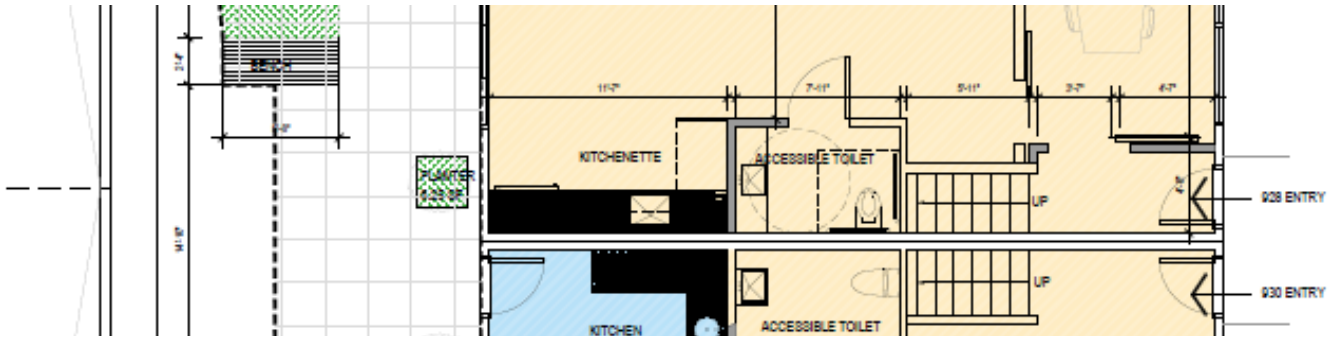
Zoning Adjustments Board Staff Report

APP #ZP2023-0094

July 10, 2025

Use Permit at 924-930 Carleton Street



Quick Facts	Project Description:
Applicant: Devi Dutta Architecture, Berkeley **Project Address:** 924-930 Carleton Street **GP Land Use:** Manufacturing / Mixed Use Residential **Zoning:** MU-R–Mixed Use-Residential District **CEQA:** Section 15162 **Submittal Date:** June 29, 2023 **Date Deemed Complete:** July 25, 2024 **Project Planner:** Boshi Fu	The applicant is seeking approval for a change of use from office to live/work units (5,685 square feet total) by converting four existing office spaces into four live/work units within a two-story building (32 feet, 1 inch in maximum height) on a 16,664 square-feet lot that includes four existing live/work units. The project involves no exterior alterations or expansion of the building footprint. Each live/work unit will include designated living and working areas, consistent with the standards of the MU-R district.
	Zoning Permits Requested:
	• **Use Permit** pursuant to Berkeley Municipal Code (BMC) Section 23.312.030(D)(3)(b) to establish four live/work units where 5,000 square feet or more of gross floor area is changed; and • **Use Permit** pursuant to BMC Section 23.206.090(D) to allow for a live/work building with a maximum building height of 35 feet
	Staff Recommendation:
	Staff recommends that the Zoning Adjustments Board (ZAB): 1. **FIND** that the Initial Study and Mitigated Negative Declaration (IS/MND) adopted in March 2000 analyzed live/work uses and finds that no subsequent amendments are required, pursuant to CEQA Guidelines Section 15162. 2. **APPROVE** #ZP2023-0094 pursuant to Section 23.406.040 (E) **"Findings for Approval"** and subject to the attached Findings and Conditions (see Attachment 1).

STREET ELEVATION

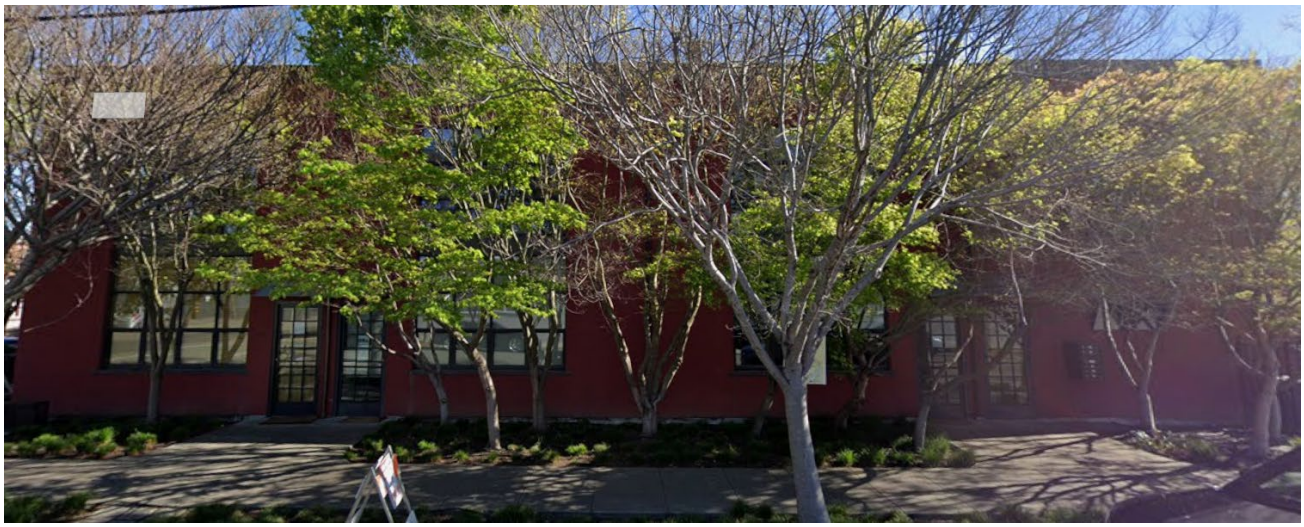

Figure 2: Site Plan

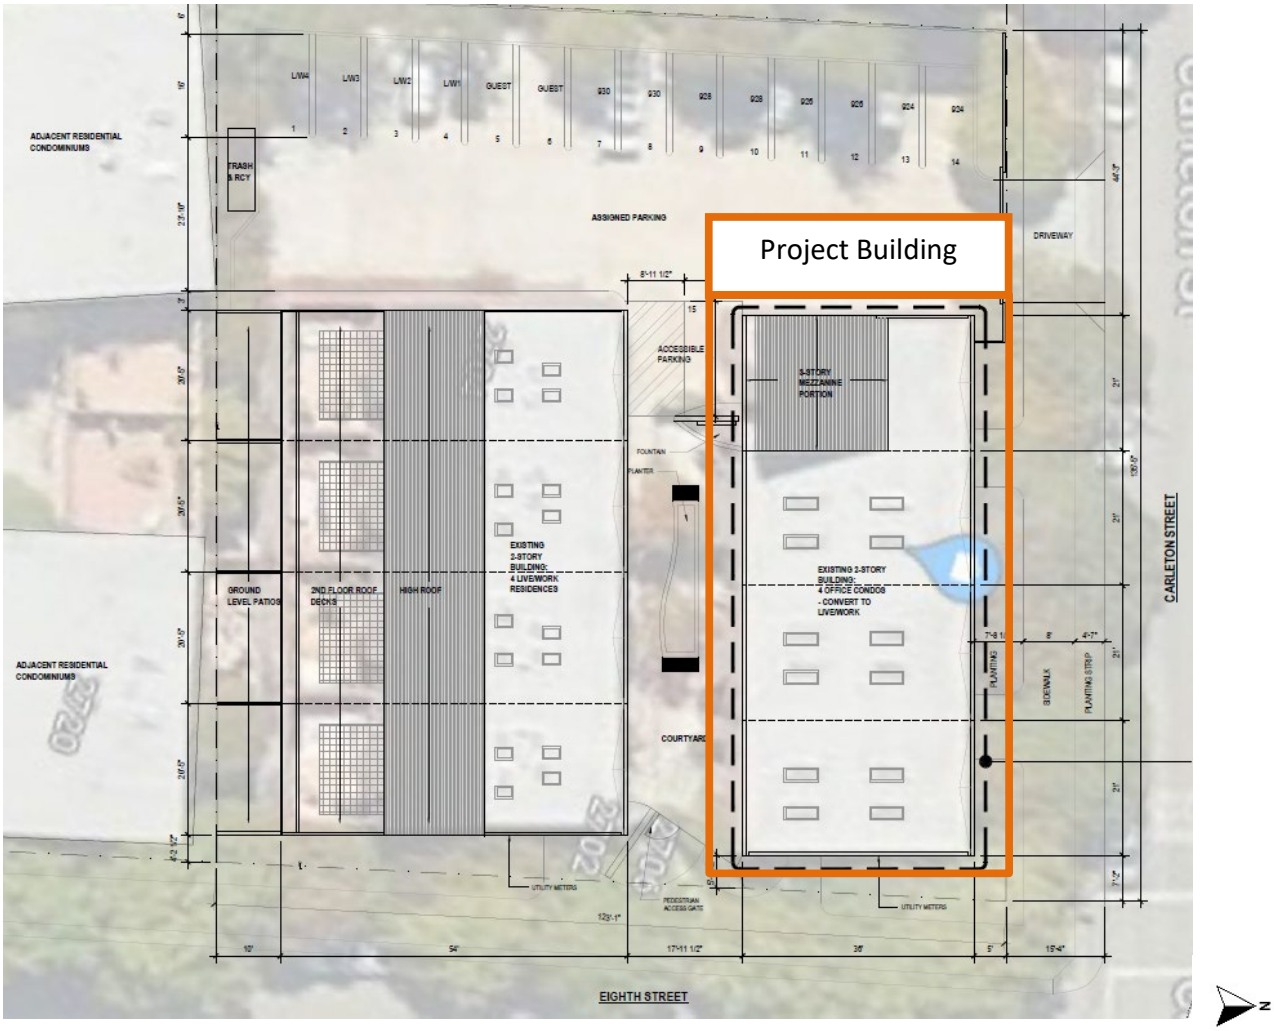

BACKGROUND

Subject Site

The subject site is located at the corner of Carleton Street and Eighth Street zoned as MU-R district in the West Berkeley Plan Area. Abutting blocks are designated as other manufacturing districts (i.e. Mixed Use Light Industrial and Mixed Manufacturing), and the subject area includes light manufacturing, residential, warehouse, off-street surface parking, office, and food service uses. The eastern portion of the block, along Eighth Street, maintains several live/work and residential units, ranging from two to three stories in height. The western portion of the block, along Seventh Street, consists of a three-story office complex with some commercial/arts & craft uses, with food service uses located on the ground floor. Additionally, the property (2701-2721 Eighth Street) directly across the project site from Eighth Street, is a City of Berkeley Landmark, known as the Standard Die and Specialty Company.

Site History

The subject site is a relatively flat, rectangular corner lot with frontage on Carleton Street and Eighth Street. The 16,664 square foot lot was developed in the year 2000, with two buildings and off-street surface parking located at the rear of the lot.

USE PERMIT #99-10000090 was approved by the Zoning Adjustments Board on April 27, 2000, consistent with the West Berkeley Plan and MU-R District standards. A Mitigated Negative Declaration was adopted on March 23, 2000, which included measures to address stormwater runoff, construction noise, and transportation impacts. The final design review for the project was completed on May 18, 2000.

The 9,901 square foot building that abuts the southern property line is developed with four live/work units with second floor roof decks and ground floor patios. This building shares a courtyard with the subject project building.

The subject project building is located on the eastern portion of the lot, primarily fronting Carleton Street, and is developed with four, two-story office units. The office suite (unit 924) located towards the rear of the lot includes a mezzanine level and four garage parking spaces for the existing live/work units on the ground floor. The lot is accessed with one curb cut along Carleton Street and includes pedestrian access at the corner of Carleton and Eighth Street.

Project Scope

The proposed project will convert the two-story, 5,685 square foot building with four existing office suites, into four live/work units.

Three live/work units will include work area and live area on the ground floor, with the second floor dedicated to live area, inclusive of communal space and two-three bedrooms. The live/work unit proposed closest to the rear property line (unit 924) will keep the existing parking at the ground floor, live and work space on the second floor, and additional live space on the mezzanine. The proposed live/work units would have access to an existing courtyard that is between the existing live/work building and the subject project building on the lot, as useable open space.

The following table illustrates the percent of floor area dedicated to live and work in the respective units.

Table 1: Live/work Unit Floor Area Allocation

Unit	Total Area (square feet)	Live Area (%)	Work Area (%)
930	1,152	50	50
928	1,511	50	50
926	1,511	55	45
924	1,511	59	41

No exterior changes are proposed to the existing building as part of this project.

Findings

Draft findings for approval can be found in Attachment 2 to the staff report.

Environmental Review

The City of Berkeley adopted an Initial Study (IS) and Mitigated Negative Declaration (MND) in March of 2000 for the "Carleton Business Center" project at 2700 Eighth Street. The original project approval included the construction of two new buildings on a single lot: one along the southern portion of the site containing four live/work units, and another along the northern portion containing four commercial office units.

The current proposal at 924-930 Carleton Street involves the interior conversion of the four commercial office units to live/work units to include shower pan installation. All existing units already have kitchens, and the existing building footprint will not expand. Mitigation measures were incorporated into the 2000 Use Permit Conditions of Approval (see conditions of approval), many of which now align with the City's current standard Conditions of Approval.

The site is listed in the State Water Board's GeoTracker database as an open Cleanup Program Site (Case No. T10000021302), the ACEHD has reviewed the current project and, in a letter dated November 22, 2024 (see Attachment 2, Exhibit B), confirmed that they have no objection to project approval, provided additional conditions and corrective actions are completed. These requests have been incorporated into the Conditions of Approval for the subject project.

Based on the limited scope of the proposed use conversion, the lack of new or more severe environmental impacts, and the environmental review previously conducted, no additional environmental review is required under CEQA Guidelines Section 15162.

ADVISORY BODY REVIEW

Landmarks Preservation Commission Review

This project is not subject to review by the Landmarks Preservation Commission because it does not involve the demolition of a nonresidential building.

Design Review Committee Review

Although the project is located in a manufacturing district, Design Review is not required because no exterior changes are proposed as part of the subject project.

POLICY CONSISTENCY

General Plan Consistency

A. The 2002 General Plan contains several policies applicable to the project, including the following:
   1. **Policy LU-7**: Neighborhood Quality of Life, Action A: Require that new development be consistent with zoning standards and compatible with the scale, historic character, and surrounding uses in the area.
   2. **Policy T-16-Access by Proximity**: Improve access by increasing proximity of residents to services, goods, and employment centers.

Staff Analysis: The project is consistent with the above General Plan policies because the conversion of office condos to live/work units will result in additional space for people to live and reconfigured work space proximate to public transit, bicycle boulevards, and commercial corridors that offer various goods and services to residents.

B. West Berkeley Plan Consistency:

The West Berkeley Plan, adopted in 1993, also contains several policies applicable to the project, including the following:

1. **Goals and Policies - Goal 5**: Encourage the development of Live-Work Units in appropriate locations.

Staff Analysis: The project is consistent with the above West Berkeley Plan goal as it converts existing office condos into new live/work units. The proposed live/work units are located on a lot that developed with four existing live/ work units, on a portion of the block with several housing units and residential uses. The proposed project will add unique housing opportunities for local artisans, craftspeople, and those who are important to West Berkeley's character.

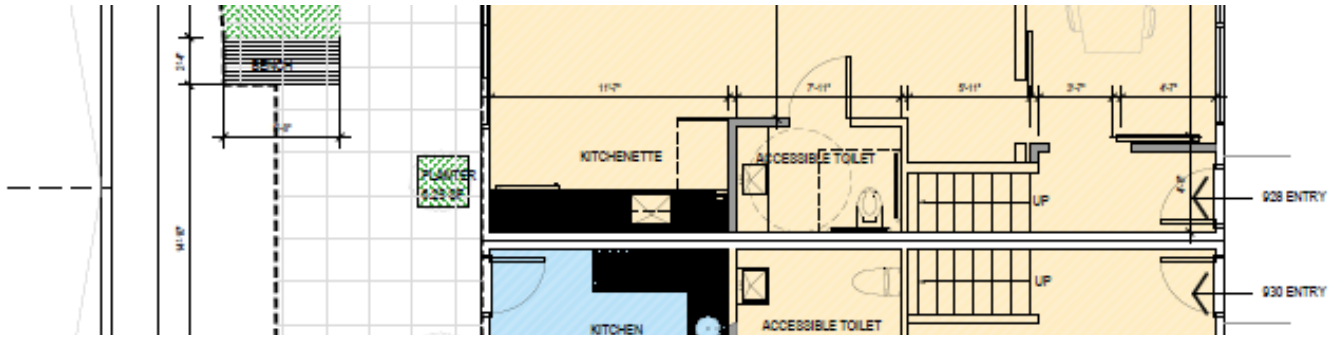
LAND USE PLANNING

Zoning Adjustments Board Findings

APP #ZP2023-0094

July 10, 2025

Use Permit at 924-930 Carleton Street



Quick Facts	Project Description:
Applicant: Devi Dutta Architecture, Berkeley **Project Address**: 924-930 Carleton Street **GP Land Use**: Manufacturing / Mixed Use Residential **Zoning**: MU-R – Mixed Use-Residential District **CEQA**: Section 15162 **Submittal Date**: June 29, 2023 **Date Deemed Complete**: July 25, 2024 **Project Planner**: Boshi Fu	The applicant is seeking approval for a change of use from office to live/work units (5,685 square feet total) by converting four existing office spaces into four live/work units within a two-story building (32 feet, 1 inch in maximum height) on a 16,664 square-feet lot that includes four existing live/work units. The project involves no exterior alterations or expansion of the building footprint. Each live/work unit will include designated living and working areas, consistent with the standards of the MU-R district.
	Zoning Permits Requested:
	• **Use Permit** pursuant to Berkeley Municipal Code (BMC) Section 23.312.030(D)(3)(b) to establish four live/work units where 5,000 square feet or more of gross floor area is changed; and • **Use Permit** pursuant to BMC Section 23.206.090(D) to allow for a live/work building with a maximum building height of 35 feet
	CEQA:
	It is staff's recommendation that the Zoning Adjustments Board (ZAB) determine that the Initial Study and Mitigated Negative Declaration (IS/MND) adopted in March 2000 analyzed live/work uses and finds that no subsequent amendments are required, pursuant to CEQA Guidelines Section 15162.

CEQA

15162 - Subsequent EIRs and Negative Declarations

Evidence:

A. In accordance with the California Environmental Quality Act (CEQA) (Public Resources Code Section 21000 et seq.) and the State CEQA Guidelines (California Code of Regulations, Title 14, Section 15000 et seq.), the City of Berkeley previously prepared an Initial Study (IS) and adopted a Mitigated Negative Declaration (MND) in 2000, for the Carleton Business Center project at 2700 Eighth Street. The environmental review at the time evaluated for the construction and operation of two new buildings on a single lot, including four live/work units in the southern portion and four commercial office units in the northern portion. The MND incorporated standard conditions and mitigation measures to reduce or avoid the project's potential significant impacts.

B. The 2000 IS/MND was adopted by the City of Berkeley, and no legal challenge was filed. The current project at 924-930 Carleton Street involves the interior conversion of the four previously approved commercial office units into live/work units and does not involve any expansion of building footprint, intensity of use, or new construction.

C. No new Initial Study or Mitigated Negative Declaration has been prepared or required for this project. Pursuant to CEQA Guidelines Section 15162, the City has determined that no subsequent or supplemental environmental review is necessary. The project does not involve substantial changes to the original project or to the surrounding neighborhood that would result in new or more severe impacts, and no new information has emerged that would trigger further review.

D. The Zoning Adjustments Board has considered the 2000 IS/MND in conjunction with the current project proposal and supporting documentation and finds, on the basis of the whole record, that:

(1) No potentially significant effects will occur beyond those already analyzed in the 2000 IS/MND;

(2) There is no substantial evidence that the project will have a significant effect on the environment; and

(3) The 2000 IS/MND continues to reflect the City's independent judgment and analysis. The record of proceedings upon which this decision is based is located at the Permit Service Center, 1947 Center Street, 2nd Floor, Berkeley, California 94704.

FINDINGS FOR APPROVAL

As required by BMC Section 23.406.040 (E) (1-5) "Findings for Approval," the following findings shall be made:

1. To approve a Use Permit, the ZAB shall find that the proposed project or use:

(a) Will not be detrimental to the health, safety, peace, morals, comfort, or general welfare of persons residing or visiting in the area or neighborhood of the proposed use; and

Evidence: The project will not be detrimental to the health safety, peace, morals, comfort or general welfare of person residing or visiting in the area because the change of use from commercial to live/work will occur within the existing building and no exterior changes or intensification of use are proposed. The four businesses currently occupying the building will remain, and the live/work units will not introduce new impacts.

(b) Will not be detrimental or injurious to property and improvements of the adjacent properties, the surrounding area or neighborhood, or to the general welfare of the City.

Evidence: The project will not be detrimental or injurious to property and improvements of the adjacent properties, the surrounding area or neighborhood or general welfare of the city because the existing footprint, height, and mass of the building, will not be altered. The continued use of low-impact businesses under the new live/work format is not expected to result in adverse effects to the general welfare.

Views: The project site is located in West Berkeley, on a relatively flat lot. The project will not obstruct any significant view corridors as defined in BMC Section 23.502.020(V)(12)[1];

Shadows: No external modifications are proposed to the building as part of the project. Therefore, no additional shadows will result from the project; and

Privacy: The project confronts and abuts office, commercial, and mixed manufacturing uses, and will not result in privacy impacts to neighboring uses. The project does not propose any new or expanded openings (i.e. windows or doors) that face existing

[1] View Corridor - A significant view of the Berkeley Hills, San Francisco Bay, Mt. Tamalpais, or a significant landmark such as the Campanile, Golden Gate Bridge, and Alcatraz Island or any other significant vista that substantially enhances the value and enjoyment of real property.

residential units. Since the project shares a courtyard with the live/work units located on the southern portion of the lot, the project may result in potential impacts to privacy given both the proximity of the neighboring live/work units and overlapping hours of use amongst all the live/work units on the lot. However, these are typical in an urban environment and will not be detrimental.

2. To approve the Use Permit, the ZAB must also make **any other Use Permit findings** specifically required by the Zoning Ordinance for the proposed project.

Live/Work Uses

Pursuant to BMC Section 23.312.050 (A) (1) "Findings" the following findings shall be made to approve Live/Work uses:

A. *All Districts.*

1. To approve any Use Permit or AUP for a live/work unit in any district, the review authority must find that the proposed project is consistent with the purpose of this chapter.

BMC 23.312.010 "Chapter Purpose"

A. Provide for the appropriate development of units which incorporate both living and working space;

Evidence: The project proposes to convert the commercial units within one of two buildings on the condominium property. No exterior changes are proposed, and the work is limited to interior improvements. Each unit contains a full kitchen and bathroom and is designed with clearly labeled "live" and "work" areas across two stories.

B. Provide flexibility as needed for the development of live/work units, particularly within existing buildings;

Evidence: The project demonstrates flexibility in the development of live/work units by converting existing commercial office units entirely within the existing building shell. No exterior changes are proposed.

C. Provide locations where appropriate new businesses can start up;

Evidence: The proposed project will continue to provide working areas in each unit designed for ongoing business activity. While four existing businesses will continue

operating after the conversion, the live/work layout will also accommodate future business in a method which is consistent with the purpose of the MU-R district.

D. Provide opportunities for people to live in mixed-use industrial and commercial areas where compatible with existing uses;

Evidence: A shared interior courtyard at the rear of the building serves as the usable open space for all residents. Each unit is designed with clearly separated living and work areas, which supports residential use in a mixed-use district where such use is compatible. The surrounding area includes a variety of mixed-use, industrial, and commercial properties, further supporting the compatibility of the proposed live/work use.

E. Protect existing and potential industrial uses from conflicts with nearby residential uses;

Evidence: A condition of approval will require that at least one resident in each live/work unit maintain a valid City Business License and a Zoning Certificate for the business operated from the premises, in accordance with BMC 23.312.040(A)(2). Additionally, the applicant shall record a statement acknowledging that the live/work units are located in a district where manufacturers and other industries operate lawfully, and that they will not seek to impede their operation.

F. Protect existing and potential residential uses from conflicts with nearby industrial uses;

Evidence: Each unit is designed with the space to be accessed by one single household. Living areas are located above the ground floor, which reduces potential exposure to nearby industrial uses.

G. Permit live/work units that function predominantly as workspaces and secondarily as residences;

Evidence: All proposed units are designed with over 40 percent of its area dedicated to workspace, located on the ground floor and directly accessible from the street. The existing commercial tenants will continue operating their businesses in the live/work units, and supports the purpose that the spaces will function predominantly as workplaces.

H. Ensure that the division of space between living and working space within these units reflects the priority of workspace; and

Evidence: The submitted floor plans show that living spaces are majority on the upper floors, while the work areas are primarily located on the ground floors. Each unit has a layout that reflects a clear division of functions.

I. Ensure that the exterior design of live/work buildings is compatible with the exterior design of commercial, industrial, and residential buildings in their area, while remaining consistent with the predominantly workspace character of live/work buildings

Evidence: No exterior changes are proposed. The project involves interior conversion only, within a building that is already consistent with the design of other live/work buildings on the lot and in the surrounding area.

MU-R Live/Work Units Standards

Pursuant to BMC Section 23.312.050 (D) "Findings", in addition to the General Standards above, the following live/work standards apply in the MU-R district.

D. *MU-R District.* In addition to the findings listed in Subsection A (All Districts) above, the review authority may approve a Use Permit or AUP to establish or modify a live/work unit in the MU-R district only if it makes all of the following findings:

1. Establishment of a live/work unit will not interfere with the lawful operation of manufacturers and other industries existing in or adjacent to the district and will not impede the lawful future establishment of manufacturers and other industries permitted under the West Berkeley Plan.

Evidence: The proposed project will convert four office spaces into four live/work units. The conversion will not expand the existing building and will not interfere with the operation of adjacent industries or interfere with the establishment of future uses allowed in the specific plan area.

2. The applicant has recorded with the County Recorder a statement acknowledging that the live/work unit is being established in a district where manufacturers and other industries operate lawfully and that he/she will not seek to impede their lawful operation. In addition, the applicant will require any tenants to sign such a statement, and require all persons purchasing live/work units to sign and record such a statement.

Evidence: As a condition of approval, the applicant shall record a statement acknowledging that the live/work units being established are located in a district where manufacturers and other industries operate lawfully, and that they will not seek to impede their operation.

3. If the applicant proposes to change one or more dwelling unit to a live/work unit, the elimination of dwelling unit and the change of use would not be materially detrimental to the housing needs and public interest of the affected neighborhood and the city.

Evidence: N/A. The project is not changing any dwelling units. The proposed live/work units will be created by converting existing office spaces.

4. If the applicant proposes to change a residential unit to a live/work unit and retain less than 75 percent of the pre-existing residential area as living area within the live/work unit:

(a) There are special circumstances particular to the application which make it appropriate to retain less than 75 percent of the pre-existing residential area as living space within the live/work unit; and

Evidence: N/A. This finding does not apply because the project does not involve the conversion of any residential units.

(b) The exterior appearance of the live/work unit has been designed to be compatible with adjacent and nearby residential uses.

Evidence: N/A. This finding does not apply because the project does not involve conversion from residential use.

General Manufacturing District Findings

Pursuant to BMC Section 23.206.110(A) "Permit Findings" to approve a Use Permit for a project in any Manufacturing District, the ZAB must find that the project:

1. Is consistent with the purposes of the district;

Evidence: The project is consistent with the purposes of the district because it will increase the concentration of live/work uses in the area, and retains existing commercial activity without resulting in a cumulative shift away from permitted land uses.

2. Is compatible with surrounding uses and buildings;

Evidence: The proposed project is compatible with surrounding uses and buildings because several multifamily and live/work projects on the subject block and within the greater West Berkeley Plan Area in terms of density, bulk, massing, and use type.

3. Complies with the adopted West Berkeley Plan; and

   Evidence: This finding is met because the West Berkeley Plan recognizes live/work as a generally positive presence the city, and noting that it "generates life in neighborhoods which are otherwise moribund at night, increasing activity and safety," and "can provide workspaces which do not need to be commuted to." The West Berkeley Plan permits live/work use in the Mixed Use–Residential district, where it is most likely to be compatible with surrounding uses. The proposed project involves the conversion of four commercial office units into four live/work units in an existing building, with no exterior changes or increase in building intensity. Therefore, the project is consistent with the goals and location policies outlined in the West Berkeley Plan.

4. Meets applicable performance standards for off-site impact.

   Evidence: The project meets the applicable performance standards for off-site impact because it is a change of use only and does not alter the height or footprint of the existing building. The structure has a building height of 32 feet, 1 inch, which complies with the maximum height allowed for commercial buildings in the MU-R district, but exceeds the 28-foot by-right height for live/work use. A Use Permit is therefore required to allow the existing height for the proposed live/work units, as required in BMC Section 23.206.090(D).

Additional Manufacturing District Findings

Pursuant to BMC Section BMC 23.206.110(B)(3), in addition to the findings in Section All Manufacturing Districts, the ZAB must also make the following findings to approve a Use Permit in the MU-R district:

(a) The project is unlikely, under reasonably foreseeable circumstances, to either induce or contribute to a cumulative change of use in buildings away from residential, live/work, light industrial, or arts and crafts uses; and

   Evidence: The proposed project will increase the number of live/work units in the district and will not result in a change of use away from live/work uses. The project is consistent with the MU-R district as it will establish additional live/work units without disturbing existing light manufacturing or industrial uses.

(b) Is designed to be supportive of the character and purposes of the district.

Evidence: The project is limited to interior renovations within the existing building only. The proposal will result in four additional live/work units, which aligns with the district's purpose of supporting a mixture of residential, commercial, and industrial uses. The live/work units will preserve existing on-site business activity, while introducing a compatible residential use.

3. When taking action on a Use Permit, the ZAB shall consider in its findings:

(a) The proposed land use; and

Evidence: This finding is met because live/work use is permitted in the MU-R district and aligns with the West Berkeley Plan's goal of supporting flexible land use that accommodates both residential and employment-generating activities. The project would convert four existing commercial units to four live/work units, maintaining business operations while introducing compatible residential use.

(b) The structure or addition that accommodates the use.

Evidence: This finding is met because the live/work use will occupy an existing two-story commercial building that does not propose any structural changes. The subject property already contains four live/work units in a separate building on the same lot. The proposed conversion would extend that existing use within a structure that is designed to support both living and working functions. There are no proposed changes to building height, footprint, or the exterior.

4. Required findings shall be made based on the circumstances existing at the time a decision is made on the application.

Evidence: This finding is met because the application has been reviewed based on the current zoning standards, general plan policies, environmental conditions, and site context as of the date of the decision.

5. The ZAB shall deny a Use Permit application if it determines that it is unable to make any of the required findings

Evidence: N/A. This finding does not apply because staff has determined that all required findings for approval can be made based on the submitted documents.

Exhibit A

Conditions of Approval

JULY 10, 2025

I. General Administrative Conditions		Regulation Source	Timing/ Implementation	Enforcement/Monitoring
1.	**Project Approval**. This Use Permit approval is for **924-930 Carleton Street**, as substantially shown and described on the project plans dated October 23, 2024, except as required to be modified by conditions herein and plans as presented to the Zoning Adjustments Board on July 10, 2025 ("Approval Date."). For any condition herein that requires preparation of a Final Plan where the project applicant has submitted a conceptual plan, the project applicant shall submit final plan(s) in substantial conformance with the conceptual plan, but incorporate the modifications required bythe conditions herein for approval by the City.	City of Berkeley	On-Going	Land Use Planning
2.	**Approval Limited to Proposed Project Scope.** This Permit authorizes only the proposed project described in the application. In no way does an approval authorize other uses, structures or activities not included in the project description. When the City approves a new use that replaces an existing use, any prior approval of the existing use becomes null and void when permits for the new use are exercised (e.g., building permit or business license issued). To reestablish the previously existing use, an applicant must obtain all permits required by the Zoning Ordinance for the use.	City of Berkeley BMC Sections 23.404.060	On-Going	Land Use Planning
3.	**Compliance Required.** All land uses and structures in Berkeley must comply with the Zoning Ordinance and all applicable City ordinances and regulations. Compliance with the Zoning Ordinance does not relieve an applicant from requirements to comply with other federal, state, and City regulations that also apply to the property.	City of Berkeley	On-Going	Land Use Planning
4.	**Conformance to Approved Plans.** All work performed under an approved permit shall be in compliance with the approved plans and any Conditions of Approval.	City of Berkeley BMC Section 23.404.060. B.4	On-Going	Land Use Planning

5.	**Permit Modifications.** No change in the use or structure for which this Use Permit is issued is permitted unless the Permit is modified by the Board. The Zoning Officer may approve changes to plans approved by the Board, consistent with the Board's policy adopted on May 24, 1978, which reduce the size of the project.	City of Berkeley BMC Section 23.404.070	On-Going	Land Use Planning
6.	**Permit Revocation.** The City may revoke or modify a discretionary permit for completed projects due to: 1) violations of permit requirements; 2) Changes to the approved project; and/or 3) Vacancy for one year or more. However, no lawful residential use can lapse, regardless of the length of time of the vacancy. Proceedings to revoke or modify a permit may be initiated by the Zoning Officer, Zoning Adjustments Board (ZAB), or City Council referral.	City of Berkeley BMC Section 23.404.080	On-Going	Land Use Planning
7.	**Permit Remains Effective for Vacant Property.** Once a Permit for a use is exercised and the use is established, the permit authorizing the use remains effective even if the property becomes vacant. The same use as allowed by the original permit may be re-established without obtaining a new permit, except as set forth in Standard Condition #5 above.	City of Berkeley BMC Section 23.404.060.D	On-Going	Land Use Planning
8.	**Exercise and Expiration of Permits** A permit authorizing a land use is exercised when both a valid City business license is issued (if required) and the land use is established on the property. A. A permit authorizing a land use is exercised when both a valid City business license is issued (if required) and the land use is established on the property. B. A permit authorizing construction is exercised when both a valid City building permit (if required) is issued and construction has lawfully begun. C. The Zoning Officer may declare a permit lapsed if it is not exercised within one year of its issuance, except if the applicant has applied for a building permit or has made a substantial good faith effort to obtain a building permit and begin construction. The Zoning Officer may declare a permit lapsed only after 14 days written notice to the applicant. A determination that a permit has lapsed may be appealed to the ZAB in accordance with Chapter 23.410 (Appeals and Certification). D. A permit declared lapsed shall be void and of no further force and effect. To establish the use or structure authorized by the lapsed permit, an applicant must apply for and receive City approval of a new permit.	City of Berkeley BMC Section 23.404.060 (C) "Time Limits"	On-Going	Land Use Planning

9.	**Hold Harmless.** The permittee agrees as a condition of approval of this application to indemnify, protect, defend with counsel selected by the City, and hold harmless, the City, and any agency or instrumentality thereof, and its elected and appointed officials, officers, employees and agents, from and against any and all liabilities, claims, actions, causes of action, proceedings, suits, damages, judgments, liens, levies, costs and expenses of whatever nature, including reasonable attorney's fees and disbursements (collectively, "Claims") arising out of or in any way relating to the approval of this application, any actions taken by the City related to this entitlement, or any environmental review conducted under the California Environmental Quality Act, Public Resources Code Section 210000 et seq., for this entitlement and related actions. The indemnification shall include any Claims that may be asserted by any person or entity, including the permittee, arising out of or in connection with the approval of this application, whether or not there is concurrent, passive or active negligence on the part of the City, and any agency or instrumentality thereof, and its elected and appointed officials, officers, employees and agents. The permittee's duty to defend the City shall not apply in those instances when the permittee has asserted the Claims, although the permittee shall still have a duty to indemnify, protect and hold harmless the City.	City of Berkeley	On-Going	Land Use Planning

II. Conditions Imposed by the Zoning Adjustments Board		Regulation Source	Timing/ Implementation	Enforcement/Monitoring
1.	**ACEHD Compliance.** Prior to issuance of any building permit, the applicant shall provide written confirmation from the Alameda County Environmental Health Department (ACEHD) that the Revised Investigation Report and Proposed Corrective Action Plan has been approved, soil vapor sampling has been reviewed, and building permit plans have been reviewed in accordance with ACEHD requirements.	Alameda County Environmental Health Department	Prior to Building Permit	Land Use Planning

III. At Building Permit Submittal		Regulation Source	Timing/Implementation	Enforcement/Monitoring
1.	**Conditions of Approval on Building Permit Plan Submittal** The Conditions of Approval shall be printed on the *second* sheet of each plan set submitted for a building permit pursuant to this Use Permit, under the title "Use Permit Conditions."	City of Berkeley	At the Time of Building Permit Submittal	Building & Safety/Land Use Planning

2.	**Project Liaison.** The applicant shall include in all building permit plans and post onsite the name and telephone number of an individual empowered to manage construction-related complaints generated from the project. The individual's name, telephone number, and responsibility for the project shall be posted at the project site for the duration of the project in a location easily visible to the public. The individual shall record all complaints received and actions taken in response, and submit written reports of such complaints and actions to the project planner on a weekly basis. **Please designate the name of this individual below:** ☐ **Project Liaison** _____ Name Phone #	City of Berkeley	At the Time of Building Permit Submittal	Building & Safety/Land Use Planning
3.	**Construction and Demolition Diversion.** The applicant shall submit a Construction Waste Management Plan that meets the requirements of BMC Chapter 19.37 including 100% diversion of asphalt, concrete, excavated soil and land-clearing debris and a minimum of 65% diversion of other nonhazardous construction and demolition waste.	City of Berkeley BMC Chapter 19.37	At Building Permit Submittal	Building & Safety Division
4.	**Public Works ADA.** Plans submitted for building permit shall include replacement of sidewalk, curb, gutter, and other streetscape improvements, as necessary to comply with current City of Berkeley standards for accessibility.	City of Berkeley	At Building Permit Submittal	Public Works
5.	**Drainage Patterns.** The applicant shall establish and maintain drainage patterns that do not adversely affect adjacent properties and rights-of-way. The applicant shall submit drainage plans for approval by the Building & Safety Division and Public Works Department, if required.	City of Berkeley	At Building Permit Submittal	Public Works
6.	**Live/work Units. Prior to the issuance of building permits, the live/work units shall comply with the following standards:** A. Adequate and clearly defined working space constituting no less than 50 percent of the gross floor area of the live/work unit is required.	City of Berkeley	At the Time of Building Permit Submittal	Land Use Planning

	B. The working space must be reserved for and regularly used by one or more live/work unit residents and be consistent with City administrative guidelines for live/work design. C. **Business License.** At least one resident in each live/work unit shall maintain at all times a valid City Business License and Zoning Certificate or Use Permit for a business on the premises. D. **Employment, Client, and Customer Visits.** (a) Persons who do not live in the live/work unit may be employed in a live/work unit if an additional Use Permit is obtained and the required on-site parking space is provided, and client and customer visits to live/work units are permitted if an additional Use Permit is obtained and the required on-site parking is provided. E. **Unit Rental and Sale.** No portion of a live/work unit may be separately rented or sold as a commercial space for a person or persons not living on the premises, or as a residential space for a person or persons not working on the premises. F. **Deed Restriction**. The applicant shall record with the County Recorder a statement acknowledging that the live/work unit is established in a district where manufacturers and other industries operate lawfully and that the applicant will not seek to impede their lawful operation. In addition, the applicant will require any tenants to sign such a statement, and require all persons purchasing live/work units to sign and record such a statement.			

IV. During Construction A. Building & Safety Division		Regulation Source	Timing/ Implementation	Enforcement/Monitoring
1.	**Construction Hours.** Construction activity shall be limited to between the hours of 7:00 AM and 6:00 PM on Monday through Friday, and between 9:00 AM and 4:00 PM on Saturday. No construction-related activity shall occur on Sunday or any Federal Holiday.	City of Berkeley	During Construction	Building & Safety
2.	**Construction Hours- Exceptions**. It is recognized that certain construction activities, such as the placement of concrete, must be performed in a continuous manner and may require an extension of these work hours. Prior to initiating any activity that might require a longer period, the developer must notify the Zoning Officer and request an exception for a finite period of time. If the Zoning Officer approves the request, then two weeks prior to the expanded schedule, the developer shall notify	City of Berkeley	During Construction	Building & Safety

	businesses and residents within 500 feet of the project site describing the expanded construction hours. A copy of such notice and methodology for distributing the notice shall be provided in advance to the City for review and approval. The project shall not be allowed more than 15 extended working days.			
3.	**Construction / No Parking Permits**. Contact the Permit Service Center (PSC) at 1947 Center Street, Third Floor or (510) 981-7500 for details on obtaining Construction/No Parking Permits (and associated signs and accompanying dashboard permits). Please note that the Zoning Officer and/or Traffic Engineer may limit off-site parking of construction-related vehicles if necessary to protect the health, safety or convenience of the surrounding neighborhood. A current copy of this Plan shall be available at all times at the construction site for review by City Staff.	City of Berkeley	During Construction	Building & Safety

IV. During Construction B. During Construction: Public Works		Regulation Source	Timing/ Implementation	Enforcement/Monitoring
1.	**Site Debris.** All piles of debris, soil, sand, or other loose materials shall be covered at night and during rainy weather with plastic at least one-eighth millimeter thick and secured to the ground.	City of Berkeley	During Construction	Public Works
2.	**Excavation.** The applicant shall ensure that all excavation takes into account surface and subsurface waters and underground streams so as not to adversely affect adjacent properties and rights-of-way.	City of Berkeley	During Construction	Public Works
3.	**Site Watering & Street Sweeping.** All active construction areas shall be watered at least twice daily, and all piles of debris, soil, sand or other loose materials shall be watered or covered. Public streets shall be swept (preferably with water sweepers) of all visible soil material carried from the site.	City of Berkeley	During Construction	Public Works
4.	**Street & Sidewalk Damages.** Subject to approval of the Public Works Department, the applicant shall repair any damage to public streets and/or sidewalks by construction vehicles traveling to or from the project site.	City of Berkeley	During Construction	Public Works

5.	**Underground Utilities.** If underground utilities leading to adjacent properties are uncovered and/or broken, the contractor involved shall immediately notify the Public Works Department and the Building & Safety Division, and carry out any necessary corrective action to their satisfaction	City of Berkeley	During Construction	Public Works
6.	**Hauling of Debris.** Trucks hauling debris, soil, sand, or other loose materials shall be covered or required to maintain at least two feet of board.	City of Berkeley	During Construction	Public Works
7.	**On-Site Drainage.** The applicant shall establish and maintain drainage patterns that do not adversely affect adjacent properties and rights-of-way.	City of Berkeley	During Construction	Public Works
8.	**Construction During the Rainy Season.** Any construction during the rainy season (October 15-April 15) wet season shall require submittal of a soils report with appropriate measures to minimize erosion and landslides, and the developer shall be responsible for following these and any other measures required by the Building and Safety Division and the Public Works Department.	City of Berkeley	During Construction	Public Works

V. Prior to Certificate of Occupancy		Regulation Source	Timing/ Implementation	Enforcement/ Monitoring
1.	**Installation of VIMMECs.** Per ACEHD requirements, install VIMMECS in the subject project building. Provide confirmation from ACEHD that VIMMECs have been installed and inspected consistent with ACEHD requirements.	Alameda County Environmental Health Department	Prior to Final Inspection or Issuance of Occupancy	Land Use Planning
2.	**Landscaping Installation.** All landscape, site and architectural improvements shall be completed per the attached approved drawings dated October 23, 2024.	City of Berkeley	Prior to Final Inspection or Issuance of Occupancy	Land Use Planning

SUBJECT: Conditional Approval of the Sub-Slab Vapor Probe Installation and Sampling as Presented in the *Revised Investigation Report and Proposed Corrective Action*

Cleanup Program Site Case No. RO000361
GeoTracker Global ID T10000021302
Carleton Street Conversion
928 Carleton Street, Berkeley, CA 94710

Dear Responsible Parties:

Alameda County Environmental Health Department (ACEHD) Local Oversight Program (LOP) is the lead regulatory oversight agency for the Cleanup Program Site (CPS) Case No. (the "Case") RO0003607, GeoTracker Global ID T10000021302, Carleton Street Conversion, located at 928 Carleton Street in Berkeley, CA 94710 (the "Site") under a Voluntary Remedial Action Agreement (VRAA) executed on May 29, 2024, with Tukman Mark & Kiyo Trust, Burke John C, 928 Carleton LLC, and Tabrizi Ali H & Sattari

Yekameh Trust, to provide regulatory oversight of environmental investigations and cleanup at the Site to convert four existing commercial condos into live/work units.

Carlton Street Studios Development – Current Configuration

The Site is a portion of the Carleton Street Studios development constructed in 2000, comprising of two buildings, a common parking and courtyard areas. The Northern Building consists of an approximately 3,000 square foot, two-to-three story, slab-on-grade building divided into four individual units. The southern building is similar in size, layout, and construction to the northern building and is comprised of four individual live/work units at 2700–2706 Eighth Street. The common area is improved with asphalt-paved parking areas and associated landscaping. A home ownership association is comprised of the owners of the Northern and Southern Buildings. Information regarding the units in the Northern and Southern Buildings including the associated unit identification and/or address and assessor parcel number (APN) is listed below.

Northern Building

- Unit 924 - 924 Carleton Street, Berkeley; APN: 54-1747-27
- Unit 926 - 926 Carleton Street, Berkeley; APN: 54-1747-26
- Unit 928 - 928 Carleton Street, Berkeley; APN: 54-1747-25
- Unit 930 – 930 Carleton Street, Berkeley; APN: 54-1747-24

Southern Building

- 2700 8th Street, Berkeley; APN: 54-1747-28
- 2702 8th Street, Berkeley; APN: 54-1747-29
- 2704 8th Street, Berkeley; APN: 54-1747-30
- 2706 8th Street, Berkeley; APN: 54-1747-31

Common Area

- APN: 54-1747-32

A summary of the Site background including historical site configuration and residual petroleum and chlorinated chemicals of concern (COC) in soil, soil vapor, and groundwater from historical land uses at and in the vicinity of the Site is described in ***Attachment 1***.

DOCUMENT REVIEWED

ACEHD has reviewed the Case files including the following document prepared by Pangea Environmental Services (Pangea), on behalf of the property owners of the four condos in the Northern Building:

- *Revised Investigation Report and Proposed Corrective Action* (the "*Revised Investigation & Proposed Corrective Action Report*"), dated October 4, 2024.

The *Revised Investigation & Proposed Corrective Action Report* was submitted subsequent to ACEHD issuance of the directive letter *Conditional Clearance for Entitlement and Request for Submittal of a Revised Investigation Report and Proposed Corrective Action Plan*, dated August 14, 2024 which recommended that the City of Berkeley Planning and Development Department approve the Northern Building planning application with conditions of approval including but not limited to submittal of a *Revised Investigation & Proposed Corrective Action Report*. The *Revised Investigation & Proposed Corrective Action Report* amends

the previous *Investigation Report and Proposed Corrective Action*, dated July 12, 2024 prepared by Pangea, on behalf of the property owners of the four condos in the Northern Building by including a scope of work for additional soil vapor characterization to evaluate potential vapor intrusion under a live/work land use scenario, a vapor intrusion conceptual site model (VI CSM), and proposed vapor mitigation and migration engineering controls (VIMMECs).

A summary of the additional information requested by ACEHD presented in the *Revised Investigation & Proposed Corrective Action Report* is included in **Attachment 2**.

ACEHD FINDINGS

1. Based on ACEHD's review of the *Revised Investigation & Proposed Corrective Action Report* and the conclusions and recommendations presented by Pangea, ACEHD concurs with the scope of work for the installation of additional sub-slab vapor probes in Units 924 (SS-5) and Unit 926 (SS-6 and SS-7) to collect a spatially robust data set within those units and sample collection from the existing and new probe network for all sub-slab vapor probes the Northern Building. ACEHD notes, however, additional installation of sub-slab probes and sampling may be required in Unit 928 and Unit 930, if warranted, based on the results of sub-slab vapor concentrations in SS-6, and SS-7 (Unit 926).

2. The *Revised Investigation & Proposed Corrective Action Report* contains errors in *Section 5.1* and *5.2* including *Table A* and *Table B* that present the calculated VI risk and risk classification by Unit including tables that do not match the text and the use of a 0.1x factor of safety for Unit 924 instead of the 10x factor of safety as required by ACEHD's *Decision Matrix for Development of Vapor Intrusion Conceptual Site Model and Dtermination of Risk Classification*, dated May 14, 2021. ACEHD notes that use of a 10x factor of safety applied to the concentration of 1,4-dixoane results in a risk classification of moderate. ACEHD is unable to evaluate VI risk classification as the *Revised Investigation & Proposed Corrective Action Report* does not include tables presenting the cumulative cancer risk and non-cancer risk hazard index calculations and corresponding figures presenting potential VI risk contours as required by ACEHD's *Decision Matrix for Development of Vapor Intrusion Conceptual Site Model and Dtermination of Risk Classification*, dated May 14, 2021. The VI risk classifications and VIMMEC element selection for each unit is dependent on completion of the additional sub-slab vapor collection as discussed in *Item 1* above.

3. The *Revised Investigation & Proposed Corrective Action Report* identifies the following VIMMECs elements:

   Units 924 and 926 (Low to Moderate VI Risk):

   - ✓ Barrier System: Concrete slab with epoxy coating as contingency dependent of results of sub-slab vapor sampling.
   - ✓ Ventilation System: Above grade ventilation in the garage of Unit 924 only
   - ✓ Wet/dry conduit utility seals

   Units 928 and 930 (Acceptable VI Risk):

   - ✓ Barrier System: Concrete slab

ACEHD concurs that the list of VIMMEC elements may be sufficient for the units, however, finalization of the VIMMEC element selection is dependent on the results of additional sub-slab vapor sampling and updated VI risk classification with supporting tables and figures as discussed above and may require installation of trench dams in subsurface utilities entering the building.

4. Due to lack of documentation regarding investigation and cleanup reported at of the former Carleton Business Center, additional investigation is required as previous request in our August 14, 2024, directive letter to evaluate the subsurface conditions in the common area and potential vapor intrusion risk to occupants of the Southern Building live/work condos and will require execution of a VRAA with the property owners of the Southern Building.

LIST OF DELIVERABLES AND COMPLIANCE DATES

ACEHD requests that you submit the deliverables provided in ***Attachment 3 – List of Deliverables & Compliance Dates*** and ***Attachment 4 – Deliverable Requirements.*** The requisite deliverables must be:

(a) Submitted to ACEHD by the compliance dates listed in ***Attachment 3*** and approved by ACEHD prior to the start of each of the associated phases of corrective action implementation and site redevelopment activities.

(b) Prepared in accordance with the requirements provided in ***Attachment 4.***

(c) Uploaded to the Case file on the State Water Resources Control Board's GeoTracker database in accordance with requirements listed in *Responsible Party(ies) Legal Requirement & Obligations Instructions* included as ***Attachment 5***.

CLOSING

Thank you for your cooperation. If you have any questions, please call me at (510) 639-1276 or send me an email message at andrew.york@acgov.org

Sincerely,

Drew York Digitally signed by Drew York Date: 2024.11.22 17:10:31 -08'00'

ATTACHMENT 1

Environmental Health Department
Alameda County Health

Case No.:	Cleanup Program Site Case No. RO0003607
Global ID:	T10000021302
Case Name:	Carleton Street Conversion
Case Address:	928 Carleton Street, Berkeley, CA 94710
Directive Letter Issue Date:	November 22, 2024

ATTACHMENT 1 – SITE BACKGROUND

Carlton Street Studios Development - Historical Configurations

The Site occupies the northeastern portion of the former Carleton Business Center parcel which was located at 2703 Seventh Street on former APN 54-1747-1-1 bordered by Carleton, Eighth, Pardee, and Seventh Streets. A Leaking Underground Storage Tank (LUST) case (T0600100261) was opened for the 2703 Seventh Street parcel and overseen by the City of Berkeley and the San Francisco Bay Regional Water Quality Control Board. A review of the former LUST case files states that a leak was reported from a structural failure of a UST at the 2703 Seventh Street site, and was stopped on September 20, 1991, however, limited documentation is available in the LUST case file regarding the UST location, removal, and investigation and cleanup. The location of the UST is not shown in available documentation, however, a geophysical survey was conducted in August 1991 using magnetic and ground penetrating radar surveys and did not indicate the presence of USTs.

Potential Offsite Source(s)

A 1990 subsurface investigation conducted at 2703 Seventh Street documented elevated levels of total petroleum hydrocarbons as gasoline (TPH-g), total petroleum hydrocarbons as diesel (TPH-d), toluene, ethylbenzene, and xylenes in soil and groundwater at the northeastern area of the property where the Carleton Street Studios are currently located and across Eighth Street to the east of the property, with concentrations decreasing in the downgradient direction. According to the investigation report, "a survey of surrounding land use revealed a series of USTs along the south side of Carleton Street approximately 100 feet east of Eighth Street" (upgradient of the Site) and identified the USTs as "a plausible source of the soil and groundwater petroleum contamination in this area". This described UST location corresponds to the location of the closed LUST case associated with the Humane Society property at 2700 Ninth Street, LUST Case No. 01-0194.

Directive Letter Issue Date:	November 22, 2024

ATTACHMENT 2 – DOCUMENT SUMMARY

ACEHD has reviewed the Case files including the following document prepared by Pangea Environmental Services (Pangea), on behalf of the property owners of the four condos in the Northern Building:

- *Revised Investigation Report and Proposed Corrective Action* (the "*Revised Investigation & Proposed Corrective Action Report*"), dated October 4, 2024.

Sections 3.0 and 4.0 of the *Revised Investigation & Proposed Corrective Action Report* documents the installation and sampling results from four sub-slab vapor probes (SS-1 through SS-4) in the Northern Building. The location of each sub-slab vapor probe relative to each of the four units of the Northern Building is presented on *Figure 2* of the *Revised Investigation & Proposed Corrective Action Report*. Results from sub-slab soil vapor sampling indicated petroleum hydrocarbon chemicals of concern (COCs) including diesel range total petroleum hydrocarbons (TPH-d), benzene, toluene, ethylbenzene, and total xylenes were detected in sub-slab vapor probes at concentrations below their respective 2019 San Fransico Bay Regional Water Quality Control Board's residential soil vapor intrusion environmental screening levels (ESLs). Volatile organic compound (VOC) chemicals of concern (COCs) including but not limited to chlorinated VOC trichloroethene (TCE) and methylene chloride were detected in sub-slab vapor probes at concentrations below their residential soil vapor intrusion ESLs of 16 micrograms per cubic meter ($\mu g/m^3$) and 34 $\mu g/m^3$, respectively. Chloroform was detected in sub-slab vapor probes SS-3 and SS-4 at concentrations of 4.29 $\mu g/m^3$ and 24.9 $\mu g/m^3$, respectively, exceeding the residential ESL of 4.1 $\mu g/m^3$. 1,4-dioxane was detected at 98 $\mu g/m^3$ in sample SS-4, exceeding the residential ESL of 12 $\mu g/m^3$.

Section 5.0 of the *Revised Investigation & Proposed Corrective Action Report* presents a vapor intrusion conceptual site model (VI CSM) for the Northern Building including but not limited to a calculated VI risk classification and proposed vapor intrusion mitigation and migration engineering control (VIMMEC) element selection. Due to limited temporally and spatially robust soil vapor data set for the Northern Building, a 10x safety factor was used in the calculated VI risk classification in accordance with ACEHD's *Decision Matrix for Development of Vapor Intrusion Conceptual Site Model and Dtermination of Risk Classification*, dated May 14, 2021. Using the 10x safety factor, risk classifications for three of the four units (Unit 926, 928, and 930) ranged from low to moderate. Unit 924 contains a ground floor garage with proposed upper levels for live/work, therefore, 0.1x safety factor was calculated in this unit to account for aboveground ventilation.

Section 6.0 of the *Revised Investigation & Proposed Corrective Action Report* presents Pangea's conclusions and recommendations based on the sub-slab soil vapor sampling conducted in November 2023, the current VI CSM evaluation, and the calculated VI risk classification and element selection including the following:

- A review of historical records suggest that historical petroleum hydrocarbon impacts are present in deeper soil and groundwater which is likely due to a historical release from a closed Leaking Underground Storage Tank (LUST) Case No. 01-0194, Berkeley Humane Society, located upgradient of the subject site.

- Residual petroleum hydrocarbon impacts are primarily located within the gravelly sand water-bearing unit beneath the Site, at approximately 13 feet to 19 feet below ground surface (bgs). However, this likely residual impact is overlain by fine-grained material (low-plasticity dense and tiff silt and clay soil) that is likely containing and mitigating any significant upward vertical migration or intrusion of VOCs beneath the Site. Therefore, the historical petroleum hydrocarbon impact does not represent a significant vapor intrusion concern to the current commercial site use or the planned live/work use.

- Limited VOCs were detected during sub-slab vapor sampling. For the three units with residential conversion planned on the ground floor, no VOCs were detected above the Tier 1 ESLs, with the exception of chloroform at one location (SS-3, Unit 926), detected slightly above its ESL of 4.1 micrograms per cubic meter (ug/m^3).

- Primary COCs in sub-slab vapor include trichloroethene (TCE), detected below the Tier 1 ESL at SS-3, chloroform, and 1,4-dioxane, detected above the Tier 1 ESL in SS-4, located in the ground floor parking area at 924 Carleton.

- An evaluation of the VI CSM indicates that historic residual petroleum hydrocarbons are adequately contained in deeper soil, and that select chlorinated VOCs (TCE, chloroform, and 1,4-dioxane) are present in shallow soil vapor at relatively low concentrations at probes SS-3 (Unit 926) and SS-4 (garage/Unit 924).

    - Additional soil vapor assessment will further evaluate the presence of VOCs and extent at the Site. The proposed assessment will evaluate seasonal concentration trends, provide lateral VOC characterization, and enhance Pangea's conceptual site model.

Section 7.0 of the *Revised Investigation & Proposed Corrective Action Report* presents proposed corrective actions to further characterize and mitigate potential VI risks to occupants of the Northern Building during Site redevelopment/improvements including the following:

1. Collection of additional sub-slab soil vapor samples from existing sub-slab probes SS-1 through SS-4 in all four units in accordance with standard operating procedures presented in the previously ACEHD-approved *Subslab Gas Assessment Workplan*, dated October 17, 2023.

2. Installation and sampling for three additional sub-slab probes (ss-5 through SS-7) within Unit 924 and Unit 926 of the Northern Building as presented on Figure 3 of the *Revised Investigation & Proposed Corrective Action Report.*

3. Collection of three indoor air samples within the Northern Building including:

    a. Two samples within Unit 924 including one in the ground floor garage, between existing sub-slab probe SS-4 and proposed probe SS-5, and one sample on the second floor of the unit (an occupied area).

    b. One sample within Unit 926 in the workshop area on the ground floor near existing sub-slab probe SS-3.

4. Collection of three *contingent* indoor air samples including the following:
    a. One sample within Unit 926 at the bottom of the stairwell on the ground floor in the 926 Carleton unit, contingent upon results at proposed sub-slab vapor probe SS-6.

    b. Two samples within Unit 928 - One sample in the lounge area of the architectural office on the second floor, contingent upon results at sub-slab vapor probe SS-2 and one sample in the open work area of the architectural office, contingent upon results at existing sub-slab vapor probe SS-2.

5. Collection of two ambient outdoor air samples in the parking area (located west of the Northern Building) and in the courtyard (located south of the Northern Building).

6. Installation of VIMMECs in Unit 924 and 926 including slab and epoxy vapor barrier and contingency and wet/dry penetration seals. No VIMMECs are proposed for Unit 928 or Unit 930.

7. Submittal of *VIMMEC Plans and Specs*, and administrative control documents including *ERMP* and *OMM&R Plan.*

Directive Letter Issue Date:	November 22, 2024

ATTACHMENT 3 - LIST OF DELIVERABLES & COMPLIANCE DATES

PURPOSE

As required in ACEHD's directive letter dated November 22, 2024, ACEHD requests that you prepare the following deliverables in accordance with the requirements provided in ***Attachment 4 – Deliverable Requirements*** and submit the deliverables to the State Water Resources Control Board's GeoTracker website in compliance with the requirements identified in ACEHD's *Responsible Party(ies) Legal Requirement/Obligations Instructions* included as ***Attachment 5***. ACEHD also requests email notification verifying upload of the requested deliverables to the Case file on GeoTracker be provided to the primary caseworker, Drew York (*andrew.york@acgov.org*).

LIST OF DELIVERABLES AND COMPLIANCE DATES

Subsequent to ACEHD's issuance of this November 22nd directive letter for submittal and ACEHD-approval of the following deliverables:

1. **ADDITIONAL SUB-SLAB VAPOR INVESTIGATION & SAMPLING REPORT**

   a. **Deliverable:** Additional Sub-Slab Vapor Investigation and Sampling Report
   Submittal Compliance Date: Friday, February 28, 2025
   File Name: RO3607_SWI_R_YYYY-MM-DD

2. **GEOTRACKER DATABASE COMPLIANCE CERTIFICATION LETTER**

   a. **Deliverable:** GeoTracker Database Compliance Certification Letter
   Submittal Compliance Date: Friday, February 28, 2025, and ongoing as field activities are conducted
   File Name: RO3607_GEOTRK_AUDIT_YYYY-MM-DD

3. **VAPOR INTURSION MITIGATION & MIGRATION ENGINEERING CONTROLS (VIMMECS)**

   a. **Deliverable:** *Updated* Vapor Intrusion Conceptual Site Model (VI CSM), VI Risk Classification, and VIMMEC Design Element Selection
   Submittal Compliance Date: Friday, February 28, 2025
   File Name: RO3607_UPDATE_VIMMEC_CSM_YYYY-MM-DD

4. **BASELINE PROJECT SCHEDULE**

   a. **Deliverable:** Baseline Project Schedule
   Submittal Compliance Date: Friday, January 31, 2025
   File Name: RO3607_PROJ_SCHD_ YYYY-MM-DD

Prior to the start of all site demolition and earthwork activities including grading and remedial excavation, submittal and ACEHD-approval of the following deliverables:

5. **SUBSLAB SOIL VAPOR PROBE DESTRUCTION**

   a. **Deliverable:** Sub-slab Vapor Probe Decommissioning Report
   Submittal Compliance Date: Thirty (30) days after decommissioning of probes
   File Name: RO3607_WELL_SVP_DCM_R_XXXX-XX-XX

6. **PERMITS, PLANS, AND APPROVALS FROM OTHER AGENCIES *(ACEHD APPROVAL NOT REQUIRED)***

   a. **Local Planning Department Entitlement Approvals**

      i. **Deliverable:** California Environmental Quality Act (CEQA) Compliance Documents
      Submittal Compliance Date: Thirty (30) days after City Adoption
      File Name: RO3607_DEV_CEQA_YYYY-MM-DD

      ii. **Deliverable:** Redevelopment Project Approval
      Submittal Compliance Date: Thirty (30) days after Project Approval
      File Name: RO3607_DEV_ENTITLE_YYYY-MM-DD

   b. **Local Building Department Construction & Demolition Permits**

      i. **Deliverable:** Building Permit Plan Set
      Submittal Compliance Date: Sixty (60) days prior to the start of foundation and hardscape demolition
      File Name: RO3607_BLD_PERMIT_YYYY-MM-DD

      ii. **Deliverable:** Demolition & Grading Permits
      Submittal Compliance Date: Thirty (30) days prior to the start of foundation and hardscape demolition
      File Name: RO3607_DEMO_GRADING_PERMIT_YYYY-MM-DD

Prior to the start of improvement construction and utility installation, submittal and ACEHD-approval of the following deliverables:

7. **VAPOR INTURSION MITIGATION & MIGRATION ENGINEERING CONTROLS (VIMMECS)**

   (ACEHD highly recommends that the VIMMEC design engineer contact ACEHD for examples of ACEHD-approved VIMMEC documents listed below from other projects for reference during preparation of the VIMMEC documents for this project).

   a. **Deliverable:** VIMMEC Plans & Specifications
   Submittal Compliance Date: Ninety (90) days prior to the start of foundation construction
   File Name: RO3607_ VIMMEC_PLANS_SPECS_YYYY-MM-DD

b. **Deliverable:** VIMMEC Installation Sequencing Plans
Submittal Compliance Date: Thirty (30) days prior to the start of foundation construction
File Name: RO3607_VIMMEC_SEQ_P_YYYY-MM-DD

c. **Deliverable:** VIMMEC Installation Schedule
Submittal Compliance Date: Thirty (30) days prior to the start of foundation construction
File Name: RO3607_VIMMEC_INSTALL_SCHD_YYYY-MM-DD

d. **Deliverable:** Draft VIMMEC Operations, Maintenance, Monitoring, and Reporting Plan (OMM&R Plan) with financial assurance cost estimate
Submittal Compliance Date: Ninety (90) days prior to the start of foundation construction
File Name: RO3607_DRAFT_VIMMEC_OMM&R_P_YYYY-MM-DD

e. **Deliverable:** Approved Building Permit Plans with VIMMEC Incorporated (with Transmittal Letter by VIMMEC Design Engineer)
Submittal Compliance Date: Fifteen (15) days prior to the start of foundation construction
File Name: RO3607_BLDG_PERMIT_VMEC_YYYY-MM-DD

During VIMMEC installation, submittal and ACEHD-approval of the following deliverables:

f. **Deliverable:** *Revised* VIMMEC Plans & Specifications
Submittal Compliance Date: Ongoing as plans and specifications are revised
File Name: RO3607_VIMMEC_PLANS_SPECS_YYYY-MM-DD

g. **Deliverable:** VIMMEC Construction Quality Assurance Plan Status Reports
Submittal Compliance Date: A minimum of three days prior to each ACEHD verification inspections
File Name: RO3607_VMEC_CQA_STATUS_R_XXX-XX-XX

h. **Deliverable:** *Updated* VIMMEC Installation Schedule(s)
Submittal Compliance Date: Ongoing as schedules are revised
File Name: RO3607_VIMMEC_INSTALL_SCHD_YYYY-MM-DD

Prior to occupancy clearance, submittal and ACEHD-approval of the following deliverables:

8. **VIMMEC COMPLETION REPORTS**

a. **Deliverable:** VIMMEC Record Report of Construction and Pre-Occupancy Performance Verification Monitoring
Submittal Compliance Date: Thirty (30) days prior to building occupancy
File Name: RO3607_VIMMEC_RROC_YYYY-MM-DD

a. **Deliverable:** Final VIMMEC OMM&R Plan (with As-built plans and final financial assurance cost estimate)
Submittal Compliance Date: Thirty (30) days prior to building occupancy
File Name: RO3607_FINAL_VIMMEC_OMMR_P_YYYY-MM-DD

9. **INSTITUTIONAL CONTROLS**

   a. **Deliverable:** Environmental Risk Management Plan
   Submittal Compliance Date: Thirty (30) days prior to building occupancy
   File Name: RO3607_ERMP_XXXX-XX-XX

   b. **Deliverable:** Draft Covenant and Environmental Restriction on Property
   Submittal Compliance Date: Thirty (30) days prior to building occupancy
   File Name: RO3607_Draft_DEED_RESTRICT_XXXX-XX-XX

   c. **Deliverable:** Financial Assurance Instrument
   Submittal Compliance Date: Thirty (30) days prior to building occupancy
   File Name: RO3607_FIN_ASSUR_XXXX-XX-XX

   d. **Deliverable:** Copy of Recorded Covenant and Environmental Restriction on Property
   Submittal Compliance Date: Ten (10) days prior to building occupancy
   File Name: RO3607_RECORD_DEED_RESTRICT_XXXX-XX-XX

Throughout the Post-Closure Period, submittal and ACEHD-approval of the following deliverables:

10. **COMPLIANCE REPORTS**

   a. **Deliverable:** Routine Operations, Maintenance, and Monitoring Report / Site Inspection Reports
   Submittal Compliance Date: To be determined in accordance with schedule in Environmental Risk Management Plan
   File Name: RO3607_R_OMM_R_XXXX-XX-XX

   b. **Deliverable:** Non-Routine Operations, Maintenance, and Monitoring Report / Site Inspection Reports
   Submittal Compliance Date: To be determined in accordance with schedule in Environmental Risk Management Plan
   File Name: RO3607_NR_OMM_R_XXXX-XX-XX

   c. **Deliverable:** 5-Year Environmental Review Summary Report
   Submittal Compliance Date: To be determined in accordance with schedule in Environmental Risk Management Plan
   File Name: RO3607_5YR_RVW_R_XXXX-XX-XX

   d. **Deliverable:** Work Plans for Tenant Improvements
   Submittal Compliance Date: Sixty (60) days prior to proposed tenant improvement plans Risk Management Plan
   File Name: RO3607_TEN_IMPROV_WP_XXXX-XX-XX

   e. **Deliverable:** Tenant Improvement Completion Report
   Submittal Compliance Date: Sixty (60) days after tenant improvement completion and thirty (30) days prior to tenant occupancy
   File Name: RO3607_TENT_IMPROV_COMP_R_XXXX-XX-XX

11. GEOTRACKER COMPLIANCE

a. **GeoTracker Database Compliance**
Deliverable: Electronic Deliverable Format (EDF), logs, etc.
Submittal Compliance Date: ongoing as investigation and reports are submitted

ATTACHMENT 4

Environmental Health Department
Alameda County Health

Case No.:	Cleanup Program Site Case No. RO0003607
Global ID:	T10000021302
Case Name:	Carleton Street Conversion
Case Address:	928 Carleton Street, Berkeley, CA 9410
Directive Letter Issue Date:	November 22, 2024

ATTACHMENT 4 - DELIVERABLE REQUIREMENTS

PURPOSE

The purpose of this document is to identify requisite elements for each of the deliverables requested by Alameda County Department of Environmental Health (ACEHD) as conditions of approval for implementation of proposed remedial actions and Site redevelopment.

ACEHD requests that you prepare the deliverables listed in ***Attachment 3 - List of Deliverables & Compliance Dates*** in accordance with the corresponding Technical Comments and Deliverable Requirements provided below and submit the deliverables to the State Water Resources Control Board's GeoTracker website in compliance with the requirements identified in ***Attachment 5.***

DELIVERABLES REQUIREMENTS

Subsequent to ACEHD's issuance of this November 22nd directive letter for submittal to GeoTracker of the following deliverables:

1. **DATA GAP INVESTIGATION REPORT**

    a. Submittal of a *Report* presenting the permitted installation of sub-slab vapor probes in accordance with the approved *Revised Investigation Report and Proposed Corrective Action*, dated October 4, 2024. The *Report* must include appropriate documentation (permits, boring logs, field sheets documentation, etc.). The *Report* must summarize the findings of the sampling and data collected and include a tabularized summary of the analytical data. Chemical iso-concentrations for soil vapor, sub-slab soil vapor, indoor/outdoor air, and groundwater results are required to be depicted on separate figures within the report. The *Report* must also include laboratory data certificates and copies of the chain-of-custody forms

2. **GEOTRACKER COMPLIANCE AUDIT**

    a. ACEHD requests Northern Building property owners conduct a thorough compliance audit and upload all historical environmental documents related to the subject site including but not limited the soil and groundwater analytical data, documents and reports, maps, and boring logs to GeoTracker. Upon completion of the audit please provide a letter certification with completed GeoTracker upload table as illustrated in ***Attachment 4*** of this letter and ongoing as reports and data are submitted.

3. **VAPOR INTURSION MITIGATION & MIGRATION ENGINEERING CONTROLS (VIMMECS)**

    a. ***Updated Vapor Intrusion Conceptual Site Model (VI CSM), VI Risk Classification, and VIMMEC Design Element Selection*** – A technical document prepared by a Professional Engineer in the State of California that includes a *VI CSM*, determination of VI risk classification, and VIMMEC strategy and design element selection tables prepared in accordance with ACEHD's *Decision Matrix for*

Development of Vapor Intrusion Conceptual Site Model and Determination of Vapor Risk Classification, dated May 14, 2021. This document must be submitted and approved by ACEHD prior to submittal of the *VIMMEC Plans and Specifications.* The VI CSM must be updated with additional sub-slab vapor results approved in the *Revised Investigation Report and Proposed Corrective Action*, updated tables and figures to support the VI risk classification, and to correct the errors presented in the *Revised Investigation & Proposed Corrective Action Report* as discussed in *Item 2* of the *ACEHD Finings* section of this directive letter.

4. **BASELINE PROJECT SCHEDULE**

   a. **Baseline Project Schedule** – ACEHD requires submittal of a *Baseline Project Schedule* which outlines the path forward at the Site. The purpose of the *Baseline Project Schedule* is to: (1) identify milestones and important target dates, such as the start and end of phases of construction, and the target occupancy date; and (2) facilitate the allocation of resources to allow for reasonable and timely preparation and review of documents. The *Baseline Project Schedule* must include the permitting and phases of construction, and entries for deliverable submittals in accordance with the requisite compliance dates provided in ***Attachment 2***. The *Baseline Project Schedule* must include a minimum of 30 days for ACEHD review and approval of deliverables. An example of a schedule can be provided upon request.

5. **SUB-SLAB VAPOR PROBE DESTRUCTION**

   a. **Sub-Slab Vapor Probe Decommissioning Report** – A *Report* documenting the permitted destruction of the existing sub-slab probes. The *Report* must include appropriate documentation (permits, waste disposal documentation, etc.). Final disposal documentation requires full and complete disposal forms, with a minimum of three accepting signatures. Documentation is not required for disposal of non-contaminated material such as vapor probe boxes.

6. **PERMITS, PLANS, AND APPROVALS FROM OTHER AGENCIES *(ACEHD APPROVAL NOT REQUIRED)***

   ACEHD requires copies of all permits, plans, and approvals from other agencies to be uploaded to GeoTracker prior to the start of demolition activities at the Site. ACEHD will review the documents to ensure consistency with ACEHD-approved vapor mitigation strategy. At a minimum, these submittals must include the following documents:

   a. **Local Planning Department Entitlement Approvals**– Submittal of the following documents approved by the City of Berkeley Planning Department. ACEHD notes that substantial changes may invalidate the conclusions of the protectiveness of the proposed redevelopment of the Site with respect to VI risk and the proposed vapor mitigation strategy.

      i. California Environmental Quality Act (CEQA) Compliance Documents

      ii. Documentation of the redevelopment Project approval by the City of Berkeley Planning Department

   b. **Local Building Department Construction & Demolition Permits** – Submittal of the following documents approved by the City of Berkeley Building Department. The documents must be accompanied by a transmittal letter prepared by the Environmental Consultant that states that

the documents are consistent with the Site development plans and ACEHD-approved *VIMMEC Plans & Specs.*

i. The Building Permit Plan Set

ii. Demolition and Grading Permits

Prior to the start of improvement construction and utility installation, submittal and ACEHD-approval of the following deliverables:

7. **VAPOR INTURSION MITIGATION & MIGRATION ENGINEERING CONTROLS (VIMMECS) – IF REQUIRED**

(ACEHD highly recommends that the VIMMEC design engineer contact ACEHD for examples of ACEHD-approved VIMMEC documents listed below from other projects for reference during preparation of the VIMMEC documents for this project).

a. ***VIMMEC Plans and Specifications*** *–VIMMEC Plans and Specifications* presenting the basis of design and construction details of proposed VIMMECs for the vapor intrusion risk classification presented in the vapor intrusion conceptual site model (*VI CSM*) and element selection tables. The *VIMMEC Plans and Specifications* must be prepared by a California Registered Civil Engineer with sufficient detail to evaluate the validity, constructability, and design performance of the engineering controls and include at a minimum the following:

- Permit application plan set details presenting all relevant elements associated with Site development and VIMMEC installation (i.e., foundational elements, utility alignments and penetrations through the slab, subgrade elements, surface coverings outside of building footprint, bioswales, vertical profiles of the building, roof top elements and penetrations, etc.).

- Basis of design including but not limited to design objectives, assumptions, engineering calculations, and performance and risk metrics

- Construction quality assurance and quality control (*CQA/CQC*) measures that will be implemented by the CQA team during construction and testing of the VIMMECs to ensure compliance with the ACEHD approved *VIMMEC Plans & Specs* including at a minimum:

  i. Material Quality Control and Quality Assurance – Identification of measures for ensuring that materials are free from defect prior to installation.

  ii. Material Storage – Declaration of materials storage criteria and requirements

  iii. Installer Qualifications – Declaration of the minimum qualifications for installers. At a minimum, installers for barrier systems must be certified by the manufacturer. Contractors installing probes installed at a depth greater than 4.9 feet bgs must have a C-57 drillers license.

iv. Inspections – Identification of minimum required inspections and triggers for additional inspections. This identification must include sequencing with other disciplines and must also include copies of forms that will be completed by the CQA inspector at the end of each inspection.

v. Inspector Qualifications – Declaration of the minimum qualifications for inspectors.

vi. Protective Measures and Prohibited Work Practices – Description of protective measures and prohibited work practices intended to limit potential damage to the *VIMMECs* during construction.

vii. Materials and Installation Testing – Requirements for testing installed system components (e.g., seam tensile test, coupon test, wet mil test, smoke test) and triggers for additional testing requirements. At a minimum, the type, frequency, and passing conditions for each test must be included. Contingencies for how failures will be addressed must be included.

b. ***VIMMEC Installation Sequencing Plans*** - Annotated ACDEH-approved VIMMEC Plans prepared by the general contractor, the VIMMEC installation sub-contractor, and the VIMMEC design engineer, and the VIMMEC CQA engineer (if different than Design Engineer) presenting the details of the sequencing/phasing of VIMMEC installation for each building(s).

c. ***VIMMEC Installation Schedule*** - A detail Gantt chart with line items applicable to VIMMEC element installation, inspections by the CQA team, inspections by local building authority, CQA Inspection Report submittals, ACDEH review of CQA Inspection Reports, ACDEH verification inspections, submittal of the *VIMMEC record report of construction* with performance verification monitoring results, long-term management plan (Land-use covenant, risk management plan , financial assurance, final OMM&R Plan), and occupancy date. If the development includes ground floor commercial use the schedule must include line-items for performance verification monitoring pre- and post-tenant improvements if tenant improvements are not completed at the same time as the final construction of the building(s).

d. ***Draft VIMMEC Operations Maintenance, Monitoring & Report Plans*** **(OMM&R)** – A *Draft VIMMEC OMM&R Plan* for proposed VIMMECs. The *Draft VIMMEC OMM&R Plan* must include, at a minimum, contact information for responsible parties, emergency contacts, environmental consultants, and ACEHD; a description of the Site development and VIMMEC components; contaminant sources and contaminants of potential concern; a schedule and description of inspection, sampling, and monitoring events including mid-construction, post-construction sampling, and pre-occupancy and long-term operation and maintenance; contingency plans for VIMMEC failure; copies of the field forms to be completed during routine and emergency inspections; standard operating procedures; and cumulative hazard and risk contours (pre-construction); *VIMMEC Plans & Specifications*; and comprehensive historical analytical results in tables and figures.

The OMM&R Plan must also include long-term stewardship cost estimates for the continued implementation and maintenance of the *VIMMECs*. The *OMM&R Plan* must include a detailed *Cost Estimate* for each type of monitoring event and a summary of long-term stewardship costs in *Present Value* based on a uniform series, present worth model with an assumed interest rate of 4%.

e. **Approved Building Permit Plans with *VIMMEC* Incorporated** – A copy of the local building authority approved *Building Permit Plan Set* for site redevelopment incorporating the *VIMMECs* must be submitted to ACEHD for review to verify that the *VIMMECs* have been incorporated into the plans as approved by ACEHD. Submittal of the *Building Permit Plan Set* must be accompanied by a transmittal letter prepared by the VIMMEC Design Engineer that states that the plans are consistent with the ACEHD approved *VIMMEC Plans & Specs* and identifies plan sheets where the VIMMEC design elements are incorporated.

During VIMMEC installation, submittal and ACEHD-approval of the following deliverables

f. ***Revised* VIMMEC Plans & Specifications** – *Revised* VIMMEC Plans and Specifications with proposed changes to the VIMMEC system design. Proposed changes must be submitted to ACEHD prior to implementation for review and approval as a complete plan set and identifies revision number and associated date as shown in the revision history block of the plan sheets. Revisions must be identified on the revised plan set(s) in accordance with standard engineering drawing practices. Minor deviations that do not affect the VIMMEC design intent do not require submittal of *Revised VIMMEC Plans and Specifications* can be documented in red-line drawings in the CQA Inspection Reports and final as-built drawings.

g. ***VIMMEC* Construction Quality Assurance Plan Status Reports** – Reports documenting the status of the VIMMEC installation and testing. The reports must be signed by the CQA Engineer with Responsible Charge and include at a minimum the following:

   i. A Statement that the work associated with the CQA inspection has been conducted in accordance with the approved plans, all repairs completed, and the Site is ready for ACEHD inspection.

   ii. A summary of work covered as part of the VIMMEC CQA inspection

   iii. Identification of deviations from the approved plans.

   iv. A figure utilizing the applicable VIMMEC Plan sheets that shows the location of each element of the completed work and identification of the photograph identification number documenting the work.

   v. An annotated photograph log of each installed VIMMEC element (including photographs documenting overlap and seaming of each layer of composite geomembranes) accompanied by the corresponding design detail that illustrates that the work completed in the field conforms to the approved design.

   vi. Documentation and receipts of materials and products delivered to the site as part of the VIMMEC installation.

   vii. Documentation of storage of materials in accordance with manufacturer requirements.

   viii. Copies of the CQA Inspection Forms signed by the CQA inspector and all tradespersons associated with the work.

   ix. Copies of daily field logs (handwritten logs must be legible).

It is the CQA team's responsibility to observe and document all phases of the VIMMEC installation. CQA Inspection must be submitted a minimum of 24-hours (1 working day) prior to ACEHD scheduled inspections. Upon receipt of CQA Inspection Report, ACEHD will review and provide comment requesting resubmittal or confirm the ACEHD verification inspection or waive the inspection depending on staff availability and the completeness of the CQA Inspection Report.

h. ***Updated VIMMEC Installation Schedule*(s)** – Prepared in accordance with *Item 7.C* listed above.

Prior to occupancy clearance, submittal and ACEHD-approval of the following deliverables:

8. **VIMMEC COMPLETION REPORTS**

a. **VIMMEC Record Report of Construction (RROC) and Pre-Occupancy Performance Verification Report** – A comprehensive report documenting the CQA activities and observation and findings during construction of the *VIMMECs*. The *VIMMEC RROC* must include the CQA Inspection Reports, as-built plans and specifications, certification by the CQA Engineer that the completed VIMMECs were installed in accordance with the ACEHD, approved *VIMMEC Plans & Specs*.

The *VIMMEC RROC* must document the pre-occupancy performance verification monitoring event and certification by the VIMMEC CQA/Design Engineer that the VIMMECs are functioning as designed.

b. **Final VIMMEC OMM&R Plan** – A *Final VIMMEC OMM&R Plan* that includes, at a minimum documentation of the final installed *VIMMEC* components, including As-Built drawings and specifications; and other changes pretendant to the as-built VIMMECs

9. **INSTITUTIONAL CONTROLS**

a. **Environmental Risk Management Plan (Environmental RMP)** – A *Environmental RMP* for long-term site management plan written for the property owner to facilitate compliance with the requirements of the *Deed Restriction*. The *Environmental RMP* is a communications document for non-technical audiences identifying chemicals of concern (COCs) in the subsurface, and engineering, administrative, and institutional controls that have been implemented at the Site to control unacceptable risk due to exposure from COCs. The *Environmental RMP* must include sufficient detail that non-technical staff can identify what work practices are unacceptable and can identify engineering controls if encountered. The *Environmental RMP* must also include communications and reporting requirements so that, in the event the engineering controls are damaged, the appropriate professionals and regulatory agencies can be notified to ensure that the integrity of the engineering controls is maintained. The *Environmental RMP* must also include the requirements for submittal of work plans for ACEHD review and approval prior to implementing proposed tenant improvements in ground floor commercial spaces and include ACEHD's *Review Checklist – Template for Tenant Improvement Work Plan*.

b. **Draft Covenant and Environmental Restriction on Property** – Recordation of institutional controls including a *Deed Restriction* and *Disclosure Covenants, Conditions and Restrictions* (CC&Rs) providing legal and administrative controls and methods for dissemination of information to site users and occupants, homeowners associations, property managers and property owners

to minimize risk during property development, future below-ground construction and maintenance, and long-term site use.

c. **Financial Assurance Instrument** – Documentation of an appropriate financial instrument to assure ACEHD of implementation and maintenance of the VIMMECs. The details of this financial assurance must be worked out by the project proponent and ACEHD as design, construction, and monitoring plans are finalized and approved. The financial assurance instrument must provide for sufficient funds to construct, monitor, and provide regulatory oversight costs for long-term operations and maintenance of the VIMMECs. Estimates of these costs must be based, in part, on the cost estimates for project implementation that are established in the *VIMMEC Plans & Specifications* and *OMM&R Plans*.

   Refer to Department of Toxic Substance Control's *Quick Reference Guide* for more information on financial assurance mechanisms.

d. **Copy of Recorded Covenant and Environmental Restriction on Property** – A copy of the executed and recorded Covenant and Environmental Restriction on Property with the Alameda County Assessor Office.

Throughout the Post-Closure Period, submittal and ACEHD-approval of the following deliverables:

10. **COMPLIANCE REPORTS**

a. **Routine Operations, Maintenance, and Monitoring Report / Site Inspection Reports** – A report documenting compliance with the *Environmental RMP* and the *OMM&R Plan*. At a minimum, this report must include the following elements:

   i. Narrative description of environmental activities (e.g., site inspections, sampling, maintenance) and/or activities covered by the *Environmental RMP* (e.g., earthwork, utility work, slab modifications or penetrations) that were completed during the reporting period;

   ii. Narrative description of the environmental activities or activities covered by the *Environmental RMP* that are planned for implementation during the next reporting period;

   iii. Results of the physical condition inspection for accessible elements of the engineering controls, including a photo-log with representative photographs;

   iv. Tabulated results of the monitoring of performance metrics;

   v. An evaluation of the current condition and performance of engineering controls, including a statement that the engineering controls are or are not achieving design objectives;

   vi. Identification of any tenant or ownership changes that occurred during the reporting period;

   vii. Signed tenant acknowledgement and compliance statements;

   viii. Copies of field inspection forms and/or maintenance logs; and

ix. Updates to the *RROC* as "redline" drawings, as necessary.

b. **Non-Routine Operations, Maintenance, and Monitoring Report / Site Inspection Reports** – A report documenting the implementation of non-routine site inspections and/or maintenance and monitoring activities. Submittal of this report is required when trigger conditions identified in the *Environmental RMP* are met (e.g., earthquake, un-planned/emergency utility work within burdened areas, unanticipated damage to engineering controls or slab foundation). At a minimum, this report must include the following elements:

i. Identification of the conditions that triggered the non-routine report;

ii. Description of the Scope of Work implemented;

iii. Documentation of compliance with requirements of the *Environmental RMP* and *OMM&R Plan*;

iv. An evaluation of the condition and performance of engineering controls against design objectives after completion of the scope of work;

v. Identification of any outstanding environmental issues;

vi. Copies of field inspection forms and/or maintenance logs; and

vii. Updates to the *RROC* as "redline" drawings, as necessary.

c. **5-Year Environmental Review Summary Report** – A *Report* presenting an evaluation of the performance and adequacy of the engineering and administrative controls that have been implemented at the Site in accordance with the requirements of the *OMM&R Plan* and the *Environmental RMP*. This *Report* may be combined with a *Routine Operations, Maintenance, Monitoring, and Reporting Plan* or submitted as a stand-alone document and must, at a minimum have each of the following additional elements:

i. Results of the collection of risk metrics (collection of concentration data from applicable source area, point of control, and point of exposure);

ii. An evaluation on the performance of the engineering and administrative controls;

iii. An evaluation on the adequacy of the current financial assurance mechanisms;

iv. An evaluation on if termination criteria have been met; and

v. Recommendations for modifications or termination of the administrative or engineering controls.

d. **Work Plans for Tenant Improvement** – A *Work Plan* presenting a scope of work for the implementation of tenant improvement activities identified in burdened activities in the *Environmental RMP*. The scope of work must demonstrate compliance with the Environmental *RMP*, *OMM&R Plans*, and the *Remedial Soil Excavation Plans & Specifications* as applicable. The *Work Plan* must include a copy of the City of Hayward approved Building Permit Plan set.

e. **Tenant Improvement Completion Report** – A *Report* documenting the implementation of an ACEHD approved Work Plan for Tenant Improvement and demonstrating compliance with the *Environmental RMP*, *OMM&R Plans*, and the *Remedial Soil Excavation Plans & Specifications* as applicable. The *Report* must include As-built drawings of the tenant improvements.

11. **GEOTRACKER COMPLIANCE**

a. **GeoTracker Database Compliance** - On-going compliance by uploading all environmental documents related to the subject site including but not limited soil, groundwater and soil vapor analytical data, monitoring well depth-to-water measurements, and surveyed location and elevation data for sampling locations, documents and reports, maps, and boring logs to GeoTracker.

ATTACHMENT 5

Alameda County Environmental Cleanup Oversight Programs (LOP and SCP)	**REVISION DATE:** May 19, 2020
	ISSUE DATE: July 25, 2012
	PREVIOUS REVISIONS: September 17, 2013, May 15, 2014, December 12, 2016, December 14, 2017
SECTION: ACDEH Procedures	**SUBJECT:** Responsible Party(ies) Legal Requirements / Obligations

REPORT & DELIVERABLE REQUESTS

Alameda County Department of Environmental Health (ACDEH) Cleanup Oversight Programs, Local Oversight Program (LOP) and Site Cleanup Program (SCP) require submission of all reports in electronic form to the State Water Board's (SWB) GeoTracker website in accordance with California Code of Regulations, Title 23, Chapter 30, Division3, Article 2, Section 3892 and Chapter 16, Article 11, Division 3.

Leaking Underground Fuel Tank (LUFT) Cases

Reports and deliverable requests are pursuant to California Health and Safety Code Section 25296.10. 23 CCR Sections 2652 through 2654, and 2721 through 2728 outline the responsibilities of a responsible party (RP) in conjunction with an unauthorized release from a petroleum underground storage tank (UST) system.

Site Cleanup Program (SCP) Cases

For non-petroleum UST cases, reports and deliverables requests are pursuant to California Health and Safety Code Section 101480.

ELECTRONIC SUBMITTAL OF REPORTS

A complete report submittal includes the PDF report and all associated electronic data files, including but not limited to GEO_MAP, GEO_XY, GEO_Z, GEO_BORE, GEO_WELL, and laboratory analytical data in Electronic Deliverable Format™ (EDF). Additional information on these requirements is available on the State Water Board's website (http://www.waterboards.ca.gov/water_issues/programs/ust/electronic_submittal/)

- Do not upload draft reports to GeoTracker
- Rotate each page in the PDF document in the direction that will make it easiest to read on a computer monitor.

GEOTRACKER UPLOAD CERTIFICATION

Each report submittal is to include a GeoTracker Upload Summary Table with GeoTracker valid values[1] as illustrated in the example below to facilitate ACDEH review and verify compliance with GeoTracker requirements.

GeoTracker Upload Table Example

Alameda County Environmental Cleanup Oversight Programs (LOP and SCP)	**REVISION DATE:** NA
	ISSUE DATE: December 14, 2017
	PREVIOUS REVISIONS: September 17, 2013, May 15, 2014, December 12, 2016
SECTION: ACDEH Procedures	**SUBJECT:** Responsible Party(ies) Legal Requirements / Obligations

ACKNOWLEDGEMENT STATEMENT

All work plans, technical reports, or technical documents submitted to ACDEH must be accompanied by a cover letter from the responsible party that states, at a minimum, the following: "I have read and acknowledge the content, recommendations and/or conclusions contained in the attached document or report submitted on my behalf to the State Water Board's GeoTracker website." This letter must be signed by the Responsible Party, or legally authorized representative of the Responsible Party.

PROFESSIONAL CERTIFICATION & CONCLUSIONS/RECOMMENDATIONS

The California Business and Professions Code (Sections 6731, 6735, and 7835) requires that work plans and technical or implementation reports containing geologic or engineering evaluations and/or judgments be performed under the direction of an appropriately licensed or certified professional and include the professional registration stamp, signature, and statement of professional certification. Additional information is available on the Board of Professional Engineers, Land Surveyors, and Geologists website at: http://www.bpelsg.ca.gov/laws/index.shtml.

UNDERGROUND STORAGE TANK CLEANUP FUND

For LUFT cases, RP's non-compliance with these regulations may result in ineligibility to receive grant money from the state's Underground Storage Tank Cleanup Fund (Senate Bill 2004) to reimburse the cost of cleanup. Additional information is available on the internet at: https://www.waterboards.ca.gov/water_issues/programs/ustcf/

AGENCY OVERSIGHT

Significant delays in conducting site assessment/cleanup or report submittals may result in referral of the case to the Regional Water Board or other appropriate agency, including the County District Attorney, for possible enforcement actions. California Health and Safety Code, Section 25299.76 authorizes enforcement including administrative action or monetary penalties of up to $10,000 per day for each day of violation.

GeoTracker Global ID T10000021302

Dear Dilan Roe:

Devi Dutta Architecture Inc. has retained Pangea Environmental Services, Inc. (Pangea) as the environmental consultant for the project referenced above. Pangea is submitting the attached report on behalf of Devi Dutta Architecture Inc.

I have read and acknowledged the content, recommendations, and/or conclusions contained in the attached document or report submitted on my behalf to the State Water Resources Control Board's GeoTracker website.

Sincerely,

Devi Dutta-Choudhury, AIA

Re: **Revised Investigation Report and Proposed Corrective Action Plan**
924–930 Carleton Street
Berkeley, California 94710
ACEHD Site Cleanup Program – Case #RO00003607

Dear Mr. York:

Pangea Environmental Services, Inc. has prepared this *Revised Investigation Report and Proposed Corrective Action Plan* for the subject property at 924, 926, 928, and 930 Carleton Street in Berkeley, California. This revised workplan was requested by the Alameda County Environmental Health Department (ACEHD) in a letter dated August 14, 2024. This Report was prepared on behalf of property owners Tabrizi Ali H & Sattari Yekameh Trust, 928 Carleton LLC, Jonathan Burke, and Tukman Mark & Kiyo Trust. This Report documents implementation of the *Subslab Gas Assessment Workplan* dated October 17, 2023 and presents a revised workplan proposing additional subslab gas sampling in the units in the northern building on the subject property, and presents additional information requested by the August 14, 2024 ACEHD letter.

If you have any questions or comments, please call me at (510) 435-8664 or email briddell@pangeaenv.com.

Sincerely,
Pangea Environmental Services, Inc.

Bob Clark-Riddell, P.E.
Principal Engineer

1.0 INTRODUCTION

Pangea Environmental Services, Inc. (Pangea) has prepared this *Revised Investigation Report and Proposed Corrective Action Plan* (Revised Corrective Action Plan) for the subject property at 924, 926, 928, and 930 Carleton Street in Berkeley, California. This revised workplan was requested by the Alameda County Environmental Health Department (ACEHD) in a letter dated August 14, 2024 (Appendix A). This Report was prepared on behalf of property owners Tabrizi Ali H & Sattari Yekameh Trust, 928 Carleton LLC, Jonathan Burke, and Tukman Mark & Kiyo Trust. This Report documents implementation of the *Subslab Gas Assessment Workplan* (Workplan) dated October 17, 2023. In accordance with the August 14, 2024 ACEHD letter, this Report also presents a revised workplan proposing additional subslab gas sampling in the units in the northern building on the subject property, and presents additional information requested by the letter.

1.1 Agency Direction

In its August 14, 2024 letter, ACEHD commented on Pangea's *Investigation Report and Proposed Corrective Actions* (Report) dated July 12, 2024 (Pangea, 2024). The ACEHD letter requests submittal of a *Revised Investigation Report and Proposed Corrective Action Plan* that includes the following:

- Inclusion of figure(s) illustrating both the existing and proposed conversion components within each of the units in the northern building, including but not limited to kitchens, sinks, and partition walls (figures are provided in the floor plans in Appendix G of this Report).

- Inclusion of figure(s) illustrating the existing and proposed utility alignment(s) beneath each of the units in the northern building (figures are provided in the site plan in Appendix H of this Report).

- Inclusion of figure(s) and the addition of a workplan section discussing the location and associated information on the current heating, ventilation, and air conditioning (HVAC) systems in each of the northern building units, including the garage ventilation system in unit 924 (figures are provided in the floor plans in Appendix G. See Workplan Section 7.1 of this Report for HVAC information).

- Inclusion of figure(s) and the addition of a workplan section proposing the concurrent sample collection of indoor and ambient air and subslab vapor samples in units where soil vapor concentrations for chemicals of concern exceed the RWQCB ESLs for residential vapor intrusion risk (information provided in Figure 3 and Section 7.0 of this report).

Also in its August 14, 2024 letter, ACEHD commented on Pangea's *Investigation Report and Proposed Corrective Actions* (Report) dated July 12, 2024 (Pangea, 2024). The ACEHD letter opined that "installation and long-term stewardship of VIMMECs will mitigate potential vapor intrusion risk to the future residential occupants of the northern building units". In the letter, ACEHD stated that it has no

objection to the City of Berkeley Planning & Development Department approving the planning application for the conversion of the northern building commercial units to live/work units, provided that the ACEHD comments listed in the August 14 letter are included in the City's conditions of approval. The listed conditions are as follows:

- Further soil vapor sampling to evaluate the vapor intrusion risk and the VIMMEC components within the northern building units (e.g., barrier, ventilation system, conduit seals, and trench dams).
- Installation of VIMMECs within northern building units where subslab soil vapor concentrations exceed the January 2019 San Francisco Bay Regional Water Quality Control Board (RWQCB) environmental screening levels (ESLs) for residential vapor intrusion risk during conversion of the northern building commercial units to live/work units.
- Submittal of VIMMEC plans and specifications to ACEHD for review and approval, using the City of Berkeley Building Department Permit Application Plan Set for the northern building live/work unit conversions.
- Submittal of plans for long-term stewardship of the VIMMECs to ACEHD for review and approval, including recordation of a Covenant and Environmental Restriction on Property.
- Submittal of administrative control documents to ACEHD for review and approval, including an Environmental Risk Management Plan; a VIMMEC Operations, Maintenance, Monitoring, and Reporting (OMM&R) Plan; and a financial assurance instrument.
- Submittal of OMM&R compliance reports to ACEHD for review and approval.

ACEHD also noted that further evaluation of the southern building, common area, and parking lot is warranted to evaluate vapor intrusion risk to occupants of the southern building under the current configuration as live/work units and to construction/utility workers in the common area and parking lot of the site.

2.0 SITE BACKGROUND

2.1 Site Description

The subject property is located on an approximately 0.11-acre series of parcels at 924–930 Carleton Street in a mixed-use area of Berkeley, California. The four commercial condos housed by the subject property (units 924, 926, 928, and 930) are part of a larger development consisting of two buildings, designated as the *northern building* and the *southern building*, and an associated common area and parking lot. Each building consists of a total of four units, with the northern building currently operating as commercial condos to be converted into live/work units, and the southern building currently operating as live/work

units. The property on which the northern building is cited is identified with the following assessor parcel numbers (APNs):

- 54-1747-24 (930 Carleton Street)
- 54-1747-25 (928 Carleton Street)
- 54-1747-26 (926 Carleton Street)
- 54-1747-27 (924 Carleton Street)

The units of the southern building are identified with the following APNs:

- 54-1747-28 (2700 8th Street)
- 54-1747-29 (2702 8th Street)
- 54-1747-30 (2704 8th Street)
- 54-1747-31 (2706 8th Street)

The subject property is a portion of the Carleton Street Studios development constructed in 2000, comprising two buildings and common parking and courtyard areas (Figure 1). The northern building consists of an approximately 3,000 square foot, two-story, slab-on-grade building divided into four individual units (the northern units in the "northern building"). The common area parcel (APN 54-1747-32) is improved with asphalt-paved parking areas and associated landscaping. A home ownership association encompasses the owners of the four individual units for the northern building and the owners of the four individual live/work units in the southern building at 2700–2706 Eighth Street. The southern building is similar in size, layout, and construction to the northern building.

The properties for the northern and southern buildings are bordered by commercial buildings to the north, east, and west, and by residential property to the south. Basement status is unknown in any of the adjacent buildings.

2.2 Current Land Use

The four units located on the site at 924–930 Carleton are currently in use as commercial condos containing business offices and workspaces, with ground floor parking in 930 Carleton. Occupant use primarily involves business and administrative activities. The 926 Carleton unit is also reportedly being used in part for motorcycle storage and light maintenance.

2.3 Proposed Future Land Use

The site property owners propose to redevelop all four two-story office spaces on the property into live/work units, with intended mixed commercial and residential use. Pangea understands that upon approval of the

workplan contained in this report, ACEHD intends to submit a letter to the City of Berkeley Planning and Development Department recommending approval for entitlement to proceed with the redevelopment.

2.4 Historical Land Use

To evaluate historical land use, Pangea first reviewed the Environmental Transaction Screen (ETS) conducted on July 5, 2017 by AEI Consultants (AEI). Pangea also obtained and reviewed Sanborn maps from 1911, 1950, and 1980 (Appendix B), as well as a City Directory Abstract and Radius Map Report generated on July 3, 2024 by Environmental Data Resources, Inc. (EDR) (Appendix C).

Based on Pangea's review of historical sources, the property consisted of the following:

- **1911:** Vacant land until at least 1911.
- **1939–1958:** A large warehouse-like building occupied by Hummel Furniture Manufacturing Company from at least 1939 to 1958. As shown on the 1950 Sanborn map, the Hummel Furniture Manufacturing Company used the subject site for furniture woodworking, upholstery, painting, and assembly.
- **1963–1998:** A parking lot for the Colgate Palmolive Co. from at least 1963 to 1998.
- **2002–present:** An office building and additional associated live/work building located to the south of the subject property (2700–2706 Eighth Street). The subject property building was occupied from approximately 2002 to at least 2017 by Kudsk Construction, whose operations involved administrative activities (AEI, 2017). The EDR Radius Map Report notes that Kudsk Construction had a former UST and is listed in the Department of Toxic Substances Control (DTSC) Hazardous Waste Tracking System (HWTS), which indicates that Kudsk Construction may have been the generator of some hazardous materials at the site at some time during its occupancy.

Based on our review of the historical records and experience on projects with similar historical use, Pangea concludes that other than the closed LUST case, it is unlikely that other historical activities have resulted in any significant releases of hazardous materials at the subject site. Historical activities could have resulted in minor releases that could contribute to *de minimus* conditions.

2.5 Historical Land Use and Investigation Information for the Site and Nearby

Investigation information described below is from the two closed LUST cases, and key information is provided in Appendix D.

Closed LUST Case: Carleton Business Center (2703 Seventh Street)

A Leaking Underground Storage Tank (LUST) case (T0600100261) was opened for the 2703 Seventh Street property (parent parcel; also known as "Carleton Business Center") and overseen by the City of Berkeley and the San Francisco Bay Regional Water Quality Control Board (RWQCB). The property, then identified as APN #54-1747-1-1, was bordered by Carleton, Eighth, Pardee, and Seventh Streets, and is identified as the parent parcel on which the subject property (924–930 Carleton) occupies the *northeastern* portion of the Carleton Business Center parcel. EDR records state that a leak was reported from the structural failure of a UST at the site, and leak was stopped on September 20, 1991. The location of the former UST is not shown in reviewed documents. Information in Appendix D documents that a geophysical survey at this site was conducted in August 1991 using magnetic and ground penetrating radar surveys and did not indicate the presence of USTs.

In August 1990, a subsurface Environmental Site Assessment (ESA) was conducted by Blymyer Engineers, Inc. for the Carleton Business Center property located at 2703 Seventh Street. Blymyer's *Environmental Site Assessment* report dated December 7, 1990 reported elevated levels of total petroleum hydrocarbons as gasoline (TPHg), total petroleum hydrocarbons as diesel (TPHd), toluene, ethylbenzene, and xylenes in soil and groundwater at the *northeastern* area of the property and across Eighth Street to the east of the property, with concentrations decreasing in the downgradient direction. According to the report, "a survey of surrounding land use revealed a series of underground storage tanks (USTs) along the south side of Carleton Street approximately 100 ft east of Eighth Street" (upgradient of the subject property), and identified the USTs as "a plausible source of the soil and groundwater petroleum contamination in this area" (Blymyer, 1990). This described UST location corresponds to the location of the closed LUST case associated with the Humane Society property at 2700 Ninth Street. Blymyer's investigation included the drilling and sampling of several borings on the large block parcel (e.g., locations C-1 through C-4, MW-1, and D-1 through D-5), although the exact locations were not specified in the reviewed documentation. The highest hydrocarbon impact was found in grab groundwater from boring C-3 (concentration of 1,200,000 µg/L TPHg), and from boring D-3 (concentrations of 1,000,000 µg/L TPHg, 89,000 µg/L TPHd, and 7,100 µg/L benzene). No significant impact was detected in analyzed shallow soil samples, and the highest impact was in select samples from 13 to 16.5 ft bgs.

In August 1991, a preliminary site assessment was conducted for the parent parcel by B&V Waste Science and Technology Corp. (B&V). Site assessment procedures and results are discussed in B&V's September 16, 1991 *Preliminary Site Assessment* report for the parent parcel (B&V, 1991). Key figures and tabulated data are included in Appendix D herein. The investigation included the installation and sampling of five groundwater monitoring wells (MW-1 through MW-5) to apparently further delineate the hydrocarbon impact discovered during grab sampling by Blymyer. Wells MW-1 and MW-2 were located near the current northern building for the subject property (924–930 Carleton) and wells MW-3 and MW-4 were located near the current southern building at 2700–2706 Eight Street. The highest hydrocarbon impact was found

in groundwater from well MW-3 (with concentrations of 16,000 µg/L TPHg and 1,500 µg/L xylenes), and from well MW-4 (with 430 µg/L benzene).

Remedial actions were not performed for this LUST case, and the case was closed in March 1992 under land use as a vacant lot at the time. Again, key information from this closed LUST case is provided in Appendix D. (Some prior figures do not show sampling locations or data since the 11×17 figures were scanned as 8.5×11 figures during document digitation by others.)

UST Removal and Closed LUST Case: Berkeley Humane Society (2700 Ninth Street)

In 1991, after a UST leak was reported at this site, LUST case (T0600100181) was opened for the Berkeley Humane Society (Humane Society) property at 2700 Ninth Street. This site is located approximately 300 ft to the east and hydraulically upgradient of the subject property at 924–930 Carleton. The case was closed in 1994 following completion of site investigation and remedial action (RWQCB, 1994). The USTs at this site were removed on January 23, 1991 by Century West Engineering, according to B&V's *Preliminary Site Assessment* report for the parent parcel at 2703 Seventh Street (B&V, 1991). B&V's report also references a March 12, 1991 report from Century West Engineering stating that holes were found in two of the tanks and some fuel constituents were observed in the tank excavation pit.

According to the abovementioned ETS from AEI, any USTs present at the Humane Society property could remain a potential source of contamination for the subject site due to their relative upgradient location (AEI, 2017). However, the known USTs were removed by Century West Engineering.

Other Historical Land Use Information

Additional historical land use information can be found in the EDR City Directory and the EDR Radius Map Report in Appendix C. No significant known releases, historic auto stations, historic cleaners, or other uses of special concern are identified for nearby properties in the City Directory or Radius Map Report, except for the LUST cases referenced above and the Consolidated Printers Inc site located at 2680 Eight Street apparently north of the subject site.

Summary of Historical Hydrocarbon Information

Key historical information from the closed LUST case presented in Appendix D of this report indicates that the primary residual impact was present at former groundwater monitoring wells MW-3 and MW-4, located south of the subject building, with a groundwater flow direction toward the west-southwest and away from the site building. The MW-3 well log indicates the hydrocarbon impact was primarily within the gravelly sand water-bearing unit approximately 13 to 19 ft below grade surface (bgs), and is overlain by low-plasticity dense and stiff silt and clay soil. This overlying fine-grained material is likely containing and mitigating any significant upward vertical migration or intrusion of volatile organic compounds (VOCs) beneath the subject site.

2.6 Chemicals of Potential Concern

Based on prior site assessment data related to the former LUST case at 2703 Seventh Street, the chemicals of potential concern (COPCs) include the following: petroleum hydrocarbons TPHg, TPHd, and TPHmo, and VOCs. Based on the subslab gas assessment described herein, additional COPCs include trichloroethylene (TCE), 1,4-dioxane, and chloroform.

3.0 SITE ASSESSMENT ACTIVITIES

On November 28, 2023, Pangea conducted subslab gas sampling at the subject property. The sampling involved the installation and sampling of four subslab gas probes (SS-1, SS-2, SS-3, and SS-4) within the building footprint at the approximate locations shown on Figure 1. One probe was installed in each of the four units. Consistent with the ACEHD request, the probes were located near the bathrooms and kitchens of the units to help facilitate co-location sampling with indoor air sampling, if required in the future.

Pangea collected soil vapor samples using standard agency-approved procedures, including use of batch-certified Summa canisters, helium tracer gas, and analysis of VOCs, TPH, and helium. The sampling was performed in general accordance with applicable agency guidance: *Department of Toxic Substances Control's (DTSC) July 2015 Advisory – Active Soil Gas Investigation*. Sampling field data sheets are included in Appendix F. Additional work specifics are provided below.

3.1 Subslab Gas Sampling Procedures

The subslab gas probes were installed and sampled following DTSC's July 2015 *Advisory – Active Soil Gas Investigation* guidance, and in general accordance with Pangea's standard operating procedures in Appendix E. The subslab gas probes used were Vapor Pins™ manufactured by Cox-Colvin & Associates, Inc.

The probes were allowed to equilibrate with subslab gas for at least 2 hours. Subslab gas samples were collected using laboratory-supplied manifolds and batch-certified Summa™ canisters. The Summa canisters were supplied with a vacuum of approximately 30 inches of mercury. Prior to sample collection from the probes, a shut-in test was conducted on the Summa™ canisters and flow controllers for a minimum of 5 minutes to ensure there were no leaks in the apparatus. Three casing volumes of air were purged from the probe using a syringe at a flow rate between 100 and 200 milliliters (ml) per minute. Upon completion of purging, the Summa canisters were opened for sample collection. The flow controller regulated the vapor flow to approximately 100–200 ml of air per minute. After approximately 5 minutes, when the vacuum within the Summa canisters decreased to approximately 5 inches of mercury, the Summa canister valve was closed. A subslab gas sampling schematic is provided in Appendix E.

To further evaluate potential leakage within the sampling system, a leak-check enclosure was placed over the sampling assembly, and helium gas was introduced into the leak-check enclosure/shroud. A helium

meter monitored helium concentrations in the enclosure during sample collection. One shroud sample was collected during sampling to quantify the concentration of helium in the shroud. The sample was collected by placing an open Summa canister with a flow-control manifold in the shroud during the sampling of the subslab gas well.

Pangea's technician utilized low-flow purging (DTSC, 2015) to keep the probe-side vacuum below 100 inches of water and removed approximately 3,000 ml of soil gas prior to sampling from the wells. A shut-in test was performed with each sampling train under a vacuum of 100 inches of water for a period of 5 minutes to confirm the absence of leaks. The sampling manifold and connection ports were then enclosed in a shroud that was charged with helium at a concentration of approximately 20 to 30% during the purging and sampling process. To maintain the helium concentration in the shroud, the sampling Summa canister was placed outside the shroud while the probe connection to the flow controller was within the shroud. The concentration of helium in the purged gas was measured with an OxyCheq Expedition helium meter to evaluate leakage. The soil gas samples were then collected in individually certified one-liter Summa canisters. The Summa canisters were closed once the vacuum within the canisters decreased to approximately 5 inches of mercury. Pangea's subslab sampling configuration is shown in Appendix E.

After sample collection, the Cox-Colvin subslab probes were left in place to facilitate future sampling, if needed.

3.2 Subslab Gas Canister Transporation and Analysis

Subslab gas samples SS-1, SS-2, SS-3, and SS-4 were transported to Pace Analytical of Mt. Juliet, Tennessee, a California-certified laboratory, following chain-of-custody protocol, and analyzed for:

- VOCs by EPA Method TO-15
- TPHg by EPA Method TO-15
- Helium by ASTM Method D1946

Subslab gas samples SS-1, SS-2, SS-3, and SS-4 were also transported to Enthalpy Analytical (Enthalpy) of Orange, California, a California State-certified laboratory, following chain-of-custody protocol, and analyzed for TPHd by EPA Method TO-17. Enthalpy noted on its chain-of-custody form that the tube for sample SS-4 was received broken. As such, analytical results for TPHd are available for samples SS-1, SS-2, and SS-3 only.

Note that while ACEHD requested analysis of total petroleum hydrocarbons as motor oil (TPHmo), laboratories do not provide TPHmo analysis on air samples, so TPHmo data is not included in this report.

Laboratory analytical results are described below.

4.0 SUBSLAB GAS ANALTYICAL RESULTS

Subslab gas analytical data is summarized on Figure 2 and Table 1. Table 1 compares analytical data to ESLs established in January 2019 by the RWQCB for residential site use. The laboratory analytical reports are included in Appendix I. Low concentrations of the following key compounds were detected in the samples:

- Petroleum hydrocarbons: TPHd, benzene, toluene, ethylbenzene, and xylenes.
- Chlorinated VOCs: TCE and methylene chloride.

The following VOCs were detected at levels above applicable residential soil gas ESLs in one or more of the samples:

- Chloroform.
- 1,4-dioxane.

These results are discussed in greater detail in the following subsections.

4.1 Petroleum Hydrocarbon Data Evaluation

TPHd was detected in subslab gas probes SS-1 through SS-3 at concentrations ranging from 260 to 340 micrograms per cubic meter (µg/m^3), as shown on Table 1, well below the applicable residential soil gas vapor intrusion ESL of 8,900 µg/m^3. No TPHg was detected above laboratory reporting limits in any of the samples.

Benzene was detected in subslab gas probes SS-1 through SS-4 at concentrations ranging from 0.706 to 1.87 µg/m^3, below the residential soil gas vapor intrusion ESL of 3.2 µg/m^3.

Toluene was detected in subslab gas probes SS-1 through SS-4 at concentrations ranging from 3.92 to 12.9 µg/m^3, far below the residential soil gas vapor intrusion ESL of 10,000 µg/m^3.

Ethylbenzene was detected in subslab gas probe SS-3 at a concentration of 2.97 µg/m^3, well below the residential soil gas vapor intrusion ESL of 37 µg/m^3.

Total xylenes were detected in subslab gas probes SS-1 through SS-3 at concentrations ranging from 1.92 to 17.5 µg/m^3, far below the residential soil gas vapor intrusion ESL of 3,500 µg/m^3.

4.2 Key Chlorinated VOC Data Evaluation

TCE was detected in subslab gas probe SS-3 at a concentration of 13.8 µg/m^3, below the residential soil gas vapor intrusion ESL of 16 µg/m^3. The source of the TCE is unknown. Pangea notes that probe SS-3 is

located within the 926 Carleton unit, where an industrial product design firm stores and maintains a few motorcycles.

Chloroform was detected in subslab gas probes SS-3 and SS-4 at concentrations of 4.29 µg/m^3 and 24.9 µg/m^3, respectively, both *above* the residential soil gas vapor intrusion ESL of 4.1 µg/m^3. Chloroform presence is commonly attributed to usage of municipal-supplied water/hot water, so chloroform presence may not require further action by regulatory oversight agencies. Note that probe SS-4 is located in the building garage/ground floor, a non-occupied floor in the 924 Carleton unit, rendering vapor intrusion a lesser concern for this unit. No change of use is planned for the ground floor at 924 Carleton.

Methylene chloride detected in subslab gas probes SS-1 through SS-4 at concentrations ranging from 1.92 to 17.5 µg/m^3, far below the residential soil gas vapor intrusion ESL of 3,500 µg/m^3.

The only other VOC detected at notable levels was *1,4-dioxane*, detected at 98 µg/m^3 in sample SS-4. 1,4-dioxane is commonly found as a byproduct of chemicals used in laundry detergents, so its presence may possibly be connected with laundry usage at the facility or the sanitary sewer adjacent to the west and south sides of the building. Again, probe SS-4 is located in the non-occupied building garage/ground floor, rendering vapor intrusion a lesser concern for this unit. No change of use is planned for the ground floor.

4.3 Other VOC Data Evaluation

Several other VOCs were detected at low concentrations in select samples. However, the detected concentrations were well below the established elevated ESL, or no ESL has been established for the compound. Therefore, these other detections are not a significant concern. The other detected VOCs in each sample included one or more of the following: 1,2,4-trimethylbenzene, 1,3,5-trimethylbenzene , 2,2,4-trimethylpentane, 2-butanone (MEK), 2-propanol, 4-ethyltoluene, chlorobenzene, chloromethane, cyclohexane, dichlorodifluoromethane, ethanol, heptane, n-hexane, tetrahydrofuran, and trichlorofluoromethane.

4.4 Quality Assurance

Quality assurance and quality control procedures included monitoring of the leak check compound helium during purging and sampling and collection of shroud and duplicate samples. All subslab gas samples were analyzed for helium by ASTM D1946 to check for undetected leaks during sampling, and the helium percentage in each shroud was monitored using a helium meter. In accordance with the approved Workplan, one shroud sample was collected during sampling (at probe SS-4) to quantify the concentration of helium in the shroud. Helium data is presented on Table 1.

During the sampling event, helium percentage was analyzed in each sample per ACEHD direction. The laboratory reported a helium percentage of 18.2% in the one shroud sample from SS-4. The helium percentage in each shroud was monitored using a helium meter and maintained at a percentage of

approximately 20 to 30% during sampling. No helium (<0.100%) was detected in any of the subslab/soil gas samples collected during this event. Using the detection limit of <0.100% helium concentration and the 18.2% helium concentration detected in the shroud yields a calculated leak percentage of <0.5%. According to the CalEPA/DTSC *Advisory: Active Soil Gas Investigation* dated July 2015, an ambient air leak of up to 5% is acceptable if quantitative tracer testing is performed by shrouding. This information suggests that that analytical results from this round of sampling are representative of subsurface conditions.

Table 1 also lists the vacuum gauge reading for each sampling canister at receipt by Pangea, at completion of sampling by Pangea, and at receipt by the lab. A slight vacuum decrease (1–2" Hg) was indicated by canister receipt for samples SS-2 and SS-4 and the shroud canister. A vacuum decrease of 4" Hg was observed for the SS-3 canister, which could correspond to leakage of 13% during canister transport and could lead to under-reporting of VOC concentrations or introduction of VOCs into the sample container, rendering the sample less representative.

Pangea also contacted the analytical laboratory about possible carryover of chemicals within the analytical instruments and sample canisters. The laboratory stated that there "was no carryover on the instrument and the lab confirmed positive identification. Also, no indication of carryover from a previous sample using the same canister or manifold."

5.0 VI RISK EVALUATION, RISK CLASSIFICATION AND ELEMENT SELECTION

This section presents Pangea's risk evaluation and risk classification for vapor intrusion associated with VOCs detected in subslab gas in November 2023. Our calculated cancer risks for vapor intrusion for the current and proposed site usage are summarized below on Tables A and B, respectively. This risk evaluation used the conservative default slab attenuation rate of 0.03 and ESLs from the 2019 ESL guidance established by the RWQCB. This report also proposes vapor intrusion mitigation measures consistent with ACEHD's *VIMMEC Strategy and Design Element Selection Guidance* and ACEHD's *Decision Matrix for Development of Vapor Intrusion Conceptual Site Model and Determination of Risk Classification*.

Note that there is no significant hazard for non-cancer results.

5.1 Existing Site Use: Commercial and Garage/Commercial

As shown on Table A, the calculated risk and vapor intrusion (VI) risk classification for the *existing* site use is summarized as follows:

- For the three *commercial* units, the maximum risk classification for detected VOCs was acceptable (6E-07), excluding a 10x factor. With a 10x factor, the 926 Carleton unit has a low risk (6E-6), but other two units have acceptable risk (7E-07). The maximum risk classification was also acceptable (<7E-07) when considering all VOC data, including non-detect results.

- For the one unit (924 Carleton) with a ground floor garage and upper *commercial* usage, the risk classification was acceptable (3E-07), excluding a 10x factor. The risk calculation was reduced by one order of magnitude (x0.1) to account for aboveground ventilation in the garage/ground floor (0.1x factor).

Table A – Calculated Risk and Risk Classification by Unit (Existing Use)

Probe ID (Location)	Risk (for Detected VOCs)	Risk (all VOCs, Including Non-Detect Data)	Risk Driving VOCs
Commercial (Commercial Screening)			
SS-1 (930 Carleton)	7E-08	<2E-07	Benzene
SS-2 (928 Carleton)	7E-08	<2E-07	Benzene
SS-3 (926 Carleton)	6E-07	<7E-07	Chloroform, TCE, Benzene
Garage and Upper Commercial (Commercial Screening with Ground Floor Ventilation)			
SS-4 (924 Carleton)	3E-07*	<3E-07*	1,4-Dioxane, Chloroform
* Risk calculation reduced by one order of magnitude (x0.1) to account from aboveground ventilation in garage/ground floor (0.1x factor).			
VI Risk Classification =	Acceptable (1E-06)	Low (>1E-06)	Moderate (>1E-05)

5.2 Proposed Site Use: Live/Work and Garage/Live-Work

As shown on Table B, the calculated risk and VI risk classification for the *proposed* site use is summarized as follows:

- For the three proposed *live/work* units, the risk classification for the detected VOCs excluding a 10x factor was *acceptable risk* (3E-07) for two units and *very low risk* (3E-06) for the 926 Carleton unit. With a 10x factor and using all VOC data (including non-detect values), the risk classification ranges from very low to moderate risk.

- For the one unit (924 Carleton) with a *ground floor garage* and proposed upper *live-work* usage, the risk classification was *acceptable risk* (1E-06) excluding a 10x factor. The risk calculation was reduced by one order of magnitude (x0.1) to account for aboveground ventilation in the garage/ground floor (0.1x factor).

Table B – Calculated Risk and Risk Classification by Unit (Proposed Use)

Probe ID (Location)	Risk (for Detected VOCs)	R Risk (all VOCs, Including Non-Detect Data)	Risk Driving VOCs
Proposed Live/Work (Residential Screening)			
SS-1 (930 Carleton)	3E-07	<3E-07	Benzene
SS-2 (928 Carleton)	3E-07	<4E-06	Benzene
SS-3 (926 Carleton)	3E-06	<4E-06	TCE, Chloroform, Benzene
Proposed Garage and Upper Live/Work (Residential Screening with Ground Floor Ventilation)			
SS-4 (924 Carleton)	1E-06*	<1E-06	1,4-Dioxane, Chloroform
* Risk calculation reduced by one order of magnitude (x0.1) to account from aboveground ventilation in garage/ground floor (0.1x factor).			
VI Risk Classification =	Acceptable (1E-06)	Low (>1E-06)	Moderate (>1E-05)

5.3 VIMMEC Element Selection or VI Site Conceptual Model

A VIMMEC Strategy and Design Element Selection rubric (VIMMEC selection rubric) for this site is included in Appendix J and described below. Based on the acceptable risk classification and very low risk classification provided above, it appears that no VIMMEC elements are warranted. Additional data collection is planned to provide seasonal and more robust data for final VIMMEC element selection. However, Pangea selects the following design elements for the units at 924 and 926 Carleton, with noted contingencies until ACEHD concurs that no VIMMEC elements are required following additional data collection:

- Barrier System#1: Concrete slab.
- Ventilation System#1: Above-grade ventilation (garage) (unit 924 Carleton only)
- P-traps (self-priming) and conduit seals.
- Contingencies:
    - Barrier system#2: Epoxy coating on existing concrete slab.
    - Environmental risk management plan, and operations, maintenance, monitoring, and reporting plan.

6.0 CONCLUSIONS AND RECOMMENDATIONS

Based on the above information, Pangea offers the following conclusions and recommendations:

- Based on our review of the historical records and project experience on projects with similar historical use, Pangea concludes that other than the closed LUST case (Carleton Business Center), it is unlikely that historical activities resulted in any significant releases of hazardous materials at the subject site. Historical activities could have resulted in minor releases that could contribute to *de minimus* conditions.

- Reviewed records suggest that historical petroleum hydrocarbon impact present in deeper soil and groundwater is likely due a historical release from the former LUST case (Human Society) upgradient of the subject site. The residual petroleum hydrocarbon impact is primarily located within the gravelly sand water-bearing unit at the subject site approximately 13 to 19 ft bgs. However, this likely residual impact is overlain by fine-grained material (low-plasticity dense and stiff silt and clay soil) that is likely containing and mitigating any significant upward vertical migration or intrusion of VOCs beneath the subject site. This conclusion is supported by the recent sampling results, which did not indicate any significant petroleum hydrocarbon impact in subslab gas. Therefore, the historical petroleum hydrocarbon impact does not represent a significant vapor intrusion concern to the current commercial site use or the planned residential site use.

- Limited VOCs were detected during the subslab gas sampling. For the three units with residential conversion planned on the ground floor, no VOCs were detected above the Tier 1 ESL, except for limited chloroform at one location (SS-3, 926 Carleton), detected slightly above its ESL of 4.1 µg/m^3. Chloroform presence is commonly attributed to usage of municipal-supplied water/hot water. The primary COPCs include TCE (detected below the Tier 1 ESL in SS-3) and chloroform and 1,4-dioxane (detected above the Tier 1 ESL in SS-4, located in the ground floor parking area at 924 Carleton).

- Our current conceptual site model is that historic residual petroleum hydrocarbons are adequately contained in deeper soil, and that select chlorinated VOCs (TCE, chloroform, and 1,4-dioxane) are present in shallow soil vapor at relatively low concentrations at probes SS-3 (926 Carleton) and SS-4 (garage/924 Carleton) due to the proximity of the adjacent sanitary sewer (chloroform and 1,4-dioxane) and possibly due to motorcycle storage and light maintenance or other historic activity (TCE).

- Proposed assessment will further evaluate the VOC presence and extent at the subject site. The proposed assessment will evaluate seasonal concentration trends, provide lateral VOC characterization, and enhance Pangea's conceptual site model.

- The above risk calculations and classifications suggest that no VIMMEC elements are warranted to mitigate any identified potential human health risk from vapor intrusion of VOCs into the current commercial units or planned live/work units at the subject site. Pangea recommends consideration of contingent mitigation measures provided above for Units at 924 and 926 Carleton after additional data collection.

7.0 PROPOSED CORRECTIVE ACTIONS

This section describes proposed and contingent corrective action to further characterize and mitigate the potential human health risks at the site prior to redevelopment, as discussed during the ACEHD meeting on June 26, 2024 and revised per the August 14, 2024 ACEHD letter.

7.1 Location and Associated Information on Current Heating and HVAC Systems

The site building contains no HVAC system as such, but includes several wall-mounted heater units, as shown in the floor plan in Appendix G.

7.2 Subslab Gas Sampling

The planned subslab gas sampling involves the following:

- Additional sampling of existing subslab probes SS-1 through SS-4 in units at 930, 928, 926, and 924 Carleton Street, following procedures in the *Subslab Gas Assessment Workplan* (Workplan) dated October 17, 2023, excluding TPHd analysis by TO-17 due to negligible detections during initial sampling.

- Installation and sampling of three additional subslab probes at locations SS-5, SS-6, and SS-7 within the units at 924 and 926 Carleton Street (Figure 3). These probe locations will provide lateral characterization of VOC impact detected at locations SS-3 and SS-4.

Existing and proposed additional sampling locations are shown on Figure 3.

7.3 Indoor and Ambient Air Sampling

The proposed indoor and ambient air sampling involves the following:

- Sampling of indoor air in two northern building units at the three locations shown on Figure 3 (labeled “IA-x”):

    - one indoor air sample in the workshop area on the ground floor of the 926 Carleton unit, near existing subslab gas probe SS-3.

  - one indoor air sample in the building garage in the 924 Carleton unit, between existing subslab gas probe SS-4 and proposed probe SS-5, and one indoor air sample on the second floor of the unit (an occupied area).

- *Contingent* sampling of indoor air at the three locations in the northern building units shown on Figure 3 (labeled "Contingent IA-x"):

  - At the bottom of the stairwell on the ground floor in the 926 Carleton unit, contingent upon results at proposed subslab gas probe SS-6.

  - In the lounge area of the architectural office on the second floor of the 928 Carleton unit, contingent upon results at subslab gas probe SS-2.

  - In the open work area of the architectural office, contingent upon results at subslab gas probe SS-2.

- Sampling of ambient air near the northern building units at the two locations shown on Figure 3 (labeled "AA-x"):

  - One sample in the parking area to the west of the building.

  - One sample in the courtyard to the south of the building.

All air samples will be collected in general accordance with DTSC's October 2011 *Vapor Intrusion Mitigation Advisory* (CalEPA/DTSC, 2011). Indoor air samples will be collected over an 8-hour period using 6-liter, individually certified Summa canisters equipped with 8-hour calibrated flow controllers. Indoor air samples will be collected within the breathing zone at a height of approximately 3 to 5 ft above the floor and collected under conservative building conditions with all doors and windows closed. The outdoor ambient air samples will be collected at a height of approximately 6 ft above grade and at a distance of at least twice the height of the adjacent building, if possible. The ambient air sample canisters will also be placed at least 10 ft beyond the drip line of any trees. Sampling parameters including weather conditions will be documented on an air sampling log. Samples will be transported under chain-of-custody protocol to a California-certified laboratory for analysis of VOCs, including the primary COPCs.

7.4 Proposed/Contingent Mitigation Measures

No mitigation measures are proposed for the units at 928 and 930 Carleton. For 924 and 926 Carleton, Pangea proposes the following:

- Seal penetrations (wet and dry).

For 924 and 926 Carleton, Pangea proposes the following contingent measures:

- Epoxy coating (e.g., RetroCoat) with construction quality assurance (CQA) inspections and reporting.
- Environmental Risk Management Plan and OMM&R Plan.

As discussed in the June 26, 2024 meeting with ACDEH, Pangea plans to submit VIMMEC plans and specifications to ACEHD for approval after the aforementioned additional round of sampling and analysis is conducted.

Notes and Abbreviations:

ft bgs = depth interval below ground surface in feet

TPHg = total petroleum hydrocarbons as gasoline, reported as C5-12 hydrocarbons

TPHd = total petroleum hydrocarbons as diesel, reported as C10-25 hydrocarbons

PCE = tetrachloroethene

TCE = trichloroethene

DCE = dichloroethene

VOCs = volatile organic compounds by EPA Method TO-15

ug/m^3 = micrograms per cubic meter

Values shown in **bold** indicate concentrations detected above the laboratory reporting limit.

Cells highlighted green indicate concentrations detected above the *residential* soil gas ESL for vapor intrusion.

Cells highlighted gray indicate concentrations detected above the residential and *commercial* soil gas ESL for vapor intrusion.

< n = chemical not present at a concentration in excess of detection limit shown

a = other analytes detected above laboratory reporting limits, including one or more of the following without an established ESL or detected well below the ESL: 1,2,4-trimethylbenzene, 1,3,5-trimethylbenzene , 2,2,4-trimethylpentane, 2-butanone (MEK), 2-propanol, 4-ethyltoluene, chlorobenzene, chloromethane, cyclohexane, dichlorodifluoromethane, ethanol, heptane, n-hexane, tetrahydrofuran, trichlorofluoromethane

ESL = Environmental Screening Level for subslab/shallow soil gas. Established by the SFBRWQCB, Interim Final - January 2019.

* = sample received broken at lab

-- = not analyzed, not applicable, and/or not available

SUBJECT: Conditional Clearance for Entitlement and Request for Submittal of a *Revised Investigation Report and Proposed Corrective Action Plan*
Cleanup Program Site Case No. RO000361
GeoTracker Global ID T10000021302
Carleton Street Conversion
928 Carleton Street, Berkeley, CA 94710

Dear Responsible Parties:

On August 14, 2023, Alameda County Environmental Health Department (ACEHD) received a *Phase I Screening Application* from the City of Berkeley Planning & Development Department due to the submittal of an entitlement application for the proposed conversion of four commercial units located at the subject site from commercial condos to live/work units. The City of Berkeley Planning & Development Department referred the *Phase I Screening Application* to ACEHD due to a former Leaking Underground Storage Tank (LUST) Cleanup Site Case No. 01-0281 (Carleton Business Center) overseen by the Regional Water Quality Control

Environmental Health Department
Alameda County Health

Board and City of Berkeley that was closed with documented petroleum contamination in soil and groundwater on March 6, 1992, as a vacant undeveloped lot. The four commercial condos (Units 924, 926, 928, and 930) are part of a larger development (the "Site") consisting of two buildings designated as the "Northern Building" and "Southern Building" and an associated common area and parking lot. Each building consists of a total of four units with the Northern Building currently operating a commercial condo to be converted into live/work units and the Southern Building operating as live/work units. Information regarding the units in the Northern and Southern Buildings including the associated unit identification and/or address and assessor parcel number (APN) is listed below.

Northern Building

- Unit 924 - 924 Carleton Street, Berkeley; APN: 54-1747-27
- Unit 926 - 926 Carleton Street, Berkeley; APN: 54-1747-26
- Unit 928 - 928 Carleton Street, Berkeley; APN: 54-1747-25
- Unit 930 – 930 Carleton Street, Berkeley; APN: 54-1747-24

Southern Building

- 2700 8th Street, Berkeley; APN: 54-1747-28
- 2702 8th Street, Berkeley; APN: 54-1747-29
- 2704 8th Street, Berkeley; APN: 54-1747-30
- 2706 8th Street, Berkeley; APN: 54-1747-31

ACEHD understands the Site was redeveloped with its current configuration of commercial condos (Northern Building) and live/work units (Southern Building) in 2000 without regulatory review of risk to occupants of the new development from subsurface contamination.

Subsequent to ACEHD's review of the *Phase I Screening Application* from the City of Berkeley Planning & Development Department, a kick-off teleconference call meeting was conducted on September 22, 2023, with ACEHD and property owners from Units 928 and 930 of the Northern Building. During the meeting and based on ACEHD review of the available documents, Cleanup Program Site (CPS) Case No. RO0003607 was opened with a status of a "non-case" pending collection of subsurface soil vapor data to evaluate potential vapor intrusion risk under the proposed conversion of the Northern Building to live/work and the existing land-use of live/work in the Southern Building. During the September 2023 meeting, ACEHD requested retainment of an environmental consultant and submittal of a brief *Work Plan* for the advancement of sub-slab soil vapor probes within each unit of the Northern Building.

Subsequent to the September 22, 2023, meeting, property owners from the Northern Building retained an environmental consultant and the *Sub-Slab Gas Assessment Work Plan*, dated October 17, 2023, prepared on behalf of the property owner for Unit 928 by Pangea Environmental Services, Inc (Pangea)

was submitted for ACEHD review and concurrence. In an email dated November 2, 2023, ACEHD provided concurrence of the *Sub-Slab Gas Assessment Work Plan* to collect soil vapor samples beneath each unit of the North Building and requested submittal of draft data followed by a *Technical Report* documenting results of the investigation. Draft data results were submitted on March 4, 2024, to ACEHD for discussion purposes and documented the detection of volatile organic compounds (VOC) chemicals of concern (COCs) in soil vapor including trichloroethene (TCE), chloroform, and 1,4, dioxane beneath the units of the Northern Building. On April 30, 2024, a teleconference call was conducted with all the property owners associated with the units of the Northern Building, Pangea, and ACEHD to discuss the draft data results. During the meeting ACEHD indicated the status of the CPS Case No RO0003607 would be changed to "open – site assessment" and requested execution of a Voluntary Remedial Action Agreement (VRAA) between the four individual property owners of the Northern Building and ACEHD. Execution of the VRAA was conducted on May 29, 2024.

On July 16, 2024, the ACEHD-requested *Technical Report*, the *Investigation Report and Proposed Corrective Actions*, dated July 12, 2024, prepared on behalf of all four property owners of the Northern Building by Pangea was submitted to the case file on GeoTracker for ACEHD for review. The *Investigation Report and Proposed Corrective Actions* documents subsurface investigations conducted at the Site on November 28, 2023, and contingent conceptual level corrective actions to be implemented subsequent to the evaluation of additional sub-slab soil vapor sampling conducted within the Northern Building.

ACEHD has reviewed the case files for the former LUST Cleanup Site Case No. 01-0281 and active CPS Case No. RO0003607 including the following documents:

- *Investigation Report and Proposed Corrective Actions*, dated July 12, 2024, and prepared on behalf of all four property owners of the Northern Building by Pangea;
- *Architectural Plan Set* (the "*Arch Plan Set*"), dated June 28, 2023; and prepared by Devi Dutta Architecture Inc.; and
- *Phase I Environmental Transaction Screen* (the "*Phase I ESA*"), dated July 5, 2027, prepared on behalf of Bank of the West by AEI Consultants.

The above listed documents present a summary of site investigations, COCs in soil, groundwater, and soil vapor, a conceptual outline of proposed vapor intrusion mitigation and migration engineering control (VIMMEC) measures that could be implemented, if warranted, based on further sub-slab vapor data collection; and architectural plans for the conversion of the Northern Building from four commercial condos to four live/work units.

ACEHD FINDINGS

Based on ACEHD's review of the above listed documents, ACEHD is of the opinion that installation and long-term stewardship of VIMMECs will mitigate potential vapor intrusion risk to the future residential occupants of the Northern Building units. Therefore, ACEHD has no objection to the City of Berkeley Planning & Development Department approving the planning application for the conversion of the Northern Building commercial units to live/work units, provided ACEHD comments listed below are included in the conditions of approval:

- Further soil vapor sampling is required to evaluate the vapor intrusion risk and the VIMMEC components within the units of the Northern Buildings (e.g., barrier, ventilation system, conduit seals, and trench dams).

- VIMMECs will be required to be installed within Northern Building units where sub-slab soil vapor concentrations exceed the January 2019 San Francisco Bay Regional Water Quality Controls Board's environmental screening levels (ESLs) for residential vapor intrusion risk during conversion of the Northern Building commercial units to live/work units.

- *VIMMEC Plans and Specifications* will be required to be submitted to ACEHD for review and approval utilizing the City of Berkeley Building Department *Permit Application Plan Set* for the Northern Building live/work unit conversions.

- Long-term stewardship of the environmental engineering controls will be required to be submitted to ACEHD for review and approval including recordation of a *Covenant and Environmental Restriction on Property*; submittal of administrative control documents (including *Environmental Risk Management Plan*, *VIMMEC Operations, Maintenance, Monitoring and Reporting Plan* [the "*OMM&R Plan*"], and financial assurance instrument); and submittal of *OMM&R Compliance Reports* to ACEHD.

ACEHD notes that further evaluation of the Southern Building and common area and parking lot is warranted to evaluate vapor intrusion risk to occupants of the Southern Building under the current configuration as live/work units and to construction/utility workers in the common area and parking lot of the Site.

LIST OF DELIVERABLES AND COMPLIANCE DATES

ACEHD requests that you prepare the deliverables in accordance with the requirements provided below and submit them to the State Water Resources Control Board's GeoTracker website in compliance with the requirements identified in ACEHD's *Responsible Party(ies) Legal Requirement/Obligations Instructions* included as ***Attachment 1***. ACEHD also requests email notification verifying upload of the requested deliverables to the Case file on GeoTracker be provided to the primary caseworker, Drew York (andrew.york@acgov.org).

1. **REVISED INVESTIGATION REPORT AND PROPOSED CORRECTIVE ACTION PLAN**

   a. **Deliverable:** *Revised Investigation Report and Proposed Corrective Action Plan*
   Compliance Date: Friday, September 13, 2024
   File Name: RO3527_ SWI_CR_WP_YYYY-MM-DD

   Section 7.0 of the *Investigation Report and Proposed Corrective Actions* proposes the sampling of existing sub-slab vapor probes SS-1 through SS-4 located in the four units of the Northern Building; and the installation and sampling of three additional sub-slab vapor probes (SS-5 through SS-7) in Units 924 and 926 of the Northern Building in accordance with

Environmental Health Department
Alameda County Health

procedures outlined in the *Sub-Slab Gas Assessment Work Plan*, dated October 17, 203 and conditionally concurred by ACEHD in a email dated November 3, 2023. However, prior to approving the scope of work presented in the *Investigation Report and Proposed Corrective Actions* including the installation and sampling of three additional sub-slab vapor probes (SS-5 through SS-7), ACEHD requests submittal of a *Revised Investigation Report and Proposed Corrective Action Plan* that includes the following:

I. Figure(s) illustrating both the existing and proposed conversion components within each of the units in the Northern Building including but not limited to kitchens, sinks, partition walls, etc.;

II. Figure(s) illustrating the existing and proposed utility alignment(s) beneath each of the units in the Northern Building;

III. Figure(s) and the addition of a *Work Plan Section* discussing the location and associated information on the current heating, ventilation, and air conditioning (HVAC) systems in each of the Northern Building units (including the garage ventilation system in Unit 924); and

IV. Figure(s) and the addition of a *Work Plan Section* proposing the concurrent sample collection of indoor and ambient air and sub-slab vapor samples in Units where COC soil vapor concentrations exceed the January 2019 San Francisco Bay Regional Water Quality Controls Board's environmental screening levels (ESLs) for residential vapor intrusion risk.

CLOSING

Thank you for your cooperation. If you have any questions, please call me at (510) 639-1276 or send me an email message at andrew.york@acgov.org

Sincerely,

Drew J. York

Alameda County Environmental Cleanup Oversight Programs (LOP and SCP)	**REVISION DATE:** May 19, 2020
	ISSUE DATE: July 25, 2012
	PREVIOUS REVISIONS: September 17, 2013, May 15, 2014, December 12, 2016, December 14, 2017
SECTION: ACDEH Procedures	**SUBJECT:** Responsible Party(ies) Legal Requirements / Obligations

REPORT & DELIVERABLE REQUESTS

Alameda County Department of Environmental Health (ACDEH) Cleanup Oversight Programs, Local Oversight Program (LOP) and Site Cleanup Program (SCP) require submission of all reports in electronic form to the State Water Board's (SWB) GeoTracker website in accordance with California Code of Regulations, Title 23, Chapter 30, Division3, Article 2, Section 3892 and Chapter 16, Article 11, Division 3.

Leaking Underground Fuel Tank (LUFT) Cases

Reports and deliverable requests are pursuant to California Health and Safety Code Section 25296.10. 23 CCR Sections 2652 through 2654, and 2721 through 2728 outline the responsibilities of a responsible party (RP) in conjunction with an unauthorized release from a petroleum underground storage tank (UST) system.

Site Cleanup Program (SCP) Cases

For non-petroleum UST cases, reports and deliverables requests are pursuant to California Health and Safety Code Section 101480.

ELECTRONIC SUBMITTAL OF REPORTS

A complete report submittal includes the PDF report and all associated electronic data files, including but not limited to GEO_MAP, GEO_XY, GEO_Z, GEO_BORE, GEO_WELL, and laboratory analytical data in Electronic Deliverable Format™ (EDF). Additional information on these requirements is available on the State Water Board's website (http://www.waterboards.ca.gov/water_issues/programs/ust/electronic_submittal/)

- Do not upload draft reports to GeoTracker
- Rotate each page in the PDF document in the direction that will make it easiest to read on a computer monitor.

GEOTRACKER UPLOAD CERTIFICATION

Each report submittal is to include a GeoTracker Upload Summary Table with GeoTracker valid values[1] as illustrated in the example below to facilitate ACDEH review and verify compliance with GeoTracker requirements.

GeoTracker Upload Table Example

Alameda County Environmental Cleanup Oversight Programs (LOP and SCP)	**REVISION DATE:** NA
	ISSUE DATE: December 14, 2017
	PREVIOUS REVISIONS: September 17, 2013, May 15, 2014, December 12, 2016
SECTION: ACDEH Procedures	**SUBJECT:** Responsible Party(ies) Legal Requirements / Obligations

ACKNOWLEDGEMENT STATEMENT

All work plans, technical reports, or technical documents submitted to ACDEH must be accompanied by a cover letter from the responsible party that states, at a minimum, the following: "I have read and acknowledge the content, recommendations and/or conclusions contained in the attached document or report submitted on my behalf to the State Water Board's GeoTracker website." This letter must be signed by the Responsible Party, or legally authorized representative of the Responsible Party.

PROFESSIONAL CERTIFICATION & CONCLUSIONS/RECOMMENDATIONS

The California Business and Professions Code (Sections 6731, 6735, and 7835) requires that work plans and technical or implementation reports containing geologic or engineering evaluations and/or judgments be performed under the direction of an appropriately licensed or certified professional and include the professional registration stamp, signature, and statement of professional certification. Additional information is available on the Board of Professional Engineers, Land Surveyors, and Geologists website at: http://www.bpelsg.ca.gov/laws/index.shtml.

UNDERGROUND STORAGE TANK CLEANUP FUND

For LUFT cases, RP's non-compliance with these regulations may result in ineligibility to receive grant money from the state's Underground Storage Tank Cleanup Fund (Senate Bill 2004) to reimburse the cost of cleanup. Additional information is available on the internet at: https://www.waterboards.ca.gov/water_issues/programs/ustcf/

AGENCY OVERSIGHT

Significant delays in conducting site assessment/cleanup or report submittals may result in referral of the case to the Regional Water Board or other appropriate agency, including the County District Attorney, for possible enforcement actions. California Health and Safety Code, Section 25299.76 authorizes enforcement including administrative action or monetary penalties of up to $10,000 per day for each day of violation.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at approximately five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1920 through current. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 660 feet of the target property.

Summary information obtained is provided in the text of this report.

RECORD SOURCES

The EDR City Directory Report accesses a variety of business directory sources, including Haines, InfoUSA, Polk, Cole, Bresser, and Stewart. Listings marked as EDR Digital Archive access Cole and InfoUSA records. The various directory sources enhance and complement each other to provide a more thorough and accurate report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E1527 - 21), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E2247 - 16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E1528 - 22) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE: SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

A review of the SEMS-ARCHIVE list, as provided by EDR, and dated 04/22/2024 has revealed that there are 5 SEMS-ARCHIVE sites within approximately 0.5 miles of the target property.

EPA Id: CAD070148457

Lists of Federal RCRA generators

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 06/03/2024 has revealed that there are 5 RCRA-LQG sites within approximately 0.25 miles of the target property.

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 06/03/2024 has revealed that there are 15 RCRA-SQG sites within approximately 0.25 miles of the target property.

RCRA-VSQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

A review of the RCRA-VSQG list, as provided by EDR, and dated 06/03/2024 has revealed that there are 2 RCRA-VSQG sites within approximately 0.25 miles of the target property.

Lists of state- and tribal (Superfund) equivalent sites

RESPONSE: Identifies confirmed release sites where DTSC is involved in remediation, either in a lead or oversight capacity. These confirmed release sites are generally high-priority and high potential risk.

A review of the RESPONSE list, as provided by EDR, has revealed that there are 9 RESPONSE sites within approximately 1 mile of the target property.

Lists of state- and tribal hazardous waste facilities

ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State

EXECUTIVE SUMMARY

Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the ENVIROSTOR list, as provided by EDR, and dated 01/22/2024 has revealed that there are 34 ENVIROSTOR sites within approximately 1 mile of the target property.

Lists of state and tribal leaking storage tanks

LUST: Leaking Underground Storage Tank (LUST) Sites included in GeoTracker. GeoTracker is the Water Boards data management system for sites that impact, or have the potential to impact, water quality in California, with emphasis on groundwater.

A review of the LUST list, as provided by EDR, has revealed that there are 47 LUST sites within approximately 0.5 miles of the target property.

CPS-SLIC: Cleanup Program Sites (CPS; also known as Site Cleanups [SC] and formerly known as Spills, Leaks, Investigations, and Cleanups [SLIC] sites) included in GeoTracker. GeoTracker is the Water Boards data management system for sites that impact, or have the potential to impact, water quality in California, with emphasis on groundwater.

A review of the CPS-SLIC list, as provided by EDR, has revealed that there are 23 CPS-SLIC sites within approximately 0.5 miles of the target property.

Lists of state and tribal registered storage tanks

UST: The Underground Storage Tank database contains registered USTs. USTs are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA). The data come from the State Water Resources Control Board's Hazardous Substance Storage Container Database.

A review of the UST list, as provided by EDR, has revealed that there is 1 UST site within approximately 0.25 miles of the target property.

EXECUTIVE SUMMARY

Local Lists of Registered Storage Tanks

SWEEPS UST: Statewide Environmental Evaluation and Planning System. This underground storage tank listing was updated and maintained by a company contacted by the SWRCB in the early 1990's. The listing is no longer updated or maintained. The local agency is the contact for more information on a site on the SWEEPS list.

A review of the SWEEPS UST list, as provided by EDR, and dated 06/01/1994 has revealed that there are 13 SWEEPS UST sites within approximately 0.25 miles of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 06/03/2024 has revealed that there are 82 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

FUDS: The Listing includes locations of Formerly Used Defense Sites Properties where the US Army Corps Of Engineers is actively working or will take necessary cleanup actions.

A review of the FUDS list, as provided by EDR, and dated 01/30/2024 has revealed that there are 2 FUDS sites within approximately 1 mile of the target property.

PFAS ECHO: Regulators and the public have expressed interest in knowing which regulated entities may be using PFAS. EPA has developed a dataset from various sources that show which industries may be handling PFAS. Approximately 120,000 facilities subject to federal environmental programs have operated or currently operate in industry sectors with processes that may involve handling and/or release of PFAS.

A review of the PFAS ECHO list, as provided by EDR, and dated 12/28/2023 has revealed that there are 11 PFAS ECHO sites within approximately 0.25 miles of the target property.

EXECUTIVE SUMMARY

PFAS: A listing of PFAS sites included in the Envirostor and GeoTracker databases. Locations of potential sources of per - and polyfluoroalkyl substances (PFAS). This does not mean that PFAS has been produced, used, or discharged at these sites.

A review of the PFAS list, as provided by EDR, and dated 03/04/2024 has revealed that there is 1 PFAS site within approximately 0.25 miles of the target property.

CHROME PLATING: This listing represents chrome plating facilities the California State Water Resources Control Board staff identified as possibly being a source of Per- and polyfluoroalkyl substance (PFAS) contamination. Sites and locations were identified by staff with the Division of Water Quality in the California State Water Board. Data was collected from the CA Air Resources Board 2013 and 2018 - Cr VI emission survey, CA Emission Inventory, CA HAZ Waste discharge database and by reviewing storm water permits. Former chrome plating sites are also included that are open site investigation or remediation cases with the Regional Water Quality Control Boards and the Department of Toxic Substances Control.

A review of the CHROME PLATING list, as provided by EDR, and dated 03/04/2024 has revealed that there is 1 CHROME PLATING site within approximately 0.5 miles of the target property.

EXECUTIVE SUMMARY

UST FINDER RELEASE: US EPA's UST Finder data is a national composite of leaking underground storage tanks. This data contains information about, and locations of, leaking underground storage tanks. Data was collected from state sources and standardized into a national profile by EPA's Office of Underground Storage Tanks, Office of Research and Development, and the Association of State and Territorial Solid Waste Management Officials.

A review of the UST FINDER RELEASE list, as provided by EDR, and dated 06/08/2023 has revealed that there are 39 UST FINDER RELEASE sites within approximately 0.5 miles of the target property.

EXECUTIVE SUMMARY

E MANIFEST: EPA established a national system for tracking hazardous waste shipments electronically. This system, known as ?e-Manifest,? will modernize the nation?s cradle-to-grave hazardous waste tracking process while saving valuable time, resources, and dollars for industry and states.

A review of the E MANIFEST list, as provided by EDR, and dated 07/24/2023 has revealed that there are 52 E MANIFEST sites within approximately 0.25 miles of the target property.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there is 1 EDR Hist Auto site within approximately 0.125 miles of the target property.

Site Name:	CONSOLIDATED PRINTERS, INC.
Violation Date:	01-12-2017
Citation:	40 CFR 1 262.34(d)(5)(ii) - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 262.34(d)(5)(ii)
Violation Description:	Failure to post the following information next to the telephone: (A) The name and telephone number of the emergency coordinator; (B) Location of fire extinguishers and spill control material, and, if present, fire alarm; and (C) The telephone number of the fire department, unless the facility has a direct alarm.
Violation Notes:	Returned to compliance on 02/08/2017. Corrective Action: Complete emergency postings template provided by TMD and post.
Violation Division:	Berkeley City Toxics Management Division
Violation Program:	HW
Violation Source:	CERS,
Site ID:	107798
Site Name:	CONSOLIDATED PRINTERS, INC.
Violation Date:	01-12-2017
Citation:	22 CCR 12 66262.34(f) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(f)
Violation Description:	Failure to properly label hazardous waste accumulation containers and portable tanks with the following requirements: "Hazardous Waste", name and address of the generator, physical and chemical characteristics of the Hazardous Waste, and starting accumulation date.
Violation Notes:	Returned to compliance on 01/28/2017. Generator did not properly label all containers containing hazardous waste in that the accumulation start dates were absent and buckets of waste did not have names of waste. Corrective Action: For the 55-gal waste drums, always mark accumulation start dates when accumulation begins. For the 3-gal waste buckets, properly label like the 55-gal drums. If waste is transfered to drums as soon as it is generated, then the accumulation start dates is not necessary on buckets.

Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: Haz Mat: Hazardous materials are kept in th chemical storage room and also throughout the facility, as needed for certain projects. Hazardous materials are consistenet with the inventory provided on CERS and are properly labeled. Safety: Fire extinguishers are up to date and will be due for servicing in March 2017. Emergency station with phone numbers and phone was not available. Records: Complete training records were not available. Only the 2015 training records were available, the content of that training were compliant. Manifests were not properly maintained in that only the generator initial copy was kept. There were no records for any shipment of hazardous waste within the last 180 days - the last manifest available was from 9-7-14. Property owner is aware of the presence of hazardous materials, but no formal notification of compliance with the HMBP requirements was provided. Storm Water: The only outside activity is loading and unloading- which is sometimes done [Truncated]

Eval General Type: Compliance Evaluation Inspection
Eval Date: 07-07-2023
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: Met Roberto on-site to conduct a routine hazardous waste inspection. Facility is a small quantity generator. Facility has had a difficult time getting a hazardous waste hauler to come to their site to help them dispose of their waste. Waste is accumulating in large quantities and has been on-site for too long. Waste needs to be disposed of as is detailed in the violation section of this report. A list of waste disposal companies that service Berkeley was attached to this report. Spill equipment appeared to be in good order.

Citation:	22 CCR 12 66262.40(c) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.40(c)
Violation Description:	Failure to determine if the waste generated is a hazardous waste and to maintain analysis results for three years.
Violation Notes:	Returned to compliance on 06/02/2014. Fire debris waste observed in and around facility, impacted stormdrain inlet on-site, no significant residue at face of curb where discharge exits site (appears clogged).
Violation Division:	Berkeley City Toxics Management Division
Violation Program:	HW
Violation Source:	CERS,

Site ID:	419281
Site Name:	Fire Cause Analysis
Violation Date:	02-15-2019
Citation:	22 CCR 12 66262.23(a) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.23(a)
Violation Description:	Failure to properly complete the Uniform Hazardous Waste Manifest.
Violation Notes:	Returned to compliance on 02/28/2019. The facility is using a temporary EPA ID number, CAC002839482, on the hazardous waste manifests for the shipment of hazardous waste in 2016, 2017 and 2018. The temporary EPA ID numbers are only for businesses who do not normally handle hazardous waste. This facility is routinely generating hazardous waste. Corrective action: Submit a manifest correction letter to DTSC for each of the manifests that list the incorrect EPA ID number. All future shipments of hazardous waste must be made using the permanent EPA ID number.

Violation Division: Berkeley City Toxics Management Division
Violation Program: HW
Violation Source: CERS,

Site ID: 419281
Site Name: Fire Cause Analysis
Violation Date: 02-15-2019
Citation: HSC 6.95 25507 - California Health and Safety Code, Chapter 6.95, Section(s) 25507
Violation Description: Failure to adequately establish and implement a business plan when storing/handling a hazardous material at or above reportable quantities.
Violation Notes: Returned to compliance on 02/28/2019. TMD observed 3, 20 lb cylinders of propane onsite. These cylinders contain approximately 160 cubic feet of propane each. Businesses are required to establish and implement a Hazardous Materials Business Plan when storing/handling hazardous materials, including hazardous waste, at or above aggregate quantities of 500 pounds or more of all solid hazardous materials and waste; 55 gallons or more of all liquid hazardous materials and wastes; or 200 cubic feet or more at standard temperature and pressure of all gaseous hazardous materials. The HMBP must be submitted, electronically, in the California Environmental Reporting System (CERS), at the time the business begins operations, or at the time it first begins to handle a hazardous material or waste that must be disclosed. Corrective action: Facility may decrease storage to below registration thresholds and provide confirmation to TMD, or you shall create an account in the CERS Business Portal, [Truncated]

corrected on site.
Violation Division: Berkeley City Toxics Management Division
Violation Program: HW
Violation Source: CERS,

Site ID: 419281
Site Name: Fire Cause Analysis
Violation Date: 02-15-2019
Citation: 22 CCR 12 66262.34(e) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(e)
Violation Description: Failure to meet the following conditions of satellite accumulation regulations: Accumulate up to 55 gallons of hazardous waste or one quart of acute hazardous waste at or near the initial point of accumulation which was under the control of the operator. Total time hazardous waste can be accumulated onsite in any generator accumulation area is one year, i.e., the combined accmulation time at a satellite accumulation point and at a 90/180/270 accumulation area (depending on size of generator and distance transported), whichever comes first. The generator complies with section 66265.171, 66265.172, and 66265.173(a). The container must be clearly marked with the initial date that hazardous waste is first placed in the container and labelled with the words Hazardous Waste including specified information Container must be labelled with the date the satellite accumulation limit is reached and moved within three days after reaching the 55 gallon (or one quart) limit to a 90 day accumulation area 55 gallons (or one quart of acute hazardous waste) of waste per process may be accumulated
Violation Notes: Returned to compliance on 02/28/2019. The 55 gallon drum of waste fire debris is labeled as hazardous waste, but is not labeled with the name and address of the generator, contents, physical state, hazard properties and accumulation start date. Corrective action: Label the hazardous waste drum with the name and address of the generator, contents, physical state, hazard properties and accumulation start date.

FIRE CAUSE ANALYSIS (Continued) **S120987280**

Violation Description: Failure to determine the status of any hazardous waste if a signed copy of the manifest isn t received within 35 days of the date the waste was accepted by the initial transporter and/or to submit an Exception Report to DTSC if a signed copy of the manifest isn t received within 60 days of the date the waste was accepted by the initial transporter.
Violation Notes: Returned to compliance on 02/28/2019. The designated facility to generator copy of manifest 018138978JJK is not onsite. Corrective action: Contact the transporter of the designated facility to obtain a copy of the manifest.
Violation Division: Berkeley City Toxics Management Division
Violation Program: HW
Violation Source: CERS,

Evaluation:
Eval General Type: Compliance Evaluation Inspection
Eval Date: 03-07-2016
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: Routine hazardous waste only, Stormwater and complaint follow up inspection. Burned vehicles left uncovered during initial visit, RP (Kyle Binkowski) agreed to completely cover the vehicles upon receiving them or to place them inside the warehouse. See inspection report for further details.
Eval Division: Berkeley City Toxics Management Division
Eval Program: HW
Eval Source: CERS,

Eval General Type: Other/Unknown
Eval Date: 04-21-2014
Violations Found: Yes
Eval Type: Other, not routine, done by local agency
Eval Notes: Facility elected to remove gases from their place of business, thus reducing their chemical inventory to below threshold reporting quantities per BMC or HSC 6.95.
Eval Division: Berkeley City Toxics Management Division
Eval Program: HMRRP
Eval Source: CERS,

Eval General Type: Other/Unknown
Eval Date: 04-30-2014
Violations Found: No
Eval Type: Other, not routine, done by local agency
Eval Notes: observed small volume of liquid material, flammable solvent and some acid, stored in cabinet below fume hood. Below reporting threshold.
Eval Division: Berkeley City Toxics Management Division
Eval Program: HMRRP
Eval Source: CERS,

Eval General Type: Compliance Evaluation Inspection
Eval Date: 08-25-2022
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: On site for a routine hazardous waste inspection. Facility is a very small quantity generator. Facility hasn't generated enough hazardous waste (fire debris/ashes) to have a pick-up. Generator s ID number CAL000397769 is active. Walked the facility, including the dumpster

L. J. KRUSE CO. (Continued) **S121781582**

Eval General Type: Compliance Evaluation Inspection
Eval Date: 11-16-2023
Violations Found: No
Eval Type: Routine done by local agency
Eval Notes: Arrived on site with Karl Etulle of TMD to conduct a routine inspection of L. J. Kruse Company to evaluate the facility's with the Hazardous Waste Generator (HWG) program. EPA ID Nmber CAL000336391 was inactive at the time of inspection and expired on 6/30/2015. Operator should complete DTSC Form 1358 and email it to IDNUMBER@dtsc.ca.gov to reactivate their EPA ID Number. TMD met with Ben Kruse, Vice President. Per Kruse, the facility generates very little hazardous waste and has not had a pickup in a while. No manifests were available for review. Facility has not accumulated more than 100 kilograms of waste, operator was instructed to comply with the 180 day accumulation time limit once 100 kilograms of waste is accumulated on site. At the time of inspection, TMD observed the following waste streams: - 30 gallon drum of used oil - 5 gallon bucket of used oil

Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: EPA ID # is inactive, however shipments have not been made since 2015. Assure that when a hazardous waste is shipped off, the EPA ID, CAL 000 336 391, is active. Universal waste is stored in boxes and shipped off about every two months. visual inspections of haz waste and haz mat areas are conducted. Fire extinguishers are up to date. Hazardous waste drum is 30 gal max capacity. Had about 7 gallons of liquid or less at time of inspection. Once 27 gallons is reached, generator must ship off within 180 days. Drum had non-RCRA waste, solid(oily debris, absorbents), last pick up 8/25/15. Onsite 8/9/17 to complete SW and Green Business inspections.

Eval Notes: Arrived on site with Karl Etulle of TMD to conduct a routine inspection of L. J. Kruse Company to evaluate the facility's compliance with the Hazardous Materials Business Plan (HMBP) program. L. J. Kruse Company is a plumbing fabrication facility that has various compressed gases, paints, and oils on site. Met with Ben Kruse, Vice President. Began inspection by reviewing the Business Owner Operator Identification information submitted to CERS. Kruse confirmed that all information listed was correct and up to date. Kruse then escorted us through the facility to verify the hazardous materials inventory. TMD observed various refrigerants (UN3163 Pentafluorane - Difluoromethane, Forane R410A) that were not reported in the inventory. Facility also appeared to be over-reporting the quantities of other compressed gases. Kruse was instructed to submit an updated hazardous materials inventory to cers.calepa.ca.gov within 30 days of report issuance. Concluded inspection by [Truncated]

Background Info:	The Colgate-Palmolive Company plant (10.4 acres) in Berkeley, produced soaps, and personal and household cleaning products from 1916 until 1981. It consisted of 27 buildings, a tank farm, several individual storage tanks, and other structures. Colgate-Palmolive Company was issued an Interim Status Document in April 6, 1981. In October 1981 the Colgate-Palmolive plant ceased operation at the site.

Citation: 22 CCR 15 66265.173 - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.173
Violation Description: Failure to properly close hazardous waste containers when not in active use.
Violation Notes: Returned to compliance on 05/20/2015. At the Landis grinder, solids accumulate in the reservoir of the machine. Facility has an open tray that sits below the opening of this reservoir to catch the overflow and allow the operator to shovel out the sludge. The sludge in this tray is transferred to a hazardous waste drum a couple times per month, according to Aaron. Sludge in process equipment is not considered to be generated until the waste is removed from the equipment. TMD does not consider the open tray part of the equipment and considers the tray an in-process container, which would not need to be closed during working hours. The hazardous waste should be transferred to a closed and properly labeled hazardous waste container at the end of working hours, or the tray can be managed as the hazardous waste container and be labeled and closed, along with compliance for accumulation time limits.
Violation Division: Berkeley City Toxics Management Division
Violation Program: HWLQG
Violation Source: CERS,

Site ID: 114204
Site Name: ELECTRO-COATINGS OF CALIFORNIA INC
Violation Date: 04-09-2015
Citation: 22 CCR 15 66265.31 - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.31
Violation Description: Failure to maintain and operate the facility to minimize the possibility of a fire, explosion, or any unplanned sudden or non-sudden release of hazardous waste or hazardous waste constituents to the air, soil, or surface water which could threaten human health or the environment.
Violation Notes: Returned to compliance on 05/20/2015. TMD observed, during the inspection, blasting media on ground around sand blast room and out to the loading area of the building. TMD observed square holes in the side of the sand blast room through which a hose runs through. These holes are larger than the hose, and the accumulation of sand blast media below the hole appears to indicate this is a source of release of media from the room. The blasting media is collected and managed as hazardous waste, non-RCRA hazardous waste (hopper dust). Generator failed to maintain and operate facility in a manner to protect against/prevent any unplanned release to air, soil or surface water. Corrective action: Immediately clean up the area around the sand blast room and manage in accordance with hazardous waste regulations.

ELECTRO-COATINGS OF CALIFORNIA INC (Continued) **S112999590**

Provide TMD with a plan outlining how the facility will change its operation to minimize the possibility of the release of blasting media.

Violation Program: HWLQG
Violation Source: CERS,

Site ID: 114204
Site Name: ELECTRO-COATINGS OF CALIFORNIA INC
Violation Date: 04-09-2015
Citation: HSC 6.5 25143.9 - California Health and Safety Code, Chapter 6.5, Section(s) 25143.9

Violation Description: Failure to meet the following requirements of excluded recyclable materials: 1) Used or reused as an ingredient in an industrial process to make a product if the material is not being reclaimed, 2) Used or reused as a safe and effective substitute for commercial products if the material is not being reclaimed, 3) Returned to the original process from which the material was generated, without first being reclaimed, if the material is returned as a substitute for raw material feedstock, and the process uses raw materials as principal feedstocks, 4) The material is recycled and used at the same facility at which the material was generated, or by the same corporate entity, 5) The material is recycled within the applicable generator accumulation time, 6) The material is managed in accordance with all applicable requirements for generators of hazardous wastes, 7) If the material is held in a container or tank, the container or tank is labeled, marked, and placarded in accordance with the department's hazardous waste labeling, marking, and placarding requirements which are applicable to generators, except that the container or tank shall be labeled or marked clearly with the words "Excluded Recyclable Material" instead of the words "Hazardous Waste," 8) If the material is used oil, the containers, aboveground tanks, and fill pipes used to transfer oil into underground storage tanks shall also be labeled and clearly marked with the words "Used Oil", 9) The owner or operator of the business location where the material is located has a business plan that meets the following minimal requirements: emergency response plans and procedures, which specifically address the material or that meets the emergency response and contingency requirements which are applicable to generators of hazardous waste, and 10) The material shall be stored and handled in accordance with all local ordinances and codes.

Violation Notes: Returned to compliance on 05/20/2015. At the Mesta grinder, Cimtech 46C, a metal working fluid is conveyed from the grinder through a filter and into a tray below that captures the liquid and returns it to the machine. The sludge and filter are transferred to a hazardous waste container and managed as non-RCRA hazardous waste (grinding sludge). This material meets the recycling exemption of HSC 25143.9. However, the facility has not complied with the requirements of HSC 25143.9 in that the tank/tray is not labeled in accordance with generator requirements except that the tank shall be labeled with the words "Excluded Recyclable Material" instead of the words hazardous waste.

Eval Type: Routine done by local agency
Eval Notes: Arrived on site with Karl Etulle of TMD to conduct a routine inspection of Electro-Coatings of California Inc. to evaluate the facility's compliance with the Hazardous Waste Generator program. Facility reconditions parts for paper and steel industries, and generates large quantities of RCRA hazardous waste. EPA ID Number CAD009116211 was active at the time of inspection. Met with Aaron Plechaty, General Manager. Facility is equipped with various emergency response equipment including: eyewashes, showers, multiple fire extinguishers (last serviced 11/1/2023), and spill kits. Enhanced Emergency Response postings were readily visible throughout the facility. Observed the following waste streams: - Five ~120 gallon totes of benzene sulfonic acid, 3-nitro sodium salt, carbonic acid waste (accumulation start date 11/15/23) - 55 gallon drum of nickel filter/debris solid (accumulation start date 10/26/23) - Two 55-gallon

Eval General Type: Compliance Evaluation Inspection
Eval Date: 12-05-2022
Violations Found: No
Eval Type: Routine done by local agency
Eval Notes: Toxics Management Division (TMD) was on-site to conduct routine Hazardous Materials Business Plan (HMBP), Large Quantity Generator (RCRA-LQG), and Stormwater (SW) inspections. Facility reconditions metal rubber rolls used in industrial processes; industrial clients send their used rolls to this facility, and this facility removes their coatings and re-plates them, or adds new rubber, as needed. Facility map was accurate, though the lab room in the the north east corner will be removed soon. TMD observed eyewash stations serviced throughout facility, fire extinguishers current as of January 2022, and spill response equipment (absorbent). Compressed gases were seismically braced and properly stored. Employee training records were current as of 8/26/22. Hazardous materials and hazardous waste inventories in CERS were observed to be accurate. No violations observed.

Violation Date: 04-09-2015
Citation: 22 CCR 15 66265.173 - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.173
Violation Description: Failure to properly close hazardous waste containers when not in active use.
Violation Notes: Returned to compliance on 05/20/2015. At the Landis grinder, solids accumulate in the reservoir of the machine. Facility has an open tray that sits below the opening of this reservoir to catch the overflow and allow the operator to shovel out the sludge. The sludge in this tray is transferred to a hazardous waste drum a couple times per month, according to Aaron. Sludge in process equipment is not considered to be generated until the waste is removed from the equipment. TMD does not consider the open tray part of the equipment and considers the tray an in-process container, which would not need

ELECTRO-COATINGS OF CALIFORNIA INC (Continued) **S112999590**

to be closed during working hours. The hazardous waste should be transferred to a closed and properly labeled hazardous waste container at the end of working hours, or the tray can be managed as the hazardous waste container and be labeled and closed, along with compliance for accumulation time limits.

Violation Division: Berkeley City Toxics Management Division
Violation Program: HWLQG
Violation Source: CERS,

Site ID: 114204
Site Name: ELECTRO-COATINGS OF CALIFORNIA INC
Violation Date: 04-09-2015
Citation: 22 CCR 15 66265.31 - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.31
Violation Description: Failure to maintain and operate the facility to minimize the possibility of a fire, explosion, or any unplanned sudden or non-sudden release of hazardous waste or hazardous waste constituents to the air, soil, or surface water which could threaten human health or the environment.
Violation Notes: Returned to compliance on 05/20/2015. TMD observed, during the inspection, blasting media on ground around sand blast room and out to the loading area of the building. TMD observed square holes in the side of the sand blast room through which a hose runs through. These holes are larger than the hose, and the accumulation of sand blast media below the hole appears to indicate this is a source of release of media from the room. The blasting media is collected and managed as hazardous waste, non-RCRA hazardous waste (hopper dust). Generator failed to maintain and operate facility in a manner to protect against/prevent any unplanned release to air, soil or surface water. Corrective action: Immediately clean up the area around the sand blast room and manage in accordance with hazardous waste regulations. Provide TMD with a plan outlining how the facility will change its operation to minimize the possibility of the release of blasting media.
Violation Division: Berkeley City Toxics Management Division
Violation Program: HWLQG
Violation Source: CERS,

Site ID: 114204
Site Name: ELECTRO-COATINGS OF CALIFORNIA INC
Violation Date: 04-09-2015
Citation: HSC 6.5 25143.9 - California Health and Safety Code, Chapter 6.5, Section(s) 25143.9
Violation Description: Failure to meet the following requirements of excluded recyclable materials: 1) Used or reused as an ingredient in an industrial process to make a product if the material is not being reclaimed, 2) Used or reused as a safe and effective substitute for commercial products if the material is not being reclaimed, 3) Returned to the original process from which the material was generated, without first being reclaimed, if the material is returned as a substitute for raw material feedstock, and the process uses raw materials as principal feedstocks, 4) The material is recycled and used at the same facility at which the material was generated, or by the same corporate entity, 5) The material is recycled within the applicable generator accumulation time, 6) The material is managed in accordance with all applicable requirements for generators of hazardous wastes, 7) If the material is held in a container or tank, the container or tank is

ELECTRO-COATINGS OF CALIFORNIA INC (Continued) **S112999590**

labeled, marked, and placarded in accordance with the department's hazardous waste labeling, marking, and placarding requirements which are applicable to generators, except that the container or tank shall be labeled or marked clearly with the words "Excluded Recyclable Material" instead of the words "Hazardous Waste," 8) If the material is used oil, the containers, aboveground tanks, and fill pipes used to transfer oil into underground storage tanks shall also be labeled and clearly marked with the words "Used Oil", 9) The owner or operator of the business location where the material is located has a business plan that meets the following minimal requirements: emergency response plans and procedures, which specifically address the material or that meets the emergency response and contingency requirements which are applicable to generators of hazardous waste, and 10) The material shall be stored and handled in accordance with all local ordinances and codes.

Violation Notes: Returned to compliance on 05/20/2015. At the Mesta grinder, Cimtech 46C, a metal working fluid is conveyed from the grinder through a filter and into a tray below that captures the liquid and returns it to the machine. The sludge and filter are transferred to a hazardous waste container and managed as non-RCRA hazardous waste (grinding sludge). This material meets the recycling exemption of HSC 25143.9. However, the facility has not complied with the requirements of HSC 25143.9 in that the tank/tray is not labeled in accordance with generator requirements except that the tank shall be labeled with the words "Excluded Recyclable Material" instead of the words hazardous waste.

Citation: 22 CCR 15 66265.16 - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.16
Violation Description: Failure to provide employees within the first six months after the date of their employment, or assignment to the facility, or to work unsupervised, or to a new position at a facility with hazardous waste training to ensure employees are competent in the following areas: hazardous waste management procedures (including contingency plan implementation) relevant to the positions in which they are employed, emergency response and emergency equipment, and procedures for using, inspecting, repairing, and replacing facility emergency and monitoring equipment. In addition, the owner/operator shall ensure facility personnel take part in an annual review of the initial training and training records training records on current personnel shall be kept until closure of the facility. Training records on former employees shall be kept for at least three years from the date the employee last worked at the facility. The records shall include the following: the job title for each position at the facility related to hazardous waste management, and the name of the employee filling each job; a written job description for each position, duties of facility personnel assigned to each position, and a written description of the type and amount of both introductory and continuing training that will be given to each person filling a position.
Violation Notes: Returned to compliance on 06/05/2015. The hazardous waste training was last conducted 12/2013. Refresher training is to be conducted on an annual basis. Generator did not provide refresher training for employees. Corrective action: Conduct training and provide a copy of the training record to TMD.

Violations Found: No
Eval Type: Routine done by local agency
Eval Notes: Arrived on site with Karl Etulle of TMD to conduct a routine inspection of Electro-Coatings of California Inc. to evaluate the facility's compliance with the Hazardous Waste Generator program. Facility reconditions parts for paper and steel industries, and generates large quantities of RCRA hazardous waste. EPA ID Number CAD009116211 was active at the time of inspection. Met with Aaron Plechaty, General Manager. Facility is equipped with various emergency response equipment including: eyewashes, showers, multiple fire extinguishers (last serviced 11/1/2023), and spill kits. Enhanced Emergency Response postings were readily visible throughout the facility. Observed the following waste streams: - Five ~120 gallon totes of benzene sulfonic acid, 3-nitro sodium salt, carbonic acid waste (accumulation start date 11/15/23) - 55 gallon drum of nickel filter/debris solid (accumulation start date 10/26/23) - Two 55-gallon drums of chrome debris (accumulation start dates [Truncated]

Eval Notes: Hazardous waste containers are in good condition, kept closed when not adding or removing waste, properly labeled. Hazardous wastes are accounted for in inventory and shipment records. Hazardous Waste manifests were reviewed for 2018-2019. Wastes shipped off are consistent with waste reported on CERS inventory. Fire extinguishers are properly serviced and inspected about monthly. Emergency eyewash stations are available throughout the facility and are inspected monthly. Emergency phone numbers and facility map are posted in office area, near a phone. Weekly hazardous wasste inspections are conducted to account for hazardous waste and verify proper containment. Hazardous waste management training was provided to 9 employees 6/2018. Training will need to be conducted by 6/2019. Note

that the person signing the manifests is required to have training.
Eval Division: Berkeley City Toxics Management Division
Eval Program: HWLQG
Eval Source: CERS,

Eval General Type: Compliance Evaluation Inspection
Eval Date: 12-05-2022
Violations Found: No
Eval Type: Routine done by local agency
Eval Notes: Toxics Management Division (TMD) was on-site to conduct routine Hazardous Materials Business Plan (HMBP), Large Quantity Generator (RCRA-LQG), and Stormwater (SW) inspections. Facility reconditions metal rubber rolls used in industrial processes; industrial clients send their used rolls to this facility, and this facility removes their coatings and re-plates them, or adds new rubber, as needed. Facility map was accurate, though the lab room in the the north east corner will be removed soon. TMD observed eyewash stations serviced throughout facility, fire extinguishers current as of January 2022, and spill response equipment (absorbent). Compressed gases were seismically braced and properly stored. Employee training records were current as of 8/26/22. Hazardous materials and hazardous waste inventories in CERS were observed to be accurate. EPA ID# CAD009116211 was current at time of inspection. Hazardous waste manifests, including designated facility to generator copies [Truncated]

Hazardous Waste Summary:

Waste Code: D001
Waste Description: Ignitable Waste

Waste Code: D002
Waste Description: Corrosive Waste

Waste Code: D003
Waste Description: Reactive Waste

Waste Code: D004
Waste Description: Arsenic

Waste Code: D006
Waste Description: Cadmium

Waste Code: D007
Waste Description: Chromium

Waste Code: D008
Waste Description: Lead

Waste Code: D010
Waste Description: Selenium

Waste Code: F003
Waste Description: The Following Spent Nonhalogenated Solvents: Xylene, Acetone, Ethyl Acetate, Ethyl Benzene, Ethyl Ether, Methyl Isobutyl Ketone, N-Butyl Alcohol, Cyclohexanone, And Methanol; All Spent Solvent Mixtures/Blends Containing, Before Use, Only The Above Spent Nonhalogenated Solvents; And All Spent Solvent Mixtures/Blends Containing, Before Use, One Or More Of The Above Nonhalogenated Solvents, And A Total Of Ten Percent Or More (By Volume) Of One Or More Of Those Solvents Listed In F001, F002, F004, And F005; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

Waste Code: F005
Waste Description: The Following Spent Nonhalogenated Solvents: Toluene, Methyl Ethyl Ketone, Carbon Disulfide, Isobutanol, Pyridine, Benzene, 2-Ethoxyethanol, And 2-Nitropropane; All Spent Solvent Mixtures/Blends Containing, Before Use, A Total Of Ten Percent Or More (By Volume) Of One Or More Of The Above Nonhalogenated Solvents Or Those Solvents Listed In F001, F002, Or F004; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

Completed Info:
Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Preliminary Assessment Report
Completed Date: 10/21/1987
Comments: Preliminary Assessment Done: Recommend Site Inspection (low (priority) -- owner in Chapter 11 Facility has a history of numerous spills of hazardous waste to soil.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Site Screening
Completed Date: 03/26/1993
Comments: This facility is a possible source for the Cr(VI) found in groundwater below a neighboring facility (Macauley Foundry, 811 Carleton, Berkeley). There is no on-site data available Chromium was found at up to 60ppm in soil and 30 ppm in groundwater at the Macauley facility. The site appears to have no exposed soil, all areas not covered by the building appear to be paved. This facility has a sister facility in Emeryville at 1401 Park St., which has soil and groundwater contaminated with chromium and TCE. A former employee of th city of Berkeley said he beleived that in the past the facility disposed of wastes into the ground. The only known use of groundwater in the immediate vicinity id for indust- rial purposes, according to the the well inventory provided the Alameda County Public Works Dept. A hazard ranking pack age will be prepared.

Facility Project Subtype:	Not reported
RWQCB Region:	SAN FRANCISCO BAY RWQCB (REGION 2)
Site History:	Groundwater contamination due to a plating shop operations since 1960's; historical spills and leaks around tanks with chromic acid. Groundwater and soil contaminated with total and hexavalent chromium. Soil and groundwater chromium contamination has been found on- and offsite. In 1991 the City of Berkeley TMD required the RP to prepare a work plan for chromium 6 contamination delineation in soil and GW, a feasibility study for corrective actions to remove chromium from soil and GW, risk assessment, and evaluation of the facility storm water pollution prevention plan. Implementation of the in-situ reduction of Cr 6 to Cr 3 as proposed in the 3/1998 Arcadis Gerathy & Miller revised CAP; installation of 12 injection points on- and offsite and injections of an enriched carbohydrate solution into the saturated and vadose zones in 12/1998 and 4/1999. Site closure requested from the TMD in April 2005 by Tamalpais Environmental Consultants (TEC) based on low concentrations in GW. Additional subsurface treatments in 11/2008 to address residual Cr 6 at the site based on results from well MW-1 downgradient of the former source area. Temporary injection points installed to inject a remediation mixture w/whey and an emulsified soybean oil. An additional round of groundwater remediation injections performed in four locations in June 2013 to address chromium 6 detected in well MW-1.The concentration of chromium 6 in MW-1 was below 10 ug/L during the groundwater monitoring events conducted in 12/2014 and 12/2015 by TEC .

ELECTRO-COATINGS IND (Continued) **1000181777**

Environmental Interest/Information System:
All generators and treatment, storage, and disposal (TSD) facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years. The data collected is used to create the National Biennial Resource Conservation and Recovery Act (RCRA) Hazardous Waste Report. This data is processed within the RCRA Information (RCRAInfo) database
THE EMISSION INVENTORY SYSTEM (EIS) MAINTAINS AN INVENTORY OF LARGE STATIONARY SOURCES AND VOLUNTARILY-REPORTED SMALLER SOURCES OF AIR POINT POLLUTANT EMITTERS. IT CONTAINS INFORMATION ABOUT FACILITY SITES AND THEIR PHYSICAL LOCATION, EMISSIONS UNITS, EMISSIONS PROCESSES, RELEASE POINTS, CONTROL APPROACHES, AND REGULATIONS. FACILITY INVENTORY DATA ARE KEPT SEPARATE FROM THE EMISSIONS DATA AND HAVE STABLE IDENTIFIERS TO IMPROVE CONTINUITY FROM YEAR TO YEAR AND TO HELP IDENTIFY DUPLICATE OR MISSING FACILITIES
The Toxic Release Inventory System (TRIS) is a publicly available EPA database reported annually by certain covered industry groups, as well as federal facilities. It contains information about more than 650 toxic chemicals that are being used, manufactured, treated, transported, or released into the environment, and includes information about waste management and pollution prevention activities.
The National Pollutant Discharge Elimination System (NPDES) module of the Integrated Compliance Information System (ICIS). Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.
The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS),EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), andToxic Release Inventory (TRI).
The Department of Labor, Occupational Safety and Health Administration information system consists of inspection case detail for approximately 100,000 OSHA inspections conducted annually. The FRS dataset includes facilities that had inspections within the last 7 years within the mining, oil and gas, utilities, and manufacturing sectors.
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.
California's Hazardous Waste Tracking System Data Mart (HWTS-DATAMART) provides information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

Location Case Number: Not reported
File Location: All Files are on GeoTracker or in the Local Agency Database
Potential Contaminants of Concern: Chromium, Per- and Polyfluoroalkyl Substances (PFAS)
Potential Media Affected: Other Groundwater (uses other than drinking water), Soil, Under Investigation

Site History: Groundwater contamination due to a plating shop operations since 1960's; historical spills and leaks around tanks with chromic acid. Groundwater and soil contaminated with total and hexavalent chromium. Soil and groundwater chromium contamination has been found on- and offsite. In 1991 the City of Berkeley TMD required the RP to prepare a work plan for chromium 6 contamination delineation in soil and GW, a feasibility study for corrective actions to remove chromium from soil and GW, risk assessment, and evaluation of the facility storm water pollution prevention plan. Implementation of the in-situ reduction of Cr 6 to Cr 3 as proposed in the 3/1998 Arcadis Gerathy & Miller revised CAP; installation of 12 injection points on- and offsite and injections of an enriched carbohydrate solution into the saturated and vadose zones in 12/1998 and 4/1999. Site closure requested from the TMD in April 2005 by Tamalpais Environmental Consultants (TEC) based on low concentrations in GW. Additional subsurface treatments in 11/2008 to address residual Cr 6 at the site based on results from well MW-1 downgradient of the former source area. Temporary injection points installed to inject a remediation mixture w/whey and an emulsified soybean oil. An additional round of groundwater remediation injections performed in four locations in June 2013 to address chromium 6 detected in well MW-1.The concentration of chromium 6 in MW-1 was below 10 ug/L during the groundwater monitoring events conducted in 12/2014 and 12/2015 by TEC .

Evaluation:
Eval General Type: Other/Unknown
Eval Date: 06-07-2018
Violations Found: Yes
Eval Type: Other, not routine, done by local agency
Eval Notes: Not reported
Eval Division: Berkeley City Toxics Management Division
Eval Program: HMRRP
Eval Source: CERS,

Eval General Type: Compliance Evaluation Inspection
Eval Date: 09-01-2022
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: Arrived onsite to conduct routine Hazardous Materials Business Plan (HMBP) inspection of Berkeley Humane. Facility is an animal shelter with a veterinary hospital, outdoor dog kennels, and laundry machines on site. Met with Kristen Loomer, Director of Operations. Began inspection by verifying the business owner/operator information. All information was correct and up to date. Loomer then escorted me around the facility to verify the hazmat inventory. Observed 4 full and 3 empty cylinders of oxygen gas in the hospital area. Facility also uses accelerated hydrogen peroxide and bleach, which were each stored in 55-gallon drums lifted on spill containment pallets in the warehouse. Verified that the inventory observed at the facility matches the inventory reported in CERS. Employee training records for 2020, 2021, and 2022 were immediately available for review. New staff is trained on workplace safety, hazardous materials handling, and emergency preparedness within first few [Truncated]

Citation: HSC 6.95 25508(a)(3) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(3)
Violation Description: Failure to complete and electronically submit hazardous material inventory information for all reportable hazardous materials on site at or above reportable quantities.
Violation Notes: Returned to compliance on 01/19/2023. Observation: TMD observed various chemicals that were either missing from the hazardous materials inventory or had an inaccurate quantity reported in the inventory. Corrective Action: Conduct a thorough review of the facility's hazardous materials and submit an updated inventory to cers.calepa.ca.gov within 30 days of report issuance.

Violation Date: 11-16-2022
Citation: 22 CCR 12 66262.40(a) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.40(a)
Violation Description: Failure to keep a copy of each properly signed manifest for at least three years from the date the waste was accepted by the initial transporter. The manifest signed at the time the waste was accepted for transport shall be kept until receiving a signed copy from the designated facility which received the waste.
Violation Notes: Returned to compliance on 01/19/2023. Observation: Operator was only able to produce generator initial copy manifests dated 5/13/22, 7/12/22, 9/23/22 at the time of inspection. Corrective Action: Keep both copies of the uniform hazardous waste manifest (generator initial copy and designated facility to generator copy) for a minimum of 3 years. Submit the manifests from the next scheduled waste pickup via email within 30 days of report issuance.

Evaluation:
Eval General Type: Compliance Evaluation Inspection
Eval Date: 11-16-2022
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: TMD arrived onsite to conduct a routine Hazardous Materials Business Plan (HMBP) inspection of Huue, Inc. TMD met with senior scientist Abolfazl Aghanouri. Began inspection by reviewing the Business Owner Operator information. Aghanouri confirmed that all information is current and up to date. Aghanouri then escorted me through the facility to verify the hazardous materials inventory. Observed various chemicals that were not reported or have an inaccurate quantity reported in the inventory including: - Ecolab ultrasil enzymatic cleanser (~10 gallons) - Nitric Acid (~400 ml) - Mobil vacuum pump oil (~5 quarts) - Nitrogen (inventory reports 100 cubic feet, TMD observed

Eval Notes: TMD arrived onsite to conduct a routine Hazardous Waste Generator inspection of Huue Inc. Met with senior scientist, Abolfazl Aghanouri, who escorted me through the facility to inspect the hazardous waste accumulation area. Observed various emergency response equipment including an emergency shower, first aid kit, spill kit and fire extinguisher (last serviced on 11/10/21). Advised Aghanouri to schedule maintenance on the fire extinguisher as soon as possible. Emergency response posting was posted next to the facility's telephone. EPA ID# CAL000464623 was active at the time of inspection. Employee training records were adequate. TMD reviewed the following uniform hazardous waste manifests: - 5/13/22: waste flammable liquids (Dimethylsulfoxide, Methanol) - 90 lbs - 5/13/22: chromatography waste - 7/12/22: chromatography waste - 7/12/22: waste flammable liquids - 140 lbs - 7/12/22: waste flammable corrosives (ammonium hydroxide,methanol) - 140 lbs - 7/12/22: [Truncated]

Site Name:	DAVID BROTHERS
Violation Date:	03-16-2022
Citation:	HSC 6.95 25508(a)(3) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(3)
Violation Description:	Failure to complete and electronically submit hazardous material inventory information for all reportable hazardous materials on site at or above reportable quantities.
Violation Notes:	Returned to compliance on 05/19/2022. Observation: Acetylene amount reported in CERS is 110, but cylinder on-site was larger than that. Oxygen is reported in CERS as 230 cubic feet on-site, but only 127 cubic feet were observed. All hazard materials inventory items in CERS are using outdated federal hazard categories. Corrective Action: Update amount for oxygen and acetylene in CERS to reflect what was observed on site. Update all items in CERS by de-selecting the obsolete, old federal hazard categories, and selecting from the new 24 hazard category options - this must be done for each line item. Correct within 30 days.

15, Section(s) 66265.16

Violation Description: Failure to provide employees with hazardous waste training program of class room instructions or on-the-job training within the first six months after the date of their employment or assignment to a facility, or to a new position at a facility and annually thereafter. Training records on current personnel shall be kept until closure of the facility and for former employees the record shall be kept for at least three years from the date the employee last worked at the facility. The records shall include the following: the job title for each position at the facility related to hazardous waste management, and the name of the employee filling each job; a written job description for each position, duties of facility personnel assigned to each position, and a written description of the type and amount of both introductory and continuing training that will be given to each person filling a position.

Violation Notes: Returned to compliance on 04/28/2021. Observation: No employee training records provided at time of inspection. Corrective Action: TMD to provide employee training template; conduct training and retain record on-site for 3 years.

Violation Division: Berkeley City Toxics Management Division
Violation Program: HW
Violation Source: CERS,

Site ID: 425908
Site Name: Aerosol Dynamics Inc
Violation Date: 03-31-2021
Citation: 40 CFR 1 265.32 - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 265.32

Violation Description: Failure of the facility to maintain the following emergency equipment or equivalents: 1) An internal communications or alarm system; 2) A device, such as a telephone (immediately available at the scene of Operations/ Maintenance) or a hand-held two-way radio, capable of summoning emergency assistance from local police departments, fire departments, or State or local emergency response teams; 3) Portable fire extinguishers, fire control equipment, spill control equipment, and decontamination equipment; and 4) Water at adequate volume and pressure to supply water hose streams, or foam producing equipment, or automatic sprinklers, or water spray systems.

Violation Notes: Returned to compliance on 04/05/2021. Observation: During inspection, TMD observed fire extinguisher last serviced in May of 2018. Corrective Action: Operator corrected this prior to report delivery by providing documentation showing the equipment was serviced.

Violation Division: Berkeley City Toxics Management Division
Violation Program: HW
Violation Source: CERS,

Evaluation:
Eval General Type: Other/Unknown
Eval Date: 08-03-2017
Violations Found: Yes
Eval Type: Other, not routine, done by local agency
Eval Notes: EPA ID#, CAL 000 287 950. Waste generated is water, methanol, HPLC. Have not shipped since 2013. Takes waste to HHW alameda county. Must report HW activity on CERS.calepa.ca.gov. Acetonitrile, methanol and water mixture for machine. 4L container of each. Acetic acid 2.5L Nitric acid. 5L total is about 10 of haz mat. No outside activity.

Eval General Type: Compliance Evaluation Inspection
Eval Date: 08-29-2017
Violations Found: No
Eval Type: Routine done by local agency
Eval Notes: Submitted hazardous waste generator packet online. Labeling - Need more labels. Accumulation start dates available. Emergency response number are posted. No violations
Eval Division: Berkeley City Toxics Management Division
Eval Program: HW
Eval Source: CERS,

Eval General Type: Compliance Evaluation Inspection
Eval Date: 03-31-2021
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: Toxics Management Division (TMD) connected virtually with Arantzazu Eiguren-Hernandez, Senior Research Chemist of Aerosol Dynamics, via a combination of audio and video streaming to conduct this virtual inspection. Aerosol Dynamics builds instruments for measuring air pollution, and this location is primarily research and development-focused, using mostly water with some methanol and isopropyl alcohol (IPA). TMD observed a pneumatic compressor, 33CF hydrogen, and 88 CF nitrogen, seismically braced. Hazardous materials are below Hazardous Materials Business Plan (HMBP) reporting thresholds. Fire extinguisher last serviced in May 2018. Facility operator provided receipt of 2019 disposal to Alameda County HHW small business program, and photo of Emergency Response posting. TMD observed - 1x 5gal of water/IPA/methanol waste, dated 12/10/19 - 1x 1.06gal of waste solvents, no accumulation start date

Violations:

Site ID: 419283
Site Name: Flying Moose Manufacturing LLC
Violation Date: 09-01-2020
Citation: HSC 6.5 25123.3(h)(1) - California Health and Safety Code, Chapter 6.5, Section(s) 25123.3(h)(1)
Violation Description: Failure to send hazardous waste offsite for treatment, storage, or disposal within 180 days (or 270 days if waste is transported over 200 miles) for a generator who generates less than 1000 kilogram per month if all of the following conditions are met: (1) The quantity of hazardous waste accumulated onsite never exceeds 6,000 kilograms. (2) The generator complies with the requirements of 40 Code of Federal Regulations section 262.34(d), (e) and (f). (3) The generator does not hold acutely hazardous waste or extremely hazardous waste in an amount greater than one kilogram for more than 90 days.
Violation Notes: Returned to compliance on 10/02/2020. Observation: Waste Coolant accumulation start date is October of 2019, and operator states October 2019 is the only time they have shipped off in 3 years. Corrective Action: Ship off (or drop off) waste within 30 days and submit proof to TMD. Continue to label accumulation start dates and send off hazardous waste within accumulation time limits. Maintain records on-site for 3 years.

FLYING MOOSE MANUFACTURING LLC (Continued) **S121780227**

Violation Notes:	Returned to compliance on 03/03/2017. The facility failed to establish required hazardous materials business plan. The facility exceed the specified thresholds of hazardous materials (>= 55 gallon for liquids) required to submit a hazardous materials business plan (HMBP) in accordance with BMC 15.12.050. Therefore the facility meet the requirement to report Hazardous Materials and submit a HMBP. Corrective Action: Please establish Hazardous Materials Business Plan (HMBP), go to cers.calepa.ca.gov and create an account. Report a complete list of Hazardous Materials and Hazardous Waste inventory, site map, emergency response plan and employee training plan.

Eval Type: Routine done by local agency
Eval Notes: Arrived on site to conduct a routine inspection of Flying Moose Manufacturing LLC to evaluate the facility's compliance with the Hazardous Waste Generator (HWG) program. Facility specializes in metal fabrication and generates small quantities of used oil and antifreeze. Met with Chris Taggart, Shop Helper. Observed the emergency posting posted by the facility's telephone. Observed the following waste streams: - 2 55-gallon drums of oily water/coolant (accumulation

start date 8/16/23) Reviewed the following waste manifests: - 3/11/21: 110 gallons used oil - 6/10/21: 120 gallon oily water

Eval Division: Berkeley City Toxics Management Division
Eval Program: HW
Eval Source: CERS,

Eval General Type: Compliance Evaluation Inspection
Eval Date: 09-01-2020
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: Toxics Management Division (TMD) conducted this routine inspection virtually, via a combination of video and audio streaming. Flying Moose is a Research and Development machining shop, which produces metal parts; thus, most machines and materials on-site are oriented toward metal machining. Machining produces aluminum scraps, all of which observed meet the definition of "scrap metal." Scrap aluminum is given to metal recyclers. Scrap steel cut-outs (steel sheets with pieces cut out) are donated to Oakland's The Crucible. TMD observed an empty oily rag container; these must be disposed of as Hazardous Waste if unable to launder them if/when they accumulate. Three machines on-site produce waste coolant when serviced: 2 CNC mills and 1 CNC lathe. These machines are serviced on an as-needed basis. They also contain closed-loop oil systems which would be serviced by a third party contractor if needed. Flying Moose's EPA ID#CAL000413938 which was inactive at time of [Truncated]

Eval Program: HW
Eval Source: CERS,

Eval General Type: Compliance Evaluation Inspection
Eval Date: 06-24-2015
Violations Found: No
Eval Type: Routine done by local agency
Eval Notes: Hazmat quantities and locations consistent with 2015 HMBP submittal. E.R. equipment andd posting as indicated on 2015 HMBP.

Eval Division: Berkeley City Toxics Management Division
Eval Program: HMRRP
Eval Source: CERS,

Eval General Type: Compliance Evaluation Inspection
Eval Date: 09-01-2020
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: Toxics Management Division (TMD) conducted this routine inspection in conjunction with routine stormwater (SW) and Hazardous Waste Generator (HWG) inspections; this inspection was conducted virtually via a combination of audio and video streaming. Operator produced 3 years' worth of employee training records and emergency response plan prior to inspection. Emergency response equipment (fire extinguishers, spill control kit, eyewash station) were observed on-site. Waste is stored in 55 gallon drum, hazardous products are stored in Flammable Liquids locker, and compressed gas cylinders were seismically braced. Some machines are powered by a permitted air compressor. TMD observed - 3x argon/CO2 blend (unknown quantity) - 2x 281 CF argon - lead acid battery in forklift (unknown quantity) - 6x 5 gallon containers in flammable liquids locker (water soluble oil concentrate, cutting fluid, and compressor lubricant)

Eval Notes: Arrived on site to conduct a routine inspection of Flying Moose Manufacturing LLC to evaluate the facility's compliance with the Hazardous Materials Business Plan (HMBP) Facility specializes in metal fabrication and has various compressed gases and some cleaning chemicals on site. Met with Chris Taggart, Shop Helper. Began inspection by reviewing the Business Owner Operator Identification information submitted to CERS. Taggart confirmed that all information listed was correct and up to date. Taggart then escorted me through the facility to verify the hazardous materials inventory. Facility is equipped with spill control equipment, first aid kits, multiple fire extinguishers (last serviced 10/18/22). Observed various chemicals that weren't reported in the hazardous materials inventory including: <10 gallons various cleaners, ~30 gallons hydraulic oil, and ~5 gallons acetone. Taggart was instructed to submit an updated hazardous materials inventory to [Truncated]

Click Here for FRS Facility Detail Report:

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Facility Project Subtype:	Not reported
RWQCB Region:	SAN FRANCISCO BAY RWQCB (REGION 2)
Site History:	The Proen Products Company facility operated from approximately 1952 to June 1990. Proen manufactured fertilizer tablets, lawn sprinklers, and lawn edgers at the Site. the fertilizer tablet manufacturing operation was separate from the metal parts manufacturing operation. The fertilizer process consisted of combining fertilizer ingredients (e.g., urea) in a mixer and baking the combined ingredients in an oven.Metal sprinkler parts were manufactured from zinc alloy in the die casting operation and the metal parts cut in the punch press were cut from brass, aluminum, or steel sheets of metal. Solvents used for degreasing metal parts included 1,1,1-trichloroethane (1,1,1-TCA, reportedly used from 1982 to 1990) and trichloroethene (TCE, reportedly used before 1982). Carbon tetrachloride was reportedly used for degreasing during the earlier years of the facility's operation. Additional chemicals used at the facility reportedly included isopropanol, petroleum naphtha, dipping enamels, copper

PROEN PRODUCTS (Continued) **S101007032**

sulfate, Hampene 200 (EDTA), manganese sulfate, zinc sulfate, and Houghto-Safe 620 (ethylene glycol). Wastes removed and disposed off site by licensed contractors included paint thinner, waste paints, and waste 1,1,1-TCA. Soil and groundwater investigations conducted in 1990 and 1991 revealed that elevated concentrations of VOCs were present in collected soil samples. The highest concentrations of VOCs and TPH-g and BTEX were detected in the hand augered boring SB -1 near the sump:TCE up to 2.2 mg/kg in soil and up to 230 mg/l in GW sample. Five MWs installed along the site perimeter (corner of 9th and Grayson St) in August 1990 to monitor the VOCs plume; additional eight wells installed in 1992. The highest concentrations of TCE was detected in MW-2 located downgradientfrom the Site. 1.4 mg/l of TCE (April 1991). Add site investigation and removal of the sump, soil excavation and removal of approx.. 1,130 tons in May 1992; TCE was detected in soil up to 17 mg/kg and in water up to 230 mg/l. After the cleanup TCE concentrations were reduced to 0.68 mg/kg and 0.068 mg/l. Annual monitoring until 2009. Groundwater monitoring continued thru 2020. Additional soil vapor sampling was completed in 2020 to address the potential for Vapor Intrusion of VOCs identified in groundwater. Sampling results showed that the site no longer poses an unacceptable risk to occupants; and no further remedial action is needed. The residual groundwater VOC plume will be addressed via natural attenuation. The Site is located within the City of Berkeley (COB) Environmental Management Area (EMA), and the potential for future exposures to offsite impacted groundwater will be managed by the COB. The case was closed on 3/3/21 and an NFA letter was issued. Groundwater monitoring wells were decommissioned and results were reported 6/1/2021.

Citation: HSC 6.95 25508(a)(1) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(1)
Violation Description: Failure to complete and electronically submit a business plan when storing/handling a hazardous material at or above reportable quantities.
Violation Notes: Returned to compliance on 09/22/2019. Facility failed to establish and adequately implement a Hazardous Materials Business Plan (HMBP). The facility exceeds the specified thresholds of hazardous materials required to submit a HMBP in accordance with BMC 15.12.050. Therefore, the facility meets the requirements to report hazardous materials inventory and submit a HMBP. Corrective Action: Please establish a Hazardous Materials Business Plan (HMBP) within 30 days, by September 22nd, 2019. To complete a HMBP, please go to cers.calepa.ca.gov and create an account. Report complete list of HazMat inventory, Site Map, and Emergency Response/Training Plans. Call Toxics Management Division for help at (510) 981-7460.

Violation Source: CERS,

Evaluation:
Eval General Type: Other/Unknown
Eval Date: 09-18-2014
Violations Found: No
Eval Type: Other, not routine, done by local agency
Eval Notes: Conducted a closure inspection, confirmed site is not generating HW anymore.
Eval Division: Berkeley City Toxics Management Division
Eval Program: HW
Eval Source: CERS,

Eval General Type: Compliance Evaluation Inspection
Eval Date: 10-25-2021
Violations Found: No
Eval Type: Routine done by local agency
Eval Notes: Ms. Awet Alem showed me around so I could conduct a routine hazardous waste inspection. Waste was properly labeled. Waste is neutralized using the laboratory benchtop neutralization exemption, and is then disposed of down the drain. Emergency response eye washes, spill kits and fire extinguishers were all well maintained.
Eval Division: Berkeley City Toxics Management Division
Eval Program: HW
Eval Source: CERS,

Eval General Type: Other/Unknown
Eval Date: 08-23-2019
Violations Found: Yes
Eval Type: Other, not routine, done by local agency
Eval Notes: Conducted a screening for hazardous materials and hazardous waste. At any one time during a year, if a facility uses, handles, stores, or generates combined (aggregate) quantities of hazardous materials and hazardous waste in amounts = 55 gallons for liquids, 500 pounds for solids, and/or 200 cubic feet of compressed gases, the facility must submit a Hazardous Materials Business Plan (HMBP), and must submit a Hazardous Waste Generator form for any amount of waste. Facility has laboratories and produces biomaterials including putty for expedited bone-healing. Facility is kept clean and aisles are clear; fire extinguishers are current and need servicing in October of 2019. Flammable storage lockers are in use and self-shutting. Representative states that no hazardous waste or biohazardous waste is generated at the facility - sodium bicarbonate is used to neutralize all wastes which are then washed into sanitary sewer. TMD to verify that this is an acceptable [Truncated]

Violations:
Site ID: 592438
Site Name: Form Energy, Inc.
Violation Date: 05-18-2022
Citation: HSC 6.95 25508(a)(3) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(3)
Violation Description: Failure to complete and electronically submit hazardous material inventory information for all reportable hazardous materials on site at or above reportable quantities.
Violation Notes: Returned to compliance on 06/25/2022. Observation: Remove waste poly and waste metal drums from inventory, as they are not hazardous. For the "annual waste amount" field, this should only be filled out for waste line items. New materials should be one line item and do not have an "annual waste amount", and waste items should be another line item, and have an "annual waste amount." Corrective Action: Remove nonhazardous items from inventory. Separate materials and waste in inventory. Submit on CERS within 30 days.

Eval General Type: Compliance Evaluation Inspection
Eval Date: 09-17-2013
Violations Found: No
Eval Type: Routine done by local agency
Eval Notes: No violations noted during the inspection. Facility has large quantities of flammable liquids located inside both buildings, 829 Heinz & 2810 Seventh street. Hazardous Waste disposal records were available and up to date the day of the inspection. Training records were current and provided/ emailed after the inspection, the same day. Safety equipment, eye wash and fire Extinguishers were checked on a regular basis, the service tags were current. SAA's were verified to be labeled, sealed according to good hazardous waste practices. Hazardous materials spill cleanup equipment was located where needed. Facility Environmental Manager Zulma Machillanda-Hahn mentioned that the Fire Department conducts annual inspections.

Eval General Type: Compliance Evaluation Inspection
Eval Date: 09-29-2023
Violations Found: No
Eval Type: Routine done by local agency
Eval Notes: Met Leighton on-site to conduct the routine hazardous waste inspection. Facility is a RCRA LQG. Containers were observed in the 90day storage area and in various satellite accumulation areas. Labels were all properly completed. Manifests were reviewed. There was a gap in manifests between 5/16-8/23/22, Leighton explained that the facility may not have generated waste between this period and that's why there were no manifests during that time. Emergency response/Contingency plan was reviewed and was current. Training records were reviewed and were current. Emergency response equipment was observed and appeared to be well-maintained.
Eval Division: Berkeley City Toxics Management Division

Eval Date: 03-16-2016
Violations Found: No
Eval Type: Routine done by local agency
Eval Notes: Routine Scheduled HMBP, HW- LQG, and stormwater inspection. Reviewed HW disposal records, haz comm/hw training records- all were up to date and available for review during the inspection. The safety Equipment; safety showers, eye wash stations and Fire extinguishers were inspected and an inspection log was completed. The HMBP was submitted electronically via CERS on 2/22/16. It was mentioned during the inspection that DSM would be shutting down completely and relocating pennsylvania at the end of 2017. They were instructed to provide a formal closure plan several months before the actual closure and they are working with an outside contractor to plan for closure. Manufacturing activities have been substantially reduced, the hw reuse as a product has ceased, apparently only one shipment went out. No violations were noted during the inspection. A recent small office

Waste Description:	Corrosive Waste
Waste Code:	D003
Waste Description:	Reactive Waste
Waste Code:	D008

FORM ENERGY, INC (Continued) **1026830203**

Waste Description: Lead

Waste Code: D035
Waste Description: Methyl Ethyl Ketone

Waste Code: F003
Waste Description: The Following Spent Nonhalogenated Solvents: Xylene, Acetone, Ethyl Acetate, Ethyl Benzene, Ethyl Ether, Methyl Isobutyl Ketone, N-Butyl Alcohol, Cyclohexanone, And Methanol; All Spent Solvent Mixtures/Blends Containing, Before Use, Only The Above Spent Nonhalogenated Solvents; And All Spent Solvent Mixtures/Blends Containing, Before Use, One Or More Of The Above Nonhalogenated Solvents, And A Total Of Ten Percent Or More (By Volume) Of One Or More Of Those Solvents Listed In F001, F002, F004, And F005; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

Waste Code: F005
Waste Description: The Following Spent Nonhalogenated Solvents: Toluene, Methyl Ethyl Ketone, Carbon Disulfide, Isobutanol, Pyridine, Benzene, 2-Ethoxyethanol, And 2-Nitropropane; All Spent Solvent Mixtures/Blends Containing, Before Use, A Total Of Ten Percent Or More (By Volume) Of One Or More Of The Above Nonhalogenated Solvents Or Those Solvents Listed In F001, F002, Or F004; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

Hazardous Waste Summary:

Waste Code: D001
Waste Description: Ignitable Waste

Waste Code: D002
Waste Description: Corrosive Waste

Waste Code: D022
Waste Description: Chloroform

Waste Code: D035
Waste Description: Methyl Ethyl Ketone

Waste Code: D038
Waste Description: Pyridine

Waste Code: F002
Waste Description: The Following Spent Halogenated Solvents: Tetrachloroethylene, Methylene Chloride, Trichloroethylene, 1,1,1-Trichloroethane, Chlorobenzene, 1,1,2-Trichloro-1,2,2-Trifluoroethane, Ortho-Dichlorobenzene, Trichlorofluoromethane, And 1,1,2, Trichloroethane; All Spent Solvent Mixtures/Blends Containing, Before Use, A Total Of Ten Percent Or More (By Volume) Of One Or More Of The Above Halogenated Solvents Or Those Solvents Listed In F001, F004, And F005; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

Waste Code: F003
Waste Description: The Following Spent Nonhalogenated Solvents: Xylene, Acetone, Ethyl Acetate, Ethyl Benzene, Ethyl Ether, Methyl Isobutyl Ketone, N-Butyl Alcohol, Cyclohexanone, And Methanol; All Spent Solvent Mixtures/Blends Containing, Before Use, Only The Above Spent Nonhalogenated Solvents; And All Spent Solvent Mixtures/Blends Containing, Before Use, One Or More Of The Above Nonhalogenated Solvents, And A Total Of Ten Percent Or More (By Volume) Of One Or More Of Those Solvents Listed In F001, F002, F004, And F005; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

Waste Code: F005
Waste Description: The Following Spent Nonhalogenated Solvents: Toluene, Methyl Ethyl Ketone, Carbon Disulfide, Isobutanol, Pyridine, Benzene, 2-Ethoxyethanol, And 2-Nitropropane; All Spent Solvent Mixtures/Blends Containing, Before Use, A Total Of Ten Percent Or More (By Volume) Of One Or More Of The Above Nonhalogenated Solvents Or Those Solvents

DSM BIOMEDICAL INC (Continued) **1001217425**

Listed In F001, F002, Or F004; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

Waste Code: U162
Waste Description: 2-Propenoic Acid, 2-Methyl-, Methyl Ester (I,T) (Or) Methyl Methacrylate (I,T)

Waste Code: U196
Waste Description: Pyridine

Waste Code: U213
Waste Description: Furan, Tetrahydro-(I) (Or) Tetrahydrofuran (I)

Waste Code: U220
Waste Description: Benzene, Methyl- (Or) Toluene

THE PROFESSIONAL TREE CARE COMPANY (Continued) **S121791550**

Violation Description: Failure to meet the following container management requirements: (a) A container holding hazardous waste must always be closed during storage, except when it is necessary to add or remove waste. (b) A container holding hazardous waste must not be opened, handled, or stored in a manner which may rupture the container or cause it to leak.
Violation Notes: Returned to compliance on 02/28/2018. The used oil drum in the back corner of the hazardous waste storage area is covered with a grate and is not closed. The used oil tank lid is not closed when not adding or removing waste. Corrective action: Maintain these containers/tanks closed except when adding or removing hazardous waste. 2/14/18 - Spoke with Pamela and received email. Extension granted.
Violation Division: Berkeley City Toxics Management Division
Violation Program: HW
Violation Source: CERS,

Site ID: 75257
Site Name: THE PROFESSIONAL TREE CARE COMPANY
Violation Date: 01-09-2018
Citation: 40 CFR 1 262.34(d)(5)(iii) - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 262.34(d)(5)(iii)
Violation Description: Failure to ensure that all employees are thoroughly familiar with proper waste handling and emergency procedures, relevant to their responsibilities during normal facility operations and emergencies.
Violation Notes: Returned to compliance on 02/28/2018. Employees are not thoroughly familiar with proper waste handling as demonstrated by the container management violations observed at the time of the inspection. Corrective action: Provide a training which reviews the hazardous waste management requirements and document the training. Provide a copy of the training record to TMD. 2/14/18 - Spoke with Pamela and received email. Extension granted.
Violation Division: Berkeley City Toxics Management Division

Site Name: THE PROFESSIONAL TREE CARE COMPANY
Violation Date: 01-09-2018
Citation: HSC 6.95 25508(a)(1) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(1)
Violation Description: Failure to complete and electronically submit hazardous material inventory information for all reportable hazardous materials on site at or above reportable quantities.
Violation Notes: Returned to compliance on 03/07/2018. Facility is storing transmission drive train oil, approximately 10, 5 gallon containers, and a 318 cubic foot cylinder of argon/CO2 onsite. This is not disclosed on the inventory. Corrective action: Update the inventory to include all hazardous materials stored onsite. 2/14/18 - Spoke with Pamela and received email. Extension granted.

6.95, Section(s) 25505(a)(4)
Violation Description: Failure to provide initial and annual training to all employees in safety procedures in the event of a release or threatened release of a hazardous material or failure to document and maintain training records for a minimum of three years.
Violation Notes: Returned to compliance on 02/28/2018. John indicates that they are provided on the job training, but he is not aware of any training documentation. Corrective action: Provide a training to employees reviewing hazards of materials, emergency response procedures, coordination of emergency response actions, notification procedures for local emergency responders, CUPA, Cal OES and onsite and offsite personnel, PPE, use and maintenenace of emergency response equipment and supplies, evacuation procedures and any other items included in your in-house developed training program. Document the training and provide a copy of the training record to TMD. 2/14/18 - Spoke with Pamela and received email. Extension granted.

Site ID: 75257
Site Name: THE PROFESSIONAL TREE CARE COMPANY
Violation Date: 01-09-2018
Citation: 40 CFR 1 265.177 - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 265.177
Violation Description: Failure to separate incompatible wastes from the same container, nearby containers, or unwashed containers which previously contained incompatible waste or materials.
Violation Notes: Returned to compliance on 02/28/2018. John indicates the used antifreeze usually gets added to the used oil container for disposal. Used oil may not be mixed with other hazardous wastes or other materials. Corrective action: Maintain a separate container for the used antifreeze and label properly as hazardous waste. 2/14/18 - Spoke with Pamela and received email. Extension granted.
Violation Division: Berkeley City Toxics Management Division
Violation Program: HW
Violation Source: CERS,

Site ID: 75257
Site Name: THE PROFESSIONAL TREE CARE COMPANY
Violation Date: 01-09-2018
Citation: HSC 6.5 Multiple - California Health and Safety Code, Chapter 6.5, Section(s) Multiple
Violation Description: Hazardous Waste Generator Program - Administration/Documentation - General
Violation Notes: Returned to compliance on 02/14/2018. Facility generates hazardous waste but does not have an active EPA ID number. CAL000273418 is inactive. Corrective action: Submit the application to DTSC, https://www.dtsc.ca.gov/HazardousWaste/upload/GISS_FORM_1358.pdf, to reactivate your EPA ID number. In addition, ensure to complete the eVerification Questionnaire, electronically, every year. 2/14/18 - Pamela indicates The EPA ID application was submitted by email over 3 weeks ago. She then went online, resubmitted an electronic application and paid the bill 1.5 weeks ago. DTSC hasn't reactivated their EPA ID number.

Eval Source: CERS,

Eval General Type: Compliance Evaluation Inspection
Eval Date: 01-09-2018
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: Facility generates used oil, used oil filters, used rags from equipment maintenance and oily water/sludge from the oil water separator. John indicates the rags are taken by the uniform service for laundering and the parts washer is serviced as needed. The copies of waste disposal records onsite were illegible. Provide TMD with copies of waste disposal records for the used oil, used antifreeze, oily debris, oily water, used lead acid batteries and used oil filters. For the hazardous waste manifests, provide the generator retains copy, as well as the designated facility to generator copy. In addition, please provide your procedure for submitting copies of the hazardous waste manifests to DTSC.

Eval General Type: Compliance Evaluation Inspection
Eval Date: 01-09-2018
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: Met with John Burke to confirm the information in the 3/1/2017 HMBP submittal. Please note that the annual review and certification is due 3/1/2018 and must include an update to the hazard categories on the inventory. Please see the items marked on the printed inventory provided by TMD. Observed storage of argon/carbon dioxide, transmission drive train oil, a water bottle of antifreeze, parts washer, propane, used oil, and oil. The 5 gallon water bottle of antifreeze is open and sitting, leaning, on top of the oil tank and is unlabeled. The container must be labeled within 10 days or is considered a hazardous waste. In addition, the container must be stored in a manner to prevent or minimize a release, including closing it.

Violations:

Site ID:	53457
Site Name:	OCEANWORKS, INC.
Violation Date:	01-12-2015
Citation:	22 CCR 12 66262.34(f) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(f)
Violation Description:	Failure to properly label hazardous waste accumulation containers with the following requirements: "Hazardous Waste", name and address of the generator, physical and chemical characteristics of the Hazardous Waste, and starting accumulation date.
Violation Notes:	Returned to compliance on 02/25/2015. Used oil drums and used antifreeze are not labeled properly. Corrective action: Mark all hazardous waste containers with the words "Hazardous waste", accumulation start date, composition and physical state, hazard properties, name and address of generator. Dates on wall acceptable at this time.

Site Name:	OCEANWORKS, INC.
Violation Date:	01-12-2015
Citation:	40 CFR 1 265.173 - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 265.173
Violation Description:	Failure to properly close hazardous waste containers when not in active use.
Violation Notes:	Returned to compliance on 02/25/2015. Observed used oil drum and used antifreeze drum with drain funnels with no closing mechanism and staff were not adding or removing waste. 16 gallon used oil drums weren't closed. Corrective action: Close all hazardous waste containers and ensure that containers remain closed except when adding or removing waste. If a funnel is used, it must either be removed and container closed each time, or be equipped with a valve or cover to prevent leakage if drum should be tipped over.

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.
