare an EIR to address these impacts.

---

[16] See Gov. Code § 65913.10(c).) https://berkeleyca.gov/sites/default/files/legislative-body-meeting-attachments/2024-02-01_LPC_Late%20Communications_2274%20Shattuck.pdf.

B. The Project Does Not Qualify for the Infill Exemption Due to Significant Noise and Vibration Impacts

In order to approve the Project under an Infill Exemption, the City must determine, based on substantial evidence, that approval of the Project would not result in any significant effects on the environment. Exemptions must be narrowly construed and are not to be expanded beyond the scope of their plain language.[17] CEQA Guidelines Section 15332 provides an exemption from CEQA for "benign infill projects that are consistent with the General Plan and Zoning requirements" of a municipality and that satisfy the following criteria:[18]

(a) The project is consistent with the applicable general plan designation and all applicable general plan policies as well as with applicable zoning designation and regulations.
(b) The proposed development occurs within city limits on a project site of no more than five acres substantially surrounded by urban uses.
(c) The project site has no value as habitat for endangered, rare or threatened species.
(d) Approval of the project would not result in any significant effects relating to traffic, noise, air quality, or water quality.
(e) The site can be adequately served by all required utilities and public services.

The Project fails to meet the requirements of Section 15332(d) because the Project will result in significant impacts from noise and vibration to nearby sensitive receptors. The Project's construction noise and vibration impacts will adversely impact nearby sensitive receptors including residents in the multi-family apartment buildings located immediately to the west and south of the project boundary, as well as to the northeast of the project site, and students at Berkeley High School located approximately 450 west of the Project site, and Washington Elementary School.[19] For the reasons detailed herein and in EBRRD's expert consultant reports attached hereto, the Project fails to qualify for the Infill Exemption.

[17] *Castaic Lake Water Agency v. City of Santa Clarita* (1995) 41 Cal.App.4th 1257.
[18] 14 CCR § 15332.
[19] AB 1633 Letter, p. 134 of 320.

Pile driving and construction of the Project will generate significant noise and vibration impacts.[20] Construction of the 17-story building will necessarily require pile driving.[21] The AB 1633 Letter from the Applicant provides that "Construction of the foundation for this project will utilize cast-in-place concrete piles. No pile driving will be involved at any point during the construction of the project."[22] Expert evidence presented by Deborah Jue demonstrates that a Project of this size would necessarily require pile driving to ensure the structural stability of the Project's foundation. Substantial evidence in Deborah Jue's comments demonstrate that noise from pile driving ranges from 95 to 101 dBA Leq. Table 1 presents the noise from impact and vibratory pile driving that may result from construction of the Project. Construction noise would be significant at nearby residences, and the record lacks substantial evidence demonstrating that the Project's noise control plan would reduce this impact.[23] Ms. Jue explains that the construction noise plan must include specific noise control measures such as sound curtains, off-site noise control, and possibly alternate daytime accommodations.[24] She concludes that, even with additional mitigation, noise and vibration impacts could remain significant as sound curtains are unlikely to provide more than 5 or 10 dBA reduction.[25] The City cannot rely on an the Infill Exemption due to significant, unmitigated noise impacts.

Table 1 Pile Driving Noise at Near Distances

Receptor	Distance, ft (center/near)	Pile Driving Noise Level, dBA Leq	Criteria, dBA Leq	Significant?
K Street Flats[1]	150 90	85 – 91 90 – 96	70	**Yes** **Yes**
2030 Bancroft Way	180 65	84 – 90 93 – 99	70	**Yes** **Yes**
Note 1: Assumes No shielding from the Public Library to the K Street Flats				

The Downtown Area Plan Noise mitigation measures do not reduce the noise impacts from Project construction to less than significant levels. DAP MM NOI-3 provides that "Affected residents could be provided building sound insulation such

[20] Jue Comments, p. 2.
[21] *Id.*
[22] AB 1633 Letter, p. 289 of 320.
[23] Jue Comments, p. 2.
[24] *Id.*
[25] *Id.*

as sound-rated windows and doors…as a method of reducing noise levels in interior spaces."[26] These measures are not included in the Project, and are necessary to reduce significant noise impacts. The measures included in MM NOI-4 and MM NOI-5 are likewise not included in Project features and as demonstrated in Deborah Jue's comments, would not sufficiently reduce Project construction and operational noise and vibration impacts to less than significant levels.

Moreover, Ms. Jue's comments demonstrate that the Noise Impact Analysis failed to adequately quantify construction noise beyond pile driving.[27] Ms. Jue's comments provide substantial evidence that when the noise analysis is conducted with the correct distances to sensitive receptors, for example, 65 ft to 2030 Bancroft Way, the construction noise impacts are significant.[28] Ms. Jue recommends feasible mitigation to reduce construction noise impacts, including sound barriers, buffer distances, and exclusion of specific activities and equipment.[29]

Additionally, Ms. Jue's comments provide that the Noise Impact Analysis underestimates the Project's construction noise impacts by failing to include noise associated with demolition equipment, backup generators, compressors, deliveries.[30] This is a significant omission resulting in a severe underestimation of construction noise impacts associated with the development of the Project.

The Project also results in significant operational noise impacts, which the Noise Impact Analysis fails to identify. Ms. Jue's comments demonstrate that the analysis of the HVAC systems relies on noise from a typical residential HVAC system, omitting impacts associated with the high-rise structure.[31] These kinds of structures require HVAC systems that are much larger than the "typical" residential HVAC systems referenced in the Noise Impact Analysis.[32] Large, air-cooled chillers can have a sound power level 90 to 110 dBA; contained within a reverberant mechanical room with standard louvers the noise reaching the nearest neighbor at 2030 Bancroft Way from two chillers could reach 50 to 70 dBA during constant operation, which could represent up to a 35 dBA increase over the baseline

[26] Downtown Area Plan, Mitigation Monitoring and Reporting Program, p. 7 of 18.
[27] Jue Comments, p. 2.
[28] Jue Comments, p. 2.

[31] *Id.* at 3.
[32] *Id.*

environment during the nighttime. Ms. Jue's comments provide substantial evidence that this kind of increase would contribute to sleep disturbance for nearby sensitive receptors, which would result in a significant impact.[33]

If there is substantial evidence that a proposed project may have a significant effect on the environment, the agency must prepare an environmental impact report pursuant to CEQA before approving project.[34] Significant noise impacts preclude reliance on a CEQA exemption, including specifically the Infill Exemption. Here, there is substantial evidence that noise and vibration from construction of the Project will result in a significant effect on the environment. The ZAB cannot rely on a CEQA exemption to approve the Project, and must remand the Project to Staff to prepare a legally adequate EIR before the Project can be approved.

C. The Project is Subject to an Exception to a CEQA Categorical Exemption Because the Project Will Cause Substantial Adverse Change in the Significance of a Historical Resource

A project proposed pursuant to any CEQA categorical exemption, including a Class 31 or Class 32 exemption, must undergo environmental review if the project "may cause a substantial adverse change in the significance of a historical resource."[35] Here, substantial evidence in the record demonstrates that the Project will result in a substantial adverse change in the significance of the historical resource, the former U.A. Theater.

A resource is historical if it is "listed in, or determined to be eligible by the State Historical Resources Commission, for listing in the California Register of Historical Resources."[36] A resource is presumptively historical if it is included in a local register of historical resources, or identified as significant in a historical resource survey, absent a preponderance of evidence to the contrary.[37]

"Generally, a resource shall be considered by the lead agency to be 'historically significant' if the resource meets the criteria for listing on the California Register of Historical Resources including the following:

(A) Is associated with events that have made a significant contribution to the broad patterns of California's history and cultural heritage;

[35] 14 CCR § 15300.2, subd. (f).
[36] *Id.* at § 15064.5, subd. (a)(1).
[37] *Id.* at § 15064.5, subd. (a)(2).

(B) Is associated with the lives of persons important in our past;
(C) Embodies the distinctive characteristics of a type, period, region, or method of construction, or represents the work of an important creative individual, or possesses high artistic values; or
(D) Has yielded, or may be likely to yield, information important in prehistory or history."[38]

"Substantial adverse change in the significance of an historical resource means physical demolition, destruction, relocation, or alteration of the resource or its immediate surroundings such that the significance of an historical resource would be materially impaired."[39] Material impairment of a historical resource occurs when a project "[d]emolishes or materially alters in an adverse manner those physical characteristics of an historical resource that convey its historical significance" and entitle it to be included in the California Register of Historical Resources or similar local registers.[40]

If a resource is determined to be a historical resource, "the fair argument standard applies to the question whether the proposed project 'may cause a substantial adverse change in the significance of an historical resource'...."[41] The fair argument standard "presents a legal question, i.e., the sufficiency of the evidence to support a fair argument" that the project would have a significant environmental impact.[42] "[U]nder this standard, deference to the agency's determination is not appropriate and its decision [not to conduct further environmental review] can be upheld only when there is no credible evidence to the contrary."[43] "The fair argument standard thus creates a low threshold for requiring an EIR, reflecting the legislative preference for resolving doubts in favor of environmental review."[44]

Substantial evidence supports a fair argument that construction of the Project will result in a significant adverse impact to a historic resource. On March 15, 2006, the California Office of Historic Preservation formally designated the property to the California Register based on the National Register finding that was

[38] *Id.* at § 15064.5, subd. (a)(3).
[39] *Id.* at § 15064.5, subd. (b)(1).
[40] 14 CCR § 15064.5, subd. (b)(2).)
[41] *Valley Advocates v. City of Fresno* (2008) 160 Cal.App.4th 1039, 1072; see *Berkeley Hillside, supra*, 60 Cal.4th at p. 1117 (citing *Valley Advocates* to support a bifurcated standard of review for the unusual circumstances exception).
[42] *Lucas v. City of Pomona* (2023) 92 Cal.App.5th 508, 537.
[43] *Ibid*.
[44] *Covina Residents for Responsible Development v. City of Covina* (2018) 21 Cal.App.5th 712, 723.

made by the 1978 HRI documentation and reiterated by the BRT Project documentation.[45] In the Office of Historic Preservation's Built Environment Resources Directory, the property now bears a status code of "2S2" indicating that it is an "Individual property determined eligible for the National Register by a consensus through the Section 106 process. Listed in the California Register."[46] The Project site is therefore a historical resource pursuant to CEQA.

The Project's remaining components are significant and warrant preservation. The Historic Preservation Commission concluded that the Project was a City Landmark because they determined that the property met the following criteria:

1. Architectural Merit:
    a. Property that is the first, last, only or most significant architectural property of its type in the region;
    b. Properties that are prototypes of or outstanding examples of periods, styles, architectural movements or construction, or examples of the more notable works of the best surviving work in a region of an architect, designer or master builder;
    c. Architectural examples worth preserving for the exceptional values they add as part of the neighborhood fabric.[47]
2. Cultural value: Structures, sites and areas associated with the movement or evolution of religious, cultural, governmental, social and economic developments of the City.
3. Educational value: Structures worth preserving for their usefulness as an educational force.
4. Historic value: Preservation and enhancement of structures, sites and areas that embody and express the history of Berkeley/Alameda County/California/United States. History may be social, cultural, economic, political, religious or military.[48]

While the Staff Report states that the City may not consider the City Landmark designation as a CEQA factor since it post-dated the Applicant's SB 330 Application, the City must still evaluate whether the Project would result in

---

[45] Notice of Exemption, Attachment 2, Historic Resources Evaluation, p. 49 of 320.
[46] *Id.*
[47] P. 17 of 63.
[48] City of Berkeley, Landmarks Preservation Commission Staff Report, 2274 Shattuck Avenue – United Artists Theater Demolition Referral: Use Permit (#ZP2023-0079) p. 9 of 63; 17 of 63. Available at: https://berkeleyca.gov/sites/default/files/documents/2024-02-01_LPC_Item%207_2274%20Shattuck_Demolition_Staff%20Report%20and%20Attachment.pdf.

substantial adverse effects to the significance of the resource. Here, the Project would impact the significant of the UA Theater as a listed California Historic Resource, as well as by being inconsistent with the Secretary of the Interior's Standards for Rehabilitation.[49]

First, the Project will not comply with Standard 1.[50] Standard 1 requires that "A property will be used as it was historically or be given a new use that requires minimal change to its distinctive materials, features, spaces and spatial relationships."[51] The Project will not be used as a theater as it was historically.[52] The Project also requires substantial change to convert the theater into a 17-story high-rise mixed use residential building.

Second, the Project will not comply with Standard 4. Standard 4 requires that "Changes to a property that have acquired historic significance in their own right will be retained and preserved."[53] Only the upper façade is being maintained, the other features of the façade and the building that have acquired historical significance in their own right will be demolished.

Third, the Project will not comply with Standard 9. Standard 9 requires that "New additions, exterior alterations or related new construction will not destroy historic materials, features and spatial relationships that characterize the property. The new work will be differentiated from the old and will be compatible with the historic materials, features, size, scale and proportion, and massing to protect the integrity of the property and its environment."[54] The design of the Project, with its modern features and massive scale, is not compatible with the size, scale and proportion of the historical property. The incompatibility of the scale is visible the project rendering below.[55]

[53] Code of Federal Regulations, Title 36, Chapter 1, Part 68.3 (b).
[54] *Id.*
[55] Staff Report, p. 83 of 142.

The Project Applicant attests that "[g]iven the project's eligibility for a Class 31 exemption, and the findings in the [Project Impact Analysis], the Project cannot legally be deemed to have a significant impact on historical resources."[56] This is not correct. If the ZAB determines that that implementation of the Project **will not** be consistent with the Secretary of Interior's Standards for Rehabilitation pursuant to the SOI Standards for the Treatment of Historic Properties with Guidelines for Preserving, Rehabilitating, Restoring, & Reconstructing Historic Buildings (1995, rev. 2017), then ZAB may determine that the Project does not qualify for a CEQA Exemption.

Substantial evidence presented herein and, in the record, supports a fair argument that the Project results in a significant impact to historical resources, precluding reliance on a CEQA exemption for Project approval. The ZAB should remand the Project to Staff to prepare a legally adequate EIR analyzing the Project's significant environmental impacts before the Project can be approved.

[56] Staff Report, p. 115 of 142.

III. CONCLUSION

Without providing community benefits or workforce standards, the Project would be precisely the type of project that the City has declared to be contrary to the general welfare. This Project should not be approved until the ZAB is presented with substantial evidence demonstrating that the Project will comply with the zoning ordinance and General Plan by providing employment opportunities for a local skilled construction workforce.

The ZAB should remand the Project to prepare a legally adequate environmental impact report ("EIR") to adequately analyze and mitigate the Project's potentially significant environmental impacts with respect to water quality, public health, air quality and greenhouse gas emissions before the Project can lawfully be approved.

Thank you for considering our comments. Please place this comment letter in the record of proceedings for this matter.

Sincerely,

Kelilah D. Federman

SUBJECT: 2274 Shattuck Project Staff Report, Comments on the Noise and Vibration Analysis

Dear Ms. Federman,

Per your request, I have reviewed the subject matter documents for the 2274 Shattuck Avenue Project (Project) Staff Report in Berkeley, California. The Staff Report includes the Applicant's filing (Attachment 3) which includes a Noise Impact Analysis as its Attachment 5 (Noise Memo). The project would demolish existing structures while retaining the historic façade along Shattuck Avenue and construct a 17 story high rise building. The project is subject to Berkeley's Downtown Area Plan.

Wilson Ihrig, Acoustical Consultants, has practiced exclusively in the field of acoustics since 1966. During our 58 years of operation, we have prepared hundreds of noise studies for Environmental Impact Reports and Statements. We have one of the largest technical laboratories in the acoustical consulting industry. We also utilize industry-standard acoustical programs such as Roadway Construction Noise Model (RCNM), SoundPLAN, and CADNA. In short, we are well qualified to prepare environmental noise studies and review studies prepared by others.

Project Does Not Qualify for Class 32 Exemption

The Project is subject to a Class 32 Exemption approval by the Zoning Adjustments Board. In order to approve the Project under a Class 32 Exemption, the ZAB must find that (a) The project is consistent with the applicable general plan designation and all applicable general plan policies as well as with applicable zoning designation and regulations. (b) The proposed development occurs within city limits on a project site of no more than five acres substantially surrounded by urban uses. (c) The project site has no value as habitat for endangered, rare or threatened species. (d) Approval of the project would not result in any significant effects relating to traffic, noise, air quality, or water quality. (e) The site can be adequately served by all required utilities and public services.

As described below, there would be significant noise impacts associated with the project, and the conditions of item (d) would not be met.

Pile Driving Would Generate Significant Noise and Vibration Impacts

The Noise Memo claims that no pile driving will be done (p. 10) but provides no evidence to substantiate this assertion and its claim that cast-in-place concrete piles will be sufficient to support a 17-story structure. Neither the Staff Report nor the Applicant's filing contains any mention of the foundation requirements. Pile driving would generate significant noise and vibration impacts. The FTA guidance referenced in the Noise Memo indicates that the typical noise from pile driving ranges from 95 to 101 dBA Leq. Table 1 presents the noise from impact and vibratory pile driving. Construction noise would be significant at nearby residences, and

the construction noise plan must include specific noise control measures such as sound curtains, off-site noise control, and possibly alternate daytime accommodations. Even so, these impacts could remain significant and unavoidable as sound curtains are unlikely to provide more than 5 or 10 dBA reduction. An explicit mitigation or condition to exclude impact and vibratory piles would be necessary.

Table 1 Pile Driving Noise at Near Distances

Receptor	Distance, ft (center/near)	Pile Driving Noise Level, dBA Leq	Criteria, dBA Leq	Significant?
K Street Flats[1]	150 90	85 – 91 90 – 96	70	**Yes** **Yes**
2030 Bancroft Way	180 65	84 – 90 93 – 99	70	**Yes** **Yes**
Note 1: Assumes No shielding from the Public Library to the K Street Flats				

Vibration from pile driving could be 0.17 to 1.518 in/sec PPV at a distance of 25 ft, which are much higher than grading equipment considered in the Noise Memo. At the closest building (the Berkeley Public Library which is less than 10 ft from the nearest edge of the Project footprint), pile driving would exceed the 0.3 in/sec criteria and be significant. See Table 2. An explicit mitigation or condition to exclude impact and vibratory piles would be necessary.

Table 2 Impact Pile Driving Near Distances

Receptor	Distance, ft (near)	Pile Driving Vibration (PPV in/sec)	Criteria, PPV in/sec	Significant?
Berkeley Public Library	15 <10	0.366 - 3.266 0.672 – 6.000	0.3	**Yes** **Yes**

Construction of a High Rise Would Generate Significant Noise Impacts

The Noise Memo conducted their construction noise analysis by averaging the moving sources (excavators and graders) over the entire site; but, these calculations should also be done for the closest distances, which is 65 ft to 2030 Bancroft Way. See Table 3. Construction noise would be significant at 2030 Bancroft Way, and the construction noise plan must include specific noise control measures such as sound barriers, buffer distances, and exclusion of specific activities and equipment.

Demolition equipment, backup generators, compressors, deliveries, etc. should also be identified in the analysis, as much of this activity could be staged on Bancroft Way.

Table 3 Grading Construction Noise at Near Distances

Receptor	Distance, ft (center/near)	Construction Noise Level, dBA Leq	Criteria, dBA Leq	Significant?
2030 Bancroft Way	180 65	66.8 75.6	70	No **Yes**
Adapted from Noise Memo, Table 6				

The Noise Memo lacks any discussion of the noise from erecting a high rise, which includes a tower crane, arc welding, construction elevators, equipment delivery, etc. These activities would rise above the Berkeley Public Library building, and the noise could be comparable to or higher than grading and would be significant.

Noise Analysis Lacks Adequate Baseline Noise Data

The Noise Memo references the Berkeley General Plan from 2002 and references the L_{dn} which is a 24-hour noise metric. The Noise Memo lacks any validation of this noise data, and it provides no documentation of existing nighttime conditions. In particular, there is no data to document the noise levels toward the center of the block where traffic noise is shielded by buildings. Without this current data the Noise Memo lacks the basis to draw conclusions regarding substantial, and potentially significant increases in the noise environment caused by the Project. Nighttime environments in the Bay Area that are shielded from traffic could be on the order of 35 to 45 dBA on an hourly Leq basis.

Noise from Operation of a High Rise is Potentially Significant

The Noise Memo applies noise from "typical residential heating, ventilation, and air conditioning (HVAC) systems", omitting any acknowledgement that this would be a high-rise structure, with additional needs for common areas and non-residential areas. The project plans show several mechanical rooms on the ground floor (Drawing A0.3B, p. 64 of 142) which appears to be contrary to the floor plan shown in the previous page (Drawing A0.3A, p. 63 of 142). There is no additional MEP space shown on the roof or at an intermediate floor or mezzanine and based on our experience with high rise projects the MEP space allocated in the drawings is inadequate. These kinds of structures require HVAC systems that are much larger than the "typical" referenced in the Noise Memo. Large, air-cooled chillers can have a sound power level 90 to 110 dBA; contained within a reverberant mechanical room with standard louvers the noise reaching the nearest neighbor at 2030 Bancroft Way from two chillers could reach 50 to 70 dBA during constant operation, which could represent a up to a 35 dBA increase over the baseline environment during the nighttime. This kind of increase would contribute to sleep disturbance which would be significant.

Conclusions

The noise and vibration analysis for the project contains substantial omissions errors. Correcting these issues would identify that Project would generate additional significant noise impacts and warrant an Environmental Impact Report (EIR) that includes mitigation measures to manage the anticipated impacts and full disclosure of any impacts that would remain significant.

Please feel free to contact me with any questions on this information.

Very truly yours,

Hello,

I see that my letter plus attached documents was not included in the supplemental packet for the meeting tonight, even though I submitted it well before the 5pm deadline on Friday.

Can you please make sure it is distributed to the ZAB members?

thanks
Laura

Re: item #6 on 12/12 agenda (2274 Shattuck Ave.)
Include two attachments: June 21 and Aug. 2 reports from Rincon Consultants

Dec. 10, 2024

Dear members of the Berkeley Zoning Adjustments Board:

I'm urging you to follow state law and not vote to destroy the United Artists theater in downtown Berkeley, the magnificent art deco theater that closed in February 2023 after operating for 91 years. This palatial theater was built by Hollywood giants Charlie Chaplin and Mary Pickford; it's the last theater standing from the original United Artists chain that could be preserved.

I fear that your board will rubber-stamp approval of the housing project DESPITE ample evidence the theater is a "historical resource" under state law. At the start of this year, the city outlined CEQA review according to the facts, and it is now allowing the developer an end-run about this landmark California law with no apparent basis. Fearing lawsuits from developers doesn't justify not following the law.

From the Aug. 2 "peer review" report from Rincon Consultants, which strongly raises the question of whether the city is following the law in granting the categorical CEQA exemption under AB 1633:

"Though several aspects of its distinctive Art Deco design are proposed to be retained, the proposed demolition of the former theater auditorium would result in loss of integrity of design, materials, workmanship, feeling and association. It would no longer reflect its historic significance for its role in the Depression-era development of Downtown Berkeley, specifically as a purpose-built entertainment venue for motion pictures. The proposed project

would result in a substantial adverse change and it would no longer retain its architectural and historic identity for which it is significant, resulting in a significant and unavoidable impact to historical resources pursuant to CEQA.

While building housing is important, the state housing fast-track laws passed since 2017 have swung the pendulum too far -- they have robbed cities of local control over planning and inhibit citizen input. But the city of Berkeley has also been part of the problem. This housing project has arrived on your agenda after months of actions by the city planning department that were nontransparent, underhanded, and arguably plain secretive. For instance, our group was told for months (in winter and spring) that the project was “on hold” when fact the developer had demanded the categorical CEQA exemption, showing the project was very much in the works. We were not told about the exemption request until months after it happened, even though we asked if such a thing had happened. It was not posted to the public records archive in a timely matter.

Also, May through October, our group was calling on the city to get a peer review evaluation of the developer’s HRE. (Please note that hundreds of citizens sent letters saying the developer’s biased HRE could not be considered the final say on the historic status of the theater.) We were not notified that two reports were obtained and that the reports’ conclusions disagreed with the developer and supported the theater being a historical resource under CEQA. These reports weren’t made public; they weren’t posted in a timely manner to the city’s records archive. They were only made public in early October, AFTER the city decided to grant the developer the fateful categorical exemption to CEQA, ensuring, city officials say, your rubberstamp of the project.

So, something is majorly WRONG when a supposedly public board has no choice but to approve a major housing project that will result in the destruction of a landmark theater that is a historic resource under CEQA. Something is wrong when this is the first time the project has gone before ZAB, when this project has not been properly vetted before the public.

What do ZAB members think about their loss of power to shape planning? Are you a public board in name only? Even if you favor housing construction, why not speak out about this over-reach by the state?

People are watching as city officials like you preside over the loss of historic movie theaters and do nothing to invigorate a lifeless downtown. The city center can’t be, as one LPC member quipped, just “a pile of bedrooms.”

Sincerely,
Laura Linden

> > I am very disappointed to hear that you are seriously considering approving the granting of the categorical exemption to the United Artists Theater. It did not comply with the Downtown Area plan, which should have prevented a categorical exemption from being granted in the first place. However, City Planner Sharon Gong's lack of communication of the violation of the Berkeley Downtown Area Plan (the standards protecting the cinemas were objective, by the way) in the required timeframe should still not have qualified the theater for a categorical exemption. That's because categorical exemptions to CEQA shall not apply to properties listed on the California Register of Historical Resources. The protections to the facade as proposed are insufficient.
> >
> > While I admire the efforts to build more housing in Berkeley, it is also important to protect the very purpose of Downtown Berkeley as it was envisioned and planned for in the extensive city planning process that created the Downtown Area Plan. Removing the last remaining theater - that is historically protected - will, I'm afraid, be detrimental to the vibrancy of Downtown. The cost of building the additional housing at this particular site is too significant of one and I'm afraid the project as planned would irreparably harm the land uses throughout Downtown that are interconnected and currently very vulnerable.

This project merits a CEQA review to assess the change to the land use and to the historical resource.

WARNING: This is not a City of Berkeley email. Do not click links or attachments unless you trust the sender and know the content is safe.

Dear members of the Berkeley Zoning Adjustment Board,

Like many residents of Berkeley, I have watched in sadness as we lose so many of the attractions of our once vibrant downtown area. Family-owned restaurants have closed that will never be able to afford to return to the area, and beautiful movie theaters are being destroyed to make way for apartments and condos that Berkeley residents most in need of permanent housing won't be able to afford. Now we have the opportunity to retain a glorious art deco movie palace right in the heart of downtown, adjacent to our gorgeous art deco library, but it seems as if we are squandering that opportunity to meet the needs of a commercial real estate developer rather than the needs of the community.

This loss is painful not just out of a sense of nostalgia, but also because it should not be happening in the first place. Two reports from the Rincon Group recommended that a CEQA exemption should not be granted, including the following statement: "Pursuant to Section 15064.5(b) of the CEQA Guidelines, material impairment of a historical resource occurs when a property is altered such that it is no longer able to convey its historical significance. The proposed project would result in material impairment. Though several aspects of its distinctive Art Deco design are proposed to be retained, the proposed demolition of the former theater auditorium would result in loss of integrity of design, materials, workmanship, feeling and association. It would no longer reflect its historic significance for its role in the Depression-era development of Downtown Berkeley, specifically as a purpose-built entertainment venue for motion pictures. The proposed project would result in a **substantial adverse change** and it would no longer retain its architectural and historic identity for which it is significant, resulting in a significant and unavoidable impact to historical resources pursuant to CEQA."

Once demolished, this theater cannot be recreated. It cannot be rebuilt. Generic high-rise housing complexes can be built literally anywhere, but we should not be destroying architecturally important buildings in order to build them.

Please do not rubber stamp this development.

Best regards,
Sonia Mistry
Berkeley Resident

Subject: Please approve housing at 2274 Shattuck

WARNING: This is not a City of Berkeley email. Do not click links or attachments unless you trust the sender and know the content is safe.

Commission Zoning Adjustments Board Berkeley,

I am writing to urge you to approve the proposed housing development at 2274 Shattuck, ASAP and with urgency.

Opponents have argued that this site should be preserved as a historic building, but there is no practical, safe, or affordable way for that to happen, as demonstrated by in-depth structural and historical analyses of the building. The interior of the building has been renovated extensively, such that it resembles a modern-day, utilitarian multiplex. Only the façade and lobby retain their original architectural features, and the developer has proposed restoring and preserving those features.

Despite an extreme overreach by staff that requested landmarking the entire structure, even the Landmarks Preservation Commission dialed back the preservation portion to cover only the façade and lobby, as the developer had proposed. The existing building is seismically unsound and poses a health and safety risk to the public, but the housing development proposed at the site could address these issues.

There is a way to honor the history of the theater while also building badly-needed housing, and this proposal aims to do just that.

This project will provide 227 affordable-by-design units which are suitable for students, young professionals, and families. The project also provides 23 very low-income affordable units. It will contribute more than $7M in Building Permit and Impact Fees to the City of Berkeley, and it will also contribute ~$2M annually to the property tax base.

It’s long past time for this project to break ground. Please support it so that we can move forward.

Sincerely,

Subject: Berkleyans resisting cultural homogenization

WARNING: This is not a City of Berkeley email. Do not click links or attachments unless you trust the sender and know the content is safe.

This article speaks to those of us resisting **cultural homogenization**: https://tinyurl.com/4jdrch47

Excerpt: Historically, allopatry was higher even among cosmopolitan places, affording the chance for *local culture* to exist at high-traffic crossroads. This is why Florence looks like Florence, Shanghai looks like Shanghai, and Timbuktu looks like Timbuktu [in US, Santa Fe could be an example because the City has imposed certain building codes]. Internationalism is the reason that absolutely everywhere seems to look a little like Vancouver. A long-dominant architectural style was even called 'the International Style', a conscious nod to the fact that the loss of insularity of place is scraping the planet clean of local style. . . .

This means 'thinking small', making decisions that affect a narrower sphere, but in more profound ways. Real culture – and one's sanity – rests on not concerning oneself *too much* with the grand affairs of the nation and the world. It rests on realising that what matters is the busy trade in coffee and pastry at Sophia's ramshackle café down the street; the street with the matched ceramic flower boxes made by Lupe, who teaches pottery at the high school, and installed by Richard the handyman, who hosts Christmas drinks on the 22nd every year. So what part are you playing? Are you patronising the café, planting flowers, hosting events? Or are you caught up in the culture of the nation while the culture of your street rots?
