EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1920 through 2017. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 660 feet of the target property.

A summary of the information obtained is provided in the text of this report.

RECORD SOURCES

EDR's Digital Archive combines historical directory listings from sources such as Cole Information and Dun & Bradstreet. These standard sources of property information complement and enhance each other to provide a more comprehensive report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer. Reproduction of City Directories without permission of the publisher or licensed vendor may be a violation of copyright.

Stormwater Requirements Checklist

Municipal Regional Stormwater Permit (MRP 2.0)
Stormwater Controls for Development Projects

City of Berkeley
Public Works Dept.
Engineering Division

I. C.3.i Project Information

This form applies to development projects creating and/or replacing ≥ 2500 ft² to < 10,000 ft² of impervious surface which are not Special Land Use Categories projects (auto service facilities, retail gasoline outlets, restaurants, and uncovered parking lots). This form also applies to detached single-family home projects, which create and /or replace ≥ 2500 ft² of impervious surface. Interior remodeling projects and routine maintenance or repair projects such as roof or exterior wall surface replacement and pavement resurfacing within the existing footprint are exempt from C.3.i stormwater requirement.

I.A. Enter Project Data

I.A.1 Project Name: 2274 Shattuck Ave Mixed-use

I.A.2 Project Address (include cross street): 2274 Shattuck Ave. (at Bancroft Way)

I.A.3 Project APN: 57-2028-3

I.A.4 Project Watershed[1]: Potter & Derby Creeks

I.A.5 Applicant Name: Isaiah Stackhouse

I.A.6 Date Submitted: 4/26/2023

I.A.7 Applicant Address: 2421 Fourth St. Berkeley, CA 94710

I.A.8 Applicant Phone: 510-659-1414

I.A.9 Applicant Email Address: isaiah@trachtenbergarch.com

I.A.10 Development type: (check all that apply)

☑ Residential ☐ Commercial ☐ Industrial ☑ Mixed-Use ☐ Streets, Roads, etc.

☑ 'Redevelopment' as defined by MRP: creating, adding and/or replacing exterior existing impervious surface on a site where past development has occurred[2]

☐ 'Special land use categories' as defined by MRP: (1) auto service facilities[3], (2) retail gasoline outlets, (3) restaurants[3], (4) uncovered parking area (stand-alone or part of a larger project)

I.A.11 Project Description[4]: (Also note any past or future phases of the project.) Partial removal of existing commercial structures to construct a new 17-story mixed use building with 227 dwelling units, ground level lobbies, commercial space, and parking with state of California density bonus.

I.A.12 Total Area of Site: 0.51 acres

I.A.13 Slope on Site: 2.5 %

I.A.14 Total Area of land disturbed during construction (include clearing, grading, excavating and stockpile area: 0.51 acres.

I.B. Enter the amount of impervious and pervious surface[1] created and/or replaced by the project.

Table of Impervious and Pervious Surfaces

Type of Impervious Surface	a Pre-Project Impervious Surface (sq.ft.)	b Existing Impervious Surface to be Replaced[7] (sq.ft.)	C New Impervious Surface to be Created[7] (sq.ft.)	d Post-project pervious surface (sq.ft.)
Roof area(s) – excluding any portion of the roof that is vegetated ("green roof")	20,770	15,490	0	
Impervious[5] sidewalks, patios, paths, driveways	984	984	1,702	
Impervious[5] uncovered parking[6]	0	0	0	N/A
Streets (public)		N/A	N/A	
Streets (private)		N/A	N/A	
Totals:		16,474	1,702	
Area of Existing Impervious Surface to remain in place	0	N/A		
Total New Impervious Surface *(sum of totals for columns b and c):*		18,176		

[1] Watershed is defined by the maps from the Alameda County Flood Control District at http://acfloodcontrol.org/resources/explore-watersheds

[2] Roadway projects that replace existing impervious surface are subject to C.3 requirements only if one or more lanes of travel are added.
[3] Standard Industrial Classification (SIC) codes are in Section 2.3 of the C.3 Technical Guidance (download at www.cleanwaterprogram.org)
[4] Project description examples: 5-story office building, industrial warehouse, residential with five 4-story buildings for 200 condominiums, etc.
[5] Per the MRP, pavement that meets the following definition of pervious pavement is NOT an impervious surface. Pervious pavement is defined as pavement that stores and infiltrates rainfall at a rate equal to immediately surrounding unpaved, landscaped areas, or that stores and infiltrates the rainfall runoff volume described in Provision C.3.d.
[6] Uncovered parking includes top level of a parking structure.
[7] "Replace" means to install new impervious surface where existing impervious surface is removed. "Create" means to install new impervious surface where there is currently no impervious surface.

I.C. Identify C.6 Construction-Phase Stormwater Requirements

		Yes	No
I.C.1	Does the project disturb 1.0 acre (43,560 sq.ft.) or more of land? (See Item I.A.14). *If Yes, obtain coverage under the state's Construction General Permit at https://smarts.waterboards.ca.gov/smarts/faces/SwSmartsLogin.jsp. Submit to the municipality a copy of your Notice of Intent and Storm Water Pollution Prevention Plan (SWPPP) before a grading or building permit is issued.*	☐	☑
I.C.2	Is the site a "High Priority Site" that disturbs less than 1.0 acre (43,560 sq.ft.) of land? (Municipal staff will make the final determination.) "High Priority Sites" are sites having any of the following criteria: ▪ that require a grading permit, ▪ are adjacent to a creek, ▪ or are otherwise high priority for stormwater protection during construction (see MRP 2.0 Provision C.6.e.ii.(2)(c))	☐	☑
I.C.3	Is the site a "Hillside Site" that disturbs 5,000 sq.ft. or more, but less than 1.0 acre (43,560 sq.ft.) of land? (Municipal staff will make the final determination.) ▪ "Hillside Sites" are located on hillsides, as indicated on a jurisdictional map of hillside development areas or as indicated by meeting jurisdictional hillside development criteria. ▪ If no map or criteria exist, then Hillside Sites are sites with a slope of 15% or more (see I.A.13 above and MRP 2.0 Provision C.6.e.ii.(2)(b)).	☐	☑

➢ NOTE TO APPLICANT: All projects require appropriate stormwater best management practices (BMPs) during construction. Refer to the Section II to identify appropriate construction BMPs.

➢ NOTE TO MUNICIPAL STAFF: If the answer is "Yes" to I.E.1, I.E.2, OR I.E.3, refer this project to construction site inspection staff to be added to their list of projects that require stormwater inspections at least monthly during the wet season (October 1 through April 30) and other times of the year as appropriate.

II. Implementation of C.3.i Stormwater Requirements

II.A. Select Appropriate Site Design Measures

Starting December 1, 2012, projects that create and/or replace 2,500 - 10,000 sq.ft. of impervious surface, and stand-alone single family homes that create/replace 2,500 sq.ft. or more of impervious surface, **must include one or more of the following Site Design Measures a through f**, and are encouraged to implement the other Site Design Measures as practicable. See attached fact sheets for guidance on rain barrels / cisterns, vegetated areas and permeable surfaces, and attached sheets on recommended Source Control Measures and Construction BMPs.

II.A.1 Is the site design measure included in the project plans?

Yes	No	Plan Sheet No.	
☐	☑		a. Direct roof runoff into cisterns or rain barrels and use rainwater for irrigation or other non-potable use.
☑	☐		b. Direct roof runoff onto vegetated areas.
☑	☐		c. Direct runoff from sidewalks, walkways, and/or patios onto vegetated areas.
☐	☑		d. Direct runoff from driveways and/or uncovered parking lots onto vegetated areas.
☐	☑		e. Construct sidewalks, walkways, and/or patios with pervious surfaces. Use the specifications in the C3 Technical Guidance (Version 4.1) or for small projects see the BASMAA Pervious Paving Factsheet. For these documents and others go to www.cleanwaterprogram.org and click on "Resources."
☐	☑		f. Construct bike lanes, driveways, and/or uncovered parking lots with pervious surfaces. Use the specifications in the C3 Technical Guidance (Version 4.1) or for small projects see the BASMAA Pervious Paving Factsheet. For these documents and others go to the program website at: www.cleanwaterprogram.org and click on "Resources."
☐	☑		g. Minimize land disturbance and impervious surface (especially parking lots).
☐	☑		h. Maximize permeability by clustering development and preserving open space.
☐	☑		i. Use micro-detention, including distributed landscape-based detention.
☐	☑		j. Protect sensitive areas, including wetland and riparian areas, and minimize changes to the natural topography.
☑	☐		k. Self-treating area (see Section 4.1 of the C.3 Technical Guidance)
☐	☑		l. Self-retaining area (see Section 4.2 of the C.3 Technical Guidance)
☑	☐		m. Plant or preserve interceptor trees (Section 4.5, C.3 Technical Guidance)

II.B. C.3.i projects are encouraged to implement the following Source Control Measure as practicable.

Are these features in project? Yes	No	Features that require source control measures	Source control measures (Refer to Local Source Control List for detailed requirements)	Is source control measure included in project plans? Yes	No	Plan Sheet No.
☑	☐	Storm Drain	Mark on-site inlets with the words "No Dumping! Flows to Bay" or equivalent.	☐	☐	
☑	☐	Floor Drains	Plumb interior floor drains to sanitary sewer[8] [or prohibit].	☐	☐	
☐	☑	Parking garage	Plumb interior parking garage floor drains to sanitary sewer.[9]	☐	☐	
☑	☐	Landscaping	▪ Retain existing vegetation as practicable. ▪ Select diverse species appropriate to the site. Include plants that are pest- and/or disease-resistant, drought-tolerant, and/or attract beneficial insects. ▪ Minimize use of pesticides and quick-release fertilizers. ▪ Use efficient irrigation system; design to minimize runoff.	☐	☐	
☐	☑	Pool/Spa/Fountain	Provide connection to the sanitary sewer to facilitate draining.[9]	☐	☐	
☐	☑	Food Service Equipment (non-residential)	Provide sink or other area for equipment cleaning, which is: ▪ Connected to a grease interceptor prior to sanitary sewer discharge.[9] ▪ Large enough for the largest mat or piece of equipment to be cleaned. ▪ Indoors or in an outdoor roofed area designed to prevent stormwater run-on and run-off, and signed to require equipment washing in this area.	☐	☐	
☑	☐	Refuse Areas	▪ Provide a roofed and enclosed area for dumpsters, recycling containers, etc., designed to prevent stormwater run-on and runoff. ▪ Connect any drains in or beneath dumpsters, compactors, and tallow bin areas serving food service facilities to the sanitary sewer.[9]	☐	☐	
☑	☐	Outdoor Process Activities [9]	Perform process activities either indoors or in roofed outdoor area, designed to prevent stormwater run-on and runoff, and to drain to the sanitary sewer.[9]	☐	☐	
☐	☑	Outdoor Equipment/ Materials Storage	▪ Cover the area or design to avoid pollutant contact with stormwater runoff. ▪ Locate area only on paved and contained areas. ▪ Roof storage areas that will contain non-hazardous liquids, drain to sanitary sewer[9], and contain by berms or similar.	☐	☐	
☐	☑	Vehicle/ Equipment Cleaning	▪ Roofed, pave and berm wash area to prevent stormwater run-on and runoff, plumb to the sanitary sewer[9], and sign as a designated wash area. ▪ Commercial car wash facilities shall discharge to the sanitary sewer.[9]	☐	☐	
☐	☑	Vehicle/ Equipment Repair and Maintenance	▪ Designate repair/maintenance area indoors, or an outdoors area designed to prevent stormwater run-on and runoff and provide secondary containment. Do not install drains in the secondary containment areas. ▪ No floor drains unless pretreated prior to discharge to the sanitary sewer.[9] ▪ Connect containers or sinks used for parts cleaning to the sanitary sewer.[9]	☐	☐	
☐	☑	Fuel Dispensing Areas	▪ Fueling areas shall have impermeable surface that is a) minimally graded to prevent ponding and b) separated from the rest of the site by a grade break. ▪ Canopy shall extend at least 10 ft in each direction from each pump and drain away from fueling area.	☐	☐	
☐	☑	Loading Docks	▪ Cover and/or grade to minimize run-on to and runoff from the loading area. ▪ Position downspouts to direct stormwater away from the loading area. ▪ Drain water from loading dock areas to the sanitary sewer.[9] ▪ Install door skirts between the trailers and the building.	☐	☐	
☐	☑	Fire Sprinklers	Design for discharge of fire sprinkler test water to landscape or sanitary sewer.[9]	☐	☐	
☐	☑	Miscellaneous Drain or Wash Water	▪ Drain condensate of air conditioning units to landscaping. Large air conditioning units may connect to the sanitary sewer.[9] ▪ Roof drains shall drain to unpaved area where practicable. ▪ Drain boiler drain lines, roof top equipment, all washwater to sanitary sewer[9].	☐	☐	
☐	☑	Architectural Copper	▪ Discharge rinse water to sanitary sewer[9], or collect and dispose properly offsite. See flyer "Requirements for Architectural Copper."	☐	☐	

[8] Any connection to the sanitary sewer system is subject to sanitary district approval.
[9] Businesses that may have outdoor process activities/equipment include machine shops, auto repair, industries with pretreatment facilities.

II.C Implement Construction Best Management Practices (BMPs) where applicable.

Yes	No	Best Management Practice (BMP)
☑	☐	Attach the municipality's construction BMP plan sheet to project plans and require contractor to implement the applicable BMPs on the plan sheet.
☑	☐	Temporary erosion controls to stabilize all denuded areas until permanent erosion controls are established.
☑	☐	Delineate with field markers clearing limits, easements, setbacks, sensitive or critical areas, buffer zones, trees, and drainage courses.
☑	☐	Provide notes, specifications, or attachments describing the following: ▪ Construction, operation and maintenance of erosion and sediment controls, include inspection frequency; ▪ Methods and schedule for grading, excavation, filling, clearing of vegetation, and storage and disposal of excavated or cleared material; ▪ Specifications for vegetative cover & mulch, include methods and schedules for planting and fertilization; ▪ Provisions for temporary and/or permanent irrigation.
☑	☐	Perform clearing and earth moving activities only during dry weather.
☑	☐	Use sediment controls or filtration to remove sediment when dewatering and obtain all necessary permits.
☑	☐	Protect all storm drain inlets in vicinity of site using sediment controls such as berms, fiber rolls, or filters.
☑	☐	Trap sediment on-site, using BMPs such as sediment basins or traps, earthen dikes or berms, silt fences, check dams, soil blankets or mats, covers for soil stock piles, etc.
☑	☐	Divert on-site runoff around exposed areas; divert off-site runoff around the site (e.g., swales and dikes).
☑	☐	Protect adjacent properties and undisturbed areas from construction impacts using vegetative buffer strips, sediment barriers or filters, dikes, mulching, or other measures as appropriate.
☑	☐	Limit construction access routes and stabilize designated access points.
☑	☐	No cleaning, fueling, or maintaining vehicles on-site, except in a designated area where washwater is contained and treated.
☑	☐	Store, handle, and dispose of construction materials/wastes properly to prevent contact with stormwater.
☑	☐	Contractor shall train and provide instruction to all employees/subcontractors re: construction BMPs.
☑	☐	Control and prevent the discharge of all potential pollutants, including pavement cutting wastes, paints, concrete, petroleum products, chemicals, washwater or sediments, rinse water from architectural copper, and non-stormwater discharges to storm drains and watercourses.

TRACHTENBERG ARCHITECTS

www.TrachtenbergArch.com

2274 Shattuck Ave. Mixed Use

Berkeley, CA 94703
April 26, 2022

III.B.1 Housing Affordability Statement

- How the project complies with the Affordable Housing Mitigation Fee Ordinance (rental projects) or the Berkeley Inclusionary Ordinance (condo or live/work projects)
- Level of affordability that will be provided and/or fee that will be paid
- Number and location of any affordable units
- Size and amenities (bedrooms, bathrooms, parking facilities) of affordable units

As a rental project and a Density Bonus project, the project will be providing a minimum of 23 units which are to be affordable to Very Low-Income Households as defined in Section 50105 of the Health and Safety Code (see Density Bonus Eligibility Statement for reference). To comply with City of Berkeley Affordable Housing rental requirements, the project will also be providing additional Affordable Units and/or/or-in-combination-with providing an in-lieu Mitigation Fee per the City of Berkeley requirements.

Per the calculations on Sheet A0.3, the project will be providing 23 dwelling units affordable to Very-Low Income Households.

The Affordable Units are proposed to be evenly located throughout the project, be of the same size and contain on average the same number of bedrooms as the market rate units in the project, and shall be comparable with the design or use of market rate units in terms of appearance, materials and finish quality. The proposed locations will be dispersed evenly over the 17 residential floors and the percentage of each unit type are the closest possible match to the unit-type percentages of the overall building. Please note that the locations and distribution of the affordable units are still to be determined.

April 26, 2023

B.1b. Anti-Discriminatory Housing Statement

Submit a written statement answering the following questions and **provide** the requested documentation, if applicable:

1. Does the applicant or sponsor, including the applicant or sponsor's parent company, subsidiary, or any other business or entity with an ownership share of at least 30% of the applicant's company, engage in the business of developing real estate, owning properties, or leasing or selling individual dwelling units in states or jurisdictions outside of California?No

2. If the answer to (1) is yes, in which states?

3. If the answer to (1) is yes, does the applicant or sponsor, as defined in (1), have policies in individual states that prohibit discrimination based on sexual orientation, gender identity, and/or gender expression in the sale, lease, or financing of any dwelling units enforced on every property in the state or states where the applicant or sponsor has an ownership or financial interest?

4. If the answer to (1) is yes, does the applicant or sponsor, as defined in (1), have a national policy that prohibits discrimination based on sexual orientation and gender identity in the sale, lease, or financing of any dwelling units enforced on every property in the United States where the applicant or sponsor has an ownership or financial interest in property?

5. If the answer to (3) or (4) is yes, please provide a copy of that policy or policies as part of the application to the Planning Department.

Density Bonus Eligibility Statement

a. Number of "base project" units: 151 Units.
b. Number of affordable units and level of affordability: 23-Units (15%) affordable to Very Low-Income Households as defined in Section 50105 of the Health and Safety Code.
c. Percent density bonus requested and allowed under Section 65915: 50%.
d. Waivers or modifications of developments standards necessary to accommodate density bonus:
    - Increase the maximum building height to accommodate the density bonus units.
    - Reduce required setbacks to accommodate the density bonus units.
    - Reduce the required amount of open space to accommodate the density bonus units.
    - Reduce the required amount of bike parking to accommodate the density bonus units.
e. Explanation of why each waiver or modification is needed to accommodate density bonus: Following the guidelines provided in the City's "*Conceptual Approach to Implementing Density Bonus Law In Berkeley, February 22, 2013",* the density bonus units are added to the Base Project which "reflects the proposed project's building separation, open space location, and parking location", via additional the following waivers or modifications to accommodate additional dwelling units:
    - Building height, setbacks, open space, and bike parking waivers are needed to accommodate the density bonus units.

Request for Incentives or Concessions

Under Section 65917, as a project which provides15 percent very low-income units, the project is eligible for three incentives or concession which results in identifiable and actual cost reductions. Currently the project is not utilizing any concessions pending further processing of the project.

GreenPointRATED
A PROGRAM OF BUILD IT GREEN

NEW HOME RATING SYSTEM, VERSION 9.0

MULTIFAMILY

The GreenPoint Rated checklist tracks green features incorporated into the home. GreenPoint Rated is administered by Build It Green, a non-profit whose mission is to promote healthy, energy and resource efficient buildings.
The minimum requirements of GreenPoint Rated are: verification of 50 or more points; Earn the following minimum points per category: Commuity (2) Energy (25), Indoor Air Quality/Health (6), Resources (6), and Water (6); and meet the prerequisites depending on State. For California: CALGreen Mandatory H6.1, J5.1, J6, O1. Outside California: ICC 700 Mandatory Measures, H6.1, J5.1, O1.

The criteria for the green building practices listed below are described in the GreenPoint Rated New Home Rating Manual v9.0. For more information please visit **www.builditgreen.org/greenpointrated**
Build It Green is not a code enforcement agency.

A home is only GreenPoint Rated if all features are verified by a Certified GreenPoint Rater and submitted through Build It Green.

New Home Multifamily Version 9.0

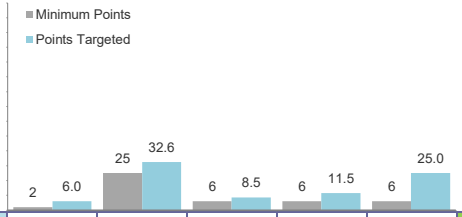
Planning Scoresheet

Points Targeted: **83.6**

Certification Level Targeted: **Silver**

Compliance Pathway Targeted: **Option 1: All Electric Compliance**

T24 Compliance Targeted: **0.3** **%**



2274 Shattuck Measures		Points Targeted	Possible Points: Community	Energy	IAQ/Health	Resources	Water	Notes
CALGreen								
Yes	**CALGreen (REQUIRED)**	4		1	1	1	1	
A. SITE								
TBD	**A1. Construction Footprint**					1		
	A2. Job Site Construction Waste Diversion							
Yes	A2.1 70% C&D Waste Diversion (Including Alternative Daily Cover)	2				2		
Yes	A2.2 Recycling Rates from Third-Party Verified Mixed-Use Waste Facility	1				1		
TBD	**A3. Recycled Content Base Material**					1		
TBD	**A4. Heat Island Effect Reduction (Non-Roof)**			1	1			
TBD	**A5. Construction Environmental Quality Management Plan Including Flush-Out**				1			
	A6. Stormwater Control: Prescriptive Path							
Yes	A6.1 Permeable Paving Material	1					1	
TBD	A6.2 Filtration and/or Bio-Retention Features						1	
TBD	A6.3 Non-Leaching Roofing Materials						1	
TBD	A6.4 Smart Stormwater Street Design		1					
TBD	**A7. Stormwater Control: Performance Path**						3	
B. FOUNDATION								
TBD	**B1. Low Carbon Concrete**					3		
TBD	**B2. Radon-Resistant Construction (Required for EPA Radon Zone 1)**				2			
TBD	**B3. Foundation Drainage System**					2		
TBD	**B4. Sealed Crawlspace**				1			
	B5. Structural Pest Controls							

2274 Shattuck		Points Targeted	Community	Energy	IAQ/Health	Resources	Water	
TBD	B5.1 Termite Shields and Separated Exterior Wood-to-Concrete Connections					1		
TBD	B5.2 Plant Trunks, Bases, or Stems at Least 36 Inches from the Foundation					1		
C. LANDSCAPE								
24.14%	Enter the landscape area percentage. Points capped at 3 for less than 15%.							
Yes	**C1. Plants Grouped by Water Needs (Hydrozoning)**	0					1	
TBD	**C2. Three Inches of Organic Mulch in Planting Beds**						1	
	C3. Resource Efficient Landscapes							
TBD	C3.1 No Invasive Species According to Region					1		
Yes	C3.2 Plants Chosen and Located to Grow to Natural Size	1				1		
Yes	C3.3 Drought Tolerant, Native, or Other Appropriate Species	3					3	
	C4. Minimal Turf in Landscape							
Yes	C4.1 No Turf on Slopes Exceeding 10% and No Overhead Sprinklers Installed in Areas Less Than Eight Feet Wide	2					2	
≤10%	C4.2 Turf on a Small Percentage of Landscaped Area	1					2	
TBD	**C5. Trees to Moderate Building Temperature**			1	1			
	C6. High-Efficiency Irrigation System							
Yes	C6.1 System Uses Only Low-Flow Drip, Bubblers or Sprinklers	2					2	
Yes	**C7. One Inch of Compost in the Top Six to Twelve Inches of Soil**	2					2	
	C8. Rainwater Harvesting System							
TBD	C8.1 Rainwater Harvesting System with 300 Gallon Storage Capacity						1	
TBD	C8.2 Rainwater to Flush Toilets or Meet 50% of Landscape Irrigation Demand						3	
TBD	**C9. Recycled Wastewater Irrigation System**						1	
Yes	**C10. Submeter or Dedicated Meter for Landscape Irrigation**	2					2	
≤0.5 Eto	**C11. Efficient Landscape Water Budget**	0					1	
	C12. Environmentally Preferable Materials for Site							
TBD	C12.1 Environmentally Preferable Materials for 70% of Hardscapes and Fencing					1		
TBD	C12.2 Play Structures and Surfaces Have an Average Recycled Content ≥20%					1		
Yes	**C13. Reduced Light Pollution**	1	1					
TBD	**C14. Large Stature Tree(s)**		1					
TBD	**C15. Third Party Landscape Program Certification**						1	
TBD	**C16. Maintenance Contract with Certified Professional**						1	
TBD	**C17. Community Garden**		2					
D. STRUCTURAL FRAME AND BUILDING ENVELOPE								
	D1. Optimal Value Engineering							
TBD	D1.1 Joists, Rafters, and Studs at 24 Inches on Center			1		2		
TBD	D1.2 Non-Load Bearing Door and Window Headers Sized for Load					1		

2274 Shattuck		Points Targeted	Community	Energy	IAQ/Health	Resources	Water	
TBD	D1.3 Advanced Framing Measures					2		
	D2. Construction Material Efficiencies							
TBD	D2.1 Prefabricated Wall or Roof Framing					2		
TBD	D2.2 Prefabricated Modular Units					6		
TBD	**D3. Engineered Beams and Headers**					1		
TBD	**D4. Insulated Headers**			1				
	D5. FSC-Certified Wood							
TBD	D5.1 Dimensional Lumber, Studs, and Timber					6		
TBD	D5.2 Panel Products					3		
	D6. Solid Wall Systems							
TBD	D6.1 At Least 90% of Floors					1		
TBD	D6.2 At Least 90% of Exterior Walls			1		1		
TBD	D6.3 At Least 90% of Roofs			1		1		
TBD	**D7. Energy Heels on Roof Trusses**			1				
TBD	**D8. Overhangs and Gutters**			1		1		
	D9. Reduced Pollution Entering the Home from the Garage							
Yes	D9.1 Detached or No Garage	2			2			
TBD	D9.2 Mitigation Strategies for Attached Garage				1			
	D10. Structural Pest and Rot Controls							
TBD	D10.1 All Wood Located At Least 12 Inches Above the Soil					1		
TBD	D10.2 Wood Framing Treated With Borates or Factory-Impregnated, or Wall Materials Other Than Wood					1		
Yes	**D11. Moisture-Resistant Materials in Wet Areas (such as Kitchen, Bathrooms, Utility Rooms, and Basements)**	2			1	1		

2274 Shattuck		Points Targeted	Community	Energy	IAQ/Health	Resources	Water	
E. EXTERIOR								
Yes	**E1. Environmentally Preferable Decking**	1				1		
TBD	**E2. Flashing Installation Third-Party Verified**					2		
TBD	**E3. Rain Screen Wall System**					2		
Yes	**E4. Durable and Non-Combustible Cladding Materials**	1				1		
Yes	**E5. Durable and Fire Resistant Roofing Materials or Assembly**	1				1		
TBD	**E6. Vegetated Roof**		2	2				
Yes	**E7. Cool Roof**	1		1				
F. INSULATION								
	F1. Insulation with 30% Post-Consumer or 60% Post-Industrial Recycled Content							
TBD	F1.1 Walls and Floors					0.5		
TBD	F1.2 Ceilings					0.5		
	F2. Low-Emitting Insulation							
TBD	F2.1 Walls and Floors				0.5			
TBD	F2.2 Ceilings				0.5			
	F3. Insulation That Does Not Contain Fire Retardants							
TBD	F3.1 Cavity Walls and Floors				1			
TBD	F3.2 Ceilings				1			
TBD	F3.3 Interior and Exterior Insulation				1			
G. PLUMBING								
	G1. Efficient Distribution of Domestic Hot Water							
Yes	G1.2 WaterSense Volume Limit for Hot Water Distribution	1					1	
Yes	G1.3 Increased Efficiency in Hot Water Distribution	2					2	
	G2. Install Water-Efficient Fixtures							
Yes	G2.1 WaterSense Showerheads ≤ 1.75 gpm	2					2	
Yes	G2.1 WaterSense Bathroom Facuets ≤ 1.0 gpm	1					1	
1.28 gpf	G2.3 WaterSense Toilets with a Maximum Performance (MaP) Threshold of No Less Than 500 Grams ≤ 1.28 gpf OR ≤ 1.1 gpf	1					2	
TBD	G2.4 Urinals with Flush Rate of ≤ 0.1 gpf						1	
TBD	**G3. Pre-Plumbing for Graywater System**						2	
TBD	**G4. Operational Graywater System**						4	
TBD	**G5. Thermostatic Shower Shut-Off Valve**						1	
Yes	**G6. Submeter Water for Tenants**	2					2	
H. HEATING, VENTILATION, AND AIR CONDITIONING								
	H1. All Electric or Sealed Combustion Units							
Yes	H1.1 Sealed Combustion Furnace or Heat Pump	1			1			

2274 Shattuck		Points Targeted	Community	Energy	IAQ/Health	Resources	Water	
Yes	H1.2 Sealed Combustion or Heat Pump Water Heater	2			2			
TBD	**H2. High Performing Zoned Hydronic Radiant Heating System**			1	1			
	H3. Effective Ductwork							
Yes	H3.1 Duct Mastic on Duct Joints and Seams	1		1				
TBD	H3.2 Pressure Balance the Ductwork System			1				
	H5. Advanced Practices for Cooling							
Yes	H5.1 ENERGY STAR® Ceiling Fans in Living Areas and Bedrooms	1		1				
TBD	H5.2 Operable Windows and Skylights Located to Induce Cross Ventilation in At Least One Room in 80% of Units			1				
	H6. Whole House Mechanical Ventilation Practices to Improve Indoor Air Quality							
Yes	H6.1 Meet ASHRAE Standard 62.2-2019 Ventilation Residential Standards	Y	R	R	R	R	R	
TBD	H6.2 Advanced Ventilation Standards				2			
TBD	H6.3 Outdoor Air is Filtered and Tempered				1			
	H7. Effective Range Design and Installation							
TBD	H7.1 Effective Range Hood Ducting and Design				1			
TBD	H7.2 Automatic Range Hood Control				1			
Yes	**H8. High Efficiency HVAC Filter (MERV 16+)**	1			1			
TBD	**H9. Advanced Refrigerants**				1			
I. RENEWABLE ENERGY								
0.0%	**I1. Onsite Renewable Generation (PV, Micro Hydro and Wind)**	0		25				
	I2. Low Carbon Homes							
TBD	I2.1 Near Zero Energy Home			2				
No	I2.2 Near Zero Energy Home with Flexibility Strategies	0		2				
	I3. Energy Storage and Thermal Load Shifting							
TBD	I3.1 Battery Energy Storage System (BESS)			2				
TBD	I3.2 Auxiliary Thermal Energy Storage System or Pre-Heating of Hot Water			1				
TBD	I3.3 Pre-Cooling Equipment for AC			1				
TBD	**I4. Solar Hot Water Systems to Preheat Domestic Hot Water**			4				
J. BUILDING PERFORMANCE AND TESTING								
TBD	**J1. Third-Party Verification of Quality of Insulation Installation**				1			
TBD	**J2. Supply and Return Air Flow Testing**			1	1			
TBD	**J3. Compartmentalization of Units**			1	1			
TBD	**J4. All Electric or Combustion Appliance Safety Testing**				1			
	J5. Building Energy Performance							
Option 1: All Electric Compliance	J5.1 All Electric Home Outperforms Title 24	25.5714		25+				All Electric Compliance - High-Rise or Low Rise meet T24.
0.0%	J5.2 Non-Residential Spaces Outperform Title 24	0.0		15				One Energy Point for Every 1%

2274 Shattuck		Points Targeted	Community	Energy	IAQ/Health	Resources	Water	
Yes	**J6. Title 24 Prepared and Signed by a CABEC Certified Energy Analyst**	1		1				
TBD	**J7. Participation in Utility Program with Third-Party Plan Review**			1				
TBD	**J8. ENERGY STAR® for Homes**			1				
No	**J9. EPA Indoor airPlus Certification**				2			
K. FINISHES								
	K1. Entryways Designed to Reduce Tracked-In Contaminants							
TBD	K1.1 Entryways to Individual Units				1			
TBD	K1.2 Entryways to Buildiings				1			
	K2. Low-VOC Interior Wall and Ceiling Paints							
TBD	K2.1 Zero-VOC Interior Wall and Ceiling Paints (< 5 gpl)				2			
TBD	**K3. Low-VOC Caulks and Adhesives**				1			
	K4. Environmentally Preferable Materials for Interior Finish							
TBD	K4.1 Cabinets					2		
TBD	K4.2 Interior Trim					2		
TBD	K4.3 Shelving					2		
TBD	K4.4 Doors					2		
TBD	K4.5 Countertops					1		
	K5. Formaldehyde Emissions in Interior Finish Exceed CARB							
TBD	K5.1 Doors				1			
TBD	K5.2 Cabinets and Countertops				2			
TBD	K5.3 Interior Trim and Shelving				2			
TBD	**K6. Products That Comply With the Health Product Declaration Open Standard**				2			
TBD	**K7. Indoor Air Formaldehyde Level Less Than 27 Parts Per Billion**				2			
No	**K8. Comprehensive Inclusion of Low Emitting Finishes**				1			
	K9. Durable Cabinets							
TBD	K9.1 Durable Cabinet Construction					1		
TBD	K9.2 Durable Cabinet Hardware					1		
TBD	**K10. At Least 25% of Interior Furniture Has Environmentally Preferable Attributes**					1		

2274 Shattuck		Points Targeted	Community	Energy	IAQ/Health	Resources	Water	
L. FLOORING								
TBD	**L1. Environmentally Preferable Flooring**					3		
TBD	**L3. Durable Flooring**				1	1		
TBD	**L4. Thermal Mass Flooring**			1				
M. APPLIANCES AND LIGHTING								
Yes	**M1. ENERGY STAR® Dishwasher**	1					1	
	M2. Efficient Clothes Washing and Drying							
TBD	M2.1 CEE-Rated or ENERGY STAR® Clothes Washer			1			2	
Yes	M2.2 ENERGY STAR® Dryer	1		2				
TBD	M2.3 Solar Dryer/ Laundry Lines			0.5				
TBD	**M3. Size-Efficient ENERGY STAR® Refrigerator**			2				
	M4. Permanent Centers for Waste Reduction Strategies							
TBD	M4.1 Built-In Recycling Center					1		
TBD	M4.2 Built-In Composting Center					1		
TBD	M4.3 Triple Trash Chutes in Multifamily Building					1		
	M5. Lighting Efficiency							
TBD	M5.1 High-Efficacy Lighting			2				
TBD	M5.2 Lighting System Designed to IESNA Footcandle Standards or Designed by Lighting Consultant			2				
TBD	**M6. Electric Vehicle Charging Stations and Infrastructure**			2	2			
TBD	**M7. Central Laundry**						1	
TBD	**M8. Gearless Elevator**			1				
TBD	**M9. Gas Infrastructure Removed for Major Alterations**				4			
TBD	**M10. All-Electric Commercial Kitchen**				4			
N. COMMUNITY								
	N1. Smart Development							
Yes	N1.1 Infill Site	2	1			1		
TBD	N1.2 Designated Brownfield Site		1			1		
TBD	N1.3 Conserve Resources by Increasing Density			2		2		
TBD	N1.4 Cluster Homes for Land Preservation		1			1		
	N1.5 Home Size Efficiency					10		
	Enter the area of the home, in square feet							
	Enter the number of bedrooms							
	N2. Home(s)/Development Located Near Transit							
TBD	N2.1 Within 1 Mile of a Major Transit Stop		1					
TBD	N2.2. Within 1/2 mile of a Major Transit Stop		2					

2274 Shattuck		Points Targeted	Community	Energy	IAQ/Health	Resources	Water	
	N3. Pedestrian and Bicycle Access							
	N3.1 Pedestrian Access to Services Within 1/2 Mile of Community Services		2					
	Enter the number of Tier 1 services							
	Enter the number of Tier 2 services							
TBD	N3.2 Connection to Pedestrian Pathways		1					
TBD	N3.3 Traffic Calming Strategies		2					
TBD	N3.4 Sidewalks Buffered from Roadways and 5-8 Feet Wide		1					
≥30%	N3.5 Bicycle Storage for Residents	2	2					
Yes	N3.6 Bicycle Storage for Non-Residents	1	1					
TBD	N3.7 Reduced Parking Capacity		2					
	N4. Outdoor Gathering Places							
Yes	N4.1 Public or Semi-Public Outdoor Gathering Places for Residents	1	1					
TBD	N4.2 Public Outdoor Gathering Places with Direct Access to Community Services		1					
	N5. Social Interaction							
TBD	N5.1 Residence Entries with Views to Callers		1					
TBD	N5.2 Entrances Visible from Street and/or Other Front Doors		1

DESIGN REVIEW APPLICATION

For: ____ Preliminary Design Review (PDR) ____ Signs and Awnings
____ Final Design Review (FDR) ____ Modification: PDR or FDR
____ Staff Level Design Review (DRSL)

Intake Planner _____

Project Address: 2274 Shattuck Ave Zone: C-DMU Corr.

Project Description: Partial removal of existing commercial structures to construct a new 17-story mixed use building with 227 dwelling units, ground level lobbies, commercial space, and parking with state of California density bonus.

Date Building Permit/Sign Permit/Use Permit or Zoning Permit was applied for: 5/22/2023

Associated Use Permit number: #PLN2022-0072

For exterior changes to existing buildings, other than signs and awnings, the estimated construction cost is $_____

TITLE REPORT

THE TITLE REPORT USED IN THIS SURVEY WAS ISSUED BY OLD REPUBLIC TITLE COMPANY, PRELIMINARY REPORT ORDER NO. 0227027911-MN, EFFECTIVE DATE MARCH 21, 2022 AT 7:30 A.M.

TITLE TO SAID ESTATE IS VESTED IN:

UNITED ARTISTS PROPERTIES I CORP., A COLORADO CORPORATION

THE ESTATE OR INTEREST IN THE LAND IS:

FEE AS TO PARCEL(S) ONE, TWO AND THREE AND AN EASEMENT AS TO PARCEL(S) ONE-A

EXCEPTIONS TO TITLE

1. TERMS AND PROVISIONS AS CONTAINED IN AN INSTRUMENT ENTITLED MEMORANDUM OF PARI PASSU INDEMNITOR AGREEMENT, DATED MARCH 1, 2021, RECORDED MARCH 12, 2021 IN OFFICIAL RECORDS UNDER RECORDER'S SERIAL NUMBER 2021010753 (PTR EXC. 7 – NOT PLOTTABLE).

BASIS OF BEARINGS

THE BASIS OF BEARINGS OF THIS SURVEY IS TAKEN BETWEEN THE TWO FOUND CITY MONUMENTS ALONG SHATTUCK AVENUE BETWEEN DURANT AVENUE AND ADDISON STREET AS SHOWN ON THAT CERTAIN MAP ENTITLED "A 3 UNIT COMMERCIAL SUBDIVISION FOR CONDOMINIUM CONVERSION PURPOSES", FILED JUNE 13, 1996 IN BOOK 223 OF PARCEL MAPS, AT PAGES 69 TO 70, IN THE OFFICE OF THE COUNTY RECORDER OF ALAMEDA COUNTY, STATE OF CALIFORNIA. TAKEN AS SOUTH 05°00'00" EAST.

NOTES

1. DATE OF FIELD SURVEY: JUNE 2 AND 9, 2022 AS TO THE BOUNDARY AND TOPOGRAPHIC SURVEY OF THE SUBJECT PROPERTY.
2. THE UTILITIES SHOWN HEREON ARE BY SURFACE OBSERVATION AND RECORD INFORMATION ONLY AND NO WARRANTY IS GIVEN HEREIN AS TO THEIR EXACT LOCATION. IT IS THE RESPONSIBILITY OF THE DEVELOPER AND/OR CONTRACTOR TO VERIFY THE EXACT LOCATION OF THE UTILITIES WITH THE APPROPRIATE UTILITY COMPANY OR AGENCY.
3. UTILITY JURISDICTIONS / PROVIDERS ARE AS FOLLOWS:
   STORM DRAINS: CITY OF BERKELEY
   SANITARY SEWER: CITY OF BERKELEY
   WATER: EAST BAY MUNICIPAL UTILITY DISTRICT (EBMUD)
   ELECTRICITY: PACIFIC GAS & ELECTRIC CO.
   NATURAL GAS: PACIFIC GAS & ELECTRIC CO.
   TELEPHONE: AT&T
4. THERE ARE NO CEMETERIES ON OR WITHIN 100 FEET OF THE SUBJECT PROPERTY.
5. THE LEGAL DESCRIPTION OF THE SUBJECT PROPERTY IS THE SAME AS THE PROPERTY DESCRIBED IN THE PRELIMINARY TITLE REPORT.
6. THE LEGAL DESCRIPTION AS SHOWN IN THE TITLE REPORT MATHEMATICALLY CLOSES.
7. THERE IS NO OBSERVED EVIDENCE OF SITE USE AS A SOLID WASTE DUMP, SUMP OR SANITARY LANDFILL
8. THERE ARE NO WETLAND AREAS IN THE SUBJECT PROPERTY
9. THE SUBJECT PROPERTY HAS DIRECT ACCESS TO AND FROM TELEGRAPH AVENUE, A PUBLIC RIGHT OF WAY.

BENCHMARK

ELEVATIONS SHOWN ARE BASED ON BENCHMARK BS527, BEING 1-3/8" DIAMETER BRASS DISC UCB MONUMENT BS-8 SET FLUSH IN SIDEWALK AT NORTHWEST CORNER OF BANCROFT WAY AND FULTON STREET. ELEVATION = 193.16 FEET. CITY OF BERKELEY DATUM.

LEGAL DESCRIPTION

THE LAND REFERRED TO IN THIS REPORT IS SITUATED IN THE COUNTY OF ALAMEDA, CITY OF BERKELEY, STATE OF CALIFORNIA, AND IS DESCRIBED AS FOLLOWS:

PARCEL ONE:

BEGINNING AT A POINT ON THE WESTERN LINE OF SHATTUCK AVENUE, DISTANT THEREON NORTH 5° 17' 30" WEST 136.00 FEET FROM THE INTERSECTION THEREOF WITH THE NORTHERN LINE OF BANCROFT WAY, AS SAID WAY AND AVENUE ARE SHOWN ON THE MAP HEREINAFTER REFERRED TO; RUNNING THENCE SOUTH 5° 17' 30" EAST ALONG SAID LINE OF SHATTUCK AVENUE, 36.00 FEET; THENCE SOUTH 80° 39' WEST 113.14 FEET; THENCE SOUTH 9° 30' EAST 100.03 FEET TO THE SAID NORTHERN LINE OF BANCROFT WAY; THENCE SOUTH 80° 30' WEST ALONG SAID LINE OF BANCROFT WAY 70.00 FEET; THENCE NORTH 9° 30' WEST 168.64 FEET; THENCE NORTH 80° 30' EAST 13.10 FEET TO THE CORNER COMMON TO LOT 3 AND 22, BLOCK 6 AS PER MAP HEREINAFTER REFERRED TO; THENCE NORTH 81° 32' 30" EAST 61.91 FEET; THENCE SOUTH 9° 30' EAST 31.88 FEET; THENCE NORTH 80° 30' EAST 105.78 FEET TO THE POINT OF BEGINNING.

BEING A PORTION OF LOTS 4 AND 22, BLOCK 6, MAP ENTITLED, "SHATTUCK TRACT MAP NO. 2", FILED JULY 24, 1900, MAP BOOK 16, AT PAGE 10, ALAMEDA COUNTY RECORDS.

PARCEL ONE-A:

AN EASEMENT FOR INGRESS AND EGRESS AND FOR LIGHT AND AIR AS GRANTED IN THE DEED TO UNITED ARTISTS THEATRES OF CALIFORNIA, LTD., A CORPORATION, RECORDED MAY 5, 1931, BOOK 2616, AT PAGE 56, ALAMEDA COUNTY RECORDS, DESCRIBED AS FOLLOWS:

BEGINNING AT A POINT ON THE NORTHERN LINE OF BANCROFT WAY, DISTANT THEREON SOUTH 80° 30' WEST 95.8 FEET FROM THE INTERSECTION THEREOF WITH THE WESTERN LINE OF SHATTUCK AVENUE, AS SAID AVENUE AND WAY ARE SHOWN ON THE MAP HEREINAFTER REFERRED TO; RUNNING THENCE SOUTH 80° 30' WEST 10.00 FEET; THENCE NORTH 9° 30' WEST 100.03 FEET; THENCE NORTH 80° 39' EAST 10.00 FEET; THENCE SOUTH 9° 30' EAST 100.00 FEET TO THE POINT OF BEGINNING.

BEING A PORTION OF LOT 22, BLOCK 6, "SHATTUCK TRACT, MAP NO. 2", FILED JULY 24, 1900, MAP BOOK 16, AT PAGE 10, ALAMEDA COUNTY RECORDS.

SAID EASEMENT TO BE APPURTENANT TO PARCEL ONE HEREIN ABOVE DESCRIBED.

PARCEL TWO:

BEGINNING AT A POINT ON THE NORTHERN LINE OF BANCROFT WAY, DISTANT THEREON WESTERLY 210.20 FEET FROM THE INTERSECTION THEREOF WITH THE LINE OF SHATTUCK AVENUE, AS SAID WAY AND AVENUE ARE SHOWN ON THE MAP HEREINAFTER REFERRED TO; RUNNING THENCE NORTHERLY AT RIGHT ANGLES TO SAID LINE OF BANCROFT WAY 134.64 FEET; THENCE AT RIGHT ANGLES EASTERLY 2.50 FEET TO THE WESTERN BOUNDARY LINE OF LOT 4, BLOCK 6, AS PER MAP HEREINAFTER REFERRED TO; THENCE AT RIGHT ANGLES NORTHERLY ALONG SAID WESTERN BOUNDARY LINE OF SAID LOT 4, 34.00 FEET; THENCE AT RIGHT ANGLES WESTERLY 31.90 FEET TO THE WESTERN LINE OF THE PROPERTY CONVEYED TO UNITED ARTISTS THEATRES OF CALIFORNIA, LTD., A CORPORATION BY DEED RECORDED MAY 5, 1931, BOOK 2616, AT PAGE 56, ALAMEDA COUNTY RECORDS; THENCE SOUTH 9° 30' EAST 168.64 FEET TO THE NORTHERN LINE OF BANCROFT WAY; THENCE WESTERLY ALONG SAID LINE OF BANCROFT WAY 34.40 FEET TO THE POINT OF BEGINNING.

BEING A PORTION OF LOTS 4 AND 22, BLOCK 6, SHATTUCK TRACT MAP NO. 2, FILED JULY 24, 1900, MAP BOOK 16, AT PAGE 10, ALAMEDA COUNTY RECORDS.

PARCEL THREE:

COMMENCING AT THE NORTHWESTERN CORNER OF THAT CERTAIN PARCEL OF LAND CONVEYED BY ELLEN S. MORSE TO HOMESTEAD LOAN ASSOCIATION OF BERKELEY, A CORPORATION BY DEED DATED MAY 8, 1905, RECORDED IN BOOK 1063 OF DEEDS, AT PAGE 20, ALAMEDA COUNTY RECORDS; THENCE SOUTH 9° 30' EAST ALONG THE WESTERN BOUNDARY LINE THEREOF 31.80 FEET TO THE SOUTHWESTERN CORNER THEREOF, SAID CORNER BEING ON THE BOUNDARY LINE OF THAT CERTAIN PARCEL OF LAND CONVEYED BY A. O. DONOGH AND MARION E. DONOGH, HIS WIFE TO UNITED ARTISTS THEATRES OF CALIFORNIA, LTD., A CORPORATION, BY DEED DATED APRIL 16, 1931, RECORDED IN BOOK 2616, PAGE 56, ALAMEDA COUNTY RECORDS; THENCE ALONG LAST SAID BOUNDARY LINE SOUTH 80° 30' WEST 5.78 FEET TO A CORNER THEREOF; THENCE NORTHERLY ALONG LAST SAID BOUNDARY LINE NORTH 9° 30' WEST 31.88 FEET TO A CORNER THEREOF ON LINE OF LOT 22, BLOCK 6, AS PER MAP HEREINAFTER REFERRED TO; THENCE EASTERLY ALONG THE NORTHERLY LINE OF SAID LOT 22, 5.76 FEET TO THE POINT OF BEGINNING.

BEING A PORTION OF LOT 22, BLOCK 6, SHATTUCK TRACT NO. 2, FILED JULY 24, 1900, MAP BOOK 16, AT PAGE 10, ALAMEDA COUNTY RECORDS.

APN: 057-2028-003

TABLE A NOTES

1. FOUND MONUMENTS ARE SHOWN ON THIS SHEET OF THE SURVEY.
2. THE STREET ADDRESS OF THE PROPERTY IS 2274 SHATTUCK AVENUE, BERKELEY, CA 94704
3. FLOOD ZONE DESIGNATION: THE PREMISES ARE LOCATED IN ZONE "X" (NON-SHADED) DEFINED AS "AREAS OF MINIMAL FLOOD," PER FLOOD INSURANCE RATE MAP COMMUNITY PANEL NO. 0600100057G, EFFECTIVE DATE: AUGUST 3, 2009.
4. THE TOTAL GROSS LAND AREA IS: 22,112 SQUARE FEET +/- OR 0.508 ACRES MORE OR LESS.
6. (A/B) ZONING REQUIREMENTS: PER THE CITY OF BERKELEY PLANNING AND ZONING DEPARTMENT, THE PROPERTY IS ZONED "C-DMU" DEFINED AS "DOWNTOWN MIXED-USE DISTRICT."

   REFERENCE FOR "C-DMU" ZONING IS MADE HERE TO THE CITY OF BERKELEY CODE, CHAPTER 23.204.130, REGARDING PROPERTY DEVELOPMENT STANDARDS, MINIMUM SETBACKS, BUILDING HEIGHT LIMITATION, AND PARKING REQUIREMENTS ARE AS FOLLOWS:

   SETBACKS
   MINIMUM FRONT: 0 FEET
   MINIMUM INTERIOR SIDE: 0 FEET
   MINIMUM STREET SIDE: 0 FEET
   MINIMUM REAR: 0 FEET

   MAXIMUM HEIGHT: 60 FEET, 75 FEET WITH USE PERMIT

   MINIMUM PARKING REQUIREMENTS: NONE REQUIRED
7. (A/B/C) EXTERIOR DIMENSIONS AND SQUARE FOOTAGE OF BUILDING AT GROUND LEVEL, AND NUMBER OF STORIES ARE SHOWN ON SHEET 2 OF THE SURVEY.
8. SUBSTANTIAL IMPROVEMENTS OBSERVED IN THE PROCESS OF CONDUCTING THE SURVEY ARE SHOWN.
9. THERE ARE NO PARKING SPACES LOCATED ON THE SUBJECT PROPERTY.
10. THERE ARE NO DIVISIONS OR PARTY WALLS LOCATED ON THE SUBJECT PROPERTY WITH RESPECT TO ADJOINING PROPERTIES.
11. (A) LOCATION OF UTILITIES EXISTING ON OR SERVING THE SURVEYED PROPERTY AS DETERMINED BY OBSERVED EVIDENCE TOGETHER WITH EVIDENCE FROM PLAN OBTAINED FROM UTILITY COMPANIES OR PROVIDED BY CLIENT ARE SHOWN ON SHEET 2.
12. GOVERNMENTAL AGENCY SURVEY-RELATED REQUIREMENTS ARE SHOWN.
13. NAMES OF ADJOINING OWNERS OF PLATTED LANDS ARE SHOWN ON THIS SHEET OF THE SURVEY.
14. DISTANCE TO THE NEAREST INTERSECTING STREET IS SHOWN ON THIS SHEET OF THE SURVEY.
16. THERE IS NO OBSERVABLE EVIDENCE OF CURRENT EARTH MOVING WORK, BUILDING CONSTRUCTION OR BUILDING ADDITIONS.
17. THERE IS NO OBSERVED EVIDENCE OF RECENT STREET OR SIDEWALK CONSTRUCTION OR REPAIRS.
18. THERE ARE NO OFFSITE EASEMENTS TO THE SUBJECT PROPERTY.
19. PROFESSIONAL LIABILITY INSURANCE IN THE AMOUNT OF $2,000,000 IS HELD BY THE SURVEYOR.

GENERAL PLANTING AND IRRIGATION NOTES

1. LANDSCAPE AND IRRIGATION PLANS SHALL COMPLY WITH THE CRITERIA OF THE CALIFORNIA MODEL WATER EFFICIENCY ORDINANCE AND APPLY THOSE CRITERIA FOR THE EFFICIENT USE OF WATER IN THE LANDSCAPE DESIGN PLAN.

2. LANDSCAPE AND IRRIGATION PLANS SHALL COMPLY WITH ALL APPLICABLE CITY CODES AND ORDINANCES.

3. ALL PLANTING AREAS SHALL BE TOP-DRESSED WITH A 3" LAYER OF ORGANIC, UN- DYED MULCH RECYCLED FROM LOCAL ORGANIC MATERIALS SUCH AS TREE TRIMMINGS, PLANT, OR CLEAN WOOD WASTE. COMPOST APPLICATION TO ACHIEVE A MINIMUM OF 6% ORGANIC MATTER IN SOIL COMPOSITION BASED ON MWELO SPECIFIED SOIL ANALYSIS RESULS FOR THE SITE SOIL PER [CGBSC 4.304].

4. 50% OF ALL SHRUBS AND GROUNDCOVER SHALL BE A MINIMUM OF 5-GALLON SIZE OR LARGER.

5. IRRIGATION SYSTEM IS TO BE A FULLY AUTOMATIC WEATHER-BASED SYSTEM USING LOW FLOW DRIP AND BUBBLER SYSTEM.

6. STREET TREES SHALL BE TIED INTO IRRIGATION SYSTEM.

7. 85% OF ALL PLANTS PROPOSED ARE NATIVE AND WILD-LIFE SUPPORTING.

8. PLANT SELECTION AND DESIGN TO COMPLY WITH BAY-AREA FRIENDLY BASICS LANDSCAPE CHECKLIST.

IRRIGATION SYSTEM DESIGN INTENT

1. THIS PLAN SHALL COMPLY WITH THE REQUIREMENTS OF THE STATE OF CALIFORNIA'S MODEL WATER EFFICIENT LANDSCAPE ORDINANCE (MWELO), CITY OF BERKELEY, AND EAST BAY MUNICIPAL UTILITY DISTRICT (EBMUD) WATER DISTRICT.

2. THE IRRIGATION SYSTEM SHALL BE DESIGNED TO PROVIDE THE MINIMUM AMOUNT OF WATER NECESSARY TO SUSTAIN GOOD PLANT HEALTH.

3. THE IRRIGATION SYSTEM IS TO BE A FULLY AUTOMATIC, WEATHER-BASED SYSTEM USING RAIN SENSOR, LOW FLOW DRIP, BUBBLER DISTRIBUTION, AND ROTOR WITH MATCHED PRECIPITATION RATE NOZZLES DESIGNED FOR HEAD-TO-HEAD COVERAGE.

4. ALL SELECTED COMPONENTS SHALL BE PERMANENT, COMMERCIAL GRADE, SELECTED FOR DURABILITY, VANDAL RESISTANCE AND MINIMUM MAINTENANCE REQUIREMENT, INSTALLED BELOW-GRADE, AND DESIGNED FOR 100% COVERAGE.

5. THE SYSTEM SHALL INCLUDE A MASTER CONTROL VALVE, RAIN SENSOR AND FLOW SENSING CAPABILITY CONNECTED TO THE IRRIGATION CONTROLLER WHICH WILL SHUT DOWN ALL OR PART OF THE SYSTEM IF LEAKS ARE DETECTED.

6. THE IRRIGATION SYSTEM SHALL BE DESIGNED TO DELIVER WATER TO HYDROZONES BASED ON MOISTURE REQUIREMENTS OF THE PLANT GROUPING.

7. COLOR CODED HYDROZONE LANDSACPING HYDROZONE MAP WITH GROUPING AND COLLOCATING PLANTING MATERIAS BY WUCOLS WATER USE CATEGORY VL, L, M, OR H, PER [CGBSC 4.304}, TO BE PROVIDED IN PERMIT DRAWINGS.

RAIN SENSOR AND CONTROLLER LOCATION TO BE PROVIDED IN PERMIT DRAWINGS.

RE: **2274 Shattuck Avenue, Application# ZP2023-0079**

Use Permit for:

> *Partial demo of existing commercial structures to construct a new 17-story mixed-used building with 227 dwelling units, ground level lobbies, commercial space, and parking with State of California Density Bonus.*

Dear Applicant:

On behalf of the City of Berkeley, I would like to introduce myself as the project planner for the above referenced application. Staff from various City departments will be reviewing your application to ensure that the project application is complete. If any questions arise, City staff will either contact you in writing or by phone at the number supplied on your application. Unless you inform us otherwise, you will be the primary contact during the application process. It is also prudent to expect site visits by various staff members over the course of the City's review of the project. These visits will be from the public right-of-way, unless an appointment is made with you in advance.

If you have any questions or concerns, please feel free to contact me at 510-981-7429 or sgong@cityofberkeley.info. I will contact you within 30 days of your application date to follow-up with the status of the project and to request any additional information needed to complete the application. For more information related to the Use Permit process, please visit the City's Use Permits web page.

Please know that this application is subject to the Permits Streamlining Act, Government Code Section 65921, which (1) sets forth various time limits within which state and local government agencies must either approve or disapprove permits and (2) providing that these time limits may be extended once (and only once) by agreement between the parties.

I look forward to working with you.

Sincerely,

Sharon Gong
Senior Planner

Subject: 2274 Shattuck Avenue DRCP2023-0008 Completeness Review

Follow Up Flag: Follow up
Flag Status: Flagged

Hello, Isaiah: We were able to go through the design review application for this address above. Thank you for the drawings and details included to date. We do still need some additional information in order to continue our review:

- We did not find your applicant statement so please resubmit this, and add a design statement that includes how this project fits into its downtown neighborhood context. A link to the Downtown Design Guidelines is provided below. We will refer to these in our staff report when this project goes to the DRC.
https://www.cityofberkeley.info/uploadedFiles/Planning_and_Development/Level_3_-_DAP/DBDesignGuidelines2012.pdf

- Street Strip Elevations: we see where Zoning asked for the buildings behind the street facades be omitted. We do see where the street strip elevations are confusing, but also acknowledge that there is a lot of context information shown. Design Review is pleased to continue to show the information behind the street elevations, but requests that you ghost the buildings in the background for clarity.

- We ask that you work with our Land Use Planning consultant, Darya Barar, as well as Public Works as you continue to finalize your street tree and overall streetscape improvement plans. Darya's email follows: dbarar@Bartlett.com

- Although minor, we do see some encroachments shown on the rendering for architectural trim and the entry canopy. Reach out to Public Works early on for their recommendations.

- Structures on adjacent parcels should be included on all building sections.

- On the preliminary plant palette, note whether those selections are native plants, and include the overall percentage proposed. We have also had a special request from the Design Review Committee to note where specific plants are a good pollinator and for which insects, and want to thank you for the additional information that you have already put on the plant palette for the species that support butterflies.

- We recommend including more details to show storefront windows, roof top trellis structure, residential windows (including any operability), material transitions, garage door design, and any architectural elements, like the horizontal metal fins, that help to show the quality and scale of the proposed design.

- Provide more information on proposed lighting, but we do thank you for the night rendering included. Also include any bird-safe and dark sky measures proposed.

- Colors and materials – provide more detailed information of the proposed materials, including photos of material samples and successful installations. As we have gone back to in-person meetings, we are looking forward to seeing a color and material board presented to the Design Review Committee.

- While Design Review is primarily looking at the design from its external context, we also look for any interior plan issues that may affect the exterior. A long time city goal is that all habitable spaces in residential units have access to natural light and air. We see that the unit configurations on some of the two and three unit layouts do not have natural light and air to one of the bedroom spaces. We also recommend that you illustrate how the interior design of the units allow for natural light to reach that back bedroom space or reconfigure those units as needed so that all areas have natural light.

I'm copying Sharon on this e-mail so that we continue to be coordinated with your Use Permit application. Please forward any resubmittal directly to me for Design Review so that I can begin review as soon as possible, but I will continue to circle back with Sharon to make sure that we are consistent with any recommendations or requirements from Zoning and that we are coordinating our schedules. Thank you, Isaiah. – Anne (510) 981-7415

RE: Application for Use Permit #ZP2023-0079 for 2274 Shattuck Avenue

Dear Mr. Stackhouse,

Thank you for submitting the materials to support the proposal to demolish the existing commercial building (preserving the eastern portion), and construct a 17-story, mixed-use building with 227 dwelling units and an 865-square-foot café in the C-DMU (Corridor) Zoning District at 2275 Shattuck Avenue (APN 057-2028-003).

Application – Based upon a preliminary review, the application appears to include the following approval requests:

1. Use Permit under BMC Section 23E.68.030.A to construct a new mixed-use development
2. Density Bonus with the following requested reductions, waivers and concessions:

   Waivers

   a. Waiver of BMC Section 23.204.130(E)(2) to exceed building height limits – to be 183 feet (plus 5-foot parapet, by right), where 75 feet is the limit (plus 5-foot parapet, by right)
   b. Waiver of BMC Section 23.204.130(E)(3)(b) to waive side and rear setbacks above 75 feet in height
   c. Waiver of BMC Section 23.204.130(E)(3)(b)(i) to exceed 120 feet in width in diagonal measurement above 120 feet in height – to be 178'-9" feet in width
   d. Waiver of BMC Section 23.204.130(E)(4) to reduce the usable open space requirement – to be 7,737 square feet, 18,160 square feet is required
   e. Waiver of BMC Section 23.204.130(E)(4) to reduce the privately-owned public open space– to be 0 square feet, where 17 square feet is required
   f. Waiver of BMC Section 23.322.090(A) to provide 72 long term residential bicycle parking, where 210 short-term is required

Concessions [Three concessions permitted, per Government Code §65915(d)(2)]: None.

Staff has reviewed the application and has determined that the following **additional** approvals will be required for the proposed project. (See below for additional fees due):

1. Use Permit under BMC Section 23C.08.050.A to demolish a non-residential building
2. Use Permit under BMC Section 23E.68.030.A, to construct dwelling units
3. Use Permit under BMC Section 23E.68.050 to create new floor area of 10,000 square feet or more
4. Use Permit under BMC Section 23.204.130(E)(3)(b) to modify rear setback requirements (included in Base Project)
5. Use Permit under BMC Section 23.204.130(E)(6)(a)(i) to pay a fee in lieu of providing Privately-Owned Public Open Space (POPOS)
6. Administrative Use Permit under BMC Section 23.304.050(A) to exceed building height limits with rooftop architectural elements which exceed the maximum height limit for the district

Incomplete Items – Staff has also determined that application is incomplete at this time. Please address the following items to continue with the application review:

1. Fees. The additional approvals listed above require a payment of fees for each. Fees for additional approvals will be due once they are finalized and an invoice will be sent to you. Please be aware that with the submittal of information requested by staff, additional approvals may be added to the permit and associated fees will be due.

2. Demolition/Preservation. Provide a detailed description of the portions of the existing building to be preserved and not demolished.

3. Public Comments. A number of public comment letters have been received by staff for the project. They have been included in the project file and public record. I have also attached them to this letter.

4. Plans.

    a. Clarify if whether a parcel merger is required for the project. The survey shows parcel lines for three parcels, but only one APN.
    b. Staff had determined that the parcel has two frontages – Shattuck and Bancroft. The remainder of the lot lines are considered interior side lot lines. Please make this revision and update as necessary in the setbacks table on A0.1.
    c. The area under the trellis/shade structure on the roof should be included in the rooftop elements calculation on A0.1 and subject to the 15% limit.
    d. Verify that all usable open space (UOS) meets the definition in BMC 23.304.090. For instance, areas used as walkways or circulation are excluded from the total UOS.
    e. Check that the maximum height dimension is consistent with the definition: *Maximum Building Height: The vertical distance of a building at any point, within a given plane, from finished grade to the top of the roof or parapet walls.*
    f. Clarify the number of street trees to be replaced on L1.01 (1 or 2?).
    g. In the building elevations and street strip elevations, do not show structures/buildings that are *behind* the subject parcel along the viewline (perpendicular to the elevation). Also, please check the street strip elevation labels.

5. Density Bonus Diagrams/Calculations. Base Project = BP; Proposed Project = PP; AUS=Average Unit Size; QU=Qualifying Units; DBU=Density Bonus Units.

   a. Please check RFA calculations. RFA should not include mechanical, or building operation areas. RFA should include trash rooms for residents. Trash area for the cafe should be included separately in the total commercial area, and not in the RFA.

   b. The ground-floor residential support area that is included in the RFA, proportionate to the residential area in the BP, is not substantially similar to the respective proportion in the PP. The proportion should be similar for calculation of the density bonus. Revisions to the commercial area in the BP should follow with revised calculations for affected development standards in the BP to show compliance.

   c. Indicate the location of Privately-Owned Public Open Space (POPOS) in the BP to comply with the requirement. If not shown, then the use permit to not provide POPOS in the BP will be added to the permit.

   d. Provide the setback lines, per floor, on the BP and PP diagrams and dimensions for 65 feet from the frontages, to demonstrate setback compliance/waiver necessity.

   e. Include height and setbacks data in the BP compliance tables.

   f. Verify whether the 0' setback (5' required for interior side setback 65' from frontage) at unit 1 in the BP requires the Use Permit to modify setbacks to be added to the permit. Are any other modification permits being wrapped into the BP for compliance?

   g. BP compliance tables showing calculations for 150 BP units, are not consistent with the 151 units shown in the Density Bonus table.

   h. Per BMC Section 23.330.060(B), "The City may negotiate changes to the requested waivers and reductions as part of the Use Permit and Design Review process, in coordination with the applicant, to address aspects of the project that may be of concern in the community or inconsistent with overarching principles of the General Plan, Zoning Ordinance, and Design Guidelines". Please provide further explanation for why the increase in height from the 75-foot limit to 108 feet is necessary to accommodate the project with a density bonus of 76 units on the site.

6. Zoning Project Submittal Requirements (ZPSR). The following required items were incomplete from the application submittal: [ZPSR Link]

   a. Neighborhood Outreach. Provide proof of distribution of the invitations, including the date of distribution.

   b. Architect's Stamp. Include a licensed architect or engineer's stamp on each sheet in the plan set.

   c. Historic Resource Evaluation. This is required for demolition of a non-residential building 40 or more years old, subject to referral to the Landmarks Preservation Commission in accordance with BMC Section 23.326, or demolition/substantial change of any building 40 or more years old subject to environmental review pursuant to CEQA. Submit: State of California Department of Parks and Recreation (DPR) 523 forms (http://ohp.parks.ca.gov/?page_id=28351), or provide supplemental information in accordance with the Landmarks Preservation Ordinance criteria (BMC Section 3.24.110).

d. Traffic Impact Study. Demonstrate how the project meets screening criteria for determination and provide documentation that Transportation Division has determined that the project is not required to submit a transportation impact study. Please contact Kim Pham in the Transportation Division (KPham@cityofberkeley.info) for more information.

e. Water Efficiency. Projects with 500 square feet or more of new, or 2,500 square feet or more of renovated irrigated landscaping must comply with State water efficient landscaping provisions. WELO-compliant landscape documentation including a planting, grading, and irrigation plan. See the ZPSR for details.

f. Natural Gas Prohibition. Submit two statements as detailed in the ZPSR to ensure compliance with the City's Natural Gas Prohibition.

Advisory Comments

1. Level CEQA of Review. Staff will determine the level of CEQA review for the project within 30 days of the application being deemed complete.

2. Interdepartmental Roundtable Meeting. An interdepartmental review will be scheduled as an opportunity for you to receive comments on the project from City departments such as Building and Safety, Transportation, Zero Waste, Parks, Toxics and Public Works. I will coordinate with you to schedule a time when you can attend.

3. Landmarks Preservation Commission. The project will be scheduled for an LPC to obtain a recommendation for the demolition of the existing building, as required by BMC Section 23C.08.050.C.

4. Design Review. DR comments will be sent to you separately. Please respond to these comments in your next submittal, and copy Anne Burns for all submittals.

Revised submittal items should be uploaded to the Box.com project folder link that was previously sent to you. If the link is no longer active, please email me to request a new link Submit responses to all requested items at once, and not incrementally. Also, please be aware of streamlining timelines under SB330, Government Code Section 65941.1(a)(d) that affect the validity of the project's SB 330 Preliminary Application.[1]

[1] (1) Within 180 calendar days after submitting a preliminary application with all of the information required by subdivision (a) to a city, county, or city and county, the development proponent shall submit an application for a development project that includes all of the information required to process the development application consistent with Sections 65940, 65941, and 65941.5.
(2) If the public agency determines that the application for the development project is not complete pursuant to Section 65943, the development proponent shall submit the specific information needed to complete the application within 90 days of receiving the agency's written identification of the necessary information. If the development proponent does not submit this information within the 90-day period, then the preliminary application shall expire and have no further force or effect.

Should you have questions regarding this letter or your application, please feel free to contact me.

Sincerely,

Sharon Gong

www.TrachtenbergArch.com

2274 Shattuck Mixed Use **August 9, 2023**
Applicant's Statement

APPLICANT STATEMENT / WAIVER REQUEST

The proposed project is designed to carry out the vision of the Downtown Area Plan by providing 227 residential units of urgently needed housing in downtown Berkeley, in close proximity to BART and public transit. The project addresses the City's housing and affordability needs by providing 23 units that will be affordable to very-low income households, while also contributing towards the City's Affordable Housing Mitigation Fee. The residential units are diverse in size, ranging from studios to four-bedroom units.

The Project is Consistent with the Downtown Area Plan and Design Standards

Designed to respect the character of Downtown Berkeley and the intent of the design guidelines, the building's form, façades, and detailing will complement Downtown's traditional and human-scaled character without sacrificing its contemporary architectural expression. With regard to massing, the residential structure is setback significantly from Shattuck Avenue. This helps maintain the current pedestrian scale and commercial focus of Shattuck Ave, while the residential structure is still visible beyond and more appropriately fronts Bancroft Way, a more residentially suited street. The residential entrance on Bancroft Way will convert a large, blank wall and incorporate new landscaping to activate the pedestrian-oriented streetscape.

The project will be designed to repair the façade. Restoration of the exterior façade will ensure that the site maintains its scale and proportion to nearby buildings on Shattuck Avenue.

At the storefront level, the project's street-facing façades along both Shattuck and Bancroft Way are mostly visually open between 3' and 8' above grade, as retail and lobby spaces occupy most of the ground floor level. The generous glazing of storefronts is designed to maximize visibility between interior and exterior spaces. The retail space maintains the façade as a beacon for welcoming the public, as it had done in the past. The entry to the residential lobby is also accessed by a public common space that is shared with the café to provide more street facing public space. The storefront will be replaced with a contemporary system and will be consistent with the original amount of glazing, proportions, and recessed entry. The materials and simplified detailing will be compatible with the façade and tie into the material palette of the new residential tower. The offset location of the residential tower will aid in highlighting building details, ornamentation and other features of the Shattuck Avenue façade.

The Shattuck Avenue frontage will maintain a continuous zero-setback "build-to line" at the ground floor where commercial and higher levels of activity is anticipated, as encouraged by the Design Guidelines. Multiple entrances are provided into the commercial space, accessible directly from the public sidewalk. The project is designed to minimize contrast between the older commercial façade on Shattuck and the new residential portion utilizing setbacks and a harmonious material palette.

The Project Includes a Density Bonus Application

The project is only feasible due to the scale of development that is allowed under state density bonus law, as implemented by the Berkeley Municipal Code (Chapter 23.330), and the City's administrative policies. The proposed density is therefore critical to ensure that the project remains financially feasible through construction and occupancy.

As detailed in the Density Bonus Eligibility Statement and plan sheets, the project will include 23 units onsite that will be affordable to very-low income households. Under state density bonus law, this amounts to 15% of the base project units, which yields a 50% density bonus, and the project is eligible for unlimited reductions or waivers of development standards in connection with building height, width, setbacks, open space, parking ratios, and up to three concessions to facilitate construction of both the base and bonus units.

Proposed Waivers and Concessions

The following waivers or modifications of developments standards are necessary to develop the project as proposed:

- Exceed the maximum building height limit of 75 feet to approximately 183 feet and 17 stories (BMC § 23.204.130.E.1);
- Reduce the setbacks on the interior side and rear of the building from the required 15 feet, and exceed the maximum building width above 120 feet, beyond 120 feet (BMC § 23.204.130.E.3);
- Reduce the usable open-space requirement from 80 sq. ft/unit (BMC § 23.204.130.E.4); and
- Reduce the long-term residential bicycle parking ratio from 1 space per 3 bedrooms (BMC § 23.322.090.A.2).

The applicant reserves three eligible concessions pending further processing of the project.

The Project is Subject to The Housing Accountability Act (HAA) and SB 330

The Project is Subject to City Policies in Effect as of November 29, 2022

The project is a "housing development project" pursuant to the Housing Accountability Act (Gov. Code § 65589.5), as amended by the Housing Crisis Act of 2019 (SB 330) and other state housing laws (collectively, the "HAA"), as it consists of a mixed-use development with more than two-thirds of the square footage designated for residential use. (Gov. Code § 65589.5(h)(1).) Pursuant to SB 330, the applicant submitted a preliminary application (Gov. Code § 65941.1) on November 29, 2022, for the project, thereby securing vested rights for the project. The City confirmed by letter dated December 9, 2022, that the project meets the definition of a "housing development project." The current full development application includes minor revisions that fall within the scope of allowable revisions under the HAA, thus the project remains subject to the early vesting protections and "shall be subject only to the ordinances, policies, and standards adopted and in effect" when the preliminary application was submitted. (Gov. Code § 65589.5(o).)

The Project is Consistent with all Applicable Objective Standards

The project complies with all applicable, objective standards of the City's general plan, zoning, and subdivision standards and criteria, including design review standards in effect at the time

that the SB 330 preliminary application was submitted. As such, the project is entitled to additional protections under the HAA that prohibit the City from denying the project or conditioning it to be developed at a lower density, subject to exceptions not applicable here. (Gov. Code § 65589.5(j)(1)-(4).)

The HAA defines "objective" standards as provisions "involving no personal or subjective judgment by a public official" and as such, must be "uniformly verifiable by reference to an external and uniform benchmark or criterion available and knowable by both the development applicant or proponent and the public official." (Gov. Code § 65589.5(h)(8).)

As noted above, the project will implement state density bonus law. The HAA clearly provides that "a density bonus, incentive, concession, waiver, or reduction of development standards pursuant to [state density bonus law] shall not constitute a valid basis on which to find a proposed housing development project is inconsistent, not in compliance, or not in conformity, with an applicable plan, program, policy, ordinance, standard, requirement, or other similar provision." (Gov. Code § 65589.5(j)(3).) The project is therefore consistent with the objective standards in the C-DMU zone, as applicable given that some of the development standards are proposed to be waived pursuant to state density bonus law.

More specifically, under the HAA and state density bonus law, the policies contained in the Downtown Area Plan and Design Guidelines are inapplicable to the project if they conflict with the proposed waivers related to building height, setbacks, open space, and other development standards and concessions needed to facilitate the inclusion of onsite affordable and density bonus units, or if they involve subjective judgment by a public official as defined in the HAA. Subjective standards contained in the Downtown Area Plan and Design Guidelines, such as those related to visual character, are therefore superseded by the HAA in connection with the project.

Summary of Inapplicable or Waived Submittal Requirements

The following provisions of the City's zoning application are not applicable to the project:

Section 3

A. Story Pole Plan – not required; the project site is not in the Hillside (H) zone.

B. Arborist Report – not required; no Coast Live Oak trees will be affected by the project.

C. Parking Survey – not required; pursuant to City Ordinance 7787-NS there are no offsite parking requirements applicable to the project, therefore no waiver of off-street parking is requested that would necessitate a parking survey. (BMC § 23.322.070)

Section 4

While environmental review submittals are ordinarily required after the application is deemed complete, the following submittals should not be required for this project:

D. Geotechnical and Seismic Hazard Investigation; not required. The project site is not located in a landslide or liquefaction zone shown on the City's Environmental Constraints Map or the City's GIS Zoning Summary for the project site.

F. State General Construction Permit; not required. The project will not disturb one acre or more of soil (or less than one acre as part of a larger development plan that disturbs one acre or more).

Section 5

D. Area of Potential Effects Statement; not required. The project is not seeking federal funds, either directly or through the City's Housing Trust Fund

Section 7

C. Zoning Use Questionnaire; not required. No tenant or operator has been selected for the new commercial space.

D. Home Occupation Questionnaire; not required. No home occupations are proposed.

Hi Andy,

We just dropped this job at the post office.

Thanks,

Uno

Looks great, approved for printing and mailing. Let me know once they get delivered to the post office.

Thank you,

Andy

Hi Uno,

Apologies for the mix up, I had sent a second version yesterday that has more adequate space on the address side, please use the file attached. Can you confirm the barcode can be placed as to not overlap the map? Otherwise everything else looks good.

Thank you,

Andy

Density Bonus Eligibility Statement

a. Number of "base project" units: 151 Units.
b. Number of affordable units and level of affordability: 23-Units (15%) affordable to Very Low-Income Households as defined in Section 50105 of the Health and Safety Code.
c. Percent density bonus requested and allowed under Section 65915: 50%.
d. Waivers or modifications of developments standards necessary to accommodate density bonus:
    - Increase the maximum building height to accommodate the density bonus units.
    - Reduce required setbacks to accommodate the density bonus units.
    - Reduce the required amount of open space to accommodate the density bonus units.
    - Reduce the required amount of bike parking to accommodate the density bonus units.
e. Explanation of why each waiver or modification is needed to accommodate density bonus: Following the guidelines provided in the City's "*Conceptual Approach to Implementing Density Bonus Law In Berkeley, February 22, 2013",* the density bonus units are added to the Base Project which "reflects the proposed project's building separation, open space location, and parking location", via additional the following waivers or modifications to accommodate additional dwelling units:
    - Building height, setbacks, open space, and bike parking waivers are needed to accommodate the density bonus units. Refer to the applicant statement for more information.

Request for Incentives or Concessions

Under Section 65917, as a project which provides15 percent very low-income units, the project is eligible for three incentives or concession which results in identifiable and actual cost reductions. Currently the project is not utilizing any concessions pending further processing of the project.

Rationale Waiver for Additional Height

The City's letter dated June 29, 2023 requested further explanation of "why the increase in height from the 75-foot limit to 108 feet is necessary to accommodate the project with a density bonus of 76 units on the site."

Additional height is needed to facilitate the affordable and bonus units allowed under state density bonus law. It is much more cost-effective to construct those units in a rectangular structure with increased height, rather than spreading out the affordable and bonus units over the total project area. For example, the cost of demolishing the entire project area, and constructing an irregular, T-shaped residential structure, would be significantly more costly than the current proposal, which entails preservation of a portion of the portion of the site fronting on Shattuck Avenue, with vertical construction of the residential units in a more traditional, rectangular structure fronting Bancroft Way.

6.B. Natural Gas & Energy Statement

1. A statement that the building will not include any natural gas infrastructure in compliance with BMC Chapter 12.80, or documentation to support an application for an exception or public interest exemption to the Natural Gas Prohibition if the conditions of BMC Section 12.80.040A.1 or 12.80.050 are met. The Land Use drawing set submittal and the building permit plan set submittal shall both include a cover sheet declaration: 'Natural Gas-free Design as required by BMC Chapter 12.80.

2. A statement, and corresponding features on plans, that the proposed project is designed to comply with the Berkeley Energy Code (BMC Chapter 19.36) and Berkeley Green Code (BMC Chapter 19.37) including solar PV system, battery energy storage, electric vehicle charging, and low-carbon concrete requirements. Note that for building permit submittal, quantitative values for appliance fuel efficiency must be included in relevant building permit architectural sheets, and window and door schedules, and on architectural, plumbing, and mechanical sheets, matching those values stipulated in prescriptive or performance energy compliance documents

The project will comply with BMC Chapter 12.80, which provides that natural gas infrastructure shall be prohibited in newly constructed buildings, or that an application for an exception or public interest exemption must be made pursuant to section 12.80.040A.1 or 12.80.050. The applicant is not seeking an exception or public interest exemption at this time, but notes that Chapter 12.80 is currently subject to legal challenge and that the specific requirements of Chapter 12.80 may change.

The project will comply with the provisions of the BMC Energy Code Chapter 19.36 and BMC Green Code Chapter 19.37, including solar PV system, electric vehicle charging, and low-carbon concrete requirements.

GENERAL PLANTING AND IRRIGATION NOTES

1. LANDSCAPE AND IRRIGATION PLANS SHALL COMPLY WITH THE CRITERIA OF THE CALIFORNIA MODEL WATER EFFICIENCY ORDINANCE AND APPLY THOSE CRITERIA FOR THE EFFICIENT USE OF WATER IN THE LANDSCAPE DESIGN PLAN.

2. LANDSCAPE AND IRRIGATION PLANS SHALL COMPLY WITH ALL APPLICABLE CITY CODES AND ORDINANCES.

3. ALL PLANTING AREAS SHALL BE TOP-DRESSED WITH A 3" LAYER OF ORGANIC, UN- DYED MULCH RECYCLED FROM LOCAL ORGANIC MATERIALS SUCH AS TREE TRIMMINGS, PLANT, OR CLEAN WOOD WASTE. COMPOST APPLICATION TO ACHIEVE A MINIMUM OF 6% ORGANIC MATTER IN SOIL COMPOSITION BASED ON MWELO SPECIFIED SOIL ANALYSIS RESULS FOR THE SITE SOIL PER [CGBSC 4.304].

4. 50% OF ALL SHRUBS AND GROUNDCOVER SHALL BE A MINIMUM OF 5-GALLON SIZE OR LARGER.

5. IRRIGATION SYSTEM IS TO BE A FULLY AUTOMATIC WEATHER-BASED SYSTEM USING LOW FLOW DRIP AND BUBBLER SYSTEM.

6. STREET TREES SHALL BE TIED INTO IRRIGATION SYSTEM.

7. 75% OF ALL PLANTS PROPOSED ARE NATIVE AND WILD-LIFE SUPPORTING.

8. PLANT SELECTION AND DESIGN TO COMPLY WITH BAY-AREA FRIENDLY BASICS LANDSCAPE CHECKLIST.

IRRIGATION SYSTEM DESIGN INTENT

1. THIS PLAN SHALL COMPLY WITH THE REQUIREMENTS OF THE STATE OF CALIFORNIA'S MODEL WATER EFFICIENT LANDSCAPE ORDINANCE (MWELO), CITY OF BERKELEY, AND EAST BAY MUNICIPAL UTILITY DISTRICT (EBMUD) WATER DISTRICT.

2. THE IRRIGATION SYSTEM SHALL BE DESIGNED TO PROVIDE THE MINIMUM AMOUNT OF WATER NECESSARY TO SUSTAIN GOOD PLANT HEALTH.

3. THE IRRIGATION SYSTEM IS TO BE A FULLY AUTOMATIC, WEATHER-BASED SYSTEM USING RAIN SENSOR, LOW FLOW DRIP, BUBBLER DISTRIBUTION, AND ROTOR WITH MATCHED PRECIPITATION RATE NOZZLES DESIGNED FOR HEAD-TO-HEAD COVERAGE.

4. ALL SELECTED COMPONENTS SHALL BE PERMANENT, COMMERCIAL GRADE, SELECTED FOR DURABILITY, VANDAL RESISTANCE AND MINIMUM MAINTENANCE REQUIREMENT, INSTALLED BELOW-GRADE, AND DESIGNED FOR 100% COVERAGE.

5. THE SYSTEM SHALL INCLUDE A MASTER CONTROL VALVE, RAIN SENSOR AND FLOW SENSING CAPABILITY CONNECTED TO THE IRRIGATION CONTROLLER WHICH WILL SHUT DOWN ALL OR PART OF THE SYSTEM IF LEAKS ARE DETECTED.

6. THE IRRIGATION SYSTEM SHALL BE DESIGNED TO DELIVER WATER TO HYDROZONES BASED ON MOISTURE REQUIREMENTS OF THE PLANT GROUPING.

7. COLOR CODED HYDROZONE LANDSACPING HYDROZONE MAP WITH GROUPING AND COLLOCATING PLANTING MATERIAS BY WUCOLS WATER USE CATEGORY VL, L, M, OR H, PER [CGBSC 4.304}, TO BE PROVIDED IN PERMIT DRAWINGS.

8. RAIN SENSOR AND CONTROLLER LOCATION TO BE PROVIDED IN PERMIT DRAWINGS.

LANDSCAPE AREA CALCULATION:

	LANDSCAPE AREA
LEVEL 1:	2,559 SF
ROOF LEVEL:	1,525 SF
TOTAL:	4,084 SF (69%)

STORMWATER TREATMENT AREA:

REQUIRED STORMWATER TREATMENT AREA= 4% OF THE ROOF AREA (16810 SF) = 672 SF

PROPOSED STORMWATER TREATMENT AREA= 762 SF

BIKE PARKING CALCULATIONS:

(1) COMMERCIAL BIKE PARKING STALL

(16) SHORT TERM RESIDENTIAL BIKE PARKING STALLS

TOTAL SHORT TERM BIKE PARKING STALLS REQUIRED: 17 STALLS
TOTAL SHORT TERM BIKE PARKING STALLS PROVIDED: 18 STALLS (9 BIKE RACKS)

RE: 6/29/2023 Incompleteness Letter for 2274 Shattuck Avenue, #ZP2023-0079

Dear Sharon,

Thank you for your review and incompleteness letter dated June 29, 2023. Please see our responses below in blue text along with the attached updated plans and documents.

Incomplete Items:

1. Fees. The additional approvals listed above require a payment of fees for each. Fees for additional approvals will be due once they are finalized and an invoice will be sent to you. Please be aware that with the submittal of information requested by staff, additional approvals may be added to the permit and associated fees will be due.
   All future fees to be paid once invoiced.

2. Demolition/Preservation. Provide a detailed description of the portions of the existing building to be preserved and not demolished.
   Per sheet A2.0A, the 1-story lobby fronting Shattuck will remain as dimensioned, and a portion of the rear of the building is to be demolished as shown. The lobby space will be renovated as shown in the proposed plan on A2.1. Renovations include replacing the storefront, removing the vestibule, and removing the dividing wall and concessions. The existing street facing façade will be preserved and restored.

3. Public Comments. A number of public comment letters have been received by staff for the project. They have been included in the project file and public record. I have also attached them to this letter.
   Thank you for sharing, all letters have been reviewed by our team.

4. Plans
   a. Clarify if whether a parcel merger is required for the project. The survey shows parcel lines for three parcels, but only one APN.
      There are three parcels within the lot. The project proposes to merge the parcels as usually done during the building permit process.

   b. Staff had determined that the parcel has two frontages – Shattuck and Bancroft. The remainder of the lot lines are considered interior side lot lines. Please make this revision and update as necessary in the setbacks table on A0.1.
      The setbacks table on A0.1 and the tabulation form have been revised to show two frontages and the rest as interior side yards, with no rear yard designated.

   c. The area under the trellis/shade structure on the roof should be included in the rooftop elements calculation on A0.1 and subject to the 15% limit.
      All areas of the trellis structure which are not open to the sky have been added to the

rooftop elements calculation. An additional diagram for clarity has been added to A0.1.

d. Verify that all usable open space (UOS) meets the definition in BMC 23.304.090. For instance, areas used as walkways or circulation are excluded from the total UOS.
The grass hatch color has been removed from the diagram to clarify the areas being counted to the UOS. No walkways or circulation paths are included in the calculations.

e. Check that the maximum height dimension is consistent with the definition: Maximum Building Height: The vertical distance of a building at any point, within a given plane, from finished grade to the top of the roof or parapet walls.
Per the Berkeley handout for maximum building height instructions, in the C-DMU district, the maximum height is measured to the top of roof, and allows for a 5' tall parapet wall above the roof. All of these guidelines have been followed when measuring the maximum building height which occurs along Bancroft Way where the finished grade is lowest, as shown on A3.4.

f. Clarify the number of street trees to be replaced on L1.01 (1 or 2?).
The design does not propose the removal of any existing trees. However, there are three trees located offsite in proximity to the project construction that will be protected and preserved as an essential part of our plan.
Furthermore, in line with our commitment to enhancing the environment and urban greenery, we are proposing the addition of two new trees along the Bancroft streetscape, as shown on the plans. These new trees will contribute positively to the aesthetics, pedestrian comfort, and sustainability of the area.

g. In the building elevations and street strip elevations, do not show structures/buildings that are behind the subject parcel along the viewline (perpendicular to the elevation). Also, please check the street strip elevation labels.
Based on the feedback from DRC to keep the background context visible, we have significantly lightened any background context to clarify what is in the foreground vs. background. The street strip elevation labels have been corrected.

5. Density Bonus Diagrams/Calculations
   a. Please check RFA calculations. RFA should not include mechanical, or building operation areas. RFA should include trash rooms for residents. Trash area for the cafe should be included separately in the total commercial area, and not in the RFA.
   MEP spaces have been removed from the RFA calculations. The trash area for the café has been labelled within the same commercial area.

   b. The ground-floor residential support area that is included in the RFA, proportionate to the residential area in the BP, is not substantially similar to the respective proportion in the PP. The proportion should be similar for calculation of the density bonus. Revisions to the commercial area in the BP should follow with revised calculations for affected development standards in the BP to show compliance.
   The support areas have been clearly labeled and hatched with a new color for clarity in both the BP and PP diagrams. The proportion of the support area to RFA in the BP matches exactly to the proportion of support area to RFA in the PP.

   c. Indicate the location of Privately-Owned Public Open Space (POPOS) in the BP to comply with the requirement. If not shown, then the use permit to not provide POPOS in the BP will be added to the permit.
   A POPOS has been added to the BP along Bancroft. A POPOS has also been added to the proposed project at the Shattuck entry and updated in the zoning compliance table.

   d. Provide the setback lines, per floor, on the BP and PP diagrams and dimensions for 65 feet from the frontages, to demonstrate setback compliance/waiver necessity.

Setback lines have been added to both the BP and PP diagrams.

e. Include height and setbacks data in the BP compliance tables.
Height and setbacks data for the BP have been added to A0.3A.

f. Verify whether the 0' setback (5' required for interior side setback 65' from frontage) at unit 1 in the BP requires the Use Permit to modify setbacks to be added to the permit. Are any other modification permits being wrapped into the BP for compliance?
The allowable use permit modifications have been hatched on the BP diagram for clarity. The modified setbacks at 21' to 75' are the only modifications needed.

g. BP compliance tables showing calculations for 150 BP units, are not consistent with the 151 units shown in the Density Bonus table.
The BP compliance tables and diagrams have been updated to include 151 units.

h. Per BMC Section 23.330.060(B), "The City may negotiate changes to the requested waivers and reductions as part of the Use Permit and Design Review process, in coordination with the applicant, to address aspects of the project that may be of concern in the community or inconsistent with overarching principles of the General Plan, Zoning Ordinance, and Design Guidelines". Please provide further explanation for why the increase in height from the 75-foot limit to 108 feet is necessary to accommodate the project with a density bonus of 76 units on the site.
The Density Bonus Eligibility Statement has been revised to include the following: Additional height is needed to facilitate the affordable and bonus units allowed under state density bonus law. It is much more cost-effective to construct those units in a rectangular structure, with increased height, rather than spreading out the affordable and bonus units over the total project area. For example, the cost of demolishing the entire project area, and constructing an irregular, T-shaped residential structure, would be significantly more costly than the current proposal, which entails preservation of a portion of the site fronting on Shattuck Ave, with vertical construction of the residential units in a more traditional, rectangular structure fronting on Bancroft Way.

6. Zoning Project Submittal Requirements (ZPSR)
   a. Neighborhood Outreach. Provide proof of distribution of the invitations, including the date of distribution.
   TA hired an outside consultant for printing and mailing of the neighborhood notification postcards. We have included in the attachments the invoice for printing and mailing as well as the email notifying when the postcards were dropped off at the post office on 4/13.

   b. Architect's Stamp - Include a licensed architect or engineer's stamp on each sheet in the plan set.
   Our architect's stamp has been included on all drawing sheets.

   c. Historic Resource Evaluation - This is required for demolition of a non-residential building 40 or more years old, subject to referral to the Landmarks Preservation Commission in accordance with BMC Section 23.326, or demolition/substantial change of any building 40 or more years old subject to environmental review pursuant to CEQA. Submit: State of California Department of Parks and Recreation (DPR) 523 forms (http://ohp.parks.ca.gov/?page_id=28351), or provide supplemental information in accordance with the Landmarks Preservation Ordinance criteria (BMC Section 3.24.110).
   Our consultant is in the process of completing the Historic Resource Evaluation.

   d. Traffic Impact Study - Demonstrate how the project meets screening criteria for determination and provide documentation that Transportation Division has determined that the project is not required to submit a transportation impact study. Please contact Kim Pham in the Transportation Division (KPham@cityofberkeley.info) for more

information.
A traffic study is included with this submission.

e. Water Efficiency. Projects with 500 square feet or more of new, or 2,500 square feet or more of renovated irrigated landscaping must comply with State water efficient landscaping provisions. WELO-compliant landscape documentation including a planting, grading, and irrigation plan. See the ZPSR for details.
Per communications with City Staff, the provided preliminary planting and irrigation documentation, including irrigation system design narrative, hydrozone table, and WUCOLs, (see sheets L4.01, L4.02, L5.0 and L5.02) has been deemed sufficient for Zoning Approvals. Final Planting and Irrigation designs, WELO calculations, and colored hydrozone map will be provided at Building Permit. The landscape design will comply with all local and State Water Efficient Landscaping Ordinance requirements (WELO).

Our General Planting and Irrigation Notes, along with the Irrigation System Design Intent (Please refer to sheet L3.01) outlines our commitment to water efficiency and sustainable landscaping practices. We have taken measures to ensure that our project adheres to the specified water-efficient guidelines, aiming to minimize water consumption while promoting healthy plant growth.

f. Natural Gas Prohibition - Submit two statements as detailed in the ZPSR to ensure compliance with the City's Natural Gas Prohibition.
The project will be designed to support all-electric appliances for the residential units. The cost of converting to all-electric boilers, however, is significantly more expensive than natural gas models; in addition, the applicant intends to reserve the option of natural gas for the ground floor commercial use. Reserving natural gas for ground floor commercial and boilers is consistent with the City's objective standards that were in effect at the time that the SB 330 preliminary application was submitted.

Design Review Comments:

- We did not find your applicant statement so please resubmit this, and add a design statement that includes how this project fits into its downtown neighborhood context. A link to the Downtown Design Guidelines is provided below. We will refer to these in our staff report when this project goes to the DRC.
A revised applicant statement, which includes a design statement, is included in this submission.

- Street Strip Elevations: we see where Zoning asked for the buildings behind the street facades be omitted. We do see where the street strip elevations are confusing, but also acknowledge that there is a lot of context information shown. Design Review is pleased to continue to show the information behind the street elevations, but requests that you ghost the buildings in the background for clarity.
We have significantly lightened any background context to clarify what is in the foreground vs. background.

- We ask that you work with our Land Use Planning consultant, Darya Barar, as well as Public Works as you continue to finalize your street tree and overall streetscape improvement plans. Darya's email follows: dbarar@Bartlett.com
The team has been in contact with Darya and will make sure that final street tree species selections are reviewed by Darya and City Urban Forester.

- Although minor, we do see some encroachments shown on the rendering for architectural trim and the entry canopy. Reach out to Public Works early on for their recommendations.
All canopies and trim comply with the CBC chapter 32 pertaining to encroachments into the public right of way. TA will coordinate with the Public Works department in the future as needed.

- Structures on adjacent parcels should be included on all building sections.
  Adjacent structures have been included in building sections.

- On the preliminary plant palette, note whether those selections are native plants, and include the overall percentage proposed. We have also had a special request from the Design Review Committee to note where specific plants are a good pollinator and for which insects, and want to thank you for the additional information that you have already put on the plant palette for the species that support butterflies.
  75% of plants specified are native (refer to sheets L4-01 and L4-02) while 100% of plants are adapted/appropriate for the City of Berkeley.
  A pollinator garden has been included in the ground level courtyard design (refer L1.01 and L4.01) to attract and support a range of pollinator species such as butterflies, hummingbirds, and beneficial insects. Many pollinator plants support more than one type of pollinator, such as Manzanita which is part of the plan palette; Hummingbirds, butterflies, and honeybees have all been found to frequent these plants in search of nectar.

- We recommend including more details to show storefront windows, roof top trellis structure, residential windows (including any operability), material transitions, garage door design, and any architectural elements, like the horizontal metal fins, that help to show the quality and scale of the proposed design.
  Thank you for the recommendation. The project drawings submitted for the Design Review hearing will include more details.

- Provide more information on proposed lighting, but we do thank you for the night rendering included. Also include any bird-safe and dark sky measures proposed.
  Thank you for the recommendation. The project drawings submitted for the Design Review hearing will include more details on any bird-safe and dark sky measures.

- Colors and materials – provide more detailed information of the proposed materials, including photos of material samples and successful installations. As we have gone back to in-person meetings, we are looking forward to seeing a color and material board presented to the Design Review Committee.
  We will bring a material board with physical samples to the Design Review hearing.

- While Design Review is primarily looking at the design from its external context, we also look for any interior plan issues that may affect the exterior. A long time city goal is that all habitable spaces in residential units have access to natural light and air. We see that the unit configurations on some of the two and three unit layouts do not have natural light and air to one of the bedroom spaces. We also recommend that you illustrate how the interior design of the units allow for natural light to reach that back bedroom space or reconfigure those units as needed so that all areas have natural light.
  Thank you for the recommendation. The project drawings submitted for the Design Review hearing will include more details.

2274 Shattuck Avenue Project
in the
City of Berkeley

TRAFFIC IMPACT ANALYSIS

1) EXECUTIVE SUMMARY

The proposed project is located at 2274 Shattuck Avenue in the City of Berkeley. The project would consist of 227 apartments, up to 865 square feet of ground floor retail space. The project would replace existing commercial buildings that formerly housed a movie theater. Vehicle access to the proposed project would be via a driveway to a parking garage for one vehicle only, on Bancroft Way. **Figure 1** shows the location of the project and the surrounding roadway network. **Figure 2** shows the ground floor site plan for the project**.** Based on the trip generation forecasts the project would generate about 39 vehicle trips during the AM peak hour and about 56 trips during the PM peak hour. The project would have a less than significant impact on vehicle miles traveled (VMT) according to the City's adopted standards.[1] A detailed review of the project's design and an analysis conducted according to the City's guidelines indicated there would be no operational impacts to transit in the area or safety impacts to bicyclists or pedestrians.[2]

2) INTRODUCTION

This traffic impact report describes the transportation and circulation conditions both with and without the proposed project. The study presents information on the roadway network, the pedestrian and transit conditions, and provides an analysis of the effects on transportation facilities associated with the project. This study also describes the regulatory setting; the criterion used for determining the significance of environmental impacts; and summarizes potential environmental impacts and appropriate mitigation measures when necessary. This study has been conducted in accordance with the requirements and methodologies set forth by the City of Berkeley, Alameda County, Caltrans, and the applicable provisions of CEQA.

TRAFFIC IMPACT ANALYSIS
2274 Shattuck Avenue Project
City of Berkeley

3) ENVIRONMENTAL SETTING

This section of the report describes the roadways, traffic conditions and other existing transportation characteristics in the vicinity of the project. The primary basis for the traffic operations portion of the analysis is the peak hour level of service at the key study intersections. In this report, these peak commute hours will be identified as the AM and PM peak hours.

3.3 Project Study Intersections

To provide a baseline for identification of impacts on the local roadway network, existing traffic operating conditions have been determined for the key local intersections that may be affected by the project. For this analysis five study intersections were selected in coordination with City staff based on the City's Guidelines for Development of Traffic Impact Reports and their potential to be impacted by the proposed project. The five study intersections are:

1. *Milvia Street at Kittredge Street*
2. *Shattuck Avenue at Kittredge Street*
3. *Milvia Street at Bancroft Way*
4. *Bancroft Way at the Proposed Garage Entrance*
5. *Shattuck Avenue at Bancroft Way*

3.2 Traffic Analysis Scenarios

The study intersections were evaluated for the following four scenarios:

- Scenario 1: *Existing Conditions* – Level of Service (LOS) based on existing peak hour volumes and existing intersection configurations.

- Scenario 2: *Existing Plus Project* – Existing traffic volumes plus trips from the proposed project.

- Scenario 3: *Baseline (No Project) Conditions* – The Baseline scenario is based on Existing Conditions plus a 20% increase to the existing traffic volumes to account for approved projects and background traffic growth.

- Scenario 4: *Baseline Plus Project Conditions* – This scenario is based on the Baseline traffic volumes plus the trips that would be generated by the proposed project.

- Scenario 5: *Cumulative (No Project) Conditions* – The cumulative scenario is based on Year 2040 forecasts from the Alameda County Transportation Commission's (ACTC) countywide travel demand model.

- Scenario 6: *Cumulative Plus Project Conditions* – This scenario is based on the Cumulative traffic volumes plus the trips that would be generated by the proposed project.

3.3 Existing Roadway Network

As shown on **Figure 1**, the roads that would be primarily affected by the project are Shattuck Avenue, Bancroft Way, Kittredge Street, and Milvia Street. The following is a brief description of these roadways:

- **Shattuck Avenue** – Shattuck Avenue is a four-lane arterial roadway extending south from Vine Street to terminate to the south at Telegraph Avenue in the City of Oakland. It serves school, residential and commercial traffic and is an important north-south travel route. It is designated as a major street and a primary transit route in the City's General Plan.

- **Bancroft Way –** Bancroft Way is a discontinuous roadway extending east from Bolivar Way to terminate to the east at Piedmont Avenue. It serves school, residential and commercial traffic and is one way westbound to the east of Shattuck Avenue. It is designated as a collector street and a primary transit route in the City's General Plan.

- **Kittredge Street –** Kittredge Street is only a few blocks long, extending east from Milvia Street to terminate to the east at Oxford Street. It serves school, residential and commercial traffic and a two lane street with stop controls at all intersections except Shattuck Avenue, where there is a traffic signal.

- **Milvia Street** – Milvia Street is a two-lane collector street extending north from Russell Road to Yolo Avenue. It serves school, residential and commercial traffic and is designated as an important north-south bicycle boulevard.

3.4 Accident History

Caltrans has established restrictions on the use of multi-way stop signs and the California Manual of Uniform Traffic Control Devices (MUTCD) provides detailed guidance on when multi-way stop applications and traffic signals are appropriate.[1] Caltrans' guidelines state that a traffic signal or all-way stop control shall be considered if: "*Five or more reported crashes, of types susceptible to correction by a traffic control signal, have occurred within a 12-month period, each crash involving personal injury or property damage apparently exceeding the applicable requirements for a reportable crash*". A detailed review of the accident history in the study area (back to 2017) was conducted using data available from the California Highway Patrol's Statewide Integrated Traffic Records System (SWITRS). This data is included in the technical appendix and verifies the existing accident history in the area would not warrant installation of additional traffic signals, multi-way stop control, or other safety measures.

[1] *California MUTCD*, Chapter 2B, Caltrans, Sacramento, CA, November 7, 2014.

3.5 Intersection Analysis Methodology

Existing operational conditions at the study intersection were evaluated according to the requirements set forth by the City of Berkeley. Analysis of traffic operations was conducted using the 6th Edition of the *Highway Capacity Manual* (*HCM*) Level of Service (LOS) methodology with Synchro software.[1]

Level of service is an expression, in the form of a scale, of the relationship between the capacity of an intersection (or roadway segment) to accommodate the volume of traffic and the traffic moving through it at any given time. The level of service scale describes traffic flow with six ratings ranging from A to F, with "A" indicating relatively free flow of traffic and "F" indicating stop-and-go traffic characterized by traffic jams.

As the amount of traffic moving through a given intersection or roadway segment increases, the traffic flow conditions that motorists experience rapidly deteriorate as the capacity of the intersection or roadway segment is reached. Under such conditions, there is general instability in the traffic flow, which means that relatively small incidents (e.g., momentary engine stall) can cause considerable fluctuations in speeds and delays that lead to traffic congestion. This near-capacity situation is labeled level of service (LOS) E.

Beyond LOS E, the intersection or roadway segment capacity has effectively been exceeded, and arriving traffic will exceed the ability of the intersection to accommodate it. **Table 1** summarizes the relationship between LOS, average control delay, and the volume to capacity ratio at signalized intersections. **Table 2** summarizes the relationship between LOS and delay at unsignalized intersections

For signalized intersections, The City of Berkeley's LOS standards are based on the average delay for the entire intersection. The *HCM* methodology determines the capacity of each lane group approaching the intersection. The LOS is then based on average control delay (in seconds per vehicle) for the various movements within the intersection. A combined weighted average control delay and LOS are presented for the intersection. A summary of the HCM results and copies of the detailed HCM LOS calculations are included in the appendix to this report.

For unsignalized (all-way stop controlled and two-way stop controlled) intersections, the average control delay and LOS operating conditions are calculated by approach (e.g., northbound) and movement (e.g., northbound left-turn) for those movements that are subject to delay. Operating conditions for unsignalized intersections are presented for the worst approach.

[1] *6th Edition of the Highway Capacity Manual*, Transportation Research Board, Washington D.C., 2016.

TABLE 1
SIGNALIZED INTERSECTION LEVEL OF SERVICE DEFINITIONS

Level of Service	Description of Operations	Average Delay (sec/veh)	Volume to Capacity Ratio
A	Insignificant Delays: No approach phase is fully used and no vehicle waits longer than one red indication.	≤ 10	< 0.60
B	Minimal Delays: An occasional approach phase is fully used. Drivers begin to feel restricted.	> 10 to 20	> 0.61 to 0.70
C	Acceptable Delays: Major approach phase may become fully used. Most drivers feel somewhat restricted.	> 20 to 35	> 0.71 to 0.80
D	Tolerable Delays: Drivers may wait through no more than one red indication. Queues may develop but dissipate rapidly without excessive delays.	> 35 to 55	> 0.81 to 0.90
E	Significant Delays: Volumes approaching capacity. Vehicles may wait through several signal cycles and long vehicle queues from upstream.	> 55 to 80	> 0.91 to 1.00
F	Excessive Delays: Represents conditions at capacity, with extremely long delays. Queues may block upstream intersections.	> 80	> 1.00

SOURCES: *Highway Capacity Manual, Sixth Edition*, Transportation Research Board, 2016.

TABLE 2
UNSIGNALIZED INTERSECTION LEVEL OF SERVICE DEFINITIONS

Level of Service	Description of Operations	Average Delay (seconds/vehicle)
A	No delay for stop-controlled approaches.	0 to 10
B	Operations with minor delays.	> 10 to 15
C	Operations with moderate delays.	> 15 to 25
D	Operations with some delays.	> 25 to 35
E	Operations with high delays and long queues.	> 35 to 50
F	Operation with extreme congestion, with very high delays and long queues unacceptable to most drivers.	> 50

SOURCE: *Highway Capacity Manual, Sixth Edition*, Transportation Research Board, 2016.

3.6 Existing Intersection Capacity Conditions

The existing intersection geometry at the project study intersections is presented in **Figure 3**. The existing traffic volumes at these intersections for the weekday AM and PM peak hours are presented in **Figure 4**. Traffic counts at the study intersections were conducted in July, 2023 and adjusted for conditions when schools are in session based on other available count data for the study area. **Table 3** summarizes the associated LOS computation results for the existing weekday AM and PM peak hour conditions at these intersections. As shown in **Table 3**, all of the study intersections currently have acceptable conditions (LOS D or better). Please note the detailed LOS calculations are included in the appendix to this report**.**

3.7 Pedestrian and Bicycle Facilities

Bicycle paths, lanes and routes are typical examples of bicycle transportation facilities, which are defined by Caltrans as being in one of the following five classes:

Class I – Provides a completely separated facility designed for the exclusive use of bicyclists and pedestrians with crossing points minimized.
Class II – Provides a restricted right-of-way designated lane for the exclusive or semi-exclusive use of bicycles with through travel by motor vehicles or pedestrians prohibited, but with vehicle parking and cross-flows by pedestrians and motorists permitted.
Class III – Provides a right-of-way designated by signs or permanent markings and shared with pedestrians and motorists.
Class IV – Provides an adjacent bike lane or bikeway that is physically separated from motor vehicle traffic.

In the vicinity of the project Center Street, Oxford Street, and Bancroft Way are Class II bike routes with bike lanes. Milvia Street is a Class III bike route and is designated as a bicycle boulevard with signage and markings encouraging motorists to share the road with bicyclists.

3.8 Transit Service

The entrance to the Downtown Berkeley BART station is located two blocks from the project site. This station is located on the Richmond-Fremont Line which connected to other destinations in the Bay Area at the MacArthur Station. There is also direct service to Downtown San Francisco as well as continuing service to Milbrae. There is also extensive bus transit service provided by Alameda-Contra Costa County Transit (AC Transit) at the BART Station. In addition to local bus routes 6, 18, 51B, and 79, the following special lines operate less within two blocks of the project:

> **800:** (All Nighter) Richmond BART to Market St. and Van Ness Ave, S.F., via Macdonald Ave, San Pablo Ave, University Ave, Telegraph Ave and downtown Oakland. Returns via Market St. and West Oakland BART.

851: (All Nighter) Downtown Berkeley to Fruitvale BART via Southside Berkeley (UC campus), College Ave., Broadway, downtown Oakland, Webster St., Santa Clara Ave., Broadway, and Fruitvale Ave.**F:** (Transbay) UC Campus to Transbay Temporary Terminal, San Francisco via Shattuck Ave, Adeline St and 40th St.

Please note there are also bus stops less than a block from the project site at Shattuck Avenue and Kittredge Street.

4) REGULATORY CONTEXT

Existing policies, laws and regulations that apply to the proposed project are summarized below.

4.1 State

The California Department of Transportation (Caltrans) has jurisdiction over State highways and any improvements to these roadways would require Caltrans' approval.

4.2 Local

City of Berkeley General Plan - The Transportation and Circulation Element the City of Berkeley General Plan addresses the location and extent of existing and planned transportation routes, terminals, and other local public utilities and facilities. The General Plan identifies roadway and transit goals and policies that have been adopted to ensure that the transportation system of the City will have adequate capacity to serve planned growth. These goals and policies are intended to provide a plan and implementation measures for an integrated, multi-modal transportation system to meet the needs of all economic and social segments of the City.

4.3 Significance Criteria

It is important to note that this project has not been found to have any significant impacts according to CEQA and the CEQA criteria at the bottom of this section are presented for informational purposes only. In addition, the level of service criteria described below are based on the City's General Plan standards, not CEQA, and any proposed mitigations are intended to address the City standards. Traffic improvements to improve traffic operations at the project study intersections are not considered to be required mitigations under CEQA. In this case the project has not been found to have any significant impacts but it should be noted that according to CEQA guidelines, a project could have a significant impact if it would:

- Conflict with a plan, ordinance or policy establishing measures of effectiveness for the performance of the circulation system, including transit, roadway, bicycle and pedestrian facilities.
- Conflict with or be inconsistent with CEQA Guidelines Section 15064.3 subdivision (b)?
- Substantially increase hazards due to a geometric design feature (e.g., sharp curves or dangerous intersections) or incompatible uses (e.g. farm equipment).
- Result in inadequate emergency vehicle access.

5) IMPACT ANALYSIS AND MITIGATION MEASURES

5.1 Project Trip Generation

As noted above, the proposed project would consist of 227 apartments with up to 1,500 square feet of ground floor retail space. The resulting trip generation calculations are shown in **Table 4**. The trip generation rates are based on the ITE rates for high-rise apartments in the center city core, close to rail transit (Land Use 222) and for retail/restaurant uses (Land Use 822) taken from the 11th Edition of the Institute of Transportation Engineers (ITE) Trip Generation Manual. The ITE trip rates for apartments are generally representative of apartment buildings with a mixture of one- and two-bedroom apartments, with studios sometimes included, for an average of no more than about 2 bedrooms per unit. For this project the proposed number of residential units is 227 but there are 80 three-bedroom units and 66 four-bedroom units that were counted as three units each, so the resulting calculations are based on 373 units. As shown in **Table 4**, the proposed project is forecast to generate a net increase in traffic of approximately 39 trips during the AM peak hour and 56 trips during the PM peak hour.

5.2 Project Trip Distribution

The trip distribution assumptions have been based on the existing traffic count data including daily directional volume and peak-hour turning movements, the Alameda County travel demand

TABLE 4
TRIP GENERATION CALCULATIONS

Land Use	ITE Code	Size	ADT	AM Peak Hour			PM Peak Hour		
				In	Out	Total	In	Out	Total
ITE Apartment Rates (Center City Core, Close to Rail Transit) - Trips per Unit	222		0.82	0.05	0.06	0.10	0.10	0.04	0.14
Apartment Trip Generation		373 units[1]	306	17	20	37	38	14	52
ITE Restaurant/Retail Rates - Trips per Square Foot	822		54.45	1.43	0.96	2.39	3.30	3.29	6.59
Restaurant/Retail Trip Generation		*865 sq. ft.*	*47*	1	1	2	3	3	6
Reduction for Non-Auto/Pass-By Trips (34%)			*16*	*0*	0	0	1	1	2
Subtotals for the Restaurant/Retail			*31*	*1*	*1*	*2*	*2*	*2*	*4*
Net New Trip Generation for the Proposed Project			**337**	**18**	**21**	**39**	**40**	**16**	**56**

SOURCE: Institute of Transportation Engineers Trip Generation Manual (11th Edition).
NOTES: [1] The project is only proposing to include only 227 units but for the purposes of the trip generation calculations the 80 three-bedroom units and the 66 four-bedroom units were counted as two units each.

model, and knowledge of the surrounding area such as commute patterns and the overall land use patterns in the area. **Figure 5** shows the project traffic that is forecast to be added at the project study intersections.

5.3 Existing Plus Project Intersection Capacity Conditions

This scenario evaluates the existing conditions with the addition of traffic from the proposed project. A comparison of the capacity calculations for the conditions with the addition of traffic from the project is shown in **Table 5**. **Figure 6** presents the existing plus project volumes used in the analysis. The corresponding LOS analysis calculation sheets are presented in the Traffic Analysis Appendix. As shown in **Table 5**, all of the study intersections would continue to have acceptable conditions (LOS D or better) during the weekday AM and PM peak hours.

			PM	13.2	B	13.3	B

SOURCE: Abrams Associates, 2023

NOTES: HCM LOS results are presented in terms of average intersection delay in seconds per vehicle.

5.4 Baseline Intersection Capacity Conditions

For background conditions the pre-Covid volumes from traffic counts taken in 2018 were used. These were substantially higher than the existing traffic counts and represent a conservative estimate of post-pandemic conditions. **Figure 7** presents the resulting baseline volumes at each of the project study intersections **Table 6** summarizes the LOS results for the Baseline and Baseline Plus Project weekday AM and PM peak hour conditions. The corresponding LOS analysis calculation sheets are presented in the appendix. As shown in **Table 6**, all of the study intersections currently have acceptable conditions (LOS D or better) during the weekday AM and PM peak hours. Please note the detailed LOS calculations are included in the technical appendix to this report**.**

5.5 Baseline Plus Project Intersection Capacity Conditions

The Baseline plus proposed project traffic forecasts were developed by adding project-related traffic to the baseline traffic volumes. As noted above, **Table 6** summarizes the LOS results for the Baseline Plus Project weekday AM and PM peak hour conditions (i.e. the existing roadway network). **Figure 8** presents the resulting baseline plus project volumes at each of the project study intersections. Please note that the corresponding LOS analysis calculation sheets are presented in the appendix. As shown in **Table 6**, all of the study intersections would continue to have acceptable conditions (LOS D or better) during the weekday AM and PM peak hours.

NOTES: HCM LOS results are presented in terms of seconds per vehicle.

5.6 Cumulative Traffic Volumes

The Cumulative scenario evaluates the future buildout conditions in the area based on forecasts for the area from the Alameda County Transportation Commission's (ACTC) countywide travel demand model. **Figure 9** presents the resulting cumulative buildout volumes for the area, without traffic from the proposed project. Please note these forecasts have not been adjusted for potential effects of recent events (such an increase in working from home) and represent the worst-case forecasts that were developed based on pre-pandemic conditions (i.e. no reductions were taken to account for the effects of the pandemic).

5.7 Cumulative Plus Project Traffic Capacity Conditions

This scenario evaluates the addition of project-related traffic to the cumulative traffic volumes. The resulting volumes with the addition of traffic from full development of the project site are presented in **Figure 10**. **Table 7** summarizes the LOS results for the Cumulative Plus Project weekday AM and PM peak hour conditions. Please note that the corresponding LOS analysis calculation sheets are presented in the appendix. As shown in **Table 7** all study intersections and the project driveway would be forecast to continue to have acceptable conditions during the weekday AM and PM peak hours.

NOTES: HCM LOS results are presented in terms of seconds per vehicle.

5.8 Internal Circulation and Access

It is recommended that one on-street parking space be removed (and replaced with red curb) just east of the garage driveway to ensure adequate sight distance for vehicles exiting the garage. The project has been designed to meet City of Berkeley design standards and no site circulation or access issues have been identified that would cause any traffic safety issues or any unusual traffic congestion or delay. Accident records for surrounding streets within a block of the project site and for each of the study intersections are included in the technical appendix to this report. Per City of Berkeley guidelines, the project is providing the required five foot by five-foot sight distance triangle at the garage entrance/exit.

Based on the City's standard conditions required for other similar projects it is also expected the project will be required to provide the following:

1) Install "STOP" pavement markings and signage for exiting drivers to look both ways at the exit, prior to crossing the sidewalk;
2) Install convex mirrors at the project driveway to improve the visibility of exiting vehicles from the sidewalk;
3) Provide visual and/or audio warning devices that alert pedestrians when vehicles are exiting the driveway.

5.9 Parking

This section discusses the City of Berkeley's zoning and estimated parking demand for the project. Section 23.322.030 of the Berkeley Municipal Code specifies that no parking spaces are required for residential uses within commercial districts. Per AB 2097, no commercial parkin

spaces are required for projects within ½ mile of a BART station. It should also be noted that that according to the City's bicycle parking standards the project would require 211 long term bicycle parking spaces and also 16 short term spaces. The project is requesting a concession to provide 74 long-term bicycle parking spaces plus another 16 short-term bicycle parking spaces provided on-street with bicycle racks.

Parking Demand in Berkeley - For this location on a major bus route the parking demand would be less than the typical ITE rate in the Parking Generation Manual. This is based on many of the same characteristics that are discussed in the trip generation section. The availability of transit, the use of bicycles, and the attractiveness of walking in a mixed-use environment clearly results in reduced vehicle trip generation and an associated reduction in the need for parking. Since Berkeley has numerous opportunities for public transportation and the apartment residents are not all expected to have personal vehicles, it is anticipated that a substantial portion of all travel will occur by walking, bicycling, and through the use of public transit. Please note in addition to being two blocks from a BART station, there are bus stops one block from the site that include access to local routes as well as transbay and all-nighter bus routes.

5.10 Pedestrian and Bicycle Conditions

With respect to planned pedestrian and bicycle facilities in the project area, the City's Pedestrian Plan has identified the nearby segment of Martin Luther King Jr. Way from Hearst Avenue to Dwight Way as a priority street segment for improvements. About two blocks east of the project site at the intersection of Martin Luther King Jr. Way and Bancroft Way proposed improvements in the Pedestrian Plan include prohibiting right turns on red, striping high visibility crosswalks, and the installation of curb extensions to reduce the crossing distance for pedestrians. About three blocks from the project site at the intersection of Martin Luther King Jr. Way and Allston Way proposed improvements in the Pedestrian Plan include prohibiting right turns on red and the installation of curb extensions.

In the project study area the City's Bicycle Plan identifies a rectangular rapid flashing beacon (RRFB) at the intersection of Addison Street and Oxford Street and a protected intersection at Bancroft Way and Oxford Street/Fulton Street. Protected intersections typically require the use of bicycle signals. Bicycle signal phases can be added to the traffic signals to isolate bicycle movements from conflicting vehicle movements. The Bicycle Plan also specifies that the adjacent segment of Milvia Street is planned to have a cycletrack and University Avenue, Oxford Street, Shattuck Avenue are being studied for potential cycletracks (separated bikeways). The bicycle plan also specifies that Addison Street should be studied for a potential bicycle boulevard.

The proposed project would not generate a significant increase in pedestrian traffic in the area (in comparison to the existing volumes) given the size of the proposed project. Based on ITE data and data from MTC's Bay Area Travel Survey for projects within 1/2 mile of a BART station

during the peak commute hours the project would be forecast to generate approximately 98 transit trips, 26 bicycle trips and 149 pedestrian trips. In addition to the relatively low increase in vehicle trip generation, the proposed project would not be forecast to significantly impact or change the design of any existing pedestrian facilities and should not create any new safety problems in the area. An analysis of the pedestrian operations in the area using Synchro software indicated all crosswalks at the project study intersections would continue to operate at LOS C or better with or without the proposed project. The project will add some pedestrians and bicyclists who will utilize sidewalks and bicycle facilities in the area. Please note there are existing sidewalks and crosswalks along the route from the project to the BART station. In relation to the existing conditions, the proposed project would not cause substantial changes to the pedestrian or bicycle traffic in the area and would not substantially impact or require changes to the design of any existing bicycle or pedestrian facilities.

5.11 Transit

The proposed project would not interfere with any existing bus routes and would not remove or relocate any existing bus stops. The proposed Project also would not conflict with any transit plans or goals of the City of Berkeley. Based on the Synchro analysis of intersection operations and roadway segment speeds the project is not forecast to cause a degradation of the level of service (or a substantial increase in delay) on any roadway segments currently being utilized by bus transit in the area and, as such, no adverse effects to transit are expected.

5.12 Vehicle Miles Traveled

The vehicle miles traveled (VMT) in an area is one performance measure that can be used to quantify potential changes in travel from a project. This letter presents the extent of the VMT-related transportation impacts forecast to be caused by the Project. VMT is a particularly useful metric for evaluating the impacts of growth on greenhouse gas (GHG) emissions because it can be used to estimate fuel consumption by motor vehicles. Increases in VMT cause proportional increases in greenhouse gas emissions and air pollution. The Office of Planning and Research (OPR) released their final guidelines in a Technical Advisory on Evaluating Transportation Impacts in CEQA, dated December 2018. This analysis is based on the City of Berkeley's adopted guidelines as set forth in a staff report to the planning commission on September 2, 2020.[1]

VMT is typically estimated using an area-wide travel demand model from a regional transportation agency that calculates VMT based on the number of vehicles multiplied by the typical distance traveled by each vehicle originating from or driving to a certain area. This analysis uses the Alameda County Transportation Commission (ACTC) Travel Demand Model data on VMT per capita for various areas within the City of Berkeley. The Travel Demand

[1] *General Plan Amendment: Vehicle Miles Traveled (VMT) for Transportation Impact Analysis under the California Environmental Quality Act (CEQA)*, Planning Commission Staff Report, Planning and Development Department, City of Berkeley, September 2, 2020.

Model divides areas within ACTC's jurisdiction into transportation analysis zones, or TAZs. TAZs are used in transportation planning models for transportation analysis and other planning purposes. The apartments and commercial space proposed to be built by the Project would be expected to have similar VMT as other developments in the same TAZ. The VMT per resident and per employee estimated by the ACTC Travel Model for the Project's TAZ would therefore be assumed represent the approximate VMT that would be generated by the Project as well.

As per Attachment 1 of the September 2, 2020 Planning Commission staff report, the proposed project at 2274 Shattuck Avenue is located is located in a transit priority area (TPA) and also in an area with an average VMT per resident and worker that is at least 15% below the respective Bay Area averages. OPR's 2018 Technical Advisory also states the following: "*Presumption of Less Than Significant Impact Near Transit Stations - Proposed CEQA Guideline Section 15064.3, subdivision (b)(1), states that lead agencies generally should presume that certain projects (including residential, retail, and office projects, as well as projects that are a mix of these uses) proposed within ½ mile of an existing major transit stop or an existing stop along a high quality transit corridor will have a less-than-significant impact on VMT*." However, the City of Berkeley VMT analysis guidelines specify that the presumption of a less-than-significant VMT impact might not be appropriate if the project:

- Has a floor area ratio (FAR) of less than 0.75.
- Includes more than 200,000 square feet of office or commercial space.
- Includes more parking supply than the project's estimated demand
- Is inconsistent with the City's General Plan, an applicable Specific Plan, or an applicable Sustainable Communities Strategy (as determined by the City, with input from the MTC).
- Replaces affordable residential units with market-rate residential units.
- Has project-specific or location-specific information that indicates that the project will generate significant levels of VMT.

In this case none of the above factors would apply to the proposed project. The project is located less than 1/2 mile from BART and high-quality bus transit corridors and is located near bus stops for numerous bus lines at the intersection of Shattuck Avenue at Kittredge Street. The project also meets the other screening criteria described above and therefore, subject to City approval, this project would be assumed to have a less than significant impact on VMT in the area.

6) SUMMARY OF IMPACTS AND IMPROVEMENT MEASURES

TR-1 Demolition and construction activities associated with the proposed project would not increase in traffic to and from the site as compared to the existing, approved project, the existing project requires an appropriate construction management plan developed and approved by the City of Berkeley, consistent with the already existing and broadly applicable standard conditions that apply to projects similar in nature.

Heavy Equipment

Heavy equipment transport to and from the site could cause traffic impacts in the vicinity of the project site during construction. However, each overweight/oversized load would be required to obtain all necessary permits, which would include conditions. Prior to issuance of grading and building permits, the project applicant would be required to submit and have approved a Traffic Control Plan.

The requirements within the Traffic Control Plan include, but are not limited to, the following: truck drivers would be notified of and required to use the most direct route between the site and the freeway, as determined by the City Traffic Engineering Department; all site ingress and egress would occur only at the main driveway to the project site and construction activities may require temporary traffic controls as determined by the City Engineer. Please note construction traffic will be directed to use University Avenue as the City has a goal of minimizing construction traffic on local streets. Specifically, designated travel routes for large vehicles would be monitored and controlled by flaggers for large construction vehicle ingress and egress. Any debris and mud caused by trucks would be monitored daily and may require instituting a street cleaning program. In addition, several loads of heavy equipment being hauled to and from the site each month would be short-term and temporary.

Employees

The weekday work is expected to begin around 7:00 AM and end around 4:00 PM. The construction worker arrival peak would occur between 6:30 AM and 7:30 AM, and the departure peak would occur between 4:00 PM and 5:00 PM. These peak hours are slightly before the citywide commute peaks. It should be noted that the trips generated during construction would be temporary.

Based on past construction of similar projects, construction workers could require parking for up to 75 vehicles during the peak construction period. Additionally, deliveries, visits, and other activities may generate peak non-worker parking demand of 5 to 10 trucks and automobiles per day. Therefore, up to 85 vehicle parking spaces may be required during the peak construction period for the construction employees. It should

be noted the developer and their construction team are required to provide off-street parking for their employees on the site, if possible. Furthermore, the Traffic Control Plan requires that if construction employee parking cannot be provided on the project site, then other provisions will need to be made for off-site parking, subject to approval of the City Traffic Engineering Department.

Construction Material Import

The project would also require the importation of construction material, including raw materials for the building pads, the buildings, the parking area, and landscaping. Based on past construction of similar projects, importing this material is estimated to require substantial amounts of truck traffic. Under the provisions of the Traffic Control Plan, if importation and exportation of material becomes a traffic nuisance, then the City Engineer may limit the hours the activities can take place.

Impacts of Construction on Pedestrians and Bicyclists

The project would most likely require temporary closures of sidewalks and/or vehicle lanes adjacent to the site for safety. This would require a detailed plan for detouring pedestrian and bicycle traffic. This plan will need to be reviewed and approved by the City Engineer. The analysis of traffic operations at the driveway indicates there would be no significant changes to the traffic volumes, delay, or safety on the study roadways with the addition of traffic from the proposed project. The City requires permission to close sidewalks and an acceptable traffic control plan for closures to be permitted. In general, the pedestrian and bicycle operations in the area would not be expected to change significantly during construction beyond the addition of truck traffic to the area.

Traffic Control Plan

The Traffic Control Plan would indicate how parking for construction workers would be provided during construction and ensure a safe flow of traffic in the project area during construction. This analysis assumed construction of the entire project in one phase to identify the potential worst-case traffic effects. Each phase will be subject to a Traffic Control Plan and oversight by the City Engineer and construction traffic is not forecast to exceed the post construction traffic conditions created by the proposed project. As a result, the potential construction traffic impacts have been adequately addressed through the project impact analysis. The goal of the conditional requirements of the City is to make construction impacts less than significant. There is some increase in traffic associated with all construction projects, however the required traffic management plan is intended to ensure the effects of construction are acceptable to the City. Therefore, the demolition and construction activities associated with the proposed project or its individual phases would be expected to result in a ***less-than-significant*** impact.

Mitigation Measure(s)

None required.

TR-2 Impacts related to site access and circulation.

It is recommended that one on-street parking space be removed (and replaced with red curb) just east of the garage driveway to ensure adequate sight distance for vehicles exiting the garage. Beyond this change, it was determined that garage circulation should function well and should not cause any safety or operational problems. The project site design has been required to conform to City design standards and is not expected to create any significant impacts to pedestrians or bicyclists. Therefore, impacts related to site access and circulation would be ***less-than-significant***.

Mitigation Measure(s)
None required.

TR-3 Impacts regarding emergency vehicle access on and surrounding the proposed project site.

Sufficient emergency access is determined by factors such as number of access points, roadway width, and proximity to fire stations. The land use plan for the proposed project would be subject to approval of the fire department. All lane widths adjacent to the project would meet the minimum width that can accommodate an emergency vehicle; therefore, the width of the roadways would be adequate. Therefore, the development of the proposed project is expected to have ***less-than-significant*** impacts regarding emergency vehicle access.

Mitigation Measure(s)
None required.

RE: Application for Use Permit #ZP2023-0079 for 2274 Shattuck Avenue

Dear Mr. Stackhouse,

Thank you for submitting the materials to support the proposal to demolish the existing commercial building (preserving and renovating the eastern portion), and construct a 17-story, mixed-use building with 227 dwelling units and an 865-square-foot café in the C-DMU (Corridor) Zoning District at 2275 Shattuck Avenue (APN 57-2028-3).

Application – Based upon a preliminary review, the application appears to include the following approval requests:

1. Use Permit under BMC Section 23E.68.030.A to construct a new mixed-use development
2. Density Bonus with the following requested reductions, waivers and concessions:

   Waivers

   a. Waiver of BMC Section 23.204.130(E)(2) to exceed building height limits – to be 183 feet (plus 5-foot parapet, by right), where 75 feet is the limit (plus 5-foot parapet, by right)
   b. Waiver of BMC Section 23.204.130(E)(3)(b) to waive front and side setback minimums; see setbacks table
   c. Waiver of BMC Section 23.204.130(E)(3) to increase front setback maximum, where 5 feet maximum is required, at 0-20-foot building height; see setbacks table
   d. Waiver of BMC Section 23.204.130(E)(3)(b)(i) to exceed 120 feet in width in diagonal measurement above 120 feet in height – to be 178'-9" feet in width
   e. Waiver of BMC Section 23.204.130(E)(4) to reduce the usable open space requirement – to be 7,737 square feet, 18,160 square feet is required
   f. Waiver of BMC Section 23.322.090(A) to provide 72 long term residential bicycle parking, where 210 short-term is required

Concessions [Three concessions permitted, per Government Code §65915(d)(2)]: None.

Staff has reviewed the application and has determined that the following **additional** approvals will be required for the proposed project. (See below for additional fees due):

1. Use Permit under BMC Section 23C.08.050.A to demolish a non-residential building
2. Use Permit under BMC Section 23E.68.030.A, to construct dwelling units
3. Use Permit under BMC Section 23E.68.050 to create new floor area of 10,000 square feet or more
4. Use Permit under BMC Section 23.04.130(E)(1) to increase the maximum building height limit to 75' (plus 5' parapet, by right)
5. Use Permit under BMC Section 23.204.130(E)(3)(b) to modify front and side setback requirements
6. Administrative Use Permit under BMC Section 23.304.050(A) to exceed building height limits with rooftop architectural elements which exceed the maximum height limit for the district

Incomplete Items – Staff has also determined that application is incomplete at this time. Please address the following items to continue with the application review:

1. Fees. The additional approvals listed above require a payment of fees for each. Fees for additional approvals are due immediately. Also added are the traffic study review fee and demolition referral fee. I've sent the invoices with this letter.

2. Demolition/Preservation. Provide a detailed description of the portions of the existing building to be preserved and not demolished. **Thank you.**

3. Plans.

    a. Clarify if whether a parcel merger is required for the project. The survey shows parcel lines for three parcels, but only one APN. **Thank you.**

    b. Staff had determined that the parcel has two frontages – Shattuck and Bancroft. The remainder of the lot lines are considered interior side lot lines. Please make this revision and update as necessary in the setbacks table on A0.1. **Thank you.**

    c. The area under the trellis/shade structure on the roof should be included in the rooftop elements calculation on A0.1 and subject to the 15% limit. **Include the entire area under the trellis, and revise the calculation.**

    d. Verify that all usable open space (UOS) meets the definition in BMC 23.304.090. For instance, areas used as walkways or circulation are excluded from the total UOS. **Thank you.**

    e. Check that the maximum height dimension is consistent with the definition: *Maximum Building Height: The vertical distance of a building at any point, within a given plane, from finished grade to the top of the roof or parapet walls.* **Thank you. Provide a height dimension for the east portion of the building that fronts on Shattuck Avenue.**

    f. Clarify the number of street trees to be replaced on L1.01 (1 or 2?). **None. Thank you.**

    g. In the building elevations and street strip elevations, do not show structures/buildings that are *behind* the subject parcel along the viewline (perpendicular to the elevation). Also, please check the street strip elevation labels. **Thank you.**

h. **Provide dimensions for the front setback at Bancroft and Shattuck where it exceeds the 5' maximum.**

i. **Show any overhangs in the plans as dashed – i.e. the overhang at the entry canopy.**

4. Density Bonus Diagrams/Calculations. Base Project = BP; Proposed Project = PP; AUS=Average Unit Size; QU=Qualifying Units; DBU=Density Bonus Units.

   a. Please check RFA calculations. RFA should not include mechanical, or building operation areas. RFA should include trash rooms for residents. Trash area for the cafe should be included separately in the total commercial area, and not in the RFA. **Thank you.**

   b. The ground-floor residential support area that is included in the RFA, proportionate to the residential area in the BP, is not substantially similar to the respective proportion in the PP. The proportion should be similar for calculation of the density bonus. Revisions to the area in the BP should follow with revised calculations for affected development standards in the BP to show compliance. **The amount of lobby/unlabeled area in the BP is still not proportionately similar to the PP. This area should be much smaller for the smaller BP.**

   c. Indicate the location of Privately-Owned Public Open Space (POPOS) in the BP to comply with the requirement. If not shown, then the use permit to not provide POPOS in the BP will be added to the permit. **Clearly show the POPOS that is now provided in the PP.**

   d. Provide the setback lines, per floor, on the BP and PP diagrams and dimensions for 65 feet from the frontages, to demonstrate setback compliance/waiver necessity. **Thank you.**

   e. Include height and setbacks data in the BP compliance tables. **Thank you.**

   f. Verify whether the 0' setback (5' required for interior side setback 65' from frontage) at unit 1 in the BP requires the Use Permit to modify setbacks to be added to the permit. Are any other modification permits being wrapped into the BP for compliance? **Thank you.**

   g. BP compliance tables showing calculations for 150 BP units, are not consistent with the 151 units shown in the Density Bonus table. **Thank you.**

   h. Per BMC Section 23.330.060(B), "The City may negotiate changes to the requested waivers and reductions as part of the Use Permit and Design Review process, in coordination with the applicant, to address aspects of the project that may be of concern in the community or inconsistent with overarching principles of the General Plan, Zoning Ordinance, and Design Guidelines". Please provide further explanation for why the increase in height from the 75-foot limit to 108 feet is necessary to accommodate the project with a density bonus of 76 units on the site. **Thank you.**

5. Zoning Project Submittal Requirements (ZPSR). The following required items were incomplete from the application submittal: [ZPSR Link]

   a. Neighborhood Outreach. Provide proof of distribution of the invitations, including the date of distribution. **Thank you.**

b. Architect's Stamp. Include a licensed architect or engineer's stamp on each sheet in the plan set. **Thank you.**

c. Historic Resource Evaluation. This is required for demolition of a non-residential building 40 or more years old, subject to referral to the Landmarks Preservation Commission in accordance with BMC Section 23.326, or demolition/substantial change of any building 40 or more years old subject to environmental review pursuant to CEQA. Submit: State of California Department of Parks and Recreation (DPR) 523 forms (http://ohp.parks.ca.gov/?page_id=28351), or provide supplemental information in accordance with the Landmarks Preservation Ordinance criteria (BMC Section 3.24.110). **This item still missing.**

d. Traffic Impact Study. Demonstrate how the project meets screening criteria for determination and provide documentation that Transportation Division has determined that the project is not required to submit a transportation impact study. Please contact Kim Pham in the Transportation Division (KPham@cityofberkeley.info) for more information. **Thank you.**

e. Water Efficiency. Projects with 500 square feet or more of new, or 2,500 square feet or more of renovated irrigated landscaping must comply with State water efficient landscaping provisions. WELO-compliant landscape documentation including a planting, grading, and irrigation plan. See the ZPSR for details. **Thank you.**

f. Natural Gas Prohibition. Submit two statements as detailed in the ZPSR to ensure compliance with the City's Natural Gas Prohibition. **Revised statement indicating compliance received. Thank you.**

Advisory Comments

1. Level CEQA of Review. Staff will determine the level of CEQA review for the project within 30 days of the application being deemed complete.

2. Interdepartmental Roundtable Meeting. An interdepartmental review will be scheduled as an opportunity for you to receive comments on the project from City departments such as Building and Safety, Transportation, Zero Waste, Parks, Toxics and Public Works. I will coordinate with you to schedule a time when you can attend.

3. Landmarks Preservation Commission. The project will be scheduled for an LPC to obtain a recommendation for the demolition of the existing building, as required by BMC Section 23C.08.050.C.

4. Design Review. DR comments will be sent to you separately. Please respond to these comments in your next submittal, and copy Anne Burns for all submittals.

Revised submittal items should be uploaded to the Box.com project folder link that was previously sent to you. If the link is no longer active, please email me to request a new link Submit responses to all requested items at once, and not incrementally. Also, please be aware

of streamlining timelines under SB330, Government Code Section 65941.1(a)(d) that affect the validity of the project's SB 330 Preliminary Application.[1]

Should you have questions regarding this letter or your application, please feel free to contact me.

Sincerely,

Sharon Gong
Senior Planner
(510) 981-7429
sgong@cityofberkeley.info

[1] (1) Within 180 calendar days after submitting a preliminary application with all of the information required by subdivision (a) to a city, county, or city and county, the development proponent shall submit an application for a development project that includes all of the information required to process the development application consistent with Sections 65940, 65941, and 65941.5.
(2) If the public agency determines that the application for the development project is not complete pursuant to Section 65943, the development proponent shall submit the specific information needed to complete the application within 90 days of receiving the agency's written identification of the necessary information. If the development proponent does not submit this information within the 90-day period, then the preliminary application shall expire and have no further force or effect.

P.O. Box 70415, Richmond, CA. 94807 • (415) 745-1906 • caitlin@leftcoastarchitecturalhistory.com

Memorandum

Date:	7. December 2023
Author:	Caitlin Hibma, Principal/Architectural Historian Left Coast Architectural History
Re:	2274 Shattuck Avenue Historic Resource Evaluation Memorandum

Introduction

This memorandum was prepared by Caitlin Hibma of Left Coast Architectural History, who is qualified under the Secretary of the Interior's Professional Qualification Standards for Architectural History. It pertains to the property at 2274 Shattuck Avenue (APN: 57-2028-3) in Berkeley, California, which historically operated as a single-screen, 1,800-seat theater under the United Artists marquee. More recently it has operated as Regal Cinemas, which vacated the property in early 2023.

Executive Summary

The property was listed in the California Register of Historical Resources (California Register) in 2006, following a windshield-survey of 51 potential historic resources along a proposed 18-mile AC Transit East Bay Bus Rapid Transit Project (BRT Project). Both the BRT Project documentation and a 2015 Shattuck Avenue Commercial Corridor Historic Context & Survey relied heavily on 1978 Historic Resources Inventory documentation, and did not account for extensive alterations since the completion of the 1978 documentation. None of the prior evaluations comprehensively analyzed the present condition of the building under current preservation standards and are therefore inadequate for the purposes of CEQA and local land use planning decision-making. *Specifically, none addressed the building's loss of integrity by serial alteration, damage, and destruction of its most important interior and exterior features, which would make it ineligible for listing on the California register and National Register of Historic Places (National Register) today.*

The 1978 Historic Resources Inventory (HRI) documentation determined that the property was eligible for the National Register, but of course, did not address the numerous and extensive alterations made to the building since completion of the documentation 45 years ago. The documentation did note that substantial alterations had been made to the original single-screen theater even before 1978, but it did not analyze significance or the seven aspects of integrity according to current National or California Register significance criteria, as would be standard practice today. Its evaluation of National Register eligibility therefore must be reconsidered to account for both physical changes to the building and present-day evaluation criteria.

In 2004-2005, documentation for the AC Transit East Bay Bus Rapid Transit Project (BRT Project) was undertaken. It produced a California Department of Parks & Recreation (DPR) 523 Update Form, which noted that the

property was “field checked” and did “not appear to have undergone any alteration that would warrant a change in its National Register status code;” ie: the status established by the 1978 HRI documentation. The findings of the 1978 HRI documentation were referenced in the 2004 Update Form and the 1978 HRI form was appended. According to the related Finding of Effect report (2005) for the BRT Project, the evaluation process recognized the inadequacy of the evaluative procedures applied in 1978. It specified the significance criteria under which it determined the property to be eligible – National Register criteria A and C – resting entirely on the information and conclusions of the 1978 HRI documentation (aside from a visual field check of the property) and performing no independent analysis or documentation of obvious exterior alterations that had been made during the intervening 27 years. Nevertheless, as a result of the BRT Project study, the California OHP formally designated the property to the California Register by a consensus through the Section 106 process, based on the National Register finding that was made by the 1978 evaluation and reiterated by the 2004-2005 documentation.

The 2015 documentation, a component of the Shattuck Avenue Commercial Corridor Historic Context and Survey, performed only a summary, non-itemized evaluation according to National or California Register significance criteria and the seven aspects of integrity. It relied heavily on the conclusions of earlier analyses and focused primarily on the property's significance to a potential Shattuck Avenue Downtown Historic District. It did not perform any detailed or itemized analysis in regard to the theater's significance or integrity in relation to a potential district, however; and never formally determined eligibility for, nor designated, a historic district in the area.

All prior documentation and evaluation of the property relies on and is iterative of the original 1978 Historic Resources Inventory documentation, which was not performed to current standards. Therefore, this Historic Resource Evaluation seeks to provide analysis to compensate for the above deficiencies, especially by providing images of current versus historical condition, summarizing alterations over time, establishing a period of significance for the property, and assessing architectural merit according to up-to-date standards.

This study finds that:

- Past documentation and evaluation of the property relies heavily on the initial 1978 documentation, which does not reflect subsequent physical alterations and was not conducted according to current standards and is, therefore, not adequate for the purposes of CEQA and current local land use planning decision-making.

- The theater's period of significance is 1932 to 1973; the date of its construction to the time when the original single-screen theater was subdivided, and underwent numerous other alterations, for conversion into a multi-plex, which substantially changed both its visual appearance and functionality.

- A detailed accounting and synthesis of building permit records and other documentation of alterations indicates that the theater has undergone substantial alterations to both its exterior and interior, with a majority of significant features altered or absent since the 1970s; some since the 1940s.

- On the theater's primary exterior frontage on Shattuck, only the upper facade remains intact. Significant features that have been altered, removed, obscured, or demolished, in whole or in part, include the lower primary facade; marquee and blade signs; open atrium and associated finishes; box office; murals and painted décor throughout; concession stand; single main auditorium space; stage, proscenium, and auditorium décor; organ and grilles; theater seats; lounges and backstage space.

- The property does not meet the eligibility criteria of the National Register for association with important events, people, architectural merit, architect, or information potential. It does not meet the eligibility criteria of the California Register for association with important events, people, architect, or information

potential.

- The property may have met the California Register eligibility criteria for demonstration of high architectural merit; however, the building has lost integrity to the extent that it cannot effectively convey that merit. That integrity was lost as long ago as 1973.

- Local criteria for eligibility as a Landmark or Structure of Merit are broad and subjective, giving the City a measure of discretion to designate a property. However, the Housing Crisis Act of 2019 precludes the application of new zoning regulations – including local historic designations – once a preliminary application for a housing development is submitted.

- Assessed in its current state, the property has lost a majority of the seven aspects of integrity considered for National and California register eligibility, resulting in the inability of the property to convey its historic significance.

- Although the property is listed on the California Register, it would not qualify for listing had its loss of integrity been properly evaluated at the time of its designation (2006).

Methodology

Caitlin Hibma conducted site visits to 2274 Shattuck Avenue on 18 September and 15 November 2023 to observe and photograph the property's interior and exterior. (See *Appendix 1: Current & Historical Images*)

To minimize further confusion and rectify data concerning the historic significance, integrity, and status of 2274 Shattuck Avenue, this memorandum summarizes and synthesizes the findings of earlier studies, and provides new and additional information pertinent to current evaluation and treatment of the property; ultimately providing a conclusion as to the continued or changed historic status of the property.

Background information referenced herein was compiled from various records requests, file reviews, and other research:

- Berkeley Department of Planning & Development (Planning Department) – permit records request (June 7, 2023);
- Berkeley Architectural Heritage Association (BAHA) – review of records (June 15, 2023) and other records requests (Nov. 2, 2023);
- Northwest Information Center (NWIC) of the California Historic Resources Information System (CHRIS) – request for AC Transit East Bay Bus Rapid Transit Project (June 15, 2023);
- California Office of Historic Preservation (OHP) – request to Jay Correia (Registration Unit, Supervisor) to confirm historic status of property;
- JRP Historical Consulting, LLC – request for AC Transit East Bay Bus Rapid Transit Project records (Oct. 24, 2023);
- Alameda-Contra Costa Transit District – public records request for AC Transit East Bay Bus Rapid Transit Project records (Oct. 31, 2023);
- California Office of Planning & Research (OPR) – request for AC Transit East Bay Bus Rapid Transit Project records (Oct. 31, 2023);
- California State Library - request for AC Transit East Bay Bus Rapid Transit Project records (Oct. 31, 2023);

Evaluative Procedures

National Register of Historic Places & California Register of Historical Resources

The National Register is the official Federal list of districts, sites, buildings, structures, and objects significant in American history, architecture, archaeology, engineering, and culture. In order for a property to be eligible for listing in the National Register, it must be found significant under one or more criteria (A-D) relating to historically significant events, people, architects or architectural merit, or information potential. It must also retain the integrity necessary to convey that significance.

The California Register is an inventory of significant architectural, archaeological, and historical resources in the State of California. As with the National Register, a property must be found significant under one or more criteria (1-4) relating to events, people, architects or architectural merit, or information potential to be eligible for listing in the California Register and retain integrity.[1]

Properties that are determined to be eligible for the National Register are automatically eligible for the California Register,[2] and eligibility for the California Register qualifies a property as a historical resource for the purposes of CEQA.

Because the property at 2274 Shattuck Avenue was previously evaluated for both the National and California registers, the analysis presented in this memorandum provides an evaluation of the historic significance according to both registers' significance criteria, which essentially align.

Criterion A/1 (Event): Resources that are associated with events that have made a significant contribution to the broad patterns of our history/California's history and cultural heritage.

Criterion B/2 (Persons): Resources associated with the lives of persons significant/important in our past.

Criterion C/3 (Architecture): Resources that embody the distinctive characteristics of a type, period, or method of construction, or that represent the work of a master/important creative individual, or that possess high artistic values/or that represent a significant and distinguishable entity whose components may lack individual distinction.

Criterion D/4 (Information Potential): Resources that have yielded, or may be likely to yield, information important in prehistory or history.

Integrity

In order to qualify for listing in the National or California Register, a property must possess significance under one of the aforementioned criteria *and* have historic integrity according to seven aspects. Most, if not all, aspects of integrity must be met in order for the property to retain integrity, although "it is possible that historical resources may not retain sufficient integrity to meet the criteria for listing in the National Register, but they may still be eligible for listing in the California Register. A resource that has lost its historic character or appearance may still have sufficient integrity for the California Register if it maintains the potential to yield significant

[2] California Public Resource Code, Section 5024.1 (d)(1).

scientific or historical information or specific data."[3]

Location is the place where the historic property was constructed.

Setting addresses the physical environment of the historic property inclusive of the landscape and spatial relationships of the building(s).

Design is the combination of elements that create the form, plans, space, structure and style of the property.

Materials refer to the physical elements that were combined or deposited during a particular period of time and in a particular pattern of configuration to form the historic property.

Workmanship is the physical evidence of the crafts of a particular culture or people during any given period in history.
Feeling is the property's expression of the aesthetic or historic sense of a particular period of time.

Association is the direct link between an important historic event or person and a historic property.

Berkeley Landmarks & Structures of Merit

Berkeley Landmarks and Structures of Merit are designated by the City of Berkeley. Resources may be designated as Landmarks if they meet one or more of five criteria similar to those used for the California Register, but which elaborate on particular areas of significance. Resources may be designated as Structures of Merit if they meet general and/or specific criteria. Integrity is not considered in the evaluation for Berkeley Landmark or Structure of Merit eligibility.

However, Sec. 3.24.100.B of the Berkeley Municipal Code does not allow the interiors of private buildings to be designated or regulated as Landmarks or Structures of Merit. The Housing Crisis Act of 2019 further precludes the application of new zoning regulations – including local historic designations—once a preliminary application for a housing development is submitted.

Berkeley Landmarks

1. Architectural Merit:
a) Property that is the first, last, only or most significant architectural property of its type in the region;
b) Properties that are prototypes of or outstanding examples of periods, styles, architectural movements or construction, or examples of the more notable works of the best surviving work in a region of an architect, designer or master builder;
c) Architectural examples worth preserving for the exceptional values they add as part of the neighborhood fabric.

2. Cultural value: Structures, sites and areas associated with the movement or evolution of religious, cultural, governmental, social and economic developments of the City.

3. Educational value: Structures worth preserving for their usefulness as an educational force.

[3] California Office of Historic Preservation, "Technical Assistance Series #6: California and National Register Comparison (for purposes of determining eligibility for the California Register)."

4. Historic value: Preservation and enhancement of structures, sites and areas that embody and express the history of Berkeley/Alameda County/California/United States. History may be social, cultural, economic, political, religious or military.

5. Any property which is listed on the National Register described in Section 470A of Title 16 of the United States Code.

Berkeley Structures of Merit

General criteria shall be architectural merit and/or cultural, educational, or historic interest or value. If upon assessment of a structure, the commission finds that the structure does not currently meet the criteria as set out for a landmark, but it is worthy of preservation as part of a neighborhood, a block or a street frontage, or as part of a group of buildings which includes landmarks, that structure may be designated a structure of merit.

Specific Criteria

a. The age of the structure is contemporary with (1) a designated landmark within its neighborhood, block, street frontage, or group of buildings, or (2) an historic period or event of significance to the City, or to the structure's neighborhood, block, street frontage, or group of buildings.

b. The structure is compatible in size, scale, style, materials or design with a designated landmark structure within its neighborhood, block, street frontage, or group of buildings.

c. The structure is a good example of architectural design.

d. The structure has historical significance to the City and/or to the structure's neighborhood, block, street frontage, or group of buildings.

Historic Status & Previous Evaluations

Via three previous iterative evaluations of the property (summarized below and included in *Appendix 3: Prior Evaluations*), the latter of which rely heavily on the initial evaluation, 2274 Shattuck Avenue has been determined eligible for listing in the National Register and the California Register. No evaluation of the property's eligibility as a City of Berkeley Landmark or Structure of Merit has previously been undertaken.

Based on previous eligibility determinations, the property was subsequently designated to the California Register in 2006. It is, therefore, currently considered to be a historical resource for purposes of the California Environmental Quality Act (CEQA).

The property was also identified as a contributor to the potential Shattuck Avenue Downtown Historic District in the Shattuck Avenue Commercial Corridor Historic Context & Survey (Archives & Architecture, 2015); however, no formal determination was made as to district's eligibility for local, state or national designation.

1978 Historic Resources Inventory Forms for Berkeley Architectural Heritage Survey by Betty Marvin

The first documentation and evaluation of the property at 2274 Shattuck Avenue was undertaken in 1978 for the Berkeley Architectural Heritage Survey by local preservation specialist, Betty Marvin. At the time, the California Office of Historic Preservation's standard property inventory forms were known as Historic Resource Inventory forms, rather than DPR 523 Forms, as they are today. They contained generally similar information, however; and were a vehicle for recording the physical character and history of a property, while providing an evaluation

of its historic status.

The 1978 Historic Resource Inventory forms make cursory mention of the original United Artists ownership of the theater and its management by Fox-West Coast, as well as 45 years of operation as a "small town movie theater." They describe the building as an "Art Deco movie palace behind a deceptively small and austere facade," and relate its history and development from the time of its construction in 1932, to the late 1970s, making particular note of the building's evolution from original design intent to actual construction, including

> … many delays and changes of plans, to which we partly owe its advanced glass Deco style: early reports planned a "free adaptation of Spanish Renaissance," in other words the Moorish style of the 1920s... Plans at one time called for the Bancroft Way frontage – sheer concrete wall with just the least ridged pattern – to be decorated, but money was apparently not available.

The Bancroft Way facade was further described as "a massive irregularly shaped concrete block... with service entrances and little else."

Original, but now altered, features were described, including the "outside atrium with 4-sided dome, tiled walls and pavement," while note was also made of the substantial alterations that had already occurred in 1978; specifically, that the "Original 25' stage [was] closed off, lounge and smoking room remodeled, [and] 1940s bare-bulb marquee removed, in [the] change from 1 to 4 theaters, 1970-1976." The narrative concludes that

> Though some splendor has been lost in creating the 4 auditoriums, moving the box office inside (after a cashier was shot in a holdup [June 1972]), and removing the bare-bulb marquee and vertical neon sign... this is a gloriously preserved Art Deco theater...hard times for movies in the 1960s and 70s probably helped keep it intact – while the building was out of fashion there was neither money nor interest to remodel it...

The 1978 Historic Resource Inventory forms for 2274 Shattuck Avenue assigned the property a "National Register Status Code" of "3" indicating that it "appeared eligible for the National Register to the person completing or reviewing the form." No action was taken at the time to designate the property, however. In 2003, the status code system was revised and National Register Status Codes became known as California Register Status Codes. The former status code of "3" translates to the current status codes of "3S," "3D," or "3B," which all indicate eligibility for the National Register (either individually and/or as a contributor to a historic district).

2005 Update for AC Transit East Bay Bus Rapid Transit Project by JRP Historical Consulting

In 2004-2005, a second evaluation of the property was undertaken for the purposes of the AC Transit East Bay Bus Rapid Transit Project (BRT Project). The study produced a cursory DPR 523 Update Form, which noted only that the property was "field checked" and did "not appear to have undergone any alteration that would warrant a change in its National Register status code."

Fifty-one properties addressed by the BRT Project and it seems unlikely that field verification consisted of more than windshield-level survey or that building interiors or documentation of alterations were addressed. The related Finding of Effect document does note that

> Three-quarters of the previous evaluations were completed between 1977 and 1985; however, the vast majority were evaluated in the late 1970s as part of the statewide inventory completed by local governments and private organizations. At that time there was no standardization in the evaluation process and as a result, the historic resources within the architectural APE that were found to be significant often lacked clear and concise explanation of the historical importance... Only a

> handful of these previously evaluated properties included references to specific criteria (Criteria A, B, C, and D). Additionally, evaluation of the property's overall historic integrity was not supplied or overlooked. As a result, many of these historic resources appear to have been altered prior to the time they were found to be historically significant. Furthermore, these forms generally lack dates for period of significance or provide periods that do not correspond with the built resources. Many do not define architectural styles or influences, and when significance is based on architectural merit, character-defining features are not provided.[4]

The Finding of Effect document also provides a chart "giving a brief explanation of the significance of each historic property and where clearly specified in previous documentation, the characteristics that contribute to that significance..."[5] The chart notes that no period of significance was identified by previous documentation and summarizes that

> The United Artist Theater building appears to be significant under Criteria A and C. Constructed in 1932, the building served as a locally operated movie theater for over 45 years. The building is also noteworthy for its Art Deco style of architecture, typified by its stepped pyramidal facade, which includes "WPA-style sculpture representing Artistry United."

No independent evaluation or new determination of the property's historic significance or designation eligibility is provided by the DPR 523 Update form or in the Finding of Effect report. Since the BRT Project did not entail any alterations to the building – merely an alteration of its setting – a detailed re-evaluation was not necessary to conclude the BRT Project's indirect effects would be less than significant. The BRT project's effort to field check and produce a DPR 523 Update form simply reiterated and confirmed the findings of the 1978 Historic Resource Inventory evaluation without new information or analysis. As a result of the BRT Project study, on 15 March 2006, the California Office of Historic Preservation formally designated the property to the California Register based on the National Register finding that was made by the 1978 HRI documentation and reiterated by the BRT Project documentation. In the Office of Historic Preservation's Built Environment Resources Directory, the property now bears a status code of "2S2" indicating that it is an "Individual property determined eligible for the National Register by a consensus through the Section 106 process. Listed in the California Register."

2015 DPR Forms for Shattuck Avenue Commercial Corridor Historic Context and Survey by Archives & Architecture, LLC

The most recent evaluation of the property occurred in 2015 as a component of the Shattuck Avenue Commercial Corridor Historic Context and Survey authored by Archives & Architecture, LLC. Although the evaluation cites and summarizes both previous evaluations, a full set of DPR 523 forms was completed, thus creating a duplicate record.

The 2015 DPR 523 forms describe the building on a Primary Record form (DPR 523 A) and provide a list of character defining features that include the "stepped-parapet front wall; concrete wall structure and board-formed concrete rear wing with its vertical speed stripes; recessed entrance form; exterior wall frescos and bas relief; tower plume, arch, and scroll patterns; [and] original tile floor." The last item may refer to original tile floor borders; however, no full tile floors – originally only found in the atrium – remain intact. Also of note, the characterization of the speed-striped concrete wall structure on the rear wing (i.e. the Bancroft Way facade) as character defining conflicts with the 1978 evaluation's characterization of that facade as a value-engineered feature lacking in architectural merit. The narrative goes on to state that there have been two iterations of the vertical blade sign, both associated with the original marque, all of which have been removed, and that the primary facade has been altered, namely through the enclosure of the atrium, removal of the marquee and blade signage,

[4] Ibid.
[5] Ibid.

and changes to materials and features around the entrance at ground level. The only alteration noted within the summarizing section, however, is the removal of the marquee and blade sign.

The 2015 DPR 523 forms summarize and expand upon the history and context of the building on a Building, Structure, Object Record form (DPR 523 B), but devote attention primarily to summarizing the property's current historical status as established by the 1978 documentation and reiterative 2004 documentation, discussing integrity, and providing a cursory evaluation. The evaluation does not address California/National Register criteria-based analysis, but focuses generally on the property's contribution to a potential Shattuck Avenue Downtown Historic District and relation to the surrounding Downtown streetscape.

The 2015 DPR 523 Forms reiterate the "2S2" status code that was a result of the 2004 documentation, indicating that the property's continued eligibility for the National Register and standing designation to the California Register. It indicates that it would be a "contributor to the establishment of a historic district in the greater Shattuck Avenue area" primarily for the detailing and relationship of its commercial façade on Shattuck Avenue to the surrounding streetscape.

Physical Description & Alterations

At the time this memorandum is issued, the theater building has an L-shaped plan and is approximately two to four stories high with flat and bow-truss roof forms. The L-shaped plan consists of a two-story east-west ell that fronts on Shattuck Avenue, and a three to four story north-south ell that fronts on Bancroft Way. A separate, unrelated building is located within the interior angle of the L-shaped plan. View of the roof shows that a demising wall separates the two-story atrium and lobby portions of the east-west ell, which is separated from the north-south ell by a demising wall and change in height from two to three stories. The majority of the north-south ell is three-stories and the generally rectangular footprint of the ell narrows toward the south end, where it rises to four stories at the extreme southern end to accommodate the theater's fly loft.[6]

The primary facade faces Shattuck Avenue (east), without setback from the sidewalk. Its mass is two stories high, with parapet ornamentation that rises to approximately three to four stories. The margins of the first story are clad with non-original, large-dimension, marble tile that incorporates inset non-original poster display cases. The majority of the first story is spanned and enclosed by a non-original extruded aluminum frame storefront assembly that includes glazed entry doors on either side and an integral ticket window at the center. Above the first story is a non-original illuminated sign-board marquee that is flat and projects minimally from the face of the building. The upper primary facade is the only portion of the original facade to remain intact and features flat vertically-oriented panels that step upward toward the center. The panels have corbelled edges and feature low bas reliefs depicting half-arch, fountain, and other geometric motifs, as well as human figures and the words "Artistry" and "Unity." The upper facade is clad with smooth painted plaster that is in deteriorated condition.

The Bancroft Way facade (south) is physically and visually separate from the Shattuck Way facade, as it faces a different direction and street frontage, making the theater's Shattuck Avenue and Bancroft Way frontages appear unrelated. The Bancroft Way facade consists of a monolithic, flat, four-story plane of unfinished board form concrete. The concrete is adorned only with vertical bands of incised lines, which terminate in subtle chevron forms at the roofline. Between the vertical bands, the roofline is very slightly corbelled. There is a low projecting bay with a service entrance approached by concrete steps on the left side of the facade. On the right side, is another projecting bay with a chain link-gated service entrance. Two metal pedestrian doors are located on the left side of the main portion of the facade, which is otherwise completely unfenestrated.

Major spaces of the interior consist of a now-enclosed atrium, vestibule, and double-height lobby within the

[6] A fly loft an upward extension of the backstage space that allows scenery and stage elements to be lifted upward, via ropes and pulleys, facilitating scene changes.

east-west ell. The north-south ell contains two stories of auditorium space, as well as former lounge rooms, and backstage/fly loft space. The auditorium space was once a large single-screen theater, but now consists of four small auditoriums (two over two) and a "void space" (unused space at upper front of original auditorium space, forward of mezzanine). The two lounges and backstage space have also been converted into small auditoriums. In most spaces original finishes and decorative elements have been removed or painted over.

(See *Appendix 1: Current & Historical Images* for photographs.)

Alterations

Previous documentation of the theater only loosely noted alterations to the building at the time that each evaluation was made; or, in later cases, only confirmed and reiterated alterations addressed in previous documentation. The most visually apparent alterations were given the most attention, while some alterations appear to have been omitted.

The two charts on the following pages represent a comprehensive a chronological list and a graphic representation of changes that were made to the theater based on evidence from various sources and some subsequent deductions based on visual observation during site visits and related documentation. A spreadsheet of all building permits and other planning records on file with the City of Berkeley Planning Department is appended to this memorandum *(Appendix 2: Permits Chart).*

Date	Alteration	Source
1932	Theater built.	Permit
1940s (1943-1954)	Main lobby concession stand added. (Not included in original plans; presumably not original.)	S. Coleman reminiscence (BAHA)
1940s (1946-1965)	Original "United Artists" blade sign removed and replaced with Streamline Moderne "UA" version, Deco box marquee remained.	Historic photos
1940s	Lobby redecorated, decorative painting using scrolling foliate motifs introduced.	Gary Parks (FB)[7]
Mid-1960s	Art Deco painted and/or plaster decorative elements on the ceiling in the main lobby removed or painted over; comparison of 1932 images to today show that bands of painted or plasterwork scallop and chevron patterns on lobby ceiling are now gone. Evidence of other painted patterns and motifs exist throughout the building and may have been painted over in 1940s, mid-1960s, or other periods of remodeling noted below.	Carlo Chaney (FB)[8]
1973	Single large auditorium "twinned;" divided into two smaller auditoriums. Subdivision involved and resulted in: • Suspended ceiling installed at mezzanine level; the dividing wall between the two auditoriums - font to back - does not continue above approximately mezzanine level within void space suggesting that ceiling was installed at mezzanine level and that mezzanine was closed off/unused for a time. Void space and remaining decorative features have been obscured from view since this time. • Stage closed off, orchestra pit demolished, new partition walls/screens installed forward of orchestra pit. • Proscenium[9] and other ornamental features and decorative painting (including lower portions of decorative organ grilles) obscured and partially destroyed up to level of new suspended ceiling. • Suspension wires for new ceiling were punched through decorative plaster work – including suspended sunburst ceiling ornament radiating from the proscenium – within void space, heavily damaging it.	Permit Deduced
1973	Deco box marquee and Streamline Moderne blade sign removed. Flat sign board marquee (listing 2 movies) and short "UA Cinemas" projecting sign installed.	Permit, historic photo
1973	Organ removed. (Lower portions of decorative organ grilles removed to level of suspended ceiling, see above.)	Gary Parks (FB)
1973	Original theater seats replaced.	Permit
1974	Split upper level into two separate theaters.	Permit

[7] FB = facebook. Information gathered from posts and comments on "Save the United Artists Theater Berkeley" Facebook group. Gary Parks is a local theater preservationist, expert, and author on the topic. Anthony Bruce is Executive Director of Berkeley Architectural Heritage Association. Carlo Chaney is a Chicago-based theater preservationist.

[8] FB = facebook. Information gathered from posts and comments on "Save the United Artists Theater Berkeley" Facebook group.

[9] The proscenium or proscenium arch is a framing opening that defines the stage from the auditorium. A stage apron or open orchestra pit sometimes extends beyond the proscenium into the auditorium slightly. The proscenium is often decorative. In the case of this theater, it included decoratively painted massive round columns flanking the stage and a slight arch at the top, which had a stepped profile and was adorned with decorative plaster work.

	Mezzanine space divided down center resulting in 4 auditoriums; two at first floor, two at second floor. Reopening mezzanine as two additional auditoriums involved and resulted in: • Partition wall/screens installed at location of mezzanine railing. • Dividing wall between auditorium spaces continued up to original ceiling (does not continue within void space). • Majority of ornamental features and decorative painting within mezzanine auditoriums removed or painted over.	Deduced
1974	Installation of wall/screens at mezzanine railing location resulted in void space at upper front of original auditorium space. Some decorative plaster work is still visible in this space but is heavily damaged and decorative painting has been painted over. Both plaster work and decorative painting are removed, damaged, or obscured throughout the rest of the original auditorium space.	Observed/deduced
ca. 1974	Flat sign board marquee enlarged (to list 4 movies for 4 auditoriums). Short projecting "UA Cinemas" sign removed, not replaced.	Historic photo.
1975	HVAC equipment and duct work installed. Ventilation ducting profuse in void area; resulted in severe damage and partial destruction of remaining ornamental plaster work.	Permit Deduced
Post-1972	First story of front (Shattuck) facade remodeled; cladding materials, entry assemblies, poster display cases, etc.	Historic photo
1972-1978	Box office moved "inside," from front facade to interior of atrium. (Unclear if box office was rebuilt with change of location. Originally box office appears to have been clad with black vitrolite[10] and had gold Deco style ornament.)	Historic photo, 1978 DPR
1982, 1985	Ladies lounge, smoking room, and former backstage area (unclear which, when) converted to auditoriums for total of 7 auditoriums.	Permits
ca.1982	Two new murals painted (by John Anderson) in lobby/foyers to mimic original Heinsbergen Decorating Company mural, of which only one remains.	Anthony Bruce (FB)
1989	Atrium closed off from street, facade repaired, exterior remodeled. Modern aluminum frame, glazed entry assembly, incorporating box office window, installed across entry opening. (Relocated original and/or replacement box office demolished at this time). This remodeling also resulted in • First story exterior walls around entry re-clad with marble tile and new poster cases installed (original materials appear to have been black vitrolite with inlaid Deco style gold accents). • Original colored pavement and/or tilework removed from atrium floor, walls, and possibly dome; floor carpeted, walls and dome covered with sheetrock and painted. • Box office counter, main lobby concession stand, and mezzanine concession stand added/remodeled with identical aesthetics to atri-	Gary Parks, Berkeleyside[11] Deduced

National & California Registers Significance Evaluation

Because the property at 2274 Shattuck Avenue was previously evaluated for both the National and California registers, the following analysis provides an evaluation of the historic significance according to both registers' significance criteria:

Criterion A/1: *Resources that are associated with events that have made a significant contribution to the broad patterns of our history/California's history and cultural heritage.*

No specific events of historical importance are known to have occurred at the property. The property fits the extremely broad context of Depression-era movie theaters and entertainment venues. During economic hard-times of the 1930s, flamboyant movie palaces and smaller theaters were built in large numbers across the nation, as a financially beleaguered populace turned to the fantasy and escapism of affordable entertainment like movies. Hollywood, its studios, stars, and stories were represented physically by movie theaters in communities across America. Theaters also provided local employment opportunities, in their initial construction and ongoing operation, that helped bolster local economies to some extent. The United Artist Theater at 2274 Shattuck Avenue, built in the early years of the Depression, filled these roles within the City of Berkeley. However, it was one of many built within the same context, both within Berkeley and across California and the United States. It claims a place within that broad historical context, but does not stand out as particularly important or influential to the context, as it is one of a myriad of Art Deco Depression-era movie theaters found locally, regionally, and nationally.

The property does not appear to be eligible for listing in the National or California registers under Criterion A/1.

Criterion B/2: *Resources associated with the lives of persons significant/important in our past.*

The property has been owned by corporate entities throughout its history, with no specific people directly related to it, either as owners, operators/employees, or in other associated roles. United Artists, for whom the theater was built, was founded by movie stars Mary Pickford, Charlie Chaplin, Douglas Fairbanks, and D.W. Griffith; however, these celebrities had no specific relationship with the theater at 2274 Shattuck Avenue, which was one of numerous United Artists theaters built throughout California and the nation. Various stars may have visited the theater in connection with films being shown; for instance Roy Rogers and stars of the film "Down to Earth" appeared in person at the grand opening of the theater at 2274 Shattuck Avenue;[12] however, this was a common practice within the early film industry and those stars have no meaningful connection to this specific theater among the many that they appeared at for premiers, grand openings, and other events.

The property does not appear to be eligible for listing in the National or California registers under Criterion B/2.

Criterion C/3: *Resources that embody the distinctive characteristics of a type, period, or method of construction, or that represent the work of a master/important creative individual, or that possess high artistic values/or that represent a significant and distinguishable entity whose components may lack individual distinction.*

Architecture

The theater at 2274 Shattuck Avenue represents the Art Deco style of architecture. The Art Deco style was popular nation-wide in the 1920s and 1930s, breaking away from traditional styles to introduce a unique, modernistic, and uplifting aesthetic to a nation that was at first focused on progress and the future, then later seeking escapist relief from the Great Depression. It was a highly decorative style and was applied primarily to public and commercial buildings. Sometimes found on large apartment buildings, it was much less common in residential de-

[12] *Berkeley Daily Gazette,* 15 September 1932.

sign. Applied to a theater, the Art Deco style was an exuberant advertisement for the exciting entertainment offered by the establishment.

The Art Deco style was characterized by smooth wall surfaces, usually clad with stucco, that were profusely decorated with geometric motifs like zig-zags, stair steps, sunbursts, chevrons, stylized floral shapes, and vertical bands. Verticality was the emphasis of the style and was often dramatically expressed in towers, blade/fin walls, and other vertical projections above the roofline. The style was often embellished with color and light in the form of polychrome paint schemes and multicolored neon signage.

The theater at 2274 Shattuck Avenue expresses the Art Deco style only in its upper primary facade (the lower portion having been completely altered), which is narrow but has vertical emphasis embodied in stepped rectangular panels that rise to the center. The vertical components of the stepped roofline incorporate smaller stepped and corbelled details at their edges and are adorned with stylized half-arches, fountain motifs, radiating sunburst-like scored lines, and Deco style human figures. The aesthetic may have originally been enhanced by polychrome paint and had a vertical blade sign and a marquee with chevron ornamentation, copiously outlined in neon; as well as Deco style geometric lines and shapes in the surround of the entry and within the open and visible atrium. However, by at least 1965, the facade had been painted a monochrome off-white and, over time, the marquee and signage underwent repeated replacements. Today, the paint scheme is more polychrome, but the non-original paint is faded and peeling, while blade signage has been removed entirely and the marquee is now a flat reader board. The atrium has been closed off from view and access of the street. Effectively, although Art Deco forms remain, the theater's ability to advertise its purpose – a critical function for an entertainment business – through color, light, and innate stylistic flamboyance, has been lost.

The secondary Bancroft Way facade effectively reads as a separate building due to the theater's L-shaped plan, the two facades' perpendicular orientations, and an intervening building mass. It only loosely associates with the Shattuck Way frontage in its vague Art Deco references. Its lack of ornament, sculptural definition, color, and interaction with the public realm is antithetical to the Art Deco style and the building's identity as an entertainment venue. It relates little – physically or stylistically – to the Shattuck Avenue frontage of the building. It is also an indicator of the value-engineering (lack of budget) that resulted in the original design of such a massive unadorned facade. Pertinent to the concept of the Bancroft Way facade's value engineering and lack of ornamental consideration, the National Register Bulletin addressing “How to Apply the National Register Criteria for Evaluation” (National Register Bulletin No. 15) states:

> Art Deco detailing is not eligible under Criterion C if the detailing was added merely as an afterthought, rather than fully integrated with overall lines and massing typical of the Art Deco style...[13]

The interior of the theater was also originally designed in the Art Deco style, but many elements have been lost in the substantial alteration of the originally single-screen theater into a multi-plex; not least, the enclosure and ornamental sterilization of the originally-exterior atrium, and the removal of original features and ornament within the now-subdivided auditorium. With regard to interiors, and providing a strikingly pertinent reference to auditorium interiors like that at 2274 Shattuck Way, National Register Bulletin No. 15 states:

> In some cases the loss of an interior will disqualify properties from listing in the National Register – a historic concert hall noted for the beauty of its auditorium and its fine acoustic qualities would be the type of property that if it were to lose its interior, it would lose its value as a historic resource.[14]

[13] National Park Service, “National Register Bulletin (15): How to Apply the National Register Criteria for Evaluation,” 1995; 18.
[14] Ibid., 46.

Essential interior features of the theater have not only been lost or altered to a great extent, but many of those that do remain are hidden from view or have been painted over or otherwise obscured. The interior decorative features of the original single-screen auditorium that survive (though in a damaged state) are limited to the void space at the upper front of the original auditorium, which is completely hidden from view and accessible only through a small utility hatch from the fly loft. National Register Bulletin No. 15 addresses this situation by stating that eligible properties

> must not only retain their essential physical features, but the features must be visible enough to convey their significance. This means that even if a property is physically intact, its integrity is questionable if its significant features are concealed under modern construction.[15]

Thus, although some original decorative features remain, they cannot contribute to the building's integrity and, subsequently, its ability to convey the architectural significance of the property.

The theater, as originally designed (with the exception of the Bancroft Way facade, which was not executed to original designs), appears to have been a modest example of the Art Deco style and was also one of many Art Deco style theaters locally and nationwide. Many of those still stand and are of greater architectural merit, in regard to which National Register Bulletin No. 15 states that a building that is "a modest example" of its style would not qualify as having high artistic values.[16] Because it is a relatively well represented type and style locally and nationally, is modest in comparison to other theaters locally and nationally, and has lost integrity it does not appear to rise to National Register-level significance.

In its original physical state, it appears to have had adequate architectural merit to qualify it for eligibility at the California Register level; however, as discussed below, alterations have degraded its integrity to the point that it can no longer adequately demonstrate its architectural merit.

Architect

The theater was designed by architect Clifford A. Balch, who was a partner in the architecture firm of Walker & Eisen.[17] According to the Cinema Treasures website and Pacific Coast Architecture Database, Balch designed at least 60 theaters in California between 1914 and 1941. His work was heavily concentrated in Southern California, although he readily worked throughout the state. He was hired repeatedly by the Fox West Coast Theater Corporation and United Artists. Although he began specializing in theater design under a previous partnership, from 1919 onward he worked under the auspices of the Southern California firm of Walker & Eisen. The firm was founded in 1919 by partners Albert R. Walker and Percy A. Eisen. The L.A. Conservancy notes the Fine Arts Building and the Oviatt Building in Los Angeles as some of their best known work, but notes that they were extremely prolific. They designed many building types beyond theaters, but Balch appears to have been the theater specialist in the Walker & Eisen office.

Based on his prominence in the field of theater-design throughout California and the number of theaters of the 1920s, 30s, and 40s, that are in his portfolio, Clifford Balch appears to have been a popular theater designer. Many of his theater designs are still standing today. The Cinema Treasures website identifies 38 Balch-designed theaters that are still extant today (of 61 total examples identified).[18] Many have been adaptively re-used, but retain their architectural character, and many provide equal or better examples of Balch's work than the United Artists theater at 2274 Shattuck Avenue. Additionally, Balch designed at least four other United Artists theaters using a facade design identical to that at 2274 Shattuck Avenue,[19] indicating that a cookie-cutter approach was

[15] Ibid.
[16] Ibid., 20.
[17] Wikipedia, "Walker & Eisen," https://en.wikipedia.org/wiki/Walker_%26_Eisen.
[18] Cinema Treasures (website); https://cinematreasures.org/architects/188?status=all
[19] United Artists Alameda Theater, 5136 Whittier Blvd., Los Angeles, 1931 (extant); United Artists Pasadena Theater, 606

prescribed by the theater company and suggesting that although Balch may have executed the original design concept, he may not have had direct involvement with the execution of the design at 2274 Shattuck Avenue, which was the third or fourth iteration of the design to be executed. Two of the identical theaters (both built the year prior to the subject theater) are still extant and appear to have equal or better integrity than the subject property.

Because it is one of many remaining Balch-designed theaters in California, including at least two others of identical design, and has lost the integrity of Balch's original design intent due to alterations, the theater does not appear to rise to a level of national, regional, or local significance for association with a master architect or important creative individual.

The property does not appear to rise to a level of significance to be eligible for listing in the National Register under Criterion C. It would have been eligible for listing in the California Register under Criterion 3, but for loss of integrity; see below.

Criterion D/4: *Resources that have yielded, or may be likely to yield, information important in prehistory or history.*

Criterion D/4 is typically concerned with archaeological investigation. Where buildings or architectural elements are concerned, this criterion typically relates to rare construction types, of which 2274 Shattuck Avenue is not an example.

Therefore, the property does not appear to be eligible for individual listing in the National or California registers under Criterion D/4.

Integrity Evaluation

In order to qualify for listing in the National or California Register, a property must possess significance under one of the aforementioned criteria *and* have historic integrity according to seven aspects. Most, if not all, aspects of integrity must be met in order for the property to retain integrity, although

> It is possible that historical resources may not retain sufficient integrity to meet the criteria for listing in the National Register, but they may still be eligible for listing in the California Register. A resource that has lost its historic character or appearance may still have sufficient integrity for the California Register if it maintains the potential to yield significant scientific or historical information or specific data.[20]

No assessment of integrity is required under Berkeley Landmark or Structure of Merit evaluation criteria, which are addressed in the next section (Berkeley Municipal Code 3.24.110).

The theater appears to be significant under one of the above California Register criteria; therefore, an evaluation of integrity is provided:

- Location: The theater retains integrity of location, having never been moved from or re-positioned on its original site.

E. Colorado Blvd., Pasadena, 1931 (extant); United Artists Long Beach Theater, 217 E. Ocean Blvd., Long Beach, 1932 (demolished); United Artists 4 Star Theater, 5112 Wilshire Blvd., Los Angeles, 1933 (demolished).

[20] California Office of Historic Preservation, "Technical Assistance Series #6: California and National Register Comparison (for purposes of determining eligibility for the California Register)."

- Setting: The densely urban environment of Downtown Berkeley, and adjacency of the major thoroughfare of Shattuck Avenue, has evolved over time. Development such as transportation and streetscape improvements and the construction of modern buildings has changed the character and scale of the greater Shattuck Avenue corridor and generated numerous fine grain changes in the theater's surroundings that erode integrity of setting, although it remains an urban environment.

- Materials**:** The theater has lost integrity of materials, having undergone exterior and interior alterations that have removed and/or covered and obscured many of its distinctive materials such as facade cladding and fenestration, tilework, painting and plasterwork, signage, and fixtures.

- Design**:** The theater has lost integrity of design. It retains its basic massing and exterior structural envelope, but has undergone substantial alterations to important exterior elements like the lower primary facade, marquee/blade sign, and open atrium. Substantial changes to the interior volume resulting from the division of the originally single-screen theater into multiple auditoriums and the conversion of period-indicative spaces like the lounges and stage into additional auditoriums has greatly obscured the original design intent. These changes have both diminished its visual identity as a theater – including its ability to advertise its entertainment commerce; a critical aspect of a movie theater's design – and changed its functional design in terms of use, circulation, capacity, etc.

- Workmanship**:** The theater has lost integrity of workmanship, because both its functional design and many of its material features have been altered. With the physical alteration and/or removal of spaces and features, the tangible materials that make them up and the ways in which they were constructed, crafted, or applied is lost. For instance, enclosure of the atrium and alteration of the configuration and appearance of the primary facade and entrance resulted in the destruction of an original ticket booth, which was built and ornamented in a way indicative of its time and use. Likewise, the skilled application of tilework, painted ornament, and decorative exterior cladding was all negated with changes to the lower primary facade and atrium interior. Similarly, subdivision of the single voluminous auditorium resulted in the removal, obscuring, and/or extensive damage of the stage and proscenium, which were constructed to certain parameters and with certain theater-specific features (like orchestra pits, fly lofts, etc.), while plaster ornamentation and decorative painting applied with certain skill and style, were wholly or partially demolished, severely damaged, and hidden from view. Thus, the workmanship – or physical treatment and application of materials and features to the specifications of the intended design – is no longer extant.

- Feeling**:** The theater has lost integrity of feeling as an Art Deco style movie theater, because the Art Deco aesthetics only remain in the upper primary facade, while signature features indicative of the building's intended use as a theater, such as the marquee and blade sign and a recognizable standalone ticket booth (rather than one integrated into a generic modern storefront assembly) are no longer extant. The lower primary facade, including the modern sign board marquee, has been remodeled in a way that dilutes the theater's original physical and visual character, and the originally open and accessible atrium has been closed off from the public realm, diminishing the impression of an inviting entertainment venue. The interior lobby retains some Art Deco decorative elements, but alterations to materials and features, there and within the auditoriums, convey only a diminished sense of an Art Deco movie palace, while the ad hoc subdivision of auditorium spaces has negated the feeling of a grand movie palace setting. Ultimately, upon approach, the exciting sense of a brightly illuminated, colorful, highly stylized, vivacious entertainment venue is no longer felt; nor is the promise of entering a gilded, luxurious, highly decorated theater, where one will sit in a voluminous space full of exotic ornamentation to indulge in a few hours of movie-watching.

- Association**:** The theater's loss of physical aspects of integrity, like materials, design, and workman-

> ship, as well as its inability to convey the feeling of an Depression-era Art Deco movie theater means that it only minimally reflects the character that was present at the time it was built. It is able, on a basic level, to convey its significant associations with the film and theater industry of the 1930s; however, its character has very obviously been altered and it expresses the confusing associations of other eras as well.

In addition to the above, National Register Bulletin No. 15 identifies "a movie theater embodying high artistic value in its decorative features" as an example of a property that might be significant under National Register criterion C. However, for it to be eligible it "must clearly contain enough of those [distinctive] characteristics to be considered a true representative of a particular type, period, or other method of construction."[21] It goes on to say that:

> A property important for illustrating a particular architectural style or construction technique must retain most of the physical features that constitute that style or technique. A property that has lost some historic materials or details can be eligible *if* it retains the majority of the features that illustrate its style in terms of the massing, spatial relationships, proportion, pattern of windows and doors, texture or materials and ornamentation. The property is not eligible, however, if it retains some basic features conveying massing but has lost the majority of the features that once characterized its style.[22]

As a building that retains its basic massing and structural envelope, but has lost the lower portion of its primary facade and originally-open atrium, as well as the marquee and signage that were signatures of both its style and function, the theater is no longer a "true representative of a particular type" or style and would, thus, not be eligible.

Based on the above analysis, the property assessed in its current state has lost the majority of the seven aspects of integrity considered for National and California register eligibility, and does not conform to National Register guidance regarding retention of distinctive features, thus resulting in the inability of the property to convey its historic significance.

City of Berkeley Landmark & Structure of Merit Evaluation

Sec. 3.24.100.B of the Berkeley Municipal Code does not allow the interiors of private buildings to be designated or regulated as Landmarks or Structures of Merit. The Housing Crisis Act of 2019 further precludes the application of new zoning regulations – including local historic designations—once a preliminary application for a housing development is submitted. As a formality, and because it was not included in previous documentation or evaluation, the following evaluation of local Landmark/Structure of Merit eligibility is provided:

Berkeley Landmark Evaluation

Berkeley Landmarks are designated by the City of Berkeley. Resources may be designated as Landmarks if they meet one or more of five criteria similar to those used for the California Register, but which elaborate on areas of significance. The following provides an evaluation of the historic significance of 2274 Shattuck Avenue according to local significance criteria:

1. Architectural Merit:
a-c. Property that is the first, last, only or most significant architectural property of its type in the region; Properties that are prototypes of or outstanding examples of periods, styles, architectural movements or construction, or

[21] National Park Service, 18.
[22] Ibid., 46.

examples of the more notable works of the best surviving work in a region of an architect, designer or master builder; Architectural examples worth preserving for the exceptional values they add as part of the neighborhood fabric.

The theater does not claim the status of first, last, or only of its type or style in the region. Although it has a place in the context of Depression-era Art Deco movie theaters, it is not a particularly significant or outstanding example of its type or style in relation to others and is heavily altered, with only its upper primary facade intact and character defining. The theater was designed by architect Clifford Balch, who was a prolific theater designer in California; however, this is one of numerous theaters he designed – may of which are still extant, including the California Theater in Berkeley. It is also one of four others of identical design to the theater at 2274 Shattuck Avenue, indicating that although Balch may have rendered the initial design concept, it was applied to the subject property without great architectural consideration or direct interaction from him. Thus, the property does not possess the architectural merit (or integrity) and association with an important architect that would qualify it as a Berkeley Landmark under this criterion.

2. Cultural value: Structures, sites and areas associated with the movement or evolution of religious, cultural, governmental, social and economic developments of the City

The construction of the theater and its subsequent use history was influenced by national-level cultural and economic factors, but these were of extremely broad context and not unique to the City of Berkeley. It was built during the Great Depression and was part of a vast trend of theater construction that sought to provide affordable entertainment for a financially beleaguered public seeking the escapism of Hollywood films, while contributing jobs and income for local citizens during hard times. Another local example, the 1930 Art Deco style California Theater (2113 Kittredge St.), was not deemed eligible as a Berkeley Landmark for its cultural value, setting the precedent that the subject property also does not appear to have the locally-specific cultural value that would qualify it as a Berkeley Landmark under this criterion.

3. Educational value: Structures worth preserving for their usefulness as an educational force

The theater does not appear to have any use as an educational tool. It does not have any strong potential to convey lessons on history, as it is not associated with any important events nor is it physically illustrative of the lives, work, or activities of its owners or users. It therefore does not appear to have the high educational value that would qualify it as a Berkeley Landmark under this criterion.

4. Historic value: Preservation and enhancement of structures, sites and areas that embody and express the history of Berkeley/Alameda County/California/United States. History may be social, cultural, economic, political, religious or military.

The theater does not strongly embody or express unique local history, but is part of very broad nation-wide contexts pertaining to the Great Depression and the theater and film industry. In comparison to another local example – the intact primary facade of the 1930 Art Deco style California Theater (2113 Kittredge St.), which was deemed eligible as a Berkeley Landmark under this criterion – the subject property was not one of the earliest moving picture theaters in Berkeley and was one of numerous theaters constructed throughout the state in the 1930s by United Artists, with no close ties to important corporate figures or film industry stars. Therefore, it does not appear to have the historic value that would qualify it as a Berkeley Landmark under this criterion.

5. Any property which is listed on the National Register described in Section 470A of Title 16 of the United States Code.

The theater is not listed in the National Register and therefore does not qualify as a Berkeley Landmark under this criterion.

Berkeley Structure of Merit Evaluation

Berkeley Structures of Merit are designated historical resources within the City of Berkeley. Resources may be designated as Structures of Merit if they meet general and/or specific criteria. An evaluation follows:

General Criteria

1. General Criteria shall be architectural merit and/or cultural, educational, or historic interest or value. If upon assessment of a structure, the commission finds that the structure does not currently meet the criteria as set out for a landmark, but it is worthy of preservation as part of a neighborhood, a block or a street frontage, or as part of a group of buildings which includes landmarks, that structure may be designated a structure of merit.

The theater claims a place in the context of Depression-era Art Deco movie theaters and Art Deco architecture in Berkeley. It has commonalities with other Art Deco buildings on its Shattuck Avenue street frontage, as well as with other theaters in Downtown Berkeley.

Specific Criteria

a. The age of the structure is contemporary with (1) a designated landmark within its neighborhood, block, street frontage, or group of buildings, or (2) an historic period or event of significance to the City, or to the structure's neighborhood, block, street frontage, or group of buildings.

There are numerous designated landmarks in Downtown Berkeley, including two on the same street frontage, one of which (Berkeley Public Library) is of the same age and architectural style as the theater. The theater is contemporary to the Great Depression, but that is a very broad, nation-wide historical period and not specific to the City of Berkeley.

b. The structure is compatible in size, scale, style, materials or design with a designated landmark structure within its neighborhood, block, street frontage, or group of buildings.

The lower primary facade of the theater is altered and only the upper facade remains compatible in style and design with the Art Deco Berkeley Public Library that is located on the same block and street frontage. The Bancroft Way facade is not visible from the library and is incompatible in its size and scale, lack of typically expressive Art Deco styling, raw concrete material palette, and rudimentary value-engineered design.

c. The structure is a good example of architectural design.
The theater is a heavily altered example of an Art Deco style movie theater that is comparable to other extant theaters of similar age and aesthetics in the area and throughout the state. The heavily altered lower primary facade, and atypically rudimentary Bancroft Way facade, means that the theater does not represent the Art Deco style adequately to be considered a good example.

d. The structure has historical significance to the City and/or to the structure's neighborhood, block, street frontage, or group of buildings.

The theater is part of very broad nation-wide contexts pertaining to the Great Depression and the theater and film industry; however, it does not embody or express unique local history.

Conclusion

Although the property is listed on the California Register, it would not qualify for listing had its loss of integrity

been properly evaluated at the time of its designation (2006). According to the evaluation above, the United Artists theater at 2274 Shattuck Avenue has some significance in relation to California Register criterion 3 as an example of Art Deco style movie theater architecture, but has lost integrity to the point that it cannot adequately convey that significance in its current physical state. It does not appear to rise to a level of significance to be eligible for listing in the California Register under other criteria, nor for the National Register under any criteria.

An evaluation of integrity indicates that the majority of the seven aspects of integrity have been lost or greatly diminished. Physical alterations to the exterior and interior of the originally single-screen theater have caused it to lose integrity to the extent that it only basically conveys the original architectural merit for which it might be considered important.

The theater does not appear to be significant under Berkeley Landmark criteria. It has some chronological and stylistic similarities to other designated properties nearby, as upheld by the broader Structure of Merit criteria, but its altered state obscures accurate reference in this respect. Local eligibility evaluation does not consider issues of integrity; however, in a scenario where a building's significance rests on its visual similarities to nearby buildings, and its visual similarity has been compromised, it can be concluded that eligibility is, nevertheless, negated. It is reiterated that Sec. 3.24.100.B of the Berkeley Municipal Code does not allow the interiors of private buildings to be designated or regulated as Landmarks or Structures of Merit. The Housing Crisis Act of 2019 further precludes the application of new zoning regulations – including local historic designations—once a preliminary application for a housing development is submitted..

The conclusions of this memorandum differ from the conclusions of earlier evaluations, in that the property does not appear to rise to a level of significance, nor retain the integrity, to be eligible for the National Register. The evaluations concur to some extent that the property has significance at the state level for architectural merit; however, this memorandum's evaluation of significance finds it only in the property's basic physical, architectural qualities and documents a substantial loss of integrity that negates the property's ability to convey significance.

Thank you for your consideration.

Sincerely,

Principal/Architectural Historian, Left Coast Architectural History

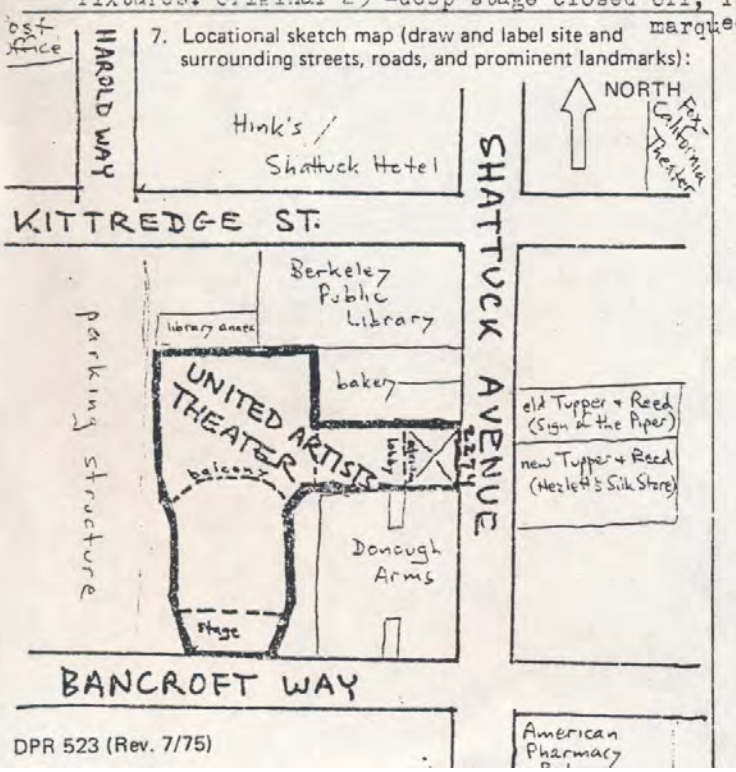
3. Street or rural address 2274 Shattuck Avenue
   City: Berkeley ZIP: 94704 County: Alameda
4. Present owner, if known: United Artists Theaters Address: 172 Golden Gate Avenue
   City: San Francisco ZIP: 94102 Ownership is: Public ☐ Private ☒
5. Present Use: movie theater (4 auditoriums) Original Use: movie theater (1750 seats)
   Other past uses: ____

DESCRIPTION

6. Briefly describe the present physical appearance of the site or structure and describe any major alterations from its original condition:

Large & still splendid Art Deco movie palace, behind a deceptively small & austere facade. With the library (J.W.Plachek,1930) & the little tiled bakery/restaurant next door, forms an Art Deco group which is one of the highlights of downtown Berkeley. UA occupies an L-shaped lot (around the Donough Arms building) of which the Shattuck Ave. frontage is the smaller part & is devoted entirely to grand entrance & lobby. Auditorium building faces Bancroft Way, a massive irregularly shaped concrete block (now holds 4 screening rooms) with service entrances & little else. Facade is a stepped pyramid or widened obelisk, painted beige, with WPA-style sculpture representing Artistry United. Series of 3 lobbies--outside atrium with 4-sided dome, tiled walls & pavement; tall front lobby with mirrors & Deco floral designs in red & gold; inner lobby rambles on in more intimate style under the mezzanine. Streamlined stair & mezzanine railings; frosted glass & metal light fixtures; tropical & classical mural paintings & medallions; 1930s drinking fountains, phone booth, washroom furniture, heating fixtures. Original 25'-deep stage closed off, lounge & smoking room remodeled, 1940s bare-bulb marquee removed, in change from 1 to 4 theaters, 1970-1976.

7. Locational sketch map (draw and label site and surrounding streets, roads, and prominent landmarks):



8. Approximate property size:
   Lot size (in feet) Frontage 36'(Shattuck)
   Depth 220' (irregular)

f. Windmill ☐ g. Watertower/tankhouse ☐ h. Other ☐ _____ i. None ☒

SIGNIFICANCE

20. Briefly state historical and/or architectural importance (include dates, events, and persons associated with the site when known):
Built 1932 as a local depression employment & amusement measure: reports on the work in progress dwelt on the amount to be spent ($300,000), the number of jobs, & how many of the 200 workers were to come from Berkeley. Many delays and changes of plans, to which we partly owe its advanced glass Deco style: early reports planned a "free adaptation of Spanish Renaissance", in other words the Moorish style of the 1920s, like the nearby Fox-California as rebuilt 1929-30. U.A. went ahead after "extensive survey...convinced them that Berkeley was in a position to suppor a high class theater of the size contemplated." Plans at one time called for the Bancroft Way frontage--sheer concrete wall with just the least ridged pattern--to be decorated, but money was apparently not available. Stage, orchestra pit, & dressing rooms; space was provided for a large theater organ in the future. By the time the theater opened, management had been transferred to Fox-West Coast, which also operated the nearby UC and California theaters.

Though some splendor has been lost in creating the 4 auditoriums, moving the box office inside (after a cashier was shot in a holdup), & removing the bare-bulb marquee & vertical neon sign (to highlight the murals, & complement similar purification at the library), this is a glorious preserved Art Deco theater, comparable on a smaller scale to the Oakland Paramount. It has not been through the Paramount's spectacular peril & resurrection, but has operated continuously for 45 years as a small-town movie theater. Hard times for movies in 1960-70s probably helped keep i intact--while the building was out of fashion there was neither money nor interest to remodel it

21. Main theme of the historic resource: (Check only one): a. Architecture 1 b. Arts & Leisure 2 now nostalgia fad provides desire, & 4 auditoriums the means, to preserv it.
c. Economic/Industrial ☐ d. Exploration/Settlement ☐ e. Government ☐ f. Military ☐
g. Religion ☐ h. Social/Education ☐

B10. Significance: Betty Marvin of Berkeley Architectural Heritage Survey previously inventoried and evaluated the United Artists Theater building in 1978 on the attached Historic Resources Inventory form. That survey found that this property appeared eligible for listing in the National Register of Historic Places (NRHP status code 3) for its association within Berkeley's arts and leisure historic context and for its Art Deco architecture. Subsequently, the property appears to be eligible for listing in the California Register of Historic Resources and appears to be a historical resource for the purposes of CEQA.

***P3a Description**: (Describe resource and its major elements. Include design, materials, condition, alterations, size, setting, and boundaries)

Although the base of the front façade has been altered over time, the United Artists Theater Building at 2274 Shattuck Ave. features a distinctive 1930s Art Deco upper façade on Shattuck Avenue and an original formed-concrete theater shell on Bancroft Way. The theater is a Contributor to the Shattuck Avenue Downtown Historic District. The proportions and materials of the dynamic façade design continue today to serve as a clear example of an early twentieth-century commercial/theater building in the downtown core.

The United Artists Theater is part of a setting of mostly historic buildings along the primary commercial corridor along Shattuck Avenue and the transit center that connects the city with the University of California campus.

(Continued from previous page)

The stepped upper front façade is notable for its Art Deco style frescos and bas relief. "Artistry" and "Unity" are featured on each side of the tower, with stylized imagery of leaves and globes, gears and levers, musical instruments, and male and female forms. The tall center of the upper façade once supported a blade sign; there have been two designs, both mounted during the period of the original projecting Art Deco marquee. The tower has curving patterns similar to plumes. The sides of the tower are accentuated with scrolls and half-arches. The base of the building includes outer piers clad in marble and a remodeled recessed entrance. An original tile floor is evident at the south side of the entrance area. The current marquee is a recent installation, flat to the building. Previous documentation indicated that the interiors were also Art Deco from the 1930s.

The building lobby leads to a large theater area with a more utilitarian exterior design. The mostly unpainted fly of the original theater abuts the sidewalk along Bancroft Way. This imposing, rectangular structure is built of cast concrete with vertical fluted speed stripes and board-formed horizontal texture. Its height is equivalent to five or six stories tall. At the east corner is a one-story exiting wing. At the west corner is a two-story wing with a driveway/service entrance.

This building serves pedestrian traffic that flows from the primary commercial strip along Shattuck Avenue to the related downtown urban uses and the University Campus nearby. The large, irregular, L-shaped parcel is approximately 36 feet wide at Shattuck Avenue and wraps around the corner building to have a wall on Bancroft. The footprint of the building covers almost the entire property, with some setbacks for egress.

Character-defining features include: stepped-parapet front wall; concrete wall structure and board-formed concrete rear wing with its vertical speed stripes; recessed entrance form; wall frescos and bas relief; tower plume, arch, and scroll patterns; original tile floor. Alterations include the recent current marquee and the loss of the blade sign.

The historic elements of the building appear in fair condition.

Lobby entry, viewed facing northwest.

Period of Significance 1932-1958 **Property Type** Commercial **Applicable Criteria** A (1), C (3)
(Discuss importance in terms of historical or architectural context as defined by theme, period, and geographic scope. Also address integrity.)

The United Artists Theater building at 2274 Shattuck Ave. is a local historic resource that has been found eligible for the National Register of Historic Places. The building's significance is based on its distinctive architecture and its role in Downtown Berkeley as an entertainment venue. The evaluation for significance was prepared by Cindy Toffelmier of JRP Historical Consulting for the East Bay Bus Rapid Transit Project, and on March 15, 2006, OHP listed the property on the California Register of Historical Resources.

The theatre was constructed in 1931-32, and opened on September 16, 1932. Known as United Artists Berkeley 7, the multi-screen theater was originally designed as a single-auditorium theater, by Walker & Eisen, Architects, together with Clifford A. Balch. Although facing Shattuck Avenue with a modest lobby, the theater has a large auditorium structure that imposes over Bancroft Avenue with its stagehouse. Costing $300,000 by the time of opening in late 1932, it was considered a large project during the early years of the 1930s Depression.

(Continued from previous page)

The United Artists Theatre opened with 1,800 seats, and was extensively publicized in local newspapers, an important civic event in a hard hit Depression-era city. Notable entertainers such as Bing Crosby attended the opening ceremonies.

United Artists (UA) had been founded in 1919 by movie stars Mary Pickford, Charlie Chaplin, Douglas Fairbanks, and D.W. Griffith to make films and, as was common during this time, show them in their own corporate-owned theaters. Today, the company operates under the name United Artists Media Group (UAMG). The Berkeley UA Theater was an early link in the United Artists theater chain and considered luxurious for the time. The Berkeley Theater was similar in design to a number of Southern California UA theaters that were also the work of Clifford Balch working with Walker & Eisen.

Clifford A. Balch was an architect whose work is primarily found in Southern California. Born in Minnesota in 1880, the son of a carpenter, the Balch family relocated to Pasadena in the early 1890s. He was a partner in the firm of Balch and Stanbery, Architects and Engineer. His partnership with Floyd Edgar Stanbery specialized in movie theatres in the 1920s, but dissolved by the early 1930s.

Balch also designed theatres for Fox West Coast Theatres as well as United Artists throughout California throughout the 1930s and early 1940s, producing over 20 classic Art Deco style movie theatres across California and Nevada. He also worked on Berkeley's renovation of the T&D at this time for Fox West Coast.

The architectural partnership of Walker & Eisen was formed by architects Albert R. Walker and Percy A. Eisen, in Los Angeles, California. The work of the firm spans many building types beyond theaters, including The Hotel Normandie, the Platt Building, and the Beverley Wilshire Hotel, all in Southern California.

Balch and the Walter & Eisen individually designed many other California theaters in addition to working as a team on Berkeley's United Artists Theater. The Berkeley theater was a standard United Artists style house for the period with deco panels on the front were labeled "Unity" and "Artistry."

Integrity
The United Artists Theater retains some of its overall historic architectural integrity in the context of the potential historic district. It has integrity of location and setting in Downtown Berkeley; integrity of its Art Deco design at the upper floor and the massive side wall; integrity of only some materials including the upper stucco design and the entire Bancroft Way massing; however, the marquee, sign, and ground floor have been altered in relatively recent times. The strength of the second-floor façade design continues to convey visual associations with Berkeley commercial/theater design in the early twentieth century. The building is readily identifiable as an historic building within the greater downtown core.

Prior Surveys
The property was surveyed in 1978, and found eligible for the National Register by the State Historic Preservation Officer. The building was reevaluated by Cindy Toffelmier of JRP Historical Consulting for the East Bay Bus Rapid Transit Project, and was determined eligible for the National Register through a consensus in the Section 106 process, and on March 15, 2006, OHP listed the property on the California Register of Historical Resources.

Evaluation
The building is historically significant due to its association with important patterns of development in the downtown core, and for its distinctive Art Deco architecture.

(Continued from previous page)

The property remains an important contributor to the establishment of a historic district in the greater Shattuck Avenue area. The building continues to represent, at the street, commercial forms and materials that were prominent in the downtown during the period of historical significance for this building; from 1932-1958. The form and detailing of both the building and its original commercial storefronts maintain an important link to the past of downtown Berkeley.

RE: 9/13/2023 Incompleteness Letter for 2274 Shattuck Avenue, #ZP2023-0079

Dear Sharon,

Thank you for your review and incompleteness letter dated September 13, 2023. Please see our responses below in blue text along with the attached updated plans and documents.

Incomplete Items:

1. Fees. The additional approvals listed above require a payment of fees for each. Fees for additional approvals are due immediately. Also added are the traffic study review fee and demolition referral fee. I've sent the invoices with this letter.
   All outstanding fees have been paid as of 11/28/2023.

3. Plans
   c. The area under the trellis/shade structure on the roof should be included in the rooftop elements calculation on A0.1 and subject to the 15% limit. **Include the entire area under the trellis, and revise the calculation.**
   The trellis shading members have been removed from the design, and the structure will serve only has an architectural framing element without shading infill. The calculation and diagram have been revised to account for the new area of the architectural frame, see A0.1.

   e. Check that the maximum height dimension is consistent with the definition: Maximum Building Height: The vertical distance of a building at any point, within a given plane, from finished grade to the top of the roof or parapet walls. **Thank you. Provide a height dimension for the east portion of the building that fronts on Shattuck Avenue.**
   Building height dimensions have been added to the East elevation along Shattuck Avenue, see A3.1.

   h. **Provide dimensions for the front setback at Bancroft and Shattuck where it exceeds the 5' maximum.**
   In the floor plan, we have dimensioned the front setback of the recessed façade which maintains the conditions of the existing historic building. We understand that exceeding the 5' maximum is allowable with a use permit modification per code section 23.204.130(E)(3)(b).

   i. **Show any overhangs in the plans as dashed – i.e. the overhang at the entry canopy.**
   Dashed lines indicating overhangs above have been added to the floor plan.

4. Density Bonus Diagrams/Calculations
   b. The ground-floor residential support area that is included in the RFA, proportionate to the residential area in the BP, is not substantially similar to the respective proportion in the PP.

The proportion should be similar for calculation of the density bonus. Revisions to the commercial area in the BP should follow with revised calculations for affected development standards in the BP to show compliance. **The amount of lobby/unlabeled area in the BP is still not proportionately similar to the PP. This area should be much smaller for the smaller BP.**
The BP has been revised to show a more proportional amount of lobby & amenity spaces as compared to the PP, in a similar fashion to the MEP areas, see A0.3A. Not all spaces change size directly based on the building size, but the BP common spaces have been sized and labeled more appropriately.

c. Indicate the location of Privately-Owned Public Open Space (POPOS) in the BP to comply with the requirement. If not shown, then the use permit to not provide POPOS in the BP will be added to the permit. **Clearly show the POPOS that is now provided in the PP.**
The POPOS for the PP has been labeled on A0.1 and A0.3B for clarity.

5. Zoning Project Submittal Requirements (ZPSR)
   c. Historic Resource Evaluation - This is required for demolition of a non-residential building 40 or more years old, subject to referral to the Landmarks Preservation Commission in accordance with BMC Section 23.326, or demolition/substantial change of any building 40 or more years old subject to environmental review pursuant to CEQA. Submit: State of California Department of Parks and Recreation (DPR) 523 forms (http://ohp.parks.ca.gov/?page_id=28351), or provide supplemental information in accordance with the Landmarks Preservation Ordinance criteria (BMC Section 3.24.110). **This item is still missing.**
   The Historic Resource Evaluation written by Left Coast Architectural History and dated 12/7/2023 is included in the attachments. An additional drawing sheet, A4.0, has been added to outline the extent of restoration of the historic façade along Shattuck Ave.

GENERAL PLANTING AND IRRIGATION NOTES

1. LANDSCAPE AND IRRIGATION PLANS SHALL COMPLY WITH THE CRITERIA OF THE CALIFORNIA MODEL WATER EFFICIENCY ORDINANCE AND APPLY THOSE CRITERIA FOR THE EFFICIENT USE OF WATER IN THE LANDSCAPE DESIGN PLAN.

2. LANDSCAPE AND IRRIGATION PLANS SHALL COMPLY WITH ALL APPLICABLE CITY CODES AND ORDINANCES.

3. ALL PLANTING AREAS SHALL BE TOP-DRESSED WITH A 3" LAYER OF ORGANIC, UN- DYED MULCH RECYCLED FROM LOCAL ORGANIC MATERIALS SUCH AS TREE TRIMMINGS, PLANT, OR CLEAN WOOD WASTE. COMPOST APPLICATION TO ACHIEVE A MINIMUM OF 6% ORGANIC MATTER IN SOIL COMPOSITION BASED ON MWELO SPECIFIED SOIL ANALYSIS RESULS FOR THE SITE SOIL PER [CGBSC 4.304].

4. 50% OF ALL SHRUBS AND GROUNDCOVER SHALL BE A MINIMUM OF 5-GALLON SIZE OR LARGER.

5. IRRIGATION SYSTEM IS TO BE A FULLY AUTOMATIC WEATHER-BASED SYSTEM USING LOW FLOW DRIP AND BUBBLER SYSTEM.

6. STREET TREES SHALL BE TIED INTO IRRIGATION SYSTEM.

7. 75% OF ALL PLANTS PROPOSED ARE NATIVE AND WILD-LIFE SUPPORTING.

8. PLANT SELECTION AND DESIGN TO COMPLY WITH BAY-AREA FRIENDLY BASICS LANDSCAPE CHECKLIST.

IRRIGATION SYSTEM DESIGN INTENT

1. THIS PLAN SHALL COMPLY WITH THE REQUIREMENTS OF THE STATE OF CALIFORNIA'S MODEL WATER EFFICIENT LANDSCAPE ORDINANCE (MWELO), CITY OF BERKELEY, AND EAST BAY MUNICIPAL UTILITY DISTRICT (EBMUD) WATER DISTRICT.

2. THE IRRIGATION SYSTEM SHALL BE DESIGNED TO PROVIDE THE MINIMUM AMOUNT OF WATER NECESSARY TO SUSTAIN GOOD PLANT HEALTH.

3. THE IRRIGATION SYSTEM IS TO BE A FULLY AUTOMATIC, WEATHER-BASED SYSTEM USING RAIN SENSOR, LOW FLOW DRIP, BUBBLER DISTRIBUTION, AND ROTOR WITH MATCHED PRECIPITATION RATE NOZZLES DESIGNED FOR HEAD-TO-HEAD COVERAGE.

4. ALL SELECTED COMPONENTS SHALL BE PERMANENT, COMMERCIAL GRADE, SELECTED FOR DURABILITY, VANDAL RESISTANCE AND MINIMUM MAINTENANCE REQUIREMENT, INSTALLED BELOW-GRADE, AND DESIGNED FOR 100% COVERAGE.

5. THE SYSTEM SHALL INCLUDE A MASTER CONTROL VALVE, RAIN SENSOR AND FLOW SENSING CAPABILITY CONNECTED TO THE IRRIGATION CONTROLLER WHICH WILL SHUT DOWN ALL OR PART OF THE SYSTEM IF LEAKS ARE DETECTED.

6. THE IRRIGATION SYSTEM SHALL BE DESIGNED TO DELIVER WATER TO HYDROZONES BASED ON MOISTURE REQUIREMENTS OF THE PLANT GROUPING.

7. COLOR CODED HYDROZONE LANDSACPING HYDROZONE MAP WITH GROUPING AND COLLOCATING PLANTING MATERIAS BY WUCOLS WATER USE CATEGORY VL, L, M, OR H, PER [CGBSC 4.304}, TO BE PROVIDED IN PERMIT DRAWINGS.

8. RAIN SENSOR AND CONTROLLER LOCATION TO BE PROVIDED IN PERMIT DRAWINGS.

LANDSCAPE AREA CALCULATION:

	LANDSCAPE AREA
LEVEL 1:	2,559 SF
ROOF LEVEL:	1,525 SF
TOTAL:	4,084 SF (69%)

STORMWATER TREATMENT AREA:

REQUIRED STORMWATER TREATMENT AREA= 4% OF THE ROOF AREA (16810 SF) = 672 SF

PROPOSED STORMWATER TREATMENT AREA= 762 SF

BIKE PARKING CALCULATIONS:

(1) COMMERCIAL BIKE PARKING STALL

(16) SHORT TERM RESIDENTIAL BIKE PARKING STALLS

TOTAL SHORT TERM BIKE PARKING STALLS REQUIRED: 17 STALLS
TOTAL SHORT TERM BIKE PARKING STALLS PROVIDED: 18 STALLS (9 BIKE RACKS)

Re: Proposal to develop 2274 Shattuck Ave. (PLN2022-0072)

Dear Ms. Gong:

My name is Anastasia Rose Ellis. I am a Berkeley resident of over 52 years who represents a growing group of citizens concerned about the proposal to raze the historic UA theater and replace it with an apartment building.

I am writing to request a meeting with you or another representative of the planning department on this matter. I have questions about planning and oversight processes and, in particular, want to understand all the ways that SB 330 affects public review of this project.

Please let me know the soonest this is possible.

I look forward to this meeting and thank you for your anticipated assistance.

Warm regards,

Anastasia “Rose” Ellis

RE: Questions from Save Our Historic United Artists Theatre in advance of May 9 meeting about the development proposal for 2274 Shattuck Ave.

A 2015 "historical technical" report obtained from the city indicates the UA theater was found eligible for the National Register of Historic Places. It also said that, in 2006, the state Office of Historic Preservation listed the theater on the California Register of Historical Resources.

1. Is it true that the UA (any part of the theater, the building, the 2274 Shattuck property) is listed on the state Register of Historical Resources? Likewise, is it listed in the State Historic Resources Inventory? If not, why not?

2. Is it on the National Register of Historic Places? If not, why not?

3a. Does the theater/2274 Shattuck have any other local, county, state, or national designations as a landmark, "structure of merit," or as a property any historical, cultural or architectural value? If so, please list how it is recognized. If it has no such designations, why not?

3b. Is it possible that the city does not know for certain what designations it has or doesn't have?

In November, the developer updated its preliminary application because it realized the initial filing "contained erroneous information…regarding the historic status of the property." It noted that the property was identified as a potential historic resource in the 2009 EIR for the 2012 Downtown Area Plan.

4. Does the planning department find that the developer's revised information is complete, that it has not omitted any other information about the property's historical status that disqualifies the application?

A document from 2015, the Shattuck Avenue Commercial Corridor Historic Context and Survey, says that the city's "Downtown Area Plan Environmental Impact Report," adopted in 2012, recommends creating a "historic district along Shattuck Avenue using historic

district criteria in Berkeley's Landmark Preservation Ordinance and applicable National Park Service guidelines."

5. Was this district created? If so, how does it impact the redevelopment of 2274 Shattuck?

The city's general plan says in part: The downtown "is a center for cultural and the arts. Downtown should build on its role as a destination for drama, music, films, and fine arts and support their health and growth. The Arts District has brought together a strong complement of theatre and music venues, and cultural destinations are located throughout Downtown. As a consequence, Downtown Berkeley has experienced a cultural renaissance in the past few years, with an explosion of music, theatre and art venues."

It goes on: "Downtown is also fortunate to have exceptional architectural and historic assets. Moving forward, it will be important to build on the foundation that these assets represent, as Downtown's competitiveness depends on the unique sense of place that its historic and architectural treasures afford."

It also says: "The Arts District was initially focused along a one-block segment of Addison Street that was improved to be more attractive and feature poetry and public art. Major new cultural uses are expanding the Art District beyond its original boundaries. The University of California Berkeley Art Museum and Pacific Film Archive and the Judah L. Magnes Museum are relocating to the Downtown, and adaptive reuse of the UC Theater may feature a major music club."

6a. Do the Arts District or the Civic Center Historic District, outlined in the general plan, provide any protection of the 2274 Shattuck property?

6b. The general plan essentially says that the "Arts District" is not limited to Addison Street and is expanding to other parts of the downtown. Doesn't that suggest that the UA is also in the arts district?

6c. Isn't preserving the UA theater in some form, for its architectural, cultural and historical value, consistent with the city's general plan?

7. In what ways does city's Landmarks Preservation Ordinance come to bear on the developer's proposal for 2274 Shattuck? In what ways does SB 330 undermine this ordinance?

A 2021 LPC staff report, on a different property, cited a lack of a "current, City-wide comprehensive historic resource survey."

8a. Is this true and would this lack of such a report impact proper legal and public review of the 2274 Shattuck proposal?

8b. Also, is the city in violation of any law by not having a current survey?

9. Provided the developer follows through with filing the official application with ZAB, will the city hire a firm to undertake a historic resource evaluation on the 2274 Shattuck property? If so, at what stage does this evaluation happen? And if not, why not?

10a. If you haven't answered above, please list ALL the ways that SB 330 limits public and environmental review of this project, and ALL the ways that SB 330 deviates the from the usual planning process as pertains to this proposal.

10b. Are there any exemptions to SB 330? Can the cap on public hearings of five be exceeded, for example.

SB 330 does not exempt a development proposal from environmental review/CEQA.

11a. At what stage or stages does this project undergo environmental review?

11b. In what context would environmental review lead to "additional hearings?"

12a. Exemptions: Has the developer asked for exemptions under CEQA — or any other laws? Or, does the city anticipate the developer asking for exemptions in the official application?

12b. Does the city anticipate granting any exemptions for this project? Related to the ADA or anything else?

13. Provided the project goes forward, is the developer required to respond to written correspondence from the public? If so, how does that work?

14. Can members of the public get on a notification list to be informed of any public meeting on this project? Does the planning department handle this?

15. Is it possible to set up a citizens advisory group (or whatever it is called in this context) for this development proposal? If so, is this according to local ordinance, or state law? How would this work?

16. In light of the 2274 Shattuck property having historic and architectural value, regardless of any specific status under law, can the city take measures to secure the building to try to prevent damage from vandals while it is vacant? Or, can the city compel the property owner to take measures to secure it?

17. The application to nominate a property for landmark status with the LPC is onerous and arguably expensive. Does the city provide any services or aid for low-income people and groups in their effort to engage in this preservation process?

18. We have heard that when Regal sold the property to the developer, the developer agreed the property would not be used as a movie theater ever again. Is that true? If so, is it legal? Should such a stipulation be subject to public review and comment?

Thank you so much for answering these questions. We look forward to speaking with you on Tuesday.

Subject: Let there be UNITY to uphold the ARTISTRY of the historic UA Theatre!

WARNING: This is not a City of Berkeley email. Do not click links or attachments unless you trust the sender and know the content is safe.

Dear Sharon,

I am requesting notice of any future public meetings with the developer and the Landmark Preservation Committee.

This is my stand on the issue:

The more I learn about the history and assets that are undamaged inside the UA Theatre, I more strongly I feel about keeping it. There is a grand ceiling tucked behind plywood, there are dressing rooms and a backstage, there is filagree and tilework. It would be beyond tragic to lose it… forever.

I implore you to look into alternatives for where to build the apartment building, whether it be a different place entirely or atop the theatre.

There are so many success stories of venues that have been saved, just in the Bay Area. The Paramount and The Fox in Oakland, The Rafael in San Rafael, The Cerrito in El Cerrito, The New Mission in San Francisco (now, that is a palace!).

Surely Berkeley could use a 1000 seat venue; lectures, concerts, plays, comedy, and film.

I am a 35 year resident of Berkeley, and, I must say, it feels like beautiful architecture is being stripped away one building at a time. I mourn the loss of The California, The Oaks, and The Shattuck Cinemas. (Yes, I love to go to the movies). And, what it is being replaced with is uninteresting box after box.

I get it that we need more housing, and that you are under pressure to fulfill the mandate. But, please, not at the expense of this example local grandeur.

Old buildings attract people.

Old buildings are reminders of a city's culture and complexity.

Regret only goes one way.

Sincerely,
Arlene Owseichik

Subject: RE: questions for landmarks planners from Save Our Historic United Artists Theatre
Date: Monday, June 12, 2023 10:19:00 AM

Dear Ms. Linden:

Thank you for your interest in the United Artist's Theater at 2274 Shattuck Avenue in Berkeley. Your questions mostly pertain to: the known historical designations on the property; the process for landmark nomination; and the review of future development proposal(s) on the site. I understand from Fatema Crane that you and she reviewed many of these topics previously on April 27 during an extended one-hour+ telephone conversation.

Per your request to Fatema on May 22, I have provided the information that is in the public record pertaining to the subject property; I have also gathered some additional resources for you should you wish to pursue further historical research on this property.

- The vacant United Artists Theater Building at 2274 Shattuck was built in 1932 and is on the State Historic Resources Inventory (SHRI) with the following California Historic Resources Status Codes:
  - 2S2 Individual property determined eligible for NR by a consensus through Section 106 process. Listed in the CR.
  - 3S Appears eligible for NR as an individual property through survey evaluation.

  Projects which have the possibility to impact the environment, including "historic resources" as defined in the California Environmental Quality Act (CEQA), may require further study regarding the potential impacts of the project on the historic resource. You can find more information on CEQA and historic resources through the California Office of Historic Preservation, here: https://ohp.parks.ca.gov/?page_id=21721#:~:text=CEQA%20is%20encoded%20in%20Sections,environmental%20impacts%20of%20proposed%20discretionary

- The subject property is not listed on the City of Berkeley List of Designated City Landmarks, Structures of Merit, and Historic Districts. No application has been filed for Landmark initiation on the property. The process, criteria, and requirements for landmark initiation is outlined in the Berkeley Municipal Code, Chapter 3.24 (Landmarks Ordinance).

  Pursuant to Berkeley Municipal Code (BMC) Section 3.24.120, initiation for designation may be by an application of the property owner, or by the Landmarks Preservation Commission, the Planning Commission, the Civic Arts Commission, or the City council; or by the verified application of at least fifty residents of the City. The application fee is $100.00.

  BMC Sections 3.24.280 – 3.24.290 requires designated properties to be kept in good repair and free of unsafe or dangerous conditions.

- The Zoning Ordinance (BMC Chapter 23), Section 23.326.070 C.1, requires that any application for a Use permit or AUP to demolish a non-residential building or structure which is 40 or more years old shall be forwarded to the Landmarks Preservation Commission (LPC) for review before consideration of the Use Permit or AUP.

- Use Permit and Design Review application (ZP2023-0079 and DRCP2023-0008) was filed with the City on June 2, 2023. The project description includes: partial removal of the existing commercial structure to allow for the construction of a new 17-story mixed-use development with 239 dwelling units, ground level lobbies, commercial space, and parking. The project includes a with a State of California density bonus application and is subject to the Housing Accountability Act (HAA) and SB330.

  The application is currently under review for its initial submittal, which will be completed within a 30-day window. The application has not yet been deemed complete, and during the review period, the planner may identify questions, issues, and comments on the application that may need to be addressed by the applicant and resubmitted for re-review. As a result, the original project description/scope may evolve based on the review of the project.

  Should you have questions on the proposed project that has been filed, please contact the project planner: Sharon Gong, Senior Planner, sgong@berkeleyca.gov.

I hope you find this information useful. You may also choose to, by your own election, seek the guidance of a professional historic consultant to help conduct research or guide you with some of your inquiries.
Please let me know if you need further information from me related to the City of Berkeley Landmarks Preservation Commission (LPC) or Landmarks Ordinance.

Thank you,

Hi again,

Please add this question to the list. Thanks!

Laura

A document from 2015, the Shattuck Avenue Commercial Corridor Historic Context and Survey, says that the city's "Downtown Area Plan Environmental Impact Report," adopted in 2012, recommends creating a "historic district along Shattuck Avenue using historic district criteria in Berkeley's Landmark Preservation Ordinance and applicable National Park Service guidelines."

QUESTION: Did this happen? If not, why not?

L²

On Monday, May 22, 2023, 03:17:21 PM PDT, Laura Linden <redchickn@yahoo.com> wrote:

Hi Fatema,

Here are questions we have for landmark planners. Would it be possible to get answers in writing and also speak to them on the phone or on zoom? The written part is important. I'm disabled and have significant memory issues and can't always remember all the details of long phone conversations.

Thanks,
Laura

ELIGIBILITY FOR THE NATIONAL REGISTER OF HISTORIC PLACES AND OTHER REGISTRIES

First off, we're still trying to nail down what historical designations, if any, that the building has. And if it doesn't have them, contrary to various records, why not? For example, a 2015 "historical technical" report obtained from the city indicates the UA theater was found eligible for the National Register of Historic Places. Someone from the Berkeley Architectural Heritage Association also told us a consultant in 1979 found it eligible for the National Register.

QUESTION: Is it on the National Register of Historic Places? If not, why not?

QUESTION: Isn't it true that being called "eligible," rather than actually being on the register, still carries some legal protection? Please explain what this could mean for this building in particular.

The 2015 report referenced above also said that, in 2006, the state Office of Historic Preservation listed the theater on the California Register of Historical Resources.

QUESTION: Is it true that the UA (any part of the theater, the building, the 2274 Shattuck property) is listed on the state Register of Historical Resources? If not, why not? Do we need to double-check with the state agency to make sure?

QUESTION: Likewise, is it listed in the State Historic Resources Inventory? (If that is different from the register mentioned directly above.) If not, why not?

QUESTION: Does the theater/2274 Shattuck have any other local, county, state, or national designations as a landmark, "structure of merit," or as a property any historical, cultural or architectural value? If so, please list how it is recognized. If it has no such designations, why not?

QUESTION: Is it possible that the city does not know for certain what designations it has or doesn't have?

LANDMARKS PRESERVATION ORDINANCE

QUESTION: In what ways does city's Landmarks Preservation Ordinance come to bear on the developer's proposal for 2274 Shattuck? In what ways does SB 330 undermine this ordinance?

A 2021 LPC staff report, on a different property, cited a lack of a "current, City-wide comprehensive historic resource survey."

QUESTION: Is this true and would this lack of such a report impact proper legal and public review of the 2274 Shattuck proposal?

QUESTION: Also, is the city in violation of any law by not having a current survey?

HISTORIC RESOURCE EVALUATION

Sharon Gong answered our question on this but we're still not exactly clear how it works.

QUESTION: Is it right that the developer hires a firm to do a historical resource evaluation, and that it is probably doing this right now, in preparing its zoning project application that is due by the end of this month?

QUESTION: Does the city undertake a separate evaluation, or is the evaluation of the outside consultant hired by the developer the only evaluation that is used? We're wondering if anyone from the planning department will be inspecting the building for its historical features, on the interior specifically. A lot of these historical features lie behind multiplex renovations, we're told.

LANDMARK NOMINATION PROCESS

QUESTION: The application to nominate a property for landmark status with the LPC is onerous and arguably expensive. Does the city provide any services or aid for low-income people and groups in their effort to engage in this preservation process?

QUESTiON: In light of the 2274 Shattuck property having historic and architectural value, regardless of any specific status under law, can the city take measures to secure the building to try to prevent damage from vandals while it is vacant? Or, can the city compel the property owner to take measures to secure it?

Hi there,

The city and our community cannot reasonably afford to lose out on new housing opportunities.

We know housing is wildly unaffordable and desperately needed.

I urge you to use your humanity and prioritize housing for people over a theater that brings temporary enjoyment to people.

I also urge you to remember that most people cannot take time out of their day to attend a meeting or issue public comment, so the loudest voices often represent a wealthy few.

Thank you for your service.

Mauricio

Dear Ms. Gong,

I am concerned about the fate of the United Artists Theater, and would like to be kept informed of future Zoning Department meetings that have the U.A. on their agenda.

I doubt that many people realize the auditorium is both beautiful and of historic importance, although I think many would be dismayed when and if we lose such a treasure. It's truly astonishing to my family, who've lived in Berkeley almost 50 years, that the Landmark Preservation Committee would not take strong measures to keep developers from demolishing the theater, especially when they could be using the ground floor's original structure as a selling point (as an elegant cafe, restaurant, bar, gym, etc.) for the apartments they hope to build.

Thanks for your help,

Melanie Lawrence & John Smail

Just a quick note before I go out of town, begging for mercy for the U.A. Berkeley. I've lived here most of my adult life, and spent many, many hours at the U.A. and the Landmark . The idea of tearing down those beautiful murals and fittings is barbaric; if the building must be turned into so-called luxury apartments, enhance the luxury with some elegantly restored downstairs rooms that can serve as a cafe, restaurant, gym and more.

Yours truly,

Melanie Lawrence

Dear members of the Landmark Preservation Commission,

below please find my letter to the Berkeley City Council:
I thank you for any consideration that you can extend to the preservation and restoration of the glorious art deco movie palace that still exists in the United Artists Theater building.

Sincerely
Allen Michaan

Hello,
my name is Allen Michaan and I have been operating theaters continuously for the last 51 years since I built and operated my first theater, the Rialto, in a West Berkeley warehouse on Gilman Street.
I have a long history in your city having designed and developed the Shattuck Cinemas as well as being the
operator of the Sunset Theater, Fine Arts Cinema, the Northside Theater and the Oaks Theater on Solano Ave.
Changing industry conditions and the stranglehold of huge theater chains monopolizing the available movie titles eventually forced out independent operators such as my company Renaissance Rialto, Inc.

Over the years I have restored and operated several dozen movie houses in San Francisco, Menlo Park, Palo Alto,
Orinda, Benicia, Walnut Creek and Lafayette.

As well I have consulted for and contributed to the restoration and rebirth of
several theaters in other parts of the country.

Today I proudly continue my tradition of theatrical exhibition at my Grand Lake Theater in Oakland which I originally leased in 1980 and eventually purchased the property 5 years ago.
The Grand Lake is considered to be one of the finest theaters in the nation.

As the leaders of Berkeley you have a unique opportunity to bestow a gift on your constituents as well as to the citizens of the
greater Bay Area and to future generations by actively ensuring the preservation of the Historic United Artists theater on Shattuck Avenue.

Constructed in 1932 as one of a handful of theaters developed by the association of Charlie Chaplin, Mary Pickford and Douglas Fairbanks it was a major art deco destination for movie and performance alike.
It boasted a full stage, dressing rooms and 1800 seats all in a spectacular setting.
A full history of the theater can be found at: www.savetheuaberkeley.org

I remember seeing movies there in the early 1970s and was always overwhelmed by it's magnificence.

When the process of dividing the space into multiple auditoriums began around 1973 the owners were required to carve out the new spaces without causing any major destruction to the original fabric of the theater.
We have actual eyewitness testimony from a theater maintenance specialist who has explored the areas above and behind the later modifications that the original decor is largely intact and ready for restoration.

The citizen group that is actively calling for this theater to be saved has requested of the developer that we be allowed to inspect all areas of the theater, however we have been denied ANY access for "safety concerns".
This building, which was deemed eligible for inclusion on the National Register of Historic places has the potential to be what the Paramount Theater is to the City of Oakland.
Once lost, entertainment palaces such as the United Artist Theater will never be replaced.
Berkeley has lost almost all of it's theaters, this one deserves to be saved for the community.

PLEASE, do not make the same mistake that San Francisco made in 1963 when it allowed the Fox Theater to
be demolished only to be replaced by an ugly office building.
The preservation community mourns that loss to this day.
I urge that any actions to allow the destruction of this architectural treasure be placed on hold until a full study
takes place to determine the actual condition of the auditorium. Preserving the lobby is not enough.

Our group acknowledges the importance of more housing but surely there must be some other city owned
property that can be traded to the developers for their construction goals.

This is a special opportunity for you to prevent an act of cultural vandalism and instead turn it into a gift for Berkeley's citizens, now and for the future.

Respectfully yours,
Allen Michaan
Owner, Grand Lake Theater

I wanted to do my part to preserve this iconic, historic theater. I was born in Berkeley and went with my friends and family to see our first films there . They want their grandchildren to have the same opportunity.
There are also groups of local actors and artists who need a stage and auditorium to perform. The beauty of this theater is its location and accessibility. U.C. Berkeley students from all over the world become acquainted with American culture there .
Let’s not deny the general public their due .

- To the Landmark Preservation Committe, Ms. Sharon Gong, members of the City Council, members of the Zoning Adjustment Board, and Mr. Patrick Kennedy:
-
- My name is Kate, and I'm a Bay Area native that is urging you to not destroy a cultural and Art Deco architectural jewel in Downtown Berkeley.
-
- The UA Berkeley, aka 2274 Shattuck Avenue, has so much more beyond the front walls of the now closed theater. If restored properly, it could rival the Fox or Paramount Theater in Oakland and serve not only as a movie house, but a live arts venue for local companies and performing artists, as well as a community hub where people can connect in person without having to buy drinks, meals, or silently slump behind a book or computer at the library.
-
- As an El Cerrito Resident, I used to visit downtown Berkeley all the time for dinner and the movies, but now that ALL the movie houses downtown are gone (there used to be at least five,) I hardly go to downtown Berkeley anymore. It's much cheaper to watch a movie than to attend live performances, and a single someone on a teacher's salary can only do so much. In the meantime, I'm giving my hard earned cash to the Cerrito, Grand Lake, and Piedmont theaters and their neighboring small businesses.. money that could be going to Berkeley.
-
- By restoring the UA Berkeley, you could revitalize Downtown Berkeley's "arts" district by making the arts more affordable and accessible for the rest of us. I believe you could also build affordable housing above the theatre, just like what you're planning on doing with the California theater. It doesn't have to be an all or nothing scenario.
-
- Also, this theater is an architectural and civic treasure that so many people don't even know about. Once this gem is destroyed, it won't be replicated. We don't need more ugly sterile architecture replacing it. Future generations deserve to enjoy it too.
-
- Thank you for your time and consideration.

Sincerely,
Kate

RE: Application for Use Permit #ZP2023-0079 for 2274 Shattuck Avenue

Dear Mr. Stackhouse,

Thank you for submitting the materials to support the proposal to demolish the existing commercial building (preserving and renovating the eastern portion), and construct a 17-story, mixed-use building with 227 dwelling units and an 865-square-foot café in the C-DMU (Corridor) Zoning District at 2275 Shattuck Avenue (APN 57-2028-3).

Pursuant to the Permit Streamlining Act (Government Code Chapter 4.5 Title 7), your application has been deemed **complete as of January 4, 2024**. Additional comments may be made at a later time if changes are made to the project.

Permits Required

1. Use Permit under BMC Section 23C.08.050.A to demolish a non-residential building
2. Use Permit under BMC Section 23E.68.030.A to construct a new mixed-use development
3. Use Permit under BMC Section 23E.68.030.A, to construct dwelling units
4. Use Permit under BMC Section 23E.68.050 to create new floor area of 10,000 square feet or more
5. Use Permit under BMC Section 23.04.130(E)(1) to increase the maximum building height limit to 75' (plus 5' parapet, by right)
6. Use Permit under BMC Section 23.204.130(E)(3)(b) to modify front and side setback requirements
7. Administrative Use Permit under BMC Section 23.304.050(A) to exceed building height limits with rooftop architectural elements which exceed the maximum height limit for the district
8. Density Bonus with the following requested reductions, waivers and concessions:

   Waivers

a. Waiver of BMC Section 23.204.130(E)(2) to exceed building height limits – to be 183 feet (plus 5-foot parapet, by right), where 75 feet is the limit (plus 5-foot parapet, by right)
b. Waiver of BMC Section 23.204.130(E)(3)(b) to waive front and side setback minimums; see setbacks table
c. Waiver of BMC Section 23.204.130(E)(3) to increase front setback maximum, where 5 feet maximum is required, at 0-20-foot building height; see setbacks table
d. Waiver of BMC Section 23.204.130(E)(3)(b)(i) to exceed 120 feet in width in diagonal measurement above 120 feet in height – to be 178'-9" feet in width
e. Waiver of BMC Section 23.204.130(E)(4) to reduce the usable open space requirement – to be 7,737 square feet, 18,160 square feet is required
f. Waiver of BMC Section 23.322.090(A) to provide 72 long term residential bicycle parking, where 210 short-term is required

Concessions – None. [Three concessions permitted per Government Code §65915(d)(2)]

Level of Review Under the California Environmental Quality Act

Under the California Environmental Quality Act (CEQA), staff determines whether an environmental impact report, a negative declaration, or a mitigated negative declaration will be required, depending on the type of project. This project proposes to partially demolish a building and construct a new building on a site that is listed on the California Register of Historical Resources, and which is also eligible as a City of Berkeley Landmark and Structure of Merit.

Therefore, staff has determined that the recommended level of CEQA review for the project is an Infill Environmental Checklist with a potential for an Infill Environmental Impact Report (EIR).

Advisory Comments

1. Interdepartmental Roundtable Meeting. An interdepartmental review will be scheduled as an opportunity for you to receive comments on the project from City departments such as Building and Safety, Transportation, Zero Waste, Parks, Toxics and Public Works. I will coordinate with you to schedule a time when you can attend.

2. Landmarks Preservation Commission. The project will be scheduled for an LPC to obtain a recommendation for the demolition of the existing building, as required by BMC Section 23C.08.050.C.

Next Steps

Now that your Use Permit application is deemed complete, I will work to finish my analysis of this project, and prepare the staff report and recommendations for consideration by the ZAB at the public hearing within the timelines established under Government Code Section 65950.

During the course of my review, additional information may be required to correct, clarify, or amplify the details provided in the application. This may result in additional fees for zoning permits, CEQA review costs, and other processes/reviews, as needed based on the City's adopted fee schedule.

Should you have questions regarding this letter or your application, please feel free to contact me.

Sincerely,

Sharon Gong

Re: UA Regal Theater, Berkeley
Recommissioning Report

Dear Mr. Walsh:

This letter provides Dolmen Consulting Engineers, Inc. ("DCE")[1] initial analysis and overview of the structural conditions and deficiencies at the former UA Regal Theater building at 2274 Shattuck Avenue in Berkeley. It outlines the primary structural impediments to reopening the building for public use, the challenges of doing so while recreating or repairing interior features that were damaged or destroyed during the conversion of the original single-screen theater into a seven-screen multiplex, along with the major capital expenditures that would be required to do so. Lastly, it addresses the feasibility of building a residential high-rise on the property without removing the multiplex portion of the building that fronts on Bancroft Street.

In preparing this analysis, we completed two inspections of the building's interior and exterior in 2023, reviewed available permit records and as-built plans, and the Historic Resource Evaluation[2] for the building. In addition, we evaluated potential safety hazards associated with the building's non-ductile concrete ("NDC") construction and the condition of its remnant decorative plaster features. We observed numerous conditions that make the building—and its former single-screen auditorium in particular—unsafe for occupancy in its present condition. Specifically:

- **Deteriorated and Damaged Plaster Ornamentation and Ceiling is Prone to Crumbling or Collapse.** Although plaster is a cementitious material, it is fragile and becomes friable over time. It is especially prone to damage by water, structural

[1] Since it was founded in 2000, DCE has performed numerous structural conditions and seismic hazard assessments, and structural design services for clients in the Bay Area and internationally. Our experience includes structural and seismic hazard assessments for pre-1940 residential, commercial, and public buildings, as well as for newer building housing critical energy transmission facilities. DCE has extensive experience in the seismic retrofit of historic buildings, including many unreinforced reinforced masonry building, as well as structural systems for new public assembly buildings, high-rise residential and commercial buildings, and naval docks, among others.

[2] Left Coast Architectural History *2274 Shattuck Avenue Historic Resource Evaluation Memorandum,7 Dec2023.*

movement, vibrations, and direct physical impacts. Both the ceiling and supporting substrate for plaster ornamentation were directly damaged in numerous locations by installation of a new HVAC system and acoustic drop ceiling when the theater was converted to a multiplex. Deep cracks and crumbling in plaster ornamentation are plainly visible in numerous locations, as is damage to its substrate or superstructure. Moisture intrusion is also evident in many locations on the ceiling. Over time, ongoing deterioration could cause heavy plaster projecting features over the stage arch to simply break off.[3] In an earthquake, they could collapse catastrophically, raining tons of heavy debris on seating areas below.

- **The Non-Ductile Concrete Building Poses a High-Risk in an Earthquake.** Non-ductile concrete buildings have reinforced concrete frames that are brittle, i.e. they lack the ability to form plastic hinges, and are prone to fail when seismic excitations cause excessive movement.[4] The City of Berkeley's 2019 Local Hazard Mitigation Plan ("LHMP") notes that NDC buildings "have performed very poorly in recent earthquakes, and have resulted in catastrophic collapses."[5] The LHMP goes on to identify the UA as a "Potential Non-Ductile Concrete Building."[6] Our observations confirmed the building is NDC construction. The condition of structural components in the building - exposed rebar rusting in concrete walls, evidence of water/moisture intrusion in the ceiling and load-bearing walls, as well as the suspension of heavy plaster on that structure, make the building increasingly vulnerable over time.

In its current condition, the building is unsafe for occupancy due to 92-year-old plaster that poses a hazard under any circumstance. In a major earthquake, there would be an imminent threat that tons of plaster could crumble onto seating areas below. The City of Los Angeles recently adopted an ordinance mandating the seismic retrofit of existing NDC structures. Numerous other cities and counties across California are considering similar measures.

The City of Berkeley offers grants to the owners of NDC buildings, but the cap on availability ($160,000) is dwarfed by the costs for both design and hard construction costs that a retrofit would entail. Replacement and reconstruction of large portions of the structure, and its original decorative features, would be required to bring it up to acceptable standards for a high-occupancy theater or performing arts use. A similar restoration of the Geary Theater in San Francisco after the 1989 Loma Prieta Earthquake cost $27.5 million in 1994 – 1996, the equivalent of at least $77 million today.

---

[5] LHMP at p. B-56
[6] LHMP, Map 11, p. B-58

Restoring the multiplex to its original single-stage/screen performance space configuration would make it utterly infeasible to build residences above. The roughly 120-foot clear span of the since-partitioned theater, its irregular roofline, and exterior walls would not support residential construction. These issues are more fully explained in the following paragraphs.

1. Heavy Plaster Ceiling Hazard

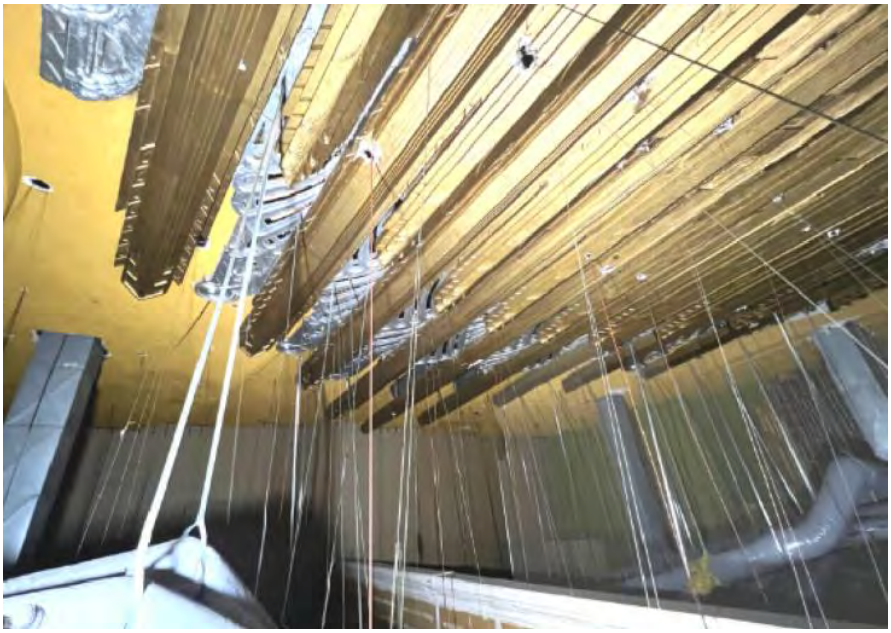
The original plaster ornamentation surrounding the stage and single-screen theater dates to its construction in 1932. The remaining decorative plaster features in the theater auditorium have largely been covered for more than fifty years, when the theater was first divided into two, then four screens. Our review of existing and upcoming legislation, and the conditions we encountered on site yielded two problematic primary issues.

Firstly, it appears that the original plaster ceiling, which has been covered for over fifty years in the main screening room, has been significantly compromised. Ornamental plaster consists of gypsum and lime mixed with water. It can be modelled, cast or molded, incised, stamped and stenciled, and a variety of pigments can be added for polychrome effects. It was typically either molded on site (i.e.: formed on a bench, dried, and installed) or even sculpted in place on a wall or ceiling, or cast in a factory to be transported to the site and applied as a finished unit.

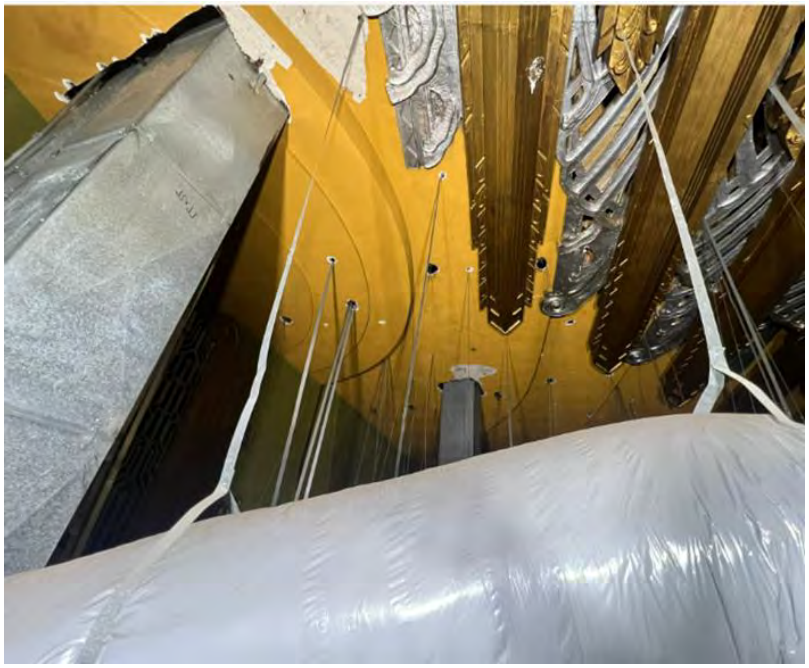
Plaster is a cementitious but fragile and friable material. It is especially prone to damage by water, structural shifting, vibrations, and physical impact. Like flat plaster that is applied to wood or metal lath and relies on the plaster itself, pressed through holes in a lath superstructure (or “keyed”) as adhesive, ornamental plaster is typically applied either to a flat lath and plaster base or to some other perforated or textured superstructure that it can be pressed through to cling when dried. Failure of the substrate or superstructure is often the most common form of damage to the ornamental plaster applied to it, although the ornamental elements themselves are not immune to cracking, chipping, etc., especially if they have any third-dimensionality.

The sculpted and projecting nature of many of the theater's elements makes them especially prone to damage and the physical strain of gravity, existing damage that may conceal other defects, as well as other factors makes their preservation challenging. When the theater was converted to a multiplex, many of the improvements to the main screening room were attached to, and threaded through, the decorative plaster ceiling, compromising its integrity and providing a route for further deterioration. New mechanical systems were installed in the property in 1983 and 1992. The supports for the extensive ductwork associated with these new mechanical systems, and the ductwork itself, were installed through the heavy plaster, further reducing its integrity, and increasing the risk of collapse.

Cracked and spalled plaster in the main auditorium



Ductwork and ceiling supports in the main auditorium



Ductwork and ductwork supports in the main auditorium

Water damage in the ceilings throughout

These successive installations have compromised the structural integrity of the ceiling members and should be addressed before any potential reopening to the public. To upgrade the building's seismic system and repair damage to plaster, these elements would need to be removed and reproduced in their entirety. Past efforts to patch cracked plaster

are visible, but are insufficient with further cracking evident.

The 1989 Loma Prieta earthquake provided us with a very dramatic illustration of the type of failure we are concerned about when the ceiling of the Geary Theater collapsed onto the orchestra seats below. In its existing condition, the plaster ceiling at the UA Regal Theater could fail in the same way as the Geary Theater's during the 1989 event. Unlike the Geary Theater, the Regal's heavy plaster ceiling extends over most of the auditorium seating, increasing the risk to occupants.

This excerpt from the Geary Theater's website describes the failure:

"At 5:04 p.m. on October 17, 1989, disaster struck once again. During the Loma Prieta earthquake, the proscenium arch of the Geary collapsed, ripping a two-thousand-square-foot hole in the ceiling, and crushing the front-of-house lighting bridge and the first six rows of orchestra seats beneath tons of fallen plaster. Miraculously, no personal injuries were sustained."

Had the earthquake come three hours later when the audience was seated, performers were on-stage and crews behind, "it would have been a real disaster."[7]

Aftermath of the Geary Theater Collapse, 1989

[7] *Los Angeles Times*, "Geary Theater Stages Comeback", January 8, 1996

Aftermath of the Geary Theater Collapse, 1989

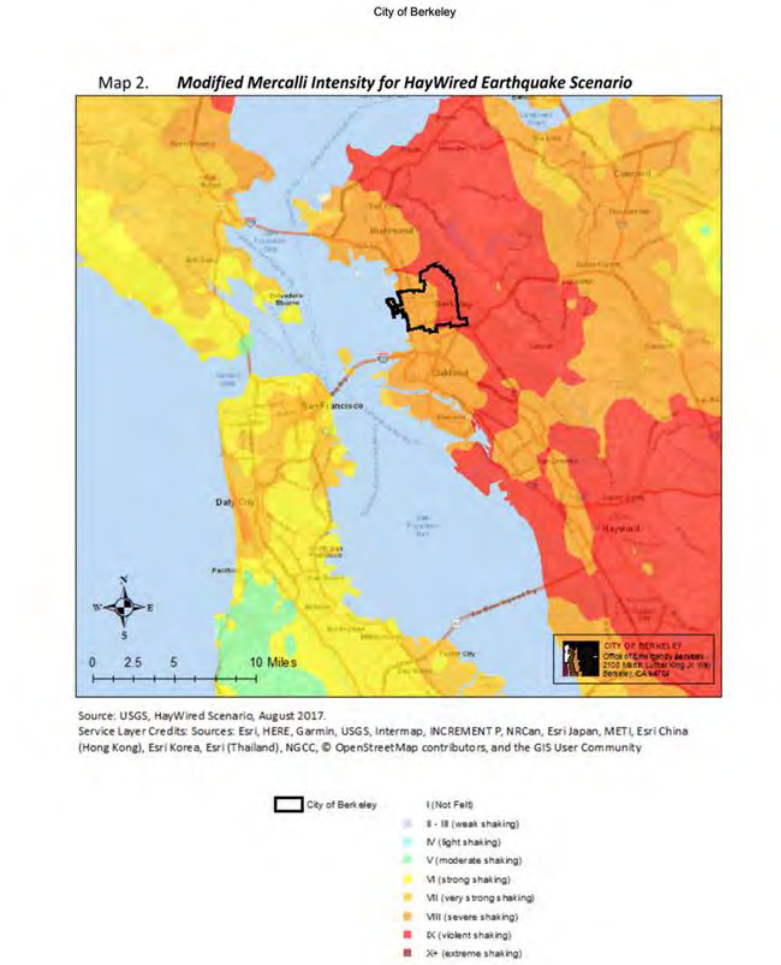
The initial estimate for repair costs proved optimistic: initially estimated at $12 million - $14 million, the repair and reopening of the Geary Theater actually took more than six years and $27.5 million, including $11.5 million in Federal Emergency Management Association funding and what was described in 1996 as the nation's largest theater capital campaign.[8]

2. Seismic Risk

The 1989 Loma Prieta earthquake measured 6.9 on the Richter Scale and produced 20 seconds of strong shaking south of Santa Cruz. The Geary Theater is approximately 70 miles from Loma Prieta, allowing for significant attenuation of ground motions. The Hayward Fault — just one mile from the Regal — can produce a Richter magnitude 7.0 event. Modeling by the USGS and Berkeley's LHMP predict "violent" or "severe"

[8] *Los Angeles Times*, "Geary Theater Stages Comeback", January 8, 1996

shaking throughout Berkeley, with the Regal sitting very near the "violent" shaking zone. We can anticipate much higher ground motions at the Regal Theater than those experienced at the Geary Theater. Those stronger motions may also last up to twice as long as motions experienced in 1989.



2.1 Non-Ductile Concrete, Structural Retrofit

The State of California, and the various counties, cities, and municipalities within California, are preparing for the next seismic event by requiring the strengthening of the most vulnerable buildings in their jurisdictions. Ordinances addressing unreinforced masonry buildings and soft story buildings have already been passed and enforced. The next class of buildings the State is going to address are non-ductile buildings. Los Angeles recently enacted a "non-ductile concrete" strengthening ordinance. The Los Angeles ordinance was brought forward in 2023 after the devastating earthquake in Turkey resulting in 50,000 casualties, largely due to the catastrophic collapse of numerous non-ductile concrete buildings.

San Francisco is close to finalizing a similar ordinance, and other municipalities are following suit. These ordinances address concrete buildings that were built before 1977. The Regal Theater will be subject to any such ordinance in Berkeley. Model ordinances require these buildings to be brought up to 75%-100% of current seismic code, but also require detailed analysis and retrofitting of all elements of the building, such as the heavy plaster ceiling.

NDC's were generally built before 1977, when seismic codes began requiring ductility through the use of special reinforcing steel within reinforced concrete beams and columns. When properly used, the reinforcing steel provides additional elasticity to concrete, allowing it to retain its strength during earthquakes, and preventing collapses like the one shown below.[9]

Figure 1-1. 1971 San Fernando Earthquake, Olive Valley Hospital, was once two stories. Source: World Housing Encylopedia. http://www.world-housing.net/uploads/101108_111_10.jpg

ASCE 41 is the guideline that these ordinances refer to. That document directs engineers to study all components of the subject building. Here's an excerpt from a commentary on the guideline:

"The seismic evaluation and retrofit design shall pay careful attention to building elements that have little ductility or deformation capacity. Proposed retrofit solutions shall consider ways to provide deformation capacity in non-ductile elements. Retrofit solutions that only add strength and stiffness to a building without protecting non-ductile elements shall be carefully evaluated to understand whether assumed lateral displacement demand might be exceeded, causing unanticipated damage to non-ductile elements."

[9] Preventing Loss and Saving Lives: Earthquakes and Non-Ductile Concrete Buildings in the City of Los Angeles, University of Southern California, School of Policy, Planning and Development, May 4, 2008. p.6

While Berkeley does have a non-ductile concrete "grant" program, which provides funding for seismic retrofits, it allocates a maximum of $160,000 for construction per site.[10] Based on the example of the Geary Theater and assuming work is brought up to ASCE 41 standards, the estimated budget to bring the property into compliance would be approximately $77 million.[11] This is roughly four times greater than the targeted capital raise for tenant improvements in the proposed new California Theater.

Although Berkeley has not yet mandated NDC retrofits, many other cities are moving quickly. San Francisco's ordinance is anticipated to be enacted in the second quarter of 2024. Even if a non-ductile ordinance is not passed, the consequences of inaction are potentially far worse given that significant casualties could occur if the existing building were in use during a magnitude 6.0 or higher earthquake. A prudent property owner would make seismic improvements before inviting the public back to the building. Landowners have been held liable for failing to make these seismic retrofits:

> The families of two women who died in Paso Robles in 2003 were awarded nearly $2 million by a jury, which found that the property owners were negligent for not making the building safer. Even though a city deadline to complete the retrofit was still years away when the earthquake hit, the jury found the owners bore financial responsibility for not retrofitting their building sooner. In 2010 a state appeals court upheld the verdict, finding that the building's compliance with city law "did not insulate owners of [the] unreinforced building from negligence in failing to retrofit."[12]

3. Existing Theater Incompatible with Retrofit or New Construction

Bringing the building in line with seismic and other current building standards would effectively mean demolishing substantially all of the auditorium interior, its roof, and substantial portions of its exterior walls. Any interior decorative features - particularly plasterwork – would have to be replicated; they could not be retained due to the need to reinforce and/or build new walls.

The proposed project consists of 17 stories. The street-facing facade along Shattuck will be restored and the lobby will retain some of its existing features. The residential portion of the property will be located where the existing seven movie theaters are located.

We have assessed the feasibility of constructing a 17-story residential building over the existing structure, while preserving the movie theaters on the ground floor. Typical column

---

[10] See https://berkeleyca.gov/construction-development/seismic-safety/funding-seismic-retrofits/retrofit-grants.

[11] Based on a 2.8x construction cost increase over 1996 levels per https://www.dgs.ca.gov/RESD/Resources/Page-Content/Real-Estate-Services-Division-Resources-List-Folder/DGS-California-Construction-Cost-Index-CCCI

[12] https://www.arcamax.com/currentnews/newsheadlines/

spacing for efficient residential concrete construction is 25’-30’. The idea of maintaining a 120’ clear span, supporting a highrise residential building above, is unfounded. Even if there were a structural solution, the need for elevators, stairs, MEP, and fire protection services would mean significant volumes of the auditorium would be blocked out to service the tower above. The existing perimeter walls would not be able to carry the additional weight of the new building above, meaning that they would need to be removed. New foundations are needed for the proposed highrise which means that heavy equipment will need to track into the space currently occupied by the auditorium. and their locations limit how many housing units can be built. Additionally, the irregular roof and exterior side walls of the structure would conflict with the proposed floor levels.

Sincerely,

Diarmuid Mac Neill
President

City of Berkeley Landmarks Preservation Commission
Fatema Crane
Land Use Planning Division
fcrane@berkeleyca.gov

Subject: Regal UA BerkeleyTheater

Dear Ms. Crane and Berkeley Landmarks Preservation Commissioners,

Oakland Heritage Alliance, our 33-year old nonprofit historic preservation organization, appreciates the opportunity to comment.

We urge you to designate the United Artists Theatre building as a landmark. At your meeting on February 1, please vote to landmark the *entire* exterior of the building, as is supported by local law.

The UA Berkeley is an excellent example of Art Deco architecture that, if destroyed, can never be replaced. It was found eligible for the National Register of Historic Places and it is on the California Register of Historical Resources. The city of Berkeley recognizes it as an "architecturally significant" building and a "structure of merit."

If we may give examples, Oakland's Paramount and Fox Oakland theaters were each seen as expendable before people recognized their merit. In each case, restoration has proven an excellent and economically valuable effort, and they are now recognized widely as great assets, important architectural landmarks, well-used and cherished elements of the Bay Area past.

In your role to protect, preserve, and recognize buildings of high historic and architectural value, we urge you to protect the Regal UA theater, a key landmark in Berkeley. It will be well worth it to preserve this magnificent Art Deco movie palace from Hollywood's golden era.

Sincerely,

Sincerely,

Daniel Levy, President

WARNING: This is not a City of Berkeley email. Do not click links or attachments unless you trust the sender and know the content is safe.

Dear Landmarks Preservation Commission:
I first learned about the threat to the UA Berkeley Theater at the World Congress on Art Deco held this past April in Miami. The World Congress on Art Deco is an international conference held in a different location every two years, and is attended by people all over the world.

I am writing to implore you to landmark the UA Berkeley Theater at 2274 Shattuck Ave. and to do all you can to preserve the theater in its entirety. This theater is an incredible Art Deco architectural treasure. Most of its distinct Art Deco decor and architectural elements have been preserved and well-maintained over the decades and remain intact. With some uncovering, renewal, and restoration, this theater could be returned to its Art Deco grandeur. It would be a grave, irreversible mistake to destroy this architectural and civic gem to build a high-rise apartment, which can be built elsewhere downtown.

Please protect the UA Berkeley Theater for the enjoyment of current and future generations.
Sincerely,
Deborah Chalfie

We MUST save this gorgeous theater in its entirety! It holds a unique place in the history of Berkeley and the Art Deco movement. Not saving it in its entirety is a huge irrevocable mistake. Once it's gone it's gone and no amount of money can ever bring it back. We owe it to future generations for the rest of time. It's not just another old building, it from a completely unique and important period of design. Thank You

To whom it may concern with the Landmarks Preservation Commission,

I implore you to please landmark the ENTIRE exterior of the UA Berkeley building. Furthermore, the UA Berkeley, at 2274 Shattuck Ave., must not be destroyed for an apartment high-rise. The theater is an architectural and civic treasure that must be preserved in its entirety for future generations.

Once a historic gem is knocked down, it can never be replaced. Please do not fall victim to that egregious, irreversible mistake. Art Deco buildings are especially precious: the attention to detail, the quality of the materials used, the artistry and creativity... and the UA Berkeley is no exception.

Keep Berkeley diverse, including architecturally diverse!

2274 Shattuck Ave. is not the plot to develop. Period. There are others that developers can exploit. Just not 2274 Shattuck Ave. Please. I beg you.

I went to the Grand Lake Theater last Friday for a Noir extravaganza. The audience was decked out in period attire. The energy was amazing. And every seat was taken. UA Berkeley can be that destination, in Berkeley - Noir film festivals, silent movies festivals, cult classics, etc. It is a unique, historically significant building that deserves to remain in the Berkeley landscape.

Thank you for your consideration.

Sincerely,
Elizabeth LaBarre
Bay Area native

WARNING: This is not a City of Berkeley email. Do not click links or attachments unless you trust the sender and know the content is safe.

Dear members of the City Council and ZAB,

State housing code SB 330 does not demand that a city dispense with its existing adopted plans and policies such as Berkeley's **adopted Policy LU 1.2 (b). "Retain and support Downtown's cinemas". Note the word RETAIN.** This policy is in the Downtown Area Plan, a part of the General Plan, that was approved by nearly 2/3 of Berkeley voters who have a right to expect the city to implement that adopted policy.

SB 330 provides that if a proposed housing project does not conform to adopted policy the city should **notify the applicant** of this within 60 days of their application determined complete. SB330 Section 65589.5(j)(2)(A)and(B).

Has the city notified the applicant proposing to demolish the UA Theater that the proposal is not consistent with the adopted policy to "Retain and support Downtown's cinemas"? Given the application was deemed complete on January 4, **there is still time to provide that notification.**

The great importance of the cinemas to the vitality of the downtown appears many times in the Downtown Area Plan. As was so well stated at the recent LPC meeting, a downtown is "more than a pile of bedrooms". How can Berkeley present the downtown as a good place to live, especially as it is the downtown for a world class university, when it has destroyed all of its commercial theaters? To preside over this tragic situation should be a source of profound embarrassment.

Please comply with SB330 Section 65589.5(j)(2)(A)and (B) and notify the applicant that the proposal to demolish the downtown's last commercial theater is profoundly inconsistent with adopted Policy LU1.2 (b) to "*RETAIN AND SUPPORT DOWNTOWN'S CINEMAS".*

Re: 2274 Shattuck Avenue – AB 1633 Notice of CEQA Exemption

Dear Ms. Gong:

As you know, our office represents the applicant team for the proposed mixed-use project at 2274 Shattuck Avenue ("Project"). In accordance with Assembly Bill 1633 ("AB 1633"),[1] we request that the City find the Project exempt from review under the California Environmental Quality Act ("CEQA") pursuant to the "Class 32" exemption for Infill Development Projects,[2] as well as the "Class 31" exemption for Historical Resource Restoration/Rehabilitation.[3]

Substantial evidence supports the application of both the Class 32 and Class 31 exemptions for this Project, as documented in the technical reports submitted with the Project application and concurrently with this letter. Moreover, substantial evidence supports that no exceptions to the exemptions apply.[4] We therefore request that the City find the Project exempt from CEQA under Class 32 as well as Class 31, as those exemptions are now mandated by the Housing Accountability Act ("HAA"),[5] within the next 90 days.

AB 1633 makes CEQA exemptions mandatory under the Housing Accountability Act for eligible high-density infill residential projects.

AB 1633 amended the HAA as of January 1, 2024, to require that cities find certain high-density infill residential projects, such as this Project, exempt from CEQA. AB 1633 redefines an unlawful disapproval of a housing development project under the HAA (for eligible projects) to now include "*any* instance in which a local agency… fails to make a determination of whether the project is exempt from [CEQA] or commits an abuse of discretion as defined in [the HAA]."[6]

[1] Gov. Code § 65589.5
[2] 14 Cal. Code Reg. § 15332
[3] 14 Cal. Code Reg. § 15331
[4] 14 Cal. Code Reg. § 15300.2(c) and (f)
[5] Gov. Code § 65589.5(h)(6)(D)
[6] *Id.*

AB 1633 also amended the HAA to include a new statutory definition of "abuse of discretion" as follows: "'abuse of discretion' means the conditions set forth [by AB 1633] are satisfied, but the local agency does not determine that the project is exempt from [CEQA]."[7] The legislature therefore expressly modified the standard of review under CEQA to *require that* cities find eligible, high-density infill residential projects such as this one exempt in *any* instance in which there is substantial evidence to support a CEQA exemption and lack of exception.[8] As a result, an unlawful denial or abuse of discretion now occurs, for eligible high-density infill residential projects, if (1) an applicant provides substantial evidence that the project is eligible for a CEQA exemption and there are no exceptions to the exemption, but (2) the agency fails to find the project exempt.[9] The legislature therefore revised the substantial evidence standard to establish that an HAA violation occurs if a city fails to make a *mandatory* AB 1633/CEQA exemption finding for eligible infill projects.

AB 1633 requires that the City find this Project exempt within 90 days.

By rewriting the substantial evidence standard to favor housing production, the legislature intended that AB 1633 CEQA exemption findings be made promptly – i.e., within 90 days after the submission of this notice.[10] The HAA allows cities to extend the 90-day deadline by an additional 90 days. An extension, however, is only authorized if "necessary to determine if there is substantial evidence in the record that the housing development project is eligible for the exemption."[11] In this case, the applicant has provided all of the reports and studies needed to support the exemption. The reports submitted concurrently with this letter constitute substantial evidence to support all of the necessary findings for the Class 32 and Class 31 CEQA exemptions. As such, there is no legal basis or need for the City to peer review or provide additional studies to document the Class 32 and Class 31 CEQA exemptions for this Project.

The applicant therefore requests that the City promptly find that the Project is exempt under both the Class 31 and Class 32 CEQA exemptions, and that no exceptions to these exemptions apply. We request that this decision be made within the next 30-60 days but in no case should the determination require more than 90 days for this Project.

This Project meets all of the requirements for a mandatory Class 32 CEQA exemption.

Project Description

Trachtenberg Architects is the applicant for this Project, which proposes to construct a 214,082 square-foot mixed-use project at 2274 Shattuck Avenue, at the corner of Shattuck Avenue and Bancroft Way. The project sponsor is 2274 Shattuck QOZB, LLC (Panoramic Interests). The Project is located on the east side of Shattuck Avenue, with frontage on Shattuck Avenue and the north side Bancroft Way. The Project entails renovation of the commercial frontage on Shattuck Avenue, and renovations to the interior foyer and lobby, with a café and repurposed commercial space that celebrates the site's prior use as a theater. The ground floor and roof will include open space and other amenities for Project residents. The subdivided theater space will be demolished to facilitate the construction of 227 housing units. The units will be diverse in

[7] Gov. Code § 65589.5(h)(6)(D)(ii)(I)
[8] Gov. Code § 65589.5(h)(6)(D)(i)(IV)
[9] Gov. Code § 65589.5(h)(6)(D)(i)(IV)
[10] Gov. Code § 65589.5(h)(6)(D)(i)(V)(ia)
[11] *Id.* subd. (h)(6)(D)(i)(V)(ic)

size, consisting of 32 studios, 49 two-bedrooms, 80 three-bedrooms, and 66 four-bedrooms. In accordance with state density bonus law, 23 of those units will be reserved for very-low income households earning no more than 50% of the area median income (AMI) for Alameda County.

The following reports support the findings for the Class 32 CEQA exemption: (1) Traffic Impact Analysis, 2274 Shattuck Avenue Project, Abrams Associates, dated August 9, 2023 (**Attachment 1**); (2) 2274 Shattuck Avenue Historic Resources Evaluation Memorandum, West Coast Architectural History, dated December 7, 2023 (**Attachment 2**); (3) 2274 Shattuck Avenue Project Impacts Analysis Memorandum, Left Coast Architectural History, dated March 1, 2024 (**Attachment 3**); (4) Air Quality Impacts Analysis for the 2274 Shattuck Avenue Mixed Use Project in Berkeley, California, FirstCarbon Solutions, dated March 1, 2024 (**Attachment 4**); (5) Noise Impact Analysis for the 2274 Shattuck Avenue Mixed Use Project in Berkeley, California, FirstCarbon Solutions, dated March 1, 2024 (**Attachment 5**), and (6) Water Quality Impact Analysis for the 2274 Shattuck Avenue Mixed Use Project in Berkeley, California, FirstCarbon Solutions, dated March 1, 2024 (**Attachment 6**). The Historic Resources Evaluation and Project Impact Analysis also support the findings for the Class 31 CEQA exemption.

AB 1633 Eligibility Criteria

The HAA requires the Project to meet the following criteria in order to qualify for a mandatory CEQA exemption:

1. The Project cannot be on an environmentally sensitive site or a site subject to certain environmental hazards;

2. The Project must be on a legal parcel, in an urbanized area that is also a transit priority area, low vehicle miles traveled area, or amenity-rich area;

3. The density of the housing development project must meet or exceed 15 dwelling units per acre; and

4. There must be substantial evidence in the record that the Project qualifies for an exemption and is not subject to any exceptions.

As detailed below, the Project satisfies each criterion and is therefore subject to a mandatory Class 32 CEQA exemption under AB 1633. In other words, this Project meets all requirements imposed by the state legislature to facilitate expedited review under the HAA for high-density residential infill projects. The applicable findings, backed by substantial evidence as detailed below, demonstrate that this Project is categorically exempt under CEQA, and that a decision to the contrary would constitute an unlawful denial under the HAA.[12]

1. The Project is not located on an environmentally sensitive site and it is not subject to certain environmental hazards.

AB 1633 requires the Project to not be located on any site that is environmentally sensitive, subject to certain environmental hazards, or within a very high fire hazard severity zone.[13] The following environmentally sensitive sites and hazards must be avoided: (A) coastal zones;

[12] Gov. Code § 65589.5(h)(6)(D)(i)
[13] *See* Gov. Code § 65589.5(h)(6)(D)(i)(I), citing Gov. Code § 65913.4(a)(6)(A)-(C) and (E)-(K)

(B) prime farmland; (C) wetlands; (D) hazardous waste sites; (E) earthquake fault zones; (F) flood hazard areas; (G) regulatory floodways; (H) conservation lands; (I) habitat for protected species; (J) conservation easements; and (K) very-high fire severity zones. As detailed below, the Project site does not contain any of these characteristics.

A. The Project is not in the Coastal Zone.

AB 1633 applies to projects that are generally not located in an area of the Coastal Zone.[14] The "Coastal Zone" is the land and water area along the entire the California Coast that generally extends 1,000 yards from the mean high tide line of the sea, and is identified on a detailed map adopted by the Coastal Commission.[15] The City of Berkely is not within the Coastal Zone, as documented in **Attachment 7** attached to this letter.

B. The Project is not located on prime farmland.

AB 1633 applies to projects that are not (i) located on prime farmland or farmland of statewide importance, as defined by the United States Department of Agriculture and designated on the maps prepared by the Farmland Mapping and Monitoring Program of the Department of Conservation, or (ii) zoned or designated for agricultural protection or preservation by a local ballot measure that was approved by the voters of that jurisdiction.[16] It should be abundantly clear that the existing site is not located on prime farmland or farmland of statewide importance, and is not otherwise zoned for agricultural protection. Substantial evidence to support this finding is provided by reference to the Department of Conservation's Important Farmland Finder Map, where the Project site is identified as Urban and Built Up Land. (See **Attachment 7**).[17]

C. The Project site is not located in a wetland.

AB 1633 applies to projects that are not located on federally designated wetlands.[18] The Project site is an infill, urbanized location that has no water features. Accordingly, the U.S. Fish & Wildlife Service has determined the site does not contain any potential for wetlands or aquatic resources.(See National Wetlands Inventory in **Attachment 7**).[19]

---

[14] *See*, e.g., Gov. Code, §§ 65913.4(a)(6)(A)(ii) ["An area of the coastal zone that is not subject to a certified local coastal program or certified land use plan."]; 65913.4(a)(6)(A)(iv) ["In a parcel within the coastal zone that is not zoned for multifamily housing."]; 65589.5 (h)(6)(D)(i)(I)(ia); 65913.4(a)(6)(A).)
[15] Pub. Res. Code § 30103.
[16] Gov. Code, §§ 65589.5(h)(6)(D)(i)(I)(ia); 65913.4(a)(6)(B).
[17] California Department of Conservation, California Important Farmland Finder [https://maps.conservation.ca.gov/DLRP/CIFF/], last accessed on February 21, 2024
[18] Gov. Code, §§ 65589.5 (h)(6)(D)(i)(I)(ia); 65913.4(a)(6)(C)
[19] See U.S. Fish and Wildlife Service, National Wetlands Inventory https://www.fws.gov/wetlands/, last accessed on February 21, 2024

D. The Project is not located on a hazardous waste site.

AB 1633 generally applies to projects that are not located on the "Cortese List" or on hazardous waste sites designated by the Department of Toxic Substances Control ("DTSC").[20] The Project site is not listed on either of these lists and is not located on a hazardous waste site.[21]

E. The Project is not located in a fault zone.

AB 1633 applies to projects that are not located "[w]ithin a delineated earthquake fault zone as determined by the State Geologist in any official maps published by the State Geologist, unless the development complies with applicable seismic protection building code standards adopted by the California Building Standards Commission under the California Building Standards Law.[22] The Project is not located within a delineated earthquake fault zone on an official map published by the United States Geologic Service ("USGS") (see **Attachment 7**).[23]

F. The Project is not located in a special flood hazard area or regulatory floodway.

AB 1633 applies to projects that are not located "[w]ithin a special flood hazard area subject to inundation by the 1 percent annual chance flood (100-year flood) as determined by the Federal Emergency Management Agency ("FEMA") in any official maps published by [FEMA],"[24] and to projects that are not located "[w]ithin a regulatory floodway as determined by [FEMA] in any official maps published by [FEMA]. The Project is not located in a special flood hazard area[25] or regulatory floodway[26] as determined by FEMA (see **Attachment 7**).

G. The Project site is not identified in a natural resource protection plan.

AB 1633 applies to projects that are not located on land identified for conservation in (i) an adopted natural community conservation plan under the California Fish and Game Code, (ii) a habitat conservation plan pursuant to the federal Endangered Species Act, or (iii) another adopted natural resource protection plan.[27] The Project is located on an urban, infill site in Downtown Berkeley. It is not located in an adopted natural community conservation plan,

habitat conservation plan or any other adopted natural resource protection plan (see **Attachment 7**).[28]

H. The Project site is not habitat for protected species.

AB 1633 applies to projects that are not located on habitat for candidate, sensitive, or special status species as identified under the federal Endangered Species Act, the California Endangered Species Act, or the Native Plant Protection Act.[29] The Project site is located in the urban landscape of Downtown Berkeley and has no value as habitat for any listed species.

I. The Project site is not under a conservation easement.

AB 1633 applies to projects that are not located on lands under conservation easement.[30] The Project site is in an entirely urbanized infill location, and accordingly is not encumbered by any conservation easement (see **Attachment 7**).[31]

J. The Project is not located in a Very High Fire Hazard Severity Zone.

AB 1633 applies to projects that are not located within a very high fire hazard severity zone, as determined by the Department of Forestry and Fire Protection, or within a high or very high fire hazard severity zone as indicated on maps adopted by the Department of Forestry and Fire Protection.[32] The Project is not located in a very high fire hazard severity zone (see **Attachment 7**).[33]

2. The Project is located on a legal parcel, in an urbanized area as defined by AB 1633.

AB 1633 applies to a housing development project "located on a legal parcel or parcels within an urbanized area" that meets at least one of the following criteria:

(ia) The housing development project is located within one-half mile walking distance to either a high-quality transit corridor or a major transit stop;

(ib) The housing development project is located in a very low vehicle travel area; or

(ic) The housing development project is proximal to six or more of the following amenities pursuant to subclause (IV) of clause (ii) as of the date of submission of the project application:

---

[31] (See California Natural Resources Agency, California Conservation Easement Database [https://data.cnra.ca.gov/dataset/california-conservation-easement-database]; [https://databasin.org/datasets/65202ded0d40478a847f019630950570/], last accessed on February 21, 2024
[32] Gov. Code, § 65589.5(h)(6)(D)(i)(I)(ia)
[33] See Dept. of Forestry and Fire Protection https://osfm.fire.ca.gov/what-we-do/community-wildfire-preparedness-and-mitigation/fire-hazard-severity-zones/fire-hazard-severity-zones-maps, last accessed on February 21, 2024

(IV) “Proximal” to an amenity means either of the following:

(ia) Within one-half mile of either of the following amenities:

(Ia) A bus station.

(Ib) A ferry terminal.

(ib) Within two miles of any of the following amenities:

(Ia) A supermarket or grocery store.

(Ib) A public park.

(Ic) A community center.

(Id) A pharmacy or drugstore.

(Ie) A medical clinic or hospital.

(If) A public library.

(Ig) A school that maintains a kindergarten or any of grades 1 to 12, inclusive

(id) Parcels that are developed with urban uses adjoin at least 75 percent of the perimeter of the project site or at least three sides of a four-sided project site. For purposes of this clause, parcels that are only separated by a street or highway shall be considered to be adjoined.[34]

Although only required to meet one of the four "urbanized area" scenarios, the Project meets all four, as the Project is:

- Located within a transit priority area designated by the City of Berkeley, which means it is within 1/2-mile from a rail station and/or 1/4-mile from bus stops with service at least every 15 minutes. This is supported by the transit priority area map included in the City's VMT Criteria and Thresholds guidance, which establishes that the Project site is within 1/2-mile from a rail station or 1/4-mile from bus stops with service at least every 15 minutes. (See **Attachment 7**.)

- Located in a very low vehicle travel area. A “very low vehicle travel area” means an urbanized area, as designated by the United States Census Bureau, where the existing residential development generates vehicle miles traveled ("VMTs") per capita that is below 85 percent of either regional vehicle miles traveled per capita or city vehicle miles traveled per capita. (Gov. Code, § 659159(o)(9).) The City defines low-VMT areas based on the results of the Alameda County Transportation Commission model, and depicts these areas in the map included

[34] Gov. Code §65589.5 (h)(6)(D)(i)(II)

in Exhibit I. The areas shaded green are those identified as "Low VMT Areas," where "VMT per capita … is 15% lower than the baseline regional average."[35] The Project is located in a Low VMT Area (see **Attachment 7**).

- Located proximal to the following amenities:
    - Numerous bus stops;
    - Within one mile of a supermarket or grocery store (Trader Joe's);
    - Within one mile of a public park (Martin Luther King Jr. Civic Center Park and Ohlone Park);
    - Within one mile of a community center (Multicultural Community Center);
    - Within one mile of a pharmacy or drugstore (CVS pharmacy);
    - Within one mile of a public library (Berkeley Public Library);
    - Within one mile of a school that maintains a kindergarten or any of grades 1 to 12, inclusive (Washington Elementary School).
- Located in an urban area, on a property surrounded on all sides by urban uses.

The Project therefore meets all of the urbanized criteria for a mandatory CEQA exemption.

3. The Project's density qualifies under AB 1633.

AB 1633 applies to projects that meet or exceed 15 dwelling units per acre.[36] Here, the Project proposes 227 dwelling units on 0.51 acres, resulting in a density of more than 440 dwelling units per acre.

4. Substantial evidence establishes that the Project is exempt under Class 32 and Class 31, and there are no applicable exceptions.

A. Substantial evidence supports the Class 32 exemption.

The Class 32 exemption applies to infill development projects that are (a) consistent with the applicable general plan and zoning designation, (b) on a site smaller than five acres and substantially surrounded by urban uses with no potential value as habitat for endangered, rare or threatened species, and where (c) approval of the project would not result in any significant effects relating to traffic, noise, air quality or water quality, and (d) the site can be adequately served by all required utilities and public services.[37]

[35] City of Berkeley VMT Criteria and Thresholds, June 29, 2020, p. 7 and attachments https://berkeleyca.gov/sites/default/files/2022-02/VMT-Criteria-and-Thresholds.pdf, last accessed on February 21, 2024.
[36] Gov. Code § 65589.5(h)(6)(D)(i)(III)
[37] 14 Cal. Code Reg. § 15332

Here, the City has already conclusively established that the Project is consistent with the applicable general plan and zoning standards, given that no notice or other documentation was provided to the applicant within 30 days after the City deemed the zoning application complete.[38] The site is approximately one-half acre and, as noted above, has no potential habitat value.

The applicant submitted a traffic report with the zoning application to confirm that the Project meets the City's local VMT threshold and is screened from further review due to its location within a transit priority area. Concurrently submitted with this letter are additional reports confirming that the Project will not result in impacts related to air quality, noise and water quality.

B. Substantial evidence supports the Class 31 exemption.

While the Class 32 exemption is sufficient for clearing this Project from environmental review, the Class 31 exemption also applies here. Class 31 "consists of projects limited to maintenance, repair, stabilization, rehabilitation, restoration, preservation, conservation or reconstruction of historical resources in a manner consistent with the Secretary of the Interior's Standards for the Treatment of Historic Properties with Guidelines for Preserving, Rehabilitating, Restoring, and Reconstructing Historic Buildings."[39] The Historic Resources Evaluation recently conducted for the Project site, and submitted as part of the zoning application, establishes the remaining historical context of the Project site. The Project Impact Analysis (PIA) analyzes the Project in connection with the site's historical context and with the proposed Shattuck Avenue Downtown Historic District. The PIA concludes that the Project will not cause a significant impact on any historical resources. In connection with that finding, the PIA establishes that implementation of the Project will be consistent with the Secretary of Interior's Standards for Rehabilitation pursuant to the SOI Standards for the Treatment of Historic Properties with Guidelines for Preserving, Rehabilitating, Restoring, & Reconstructing Historic Buildings (1995, rev. 2017).

C. Substantial evidence supports the finding that no exceptions may be found to the Class 32 or Class 31 CEQA exemptions for this Project.

Under CEQA, an exception may prohibit the application of a categorical exemption if the Project (a) is located in an environmentally sensitive area; (b) causes cumulative impacts due to successive projects implemented of the same type, in the same place; (c) causes a significant impact due to unusual circumstances; (d) causes damage to scenic resources within a state scenic highway; (e) is on the "Cortese List" of hazardous sites; or (f) causes a substantial adverse change in the significance of a historical resource.[40]

None of these exceptions apply here. The Project is located in Downtown Berkeley, and does not contain environmentally sensitive features, as the building envelope is virtually coextensive with the entire parcel. There are no cumulative impacts resulting from the City's implementation of the Downtown Area Plan, which the City adopted for the purpose of *reducing* environmental impacts, such as vehicle-miles traveled, by locating higher density housing near high-quality public transit and near the University of California, Berkeley campus. There are no unusual circumstances associated with this Project, as it proposes a high-quality mixed-use development in the Downtown Berkeley core area, consistent with the goals of the Downtown

[38] Gov. Code § 65589.5(j)(2)(A)(i)
[39] 14 Cal. Code Reg. § 15331
[40] 14 Cal. Code Reg. § 15300.2

Area Plan. The site will cause no impacts to scenic resources within a state scenic highway (to the extent this criterion even applies after the enactment of SB 743), and the site is not located on the Cortese List. With regard to historical resources, the PIA submitted concurrently with this letter confirms that the Project will not have an impact on any mandatory or potential historical resources, and that implementation of the Project will be consistent with the SOI Standards for Rehabilitation. Given the project's eligibility for a Class 31 exemption, and the findings in the PIA, the Project cannot legally be deemed to have a significant impact on historical resources.

As a result, substantial evidence in the zoning application, materials submitted concurrently with this letter, and the record of proceedings as a whole supports the finding that there are no impacts to historical resources, unusual circumstances, nor any other exceptions that could apply to the Class 31 and Class 32 exemptions for this Project.

In summary, this Project meets all of the criteria under the HAA to qualify as an eligible high-density residential infill project subject to an expedited CEQA exemption under AB 1633.

Given the mandatory effect of the HAA as to this Project, the applicant requests that the City find that the Project is subject to the Class 32 and Class 31 CEQA exemptions and that there are no applicable exceptions to these exemptions. While up to 90 days may be allowed for this decision, the applicant respectfully requests that a decision be made sooner, if possible. As noted above, there is no basis that would justify the City in needing an additional 90 days to respond, given that there is no basis for seeking a peer review of the submitted studies, or preparing additional studies to support the Class 32 exemption.

Thank you for considering this request and please do not hesitate to contact me if you have any questions regarding the applicability of the mandatory Class 32 and Class 31 CEQA exemptions under AB 1633 for this Project.

Very truly yours,

Robin R. Baral

2274 Shattuck Avenue Project
in the
City of Berkeley

TRAFFIC IMPACT ANALYSIS

1) EXECUTIVE SUMMARY

The proposed project is located at 2274 Shattuck Avenue in the City of Berkeley. The project would consist of 227 apartments, up to 865 square feet of ground floor retail space. The project would replace existing commercial buildings that formerly housed a movie theater. Vehicle access to the proposed project would be via a driveway to a parking garage for one vehicle only, on Bancroft Way. **Figure 1** shows the location of the project and the surrounding roadway network. **Figure 2** shows the ground floor site plan for the project**.** Based on the trip generation forecasts the project would generate about 39 vehicle trips during the AM peak hour and about 56 trips during the PM peak hour. The project would have a less than significant impact on vehicle miles traveled (VMT) according to the City's adopted standards.[1] A detailed review of the project's design and an analysis conducted according to the City's guidelines indicated there would be no operational impacts to transit in the area or safety impacts to bicyclists or pedestrians.[2]

2) INTRODUCTION

This traffic impact report describes the transportation and circulation conditions both with and without the proposed project. The study presents information on the roadway network, the pedestrian and transit conditions, and provides an analysis of the effects on transportation facilities associated with the project. This study also describes the regulatory setting; the criterion used for determining the significance of environmental impacts; and summarizes potential environmental impacts and appropriate mitigation measures when necessary. This study has been conducted in accordance with the requirements and methodologies set forth by the City of Berkeley, Alameda County, Caltrans, and the applicable provisions of CEQA.

City of Berkeley

3) ENVIRONMENTAL SETTING

This section of the report describes the roadways, traffic conditions and other existing transportation characteristics in the vicinity of the project. The primary basis for the traffic operations portion of the analysis is the peak hour level of service at the key study intersections. In this report, these peak commute hours will be identified as the AM and PM peak hours.

3.3 Project Study Intersections

To provide a baseline for identification of impacts on the local roadway network, existing traffic operating conditions have been determined for the key local intersections that may be affected by the project. For this analysis five study intersections were selected in coordination with City staff based on the City's Guidelines for Development of Traffic Impact Reports and their potential to be impacted by the proposed project. The five study intersections are:

1. *Milvia Street at Kittredge Street*
2. *Shattuck Avenue at Kittredge Street*
3. *Milvia Street at Bancroft Way*
4. *Bancroft Way at the Proposed Garage Entrance*
5. *Shattuck Avenue at Bancroft Way*

3.2 Traffic Analysis Scenarios

The study intersections were evaluated for the following four scenarios:

- Scenario 1: *Existing Conditions* – Level of Service (LOS) based on existing peak hour volumes and existing intersection configurations.

- Scenario 2: *Existing Plus Project* – Existing traffic volumes plus trips from the proposed project.

- Scenario 3: *Baseline (No Project) Conditions* – The Baseline scenario is based on Existing Conditions plus a 20% increase to the existing traffic volumes to account for approved projects and background traffic growth.

- Scenario 4: *Baseline Plus Project Conditions* – This scenario is based on the Baseline traffic volumes plus the trips that would be generated by the proposed project.

- Scenario 5: *Cumulative (No Project) Conditions* – The cumulative scenario is based on Year 2040 forecasts from the Alameda County Transportation Commission's (ACTC) countywide travel demand model.

- Scenario 6: *Cumulative Plus Project Conditions* – This scenario is based on the Cumulative traffic volumes plus the trips that would be generated by the proposed project.

3.3 Existing Roadway Network

As shown on **Figure 1**, the roads that would be primarily affected by the project are Shattuck Avenue, Bancroft Way, Kittredge Street, and Milvia Street. The following is a brief description of these roadways:

- **Shattuck Avenue** – Shattuck Avenue is a four-lane arterial roadway extending south from Vine Street to terminate to the south at Telegraph Avenue in the City of Oakland. It serves school, residential and commercial traffic and is an important north-south travel route. It is designated as a major street and a primary transit route in the City's General Plan.

- **Bancroft Way –** Bancroft Way is a discontinuous roadway extending east from Bolivar Way to terminate to the east at Piedmont Avenue. It serves school, residential and commercial traffic and is one way westbound to the east of Shattuck Avenue. It is designated as a collector street and a primary transit route in the City's General Plan.

- **Kittredge Street –** Kittredge Street is only a few blocks long, extending east from Milvia Street to terminate to the east at Oxford Street. It serves school, residential and commercial traffic and a two lane street with stop controls at all intersections except Shattuck Avenue, where there is a traffic signal.

- **Milvia Street** – Milvia Street is a two-lane collector street extending north from Russell Road to Yolo Avenue. It serves school, residential and commercial traffic and is designated as an important north-south bicycle boulevard.

3.4 Accident History

Caltrans has established restrictions on the use of multi-way stop signs and the California Manual of Uniform Traffic Control Devices (MUTCD) provides detailed guidance on when multi-way stop applications and traffic signals are appropriate.[1] Caltrans' guidelines state that a traffic signal or all-way stop control shall be considered if: "*Five or more reported crashes, of types susceptible to correction by a traffic control signal, have occurred within a 12-month period, each crash involving personal injury or property damage apparently exceeding the applicable requirements for a reportable crash*". A detailed review of the accident history in the study area (back to 2017) was conducted using data available from the California Highway Patrol's Statewide Integrated Traffic Records System (SWITRS). This data is included in the technical appendix and verifies the existing accident history in the area would not warrant installation of additional traffic signals, multi-way stop control, or other safety measures.

[1] *California MUTCD*, Chapter 2B, Caltrans, Sacramento, CA, November 7, 2014.

3.5 Intersection Analysis Methodology

Existing operational conditions at the study intersection were evaluated according to the requirements set forth by the City of Berkeley. Analysis of traffic operations was conducted using the 6th Edition of the *Highway Capacity Manual* (*HCM*) Level of Service (LOS) methodology with Synchro software.[1]

Level of service is an expression, in the form of a scale, of the relationship between the capacity of an intersection (or roadway segment) to accommodate the volume of traffic and the traffic moving through it at any given time. The level of service scale describes traffic flow with six ratings ranging from A to F, with "A" indicating relatively free flow of traffic and "F" indicating stop-and-go traffic characterized by traffic jams.

As the amount of traffic moving through a given intersection or roadway segment increases, the traffic flow conditions that motorists experience rapidly deteriorate as the capacity of the intersection or roadway segment is reached. Under such conditions, there is general instability in the traffic flow, which means that relatively small incidents (e.g., momentary engine stall) can cause considerable fluctuations in speeds and delays that lead to traffic congestion. This near-capacity situation is labeled level of service (LOS) E.

Beyond LOS E, the intersection or roadway segment capacity has effectively been exceeded, and arriving traffic will exceed the ability of the intersection to accommodate it. **Table 1** summarizes the relationship between LOS, average control delay, and the volume to capacity ratio at signalized intersections. **Table 2** summarizes the relationship between LOS and delay at unsignalized intersections

For signalized intersections, The City of Berkeley's LOS standards are based on the average delay for the entire intersection. The *HCM* methodology determines the capacity of each lane group approaching the intersection. The LOS is then based on average control delay (in seconds per vehicle) for the various movements within the intersection. A combined weighted average control delay and LOS are presented for the intersection. A summary of the HCM results and copies of the detailed HCM LOS calculations are included in the appendix to this report.

For unsignalized (all-way stop controlled and two-way stop controlled) intersections, the average control delay and LOS operating conditions are calculated by approach (e.g., northbound) and movement (e.g., northbound left-turn) for those movements that are subject to delay. Operating conditions for unsignalized intersections are presented for the worst approach.

[1] *6th Edition of the Highway Capacity Manual*, Transportation Research Board, Washington D.C., 2016.

TABLE 1
SIGNALIZED INTERSECTION LEVEL OF SERVICE DEFINITIONS

Level of Service	Description of Operations	Average Delay (sec/veh)	Volume to Capacity Ratio
A	Insignificant Delays: No approach phase is fully used and no vehicle waits longer than one red indication.	≤ 10	< 0.60
B	Minimal Delays: An occasional approach phase is fully used. Drivers begin to feel restricted.	> 10 to 20	> 0.61 to 0.70
C	Acceptable Delays: Major approach phase may become fully used. Most drivers feel somewhat restricted.	> 20 to 35	> 0.71 to 0.80
D	Tolerable Delays: Drivers may wait through no more than one red indication. Queues may develop but dissipate rapidly without excessive delays.	> 35 to 55	> 0.81 to 0.90
E	Significant Delays: Volumes approaching capacity. Vehicles may wait through several signal cycles and long vehicle queues from upstream.	> 55 to 80	> 0.91 to 1.00
F	Excessive Delays: Represents conditions at capacity, with extremely long delays. Queues may block upstream intersections.	> 80	> 1.00

SOURCES: *Highway Capacity Manual, Sixth Edition*, Transportation Research Board, 2016.

TABLE 2
UNSIGNALIZED INTERSECTION LEVEL OF SERVICE DEFINITIONS

Level of Service	Description of Operations	Average Delay (seconds/vehicle)
A	No delay for stop-controlled approaches.	0 to 10
B	Operations with minor delays.	> 10 to 15
C	Operations with moderate delays.	> 15 to 25
D	Operations with some delays.	> 25 to 35
E	Operations with high delays and long queues.	> 35 to 50
F	Operation with extreme congestion, with very high delays and long queues unacceptable to most drivers.	> 50

SOURCE: *Highway Capacity Manual, Sixth Edition*, Transportation Research Board, 2016.

3.6 Existing Intersection Capacity Conditions

The existing intersection geometry at the project study intersections is presented in **Figure 3**. The existing traffic volumes at these intersections for the weekday AM and PM peak hours are presented in **Figure 4**. Traffic counts at the study intersections were conducted in July, 2023 and adjusted for conditions when schools are in session based on other available count data for the study area. **Table 3** summarizes the associated LOS computation results for the existing weekday AM and PM peak hour conditions at these intersections. As shown in **Table 3**, all of the study intersections currently have acceptable conditions (LOS D or better). Please note the detailed LOS calculations are included in the appendix to this report**.**

3.7 Pedestrian and Bicycle Facilities

Bicycle paths, lanes and routes are typical examples of bicycle transportation facilities, which are defined by Caltrans as being in one of the following five classes:

Class I – Provides a completely separated facility designed for the exclusive use of bicyclists and pedestrians with crossing points minimized.
Class II – Provides a restricted right-of-way designated lane for the exclusive or semi-exclusive use of bicycles with through travel by motor vehicles or pedestrians prohibited, but with vehicle parking and cross-flows by pedestrians and motorists permitted.
Class III – Provides a right-of-way designated by signs or permanent markings and shared with pedestrians and motorists.
Class IV – Provides an adjacent bike lane or bikeway that is physically separated from motor vehicle traffic.

In the vicinity of the project Center Street, Oxford Street, and Bancroft Way are Class II bike routes with bike lanes. Milvia Street is a Class III bike route and is designated as a bicycle boulevard with signage and markings encouraging motorists to share the road with bicyclists.

3.8 Transit Service

The entrance to the Downtown Berkeley BART station is located two blocks from the project site. This station is located on the Richmond-Fremont Line which connected to other destinations in the Bay Area at the MacArthur Station. There is also direct service to Downtown San Francisco as well as continuing service to Milbrae. There is also extensive bus transit service provided by Alameda-Contra Costa County Transit (AC Transit) at the BART Station. In addition to local bus routes 6, 18, 51B, and 79, the following special lines operate less within two blocks of the project:

> **800:** (All Nighter) Richmond BART to Market St. and Van Ness Ave, S.F., via Macdonald Ave, San Pablo Ave, University Ave, Telegraph Ave and downtown Oakland. Returns via Market St. and West Oakland BART.

Please note there are also bus stops less than a block from the project site at Shattuck Avenue and Kittredge Street.

4) REGULATORY CONTEXT

Existing policies, laws and regulations that apply to the proposed project are summarized below.

4.1 State

The California Department of Transportation (Caltrans) has jurisdiction over State highways and any improvements to these roadways would require Caltrans' approval.

4.2 Local

City of Berkeley General Plan - The Transportation and Circulation Element the City of Berkeley General Plan addresses the location and extent of existing and planned transportation routes, terminals, and other local public utilities and facilities. The General Plan identifies roadway and transit goals and policies that have been adopted to ensure that the transportation system of the City will have adequate capacity to serve planned growth. These goals and policies are intended to provide a plan and implementation measures for an integrated, multi-modal transportation system to meet the needs of all economic and social segments of the City.

4.3 Significance Criteria

It is important to note that this project has not been found to have any significant impacts according to CEQA and the CEQA criteria at the bottom of this section are presented for informational purposes only. In addition, the level of service criteria described below are based on the City's General Plan standards, not CEQA, and any proposed mitigations are intended to address the City standards. Traffic improvements to improve traffic operations at the project study intersections are not considered to be required mitigations under CEQA. In this case the project has not been found to have any significant impacts but it should be noted that according to CEQA guidelines, a project could have a significant impact if it would:

- Conflict with a plan, ordinance or policy establishing measures of effectiveness for the performance of the circulation system, including transit, roadway, bicycle and pedestrian facilities.
- Conflict with or be inconsistent with CEQA Guidelines Section 15064.3 subdivision (b)?
- Substantially increase hazards due to a geometric design feature (e.g., sharp curves or dangerous intersections) or incompatible uses (e.g. farm equipment).
- Result in inadequate emergency vehicle access.

5) IMPACT ANALYSIS AND MITIGATION MEASURES

5.1 Project Trip Generation

As noted above, the proposed project would consist of 227 apartments with up to 1,500 square feet of ground floor retail space. The resulting trip generation calculations are shown in **Table 4**. The trip generation rates are based on the ITE rates for high-rise apartments in the center city core, close to rail transit (Land Use 222) and for retail/restaurant uses (Land Use 822) taken from the 11th Edition of the Institute of Transportation Engineers (ITE) Trip Generation Manual. The ITE trip rates for apartments are generally representative of apartment buildings with a mixture of one- and two-bedroom apartments, with studios sometimes included, for an average of no more than about 2 bedrooms per unit. For this project the proposed number of residential units is 227 but there are 80 three-bedroom units and 66 four-bedroom units that were counted as three units each, so the resulting calculations are based on 373 units. As shown in **Table 4**, the proposed project is forecast to generate a net increase in traffic of approximately 39 trips during the AM peak hour and 56 trips during the PM peak hour.

5.2 Project Trip Distribution

The trip distribution assumptions have been based on the existing traffic count data including daily directional volume and peak-hour turning movements, the Alameda County travel demand

TABLE 4
TRIP GENERATION CALCULATIONS

Land Use	ITE Code	Size	ADT	AM Peak Hour			PM Peak Hour		
				In	Out	Total	In	Out	Total
ITE Apartment Rates (Center City Core, Close to Rail Transit) - Trips per Unit	222		0.82	0.05	0.06	0.10	0.10	0.04	0.14
Apartment Trip Generation		373 units[1]	306	17	20	37	38	14	52
ITE Restaurant/Retail Rates - Trips per Square Foot	822		54.45	1.43	0.96	2.39	3.30	3.29	6.59
Restaurant/Retail Trip Generation		*865 sq. ft.*	*47*	1	1	2	3	3	6
Reduction for Non-Auto/Pass-By Trips (34%)			*16*	*0*	0	0	1	1	2
Subtotals for the Restaurant/Retail			*31*	*1*	*1*	*2*	*2*	*2*	*4*
Net New Trip Generation for the Proposed Project			**337**	**18**	**21**	**39**	**40**	**16**	**56**

SOURCE: Institute of Transportation Engineers Trip Generation Manual (11th Edition).
NOTES: [1] The project is only proposing to include only 227 units but for the purposes of the trip generation calculations the 80 three-bedroom units and the 66 four-bedroom units were counted as two units each.

model, and knowledge of the surrounding area such as commute patterns and the overall land use patterns in the area. **Figure 5** shows the project traffic that is forecast to be added at the project study intersections.

5.3 Existing Plus Project Intersection Capacity Conditions

This scenario evaluates the existing conditions with the addition of traffic from the proposed project. A comparison of the capacity calculations for the conditions with the addition of traffic from the project is shown in **Table 5**. **Figure 6** presents the existing plus project volumes used in the analysis. The corresponding LOS analysis calculation sheets are presented in the Traffic Analysis Appendix. As shown in **Table 5**, all of the study intersections would continue to have acceptable conditions (LOS D or better) during the weekday AM and PM peak hours.

			PM	13.2	B	13.3	B

SOURCE: Abrams Associates, 2023

NOTES: HCM LOS results are presented in terms of average intersection delay in seconds per vehicle.

5.4 Baseline Intersection Capacity Conditions

For background conditions the pre-Covid volumes from traffic counts taken in 2018 were used. These were substantially higher than the existing traffic counts and represent a conservative estimate of post-pandemic conditions. **Figure 7** presents the resulting baseline volumes at each of the project study intersections **Table 6** summarizes the LOS results for the Baseline and Baseline Plus Project weekday AM and PM peak hour conditions. The corresponding LOS analysis calculation sheets are presented in the appendix. As shown in **Table 6**, all of the study intersections currently have acceptable conditions (LOS D or better) during the weekday AM and PM peak hours. Please note the detailed LOS calculations are included in the technical appendix to this report**.**

5.5 Baseline Plus Project Intersection Capacity Conditions

The Baseline plus proposed project traffic forecasts were developed by adding project-related traffic to the baseline traffic volumes. As noted above, **Table 6** summarizes the LOS results for the Baseline Plus Project weekday AM and PM peak hour conditions (i.e. the existing roadway network). **Figure 8** presents the resulting baseline plus project volumes at each of the project study intersections. Please note that the corresponding LOS analysis calculation sheets are presented in the appendix. As shown in **Table 6**, all of the study intersections would continue to have acceptable conditions (LOS D or better) during the weekday AM and PM peak hours.

NOTES: HCM LOS results are presented in terms of seconds per vehicle.

5.6 Cumulative Traffic Volumes

The Cumulative scenario evaluates the future buildout conditions in the area based on forecasts for the area from the Alameda County Transportation Commission's (ACTC) countywide travel demand model. **Figure 9** presents the resulting cumulative buildout volumes for the area, without traffic from the proposed project. Please note these forecasts have not been adjusted for potential effects of recent events (such an increase in working from home) and represent the worst-case forecasts that were developed based on pre-pandemic conditions (i.e. no reductions were taken to account for the effects of the pandemic).

5.7 Cumulative Plus Project Traffic Capacity Conditions

This scenario evaluates the addition of project-related traffic to the cumulative traffic volumes. The resulting volumes with the addition of traffic from full development of the project site are presented in **Figure 10**. **Table 7** summarizes the LOS results for the Cumulative Plus Project weekday AM and PM peak hour conditions. Please note that the corresponding LOS analysis calculation sheets are presented in the appendix. As shown in **Table 7** all study intersections and the project driveway would be forecast to continue to have acceptable conditions during the weekday AM and PM peak hours.

NOTES: HCM LOS results are presented in terms of seconds per vehicle.

5.8 Internal Circulation and Access

It is recommended that one on-street parking space be removed (and replaced with red curb) just east of the garage driveway to ensure adequate sight distance for vehicles exiting the garage. The project has been designed to meet City of Berkeley design standards and no site circulation or access issues have been identified that would cause any traffic safety issues or any unusual traffic congestion or delay. Accident records for surrounding streets within a block of the project site and for each of the study intersections are included in the technical appendix to this report. Per City of Berkeley guidelines, the project is providing the required five foot by five-foot sight distance triangle at the garage entrance/exit.

Based on the City's standard conditions required for other similar projects it is also expected the project will be required to provide the following:

1) Install "STOP" pavement markings and signage for exiting drivers to look both ways at the exit, prior to crossing the sidewalk;
2) Install convex mirrors at the project driveway to improve the visibility of exiting vehicles from the sidewalk;
3) Provide visual and/or audio warning devices that alert pedestrians when vehicles are exiting the driveway.

5.9 Parking

This section discusses the City of Berkeley's zoning and estimated parking demand for the project. Section 23.322.030 of the Berkeley Municipal Code specifies that no parking spaces are required for residential uses within commercial districts. Per AB 2097, no commercial parkin

spaces are required for projects within ½ mile of a BART station. It should also be noted that that according to the City's bicycle parking standards the project would require 211 long term bicycle parking spaces and also 16 short term spaces. The project is requesting a concession to provide 74 long-term bicycle parking spaces plus another 16 short-term bicycle parking spaces provided on-street with bicycle racks.

Parking Demand in Berkeley - For this location on a major bus route the parking demand would be less than the typical ITE rate in the Parking Generation Manual. This is based on many of the same characteristics that are discussed in the trip generation section. The availability of transit, the use of bicycles, and the attractiveness of walking in a mixed-use environment clearly results in reduced vehicle trip generation and an associated reduction in the need for parking. Since Berkeley has numerous opportunities for public transportation and the apartment residents are not all expected to have personal vehicles, it is anticipated that a substantial portion of all travel will occur by walking, bicycling, and through the use of public transit. Please note in addition to being two blocks from a BART station, there are bus stops one block from the site that include access to local routes as well as transbay and all-nighter bus routes.

5.10 Pedestrian and Bicycle Conditions

With respect to planned pedestrian and bicycle facilities in the project area, the City's Pedestrian Plan has identified the nearby segment of Martin Luther King Jr. Way from Hearst Avenue to Dwight Way as a priority street segment for improvements. About two blocks east of the project site at the intersection of Martin Luther King Jr. Way and Bancroft Way proposed improvements in the Pedestrian Plan include prohibiting right turns on red, striping high visibility crosswalks, and the installation of curb extensions to reduce the crossing distance for pedestrians. About three blocks from the project site at the intersection of Martin Luther King Jr. Way and Allston Way proposed improvements in the Pedestrian Plan include prohibiting right turns on red and the installation of curb extensions.

In the project study area the City's Bicycle Plan identifies a rectangular rapid flashing beacon (RRFB) at the intersection of Addison Street and Oxford Street and a protected intersection at Bancroft Way and Oxford Street/Fulton Street. Protected intersections typically require the use of bicycle signals. Bicycle signal phases can be added to the traffic signals to isolate bicycle movements from conflicting vehicle movements. The Bicycle Plan also specifies that the adjacent segment of Milvia Street is planned to have a cycletrack and University Avenue, Oxford Street, Shattuck Avenue are being studied for potential cycletracks (separated bikeways). The bicycle plan also specifies that Addison Street should be studied for a potential bicycle boulevard.

The proposed project would not generate a significant increase in pedestrian traffic in the area (in comparison to the existing volumes) given the size of the proposed project. Based on ITE data and data from MTC's Bay Area Travel Survey for projects within 1/2 mile of a BART station

during the peak commute hours the project would be forecast to generate approximately 98 transit trips, 26 bicycle trips and 149 pedestrian trips. In addition to the relatively low increase in vehicle trip generation, the proposed project would not be forecast to significantly impact or change the design of any existing pedestrian facilities and should not create any new safety problems in the area. An analysis of the pedestrian operations in the area using Synchro software indicated all crosswalks at the project study intersections would continue to operate at LOS C or better with or without the proposed project. The project will add some pedestrians and bicyclists who will utilize sidewalks and bicycle facilities in the area. Please note there are existing sidewalks and crosswalks along the route from the project to the BART station. In relation to the existing conditions, the proposed project would not cause substantial changes to the pedestrian or bicycle traffic in the area and would not substantially impact or require changes to the design of any existing bicycle or pedestrian facilities.

5.11 Transit

The proposed project would not interfere with any existing bus routes and would not remove or relocate any existing bus stops. The proposed Project also would not conflict with any transit plans or goals of the City of Berkeley. Based on the Synchro analysis of intersection operations and roadway segment speeds the project is not forecast to cause a degradation of the level of service (or a substantial increase in delay) on any roadway segments currently being utilized by bus transit in the area and, as such, no adverse effects to transit are expected.

5.12 Vehicle Miles Traveled

The vehicle miles traveled (VMT) in an area is one performance measure that can be used to quantify potential changes in travel from a project. This letter presents the extent of the VMT-related transportation impacts forecast to be caused by the Project. VMT is a particularly useful metric for evaluating the impacts of growth on greenhouse gas (GHG) emissions because it can be used to estimate fuel consumption by motor vehicles. Increases in VMT cause proportional increases in greenhouse gas emissions and air pollution. The Office of Planning and Research (OPR) released their final guidelines in a Technical Advisory on Evaluating Transportation Impacts in CEQA, dated December 2018. This analysis is based on the City of Berkeley's adopted guidelines as set forth in a staff report to the planning commission on September 2, 2020.[1]

VMT is typically estimated using an area-wide travel demand model from a regional transportation agency that calculates VMT based on the number of vehicles multiplied by the typical distance traveled by each vehicle originating from or driving to a certain area. This analysis uses the Alameda County Transportation Commission (ACTC) Travel Demand Model data on VMT per capita for various areas within the City of Berkeley. The Travel Demand

[1] *General Plan Amendment: Vehicle Miles Traveled (VMT) for Transportation Impact Analysis under the California Environmental Quality Act (CEQA)*, Planning Commission Staff Report, Planning and Development Department, City of Berkeley, September 2, 2020.

Model divides areas within ACTC's jurisdiction into transportation analysis zones, or TAZs. TAZs are used in transportation planning models for transportation analysis and other planning purposes. The apartments and commercial space proposed to be built by the Project would be expected to have similar VMT as other developments in the same TAZ. The VMT per resident and per employee estimated by the ACTC Travel Model for the Project's TAZ would therefore be assumed represent the approximate VMT that would be generated by the Project as well.

As per Attachment 1 of the September 2, 2020 Planning Commission staff report, the proposed project at 2274 Shattuck Avenue is located is located in a transit priority area (TPA) and also in an area with an average VMT per resident and worker that is at least 15% below the respective Bay Area averages. OPR's 2018 Technical Advisory also states the following: "*Presumption of Less Than Significant Impact Near Transit Stations - Proposed CEQA Guideline Section 15064.3, subdivision (b)(1), states that lead agencies generally should presume that certain projects (including residential, retail, and office projects, as well as projects that are a mix of these uses) proposed within ½ mile of an existing major transit stop or an existing stop along a high quality transit corridor will have a less-than-significant impact on VMT*." However, the City of Berkeley VMT analysis guidelines specify that the presumption of a less-than-significant VMT impact might not be appropriate if the project:

- Has a floor area ratio (FAR) of less than 0.75.
- Includes more than 200,000 square feet of office or commercial space.
- Includes more parking supply than the project's estimated demand
- Is inconsistent with the City's General Plan, an applicable Specific Plan, or an applicable Sustainable Communities Strategy (as determined by the City, with input from the MTC).
- Replaces affordable residential units with market-rate residential units.
- Has project-specific or location-specific information that indicates that the project will generate significant levels of VMT.

In this case none of the above factors would apply to the proposed project. The project is located less than 1/2 mile from BART and high-quality bus transit corridors and is located near bus stops for numerous bus lines at the intersection of Shattuck Avenue at Kittredge Street. The project also meets the other screening criteria described above and therefore, subject to City approval, this project would be assumed to have a less than significant impact on VMT in the area.

6) SUMMARY OF IMPACTS AND IMPROVEMENT MEASURES

TR-1 Demolition and construction activities associated with the proposed project would not increase in traffic to and from the site as compared to the existing, approved project, the existing project requires an appropriate construction management plan developed and approved by the City of Berkeley, consistent with the already existing and broadly applicable standard conditions that apply to projects similar in nature.

Heavy Equipment

Heavy equipment transport to and from the site could cause traffic impacts in the vicinity of the project site during construction. However, each overweight/oversized load would be required to obtain all necessary permits, which would include conditions. Prior to issuance of grading and building permits, the project applicant would be required to submit and have approved a Traffic Control Plan.

The requirements within the Traffic Control Plan include, but are not limited to, the following: truck drivers would be notified of and required to use the most direct route between the site and the freeway, as determined by the City Traffic Engineering Department; all site ingress and egress would occur only at the main driveway to the project site and construction activities may require temporary traffic controls as determined by the City Engineer. Please note construction traffic will be directed to use University Avenue as the City has a goal of minimizing construction traffic on local streets. Specifically, designated travel routes for large vehicles would be monitored and controlled by flaggers for large construction vehicle ingress and egress. Any debris and mud caused by trucks would be monitored daily and may require instituting a street cleaning program. In addition, several loads of heavy equipment being hauled to and from the site each month would be short-term and temporary.

Employees

The weekday work is expected to begin around 7:00 AM and end around 4:00 PM. The construction worker arrival peak would occur between 6:30 AM and 7:30 AM, and the departure peak would occur between 4:00 PM and 5:00 PM. These peak hours are slightly before the citywide commute peaks. It should be noted that the trips generated during construction would be temporary.

Based on past construction of similar projects, construction workers could require parking for up to 75 vehicles during the peak construction period. Additionally, deliveries, visits, and other activities may generate peak non-worker parking demand of 5 to 10 trucks and automobiles per day. Therefore, up to 85 vehicle parking spaces may be required during the peak construction period for the construction employees. It should

be noted the developer and their construction team are required to provide off-street parking for their employees on the site, if possible. Furthermore, the Traffic Control Plan requires that if construction employee parking cannot be provided on the project site, then other provisions will need to be made for off-site parking, subject to approval of the City Traffic Engineering Department.

Construction Material Import

The project would also require the importation of construction material, including raw materials for the building pads, the buildings, the parking area, and landscaping. Based on past construction of similar projects, importing this material is estimated to require substantial amounts of truck traffic. Under the provisions of the Traffic Control Plan, if importation and exportation of material becomes a traffic nuisance, then the City Engineer may limit the hours the activities can take place.

Impacts of Construction on Pedestrians and Bicyclists

The project would most likely require temporary closures of sidewalks and/or vehicle lanes adjacent to the site for safety. This would require a detailed plan for detouring pedestrian and bicycle traffic. This plan will need to be reviewed and approved by the City Engineer. The analysis of traffic operations at the driveway indicates there would be no significant changes to the traffic volumes, delay, or safety on the study roadways with the addition of traffic from the proposed project. The City requires permission to close sidewalks and an acceptable traffic control plan for closures to be permitted. In general, the pedestrian and bicycle operations in the area would not be expected to change significantly during construction beyond the addition of truck traffic to the area.

Traffic Control Plan

The Traffic Control Plan would indicate how parking for construction workers would be provided during construction and ensure a safe flow of traffic in the project area during construction. This analysis assumed construction of the entire project in one phase to identify the potential worst-case traffic effects. Each phase will be subject to a Traffic Control Plan and oversight by the City Engineer and construction traffic is not forecast to exceed the post construction traffic conditions created by the proposed project. As a result, the potential construction traffic impacts have been adequately addressed through the project impact analysis. The goal of the conditional requirements of the City is to make construction impacts less than significant. There is some increase in traffic associated with all construction projects, however the required traffic management plan is intended to ensure the effects of construction are acceptable to the City. Therefore, the demolition and construction activities associated with the proposed project or its individual phases would be expected to result in a ***less-than-significant*** impact.

Mitigation Measure(s)

None required.

TR-2 Impacts related to site access and circulation.

It is recommended that one on-street parking space be removed (and replaced with red curb) just east of the garage driveway to ensure adequate sight distance for vehicles exiting the garage. Beyond this change, it was determined that garage circulation should function well and should not cause any safety or operational problems. The project site design has been required to conform to City design standards and is not expected to create any significant impacts to pedestrians or bicyclists. Therefore, impacts related to site access and circulation would be ***less-than-significant***.

Mitigation Measure(s)
None required.

TR-3 Impacts regarding emergency vehicle access on and surrounding the proposed project site.

Sufficient emergency access is determined by factors such as number of access points, roadway width, and proximity to fire stations. The land use plan for the proposed project would be subject to approval of the fire department. All lane widths adjacent to the project would meet the minimum width that can accommodate an emergency vehicle; therefore, the width of the roadways would be adequate. Therefore, the development of the proposed project is expected to have ***less-than-significant*** impacts regarding emergency vehicle access.

Mitigation Measure(s)
None required.

Historic Resources Evaluation

P.O. Box 70415, Richmond, CA. 94807 • (415) 745-1906 • caitlin@leftcoastarchitecturalhistory.com

Memorandum

Date:	7. December 2023
Author:	Caitlin Hibma, Principal/Architectural Historian Left Coast Architectural History
Re:	2274 Shattuck Avenue Historic Resource Evaluation Memorandum

Introduction

This memorandum was prepared by Caitlin Hibma of Left Coast Architectural History, who is qualified under the Secretary of the Interior's Professional Qualification Standards for Architectural History. It pertains to the property at 2274 Shattuck Avenue (APN: 57-2028-3) in Berkeley, California, which historically operated as a single-screen, 1,800-seat theater under the United Artists marquee. More recently it has operated as Regal Cinemas, which vacated the property in early 2023.

Executive Summary

The property was listed in the California Register of Historical Resources (California Register) in 2006, following a windshield-survey of 51 potential historic resources along a proposed 18-mile AC Transit East Bay Bus Rapid Transit Project (BRT Project). Both the BRT Project documentation and a 2015 Shattuck Avenue Commercial Corridor Historic Context & Survey relied heavily on 1978 Historic Resources Inventory documentation, and did not account for extensive alterations since the completion of the 1978 documentation. None of the prior evaluations comprehensively analyzed the present condition of the building under current preservation standards and are therefore inadequate for the purposes of CEQA and local land use planning decision-making. *Specifically, none addressed the building's loss of integrity by serial alteration, damage, and destruction of its most important interior and exterior features, which would make it ineligible for listing on the California register and National Register of Historic Places (National Register) today.*

The 1978 Historic Resources Inventory (HRI) documentation determined that the property was eligible for the National Register, but of course, did not address the numerous and extensive alterations made to the building since completion of the documentation 45 years ago. The documentation did note that substantial alterations had been made to the original single-screen theater even before 1978, but it did not analyze significance or the seven aspects of integrity according to current National or California Register significance criteria, as would be standard practice today. Its evaluation of National Register eligibility therefore must be reconsidered to account for both physical changes to the building and present-day evaluation criteria.

In 2004-2005, documentation for the AC Transit East Bay Bus Rapid Transit Project (BRT Project) was undertaken. It produced a California Department of Parks & Recreation (DPR) 523 Update Form, which noted that the

property was “field checked” and did “not appear to have undergone any alteration that would warrant a change in its National Register status code;” ie: the status established by the 1978 HRI documentation. The findings of the 1978 HRI documentation were referenced in the 2004 Update Form and the 1978 HRI form was appended. According to the related Finding of Effect report (2005) for the BRT Project, the evaluation process recognized the inadequacy of the evaluative procedures applied in 1978. It specified the significance criteria under which it determined the property to be eligible – National Register criteria A and C – resting entirely on the information and conclusions of the 1978 HRI documentation (aside from a visual field check of the property) and performing no independent analysis or documentation of obvious exterior alterations that had been made during the intervening 27 years. Nevertheless, as a result of the BRT Project study, the California OHP formally designated the property to the California Register by a consensus through the Section 106 process, based on the National Register finding that was made by the 1978 evaluation and reiterated by the 2004-2005 documentation.

The 2015 documentation, a component of the Shattuck Avenue Commercial Corridor Historic Context and Survey, performed only a summary, non-itemized evaluation according to National or California Register significance criteria and the seven aspects of integrity. It relied heavily on the conclusions of earlier analyses and focused primarily on the property's significance to a potential Shattuck Avenue Downtown Historic District. It did not perform any detailed or itemized analysis in regard to the theater's significance or integrity in relation to a potential district, however; and never formally determined eligibility for, nor designated, a historic district in the area.

All prior documentation and evaluation of the property relies on and is iterative of the original 1978 Historic Resources Inventory documentation, which was not performed to current standards. Therefore, this Historic Resource Evaluation seeks to provide analysis to compensate for the above deficiencies, especially by providing images of current versus historical condition, summarizing alterations over time, establishing a period of significance for the property, and assessing architectural merit according to up-to-date standards.

This study finds that:

- Past documentation and evaluation of the property relies heavily on the initial 1978 documentation, which does not reflect subsequent physical alterations and was not conducted according to current standards and is, therefore, not adequate for the purposes of CEQA and current local land use planning decision-making.

- The theater's period of significance is 1932 to 1973; the date of its construction to the time when the original single-screen theater was subdivided, and underwent numerous other alterations, for conversion into a multi-plex, which substantially changed both its visual appearance and functionality.

- A detailed accounting and synthesis of building permit records and other documentation of alterations indicates that the theater has undergone substantial alterations to both its exterior and interior, with a majority of significant features altered or absent since the 1970s; some since the 1940s.

- On the theater's primary exterior frontage on Shattuck, only the upper facade remains intact. Significant features that have been altered, removed, obscured, or demolished, in whole or in part, include the lower primary facade; marquee and blade signs; open atrium and associated finishes; box office; murals and painted décor throughout; concession stand; single main auditorium space; stage, proscenium, and auditorium décor; organ and grilles; theater seats; lounges and backstage space.

- The property does not meet the eligibility criteria of the National Register for association with important events, people, architectural merit, architect, or information potential. It does not meet the eligibility criteria of the California Register for association with important events, people, architect, or information

potential.

- The property may have met the California Register eligibility criteria for demonstration of high architectural merit; however, the building has lost integrity to the extent that it cannot effectively convey that merit. That integrity was lost as long ago as 1973.

- Local criteria for eligibility as a Landmark or Structure of Merit are broad and subjective, giving the City a measure of discretion to designate a property. However, the Housing Crisis Act of 2019 precludes the application of new zoning regulations – including local historic designations – once a preliminary application for a housing development is submitted.

- Assessed in its current state, the property has lost a majority of the seven aspects of integrity considered for National and California register eligibility, resulting in the inability of the property to convey its historic significance.

- Although the property is listed on the California Register, it would not qualify for listing had its loss of integrity been properly evaluated at the time of its designation (2006).

Methodology

Caitlin Hibma conducted site visits to 2274 Shattuck Avenue on 18 September and 15 November 2023 to observe and photograph the property's interior and exterior. (See *Appendix 1: Current & Historical Images*)

To minimize further confusion and rectify data concerning the historic significance, integrity, and status of 2274 Shattuck Avenue, this memorandum summarizes and synthesizes the findings of earlier studies, and provides new and additional information pertinent to current evaluation and treatment of the property; ultimately providing a conclusion as to the continued or changed historic status of the property.

Background information referenced herein was compiled from various records requests, file reviews, and other research:

- Berkeley Department of Planning & Development (Planning Department) – permit records request (June 7, 2023);
- Berkeley Architectural Heritage Association (BAHA) – review of records (June 15, 2023) and other records requests (Nov. 2, 2023);
- Northwest Information Center (NWIC) of the California Historic Resources Information System (CHRIS) – request for AC Transit East Bay Bus Rapid Transit Project (June 15, 2023);
- California Office of Historic Preservation (OHP) – request to Jay Correia (Registration Unit, Supervisor) to confirm historic status of property;
- JRP Historical Consulting, LLC – request for AC Transit East Bay Bus Rapid Transit Project records (Oct. 24, 2023);
- Alameda-Contra Costa Transit District – public records request for AC Transit East Bay Bus Rapid Transit Project records (Oct. 31, 2023);
- California Office of Planning & Research (OPR) – request for AC Transit East Bay Bus Rapid Transit Project records (Oct. 31, 2023);
- California State Library - request for AC Transit East Bay Bus Rapid Transit Project records (Oct. 31, 2023);
- Newspapers.com, the California Digital Newspaper Collection, the Online Archive of California, Berkeley Historical Society photo collection, and other online resources.

Specific sources are cited within the text and historical images that were collected are included and cited in *Appendix 1: Current & Historical Images*.

Evaluative Procedures

National Register of Historic Places & California Register of Historical Resources

The National Register is the official Federal list of districts, sites, buildings, structures, and objects significant in American history, architecture, archaeology, engineering, and culture. In order for a property to be eligible for listing in the National Register, it must be found significant under one or more criteria (A-D) relating to historically significant events, people, architects or architectural merit, or information potential. It must also retain the integrity necessary to convey that significance.

The California Register is an inventory of significant architectural, archaeological, and historical resources in the State of California. As with the National Register, a property must be found significant under one or more criteria (1-4) relating to events, people, architects or architectural merit, or information potential to be eligible for listing in the California Register and retain integrity.[1]

Properties that are determined to be eligible for the National Register are automatically eligible for the California Register,[2] and eligibility for the California Register qualifies a property as a historical resource for the purposes of CEQA.

Because the property at 2274 Shattuck Avenue was previously evaluated for both the National and California registers, the analysis presented in this memorandum provides an evaluation of the historic significance according to both registers' significance criteria, which essentially align.

Criterion A/1 (Event): Resources that are associated with events that have made a significant contribution to the broad patterns of our history/California's history and cultural heritage.

Criterion B/2 (Persons): Resources associated with the lives of persons significant/important in our past.

Criterion C/3 (Architecture): Resources that embody the distinctive characteristics of a type, period, or method of construction, or that represent the work of a master/important creative individual, or that possess high artistic values/or that represent a significant and distinguishable entity whose components may lack individual distinction.

Criterion D/4 (Information Potential): Resources that have yielded, or may be likely to yield, information important in prehistory or history.

Integrity

In order to qualify for listing in the National or California Register, a property must possess significance under one of the aforementioned criteria *and* have historic integrity according to seven aspects. Most, if not all, aspects of integrity must be met in order for the property to retain integrity, although "it is possible that historical resources may not retain sufficient integrity to meet the criteria for listing in the National Register, but they may still be eligible for listing in the California Register. A resource that has lost its historic character or appearance may still have sufficient integrity for the California Register if it maintains the potential to yield significant

[1] California Public Resources Code, Section 5024.1(c) (1)(2)(3)(4) and California Code of Regulations, Section 15064.5(a)(3)(A)(B)(C)(D).
[2] California Public Resource Code, Section 5024.1 (d)(1).

scientific or historical information or specific data."[3]

Location is the place where the historic property was constructed.

Setting addresses the physical environment of the historic property inclusive of the landscape and spatial relationships of the building(s).

Design is the combination of elements that create the form, plans, space, structure and style of the property.

Materials refer to the physical elements that were combined or deposited during a particular period of time and in a particular pattern of configuration to form the historic property.

Workmanship is the physical evidence of the crafts of a particular culture or people during any given period in history.
Feeling is the property's expression of the aesthetic or historic sense of a particular period of time.

Association is the direct link between an important historic event or person and a historic property.

Berkeley Landmarks & Structures of Merit

Berkeley Landmarks and Structures of Merit are designated by the City of Berkeley. Resources may be designated as Landmarks if they meet one or more of five criteria similar to those used for the California Register, but which elaborate on particular areas of significance. Resources may be designated as Structures of Merit if they meet general and/or specific criteria. Integrity is not considered in the evaluation for Berkeley Landmark or Structure of Merit eligibility.

However, Sec. 3.24.100.B of the Berkeley Municipal Code does not allow the interiors of private buildings to be designated or regulated as Landmarks or Structures of Merit. The Housing Crisis Act of 2019 further precludes the application of new zoning regulations – including local historic designations—once a preliminary application for a housing development is submitted.

Berkeley Landmarks

1. Architectural Merit:
a) Property that is the first, last, only or most significant architectural property of its type in the region;
b) Properties that are prototypes of or outstanding examples of periods, styles, architectural movements or construction, or examples of the more notable works of the best surviving work in a region of an architect, designer or master builder;
c) Architectural examples worth preserving for the exceptional values they add as part of the neighborhood fabric.

2. Cultural value: Structures, sites and areas associated with the movement or evolution of religious, cultural, governmental, social and economic developments of the City.

3. Educational value: Structures worth preserving for their usefulness as an educational force.

[3] California Office of Historic Preservation, "Technical Assistance Series #6: California and National Register Comparison (for purposes of determining eligibility for the California Register)."

4. Historic value: Preservation and enhancement of structures, sites and areas that embody and express the history of Berkeley/Alameda County/California/United States. History may be social, cultural, economic, political, religious or military.

5. Any property which is listed on the National Register described in Section 470A of Title 16 of the United States Code.

Berkeley Structures of Merit

General criteria shall be architectural merit and/or cultural, educational, or historic interest or value. If upon assessment of a structure, the commission finds that the structure does not currently meet the criteria as set out for a landmark, but it is worthy of preservation as part of a neighborhood, a block or a street frontage, or as part of a group of buildings which includes landmarks, that structure may be designated a structure of merit.

Specific Criteria

a. The age of the structure is contemporary with (1) a designated landmark within its neighborhood, block, street frontage, or group of buildings, or (2) an historic period or event of significance to the City, or to the structure's neighborhood, block, street frontage, or group of buildings.

b. The structure is compatible in size, scale, style, materials or design with a designated landmark structure within its neighborhood, block, street frontage, or group of buildings.

c. The structure is a good example of architectural design.

d. The structure has historical significance to the City and/or to the structure's neighborhood, block, street frontage, or group of buildings.

Historic Status & Previous Evaluations

Via three previous iterative evaluations of the property (summarized below and included in *Appendix 3: Prior Evaluations*), the latter of which rely heavily on the initial evaluation, 2274 Shattuck Avenue has been determined eligible for listing in the National Register and the California Register. No evaluation of the property's eligibility as a City of Berkeley Landmark or Structure of Merit has previously been undertaken.

Based on previous eligibility determinations, the property was subsequently designated to the California Register in 2006. It is, therefore, currently considered to be a historical resource for purposes of the California Environmental Quality Act (CEQA).

The property was also identified as a contributor to the potential Shattuck Avenue Downtown Historic District in the Shattuck Avenue Commercial Corridor Historic Context & Survey (Archives & Architecture, 2015); however, no formal determination was made as to district's eligibility for local, state or national designation.

1978 Historic Resources Inventory Forms for Berkeley Architectural Heritage Survey by Betty Marvin

The first documentation and evaluation of the property at 2274 Shattuck Avenue was undertaken in 1978 for the Berkeley Architectural Heritage Survey by local preservation specialist, Betty Marvin. At the time, the California Office of Historic Preservation's standard property inventory forms were known as Historic Resource Inventory forms, rather than DPR 523 Forms, as they are today. They contained generally similar information, however; and were a vehicle for recording the physical character and history of a property, while providing an evaluation

of its historic status.

The 1978 Historic Resource Inventory forms make cursory mention of the original United Artists ownership of the theater and its management by Fox-West Coast, as well as 45 years of operation as a "small town movie theater." They describe the building as an "Art Deco movie palace behind a deceptively small and austere facade," and relate its history and development from the time of its construction in 1932, to the late 1970s, making particular note of the building's evolution from original design intent to actual construction, including

> … many delays and changes of plans, to which we partly owe its advanced glass Deco style: early reports planned a "free adaptation of Spanish Renaissance," in other words the Moorish style of the 1920s... Plans at one time called for the Bancroft Way frontage – sheer concrete wall with just the least ridged pattern – to be decorated, but money was apparently not available.

The Bancroft Way facade was further described as "a massive irregularly shaped concrete block... with service entrances and little else."

Original, but now altered, features were described, including the "outside atrium with 4-sided dome, tiled walls and pavement," while note was also made of the substantial alterations that had already occurred in 1978; specifically, that the "Original 25' stage [was] closed off, lounge and smoking room remodeled, [and] 1940s bare-bulb marquee removed, in [the] change from 1 to 4 theaters, 1970-1976." The narrative concludes that

> Though some splendor has been lost in creating the 4 auditoriums, moving the box office inside (after a cashier was shot in a holdup [June 1972]), and removing the bare-bulb marquee and vertical neon sign... this is a gloriously preserved Art Deco theater...hard times for movies in the 1960s and 70s probably helped keep it intact – while the building was out of fashion there was neither money nor interest to remodel it...

The 1978 Historic Resource Inventory forms for 2274 Shattuck Avenue assigned the property a "National Register Status Code" of "3" indicating that it "appeared eligible for the National Register to the person completing or reviewing the form." No action was taken at the time to designate the property, however. In 2003, the status code system was revised and National Register Status Codes became known as California Register Status Codes. The former status code of "3" translates to the current status codes of "3S," "3D," or "3B," which all indicate eligibility for the National Register (either individually and/or as a contributor to a historic district).

2005 Update for AC Transit East Bay Bus Rapid Transit Project by JRP Historical Consulting

In 2004-2005, a second evaluation of the property was undertaken for the purposes of the AC Transit East Bay Bus Rapid Transit Project (BRT Project). The study produced a cursory DPR 523 Update Form, which noted only that the property was "field checked" and did "not appear to have undergone any alteration that would warrant a change in its National Register status code."

Fifty-one properties addressed by the BRT Project and it seems unlikely that field verification consisted of more than windshield-level survey or that building interiors or documentation of alterations were addressed. The related Finding of Effect document does note that

> Three-quarters of the previous evaluations were completed between 1977 and 1985; however, the vast majority were evaluated in the late 1970s as part of the statewide inventory completed by local governments and private organizations. At that time there was no standardization in the evaluation process and as a result, the historic resources within the architectural APE that were found to be significant often lacked clear and concise explanation of the historical importance... Only a

> handful of these previously evaluated properties included references to specific criteria (Criteria A, B, C, and D). Additionally, evaluation of the property's overall historic integrity was not supplied or overlooked. As a result, many of these historic resources appear to have been altered prior to the time they were found to be historically significant. Furthermore, these forms generally lack dates for period of significance or provide periods that do not correspond with the built resources. Many do not define architectural styles or influences, and when significance is based on architectural merit, character-defining features are not provided.[4]

The Finding of Effect document also provides a chart "giving a brief explanation of the significance of each historic property and where clearly specified in previous documentation, the characteristics that contribute to that significance..."[5] The chart notes that no period of significance was identified by previous documentation and summarizes that

> The United Artist Theater building appears to be significant under Criteria A and C. Constructed in 1932, the building served as a locally operated movie theater for over 45 years. The building is also noteworthy for its Art Deco style of architecture, typified by its stepped pyramidal facade, which includes "WPA-style sculpture representing Artistry United."

No independent evaluation or new determination of the property's historic significance or designation eligibility is provided by the DPR 523 Update form or in the Finding of Effect report. Since the BRT Project did not entail any alterations to the building – merely an alteration of its setting – a detailed re-evaluation was not necessary to conclude the BRT Project's indirect effects would be less than significant. The BRT project's effort to field check and produce a DPR 523 Update form simply reiterated and confirmed the findings of the 1978 Historic Resource Inventory evaluation without new information or analysis. As a result of the BRT Project study, on 15 March 2006, the California Office of Historic Preservation formally designated the property to the California Register based on the National Register finding that was made by the 1978 HRI documentation and reiterated by the BRT Project documentation. In the Office of Historic Preservation's Built Environment Resources Directory, the property now bears a status code of "2S2" indicating that it is an "Individual property determined eligible for the National Register by a consensus through the Section 106 process. Listed in the California Register."

2015 DPR Forms for Shattuck Avenue Commercial Corridor Historic Context and Survey by Archives & Architecture, LLC

The most recent evaluation of the property occurred in 2015 as a component of the Shattuck Avenue Commercial Corridor Historic Context and Survey authored by Archives & Architecture, LLC. Although the evaluation cites and summarizes both previous evaluations, a full set of DPR 523 forms was completed, thus creating a duplicate record.

The 2015 DPR 523 forms describe the building on a Primary Record form (DPR 523 A) and provide a list of character defining features that include the "stepped-parapet front wall; concrete wall structure and board-formed concrete rear wing with its vertical speed stripes; recessed entrance form; exterior wall frescos and bas relief; tower plume, arch, and scroll patterns; [and] original tile floor." The last item may refer to original tile floor borders; however, no full tile floors – originally only found in the atrium – remain intact. Also of note, the characterization of the speed-striped concrete wall structure on the rear wing (i.e. the Bancroft Way facade) as character defining conflicts with the 1978 evaluation's characterization of that facade as a value-engineered feature lacking in architectural merit. The narrative goes on to state that there have been two iterations of the vertical blade sign, both associated with the original marque, all of which have been removed, and that the primary facade has been altered, namely through the enclosure of the atrium, removal of the marquee and blade signage,

[4] Ibid.
[5] Ibid.

and changes to materials and features around the entrance at ground level. The only alteration noted within the summarizing section, however, is the removal of the marquee and blade sign.

The 2015 DPR 523 forms summarize and expand upon the history and context of the building on a Building, Structure, Object Record form (DPR 523 B), but devote attention primarily to summarizing the property's current historical status as established by the 1978 documentation and reiterative 2004 documentation, discussing integrity, and providing a cursory evaluation. The evaluation does not address California/National Register criteria-based analysis, but focuses generally on the property's contribution to a potential Shattuck Avenue Downtown Historic District and relation to the surrounding Downtown streetscape.

The 2015 DPR 523 Forms reiterate the "2S2" status code that was a result of the 2004 documentation, indicating that the property's continued eligibility for the National Register and standing designation to the California Register. It indicates that it would be a "contributor to the establishment of a historic district in the greater Shattuck Avenue area" primarily for the detailing and relationship of its commercial façade on Shattuck Avenue to the surrounding streetscape.

Physical Description & Alterations

At the time this memorandum is issued, the theater building has an L-shaped plan and is approximately two to four stories high with flat and bow-truss roof forms. The L-shaped plan consists of a two-story east-west ell that fronts on Shattuck Avenue, and a three to four story north-south ell that fronts on Bancroft Way. A separate, unrelated building is located within the interior angle of the L-shaped plan. View of the roof shows that a demising wall separates the two-story atrium and lobby portions of the east-west ell, which is separated from the north-south ell by a demising wall and change in height from two to three stories. The majority of the north-south ell is three-stories and the generally rectangular footprint of the ell narrows toward the south end, where it rises to four stories at the extreme southern end to accommodate the theater's fly loft.[6]

The primary facade faces Shattuck Avenue (east), without setback from the sidewalk. Its mass is two stories high, with parapet ornamentation that rises to approximately three to four stories. The margins of the first story are clad with non-original, large-dimension, marble tile that incorporates inset non-original poster display cases. The majority of the first story is spanned and enclosed by a non-original extruded aluminum frame storefront assembly that includes glazed entry doors on either side and an integral ticket window at the center. Above the first story is a non-original illuminated sign-board marquee that is flat and projects minimally from the face of the building. The upper primary facade is the only portion of the original facade to remain intact and features flat vertically-oriented panels that step upward toward the center. The panels have corbelled edges and feature low bas reliefs depicting half-arch, fountain, and other geometric motifs, as well as human figures and the words "Artistry" and "Unity." The upper facade is clad with smooth painted plaster that is in deteriorated condition.

The Bancroft Way facade (south) is physically and visually separate from the Shattuck Way facade, as it faces a different direction and street frontage, making the theater's Shattuck Avenue and Bancroft Way frontages appear unrelated. The Bancroft Way facade consists of a monolithic, flat, four-story plane of unfinished board form concrete. The concrete is adorned only with vertical bands of incised lines, which terminate in subtle chevron forms at the roofline. Between the vertical bands, the roofline is very slightly corbelled. There is a low projecting bay with a service entrance approached by concrete steps on the left side of the facade. On the right side, is another projecting bay with a chain link-gated service entrance. Two metal pedestrian doors are located on the left side of the main portion of the facade, which is otherwise completely unfenestrated.

Major spaces of the interior consist of a now-enclosed atrium, vestibule, and double-height lobby within the

[6] A fly loft an upward extension of the backstage space that allows scenery and stage elements to be lifted upward, via ropes and pulleys, facilitating scene changes.

east-west ell. The north-south ell contains two stories of auditorium space, as well as former lounge rooms, and backstage/fly loft space. The auditorium space was once a large single-screen theater, but now consists of four small auditoriums (two over two) and a "void space" (unused space at upper front of original auditorium space, forward of mezzanine). The two lounges and backstage space have also been converted into small auditoriums. In most spaces original finishes and decorative elements have been removed or painted over.

(See *Appendix 1: Current & Historical Images* for photographs.)

Alterations

Previous documentation of the theater only loosely noted alterations to the building at the time that each evaluation was made; or, in later cases, only confirmed and reiterated alterations addressed in previous documentation. The most visually apparent alterations were given the most attention, while some alterations appear to have been omitted.

The two charts on the following pages represent a comprehensive a chronological list and a graphic representation of changes that were made to the theater based on evidence from various sources and some subsequent deductions based on visual observation during site visits and related documentation. A spreadsheet of all building permits and other planning records on file with the City of Berkeley Planning Department is appended to this memorandum *(Appendix 2: Permits Chart).*

Date	Alteration	Source
1932	Theater built.	Permit
1940s (1943-1954)	Main lobby concession stand added. (Not included in original plans; presumably not original.)	S. Coleman reminiscence (BAHA)
1940s (1946-1965)	Original "United Artists" blade sign removed and replaced with Streamline Moderne "UA" version, Deco box marquee remained.	Historic photos
1940s	Lobby redecorated, decorative painting using scrolling foliate motifs introduced.	Gary Parks (FB)[7]
Mid-1960s	Art Deco painted and/or plaster decorative elements on the ceiling in the main lobby removed or painted over; comparison of 1932 images to today show that bands of painted or plasterwork scallop and chevron patterns on lobby ceiling are now gone. Evidence of other painted patterns and motifs exist throughout the building and may have been painted over in 1940s, mid-1960s, or other periods of remodeling noted below.	Carlo Chaney (FB)[8]
1973	Single large auditorium "twinned;" divided into two smaller auditoriums. Subdivision involved and resulted in: • Suspended ceiling installed at mezzanine level; the dividing wall between the two auditoriums - font to back - does not continue above approximately mezzanine level within void space suggesting that ceiling was installed at mezzanine level and that mezzanine was closed off/unused for a time. Void space and remaining decorative features have been obscured from view since this time. • Stage closed off, orchestra pit demolished, new partition walls/screens installed forward of orchestra pit. • Proscenium[9] and other ornamental features and decorative painting (including lower portions of decorative organ grilles) obscured and partially destroyed up to level of new suspended ceiling. • Suspension wires for new ceiling were punched through decorative plaster work – including suspended sunburst ceiling ornament radiating from the proscenium – within void space, heavily damaging it.	Permit Deduced
1973	Deco box marquee and Streamline Moderne blade sign removed. Flat sign board marquee (listing 2 movies) and short "UA Cinemas" projecting sign installed.	Permit, historic photo
1973	Organ removed. (Lower portions of decorative organ grilles removed to level of suspended ceiling, see above.)	Gary Parks (FB)
1973	Original theater seats replaced.	Permit
1974	Split upper level into two separate theaters.	Permit

[7] FB = facebook. Information gathered from posts and comments on "Save the United Artists Theater Berkeley" Facebook group. Gary Parks is a local theater preservationist, expert, and author on the topic. Anthony Bruce is Executive Director of Berkeley Architectural Heritage Association. Carlo Chaney is a Chicago-based theater preservationist.

[8] FB = facebook. Information gathered from posts and comments on "Save the United Artists Theater Berkeley" Facebook group.

[9] The proscenium or proscenium arch is a framing opening that defines the stage from the auditorium. A stage apron or open orchestra pit sometimes extends beyond the proscenium into the auditorium slightly. The proscenium is often decorative. In the case of this theater, it included decoratively painted massive round columns flanking the stage and a slight arch at the top, which had a stepped profile and was adorned with decorative plaster work.

	Mezzanine space divided down center resulting in 4 auditoriums; two at first floor, two at second floor. Reopening mezzanine as two additional auditoriums involved and resulted in: • Partition wall/screens installed at location of mezzanine railing. • Dividing wall between auditorium spaces continued up to original ceiling (does not continue within void space). • Majority of ornamental features and decorative painting within mezzanine auditoriums removed or painted over.	Deduced
1974	Installation of wall/screens at mezzanine railing location resulted in void space at upper front of original auditorium space. Some decorative plaster work is still visible in this space but is heavily damaged and decorative painting has been painted over. Both plaster work and decorative painting are removed, damaged, or obscured throughout the rest of the original auditorium space.	Observed/deduced
ca. 1974	Flat sign board marquee enlarged (to list 4 movies for 4 auditoriums). Short projecting "UA Cinemas" sign removed, not replaced.	Historic photo.
1975	HVAC equipment and duct work installed. Ventilation ducting profuse in void area; resulted in severe damage and partial destruction of remaining ornamental plaster work.	Permit Deduced
Post-1972	First story of front (Shattuck) facade remodeled; cladding materials, entry assemblies, poster display cases, etc.	Historic photo
1972-1978	Box office moved "inside," from front facade to interior of atrium. (Unclear if box office was rebuilt with change of location. Originally box office appears to have been clad with black vitrolite[10] and had gold Deco style ornament.)	Historic photo, 1978 DPR
1982, 1985	Ladies lounge, smoking room, and former backstage area (unclear which, when) converted to auditoriums for total of 7 auditoriums.	Permits
ca.1982	Two new murals painted (by John Anderson) in lobby/foyers to mimic original Heinsbergen Decorating Company mural, of which only one remains.	Anthony Bruce (FB)
1989	Atrium closed off from street, facade repaired, exterior remodeled. Modern aluminum frame, glazed entry assembly, incorporating box office window, installed across entry opening. (Relocated original and/or replacement box office demolished at this time). This remodeling also resulted in • First story exterior walls around entry re-clad with marble tile and new poster cases installed (original materials appear to have been black vitrolite with inlaid Deco style gold accents). • Original colored pavement and/or tilework removed from atrium floor, walls, and possibly dome; floor carpeted, walls and dome covered with sheetrock and painted. • Box office counter, main lobby concession stand, and mezzanine concession stand added/remodeled with identical aesthetics to atri-	Gary Parks, Berkeleyside[11] Deduced

National & California Registers Significance Evaluation

Because the property at 2274 Shattuck Avenue was previously evaluated for both the National and California registers, the following analysis provides an evaluation of the historic significance according to both registers' significance criteria:

Criterion A/1: *Resources that are associated with events that have made a significant contribution to the broad patterns of our history/California's history and cultural heritage.*

No specific events of historical importance are known to have occurred at the property. The property fits the extremely broad context of Depression-era movie theaters and entertainment venues. During economic hard-times of the 1930s, flamboyant movie palaces and smaller theaters were built in large numbers across the nation, as a financially beleaguered populace turned to the fantasy and escapism of affordable entertainment like movies. Hollywood, its studios, stars, and stories were represented physically by movie theaters in communities across America. Theaters also provided local employment opportunities, in their initial construction and ongoing operation, that helped bolster local economies to some extent. The United Artist Theater at 2274 Shattuck Avenue, built in the early years of the Depression, filled these roles within the City of Berkeley. However, it was one of many built within the same context, both within Berkeley and across California and the United States. It claims a place within that broad historical context, but does not stand out as particularly important or influential to the context, as it is one of a myriad of Art Deco Depression-era movie theaters found locally, regionally, and nationally.

The property does not appear to be eligible for listing in the National or California registers under Criterion A/1.

Criterion B/2: *Resources associated with the lives of persons significant/important in our past.*

The property has been owned by corporate entities throughout its history, with no specific people directly related to it, either as owners, operators/employees, or in other associated roles. United Artists, for whom the theater was built, was founded by movie stars Mary Pickford, Charlie Chaplin, Douglas Fairbanks, and D.W. Griffith; however, these celebrities had no specific relationship with the theater at 2274 Shattuck Avenue, which was one of numerous United Artists theaters built throughout California and the nation. Various stars may have visited the theater in connection with films being shown; for instance Roy Rogers and stars of the film "Down to Earth" appeared in person at the grand opening of the theater at 2274 Shattuck Avenue;[12] however, this was a common practice within the early film industry and those stars have no meaningful connection to this specific theater among the many that they appeared at for premiers, grand openings, and other events.

The property does not appear to be eligible for listing in the National or California registers under Criterion B/2.

Criterion C/3: *Resources that embody the distinctive characteristics of a type, period, or method of construction, or that represent the work of a master/important creative individual, or that possess high artistic values/or that represent a significant and distinguishable entity whose components may lack individual distinction.*

Architecture

The theater at 2274 Shattuck Avenue represents the Art Deco style of architecture. The Art Deco style was popular nation-wide in the 1920s and 1930s, breaking away from traditional styles to introduce a unique, modernistic, and uplifting aesthetic to a nation that was at first focused on progress and the future, then later seeking escapist relief from the Great Depression. It was a highly decorative style and was applied primarily to public and commercial buildings. Sometimes found on large apartment buildings, it was much less common in residential de-

[12] *Berkeley Daily Gazette,* 15 September 1932.

sign. Applied to a theater, the Art Deco style was an exuberant advertisement for the exciting entertainment offered by the establishment.

The Art Deco style was characterized by smooth wall surfaces, usually clad with stucco, that were profusely decorated with geometric motifs like zig-zags, stair steps, sunbursts, chevrons, stylized floral shapes, and vertical bands. Verticality was the emphasis of the style and was often dramatically expressed in towers, blade/fin walls, and other vertical projections above the roofline. The style was often embellished with color and light in the form of polychrome paint schemes and multicolored neon signage.

The theater at 2274 Shattuck Avenue expresses the Art Deco style only in its upper primary facade (the lower portion having been completely altered), which is narrow but has vertical emphasis embodied in stepped rectangular panels that rise to the center. The vertical components of the stepped roofline incorporate smaller stepped and corbelled details at their edges and are adorned with stylized half-arches, fountain motifs, radiating sunburst-like scored lines, and Deco style human figures. The aesthetic may have originally been enhanced by polychrome paint and had a vertical blade sign and a marquee with chevron ornamentation, copiously outlined in neon; as well as Deco style geometric lines and shapes in the surround of the entry and within the open and visible atrium. However, by at least 1965, the facade had been painted a monochrome off-white and, over time, the marquee and signage underwent repeated replacements. Today, the paint scheme is more polychrome, but the non-original paint is faded and peeling, while blade signage has been removed entirely and the marquee is now a flat reader board. The atrium has been closed off from view and access of the street. Effectively, although Art Deco forms remain, the theater's ability to advertise its purpose – a critical function for an entertainment business – through color, light, and innate stylistic flamboyance, has been lost.

The secondary Bancroft Way facade effectively reads as a separate building due to the theater's L-shaped plan, the two facades' perpendicular orientations, and an intervening building mass. It only loosely associates with the Shattuck Way frontage in its vague Art Deco references. Its lack of ornament, sculptural definition, color, and interaction with the public realm is antithetical to the Art Deco style and the building's identity as an entertainment venue. It relates little – physically or stylistically – to the Shattuck Avenue frontage of the building. It is also an indicator of the value-engineering (lack of budget) that resulted in the original design of such a massive unadorned facade. Pertinent to the concept of the Bancroft Way facade's value engineering and lack of ornamental consideration, the National Register Bulletin addressing “How to Apply the National Register Criteria for Evaluation” (National Register Bulletin No. 15) states:

> Art Deco detailing is not eligible under Criterion C if the detailing was added merely as an afterthought, rather than fully integrated with overall lines and massing typical of the Art Deco style...[13]

The interior of the theater was also originally designed in the Art Deco style, but many elements have been lost in the substantial alteration of the originally single-screen theater into a multi-plex; not least, the enclosure and ornamental sterilization of the originally-exterior atrium, and the removal of original features and ornament within the now-subdivided auditorium. With regard to interiors, and providing a strikingly pertinent reference to auditorium interiors like that at 2274 Shattuck Way, National Register Bulletin No. 15 states:

> In some cases the loss of an interior will disqualify properties from listing in the National Register – a historic concert hall noted for the beauty of its auditorium and its fine acoustic qualities would be the type of property that if it were to lose its interior, it would lose its value as a historic resource.[14]

[13] National Park Service, “National Register Bulletin (15): How to Apply the National Register Criteria for Evaluation,” 1995; 18.
[14] Ibid., 46.

Essential interior features of the theater have not only been lost or altered to a great extent, but many of those that do remain are hidden from view or have been painted over or otherwise obscured. The interior decorative features of the original single-screen auditorium that survive (though in a damaged state) are limited to the void space at the upper front of the original auditorium, which is completely hidden from view and accessible only through a small utility hatch from the fly loft. National Register Bulletin No. 15 addresses this situation by stating that eligible properties

> must not only retain their essential physical features, but the features must be visible enough to convey their significance. This means that even if a property is physically intact, its integrity is questionable if its significant features are concealed under modern construction.[15]

Thus, although some original decorative features remain, they cannot contribute to the building's integrity and, subsequently, its ability to convey the architectural significance of the property.

The theater, as originally designed (with the exception of the Bancroft Way facade, which was not executed to original designs), appears to have been a modest example of the Art Deco style and was also one of many Art Deco style theaters locally and nationwide. Many of those still stand and are of greater architectural merit, in regard to which National Register Bulletin No. 15 states that a building that is "a modest example" of its style would not qualify as having high artistic values.[16] Because it is a relatively well represented type and style locally and nationally, is modest in comparison to other theaters locally and nationally, and has lost integrity it does not appear to rise to National Register-level significance.

In its original physical state, it appears to have had adequate architectural merit to qualify it for eligibility at the California Register level; however, as discussed below, alterations have degraded its integrity to the point that it can no longer adequately demonstrate its architectural merit.

Architect

The theater was designed by architect Clifford A. Balch, who was a partner in the architecture firm of Walker & Eisen.[17] According to the Cinema Treasures website and Pacific Coast Architecture Database, Balch designed at least 60 theaters in California between 1914 and 1941. His work was heavily concentrated in Southern California, although he readily worked throughout the state. He was hired repeatedly by the Fox West Coast Theater Corporation and United Artists. Although he began specializing in theater design under a previous partnership, from 1919 onward he worked under the auspices of the Southern California firm of Walker & Eisen. The firm was founded in 1919 by partners Albert R. Walker and Percy A. Eisen. The L.A. Conservancy notes the Fine Arts Building and the Oviatt Building in Los Angeles as some of their best known work, but notes that they were extremely prolific. They designed many building types beyond theaters, but Balch appears to have been the theater specialist in the Walker & Eisen office.

Based on his prominence in the field of theater-design throughout California and the number of theaters of the 1920s, 30s, and 40s, that are in his portfolio, Clifford Balch appears to have been a popular theater designer. Many of his theater designs are still standing today. The Cinema Treasures website identifies 38 Balch-designed theaters that are still extant today (of 61 total examples identified).[18] Many have been adaptively re-used, but retain their architectural character, and many provide equal or better examples of Balch's work than the United Artists theater at 2274 Shattuck Avenue. Additionally, Balch designed at least four other United Artists theaters using a facade design identical to that at 2274 Shattuck Avenue,[19] indicating that a cookie-cutter approach was

[15] Ibid.
[16] Ibid., 20.
[17] Wikipedia, "Walker & Eisen," https://en.wikipedia.org/wiki/Walker_%26_Eisen.
[18] Cinema Treasures (website); https://cinematreasures.org/architects/188?status=all
[19] United Artists Alameda Theater, 5136 Whittier Blvd., Los Angeles, 1931 (extant); United Artists Pasadena Theater, 606

prescribed by the theater company and suggesting that although Balch may have executed the original design concept, he may not have had direct involvement with the execution of the design at 2274 Shattuck Avenue, which was the third or fourth iteration of the design to be executed. Two of the identical theaters (both built the year prior to the subject theater) are still extant and appear to have equal or better integrity than the subject property.

Because it is one of many remaining Balch-designed theaters in California, including at least two others of identical design, and has lost the integrity of Balch's original design intent due to alterations, the theater does not appear to rise to a level of national, regional, or local significance for association with a master architect or important creative individual.

The property does not appear to rise to a level of significance to be eligible for listing in the National Register under Criterion C. It would have been eligible for listing in the California Register under Criterion 3, but for loss of integrity; see below.

Criterion D/4: *Resources that have yielded, or may be likely to yield, information important in prehistory or history.*

Criterion D/4 is typically concerned with archaeological investigation. Where buildings or architectural elements are concerned, this criterion typically relates to rare construction types, of which 2274 Shattuck Avenue is not an example.

Therefore, the property does not appear to be eligible for individual listing in the National or California registers under Criterion D/4.

Integrity Evaluation

In order to qualify for listing in the National or California Register, a property must possess significance under one of the aforementioned criteria *and* have historic integrity according to seven aspects. Most, if not all, aspects of integrity must be met in order for the property to retain integrity, although

> It is possible that historical resources may not retain sufficient integrity to meet the criteria for listing in the National Register, but they may still be eligible for listing in the California Register. A resource that has lost its historic character or appearance may still have sufficient integrity for the California Register if it maintains the potential to yield significant scientific or historical information or specific data.[20]

No assessment of integrity is required under Berkeley Landmark or Structure of Merit evaluation criteria, which are addressed in the next section (Berkeley Municipal Code 3.24.110).

The theater appears to be significant under one of the above California Register criteria; therefore, an evaluation of integrity is provided:

- Location: The theater retains integrity of location, having never been moved from or re-positioned on its original site.

E. Colorado Blvd., Pasadena, 1931 (extant); United Artists Long Beach Theater, 217 E. Ocean Blvd., Long Beach, 1932 (demolished); United Artists 4 Star Theater, 5112 Wilshire Blvd., Los Angeles, 1933 (demolished).

[20] California Office of Historic Preservation, "Technical Assistance Series #6: California and National Register Comparison (for purposes of determining eligibility for the California Register)."

- Setting: The densely urban environment of Downtown Berkeley, and adjacency of the major thoroughfare of Shattuck Avenue, has evolved over time. Development such as transportation and streetscape improvements and the construction of modern buildings has changed the character and scale of the greater Shattuck Avenue corridor and generated numerous fine grain changes in the theater's surroundings that erode integrity of setting, although it remains an urban environment.

- Materials**:** The theater has lost integrity of materials, having undergone exterior and interior alterations that have removed and/or covered and obscured many of its distinctive materials such as facade cladding and fenestration, tilework, painting and plasterwork, signage, and fixtures.

- Design**:** The theater has lost integrity of design. It retains its basic massing and exterior structural envelope, but has undergone substantial alterations to important exterior elements like the lower primary facade, marquee/blade sign, and open atrium. Substantial changes to the interior volume resulting from the division of the originally single-screen theater into multiple auditoriums and the conversion of period-indicative spaces like the lounges and stage into additional auditoriums has greatly obscured the original design intent. These changes have both diminished its visual identity as a theater – including its ability to advertise its entertainment commerce; a critical aspect of a movie theater's design – and changed its functional design in terms of use, circulation, capacity, etc.

- Workmanship**:** The theater has lost integrity of workmanship, because both its functional design and many of its material features have been altered. With the physical alteration and/or removal of spaces and features, the tangible materials that make them up and the ways in which they were constructed, crafted, or applied is lost. For instance, enclosure of the atrium and alteration of the configuration and appearance of the primary facade and entrance resulted in the destruction of an original ticket booth, which was built and ornamented in a way indicative of its time and use. Likewise, the skilled application of tilework, painted ornament, and decorative exterior cladding was all negated with changes to the lower primary facade and atrium interior. Similarly, subdivision of the single voluminous auditorium resulted in the removal, obscuring, and/or extensive damage of the stage and proscenium, which were constructed to certain parameters and with certain theater-specific features (like orchestra pits, fly lofts, etc.), while plaster ornamentation and decorative painting applied with certain skill and style, were wholly or partially demolished, severely damaged, and hidden from view. Thus, the workmanship – or physical treatment and application of materials and features to the specifications of the intended design – is no longer extant.

- Feeling**:** The theater has lost integrity of feeling as an Art Deco style movie theater, because the Art Deco aesthetics only remain in the upper primary facade, while signature features indicative of the building's intended use as a theater, such as the marquee and blade sign and a recognizable standalone ticket booth (rather than one integrated into a generic modern storefront assembly) are no longer extant. The lower primary facade, including the modern sign board marquee, has been remodeled in a way that dilutes the theater's original physical and visual character, and the originally open and accessible atrium has been closed off from the public realm, diminishing the impression of an inviting entertainment venue. The interior lobby retains some Art Deco decorative elements, but alterations to materials and features, there and within the auditoriums, convey only a diminished sense of an Art Deco movie palace, while the ad hoc subdivision of auditorium spaces has negated the feeling of a grand movie palace setting. Ultimately, upon approach, the exciting sense of a brightly illuminated, colorful, highly stylized, vivacious entertainment venue is no longer felt; nor is the promise of entering a gilded, luxurious, highly decorated theater, where one will sit in a voluminous space full of exotic ornamentation to indulge in a few hours of movie-watching.

- Association**:** The theater's loss of physical aspects of integrity, like materials, design, and workman-

> ship, as well as its inability to convey the feeling of an Depression-era Art Deco movie theater means that it only minimally reflects the character that was present at the time it was built. It is able, on a basic level, to convey its significant associations with the film and theater industry of the 1930s; however, its character has very obviously been altered and it expresses the confusing associations of other eras as well.

In addition to the above, National Register Bulletin No. 15 identifies "a movie theater embodying high artistic value in its decorative features" as an example of a property that might be significant under National Register criterion C. However, for it to be eligible it "must clearly contain enough of those [distinctive] characteristics to be considered a true representative of a particular type, period, or other method of construction."[21] It goes on to say that:

> A property important for illustrating a particular architectural style or construction technique must retain most of the physical features that constitute that style or technique. A property that has lost some historic materials or details can be eligible *if* it retains the majority of the features that illustrate its style in terms of the massing, spatial relationships, proportion, pattern of windows and doors, texture or materials and ornamentation. The property is not eligible, however, if it retains some basic features conveying massing but has lost the majority of the features that once characterized its style.[22]

As a building that retains its basic massing and structural envelope, but has lost the lower portion of its primary facade and originally-open atrium, as well as the marquee and signage that were signatures of both its style and function, the theater is no longer a "true representative of a particular type" or style and would, thus, not be eligible.

Based on the above analysis, the property assessed in its current state has lost the majority of the seven aspects of integrity considered for National and California register eligibility, and does not conform to National Register guidance regarding retention of distinctive features, thus resulting in the inability of the property to convey its historic significance.

City of Berkeley Landmark & Structure of Merit Evaluation

Sec. 3.24.100.B of the Berkeley Municipal Code does not allow the interiors of private buildings to be designated or regulated as Landmarks or Structures of Merit. The Housing Crisis Act of 2019 further precludes the application of new zoning regulations – including local historic designations—once a preliminary application for a housing development is submitted. As a formality, and because it was not included in previous documentation or evaluation, the following evaluation of local Landmark/Structure of Merit eligibility is provided:

Berkeley Landmark Evaluation

Berkeley Landmarks are designated by the City of Berkeley. Resources may be designated as Landmarks if they meet one or more of five criteria similar to those used for the California Register, but which elaborate on areas of significance. The following provides an evaluation of the historic significance of 2274 Shattuck Avenue according to local significance criteria:

1. Architectural Merit:
a-c. Property that is the first, last, only or most significant architectural property of its type in the region; Properties that are prototypes of or outstanding examples of periods, styles, architectural movements or construction, or

[21] National Park Service, 18.
[22] Ibid., 46.

examples of the more notable works of the best surviving work in a region of an architect, designer or master builder; Architectural examples worth preserving for the exceptional values they add as part of the neighborhood fabric.

The theater does not claim the status of first, last, or only of its type or style in the region. Although it has a place in the context of Depression-era Art Deco movie theaters, it is not a particularly significant or outstanding example of its type or style in relation to others and is heavily altered, with only its upper primary facade intact and character defining. The theater was designed by architect Clifford Balch, who was a prolific theater designer in California; however, this is one of numerous theaters he designed – may of which are still extant, including the California Theater in Berkeley. It is also one of four others of identical design to the theater at 2274 Shattuck Avenue, indicating that although Balch may have rendered the initial design concept, it was applied to the subject property without great architectural consideration or direct interaction from him. Thus, the property does not possess the architectural merit (or integrity) and association with an important architect that would qualify it as a Berkeley Landmark under this criterion.

2. Cultural value: Structures, sites and areas associated with the movement or evolution of religious, cultural, governmental, social and economic developments of the City

The construction of the theater and its subsequent use history was influenced by national-level cultural and economic factors, but these were of extremely broad context and not unique to the City of Berkeley. It was built during the Great Depression and was part of a vast trend of theater construction that sought to provide affordable entertainment for a financially beleaguered public seeking the escapism of Hollywood films, while contributing jobs and income for local citizens during hard times. Another local example, the 1930 Art Deco style California Theater (2113 Kittredge St.), was not deemed eligible as a Berkeley Landmark for its cultural value, setting the precedent that the subject property also does not appear to have the locally-specific cultural value that would qualify it as a Berkeley Landmark under this criterion.

3. Educational value: Structures worth preserving for their usefulness as an educational force

The theater does not appear to have any use as an educational tool. It does not have any strong potential to convey lessons on history, as it is not associated with any important events nor is it physically illustrative of the lives, work, or activities of its owners or users. It therefore does not appear to have the high educational value that would qualify it as a Berkeley Landmark under this criterion.

4. Historic value: Preservation and enhancement of structures, sites and areas that embody and express the history of Berkeley/Alameda County/California/United States. History may be social, cultural, economic, political, religious or military.

The theater does not strongly embody or express unique local history, but is part of very broad nation-wide contexts pertaining to the Great Depression and the theater and film industry. In comparison to another local example – the intact primary facade of the 1930 Art Deco style California Theater (2113 Kittredge St.), which was deemed eligible as a Berkeley Landmark under this criterion – the subject property was not one of the earliest moving picture theaters in Berkeley and was one of numerous theaters constructed throughout the state in the 1930s by United Artists, with no close ties to important corporate figures or film industry stars. Therefore, it does not appear to have the historic value that would qualify it as a Berkeley Landmark under this criterion.

5. Any property which is listed on the National Register described in Section 470A of Title 16 of the United States Code.

The theater is not listed in the National Register and therefore does not qualify as a Berkeley Landmark under this criterion.

Berkeley Structure of Merit Evaluation

Berkeley Structures of Merit are designated historical resources within the City of Berkeley. Resources may be designated as Structures of Merit if they meet general and/or specific criteria. An evaluation follows:

General Criteria

1. General Criteria shall be architectural merit and/or cultural, educational, or historic interest or value. If upon assessment of a structure, the commission finds that the structure does not currently meet the criteria as set out for a landmark, but it is worthy of preservation as part of a neighborhood, a block or a street frontage, or as part of a group of buildings which includes landmarks, that structure may be designated a structure of merit.

The theater claims a place in the context of Depression-era Art Deco movie theaters and Art Deco architecture in Berkeley. It has commonalities with other Art Deco buildings on its Shattuck Avenue street frontage, as well as with other theaters in Downtown Berkeley.

Specific Criteria

a. The age of the structure is contemporary with (1) a designated landmark within its neighborhood, block, street frontage, or group of buildings, or (2) an historic period or event of significance to the City, or to the structure's neighborhood, block, street frontage, or group of buildings.

There are numerous designated landmarks in Downtown Berkeley, including two on the same street frontage, one of which (Berkeley Public Library) is of the same age and architectural style as the theater. The theater is contemporary to the Great Depression, but that is a very broad, nation-wide historical period and not specific to the City of Berkeley.

b. The structure is compatible in size, scale, style, materials or design with a designated landmark structure within its neighborhood, block, street frontage, or group of buildings.

The lower primary facade of the theater is altered and only the upper facade remains compatible in style and design with the Art Deco Berkeley Public Library that is located on the same block and street frontage. The Bancroft Way facade is not visible from the library and is incompatible in its size and scale, lack of typically expressive Art Deco styling, raw concrete material palette, and rudimentary value-engineered design.

c. The structure is a good example of architectural design.
The theater is a heavily altered example of an Art Deco style movie theater that is comparable to other extant theaters of similar age and aesthetics in the area and throughout the state. The heavily altered lower primary facade, and atypically rudimentary Bancroft Way facade, means that the theater does not represent the Art Deco style adequately to be considered a good example.

d. The structure has historical significance to the City and/or to the structure's neighborhood, block, street frontage, or group of buildings.

The theater is part of very broad nation-wide contexts pertaining to the Great Depression and the theater and film industry; however, it does not embody or express unique local history.

Conclusion

Although the property is listed on the California Register, it would not qualify for listing had its loss of integrity

been properly evaluated at the time of its designation (2006). According to the evaluation above, the United Artists theater at 2274 Shattuck Avenue has some significance in relation to California Register criterion 3 as an example of Art Deco style movie theater architecture, but has lost integrity to the point that it cannot adequately convey that significance in its current physical state. It does not appear to rise to a level of significance to be eligible for listing in the California Register under other criteria, nor for the National Register under any criteria.

An evaluation of integrity indicates that the majority of the seven aspects of integrity have been lost or greatly diminished. Physical alterations to the exterior and interior of the originally single-screen theater have caused it to lose integrity to the extent that it only basically conveys the original architectural merit for which it might be considered important.

The theater does not appear to be significant under Berkeley Landmark criteria. It has some chronological and stylistic similarities to other designated properties nearby, as upheld by the broader Structure of Merit criteria, but its altered state obscures accurate reference in this respect. Local eligibility evaluation does not consider issues of integrity; however, in a scenario where a building's significance rests on its visual similarities to nearby buildings, and its visual similarity has been compromised, it can be concluded that eligibility is, nevertheless, negated. It is reiterated that Sec. 3.24.100.B of the Berkeley Municipal Code does not allow the interiors of private buildings to be designated or regulated as Landmarks or Structures of Merit. The Housing Crisis Act of 2019 further precludes the application of new zoning regulations – including local historic designations—once a preliminary application for a housing development is submitted..

The conclusions of this memorandum differ from the conclusions of earlier evaluations, in that the property does not appear to rise to a level of significance, nor retain the integrity, to be eligible for the National Register. The evaluations concur to some extent that the property has significance at the state level for architectural merit; however, this memorandum's evaluation of significance finds it only in the property's basic physical, architectural qualities and documents a substantial loss of integrity that negates the property's ability to convey significance.

Thank you for your consideration.

Sincerely,

Principal/Architectural Historian, Left Coast Architectural History

5. Present Use: movie theater (4 auditoriums) Original Use: movie theater (1750 seats)
   Other past uses: ____

DESCRIPTION

6. Briefly describe the present physical appearance of the site or structure and describe any major alterations from its original condition:

Large & still splendid Art Deco movie palace, behind a deceptively small & austere facade. With the library (J.W.Plachek,1930) & the little tiled bakery/restaurant next door, forms an Art Deco group which is one of the highlights of downtown Berkeley. UA occupies an L-shaped lot (around the Donough Arms building) of which the Shattuck Ave. frontage is the smaller part & is devoted entirely to grand entrance & lobby. Auditorium building faces Bancroft Way, a massive irregularly shaped concrete block (now holds 4 screening rooms) with service entrances & little else. Facade is a stepped pyramid or widened obelisk, painted beige, with WPA-style sculpture representing Artistry United. Series of 3 lobbies--outside atrium with 4-sided dome, tiled walls & pavement; tall front lobby with mirrors & Deco floral designs in red & gold; inner lobby rambles on in more intimate style under the mezzanine. Streamlined stair & mezzanine railings; frosted glass & metal light fixtures; tropical & classical mural paintings & medallions; 1930s drinking fountains, phone booth, washroom furniture, heating fixtures. Original 25'-deep stage closed off, lounge & smoking room remodeled, 1940s bare-bulb marquee removed, in change from 1 to 4 theaters, 1970-1976.

7. Locational sketch map (draw and label site and surrounding streets, roads, and prominent landmarks):

SIGNIFICANCE

20. Briefly state historical and/or architectural importance (include dates, events, and persons associated with the site when known):
Built 1932 as a local depression employment & amusement measure: reports on the work in progress dwelt on the amount to be spent ($300,000), the number of jobs, & how many of the 200 workers were to come from Berkeley. Many delays and changes of plans, to which we partly owe its advanced glass Deco style: early reports planned a "free adaptation of Spanish Renaissance", in other words the Moorish style of the 1920s, like the nearby Fox-California as rebuilt 1929-30. U.A. went ahead after "extensive survey...convinced them that Berkeley was in a position to suppor a high class theater of the size contemplated." Plans at one time called for the Bancroft Way frontage--sheer concrete wall with just the least ridged pattern--to be decorated, but money was apparently not available. Stage, orchestra pit, & dressing rooms; space was provided for a large theater organ in the future. By the time the theater opened, management had been transferred to Fox-West Coast, which also operated the nearby UC and California theaters.

Though some splendor has been lost in creating the 4 auditoriums, moving the box office inside (after a cashier was shot in a holdup), & removing the bare-bulb marquee & vertical neon sign (to highlight the murals, & complement similar purification at the library), this is a glorious preserved Art Deco theater, comparable on a smaller scale to the Oakland Paramount. It has not been through the Paramount's spectacular peril & resurrection, but has operated continuously for 45 years as a small-town movie theater. Hard times for movies in 1960-70s probably helped keep i intact--while the building was out of fashion there was neither money nor interest to remodel it

21. Main theme of the historic resource: (Check only one): a. Architecture 1 b. Arts & Leisure 2 now nostalgia fad provides desire, & 4 auditoriums the means, to preserv it.
c. Economic/Industrial ☐ d. Exploration/Settlement ☐ e. Government ☐ f. Military ☐
g. Religion ☐ h. Social/Education ☐

B10. Significance: Betty Marvin of Berkeley Architectural Heritage Survey previously inventoried and evaluated the United Artists Theater building in 1978 on the attached Historic Resources Inventory form. That survey found that this property appeared eligible for listing in the National Register of Historic Places (NRHP status code 3) for its association within Berkeley's arts and leisure historic context and for its Art Deco architecture. Subsequently, the property appears to be eligible for listing in the California Register of Historic Resources and appears to be a historical resource for the purposes of CEQA.

***P3a Description**: (Describe resource and its major elements. Include design, materials, condition, alterations, size, setting, and boundaries)

Although the base of the front façade has been altered over time, the United Artists Theater Building at 2274 Shattuck Ave. features a distinctive 1930s Art Deco upper façade on Shattuck Avenue and an original formed-concrete theater shell on Bancroft Way. The theater is a Contributor to the Shattuck Avenue Downtown Historic District. The proportions and materials of the dynamic façade design continue today to serve as a clear example of an early twentieth-century commercial/theater building in the downtown core.

The United Artists Theater is part of a setting of mostly historic buildings along the primary commercial corridor along Shattuck Avenue and the transit center that connects the city with the University of California campus.

(Continued from previous page)

The stepped upper front façade is notable for its Art Deco style frescos and bas relief. "Artistry" and "Unity" are featured on each side of the tower, with stylized imagery of leaves and globes, gears and levers, musical instruments, and male and female forms. The tall center of the upper façade once supported a blade sign; there have been two designs, both mounted during the period of the original projecting Art Deco marquee. The tower has curving patterns similar to plumes. The sides of the tower are accentuated with scrolls and half-arches. The base of the building includes outer piers clad in marble and a remodeled recessed entrance. An original tile floor is evident at the south side of the entrance area. The current marquee is a recent installation, flat to the building. Previous documentation indicated that the interiors were also Art Deco from the 1930s.

The building lobby leads to a large theater area with a more utilitarian exterior design. The mostly unpainted fly of the original theater abuts the sidewalk along Bancroft Way. This imposing, rectangular structure is built of cast concrete with vertical fluted speed stripes and board-formed horizontal texture. Its height is equivalent to five or six stories tall. At the east corner is a one-story exiting wing. At the west corner is a two-story wing with a driveway/service entrance.

This building serves pedestrian traffic that flows from the primary commercial strip along Shattuck Avenue to the related downtown urban uses and the University Campus nearby. The large, irregular, L-shaped parcel is approximately 36 feet wide at Shattuck Avenue and wraps around the corner building to have a wall on Bancroft. The footprint of the building covers almost the entire property, with some setbacks for egress.

Character-defining features include: stepped-parapet front wall; concrete wall structure and board-formed concrete rear wing with its vertical speed stripes; recessed entrance form; wall frescos and bas relief; tower plume, arch, and scroll patterns; original tile floor. Alterations include the recent current marquee and the loss of the blade sign.

The historic elements of the building appear in fair condition.

Lobby entry, viewed facing northwest.

(Discuss importance in terms of historical or architectural context as defined by theme, period, and geographic scope. Also address integrity.)

The United Artists Theater building at 2274 Shattuck Ave. is a local historic resource that has been found eligible for the National Register of Historic Places. The building's significance is based on its distinctive architecture and its role in Downtown Berkeley as an entertainment venue. The evaluation for significance was prepared by Cindy Toffelmier of JRP Historical Consulting for the East Bay Bus Rapid Transit Project, and on March 15, 2006, OHP listed the property on the California Register of Historical Resources.

The theatre was constructed in 1931-32, and opened on September 16, 1932. Known as United Artists Berkeley 7, the multi-screen theater was originally designed as a single-auditorium theater, by Walker & Eisen, Architects, together with Clifford A. Balch. Although facing Shattuck Avenue with a modest lobby, the theater has a large auditorium structure that imposes over Bancroft Avenue with its stagehouse. Costing $300,000 by the time of opening in late 1932, it was considered a large project during the early years of the 1930s Depression.

(Continued from previous page)

The United Artists Theatre opened with 1,800 seats, and was extensively publicized in local newspapers, an important civic event in a hard hit Depression-era city. Notable entertainers such as Bing Crosby attended the opening ceremonies.

United Artists (UA) had been founded in 1919 by movie stars Mary Pickford, Charlie Chaplin, Douglas Fairbanks, and D.W. Griffith to make films and, as was common during this time, show them in their own corporate-owned theaters. Today, the company operates under the name United Artists Media Group (UAMG). The Berkeley UA Theater was an early link in the United Artists theater chain and considered luxurious for the time. The Berkeley Theater was similar in design to a number of Southern California UA theaters that were also the work of Clifford Balch working with Walker & Eisen.

Clifford A. Balch was an architect whose work is primarily found in Southern California. Born in Minnesota in 1880, the son of a carpenter, the Balch family relocated to Pasadena in the early 1890s. He was a partner in the firm of Balch and Stanbery, Architects and Engineer. His partnership with Floyd Edgar Stanbery specialized in movie theatres in the 1920s, but dissolved by the early 1930s.

Balch also designed theatres for Fox West Coast Theatres as well as United Artists throughout California throughout the 1930s and early 1940s, producing over 20 classic Art Deco style movie theatres across California and Nevada. He also worked on Berkeley's renovation of the T&D at this time for Fox West Coast.

The architectural partnership of Walker & Eisen was formed by architects Albert R. Walker and Percy A. Eisen, in Los Angeles, California. The work of the firm spans many building types beyond theaters, including The Hotel Normandie, the Platt Building, and the Beverley Wilshire Hotel, all in Southern California.

Balch and the Walter & Eisen individually designed many other California theaters in addition to working as a team on Berkeley's United Artists Theater. The Berkeley theater was a standard United Artists style house for the period with deco panels on the front were labeled "Unity" and "Artistry."

Integrity
The United Artists Theater retains some of its overall historic architectural integrity in the context of the potential historic district. It has integrity of location and setting in Downtown Berkeley; integrity of its Art Deco design at the upper floor and the massive side wall; integrity of only some materials including the upper stucco design and the entire Bancroft Way massing; however, the marquee, sign, and ground floor have been altered in relatively recent times. The strength of the second-floor façade design continues to convey visual associations with Berkeley commercial/theater design in the early twentieth century. The building is readily identifiable as an historic building within the greater downtown core.

Prior Surveys
The property was surveyed in 1978, and found eligible for the National Register by the State Historic Preservation Officer. The building was reevaluated by Cindy Toffelmier of JRP Historical Consulting for the East Bay Bus Rapid Transit Project, and was determined eligible for the National Register through a consensus in the Section 106 process, and on March 15, 2006, OHP listed the property on the California Register of Historical Resources.

Evaluation
The building is historically significant due to its association with important patterns of development in the downtown core, and for its distinctive Art Deco architecture.

(Continued from previous page)

The property remains an important contributor to the establishment of a historic district in the greater Shattuck Avenue area. The building continues to represent, at the street, commercial forms and materials that were prominent in the downtown during the period of historical significance for this building; from 1932-1958. The form and detailing of both the building and its original commercial storefronts maintain an important link to the past of downtown Berkeley.

Project Impacts Analysis

P.O. Box 70415, Richmond, CA. 94807 • (415) 745-1906 • caitlin@leftcoastarchitecturalhistory.com

Memorandum

Date:	1 March 2024
Author:	Caitlin Hibma, Principal/Architectural Historian Left Coast Architectural History
Re:	2274 Shattuck Avenue Project Impacts Analysis

Introduction

The following Project Impacts Analysis was undertaken by Left Coast Architectural History and pertains to the property at 2274 Shattuck Avenue (APN: 57-2028-3) in Berkeley, California, which historically operated as a single-screen movie theater under the United Artists marquee. It is commonly referred to as the United Artists Theater. Most recently it operated as Regal Cinemas, which vacated the property in early 2023.

Methodology

Left Coast Architectural History was the author of the Historic Resource Evaluation of the property that was completed in December 2023. Multiple site visits, historical documentation, and evaluative analysis related to that undertaking contributes to the analysis undertaken in this subsequent Project Impacts Analysis.

The analysis contained herein applies the guidelines for evaluation that pertain to the subject property; namely, the Secretary of the Interior's Standards for Rehabilitation (Standards).[1] This analysis also examines the City of Berkeley Municipal Code Landmarks Preservation Commission's permit application review standards and criteria (Landmarks Preservation Ordinance; LPO),[2] and the Berkeley Downtown Design Guidelines (Downtown Design Guidelines),[3] although neither the LPO nor the Downtown Design Guidelines are applicable to the proposed project, because the subject property is proposed for redevelopment pursuant to SB 330. Per the findings of the Landmark Preservation Commission the Landmark designation for this property will only apply if the SB 330 project application lapses. In addition, the Downtown Design Guidelines are comprised of subjective standards and policies, while under SB 330 the City is limited to focusing on the project's compliance with objective standards. To ensure a comprehensive review for purposes of CEQA, however; this memorandum

1 National Park Service, *The Secretary of the Interior's Standards for the Treatment of Historic Properties with Guidelines for Preserving, Rehabilitating, Restoring, & Reconstructing Historic Buildings,* (1995 rev. 2017); https://www.nps.gov/orgs/1739/upload/treatment-guidelines-2017-part1-preservation-rehabilitation.pdf
2 Berkeley Municipal Code § 3.24.260
3 Berkeley Downtown Design Guidelines (2012); https://berkeleyca.gov/sites/default/files/2022-02/Downtown-Berkeley-%20Design-Guidelines-2012.pdf

incorporates analysis of the LPO and the Downtown Design Guidelines.

Proposed project drawings titled "2274 Shattuck" authored by Trachtenberg Architects, 10 November 2023, as well as accompanying architectural renderings, were used as the basis for analysis.

Summary of Findings

The following analysis finds that the proposed project at 2274 Shattuck Avenue complies with the Secretary of the Interior's Standards for Rehabilitation, City of Berkeley Municipal Code chapter 3.24.260, and the Downtown Berkeley Design Guidelines. Consequently, the proposed project would not constitute an impact to a historic resource per the California Environmental Quality Act (CEQA).

Background

Previous Documentation & Evaluation

Historic Resources Inventory (HRI) documentation, completed in 1978, determined that the property was eligible for the National Register of Historic Places. This documentation was not performed to current standards of evaluation; omitting analysis of significance and integrity.

In 2004-2005, documentation of the property for the AC Transit East Bay Bus Rapid Transit Project (BRT Project) was undertaken and produced a California Department of Parks & Recreation (DPR) 523 Update Form, which referenced and appended the 1978 HRI documentation. No independent evaluation or analysis was performed. Nevertheless, as a result of the BRT Project study, the California Office of Historic Preservation formally designated the property to the California Register of Historical Resources by a consensus through the Section 106 process, based on the National Register finding that was made by the 1978 evaluation and reiterated by the 2004-2005 documentation.

In 2015, the property was documented as part of the Shattuck Avenue Commercial Corridor Historic Context and Survey. That study performed a summary, non-itemized evaluation according to National and California Register significance and the seven aspects of integrity. It relied heavily on the conclusions of earlier analyses and focused primarily on the property's significance to a potential Shattuck Avenue Downtown Historic District. It did not perform any detailed or itemized analysis in regard to the theater's significance or integrity in relation to a potential district, however; and never formally determined eligibility for, nor designated, a historic district in the area.

In December 2023, a Historic Resource Evaluation was undertaken to verify and synthesize all past documentation and evaluation efforts, while providing independent analysis using up-to-date standards that thoroughly considered significance at all levels, including City of Berkeley Landmark and Structure of Merit (criteria not previously implemented) and integrity. The Historic Resource Evaluation found that the property did not qualify as a resource at any level, primarily due to loss of integrity.

A Demolition Referral (pertaining to the proposed project addressed herein) and a community-prepared Landmark Nomination for the property were considered by the City of Berkeley Landmarks Preservation Commission in February 2024. The Commission decided that the property qualified for local Landmarking, although only the upper Shattuck Avenue facade, above the existing, non-historic, reader board marquee, was deemed significant and character defining. The Commission Staff Report further noted that the site is subject to an SB 330 application, and that the Landmark designation will only apply if the proposed SB 330 application were to lapse. Therefore, the SB 330 redevelopment application will not be subject to further review by the Landmarks Preservation Commission. For purposes of CEQA, however; the Landmark designation and

applicable provisions of the LPO are evaluated herein as the site is deemed a potential or eligible historic resource under the LPO.

Current Historical Status

The property is listed in the California Register of Historical Resources and is identified as a contributor to the potential Shattuck Avenue Downtown Historic District. The site was also recently designated as a City of Berkeley Landmark, with the upper Shattuck Avenue facade identified as the area containing significant features to be preserved. As explained above, however; the proposed project will not be subject to the permit review provisions in the Berkeley LPO. Subsequently, the property qualifies as a mandatory historical resource under the California Register of Historic Resources, and a discretionary or proposed historic resource under the LPO for purposes of CEQA.

Character Defining Features

The February 2024 Landmark designation of 2274 Shattuck Avenue identifies the upper Shattuck Avenue facade, above the existing, non-historic, reader board marquee, as the only significant and character defining element of the property. The character defining features of the upper Shattuck Avenue facade are:

- Approximately three story height
- Smooth plaster finish
- Vertically-oriented wall panels that graduate upward toward the center and have chamfered edges
- Bas relief surface ornamentation that includes half-arch, fountain, and other geometric motifs
- Human figures in bas relief and the inscribed words “Artistry” and “Unity”

Proposed Project

Project Setting

The project is located at 2274 Shattuck Avenue, a 22,112 square-foot (0.51-acre) site near the northwest corner of Shattuck Avenue and Bancroft Way, on a highly urbanized block in Downtown Berkeley. The site has discontiguous frontage on Shattuck Avenue and Bancroft Way; the frontages are separated by an intervening parcel and unrelated building at the street corner.

The site is developed with a single building that completely fills the parcel. The building has an L-shaped plan and is approximately two to four stories high with flat and bow-truss roof forms. The L-shaped plan consists of a two-story east-west ell that fronts on Shattuck Avenue, and a three to four story north-south ell that fronts on Bancroft Way. A separate, unrelated building is located within the interior angle of the L-shaped plan. A demising wall separates the two-story atrium and lobby portions of the east-west ell, which is separated from the north-south ell by a demising wall and a change in height from two to three stories. The majority of the north-south ell is three-stories and the generally rectangular footprint of the ell narrows toward the south end, where it rises to four stories at the extreme southern end to accommodate the theater's fly loft.

The primary facade faces Shattuck Avenue (east), without setback from the sidewalk. Its mass is two stories high, with parapet ornamentation that rises to approximately three stories. The margins of the first story are clad with non-original, large-dimension, marble tile that incorporates inset non-original poster display cases. The majority of the first story is spanned and enclosed by a non-original extruded aluminum frame storefront assembly that includes glazed entry doors on either side and an integral ticket window at the center. Above the first story is a non-original illuminated reader board marquee that is flat and projects minimally from the face of

the building. The upper primary facade is the only portion of the original facade to remain intact and features a spire-like element at the center that is made up of flat vertically-oriented panels that step upward toward the center. The panels have chamfered edges and feature low bas relief sculptural ornamentation depicting half-arch, fountain, and other geometric motifs, as well as human figures and the words “Artistry” and “Unity.” The upper facade is clad with smooth painted stucco that is in deteriorated condition.

The Bancroft Way facade (south) is physically and visually separate from the Shattuck Way facade, as it faces a different direction and street frontage, making the theater's Shattuck Avenue and Bancroft Way frontages appear unrelated. The Bancroft Way facade consists of a monolithic, flat, four-story plane of unfinished board form concrete. The concrete is adorned only with vertical bands of incised lines, which terminate in subtle chevron forms at the roofline. Between the vertical bands, the roofline is very slightly corbelled. There is a low projecting bay with a service entrance approached by concrete steps on the left side of the facade. On the right side, is another projecting bay with a chain link-gated service entrance. Two metal pedestrian doors are located on the left side of the main portion of the facade, which is otherwise completely unfenestrated.

Major spaces of the interior consist of a once-open, now-enclosed atrium, entry vestibule, and double-height lobby within the east-west ell. The north-south ell contains two stories of auditorium space, as well as former lounge rooms, and backstage/fly loft space. The auditorium space was once a large single-screen theater, but now consists of four small auditoriums (two over two) and a “void space” (unused space at upper front of original auditorium space, forward of the mezzanine). The two lounges and backstage space have also been converted into small auditoriums. In most spaces original finishes and decorative elements have been removed or painted over.

Proposed Project Description

The proposed project will convert the existing theater building to primarily residential use with a secondary commercial use. The L-shaped layout of the site will facilitate the ability of the proposed project to embody two distinct uses in two distinct building volumes. The existing two story east-west ell fronting on Shattuck Avenue will be retained and rehabilitated to host a commercial use (ie: a café) and physically retain features and finishes that reference the building's historic use as a theater. The three to four story north-south ell that fronts on Bancroft Way and originally contained auditorium space will be replaced with a 17-story tower that will house 227 residential units.

The existing Shattuck Avenue façade and the theater's interior atrium, lobby, and foyer will be retained. The upper façade will be preserved and restored, with only stucco repair and repainting anticipated, thus enhancing the visual effects of the facade's original Art Deco bas reliefs and decorative elements. Non-original cladding materials and components, like the entry assembly, on the lower facade will be removed. They will be replaced with new smooth stucco cladding and a metal sash entry assembly that matches fenestration on the proposed residential tower. The non-original reader board marquee will be removed, allowing the entry assembly to be slightly taller than the existing, accommodating a glazed clerestory at the top. The width of the entry opening will remain the same. New signage will be installed vertically on the upper facade, although it will consist of surface-mounted letter signage. A flat projecting canopy will be located above the entry assembly. Some secondary signage, matching that on the upper facade, will be integrated into the entry assembly. Projecting marquees and blade signs will not be used.

The interior of the two-story east-west ell will be rehabilitated to accommodate ground floor commercial space, proposed for use as a café, with emphasis on public pedestrian access from the street. Beyond the café (ie: to its west), will be a residential lobby containing a leasing office and resident amenities. At the juncture of the east-west ell and the residential tower will be an open-air courtyard that partially separates the retained east-west ell from the new residential tower. The ground level of the tower will include indoor and outdoor bicycle parking.

The residential tower will require demolition of the theater's auditorium volume (north-south ell), which was originally a single-screen space, but was subdivided into a multi-plex over time and included the conversion of adjacent spaces, such as lounge rooms, into additional auditoriums. The proposed residential tower will be sited approximately 122 feet west of Shattuck Avenue, resulting in massing that is set back from the commercial corridor. The residential units will be diverse in size, consisting of 32 studios, 49 two-bedrooms, 80 three-bedrooms, and 66 four-bedrooms. At 17 stories, the residential tower will be approximately 183 feet high.

An entrance to the residential tower will be located on Bancroft Way, to the right of center, and will consist of a metal sash entry assembly and related asymmetrically arranged metal sash fenestration. The first story will be clad with stucco and a service entrance will be located on the left side. All facades of the tower above will have vertical emphasis created by flat vertical panels of smooth stucco in varying widths that rise from the second to 16th floors. Vertical bands of windows, also of varying width, will be located in between. Windows will be separated at each floor level by metal spandrel panels and will have aluminum sashes in single and triple configurations. The 17th floor will have a continuous band of fenestration in a regular unvaried pattern. The pattern will be echoed by a glazed parapet railing that surrounds a roof top deck. Penthouse massing will be set back deeply from the edges of the roof and will be clad with stucco and have aluminum sash fenestration. Horizontally projecting flat metal fins will span the facades, creating subtle horizontal demarcation at the top of the first (where applicable), fifth, and 16th stories.

The project is comprised, in total, of 214,082 square feet of gross building floor area for the residential and commercial uses, 90 bicycle parking spaces, and 7,737 square feet of open space consisting of 5,840 square feet of rooftop terrace and 1,657 square feet of ground level landscaping and garden areas.

Project Impacts Analysis

CEQA Guidelines § 15064.5 and the Secretary of the Interior's Standards for Rehabilitation

Because the subject property qualifies as a historical resource under CEQA, a Project Impact Analysis must be performed which evaluates the potential impacts of the proposed project on the resource pursuant to Section 15064.5(b) of the CEQA Guidelines. Under section 15064.5(b), a project may cause a significant impact on a historical resource if physical demolition, destruction, relocation, or alteration of the resource or its immediate surroundings would result in the significance of an historical resource being materially impaired.

A historical resource is materially impaired when a project (a) demolishes or materially alters in an adverse manner the physical characteristics of an historical resource that convey its historical significance and that justify its inclusion in, or eligibility for, inclusion in the California Register of Historical Resources; (b) demolishes or materially alters in an adverse manner those physical characteristics that account for its inclusion in a local register of historical resources or its identification in an historical resources survey; or (c) demolishes or materially alters in an adverse manner those physical characteristics of a historical resource that convey its historical significance and that justify its eligibility for inclusion in the California Register of Historical Resources.

Here, the project does not demolish any of the physical characteristics of the site that convey its historical significance, that justify its inclusion in the California Register of Historical Resources, that account for its inclusion in the City of Berkeley's local register under the LPO, or any other features that would justify the site's eligibility for inclusion in the California Register, particularly if the site was evaluated in its current condition. As noted in the Historic Resources Evaluation, the site is deemed to have lost its historic integrity due to a series of renovations to the exterior over the past 90 years and the subdivision of the interior space into seven smaller auditoriums. In addition, the project will not have a significant adverse effect on the physical characteristics that account for the site's inclusion as a local Landmark by the City of Berkeley, as the upper Shattuck Avenue

façade, which is identified as the feature to be preserved, will not be adversely impacted. The proposed project will renovate the upper façade to enhance the bas relief sculptural elements and other remaining original features while removing the marquee and other alterations that were installed more recently.

Under CEQA Guidelines section 15064.5, the Secretary of the Interior's Standards (Standards) (Code of Federal Regulations, Title 36, Chapter 1, Part 68.3 (b)) may also be relied upon to affirmatively show that the proposed propject will not cause a significant adverse impact to the historic resource (herein, the upper Shattuck Avenue facade).

The Standards prescribe four sets of treatment approaches, including Preservation, Rehabilitation, Restoration, and Reconstruction. The Standards for Rehabilitation are used herein, because "Rehabilitation is defined as the act or process of making possible a compatible use for a property through repair, alterations, and additions while preserving those portions or features which convey its historical, cultural, or architectural values" and is most applicable to the approach and goals of the proposed project.

Standards Analysis

Standard 1. A property will be used as it was historically or be given a new use that requires minimal change to its distinctive materials, features, spaces and spatial relationships.

The property originally had a commercial use and historically functioned as a single-screen movie theater, later subdivided into a multiplex. The proposed project will maintain a commercial use in the front portion (east-west ell, fronting on Shattuck Avenue) of the building, while replacing the rear portion (north-south ell, fronting on Bancroft Way) with a residential tower. The building will no longer function as a theater, but will partially maintain a commercial use. In regard to the significant upper Shattuck Avenue facade, it will be repaired and rehabilitated. Some subtle and compatible signage will be added so that it may function as it did historically, as a distinctive and eye-catching architectural element indirectly advertising the building's presence and use.

Based on the above, the proposed project will comply with Standard 1.

Standard 2. The historic character of a property will be retained and preserved. The removal of distinctive materials or alteration of features, spaces and spatial relationships that characterize a property will be avoided.

The historic character of the significant upper Shattuck Avenue facade will be retained and preserved, as it will be rehabilitated through repair, repainting, and the addition of neutral and compatible modern signage. None of the distinctive materials, such as the smooth plaster finish, or features, such as the vertical chamfered panels and bas relief sculptural ornamentation, will be removed. The new signage will be oriented vertically at the center of the facade in a location where blade signs have historically been mounted; thus, retaining that reference and relationship of signage to facade features. The height and graduated spire-like form of the upper facade will remain unchanged, so its profile on the block face, as well as its visual relationship to nearby buildings and streetscape will remain the same.

Therefore, the proposed project will comply with Standard 2.

Standard 3. Each property will be recognized as a physical record of its time, place and use. Changes that create a false sense of historical development, such as adding conjectural features or elements from other historic properties, will not be undertaken.

The proposed alterations to the property will not attempt to add conjectural features or elements that would create a false sense of historical development. The upper Shattuck Avenue facade will be retained and

rehabilitated. Only repairs and replacement in-kind will be made to the existing sculptural elements and finishes, and no new conjectural or interpretive elements will be added. Although the upper facade originally featured a vertical illuminated blade sign at the center, it was removed, replaced multiple times in multiple iterations, and there is no longer any blade sign present. The proposed project will not attempt to replace or otherwise replicate a blade sign element. Flat, metal signage of simple modern individual lettering will be added to the upper facade – oriented vertically, at the center, in the general location of the former blade signs – but it will be readily interpreted as non-historic signage and will not attempt to mimic or borrow any historically-referential visual qualities.

Therefore, the project complies with Standard 3.

Standard 4. Changes to a property that have acquired historic significance in their own right will be retained and preserved.

The upper Shattuck Avenue facade retains its original appearance and has not undergone any substantial alteration. Original architectural forms and bas relief sculptural elements, which are significant, will be preserved. The original blade sign was removed and various iterations of blade signage were added and removed over the years. None of the signs appear to have had significance in their own right and none remain to be preserved. Changes in paint colors are cosmetic and the current deteriorating paint dates to some time after 1980, so is not historically significant. Nevertheless, the upper facade will be returned to an earlier paint scheme (based on historical photographs).

Therefore, the project complies with Standard 4.

Standard 5. Distinctive materials, features, finishes and construction techniques or examples of craftsmanship that characterize a property will be preserved.

The distinctive aspects of the upper Shattuck Avenue facade, including its smooth stucco cladding, spire-like form made up of graduated wall panels, and bas relief surface ornamentation, will be preserved and rehabilitated through repair and repainting. New signage will be oriented vertically at the center of the facade in a location where blade signs have historically been mounted; thus, preserving that reference and relationship of signage to facade features.

Therefore, the project complies with Standard 5.

Standard 6. Deteriorated historic features will be repaired rather than replaced. Where the severity of deterioration requires replacement of a distinctive feature, the new feature will match the old in design, color, texture and, where possible, materials. Replacement of missing features will be substantiated by documentary and physical evidence.

The significant upper Shattuck Avenue facade will be repaired and rehabilitated. It currently exhibits damaged and deteriorated stucco and paint finishes. Although the upper facade incorporates bas relief sculptural elements, these do not appear to be so badly damaged as to need more repair than minor stucco patching and new paint. New paint colors are proposed to be light and subtle in tone like those found on the building historically and throughout much of its history, based on photographic evidence (the current bold paint scheme dates to some time after 1980). All original elements of the sculpted upper facade remain intact to the extent that no missing features will need to be recreated. Although the upper facade originally featured an illuminated blade sign, it was removed, replaced multiple times in multiple iterations, and ultimately removed altogether. The proposed project will not attempt to replace or otherwise replicate a blade sign element.

Therefore, the proposed project complies with Standard 6.

Standard 7. Chemical or physical treatments, if appropriate, will be undertaken using the gentlest means possible. Treatments that cause damage to historic materials will not be used.

The use of chemical or physical treatments may be necessary to remove deteriorated paint on the upper facade, and clean and prepare the wall surface for new finishes. If such treatments are required, the gentlest means possible will be used following the Secretary of the Interior's Guidelines for Rehabilitation applicable to the recommended cleaning and maintenance treatments for exterior stucco.

Therefore, the project complies with Standard 7.

Standard 8. Archaeological resources will be protected and preserved in place. If such resources must be disturbed, mitigation measures will be undertaken.

There are no known archaeological resources at the subject property. In the event that demolition and/or construction activities uncover any archaeological resources in the course of work, all work will be halted and appropriate mitigation measures will be taken.

Therefore, the project complies with Standard 8.

Standard 9. New additions, exterior alterations or related new construction will not destroy historic materials, features and spatial relationships that characterize the property. The new work will be differentiated from the old and will be compatible with the historic materials, features, size, scale and proportion, and massing to protect the integrity of the property and its environment.

Additions/alterations/new construction adjacent and related to the upper Shattuck Avenue facade consist of alterations to the lower Shattuck Avenue facade and construction of the proposed residential tower to the east (separated from the Shattuck Avenue facade by approximately 122 feet). Neither of these areas of work will harm the upper Shattuck Avenue facade, which will be preserved and rehabilitated.

Work at the lower facade will remove non-historic and incompatible materials and features and institute new materials and features that are neutral and compatible with the elements of the upper facade. A similar smooth stucco wall finish will be used, but it will not bear any of the decorative bas relief ornamentation of the upper facade. It will use simple, clean lines and flat surfaces that differentiate it from historic ornament and finishes. A metal sash entry assembly will be inserted in the street-level entry opening with a flat projecting canopy above, which will compliment the geometry of the Art Deco style of the upper facade, but easily read as modern Contemporary style components.

Likewise, the new residential tower will also use compatible materials like smooth stucco, metal panel, and metal sash. It will have vertical emphasis in the form of nearly full-height vertical bands of stucco panel, alternating with vertical bands of fenestration and metal panels, that echo the vertical forms of the upper Shattuck Avenue facade. It will not bear any of the decorative bas relief elements of the upper Shattuck Avenue facade, however; and will use simple, clean lines and flat surfaces that differentiate it from historic ornament and finishes. In terms of size, scale, proportion and massing, the tower will be taller than the Shattuck Avenue facade, but will loosely reference original and existing conditions in which the north-south ell is markedly taller than the east-west ell. The fact that the new tower will be deeply set back from the Shattuck Avenue frontage and be separated to some extent by an intervening building mass (an unrelated building on a separate parcel) means that its difference in height will have a less dramatic contrast. It will essentially read as a separate building, located to the west and fronting on Bancroft Way, thus preserving the integrity and visual independence of the

east-west portion of the building and the significant upper Shattuck Avenue facade.

As the proposed work will retain and rehabilitate the upper Shattuck Avenue facade, it will preserve a distinctive visual element of the streetscape. The form of the facade (including the lower portion) will not change, and the setback and height will remain the same; therefore, its spatial relationships with neighboring buildings will be preserved. Documentation for the surrounding Shattuck Avenue Commercial Corridor District notes that street-level storefront alterations are common in contributing properties; a conditions that is exhibited in the Shattuck Avenue facade. The proposed project will supplant previous alterations at the lower facade with new materials and features that are neutral and compatible, while the intact upper facade will remain readable and contributory to the streetscape. Proportion and rhythm of wall to window at the lower facade will remain the same. Cladding materials will be consistent with the upper facade and feature no conflicting decorative details. Scale and materials of the new metal sash entry assembly will maintain an appropriate scale and palette and could theoretically be removed. Thus, by preserving the upper facade and instituting a neutral and compatible lower facade, the proposed project will be compatible with the historical, architectural, and aesthetic interest of the surrounding environment.

Therefore, the project complies with Standard 9.

Standard 10. New additions and adjacent or related new construction will be undertaken in such a manner that, if removed in the future, the essential form and integrity of the historic property and its environment would be unimpaired.

Additions/alterations/new construction adjacent and related to the upper Shattuck Avenue facade consist of alterations to the lower Shattuck Avenue facade and construction of the proposed residential tower to the east (separated from the Shattuck Avenue facade by approximately 122 feet).

The lower Shattuck Avenue facade has been altered previously and could be altered again without impairing the upper Shattuck Avenue facade. The proposed changes to the lower facade will not make any substantial structural changes to the facade, so the concept of removal or reversal of the proposed work would only entail alteration or replacement of finishes and elements like the entry assembly and canopy. This would not adversely affect the form and integrity of the upper facade.

If the proposed residential tower were to be demolished in the future, the east-west ell (to an approximate 122-foot depth) and Shattuck Avenue facade could easily be preserved, with the form and integrity of the upper Shattuck Avenue facade remaining completely intact; its form and integrity unimpaired. With the tower gone, the surrounding environment would essentially be unimpaired, even returned to its current state.

Therefore, the project complies with Standard 10.

Analysis of City of Berkeley Municipal Code Compliance

The City of Berkeley Municipal Code, Chapter 3.24.260, provides standards and criteria intended to guide the Landmark Preservation Commission's review of “permit applications for work on a landmark site, in an historic district or on a structure of merit site.” Item C.1. prescribes three criteria (two of which are applicable to the subject property) “for permit applications for construction, alteration, or repair.” While these provisions do not apply to the proposed project, they are informative for purposes of evaluating the project's potential impact on the proposed Landmark designation and the site's location in a proposed historic district:

(a) For applications relating to landmark sites, the proposed work shall not adversely affect the exterior architectural features of the landmark and, where specified in the designation for a publicly owned landmark, its

major interior architectural features; nor shall the proposed work adversely affect the special character or special historical, architectural or aesthetic interest or value of the landmark and its site, as viewed both in themselves and in their setting.

The upper Shattuck Avenue facade is identified as the only significant and character defining element of the Landmark. The proposed project will rehabilitate the upper facade by repairing stucco finish as necessary and repainting it. Flat, metal, letter signage will be added at the center of the upper facade. None of this work will adversely affect the upper Shattuck Avenue facade or the features that define its character. Additionally, the paint and signage are cosmetic and reversible. The property is not publicly owned, therefore its interior architectural features are not subject to review. Within its setting, the upper Shattuck Avenue facade will remain a distinctive architectural element that continues to exhibit Art Deco styling and ornamentation, which is in keeping with its current condition, both in relation to itself and surrounding properties.

(b) For applications relating to property in historic districts, the proposed work shall not adversely affect the exterior architectural features of the subject property or the relationship and congruity between the subject structure or feature and its neighboring structures and surroundings, including facade, setback and height; nor shall the proposed work adversely affect the special character or special historical, architectural or aesthetic interest or value of the district. The proposed work shall also conform to such further standards as may be embodied in the designation of the historic district.

The proposed work will retain and rehabilitate the upper Shattuck Avenue facade, preserving it as a distinctive visual element of the streetscape. The form of the facade (including the lower portion) will not change, and the setback and height will remain the same; therefore, its spatial relationships with neighboring buildings will be preserved. By preserving the upper facade and instituting a neutral and compatible lower facade, the proposed project will preserve the historical, architectural, and aesthetic interest of the proposed Shattuck Avenue Commercial Corridor district.

Documentation for the district provides no specific standards of its own, but does state that:

> Often in a commercial historic district, there is a strong visual presence of historic materials and design at the upper façades, and major alterations at the ground floor storefronts. The ground floor alterations can cause a building to lose its ability to convey its history on its own. However, if the tenant improvements are framed by the historic fabric, and the historic design of the upper facades remains readable, the altered building façade might retain adequate integrity to bridge the streetscape in the larger context.
>
> Critical elements that convey the continuity of historic design include the proportion of walls to windows, the rhythm and placement of windows within the larger configuration, the wall materials, the detailing of cornices, trim, and other decoration. If the scale and materials of the ground-floor storefronts maintain the scale and palette of the overall historic composition, or are easily reversible, the building can be considered to have adequate integrity to serve as a contributor to a district.

The subject property exhibits the described retention of integrity at the upper facade with alteration at the lower facade. The proposed project will supplant previous alterations at the lower facade with new materials and features that are neutral and compatible, and are “framed by” the intact upper facade, which will remain readable and contributory to the streetscape. Proportion and rhythm of wall to window at the lower facade will remain the same. Cladding materials will be consistent with the upper facade and feature no conflicting decorative details. Scale and materials of the new metal sash entry assembly will maintain an appropriate scale and palette and could theoretically be removed. Thus, the Landmark's integrity as a contributor to the district will be retained.

Analysis of Downtown Berkeley Design Guidelines Compliance

The "Downtown Berkeley Design Guidelines" provide guidance on how to modify existing buildings and construct new ones in a manner which furthers the goals and objectives of the Downtown Area Plan, which "establishes policies to guide future physical development in the Downtown Area, and sets as a priority the preservation of historic buildings, while promoting new development that complements Downtown's traditional and human-scaled character. New development should also address today's needs, and [the] Guidelines are not intended to discourage contemporary architectural expressions so long as they are appropriately sensitive to their context."

The pertinent sections of the Downtown Design Guidelines are organized by building design features (facades, roofs, etc.) and provide recommendations specific to historic status (whether a Landmark, significant building, or simply categorized as "all buildings").

The proposed project has been submitted pursuant to SB 330 therefore the City may only consider the project's consistency with objective design standards in evaluating whether to approve or deny the project. The Downtown Design Guidelines are highly subjective and therefore do not constitute objective design standards. Nevertheless, they may be relevant for purposes of CEQA to evaluate the proposed project in relation to a Landmark property:

Facades

L1) Preserve existing original facades. Make necessary repairs in a manner which does not harm historic building materials or details.

The proposed project will preserve the existing upper Shattuck Avenue facade, repairing stucco cladding in-kind, as necessary, and repainting to rehabilitate that feature. The lower facade is not original, but will be rehabilitated to compliment the significant upper facade.

L2) Remove alterations whose design or materials are not consistent with the original design nor historically significant in their own right.

The upper Shattuck Avenue facade does not exhibit any alterations, other than the removal of the original blade sign.

L3) Restore or rebuild missing or deteriorated façade features based on historic evidence, not conjecture.

The proposed project does not intend to replace any missing features. It will undertake minor restoration of stucco and paint finishes, which will be done in-kind and based on existing conditions and photographs.

L4) When restoring the façade is not possible, new alterations should have the ability to be removed, without adversely affecting original elements, in anticipation of future restoration.

The upper Shattuck Avenue facade will be restored. The only new alteration will be the addition of flat, metal, letter signage, which will be easily removable without physical impact to the facade.

L5) New or replacement elements should be exact duplicates of the original.

The proposed project does not intend to add any new or replacement elements to the upper Shattuck Avenue facade that are intended to duplicate original elements.

Materials

L1) Retain and restore original or significant materials. Repair rather than replace materials if possible.

The upper Shattuck Avenue facade is, and was historically, clad with smooth stucco. The existing stucco will be patched, as necessary, using matching smooth stucco, and painted as it has historically been.

L2) Repair or replace materials with original or substitute materials which match the original in design, material, color, and other visual qualities, and in their physical properties of expansion, contraction, absorption of moisture, and weathering.

Any stucco repair will be done using smooth stucco that matches the historic material currently extant on the facade.

L3) New storefront materials should match the materials used on the original storefront. When this is not feasible, use new materials which match the design, detailing and quality of the original materials.

The upper Shattuck Avenue facade does not incorporate the "storefront" portion of the building. There was no storefront at street level, historically; however, a glazed entry assembly exists currently and a new assembly will be installed that uses similar metal sash and plate glass materials, but which is of a design and quality more fitting to the Art Deco aesthetics of the upper Shattuck Avenue facade.

L4) Replacement windows should match the materials used on the original frames and sashes. When this is not economically feasible, use new materials which match the design, detailing and quality of the original materials.

The upper Shattuck Avenue facade does not include any windows.

Details & Ornament

LS1) Retain original details and ornamentation. Use historic evidence to replicate missing or deteriorated details and ornamentation.

The proposed project will retain and restore all original details and ornamentation, such as the Art Deco bas relief sculpture, on the upper Shattuck Avenue facade. These elements do not appear to have any missing or deteriorated elements; however, historical photographs will be used to inform restoration, as needed.

LS2) Remove alterations which hide original detailing.

The upper Shattuck Avenue facade does not include any alterations that hide original detailing.

LS3) Remove alterations not consistent with original designs nor significant in their own right.

The upper Shattuck Avenue facade does not include any alterations that are inconsistent with the original design.

Color

L1) Restore and maintain surfaces in their original condition. If paint is to be removed, use removal methods which will not harm the historic materials.

Paint on the upper Shattuck Avenue facade is deteriorated and will be removed using gentle methods that comply with the recommended cleaning and maintenance treatments for exterior stucco provided by the Secretary of the Interior's Guidelines for Rehabilitation. The facade was originally painted and will be repainted in a historically referential color scheme.

L2) Use original colors of paints, stains, or other coloring agents if they are known

The current paint colors on the upper Shattuck Avenue facade were instated sometime after 1980. The facade will be repainted using colors found on the building historically, as evidenced by photographs.

Lighting, Security, & Equipment

LS1) Do not damage or obscure historic materials when installing lighting, security, or equipment devices.

The proposed project may include some fixtures to provide up-lighting above the new canopy over the entry assembly, down-lighting over the bas relief panels of the upper Shattuck Avenue facade, and back lighting behind the new letter signage at the center of the upper facade. The up-lighting fixtures will be attached to new fabric of the remodeled lower facade, the down-lighting fixtures will be attached to the top or back of the upper facade panels so that they do not damage the front surfaces of the sculpted panels, and the back lighting will be integrated with the new letter signage, which will be attached to the facade sensitively and in a location where numerous other signs have been mounted in the past.

Special Historic Features

1) Retain original balconies, towers, and fire escapes where they still exist, and where they add interest to and enliven the downtown environment.

The upper Shattuck Avenue facade does not include balconies, fire escapes, or the like. Its distinctive tower- or spire-like form will be retained, which is visually enlivening to the Downtown environment.

2) Consult historic photographs to identify special or historic features of the building or site. Replicate missing or deteriorated features if they would add to the character of the building and the Downtown. Replication should be based on historic evidence, not conjecture.

Numerous historic photographs of the building exist. None show special historic features that the proposed project intends to replicate.

3) Incorporate special features typically found on Landmark and Significant buildings, such as corner towers, balconies, bays and friezes. These special features should be in scale and harmony with the overall building façade, and should enliven the building as well as the architectural character of the Downtown.

The proposed project intends to preserve and rehabilitate the existing upper facade, including its distinctive tower- or spire-like form, which is visually enlivening to the character of the Downtown. No additional special features will be incorporated.

4) Special features should incorporate a level of detailing which is similar to that found on Landmark and Significant buildings.

The proposed project intends to preserve and rehabilitate the existing upper facade, including its original level of detailing and quality of workmanship.

Canopies

1) Use canopies only on ground-floor facades, and design then to fit within enframed storefronts or over main entries.

The proposed canopy will be located above the street-level entry assembly and will span the facade, being only slightly wider than the entry opening, which also spans nearly the entire width of the facade.

2) Design canopies that complement and reinforce the architectural character of buildings.

The proposed canopy is a simple flat element that projects shallowly from the facade. It is Contemporary in design, but neutral and compatible with the modernist aesthetics of the Art Deco style upper Shattuck Avenue facade.

3) Locate canopies at least 8 feet above the sidewalk, and at least 1.5 feet from the curb line.

The proposed canopy will be located about 18 feet above grade and will only project shallowly from the facade, well short of 1.5 feet from the curb line.

4) For Landmark and Significant buildings, base the design and materials of canopies on historic evidence.

The building originally had a massive, elaborate, and illuminated movie theater marquee. The replication of such a feature is impractical and would risk false historicism. Instead, the proposed canopy is minimal, neutral, and compatible with the modernist aesthetics of the building.

5) Attach canopies in a manner which does not harm historic fabric nor obscure architectural elements or details.

The proposed canopy will be attached to a section of the facade that is not original and projects horizontally from the facade, so it will not impact historic fabric nor obscure any historic features.

6) Direct canopy lighting toward the display windows or downward onto the sidewalk.

Up-lighting will be located above the canopy and directed at the upper Shattuck Avenue facade in order to illuminate the Art Deco bas relief sculptural work there. This is entirely appropriate to the upper facade's artistic qualities and its historic role as passive advertising for the original theater use, which incorporated much more flamboyant lighting schemes. Some simple recessed lighting will be located below the canopy, in the soffit of the entry opening, and will be directed down at the entry area.

Signage

1) Sign design and permit approval must be obtained prior to fabrication and installation of the sign.

Approval of signage will be obtained.

2) Signs should reflect the character of the building and its use. When the building has little or no architectural character, it is imperative that the sign design adds interest and beauty to the façade.

The subject building has strong architectural character; therefore the proposed signage will be simple, subtle, and will not conflict with the very expressive Art Deco style upper Shattuck Avenue facade.

3) Respect the immediate context of the building's location, and the historic character of Downtown.

The proposed signage will be simple, subtle, and modern in its aesthetic in an effort to compliment and not conflict with the architectural interest of the Downtown.

4) The architecture of the building often identifies specific locations for signs, and these locations should be used.

The proposed signage will be situated vertically at the center of the upper Shattuck Avenue facade, where a vertical blade sign was located originally and a variety of other vertical blade signs have been installed over the years.

5) Signs should be an integral part of the design of storefront alterations and new construction. Signs should not obscure architectural elements such as transoms or columns, nor appear cluttered.

The proposed signage on the upper Shattuck Avenue facade will not be related to the new entry assembly or other elements of the lower facade, but will be mounted where signs have been located historically. Because it will be located in an area intended for signage, it will not obscure any important architectural elements. It will consist of simple, clean-lined, modern letter signage that will not appear cluttered. Signage at the lower facade will be incorporated within the new entry assembly and will also be of simple, clean-lined, modern lettering.

6) The size of signs and sign letters should be in scale and proportional to the space in which they are located, with letters typically between 6 and 16 inches high.

The proposed letter signage on the upper Shattuck Avenue facade will be appropriately scaled to the central vertical panel of the facade on which it will be mounted. It will not exceed the width of the panel and will be much shorter than the height of the upper facade.

7) Sign letter and materials should be professionally designed and fabricated.

Proposed signage will be professionally designed, produced, and installed.

8) Primary signs should contain only the name of the business and/or its logo. Secondary text which identifies products should be located in a secondary location.

Proposed signage on the upper Shattuck Avenue facade will include a single word identifying the building, without logos or secondary text. Smaller signage identifying the address number and commercial use will be incorporated within the new entry assembly and will also not include logos or secondary text.

9) Locate signs for ground floor tenants at storefront level. Signs on the upper façade should be building identification signs only.

Proposed signage to be located on the upper Shattuck Avenue facade will identify the general name being given to the building. Address number and other signage to be incorporated into the new entry assembly will be of the same lettering style and will be minimal in their information.

10) Construct signs using high-quality materials such as metal, stone, wood, gold leaf, and exposed neon. Signs should be a matte finish so as to not cause glare. Internally lit plastic letters or signs are strongly discouraged.

Proposed signage will be of individual metal letters. The metal will not be reflective and each letter will be subtly back-lit, avoiding glare issues.

11)Firmly anchor the sign to the building in a way that does not damage the surface, and allows for easy removal to accommodate the changing tenants.

The proposed signage on the upper Shattuck Avenue facade will be professionally installed and will be anchored appropriately. It will be located in an area of the upper facade that has historically supported mounted signage and is, thus, suited to carry signage. The stucco wall surface will not be damaged by the signage and may be easily patched, as necessary. As the signage will include only the name/address/use of the building and spaces; regular/repeated replacement based on changing tenants is not anticipated.

12) Coordinate the design and alignment of signs on multiple use buildings in order to achieve a unified appearance rather than visual confusion.

The project proposes only one sign on the upper Shattuck Avenue facade. It will be of simple, Contemporary style lettering that will not conflict with the Art Deco ornamentation of the upper facade. It will match the materials and style of the address numbers and commercial use signs integrated into the the new entry assembly. The upper facade signage will be located at the center of the facade, while the lower facade signage will be positioned symmetrically at either side of the entry assembly, instilling a balanced, minimalist arrangement.

13) Retain historic signs and inscriptions, and do not remove or replant historic ghost signs. If it is necessary to remove or relocate historic signs, store them on the premises for future reuse.
There are no historic signs extant on the building, other than the "Artistry" and "Unity" inscriptions that are part of the Art Deco bas reliefs on the upper Shattuck Avenue facade. These will be retained and restored as part of the rehabilitation of the upper facade.

14) On Landmark buildings, signs should be designed and located to be consistent with the character of the building and the era in which the building was constructed.

The proposed signage on the upper Shattuck Avenue facade will be located vertically at the center, in a location that has historically supported signage. Although the proposed signage will be flat lettering, rather than an elaborate blade sign, its location and vertical orientation will reference historic conditions. The simple, Contemporary style, metal lettering will not mimic Art Deco style lettering, but will be compatible in its modernistic aesthetic.

15) Modify historic signs for new use only to the extent that the changes are compatible with the original sign. Modifications should have the ability to be re-moved without affecting original elements, in anticipation of future restoration.

The project does not propose to modify any historic signs, as none are present on the building.

16) Modify corporate logo signs to conform to these guidelines, if necessary.

The project does not propose to use any corporate logo signs.

17) Cabinet signs are strongly discouraged; if used on existing, permitted signs, illuminate only the individual lettering or symbols, not the entire sign face.

The project does not propose to use any cabinet signs.

18) Sign lighting, if any, should utilize spot-lighting, halo lighting, or exposed neon. Spot lighting should be inconspicuous or an integral design feature of the sign, and should not cause glare for pedestrians or motorists. Do not use sign lighting which blinks or flashes.

The proposed signage will use back-lighting, or halo lighting, for each letter. Light will be white, low intensity, and steady.

19) In addition to these guidelines, all signs must conform to the City of Berkeley Sign Ordinance. Design approval and sign permit must be obtained prior to sign fabrication.

Approval of signage and compliance with local sign ordinances will be obtained.

20) Temporary signs should use high-quality graphics and must be removed within 30 days.

No temporary signs are proposed.

Conclusion

In summary, the above analysis finds that the proposed project at 2274 Shattuck Avenue will not adversely impact any remaining features that might justify the site's inclusion on the California Register. The proposed project moreover complies with the Secretary of the Interior's Standards for Rehabilitation, City of Berkeley Municipal Code chapter 3.24.260, and the Downtown Berkeley Design Guidelines. Consequently, as proposed, the project would not constitute an impact to a historic resource per CEQA.

Air Quality Impacts Analysis

FIRSTCARBON SOLUTIONS
FCS INTERNATIONAL, INC.

Memorandum

Date: March 1, 2024

To: Project Applicant

From: Philip Ault, Director of Noise and Air Quality, FirstCarbon Solutions

Subject: Air Quality Impacts Analysis for the 2274 Shattuck Avenue Mixed Use Project in Berkeley, California

At the request of the project applicant, FirstCarbon Solutions (FCS), prepared this memorandum to summarize findings of the Air Quality analysis prepared for the proposed 2274 Shattuck Avenue Mixed Use Project (proposed project). The project site is located in the City of Berkeley, in Alameda County, California (Exhibit 1). The site is located on Shattuck Avenue in Downtown Berkeley. (Exhibit 2). Recommended measures to avoid or minimize potential project-related impacts to sensitive receptors in the project vicinity are included in this memorandum as appropriate.

PROJECT DESCRIPTION

The project applicant proposes to demolish a portion of the existing commercial structures to construct a 17-story mixed-use building with 227 multi-family apartment dwelling units, ground level lobbies, 865 square feet of retail space, and one parking space, on an approximately 0.51-acre site. The outdoor space would consist of 1,657 square feet of ground level common space, 240 square feet of private patios, and a 5,840-square-foot roof deck with 4,084 square feet of landscaping across the ground level and roof deck. The project site consists of Assessor's Parcel Number (APN) 057-202-800-300 at 2274 Shattuck Avenue. The site would be accessed from a driveway off Shattuck Avenue and a garage off Bancroft Way (Exhibit 3).

The project site is bounded by the Berkeley Public Library and Kittredge Street to the north, multi-family apartments to the west, commercial uses and Durant Avenue to the south, and Shattuck Avenue and commercial uses to the east.

The project site is designated as "Downtown" by the City of Berkeley General Plan (General Plan) and "Corridor" by the Downtown Area Plan. Additionally, it is zoned as the Downtown Mixed-Use District "C-DMU" by the City of Berkeley Zoning Ordinance. The C-DMU zoning district permits residential uses with a Use Permit.

Exhibit 3
Site Plan

The proposed project would require a Use Permit, Zoning Certificate, and Design Review (this is not an exhaustive list). The applicant is requesting a State Density Bonus to increase the number of allowable units (from 160 to 227) and waivers for floor area ratio (FAR), a reduction in setback requirements, and a reduction of provided open space.

SETTING AND REGULATORY FRAMEWORK

Air Quality Regulatory Framework

The proposed project is in the City of Berkeley and within the jurisdiction of the Bay Area Air Quality Management District (BAAQMD), which regulates air quality in the San Francisco Bay Area Air Basin (Air Basin). Within the Air Basin, ambient air quality standards for ozone, carbon monoxide (CO), nitrogen dioxide (NO_2), sulfur dioxide (SO_2), particulate matter with an aerodynamic diameter of 2.5 microns and smaller ($PM_{2.5}$) and 10 microns and smaller (PM_{10}), and lead (Pb) have been established by both the California Environmental Protection Agency (Cal/EPA) and the United States Environmental Protection Agency (EPA).[1] California has also set standards for sulfate concentrations and atmospheric visibility.

The EPA and the California Air Resources Board (ARB) designate air basins, or specific areas within an air basin where ambient air quality standards are exceeded, as "nonattainment." If standards are met, the area is designated as "attainment." If there is inadequate or inconclusive data to make a definitive attainment designation, they are considered "unclassified." National nonattainment areas are further designated as marginal, moderate, serious, severe, or extreme as a function of deviation from standards.

The Air Basin is classified as a nonattainment area for the State ozone and particulate matter standards and as nonattainment for federal ozone 8-hour and $PM_{2.5}$ 24-hour standards. This indicates that the BAAQMD has not achieved compliance with these State and federal standards in the Air Basin.

In addition to regulating criteria pollutants for attainment of State and federal standards, ARB and the BAAQMD regulate and control emissions of toxic air contaminants (TACs) to further protect human health. TACs are a class of pollutants that includes hundreds of chemicals hazardous to human health. Long-term exposure to TACs may cause more severe health effects such as neurological damage, hormone disruption, developmental defects and cancer. TAC emissions are highly localized and are emitted from mobile sources such as cars, trucks, and marine and rail sources as well as stationary and area sources. The ARB and BAAQMD addressed their emissions via mobile source strategies, stationary source permitting requirements and health risk thresholds for new development under review in the California Environmental Quality Act (CEQA) process. The average cancer risk from TACs in the Bay Area has been reduced by 80 percent since 1990. Diesel exhaust is the primary TAC contributor to health risk in the Bay Area.

[1] The United States Environmental Protection Agency (EPA) has established National Ambient Air Quality Standards (NAAQS) for six of the most common air pollutants—carbon monoxide, lead, ground level ozone, particulate matter, nitrogen dioxide, and sulfur dioxide—known as "criteria" air pollutants (or simply "criteria pollutants").

For CEQA, the significance criteria established by the applicable air quality management district or air pollution control district may be relied upon to make the proposed project's significance impact determinations related to air quality from criteria pollutants and TACs.

Thresholds of Significance

The significance criteria established or recommended by the BAAQMD were used to make CEQA significance determinations related to the proposed project's impacts on air quality. The BAAQMD has adopted standards of significance for construction and operation. Table 1 shows the thresholds of significance. In developing the thresholds of significance for air pollutants, the BAAQMD considered the emission levels for which a project's individual emissions would be cumulatively considerable. If a project exceeds the identified significance thresholds, its emissions would be cumulatively considerable, resulting in significant adverse air quality impacts on the region's existing air quality conditions.

Table 1: BAAQMD Thresholds of Significance

Pollutant	Construction Thresholds Average Daily Emissions (pounds/day)	Operational Thresholds	
		Average Daily Emissions (pounds/day)	Average Daily Emissions (pounds/day)
Criteria Air Pollutants			
ROG	54	54	10
NO_X	54	54	10
PM_{10}	82 (exhaust)	82	15
$PM_{2.5}$	54 (exhaust)	54	10
CO	Not Applicable	9.0 ppm (8-hour average) or 20.0 ppm (1-hour average)	
Fugitive Dust	Construction Dust Ordinance, other Best Management Practices (BAAQMD Basic Construction Mitigation Measures)	Not Applicable	
Health Risks and Hazards for New Sources			
Excess Cancer Risk	10 per one million	10 per one million	
Chronic or 1-hour Acute Hazard Index	1.0	1.0	
Incremental annual average $PM_{2.5}$	0.3 µg/m^3	0.3 µg/m^3	
Health Risks and Hazards for Sensitive Receptors (Cumulative from All Sources within 1,000-foot Zone of Influence) and Cumulative Thresholds for New Sources			
Excess Cancer Risk	100 per 1 million		
Chronic Hazard Index	10.0		
Annual Average $PM_{2.5}$	0.8 µg/m^3		

Pollutant	Construction Thresholds Average Daily Emissions (pounds/day)	Operational Thresholds	
		Average Daily Emissions (pounds/day)	Average Daily Emissions (pounds/day)

Notes:
$\mu g/m^3$ = micrograms per cubic meter
CO = carbon monoxide
NO_X = nitrogen oxides
PM_{10} = particulate matter, including dust, 10 micrometers or less in diameter
$PM_{2.5}$ = particulate matter, including dust, 2.5 micrometers or less in diameter
ppm = parts per million
ROG = reactive organic gases
Source: Bay Area Air Quality Management District (BAAQMD). 2022. CEQA Air Quality Guidelines. April 20.

The BAAQMD has also developed screening criteria for project construction and operation that informs whether a project would be anticipated to result in an exceedance of emissions thresholds during construction and operation. These preliminary screening levels are contained in Table 4-1 of the BAAQMD's 2022 CEQA Air Quality Guidelines. Pre-determined project size thresholds for individual land uses provide lead agencies with a conservative indication of the potential for a project to result in the generation of operational criteria air pollutants or precursors that exceed the thresholds of significance. As such, small projects can apply these size-based thresholds to determine they would have a less than significant impact, avoiding unnecessarily detailed emissions calculations.

Table 4-1 of the 2022 BAAQMD CEQA Air Quality Guidelines establishes the Single Land Use Preliminary Screening Levels for the "Condo-Townhouse" land use type as 416 dwelling units under Operational Criteria and 637 for Construction Criteria.

Berkeley General Plan

The General Plan includes policies to avoid or mitigate impacts resulting from planned development projects with the City. The following policies are specific to air quality and apply to the proposed project.

Policy EM-18 **Regional Air Quality Action.** Continue working with the Bay Area Air Quality Management District and other regional agencies to:

1) Improve air quality through pollution prevention methods.
2) Ensure enforcement of air emission standards.
3) Reduce local and regional traffic (the single largest source of air pollution in the City) and promote public transit.
4) Promote regional air pollution prevention plans for business and industry.
5) Promote strategies to reduce particulate pollution from residential fireplaces and wood-burning stoves.
6) Locate parking appropriately and provide adequate signage to reduce unnecessary "circling" and searching for parking.

Policy EM-19 **15 percent Emission Reduction: Global Warming Plan.** Make efforts to reduce local emissions by 15 percent by the year 2010. Continue to support and implement local emission reduction programs, such as the City of Berkeley Employee Fleet Bicycle Program, the Police Bicycle Program, and the actions recommended in the City of Berkeley Resource Conservation and Global Warming Abatement Plan.

Policy EM-21 **Alternative Fuels.** Work with the University of California, the Berkeley Unified School District, and other agencies to establish natural gas fueling and electric vehicle recharging stations accessible to the public.

Policy EM-22 **Public Awareness Increase.** Increase public awareness of air quality problems, rules, and solutions through use of City publications and networks. Action:

A. Work on a local and regional level to improve air quality for Berkeley residents and the region.

Policy T-19 **Air Quality Impacts.** Continue to encourage innovative technologies and programs such as clean-fuel, electric, and low-emission cars that reduce the air quality impacts of the automobile. (Also see Environmental Management Policies EM-18 through EM-22.)

Actions

A. Establish bicycle and low-emission vehicle preferred parking areas.
B. Install electric vehicle charging stations in all City-owned parking facilities Downtown and at major parking facilities and employment centers.
C. Where appropriate, install timed signals on major streets to allow traffic to move at a steady 25 miles an hour on major and collector streets, and a steady 15 or 20 miles an hour on neighborhood streets to minimize air quality impacts from “stop and go” traffic.

Policy T-29 **Infrastructure Improvements.** Facilitate mobility and the flow of traffic on major and collector streets (shown on the Vehicular Circulation Network map at the end of the Element), reduce the air quality impacts of congestion, improve pedestrian and bicycle access, and speed public transportation throughout the City by making improvements to the existing physical infrastructure. Actions:

A. Provide timely pavement maintenance and eliminate hazards on bicycle routes.
B. Designate or add transit-priority lanes or transit-only lanes.
C. Add or eliminate left turn lanes.
D. Establish commute period parking restrictions.
E. Regularly maintain pavement.
F. Improve freeway approaches and interchanges at Ashby Avenue (including removal of Potter Street ramp) and Gilman Street (to improve pedestrian and bicycle circulation to the waterfront and facilitate truck access to West Berkeley).

G. Complete the San Pablo Avenue Corridor Plan improvements designed in cooperation with the surrounding cities.
H. Time traffic signals on major transit corridors to give priority to and speed movement of transit vehicles.

Downtown Area Plan

The Downtown Area Plan includes policies to avoid or mitigate impacts resulting from planned development projects within the City. The following policies are specific to air quality and apply to the proposed project.

Policy ES-4.4 **Green Materials.** Encourage use of environmentally preferable materials for building construction and maintenance to: maintain healthful indoor air quality; reduce exposure to harmful materials during their production; install and disposal; protect threatened and endangered species; and reduce consumption of natural resources.

a) Establish building requirements and/or incentives for performance in these areas.
b) Inform builders and landowners of standards and guidelines for preferable construction products, such as those developed by LEED®, Green Seal, Stopwaste, and the Healthy Building Network.
c) Encourage reused, reclaimed or recycled materials, and responsibly harvested wood products, such as those certified by the Forest Steward Council (FSC). Provide builders with information on these options.
d) Encourage preferable construction materials by developing a new "green building materials checklist" for Downtown projects. Consider creating a "worst in class" list of materials to avoid. Consider incentives for construction projects that conform significantly to this checklist.
- Inform building owners and managers of standards and guidelines for preferable maintenance products and operations, such as integrated pest management, and environmental purchasing and waste reduction strategies.

City of Berkeley Standard Conditions of Approval

Approval and development of the proposed project would be subject to the City of Berkeley's Standard Conditions of Approval (COAs), pursuant to the City's Municipal Code Section 23.406.040 and General Plan Policy EM-18 which requires that the BAAQMD emission standards be applied on all projects where the City is the lead agency under CEQA. In implementing Policy EM-18, the City of Berkeley has the following standard COAs relevant to air quality, which would apply to the proposed project. Unless otherwise discussed in this analysis, the proposed project is assumed to be required to incorporate these COAs.

Public Works–Apply BAAQMD-Recommended Measures During Construction

For all proposed projects, BAAQMD recommends implementing all the Basic Construction Mitigation Measures,[2] listed below to meet the Best Management Practices threshold for fugitive dust:

A. All exposed surfaces (e.g., parking areas, staging areas, soil piles, graded areas, and unpaved access roads) shall be watered two times per day.

B. All haul trucks transporting soil, sand, or other loose material off-site shall be covered.

C. All visible mud or dirt track-out onto adjacent public roads shall be removed using wet power vacuum street sweepers at least once per day. The use of dry power sweeping is prohibited.

D. All vehicle speeds on unpaved roads shall be limited to 15 miles per hour (mph).

E. All roadways, driveways, and sidewalks to be paved shall be completed as soon as possible. Building pads shall be laid as soon as possible after grading unless seeding or soil binders are used.

F. Idling times shall be minimized either by shutting equipment off when not in use or reducing the maximum idling time to 5 minutes (as required by the California Airborne Toxics Control Measure [ATCM] Title 13, Section 2485 of California Code of Regulations). Clear signage shall be provided for construction workers at all access points.

G. All construction equipment shall be maintained and properly tuned in accordance with manufacturer's specifications. All equipment shall be checked by a certified mechanic and determined to be running in proper condition prior to operation.

H. Post a publicly visible sign with the telephone number and person to contact at the City of Berkeley regarding dust complaints. This person shall respond and take corrective action within 48 hours. The BAAQMD's phone number shall also be visible to ensure compliance with applicable regulations.

Air Quality–Diesel Particulate Matter Controls During Construction

All off-road construction equipment used for projects with construction lasting more than 2 months shall comply with one of the following measures:

A. The project applicant shall prepare a Health Risk Assessment (HRA) that demonstrates the project's on-site emissions of diesel particulate matter during construction will not exceed health risk screening criteria after a screening-level health risk assessment is conducted in accordance with current guidance from BAAQMD and Office of Environmental Health Hazard Assessment (OEHHA). The HRA shall be submitted to the Public Works Department for review and approval prior to the issuance of building permits.

[2] Bay Area Air Quality Management District (BAAQMD) Basic Construction Mitigation Measures are considered standard construction measures, and do not constitute any project-specific mitigation.

B. All construction equipment shall be equipped with Tier 2 or higher engines and the most effective Verified Diesel Emission Control Strategies (VDECS) available for the engine type (Tier 4 engines automatically meet this requirement) as certified by the ARB. The equipment shall be properly maintained and tuned in accordance with manufacturer specifications.

C. In addition, a Construction Emissions Minimization Plan (Emissions Plan) shall be prepared that includes the following:
   1. An equipment inventory summarizing the type of off-road equipment required for each phase of construction, including the equipment manufacturer, equipment identification number, engine model year, engine certification (tier rating), horsepower, and engine serial number. For all VDECS, the equipment inventory shall also include the technology type, serial number, make, model, manufacturer, ARB verification number level, and installation date.
   2. A Certification Statement that the Contractor agrees to comply fully with the Emissions Plan and acknowledges that a significant violation of the Emissions Plan shall constitute a material breach of contract. The Emissions Plan shall be submitted to the Public Works Department for review and approval prior to the issuance of building permits.

Construction and Demolition Diversion

The project applicant shall divert debris according to proposed project's Construction Waste Management Plan and collect required documentation. The project applicant shall get construction debris receipts from sorting facilities in order to verify diversion requirements. Recycling and disposal receipts shall be uploaded if using Green Halo and submitted online for City review and approval prior to final inspection. Alternatively, complete the second page of the original Construction Waste Management Plan and present it, along with your construction debris receipts, to the Building Inspector by the final inspection to demonstrate diversion rate compliance. The Zoning Officer may request summary reports at more frequent intervals, as necessary to ensure compliance with this requirement.

Low Carbon Concrete

The proposed project shall verify compliance with the Berkeley Green Code, located under Municipal Code Chapter 19.37, including use of concrete mix design with a cement reduction of at least 25 percent. Documentation on concrete mix design shall be available at all times at the construction site for review by City Staff.

AIR QUALITY EMISSIONS IMPACT ANALYSIS

According to CEQA Guidelines Appendix G, to determine whether impacts related to air quality are significant environmental effects, the following questions are analyzed and evaluated.

Would the project result in:

Impact AIR-1:	**Would the project conflict with or obstruct implementation of the applicable air quality plan?**

Less than significant impact. The project site is located in the San Francisco Bay Area Air Basin, where the BAAQMD regulates air quality. The EPA is responsible for identifying nonattainment and attainment areas for each criteria pollutant within the Air Basin. The Air Basin is designated nonattainment for State standards for 1-hour and 8-hour ozone, 24-hour respirable particulate matter (PM_{10}), annual PM_{10}, and annual fine particulate matter ($PM_{2.5}$).[3]

The BAAQMD has adopted several air quality policies and plans to address regional air quality standards, the most recent of which is the 2017 Clean Air Plan. The 2017 Clean Air Plan was adopted in April of 2017 and serves as the regional Air Quality Plan (AQP) for the Air Basin for attaining NAAQS. The primary goals of the 2017 Clean Air Plan are to protect public health and protect the climate. The 2017 Clean Air Plan acknowledges that the BAAQMD's two stated goals of protection are closely related. As such, the 2017 Clean Air Plan identifies a wide range of control measures intended to decrease both criteria pollutants[4] and greenhouse gas (GHG) emissions.[5] The 2017 Clean Air Plan also accounts for projections of population growth provided by Association of Bay Area Governments (ABAG) and Vehicle Miles Traveled (VMT) projections provided by the Metropolitan Transportation Commission (MTC), and identifies strategies to bring regional emissions into compliance with federal and State air quality standards. A project would be judged to conflict with or obstruct implementation of the 2017 Clean Air Plan if it would result in substantial new regional emissions not foreseen in the air quality planning process.

The BAAQMD does not provide a numerical threshold of significance for project-level consistency analysis with AQPs. Therefore, the following criteria will be used for determining a project's consistency with the AQP.

- **Criterion 1:** Does the project support the primary goals of the AQP?
- **Criterion 2:** Does the project include applicable control measures from the AQP?
- **Criterion 3:** Does the project disrupt or hinder the implementation of any AQP control measures?

Criterion 1

The primary goals of the 2017 Clean Air Plan, the current AQP to date, are to:

- Attain air quality standards;

[3] Bay Area Air Quality Management District (BAAQMD). 2022. CEQA Air Quality Guidelines. April 20.

[4] The EPA has established National Ambient Air Quality Standards (NAAQS) for six of the most common air pollutants—carbon monoxide, lead, ground level ozone, particulate matter, nitrogen dioxide, and sulfur dioxide—known as "criteria" air pollutants (or simply "criteria pollutants").

[5] A greenhouse gas (GHG) is any gaseous compound in the atmosphere that is capable of absorbing infrared radiation, thereby trapping and holding heat in the atmosphere. By increasing the heat in the atmosphere, greenhouse gases are responsible for the greenhouse effect, which ultimately leads to global warming.

- Reduce population exposure to unhealthy air and protect public health in the Bay Area; and
- Reduce GHG emissions and protect the climate.

A measure for determining whether the proposed project supports the primary goals of the AQP is if the project would not result in an increase in the frequency or severity of existing air quality violations, cause or contribute to new violations, or delay timely attainment of air quality standards or the interim emission reductions specified in the air quality plans. This measure is determined by comparing project emissions to the significance thresholds identified by the BAAQMD for construction- and operation-related pollutants. These significance thresholds are applied in the evaluation of Impact AIR-2, below. As discussed under Impact AIR-2 and Impact AIR-3, the proposed project would not significantly contribute to cumulative nonattainment pollutant violations or expose sensitive receptors to substantial pollutant concentrations after incorporating the City's Standard COAs.

Fugitive dust control measures would be required to be implemented during the construction of the proposed project in order to reduce localized dust impacts. Impacts related to fugitive dust from the proposed project's construction would be potentially significant without the inclusion of sufficient dust control measures. City Standard COA "Public Works–Apply BAAQMD-Recommended Measures During Construction" requires the inclusion of Best Management Practices (BMPs) recommended by the BAAQMD to reduce potential impacts related to fugitive dust emissions from use of construction equipment. In addition, construction exhaust emissions would result in potentially significant health risk impacts. The proposed project would be required to apply City Standard COA "Air Quality–Diesel Particulate Matter Controls During Construction," which would require the proposed project to prepare an HRA that demonstrates the project's on-site construction-related diesel particulate matter (DPM) emissions will not exceed health risk screening criteria in accordance with current guidance from BAAQMD and OEHHA, or require the proposed project to utilize equipped with Tier 2 or higher engines and the most effective VDECS available for the engine type.

With the application of the City Standard COAs "Public Works–Apply BAAQMD-Recommended Measures During Construction" and "Air Quality–Diesel Particulate Matter Controls During Construction," the proposed project would be consistent with Criterion 1.

Criterion 2

Another measure for determining whether a project is consistent with the AQP is to determine whether the project is inconsistent with the growth assumptions incorporated into the AQP and, thus, whether it would interfere with the region's ability to comply with federal and California air quality standards. The development of the AQP is based in part on the land use general plan determinations of the various cities and counties that constitute the Air Basin. The project site has a land use designation of "Downtown" in the City's General Plan and "Corridor" in the Downtown Area Plan, and is zoned C-DMU.

The C-DMU zoning district is intended to implement the vision and goals of the Downtown Area Plan, which aims to generate more pedestrian activity Downtown, include ground floor retail uses, increase economic revitalization in the area, and promote Berkeley's regional leadership in the arts. The C-DMU

zoning district includes allowances for high-density residential uses. The proposed project would be consistent with the C-DMU zoning district of the site.

As such, the proposed project falls within the land uses contemplated for development by the City. Considering this information, the proposed project would not directly or indirectly result in substantial unplanned population growth. Therefore, the overall development of the project site would generally be consistent with the growth assumptions incorporated into the Clean Air Plan.

The AQPs also assume that all mandatory regulations to reduce air pollution would be adhered to. Therefore, to conform to the assumptions in the AQP, a project must be consistent with all applicable measures contained in the applicable AQP. The Clean Air Plan contains 85 control measures to reduce air pollutants and GHGs at the local, regional, and global levels. Along with the traditional stationary, area, mobile source, and transportation control measures, the Clean Air Plan contains several control measures designed to protect the climate, promote mixed-use, and compact development to reduce vehicle emissions and exposure to pollutants from stationary and mobile sources. The Clean Air Plan also includes an account of the implementation status of control measures identified in the 2010 Clean Air Plan.

Table 2 lists the Clean Air Plan policies relevant to the proposed project and evaluates the proposed project's consistency with the policies. As shown below, the proposed project would be consistent with applicable measures.

Table 2: Project Consistency with Applicable Clean Air Plan Control Measures

Control Measure	Project Consistency
Buildings Control Measures	
BL1: Green Buildings	**Consistent**. The proposed project would not conflict with the implementation of this measure. The proposed project will comply with the latest energy efficiency standards and incorporate applicable energy efficiency features designed to reduce project energy consumption.
BL4: Urban Heat Island Mitigation	**Consistent.** The proposed project would incorporate landscaping throughout the site. The proposed project would provide a landscaped ground floor and roof including trees, shrubs, groundcover, and hardscaped cover according to City standards that would reduce the urban heat island effect.
Energy Control Measures	
EN1: Decarbonize Electricity Generation	**Consistent.** The proposed project would not conflict with the implementation of this measure. The proposed project would comply with the latest energy efficiency standards and incorporate applicable energy efficiency features designed to reduce project energy consumption. In addition, as a high-rise residential development, the proposed project would be required to comply with the standards contained in the 2022 California Building Standards Code (CBC), Title 24, Part 6, Subchapter 8, which includes rooftop solar panels. The proposed project would be consistent with this measure.

Control Measure	Project Consistency
EN2: Decrease Electricity Demand	**Consistent.** The proposed project would be required to conform to the energy efficiency requirements of the CBC, also known as Title 24, which was adopted to meet an Executive Order in the Green Building Initiative to improve the energy efficiency of buildings through aggressive standards. The 2022 Title 24 Standards are the current State building regulations, which went into effect on January 1, 2023. Proposed project buildings would be subject to the Title 24 Standards in effect at the time of building permit issuance.
Natural and Working Lands Control Measures	
NW2: Urban Tree Planting	**Consistent.** The proposed project would incorporate new landscaping, including new trees, shrubs, grasses, and groundcover, which would be installed in proposed stormwater retention areas, alongside Bancroft Way, and in ground floor and rooftop landscaped areas of the proposed building.
WA3: Green Waste Diversion	**Consistent.** The waste service provider for the proposed project will be required to meet the Assembly Bill (AB) 341 and Senate Bill (SB) 939 and SB 1374 requirements that require waste service providers to divert green waste. All plant refuse generated during operations of the proposed project would be recycled off-site.
WA4: Recycling and Waste Reduction	**Consistent.** The waste service provider for the proposed project will be required to meet the AB 341 and SB 939 and SB 1374 requirements that require waste to be recycled.
Stationary Control Measures	
SS36: Particulate Matter from Trackout	**Consistent.** Mud and dirt that may be tracked out onto the nearby public roads during construction activities shall be removed promptly by the Contractor based on the BAAQMD's requirements. City Standard COA "Public Works–Apply BAAQMD-Recommended Measures During Construction" requires the proposed project to implement BMPs recommended by the BAAQMD for fugitive dust emissions during construction.
SS37: Particulate Matter from Asphalt Operations	**Consistent.** Asphalt used during project construction would be subject to BAAQMD Regulation 8, Rule 15-Emulsified and Liquid Asphalts. Although this rule does not directly apply to the proposed project, it does limit the reactive organic gas (ROG) content of asphalt available for use during construction by regulating the sale and use of asphalt. By using asphalt from facilities that meet BAAQMD regulations, the proposed project would be consistent with this Clean Air Plan measure.
Transportation Control Measures	
TR9: Bicycle and Pedestrian Access and Facilities	**Consistent.** The proposed project would be directly accessible to sidewalks on Bancroft Way and Shattuck Avenue. Several bus stops are located within a short walking distance of the site, including the Shattuck Avenue and Kittredge Street stop, located 100 feet north of the project site; Bancroft Way and Shattuck Avenue stop, located 100 feet east of the project site, Shattuck Avenue and Durant Avenue, located 425 feet south of the project site; and Shattuck Avenue and Allston Way, located 525 feet north of the

Control Measure	Project Consistency
	project site. In addition, the proposed project would be 760 feet south of the Downtown Berkeley stop of the Bay Area Regional Transportation light rail system. The proposed project would also be located approximately 400 feet east of the Milvia Street Class IV protected bicycle lane and would provide 90 bicycle parking spaces. Therefore, the proposed project would not conflict with and would be consistent with the BAAQMD's effort to encourage planning for bicycle and pedestrian facilities.
Source: Bay Area Air Quality Management District (BAAQMD). 2017. Final 2017 Clean Air Plan. April 19.	

In summary, the proposed project would not conflict with any applicable measures under the 2017 Clean Air Plan given the application of City Standard COA "Public Works – Apply BAAQMD-Recommended Measures During Construction"; therefore, the proposed project would be consistent with Criterion 2.

Criterion 3

The proposed project would not preclude extension of a transit line or bike path, propose excessive parking beyond parking requirements, or otherwise create an impediment or disruption to implementation of any AQP control measures. As shown in Table 2 above, the proposed project would incorporate several AQP control measures as project design features, such as utilizing asphalt which would be compliant with BAAQMD regulations, complying with energy efficiency standards contained in the 2022 California Building Standards Code (CBC), and installing landscaping across the project site. Considering this information, the proposed project would not disrupt or hinder the implementation of any AQP control measures. The proposed project is therefore consistent with Criterion 3.

Summary

As discussed above, the proposed project would be consistent with all three criteria after incorporating the City Standard COAs "Public Works–Apply BAAQMD-Recommended Measures During Construction" and "Air Quality–Diesel Particulate Matter Controls During Construction." Thus, the proposed project would not conflict with the 2017 Clean Air Plan. Therefore, impacts associated with conflicting with or obstructing the 2017 Clean Air Plan would be less than significant.

Impact AIR-2:	**Would the project result in a cumulatively considerable net increase of any criteria pollutant for which the project region is nonattainment under an applicable federal or State ambient air quality standard (including releasing emissions, which exceed quantitative thresholds for ozone precursors)?**

Less than significant impact. This impact is related to the cumulative effect of a project's criteria pollutant emissions. By its nature, air pollution is largely a cumulative impact resulting from emissions generated over a large geographic region. The nonattainment status of regional pollutants results from past and present development within the Air Basin, and this regional impact is a cumulative impact. Therefore, new development projects (such as the proposed project) within the Air Basin would contribute to this impact

only on a cumulative basis. No single project would be sufficient in size, by itself, to result in nonattainment of regional air quality standards. Instead, a project's emissions may be individually limited, but cumulatively considerable when evaluated in combination with past, present, and future development projects.

Potential regional impacts could result in exceedances of State or federal standards for NO_X, particulate matter (PM_{10} and $PM_{2.5}$), or CO. NO_X emissions are of concern because of potential health impacts from exposure to NO_X emissions during both construction and operation and as a precursor in the formation of airborne ozone. PM_{10} and $PM_{2.5}$ are of concern during construction because of the Potential to Emit (PTE) exhaust emissions from the operation of off-road construction equipment and fugitive dust during earth-disturbing activities (construction fugitive dust). CO emissions are of concern during project operation because operational CO hotspots are related to increases in on-road vehicle congestion and resulting health effects.

Reactive organic gas (ROG) emissions are also important because of their participation in the formation of ground level ozone. Ozone is a respiratory irritant and an oxidant that increases susceptibility to respiratory infections and that can cause substantial damage to vegetation and other materials. Elevated ozone concentrations result in reduced lung function, particularly during vigorous physical activity. This health problem is particularly acute in sensitive receptors such as the sick, elderly, and young children.

The cumulative analysis focuses on whether a specific project would result in cumulatively considerable emissions. According to Section 15064(h)(4) of the CEQA Guidelines, the existence of significant cumulative impacts caused by other projects alone does not constitute substantial evidence that the project's incremental effects would be cumulatively considerable. Rather, the determination of cumulative air quality impacts for construction and operational emissions is based on whether the proposed project would result in emissions that exceed the BAAQMD thresholds of significance for construction and operations on a project level. The thresholds of significance represent the allowable emissions each project can generate without generating a cumulatively considerable contribution to regional air quality impacts. Therefore, a project that would not exceed the BAAQMD thresholds of significance on the project level also would not be considered to result in a cumulatively considerable contribution to these regional air quality impacts. Construction and operational emissions are discussed separately below.

Construction Emissions

During construction, fugitive dust would principally be generated from demolition, site grading and other earthmoving activities. The majority of fugitive dust would remain localized and would be deposited near the project site; however, the potential for impacts from fugitive dust exists. Exhaust emissions would also be generated from the operation of the off-road construction equipment and on-road construction vehicles.

Construction Fugitive Dust

PM_{10} and $PM_{2.5}$ (fugitive dust) is recognized to impact local communities. Construction-related activities, such as soil disturbance, grading, and material hauling, can also result in fugitive dust emissions (e.g., $PM_{2.5}$ and PM_{10}). The BAAQMD does not have a numerical threshold for fugitive dust particulate matter

emissions. Instead, the BAAQMD bases the determination of significance for fugitive dust on implementing effective control measures. In order for a project to have a less than significant criteria air pollutant impact related to construction-related fugitive dust emissions, it must implement all BAAQMD basic BMPs. The City applies BAAQMD BMPs as standard conditions to all projects, pursuant to General Plan Policy EM-18. These air pollution control measures shall be applied during construction activities as outlined in Standard Permit Condition AQ No. 1 listed above. With the application of this condition, short-term construction fugitive dust impacts would be less than significant.

Construction Air Pollutant Emissions: ROG, NO_X, Exhaust PM_{10}, and Exhaust $PM_{2.5}$

California Emissions Estimator Model (CalEEMod) Version 2022.1 was used to estimate the proposed project's construction emissions. CalEEMod provides a consistent platform for estimating construction and operational emissions from a wide variety of land use projects and is the model recommended by the BAAQMD for estimating project emissions. Estimated construction emissions are compared with the applicable thresholds of significance established by the BAAQMD to assess ROG, NO_X, exhaust PM_{10}, and exhaust $PM_{2.5}$ construction emissions to determine significance for this criterion.

On the outset of this air quality analysis, construction of the proposed project was originally expected to begin in January 2024 and conclude in March 2026. However, the proposed project has not begun construction as of February 2024. Despite this, the original construction schedule outlined in Table 3 is maintained in this analysis for the purpose of providing a conservative analysis, as construction emissions would likely decrease if the construction schedule is deferred to later years because of improvements in technology and more stringent regulatory requirements. The duration of construction activity and associated equipment represents a reasonable approximation of the expected construction fleet as CEQA Guidelines require.

Table 3: Preliminary Construction Schedule

Phase	Phase Start Date	Phase End Date	Working Days per Week	Total Number of Working Days
Demolition	1/2/2024	2/26/2024	5	40
Site Preparation	2/27/2024	3/4/2024	5	5
Grading	3/5/2024	4/1/2024	5	20
Building Construction	4/2/2024	3/2/2026	5	500
Architectural Coating	9/16/2025	3/2/2026	5	120
Paving	2/20/2026	3/2/2026	5	7

The calculations of pollutant emissions from the construction equipment account for the type of equipment, horsepower and load factors of the equipment, and the duration of equipment use. The proposed project would be subject to City Standard COA "Air Quality–Diesel Particulate Matter Controls During Construction," which would require that all construction equipment be equipped with Tier 2 or

higher engines and the most effective VDECS available for the engine type, thus reducing emissions. The average daily construction emissions are compared with the significance thresholds in Table 5.

Table 4: Construction Emissions (Average Daily Rate)

Parameter	Air Pollutants[1] (tons/year)				
	Year	ROG	NO_X	PM_{10} (Exhaust)	$PM_{2.5}$ (Exhaust)
Project Construction					
Demolition	2024	0.006	0.150	0.0030	0.0028
Site Preparation	2024	0.001	0.018	0.0001	0.0001
Grading	2024	0.005	0.171	0.0012	0.0011
Building Construction	2024	0.090	1.193	0.0064	0.0060
	2025	0.117	1.578	0.0085	0.0080
	2026	0.018	0.262	0.0014	0.0013
Architectural Coating	2025	0.001	0.020	0.0001	0.0001
	2026	0.965	0.045	0.0004	0.0004
Paving	2026	0.550	0.025	0.0002	0.0002
Total Emissions (tons)	—	1.753	3.462	0.021	0.020
Daily Average					
Total Emissions (lbs/year)		3506	6924	42	40
Average Daily Emissions (lbs/day)[2]		6.20	12.25	0.08	0.07
Significance Threshold (lbs/day)		**54**	**54**	**82**	**54**
Exceeds Significance Threshold?		**No**	**No**	**No**	**No**

Notes:
lbs = pounds
NO_X = oxides of nitrogen
PM_{10} = particulate matter, including dust, 10 micrometers or less in diameter
$PM_{2.5}$ = particulate matter, including dust, 2.5 micrometers or less in diameter
ROG = reactive organic gases
Based on emissions with Conditions of Approval (Tier 2 plus level 3 VDECs)
[1] Totals may not add up due to rounding. Calculations use unrounded totals.
[2] Calculated by dividing the total lbs of emissions by the total number of nonoverlapping working days of construction (565 workdays).
Source: CalEEMod Output (see Attachment A).

As indicated in Table 4, construction emissions from all construction activities would be below the recommended thresholds of significance; therefore, the proposed project's construction would have less than significant impact related to emissions of ROG, NO_X, exhaust PM_{10}, and exhaust $PM_{2.5}$.

The proposed project would be subject to City Standard COA "Public Works – Apply BAAQMD-Recommended Measures During Construction" which incorporates BAAQMD's BMPs to reduce potential impacts of fugitive dust emissions during project construction. In addition, the proposed project would comply with all applicable district rules, including Regulation 6, Rule 1 (General Requirements) and Regulation 6, Rule 6 (Prohibition of Trackout) which require dust generating operations to limit particulate matter emissions. Therefore, project construction would have a less than significant impact with respect to fugitive dust.

Operational Emissions

Operational Air Pollutant Emissions: ROG, NO_X, PM_{10}, and $PM_{2.5}$

Operational emissions would include area, energy, and mobile sources. Area sources would include emissions from architectural coatings, consumer products, and landscape equipment. The proposed project would contain a natural gas central boiler to supply water heating to all residential units. All other appliances would be electric. Mobile sources include exhaust and road dust emissions from the vehicles that would travel to and from the project site. Pollutants of concern include ROG, NO_X, PM_{10}, and $PM_{2.5}$.

BAAQMD provides easy-reference tables[6] to determine whether projects may have potentially significant criteria air pollutant impacts requiring a detailed analysis. These screening criteria are not thresholds of significance but provide a conservative indication of whether implementing a proposed project could result in potentially significant criteria air pollutants and precursors impacts. If all screening criteria for criteria air pollutants and precursors are met by a proposed project, a detailed assessment of the project's criteria air pollutant and precursor emissions is not required since the emissions from such a project would be under the BAAQMD quantitative thresholds of emissions for these pollutants.

The criteria pollutant screening levels were developed from default assumptions used by CalEEMod 2022.1 using EMFAC2021 emission factors for mobile sources. Each land use subcategory was modeled to determine the project size at which any criteria air pollutant or precursor threshold of significance may be exceeded. The operational screening level from Table 4-1 of the BAAQMD CEQA Air Quality Guidelines for "apartments" is 638 dwelling units. Projects with fewer dwelling units, provided that they also meet all the other operational screening criteria (i.e., no overlapping construction and operations and project does not include stationary sources subject to permitting) do not need to perform a detailed air quality assessment of their operational emissions to demonstrate that emissions of these pollutants are less than significant.

This project proposes to construct 227 multi-family apartment units and approximately 865 square feet of retail space, with associated parking, landscaping, and accessory/mechanical infrastructure. In addition, the proposed project would install an emergency generator, which is considered to be a stationary source of operational emissions subject to BAAQMD permitting. As the proposed project would construct a stationary source, it would not meet the BAAQMD CEQA Air Quality Guidelines

[6] Bay Area Air Quality Management District (BAAQMD). 2022. CEQA Air Quality Guidelines. April 20.

operational screening levels. As such, a detailed assessment of the criteria emissions estimated to occur due to existing operations are presented in Table 5.

Table 5: Operational Regional Pollutant Emissions

Emissions Source	ROG	NO_X	PM_{10} Total	$PM_{2.5}$ Total
	Tons per Year			
Project Operation				
Mobile	0.151	0.078	0.252	0.064
Area	1.09	0.01	0.001	0.0004
Energy–Natural Gas	0.004	0.064	0.005	0.005
Emergency Generator	0.005	0.013	0.001	0.001
Total (tons/year)	1.25	0.17	0.26	0.07
Significance Threshold (Tons/Year)	**10**	**10**	**15**	**10**
Exceeds Significance Threshold?	**No**	**No**	**No**	**No**

Source: Attachment A.

As shown in Table 5, the proposed project would not exceed any of the BAAQMD's thresholds of significance for regional daily operational emissions.

The proposed project would be required to apply for applicable permits under the BAAQMD for the construction and operation of an emergency generator with a power level above 50 horsepower. However, the BAAQMD has determined that emergency generators typically have a testing and maintenance schedule of running for approximately 30 minutes in a day, once a week.[7] Additionally, the BAAQMD determined that an assumption of 100 hours of emergency operations per year is adequate for

[7] Bay Area Air Quality Management District (BAAQMD). 2019. Required Items for Engine Applications. Website: https://www.baaqmd.gov/~/media/files/engineering/ic-engine-permits/required-items-for-engine-application-final-draft-103119-pdf.pdf?sc_lang=en. Accessed November 15, 2023.

emergency generators.[8] Emergency generators would also be subject to an Engine Permit under the BAAQMD, which would include a health risk screening prior to issuance of the permit and monitoring under the BAAQMD. Given the intermittent and infrequent nature of operations from emergency generators, and the BAAQMD regulations and requirements for emergency generators, the proposed project's emergency generator would not generate a significant amount of operational emissions in addition to those operational emissions generated by the proposed residential and retail uses. As such, impacts of the proposed emergency generator and land uses would be less than significant in relation to criteria air pollutants and precursors.

Operational Carbon Monoxide Hotspot

The CO emissions from traffic generated by the proposed project are a concern at the local level because congested intersections can result in high, localized concentrations of CO (referred to as a CO hotspot).

The BAAQMD screening criteria[9] were used to determine whether implementing the proposed project could result in local carbon monoxide emissions that exceed the thresholds of significance. If all the following screening criteria are met, operation of the proposed project would result in a less than significant impact related to carbon monoxide:

- The project is consistent with an applicable congestion management program established by the county congestion management agency for designated roads or highways, the Regional Transportation Plan, and local congestion management agency plans.
- Project-generated traffic would not increase traffic volumes at affected intersections to more than 44,000 vehicles per hour.
- Project-generated traffic would not increase traffic volumes at affected intersections to more than 24,000 vehicles per hour where vertical and/or horizontal mixing is substantially limited (e.g., tunnel, parking garage, bridge underpass, natural or urban street canyon, below-grade roadway).

Several bus stops are located within a short walking distance of the project site, including the Shattuck Avenue and Kittredge Street stop, located 100 feet north of the project site; Bancroft Way and Shattuck Avenue stop, located 100 feet east of the project site, Shattuck Avenue and Durant Avenue, located 425 feet south of the project site; and Shattuck Avenue and Allston Way, located 525 feet north of the project site. The proposed project would also be 760 feet south of the Downtown Berkeley stop of the Bay Area Regional Transportation (BART) rail system and would be located approximately 400 feet east of the Milvia Street Class IV protected bicycle lane. In addition, the proposed project would only provide one parking space for retail use and would provide 90 bicycle parking spaces. As such, most residents and visitors to the proposed project would utilize non-vehicular means of travel to and from the project site, and the proposed project would not have a significant VMT impact. Therefore, the proposed project

[8] Bay Area Air Quality Management District (BAAQMD). 2019. Policy: Calculating Potential to Emit for Emergency Backup Power Generators. June 3.
[9] Bay Area Air Quality Management District (BAAQMD). 2022. CEQA Air Quality Guidelines. April 20.

would meet all the CO screening criteria and would result in a less than significant impact related to carbon monoxide.

Impact AIR-3:	**Would the project expose sensitive receptors to substantial pollutant concentrations?**

Less than significant impact. The BAAQMD defines a sensitive receptor as the following: "Facilities or land uses that include members of the population that are particularly sensitive to the effects of air pollutants, such as children, the elderly, and people with illnesses. Examples include schools, hospitals, and residential areas." As specified by the BAAQMD, health risk and hazard impacts should be analyzed for sensitive receptors within a 1,000-foot radius of the project site.[10] The closest existing sensitive receptors include the following:

- Berkeley Public Library, located adjacent to the west and north of the project site.
- Multi-family apartment buildings located immediately to the west and south of the project boundary, as well as to the northeast of the project site.
- Berkeley High School, located approximately 450 feet west of the project site.

The proposed project would result in a potentially significant impact on sensitive receptors if any of the following three following criteria are met:

- **Criterion 1:** Construction of the proposed project would exceed the BAAQMD health risk significance thresholds.
- **Criterion 2:** Operation of the proposed project would exceed the BAAQMD health risk significance thresholds.
- **Criterion 3:** The proposed project would locate new sensitive receptors (residents) that could be subject to existing sources of TACs at the project site which exceed the BAAQMD cumulative health risk significance thresholds.

Criterion 1: Project Construction Toxic Air Pollutants

An assessment was made of the potential health impacts on surrounding sensitive receptors resulting from TAC emissions during construction. The assessment is provided below, while Attachment A provides the detailed assumptions and modeling parameters.

Diesel particulate matter (DPM) has been identified by the ARB as a carcinogenic substance. Major sources of DPM include off-road construction equipment and heavy-duty delivery and vendor trucks and worker activities. For purposes of this analysis, DPM is represented as exhaust emissions of PM_{10}. $PM_{2.5}$ concentrations were calculated using the $PM_{2.5}$ emission rates using the dispersion modeling methods used for the PM_{10} and the HRA.

[10] Bay Area Air Quality Management District (BAAQMD). 2022. CEQA Air Quality Guidelines. April 20.

Estimation of Construction DPM Emissions

Construction DPM and $PM_{2.5}$ exhaust emissions were estimated using CalEEMod, Version 2022.1, as described under Impact AIR-2. Construction was assumed to begin in January 2024 and conclude in March 2026. Project construction emissions were assumed to be distributed over the project site with a working schedule of 8 hours per day, 5 days per week. Table 5 summarizes the emission rates of DPM emissions during construction of the proposed project and DPM emissions during construction of the proposed project with the application of City Standard COA "Air Quality–Diesel Particulate Matter Controls During Construction."

Estimation of Cancer Risks

The BAAQMD has developed a set of guidelines for estimating cancer risks resulting from exposure to TACs.[11] These guidelines require the use of Hotspots Analysis and Reporting Program (HARP2) software to identify the cancer risk associated with DPM generated during construction activities.

Estimation of Non-Cancer Chronic Hazards

An evaluation of the potential non-cancer effects of chronic chemical exposures was also conducted. Adverse health effects are evaluated by comparing the annual receptor concentration of each chemical compound with the appropriate reference exposure limit. Available reference exposure limits promulgated by OEHHA were considered in the assessment.

Risk characterization for non-cancer health hazards from TACs is expressed as a hazard index (HI). The HI is a ratio of the predicted concentration of the proposed project's emissions to a concentration considered acceptable to public health professionals, termed the reference exposure limit. The HI assumes that chronic sub-threshold exposures adversely affect a specific organ or organ system (toxicological endpoint). For each discrete chemical exposure, target organs presented in regulatory guidance were used. Each chemical concentration or dose is divided by the appropriate toxicity reference exposure level to calculate the HI. For compounds affecting the same toxicological endpoint, this ratio is summed. Where the total equals or exceeds 1, a health hazard is presumed to exist. For purposes of this assessment, the TAC of concern is DPM for which the OEHHA has defined a reference exposure limit for DPM of 5 micrograms per cubic meter ($\mu g/m^3$). The principal toxicological endpoint assumed in this assessment was through inhalation.

The area surrounding the project site contains a mix of high-density residential uses, commercial uses, Berkeley High School, and the Berkeley Public Library within 1,000 feet of the proposed project boundary. The nearest residence to the project site is approximately 100 feet west of the project site at 2010 Bancroft Way. Berkeley Public Library is adjacent to the west and north of the project site, and the Berkeley High School is located approximately 450 feet west of the project site. Evaluation at the identified Maximally Exposed Individual Receptor (MEIR) provides a health-conservative result for all other receptors within the 1,000 feet buffer zone. Because of the project site being within 1,000 feet of Berkeley High School and various nonresidential uses, an evaluation of the emissions from the Maximally Exposed Individual Worker (MEIW) receptor and school receptors were also conducted, as found in

[11] Bay Area Air Quality Management District (BAAQMD). 2020. BAAQMD Health Risk Assessment Modeling Protocol. December.

Attachment A. Impacts at the MEIW, Berkeley High School, and all other receptors would be less than the MEIR and decrease with increasing distance from the project site.

Table 6 summarizes the cancer risk and chronic HI results for project construction at the MEIR, which is a multi-family apartment residence located approximately 200 feet northeast of the project site at 2259 Bancroft Way. As mentioned above, the proposed project would be required to comply with City Standard COA "Air Quality–Diesel Particulate Matter Controls During Construction," which would require that the proposed project's construction equipment fleet be cleaner than the "Statewide average" fleet. As such, the resultant cancer risk and chronic hazards from DPM and maximum annual $PM_{2.5}$ are below the BAAQMD thresholds of significance.

Table 6: Estimated Cancer Risks and Chronic Non-Cancer Hazards

Cancer Risk Scenario[1]	Cancer Risk (risk per million)	Chronic Non-Cancer Hazard Index[2]	$PM_{2.5}$ Exhaust[3] ($\mu g/m^3$)
Maximum Exposed Individual Receptor[1]	5.10	0.0031	0.01555
Thresholds of Significance	**10**	**1**	**0.3**
Exceeds Individual Source Threshold?	**No**	**No**	**No**

Notes:
$\mu g/m^3$ = micrograms per cubic meter
MEIR = Maximally Exposed Individual Receptor is a residential receptor at 564430.80 m E 4191448.62 m UTM N
PM_{10} = particulate matter less than 10 microns in diameter
$PM_{2.5}$ = particulate matter less than 2.5 microns in diameter
[1] The project construction cancer risk and chronic non-cancer hazard estimates shown here incorporate the use of Tier 2 Engines with Level 3 VDECS for all construction equipment, as required by the City's Standard COA.
Chronic non-cancer hazard index was estimated by dividing the annual DPM concentration (as PM_{10} exhaust) by the reference exposure level of 5 $\mu g/m^3$.
[2] $PM_{2.5}$ concentration determined for MEIR identified at 564430.80 m E 4191448.62 m UTM N
[3] The emissions associated with use of Tier 2 Engines with Level 3 VDECS for all construction equipment rated for 25 horsepower or greater, as required with COA.
Emissions Source: Attachment A.
Thresholds Source: Bay Area Air Quality Management District (BAAQMD). 2022. CEQA Air Quality Guidelines. April 20.

As noted in Table 6 above, the proposed project's construction emissions would not exceed any applicable BAAQMD significance threshold after incorporating City Standard COA "Air Quality–Diesel Particulate Matter Controls During Construction." Therefore, project construction would not result in significant health impacts to nearby sensitive receptors with incorporation of the identified City Standard COAs.

Criterion 2: Project-Specific Operational Toxic Air Pollutants

While the proposed project is a mixed-use project primarily consisting of residential and retail uses, it would install an emergency generator on-site, which is a stationary operational emissions source of TACs during its operation. However, following BAAQMD emergency generator PTE assumptions, the proposed emergency generator would likely not exceed 100 hours of emergency operation per year, and would

additionally be expected to run for approximately 30 minutes a day, once a week. As demonstrated in Table 5, Operational Regional Emissions, the proposed project emergency generator would not generate a level of TAC emissions above BAAQMD significance thresholds and would be required to demonstrate operational emissions compliance with BAAQMD standards through a separately issued Engine Permit prior to operations. In addition, the intermittent and infrequent use of the emergency generator would ensure that it would not generate a significant amount of localized TAC emissions over time. Traffic generated by the project would consist of mostly light-duty gasoline powered vehicles, which are not a significant source of TAC and air pollutant emissions. Thus, the proposed project would not generate a significant amount of DPM or other TAC emissions during operation and would not result in significant health impacts to nearby sensitive receptors during operation.

Criterion 3: Cumulative Health Risk Assessment

The BAAQMD recommends assessing the potential cumulative impacts from sources of TACs within 1,000 feet of a project. As a result, a cumulative HRA was performed that examined the cumulative impacts of the proposed project's construction emissions and sources of TAC emissions within 1,000 feet of the proposed project. As previously discussed, the MEIR was determined to be a multi-family apartment residence located approximately 200 feet northeast of the project site at 2259 Bancroft Way.

Impacts for the cumulative sources were estimated using BAAQMD guidance and tools developed for the purpose of Screening Local Risks and Hazards as described below:

- **Stationary Source Risk and Hazard Screening Tools**. This Geographic Information System (GIS) tool contains an up-to-date database with information on permitted stationary sources in the BAAQMD. It is designed to provide screening-level risk and hazards risks and hazards (cancer risk, chronic hazard index and $PM_{2.5}$ concentrations) for stationary sources to inform environmental review for proposed projects. The risks are calculated at each facility centroid and were estimated by aggregating individual source emissions for that facility. The screening approach relies on numerous conservative default assumptions that are not facility specific, and thus, the estimates are not reflective of actual cancer risks likely to be experienced by nearby receptors. To adjust the screening values based on distance from the source to the receptor, the Air District provides source-specific distance decay factors. If a facility's screening values (adjusted using the decay factors, as appropriate) are below the threshold, it is likely that the facility would pass a more site-specific, detailed modeling analysis. The data in the tool used for this report represents 2021 emissions data. The map used was last updated on April 10, 2023.
- **Roadway Data Layers.** The roadway screening data layers provide conservative estimates of the cancer risks, hazards, and $PM_{2.5}$ concentrations for all Bay Area highways and surface streets. The roadway map was developed with a bottom-up approach relying on county-specific vehicle splits for surface streets and truck fractions from the California Department of Transportation (Caltrans) performance monitoring data for California freeways. The emissions for the roadways are calculated using the factors from the latest version of EMFAC2021. The road layer data is in a Raster file (.TIF) format that can be used to determine the risk and hazard estimates for each

location of interest. The latest available data files (dated December 8, 2022) were used for this analysis.

- **Rail and Railyard Screening Layers.** The rail screening data layers contain estimated cancer risks, hazards, and $PM_{2.5}$ concentrations from diesel locomotives and select railyards within the Bay Area. The BAAQMD calculated results are based on the emissions from Class I freight rail lines as well as commuter/passenger rail lines. The rail source map also incorporates the health impacts from select railyards in West Oakland and Richmond-North Richmond-San Pablo, analyzed as part of AB 617. The data was developed from a bottom-up emissions inventory of $PM_{2.5}$ and diesel PM was developed based on the arrival/departure schedule for commuter/passenger trains and fuel consumption rates for the two major freight rail lines operating in the Bay Area. The rail data is in a Raster file (.TIF) format that can be used to determine the risk and hazard estimates for each location of interest. The latest available data file (dated January 30, 2023) was used for this analysis.

  The cumulative health risk results during project construction, including health risks from the existing stationary sources, roadway, and rail data from the BAAQMD sources above are summarized in Table 7.

Table 7: Summary of the Cumulative Health Impacts at the MEIR during Construction

Notes:
All Risks and Hazards for Permitted Stationary Sources are maximum values and not adjusted for distance from MEIR
$PM_{2.5}$ = particulate matter less than 2.5 microns in diameter
$\mu g/m^3$ = micrograms per cubic meter
BAAQMD = Bay Area Air Quality Management District
MEIR = Maximally Exposed Individual Receptor is at 564430.80 m Easting 4191448.62 m Northing
$PM_{2.5}$ = particulate matter less than 2.5 microns in diameter
TAC = toxic air contaminant

1 The MEIR is a multi-family apartment residence located approximately 200 feet northeast of the project site at 2259 Bancroft Way.

2 The mitigated project construction cancer risk and chronic non-cancer hazard estimates shown here incorporate the use of Tier 2 Engines with Level 3 VDECS all construction equipment rated for 25 horsepower or greater, as per Berkeley Standard COA.

3 BAAQMD Roadway layers provide results for the combined contribution of all freeways and surface streets at each receptor and therefore impacts are not from a single surface street or freeway but an aggregate of their impacts. The impact of the roadways will depend both on their traffic volume and proximity. High traffic roadways emit TACs at much higher rates than surface streets, but their impacts are dissipated by distance. Nearby surface streets have lower traffic volumes and emissions, but their impact is more localized. The nearest contributing roadway with high traffic values is Shattuck Avenue which is located adjacent to the east of the project site.

4 BAAQMD rail and rail yard layers provide results that include the contribution of all rail lines and rail yards at each receptor and therefore impacts are not from a particular rail line. However, only the closest rail lines will contribute materially to the reported risk value at each receptor. The BAAQMD Rail Raster file had no data for the locations queried.

Source: Attachment A

As noted in Table 8, the cumulative impacts from mitigated project construction and existing sources of TACs would be less than the BAAQMD cumulative thresholds of significance for cancer risk and non-cancer chronic hazard and annual $PM_{2.5}$ concentrations. Therefore, the proposed project along with cumulative sources of TAC emissions within 1,000 feet would be below the BAAQMD's cumulative thresholds of significance and would not be cumulatively considerable or result in a significant impact.

The Project as a Receptor

The project would locate new sensitive receptors (residents) that could be subject to existing sources of TACs at the project site. However, the California Supreme Court concluded in *California Building Industry Association v. BAAQMD* that agencies generally subject to CEQA are not required to analyze the impact of existing environmental conditions on a project's future users or residents. An analysis of cumulative TAC sources with the proposed project as a receptor is provided for informational purposes below.

To determine the necessity of measures beyond those already required for the proposed project through compliance with regulations, the BAAQMD screening analysis was applied at the project site to evaluate whether existing TACs could adversely affect individuals living within the proposed project. The BAAQMD-provided tools for screening potential sources of TACs were used for this purpose.

Table 8 summarizes the cumulative health impacts at the project site at project buildout.

Table 8: Summary of the Cumulative Health Impacts at the Project Site

[1] BAAQMD Roadway layers provide results for the combined contribution of all freeways and surface streets at each receptor and therefore impacts are not from a single surface street or freeway but an aggregate of their impacts. The impact of the roadways will depend both on their traffic volume and proximity. High traffic roadways emit TACs at much higher rates than surface streets, but their impacts are dissipated by distance. Nearby surface streets have lower traffic volumes and emissions, but their impact is more localized. The nearest contributing roadway with high traffic values is Shattuck Avenue which is located adjacent to the east of the project site.
Source: Attachment A.

As shown in Table 8, the cumulative health impacts to the future on-site residents from existing TAC emission sources located within 1,000 feet of the project site are below BAAQMD's cumulative significance threshold for cancer risk, chronic hazards and annual $PM_{2.5}$ concentrations. As such, the proposed project would result in a less than significant cumulative health impact related to exposing sensitive receptors to substantial concentrations of pollutants. Thus, the cumulative health risk impacts from project construction and operation would be less than significant.

Criterion 4: CO Hotspot

As discussed under Impact AIR-2, the proposed project's operational CO hotspot impact would be less than significant.

Impact AIR-4: Would the project result in other emissions (such as those leading to odors or) adversely affecting a substantial number of people?

Less than significant impact. The ability to detect odors varies considerably among the populations and is subjective. The BAAQMD does not have a recommended odor threshold for construction activities. However, the BAAQMD recommends operational screening criteria based on the distance between receptors and types of sources known to generate odors.

Project construction would generate diesel exhaust and ROGs; however, these emissions would disperse rapidly from the project site and therefore would not create significant odors affecting a substantial number of people. As such, construction odor impacts would be less than significant.

Land uses typically associated with objectionable odors include wastewater treatments plants, compost facilities, landfills, solid waste transfer stations, fiberglass manufacturing facilities, paint/coating operations (e.g., auto body shops), dairy farms, petroleum refineries, asphalt batch plants, chemical manufacturing, and food manufacturing facilities, as shown in Table 10.[12]

Table 9: BAAQMD Odor Screening-level Distances Thresholds

Land Use/Type of Operation	Project Screening Distance
Wastewater Treatment Plant	2 miles
Wastewater Pumping Facilities	1 mile
Sanitary Landfill	2 miles
Transfer Station	1 mile
Composting Facility	1 mile
Petroleum Refinery	2 miles
Asphalt Batch Plant	2 miles
Chemical Manufacturing	2 miles

[12] Bay Area Air Quality Management District (BAAQMD). 2022. BAAQMD CEQA Guidelines, Chapter 5 Project-level Air Quality Impacts, Table 5-4, Odor Screening Distances. April 20.

Land Use/Type of Operation	Project Screening Distance
Fiberglass Manufacturing	1 mile
Painting/Coating Operations	1 mile
Rendering Plant	2 miles
Coffee Roaster	1 mile
Food Processing Facility	1 mile
Confined Animal Facility/Feed Lot/Dairy	1 mile
Green Waste and Recycling Operations	1 mile
Metal Smelting Plants	2 miles
Source: Bay Area Air Quality Management District (BAAQMD) 2022.	

The proposed project would involve the development of residences whose operations could lead to odors from associated laundry cleaning, vehicle exhaust, outdoor cooking, and waste disposal. However, such odors generated by project operation would be small in quantity and duration and would not pose an objectionable odor impact to future and existing receptors.

The proposed project would also generate diesel exhaust associated with the operation of the emergency generator. However, operation of this generator would be infrequent, and odors associated with this emission would disperse rapidly from the project site and therefore would not create significant odors affecting a substantial number of people. As such, operational odor impacts would be less than significant.

The proposed project, during operation, would also be an odor receptor. Using Google Maps, nine automobile shops, one coffee roaster, and one asphalt batch plant were identified within the associated screening distances, as provided in the 2022 BAAQMD CEQA Guidelines. Public records retrieved from the BAAQMD show that between 2020 and 2023, four confirmed complaints were filed for The Smokehouse Restaurant located at 3115 Telegraph Avenue in Berkeley, and 21 confirmed odor complaints were filed for the asphalt plant at 699 Virginia Street, approximately 1.9 miles west of the project site. Based on the BAAQMD odor guidelines,[13] odor impacts would be significant if more than five confirmed odor complaints are received for a facility or location per year averaged over the past three years. Since the asphalt batch plant received 21 odor complaints between 2020 and 2023, it would exceed the odor screening thresholds established by the BAAQMD. However, according to BAAQMD meteorological data, the wind in the central San Francisco Bay Area blows from the southwest to the northeast on average, with high wind gusts usually blowing from north to south.[14] Given that the proposed project is approximately 1.9 miles directly east of the asphalt plant at 699 Virginia Street, any odors from the asphalt batch plant would likely be faint and largely be carried by the wind in directions

[13] Bay Area Air Quality Management District (BAAQMD). 2022. BAAQMD CEQA Guidelines, Chapter 5 Project-level Air Quality Impacts. April 20.

[14] Bay Area Air Quality Management District (BAAQMD). 2023. Air Monitoring Data.

away from the project site. As such, the odor impact for the project operation would be less than significant based on the collective information received upon which this analysis was based.

Recommended Measures

Standard Conditions of Approval

Public Works–Apply BAAQMD-Recommended Measures During Construction

For all proposed projects, BAAQMD recommends implementing all the Basic Construction Mitigation Measures,[15] listed below to meet the Best Management Practices threshold for fugitive dust:

A. All exposed surfaces (e.g., parking areas, staging areas, soil piles, graded areas, and unpaved access roads) shall be watered two times per day.

B. All haul trucks transporting soil, sand, or other loose material off-site shall be covered.

C. All visible mud or dirt track-out onto adjacent public roads shall be removed using wet power vacuum street sweepers at least once per day. The use of dry power sweeping is prohibited.

D. All vehicle speeds on unpaved roads shall be limited to 15 miles per hour (mph).

E. All roadways, driveways, and sidewalks to be paved shall be completed as soon as possible. Building pads shall be laid as soon as possible after grading unless seeding or soil binders are used.

F. Idling times shall be minimized either by shutting equipment off when not in use or reducing the maximum idling time to 5 minutes (as required by the California Airborne Toxics Control Measure [ATCM] Title 13, Section 2485 of California Code of Regulations). Clear signage shall be provided for construction workers at all access points.

G. All construction equipment shall be maintained and properly tuned in accordance with manufacturer's specifications. All equipment shall be checked by a certified mechanic and determined to be running in proper condition prior to operation.

I. Post a publicly visible sign with the telephone number and person to contact at the City of Berkeley regarding dust complaints. This person shall respond and take corrective action within 48 hours. The BAAQMD's phone number shall also be visible to ensure compliance with applicable regulations.

Air Quality–Diesel Particulate Matter Controls During Construction

All off-road construction equipment used for projects with construction lasting more than 2 months shall comply with one of the following measures:

A. The project applicant shall prepare a Health Risk Assessment (HRA) that demonstrates the project's on-site emissions of diesel particulate matter during construction will not exceed health risk screening criteria after a screening-level health risk assessment is conducted in

[15] Bay Area Air Quality Management District (BAAQMD) Basic Construction Mitigation Measures are considered standard construction measures, and do not constitute any project-specific mitigation.

accordance with current guidance from BAAQMD and Office of Environmental Health Hazard Assessment (OEHHA). The HRA shall be submitted to the Public Works Department for review and approval prior to the issuance of building permits.

B. All construction equipment shall be equipped with Tier 2 or higher engines and the most effective Verified Diesel Emission Control Strategies (VDECS) available for the engine type (Tier 4 engines automatically meet this requirement) as certified by the ARB. The equipment shall be properly maintained and tuned in accordance with manufacturer specifications.

C. In addition, a Construction Emissions Minimization Plan (Emissions Plan) shall be prepared that includes the following:
   1. An equipment inventory summarizing the type of off-road equipment required for each phase of construction, including the equipment manufacturer, equipment identification number, engine model year, engine certification (tier rating), horsepower, and engine serial number. For all VDECS, the equipment inventory shall also include the technology type, serial number, make, model, manufacturer, ARB verification number level, and installation date.
   2. A Certification Statement that the Contractor agrees to comply fully with the Emissions Plan and acknowledges that a significant violation of the Emissions Plan shall constitute a material breach of contract. The Emissions Plan shall be submitted to the Public Works Department for review and approval prior to the issuance of building permits.

Mitigation Measures

None.

CONCLUSION

Based on the project understanding described above, the proposed project would result in less than significant impacts to air quality after incorporation of the City's Standard COAs "Public Works –Apply BAAQMD-Recommended Measures During Construction" and "Air Quality–Diesel Particulate Matter Controls During Construction."

Thank you for the opportunity to conduct an air quality impacts analysis. Please feel free to contact Phil Ault (559.930.6191 or pault@fcs-intl.com) should you have any questions.

Sincerely,

Philip Ault, Director of Noise and Air Quality
FirstCarbon Solutions
2999 Oak Road, Suite 250
Walnut Creek, CA 94597

Table of Contents

1. Basic Project Information

1.1. Basic Project Information

1.2. Land Use Types

1.3. User-Selected Emission Reduction Measures by Emissions Sector

2. Emissions Summary

2.3. Construction Emissions by Year, Mitigated

2.5. Operations Emissions by Sector, Unmitigated

2.6. Operations Emissions by Sector, Mitigated

3. Construction Emissions Details

3.2. Demolition (2024) - Mitigated

3.4. Site Preparation (2024) - Mitigated

3.6. Grading (2024) - Mitigated

3.8. Building Construction (2024) - Mitigated

3.10. Building Construction (2025) - Mitigated

3.12. Building Construction (2026) - Mitigated

3.14. Paving (2026) - Mitigated

3.16. Architectural Coating (2025) - Mitigated

3.18. Architectural Coating (2026) - Mitigated

4. Operations Emissions Details

4.1. Mobile Emissions by Land Use

4.1.1. Unmitigated

4.1.2. Mitigated

4.2. Energy

4.2.1. Electricity Emissions By Land Use - Unmitigated

4.2.2. Electricity Emissions By Land Use - Mitigated

4.2.3. Natural Gas Emissions By Land Use - Unmitigated

4.2.4. Natural Gas Emissions By Land Use - Mitigated

4.3. Area Emissions by Source

4.3.1. Unmitigated

4.3.2. Mitigated

4.4. Water Emissions by Land Use

4.4.1. Unmitigated

4.4.2. Mitigated

4.5. Waste Emissions by Land Use

4.5.1. Unmitigated

4.5.2. Mitigated

4.6. Refrigerant Emissions by Land Use

4.6.1. Unmitigated

4.6.2. Mitigated

4.8. Stationary Emissions By Equipment Type

4.8.1. Unmitigated

4.8.2. Mitigated

4.9. User Defined Emissions By Equipment Type

4.9.1. Unmitigated

4.9.2. Mitigated

8. User Changes to Default Data

1. Basic Project Information

1.1. Basic Project Information

Data Field	Value
Project Name	2274 Shattuck Avenue Mixed-Use Project - with SCoA v2
Construction Start Date	1/2/2024
Operational Year	2027
Lead Agency	—
Land Use Scale	Project/site
Analysis Level for Defaults	County
Windspeed (m/s)	3.90
Precipitation (days)	44.2
Location	2274 Shattuck Ave., Berkeley, CA 94704, USA
County	Alameda
City	Berkeley
Air District	Bay Area AQMD
Air Basin	San Francisco Bay Area
TAZ	1529
EDFZ	1
Electric Utility	Pacific Gas & Electric Company
Gas Utility	Pacific Gas & Electric
App Version	2022.1.1.21

1.2. Land Use Types

Land Use Subtype	Size	Unit	Lot Acreage	Building Area (sq ft)	Landscape Area (sq ft)	Special Landscape Area (sq ft)	Population	Description

Apartments High Rise	227	Dwelling Unit	0.46	213,217	4,084	0.00	634	—
User Defined Retail	0.86	User Defined Unit	0.02	865	0.00	0.00	—	Integrated building retail to mostly serve residents.
Other Asphalt Surfaces	1.33	1000sqft	0.03	0.00	0.00	0.00	—	—

1.3. User-Selected Emission Reduction Measures by Emissions Sector

Sector	#	Measure Title
Construction	C-6	Use Diesel Particulate Filters
Transportation	T-1	Increase Residential Density
Transportation	T-3	Provide Transit-Oriented Development
Transportation	T-10	Provide End-of-Trip Bicycle Facilities
Transportation	T-15	Limit Residential Parking Supply
Transportation	T-31-A*	Locate Project in Area with High Destination Accessibility
Transportation	T-33*	Locate Project near Bike Path/Bike Lane
Transportation	T-34*	Provide Bike Parking
Energy	E-13	Install Electric Ranges in Place of Gas Ranges
Water	W-4	Require Low-Flow Water Fixtures

* Qualitative or supporting measure. Emission reductions not included in the mitigated emissions results.

2. Emissions Summary

2.3. Construction Emissions by Year, Mitigated

Criteria Pollutants (lb/day for daily, ton/yr for annual) and GHGs (lb/day for daily, MT/yr for annual)

5.14.2. Mitigated

Land Use Type	Equipment Type	Refrigerant	GWP	Quantity (kg)	Operations Leak Rate	Service Leak Rate	Times Serviced
Apartments High Rise	Average room A/C & Other residential A/C and heat pumps	R-410A	2,088	< 0.005	2.50	2.50	10.0
Apartments High Rise	Household refrigerators and/or freezers	R-134a	1,430	0.12	0.60	0.00	1.00

5.15. Operational Off-Road Equipment

5.15.1. Unmitigated

Equipment Type	Fuel Type	Engine Tier	Number per Day	Hours Per Day	Horsepower	Load Factor

5.15.2. Mitigated

Equipment Type	Fuel Type	Engine Tier	Number per Day	Hours Per Day	Horsepower	Load Factor

5.16. Stationary Sources

5.16.1. Emergency Generators and Fire Pumps

Equipment Type	Fuel Type	Number per Day	Hours per Day	Hours per Year	Horsepower	Load Factor
Emergency Generator	Diesel	0.14	0.50	100	402	0.73

8. User Changes to Default Data

Screen	Justification
Land Use	Applicant site plan provided indicated building square footage, lot acreage, and population.
Construction: Construction Phases	Applicant-provided construction schedule.
Operations: Hearths	Project is all-electric.
Operations: Energy Use	Proposed project would provide central water heating using natural gas. The 2019 California Residential Appliance Saturation Study (RASS) estimated that multifamily residences have an average appliance saturation of 69%. Standard guidance from the Sacramento Metropolitan Air Quality Management District (SMAQMD) recommends using RASS percentages to calculate reductions from CalEEMod defaults. The proposed project would not utilize natural gas for uses not subject to Title 24.
Operations: Fleet Mix	Project is largely residential and would thus mostly consist of a passenger car fleet mix.
Operations: Emergency Generators and Fire Pumps	Project will include 300kw diesel emergency generator. BAAQMD guidance recommends 0.5 hours/day of testing, once per week, with a maximum expected emergency runtime of 100 hours per year.

Construction: Off-Road Equipment	Tier 2 - with Level 3 VDECS
Construction: Dust From Material Movement	Export Quantities

Shattuck Mixed Use Project

Modeling Parameters for AERMOD Construction Modeling - PM10E as DPM

Source	Description	Source Type	Size	Units	Release Height m	Initial Lateral Dimension m	Initial Vertical Dimension m	Hourly Emission Rate	Emission Units
On-site Construction Equipment[1]	Construction Site	Area	2171.3	m2	5	—	1.4	4.7181E-07	g/m2-s

On-Road Construction Trucks[2,3]	One-Way Route- Shattuck Ave	Line-Volume	218	meters	3.4	6.98	3.16	1.149E-06	g/s
On-Road Construction Trucks[2,3]	One-Way Route- Kala Bagal Way	Line-Volume	224	meters	3.4	6.98	3.16	1.178E-06	g/s

1 Construction exhaust modeled as an area source. Release parameters for construction equipment exhaust modeling from SCAQMD (2008) for gaseous exhaust from construction equipment.

2 Only segments within 1,000 ft of site boundary were modeled.

3 On-Road construction trucks are Vendor and Haul Trucks, as estimated in CalEEMod.

Trucks were modeled as adjacent volume sources following BAAQMD CEQA Guidelines Appendix E (April 2023). Roadway width -= physical width plus 3 meters on each side for mixing., Truck Height = 4 meters.

Parameters calculated as per BAAQMD 2022 CEQA Guidelines and US EPA Haul Road Workgroup Final Report released on March 2, 2012 which suggests the use of Adjacent Volume Sources to represent the haul road.

Reference: BAAQMD 2022 CEQA Guidelines Appendix E: Table 11 Recommended Volume Source Configuration for Construction Projects

Health Risk Calculations - Construction Scenario - Off-Site Worker Cancer Risk

Shattuck Mixed Use Project (Maximally Exposed Off-Site Worker)

Maximally Exposed Receptor Location (UTM)	
564369.64 m E	4191401.17 m N
Latitude	37.867813
Longitude	-122.268155

AERMOD Concentration DPM	0.06963	µg/m^3
Worker Adjustment Factor	4.2	
Exposure Concentration	0.292446	µg/m^3
Construction Duration	2.17	years
Calculated Cancer Risk =	**1.57E-06**	

Cancer = Dose · CPF

Dose = Accumulated dose for an individual breathing carcinogen over exposure time
CPF = cancer potency factor (mg/kg-day)$^{-1}$ for Toxic Air Contaminant of Concern
where
Dose = (CF · EF· C_{DPM} · DBR · ED ·ASF) ÷ AT

Following BAAQMD and OEHHA Guidance for Off-Site Workers

Factor	Description	Units	Value
CF	Conversion factor	(mg·m^3/µg-L)	1E-06
CPF_{DPM}	Cancer potency factor	(mg/kg-day)$^{-1}$	1.1
EF	Exposure Frequency	days per year	250
C_{DPM}	Concentration of DPM	(µg/m3)	0.292446
DBR	Daily Breathing Rate	L/kg-8 hours	230 (95% 8-hour breathing rate for 16- to 70 year olds)
ED	Exposure Duration	years	2.17
ASF	Age Sensitivity Factor	unitless	1 (for ages >=16 years)
AT	Averaging Time	days	25,550 days, equivalent to 70-year lifespan

Health Risk Calculations - Construction Scenario - Student Cancer Risk

Shattuck Mixed Use Project (School Receptors ages 2 to <16 years)

RISK SCENARIO SETTINGS

Receptor Type: Resident
Scenario: Cancer
Calculation Method: HighEnd

****
EXPOSURE DURATION PARAMETERS FOR CANCER

Start Age: -0.25
Total Exposure Duration: 1.917

Exposure Duration Bin Distribution
3rd Trimester Bin: 0.25
0<2 Years Bin: 1.917
2<9 Years Bin: 0
2<16 Years Bin: 0
16<30 Years Bin: 0
16 to 70 Years Bin: 0

****
PATHWAYS ENABLED

NOTE: Inhalation is always enabled and used for all assessments. The remaining pathways are only used for cancer and noncancer chronic assessments.

Inhalation: True
Soil: False
Dermal: False
Mother's milk: False
Water: False
Fish: False
Homegrown crops: False
Beef: False
Dairy: False
Pig: False
Chicken: False
Egg: False

****
INHALATION

Daily breathing rate: RMP

Worker Adjustment Factors
Worker adjustment factors enabled: NO

Fraction at time at home
3rd Trimester to 16 years: OFF
16 years to 70 years: ON

Noise Impact Analysis

FIRSTCARBON SOLUTIONS
FCS INTERNATIONAL, INC.

Memorandum

Date: March 1, 2024

To: Project Applicant

From: Philip Ault, Director of Noise and Air Quality, FirstCarbon Solutions

Subject: Noise Impact Analysis for the 2274 Shattuck Avenue Mixed Use Project in Berkeley, California

At the request of the project applicant, FirstCarbon Solutions (FCS), prepared this memorandum to evaluate noise impacts that could result from the construction and operations of the proposed 2274 Shattuck Avenue Mixed Use Project (proposed project). Supporting documents such as calculation worksheets and other modeling outputs are included as attachments to this memorandum.

PROJECT DESCRIPTION

The project site is located at 2274 Shattuck Avenue in the City of Berkeley, in Alameda County, California.

The project applicant proposes to demolish a portion of the existing commercial structures to construct a 17-story mixed-use building with 227 multi-family apartment dwelling units, ground level lobbies, 865 square feet of retail space, and one parking space, on an approximately 0.51-acre site. The outdoor space would consist of 1,657 square feet of ground level common space, 240 square feet of private patios, and a 5,840-square-foot roof deck with 4,084 square feet of landscaping across the ground level and roof deck. The project site consists of Assessor's Parcel Number (APN) 057-202-800-300 at 2274 Shattuck Avenue. The site would be accessed from a driveway off Shattuck Avenue and a garage off Bancroft Way.

The project site is bounded by the Berkeley Public Library and Kittredge Street to the north, multi-family apartments to the west, commercial uses and Durant Avenue to the south, and Shattuck Avenue and commercial uses to the east.

The project site is designated as "Downtown" by the City of Berkeley General Plan (General Plan) and "Corridor" by the Downtown Area Plan. Additionally, it is zoned as the Downtown Mixed-Use District "C-DMU" by the City of Berkeley Zoning Ordinance. The C-DMU zoning district permits residential uses with a Use Permit.

The proposed project would require a Use Permit, Zoning Certificate, and Design Review (this is not an exhaustive list). The project applicant is requesting a State Density Bonus to increase the number of allowable units (from 160 to 227) and waivers for floor area ratio (FAR), a reduction in setback requirements, and a reduction of provided open space.

NOISE AND VIBRATION FUNDAMENTALS

A summary of the fundamentals of noise and vibration are provided as an attachment to this document.

REGULATORY SETTING

Federal Regulations

Currently, no federal noise standards regulate environmental noise associated with temporary construction activities or the long-term operations of development projects. As such, both temporary and long-term noise impacts resulting from the proposed project would be largely regulated or otherwise evaluated by State and City of Berkeley standards designed to protect public well-being and health.

Federal Transit Administration

Though not regulatory in nature, vibration impact criteria for buildings and other structures have been established by the Federal Transit Authority (FTA), as building and structural damages are generally the foremost concern when evaluating the impacts of construction-related vibrations. For the evaluation of the proposed project's construction-related vibration impacts, the following FTA vibration impact criteria, shown in Table 1, are used given the absence of applicable federal, State, and City standards specific to temporary construction activities and their potential to result in building and structural damages.[1]

Table 1: Federal Transit Administration Construction Vibration Impact Criteria

Building Category	PPV (in/sec)
I. Reinforced—Concrete, Steel or Timber (no plaster)	0.5
II. Engineered Concrete and Masonry (no plaster)	0.3
III. Non-engineered Timber and Masonry Buildings	0.2
IV. Buildings Extremely Susceptible to Vibration Damage	0.12
Notes: PPV = peak particle velocity VdB = vibration measured as root mean square (rms) velocity in decibels of 1 microinch per second Source: Federal Transit Administration (FTA). 2018. Transit Noise and Vibration Impact Assessment Manual.	

[1] Federal Transit Administration (FTA). 2018. Transit Noise and Vibration Impact Assessment Manual.

State Regulations

2017 General Plan Guidelines

The State of California's 2017 General Plan Guidelines propose county and City standards for acceptable exterior noise levels based on land use. These standards are incorporated into land use planning processes to prevent or reduce noise and land use incompatibilities. The State's suggested compatibility considerations between various land uses and exterior noise levels are not regulatory in nature but are recommendations intended to aid communities in determining their own noise-acceptability standards.

Local Regulations

The project site is located within the City of Berkeley. The Berkeley General Plan and Berkeley Municipal Code (Municipal Code) contain guidelines, standards, and regulations for the control of noise.

Berkeley General Plan

The Environmental Management (EM) Element of the Berkely General Plan serves as the City's noise element and contains several noise policies, which require that standard noise conditions be imposed on all planning decisions.[2] The Berkeley General Plan does not establish any quantitative noise standards or thresholds of significance, though Policy EM-47 outlines residences, child care centers, hospitals, nursing homes, schools, and parks as noise-sensitive uses. The Berkeley General Plan includes the following noise-related policies:

Policy EM-43 **Noise Reduction:** Reduce significant noise levels and minimize new sources of noise.

Policy EM-44 **Noise Prevention and Elimination:** Protect public health and welfare by eliminating existing noise problems where feasible and by preventing significant future degradation of the acoustic environment.

Actions

A. Incorporate noise considerations into land use planning decisions.
B. Ensure the effective enforcement of City, State, and Federal noise levels by appropriate City departments.
C. Coordinate with the California Occupational Safety and Health Administration (Cal-OSHA) to provide information on and enforcement of occupational noise requirements within the City of Berkeley
D. Support Federal and State legislation to lower allowable noise level on all motor vehicles.

Policy EM-45 **Traffic Noise:** Work with local and regional agencies to reduce local and regional traffic, which is the single largest source of unacceptable noise in the City.

[2] City of Berkeley. 2002. Berkeley General Plan.

Policy EM-46 **Noise Mitigation:** Require operational limitations and all feasible noise buffering for new uses that generate significant noise impacts near residential, institutional, or recreational uses.

Policy EM-47 **Land Use Compatibility:** Ensure that noise-sensitive uses, including, but not limited to, residences, child care centers, hospitals, and nursing homes, are protected from detrimental noise levels.

Berkeley Municipal Code

The Municipal Code establishes a number of regulations that would apply to the proposed project's temporary construction activities and long-term operations. Section 13.40.050 contains the Municipal Code's exterior noise standards.

Section 13.40.050–Exterior Noise Standards

A. Maximum permissible sound levels shall be determined by the zoning district of the property subject to the noise, not the property from which the noise originates.
   1. The noise standards for the various categories of land use in Table 13.40-1 [see Table 5] or 13.40-2 [see Table 3] shall, unless otherwise specifically indicated in other codes, apply to all such property within a designated zone.
   2. No person shall operate or cause to be operated any source of sound at any location within the incorporated City or allow the creation of any noise on property owned, leased, occupied or otherwise controlled by such person, which causes the sound level when measured on any other property to exceed:
      (a) The noise standard for that land use as specified in Table 13.40-1 [see Table 2] for a cumulative period of more than 30 minutes in any hour; or
      (b) The noise standard for that land use as specified in Table 13.40-1 [see Table 2] plus 5 dBA for a cumulative period of more than 15 minutes in any hour; or
      (c) The noise standard for that land use as specified in Table 13.40-1 [see Table 2] plus 10 dBA for a cumulative period of more than 5 minutes in any hour; or
      (d) The noise standard for that land use as specified in Table 13.40-1 [see Table 2] plus 15 dBA for a cumulative period of more than 1 minute in any hour; or
      (e) The noise standard for that land use as specified in Table 13.40-1 [see Table 2] plus 20 dBA for any period of time.

Table 2: Exterior Noise Limits – Levels not to be exceeded more than 30 minutes any hour

Zoning District	Time Period	Noise Level (dBA)
R-1, R-2, R-1A, R-2A, and ESR	7:00 a.m. – 10:00 p.m.	55
	10:00 p.m. – 7:00 a.m.	45
R-3 and above	7:00 a.m. – 10:00 p.m.	60
	10:00 p.m. – 7:00 a.m.	55

Zoning District	Time Period	Noise Level (dBA)
Commercial	7:00 a.m. – 10:00 p.m.	65
	10:00 p.m. – 7:00 a.m.	60
Industry	Anytime	70
Source: Berkeley Municipal Code Table 13.40-1, "Exterior Noise Limits."		

3. If the measured ambient noise level is greater than the level permissible within any of the noise limit categories above, the sound level when measured on any other property shall not exceed:
   (a) The ambient noise level for a cumulative period of more than 30 minutes in any hour; or
   (b) The ambient noise level plus 5 dBA for a cumulative period of more than 15 minutes in any hour; or
   (c) The ambient noise level plus 10 dBA for a cumulative period of more than 5 minutes in any hour; or
   (d) The ambient noise level plus 15 dBA for a cumulative period of more than 1 minute in any hour; or
   (e) The ambient noise level plus 20 dBA for any period of time.
4. If the measurement location is on a boundary between two different zones, the sound level limit applicable to the quieter noise zone shall apply.
5. If possible, the ambient noise level may be measured at the same location along the property line utilized in subsection A.2 of this section with the alleged offending noise source inoperative. If the intruding noise source is continuous and cannot reasonably be discontinued or stopped for a time period whereby the ambient noise level can be measured, the ambient noise level may be determined by traveling away from the noise source to a point where a steady state decibel reading is achieved. If this test is not possible, the noise level measured while the source is in operation shall be compared directly to the noise level standards.

B. The classification of additional areas of the community not listed in Table 13.40-1 [see Table 2] in terms of environmental noise zones shall be determined by the EHD. Industrial noise limits are intended primarily for use at the boundary of industrial zones rather than for noise reduction within the zone.

Section 13.40.060 contains the Municipal Code's interior noise standards.

Section 13.40.060–Interior Noise Standards

A. Maximum Permissible Dwelling Interior Sound Levels

1. The interior noise standards for multi-family residential dwellings as presented in Table 13.40-2 [see Table 3] shall apply, unless otherwise specifically indicated in other codes, within all such dwellings with windows in their normal seasonal configuration.

Table 3: Interior Noise Limits

Zoning District	Time Interval	Allowable Interior Noise Level (dBA)
All	10:00 p.m. – 7:00 a.m.	40
	7:00 a. m. – 10:00 p.m.	45
Source: Berkeley Municipal Code Table 13.40-2, "Interior Noise Limits."		

2. No person shall operate or cause to be operated within a multi-family dwelling unit any source of sound or allow the creation of any noise which causes the sound level when measured inside a neighboring dwelling unit to exceed:
   (a) The noise standard as specified in Table 13.40-2 [see Table 3] for a cumulative period of more than 5 minutes in any hour; or
   (b) The noise standard as specified in Table 13.40-2 [see Table 3] plus five dBA for a cumulative period of more than one minute in any hour; or
   (c) The noise standard as specified in Table 13.40-2 [see Table 3] plus 10 dBA for any period of time.
3. If the measured ambient noise level is greater than the level permissible within any of the noise limit categories above, the sound level when measured on the other property shall not exceed:
   (a) The ambient noise level for a cumulative period of more than 5 minutes in any hour; or
   (b) The ambient noise level plus 5 dBA for a cumulative period of more than 1 minute in any hour; or
   (c) The ambient noise level plus 10 dBA for any period of time.

Section 13.40.070(B)(7) contains regulations specific to construction and demolition activities.

Section 13.40.070(B)(7)–Construction/Demolition

(a) Operating or causing the operation of any tools or equipment used in construction, drilling, repair, alteration, or demolition work before 7:00 a.m. on a weekday (or before 9:00 a.m. on a weekend or holiday) or after 7:00 p.m. on a weekday (or after 8:00 p.m. on a weekend or holiday) such that the sound therefrom across a residential or commercial real property line violates Section 13.40.050 or 13.40.060, except for emergency work of public service utilities or by variance issued by the EHD. (This section shall not apply to the use of domestic power tools as specified in subsection B.11 of this section.)

(b) *Noise Restrictions at Affected Properties.* Where technically and economically feasible, construction activities shall be conducted in such a manner that the maximum sound levels at affected properties will not exceed those listed in the following schedule:

AT RESIDENTIAL PROPERTIES: Mobile Equipment. Maximum sound levels for nonscheduled, intermittent, short-term operation (less than 10 days) of mobile equipment [see Table 4]:

Table 4: Mobile Equipment Noise Limits

	R-1, R-2 Residential	R-3 and above Multi-Family Residential	Commercial/Industrial
Weekdays 7:00 a.m. to 7:00 p.m.	75 dBA	80 dBA	85 dBA
Weekends 9:00 a.m. to 8:00 p.m. and legal holidays	60 dBA	65 dBA	70 dBA
Source: Berkeley Municipal Code Table 13.40-3.			

Stationary Equipment. Maximum sound levels for repetitively scheduled and relatively long-term operation (period of 10 days or more) of stationary equipment [see Table 4]:

Table 5: Stationary Equipment Noise Limits

	R-1, R-2 Residential	R-3 and above Multi-Family Residential	Commercial/Industrial
Weekdays 7:00 a.m. to 7:00 p.m.	60 dBA	65 dBA	70 dBA
Weekends 9:00 a.m. to 8:00 p.m. and legal holidays	50 dBA	55 dBA	60 dBA
Source: Berkeley Municipal Code Table 13.40-4.			

Section 13.40.070(B)(8) concerns vibrations.

Section 13.40.070(B)(8)–Vibration

Operating or permitting the operation of any device that creates a vibration, which annoys or disturbs at least two or more reasonable persons of normal sensitiveness who reside in separate residences (including apartments and condominiums) at or beyond the property boundary of the source, if on private property, or at least 150 feet (46 meters) from the source, if on a public space or public right-of-way.

(a) Operating or causing the operation of any tools or equipment used in construction, drilling, repair, alteration, or demolition work before 7:00 a.m. on a weekday (or before 9:00 a.m. on a weekend or holiday) or after 7:00 p.m. on a weekday (or after 8:00 p.m. on a weekend or

holiday) such that the sound therefrom across a residential or commercial real property line violates Section 13.40.050 or 13.40.060, except for emergency work of public service utilities or by variance issued by the EHD. (This section shall not apply to the use of domestic power tools as specified in subsection B.11 of this section.)

EXISTING NOISE CONDITIONS

Ambient Noise

Figure 21 of the Berkeley General Plan EM Element indicates that ambient noise levels at and in the vicinity of the project site range between approximately 70 and 75 dBA L_{dn} based on transportation sources such as vehicle traffic along Shattuck Avenue.[3]

THRESHOLDS OF SIGNIFICANCE AND IMPACT ANALYSIS

Thresholds of Significance

According to the California Environmental Quality Act (CEQA) Guidelines, Appendix G, to determine whether impacts related to noise and vibration are significant environmental effects, the following questions are analyzed and evaluated.

Would the proposed project:

a) Generate a substantial temporary or permanent increase in ambient noise levels in the vicinity of the project in excess of standards established in the local general plan or noise ordinance, or applicable standards of other agencies?

b) Generate excessive groundborne vibration or groundborne noise levels?

c) For a project located within the vicinity of a private airstrip or an airport land use plan or, where such a plan has not been adopted, within 2 miles of a public airport or public use airport, would the project expose people residing or working in the project area to excessive noise levels?

Substantial Noise Increase in Excess of Standards

Construction Noise Impacts

For purposes of this analysis, a significant impact would occur if construction activities would generate a substantial temporary increase in ambient noise levels in the vicinity of the proposed project in excess of standards established in the local general plan or noise ordinance, or the applicable standards of other agencies. The Berkeley General Plan does not contain quantitative noise standards for construction activities, and the City has not adopted CEQA-specific thresholds for construction. However, as explained above, the Municipal Code includes quantitative noise limits that would apply to the proposed project's construction activities. Municipal Code Section 13.40.070(B)(7) establishes that construction activities

[3] City of Berkeley. 2002. Berkeley General Plan, Figure 21 "Noise Contours."

occurring before 7:00 a.m. on a weekday (or before 9:00 a.m. on a weekend or holiday) or after 7:00 p.m. on a weekday (or after 8:00 p.m. on a weekend or holiday) shall not exceed the exterior and interior noise limits outlined in Section 13.40.050 and Section 13.40.060, respectively. Municipal Code Section 13.40.070(B)(7) further establishes that, as "technically and economically feasible," construction activities shall adhere to the mobile and stationary equipment noise limits shown above in Table 4 and Table 5, respectively. However, because construction for the proposed project would last longer than 10 days, the Table 5 limits would apply. The following criteria to determine significance are informed by this available regulatory framework. The proposed project's construction noise impact would be considered significant if any of the following were to occur:

- Construction activities occurring before 7:00 a.m. on a weekday (or before 9:00 a.m. on a weekend or holiday) or after 7:00 p.m. on a weekday (or after 8:00 p.m. on a weekend or holiday) would exceed the noise limits shown in Table 2 and Table 3, above.
- Construction activities during other daytime periods would exceed the noise limits shown in Table 2, above, at noise-sensitive receptors.

On-Site Construction Noise Impact

Construction of the proposed project would generate noise during the approximately 44-month schedule of demolition, grading, building construction, finishing, and other construction activities. The proposed project is anticipated to utilize a standard 5-day work week, and construction would occur during standard daytime hours between 7:00 a.m. and 7:00 p.m. Therefore, noise-generating construction activities would not occur during the hours in which the noise limits established by Municipal Code Section 13.40.050 and Section 13.40.060 (shown in Table 2 and Table 3) are applicable to construction activities. As such, the construction of the proposed project would not result in exceedances of the Table 2 and Table 3 noise limits. The proposed project's significance with regard to the Municipal Code Section 13.40.070(B)(7) noise limits contained in Table 2 – which are applicable to daytime construction activities between the hours of 7:00 a.m. and 7:00 p.m. on weekdays – are addressed below.

The proposed project is surrounded by multiple noise-sensitive residential uses along Kittredge Street and Bancroft Way. The nearest such receptors are K Street Flats, a multi-family apartment complex located approximately 90 feet west of the project site at 2020 Kittredge Street; and 2030 Bancroft Way, a multi-family apartment complex located approximately 65 feet south of the project site across Bancroft Way. Both of these receptors are zoned within the Commercial-Downtown Mixed-Use District (C-DMU), meaning that a 70 dBA threshold would apply (see Table 2 commercial zone thresholds for daytime construction between 7:00 a.m. and 7:00 p.m.).[4] Other noise-sensitive receptors, such as the B28 apartment complex (2028 Bancroft Way), Berkeley Park Apartments (2025 Durant Avenue), and Berkely High School (1980 Allston Way) are located farther from the project site and would experience reduced impacts. Therefore, the following analysis focuses on K Street Flats and 2030 Bancroft Way to assess the proposed project's construction noise impact.

[4] City of Berkeley. 2022. Official Zoning Map. Accessed February 29, 2024. https://berkeley.municipal.codes/BMC/OfficialZoningMap.

Noise from demolition and grading activities are typically the foremost concern when evaluating a project's construction noise impact, as demolition and grading activities often require extensive use of heavy-duty, diesel-powered earthmoving equipment that generate substantial noise levels over long usage periods. Other construction activities, such as vertical construction and interior finishing, do not utilize heavy-duty off-road construction equipment to the same extent as demolition and grading activities and therefore typically result in reduced noise impacts. Given this consideration, the following analysis evaluates noise impacts to K Street Flats and 2030 Bancroft Way that may result from the proposed project's demolition and grading activities.

Demolition for the proposed project is anticipated to last approximately two months and would involve demolition of the project site's existing features. Grading is anticipated to last approximately one month and would involve excavation for the proposed project's foundations and other sub-grade features. The majority of the proposed project's demolition and grading activities would be characterized by excavators demolishing the site's existing structures and excavating for the proposed project's foundations. Construction of the foundation for this project will utilize cast-in-place concrete piles. No pile driving will be involved at any point during the construction of the project. Excavators would transfer demolition debris and excavated soils to dumpsters or haul trucks for off-site removal. As excavators work across the approximately half-acre project site, their construction noise levels at K Street Flats and 2030 Bancroft Way would fluctuate depending on their distances from these noise-sensitive receptors. Noise levels would be greater when excavators are in closer proximity and lower when positioned farther away. Given these considerations, noise impacts associated with the proposed project's demolition and grading activities have been evaluated by modeling noise levels that would be associated with two excavators grading a 0.5-acre parcel (similar to the footprint of the proposed project's construction area) in proximity to K Street Flats and 2030 Bancroft Way.

Table 6 shows the proposed project's estimated demolition and grading-related noise levels at K Street Flats and 2030 Bancroft Way. As shown, demolition and grading-related noise levels would not exceed the applicable 70 dBA noise limit established by Municipal Code Section 13.40.070(B)(7) for these receptors that has been adopted as the threshold of significance for this analysis. Noise impacts from other construction phases and activities would not exceed those due to the demolition and grading scenario evaluated by this analysis, and noise impacts at more-distant noise-sensitive receptors would not exceed the impacts that have been estimated for K Street Flats and 2030 Bancroft Way. Therefore, the analysis demonstrates that the proposed project's construction noise impact from on-site activities would be less than significant.

Table 6: Construction Noise Levels–Demolition and Grading

Receptor	Construction Noise Level (dBA L_{eq})	Significance Criteria (dBA L_{eq})	Significant?
K Street Flats	55.2	70	No
2030 Bancroft Way	66.9	70	No

Notes:
dBA = A-weighted decibel
L_{eq} = equivalent continuous sound level

Off-site Construction Noise Impact (Construction Traffic)

Haul truck trips, construction worker vehicle trips, and other construction-related trips would occur over the course of the proposed project's construction. Haul truck trips typically have the greatest potential to result in substantial off-site noise increases along nearby roadways. The previously discussed Municipal Code noise limits have no applicability to road-legal trucks operating on public roads, but the following analysis nevertheless demonstrates that the proposed project's haul trucks would have a nominal and less than significant impact on roadside noise levels in the vicinity of the project site.

Construction of the proposed project could require up to approximately 45 haul truck trips per day to transport excavated soils and fill material to and from the site. This equates to less than six truck trips per hour over the course of a standard construction workday. As explained earlier, the project site is located in an area with existing high levels of transportation noise between 70 and 75 dBA L_{dn}. Typically, an approximate doubling of traffic volumes is required to cause 3 dBA noise increases, which are considered barely noticeable. The proposed project's addition of less than six haul truck trips per hour to surrounding major roadways and haul routes with similar noise levels would represent a small fraction of daily truck traffic, far below the numbers necessary to generate barely noticeable noise increases. As such, the proposed project's haul trucks would not result in noticeable (much less substantial) noise increases along surrounding roadways, and this impact would be less than significant.

Operational Noise Impacts

On-site Operational Noise Impact

For the purposes of this analysis, a significant impact would occur if the proposed project's on-site noise sources (i.e., mechanical equipment, parking lot operations, etc.) would generate a substantial permanent increase in ambient noise levels surrounding the proposed project. The Municipal Code includes quantitative noise limits that would apply to the proposed project's operational noise sources. Municipal Code Section 13.40.050 and Section 13.40.060 contain exterior and interior noise limits (respectively) that would apply to noise generated by the proposed project on-site. Therefore, the proposed project's noise impact from on-site operational sources would be considered significant if any of the following were to occur:

- Noise levels would exceed the exterior noise limits established by Municipal Code Section 13.40.050.
- Noise levels would exceed the interior noise limits established by Municipal Code Section 13.40.060.

The proposed project's on-site noise sources and their potential to result in significant noise impacts are discussed below. As demonstrated, the proposed project would not result in substantial sources of on-site noise, and this impact would be less than significant.

Parking

The proposed project would include limited facilities for parking–just a single parking space. As such, the proposed project's parking facilities and related activities would have no potential to result in exceedances of the Municipal Code's exterior and interior noise limits.

Mechanical Equipment

Noise levels from typical residential heating, ventilation, and air conditioning (HVAC) systems generally range between 50 dBA and 60 dBA at a reference distance of 25 feet. At the distance of the nearest sensitive receptor (2030 Bancroft Way, 65 feet south of the project site), worst-case noise levels would not exceed approximately 52 dBA L_{eq}. This is well below ambient noise levels for the location, which, as noted earlier, range between 70 and 75 dBA L_{dn}. The exterior noise limits established by Municipal Code Section 13.40.050 are adjusted to reflect, at a minimum, the ambient noise level. Thus, the proposed project's HVAC-related noise levels would not exceed ambient noise levels and therefore Municipal Code Section 13.40.050 exterior noise limits, as well. Regarding Municipal Code Section 13.40.060, exterior HVAC noise levels of 52 dBA L_{eq} would not correlate with interior noise levels in excess of the minimum 40 dBA standard. Impacts to more-distant noise-sensitive receptors would be reduced and similarly below Municipal Code noise limits.

Off-Site Operational Noise Impact (Traffic)

For the purposes of this analysis, a significant impact would occur if the proposed project's off-site operational sources (i.e., traffic) would generate a substantial permanent increase in ambient noise levels surrounding the proposed project and any nearby roadways. The City has not adopted traffic-related noise thresholds for CEQA consideration, and neither the Berkeley General Plan nor the Municipal Code contain noise limits, standards, or other thresholds that would apply to traffic generated by the proposed project. However, it is evident that the proposed project would not generate substantial increases in ambient noise levels due to traffic generation. The proposed project is an infill development in Downtown Berkely, a walkable neighborhood that is well-served by high-quality regional and local transit options. The proposed project would include just one parking space, as it is anticipated that most residents will not own personal automobiles. Given these considerations, the proposed project reasonably would not result in substantial traffic generation capable of noticeably increasing noise levels on surrounding roadways, which already experience high levels of traffic and resultant noise levels (as noted, between 70 and 75 dBA L_{dn}). The proposed project would not come close to generating the approximate doubling of traffic necessary to increase existing ambient noise levels by 3 dBA, which represents a barely perceptible noise increase. Overall, the proposed project is the type of project that is encouraged by local, regional, and State planning agencies to reduce traffic levels and the environmental impacts (i.e., noise) associated therewith. Given these considerations, the proposed project would not result in substantial permanent increases in roadways noise levels, and this impact would be less than significant.

EXCESSIVE GROUNDBORNE VIBRATION LEVELS

Construction Vibration Impacts

There are no federal, State, or City standards that would regulate the proposed project's vibration impacts from temporary construction activities, nor are there quantitative thresholds. Therefore, the criteria identified by the FTA in its 2018 Transit Noise and Vibration Impact Assessment manual are used where applicable and relevant to assist in evaluating the proposed project's vibration impacts to surrounding buildings. The proposed project's vibration impacts would be considered significant if any of the following were to occur:

- The proposed project would generate groundborne vibration levels in excess of the FTA criteria shown in Table 1.

Construction of the proposed project would require a variety of large, steel-tracked earthmoving vehicles. According to the FTA, large bulldozers and similar heavy equipment can generate groundborne vibration levels up to 0.089 in/sec peak particle velocity (PPV) at a reference distance of 25 feet. While there are numerous buildings that directly abut the project site, the types of vehicles capable of generating these vibration levels (e.g., large steel-tracked bulldozers and excavators) generally maintain a positional setback distance of at least 10 feet from nearby buildings when operating. At 10 feet, groundborne vibration levels from these vehicles are approximately 0.244 in/sec PPV or lower. This is below the FTA's 0.3 in/sec PPV criteria for engineered concrete and masonry buildings that is applicable to most buildings abutting and surrounding the project site. There are no "non-engineered timber or masonry buildings" or buildings that would be considered "extremely susceptible to vibration damage" in the vicinity of the project site. Therefore, construction of the proposed project would not expose nearby buildings to groundborne vibration levels in excess of their applicable FTA damage criteria, and this impact would be less than significant.

Operational Vibration Impacts

The proposed project would not contain any significant stationary sources of groundborne vibration, such as heavy equipment or industrial operations. Related vehicle travel (i.e., passenger vehicle trips, delivery trucks, etc.) also would not be considered a significant source of vibration, as vehicle travel rarely generates perceptible, much less substantial, groundborne vibration. Therefore, this impact would be less than significant.

EXCESSIVE NOISE LEVELS FROM AIRPORT ACTIVITY

A significant impact would occur if the proposed project would expose people residing or working in the project area to excessive noise levels from aircraft or airport operations.

The project site is not located within two miles of a public or public use airport, nor is it located within any airport influence area. Therefore, the proposed project would not expose people residing or working

in the vicinity to noise levels from airport activity that would be in excess of normally acceptable standards for land use development. No impact would occur.

CONCLUSION

Based on the project understanding described above, the proposed project would result in less than significant impacts related to noise. Thank you for the opportunity to conduct this noise impact analysis. Please feel free to contact Phil Ault (559.930.6191 or pault@fcs-intl.com) should you have any questions.

Sincerely,

Fundamentals of Noise

NOISE AND VIBRATION FUNDAMENTALS

Characteristics of Noise and Descriptors

Sound can be described in terms of its loudness (amplitude) and frequency (pitch). The standard unit of measurement for sound is the decibel, abbreviated dB. Because the human ear is not equally sensitive to sound at all frequencies, the A-weighted scale (dBA) is used to reflect the normal hearing sensitivity range of the human ear. Table 1 provides examples of A-weighted noise levels from common sources. Although the terms "sound" and "noise" are often used synonymously, noise is commonly defined as sound that is either loud, unpleasant, unexpected, or undesired.[1] Because decibels are logarithmic units, they cannot be simply added or subtracted. For example, two cars each producing 60 dBA of noise would not produce a combined 120 dBA.

Table 1: A-Weighted Decibel Scale

Common Noise Sources	Sound Level, dBA
Near Jet Engine	130
Rock and Roll Band	110
Jet Flyover at 1,000 feet	100
Power Motor	90
Food Blender	80
Living Room Music	70
Human Voice at 3 feet	60
Residential Air Conditioner at 50 feet	50
Bird Calls	40
Quiet Living Room	30
Average Whisper	20
Rustling Leaves	10
Notes: These noise levels are approximations intended for general reference and information use. They do not meet the standard required for detailed noise analysis but are provided for the reader to gain a rudimentary concept of various noise levels. Source: Cowan, James P. 1993. Handbook of Environmental Acoustics.	

Table 2 briefly defines common noise measurement descriptors and other sound terminology used in this memorandum.

[1] California Department of Transportation (Caltrans). 2013. Technical Noise Supplement to the Traffic Noise Analysis Protocol.

Table 2: Sound Terminology

Term	Definition
Sound	A vibratory disturbance created by a vibrating object which, when transmitted by pressure waves through a medium such as air, can be detected by a receiving mechanism such as the human ear or a microphone.
Noise	Sound that is loud, unpleasant, unexpected, or otherwise undesirable.
Ambient Noise	The composite of noise from all sources near and far in a given environment.
Decibel (dB)	A unitless measure of sound on a logarithmic scale which represents the squared ratio of sound pressure amplitude to a reference sound pressure. The reference pressure is 20 micropascals, representing the threshold of human hearing (0 dB).
A-Weighted Decibel (dBA)	An overall frequency-weighted sound level that approximates the frequency response of the human ear.
Equivalent Noise Level (L_{eq})	The average sound energy occurring over a specified time period. In effect, L_{eq} is the steady-state sound level that in a stated period would contain the same acoustical energy as the time-varying sound that actually occurs during the same period.
Maximum and Minimum Noise Levels (L_{max} and L_{min})	The maximum or minimum instantaneous sound level measured during a measurement period.
Day-Night Level (DNL or L_{dn})	The energy average of the A-weighted sound levels occurring during a 24-hour period, with 10 dB added to the A-weighted sound levels occurring between 10:00 p.m. and 7:00 a.m. (nighttime).
Community Noise Equivalent Level (CNEL)	The energy average of the A-weighted sound levels occurring during a 24-hour period, with 5 dB added to the A-weighted sound levels occurring between 7:00 p.m. and 10:00 p.m. and 10 dB added to the A-weighted sound levels occurring between 10:00 p.m. and 7:00 a.m.
Statistical Descriptor (L_X)	L_X is used to represent the noise level exceeded X% of a specified time period. For example, L_{90} represents the noise level that is exceeded 90% of a specified time period. L_{90} is commonly used to represent ambient or background steady-state noise levels.

Effects of Environmental Noise

The degree to which noise can impact an environment ranges from levels that interfere with speech and sleep to levels that can cause adverse health effects. Most human response to noise is subjective. Factors that influence individual responses may include the intensity, frequency, and pattern of noise;

the amount of background or existing noise present; and the nature of work or human activity that is exposed to intruding noise.

According to the National Institute of Health (NIH), extended or repeated exposure to sounds at or above 85 dB can cause hearing loss. Sounds of 75 dBA or less, even after continuous and repeated exposure, are unlikely to cause hearing loss.[2] The World Health Organization (WHO) reports that adults should not be exposed to sudden "impulse" noise events of 140 dB or greater. For children, this limit is 120 dB.[3]

Exposure to elevated nighttime noise levels can disrupt sleep, leading to increased levels of fatigue and decreased work or school performance. For the preservation of healthy sleeping environments, the WHO recommends that continuous interior noise levels should not exceed 30 dBA L_{eq} and that individual noise events of 45 dBA or higher be limited.[4]

Some epidemiological studies have shown a weak association between long-term exposure to noise levels of 65 to 70 dBA L_{eq} or greater and cardiovascular effects, including ischemic heart disease and hypertension. However, at this time, the relationship is largely inconclusive.

It is generally accepted that people with normal hearing sensitivity can barely perceive a 3 dBA change in noise levels, though if changes occur to the character of a sound (i.e., changes to the frequency content), then changes less than 3 dBA may be more noticeable.[5] Changes of 5 dBA may be readily perceptible, and changes of 10 dBA are perceived as a doubling in loudness.[6] However, few people are highly annoyed by daytime noise levels below 55 dBA.[7]

Loud noises, such as those from construction activities, can interfere with peoples' abilities to effectively communicate via speech, as well as other activities, resulting in annoyance or inconvenience. The EPA has found that a home interior noise level of 45 dBA L_{eq} generally protects speech and communication by providing 100 percent intelligibility of speech sounds.[8] Other common daily activities that may be disrupted by elevated interior noise levels include watching television, listening to music, or activities requiring concentration (such as reading). The EPA has determined that, given the preservation of an indoor noise level associated with 100 percent speech intelligibility (i.e., 45 dBA L_{eq}), the average community reaction is not evident and "7 dBA below levels associated with significant complaints and threats of legal action." Any complaints and annoyance are dependent on "attitude and other non-level related factors."

Noise Attenuation

Generally speaking, noise levels decrease, or "attenuate," as distances from noise sources to receivers increases. For each doubling of distance, noise from stationary or small, localized sources, commonly

8 United States Environmental Protection Agency (EPA). 1974. Information on Levels of Environmental Noise Requisite to Protect Public Health and Welfare with an Adequate Margin of Safety.

referred to as “point sources,” may attenuate at a rate of 6 dBA for each doubling of distance. This attenuation is referred to as the inverse square law. For example, if a point source emits a noise level of 80 dBA at a reference distance of 50 feet, its noise level would be approximately 74 dBA at a distance of 100 feet, 68 dBA at a distance of 200 feet, etc. Noise emitted by “line” sources, such as highways, attenuates at the rate of 3 dBA for each doubling of distance.[9]

Factors such as ground absorption and atmospheric effects may also affect the propagation of noise. In particular, ground attenuation by non-reflective surfaces, such as soft dirt or grass, may contribute to increased attenuation rates of up to an additional 8-10 dBA per doubling of distance.[10]

Noise is most audible when traveling by direct line of sight, an unobstructed visual path between a noise source and a receiver. Barriers that break the line of sight between noise sources and receivers, such as walls and buildings, can greatly reduce source noise levels by allowing noise to reach receivers by diffraction only. Barriers can reduce source noise levels by up to 20 dBA, though it is generally infeasible for temporary barriers to reduce source noise levels by more than 15 dBA.[11] In cases where the noise path from source to receiver is direct but grazes the top of a barrier, noise attenuation of up to 5 dBA may still occur.[12]

Characteristics of Vibration and Descriptors

Vibration is an oscillatory motion that can be described in terms of displacement, velocity, and acceleration.[13] Unlike noise, vibration is not a common environmental issue, as it is unusual for vibration from vehicle sources to be perceptible. Common sources of vibration may include trains, construction activities, and certain industrial operations.

Table 3 briefly defines common vibration measurement descriptors and other terminology used in this analysis.

Table 3: Vibration Terminology

Term	Definition
Peak Particle Velocity (PPV)	PPV is commonly used to describe and quantify vibration impacts to buildings and other structures. PPV levels represent the maximum instantaneous peak of a vibration signal and are generally measured in inches per second (in/sec).
Vibration Decibels (VdB)	The vibration velocity level in decibel scale.

[11] Ibid.
[12] Ibid.
[13] Federal Transit Administration (FTA). 2018. Transit Noise and Vibration Impact Assessment.

Effects of Vibration

High levels of vibration may cause damage to buildings or even physical personal injury. However, vibration levels rarely affect human health outside the personal operation of certain construction equipment or industrial tools. Instead, most people consider environmental vibration to be an annoyance that may affect concentration or disturb sleep. Background vibration in residential areas is usually not perceptible, and perceptible indoor vibrations are generally caused by sources within buildings themselves, such as slamming doors or heavy footsteps. Vibration from traffic on smooth roadways is rarely perceptible, even from larger vehicles such as buses or trucks.[14] The threshold of human perception of vibration is approximately 0.01-0.02 in/sec peak particle velocity (PPV).[15]

Notes:
[1] Noise level calculated based on two excavators operating over a 1/2-acre parcel of land. Reference noise levels and usage factors based on FTA data.
[2] Calculations assume a receptor located at ground level. Noise levels at higher elevations would be slightly reduced owing to farther equipment-to-source distances. For K Street Flats, even upper-floor residences are shielded from possessing direct line of sight to the project site. Therefore, the analysis does not underestimate noise impacts for these upper-floor residences - the same attenuation from shielding would apply.
[3] Shielding due to existing building configurations.

Water Quality Impact Analysis

FIRSTCARBON
SOLUTIONS
FCS INTERNATIONAL, INC.

Memorandum

Date: March 1, 2024

To: Project Applicant

From: Mary Bean, Vice President, FirstCarbon Solutions

Subject: Water Quality Impact Analysis for the 2274 Shattuck Avenue Mixed Use Project in Berkeley, California

At the request of the project applicant, FirstCarbon Solutions (FCS), prepared this water quality memorandum to describe and summarize findings relating to water quality for the proposed 2274 Shattuck Avenue Mixed Use Project (proposed project). The project site is located in the City of Berkeley, in Alameda County, California (Exhibit 1). The site consists of Assessor's Parcel Number (APN) 057-202-800-300 at 2274 Shattuck Avenue (Exhibit 2).

PROJECT UNDERSTANDING

The project applicant proposes to demolish a portion of the existing commercial structures to construct a 17-story mixed-use building with 227 multi-family apartment dwelling units, ground level lobbies, 865 square feet of retail space, and one parking space, on an approximately 0.51-acre site. The outdoor space would consist of 1,657 square feet of ground level common space, 240 square feet of private patios, and a 5,840-square-foot roof deck with 4,084 square feet of landscaping across the ground level and roof deck. The site would be accessed from a driveway off Shattuck Avenue and a garage off Bancroft Way (Exhibit 3).

The project site is bounded by commercial uses, the Berkeley Public Library, and Kittredge Street to the north, the Berkeley Public Library and multi-family apartments to the west, commercial and residential uses, as well as Bancroft Way to the south, and Shattuck Avenue, and commercial and residential uses to the east.

The project site is designated as "Downtown" by the City of Berkeley General Plan (General Plan) and "Corridor" by the Downtown Area Plan. Additionally, it is zoned as the Downtown Mixed-Use District "C-DMU" by the City of Berkeley Zoning Ordinance. The C-DMU zoning district permits residential uses with a Use Permit.

FIRSTCARBON SOLUTIONS™

Exhibit 3
Site Plan

The proposed project would require a Use Permit, Zoning Certificate, and Design Review (this is not an exhaustive list). The applicant is requesting a State Density Bonus to increase the number of allowable units (from 160 to 227) and waivers for floor area ratio (FAR), a reduction in setback requirements, and a reduction of provided open space.

WATER QUALITY ANALYSIS

The proposed project is in the City of Berkeley and within the jurisdiction of the San Francisco Bay Regional Water Quality Control Board (San Francisco Bay RWQCB), which implements the Water Quality Control Plan for the San Francisco Bay Basin (Basin Plan).[1] The Basin Plan designates beneficial uses for surface water bodies and groundwater that the California State Water Resources Control Board (State Water Board) will protect, as well as water quality objectives, and strategies for achieving these objectives, such as discharge prohibitions to attain water quality goals. The Basin Plan identifies key pollutants of concern to monitor and reduce in the San Francisco Bay, including pesticides, diazinon, mercury, poly-chlorinated biphenyls (PCBs), selenium, bacteria, pathogens, and sediment.[2] The San Francisco Bay RWQCB enforces the National Pollutant Discharge Elimination System (NPDES) permit system, Water Discharge Requirements (WDRs), Clean Water Act (CWA) Section 401 water quality certifications, and other water quality-related approvals in the San Francisco Bay Area, including the project site.

The proposed project would be served with water and wastewater services provided by the East Bay Municipal Utility District (EBMUD). As part of their Annual Water Quality Report, EBMUD conducts water quality sampling for several contaminants at their Water Treatment Plants (WTP), including Walnut Creek, Lafayette, Orinda, Sobrante, and Upper San Leandro.[3] The 2022 Annual Water Quality Report measured the EBMUD's water at WTPs for levels of microbiological pollutants, inorganic pollutants, disinfection byproducts, chloride, odor, dissolved solids, ionic compounds, sulfates, and other parameters of interest.[4] The EBMUD determined that water quality standards surpassed every public health requirement set by the California State Water Resources Control Board (State Water Board) and the United States Environmental Protection Agency (EPA).[5]

The project site is currently occupied by vacant commercial structures and is consequently completely covered by impervious surfaces. In addition, the vicinity of the project site is also completely covered with impervious surfaces, including stormwater culverts connecting to the City's stormwater drainage system. The proposed project would construct 2,559 square feet of landscaping at the ground floor, and 1,525 square feet of landscaping on the roof of the proposed building, with 762 square feet of the 1,525 square feet of the proposed rooftop landscaping being a stormwater treatment area. As such, the

---

1 California State Water Resources Control Board (State Water Board). 2023. Water Quality Control Plan (Basin Plan) for the San Francisco Bay Basin. Website: https://www.waterboards.ca.gov/sanfranciscobay/basin_planning.html. Accessed February 28, 2024.
2 Ibid.
3 East Bay Municipal Utility District (EBMUD). 2023. 2022 Annual Water Quality Report. March.
4 Ibid.
5 Ibid.

proposed project decreases impervious surfaces on-site by approximately 18 percent from existing conditions, decreasing the amount of stormwater runoff from the project site compared to existing conditions.[6] In addition, the proposed project's 762 square feet of rooftop stormwater treatment would reduce pollutant load from stormwater runoff into the City's stormwater drainage system, preventing water quality standard violations.

Construction and operation of the proposed project would be subject to federal and State water quality regulations, which are enforced by the San Francisco Bay RWQCB. The City of Berkeley is a permittee under the Municipal Regional Stormwater NPDES Permit (MRP) Order R2-2009-0074, NPDES Permit No. CAS612008. In accordance with the MRP, the City establishes quality and monitoring requirements for discharging urban runoff. These requirements include the use of best management practices for new and significant redevelopment projects, public education and outreach, industrial inspections, and guidance to the City's own Public Works staff to reduce or remove pollutant loads from urban runoff to the maximum extent practicable.

To comply with the MRP, the City requires that all development plans that replace or construct over 2,500 square feet, including the proposed project, comply with standards contained in the C.3 and C.6 Stormwater Requirements Checklist.[7] In addition, the proposed project would also be required to obtain a State General Construction Permit, which requires the proposed project to submit a Storm Water Pollution Prevention Plan (SWPPP) to the City prior to the issuance of a building permit. As the proposed project would also construct over 500 square feet of landscaping, the proposed project would further be required to comply with the State's Model Water Efficient Landscape Ordinance (MWELO), as well as the EBMUD's Section 31 Water Efficiency Requirements and MWELO Compliance document.

Furthermore, the proposed project would also be required to comply with applicable regulations, policies, and actions relating to water quality contained in the City's General Plan, the Downtown Area Plan, and Municipal Code. The proposed project would additionally be required to comply with the City's Standard Conditions of Approval (COAs) prior to the acquisition of a building permit. Conformance with existing permits and the application of existing local and State regulations would prevent water quality standard violations and increases in surface runoff. Local policies, actions, and regulations applicable to the proposed project and relevant to water quality include, but are not limited to, the below.

General Plan Policies and Actions

Policy EM-5 "**Green" Buildings.** Promote and encourage compliance with "green" building standards.

Actions

A. Encourage, and where appropriate require, new construction and major remodel projects to be sited, designed, constructed, and operated to enhance the well-being

[6] The project site is approximately 0.51 acres, or approximately 22,216 square feet. The proposed project would construct approximately 2,559 square feet of pervious surfaces on the ground floor and 1,525 square feet of pervious surfaces on the roof, for a total of 4,084 square feet of the project site, resulting in a proposed approximately 18 percent increase of pervious surfaces on-site.

[7] City of Berkeley. 2016. Stormwater Requirements Checklist. January 14.

of their occupants, and to minimize present and future impacts on the community and the natural environment.

B. Encourage landscaping for water and energy efficiency.
C. Encourage buildings to incorporate renewable energy and energy- and water-efficient technologies.
D. Encourage use of recycled-content construction materials.
E. Encourage efforts to improve indoor air quality and to provide a comfortable and healthy environment.
F. Encourage reduction of construction and demolition waste.
G. Encourage construction of durable buildings.
H. Establish a green design assistance and green building certification program.

Policy EM-24 **Sewers and Storm Sewers.** Protect and improve water quality by improving the citywide sewer system.

Actions

E. Ensure that new development pays its fair share of improvements to the storm sewerage system necessary to accommodate increased flows from the development.

Policy EM-25 **Groundwater.** Protect local groundwater by promoting enforcement of State water quality laws that ensure nondegradation and beneficial use of groundwater.

Policy EM-26 **Water Conservation.** Promote water conservation through City programs and requirements.

Actions

A. Encourage drought-tolerant landscaping and low-flow irrigation systems.
B. Consider participation in the East Bay Municipal Utility District's East Bay-shore Recycled Water Project to make recycled water available for irrigation and other nonpotable uses.

Policy EM-31 **Landscaping.** Encourage drought-resistant, rodent-resistant, and fire-resistant plants to reduce water use, prevent erosion of soils, improve habitat, lessen fire danger, and minimize degradation of resources.

Downtown Area Plan Policies and Actions

Policy ES-4.3 **Water Conservation, Reuse, and Retention.** Promote best practices for substantial water conservation, reuse, and retention as part of new construction, renovations, site improvements, and landscaping.

a) Require on-site water conservation and stormwater retention features, and establish development incentives for performance in the area.
b) Development projects should generate no new net rainwater runoff.
c) Work with EBMUD to provide incentives for the installation and/or replacement of water fixtures for greater efficiency.
d) Encourage the use of innovative water conservation technologies, such as waterless urinals and water reuse, through the development of local guidelines and/or alternative building code requirements.
e) Encourage cisterns and devices to retain and make use of rainwater.
f) Encourage water recycling through the use of graywater for flushing toilets, irrigation, and other purposes, by working to reform existing regulations that may discourage such practices, and by developing guidelines to illustrate opportunities and design considerations.

Policy ES-5.1 **Stormwater Quality.** New development and public infrastructure should provide "best-practices" to protect and improve ecological quality and functions relating to stormwater, by treating urban runoff, retaining stormwater, and attaining no net increase in runoff from Downtown.

c) Develop design guidelines and development standards to encourage appropriate "best management practices" for urban runoff retention and infiltration as part of private and institutional development projects, by diverting rainwater to:
- landscaped retention features (such as swales or "rain gardens")
- permeable paving
- "green roofs"
- below-grade "dry wells" and
- rooftop and/or below-grade cisterns

Policy ES-5.2 **Green Infrastructure Requirements.** Promote extensive landscaping and "best-practices" for landscaping that benefit and help restore natural systems throughout the Downtown area.

Policy LU-2.1 **Contributions Required of All Development.** New buildings and substantial additions, regardless of height, shall provide the following public benefits, except as noted for historic rehabilitations and adaptive reuse of existing buildings.

a) Green Buildings
- Meet Title-24 energy requirements and any local green standards adopted by Council.

b) Open Space and Green Infrastructure
- Provide on-site open space. On-site open space requirements may be reduced by paying an in lieu fee to be applied toward Downtown Streets and Open Space Improvement Plan improvements.
- Ensure no new net water runoff on-site or through in lieu payment for Downtown improvements.

Policy OS-2.5 **Water Conservation.** New landscaping and retrofits should incorporate effective water conservation and water reuse features.

a) Establish water conservation and recycling standards for new landscaping. Require use of drought-tolerant plants and advanced irrigation systems to substantially reduce water usage.

Municipal Code Ordinances

Chapter 7.76–Clean Stormwater Fund

Municipal Code Chapter 7.76 requires that all property owners within the City connecting to the City's stormwater drainage system pay a fee for clean stormwater activities, which allow the City to raise the income and revenue necessary to improve the quality of stormwater discharged from the City's stormwater drainage system.

Chapter 17.76–Construction Requirements for Sanitary Sewers and Storm Drains

Municipal Code Chapter 17.16 establishes requirements for the connection and operation of new private development in the City to the City's sanitary sewer lines and storm drains.

City Standard Conditions of Approval

As discussed above, approval and development of the proposed project would be subject to the City of Berkeley's Standard COAs, pursuant to the City's Municipal Code Section 23.406.040 and, as applicable here, the City's MRP. The City of Berkeley has the following standard COAs relevant to water quality, which would apply to the proposed project. Unless otherwise discussed, the proposed project is assumed to incorporate these COAs.

Stormwater Requirements

The applicant shall demonstrate compliance with the requirements of the City's National Pollutant Discharge Elimination System (NPDES) permit as described in Municipal Code Section 17.20. The following conditions apply:

A. The project plans shall identify and show site-specific Best Management Practices (BMPs) appropriate to activities conducted on-site to limit to the maximum extent practicable the discharge of pollutants to the City's storm drainage system, regardless of season or weather conditions.

B. Trash enclosures and/or recycling area(s) shall be covered; no other area shall drain onto this area. Drains in any wash or process area shall not discharge to the storm drain system; these drains should connect to the sanitary sewer. Applicant shall contact the City of Berkeley and the East Bay Municipal Utility District (EBMUD) for specific connection and discharge requirements. Discharges to the sanitary sewer are subject to the review, approval and conditions of the City of Berkeley and EBMUD.

C. Landscaping shall be designed with efficient irrigation to reduce runoff, promote surface infiltration and minimize the use of fertilizers and pesticides that contribute to stormwater pollution. Where feasible, landscaping should be designed and operated to treat runoff. When and where possible, xeriscape and drought-tolerant plants shall be incorporated into new development plans.

D. Design, location and maintenance requirements and schedules for any stormwater quality treatment structural controls shall be submitted to the Department of Public Works for review with respect to reasonable adequacy of the controls. The review does not relieve the property owner of the responsibility for complying with Municipal Code Chapter 17.20 and future revisions to the City's overall stormwater quality ordinances. This review shall be conducted prior to the issuance of a Building Permit.

E. All paved outdoor storage areas must be designed to reduce/limit the potential for runoff to contact pollutants.

F. All on-site storm drain inlets/catch basins must be cleaned at least once a year immediately prior to the rainy season. The property owner shall be responsible for all costs associated with proper operation and maintenance of all storm drainage facilities (pipelines, inlets, catch basins, outlets, etc.) associated with the project, unless the City accepts such facilities by Council action. Additional cleaning may be required by City of Berkeley Public Works Engineering Dept.

G. All private or public projects that create and/or replace 10,000 square feet or more of impervious surface must comply with Provision C.3 of the Alameda County NPDES permit and must incorporate stormwater controls to enhance water quality. Permit submittals shall include a Stormwater Requirement Checklist and detailed information showing how the proposed project will meet Provision C.3 stormwater requirements, including a) Site design measures to reduce impervious surfaces, promote infiltration, and reduce water quality impacts; b) Source Control Measures to keep pollutants out of stormwater runoff; c) Stormwater treatment measures that are hydraulically sized to remove pollutants from stormwater; d) an O and M (Operations and Maintenance) agreement for all stormwater treatment devices and installations; and e) Engineering calculations for all stormwater devices (both mechanical and biological).

H. All on-site storm drain inlets must be labeled “No Dumping – Drains to Bay” or equivalent using methods approved by the City.

I. Most washing and/or steam cleaning must be done at an appropriately equipped facility that drains to the sanitary sewer. Any outdoor washing or pressure washing must be managed in such a way that there is no discharge or soaps or other pollutants to the storm drain. Sanitary connections are subject to the review, approval and conditions of the sanitary district with jurisdiction for receiving the discharge.

J. Sidewalks and parking lots shall be swept regularly to prevent the accumulation of litter and debris. If pressure washed, debris must be trapped and collected to prevent entry to the storm drain system. If any cleaning agent or degreaser is used, wash water shall not discharge to the storm drains; wash waters should be collected and discharged to the sanitary sewer. Discharges to the sanitary sewer are subject to the review, approval and conditions of the sanitary district with jurisdiction for receiving the discharge.

K. The applicant is responsible for ensuring that all contractors and sub-contractors are aware of and implement all stormwater quality control measures. Failure to comply with the approved construction BMPs shall result in the issuance of correction notices, citations, or a project stop work order.

Public Works

All piles of debris, soil, sand, or other loose materials shall be covered at night and during rainy weather with plastic at least one-eighth millimeter thick and secured to the ground.

Public Works

The applicant shall ensure that all excavation takes into account surface and subsurface waters and underground streams so as not to adversely affect adjacent properties and rights-of-way.

Public Works

The project sponsor shall maintain sandbags or other devices around the site perimeter during the rainy season to prevent on-site soils from being washed off-site and into the storm drain system. The project sponsor shall comply with all City ordinances regarding construction and grading.

Public Works

Prior to any excavation, grading, clearing, or other activities involving soil disturbance during the rainy season the applicant shall obtain approval of an erosion prevention plan by the Building and Safety Division and the Public Works Department. The applicant shall be responsible for following these and any other measures required by the Building and Safety Division and the Public Works Department.

Summary of Impacts

The proposed project would reduce impervious surfaces on the project site and would introduce stormwater treatment facilities to the project site. In addition, construction of the proposed project would be required to adhere to the MRP through the mandatory submission of an SWPPP, which would ensure that stormwater runoff during construction contains a less than significant level of pollutant load.

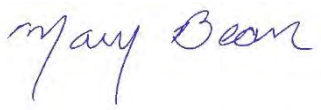
Furthermore, the proposed project would be required to comply with all applicable federal, State, and local regulations, policies, and actions pertaining to water quality. As such, approval of the proposed project would not result in any significant effects relating to water quality, and impacts relating to water quality would be less than significant.

CONCLUSION

Based on the project understanding described above, the proposed project would result in less than significant impacts to water quality after incorporation of the City's Standard COAs, compliance with the federal and State regulations, and compliance with City's above-listed plans, policies, and regulations.

Thank you for the opportunity to conduct water quality impacts analysis. Please feel free to contact Mary Bean (415.713.5223 or mbean@fcs-intl.com) should you have any questions.

Sincerely,



Mary Bean, Vice President

RE: Response to AB 1633 Notice for Use Permit #ZP2023-0079 – 2274 Shattuck Avenue

Dear Mr. Stackhouse,

We have received the AB 1633 notice prepared by Hanson Bridgett, dated March 4, 2024. The City continues to review the information provided in the applicant's communication to determine if there is substantial evidence in the record that the housing development project is exempt from the provisions of the California Environmental Quality Act. Pursuant to AB 1633, the City needs an additional 90 days to make a determination, and will respond by August 30, 2024.

Sincerely,

Sharon Gong

Subject: 2274 Shattuck Avenue (ZP2023-0079) - TIA Review

Internal

Hi Ray,

The applicants for 2274 Shattuck Avenue (ZP2023-0079) mixed-use project have submitted a Traffic Impact Analysis to support the findings for a Class 32 CEQA exemption. Can you review the attached TIA and let us know if you have any comments as to the adequacy of the report?

Project Description:
SB-330 partial demolition and renovation of the existing commercial structure to allow for the construction of a new 17-story, mixed-use development with 227 dwelling units (including 23 Very Low-Income qualifying Density Bonus units), ground-level lobbies, commercial space, and parking.
Link to plans and other application materials:
https://cityofberkeley.box.com/s/wdx113ap206qs55redex0xea3os89bh9

If we could get a **response by June 26**, that would be great.

Thanks,

Sharon

Subject: 2274 Shattuck Avenue HRE and Project Impact Analysis Peer Review

Dear Ms. Gong:

The City of Berkeley (City) retained Rincon Consultants, Inc. (Rincon) to conduct a peer review of the Historic Resources Evaluation (HRE) memorandum prepared for 2274 Shattuck Avenue by Left Coat Architectural History (December 2023) and the report titled *2274 Shattuck Avenue Project Impacts Analysis* prepared by Left Coast Architectural History (March 2024). The peer review presented below assesses reporting accuracy and adequacy relative to the field and research methods and evaluation results using industry-accepted best practice and guidance provide by the National Park Service (NPS) and the California Office of Historic Preservation (OHP). The peer review was limited to the HRE memorandum and the impacts analysis report and did not involve field work, recordation, or reevaluation of any resources. We understand that the purpose of the peer review is to support the California Environmental Quality Act (CEQA) environmental review process for a proposed 17-story mixed-use commercial and residential development.

Rincon Architectural Historian JulieAnn Murphy, MSHP, conducted the peer review, with oversight by Cultural Resources Director Steven Treffers. Both Ms. Murphy and Mr. Treffers meet the Secretary of the Interior's Professional Qualification Standards for architectural history and history (36 CFR Part 61).

Summary of Previous Reports

HRE Memorandum

In December 2023, Caitlin Hibma of Left Coast Architectural History prepared an evaluation of the building at 2274 Shattuck Avenue (APN 57-208-3). The evaluation was completed for the project applicant, who proposes to redevelop the property with a 17-story mixed-use commercial and residential development that would include retaining the building façade and the lobby portion of the building. Hibma meets the Secretary of the Interior's Professional Qualification Standards for architectural history.

The evaluation noted that 2274 is a two-to-four-story commercial building constructed in 1932 for use as a United Artists movie theater, and was designed by Walker & Eisen Architects with Clifford A. Balch. Hibma outlined that the building was the subject of three previous evaluations – a 1978 survey that produced a Historic Resource Inventory Form (precursor to the current form) and resulted in the assignment of a "3" National Register Status Code, suggesting eligibility for listing in the National Register of Historic Places (NRHP); a 2005 updated Department of Parks and Recreation (DPR) Series 523 Form prepared as part of a Section 106 review of the National Historic Preservation Act that determined the property was eligible for listing in the NRHP under Criteria A and C and resulted in a

2S2 status code, indicating NRHP eligibility and listing in the CRHR; and a 2015 evaluation as part of the potential Shattuck Avenue Commercial Corridor Historic Context Survey which affirmed the 2S2 status code and further recommended the building as a contributor to the establishment of the potential Shattuck Avenue Commercial Corridor Historic District.

The HRE then asserted that the previous evaluations did not comprehensively analyze the present condition of the building under the current professional standards and are, therefore, inadequate for CEQA determinations and for local planning decisions. It then provided an updated evaluation, finding that it did appear architecturally significant under CRHR Criterion 3 for its Art Deco design, but that it no longer retains sufficient integrity to support listing. It was also recommended ineligible for listing as a City of Berkeley Landmark and as a City of Berkeley Structure of Merit for a lack of historical and architectural significance. The HRE does not make any conclusions regarding the property's previously identified status as a contributor to the Shattuck Avenue Commercial Corridor Historic District.

2274 Shattuck Avenue Project Impacts Analysis

In March 2024, Caitlin Hibma of Left Coast Architectural History prepared a memorandum report to assess the impact of the redevelopment project on historical resources. Though Hibma previously recommended the property ineligible as a historical resource due, in part, to diminished integrity, the property is listed in the CRHR and is an identified contributor to the potential Shattuck Avenue Commercial Corridor Historic District. Additionally, the Berkeley Landmark Preservation Commission (LPC) subsequently approved a City of Berkeley Landmark application in February 2024. The provisions of the Landmark only extend to the upper Shattuck Avenue façade, above the exiting non-historic marquee.[1]

The analysis considers the project's compliance with Secretary of the Interior's Standards for Rehabilitation (Standards), the Berkeley LPC's permit application review standards, and the Berkeley Downtown Design Guidelines. The memorandum outlines the current historical status; provides a list of the character-defining features of the building according to the Landmark designation; a review of the proposed project; a Standards analysis; a Berkeley Municipal Code compliance analysis; and a Downtown Berkeley Design Guidelines compliance analysis. The proposed project was concluded to be compliant with Standards 1 through 10. It was also resolved to be compliant with the applicable provisions of the Berkeley Municipal Code and consistent with the relevant Downtown Berkeley Design Guidelines. The memorandum report concludes that the proposed project would not result in an impact to a historical resource pursuant to CEQA.

Peer Review

HRE Memorandum

The HRE memorandum generally follows the accepted standard format of historical resource evaluation reporting guidelines and includes an introduction, executive summary, methodology, regulatory context, a review of previous evaluations, and evaluative findings. The information summarized in the architectural descriptions reflected the site's existing conditions, including a comprehensive list of alterations, at their time of recordation, accurately.

[1] The City of Berkeley Landmark application was forwarded to the Berkeley City Council for notice of decision on March 19, 2024. The building's Landmark status does not extend to the current project application because it predated the Landmark designation.

As stated in the HRE memorandum, it is an update to previous survey and evaluation efforts. It accurately outlines the previous findings noting it was found eligible for listing in the NRHP in 1978; its eligibility was affirmed in 2004 and was subsequently listed in the CRHR by consensus through the Section 106 process; and it was further identified as a contributor to the potential Shattuck Avenue Commercial Corridor Historic District in 2015.

As outlined by the Office of Historic Preservation (OHP) in *Instructions for Recording Historical Resources*, it is important to update information about historical resources to ensure accuracy. The HRE memorandum argues that an update was necessary because the past documentation and evaluations relied on the 1978 documentation, which does not accurately describe alterations and was not completed according to current evaluation standards. OHP guidance provides that updates "may amplify or correct information about a resource, or simply confirm that the existing record remains accurate at the time of a subsequent field examination" (OHP 1995). It further instructs that documentation for historical resources should be updated under the following conditions:

- When it is reevaluated;
- When changes occur to the resource or its setting;
- When erroneous information needs correcting; and/or
- When additional information is necessary for planning decisions.

The effort to update the historical resource record with accurate information is generally consistent with OHP guidance. The HRE memorandum continues, providing a detailed description of the existing conditions, and includes a comprehensive list of the alterations that have occurred since it was constructed, augmenting and correcting missing information in the original and subsequent records. It then continues to include an updated evaluation for its inclusion in the NRHP, CRHR, City of Berkeley Landmark, and City of Berkeley Structure of Merit.

It recommended the building ineligible for listing in the NRHP or CRHR under Criterion A/1, B/2, and D/4. It further argues that because the Art Deco theater building is a well-represented type and style locally and nationally, is modest in comparison to other theaters locally and nationally, and it has lost its integrity that it is not eligible for listing in the NRHP under Criterion C for its architecture. It continues that it did appear eligible for listing in the CRHR as originally constructed, but that alterations have resulted in loss of integrity necessary for listing and it is therefore ineligible for listing in the CRHR under Criterion 3. It finds that the property is also not eligible for listing as City of Berkeley Landmark or as a Structure of Merit for lack of historical significance and for a lack of architectural significance due, in part, to the changes that have occurred to the building resulting in the removal of original features and design elements.

Though updating the historical resource record is consistent with OHP guidance, a reevaluation for eligibility for listing in the CRHR, in this case, was not necessary because the property is already listed in the CRHR and is considered a historical resource as defined in PRC Section 5024.1(g) and is, therefore, a historical resource under CEQA. The property was listed in the CRHR in 2005 through a consensus determination, meaning that the determination was arrived at through an agreement between the federal lead agency and OHP. Changes outlined in the HRE memorandum that have occurred since its listing in 2006 are relatively minor and are limited to interior updates. Its overall appearance and condition, based on photographs provided in the DPR form which helped to inform OHP's determination of eligibility, has remained largely unchanged since it was listed in 2006. The HRE memorandum's conclusion that the property is not a historical resource, therefore, not supported.

The update does provide additional and current information about the building, but it was not recorded on a DPR Form. Per OHP instructions, the updated physical description, current photographs, and

additional alteration information should be recorded on a DPR Continuation Sheet (DPR L) and submitted to the Northwest Information Center (NWIC) to be added to the property's existing record in the California Historical Resources Information Center (CHRIS).

2274 Shattuck Avenue Project Impacts Analysis

The project impact analysis report generally follows the accepted format for an impact analysis and provides an introduction and methodology section, a review of existing designations, a list of character-defining features, a description of the proposed project, and an analysis of the proposed project. The analysis provides the regulatory context including the definitions of substantial adverse change and material impairment provided in Section 15064.5 of the CEQA Guidelines and accurately provides that, per the Guidelines, a project that follows the Secretary of the Interior's Standards for the Treatment of Historic Properties shall be considered as mitigated to a level of less than significant on the historical resource. It then continues to provide an in-depth discussion of the project's conformance with the Secretary of the Interior's Standards for Rehabilitation (Standards), which were identified as the most applicable of the four treatment standards.

The subsequent discussion of the project's compliance with the Standards includes a Standard-by-Standard review of the proposed project, asserting that the project will successfully meet all ten of the Standards. As described, however, the project proposes demolition of more than half of the building. Demolition is not a rehabilitation treatment and is generally only acceptable as part of rehabilitation to remove non-historic additions or material. The analysis provided erroneously relies on the presumption that the only portions of the building that are historic are limited to what was identified in the March 2024 City of Berkeley Landmark nomination, which includes only the upper portion of the Shattuck Avenue façade, above the non-historic marquee. The building's current status, however, and its reason for being a historical resource pursuant to CEQA, is tied to its listing in the CRHR, which extends to the whole building. As clarified in *National Register Bulletin 15:-How to Apply the National Register Criteria for Evaluation,* for which the CRHR is based, "parts of buildings, such as interiors, facades, or wings are not eligible independent of the rest of the existing building" (NPS 1997). The Standards analysis, therefore, cannot disqualify the proposed treatment of the rear portion of the building.

Compliance with the Standards, however, is not the only way to demonstrate that a project would avoid causing a substantial adverse change in the significance of a historical resource. The argument provided would be strengthened by acknowledging the aspects of the project that are not Standards-compliant and would benefit from being reframed to analyze if the proposed changes to 2274 Shattuck Avenue amount to substantial adverse change. The project impacts discussion is recommended to be revised and analyzed to consider if the changes proposed to the historical resource (the whole building) would result in material impairment as defined in Section 15064.5 (b)(2)(A) of the CEQA Guidelines.

The analysis continues to a discussion of the proposed project's conformity with the Berkeley Municipal Code provisions for the treatment of historic resources, noting that they do not apply to the current application because it is an SB330 application, and that the analysis is provided as an informative item. The analysis provides a clear discussion of the impact of the project as it relates to the Landmark designation, which only applies to the upper portion of the Shattuck Avenue elevation. The discussion of the impact of the project to the potential Shattuck Avenue Commercial Corridor Historic District, provides a thorough discussion of the impact of the project to the district as it relates to the portion of the building which is included in the Landmark designation. Similar to the Standards analysis, however, there is nothing in the district record to suggest that the whole building is not included as a contributor to the district. It is recommended that the analysis, if required for the project

application, be updated to acknowledge the demolition of a portion of the building and any potential impact to the building as a contributor to the proposed district.

Finally, the analysis continues to a discussion of the proposed project's conformance with the Downtown Berkeley Design Guidelines. Similar to the Berkeley Municipal Code provisions for the treatment of historic resources, the design standards are noted as not applicable because the project is pursuing a SB330 application. The discussion provides a thorough and robust analysis of the relevant guidelines as it relates to the portion of the building included in the Landmark designation. The whole building was previously identified as being subject to the Downtown Berkeley Design Guidelines. As such, it is recommended that, if a requirement of the project application, that the discussion be updated to include all the applicable guidelines as outlined in the "Procedures" portion of the guidelines, including those that discuss roof forms, site design, and special sites, buildings, and subareas in order to adequately address the proposed project's conformance with the Downtown Berkeley Design Guidelines.

Conclusion

In summary, the HRE Memorandum provides useful updated information on the current condition of the building and additional information on the building's alterations. It is recommended that that information be provided on DPR Continuation Sheets and submitted to the NWIC to update the current record, as recommended by OHP guidance. The updated evaluation provided, however, was not necessary to determine if the building is a historical resource pursuant to CEQA since the building is listed in the CRHR. The *2274 Shattuck Avenue Project Impacts Analysis* generally follows the best practices and industry-accepted guidance for the impacts analysis reporting. However, the analysis discussion is limited to the portion of the building which was recently identified as City of Berkeley Landmark. The building's historical status, however, is established by its listing in the CRHR, which applies to the whole building. It is recommended, therefore, that the analysis provided in *2274 Shattuck Avenue Project Impacts Analysis* be revised to include a discussion of the project's impacts to the historical resource.

Should you have any questions regarding this memorandum, please do not hesitate to contact me at 510-834-4455 or jmurphy@rinconconsultants.com.

Sincerely,
Rincon Consultants, Inc.

Dear, City planner Sharon Gong

I am writing to urgently request your support in saving the UA Berkeley theater at 2274 Shattuck Ave. from demolition. As a resident of Berkeley and a passionate advocate for our city's cultural heritage, I believe it is crucial to preserve this architectural and civic treasure for future generations.

The UA Berkeley theater holds immense historical and cultural significance, and it would be a tragic loss to our community if it were to be destroyed for an apartment high-rise. I urge you to take immediate action to landmark the building and ensure its preservation.

Furthermore, I propose that the city consider incorporating the UA Berkeley theater into the assets of the Berkeley Public Library, using the space for film exhibitions and related media. This would not only honor the history of the theater but also provide a valuable resource for our community.

I implore you to act swiftly to save the UA Berkeley theater and preserve its function as a movie theater that serves the community. This is a critical moment in our city's history, and I believe that with your support, we can ensure that the UA Berkeley theater remains a vibrant part of Berkeley's cultural life for years to come.

Thank you for your attention to this urgent matter.

- Mark Federico Moreno

To the above recipients:

I received news today (Sunday, May 19) that *there is an option* the city planning department may exercise. That is, it may actually choose to delay a *developer's March 4 demand to gut, rape and raze the cinematically significant UA Theater, heedless of prudent, legal and ahem only decent CEQA and architectural examination.

It is quite clear, oh so clear, by now, that city governance and policy has considered the past as something that happened to other people and ended up in books or movies, and that that should be enough. Almost all the city stewards of today's Berkeley apparently were raised in a vacuum. Today's 'architectural' contributions show scant pride that City and downtown once reveled in.

Once the accretions of over-the-years 'improvement' have been chipped away, the UA may be restored to a former splendor that helped make the downtown a magnet. Which it sure isn't today, and which no recent development has made an attempt to restore.

Do something right. Don't cave in. Show some bone.

You're welcome,

phil allen

Dear Friends at the City of Berkeley,
It is beyond distressing that we have no more movie theaters downtown.
And I undestand that there are plans to demolish the United Artists Theatre. How short- sighted!
I am all for an increased housing supply, but that doesn't necessitate the destruction of unique, culturally significant buildings like the UA Theater.
At the very least a full enviromenal impact report should be required to explore the consequences of trashing the last of our theaters,
Particularly one with such potential.
Thank you.

Dear planning department,

Please don't grant an exemption to CEQA for the developer who owns the UA theater in Berkeley. I grew up in Berkeley and know the art deco which will be forever lost.

This historical and cultural resource is what gives Berkeley character. The public must understand the potential loss of a large performing space. Give the public a chance to advocate for housing elsewhere. There are many other underdeveloped areas to select.

Thank you for saving this landmark.

RE: CEQA

Dear Berkeley planning department:

I'm writing to demand that the proposal to tear down the historic United Artists theater in downtown Berkeley undergo a full review under the California Environmental Quality Act (CEQA). It would be highly unethical for the city to grant a CEQA exemption to the developer.

The UA Berkeley is a paragon of Art Deco architecture that is arguably the finest theater ever built in the city. Constructed during the Great Depression by Hollywood icons Charlie Chaplin and Mary Pickford, the UA is on the California Register of Historical Resource review of 2274 Shattuck Ave. project s and was found eligible for the National Register. It is also a city landmark, thanks to an LPC decision earlier this year. Without a doubt, the building is a cultural and historical resource under the CEQA statute; demolishing it would be a "substantial adverse change" requiring extensive CEQA review.
If the city granted the developer a blanket exemption, it would be denying the public a multifaceted process under which it could learn more about the cultural resource status of the theater, be provided the opportunity to submit comment, and have the chance to attend at least one public meeting on the topic (within the SB 330 meeting cap).
The developer proposes to retain a portion of the facade and lobby while destroying the grand four-story theater itself—a palatial venue that entertained Berkeley moviegoers for 91 years! Its destruction would be a monumental blow to the city's historic fabric; it warrants extensive review under CEQA.
Building more housing is vitally important, but it does not have to cost Berkeley one of its most magnificent historic buildings. It is unacceptable that Berkeley is allowing a ll of its downtown cinemas to be destroyed.
Thank you for your consideration.
Sincerely, Eileen Adams, Tamalpais Rd., Berkeley

Subject: Save the UA Berkeley

WARNING: This is not a City of Berkeley email. Do not click links or attachments unless you trust the sender and know the content is safe.

Dear Friends,

I urge you to save and restore the United Artists Berkeley Theatre. It may not be the Oakland Paramount, but it is a remaining historical landmark theatre. The Pandemic is over and streaming movies, although convenient, is overrated. There is nothing like going to the movies. And what better city to this but Berkeley, home of UC Berkeley and legions of students who can come to know Berkeley by experiencing the movie going experience at the UA Berkeley. Palo Alto has the Stanford Theatre (restored, preserved, and run by the David Packard Family. Berkeley has the modern PFA theatre. But if Berkeley would want to do a film festival using various venues, by selling the UA Berkeley to a developer to raze it down and put up a tower of condos . . . . Berkeley is not only killing off it's movie house heritage, it is depriving present and future generations the pleasure of expanded film programming and cultural/artistic experiences. Let's rethink the plan for this site, for this theatre and movie house.

Remember lots of young people are abandoning smartphones going back to regular dumb phones (text and call). So who is to say these same young people will want to ditch the movie streaming in favor of an in person in the theatre experience. The UA Berkeley is ready to be dusted off, restored and revived.

Thank you.

Respectfully,

I am writing because I was shocked to learn that the Planning Commission might grant developers an exemption from the CEQA in regard to the UA Berkeley. For many unfortunate reasons over recent years, Berkeley is being robbed of its uniqueness. Too many characterless buildings have replaced Berkeley landmarks to the point where the time is coming that you won't even know you're in Berkeley, it will be so bland and featureless.

Please don't allow this irreplaceable structure to be destroyed. Save our unique city!

Sincerely,
Jude Bell

Dear Berkeley planning department:

I'm writing to demand that the proposal to tear down the historic United Artists theater in downtown Berkeley undergo a full review under the California Environmental Quality Act (CEQA). It would be highly unethical for the city to grant a CEQA exemption to the developer.

The UA Berkeley is a paragon of Art Deco architecture that is arguably the finest theater ever built in the city. Constructed during the Great Depression by Hollywood icons Charlie Chaplin and Mary Pickford, the UA is on the California Register of Historical Resources and was found eligible for the National Register. It is also a city landmark, thanks to an LPC decision earlier this year. Without a doubt, the building is a cultural and historical resource under the CEQA statute; demolishing it would be a "substantial adverse change" requiring extensive CEQA review.

If the city granted the developer a blanket exemption, it would be denying the public a multifaceted process under which it could learn more about the cultural resource status of the theater, be provided the opportunity to submit comment, and have the chance to attend at least one public meeting on the topic (within the SB 330 meeting cap).

The developer proposes to retain a portion of the facade and lobby while destroying the grand four-story theater itself—a palatial venue that entertained Berkeley moviegoers for 91 years! Its destruction would be a monumental blow to the city's historic fabric; it warrants extensive review under CEQA.

Building more housing is vitally important, but it does not have to cost Berkeley one of its most magnificent historic buildings. It is unacceptable that Berkeley is allowing all of its downtown cinemas to be destroyed.

Berkeley is rapidly becoming a shadow of itself, housing and absolutely nothing else of interest. Having a downtown movie theater is what makes a city a world class city. For Berkeley to not have one is inexcusable planning on the part of the Berkeley government. To tear down one of such historical significance and aesthetic beauty would be a crime.

Thank you for your consideration.

Sincerely,
Laurel Bellon

WARNING: This is not a City of Berkeley email. Do not click links or attachments unless you trust the sender and know the content is safe.

Dear Ms Gong,

I am writing to oppose the demolition of the historic UA theatre on University Avenue.
This time is crucial for us to preserve this iconic public building that has so much potential to help revive downtown Berkeley. It could thrive as movie theatre/ concert hall and act as an anchor for the area.
Attracting business for restaurants and local stores.
Look no further to the continued success of the Paramount in Oakland which I frequent and enjoy.
In my hometown of Palmerston North , New Zealand, one beautiful theatre was preserved a few years ago and is extremely successful.
It would be great to have another space for performers to come to Berkeley and it is such a beautiful building inside.
The character of our cities cannot be lost.
Regards
Susan Ciochetto

RE: CEQA review of 2274 Shattuck Ave. project

Dear Berkeley Planning Department:

I'm writing to respectfully request that the proposal to tear down the historic United Artists theater in downtown Berkeley undergo a full review under the California Environmental Quality Act (CEQA). It would be highly unethical for the city to grant a CEQA exemption to the developer. This theater is an invaluable historic resource at a moment when Berkeley has fewer than five theaters left.

The UA Berkeley is an example of Art Deco architecture that is among the finest theaters ever built in the city. Constructed during the Great Depression by Hollywood icons Charlie Chaplin and Mary Pickford, the UA is on the California Register of Historical Resources and was found eligible for the National Register. It is also a city landmark, thanks to an LPC decision earlier this year. Without a doubt, the building is a cultural and historical resource under the CEQA statute; demolishing it would be a "substantial adverse change" requiring extensive CEQA review.

Our town used to be nationally known as jeweled with theaters, renowned theater critics, theater-inspired and informed citizens and a nightlife brimming with cultural options benefiting artists and cultural workers as well as an admiring international audience. This array of treasures has been so devalued by profiteers that this outrageous proposal to gut a storied cultural resource is apparently being considered despite the dearth of theaters which can in any way represent the living history of this most American art form.

If the city granted the developer a blanket exemption, it would be denying the public a multifaceted process under which it could learn more about the cultural resource status of the theater, be provided the opportunity to submit comment, and have the chance to attend at least one public meeting on the topic (within the SB 330 meeting cap). No one should be in a hurry to destroy California's cultural resources, especially one which qualifies as a federal landmark.

The developer proposes to retain a portion of the facade and lobby while destroying the grand four-story theater itself—a palatial venue that entertained Berkeley moviegoers for 91 years! Its destruction would be a monumental blow to the city's historic fabric; it warrants extensive review under CEQA.

Building housing is easily done while without destroying historic landmarks and historic parks. Berkeley has extraordinary plentiful options for situating projects such that it does not have to cost Berkeley one of its most magnificent historic buildings and contribute to an astonishing cultural decline for future generations. It is unacceptable that Berkeley is allowing its downtown cinemas to be destroyed.

Thank you for your consideration.

Sincerely,

Carol Denney

WARNING: This is not a City of Berkeley email. Do not click links or attachments unless you trust the sender and know the content is safe.

Dear Berkeley planning department:

I'm writing to strongly request that the proposal at 2274 Shattuck Avenue to tear down the United Artists theater undergo a full review under the California Environmental Quality Act (CEQA).

I grew up in Berkeley but currently live in Oakland; a city that means so much to me in part because of its legacy of marvelous theaters. Where would Oakland be without the Grand Lake, the Paramount and the Fox?

What will Berkeley be without any downtown movie theater at all? I believe it will be a sadder, less interesting place, and I fear that the wholesale destruction of this irreplaceable resource, if it occurs, would be sorely regretted. Berkeley needs housing and has been making remarkable progress which I fully support, but every case is different, and EVERY case should follow the letter of the law.

I believe tearing down the UA Theatre would be a terrible travesty, one that could never be remedied, but whether that's true or not, it would be highly unethical for the city to grant a CEQA exemption to the developer.

Follow the process. That's my simple request.

Patrick Emmert
Oakland

May 20, 2024

SUBJECT: Require a full CEQA review of the 2274 Shattuck Ave. UA Berkeley Theater project.

Dear Berkeley Planning Department, Berkeley Mayor, and Berkeley City Council:

I am a native of Berkeley. Born and raised in the City of Berkeley. I treasure the beautiful, architecturally significant, and historical buildings found throughout Berkeley which are part of the City's heritage and unique character.

I am writing to urge that the proposal to demolish the historic United Artists Theater in downtown Berkeley undergo a full review under the California Environmental Quality Act (CEQA). It would be highly unethical for the city to grant a CEQA exemption to the developer. The city must follow the law—no special breaks for developers. This magnificent theater and the public deserve no less

Constructed during the Great Depression by Hollywood icons Charlie Chaplin and Mary Pickford, the UA Berkeley Theater is on the California Register of Historical Resources and was found eligible for the National Register. It is also a city landmark, thanks to an LPC decision earlier this year. Without a doubt, the building is a cultural and historical resource under the CEQA statute; demolishing nearly all of it would be a "substantial adverse change" requiring extensive CEQA review. The UA Berkeley Theater is a paragon of Art Deco architecture that, if destroyed, can never be replaced.

It greatly saddens me that many of the irreplaceable iconic structures in Berkeley are being ***deliberately destroyed in the mistaken belief that high rise apartment buildings will solve the lack of affordable housing and reduce the increasing number of homeless on our streets***. I note that there are already a noticeable number of high rise apartment complexes being constructed in the Berkeley Downtown Center (at least one of which will be 26 floors high).

It can be argued that the developers are controlling the City of Berkeley's planning process, programming, and projects. While I applaud appropriate infill and higher density housing, it is tragic that these sound urban planning principals are being used to destroy our iconic and architecturally significant historical buildings.

I urge you to SAVE the historic art deco Berkeley United Artists Theater and require a full review under the California Environmental Quality Act (CEQA) of the proposed construction project.

Sincerely,

Laura Fujii

Dear Berkeley planning department:

The City of Berkeley should NOT grant a CEQA exemption to the developer of the existing United Artist Theatre,. There should be review under the California Environmental Quality Act (CEQA).

Berkeley would be losing a palace that served the community for 91 years. It survived the great depression, provided newsreels to the home front during the second world war, premiered roadshow movie extravaganzas, and has served generations of all ages.

High density housing will add to the city's congestion and crowdedness. It will make the city a less desirable place to visit. This is the last of Berkeley's movie palaces. The United Artist Theatre has so much potential to serve the community as a cultural and historic resource.

This magnificent theater and the public deserve no less. Thank you for your consideration!

WARNING: This is not a City of Berkeley email. Do not click links or attachments unless you trust the sender and know the content is safe.

Hello,

I have been a resident of Berkeley for approximately 30 years and have mourned the loss of all but the one remaining first-run movie theater. When I was a student at Cal in the early 90s, I frequently watched movies at the Shattuck Cinemas, Act 1 and 2, UC Theatre, California Theatre, and UA Berkeley, all within a handful of blocks of one another. There are no longer any first-run theaters in downtown Berkeley. We have all watched the vitality of the downtown Berkeley corridor decline very rapidly over the past five years. It seems many businesses and restaurants are closing as their buildings are torn down to build multi-story housing, and there is no doubt that housing density is needed in the Bay Area. However, tearing down beautiful historical structures should not be necessary to build that housing. Please do not allow developers to bypass the CEQA assessment of the former UA Berkeley theater on Shattuck Avenue adjacent to the Berkeley Public Library. It would be shameful to allow this building to be demolished without a proper assessment. For the long-term vitality of the downtown Berkeley area, the residents of these new housing units will want access to movie theaters and performing arts spaces as well as restaurants and shops. The restoration of the UA Berkeley as a destination for film or other performances should be an attractive prospect for the city, to keep residents from traveling to Oakland, Emeryville or San Francisco to spend their dining and movie dollars.

Thank you for your time,

Sonia Mistry

Dear Berkeley Planning Department:

I'm writing to demand that the proposal to tear down the historic United Artists theater in downtown Berkeley undergo review under the California Environmental Quality Act (CEQA). The city must NOT grant a CEQA exemption to the developer.

Constructed during the Great Depression by Hollywood icons Charlie Chaplin and Mary Pickford, the UA is on the California Register of Historical Resources and was found eligible for the National Register. It is also a city landmark, thanks to an LPC decision earlier this year. Without a doubt, the building is a cultural and historical resource under the CEQA statute; demolishing nearly all of it would be a "substantial adverse change" requiring extensive CEQA review.

The city must follow the law—no special breaks for the developer. This magnificent theater and the public deserve no less. Thank you for your consideration.

Sincerely,

Daniel Ondrasek

Bay Area resident who wants to save at least a tiny part of our architectural heritage.

Subject: CEQA review of 2274 Shattuck Ave. project

WARNING: This is not a City of Berkeley email. Do not click links or attachments unless you trust the sender and know the content is safe.

Dear Berkeley Planning Department:

I am an 18 year old student and I live and grew up in Berkeley, I'm writing to demand that the proposal to tear down the historic United Artists theater in downtown Berkeley undergo a full review under the California Environmental Quality Act (CEQA). It would be highly unethical for the city to grant a CEQA exemption to the developer. The UA Berkeley is a paragon of Art Deco architecture that is arguably the finest theater ever built in the city. Constructed during the Great Depression by Hollywood icons Charlie Chaplin and Mary Pickford, the UA is on the California Register of Historical Resources and was found eligible for the National Register. It is also a city landmark, thanks to an LPC decision earlier this year. Without a doubt, the building is a cultural and historical resource under the CEQA statute; demolishing it would be a "substantial adverse change" requiring extensive CEQA review.

If the city granted the developer a blanket exemption, it would be denying the public a multifaceted process under which it could learn more about the cultural resource status of the theater, be provided the opportunity to submit comment, and have the chance to attend at least one public meeting on the topic (within the SB 330 meeting cap). The developer proposes to retain a portion of the facade and lobby while destroying the grand four-story theater itself—a palatial venue that entertained Berkeley moviegoers for 91 years! Its destruction would be a monumental blow to the city's historic fabric; it warrants extensive review under CEQA. Building more housing is vitally important, but it does not have to cost Berkeley one of its most magnificent historic buildings. It is unacceptable that Berkeley is allowing all of its downtown cinemas to be destroyed.

Thank you for your consideration.
Sincerely,

James Osuna,
City of Berkeley

Subject: Entreating you to provide a CEQA review for the UA Theater property on Shattuck

WARNING: This is not a City of Berkeley email. Do not click links or attachments unless you trust the sender and know the content is safe.

Dear Berkeley,
I am a long-time resident of Berkeley and I have watched in horror and dismay as theater after theater in Berkeley has been shuttered and demolished.
Personally, I visited all of them.
Without a doubt, the belle of them all is the historic UA Theater that was, at the time, an Art Deco masterpiece. Nothing else in Berkeley can compare.
We believe that the architectural attributes still exist beneath the facades that were installed during the various remodels to add theaters.
The UA Berkeley is on the State Historic Registry, is National Register - eligible, and is a city landmark. Why would you consider granting the developer an exemption to the CEQA process? Surely the property deserves further review before it can be demolished.
A CEQA review would allow the public an opportunity to submit comment and attend decision making meetings. It would be unethical to not have it be so.
The UA was built to feature vaudeville shows, with a deep stage, tall wings, dressing rooms, an orchestra pit, lounges, etc. All these amenities could be put to new use in a multi-purpose entertainment venue. Berkeley's own Paramount Theater.
Downtown Berkeley is dying, restaurants, stores. They have felt the loss of the demolished theaters' traffic.
The future you envision will have many people living in apartments with nothing to do.
I am aware that housing is an important need for the city, a mandate, even. But there are many other locations where a 17 story building could be built close to transit.
Please consider a cultural future that incorporates Berkeley's historical past.
"Is it not cruel to let our city die by degrees, stripped of all her proud monuments, until there will be nothing left of all her history and beauty to inspire our children?"

Subject: UA theater landmark status

WARNING: This is not a City of Berkeley email. Do not click links or attachments unless you trust the sender and know the content is safe.

Hello:

I am a resident of Berkeley, and I am concerned about the impending destruction of the UA Cinema on Shattuck Ave. I was alerted by the Save the UA Berkeley group that the developer's plan is required by state law to undergo a review, per the California Environmental Quality Act (CEQA), but that the development company has asked to be exempted from that. I don't think you should exempt their plan from review.

In addition, I sent a query (appended below) months ago to Secretary Crane to inquire about a specific part of the landmark status granted the marquee of the theater, but did not receive a reply. The developer's mockup, which is displayed on the front of the theater, shows the decorative facade minus the Art Deco curves in the central column. I believe those should be preserved, and I'm hoping that the landmark protection ensures that they are. What does the law say about that?

Thank you,

Christine U'Ren

CC:baha@berkeleyheritage.com

Dear Secretary Crane (or to whom it may concern):

I am a Berkeley resident and attended part of the February meeting about the UA cinema demolition. I was glad to see in Berkeleyside that you at least voted to landmark the marquee of the UA (I missed the vote counting). I'm hoping this means Panoramic/Patrick Kennedy must preserve the original shape of the central column of the decorative facade. It's good that Panoramic's plan at least preserves the Artistry/Unity bas-reliefs, but turning the central column into a block without the graceful Art Deco curves, as their mockup shows, destroys much of the charm of the marquee. Can you tell me what the landmark decision means for this portion of the building?

I also wanted to express my concern about the evaluation made by Left Coast Architectural History. As one of the commission members pointed out, the evaluator used "uniqueness" as a prime factor in determining her valuation of the UA, even though that is not part of what she was commissioned to investigate. She announced at the meeting that she felt the Berkeley Public Library ticked off the boxes for community service, entertainment, and Art Deco styling, and

that, since it is in the same block as the UA, it's not necessary to keep both buildings. I find this logic appalling. First of all, the two buildings, although they may both be classified as Art Deco, do not look at all the same. Second, there's a difference between a library and a cinema, in terms of public offerings. Third, there is no reason on Earth that a town or even a block cannot support two Art Deco buildings at the same time. Part of a city council's duties, in my opinion, is the consideration of how buildings in a downtown work *together*, and it's obvious that it makes no sense to require that each building represent a different architectural movement.

I don't think you should continue to use Left Coast as an architectural advisor.

I am copying BAHA on this message, because I understand they are advising Mr. Kennedy on the development.

Thank you; I look forward to your answer.

Dear Planning Dept

As a Berkeley resident, I'm disturbed by all the mega apartment buildings going up around Berkeley and now I hear that the UA Theater is facing the same fate.

It's my understanding that the developer is asking to be granted an exemption to CEQA. This sounds like a way to sidestep saving this historical theater.

Please don't give the developers a free pass! Save the theater and restore it to its original beauty! It can be something so much more than another ugly apartment building that ordinary people cannot afford.

Thank you
Candice Schott

Subject: Pls require a CEQA review for 2274 Shattuck Ave. Project

WARNING: This is not a City of Berkeley email. Do not click links or attachments unless you trust the sender and know the content is safe.

Hello Berkeley Planning Department:

I understand that the project developer for the 2274 Shattuck Ave. Project has asked for a CEQA exemption. I believe that it should be subject to a full review. I would like to request that you require a full CEQA review for the project.

Several cities in the Bay Area have succeeded in saving and, in many cases, restoring their best Art Deco theaters:
* Oakland with the Paramount, the Fox, and the Grand Lake
* Alameda with the Alameda
* San Francisco with the Castro
* Orinda with the Moderne
* San Rafael with the California Film Institute

Is Berkeley going to be the only significant city in the Bay Area to agree to the destruction of its best Art Deco theater?

The UA is an extraordinary Art Deco theater, already on the California Register of Historical Resources. It is clearly a cultural and historical resource under the CEQA statute, and its demolition would obviously constitute a substantial adverse change. An extensive CEQA review is necessary. The least we can ask is an opportunity for the residents of Berkeley to express their opinion about the destruction of the UA. It would be a denial of justice to grant a CEQA exemption for this exceptional building.

Sincerely,

Michel G. Thouati

Subject: Don't destroy the UA theater!

WARNING: This is not a City of Berkeley email. Do not click links or attachments unless you trust the sender and know the content is safe.

Hello to the team,

I'm writing to demand that the proposal to tear down the historic United Artists theater in downtown Berkeley undergo a full review under the California Environmental Quality Act (CEQA). It would be highly unethical for the city to grant a CEQA exemption to the developer.

The UA Berkeley is a paragon of Art Deco architecture that is arguably the finest theater ever built in the city.

You undoubtedly have seen the above text multiple times. I agree with it. I want to add the following:

Last Friday night I went to the Paramount Theatre in Oakland to hear the Oakland Symphony. Having not been there in many years, I was aesthetically reminded of what a stunning piece of work it is. It made the experience so much more thrilling. The restoration was absolutely spectacular. I kept thinking what an irreplaceable treasure it is.

And you want to destroy the one theater left in Berkeley that can compete with that. The theaters in Berkeley were a grounding force to bring people to downtown. Yes, there are the theaters on Addison Street, but those are not MOVIE theaters. The only movie theater left is the Elmwood, which is great. I live close to it. But it could never be what the UA could be.

I'm sure the developers are ninety-nine percent concerned about money--ROI. Why else would they want to sidestep the CEQA review? Do any of them live in Berkeley? Do any of them have family in Berkeley? Do any of them EVER come to Berkeley? They will take their money and run. They do not care about the loss to the city's culture. What could be the most ironic is that they lose money by not creating a treasure as opposed to spending the money to make it a place people come to just because it IS a treasure.

Please give it a chance by demanding a CEQA review.

Thank you for listening!

Marla Wilson, a resident of Berkeley for 58 years.

Constructed during the Great Depression by Hollywood icons Charlie Chaplin and Mary Pickford, the UA is on the California Register of Historical Resources and was found eligible for the National Register. It is also a city landmark, thanks to an LPC decision earlier this year. Without a doubt, the building is a cultural and historical resource under the CEQA statute; demolishing it would be a "substantial adverse change" requiring extensive CEQA review.

If the city granted the developer a blanket exemption, it would be denying the public a multifaceted process under which it could learn more about the cultural resource status of the theater, be provided the opportunity to submit comment, and have the chance to attend at least one public meeting on the topic (within the SB 330 meeting cap).

The developer proposes to retain a portion of the facade and lobby while destroying the grand four-story theater itself—a palatial venue that entertained Berkeley moviegoers for 91 years! Its destruction would be a monumental blow to the city's historic fabric; it warrants extensive review under CEQA.

Building more housing is vitally important, but it does not have to cost Berkeley one of its most magnificent historic buildings. It is unacceptable that Berkeley is allowing a ll of its downtown cinemas to be destroyed.

Thank you for your consideration.

Sincerely,

Anna Wong

Subject: Save the United Artists theatre in Berkeley

WARNING: This is not a City of Berkeley email. Do not click links or attachments unless you trust the sender and know the content is safe.

Greetings,

While living in Palo Alto back in the 80's, David Packard bought and restored the Stanford Theater. I went to see all the films Packard showed that were shipped up from the UCLA Film Archives. I swore from then on, that I would always see movies in a theater, the way they were meant to be. There is nothing compared to seeing West Side Story, or Gone With the Wind on a big screen after only seeing them on TV for years.
I spend a lot of my free time going to the cinema. I belong to Cinemark Movie Club, Movie Pass, AMC Stubs, and of course UA/Regal Unlimited. Not only do I see every movie released in a cinema, but I travel to different states and cities to see all kinds of movies.

It will be a horrible shame to have the US Berkeley wither away, be shut down, or be demolished. The historical significance of this theatre is what drew me to it. One of the cinemas built by actual Hollywood actors, so they could share their art with the general public.

The City of Anchorage just lost our beloved 75 year old 4th Avenue Theatre because the city let an investment company buy the theater. The firm, that is not even a US Company, then tore it down. They plan to build a shopping plaza in its place. Horrible decision.

I don't know how much power you have to keep this building standing and in use, but I am writing to you all in hopes that you realize how much the general public loves these beautiful theatres, and we need to save them.

Dean Brady

WARNING: This is not a City of Berkeley email. Do not click links or attachments unless you trust the sender and know the content is safe.

Dear Berkeley planning department:

Because the UA Berkeley is on the state historic registry (not to mention National Register-eligible and now a city landmark), it is without a doubt considered a historical and cultural resource under state law and **deserves a full review** under the California Environmental Quality Act (CEQA).

Without a doubt, the building is a cultural and historical resource under the CEQA statute. The UA Berkeley is a gem of Art Deco architecture that is arguably the finest theater ever built in the city. It would be highly unethical for the city to grant a CEQA exemption to the developer.

Building more housing is vitally important, but it does not have to cost Berkeley one of its most magnificent historic buildings. It is unacceptable that Berkeley is allowing all of its downtown cinemas to be destroyed. Please allow this one the consideration it deserves for preservation. Allowing it a free pass to be demolished would be wasteful, irreversible and tragic.

Thank you for your consideration.

Sincerely,

Julie Ann Brown

Subject: Save the United Artists Theater.

WARNING: This is not a City of Berkeley email. Do not click links or attachments unless you trust the sender and know the content is safe.

Too much of the Berkeley is being destroyed, and the United Artists Theater should be saved.

The school district has ruined the Berkeley Community Theater. This house should have been kept by the city but was given to the school district--a big mistake.

The UA becomes more valuable to all residents for its almost 1600-seat capacity. The previous Community Theater seems to be reduced to 1000 with a reduced stage. Left in incapable hands of the school system, the venue has been lost.

The UA would fit well with the increase in residential housing.There will be increasing demand for performance facilities. It can become a dominant feature in the Berkeley of the future.

Residential development does not have to mean wrecked landmarks. The current developer can easily find other available properties and all of us can preserve the United Artists.

Please do not let the big money of the current owners destroy something prized from a former era.

Geoff Hansen
Rossmoor
Homeowner in Berkeley.

Subject: CEQA review is essencial for the U A Theater a National Register eligable landmark

WARNING: This is not a City of Berkeley email. Do not click links or attachments unless you trust the sender and know the content is safe.

To whom it may concern,

I have been operating theaters for over 50 years starting with my first theater, the Rialto, in West Berkeley in 1972. Since then, over the years, I was the operator of the Fine Arts Theater, the Northside Theater, the Sunset Theater, and the Oaks Theater all in Berkeley.
I built the Shattuck Theater.

I understand that the developer who wishes to demolish the United Artists Theater on Shattuck Avenue is seeking an exemption from the CEQA review which is a vital part of considering demolition of an existing building, especially one that already has a landmark designation, even if it only for thr Shattuck Avenue facade.

The United Artists Theater building is a highly important survivor of the Golden Age of Movie Palaces. It is listed as a California Historic building and has been deemed eligable for inclusion on the National Register of Historic Places. Furthermore it was built by the partnership of Charlie Chaplin, Mary Pickford, Douglas Fairbanks Jr.
and pioneer motion picture director D W Griffith.
It has tremendous cultural and historical significance,.
The historic eveluation report submitted by the developer to the Landmark Preservation Commission is deeply flawed and should not be considered an honest evaluation of the structure.

When the theater was remodelled in the early 1970s for the addition of small auditoriums the City of Berkeley officials, out of great foresight and wisdom, required that the additions be constructed within the shell of the original auditorium with a minimum impact on the spectacular Art Deco interior.

That interior STILL SURVIVES and the theater can easily be restored as a mixed use performance venue. Communities all over the country have recognized the value that such irreplaceable community gathering entertainment buildings provide to the citizens as well as stimulating the downtown business districts.
Those cities have embraced the preservation of these special buildings.

PLEASE do not allow this developer to rush this architectural treasure into oblivion.
Every effort must be made to explore alternate sites for his residential tower and create a preservation success story for Berkeley to rival the benefits that Oakland has realized from the preservation and restoration of the Paramount theater.
The powers that be in Berkeley must not make the same mistake as those in San Francsco made allowing the demolition of the Fox Theater in 1963.
We know better today.

Berkeley has lost almost every one of its theaters, let's save this one for current and future generations.

Respectfully yours,
Allen Michaan
Owner/ operator of the Grand Lake Theater

I'm a 56 year resident of Berkeley and worked for the city for 43 years. I have been greatly saddened to see the once thriving downtown become an empty shell filled with tall buildings and very little culture. Do not misunderstand me. I realized that housing is needed. But, so is culture and history and beauty and I see so many empty spaces in Berkeley where the buildings could go. The loss of all the movie theaters is really terrible. Friends tell me that they no longer go downtown, because there is no longer a reason to. We have one last chance to save our beautiful and historic gem...the UA Theater. We could have our very own version of the Paramount Theater. I go to movies often...sometimes as far as San Rafael and to our only 2 remaining movie theaters, the Elmwood and PFA and I can tell you that now that Covid is on the wane, people are returning to the theaters. The UA could be repurposed as a performance space and as either that and/or a movie theater, it would draw crowds to downtown once again. I understand that there is a requirement for a CEQA report. Please do not give the developer an exemption for this.
Thank-you
Anne-Marie Miller

Subject: CEQA Review for 2274 Shattuck Avenue

WARNING: This is not a City of Berkeley email. Do not click links or attachments unless you trust the sender and know the content is safe.

Dear Berkeley Planning Department:

It has come to my attention that the developer wishing to turn the United Artists Theater into housing has requested that the City
Of Berkeley grant said developer an exemption to the California Environmental Quality Act (CEQA) review.
I believe that granting this request would be a grave disservice to the City of Berkeley, to its history, and to those seeking to revitalize
and retain the factors that make Downtown Berkeley unique.
Requiring the CEQA review would provide a reasonable and multifaceted process through which much would be learned about the
theater's true worth and potential as a cultural resource, with opportunities for assessments and comments, and the opportunity for
public discussions regarding the future use of the property.
The developer has proposed to retain a portion of the facade and lobby while destroying the rest of the building---rather cold comfort
for the posterity of Berkeley and those who would be deprived of a significant part of its history and unique aesthetics. Building housing
is of course essential and important, but development of anything, however essential it may be, should never be done in a gratuitous
scorched earth manner, as some have felt Berkeley has been doing of late.
As a theater aficionado and amateur historian, I strongly urger the City Planning Department of Berkeley to deny the CEQA
exemption to the developer of the United Artists Theater.

Respectfully,

Garrett Murphy

Subject: CEQA Review of Project at 2274 Shattuck Ave

WARNING: This is not a City of Berkeley email. Do not click links or attachments unless you trust the sender and know the content is safe.

Dear Berkeley Planning Department,

It is my understanding that the prospective developer of 2274 Shattuck Avenue has demanded that the city of Berkeley grant immediately a blanket exemption from the public interest review process required for all recognized historical and cultural resources within the state, such as the United Artists Theatre of Berkeley, under the California Environmental Quality Act (CEQA).

In my opinion, there is absolutely no merit to the demand that the city short-circuit this comprehensive approach by which this historic structure, currently threatened with annihilation, will be evaluated by experts and public comment solicited concerning its ultimate fate.

The UA Berkeley is a paragon of Art Deco architecture that is arguably the finest theater ever built in the city. Constructed during the Great Depression by Hollywood motion picture icons Charlie Chaplin and Mary Pickford, the UA is already on the California Register of Historical Resources and is eligible for the National Register. It is also a city landmark, thanks to an LPC decision earlier this year.

Without a doubt, this building is a cultural and historical resource under the CEQA statute. Its demolition would be a "substantial adverse change," justifying completely the extensive CEQA review process to which the building is entitled.

If the city of Berkeley grants a blanket exemption to the developer, it will be denying the public a multifaceted process under which it will be possible for residents and visitors to learn more about the theatre's cultural resource status, to submit comments, and possibly to attend at least one public meetings devoted to the subject (within the SB 330 meeting cap).

The developer proposes to retain only the facade and lobby while destroying the remainder of the grand, four-story theater, a palatial venue where Berkeley moviegoers have been entertained for nine decades. Its destruction is unnecessary, and will constitute a monumental blow to the historic fabric of the community, especially if it is allowed to proceed without the due process to which the building is certainly entitled.

Constructing more housing is vitally important - - but not at the expense of one of Berkeley's most magnificent remaining historic buildings.

Please deny the exemption and allow the CEQA review to proceed without obstruction.

Thank you for your consideration.

Sincerely,

Joel Preisler
Los Angeles, CA

It is also a city landmark, thanks to an LPC decision earlier this year. Without a doubt, the building is a cultural and historical resource under the CEQA statute; demolishing it would be a "substantial adverse change" requiring extensive CEQA review.

If the city granted the developer a blanket exemption, it would be denying the public a multifaceted process under which it could learn more about the cultural resource status of the theater, be provided the opportunity to submit comment, and have the chance to attend at least one public meeting on the topic (within the SB 330 meeting cap).

The developer proposes to retain a portion of the facade and lobby while destroying the grand four-story theater itself—a palatial venue that entertained Berkeley moviegoers for 91 years! Its destruction would be a monumental blow to the city's historic fabric; it warrants extensive review under CEQA.

Building more housing is vitally important, but it does not have to cost Berkeley one of its most magnificent historic buildings. It is unacceptable that Berkeley is allowing all of its downtown cinemas to be destroyed.

Thank you for your consideration.

Sincerely,
Dorothea Rastegar

To the Berkeley Planning Department --

I just heard that there are thoughts under consideration to grant the developers who are planning on gutting the UA Theatre an exemption of a CEQA review.

As a Berkeley resident, and a greatly saddened cinema-goer (who really can't do that much any more in the city of Berkeley), I strongly strongly strongly oppose such an exemption. The developers had been told they would need to undergo such a review, and I would find the desire among city officials to simply steamroll ahead without proper consideration deeply disturbing. I can't urge you enough to let the full review process take its course.

regards,

-Gregory Scharpen

Dear Berkeley planning department:

I'm writing to demand that the proposal to tear down the historic United Artists theater in downtown Berkeley undergo a full review under the California Environmental Quality Act (CEQA). It would be highly unethical for the city to grant a CEQA exemption to the developer.

As a 37 year resident of Berkeley, I am saddened by the closure of all the downtown movie theaters which I frequented many times over my years in Berkeley. As the downtown has changed so much in recent years, I hardly recognize it anymore.

To take away one more cherished building contributes to the destruction of the charm of downtown.

The UA Berkeley is a paragon of Art Deco architecture that is arguably the finest theater ever built in the city. Constructed during the Great Depression by Hollywood icons Charlie Chaplin and Mary Pickford, the UA is on the California Register of Historical Resources and was found eligible for the National Register. It is also a city landmark, thanks to an LPC decision earlier this year. Subject: 2274 Shattuck: NO to CEQA exemption for the developer

WARNING: This is not a City of Berkeley email. Do not click links or attachments unless you trust the sender and know the content is safe.

Demolition of the great Art Deco United Artists Theater building should absolutely be subjected to a full and rigorous CEQA review.

Approved by the state historic registry, and a city landmark, the UA Theater is an acknowledged historical building and a cultural resource and should continue as a part of the fabric of downtown Berkeley in its function as a movie theater and performance venue.

That the city of Berkeley should allow the last of its downtown venues for the art of film to also be demolished by a for-profit developer and replaced by housing for the wealthy is intolerable. We now have a glut of market-rate housing downtown but ever fewer cultural resources. Saving the facade and lobby is a cruel joke to all those who treasure film as an art form and as affordable entertainment.

Filmmakers did not stop making films due to covid, and the damage to the movie theater business by covid and the new streaming corporations is not a longterm phenomenon. Streaming is proving to be more expensive and much less reliable and satisfying than it initially promised. It cannot replace the excitement of going downtown to the movies. Thanks to the destruction of the Shattuck Cinemas and the California Theater, we now have no place in downtown Berkeley to see Francis Ford Coppola's new film *Megalopolis* and or other film new film. The Pacific Film Archive cannot replace the commercial movie theaters that screen new films.

For a city of Berkeley's size and stature and pretensions to cultural richness and diversity, home to one of the great universities in the world, to have no downtown movie theater is an unacceptable deficiency.

I hope responsible members of city government will ensure protection of this building, and have the vision to see that filling our downtown with rapidly-built market rate residential buildings and allowing our most essential cultural resources to be destroyed in the process is not an improvement of the city. Instead, we need our city government to preserve the cultural and architectural richness of our downtown and sharply focus on recruiting non-profit developers to build the urgently-needed housing for low- and middle-income people.

Sincerely,

Charlene M. Woodcock
Berkeley

Dear Berkeley planning department:

Because the UA Berkeley is on the state historic registry (not to mention National Register-eligible and now a city landmark), it is without a doubt considered a historical and cultural resource under state law and **deserves a full review** under the California Environmental Quality Act (CEQA).

Without a doubt, the building is a cultural and historical resource under the CEQA statute. The UA Berkeley is a gem of Art Deco architecture that is arguably the finest theater ever built in the city. It would be highly unethical for the city to grant a CEQA exemption to the developer.

Building more housing is vitally important, but it does not have to cost Berkeley one of its most magnificent historic buildings. It is unacceptable that Berkeley is allowing all of its downtown cinemas to be destroyed. Please allow this one the consideration it deserves for preservation. Allowing it a free pass to be demolished would be wasteful, irreversible and tragic.

Thank you for your consideration.

Dear Sharon Gong, planning department:

I'm writing to demand that the proposal to tear down the historic United Artists theater in downtown Berkeley undergo a full review under the California Environmental Quality Act (CEQA). It would be highly unethical for the city to grant a CEQA exemption to the developer.

The United Artists theatre is a is a irreplaceable depression era public entertainment venue in the modern (Art-Deco) style, Berkeley's finest theatre and the last of its kind. Always underutilized as a move theater due to the onset of the depression Its capabilities as a live venue makes this building invaluable for the future. Built for the namesake studio owned by Douglas Fairbanks, Mary Pickford, Charlie Chaplin & D.W. Griffith, to show their films and live vaudeville entertainment. The building was crafted by a master architect, Decorated by Heinsbergen Studios and chocked full of art, comfort and design in a lavish Art Deco interior of which nearly all remains. This building and the Los Angeles United Artists were the only ones built with pipe organs, Dressing rooms and performance capabilities.

The United Artists Berkeley is a city Landmark, on the State Registry and is / was eligible for the National Register of Historic places back in 1978! It is owed to our forebears who dedicated this treasure to future generations that are no longer here to advocate, and to this building itself that has unselfishly served generations of Berkeley and East Bay residents. This building is a cultural and historical resource under the CEQA statute; demolishing it would be a "substantial adverse change" requiring extensive CEQA review.

If the city granted the developer a blanket exemption, it would be denying the public a multifaceted process under which it could learn more about the cultural resource status of the theater, be provided the opportunity to submit comment, and have the chance to attend at least one public meeting on the topic (within the SB 330 meeting cap).

The developer proposes to retain a portion of the facade and lobby while destroying the grand four-story theater itself—a palatial venue that entertained Berkeley moviegoers for 91 years! Its destruction would be a monumental blow to the city's historic fabric; it warrants extensive review under CEQA.

Thank you for your consideration.

Constructed during the Great Depression by Hollywood icons Charlie Chaplin and Mary Pickford, the UA is on the California Register of Historical Resources and was found eligible for the National Register. It is also a city landmark, thanks to an LPC decision earlier this year. Without a doubt, the building is a cultural and historical resource under the CEQA statute; demolishing it would be a "substantial adverse change" requiring extensive CEQA review.

If the city granted the developer a blanket exemption, it would be denying the public a multifaceted process under which it could learn more about the cultural resource status of the theater, be provided the opportunity to submit comment, and have the chance to attend at least one public meeting on the topic (within the SB 330 meeting cap).

The developer proposes to retain a portion of the facade and lobby while destroying the grand four-story theater itself—a palatial venue that entertained Berkeley moviegoers for 91 years! Its destruction would be a monumental blow to the city's historic fabric; it warrants extensive review under CEQA.

Building more housing is vitally important, but it does not have to cost Berkeley one of its most magnificent historic buildings. It is unacceptable that Berkeley is allowing all of its downtown cinemas to be destroyed.

Thank You For Your Consideration,

Sincerely,

Anjali Rojas
1480 Prince Street
Berkeley, CA. 94702

Subject: United Artist Theater Must Be Saved!!

WARNING: This is not a City of Berkeley email. Do not click links or attachments unless you trust the sender and know the content is safe.

Hi Steve,
I hope you're well, and thriving as much as ever.
I'm writing on behalf of the many people who want to see the Unite Artist Theater on Shattuck saved. There are no functioning film theaters in that area (other than PFA) and the possibility for individuals or groups to be in public in Berkeley and share a common experience have become sadly limited.
I advocate for anything necessary to be done to help save those theaters. They will add necessary community spirit to the neighborhood that is currently sorely lacking.
My best, Steve Anker

WARNING: This is not a City of Berkeley email. Do not click links or attachments unless you trust the sender and know the content is safe.

To: Berkeley Planning Department

The proposal to tear down the historic United Artists theater in downtown Berkeley must undergo review under the California Environmental Quality Act (CEQA*). The city must NOT grant a CEQA exemption to the developer*.

This wonderful Art Deco theater was constructed during the Great Depression by Hollywood icons Charlie Chaplin and Mary Pickford. As such it is not only on the California Register of Historical Resources but was also found eligible for the National Register.

The United Artists theater is also a city landmark, thanks to a Landmarks Preservation Commission decision earlier this year. This building is a cultural and historical resource under the CEQA statute; demolishing nearly all of it would be a “substantial adverse change” requiring extensive CEQA review.

The city must follow the law— there should be no special breaks for the developer, who knew that this was a significant landmark when they purchased the building.

Our community will be poorer for its loss.

Sincerely,
Katherine Howard

Why in the world would anyone grant a CEQA exemption to an historic building that is a city landmark, on the state historic registry, and is National Register-eligible? If this is not an example of a project that needs CEQA evaluation, what is? Do the right thing.
