Zoning Adjustments Board Staff Report

APP #ZP2024-0183

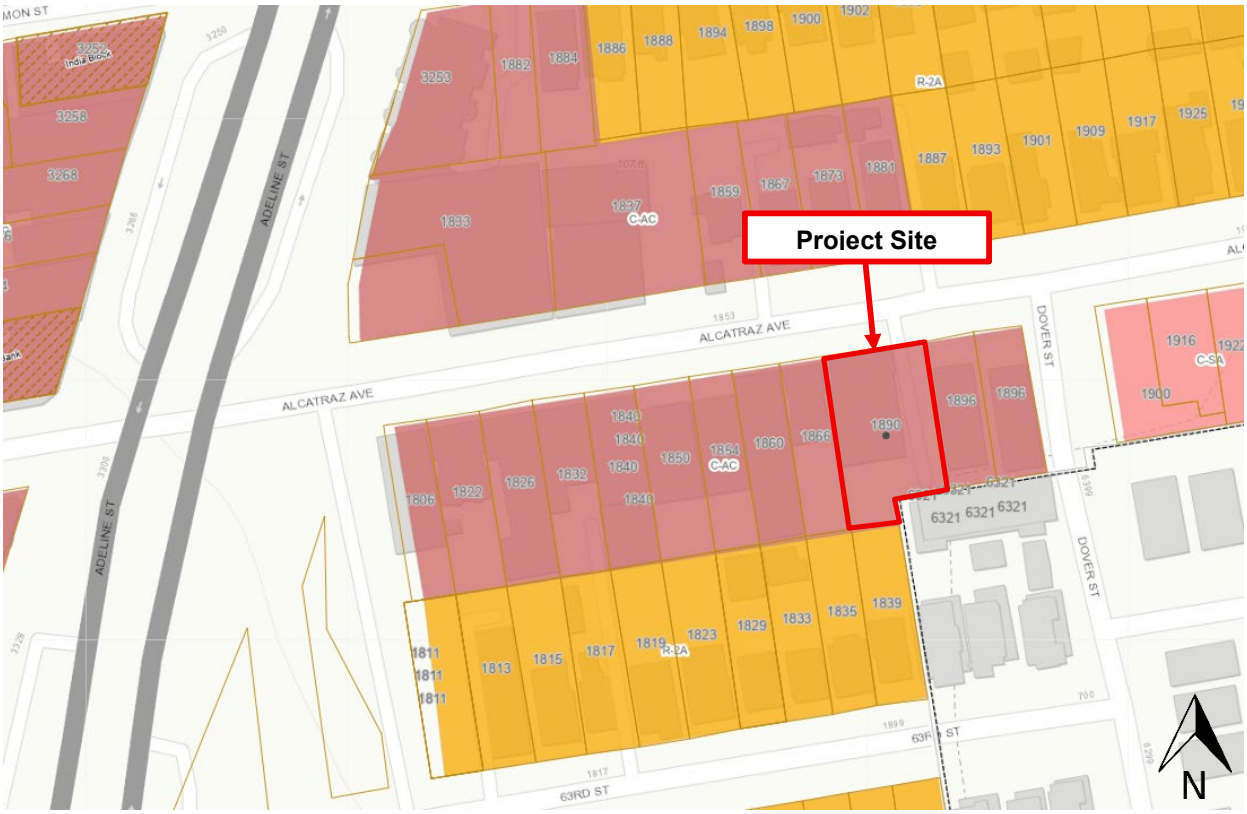

December 11, 2025

Use Permit for a Project at 1890 Alcatraz Avenue

Project Facts	Project Description:
Applicant: Canhui Li; City of Berkeley Department of Parks, Recreation, and Waterfront **Property Owner:** City of Berkeley **Project Address:** 1890 Alcatraz Avenue **Site Size:** .48 acres (21,015 sf) **GP Land Use:** Adeline Corridor Mixed Use (ACMU) **Zoning:** Adeline Corridor Commercial District (C-AC) **CEQA:** Exempt pursuant to Section 15303 (New Construction or Conversion of Small Structures) **Date Submitted:** December 31, 2024 **Date Deemed Complete:** April 4, 2025 **Project Planner:** Singeh Saliki	The applicant is seeking approval to demolish a 1-story commercial building (4,425 square feet) and construct a 2-story (39 feet and 4 inches) 6,016 square-foot community center with three off-street vehicle parking spaces and five bicycle parking spaces. **Zoning Permits Requested:** A Use Permit Public Hearing is required for the following permits: 1. **Demolition.** Use permit under BMC Section 23.326.070(A) **"Main Non-Residential Building"** to demolish a non-residential building. * 2. **New Construction**. Use permit under BMC Section 23.204.020 (A) **"Allowed Land Uses"** to construct a new community center. 3. **New Floor Area.** Use permit under BMC Section 23.204.030(A)(1) **"Floor Area Permit Requirements"** to create a new main building. * *Denotes required findings. **Staff Recommendation:** Staff recommends that ZAB determine the project is exempt from CEQA pursuant to Section 15303 of the CEQA Guidelines ("New Construction or Conversion of Small Structures") and approve ZP2024-0183 pursuant to Section 23.406.040 (E) "**Findings for Approval**" and subject to the attached Findings and Conditions of Approval.

Vicinity	**GP Land Use**	**Zoning**	**Current Use**
Subject Property	Adeline Corridor Mixed Use (ACMU)	Adeline Corridor Commercial (C-AC)	Health center
North	Adeline Corridor Mixed Use (ACMU)	Adeline Corridor Commercial (C-AC) and Restricted Multiple-Family Residential (R-2A)	Residential and commercial buildings
South	Mixed Use Residential (MDR)	Restricted Multiple-Family Residential (R-2A)	Single- and Two-family Residential
East	Adeline Corridor Mixed Use (ACMU	Adeline Corridor Commercial (C-AC)	Multi-family residential
West			Preschool

AERIAL

STREET ELEVATION

BACKGROUND

Subject Site

The subject site is located in South Berkeley, and consists of an approximately 9,700 square-foot parcel (Assessor's Parcel Number 52-1527-24-1). The site is generally level, sloping gently toward the west. It has frontage on the south side of Alcatraz Avenue and is on a block between Adeline Street to the West and Dover Street to the East. It is within the Adeline Corridor Commercial district and the Adeline Corridor Specific Plan area. It is East of the Lorin District, a state-registered historic district that includes several landmarked structures.

The area is characterized by commercial and residential buildings that are one to three stories tall. Commercial uses include a mix of retail, cultural, and community-based uses. The site is served by Alameda County Transit buses and is within a half-mile of the Ashby BART station. Alcatraz Avenue has bike lanes and on-street parking in both directions.

Site History

The site is developed with a one-story building (approximately 3,910 square feet) located on the northern edge of the property along Alcatraz Avenue. The site is accessed via a gated driveway from Alcatraz Avenue. The driveway runs along the eastern side of the property to a small parking lot and gated courtyard to the south behind the building.

The existing building was constructed in 1958 and operated first as a retail store. In 1972, the property was sold to the City of Berkeley who operated the South Berkeley Model Cities Office. The office served the community by operating a resource center for South Berkeley community members to find jobs and housing. The office also provided support services for youth in the South Berkeley community. The property was subsequently occupied by various health organizations throughout the 1980s. In 1989, the building was heavily renovated for the Berkeley Adult Health Center, which operated an office from 1989 to 2023. The building is currently vacant.

ANALYSIS

Project Scope

The proposed project would demolish the existing 1-story building to construct a new 6,016 square-foot community center (the African American Holistic Resource Center) and includes the following primary components:

- Two stories, 39 feet and 4 inches in height to the top of the roof parapet
- Three off-street vehicle parking spaces
- Five bicycle parking spaces

The community center would host services to benefit the community with education, employment, health, mental health, and housing advocacy and support. The building program includes: meditation garden, outdoor event space on the ground floor, offices, teaching kitchen, assembly spaces, conference rooms, library/media room, studios, and a rooftop event space with an edible garden.

Findings

Draft findings for approval can be found in Attachment 2 to the staff report.

Environmental Review

It is staff's recommendation that the project qualifies for a Class 3 Categorical Exemption pursuant to CEQA Guidelines Section 15303 ("New Construction or Conversion of Small Structures"). Section 15303 states that a Class 3 categorical exemption applies to construction and location of limited numbers of new, small facilities or structures; installation of small new equipment and facilities in small structures; and the conversion of existing small structures from one use to another where only minor modifications are made in the exterior of the structure. Section 15303(c) further specifies that new small structures can include non-residential structures up to 10,000 square feet in size in urbanized areas "on sites zoned for such use if not involving the use of significant amounts of hazardous substances."

- The proposed new building would be approximately 6,000 square feet, well under the 10,000 square feet cited in the Guidelines.
- The project site is zoned Adeline Corridor Commercial District (C-AC). A wide range of commercial and institutional uses are allowed uses in this district, including Community Centers (Berkeley Municipal Code Section 23.204.150 and Table 23.204-1); thus, the site is zoned for the proposed use.
- The proposed community center use and anticipated activities at the site, by their nature, would not involve the use of significant amounts of hazardous substances.

Therefore, the project meets the applicability requirements for a Class 3 categorical exemption pursuant to Section 15303 of the CEQA Guidelines.
Additionally, none of the exceptions to eligibility for a categorical exemption as listed under CEQA Guidelines Section 15300.2, apply to the project.

ADVISORY BODY REVIEW

Landmarks Preservation Commission Review: Demolition Referral

The project involves demolition of one commercial building over 40 years in age. A Historic Resources Evaluation (HRE) for the property was completed by Rincon Consultants on December 27, 2024 and found that the building is not eligible for federal, state, or local designation. Pursuant to BMC Section 23.326.070(C)(1) "Demolition of Nonresidential Buildings", the proposed demolition was referred to the Landmarks Preservation Commission (LPC) for review. The LPC reviewed the demolition referral on September 4, 2025, and took no action to designate the building as a City Landmark or Structure of Merit.

Design Review Committee Review: Preliminary Design Review

On October 16, 2025, the Design Review Committee (DRC) reviewed the project design for 1890 Alcatraz Avenue, gave a favorable recommendation on the preliminary design as presented, and provided the following direction for Final Design Review: ***Motion: (Muszynski, Woo) VOTE (5-0-0-2) Gaffney, Tam - absent***

Recommendations:

Site Design / Neighborhood Context

- *Consider if open space could be more accessible to neighbors.*
- *Recommend a display for site / project history.*
- *Designate as many public art locations as possible, including for future opportunities.*
- *Review signage at FDR; consider whether blade may be effective here; flat logo on the wall is too stagnant.*

Building Design / Details

- *Front stairwell - consider more subtlety.*
- *Metal screen - consider more transparency in lobby space.*
- *Stucco surfaces, especially near corners - develop with more details and/or colors so that walls look more finished.*
- *Screens - more welcoming for pedestrian scale; consider more transparency.*
- *Gate design should work with panel design.*
- *Floor depth - impacts elevations with solid bands. Further refine elevations for FDR.*
- *Upper stucco wall / top parapet - consider more detail so it doesn't appear as heavy.*
- *Corner bay could be more dynamic; consider color change at roof.*
- *Consider seating at top of ancestral stair on both the north and south ends.*
- *Recommend local artist for metal screen work.*

Landscaping

- *Street trees - recommend adding trees where possible.*
- *Consider reorganizing the proposed parking to allow more landscape.*
- *More trees, including on the back parcel edge and the northeast corner; any new additions to the landscape plan should be native.*
- *Recommend planting strip at curb if possible.*
- *Recommend more permeable surfaces in parking area.*

Community Meeting

Prior to submitting this application to the city, the applicant (Department of Parks, Recreation, and Waterfront Staff) gathered community feedback on the proposed project over the past two years through the following efforts:

- Community presentation and listening sessions during Juneteenth celebration in 2023, one located at the project site, a second at the Juneteenth Celebration near the project site, to seek input on the programming and design of the facility.

- Programming Design Meeting in July 2023 located at the Francis Albrier Community Center and advertised in the project neighborhood.

- Conceptual Design Meeting in June 2024, located at the Francis Albrier Community Center and advertised in the project neighborhood.

- Community presentation and listening sessions during Juneteenth celebration in 2024, located at the Juneteenth Celebration near the project site, to show conceptual designs and seek feedback.

- Project Website to advertise events and inform the public about the project.

Feedback from the community engagement events was incorporated into the project design. A summary of the community feedback is included as Attachment 6.

The applicant installed a pre-application poster on the site in December 2024. While the application was under review, staff received several emails from community member Jacob Aronson between May and November 2025. Mr. Aronson expressed concerns regarding potential environmental and health impacts on the adjacent preschool and requested updates on the project's status. Staff responded with information about the review process and clarified that the use permit will include conditions of approval to ensure compliance with the Adeline Corridor Specific Plan Area Mitigation Monitoring and Reporting Program, as well as requirements from the Toxics Management Division.

On November 25, 2025, the City mailed public hearing notices to property owners and tenants within 300 feet of the project site, and to interested neighborhood organizations. The City also posted notices in three locations within the neighborhood. The City received three letters from community members expressing concerns about the project's potential impacts on the adjacent preschool and nearby residents. The concerns focused on environmental issues (soil and air quality), construction timing and noise, and pedestrian and vehicular circulation. The commenters requested that mitigation measures be included as conditions of approval to address these concerns.

See Attachment 7 for all public comment letters.

POLICY CONSISTENCY

Adeline Corridor Specific Plan Consistency

The Adeline Corridor Specific Plan, adopted December 8, 2020, contains several policies applicable to the project, including the following:

1. **Land Use 3.1 Overall Mix of Uses:** Encourage a unique, diverse mix of community spaces, service, retail, housing, and creative workspaces along the corridor.
2. **Land Use 3.3 Building Design:** Ensure that the massing, articulation, and design of buildings provides visual interest, integrates with the neighborhood, and creates a pleasant, pedestrian-oriented public realm.
3. **Land Use 3.4 Neighborhood Transitions:** Ensure that new development provides appropriate transitions in height, bulk, and intensity to adjacent residential neighborhoods along the Adeline Corridor.
4. **Land Use 3.5 Ground Floor Frontage and Facades:** Ensure that ground floor uses and façade design in the Adeline Area positively contribute to the pedestrian experience and street character.
5. **Land Use 3.8 Sustainable Building Design and Energy Use:** Ensure that the design of new buildings incorporates features that address energy use and further the goals of Berkeley's Climate Action Plan.
6. **Economic Opportunity 5.5 New Business and Uses:** Attract and encourage new businesses and uses.

Evidence: The proposed project introduces a multi-use community center offering a range of services and creative spaces, contributing to a vibrant mix of uses along the corridor. The two-story building height is consistent with the surrounding context of one- to three-story structures. The ground floor includes active uses and a metal screen design that engages the street and contributes to a welcoming public realm. As new construction, the project includes sustainability features such as a rooftop edible garden and a photovoltaic shading system. These elements contribute to energy efficiency and align with the City's sustainability goals. The project supports economic opportunity by offering job training, advocacy, and support services, which can help residents access employment and housing. Overall, the proposed African American Holistic Resource Center is consistent with the goals and policies of the Adeline Corridor Specific Plan by promoting a diverse mix of uses, contributing to a pedestrian-friendly environment, and providing valuable community services while maintaining compatibility with the surrounding neighborhood.

General Plan Consistency

The 2002 General Plan contains several policies applicable to the project, including the following:

1. **Policy LU-3 Infill Development:** Encourage infill development that is architecturally and environmentally sensitive, embodies principles of sustainable planning and construction, and is compatible with neighboring land uses and architectural design and scale.
2. **Policy LU-7 Neighborhood Quality of Life, Action A:** Require that new development be consistent with zoning standards and compatible with the scale, historic character, and surrounding uses in the area.
3. **Policy LU-46 Adeline Corridor Mixed Use, Action B:** Leverage publicly owned land, such as the Ashby BART Station Area surface parking lots, and the right-of-way to maximize affordable housing, culturally and historically significant uses such as the Berkeley Community Flea Market, community facilities and public improvements desired by the community.
4. **Policy ED-4 Neighborhood and Avenue Commercial Districts, Action 1:** Assist with the retention and development of existing businesses or attract new businesses that serve local neighborhood needs.

Evidence: The project redevelops an existing site with a two-story building that fits the neighborhood scale. It includes sustainable features such as a rooftop garden and photovoltaic shading, and supports walkability and community use. The project complies with zoning standards and is compatible in scale and use with surrounding development. It enhances neighborhood quality of life by offering community-focused services. The project is located on public land and provides culturally relevant services for the African American community, reflecting priorities identified in the Adeline Corridor Specific Plan. The center introduces job training, advocacy, and support services that contribute to local economic opportunity and neighborhood-serving resources. Overall, the proposed African American Holistic Resource Center supports multiple General Plan policies by promoting sustainable infill development, enhancing neighborhood character, and advancing equitable, community-driven goals for the Adeline Corridor.

Table 1-3: Project Chronology, Special Characteristics, Development Standards

Table 1: Project Chronology

Date	Action
December 31, 2024	Application Submitted
April 4, 2025	Application deemed complete
May 2025 – November 2025	Application processing [a]
September 4, 2025	Landmarks Preservation Commission hearing (demo referral)
October 16, 2025	Design Review Committee meeting
November 25, 2025	Public hearing notices mailed/posted
December 11, 2025	ZAB hearing

Notes:
a. Application processing reflects the project compliance review after the application is deemed complete. Submittals are reviewed within 30 days of receipt, pursuant to the Permit Streamlining Act.

Table 2: Special Characteristics

Characteristic	Applicability	Explanation
Affordable Child Care Fee for qualifying non-residential projects (Per Resolution 66,618-N.S.)	No	These fees apply to net newly constructed nonresidential gross floor area over 7,500 square feet. The project includes less than 7,500 square feet of net new commercial space. Therefore, the project is not subject to this fee.
Affordable Housing Fee for qualifying non-residential projects (Per Resolution 66,617-N.S.)		
Affordable / Inclusionary Housing Requirements (BMC Chapter 23.328)	No	The project is not a housing development project, as defined in BMC 23.328.020[a].
Alcohol Sales/Service	No	The project is not proposing any alcohol sales or service with this permit.
Bird Safe Buildings (BMC Section 23.304.150)	Yes	The project is subject to these requirements and a condition of approval to demonstrate compliance at building permit is included.
Coast Live Oak Trees (BMC Chapter 6.52)	No	There are no Coast Live Oak (*Quercus agrifolia*) trees on the project site.
Creeks	No	No creek or culvert, as defined by BMC Chapter 17.08, exists on or within 30 feet of the project site.
Hard Hats (BMC Chapter 13.107)	No	These provisions do not apply to this project because the project is less than 50,000 square feet.
Historic Resources	No	The existing building is more than 40 years old and was referred to the Landmarks Preservation Commission (LPC) for review on September 4, 2025. The LPC took no action to initiate a Landmark or Structure of Merit designation and recommended that the ZAB approve the demolition.

Characteristic	Applicability	Explanation
Housing Accountability Act (HAA) (Gov't Code Section 65589.5(j))	No	The project does not meet the definition of a "Housing Development Project" per Government Code Section 65589.5(h)(2)[b].
Housing Crisis Act of 2019 (SB 330)	No	The project does not meet the definition of a "Housing Development Project" per Government Code Section 65589.5(h)(2)[b].
Rent Controlled Units	No	No rent-controlled units would be demolished.
Residential Preferred Parking (RPP)	No	The site is not located in an RPP zone. The project does not propose residential units.
Seismic Hazards (SHMA)	Yes	The project site is located within an area susceptible to liquefaction as shown on the State Seismic Hazard Zones map. [c] The geotechnical investigation (Attachment 8) conducted a liquefaction evaluation and concluded it is not a concern on the design consideration.
Soil/Groundwater Contamination	Yes	The project site is located within the City's Environmental Management Area. A Phase I Environmental Site Assessment (ESA) (Attachment 9) conducted by Ninyo & Moore Consultants on March 25, 2025, revealed no evidence of Recognized Environmental Conditions (RECs), Controlled RECs (CRECs), or Historical RECs (HRECs) in connection with the site, and no RECs were identified on the adjoining properties. Based on the Phase I findings, no further investigation is recommended at this time. Standard Conditions of Approval related to hazardous materials would apply.
Transit	Yes	The project site is served by multiple Alameda County Transit bus lines, and is within a half mile from the Ashby Bay Area Rapid Transit (BART) Station.

Notes:

a. BMC 23.328.020(E) defines a "Housing Development Project" for purposes of inclusionary housing requirements as "a development project, including a Mixed-Use Residential project involving the new construction of at least one Residential Unit. Projects with one or more buildings or projects including multiple contiguous parcels under common ownership or control shall be considered as a sole Housing Development Project and not as individual projects.

b. Government Code Section 65589.5(h)(2) "Housing development project" means a use consisting of any of the following: (A) residential units only, (B) mixed-use developments consisting of residential and nonresidential uses in which at least two-thirds of the square footage is designated for residential use, and (C) transitional or supportive housing. Government Code Section 65905.5(b)(3)(C) "Housing development project" includes a proposal to construct a single dwelling unit. This subparagraph shall not affect the interpretation of the scope of paragraph (2) of subdivision (h) of Section 65589.5.

c. California Department of Conservation. DOC Maps: Geologic Hazards. Available: https://maps.conservation.ca.gov/geologichazards/

Table 3: Project Data and C-AC Adeline Corridor Commercial District Development Standards BMC Sections 23.204.150 and 23.322 Parking and Loading

Standard		Existing	Addition/ (Reduction)	Proposed Total	Permitted/ Required
Lot Area (sq. ft.)		9,755	No change	No change	N/A
Gross Floor Area (sq. ft.)		3,910	2,106	6,016	N/A
Floor Area Ratio		.40	.25	.65	2.8
Building Height	Maximum (ft.)	-	-	39'-4"	45'
	Stories	1	1	2	3
Building Setbacks (ft. - in.)	Front (North) (Alcatraz)	0'	1'-2"	1'-2"	0'
	Interior Side (East)	28'- 2''	(2'- 8'')	25'-6"	0'
	Interior Side (West)	0'	No change	0'	0'
	Rear (South)	34' to 54'	19'	53' to 73'	10'; 20' when height exceeds 35'
Lot Coverage (%)		40	(9)	31	100%
Usable Open Space (sq. ft.)		5,845	839	6,684	0
Parking	Automobile	6	(3)	3	0 per AB 2097[a]
	Bicycle	0	5	5	3 (1 per 2,000 sq. ft)

Abbreviations: sq. ft. = square feet; max. = maximum; min. = minimum; n/a = not applicable; % = percent; avg. = average, ft = feet ('), in. = inches (")

Notes:

[a] AB-2097, effective January 1, 2023, prohibits local jurisdictions from requiring minimum parking for most non-residential uses located within a 1/2 mile of public transit.

Zoning Adjustments Board Findings

App #ZP2024-0183

December 11, 2025

Use Permit for a Project at 1890 Alcatraz Avenue

Project Facts	Project Description:
Applicant: Canhui Li; City of Berkeley Department of Parks, Recreation, and Waterfront **Property Owner**: City of Berkeley **Project Address:** 1890 Alcatraz Avenue **Site Size:** .48 acres (21,015 sf) **GP Land Use:** Adeline Corridor Mixed Use (ACMU) **Zoning:** Adeline Corridor Commercial District (C-AC) **CEQA:** Exempt pursuant to Section 15303 (New Construction or Conversion of Small Structures) **Submittal Date:** December 31, 2024 **Date Deemed Complete:** April 4, 2025 **Project Planner:** Singeh Saliki	The applicant is seeking approval to demolish a 1-story commercial building (4,425 square feet) and construct a 2-story (39 feet and 4 inches) 6,016 square-foot community center with three off-street vehicle parking spaces and five bicycle parking spaces. **Zoning Permits Requested:** 1. **Demolition.** Use permit under BMC Section 23.326.070(A) **"Main Non-Residential Building"** to demolish a non-residential building. * 2. **New Construction**. Use permit under BMC Section 23.204.020 (A) **"Allowed Land Uses"** to construct a new community center. 3. **New Floor Area.** Use permit under BMC Section 23.204.030(A)(1) **"Floor Area Permit Requirements"** to create a new main building. * *Denotes required findings. **Staff Recommendation** Staff recommends that ZAB determine the project is exempt from CEQA pursuant to Section 15303 of the CEQA Guidelines ("New Construction or Conversion of Small Structures") and approve ZP2024-0183 pursuant to Section 23.406.040 (E) "**Findings for Approval**" and subject to the attached Findings and Conditions of Approval.

I. CEQA

A. The project is categorically exempt from the requirements of CEQA pursuant to CEQA Guidelines Section 15303 ("New Construction or Conversion of Small Structures").

Evidence: The proposed new building would be approximately 6,000 square feet, well under the 10,000 square feet cited in the Guidelines. The project site is zoned Adeline Corridor Commercial District (C-AC). A wide range of commercial and institutional uses are allowed in this district, including Community Centers (Berkeley Municipal Code Section 23.204.150 and Table 23.204-1); thus, the site is zoned for the proposed use. The proposed community center use and anticipated activities at the site, by their nature, would not involve the use of significant amounts of hazardous substances.

II. FINDINGS FOR APPROVAL

A. As required by BMC Section 23.406.040 (E) (1) "Findings for Approval," the ZAB finds that the proposed project or use:

1. Will not be detrimental to the health, safety, peace, morals, comfort, or general welfare of persons residing or visiting in the area or neighborhood of the proposed use; and

Evidence: The project will not be detrimental to the health, safety, peace, morals, comfort, or general welfare of persons residing or visiting in the area or neighborhood because the project is consistent with all applicable C-AC District standards, including height and lot coverage. The building is placed in the northwest corner of the site, with larger setbacks on the east and south sides to reduce privacy impacts on nearby residences.

Shadows: According to the shadow studies submitted for the project (see Attachment 3, Project Plans – Sheets A-205 through A-207), new shadow impacts would occur in the summer and fall months around the hours of sunrise and sunset, on the residential building to the east. All other new shadows would impact the non-residential building to the west of the site. While the project will create some new shadow impacts on nearby residences, these will be limited in area, occur only during certain times of the year, and last for just a few hours each day. The extent of the new shadow impact from the project on the site's adjacent areas would be consistent with what is typical in an urban setting and will be considered reasonable.

Air: The proposed project will be consistent with the existing development and building-to-building separation pattern, or air, in this C-AC District neighborhood. Because the project will meet the required setbacks, the project will not unreasonably obstruct air.

Views: The view corridor as defined in BMC Section 23.502.020 (Glossary) includes views of the Berkeley Hills, San Francisco Bay, Mt. Tamalpais, or a significant landmark such as the campanile, Golden Gate Bridge, or any other views that substantially enhances the value and enjoyment of real property. The project's proposed location is in a generally flat neighborhood, developed with one- to three-story buildings, and includes some mature vegetation that obscures these views from off-street angles. Because significant views are generally not available in this neighborhood due to grade, current development patterns, and mature vegetation, the proposed project will not create detrimental impacts to views.

Finally, the project will be subject to the City's standard conditions of approval regarding construction noise and air quality, waste diversion, toxics, and stormwater requirements.

2. Will not be detrimental or injurious to property and improvements of the adjacent properties, the surrounding area or neighborhood, or to the general welfare of the City.

   Evidence: The project will not be detrimental or injurious to property and improvements of the adjacent properties, the surrounding area or neighborhood, or to the general welfare of the City because the proposed two-story community center is appropriately scaled for the neighborhood, which includes one- to three-story buildings. The project provides essential community services—health, education, housing, and employment support—enhancing public welfare. Outdoor spaces, including a meditation garden and rooftop garden, promote well-being and sustainability. In addition, the findings for required discretionary permits are satisfied per the Evidence in B and C below.

B. As required by BMC Section 23.406.040(E)(2) "Findings for Approval", to approve the Use Permit, the ZAB must also make any other Use Permit findings specifically required by the Zoning Ordinance for the proposed project.

Demolition

1. Pursuant to BMC Section 23.326.070(D) "Demolitions of Non-Residential Buildings," a Use Permit for demolition of a main building used for non-residential purposes on any lot in a non-residential district may be approved only if the ZAB finds that:
   a) The demolition will not be materially detrimental to the commercial needs and public interest of any affected neighborhood or the City of Berkeley; and
   b) The demolition:
      1) Is required to allow a proposed new building or other proposed new use;
      2) Will remove a building which is unusable for activities which are compatible with the purposes of the district in which it is located or which is infeasible to modify for such uses;

3) Will remove a structure which represents an uninhabitable attractive nuisance to the public; or
4) Is required for the furtherance of specific plans or projects sponsored by the City of Berkeley or other local district or authority upon a demonstration by the applicant that it would be infeasible to obtain prior or concurrent approval for the new construction or new use.

Evidence: The proposed project includes the demolition of an existing 4,425 square-foot commercial building and the construction of a 6,016 square-foot community center with three off-street parking spaces and five bicycle parking spaces. The demolition will not be materially detrimental to the commercial needs and public interest because the new building will provide community services, and the use will be compatible with adjacent and nearby commercial and residential uses in the C-AC District. The existing building cannot accommodate the proposed program, making demolition necessary. The project is located on public land and provides culturally relevant services for the African American community, reflecting priorities identified in the Adeline Corridor Specific Plan.

New Floor Area

2. Pursuant to BMC 23.204.030(A)(4), "C-AC Findings," to approve a Use Permit for new floor area in the C-AC district, the review authority must find that the proposed use or structure will:
    a) Be compatible with the purposes of the District;
    b) Be compatible with the design and character within the District and the adjacent residential neighborhoods;
    c) Encourage utilization of public transit and off-street parking facilities in the area of the proposed building; and
    d) If a new residential development, that the proposed use or structure facilitates construction of affordable housing as defined by the US Department of Housing and Urban Development (HUD) Guidelines.

Evidence: The project will be compatible with the purpose of the C-AC District because it will implement the policies of the Adeline Corridor Specific Plan. As a community center, it will offer services and community spaces that add to the area's mix of uses and promote economic opportunity. The two-story height is consistent with the surrounding context of one- to three-story buildings. The active ground floor and metal screen design help create an engaging and welcoming street presence. With only three car parking spaces and five bike spaces, the project encourages public transit use. The site is well-served by AC Transit buses on Alcatraz Avenue and Adeline Street and is within half a mile of the Ashby BART station.

Use Permit in C-AC District

3. Pursuant to BMC 23.204.150(G), "Permit Findings," to approve any AUP or Use Permit for a project in the C-AC district, the review authority must make the findings in Section 23.406.040--Use Permits and find that the proposed use or structure:
    a) Is consistent with the purpose of the district;
    b) Is compatible in design and character with the district and the adjacent residential neighborhoods;
    c) Encourages utilization of public transit and off-street parking facilities in the area of the proposed building; and
    d) Complies with the Adeline Corridor Specific Plan's adopted Mitigation Monitoring and Reporting Program (MMRP).

    Evidence: As discussed above, the project will be consistent with the purpose of the district, will be compatible in design and character with the district and adjacent residential neighborhoods, and will encourage utilization of public transit and off-street parking facilities. The project will comply with the Adeline Corridor Specific Plan's Mitigation Monitoring and Reporting Program during review of the building permit and during construction.

C. As required by BMC Section 23.406.040(E)(3) "Findings for Approval", when taking action on a Use Permit, the ZAB shall consider in its findings:

1. The proposed land use; and

2. The structure or addition that accommodates the use.

    Evidence: The proposed community center meets the findings for approval because it is an allowed land use in the C-AC district and will provide programs and services desired by the community (based on the feedback from several community engagement events). The proposed 2-story design complies with the zoning standards and fits well within the surrounding neighborhood of one- to three-story buildings.

D. As required by BMC Section 23.406.040(E)(4) "Findings for Approval", required findings shall be made based on the circumstances existing at the time a decision is made on the application.

    Evidence: The required findings are satisfied because the project has been determined to be fully compliant with all applicable regulations based on the project plans submitted on November 14, 2025, included as analysis in this report, and evaluated based on the existing conditions of the subject site and surrounding neighborhood at the time of decision.

PLANNING AND DEVELOPMENT

USE PERMIT ZP2024-0183 CONDITIONS OF APPROVAL

December 11, 2025

1890 Alcatraz Avenue

Use Permit #ZP2024-0183 to demolish a 1-story commercial building (4,425 square feet) and construct a 2-story (39 feet and 4 inches) 6,016 square-foot community center with three off-street vehicle parking spaces and five bicycle parking spaces.

I. STANDARD CONDITIONS OF APPROVAL FOR ALL PROJECTS

Pursuant to Berkeley Municipal Code (BMC) Title 23 Zoning Ordinance and Title 13 Public Peace, Morals, and Welfare, the following conditions, as well as all other applicable provisions of the Zoning Ordinance, apply to this Permit:

1. **Conditions and the Adeline Corridor Specific Plan Mitigation Monitoring and Reporting Program Shall be Printed on Plans.** The conditions of this Permit shall be printed on the *second* sheet of each plan set submitted for a building permit pursuant to this Use Permit, under the title 'Use Permit Conditions.' *Additional sheets* may also be used if the *second* sheet is not of sufficient size to list all of the conditions. The sheet(s) containing the conditions shall be of the same size as those sheets containing the construction drawings.
2. **Compliance Required (BMC Section 23.102.050).** All land uses and structures in Berkeley must comply with the Zoning Ordinance and all applicable City ordinances and regulations. Compliance with the Zoning Ordinance does not relieve an applicant from requirements to comply with other federal, state, and City regulations that also apply to the property.
3. **Approval Limited to Proposed Project and Replacement of Existing Uses (BMC Sections 23.404.060(B)(1) and (2)):**
   - **A.** This Permit authorizes only the proposed project described in the application. In no way does an approval authorize other uses, structures or activities not included in the project description.
   - **B.** When the City approves a new use that replaces an existing use, any prior approval of the existing use becomes null and void when permits for the new use are exercised (e.g., building permit or business license issued). To re-establish the previously existing use, an applicant must obtain all permits required by the Zoning Ordinance for the use.

4. **Conformance to Approved Plans (BMC Section 23.404.060(B)(4)).** All work performed under an approved permit shall comply with the approved plans and any conditions of approval.
5. **Exercise and Expiration of Permits (BMC Section 23.404.060(C)):**
   - **A.** A permit authorizing a land use is exercised when both a valid City business license is issued (if required) and the land use is established on the property.
   - **B.** A permit authorizing construction is exercised when both a valid City building permit (if required) is issued and construction has lawfully begun.
   - **C.** The Zoning Officer may declare a permit lapsed if it is not exercised within one year of its issuance, except if the applicant has applied for a building permit or has made a substantial good faith effort to obtain a building permit and begin construction. The Zoning Officer may declare a permit lapsed only after 14 days written notice to the applicant. A determination that a permit has lapsed may be appealed to the ZAB in accordance with BMC Chapter 23.410, Appeals and Certification.
   - **D.** A permit declared lapsed shall be void and of no further force and effect. To establish the use or structure authorized by the lapsed permit, an applicant must apply for and receive City approval of a new permit.
6. **Permit Remains Effective for Vacant Property (BMC Section 23.404.060(D)).** Once a Permit for a use is exercised and the use is established, the permit authorizing the use remains effective even if the property becomes vacant. The same use as allowed by the original permit may be re-established without obtaining a new permit, except as set forth in Standard Condition #5 above.
7. **Permit Modifications (BMC Section 23.404.070).** No change in the use or structure for which this Permit is issued is permitted unless the Permit is modified by the Board. The Zoning Officer may approve changes to plans approved by the Board, consistent with the Board's policy adopted on May 24, 1978, which reduce the size of the project.
8. **Permit Revocation (BMC Section 23.404.080).** The City may revoke or modify a discretionary permit for completed projects due to: 1) violations of permit requirements; 2) Changes to the approved project; and/or 3) Vacancy for one year or more. However, no lawful residential use can lapse, regardless of the length of time of the vacancy. Proceedings to revoke or modify a permit may be initiated by the Zoning Officer, Zoning Adjustments Board (ZAB), or City Council referral.

9. **Hold Harmless.** The permittee agrees as a condition of approval of this application to indemnify, protect, defend with counsel selected by the City, and hold harmless, the City, and any agency or instrumentality thereof, and its elected and appointed officials, officers, employees and agents, from and against any and all liabilities, claims, actions, causes of action, proceedings, suits, damages, judgments, liens, levies, costs and expenses of whatever nature, including reasonable attorney's fees and disbursements (collectively, "Claims") arising out of or in any way relating to the approval of this application, any actions taken by the City related to this entitlement, or any environmental review conducted under the California Environmental Quality Act, Public Resources Code Section 210000 et seq., for this entitlement and related actions. The indemnification shall include any Claims that may be asserted by any person or entity, including the permittee, arising out of or in connection with the approval of this application, whether or not there is concurrent, passive or active negligence on the part of the City, and any agency or instrumentality thereof, and its elected and appointed officials, officers, employees and agents. The permittee's duty to defend the City shall not apply in those instances when the permittee has asserted the Claims, although the permittee shall still have a duty to indemnify, protect and hold harmless the City.

II. ADDITIONAL CONDITIONS IMPOSED BY THE ZONING ADJUSTMENTS BOARD

Pursuant to BMC Section 23.404.050(H) Conditions of Approval, the Zoning Adjustments Board attaches the following additional conditions to this Permit:

Prior to Submittal of Any Building Permit:

10. **Project Liaison.** The applicant shall include in all building permit plans and post onsite the name and telephone number of an individual empowered to manage construction-related complaints generated from the project. The individual's name, telephone number, and responsibility for the project shall be posted at the project site for the duration of the project in a location easily visible to the public. The individual shall record all complaints received and actions taken in response, and submit written reports of such complaints and actions to the project planner on a weekly basis. Please designate the name of this individual below:

☐ **Project Liaison** _____

Name Phone #

11. **Bird Safe Buildings.** Prior to submittal of the building permit, the applicant shall demonstrate compliance with the applicable bird safe building provisions in BMC Section 23.304.150, Bird Safe Buildings.

12. **Compliance with Conditions of Approval and Environmental Mitigations.** The building permit application is subject to verification of compliance of these Conditions of Approval and the adopted Adeline Corridor Specific Plan Mitigation Monitoring and Reporting Program (Attachment 3 - Exhibit A). The applicant shall be responsible for demonstrating compliance with all conditions of approval and mitigation measures per the timeline set forth by this use permit. The applicant shall deposit $10,000 with the City, or less with the approval of the Zoning Officer, to pay for the cost of monitoring compliance with these Conditions of Approval and other applicable conditions and regulations. Should compliance-monitoring expenses exceed the initial deposit, the applicant shall deposit additional funds to cover such additional expenses upon the request of the Zoning Officer; any unused deposit will be refunded to the applicant.

Prior to Issuance of Any Building & Safety Permit (Demolition or Construction)

13. **Demolition.** Demolition of the existing building cannot commence until a complete application is submitted for the replacement building. In addition, all plans presented to the City to obtain a permit to allow the demolition are subject to these conditions.

14. **Construction Noise Management -** Public Notice Required. At least two weeks prior to initiating any construction activities at the site, the applicant shall provide notice to businesses and residents within 500 feet of the project site. This notice shall at a minimum provide the following: (1) project description, (2) description of construction activities during extended work hours and reason for extended hours, (3) daily construction schedule (i.e., time of day) and expected duration (number of months), (4) the name and phone number of the Project Liaison for the project that is responsible for responding to any local complaints, and (5) that construction work is about to commence. The liaison would determine the cause of all construction-related complaints (e.g., starting too early, bad muffler, worker parking, etc.) and institute reasonable measures to correct the problem. A copy of such notice and methodology for distributing the notice shall be provided in advance to the City for review and approval.

15. **Construction Phases.** The applicant shall provide the Zoning Officer with a schedule of major construction phases with start dates and expected duration, a description of the activities and anticipated noise levels of each phase, and the name(s) and phone number(s) of the individual(s) directly supervising each phase. The Zoning Officer or his/her designee shall have the authority to require an on-site meeting with these individuals as necessary to ensure compliance with these conditions. The applicant shall notify the Zoning Officer of any changes to this schedule as soon as possible.

16. **Construction and Demolition Diversion.** Applicant shall submit a Construction Waste Management Plan that meets the requirements of BMC Chapter 19.37 including 100 percent diversion of asphalt, concrete, excavated soil and land-clearing debris and a minimum of 65 percent diversion of other nonhazardous construction and demolition waste.

17. **Toxics.** The applicant shall contact the Toxics Management Division (TMD) at 1947 Center Street or (510) 981-7470 to determine which of the following documents are required and timing for their submittal:

A. **Phase I and Phase II Environmental Site Assessment (ESA) (per ASTM 1527).** A recent Phase I ESA (less than 2 years old) shall be submitted to the Toxics Management Division for developments for: all new commercial, industrial and mixed-use developments and all improvement projects that require work 5 or more feet below grade, and all new residential buildings with more than four dwelling units located in the Environmental Management Area (or EMA). The EMA can be viewed at: City of Berkeley Community GIS Portal (arcgis.com)

B. Depending on the findings in the Phase I, a Phase II or additional investigation may be necessary. Any available soils and groundwater analytical data available for projects listed in this section must also be submitted to TMD.

C. **Environmental Site Clearance.** The applicant shall provide environmental screening clearance from either the San Francisco Bay Regional Water Quality Control Board (RWQCB), Department of Toxic Substances Control (DTSC), or the Alameda County Department of Environmental Health's Local Oversight Program (LOP). Clearance from one of these regulatory agencies will ensure that the property meets development investigation and cleanup standards for the specific use proposed on the property. Environmental screening clearance shall be submitted to the City of Berkeley's Toxics Management Division prior to issuance of any building permits.

D. **Soil and Groundwater Management Plan**. A site-specific Soil and Groundwater Management Plan (SGMP) shall be submitted to Toxics Management Division (TMD) for all non-residential projects, and residential or mixed-use projects with more than four dwelling units, that: (1) are in the Environmental Management Area (EMA), as shown on the most recent City of Berkeley EMA map, and (2) propose any excavations deeper than 5 feet below grade or if significant soils removal is anticipated. The SGMP shall be submitted to the TMD with the project's building permit application and shall be approved by TMD prior to issuance of the building permit.

The SGMP shall comply with the hazardous materials and waste management standards required by BMC Section 15.12.100, the stormwater pollution prevention requirements of San Francisco Bay Regional Water Quality Control Board's Order No. R2-2009-0074, California hazardous waste generator regulations (Title 22 California Code of Regulations (CCR) 66260 et seq.), and the East Bay Municipal Utility District's Ordinance 311, and shall include the following:

i. procedures for soil and groundwater management including identification of pollutants and disposal methods;

ii. procedures to manage odors, dust and other potential nuisance conditions expected during development;

iii. notification to TMD within 24 hours of the discovery of any previously undiscovered contamination; and

iv. the name and phone number of the individual responsible for implementing the SGMP and who will respond to community questions or complaints.

TMD may require additional information or impose additional conditions as deemed necessary to protect human health and the environment. All requirements of the approved SGMP shall be deemed conditions of approval.

E. Demolitions & Renovations – Building Materials Survey. A hazardous materials survey for building materials and plans on hazardous materials and hazardous waste removal and disposal is required and must be prepared by qualified professionals, and submitted to the Toxics Management Division (TMD) prior to issuance of the building permit.

i. The survey shall include the identification of all materials to be disturbed for lead-based paints, PCB containing equipment and caulking, hydraulic fluids, refrigerants, treated wood, and mercury containing devices (including fluorescent light bulbs and mercury switches), asbestos and other hazardous materials and chemicals.

ii. If asbestos is identified, Bay Area Air Quality Management District Regulation 11-2-401.3 a notification must be made and the J number must be made available to the City of Berkeley Permit Service Center. Contractors must follow state regulations where there is asbestos-related work involving 100 square feet or more of asbestos containing material (8 Cal. Code Regs. §1529, §341.6 et seq.)

iii. The report to the TMD shall include, in addition to the survey, plans on hazardous materials and hazardous waste removal and disposal that comply with State and Federal codes including California Code of Regulations (CCR) 66260 et seq.

iv. Documentation evidencing disposal of hazardous waste in compliance with the survey shall be submitted to TMD within 30 days of the completion of the demolition.

Please note, the PCB Screening Form required by Public Works, Engineering, is a separate requirement and does not address the PCB identification requirement of the Toxics Management Division.

F. Hazardous Materials Business Plan. A Hazardous Materials Business Plan (HMBP) in compliance with BMC Section 15.12.040 and California Health & Safety Code, Chapter 6.95 Div. 20, shall be submitted to the Toxics Management Division through the California Environmental Reporting System: http://cers.calepa.ca.gov/ for chemicals used or stored on site during construction that exceed reporting thresholds. The reporting is required if your facility stores or handles hazardous materials in aggregate quantities equal to or greater than 55 gallons for liquids, 500 pounds for solids, or 200 cubic feet of compressed gases, or generates any quantity of hazardous waste. This includes welding gases, emergency generator fuel, paints, etc.

Additionally, the business occupant must submit an HMBP within 30 days of starting operations.

G. Petroleum Storage. An (SPCC) Plan is required to be prepared and implemented for facilities with any one of the following:

i. aggregate aboveground petroleum storage capacities of 1,320 gallons or more stored in aboveground storage containers, tanks, oil-filled equipment, or

ii. one or more tank(s) in an underground area (TIUGA) with petroleum storage capacities of 55 gallons or greater. More information on TIUGAs can be found here: https://osfm.fire.ca.gov/divisions/pipeline-safety-and-cupa/certified-unified-program-agency-cupa/aboveground-petroleum-storage-act/tank-in-an-underground-area-tiuga/

The SPCC plan must be prepared prior to beginning operations and you must submit facility information to Toxics Management Division (TMD) through the California Environmental Reporting System: http://cers.calepa.ca.gov/. The SPCC plan will be reviewed during the site inspection and shall not be submitted in CERS or to the TMD.

Prior to Issuance of Any Building (Construction) Permit

18. **Final Design Review.** The Project requires approval of a Final Design Review application by the Design Review Committee.

19. **HVAC Noise Reduction.** Prior to the issuance of building permits, the project applicant shall submit plans that show the location, type, and design of proposed heating, ventilation, and cooling (HVAC) equipment. In addition, the applicant shall provide product specification sheets or a report from a qualified acoustical consultant showing that operation of the proposed HVAC equipment will meet the City's exterior noise requirements in BMC Section 13.40.050. The City's Planning and Development Department shall review the submitted plans, including the selected HVAC equipment, to verify compliance with exterior noise standards.

20. **Solar Photovoltaic (Solar PV) and Battery Energy Storage Systems (ESS).** A solar PV system shall be installed, subject to specific limited exceptions, as specified by the Berkeley Energy Code (BMC Chapter 19.36). Energy storage system (ESS) readiness (new single-family, duplex, and townhouse homes) or ESS installation (new multifamily and most nonresidential buildings) shall be completed as specified by BMC Chapter 19.36. Location of the solar PV system and the ESS, if applicable, shall be noted on the construction plans. (Project required to meet applicable code at time of building permit application, if different from above.)

21. **Nonresidential Electric Vehicle (EV) Charging.** At least 10 percent of project parking spaces for nonresidential use shall have installed Level 2 (40 amp) electric vehicle (EV) charging stations and/or DC Fast Charging Stations, and least 20 percent shall be "EV Capable" equipped with raceway, electrical panel service capacity, and an electrical system to support future Level 2 (40 amp) EV charging stations, or any more stringent EV charging requirements, as specified by the Berkeley Green Code (BMC Chapter 19.37). EV charging station installations and EV Capable spaces shall be noted on the construction plans. Public access parking spaces shall provide any applicable mandatory accessibility provisions. (Project required to meet applicable code at time of building permit application, if different from above.)

22. **Water Efficient Landscaping.** Landscaping, totaling 500 square feet of more of new landscaping or 2,500 square feet or more of renovated irrigated area, shall comply with the State's Model Water Efficient Landscape Ordinance (MWELO). MWELO-compliant landscape documentation including a planting, grading, and irrigation plan shall be included in site plans. Water budget calculations are also required for landscapes of 2,500 square feet or more and shall be included in site plans. The reference evapotranspiration rate (ETo) for Berkeley is 41.8.
23. **Recycling and Organics Collection.** Applicant shall provide recycling and organics collection areas for occupants, clearly marked on plans, which comply with the Alameda County Organics Reduction and Recycling Ordinance (2021-02). Contact the Zero Waste Division at RecyclingProgram@berkeleyca.gov.
24. **Public Works ADA.** Plans submitted for building permit shall include replacement of sidewalk, curb, gutter, and other streetscape improvements, as necessary to comply with current City of Berkeley standards for accessibility.

Prior to Demolition or Start of Construction:

25. **Construction Meeting.** The applicant shall request of the Zoning Officer an on-site meeting with City staff and key parties involved in the early phases of construction (e.g., applicant, general contractor, foundation subcontractors) to review these conditions and the construction schedule. The general contractor or applicant shall ensure that all subcontractors involved in subsequent phases of construction aware of the conditions of approval.
26. **Construction Plan.** The applicant and all persons associated with the project are hereby notified that a Transportation Construction Plan (TCP) may be required, particularly for the following activities:

    A. Alterations, closures, or blockages to sidewalks, pedestrian paths or vehicle travel lanes (including bicycle lanes);

    B. Storage of building materials, equipment, dumpsters, debris anywhere in the public ROW;

    C. Provision of exclusive contractor parking on-street; or

    D. Significant truck activity.

    Please contact the Office of Transportation at (510) 981-7010, or 1947 Center Street, and ask to speak to a traffic engineer. In addition to other requirements of the Traffic Engineer, this plan shall include the locations of material and equipment storage, trailers, worker parking, a schedule of site operations that may block traffic, and provisions for traffic control. The TCP shall be stamped and signed by a registered engineer prior to submittal. The TCP shall be consistent with any other requirements of the construction phase. A current copy of this Plan shall be available at all times at the construction site for review by City Staff.

27. **Construction/No Parking Permits.** Contact the Permit Service Center (PSC) at 1947 Center Street or 981-7500 for details on obtaining Construction/No Parking Permits (and associated signs and accompanying dashboard permits). Please note that the Zoning Officer and/or Traffic Engineer may limit off-site parking of construction-related vehicles if necessary to protect the health, safety or convenience of the surrounding neighborhood.

During Construction:

28. **Construction Hours.** Construction activity shall be limited to between the hours of 7:00 AM and 6:00 PM on Monday through Friday, and between 9:00 AM and 4:00 PM on Saturday. No construction-related activity shall occur on Sunday or any Federal Holiday.
29. **Construction Hours- Exceptions.** It is recognized that certain construction activities, such as the placement of concrete, must be performed in a continuous manner and may require an extension of these work hours. Prior to initiating any activity that might require a longer period, the developer must notify the Zoning Officer and request an exception for a finite period of time. If the Zoning Officer approves the request, then two weeks prior to the expanded schedule, the developer shall notify businesses and residents within 500 feet of the project site describing the expanded construction hours. A copy of such notice and methodology for distributing the notice shall be provided in advance to the City for review and approval. The project shall not be allowed more than 15 extended working days.
30. **Public Works - Implement Bay Area Air District (BAAD)-**Recommended Measures during Construction. For all proposed projects, BAAD recommends implementing all the Basic Construction Mitigation Measures, listed below to meet the best management practices threshold for fugitive dust:
    - **A.** All exposed surfaces (e.g., parking areas, staging areas, soil piles, graded areas, and unpaved access roads) shall be watered two times per day.
    - **B.** All haul trucks transporting soil, sand, or other loose material off-site shall be covered.
    - **C.** All visible mud or dirt track-out onto adjacent public roads shall be removed using wet power vacuum street sweepers at least once per day. The use of dry power sweeping is prohibited.
    - **D.** All vehicle speeds on unpaved roads shall be limited to 15 mph.
    - **E.** All roadways, driveways, and sidewalks to be paved shall be completed as soon as possible. Building pads shall be laid as soon as possible after grading unless seeding or soil binders are used.
    - **F.** Idling times shall be minimized either by shutting equipment off when not in use or reducing the maximum idling time to 5 minutes (as required by the California airborne toxics control measure Title 13, Section 2485 of California Code of Regulations [CCR]). Clear signage shall be provided for construction workers at all access points.
    - **G.** All construction equipment shall be maintained and properly tuned in accordance with manufacturer specifications. All equipment shall be checked by a certified visible emissions evaluator.

H. Post a publicly visible sign with the telephone number and person to contact at the lead agency regarding dust complaints. This person shall respond and take corrective action within 48 hours. The Air District's phone number shall also be visible to ensure compliance with applicable regulations.

31. **Air Quality - Diesel Particulate Matter Controls during Construction.** All off-road construction equipment used for projects with construction lasting more than 2 months shall comply with one of the following measures:

A. The project applicant shall prepare a health risk assessment that demonstrates the project's on-site emissions of diesel particulate matter during construction will not exceed health risk screening criteria after a screening-level health risk assessment is conducted in accordance with current guidance from BAAD and OEHHA. The health risk assessment shall be submitted to the Land Use Planning Division for review and approval prior to the issuance of building permits; or

B. All construction equipment shall be equipped with Tier 2 or higher engines and the most effective Verified Diesel Emission Control Strategies (VDECS) available for the engine type (Tier 4 engines automatically meet this requirement) as certified by the California Air Resources Board (CARB). The equipment shall be properly maintained and tuned in accordance with manufacturer specifications.

C. In addition, a Construction Emissions Minimization Plan (Emissions Plan) shall be prepared that includes the following:

i. An equipment inventory summarizing the type of off-road equipment required for each phase of construction, including the equipment manufacturer, equipment identification number, engine model year, engine certification (tier rating), horsepower, and engine serial number. For all VDECS, the equipment inventory shall also include the technology type, serial number, make, model, manufacturer, CARB verification number level, and installation date.

ii. A Certification Statement that the Contractor agrees to comply fully with the Emissions Plan and acknowledges that a significant violation of the Emissions Plan shall constitute a material breach of contract. The Emissions Plan shall be submitted to the Public Works Department for review and approval prior to the issuance of building permits.

32. **Construction and Demolition Diversion.** Divert debris according to your plan and collect required documentation. Get construction debris receipts from sorting facilities in order to verify diversion requirements. Upload recycling and disposal receipts if using Green Halo and submit online for City review and approval prior to final inspection. Alternatively, complete the Construction Waste Management Plan and present it, along with your construction debris receipts, to the Building Inspector by the final inspection to demonstrate diversion rate compliance. The Zoning Officer may request summary reports at more frequent intervals, as necessary to ensure compliance with this requirement.

33. **Low-Carbon Concrete.** The project shall maintain compliance with the Berkeley Green Code (BMC Chapter 19.37) including use of concrete mix design with a cement reduction of at least 25 percent. Documentation on concrete mix design shall be available at all times at the construction site for review by City Staff. (Project required to meet applicable code at time of building permit application, if different from above.)

34. **Avoid Disturbance of Nesting Birds.** Initial site disturbance activities, including vegetation and concrete removal, shall be prohibited during the general avian nesting season (February 1 to August 30), if feasible. If nesting season avoidance is not feasible, the applicant shall retain a qualified biologist to conduct a preconstruction nesting bird survey to determine the presence/absence, location, and activity status of any active nests on or adjacent to the project site. The extent of the survey buffer area surrounding the site shall be established by the qualified biologist to ensure that direct and indirect effects to nesting birds are avoided. To avoid the destruction of active nests and to protect the reproductive success of birds protected by the MBTA and CFGC, nesting bird surveys shall be performed not more than 14 days prior to scheduled vegetation and concrete removal. In the event that active nests are discovered, a suitable buffer (typically a minimum buffer of 50 feet for passerines and a minimum buffer of 250 feet for raptors) shall be established around such active nests and no construction shall be allowed inside the buffer areas until a qualified biologist has determined that the nest is no longer active (e.g., the nestlings have fledged and are no longer reliant on the nest). No ground-disturbing activities shall occur within this buffer until the qualified biologist has confirmed that breeding/nesting is completed and the young have fledged the nest. Nesting bird surveys are not required for construction activities occurring between August 31 and January 31.

35. **Archaeological Resources (*Ongoing throughout demolition, grading, and/or construction*).** Pursuant to CEQA Guidelines section 15064.5(f), "provisions for historical or unique archaeological resources accidentally discovered during construction" should be instituted. Therefore:

    A. In the event that any prehistoric or historic subsurface cultural resources are discovered during ground disturbing activities, all work within 50 feet of the resources shall be halted and the project applicant and/or lead agency shall consult with a qualified archaeologist, historian or paleontologist to assess the significance of the find.

    B. If any find is determined to be significant, representatives of the project proponent and/or lead agency and the qualified professional would meet to determine the appropriate avoidance measures or other appropriate measure, with the ultimate determination to be made by the City of Berkeley. All significant cultural materials recovered shall be subject to scientific analysis, professional museum curation, and/or a report prepared by the qualified professional according to current professional standards.

    C. In considering any suggested measure proposed by the qualified professional, the project applicant shall determine whether avoidance is necessary or feasible in light of factors such as the uniqueness of the find, project design, costs, and other considerations.

D. If avoidance is unnecessary or infeasible, other appropriate measures (e.g., data recovery) shall be instituted. Work may proceed on other parts of the project site while mitigation measures for cultural resources is carried out.

E. If significant materials are recovered, the qualified professional shall prepare a report on the findings for submittal to the Northwest Information Center.

36. **Human Remains (*Ongoing throughout demolition, grading, and/or construction*).** In the event that human skeletal remains are uncovered at the project site during ground-disturbing activities, all work shall immediately halt and the Alameda County Coroner shall be contacted to evaluate the remains, and following the procedures and protocols pursuant to Section 15064.5 (e)(1) of the CEQA Guidelines. If the County Coroner determines that the remains are Native American, the City shall contact the California Native American Heritage Commission (NAHC), pursuant to subdivision (c) of Section 7050.5 of the Health and Safety Code, and all excavation and site preparation activities shall cease within a 50-foot radius of the find until appropriate arrangements are made. If the agencies determine that avoidance is not feasible, then an alternative plan shall be prepared with specific steps and timeframe required to resume construction activities. Monitoring, data recovery, determination of significance and avoidance measures (if applicable) shall be completed expeditiously.

37. **Paleontological Resources (*Ongoing throughout demolition, grading, and/or construction*).** In the event of an unanticipated discovery of a paleontological resource during construction, excavations within 50 feet of the find shall be temporarily halted or diverted until the discovery is examined by a qualified paleontologist (per Society of Vertebrate Paleontology standards [SVP 1995,1996]). The qualified paleontologist shall document the discovery as needed, evaluate the potential resource, and assess the significance of the find. The paleontologist shall notify the appropriate agencies to determine procedures that would be followed before construction is allowed to resume at the location of the find. If the City determines that avoidance is not feasible, the paleontologist shall prepare an excavation plan for mitigating the effect of the project on the qualities that make the resource important, and such plan shall be implemented. The plan shall be submitted to the City for review and approval.

38. **Work/Unanticipated Discovery of Tribal Cultural Resources.** In the event that cultural resources of Native American origin are identified during construction, all work within 50 feet of the discovery shall be redirected. The project applicant and project construction contractor shall notify the City Planning Department within 24 hours. The City will again contact any tribes who have requested consultation under AB 52, as well as contact a qualified archaeologist, to evaluate the resources and situation and provide recommendations. If it is determined that the resource is a tribal cultural resource and thus significant under CEQA, a mitigation plan shall be prepared and implemented in accordance with State guidelines and in consultation with Native American groups. If the resource cannot be avoided, additional measures to avoid or reduce impacts to the resource and to address tribal concerns may be required.

39. **Stormwater Requirements.** The applicant shall demonstrate compliance with the requirements of the City's National Pollution Discharge Elimination System (NPDES) permit as described in BMC Section 17.20. The following conditions apply:

A. The project plans shall identify and show site-specific Best Management Practices (BMPs) appropriate to activities conducted on-site to limit to the maximum extent practicable the discharge of pollutants to the City's storm drainage system, regardless of season or weather conditions.

B. Trash enclosures and/or recycling area(s) shall be covered; no other area shall drain onto this area. Drains in any wash or process area shall not discharge to the storm drain system; these drains should connect to the sanitary sewer. Applicant shall contact the City of Berkeley and EBMUD for specific connection and discharge requirements. Discharges to the sanitary sewer are subject to the review, approval and conditions of the City of Berkeley and EBMUD.

C. Landscaping shall be designed with efficient irrigation to reduce runoff, promote surface infiltration and minimize the use of fertilizers and pesticides that contribute to stormwater pollution. Where feasible, landscaping should be designed and operated to treat runoff. When and where possible, xeriscape and drought tolerant plants shall be incorporated into new development plans.

D. Design, location and maintenance requirements and schedules for any stormwater quality treatment structural controls shall be submitted to the Department of Public Works for review with respect to reasonable adequacy of the controls. The review does not relieve the property owner of the responsibility for complying with BMC Chapter 17.20 and future revisions to the City's overall stormwater quality ordinances. This review shall be shall be conducted prior to the issuance of a Building Permit.

E. All paved outdoor storage areas must be designed to reduce/limit the potential for runoff to contact pollutants.

F. All on-site storm drain inlets/catch basins must be cleaned at least once a year immediately prior to the rainy season. The property owner shall be responsible for all costs associated with proper operation and maintenance of all storm drainage facilities (pipelines, inlets, catch basins, outlets, etc.) associated with the project, unless the City accepts such facilities by Council action. Additional cleaning may be required by City of Berkeley Public Works Engineering Dept.

G. All on-site storm drain inlets must be labeled “No Dumping – Drains to Bay” or equivalent using methods approved by the City.

H. Most washing and/or steam cleaning must be done at an appropriately equipped facility that drains to the sanitary sewer. Any outdoor washing or pressure washing must be managed in such a way that there is no discharge or soaps or other pollutants to the storm drain. Sanitary connections are subject to the review, approval and conditions of the sanitary district with jurisdiction for receiving the discharge.

I. All loading areas must be designated to minimize “run-on” or runoff from the area. Accumulated waste water that may contribute to the pollution of stormwater must be drained to the sanitary sewer or intercepted and pretreated prior to discharge to the storm drain system. The property owner shall ensure that BMPs are implemented to prevent potential stormwater pollution. These BMPs shall include, but are not limited to, a regular program of sweeping, litter control and spill cleanup.

J. Sidewalks and parking lots shall be swept regularly to prevent the accumulation of litter and debris. If pressure washed, debris must be trapped and collected to prevent entry to the storm drain system. If any cleaning agent or degreaser is used, wash water shall not discharge to the storm drains; wash waters should be collected and discharged to the sanitary sewer. Discharges to the sanitary sewer are subject to the review, approval and conditions of the sanitary district with jurisdiction for receiving the discharge.

K. The applicant is responsible for ensuring that all contractors and sub-contractors are aware of and implement all stormwater quality control measures. Failure to comply with the approved construction BMPs shall result in the issuance of correction notices, citations, or a project stop work order.

40. **Public Works.** Subject to approval of the Public Works Department, the applicant shall repair any damage to public streets and/or sidewalks by construction vehicles traveling to or from the project site.

41. **Public Works.** All piles of debris, soil, sand, or other loose materials shall be covered at night and during rainy weather with plastic at least one-eighth millimeter thick and secured to the ground.

42. **Public Works.** The applicant shall ensure that all excavation accounts for surface and subsurface waters and underground streams so as not to adversely affect adjacent properties and rights-of-way.

43. **Public Works.** The project sponsor shall maintain sandbags or other devices around the site perimeter during the rainy season to prevent on-site soils from being washed off-site and into the storm drain system. The project sponsor shall comply with all City ordinances regarding construction and grading.

44. **Public Works.** Prior to any excavation, grading, clearing, or other activities involving soil disturbance during the rainy season the applicant shall obtain approval of an erosion prevention plan by the Building and Safety Division and the Public Works Department. The applicant shall be responsible for following these and any other measures required by the Building and Safety Division and the Public Works Department.

45. **Public Works.** The removal or obstruction of any fire hydrant shall require the submission of a plan to the City's Public Works Department for the relocation of the fire hydrant during construction.

46. **Public Works / Building and Safety.** If underground utilities leading to adjacent properties are uncovered and/or broken, the contractor involved shall immediately notify the Public Works Department and the Building & Safety Division, and carry out any necessary corrective action to their satisfaction.

Prior to Final Inspection or Issuance of Occupancy Permit:

47. **Compliance with Conditions and Environmental Mitigations.** The project shall conform to the plans and statements in the Use Permit. The developer is responsible for providing sufficient evidence to demonstrate compliance with the requirements throughout the implementation of this Use Permit. Occupancy is subject to verification of compliance to the Adeline Corridor Specific Plan Mitigation Monitoring and Reporting Program.
48. All landscape, site and architectural improvements shall be completed per the attached approved drawings received November 14, 2025.

At All Times:

49. **Compliance with Approved Plan.** The project shall conform to the plans and statements in the Use Permit.
50. **Exterior Lighting.** All exterior lighting shall be energy efficient where feasible; and shielded and directed downward and away from property lines to prevent excessive glare beyond the subject property.
51. **Rooftop Projections.** No additional rooftop or elevator equipment shall be added to exceed the approved maximum roof height without submission of an application for a Use Permit Modification, subject to Board review and approval.
52. **Design Review.** Signage and any other exterior modifications, including but not limited to landscaping and lighting, shall be subject to Design Review approval.
53. **Drainage Patterns.** The applicant shall establish and maintain drainage patterns that do not adversely affect adjacent properties and rights-of-way. Drainage plans shall be submitted
54. **Loading.** All loading/unloading activities associated with deliveries to all uses shall be restricted to the hours of 7:00 a.m. to 10:00 p.m. daily.
55. **Required Bike Parking.** Secure and on-site bike parking for at least five bicycles shall be provided for the life of the building.
56. **Nonresidential Electric Vehicle (EV) Charging.** Required Level 2 charging stations and DC Fast Charge stations, as specified by the Berkeley Green Code (BMC Chapter 19.37) shall be maintained in *good working condition and made available for building occupant and/or visitor* use. (Project required to **meet applicable code at time of building permit application, if different from above.)**
57. **Transit Subsidy Condition.** If 10 or more employees, the business operator shall reimburse employees the maximum non-taxable cost of commuting to and from work on public transportation (e.g., monthly passes) if they so commute, and a notice informing employees of the availability of such subsidy shall be permanently displayed in the employee area as per BMC Chapter 9.88.

Mitigation Monitoring and Reporting Program

The Environmental Impact Report (EIR) identifies the applicable mitigation measures that will be implemented to reduce the impacts associated with the Adeline Corridor Specific Plan. The California Environmental Quality Act (CEQA) requires a public agency to adopt a monitoring and reporting program for assessing and ensuring compliance with any required mitigation measures applied to proposed development. As stated in section 21081.6(a)(1) of the Public Resources Code:

> *...the public agency shall adopt a reporting or monitoring program for the changes made to the project or conditions of project approval, adopted in order to mitigate or avoid significant effects on the environment*.

Section 21081.6 also provides general guidelines for implementing mitigation monitoring programs and indicates that specific reporting and/or monitoring requirements, to be enforced during project implementation, shall be defined as part of adopting a mitigated negative declaration.

The mitigation monitoring table lists those mitigation measures that may be included as conditions of approval for the project. To ensure that the mitigation measures are properly implemented, a monitoring program has been devised which identifies the timing and responsibility for monitoring each measure. The project applicant will have the responsibility for implementing the measures, and the various City of Berkeley departments will have the primary responsibility for monitoring and reporting the implementation of the mitigation measures.

Mitigation Measure/ Condition of Approval	Action Required	Monitoring Timing	Responsible Agency	Compliance Verification		
				Initial	Date	Comments
AIR QUALITY						
AQ-1: Construction Emissions Measures.						
As part of the City's development approval process, the City shall require applicants for future development projects in the Plan Area to comply with the current Bay Area Air Quality Management District's basic control measures for reducing construction emissions of PM10 (Table 8-2, Basic Construction Mitigation Measures Recommended for All Proposed Projects, of the May 2017 BAAQMD CEQA Guidelines).	Review of all demolition, grading, and building permits to ensure compliance.	Prior to permit approval and during construction.	City of Berkeley Department of Planning & Development.			
AIR-2: Health Risk Assessments.						
As part of the City's development approval process, the City shall require applicants for future development projects in the Plan Area to implement the Bay Area Air Quality Management District Guidelines and State Office of Environmental Health Hazard Assessment policies and procedures requiring health risk assessments (HRA) for residential development and other sensitive receptors near sources of toxic air contaminants, including freeways and roadways with over 10,000 vehicles per day. Based on the results of the HRA, identify and implement measures (such as air filtration systems, waterproofed caulking on windows and doors, and/or requirements for closed windows) to reduce potential exposure to particulate matter, carbon monoxide, diesel fumes, and other potential health hazards. Measures identified in HRAs shall be included into the site development plan as a component of a proposed project.	Verify HRA completed and measures to reduce TACs have been incorporated into plans as appropriate.	Prior to issuance of building permit.	City of Berkeley Department of Planning & Development.			
BIOLOGICAL RESOURCES						
BIO-1: Special-status Bat Species Avoidance and Minimization.						
For projects in the Plan Area, focused surveys to determine the presence/absence of roosting bats shall be conducted prior to the initiation of demolition of buildings and removal of mature trees large enough to contain crevices and hollows that could support bat roosting. If active maternity roosts are identified, a qualified biologist	If applicable, project plans shall include project-specific mitigation	During individual environmental review	City of Berkeley Department of Planning & Development.			

Mitigation Measure/ Condition of Approval	Action Required	Monitoring Timing	Responsible Agency	Compliance Verification		
				Initial	Date	Comments
shall establish avoidance buffers applicable to the species, the roost location and exposure, and the proposed construction activity in the area. If active non-maternity day or night roosts are found on the project site, measures shall be implemented to passively relocate bats from the roosts prior to the onset of construction activities. Such measures may include removal of roosting site during the time of day the roost is unoccupied or the installation of one-way doors, allowing the bats to leave the roost but not to re-enter. These measures shall be presented in a Bat Passive Relocation Plan that shall be submitted to, and approved by, CDFW.	measures to reduce impacts to bat species.					
GREENHOUSE GAS EMISSIONS						
GHG-1: All-Electric New Construction.						
All new buildings constructed in the Plan Area shall be built as all-electric with no natural gas connection to the building, except where new natural gas connections are permitted under the City's Natural Gas Infrastructure Ordinance (BMC Chapter 12.80). This includes all appliances such as electric cooking, clothes drying, water heating, space heating, and air conditioning. Projects shall not be required to employ methods of construction the exceed the requirements of the California Building Standards Code (inclusive of any local amendments approved for enforcement in the City of Berkeley) or install appliances the exceed standards for energy efficiency established under the federal Energy Policy and Conservation Act, as amended, 42 U.S.C. § 6201 *et seq.*	Verify project plans are all-electric, or GHG reduction has occurred through specified means.	Prior to issuance of building permit	City of Berkeley Department of Planning & Development			
GHG-2: Electric Vehicle (EV) Readiness and EV Chargers						
All new development projects in the Plan Area shall conform to the following EV infrastructure requirements or an equivalent City of Berkeley adopted ordinance which meets or exceeds those standards: b. Single Family Homes and Duplexes	Verify project plans meet EV requirements.	Prior to issuance of building permit	City of Berkeley Department of Planning & Development			

Mitigation Measure/ Condition of Approval	Action Required	Monitoring Timing	Responsible Agency	Compliance Verification		
				Initial	Date	Comments
▫ At least one parking space per dwelling unit with on-site parking to be equipped with raceway, wiring, and power to support a future Level 2[1] EV charging station c. Multi-Family Buildings ▫ 20% of parking spaces to be equipped with raceways, wiring, and power to support future Level 2 EV charging stations ▫ 80% of parking spaces to be equipped with connecting raceways (no additional electric service capacity required) d. Non-Residential Buildings ▫ 10% of parking spaces must have Level 2 charging stations installed (a DC Fast Charge station) may be installed in place of 10 required Level 2 stations) ▫ 40% of parking spaces to be equipped with connecting raceways (no additional electric service capacity required) ▫ [1] Level 2 circuit: 40+ Amp, 208/240v AC (standard household washer/dryer outlet), charges approximately 25-30 mile driving distance per hour						
GHG-3 Solar Photovoltaic Power.						
All new buildings, with the exception of accessory buildings and structures, proposed in the Plan Area shall install solar photovoltaic energy systems or purchase 100% carbon neutral or renewable energy through an electric utility serving Berkeley. Solar photovoltaic equipment shall be shown on all plans submitted for individual projects in the Plan Area	Verify project plans meet solar requirements.	Prior to issuance of building permit	City of Berkeley Department of Planning & Development			
NOISE AND VIBRATION						
N-2: Construction-Related Noise Reduction Measures.						
Development projects in the Plan Area that involve construction activities shall apply the following measures during construction for the purpose of reducing construction-related noise:	Review and approve site-specific noise reduction program for the project.	Monitoring during construction.	City of Berkeley Department of			

Mitigation Measure/ Condition of Approval	Action Required	Monitoring Timing	Responsible Agency	Compliance Verification		
				Initial	Date	Comments
▪ **Construction Timing.** Construction activities shall be restricted to the daytime hours of between 7:00 AM and 7:00 PM on weekdays, or between 9:00 AM and 8:00 PM on weekends and legal holidays. ▪ **Mufflers.** Construction equipment shall be properly maintained and all internal combustion engine driven machinery with intake and exhaust mufflers and engine shrouds, as applicable, shall be in good condition and appropriate for the equipment. During construction, all equipment, fixed or mobile, shall be operated with closed engine doors and shall be equipped with properly operating and maintained mufflers, consistent with manufacturers' standards. ▪ **Electrical Power.** Electrical power, rather than diesel equipment, shall be used to run compressors and similar power tools and to power any temporary structures, such as construction trailers or caretaker facilities. ▪ **Equipment Staging.** All stationary equipment shall be staged as far away as feasible from adjacent noise-sensitive receptors. ▪ **Equipment Idling.** Construction vehicles and equipment shall not be left idling for longer than five minutes when not in use. ▪ **Workers' Radios.** All noise from workers' radios shall be controlled to a point that they are not audible at sensitive receptors near construction activity. ▪ **Smart Back-up Alarms.** Mobile construction equipment shall have smart back-up alarms that automatically adjust the sound level of the alarm in response to ambient noise levels. Alternatively, back-up alarms shall be disabled and replaced with human spotters to ensure safety when mobile construction equipment is moving in the reverse direction. ▪ **Disturbance Coordinator.** The applicant shall designate a disturbance coordinator who shall be responsible for responding to any local complaints about construction noise. The noise disturbance coordinator shall determine the cause of the noise complaint (e.g., starting too early, bad muffler, etc.) and shall require that reasonable measures warranted to	Monitor compliance with approved noise reduction program.		Planning and Development.			

Mitigation Measure/ Condition of Approval	Action Required	Monitoring Timing	Responsible Agency	Compliance Verification		
				Initial	Date	Comments
correct the problem be implemented. A telephone number for the disturbance coordinator shall be conspicuously posted at the construction site. ▪ **Additional Noise Attenuation Techniques.** During construction activity that is immediately adjacent to noise-sensitive receptors, temporary sound barriers may be installed and maintained, at the discretion of the City's Department of Planning and Development. Temporary sound barriers, if installed, shall block line of sight between noise-generating construction equipment and adjacent residential windows and shall be placed as close to the source equipment as feasible. Mobile sound barriers may be used as appropriate to attenuate construction noise near the source equipment. During the building construction phase, temporary sound barriers may be applied to generators and cranes used on-site.						
N-3: Vibration Reduction Measures.						
Applicants for new development that would involve construction activity in the Plan Area shall implement the following measures to reduce exposure to vibration from construction activities: ▪ **Best Available Technology.** The applicant shall use the best available technology to reduce construction-related vibration on construction sites within 100 feet of institutional land uses that are sensitive to vibration, and within 50 feet of historic buildings, so that vibration levels do not exceed guidelines in the Federal Transit Administration's *Transit Noise and Vibration Impact Assessment Manual* for annoyance and damage to fragile structures. Appropriate technology may include, but is not limited to: ▫ Drilling of piles instead of pile driving for foundation work ▫ Static rollers instead of vibratory rollers for paving activity ▫ Smaller and well-maintained equipment ▪ **Construction Scheduling.** The applicant shall coordinate with adjacent institutional land uses that are sensitive to vibration	Review and approve site-specific vibration reduction program. Monitor compliance with approved noise reduction program.	Monitoring during construction.	City of Berkeley Department of Planning and Development.			

Mitigation Measure/ Condition of Approval	Action Required	Monitoring Timing	Responsible Agency	Compliance Verification		
				Initial	Date	Comments
and schedule vibration-generating construction activities during less sensitive times of day.						
TRANSPORTATION AND TRAFFIC						
T-2 Signal Warrant Study and Signalization.						
Development projects tiering from the Adeline Street Specific Plan EIR with primary automobile access on one of the following local streets that is currently controlled by a stop-sign at the intersection with a major street shall evaluate traffic operations and the MUTCD signal warrants at the intersection: ▪ Shattuck Avenue at Blake, Parker, and Derby Streets ▪ Adeline Street at Stuart, Russell, Essex, Woolsey, Fairview, and Harmon Streets The signal warrant study shall be completed as part of the environmental review process for the development project. If the intersection meets the signal warrants and the development project would add ten or more trips to the critical movement that operates at LOS F during the AM and/or PM peak hour, the study shall identify improvements to mitigate the impact. The improvements may consist of signalizing the intersection, and/or restricting one or more movements at the intersection. The study shall also evaluate the secondary effects of the identified improvement, such as traffic diverted to other streets due to turn restrictions. The development project shall install the identified improvement.	Verify evaluation of signal warrants has occurred. If signal warrant met, verify improvements developed and installed.	Prior to issuance of building permit.	City of Berkeley Department of Planning and Development.

TREE PRESERVATION AND PROTECTION NOTES

THE GOAL OF TREE PRESERVATION IS NOT MERELY TREE SURVIVAL DURING DEVELOPMENT BUT MAINTENANCE OF TREE HEALTH AND BEAUTY FOR MANY YEARS. TREES RETAINED ON SITES THAT ARE EITHER SUBJECT TO EXTENSIVE INJURY DURING CONSTRUCTION OR ARE INADEQUATELY MAINTAINED BECOME A LIABILITY RATHER THAN AN ASSET. THE RESPONSE OF INDIVIDUAL TREES WILL DEPEND ON THE AMOUNT OF EXCAVATION AND GRADING, THE CARE WITH WHICH DEMOLITION IS UNDERTAKEN, AND THE CONSTRUCTION METHODS.

THE FOLLOWING RECOMMENDATIONS WILL HELP REDUCE IMPACTS TO TREES FROM DEVELOPMENT AND MAINTAIN AND IMPROVE THEIR HEALTH AND VITALITY THROUGH THE CLEARING, GRADING AND CONSTRUCTION PHASES.

1. THE DEVELOPMENT AREA IS DEFINED AS ANYWHERE ON PUBLIC OR PRIVATE PROPERTY THAT MOVEMENT OR ACTIVITY TAKES PLACE TO FACILITATE CONSTRUCTION, INCLUDING AREAS WITHIN THE DRIPLINE OF TREES ON ADJACENT PROPERTIES.
2. THE AREA WITHIN THE TREE'S DRIP LINE SHALL BE CONSIDERED THE TREE PROTECTION ZONE AND MUST BE ESTABLISHED BEFORE ANY CONSTRUCTION OR DEVELOPMENT ACTIVITIES BEGIN.
3. ALL TREES DESIGNATED FOR PRESERVATION MUST BE COMPLETELY ENCLOSED WITH 4-FOOT POLYPROPYLENE ORANGE SAFETY FENCING HELD IN PLACE WITH METAL "U" STAKES PRIOR TO DEMOLITION, GRUBBING, OR GRADING ACTIVITIES.
4. TREE TRUNKS REQUIRE PROTECTION USING STRAW WATTLE WRAPPED AROUND THE ENTIRE TRUNK UP TO 12 FEET IN HEIGHT TO PREVENT MECHANICAL DAMAGE DURING DEMOLITION AND CONSTRUCTION ACTIVITIES.
5. THE ENTIRE TREE PROTECTION ZONE MUST BE COVERED WITH 4 TO 6 INCHES OF WOOD CHIP MULCH TO PROTECT SOIL STRUCTURE AND PREVENT ROOT COMPACTION AND OTHER DAMAGE.
6. TREE PROTECTION FENCING MUST REMAIN IN PLACE THROUGHOUT THE ENTIRE CONSTRUCTION PERIOD AND CANNOT BE REMOVED UNTIL ALL GRADING AND CONSTRUCTION ACTIVITIES ARE COMPLETED.
7. CONSTRUCTION ACTIVITIES SHOULD IDEALLY NOT OCCUR WITHIN THE TREE PROTECTION ZONE, AND WHEN WORK IS ABSOLUTELY NECESSARY, SPECIAL PRECAUTIONS MUST BE TAKEN WITH ARBORIST SUPERVISION.
8. A QUALIFIED PROJECT ARBORIST MUST APPROVE ALL WORK PROPOSED WITHIN TREE PROTECTION ZONES AND BE PRESENT ON SITE WHEN ANY WORK IS PERFORMED WITHIN THESE AREAS.
9. NO PARKING OR STORAGE OF MATERIALS, CONSTRUCTION EQUIPMENT, BUILDING MATERIALS, OR EXCAVATED SOIL IS PERMITTED WITHIN ANY TREE PROTECTION ZONE.
10. CHEMICAL DUMPING, CONCRETE WASHOUT, FUEL STORAGE, OR DISPOSAL OF ANY TOXIC MATERIALS IS STRICTLY PROHIBITED WITHIN ANY TREE PROTECTION ZONE AS THESE MATERIALS CAN SEVERELY DAMAGE OR KILL ROOT SYSTEMS.
11. UTILITY LINES SHOULD BE ROUTED AWAY FROM TREE PROTECTION ZONES WHENEVER FEASIBLE TO MINIMIZE ROOT DISTURBANCE AND SOIL COMPACTION THAT CAN HARM TREE HEALTH.
12. ALL EXCAVATION WORK WITHIN THE TREE PROTECTION ZONE MUST USE AIR SPADES OR SOIL SLURRY VACUUM SYSTEMS TO AVOID DAMAGING ROOTS DURING TRENCHING OR UTILITY INSTALLATION.
13. ANY TREE ROOTS THAT BECOME DAMAGED DURING APPROVED CONSTRUCTION ACTIVITIES MUST BE CUT CLEANLY WITH SHARP TOOLS TO PROMOTE PROPER HEALING AND REDUCE DISEASE RISK.
14. IF ROOTS MUST BE EXPOSED FOR MORE THAN 48 HOURS DURING CONSTRUCTION, THE EXPOSED AREA SHALL BE COVERED WITH AT LEAST SIX INCHES OF MULCH AND KEPT MOIST UNTIL BACKFILLING IS COMPLETE.
15. WHEN FILL MATERIAL EXCEEDING 2 FEET IN DEPTH IS PLACED WITHIN THE TREE PROTECTION ZONE, PERFORATED 4-INCH DRAIN LINES MUST BE INSTALLED AT NATURAL GRADE FOR AERATION.
16. THE NUMBER AND PLACEMENT OF AERATION SYSTEMS MUST BE APPROVED BY THE PROJECT ARBORIST TO ENSURE ADEQUATE OXYGEN SUPPLY REACHES THE ROOT SYSTEM.
17. TREE TRIMMING FOR CONSTRUCTION CLEARANCE MUST BE PERFORMED BY OR UNDER THE DIRECTION OF CERTIFIED ARBORISTS AND MUST COMPLY WITH INTERNATIONAL SOCIETY OF ARBORICULTURE STANDARDS.
18. REGULAR MONITORING BY THE PROJECT ARBORIST IS REQUIRED THROUGHOUT CONSTRUCTION TO VERIFY COMPLIANCE WITH TREE PROTECTION MEASURES, ASSESS TREE HEALTH, AND ENSURE PROTECTION SYSTEMS REMAIN EFFECTIVE.
19. ANY DAMAGE TO PROTECTED TREES MUST BE REPORTED IMMEDIATELY TO THE CITY ARBORIST AT TREES@BERKELEYCA.GOV OR BY CALLING 311 WITHIN BERKELEY CITY LIMITS FOR ASSESSMENT AND CORRECTIVE MEASURES.

TREE REMOVAL NOTES

1. BERKELEY'S MUNICIPAL CODE RESTRICTS TREE REMOVAL AND EXCESSIVE PRUNING DEFINED AS REMOVAL OF MORE THAN 25% OF LEAF, STEM, OR ROOT SYSTEM WITHIN ANY 24-MONTH PERIOD.
2. PROTECTED TREES INCLUDE SINGLE STEM SPECIMENS WITH 18-INCH CIRCUMFERENCE OR MULTI-STEM TREES WITH 26-INCH COMBINED CIRCUMFERENCE MEASURED AT 4 FEET FROM GRADE.
3. CITY TREES ON PUBLIC RIGHT-OF-WAY, MEDIANS, PARKS, OR CITY PROPERTY REQUIRE SEPARATE PERMITS AND CAN ONLY BE REMOVED BY THE URBAN FORESTRY UNIT.
4. TREE REMOVAL OR EXCESSIVE PRUNING ON PRIVATE PROPERTY REQUIRES PROPER PERMITS AND EXEMPTIONS APPROVED BY CITY DESIGNEES.
5. THE CITY DOES NOT APPROVE TREE REMOVAL FOR AESTHETIC IMPROVEMENTS, VIEW ENHANCEMENT, SOLAR ACCESS, FRUIT DROP ISSUES, OR MINOR PEST PROBLEMS.
6. ALL TREE REMOVAL WORK MUST BE PERFORMED BY ISA CERTIFIED ARBORISTS WITH STATE CONTRACTOR'S LICENSE, CITY BUSINESS LICENSE, LIABILITY INSURANCE, AND WORKERS COMPENSATION.
7. PERMIT APPLICATIONS REQUIRE DETAILED WORK DESCRIPTIONS, SPECIES IDENTIFICATION, AND ADHERENCE TO ANSI A300 PART 1 STANDARDS AND ISA BEST MANAGEMENT PRACTICES.
8. CITY ARBORIST INSPECTION OCCURS WITHIN 2-4 WEEKS OF PERMIT SUBMISSION, REQUIRING PROJECT SCHEDULES TO ACCOMMODATE REVIEW PERIODS AND POTENTIAL DENIAL.
9. DESIGN TEAMS MUST EXPLORE ALL ALTERNATIVES TO REMOVAL INCLUDING BUILDING REPOSITIONING, UTILITY REROUTING, GRADE MODIFICATIONS, OR SPECIALIZED CONSTRUCTION METHODS BEFORE APPLYING.
10. APPROVED REMOVAL WORK REQUIRES COMPLETION NOTIFICATION TO THE CITY WITHIN ONE WEEK AND COMPLETE SITE RESTORATION WITH DEBRIS REMOVAL.
11. PROFESSIONAL LIABILITY INCLUDES POTENTIAL PROJECT DELAYS FROM PERMIT DENIALS, REPLACEMENT REQUIREMENTS, AND PENALTIES FOR UNAUTHORIZED TREE REMOVAL.
12. CONTACT URBAN FORESTRY UNIT AT TREES@BERKELEYCA.GOV, 311 WITHIN BERKELEY, OR (510) 981-2489 FOR EARLY CONSULTATION DURING DESIGN PHASES.

PLANTING AND IRRIGATION NOTES

1. LOOSEN COMPACTED SOIL IN AREAS TO BE PLANTED TO A DEPTH OF 10 INCHES.
2. REMOVE ALL LIME TREATED SOIL FROM PLANTING AREAS TO A DEPTH OF 3 FEET.
3. SUBMIT SOIL AND SOIL AMENDMENT TEST REPORT FOR LANDSCAPE ARCHITECT'S REVIEW PRIOR TO PURCHASE OF PLANTS.
4. FURNISH ALL NEW PLANTING AREAS WITH 1 TO 2 INCHES DEPTH LAYER OF COMPOST AND ROTOTILL IT IN A DEPTH OF 6 INCHES.
5. FURNISH ALL NEW PLANTING AREAS WITH WOOD CHIP MULCH 3 INCH DEEP AND 6 INCH DEPTH LAYER OF COMPOST.
6. INSTALL ROOT BARRIER ALONG PAVING EDGE OF ALL NEW TREES PLANTED WITHIN 5 FEET OF PAVING BUT DO NOT WRAP ROOT BARRIER AROUND ROOTBALL.
7. DO NOT PLANT NEW TREES DIRECTLY ABOVE UNDERGROUND SITE UTILITY LINES AND PIPING, AND PROTECT ALL EXISTING TREES INDICATED AS 'TREES TO REMAIN'.
8. ALL PLANTING WILL BE IRRIGATED WITH AN AUTOMATICALLY CONTROLLED DRIP SYSTEM IN ACCORDANCE WITH CITY OF BERKELEY WATER EFFICIENCY REQUIREMENTS WITH AUTOMATIC CONTROLLER CONNECTED TO EXTERIOR SOLAR SENSOR.
9. THE INTENT OF THE IRRIGATION SYSTEM IS TO PROVIDE THE MINIMUM AMOUNT OF WATER REQUIRED TO SUSTAIN GOOD PLANT HEALTH.
10. MANUAL SHUT-OFF VALVES SHALL BE INSTALLED AS CLOSE AS POSSIBLE TO THE POINT OF CONNECTION OF THE WATER SUPPLY.
11. 120 VOLT A.C. (2.5 AMP DEMAND PER CONTROLLER) ELECTRICAL SERVICE TO IRRIGATION CONTROLLER LOCATIONS TO BE PROVIDED UNDER ELECTRICAL CONTRACT WORK.
12. WHERE IT IS NECESSARY TO EXCAVATE ADJACENT TO EXISTING TREES, USE ALL POSSIBLE CARE TO AVOID INJURY TO TREES AND TREE ROOTS, WITH EXCAVATION WHERE TWO INCH AND LARGER ROOTS OCCUR TO BE DONE BY HAND, AND ANY DAMAGED ROOTS CUT CLEANLY WITH SHARP TOOLS, AND TRENCHES ADJACENT TO TREES CLOSED WITHIN TWENTY-FOUR HOURS OR KEPT SHADED WITH WET BURLAP OR CANVAS.
13. NEW REPLACEMENT TREES REQUIRE AUTOMATIC IRRIGATION INCLUDING TWO TREE BUBBLERS PROVIDING A MINIMUM OF 20 GALLONS PER WEEK BETWEEN MARCH 15 AND OCTOBER 15 FOR THE FIRST THREE YEARS.
14. TREES MUST BE PROPERLY PLANTED AT GRADE WITH SOIL AMENDMENT GENERALLY NOT RECOMMENDED, AND NO CONSTRUCTION RUBBLE OR NON-ORGANIC MATERIAL SHALL BE PLACED WITHIN TREE WELLS.
15. THE CITY'S ARBORIST MUST BE NOTIFIED PRIOR TO DELIVERY OF REPLACEMENT TREES FOR INSPECTION OF THEIR SIZE AND STRUCTURE.
16. AT THE END OF THE REQUIRED MAINTENANCE PERIOD, THE OWNER SHALL PROVIDE REGULAR MAINTENANCE OF THE IRRIGATION SYSTEM TO ENSURE EFFICIENT USE OF WATER INCLUDING CHECKING, ADJUSTING, AND REPAIRING IRRIGATION EQUIPMENT AND CONTROL SYSTEM.

ZONING ADJUSTMENTS BOARD

NOTICE OF PUBLIC HEARING

1890 Alcatraz Avenue

Use Permit #ZP2024-0183 to demolish a 1-story commercial building (4,425 square feet) and construct a 2-story (39 feet and 4 inches) 6,016 square-foot community center with three off-street vehicle parking spaces and five bicycle parking spaces.

The Zoning Adjustments Board of the City of Berkeley will hold a public hearing on the above matter, pursuant to Zoning Ordinance, Section 23.404.050 (Public Hearings and Decisions)

When: Thursday, December 11, 2025, 7:00 pm
Where: Berkeley Unified School District meeting room, 1231 Addison Street, (wheelchair accessible) with remote/hybrid option (via Zoom).

Please visit: https://berkeleyca.gov/your-government/boards-commissions/zoning-adjustments-board and click on the hearing date to access the most up-to-date meeting information, or call the Land Use Planning division (510) 981-7410.

PUBLIC ADVISORY: THIS MEETING WILL BE CONDUCTED IN A HYBRID MODEL WITH BOTH IN-PERSON ATTENDANCE AND VIRTUAL PARTICIPATION AVAILABLE FOR MEMBERS OF THE PUBLIC.

For in-person attendees, face coverings or masks that cover both the nose and mouth are encouraged. If you're feeling sick, please do not attend the meeting in-person as a public health precaution.

Currently, there are no physical distancing requirements in place by the State of California or the Local Health Officer for an indoor event similar to a Commission meeting. However, all attendees are requested to be respectful of the personal space of other attendees. An area of the public seating area will be designated as "distanced seating" to accommodate persons that need to distance for personal health reasons.

A. Land Use Designations:

- General Plan: ACMU – Adeline Corridor Mixed Use
- Zoning: C-AC – Adeline Corridor Commercial District

B. Zoning Permits Required:

- Use Permit under BMC Section 23.326.070(A) “Main Non-Residential Building” to demolish a non-residential building
- Use Permit under BMC Section 23.204.020(A) “Allowed Land Uses” to construct a new community center
- Use Permit under BMC Section 23.204.030(A)(1) “Floor Area Permit Requirements” to create a new main building

C. CEQA Recommendation: Categorically exempt pursuant to Section 15303 of the CEQA Guidelines (“New Construction or Conversion of Small Structures”).

D. Project Recommendation: Approve Use Permit #ZP2024-0183 pursuant to BMC Section 23.406.040(E) “Findings for Approval”

E. Parties Involved:

- Applicant — Canhui Li, City of Berkeley Department of Parks, Recreation, and Waterfront
- Property Owner — City of Berkeley

Further Information:
All application materials are available online at:
https://aca.cityofberkeley.info/CitizenAccess/Welcome.aspx.

The Zoning Adjustments Board final agenda and staff reports will be available online 6 days prior to this meeting at: https://berkeleyca.gov/your-government/boards-commissions/zoning-adjustments-board.

Questions about the project should be directed to the project planner, Singeh Saliki, at (510) 981-7412 or ssaliki@berkeleyca.gov.

Written comments or a request for a Notice of Decision should be directed to the Zoning Adjustments Board Secretary at zab@berkeleyca.gov.

Communication Disclaimer:
Communications to Berkeley boards, commissions or committees are public record and will become part of the City's electronic records, which are accessible through the City's website. **Please note: e-mail addresses, names, addresses, and other contact information are not required, but if included in any communication to a City board, commission or committee, will become part of the public record.** If you do not want your e-mail address or any other contact information to be made public, you may deliver communications via U.S. Postal Service or in person to the secretary of the relevant board, commission or committee. If you do not want your contact information included in the public record, please do not include that information in your communication. Please contact the secretary to the relevant board, commission or committee for further information.

Written Comments, Communications, and Reports:
Written comments must be directed to the ZAB Secretary at the Land Use Planning Division (Attn: ZAB Secretary), or via e-mail to: zab@berkeleyca.gov. All materials will be made available via the Zoning Adjustments Board Agenda page online at this address: https://berkeleyca.gov/your-government/boards-commissions/zoning-adjustments-board

All persons are welcome to attend the hearing and will be given an opportunity to address the Board. Comments may be made verbally at the public hearing and/or in writing before the hearing. The Board may limit the time granted to each speaker.

Correspondence received by 5:00 PM, eight days before this public hearing, will be provided with the agenda materials provided to the Board. Note that if you submit a hard copy document of more than 10 pages, or in color, or with photos, you must provide 15 copies. Correspondence received after this deadline will be conveyed to the Board in the following manner:

- **Correspondence received by 5:00 PM, two days before** this public hearing, will be conveyed to the Board in a Supplemental Communications and Reports #1, which is released around noon one day before the public hearing.
- **Correspondence received by 12:00 PM, the day of** this public hearing, will be conveyed to the Board in a Supplemental Communications and Reports #2, which is released around noon the day of the public hearing.
- **Correspondence received after 12:00 PM, the day of** this public hearing will be saved in the project administrative record.

Accessibility Information / ADA Disclaimer:
To request a disability-related accommodation(s) to participate in the meeting, including auxiliary aids or services, please contact the Disability Services specialist at 981-6342 (V) or 981-6345 (TDD) at least three business days before the meeting date.

SB 343 Disclaimer:
Any writings or documents provided to a majority of the Commission regarding any item on this agenda will be made available to the public. Please contact the Land Use Planning Division (zab@berkeleyca.gov) to request hard-copies or electronic copies.

Notice Concerning Your Legal Rights:
If you object to a decision by the Zoning Adjustments Board regarding a land use permit project, the following requirements and restrictions apply:

1. If you challenge the decision of the City in court, you may be limited to raising only those issues you or someone else raised at the public hearing described in this notice.
2. You must appeal to the City Council within 14 days after the Notice of Decision of the action of the Zoning Adjustments Board is mailed. It is your obligation to notify the Land Use Planning Division in writing of your desire to receive a Notice of Decision when it is completed.
3. Pursuant to Code of Civil Procedure Section 1094.6(b) and Government Code Section 65009(c)(1), no lawsuit challenging a City Council decision, as defined by Code of Civil Procedure Section 1094.6(e), regarding a use permit, variance or other permit may be filed more than 90 days after the date the decision becomes final, as defined in Code of Civil Procedure Section 1094.6(b). Any lawsuit not filed within that 90-day period will be barred.
4. Pursuant to Government Code Section 66020(d)(1), notice is hereby given to the applicant that the 90-day protest period for any fees, dedications, reservations, or other exactions included in any permit approval begins upon final action by the City, and that any challenge must be filed within this 90-day period.
5. If you believe that this decision or any condition attached to it denies you any reasonable economic use of the subject property, was not sufficiently related to a legitimate public purpose, was not sufficiently proportional to any impact of the project, or for any other reason constitutes a “taking” of property for public use without just compensation under the California or United States Constitutions, the following requirements apply:
    a. That this belief is a basis of your appeal.
    b. Why you believe that the decision or condition constitutes a "taking" of property as set forth above.
    c. All evidence and argument in support of your belief that the decision or condition constitutes a “taking” as set forth above. If you do not do so, you will waive any legal right to claim that your property has been taken, both before the City Council and in court.

AE3 ARCHITECTURE + CM

- Welcome of Youth and Elders
- Powerful
- Empowering
- Space to share the Gospel
- Revitalize
- Liberation
- Non-destructive space
- Jurisprudence
- Altar Prayer space
- Restrooms - Gender Neutral
- A safe space to address sexual assault
- Community Agreements regularly revised
- Safe loving education on Black Hair/Black hair care
- Access to specialty care services (legal services) through partnerships & hosting of special events
- Opportunities for folks to learn de-escalation strategies.
- Ambassadors, mentors and advocates that can assist both within w/ outside navigation in the mainstream i.e. how to find resources
- Safe areas for socialization for all age groups
- Welcome Elders with their Knowledge and experience
- Information center - Department of Children and families/Parent Guardian Help/Food Housing
- A place of your (Black Community) vision that is actively supported by Berkeley community members and organizations in meaningful, constructive ways
- A building that will be open and inviting to all – and particularly the black residents
- High tech and safe
- Conflict
- Collaborative Space
- Have a 'greeter'
- Conference Space
- Job Development
- Warm and nurturing
- Usable space for other A/O organizations
- Space for all African Projects: Legal Services

- A community resource that connects people
- Organizations and businesses that represent the black community of Berkeley
- Community Center where people meet on the weekends after hours
- **Event Space and Community should be combined space**
- **We don't need another space turning into a rental facility for city funds**
- **Senior spaces & relationships w/youth & pre-k**
- **Space for older adults & youth to interact**
- **"Circle spaces" not linear rows**
- **Elder care respite – shuttles to service centers?**
- **Spiritual Space with African drumming meditations dance**
- Afro-centric – inviting to the Black community especially
- Have a 'greeter' at the door to welcome folks in and direct them to what's available
- Break the cycle: Mass incarceration; work to end homelessness
- I am concerned that the space be a place for all levels
- I worry that the immediate neighbors on this block won't feel that this is their space (along with others)
- Dance R&B music for social interaction for 14–18-year-olds
- Video on demand
- I pray that young children will catch the vision and pass the torch so that others will learn, believe, achieve, succeed
- Assistance and info about tenant rights
- Gathering place for music, arts and culture for black folks
- Rentable event space to give community the opportunity to have events at an affordable price (Birthdays/Baby showers)
- Conference room named after Barbara White
- A football room
- Protection
- A place to play basketball
- Talk about victims of CPS abuse and violent crimes in a private room
- Space to learn about the laws at CPS taking our kids
- Have civil lawyers pro-bono for mothers
- Have a space to help with w/interpersonal violence.
- Hear from foster kids what they need. Share with circles of interest and concerns.
- Circles of inclusion with all ages, colors to play music, do art, share hopes & dreams of future world ideas of how to get together and a list of needs especially and where folks can contribute services money and share the ideas with other
- Help connect foster care/adoptive kids of color w/ mentors/leaders of color in our community

Community

- **Warm welcoming place**
- **A place for "us"**
- **Safe to be unapologetically Black**
- **A place where lost people can find themselves**
- **Accommodate people of all abilities centered in joy**
- **Sanctuary**
- **Own our narrative, change the counter narrative**
- **Storytelling all generations and history of community**
- **"Community Agreement" room**
- **Rules and bylaws to deescalate conflicts**
- **Social agreement**
- **What is said here stays here**
- **Place where everybody knows your name**
- **Safe space to resolve conflict disputes**
- **Space to hold events**
- **"Conference Room" where voices are heard**
- **Welcome Center**

Red Text: *June 18, 2023*

AE3 ARCHITECTURE + CM

- How do we get well rounded youth out of this collective / community learning
- How to balance technology and have tech work for individual / community
- Inspirationally powerful
- Multi-generational programming events together
- Book Club / talks
- Self esteem
- Career Resources for students and professionals
- College application mentorships / workshops
- Wifi / Internet capability
- Computer access / Printing
- Skills Training / Job development
- Book Nook / Reading Area with focus on African American history / African Studies
- Book Club
- Youth Advisory
- Internship Programs
- Multi-Generational programming events together
- Book clubs / talks
- Library w/ robust access to high quality books
- Space for all African Projects:
- Digital Equity Access
- Educational Services
- Place for parents to come with young kids and have storybook and each child gets their own copy of books
- Parent/Grandparent/Guardian help
- Place for teens to hang out informally with mentors to listen and down the line connect them to skills, interests, options to help with school work
- Music classes (enrichment) of all kinds
- Access to computer / printing
- Design Assistant – ways for all to collaborate and share skills needs

- **Stem Programs for youth**
- **Curated book exchange free library**
- **Computer Lab should have the tables that will hide the monitor & keyboard so you can use as classroom**
- **Reading stories with kids and their parents**
- **Classroom – lab – computer should be combined space**
- **I agree with this: "Classroom – lab – computer should be combined space."**
- **Flat screen & digital displays of African American History in Berkeley integrated into the whole building.**
- **Might include archive Dr. Stephanie Jounsor has done a lot of research on black research on black families, businesses etc. in Berkeley – this project could be continuing & physical documents kept & collected here.**

- Resources for students
- Computer / printer station for community
- Stem lab – area to foster tech imagination w/ youth
- Autobiography and poetry written by great leaders
- Have a computer room and chrome books
- I grew up in south Berkeley (but moved to Hayward years ago). I wish the new center would have:
- Tutoring for children and
- A Book library of African-American History. I cried when the Library on Adeline & Woulsa closed and moved away. Let's bring in back this way
- Basic Home Safety protocols. Young people can video on demand
- I need help with depression, job, housing, self-care techniques
- Planning trips for the kids to go to Africa (Ghana, Nigeria) and see the world.

Getty Images

Education

- **Celebrating Black excellence**
- **A place where youth can get correct education**
- **Reeducation of African American kids with own books**
- **Library**
- **Classroom**
- **Computer Lab / Resource Center**
- **Freedom School**
- **How to think outside of box**
- **Independent thinking outside of box - includes critical thinking.**
- **Educational disparities and core fundamentals; understanding the why**
- **Pre-K**
- **Movement**
- **Remove discipline in learning.**
- **Allow kids to learn at their own pace**
- **Emotional intelligence**
- **Learn about our history and culture**
- **Independent study school**
- **Conference room for youth with library**

AE3 ARCHITECTURE + CM

- A place to get tools for healing and wellness
- Sound Proof hubs for sensory sensitive individuals – a place to 'reset' – add-on to 'chill space'
- Endowment / Grant Writers / Sponsorships for Health Interns to do natural practices
- Fitness/Wellness Center
- Space for Telehealth appointments
- Medical Information Center – to help locals apply for county assistance
- Groups for people with Multiplicity
- Individual Therapy that's right for the person and choices
- Assistance in health Issues
- Exercise room
- Space for all African Projects: Mental Health Services, Health Services
- Therapy Rooms – Group Therapy meeting Room
- Therapy/Meeting Rooms (Group Therapy)
- Medical Help how to apply for county assistance
- I am concerned about mental health
- Family and mental help
- Community kitchen for skills building exercises and trainings
- **Will there be small rooms/office for medical or therapy meetings one on one?**
- **Clinical care & mental health should be combined**
- **Consider the word culinary instead of kitchen**
- Basic Home safety programs young people conform…
- Getting to eat healthy and knowing resources are….
- Kitchen – food provided for evening meeting i.e. families and babysitting/sitters
- Community Kitchen
- Snacks
- Have mental health created by the cycle of violence
- To learn more about holistic health alternative meds for anxiety
- Resources to black Therapist
- Getting to learn to eat healthy and knowing resource are and creating…
- A place that is a hub for healing, health and joy

Health

- Safe meditation space for healing collectively and individually: yoga, samba
- Traditional and non-traditional health practices
- Resolve mental / physical health disparities
- Healthy food
- Herbalism, natural oils and spices
- Kitchen

- Black ownership In the community
- Hub for networking
- Continued Funding to sustain the center
- Collaboration/youth empowerment
- Senior empowerment
- Job development
- Maker space
- Work shared space
- Help for homeless women/men/children
- Food/Housing resources
- Proper Funding
- Worries - Make sure the city follows through their goals for the site
- Worries - That the center won't get started
- My worry is that the progress will slow down and 15 years will pass before it will actually happen in the building.
- I worry about staffing levels. Often programs are understaffed.
- Basic finance management
- Hire Architects that look like us
- Resources
- Financial support and services that Help people gain housing
- Resources for POC by POC provides
- Black Community Center Rental
- **Jobs for Youth!**
- **Please include the "Maker Space" in the Pre-k room or incorporate it in any other room such as the event space.**
- **Limited short-term space for emerging black owned businesses**
- **Good transit connections**
- **Intergenerational tools: Sewing Machines, Table saw, plotters & cutters, etc**

Economics

- **African economics. Deal with spirit**
- **Empowerment and entrepreneurism away from capitalism**
- **Financial literacy**
- **Area to accommodate entrepreneurs.**
- **Pop-ups**
- **Maker Space**

AE3 ARCHITECTURE + CM

- Motivating
- Interactive
- Peaceful
- Impactful
- Relaxing
- Umbutu (I am because we are; We are because I am; May the circle be unbroken)
- Revitalize
- Life
- Child friendly spaces
- Kitchen (No carbs like white flour, rice, pasta) – Hopefully all food is pesticide free – healthy & organic
- A place that is sustainable
- Non-destructive space
- **Sound dampening for open and shared spaces**
- **Movable walls "flex spaces"**
- **Universal Design**
- **What about Pets!?**
- **Lovely at first. How will it be maintained consistently to avoid rodents?**
- **Combine the edible garden and meditation spaces**
- **Maximum outdoor "rooms"**
- **Important that plants are native / edible not just ornamental**
- **Make the most of outdoor spaces vertical / shade / sun. Movable furniture.**
- **Water / fountains**
- **Green roof w/ edible garden**
- **Include a living wall somewhere**

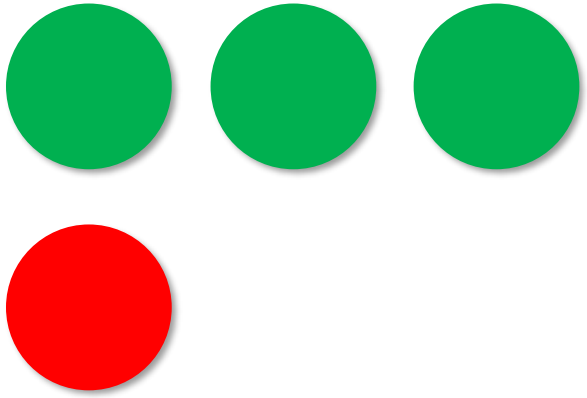

- Space for mediation
- Warm; natural light
- Clean
- Open Concept
- Very Welcoming warm greeting; pleasant attitude; calm voice
- A welcoming inviting 'face' to the street to entice folks to come in
- Colors – Warm earth tones & gold
- A lot of natural light
- A comfort Zone
- A place that is a hub for health and joy
- Place to celebrate black joy and culture
- Chill room
- I'm so happy this space will exist
- Food
- Quiet room/peace room
- Space to get away and have time for myself
- Green Space
- Greenery
- Garden
- Grown Own Food
- Plants and flowers throughout
- KEEP THE TREE!
- Plants and flowing water throughout the building

Look and Feel

- ***Beautiful***
- ***Change the narrative to Afro-centric visually and aesthetically***
- ***Natural lighting***
- ***Natural materials***
- ***Whole spaces where an individual can transition and re-integrate into community e.g., Disneyland***
- ***Ensure institutionalism is not part of space e.g., colors, flooring.***
- ***Chill space away from tech e.g., no phone zones***
- ***Movable walls***
- ***Transformative space – multi-purpose & uses***
- ***Flexible, adaptive safe and open space not facing street. "Atrium"***
- ***Rooftop garden***

AAHRC: VOTING PROCESS (JULY 12, 2023 MEETING)

Getting your feedback:

The Voting Process:

- For the next two exercises, each participant will get three (3) **green sticky dots** and (1) **red sticky dot**
- Place **green sticky dots** on the three concept or images that you like the best and most resonate with you.
- Place the **red sticky dot** on the concept or idea that you like the least
- Items that receive the most green will be ranked as a higher priority
- Items that receive the most red will be ranked lower.

Did We Miss Something?

- Use that we feel we should consider

AE3 ARCHITECTURE + CM

- Welcome of Youth and Elders
- Powerful
- Empowering
- Space to share the Gospel
- Revitalize
- Liberation
- Non-destructive space
- Jurisprudence
- Altar Prayer space
- Restrooms - Gender Neutral
- A safe space to address sexual assault
- Community Agreements regularly revised
- Safe loving education on Black Hair/Black hair care
- Access to specialty care services (legal services) through partnerships & hosting of special events
- Opportunities for folks to learn de-escalation strategies.
- Ambassadors, mentors and advocates that can assist both within w/ outside navigation in the mainstream i.e. how to find resources
- Safe areas for socialization for all age groups
- Welcome Elders with their Knowledge and experience
- Information center - Department of Children and families/Parent Guardian Help/Food Housing
- A place of your (Black Community) vision that is actively supported by Berkeley community members and organizations in meaningful, constructive ways
- A building that will be open and inviting to all – and particularly the black residents

- A community resource that connects people
- Organizations and businesses that represent the black community of Berkeley
- Community Center where people meet on the weekends after hours
- **Event Space and Community should be combined space**
- **We don't need another space turning into a rental facility for city funds**
- High tech and safe
- Conflict
- Collaborative Space
- Have a 'greeter'
- Conference Space
- Job Development
- Warm and nurturing
- Usable space for other A/O organizations
- Space for all African Projects: Legal Services

- **Senior spaces & relationships w/youth & pre-k**
- **Space for older adults & youth to interact**
- **"Circle spaces" not linear rows**
- **Elder care respite – shuttles to service centers?**
- **Spiritual Space with African drumming meditations dance**
- Afro-centric – inviting to the Black community especially
- Have a 'greeter' at the door to welcome folks in and direct them to what's available
- Break the cycle: Mass incarceration; work to end homelessness
- I am concerned that the space be a place for all levels
- I worry that the immediate neighbors on this block won't feel that this is their space (along with others)
- Dance R&B music for social interaction for 14–18-year-olds
- Video on demand
- I pray that young children will catch the vision and pass the torch so that others will learn, believe, achieve, succeed
- Assistance and info about tenant rights
- Gathering place for music, arts and culture for black folks
- Rentable event space to give community the opportunity to have events at an affordable price (Birthdays/Baby showers)
- Conference room named after Barbara White
- A football room
- Protection
- A place to play basketball
- Talk about victims of CPS abuse and violent crimes in a private room
- Space to learn about the laws at CPS taking our kids
- Have civil lawyers pro-bono for mothers
- Have a space to help with w/interpersonal violence.
- Hear from foster kids what they need. Share with circles of interest and concerns.
- Circles of inclusion with all ages, colors to play music, do art, share hopes & dreams of future world ideas of how to get together and a list of needs especially and where folks can contribute services money and share the ideas with other
- Help connect foster care/adoptive kids of color w/ mentors/leaders of color in our community

Community

- **Warm welcoming place**
- **A place for "us"**
- **Safe to be unapologetically Black**
- **A place where lost people can find themselves**
- **Accommodate people of all abilities centered in joy**
- **Sanctuary**
- **Own our narrative, change the counter narrative**
- **Storytelling all generations and history of community**
- **"Community Agreement" room**
- **Rules and bylaws to deescalate conflicts**
- **Social agreement**
- **What is said here stays here**
- **Place where everybody knows your name**
- **Safe space to resolve conflict disputes**
- **Space to hold events**
- **"Conference Room" where voices are heard**
- **Welcome Center**

AAHRC: WHAT WE HEARD, PART 2

Color Code for Meeting Dates:
Black Text: *June 7, 2023*
Green Text: *June 12, 2023*
Red Text: *June 18, 2023*

- How do we get well rounded youth out of this collective / community learning
- How to balance technology and have tech work for individual / community
- Inspirationally powerful
- Multi-generational programming events together
- Book Club / talks
- Self esteem
- Career Resources for students and professionals
- College application mentorships / workshops
- Wifi / Internet capability
- Computer access / Printing
- Skills Training / Job development
- Book Nook / Reading Area with focus on African American history / African Studies
- Book Club
- Youth Advisory
- Internship Programs
- Multi-Generational programming events together
- Book clubs / talks
- Library w/ robust access to high quality books
- Space for all African Projects:
- Digital Equity Access
- Educational Services
- Place for parents to come with young kids and have storybook and each child gets their own copy of books
- Parent/Grandparent/Guardian help
- Place for teens to hang out informally with mentors to listen and down the line connect them to skills, interests, options to help with school work
- Music classes (enrichment) of all kinds
- Access to computer / printing
- Design Assistant – ways for all to collaborate and share skills needs

- **Stem Programs for youth**
- **Curated book exchange free library**
- **Computer Lab should have the tables that will hide the monitor & keyboard so you can use as classroom**
- **Reading stories with kids and their parents**
- **Classroom – lab – computer should be combined space**
- **I agree with this: "Classroom – lab – computer should be combined space."**
- **Flat screen & digital displays of African American History in Berkeley integrated into the whole building.**
- **Might include archive Dr. Stephanie Jounsor has done a lot of research on black research on black families, businesses etc. in Berkeley – this project could be continuing & physical documents kept & collected here.**

- Resources for students
- Computer / printer station for community
- Stem lab – area to foster tech imagination w/ youth
- Autobiography and poetry written by great leaders
- Have a computer room and chrome books
- I grew up in south Berkeley (but moved to Hayward years ago). I wish the new center would have:
- Tutoring for children and
- A Book library of African-American History. I cried when the Library on Adeline & Woulsa closed and moved away. Let's bring in back this way
- Basic Home Safety protocols. Young people can video on demand
- I need help with depression, job, housing, self-care techniques
- Planning trips for the kids to go to Africa (Ghana, Nigeria) and see the world.

Getty Images

Education

- **Celebrating Black excellence**
- **A place where youth can get correct education**
- **Reeducation of African American kids with own books**
- **Library**
- **Classroom**
- **Computer Lab / Resource Center**
- **Freedom School**
- **How to think outside of box**
- **Independent thinking outside of box - includes critical thinking.**
- **Educational disparities and core fundamentals; understanding the why**
- **Pre-K**
- **Movement**
- **Remove discipline in learning.**
- **Allow kids to learn at their own pace**
- **Emotional intelligence**
- **Learn about our history and culture**
- **Independent study school**
- **Conference room for youth with library**

15	Maker Space	3	0	3
2	Community Room	3	3	0
10	Classroom	0	0	0

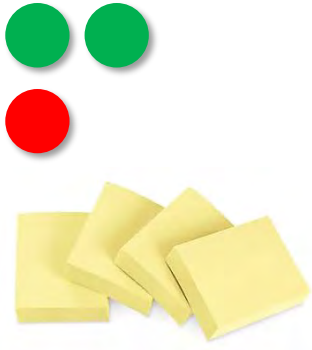

- Pre-K requires a larger program area and other specifics beyond the scope of this project.
- Project will look for commonalities in spaces to develop flex / multipurpose spaces that can be joined together into larger spaces as needed.

AAHRC: DESIRED OUTCOME FROM TODAY

We are presenting three initial concepts today that capture how the desired uses / spaces can fit on the site.

After this presentation, we would like to capture everyone's vote and other feedback by using the same process as before:

- ***Everyone gets two (2) green dots and one (1) red dot***
  - *Really like an option, add 2 dots to it*
  - *Like two options, add a dot to each (can only pick two)*
  - *Don't like an option, add a red dot (you don't have to though)*
- ***We also have yellow stickies for additional comments***

Today we are focusing on:

- ***Overall building form***
- ***Overall relationship and configuration spaces***
- ***General size of spaces***

We want to get these items right before we proceed on additional design!

We are not focusing on the following items today
(we will in future sessions):

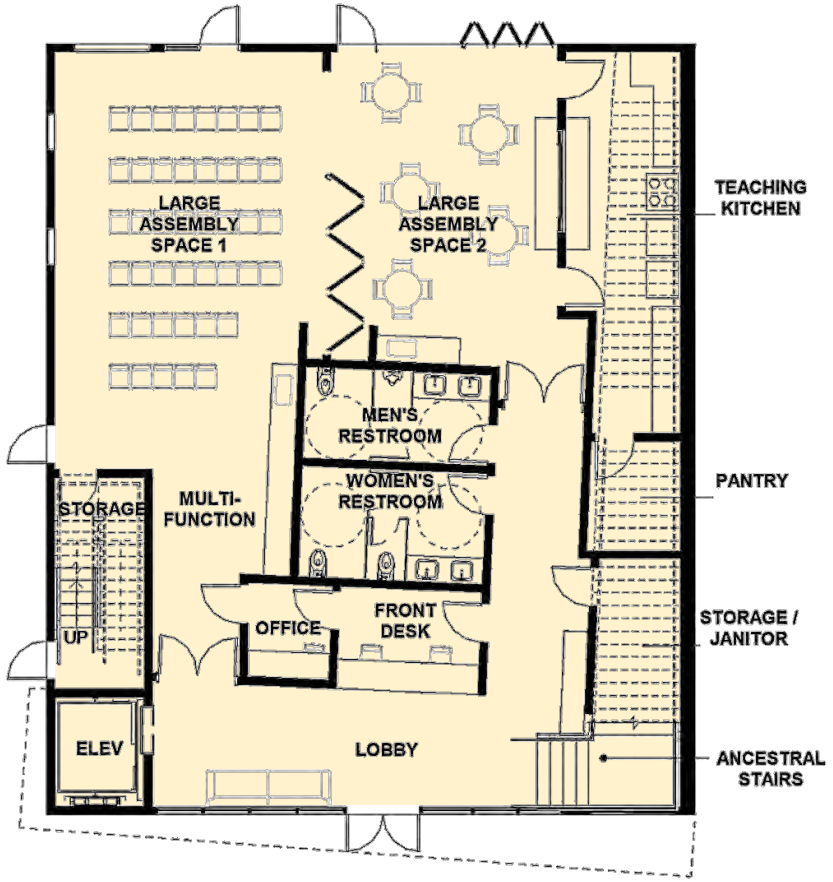

- ***Detailed layout / fittings within each space***
- ***Specific colors, materials or finishes on the interior and exterior***
- ***Specific architectural elements or furnishings***

Hi Singeh,

Can you confirm if this project is still scheduled for a ZAB hearing on December 11? Also, can you please send me the conditions of approval that staff will recommend?

Thank you,
Jacob

Hi Singeh,

I was not able to attend last night's DRC meeting due to childcare responsibilities. Can you share the outcome of the DRC's actions on this project? Additionally, please let me know if a ZAB hearing date has been scheduled yet for this project.

As always, I appreciate your helpfulness and responsiveness.

Thanks,

Jacob

Hi Singeh,

Thank you for sharing this information.

Mitigation Measure N-2 provides that "During construction activity that is immediately adjacent to noise-sensitive receptors, temporary sound barriers may be installed and maintained, **at the discretion of the City's Department of Planning and Development**." Since this project is adjacent to noise-sensitive receptors (preschool and residences), this raises the question of whether the Department of Planning and Development will exercise its discretion to require installation and maintenance of temporary sound barriers. Can you clarify whether the Department will require temporary sound barriers for this project?

Additionally, can you provide (if available) the following reports required by the Adeline Corridor Specific Plan MMRP and standard COAs?

-Health Risk Assessment (ACSP MM AIR-2)

-Site-Specific Noise Reduction Program (ACSP MM N-2)

-Site-Specific Vibration Reduction Program (ACSP MM N-3)

-Soil and Groundwater Management Plan (Toxics COA D)

-Building Materials Survey (Toxics COA E)

Thank you,

Jacob

Subject: Re: City of Berkeley African American Holistic Center (ZP2024-0183)

Hi Singeh,

Circling back to our earlier correspondence regarding the African-American Holistic Resource Center, I had some follow-up questions:

1. Has the Toxics Management Division provided comments on the application? I did not see anything from them uploaded to the Permits Online website as of yet.

> The applicant attended an interdepartmental roundtable meeting in July and received comments directly from multiple City departments including Toxics. The Toxics Division informed the applicant that because the Phase I ESA recommended no further investigation, standard conditions of approval (see attachment) would apply to the use permit.

2. Given that the Phase 1 ESA noted the potential for soil contamination due to the site's prior use as a gas station (at a time that preceded modern regulations of gas stations, underground storage tanks, hazardous substances, etc.), and you stated that no soils testing has been conducted at this time, will city staff be recommending or requiring any soils testing prior to construction?

> See Toxics standard conditions in attachment

3. Are you able to share any measures that city staff will propose the ZAB adopt to avoid or mitigate adverse environmental and health impacts during construction, specifically regarding noise, air quality, and hazardous substances impacts on the adjacent preschool?

The project site is within the Adeline Corridor Specific Plan Area, so the use permit would include a condition of approval to comply with the Mitigation Monitoring and Reporting Program (see attachment).

4. Do you have any update on an estimated timeline for when this project application will be brought to ZAB for consideration?

The project is tentatively scheduled for the October DRC; however a ZAB hearing date has not been set.

Thank you for your helpful assistance and continued responsiveness to my questions.

Best,
Jacob

> Hi Singeh,

I see a number of documents, including the Phase 1 ESA, were uploaded to the public-facing zoning permit application website you reference earlier this week. After reviewing the documents, I didn't locate any applicant-proposed or staff-recommended measures to mitigate the project's construction noise, air quality, and hazardous materials impacts—are you able to share that with me? Also, the Phase 1 report indicates the possibility of contaminated soils due to the old gas station on the property—has any soil testing been conducted to investigate this issue? Thank you for your continued assistance and responsiveness, I do appreciate it.

Best,
Jacob

Hi Ms. Saliki,

Thank you for sharing this information.

Would you be able to share with me the text of any applicant-proposed or staff-recommended measures to mitigate the project's construction noise, air quality, and hazardous materials impacts? Also, would you be able to share any Phase 1 and Phase 2 reports for the property?

To be transparent and candid with you, my specific concerns are related to construction impacts on the preschool (which has an outdoor backyard

play area) located on the adjacent property. Any information you can provide me to help allay these concerns would be appreciated.

Thank you,
Jacob

> >
> > Good morning Mr. Aronson,

I am in receipt of your email regarding the African American Holistic Center proposed for 1890 Alcatraz (ZP2024-0183). Answers to your questions are included below.

1. I was told that the Zoning Adjustments Board is planning to consider approving the project in May. Can you share the anticipated date of the ZAB meeting for this project?
   The application was deemed complete on April 24, 2025 and a public hearing date has not been scheduled.

   The applicant is working to correct/clarify/supplement details of the application submittal. A public hearing date has not been scheduled.

2. How does the city intend to comply with CEQA for this project? Can you please share any associated CEQA document (e.g., EIR, Negative Declaration, exemption-related documentation)?
   The CEQA pathway is under review.

   Staff has determined that this project is eligible for a Class 32 Infill Exemption (CEQA Guidelines Section 15332). Staff will recommend this exemption determination to the Zoning Adjustments Board.

3. Can you please share any anticipated/proposed mitigation measures and conditions of approval for the project?
   Since the project is under review for CEQA pathway and analysis, there are no mitigation measures or Conditions of Approval that have been prepared for the project at this time.

   The final determination and conditions are made by the Zoning Adjustments Board.

Singeh Saliki is the project planner for the application. She is copied on this email.

Sincerely,
Anne

The Permit Service Center (PSC), including the zoning counter, is open *between 8:30 am – 2:30 pm (final check in at 2:00 pm) Monday through Thursday*.

All permit-related and Zoning services are available online. Please visit us online for more information.

Mitigation Monitoring and Reporting Program

The Environmental Impact Report (EIR) identifies the applicable mitigation measures that will be implemented to reduce the impacts associated with the Adeline Corridor Specific Plan. The California Environmental Quality Act (CEQA) requires a public agency to adopt a monitoring and reporting program for assessing and ensuring compliance with any required mitigation measures applied to proposed development. As stated in section 21081.6(a)(1) of the Public Resources Code:

> *...the public agency shall adopt a reporting or monitoring program for the changes made to the project or conditions of project approval, adopted in order to mitigate or avoid significant effects on the environment*.

Section 21081.6 also provides general guidelines for implementing mitigation monitoring programs and indicates that specific reporting and/or monitoring requirements, to be enforced during project implementation, shall be defined as part of adopting a mitigated negative declaration.

The mitigation monitoring table lists those mitigation measures that may be included as conditions of approval for the project. To ensure that the mitigation measures are properly implemented, a monitoring program has been devised which identifies the timing and responsibility for monitoring each measure. The project applicant will have the responsibility for implementing the measures, and the various City of Berkeley departments will have the primary responsibility for monitoring and reporting the implementation of the mitigation measures.

Mitigation Measure/ Condition of Approval	Action Required	Monitoring Timing	Responsible Agency	Compliance Verification		
				Initial	Date	Comments
AIR QUALITY						
AQ-1: Construction Emissions Measures.						
As part of the City's development approval process, the City shall require applicants for future development projects in the Plan Area to comply with the current Bay Area Air Quality Management District's basic control measures for reducing construction emissions of PM10 (Table 8-2, Basic Construction Mitigation Measures Recommended for All Proposed Projects, of the May 2017 BAAQMD CEQA Guidelines).	Review of all demolition, grading, and building permits to ensure compliance.	Prior to permit approval and during construction.	City of Berkeley Department of Planning & Development.			
AIR-2: Health Risk Assessments.						
As part of the City's development approval process, the City shall require applicants for future development projects in the Plan Area to implement the Bay Area Air Quality Management District Guidelines and State Office of Environmental Health Hazard Assessment policies and procedures requiring health risk assessments (HRA) for residential development and other sensitive receptors near sources of toxic air contaminants, including freeways and roadways with over 10,000 vehicles per day. Based on the results of the HRA, identify and implement measures (such as air filtration systems, waterproofed caulking on windows and doors, and/or requirements for closed windows) to reduce potential exposure to particulate matter, carbon monoxide, diesel fumes, and other potential health hazards. Measures identified in HRAs shall be included into the site development plan as a component of a proposed project.	Verify HRA completed and measures to reduce TACs have been incorporated into plans as appropriate.	Prior to issuance of building permit.	City of Berkeley Department of Planning & Development.			
BIOLOGICAL RESOURCES						
BIO-1: Special-status Bat Species Avoidance and Minimization.						
For projects in the Plan Area, focused surveys to determine the presence/absence of roosting bats shall be conducted prior to the initiation of demolition of buildings and removal of mature trees large enough to contain crevices and hollows that could support bat roosting. If active maternity roosts are identified, a qualified biologist	If applicable, project plans shall include project-specific mitigation	During individual environmental review	City of Berkeley Department of Planning & Development.			

Mitigation Measure/ Condition of Approval	Action Required	Monitoring Timing	Responsible Agency	Compliance Verification		
				Initial	Date	Comments
shall establish avoidance buffers applicable to the species, the roost location and exposure, and the proposed construction activity in the area. If active non-maternity day or night roosts are found on the project site, measures shall be implemented to passively relocate bats from the roosts prior to the onset of construction activities. Such measures may include removal of roosting site during the time of day the roost is unoccupied or the installation of one-way doors, allowing the bats to leave the roost but not to re-enter. These measures shall be presented in a Bat Passive Relocation Plan that shall be submitted to, and approved by, CDFW.	measures to reduce impacts to bat species.					
GREENHOUSE GAS EMISSIONS						
GHG-1: All-Electric New Construction.						
All new buildings constructed in the Plan Area shall be built as all-electric with no natural gas connection to the building, except where new natural gas connections are permitted under the City's Natural Gas Infrastructure Ordinance (BMC Chapter 12.80). This includes all appliances such as electric cooking, clothes drying, water heating, space heating, and air conditioning. Projects shall not be required to employ methods of construction the exceed the requirements of the California Building Standards Code (inclusive of any local amendments approved for enforcement in the City of Berkeley) or install appliances the exceed standards for energy efficiency established under the federal Energy Policy and Conservation Act, as amended, 42 U.S.C. § 6201 *et seq.*	Verify project plans are all-electric, or GHG reduction has occurred through specified means.	Prior to issuance of building permit	City of Berkeley Department of Planning & Development			
GHG-2: Electric Vehicle (EV) Readiness and EV Chargers						
All new development projects in the Plan Area shall conform to the following EV infrastructure requirements or an equivalent City of Berkeley adopted ordinance which meets or exceeds those standards: b. Single Family Homes and Duplexes	Verify project plans meet EV requirements.	Prior to issuance of building permit	City of Berkeley Department of Planning & Development			

Mitigation Measure/ Condition of Approval	Action Required	Monitoring Timing	Responsible Agency	Compliance Verification		
				Initial	Date	Comments
▫ At least one parking space per dwelling unit with on-site parking to be equipped with raceway, wiring, and power to support a future Level 2[1] EV charging station c. Multi-Family Buildings ▫ 20% of parking spaces to be equipped with raceways, wiring, and power to support future Level 2 EV charging stations ▫ 80% of parking spaces to be equipped with connecting raceways (no additional electric service capacity required) d. Non-Residential Buildings ▫ 10% of parking spaces must have Level 2 charging stations installed (a DC Fast Charge station) may be installed in place of 10 required Level 2 stations) ▫ 40% of parking spaces to be equipped with connecting raceways (no additional electric service capacity required) ▫ [1] Level 2 circuit: 40+ Amp, 208/240v AC (standard household washer/dryer outlet), charges approximately 25-30 mile driving distance per hour						
GHG-3 Solar Photovoltaic Power.						
All new buildings, with the exception of accessory buildings and structures, proposed in the Plan Area shall install solar photovoltaic energy systems or purchase 100% carbon neutral or renewable energy through an electric utility serving Berkeley. Solar photovoltaic equipment shall be shown on all plans submitted for individual projects in the Plan Area	Verify project plans meet solar requirements.	Prior to issuance of building permit	City of Berkeley Department of Planning & Development			
NOISE AND VIBRATION						
N-2: Construction-Related Noise Reduction Measures.						
Development projects in the Plan Area that involve construction activities shall apply the following measures during construction for the purpose of reducing construction-related noise:	Review and approve site-specific noise reduction program for the project.	Monitoring during construction.	City of Berkeley Department of			

Mitigation Measure/ Condition of Approval	Action Required	Monitoring Timing	Responsible Agency	Compliance Verification		
				Initial	Date	Comments
▪ **Construction Timing.** Construction activities shall be restricted to the daytime hours of between 7:00 AM and 7:00 PM on weekdays, or between 9:00 AM and 8:00 PM on weekends and legal holidays. ▪ **Mufflers.** Construction equipment shall be properly maintained and all internal combustion engine driven machinery with intake and exhaust mufflers and engine shrouds, as applicable, shall be in good condition and appropriate for the equipment. During construction, all equipment, fixed or mobile, shall be operated with closed engine doors and shall be equipped with properly operating and maintained mufflers, consistent with manufacturers' standards. ▪ **Electrical Power.** Electrical power, rather than diesel equipment, shall be used to run compressors and similar power tools and to power any temporary structures, such as construction trailers or caretaker facilities. ▪ **Equipment Staging.** All stationary equipment shall be staged as far away as feasible from adjacent noise-sensitive receptors. ▪ **Equipment Idling.** Construction vehicles and equipment shall not be left idling for longer than five minutes when not in use. ▪ **Workers' Radios.** All noise from workers' radios shall be controlled to a point that they are not audible at sensitive receptors near construction activity. ▪ **Smart Back-up Alarms.** Mobile construction equipment shall have smart back-up alarms that automatically adjust the sound level of the alarm in response to ambient noise levels. Alternatively, back-up alarms shall be disabled and replaced with human spotters to ensure safety when mobile construction equipment is moving in the reverse direction. ▪ **Disturbance Coordinator.** The applicant shall designate a disturbance coordinator who shall be responsible for responding to any local complaints about construction noise. The noise disturbance coordinator shall determine the cause of the noise complaint (e.g., starting too early, bad muffler, etc.) and shall require that reasonable measures warranted to	Monitor compliance with approved noise reduction program.		Planning and Development.			

Mitigation Measure/ Condition of Approval	Action Required	Monitoring Timing	Responsible Agency	Compliance Verification		
				Initial	Date	Comments
correct the problem be implemented. A telephone number for the disturbance coordinator shall be conspicuously posted at the construction site. ▪ **Additional Noise Attenuation Techniques.** During construction activity that is immediately adjacent to noise-sensitive receptors, temporary sound barriers may be installed and maintained, at the discretion of the City's Department of Planning and Development. Temporary sound barriers, if installed, shall block line of sight between noise-generating construction equipment and adjacent residential windows and shall be placed as close to the source equipment as feasible. Mobile sound barriers may be used as appropriate to attenuate construction noise near the source equipment. During the building construction phase, temporary sound barriers may be applied to generators and cranes used on-site.						
N-3: Vibration Reduction Measures.						
Applicants for new development that would involve construction activity in the Plan Area shall implement the following measures to reduce exposure to vibration from construction activities: ▪ **Best Available Technology.** The applicant shall use the best available technology to reduce construction-related vibration on construction sites within 100 feet of institutional land uses that are sensitive to vibration, and within 50 feet of historic buildings, so that vibration levels do not exceed guidelines in the Federal Transit Administration's *Transit Noise and Vibration Impact Assessment Manual* for annoyance and damage to fragile structures. Appropriate technology may include, but is not limited to: ▫ Drilling of piles instead of pile driving for foundation work ▫ Static rollers instead of vibratory rollers for paving activity ▫ Smaller and well-maintained equipment ▪ **Construction Scheduling.** The applicant shall coordinate with adjacent institutional land uses that are sensitive to vibration	Review and approve site-specific vibration reduction program. Monitor compliance with approved noise reduction program.	Monitoring during construction.	City of Berkeley Department of Planning and Development.			

Mitigation Measure/ Condition of Approval	Action Required	Monitoring Timing	Responsible Agency	Compliance Verification		
				Initial	Date	Comments
and schedule vibration-generating construction activities during less sensitive times of day.						
TRANSPORTATION AND TRAFFIC						
T-2 Signal Warrant Study and Signalization.						
Development projects tiering from the Adeline Street Specific Plan EIR with primary automobile access on one of the following local streets that is currently controlled by a stop-sign at the intersection with a major street shall evaluate traffic operations and the MUTCD signal warrants at the intersection: ▪ Shattuck Avenue at Blake, Parker, and Derby Streets ▪ Adeline Street at Stuart, Russell, Essex, Woolsey, Fairview, and Harmon Streets The signal warrant study shall be completed as part of the environmental review process for the development project. If the intersection meets the signal warrants and the development project would add ten or more trips to the critical movement that operates at LOS F during the AM and/or PM peak hour, the study shall identify improvements to mitigate the impact. The improvements may consist of signalizing the intersection, and/or restricting one or more movements at the intersection. The study shall also evaluate the secondary effects of the identified improvement, such as traffic diverted to other streets due to turn restrictions. The development project shall install the identified improvement.	Verify evaluation of signal warrants has occurred. If signal warrant met, verify improvements developed and installed.	Prior to issuance of building permit.	City of Berkeley Department of Planning and Development.			

This page intentionally left blank.

Toxics. The applicant shall contact the Toxics Management Division (TMD) at 1947 Center Street or (510) 981-7470 to determine which of the following documents are required and timing for their submittal:

A. Phase I and Phase II Environmental Site Assessment (ESA) (per ASTM 1527). A recent Phase I ESA (less than 2 years old) shall be submitted to the Toxics Management Division for developments for: all new commercial, industrial and mixed-use developments and all improvement projects that require work 5 or more feet below grade, and all new residential buildings with more than four dwelling units located in the Environmental Management Area (or EMA). The EMA can be viewed at: City of Berkeley Community GIS Portal (arcgis.com)

B. Depending on the findings in the Phase I, a Phase II or additional investigation may be necessary. Any available soils and groundwater analytical data available for projects listed in this section must also be submitted to TMD.

C. Environmental Site Clearance. The applicant shall provide environmental screening clearance from either the San Francisco Bay Regional Water Quality Control Board (RWQCB), Department of Toxic Substances Control (DTSC), or the Alameda County Department of Environmental Health's Local Oversight Program (LOP). Clearance from one of these regulatory agencies will ensure that the property meets development investigation and cleanup standards for the specific use proposed on the property. Environmental screening clearance shall be submitted to the City of Berkeley's Toxics Management Division prior to issuance of any building permits.

D. Soil and Groundwater Management Plan. A site-specific Soil and Groundwater Management Plan (SGMP) shall be submitted to Toxics Management Division (TMD) for all non-residential projects, and residential or mixed-use projects with more than four dwelling units, that: (1) are in the Environmental Management Area (EMA), as shown on the most recent City of Berkeley EMA map, and (2) propose any excavations deeper than 5 feet below grade or if significant soils removal is anticipated. The SGMP shall be submitted to the TMD with the project's building permit application and shall be approved by TMD prior to issuance of the building permit.

The SGMP shall comply with the hazardous materials and waste management standards required by BMC Section 15.12.100, the stormwater pollution prevention requirements of San Francisco Bay Regional Water Quality Control Board's Order No. R2-2009-0074, California hazardous waste generator regulations (Title 22 California Code of Regulations (CCR) 66260 et seq.), and the East Bay Municipal Utility District's Ordinance 311, and shall include the following:

i. procedures for soil and groundwater management including identification of pollutants and disposal methods;

ii. procedures to manage odors, dust and other potential nuisance conditions expected during development;

iii. notification to TMD within 24 hours of the discovery of any previously undiscovered contamination; and

iv. the name and phone number of the individual responsible for implementing the SGMP and who will respond to community questions or complaints.

TMD may require additional information or impose additional conditions as deemed necessary to protect human health and the environment. All requirements of the approved SGMP shall be deemed conditions of approval.

E. <u>Demolitions & Renovations – Building Materials Survey.</u> A hazardous materials survey for building materials and plans on hazardous materials and hazardous waste removal and disposal is required and must be prepared by qualified professionals, and submitted to the Toxics Management Division (TMD) prior to issuance of the building permit.

i. The survey shall include the identification of all materials to be disturbed for lead-based paints, PCB containing equipment and caulking, hydraulic fluids, refrigerants, treated wood, and mercury containing devices (including fluorescent light bulbs and mercury switches), asbestos and other hazardous materials and chemicals.

ii. If asbestos is identified, Bay Area Air Quality Management District Regulation 11-2-401.3 a notification must be made and the J number must be made available to the City of Berkeley Permit Service Center. Contractors must follow state regulations where there is asbestos-related work involving 100 square feet or more of asbestos containing material (8 Cal. Code Regs. §1529, §341.6 et seq.)

iii. The report to the TMD shall include, in addition to the survey, plans on hazardous materials and hazardous waste removal and disposal that comply with State and Federal codes including California Code of Regulations (CCR) 66260 et seq.

iv. Documentation evidencing disposal of hazardous waste in compliance with the survey shall be submitted to TMD within 30 days of the completion of the demolition.

Please note, the PCB Screening Form required by Public Works, Engineering, is a separate requirement and does not address the PCB identification requirement of the Toxics Management Division.

F. **Hazardous Materials Business Plan.** A Hazardous Materials Business Plan (HMBP) in compliance with BMC Section 15.12.040 and California Health & Safety Code, Chapter 6.95 Div. 20, shall be submitted to the Toxics Management Division through the California Environmental Reporting System: http://cers.calepa.ca.gov/ for chemicals used or stored on site during construction that exceed reporting thresholds. The reporting is required if your facility stores or handles hazardous materials in aggregate quantities equal to or greater than 55 gallons for liquids, 500 pounds for solids, or 200 cubic feet of compressed gases, or generates any quantity of hazardous waste. This includes welding gases, emergency generator fuel, paints, etc.

Additionally, the business occupant must submit an HMBP within 30 days of starting operations.

G. **Petroleum Storage.** An (SPCC) Plan is required to be prepared and implemented for facilities with any one of the following:

i. aggregate aboveground petroleum storage capacities of 1,320 gallons or more stored in aboveground storage containers, tanks, oil-filled equipment, or

ii. one or more tank(s) in an underground area (TIUGA) with petroleum storage capacities of 55 gallons or greater. More information on TIUGAs can be found here: https://osfm.fire.ca.gov/divisions/pipeline-safety-and-cupa/certified-unified-program-agency-cupa/aboveground-petroleum-storage-act/tank-in-an-underground-area-tiuga/

The SPCC plan must be prepared prior to beginning operations and you must submit facility information to Toxics Management Division (TMD) through the California Environmental Reporting System: http://cers.calepa.ca.gov/. The SPCC plan will be reviewed during the site inspection and shall not be submitted in CERS or to the TMD.

Subject: Request for Additional Mitigation Measures for the Proposed 1890 Alcatraz AAHRC Project

WARNING: This is not a City of Berkeley email. Do not click links or attachments unless you trust the sender and know the content is safe.

Dear Members of the Zoning Adjustments Board,

I am a life long Berkeley resident and parent of a child attending Mi Mundo Preschool right next door to the proposed African American Holistic Resource Center at 1890 Alcatraz. I fully support the mission and purpose of the AAHRC and welcome the investment in our community. My comments today focus solely

on ensuring that construction of the project proceeds in a manner that protects the health, safety, and well-being of the young children who attend Mi Mundo each day.

Given the close proximity between the school and the project site, I respectfully request that the Board require additional mitigation measures to minimize construction-related impacts. These measures are common in urban infill projects and represent reasonable protections for children, staff, and nearby residents.

Specifically, I ask the Board to consider requiring the following:

1. Soil, Environmental, and Air Quality Safety (Highest Priority)

- Require pre-construction soil testing for contamination. The City's consultant identified possible soil contamination from a former gas station on the site, yet no testing has been required to date.
- Remediate any hazardous substances found—including petroleum residues, lead paint, and asbestos—before demolition and grading activities begin.
- Limit diesel construction equipment and prioritize electric or low-emission alternatives to reduce exhaust exposure.
- Require dust-control and air-quality monitoring to ensure particulate levels remain safe for young children.

2. Construction Timing and Noise Mitigation

- Restrict demolition and high-noise activities during school hours, particularly during mid-day naptime when quiet is essential for children's well-being.
- Install temporary sound walls along shared property lines.
- Implement noise monitoring with required corrective action if noise thresholds are exceeded.

3. Pedestrian, Traffic, and Site Safety

- Maintain unobstructed access to sidewalks, bike lanes, crosswalks, and Mi Mundo's loading zone throughout construction.
- Implement clear safety plans for truck access, equipment staging, and temporary closures to prevent risks to children and families during drop-off and pick-up.

These requests do not oppose the AAHRC project; rather, they seek to ensure the project moves forward responsibly with appropriate safeguards for children located directly next to the construction site.

Thank you for your consideration and for your service to the City. I respectfully request that these mitigation measures be incorporated as conditions of approval.

Sincerely,

Ari K. Morimoto

Subject: Concerns Regarding Proposed Construction at 1890 Alcatraz

WARNING: This is not a City of Berkeley email. Do not click links or attachments unless you trust the sender and know the content is safe.

Dear Members of the Board,

We are writing in advance of the December 11th board meeting to express our concerns about the proposed construction at 1890 Alcatraz Avenue. We are the parents of a 3-year-old who attends the preschool next door, Mi Mundo.

Unfortunately, we are very familiar with the issue of lead contamination—our daughter had elevated blood lead levels when she was younger—so we know how easy it is for children to accidentally ingest or inhale lead from soil, paint, and especially construction dust.

Given the proximity of this project to a preschool, we respectfully request that the Board require the following safeguards:
• **Soil testing and remediation:** Test the soil for contamination prior to beginning construction, and safely remediate any hazardous substances that may be found. The City's consultant has already concluded that there is possible contamination due to a former gas station on the site, but the City has declined to test the soil.
• **Lead paint and asbestos abatement:** Identify and safely remediate any lead paint and asbestos in the existing building before demolition.
• **Cleaner construction equipment:** Limit the use of diesel construction equipment and require electric equipment to the extent feasible.
• **Safe access and circulation:** Ensure that the loading zone, sidewalk, bike lanes, and crosswalks are not obstructed during construction, so children and families can safely access the preschool.

We appreciate your attention to these concerns and your consideration of measures that prioritize the health and safety of young children.

Sincerely,
Lauren Silverman and Paulo Esperon
(Gaia's mother and father)

Subject: 1890 Alcatraz

WARNING: This is not a City of Berkeley email. Do not click links or attachments unless you trust the sender and know the content is safe.

Hello,

I am writing because my daughter attends preschool at Mi Mundo at 1866 Alcatraz, next door to the 1890 Alcatraz property that is to be the site of the new African American Holistic Resource Center. I am all for the new building. However from what I have read, the 1890 site adjoins another site that used to be a gas station, and the building at 1890 is quite old and likely to contain lead and asbestos. From what I have heard there isn't currently a plan to test the soil at 1890 or provide any remediation for toxins.

I am writing this email to ask that the soil and structure at 1890 Alcatraz be tested and preventative measures put in place to not expose the children at Mi Mundo to harmful contaminants such as lead and petrol products during the construction, as this can have significant impact on their health and brain development.

Thank you,

Tyler Kennedy

Geotechnical Investigation Report

Dear Mr. Isaac,

Construction Testing Services (CTS) is pleased to present this Geotechnical Investigation Report for the subject property located at 1890 Alcatraz Avenue in Berkeley, California. The purpose of our investigation was to explore and evaluate the subsurface conditions at the site and develop soils engineering conclusions and recommendations for project design and construction as well as provide an assessment the of geohazards present at and in the vicinity of the property.

Our explorations and analysis conclude the project is feasible for design and construction from a geotechnical engineering perspective. Due to the presence of near surface expansive soils, undocumented fill, and the potential for strong ground shaking, designs and construction details related to the geotechnical engineering aspects will be needed to accommodate such effects. A discussion of the subsurface conditions, our conclusions, and recommendations for geotechnical aspects of design and construction for the planned site improvements are presented in the following report.

We appreciate the opportunity to be of service to you over the course of this project. If you have any questions regarding the contents of this report, or if we could provide further assistance, please contact the undersigned.

Sincerely,

CONSTRUCTION
TESTING SERVICES

INTRODUCTION

1.1 GENERAL

Presented herein is a Geotechnical Investigation Report for the subject project located at 1890 Alcatraz Avenue, Berkeley, California, as shown on Plate 1. The purpose of our investigation was to explore and evaluate the subsurface conditions at the site and develop soils engineering conclusions and recommendations for project design and construction.

1.2 PROJECT DESCRIPTION

Based on our discussions with you and review of the Request for Proposal and Addendum dated May 9, 2022, we understand the City of Berkeley is seeking to renovate and/or rebuild the existing building located at 1890 Alcatraz Avenue. There are no details for the planned development at this time, however the following improvements are being considered:

- A second story addition **or** an expanded footprint for the existing structure
- Underground utilities and concrete flatwork, and
- Asphalt and rigid concrete pavements.

Building materials and structure type are not finalized at this time, but we assume the new buildings will be lightly to moderately loaded and constructed with concrete slab-on-grade floors with maximum wall and column loads of 2 kips per lineal foot and 100 kips maximum for walls and columns respectively. The structural loads were not provided and will need to be verified by the project Structural Engineer for the final foundations design.

1.3 SCOPE OF SERVICES

Our scope of services was outlined in our Proposal dated May 19, 2022 (CTS Proposal P21730) and authorized under City of Berkeley Contract No. 10907, dated and signed on June 10, 2021, as well as City of Berkeley Purchase Order No. 22204423 dated and signed on June 6, 2022. Our scope of services generally included the following:

- Review of readily available background materials, including geologic maps, aerial photographs, topographic maps, and hazard maps;
- Coordination with Underground Service Alert (USA) to locate underground utilities in the vicinity of our subsurface explorations;
- Coordination with you to locate underground utilities not covered by USA;
- Subsurface exploration consisting of two (2) borings using hand-auger techniques to depths of up to 7 feet below the ground surface. A Staff Engineer from CTS logged the subsurface conditions and collected disturbed samples for testing;

CONSTRUCTION
TESTING SERVICES

- Advancement of two (2) cone penetration tests (CPTs) to depths of up to 65 feet below the ground surface with performance of seismic velocity measurements;
- Laboratory testing on selected samples to evaluate the in-situ moisture content, grain size distribution, Atterberg Limits, Expansion Index, and soil corrosion potential;
- CPT based Liquefaction analyses;
- Engineering analysis and compilation of the field and laboratory data collected, and our findings from the background research; and
- Preparation of this report to presenting our findings, conclusions, and recommendations related to geotechnical conditions observed at the project site, and our and our recommendations or the proposed improvements.

CONSTRUCTION TESTING SERVICES

FIELD EXPLORATIONS AND LABORATORY TESTING

2.1 FIELD EXPLORATION

Prior to initiating our field exploration, the planned exploration locations were checked for underground utilities by contacting Underground Service Alert (USA) which located underground and aboveground utilities within the vicinity of our proposed explorations. Based on the planned depths of the explorations and review of the available data regarding depth to groundwater, it was determined drilling permits with the City of Berkeley Toxics Management Division would be required for the CPTs.

The subsurface CPT and boring explorations were conducted on July 21, 2022. The locations of the CPT probes and the soil borings related to the proposed performing arts building are shown on Plates 3.

The CPT exploration program was originally planned to consist of the advancement of two (2) CPTs to depths of 100 feet and 50 feet below the ground surface (bgs); however, CPT-01 met refusal at approximately 63 ½ feet bgs due to friction from the sidewalls of the excavation on the probe. CPT-2 was also attempted to advance to 100 feet bgs; however, the CPT also met refusal at a depth of approximately 63 ½ feet bgs due to friction from the sidewalls of the excavation on the probe.

The boring exploration program consisted hand auguring two (2) soil borings identified as Borings B1 and B2 to depths of between approximately 5 to 7 feet bgs. The borings were advanced using a 4-inch diameter geotechnical hand auger with an open bucket. Table 2-1 below summarized the CPT and Boring depths and approximate locations.

Table 2-1 – Exploration Depths and Locations

Exploration ID	Depth of Exploration (ft)	Type of Exploration	Approximate Latitude	Approximate Longitude	General Location
CPT-01	63.65	CPT	37.848840°	-122.269444°	Northeast corner of parking lot
CPT-02	63.48	CPT	37.848638°	-122.269481°	Southwest corner of parking lot
B-1	7	HA	37.848661°	-122.269651°	Southwest corner of existing building
B-2	5	HA	37.848905°	-122.269702°	Northwest corner of existing building

Notes:
1. HA = Hand Auger; CPT – Cone Penetration Test
2. Latitude and longitude estimated from Google Earth.

Bulk samples were collected at select depths from the borings and transported to our laboratory for further analysis and geotechnical testing.

CONSTRUCTION
TESTING SERVICES

2.2 LABORATORY TEST RESULTS

Laboratory testing was performed to quantify and evaluate the geotechnical characteristics of the soil samples obtained at the site. The following laboratory tests were performed on selected samples from the borings:

- Moisture Content (ASTM D 2216)
- Atterberg Limits (ASTM D 4318)
- Particle Size Distribution (ASTM D6913/D1140)
- Expansion Index (ASTM D4829)
- pH and Electrical Resistivity (CT 643)
- Sulfate and Chloride Content (CT417 and CT422)

The results of the tests performed above are discussed in the Subsurface Conditions section of the report (Section 3.4). They are also presented on the boring logs provide in Appendix A, and as summaries and reports provided in Appendix B.

FINDINGS

3.1 SITE DESCRIPTION

The site is located at 1890 Alcatraz Avenue in Berkeley, California. The property fronts on the south side of Alcatraz Avenue, and east side of Dover Street. A single-story building with a mezzanine storage area is currently located on northwest portion of the property. An asphalt concrete parking area is located on the east and southeast portion of the property. A courtyard is located to the south of the building and is primary paved with concrete flatwork. A large tree is located at the center of the courtyard, with smaller plants and trees located around the perimeter. Small shrubbery is also located along the north face of the building. The property if generally free of overhead utilities, with the exception of power lines leading from Alcatraz Avenue to the north face of the building.

The property slopes very gently down from the south to the north with elevations ranging from approximately 109 feet above MSL in the south to approximately 108 feet in the north as shown on Plate 2. (Google Earth, 2020; USGS 2018). Residential properties border to the east, west, and south, and Alcatraz Avenue to the north.

The coordinates near the center of the planned performing arts center referenced from Google Earth are:

38.848762º N Latitude
122.269512º W Longitude

Based on a review of available aerial photographs and construction documents, the construction of the existing building appears to have been started in the late 1950's. A new mezzanine area also appears to have been constructed in the building in the late 1980's. Prior to the construction of the existing building the site appears to have been used as a residential property.

3.2 SUBSURFACE CONDITIONS

3.1.1 Borings

Borings B-1 and B-2 were performed on July 21, 2022 to depths between approximately 5 and 7 feet below the ground surface (bgs). Borings B-1 and B-2 encountered undocumented fill material consisting of Silty Sand (SM) with gravel and debris consisting of brick and concrete to a depth of approximately 1-foot bgs. Beneath the fill material in Boring B-1, Sandy Lean Clay (CL) and Lean Clay with Sand (CL) were encountered to a final depth of approximately 7 feet bgs. Beneath the fill material in Boring B-2, Sandy Fat Clay (CH) was encountered to a depth of approximately 3.5 feet bgs, and the boring was terminated in Clayey Sand (SC) at a final depth of approximately 5 feet bgs.

Plate 3 shows the locations of the borings and CPT's. Graphical presentations of the boring logs are shown in Appendix A.

3.1.2 Cone Penetration Tests

The CPT exploration program was originally planned to consist of two (2) CPTs to depths of 100 feet and 50 feet below the ground surface (bgs); however, CPT-01 met hydraulic refusal at approximately 63 ½ feet bgs due to friction from the sidewalls of the excavation on the probe. CPT-2 was also attempted to advance to 100 feet bgs; however, the CPT also met hydraulic refusal at a depth of approximately 63 ½ feet bgs due to friction from the sidewalls of the excavation on the probe.

Data files and plots generated by Middle Earth Geo Testing, Inc. are provided in Appendix A.

The material behavior types listed are consistent with those observed in the soil borings with higher resistant materials encountered with depth.

Middle Earth GeoTesting also recorded the average shear wave velocities at 5-foot intervals in CPT-01 and CPT-02 by measuring the time for the produced seismic energy to travel from the ground surface from the drive of a sledgehammer through the ground and to the seismometer mounted in the cone. The distance to the seismometer divided by the travel time of the shear-wave is approximately the average shear-wave velocity. Table 3-1 below summarizes their measurements.

Source: http://wdl.water.ca.gov/waterdatalibrary/				

Variations in groundwater levels may occur due to variations in ground surface topography, subsurface geologic conditions and structure, seasonal rainfall, local irrigation practices, new construction, and/or other factors beyond our control.

Based on the review of the existing available groundwater elevation data and that obtained from this study, it is recommended a ground water depth of 7 feet below the ground surface should be used in design.

CONSTRUCTION
TESTING SERVICES

GEOGLOGIC HAZARDS

This investigation considered the geologic hazards relevant to the proposed construction, including liquefaction, undocumented fill, and expansive soils. These hazards are discussed in the following subsections.

4.1 LIQUEFACTION

Soil liquefaction results from loss of strength during cyclic loading, such as imposed by earthquakes. Soils most susceptible to liquefaction are clean, loose, saturated, uniformly graded sand below the groundwater table. Empirical evidence indicates that low plasticity silt and clay are also potentially liquefiable, though this phenomenon is commonly referred to as cyclic softening. When seismic ground shaking occurs, the soil is subjected to cyclic shear stresses that can cause excess hydrostatic pressures to develop. This can lead to lateral spreading of sloping or unconfined ground. Sand boils can also develop and lead to subsidence of the ground surface. The site is mapped having moderate liquefaction susceptibility (Knudsen, 2000 and 2006). The Liquefaction Potential Map is shown as Plate 4.

Based on the field explorations conducted, liquefaction evaluation was conducted using CPT based methods and concluded not to be a design consideration.

4.2 UNDOCUMENTED FILL

Undocumented fill was encountered in the borings to depths of about 3 to 3 ½ feet below existing site grade. The undocumented fill will cause non-uniform bearing support and cause potential for intolerable foundation, or slab differential settlement. **It is concluded that the presence of undocumented fill is a concern for the project.**

4.3 EXPANSIVE SOILS

Expansive soils are common in the area and have the potential to impact the development where fluctuations in the moisture contents can cause unacceptable shrinkage and/or swell beneath buildings and/or flatwork. The Mediterranean climate, with dry summers and wet winters, causes these clays to cyclically shrink as they dry and then swell as they become wetter. Controlling this moisture change will reduce this shrink-swell capability.

The near-surface soils at our exploratory borings are classified as Fat Clay (CH). Atterberg Limits testing was performed on select samples and show:

- A range of Plasticity Indices of between 33 and 50 and Liquid Limits of between 51 and 66, and
- Expansion Index values of 112 and 122, indicating high expansion potential

Expansive soils are expected to be an impact and design consideration.

CONSTRUCTION TESTING SERVICES

CONCLUSIONS AND RECOMMENDATIONS

5.1 GENERAL

Based on the results of our findings and analysis, the project is feasible for design and construction from a geotechnical engineering perspective. Our exploratory borings show the near-surface soils are undocumented fill comprised of medium to high plasticity Fat Clay. The site is also located in an area subject to strong ground shaking. Specific recommendations to accommodate the expansive soils and strong ground shaking are presented below.

5.2 UNDOCUMENTED FILL SOILS

Undocumented fill was encountered in the borings to depths of about 3 to 3 ½ feet below existing site grade. The presence undocumented fill will cause non-uniform bearing support and cause potential for intolerable foundation, or slab differential settlement.

In building areas and where structural improvements are intended, undocumented fills should be removed completely and laterally to at least 3 feet beyond the face of the foundation for perimeter foundations. and backfilled with engineered fill. For design and estimating purposes and assuming the current grade will be constructed as the pad grade, a depth of 3 feet of complete over-excavation and replacement with engineered fill across the pad should be anticipated with deeper excavations required for elevator pits, etc. The Geotechnical Engineer of Record, or his representative should be present during grading operations to verify the undocumented fill materials are removed to expose firm native soils prior to backfill.

In pavement areas, undocumented fills should be removed to a depth of at least 2 feet and replaced with engineered fill. The upper 12 inches of paved areas should consist of non-expansive fill as discussed in the Expansive Soils and Earthwork sections of this report.

In sitework areas consisting of exterior flatwork, or landscape areas, no over-excavation is required provide the areas are prepared in accordance with the Earthwork recommendations presented in this report.

5.3 EXPANSIVE SOILS

Expansive soils are common in the area and have the potential to impact the project where fluctuations in the moisture contents can cause unacceptable shrinkage and/or swell beneath buildings and/or flatwork. We have evaluated acceptable methods to address expansive soils to include specific earthwork construction guidelines or use of structural alternatives for structures as summarized below:

- Earthwork solutions:
  - Strict moisture conditioning and compaction control during mass grading, and
  - Use of non-expansive fill in the upper portions of building pad, concrete flatwork, or pavements are feasible alternatives to reduce the expansion potential. Use of non-expansive fill should meet the requirements for fill material as described in Section 5.4.2 and be spread within the upper 12 inches of building pads to at least 3 feet beyond the building

footprint. This option is discussed in this report and used in conjunction with shallow spread foundations as described in Section 5.4.

- Structural solutions that require design considerations from the structural engineer may consist of mat foundation or post tensioned slabs. Given the complexity of the structure with the various elevations, mat foundations could be feasible.

The solutions presented herein are typical in the project area and should be evaluated by the project design team in consultation with the Owner. Recommendations for each of these alternatives are discussed in this report.

5.4 EARTHWORK

5.4.1 Site Preparation

Prior to any site grading, any existing flatwork, pavements, or existing structures and associated foundations requiring demolition should be removed from the construction limits. Where roots are less than an 1/8-inch diameter, they may remain in place provided they do not comprise more than 3 percent by dry weight of organics in the surrounding native soil. Where trees are removed, the entire tree root ball should also be removed and backfilled with compacted engineered fill.

After stripping and any required over-excavation of undocumented fills, the exposed subgrade to receive engineered fill or to be used for future support of structural improvements (i.e., foundations or slabs-on-grade), should be scarified to a depth of at least 8 inches. Fill material encountered during our explorations should be removed completely. The exposed native subgrade should be moisture conditioned to no less than two percent above the optimum moisture content, and then compacted to no less than 90 percent relative compaction based on the ASTM D 1557 test method, latest edition. Fills 5 feet and thicker should be compacted to a minimum of 95 percent relative compaction for the full depth. In paved areas, the level of compaction should be increased to at least 95 percent in the upper 6 inches.

All excavations should be observed by the project Geotechnical Engineer or their designated representative to verify any fill encountered have been removed and the subgrade meets the intent of this report.

5.4.2 Engineered Fill

If fill is to be imported from off-site, it should meet the requirements of engineered fill above as well as those for Class 3 Subbase in the State of California Standard Specifications, Chapter 25 (latest edition). Any imported fill should be sampled by the project Geotechnical Engineer prior to being imported to evaluate its suitability for its intended use and to perform confirmatory testing listed below, if necessary. Imported fill should be nearly free of organic or other deleterious debris, essentially non-plastic, and less than 6 inches in maximum dimension; except that in the upper two feet of subgrade material, the maximum size shall be 3 inches. Specific requirements for engineered fill including the applicable test procedures to verify suitability are presented in the following table.

1 – American Society for Testing and Materials Standards

It should be noted that onsite clay soils are considered expansive and do not meet the requirements of engineered fill as presented in Table 5.1. However, they may be used if they are clean and free of organic laden material, debris, and are moisture conditioned and compacted per the requirements presented for engineered fill. Clay soils should also be moisture conditioned to over-optimum conditions as presented in Table 5-2. The moisture content shall be maintained until it is covered with overlying flatwork.

5.4.3 Compaction Criteria Engineered Fill

Engineered fill within building areas, trench backfill, flatwork, and pavement subgrades should be placed uniformly in horizontal loose lifts not exceeding 8 inches.

Exposed subgrades and subsequent engineered fill should be uniformly compacted, and moisture conditioned according to the recommended criteria presented in Table 5.2 below.

4400 Yankee Hill Road, Rocklin, CA 95677 • Phone (916) 419-4747 • Fax (916) 419-4774

CONSTRUCTION TESTING SERVICES

Table 5.2 – Recommended Compaction and Moisture Conditioning for Subgrade and Engineered Fills			
Material Type and Location	Compaction and Moisture Content per Modified Proctor ASTM D1557		
	Minimum Compaction Requirement, %	Range of Moisture Contents Above Optimum	
		Minimum	Maximum
Non-Expansive soils / Engineered fill	90	0%	+5%
Expansive Soils / Engineered fill			
Beneath Foundations	90	+2%	+5%
Beneath Slabs	90	+2%	+5%
Exterior Flatwork	90	+2%	+5%
Trench[1] and/or Structure Backfill	90	+2%	+5%
Pavement	95	+2%	+5%
Fills 5 feet and greater w/i building pad	95	+2%	+5%
[1]Trench backfill may consist of onsite expansive soils provided they are not used in the upper 12 inches of subgrades			

As previously mentioned, onsite soil is considered expansive and does not meet the non-expansive fill requirements. However, expansive soils may be used provided they meet the dual requirement for compaction and moisture content, and they are not used in the upper 12 inches of building pads or flatwork areas. The moisture content shall be maintained until it is covered with overlying flatwork.

5.4.4 Controlled Low-Strength Material (CLSM)

Where access may be limited when conventional compaction methods are used, a flowable type fill or controlled low-strength material (CLSM) may be used in lieu of compacted engineered fill. This material is typically prepared and batched by ready mix suppliers. A material having a 28-day strength of at least 50 psi and maximum 150 psi per ASTM D4832 is typical for properly compacted engineered fill. This strength requirement is based on an average of two strength specimen fabricated in 6-inch diameter by 12-inch-tall cylindrical molds. The CLSM shall be sampled at least once per placement or every 150 cubic yards placed. The intended use and application and material including historical strength data should be submitted to the Geotechnical Engineer of Record for approval prior to use.

5.4.5 Construction Considerations

Based on our exploratory borings, it is anticipated that excavation may generally be accomplished with typical earthwork grading equipment in good operating condition. It is anticipated that the soils will generally consist of alluvial materials.

5.4.6 Wet Weather Construction and/or Unstable Soil Conditions

The in-situ moisture content of the site soils may increase after long periods of rainfall. Soil subgrades may become saturated due to exposure to wet weather conditions. When wet soils are encountered, they should

4400 Yankee Hill Road, Rocklin, CA 95677 • Phone (916) 419-4747 • Fax (916) 419-4774
2118 Rheem Drive, Pleasanton, CA 94588 • Phone (925) 462-5151 • Fax (925) 462-5183
One Embarcadero Center, Suite 535, San Francisco, CA 94111 • Phone (415) 438-2357 • Fax (415) 334-4747
246 30th St., Suite 101, Oakland, CA 94601 • Phone (510) 444-4747 • Fax (510) 835-1825

be remediated by aeration, removing, and replacing with drier material, or chemically treated with lime or cement combinations. Additionally, deeper excavations, such as those for the elevator pits, may encounter groundwater seepage. These conditions may be addressed with localized sump pumps to lower the groundwater temporarily to facilitate construction.

CTS should be contacted if these conditions are encountered for assurance of the method selection, specifications, acceptance criteria, and quality assurance.

5.5 TEMPORARY EXCAVATIONS

Excavations for foundations can be performed with typical conventional excavating machines generally in use for such projects. During construction, excavations as deep as 4 feet should temporarily stand vertically. Most of the soils will be OSHA Types C. Although not anticipated, temporary cuts deeper/higher than 4 feet should be sloped back at maximum 1 horizontal to 1 vertical, 1(h) to 1(v), above the 4-foot level, or stabilized by shoring in accordance with OSHA regulations. The contractor is responsible for providing suitable shoring systems, if required, based on the soils encountered. Deeper excavations may require a shoring system designed by an experienced and licensed civil engineer.

5.6 SHALLOW SPREAD FOUNDATIONS FOR BUILDING STRUCTURES

5.6.1 Allowable Bearing Capacity

Shallow spread foundations may be incorporated for the new structure or rehabbed foundation. An ultimate bearing capacity of 11,400 psf should be used for the design of spread footings supported on firm native soil. A corresponding allowable bearing capacity of 3,800 psf may be used based on a safety factor of 3. The minimum width and embedment depths as shown below.

Table 5.3 – Minimum Footing Dimensions

Performing Arts Center		
Footing Type	**Minimum Depth (inches)**	**Minimum Width (Inches)**
Continuous	24	12
Isolated	24	18

Allowable bearing capacity may be increased at a rate of 20 percent for each additional foot of embedment to a maximum of three times the designated value. The allowable bearing capacity is a net value so the weight of the foundation extending below grade may be disregarded when computing dead loads. The allowable bearing capacity is based on a factor of safety of 3 and applies to dead- plus live load conditions. The allowable bearing capacity may be increased by 1/3 for short-term loading due to wind or seismic forces.

246 30th St., Suite 101, Oakland, CA 94601 • Phone (510) 444-4747 • Fax (510) 835-1825

5.6.2 Estimated Settlement

Total static and any minor anticipated seismic settlement may vary depending on the plan dimensions of the foundation and the actual load supported. Total combined static and seismic settlements of foundations designed in accordance with the recommendations of this report are estimated to be on the order of 1 inch. Differential settlements between adjacent footings are expected to be less than ¾ of the estimated total settlement, provided footings are founded on similar materials. The differential settlement of approximately ¾ inch is expected over a span of 20 feet. Settlement of all foundations is anticipated to occur rapidly and should be essentially complete following initial application of the loads.

5.6.3 Lateral Resistance

Resistance to lateral loads may be provided from frictional forces between the bottom of the footing and the underlying soils, and by passive soil resistance against the sides of the foundations. An allowable coefficient of friction equal to 0.30 may be used between existing cast-in-place concrete footings and the underlying soil or lean concrete. If moisture barriers or other substances are placed beneath footings, the coefficient of friction can be significantly lower. Allowable passive pressure from engineered fill or undisturbed native soil may be taken as equivalent to the pressure exerted by a fluid pressure of 250 pounds per square foot, per foot of depth, (psf/ft or pcf) acting over the existing foundation depth. The passive pressure should be neglected to a depth of 1 foot where the ground adjacent to the foundation is not covered by a slab or pavement. Lateral resistance parameters provided are based on a factor of safety of at least 1.5. The appropriate factor of safety should be determined by the project Structural Engineer. Allowable passive resistance and sliding friction may be combined without reduction.

5.6.4 Construction Considerations

Foundation excavations should be firm, neat, and clean of debris, loose or soft soil, or water prior to placing any reinforcement. All footings excavations should be observed by the project Geotechnical Engineer or their designated representative just prior to placing reinforcing steel or concrete to verify the recommendations presented herein are implemented during construction.

Additionally, footings may experience an overall loss of bearing capacity or an increased potential for settlement when located near existing or future utility trenches. Further, stresses imposed by the footings on the utility lines may cause cracking, collapse, and/or a loss of serviceability. To reduce this risk, open or backfilled trenches parallel with a footing shall not be below a plane having a downward slope of 2 horizontal to 1 vertical (2:1) slope from a line 9 inches above the bottom edge of the footing and not closer than 18 inches from the face of the footing. When pipes cross under footings, the footings shall be specially designed. This may require encasement of the pipe with lean concrete. Pipe sleeves shall be provided where pipes cross through footings or footing walls and sleeve clearances shall provide for possible footing settlement but not less than 1 inch all around the pipe.

5.7 SEISMIC DESIGN PARAMETERS

5.7.1. Seismic Design Parameters from Mapped Values

The design of the proposed improvements should be performed in accordance with the requirements of governing jurisdictions and applicable building codes. The structural engineer should confirm the appropriate values to use for this structure. Map-based design criteria presented in this section are based on entering the site coordinates (latitude and longitude), the risk category, and the Site Class.

Based on the data the shear wave velocity obtained from the CPT, the generalized profile is characterized by a stiff soil profile. It was determined the site may be classified as Site Class D. If the building is designed per ASCE 41-17 requirements the parameter in Table 5.4 should be used. If the building and new foundations are designed per ASCE 7-16 the parameters in Table 5.5 should be used with account to the exceptions allowed in Section 11.4.8.

Table 5.4–Seismic Design Criteria per 2019 California Building Code and ASCE 41-17

Reference	Seismic Parameter	Value	
Google Earth	Latitude	38.848762	
Google Earth	Longitude	-122.269512	
	Site Class	D – Stiff Soil	
		BPON[1]	BPOE[2]
Variable	Seismic Parameter	BSE-2N[3]	BSE-1E[4]
S_s	Spectral Response at 0.2s	2.041g	0.918g
S_1	Spectral Response at 1.0s	0.784g	0.321g
S_{xs}	Site Modified Spectral Response at 0.2s	2.041g	1.040g
S_{x1}	Site Modified Spectral Response at 1.0s	0.784g	0.635g
F_a	Site Amplification Factor at 0.2s	1.0	1.133
F_v	Site Amplification Factor at 1.0s	1.7	1.979
T_L	Long Period Transition Period in seconds	8	8

[1]BPON – Building Performance Objective Equivalent to New Building Standards
[2]BPOE – Building Performance Objective for Existing Buildings
[3]BSE-2N – Basic Safety Earthquake-2 for use with the BPON, taken as the ground shaking based on the Risk-Targeted Maximum Considered Earthquake (MCE_R) per ASCE 7 at a site
[4]BSE-1E – Basic Safety Earthquake-1 for use with BPOE, taken as a seismic hazard with a 20% probability of exceedance in 50 years, but not greater than the BSE-1N, at a site

		$Ts = S_{D1}/S_{DS}$	0.653

Note 1: The value of 1.7 was applied for F_v per the 2019 CBC, Table 1613.2.3(2).

A site-specific response spectra and ground motion study was not performed for this study. The structural engineer should confirm the appropriate values for use on the project during foundation design.

5.8 CORROSIVITY

Laboratory testing was performed on a representative sample of the on-site earth materials to evaluate pH and electrical resistivity, as well as chloride and sulfate contents. These laboratory test results are summarized below in Table 5.6 and presented in Appendix B.

4400 Yankee Hill Road, Rocklin, CA 95677 • Phone (916) 419-4747 • Fax (916) 419-4774
2118 Rheem Drive, Pleasanton, CA 94588 • Phone (925) 462-5151 • Fax (925) 462-5183

CONSTRUCTION TESTING SERVICES

Table 5.6 – Evaluation for Soil Corrosion					
Boring	Depth	Soil pH	Minimum Resistivity	Chloride Content	Sulfate Content
B-1	1 to 3 feet	5.9	4690 Ohm-cm	8.8 ppm	27.7 ppm
B-2	1 to 3 ½ feet	6.9	4434 Ohm-cm	12.9 ppm	52.6 ppm

Based on the Caltrans Highway Design Manual corrosion criteria (Caltrans, 2018), corrosive soils are defined as soils with an electrical resistivity of 1,000 ohm-cm or less, more than 500 ppm chlorides, more than 0.2 percent sulfates, and a pH less than 5.5. Based on the Minimum Resistivity results, the on-site soils would not be classified as corrosive.

5.9 CONCRETE

Concrete in contact with soil or water that contains high concentrations of water-soluble sulfates can be subject to premature chemical and/or physical deterioration. The soil samples tested in this evaluation indicated a maximum water-soluble sulfate content of 0.00526 percent by weight (52.6 ppm). According to American Concrete Institute (ACI) 318, the potential for sulfate attack is negligible for water-soluble sulfate contents in soil ranging from 0.00 to 0.10 percent by weight (i.e., 0 to 1,000 ppm). Based on the testing, the soils may be classified as Exposure Class S0 per ACI 318, Table 19.3.1.1. Soils identified as Exposure Class S0 are assigned for conditions where the water-soluble sulfate concentration in contact with concrete is low and injurious sulfate attack is not a concern

CTS does not practice in the field of corrosion engineering and mitigation. If corrosion sensitive improvement are planned, it is recommended that a corrosion engineer be retained to evaluate corrosion test results and incorporate the necessary precautions to avoid premature corrosion of buried metal pipes and concrete structures in direct contact with the subject soils.

5.10 INTERIOR CONCRETE SLAB-ON-GRADE

We understand the building will be a permanent structure with slab-on-grade floors. The subgrade should be prepared in accordance with the earthwork recommendations included herein as well as the following:

- Thickness of reinforced concrete shall be determined by the Structural Engineer. Where moisture sensitive floor coverings are used, the slab reinforcing should be designed by the Structural Engineer. At a minimum, the slab reinforcement should consist of No. 4 bars spaced 16 inches on-center each way.
    - A vapor retarding membrane consisting that conforms to ASTM E 1745-97 Class A requirements. Placement of the vapor retarder and “welding” of overlaps should follow the manufacturer’s guidelines and is the responsibility of the foundation contractor.

CONSTRUCTION TESTING SERVICES

- A layer of crushed rock at least 4 inches thick should underlie the vapor retarding membrane. The rock shall be clean, crushed, and free-draining having a nominal 1-inch maximum size with less than 3 percent passing the No. 200 sieve.

Some cracking of the slabs-on-grade may be anticipated at the site because of concrete shrinkage and the expansive nature of the onsite soils. Frequent control joints should be provided to control the cracking. As a general guideline, control joints should be spaced at distances equal to 24 to 36 times the slab thickness. Joint spacing that is greater than 15 feet require the use of load transfer devices (dowels or diamond plates). Added steel or slab thickness would also serve to improve the performance of the slabs. Subgrade materials should not be allowed to desiccate between grading and the construction of the concrete slabs.

5.11 EXTERIOR FLATWORK

Prior to constructing exterior slabs-on-grade (i.e., sidewalks), the near surface soils should be prepared as indicated in Earthwork section of this report. Exterior slabs should be at least 4 inches thick and placed over a subgrade prepared in accordance with the recommendations of this report. For shrinkage control, we recommend the slabs be reinforced with minimum No. 4 bars at 18 inch-centers both ways centered at midpoint throughout the slab. The design professional should determine the final slab thickness, reinforcing, and joint spacing based upon the anticipated loads. Slab support may be derived from at least 12 inches of aggregate base soil beneath exterior slabs. Slab reinforcement should be supported on dobie blocks or similar. Due to the expansive soils, slabs should be provided with contraction joints on a rectangular pattern, no greater than 10 feet square and with a length-to-width ratio not exceeding 3. Tee-joints should be avoided. Place trimmer bars at least 4 feet long diagonally across L-corners. Provide expansion joints in any concrete paving at 30-foot maximum centers to accommodate expansive soil and thermal expansion. These should have ½" or thicker joint board and greased dowels. The moisture content of subgrade soils shall be maintained until it is covered with overlying aggregate base, and not be allowed to dry out.

5.12 DRAINAGE

To minimize moisture intrusion into foundation and slab subgrades, we recommend the ground surface should slope away from building pad and pavement areas in accordance with jurisdictional and/or California Building Code requirements toward the appropriate drop inlets or other surface drainage devices. These grades should be maintained for the life of the project. Building pads should also be designed such that the lowest adjacent grade surrounding the building is at or below the elevation of the building pad surface (at or below the bottom of the capillary break material beneath the floor slab. Downspouts should be directed to discharge away from the building to an appropriate catch basin.

Landscaping after construction should not promote ponding of water adjacent to the structures. Landscaping adjacent to foundations should include vegetation with low-water demands and irrigation should be limited to that which is needed to sustain the plants. Trees should be restricted from the areas adjacent to foundations a distance equivalent to the canopy radius of the mature tree. Stormwater management facilities that percolate water into the subgrade soil should not be located within a distance of 20 feet from structure foundations.

CONSTRUCTION TESTING SERVICES

5.13 BURIED SHALLOW EXISTING UTILITIES

Based on our experience at existing school sites, buried shallow existing utilities may be present near the upper 12 to 18 inches of subgrades that may impact site grading. Provision should be considered to allow for a modified section over the pipe to allow for protection of the pipe during construction and to facilitate construction. A suitable means to protect pipes in place during pavement subgrade preparation would be to encase the pipe with CLSM or utilize geotextile (i.e., Mirifi Rs380i, or approved equivalent) over the pipe to provide additional stability to the pavement section. A separate line item unit price should be provided by the Contractor to allow for such conditions if they occur.

5.14 FLEXIBLE AND RIGID PAVEMENTS

5.14.1. Flexible (Asphalt Concrete) Pavements

Asphalt and base course materials should meet the requirements of the *Caltrans Standard Specifications, latest edition*. Pavement sections were determined per the California Highway Design Manual are shown below. The pavement sections are based on a subgrade R-value equal to the minimum design value of 5.

Table 5.7 –Recommended Pavement Sections

Traffic Index[1]	Asphalt Concrete (in)	Class 2 Aggregate Base (in)
4	3	8
5	3	12
6	3	18
7	3	22

[1]Traffic Indices were assumed.

If adverse conditions are encountered during the preparation of subgrade materials, special construction methods may need to be employed. Subgrade materials should be processed to a minimum depth of 12 inches below the Class II aggregate base and compacted to a minimum 95 percent of ASTM D1557 laboratory maximum dry density at or near the optimum moisture content. Class II Aggregate Base material should be compacted to 95 percent of ASTM D1557 laboratory maximum dry density at or near optimum moisture content. The base should meet the quality requirements outlined in Section 26 of the Caltrans Standard Specifications.

The pavement section is intended as a minimum. Positive site drainage should be always maintained. Water should not be allowed to pond or seep into the ground. If the average daily traffic (ADT) increases beyond that intended, as reflected by the assumed traffic designation, increased maintenance could be required for the pavement section. The project Civil Engineer should determine the Traffic Index appropriate for the project.

5.14.2. Rigid (Portland Cement Concrete) Pavements

Where rigidity of pavement is desired for areas designed for, high volume vehicular traffic, heavy maintenance or equipment traffic, entry driveways or trash enclosure slabs, it is recommend using Portland cement concrete paving. The slab should be at least 8 inches thick over a 12-inch thick layer of compacted

aggregate baserock based on a Traffic Index up to 7 and assuming lateral support is provided. In addition, the driveway slabs should be designed with thickened edges at least twice the slab thickness and slabs reinforced with at least No. 4 reinforcing bars placed 12 inches on center both ways at the midpoint of the slab. The design and thickness of rigid pavement slabs should be confirmed with the design professional.

5.14.3. Construction Considerations for Pavements

Additional requirements and/or assumptions for pavements are outlined below:

- Baserock materials used should comply with the requirements outlined in Section 26 of the State Standard Specifications. We strongly recommend that baserock be a virgin, crushed aggregate product.
- Baserock should be firm and stable prior to placing asphalt and compacted to a minimum of 95 percent based on the ASTM D 1557 test method.
- Subgrade beneath paved areas shall be compacted to a minimum of 95 percent based on the ASTM D 1557 test method.
- Proof rolling of subgrade and of baserock with fully loaded water truck, or equivalent, should be performed under observation of our field representatives to detect for any instabilities of pavement subgrade and baserock following final grading. Proof rolling of subgrade should occur immediately (i.e., less than 24 hours) before placement of baserock. Baserock should be proofrolled immediately prior to placement of tack coat.
- Subgrade preparation is performed as outlined in the Earthwork sections of this report.

ADDITIONAL SERVICES

6.1 PLAN AND SPECIFICATIONS REVIEW

The preparation of the geotechnical investigation for design purposes is a portion of the services CTS can provide. It is essential that CTS be requested to perform a general review of the plans and specifications to evaluate if the recommendations contained in this report are properly interpreted and implemented during the design phase. CTS will not be responsible for any misinterpretation of our recommendations if we are not retained to perform this recommended task.

6.2 EARTHWORK OBSERVATIONS, SPECIAL INSPECTIONS, AND MATERIALS TESTING

To provide project continuity, it is essential that CTS be retained to observe earthwork construction, to evaluate exposed foundation soils for appropriate bearing capacity, and provide special inspections and materials testing. The purpose in having a representative of CTS observe the grading operations during site preparation, and test trench backfill, engineered fill, would be to observe the surface and subsurface conditions during construction, evaluate the applicability of the recommendations contained in this report, and recommend appropriate changes in construction procedures if conditions are found to differ from those encountered during this investigation.

Separate proposals and estimates can be provided for each of the additional services described above when requested. CTS can also prepare a master agreement for providing these services.

LIMITATIONS

The conclusions and recommendations provided in this report are based on our understanding of the proposed improvements, data developed from the results of our field and laboratory testing program laboratory testing, and our engineering analyses. The field explorations were located in the field by pacing from available landmarks as surveying was not part of our work scope. It is possible that actual subsurface conditions can vary between the points of exploration provided during this investigation. If this is found to be the case, CTS should be notified and requested to review the changes and provide appropriate modifications to our recommendations if needed.

We have strived to prepare this report in substantial accordance with generally accepted geotechnical engineering practice as it exists in the local area at the time of the work. No warranty, express or implied, is made. This report may be used by the Client, for the purposes stated, for a maximum of two years from the date of the report. If construction is delayed, or if the final construction varies from that stated herein, and land use or other factors modify site and subsurface conditions beyond our control, additional field explorations, laboratory testing, and an updated analysis and report may be required. CTS shall be released from any liability resulting from any misuse of the report by the authorized party.

Telephone: 925-462-5151

BORING NUMBER B-2

CLIENT City of Berkeley
PROJECT NAME African American Hollistic Resource Center
PROJECT NUMBER 18735
PROJECT LOCATION 1890 Alcatraz Ave, Berkeley, CA
DATE STARTED 7/21/2022 **COMPLETED** 7/21/2022
GROUND ELEVATION 108 ft msl **HOLE SIZE** 4 inches
DRILLING CONTRACTOR CTS
GROUND WATER LEVELS:
DRILLING METHOD Hand Auger
AT TIME OF DRILLING --- Not encountered.
LOGGED BY Gavin Lynch **CHECKED BY** Brad Quon, GE
AT END OF DRILLING ---
NOTES
AFTER DRILLING ---

DEPTH (ft)	GRAPHIC LOG	MATERIAL DESCRIPTION	ELEVATION (FT)	SAMPLE TYPE NUMBER	POCKET PEN (tsf)	BLOW COUNTS (N VALUE)	UNCONFINED STRENGTH (tsf)	DRY UNIT WT. (pcf)	MOISTURE CONTENT (%)	ATTERBERG LIMITS: LIQUID LIMIT	ATTERBERG LIMITS: PLASTIC LIMIT	ATTERBERG LIMITS: PLASTICITY INDEX	FINES CONTENT (%)
0		(SM) FILL: Grayish brown, dry to moist, silty **SAND**; trace gravel (< 3/4").	107.0	1									
		(CH) FILL: Light brown, dry to moist, **FAT CLAY** with sand; trace gravel (< 1").	104.5	2						66	16	50	67
5		(SC) Dark brown, moist, clayey **SAND**; trace gravel (< 3/4"), lenses of iron-oxide staining.	103.0	3									40

Bottom of borehole at 5.0 feet.

* Indicates the parameter was calculated using the normalized point stress.
The parameters listed above were determined using empirical correlations.
A Professional Engineer must determine their suitability for analysis and design.

African American Hollister Resources Center

Project ID: Construction Testing Services
Data File: SDF(319).cpt
CPT Date: 7/21/2022 2:23:53 PM
GW During Test: 10 ft

Sounding ID: CPT-01
Project No: 18735
Cone/Rig: DDG1627

* Indicates the parameter was calculated using the normalized point stress.
The parameters listed above were determined using empirical correlations.
A Professional Engineer must determine their suitability for analysis and design.

African American Hollister Resources Center

Project ID: Construction Testing Services
Data File: SDF(319).cpt
CPT Date: 7/21/2022 2:23:53 PM
GW During Test: 10 ft

Sounding ID: CPT-01
Project No: 18735
Cone/Rig: DDG1627

* Indicates the parameter was calculated using the normalized point stress.
The parameters listed above were determined using empirical correlations.
A Professional Engineer must determine their suitability for analysis and design.

African American Hollister Resources Center

Project ID: Construction Testing Services
Data File: SDF(319).cpt
CPT Date: 7/21/2022 2:23:53 PM
GW During Test: 10 ft

Sounding ID: CPT-01
Project No: 18735
Cone/Rig: DDG1627

Project	African American Hollister Resources Cen	Operator	JM-GM	Filename	SDF(319).cpt
Job Number	18735	Cone Number	DDG1627	GPS	
Hole Number	CPT-01	Date and Time	7/21/2022 2:23:53 PM	Maximum Depth	63.65 ft
EST GW Depth During Test		10.00 ft			

Net Area Ratio .8

CPT DATA

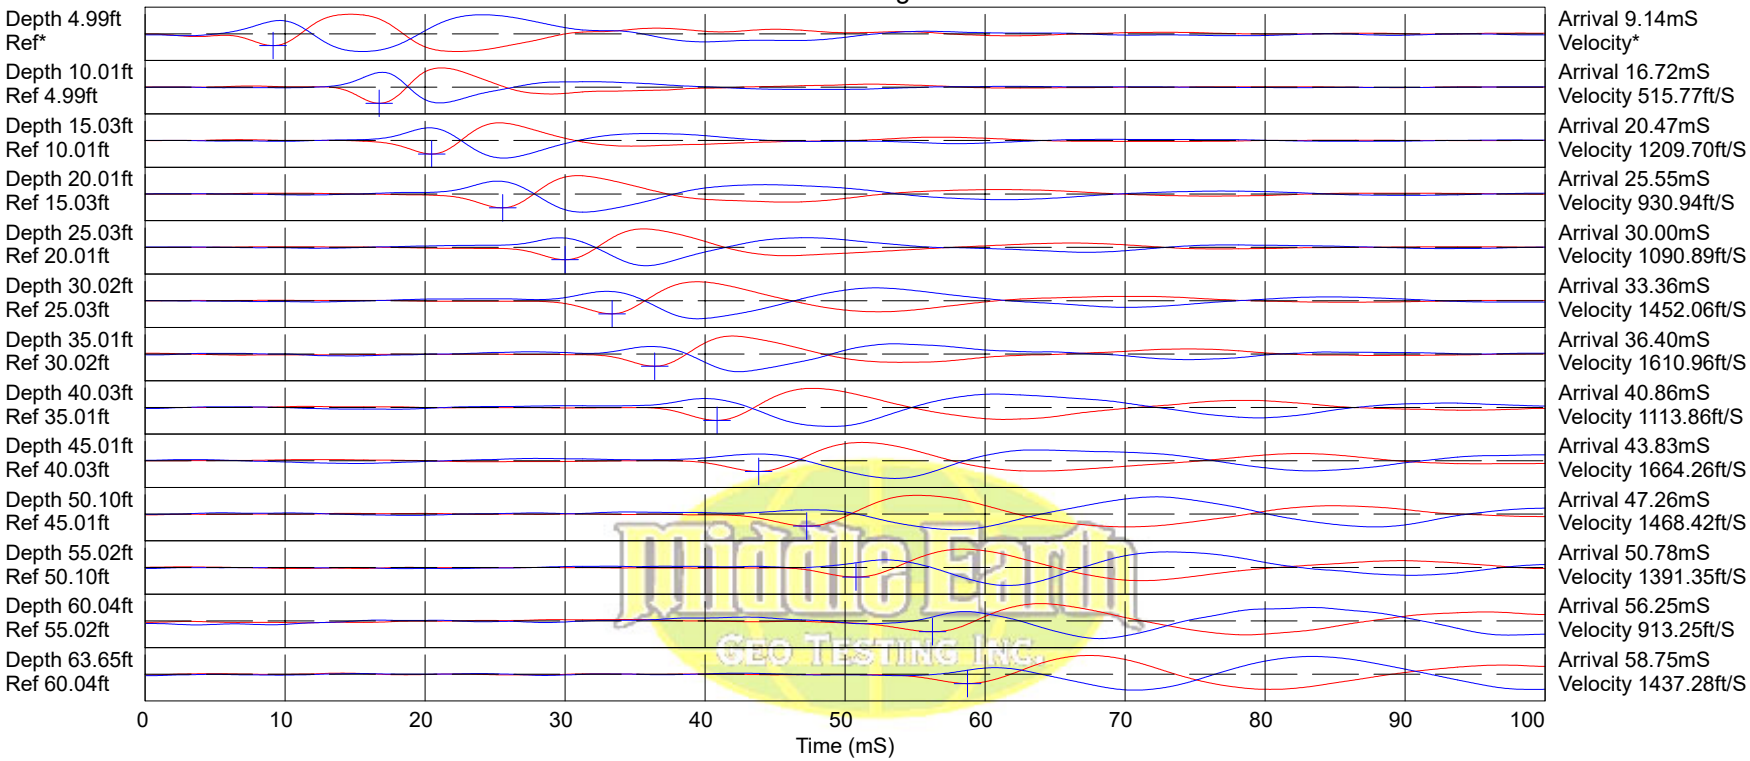

1 - sensitive fine grained
2 - organic material
3 - clay
4 - silty clay to clay
5 - clayey silt to silty clay
6 - sandy silt to clayey silt
7 - silty sand to sandy silt
8 - sand to silty sand
9 - sand
10 - gravelly sand to sand
11 - very stiff fine grained (*)
12 - sand to clayey sand (*)

Cone Size 15cm squared

S*Soil behavior type and SPT based on data from UBC-1983

* Indicates the parameter was calculated using the normalized point stress.
The parameters listed above were determined using empirical correlations.
A Professional Engineer must determine their suitability for analysis and design.

Middle Earth Geo Testing

African American Hollister Resources Center

Project ID: Construction Testing Services
Data File: SDF(320).cpt
CPT Date: 7/21/2022 4:13:39 PM
GW During Test: 14 ft

Sounding ID: CPT-02
Project No: 18735
Cone/Rig: DDG1627

* Indicates the parameter was calculated using the normalized point stress.
The parameters listed above were determined using empirical correlations.
A Professional Engineer must determine their suitability for analysis and design.

African American Hollister Resources Center

Project ID: Construction Testing Services
Data File: SDF(320).cpt
CPT Date: 7/21/2022 4:13:39 PM
GW During Test: 14 ft

Sounding ID: CPT-02
Project No: 18735

* Indicates the parameter was calculated using the normalized point stress.
The parameters listed above were determined using empirical correlations.
A Professional Engineer must determine their suitability for analysis and design.

African American Hollister Resources Center

Project ID: Construction Testing Services
Data File: SDF(320).cpt
CPT Date: 7/21/2022 4:13:39 PM
GW During Test: 14 ft

Sounding ID: CPT-02
Project No: 18735
Cone/Rig: DDG1627

APPENDIX B
LABORATORY TESTING

Classification
Soils were classified in accordance with the Unified Soil Classification System (USCS) in general accordance with ASTM D 2488 and modified as necessary in general accordance with ASTM D 2487 based on laboratory results. The classifications are indicated on the boring logs in Appendix A.

Moisture Tests
The moisture content and dry density of relatively undisturbed samples obtained from the exploratory borings were evaluated in general accordance with ASTM D 2937. The test results are indicated on the boring logs in Appendix A.

Atterberg Limits
Tests were performed on selected representative fine-grained soil samples to evaluate the liquid limit, plastic limit, and plasticity index in general accordance with ASTM D 4318.

Particle Size Distribution
Gradation analysis testing was performed on selected representative soil samples in general accordance with ASTM D 6913 and D 1140.

Expansion Index
Expansion Index testing was performed on selected representative soil samples in general accordance with ASTM D 4829.

Evaluation for Soil Corrosion
Evaluation for soil corrosion was performed on a selected representative soil sample in general accordance with CA DOT Test #643 for pH and minimum resistivity, CA DOT Test #417 for sulfate, and CA DOT Test #422 for chloride.

EXECUTIVE SUMMARY

CONCLUSIONS

Ninyo & Moore has performed this Phase I ESA in conformance with the scope and limitations of ASTM E1527-21 of the 1890 Alcatraz Avenue property located at 1890 Alcatraz Avenue in Berkeley, Alameda County, California (the Site). Based on the information compiled during the preparation of this report, this assessment has revealed no evidence of Recognized Environmental Conditions (RECs), Controlled RECs (CRECs), or Historical RECs (HRECs) in connection with the Site, and no RECs were identified on the adjoining properties.

FINDINGS AND OPINIONS

Ninyo & Moore performed a Phase I Environmental Site Assessment (ESA) on the Site located at 1890 Alcatraz Avenue, in Berkeley, Alameda County, California. A Summary of Findings is provided below. It should be recognized that all report details are not included in this Summary, and the report should be read in its entirety.

Site Location and Use

The approximately 0.22-acre Site is located along Alcatraz Avenue. The Site consisted of a vacant commercial office building and parking lot.

Historical Information

Review of historical resources, such as aerial photographs, topographic maps, fire insurance maps, and available City Directory listings, as well as through review of historical records, interviews, and research, revealed that the Site was vacant land associated with the east adjoining gasoline service station, from the mid-1930s, until the mid-1950s, when a commercial building and parking lot were constructed on the Site. The Site has historically been occupied by several tenants including Langlois Maynard Gas Station, Rollier Jesse E Gas Station, Joe & Paul S Mobil Service, Mayo S Associated Service, Jas O Rauch & Monroe Refrigeration Equipment, Berkeley Art Center, Berkeley Neighborhood Legal Services Senior Citizens, South Berkeley Model Cities Neighborhood Council, Young Adult Project, Berkeley Adult Day Care Center, and Health Housing & Community Services.

Adjoining properties have primarily been residential houses, residential apartment buildings, and commercial buildings from at least 1939 until the present, with the following exceptions on the eastern adjoining property: A gasoline service station was present from prior to 1939 to the mid-1950s. No RECs were identified in the historical review.

Records Review

Review of an environmental database report obtained for this project indicated that the Site was not listed on any of the *Standard Federal, State, and Tribal Environmental Record sources*. The Site was listed on the *Additional Federal, State, Tribal and Local Environmental*

Record sources regulatory databases researched by EDR, including the EDR Hist Auto, E MANIFEST, RCRA NonGen / NLR, HWTS, HAZNET, FINDS, and ECHO databases. Selected federal and state environmental regulatory databases as well as responses from state and local regulatory agencies were reviewed, as available. Based on the available EDR information and the nature of these specific databases listing types, no RECs were identified at the Site in connection with these database listings.

As noted above, from the mid-1930s to the mid-1950s, the Site was vacant land associated with the eastern adjoining gasoline service station. The EDR Hist Auto database listing identifies a gasoline service station at 1890 Alcatraz Avenue from 1933 to 1943. While the current Site address is 1890 Alcatraz Avenue, the historical gasoline service station also had the address of 1890 Alcatraz Avenue, but was located to the east of the Site, where the current apartment buildings at 1896 and 1898 Alcatraz are located. Based on the lack of records indicating a release from the gasoline service station, as well as the age associated with the gasoline service station (around 70 years since removal), it is not considered a REC. However, the presence of a historical gasoline service station adjacent to the Site is considered a Business Environmental Risk (BER).

Selected federal and state environmental regulatory databases as well as responses from state and local regulatory agencies were reviewed, as available. Several off-Site facilities were located within the EDR search radius from the Site. None of the listed facilities are considered to be a REC to the Site based on several factors, including distance from the Site, location relative to the regional groundwater flow direction (e.g. hydraulically downgradient or crossgradient to the Site), database listing type, and/or affected media (soil only).

Based on the completion of the Vapor Encroachment Condition (VEC) screening matrix, it is presumed unlikely that a VEC currently exists beneath the Site.

Site Reconnaissance

On March 10, 2025, Mr. Luke Swickard with Ninyo & Moore conducted a Site reconnaissance of the property that included a visual inspection of the Site, and observations of adjoining properties. At the time of the Site reconnaissance, the Site was improved with a single story, commercial office building. The building was built for health services for adults, and therefore had a lobby area, multiple offices, multiple appointment rooms, two large bathrooms, a large central area, a loft storage area, and a concrete patio. A parking lot was located on the eastern portion of the Site.

Adjoining Properties

The areas surrounding the Site consist primarily of commercial, residential, and school properties. The Site is bordered on the north by an apartment building (1871 Alcatraz Ave),

and Pelican Plumbers (1881 Alcatraz Ave); on the south by an apartment building (6321 Dover St), and residential house (1839 63rd St); on the east by an apartment building (1896 Alcatraz Ave); and on the west by Mi Mundo Preschool (1866 Alcatraz Ave).

Based on observations made during the Site reconnaissance and review of agency file information, the adjoining properties were not identified as a REC.

Recognized Environmental Conditions:
This assessment has revealed no evidence of RECs in connection with the Site or adjoining properties.

Controlled Recognized Environmental Conditions:
This assessment has revealed no evidence of CRECs in connection with the Site.

Historical Recognized Environmental Conditions:
This assessment has revealed no evidence of HRECs in connection with the Site.

Business Environmental Risks:
The following Business Environmental Risks were identified:

- Due to the age of the Site building, it is likely that asbestos-containing building materials (ACBMs) and lead-based paint (LBP) is present on the Site.
- Due to the presence of a historical gasoline service station adjacent to the east of the Site, and a lack of records indicating the complete removal of the station, it is possible contamination associated with the historical gasoline service station remains beneath the Site and property adjoining to the east.

RECOMMENDATIONS
Based on the findings of this ESA, no further investigation is recommended at this time.

Certification Statement

This report has been prepared by the staff of Ninyo & Moore for City of Berkeley under the professional supervision of the principal and/or senior staff whose signatures appear hereon. Neither Ninyo & Moore, nor any staff member assigned to this assessment, has any interest or contemplated interest, financial or otherwise, in the subject or surrounding properties, or in any entity which owns, leases, or occupies the subject or surrounding properties or which may be responsible for environmental issues observed during the course of this assessment, and has no personal bias with respect to the parties involved. The information contained in this report has received appropriate technical review and approval. The conclusions represent professional judgments founded upon the findings of the assessment summarized in the report and the interpretation of such data based on our experience and expertise according to the

existing standard of care. No other warranty or limitation exists, either expressed or implied. Anyone seeking defenses to Comprehensive Environmental Response, Compensation and Liability Act liability must take independent action to protect their position.

1 INTRODUCTION

Ninyo & Moore has performed this Phase I Environmental Site Assessment (ESA) of the property located at 1890 Alcatraz Avenue in Berkeley, Alameda County, California (Site). This ESA was conducted for City of Berkeley as part of their due diligence on the property. This Phase I ESA meets the criteria set forth in the ASTM International (ASTM) E1527-21 Standard, was conducted by an Environmental Professional as defined by §312.10 of 40 CFR 312 and satisfies all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312. The following sections identify the purpose, the involved parties, the scope of services, and the limitations and exceptions associated with this Phase I ESA.

1.1 Purpose

In accordance with the ASTM Standard Practice for ESAs on Commercial Real Estate E1527-21, the objective of the Phase I ESA is to identify recognized environmental conditions (RECs). The term recognized environmental conditions means: "*(1) the presence of hazardous substances or petroleum products in, on, or at the subject property due to a release to the environment; (2) the likely presence of hazardous substances or petroleum products in, on, or at the subject property due to a release or likely release to the environment; or (3) the presence of hazardous substances or petroleum products in, on, or at the subject property under conditions that pose a material threat of a future release to the environment."*

Identification of RECs fall into three categories: an existing REC (as defined above), a Historical REC, or a Controlled REC, as defined below.

Historical Recognized Environmental Condition (HREC) An HREC is defined as "a previous release of *hazardous substances* or *petroleum products* affecting the subject property that has been addressed to the satisfaction of the applicable regulatory authority or authorities and meeting unrestricted use criteria established by the applicable regulatory authority or authorities without subjecting the subject property to any controls (for example, *activity and use limitations* or *other property use limitations*). A *historical recognized environmental condition* is not a *recognized environmental condition*."

Controlled Recognized Environmental Condition (CREC) A CREC is defined as a "*recognized environmental condition* affecting the subject property that has been addressed to the satisfaction of the applicable regulatory authority or authorities with *hazardous substances* or *petroleum products* allowed to remain in place subject to implementation of required controls (for example, *activity and use limitations* or *other property use limitations*)."

Business Environmental Risk (BER) - A BER is defined as a "risk which can have a *material environmental* or *environmentally-driven impact* on the business associated with the current or planned use of *commercial real estate*, not necessarily related to those *environmental issues*

required to be investigated in this practice." BERs include risks to the subject property that are outside the scope of the ASTM standard. BERs are not considered RECs.

1.2 Involved Parties

Mr. Luke Swickard, Project Manager with Ninyo & Moore, conducted the Site visit and performed the project reporting and research. Mr. Brandon Wilken, Principal Geologist with Ninyo & Moore, was the environmental professional assigned to this project, and performed project oversight and quality review. Resumes of these individuals are included in Appendix A.

1.3 Scope of Services

Ninyo & Moore's scope of services for this Phase I ESA included the following:

- Performed a Site reconnaissance to visually and/or physically observe the interior and exterior of structures and other features on the Site, as well as observe visible exterior features of adjoining properties to observe areas of possibly contaminated surface soil or surface water, improperly stored hazardous materials, and possible risks of contamination from activities at the Site and adjoining properties.
- Reviewed reasonably ascertainable standard and additional environmental record sources including federal, state, local, and tribal regulatory agency databases for the Site and for properties located within a specified radius of the Site.
- Reviewed reasonably ascertainable standard physical setting sources including a current United States Geological Survey (USGS) topographic map, or historical 7.5-minute topographic map, and possibly including USGS and/or state groundwater and geologic maps, and soil maps. The purpose of this review was to note information about the geologic, hydrologic, or topographic characteristics of the Site and Site vicinity.
- Reviewed reasonably ascertainable standard historical resources, including aerial photographs, historical fire insurance rate maps, and city directories, as available. The purpose of this review was to review obvious uses of the Site from the present, back to the Site's first developed use, or back to 1940, whichever is earlier. The term "developed use" includes agricultural uses and placement of fill dirt, and other uses that may not involve structures.
- Conducted interviews with present owners, operators, and/or occupants, or a designated representative, of the Site, as well as other knowledgeable parties as appropriate. The purpose of these interviews was to obtain information regarding potential RECs in connection with the Site.
- Performed a preliminary vapor encroachment screening assessment on the Site and adjoining properties.
- Prepared this ESA report documenting the methodology, significant data gaps, and findings and opinions regarding identified RECs, HRECs, and CRECs.

1.4 Tasks Not Undertaken

Non-scope considerations, as noted in ASTM E 1527-21, are discussed in Section 7 as appropriate. Ninyo & Moore did not address interpretations of zoning regulations, building code requirements, or property title issues.

1.5 Limitations and Exceptions

The environmental services described in this report have been conducted in general accordance with current regulatory guidelines and the standard of care exercised by environmental consultants performing similar work in the project area. No other warranty, expressed or implied, is made regarding the professional opinions presented in this report.

This document is intended to be used only in its entirety. No portion of the document, by itself, is designed to completely represent any aspect of the project described herein. Ninyo & Moore should be contacted if the reader requires any additional information or has questions regarding the content, interpretations presented, or completeness of this document.

Our conclusions, recommendations, and opinions are based on an analysis of the observed Site conditions and the referenced literature. It should be understood that the conditions of a Site could change with time as a result of natural processes or the activities of man at the subject property or nearby sites. In addition, changes to the applicable laws, regulations, codes, and standards of practice may occur due to government action or the broadening of knowledge. The findings of this report may, therefore, be invalidated over time, in part or in whole, by changes over which Ninyo & Moore has no control.

Per Section 4.6 of the ASTM E1527-21 Standard, "an environmental Site assessment meeting or exceeding this practice is presumed to be viable when it is completed within 180 days prior to the date of acquisition of the subject property (or for transactions not involving an acquisition such as a lease or refinance, the date of the intended transaction). The dates of the components (*interviews*, *review of government records, visual Site inspections, and declaration by the environmental professiona*l, shall be identified in the report."

All of the following components must be conducted or updated within 180 days prior to the date of acquisition or prior to the date of the transaction:

- (i) interviews with owners, operators, and occupants;
- (ii) searches for recorded environmental cleanup liens;
- (iii) reviews of federal, tribal, state, and local government records;
- (iv) visual inspections of the subject property and of adjoining properties; and
- (v) the declaration by the environmental professional responsible for the assessment or update.

1.6 Special Terms and Conditions

Ninyo & Moore was not made aware of any special terms and conditions associated with the Site.

1.7 Reliance

This report may be relied upon by, and is intended exclusively for, the *Users* of this report, including City of Berkeley, and any of its affiliates. Any use or reuse of the findings, conclusions, and/or recommendations of this report by parties other than the aforementioned *Users* is undertaken at said parties' sole risk.

2 PROPERTY OVERVIEW

The following sections describe the location and the current uses of the Site and adjoining properties. The Site Location is presented on Figure 1 and the Site Vicinity with additional information concerning the Site and surrounding properties is presented on Figure 2. At the time of the Site reconnaissance, the Site was improved with a vacant commercial office building and parking lot. The Site is generally located in Berkeley, Alameda County, California. The 0.22-acre Site is designated by Alameda County Assessor's Parcel Number 52-1527-24-1.

2.1 Property Location and Land Use(s)

2.1.1 Property Location

The Site is located at 1890 Alcatraz Avenue in Berkeley, Alameda County, California.

2.1.2 Adjacent Property Location and Land Uses

Table 1 lists the properties adjoining the Site and associated land use. Based on the nature of the current uses of the adjoining properties and observations made during the Site reconnaissance, it is unlikely that the current uses of these properties have impacted the environmental integrity of the Site.

Table 1 - Adjoining Properties

Location	Description
North	Alcatraz Avenue, apartment building (1871 Alcatraz Ave), and Pelican Plumbers (1881 Alcatraz Ave)
South	Apartment building (6321 Dover St), and residential house (1839 63rd St)
East	Apartment building (1896 Alcatraz Ave)
West	Mi Mundo Preschool (1866 Alcatraz Ave)

2.1.3 Utilities

2.1.3.1Potable Water

East Bay Municipal Utilities District (EBMUD) provides potable water to the Site and vicinity.

2.1.3.2 Sewage Disposal System

The East Bay Municipal Utilities District (EBMUD) provides municipal sewer service to the Site and surrounding areas.

2.1.3.3 Source of Fuel for Heating and Cooling

The fuel source for the on-Site heating and cooling systems was provided by PG&E.

2.1.4 Description of Structures, Roads, and Other Improvements

As shown on Figure 2, the Site is accessible from Alcatraz Avenue. At the time of the Site reconnaissance, the Site was improved with a single story, commercial office building. The building was built for health services for adults, and therefore had a lobby area, multiple offices, multiple appointment rooms, two large bathrooms, a large central area, a loft storage area, and a concrete patio. A parking lot was located on the eastern portion of the Site.

2.2 Physical Setting

The following sections include discussions of topographic, geologic, and hydrologic conditions.

2.2.1 Topography

Based on a review of the United States Geological Survey (USGS) 7.5-Minute Topographic Quadrangle Map Series of the Oakland West, California 2021 Quadrangle, the Site is situated at an elevation of approximately 109 feet above mean sea level. The general topographic gradient (EDR 2025a) is in a west-southwesterly direction.

2.2.2 Geology/Hydrogeology

The Site is located in the Coast Range geomorphic province of California. The Coast Ranges are northwest-trending mountain ranges (2,000 to 4,000, occasionally 6,000 feet elevation above sea level), and valleys. The ranges and valleys trend northwest, subparallel to the San Andreas Fault. Strata dip beneath alluvium of the Great Valley. To the west is the Pacific Ocean. The coastline is uplifted, terraced and wave-cut. The Coast Ranges are composed of thick Mesozoic and Cenozoic sedimentary strata. The northern and southern ranges are separated by a depression containing the San Francisco Bay. The northern Coast Ranges are dominated by irregular, knobby, landslide-topography of the Franciscan Complex. The eastern border is characterized by strike-ridges and valleys in Upper Mesozoic strata. In several areas, Franciscan rocks are overlain by volcanic cones and flows of the Quien Sabe, Sonoma and Clear Lake volcanic fields. The Coast Ranges are subparallel to the active San Andreas Fault. The San Andreas is more than 600 miles long, extending from Pt. Arena to the Gulf of California. West of the San Andreas is the Salinian Block, a granitic core extending from the southern extremity of the Coast Ranges to the north of the Farallon Islands (CGS, 2002). The 1977 California Division of Mines and Geology, *Geologic Map of California*: (Jennings C.W.) shows the Site to be underlain by Quaternary Older Alluvium Deposits (Qoa). Based on our review of the EDR

Radius Map report, the primary soil type beneath the Site is mapped as Tierra loam (EDR, 2025a).

2.2.3 Surface Water Bodies

Natural surface water bodies, including streams or other bodies of water, are not present on or adjoining to the Site. The nearest body of water is the San Francisco Bay, located approximately 1.7-miles west of the Site.

2.2.4 Groundwater

Groundwater information for the Site was not available. Ninyo & Moore reviewed the State Water Resources Control Board's GeoTracker website (GeoTracker) for groundwater information in the Site vicinity. According to GeoTracker, groundwater information reported in a Groundwater Monitoring Report Second Half 2024 for the ARCO Service Station No. 0374 located at 6407 Telegraph Avenue (approximately 2,500 feet northeast of the Site), the groundwater flow direction in the Site vicinity was reported to be in a southwesterly direction and the depth to groundwater was reported to be approximately 6 to 8 feet below ground surface. Groundwater depths and flow directions can vary due to seasonal variations, groundwater withdrawal or injection, and other factors.

2.2.6 Flood Maps

According to the FEMA flood maps, the Site lies in the flood zone classified as Zone X. Zone X designates an area that has been determined to be outside of the 0.2% annual chance floodplain.

3 PROPERTY BACKGROUND

3.1 Interviews

Interviews were conducted by Ninyo & Moore with the objective of obtaining information regarding potential RECs in connection with the Site. Interviews with the present owners, operators, and/or occupants of the Site, as available, as well as other knowledgeable parties as appropriate, is mandated by ASTM E1527-21.

3.1.1 Current Owner/Site Manager or Occupant

Ms. Csilla Kenny, Assistant Civil Engineer with the City of Berkeley, was interviewed during the Site reconnaissance on March 10, 2025. Ms. Kenny provided access during the Site visit. Ms. Kenny was not aware of any hazardous materials incidents, spills, leaks or violations related to the Site.

3.1.2 Past Owner/Site Manager or Occupant

Past ownership entities were not made available to Ninyo & Moore during the preparation of this ESA. Therefore, interviews with past Site owners were not conducted.

3.1.3 State and/or Local Agencies

State and/or local agencies were contacted regarding available records for the Site. These interviews and the records reviewed are summarized in Section 4.3.

3.2 Review of Aerial Photographs

Ninyo & Moore reviewed the EDR Aerial Photo Decade Package report (EDR, 2025a) dated March 6, 2025. The report included aerial photographs that begin in 1939. A listing of the photographs reviewed is presented in Table 2. Copies of the historical aerial photographs are provided in Appendix D.

Based on the review of the aerial photographs listed below, the Site was vacant land associated with the east adjoining gasoline service station, from sometime prior to 1939, until the late 1950s, when a commercial building and parking lot were constructed on the Site. The Site vicinity appeared to be developed since at least the 1930s. No RECs were identified for the Site or adjoining properties based on historical aerial photograph review.

Table 2 -Aerial Photographs Summary

Date	Sources	Site	Adjoining Properties
1939	EDR	The Site was noted to be vacant land associated with the east adjoining gasoline service station.	The area surrounding the Site were noted to be developed with Commercial and residential buildings to the north, commercial buildings to the west, a gasoline service station to the east, and residential houses to the south. Alcatraz Avenue was noted to the north of the Site.
1946-1950	EDR	No significant changes noted.	No significant changes noted.
1958	EDR	A commercial building and parking lot were noted on the Site.	The gasoline service station to the east of the Site was replaced with two apartment buildings. An apartment building was noted to the south of the Site.
1963-2020	EDR	No significant changes noted.	No significant changes noted.

3.3 Review of Topographic Maps

Ninyo & Moore reviewed the EDR Historical Topo Map Report, dated March 6, 2025 (EDR, 2025b). A listing of the maps reviewed is presented in Table 3 below. Copies of the historical topographic maps are provided in Appendix D.

The review of topographic maps listed below indicates the Site was undeveloped prior to 1948. Structures were depicted adjacent to the north and south of the Site since at least 1895. No RECs were identified for the Site or adjoining properties based on a review of the historical topographic maps.

Table 3 - Topographic Maps Summary		
Date	**Quadrangle**	**Uses**
1895-1915	San Francisco,Concord	The Site was mapped as vacant land. Buildings were mapped to the north and south of the Site.
1948-1996	San Francisco,Concord,Oakland West,Oakland East	The Site and Site vicinity were mapped as urban land.
2012-2021	Oakland West,Oakland East	No buildings were mapped on the 2012 through 2021 topographic maps.

3.4 Review of Fire Insurance Maps

Ninyo & Moore reviewed the EDR Certified Sanborn Map Report, dated March 6, 2025 (EDR, 2025c) for historical fire insurance rate maps (Sanborn Maps) of the Site. A summary of the Sanborn Map coverage is discussed in Table 4 below. A copy of the EDR Sanborn Map Report is included in Appendix D.

Table 4 - Summary of Sanborn Map Listings		
Year(s)	**Site Comments**	**Adjoining Area Comments**
1903	The Site was depicted as vacant land.	The Site vicinity was depicted as vacant land. Alcatraz Avenue was depicted to the north of the Site.
1911-1950	The Site was unmapped.	Residential houses were depicted to the north of the Site. The properties to the east, west, and south of the Site were unmapped.
1951	The Site was depicted as vacant land, part of the east adjoining gasoline service station.	Commercial buildings were depicted to the east, a gasoline service station was depicted to the west, and an apartment building and two residential houses were depicted to the south of the Site. The properties to the north of the Site were unmapped.
1952	No significant changes depicted.	The properties to the north and east of the Site were unmapped.
1959-1966	The Site was unmapped.	The Site vicinity was unmapped.
1967-1969	The Site was depicted as vacant land.	The gasoline service station to the east of the Site was removed and replaced with two apartment buildings.
1969	No significant changes depicted.	No significant changes depicted.
1980	The Site was depicted with the current commercial building and parking lot.	An apartment building and a commercial building were depicted to the north of the Site.

3.5 Review of Reverse City Directories

Ninyo & Moore reviewed the EDR City Directory Image Report, dated March 6, 2025 (EDR, 2025d), for the Site and adjoining properties, to evaluate facilities of potential concern, which may have been historically located on or adjoining to the Site. A summary of historical City Directory listings for the Site and adjoining properties, as warranted, are discussed in Table 5 below. City directories for the Site and adjoining properties were researched from 1928 through 2020. A copy of the EDR City Directory Image report is included in Appendix D. Review of the City Directory listings did not identify any RECs associated with the Site or adjoining properties.

Table 5 - City Directory Summary

Site Address	Source Years	Site Uses
1890 Alcatraz Avenue	1933-2020	1933: Langlois Maynard Gas Sta Berkeley 1943: Rollier Jesse E gas sta 1950: Boyichi Paul R Joe & Paul S Mobil Service, Joe & Paul S Mobil Service 1955: Mayo S Associated Service Berkeley 1962-1970: Monroe Jas O Rauch & Monroe refrigtn equip 1975: Berkeley Art Center 1980: Berkeley Neighborhood Legal Services Senior Citizens, South Berkeley Model Cities Neighborhood Council, Young Adult Project 1986: Berkeley Albany, Licensed Day Care Operators 1991-1992: Berkeley Adult Day Care Center, Community Energy Services Corp 1995-2017: Berkeley Adult Day Care Center 2020: Carter Laloni Rn, Guy Karl Rn, Health Housing & Community Svc

3.6 Title Records

A title report was provided to Ninyo & Moore by the client. Old Republic National Title Insurance Company issued a title report for the Site in December 2024. A copy of the report is included in Appendix E.

3.7 Recorded Environmental Covenants and AULs

The EDR database report included a review of both Federal and State Engineering Control (EC) and Institutional Control (IC) databases, such as the *Engineering Controls Sites List* (US ENG CONTROLS), and *Institutional Controls Sites List* (US INST CONTROLS). Based on a review of the database report, the Site was not listed on the EC or IC databases, and ECs and ICs were not identified through review of the Department of Toxics Substances Control *Land Use Restriction Sites database,* or through review of the State Water Resources, *Sites with Deed Restrictions* database. In addition to these federal and state listings, AULs can be recorded at the county and municipal level that may not be listed in the regulatory database report. Environmental lien and AUL records recorded against the Site were not provided by the client. Performance of a review of these records was not included as part of the Phase I ESA scope of services, and unless notified otherwise, Ninyo & Moore assumes that the client is evaluating this information outside the scope of this report. An environmental lien search report was not requested by the client for review by Ninyo & Moore during the completion of this ESA.

3.8 Previous Investigations

Ninyo & Moore was not provided copies of prior environmental reports completed for the Site.

3.9 User-Provided Information

The following sections summarize information provided by the user to assist the Environmental Professional in identifying the possibility of RECs in connection with the Site and to fulfill the user's Title Records responsibilities in accordance with ASTM E1527-21. The User

Questionnaire was completed by Ms. Csilla Kenny, Assistant Civil Engineer with the City of Berkeley. A copy of the User Questionnaire is included in Appendix B.

3.9.1 Environmental Lien and Activity and Use Limitations Search Results

Ninyo & Moore was not informed of the existence of environmental liens or AULs associated with the Site.

3.9.2 Specialized Knowledge

Ninyo & Moore was not informed of the existence of specialized knowledge pertaining to the Site that is material to the identification of RECs in connection with the Site.

3.9.3 Relationship of Purchase Price to Fair Market Value

Information pertaining to valuation reduction was not communicated to Ninyo & Moore for the purpose of this assessment since the purpose of the Phase I ESA was not for the sale of the property.

3.9.4 Commonly Known or Reasonable Ascertainable Information

Commonly known or reasonably ascertainable information pertaining to the Site that is material to RECs in connection with the Site was identified by Ms. Csilla Kenny. According to Ms. Kenny, the Site was used as a gasoline service station sometime around the 1930s.

3.9.5 Owner, Property Manager, and Occupant Information

According to the Alameda County Assessor's website, the Site is currently owned by the City of Berkeley.

4 REGULATORY DATABASE SEARCH AND SIGNIFICANT FINDINGS

REGULATORY DATABASE SEARCH AND FINDINGS

Environmental Data Resources, Inc. (EDR) performed a computerized environmental information database search for the Site and Site vicinity on March 6, 2025 (EDR, 2025e) that included searches of federal, state, tribal, and local databases. The purpose of the database search was to determine if the Site or adjoining properties were listed on one or more of the standard government environmental records resources, and if so, review agency records to determine if a REC, HREC, CREC, or de minimis condition exists at the Site. A summary of the listed properties of potential environmental concern to the Site are presented in Table 6 below. A list of the environmental databases searched, and their corresponding search distance is included in the EDR Radius Map Report provided in Appendix C.

Table 6 - Summary of Environmental Records Sources Database Search

4.1 Subject Property

The following Table 7 summarizes the database listings associated with the Site.

Table 7 - On-Site Database Listings	
Site Name	LANGLOIS MAYNARD, BERKELEY MENTAL HEALTH
Site Address	1890 ALCATRAZ AVE
Database	EDR Hist Auto, E MANIFEST, RCRA NonGen / NLR, HWTS, HAZNET, FINDS, ECHO
Comments	The Site is listed on the EDR Hist Auto database for being a registered gasoline station from 1933 to 1943; on the RCRA NonGen / NLR, FINDS, ECHO, and E MANIFEST databases for handling but not generating hazardous waste in 2019; on the HWTS database for having tracked hazardous waste on the property from 2019 to 2021; and on the HAZNET database for transferring and storing less than a ton of pharmaceutical waste in 2020. Based on the lack of records indicating a release associated with these listings, as well as the age of the EDR Hist Auto listing, these are not considered RECs.

4.2 Surrounding Properties

Off-Site properties/facilities listed in the Summary of Environmental Records Sources table above were evaluated for their potential to impact soil, soil vapor, and/or groundwater at the Site. Table 8 below presents the off-Site properties/facilities that were interpreted to represent a potential environmental concern to the Site, based on their proximity to the Site, the nature of the database(s) on which they are listed, and/or the location of the off-Site property in relation to the Site with respect to topography or expected groundwater flow direction (southwesterly).

Table 8 - Facilities of Potential Concern	
Facility Name	CAROL A WARREN COMPANY
Address	6321 DOVER STREET
Direction from Site	Southeast and crossgradient
Distance from Site	28 feet
Database	RCRA NonGen / NLR
Notes/Comments	This property is listed on the RCRA NonGen / NLR database for handling but not generating hazardous waste in 2018. Based on the lack of records indicating a release associated with this listing, this is not considered a REC.

Facility Name	BRIAN EDWARDS-TIEKERT & CHRIS SCHILDT
Address	1829 63RD ST.
Direction from Site	Southwest and downgradient
Distance from Site	70 feet
Database	E MANIFEST, RCRA NonGen / NLR
Notes/Comments	This property is listed on the RCRA NonGen / NLR, and E MANIFEST databases for handling but not generating hazardous waste in 2019. Based on the lack of records indicating a release associated with these listings, this is not considered a REC.

Facility Name	CAMPBELL HELEN MRS
Address	1852 ALCATRAZ AVE
Direction from Site	West-Northwest and crossgradient
Distance from Site	85 feet
Database	EDR Hist Cleaner
Notes/Comments	This property is listed on the EDR Hist Cleaner database for being a registered laundry facility in 1933. Based on the lack of records indicating a release associated with this listing, as well as the age of the listing and the crossgradient relationship to the Site, this is not considered a REC.

Facility Name	EASY DOES IT EMERGENCY SERVICES
Address	3271 ADELINE ST UNIT B
Direction from Site	West-Northwest and crossgradient
Distance from Site	276 feet
Database	RCRA NonGen / NLR
Notes/Comments	This property is listed on the RCRA NonGen / NLR database for handling but not generating hazardous waste in 2020 and 2021. Based on the lack of records indicating a release associated with this listing, this is not considered a REC.

Facility Name	EUWELL'S CLEANERS
Address	1806 ALCATRAZ AVE
Direction from Site	West and crossgradient
Distance from Site	316 feet
Database	DRYCLEANERS, EMI, CERS, RCRA-SQG
Notes/Comments	This property is listed on the DRYCLEANERS database for being a registered drycleaning facility from 1989 to 2007; on the RCRA-SQG database for generating a small quantity of hazardous waste in 1996; and on the EMI, and CERS databases for emitting several tons of organic hydrocarbon gases from 1990 to 2006. Based on the lack of records indicating a release associated with this listing, as well as the age of the listing, the distance from the Site, and the crossgradient relationship to the Site, this is not considered a REC.

Facility Name	JONATHAN CHANG
Address	1814 63RD ST #A
Direction from Site	Southwest and downgradient
Distance from Site	333 feet
Database	E MANIFEST, RCRA NonGen / NLR
Notes/Comments	This property is listed on the RCRA NonGen / NLR, and E MANIFEST databases for handling but not generating hazardous waste in 2020 and 2022. Based on the lack of records indicating a release associated with these listings, this is not considered a REC.

4.3 Additional Environmental Record Sources

Local and state departments were contacted regarding available records for the Site. Results of the contacts and file reviews, as available, are discussed below. Copies of requests and responses, including public records, are included as Appendix E.

4.3.1 State/County Environmental Record Sources

Ninyo & Moore reviewed the Department of Toxic Substances Control (DTSC) EnviroStor and the State Water Resources Control Board (SWRCB) GeoTracker websites for hazardous materials records for the Site address on March 11, 2025. No records were available for the Site through review of these agency databases.

The Alameda County Environmental Health Department (ACEHD) was contacted regarding hazardous materials records associated with the Site address on March 5, 2025. Files or records were not available for the Site address. A copy of the file review request response is included in Appendix E.

4.3.2 Local Environmental Record Sources

A Public Records Request was submitted to the City of Berkeley regarding hazardous materials records for the Site March 5, 2024. The City of Berkeley has not responded by the publication of this report. If the City of Berkeley responds, and if their response

indicates a REC or alters the conclusions or recommendations of this report, an addendum will be issued.

4.3.3 Federal Environmental Record Sources

Ninyo & Moore conducted an online search of the USEPA's MyPropertyInfo database for the Site and the vicinity. The Site address was not listed in the database.

4.3.4 Gas & Oil Maps

According to the CalGEM Online Mapping System, the Site does not lie within the administrative boundaries of an oil field and no oil or gas wells are located on the Site.

5 SITE RECONNAISSANCE

SITE RECONNAISSANCE

The following sections provide a general description of the Site and adjoining properties. The Site reconnaissance was conducted on March 10, 2025, by Mr. Luke Swickard with Ninyo & Moore. Mr. Swickard was accompanied by Ms. Csilla Kenny, Assistant Civil Engineer with the City of Berkeley. Table 9 below summarizes key on-Site observations. Conditions of significant concern are discussed following the table. Photographs taken during the Site reconnaissance are provided in Appendix F.

Table 9 - On-Site Observations

Conditions	Not Observed or Noted	Observed or Noted	Significant Concerns?
Hazardous Substances		X	No
Petroleum Products	X		
Underground Storage Tanks (USTs)	X		
Aboveground Storage Tanks (ASTs)	X		
Chemical/Petroleum Odors or Staining	X		
Standing Water/Pools/Sumps	X		
Drums and Totes	X		
Unidentified Hazardous Substance Containers	X		
Transformers/Potentially PCB-Containing Materials	X		
Stains or Corrosion on Floors, Walls, or Ceilings	X		
Drains and Sumps		X	No
Pits, Ponds, Lagoons	X		
Solid Waste	X		
Stained Soil or Pavement	X		
Stressed Vegetation	X		
Elevators	X		
Waste or Storm Water Discharges		X	No
Septic Systems	X		

Conditions	Not Observed or Noted	Observed or Noted	Significant Concerns?
Wells	X		
Other	X		

Drains and Sumps

Drains were located throughout the Site bathrooms.

Waste or Storm Water Discharges

Storm drain inlets were observed throughout the asphalt-paved parking areas. Indications of spills were not observed around the drain inlets.

ASSOCIATED PHOTOGRAPHS

View of a typical storm drain inlet.

5.1 Adjoining Properties

The areas surrounding the Site consist primarily of commercial, residential, and school properties. The Site is bordered on the north by an apartment building (1871 Alcatraz Ave), and Pelican Plumbers (1881 Alcatraz Ave); on the south by an apartment building (6321 Dover St), and residential house (1839 63rd St); on the east by an apartment building (1896 Alcatraz Ave); and on the west by Mi Mundo Preschool (1866 Alcatraz Ave).

COCs include: VOCs, cholrinated solvents, Naphtalene, mercury, PCBs, Radon, pesticides

6 VAPOR ENCROACHMENT

Ninyo & Moore conducted a preliminary vapor encroachment screen (pVES) for potential chemicals of concern (COCs) that may migrate as vapors onto the Site as a result of contaminated soil and/or groundwater near the Site. The purpose of the pVES is to identify a vapor encroachment condition (VEC), which is the presence or likely presence of COC vapors in subsurface soils at the Site caused by the release of vapors from contaminated soil or groundwater either on or near the Site. The potential for VEC beneath the Site was evaluated using a Vapor Encroachment Screening Matrix (VESM). The VESM included performing a Search Distance Test to identify if there are any known or suspect contaminated properties surrounding or upgradient of the Site within specific search radii, a COC Test (for those known or suspect contaminated properties identified within the Search Distance Test) to evaluate

whether or not COCs are likely to be present, and a Critical Distance Test to evaluate whether or not COCs in a contaminated plume may be within the critical distance of the Site (100 feet for non-petroleum contaminants, and 30 feet for petroleum hydrocarbon contaminants).

Based on the results of the VESM, it is unlikely a VEC currently exists beneath the Site. A copy of the VESM is included in Appendix G.

7 NON-SCOPE CONSIDERATIONS

In accordance with ASTM E1527-21, the following, which is not intended to be all inclusive, represent non-scope considerations and, therefore, were not addressed in this Phase I ESA: asbestos, radon, lead-based paint, lead in drinking water, emerging contaminants, regulatory compliance, cultural and historical risk, industrial hygiene, health and safety, ecological resources, endangered species, indoor air quality, and high voltage power lines. In addition, Ninyo & Moore did not address interpretations of zoning regulations, building code requirements, or property title issues.

8 FINDINGS AND OPINIONS

FINDINGS AND OPINIONS

Ninyo & Moore performed a Phase I Environmental Site Assessment (ESA) on the Site located at 1890 Alcatraz Avenue, in Berkeley, Alameda County, California. A Summary of Findings is provided below. It should be recognized that all report details are not included in this Summary, and the report should be read in its entirety.

Site Location and Use

The approximately 0.22-acre Site is located along Alcatraz Avenue. The Site consisted of a vacant commercial office building and parking lot.

Historical Information

Review of historical resources, such as aerial photographs, topographic maps, fire insurance maps, and available City Directory listings, as well as through review of historical records, interviews, and research, revealed that the Site was vacant land associated with the east adjoining gasoline service station, from the mid-1930s, until the mid-1950s, when a commercial building and parking lot were constructed on the Site. The Site has historically been occupied by several tenants including Langlois Maynard Gas Station, Rollier Jesse E Gas Station, Joe & Paul S Mobil Service, Mayo S Associated Service, Jas O Rauch & Monroe Refrigeration Equipment, Berkeley Art Center, Berkeley Neighborhood Legal Services Senior Citizens, South Berkeley Model Cities Neighborhood Council, Young Adult Project, Berkeley Adult Day Care Center, and Health Housing & Community Services.

Adjoining properties have primarily been residential houses, residential apartment buildings, and commercial buildings from at least 1939 until the present, with the following exceptions on

the eastern adjoining property: A gasoline service station was present from prior to 1939 to the mid-1950s. No RECs were identified in the historical review.

Records Review

Review of an environmental database report obtained for this project indicated that the Site was not listed on any of the *Standard Federal, State, and Tribal Environmental Record sources*. The Site was listed on the *Additional Federal, State, Tribal and Local Environmental Record sources* regulatory databases researched by EDR, including the EDR Hist Auto, E MANIFEST, RCRA NonGen / NLR, HWTS, HAZNET, FINDS, and ECHO databases. Selected federal and state environmental regulatory databases as well as responses from state and local regulatory agencies were reviewed, as available. Based on the available EDR information and the nature of these specific databases listing types, no RECs were identified at the Site in connection with these database listings.

As noted above, from the mid-1930s to the mid-1950s, the Site was vacant land associated with the eastern adjoining gasoline service station. The EDR Hist Auto database listing identifies a gasoline service station at 1890 Alcatraz Avenue from 1933 to 1943. While the current Site address is 1890 Alcatraz Avenue, the historical gasoline service station also had the address of 1890 Alcatraz Avenue, but was located to the east of the Site, where the current apartment buildings at 1896 and 1898 Alcatraz are located. Based on the lack of records indicating a release from the gasoline service station, as well as the age associated with the gasoline service station (around 70 years since removal), it is not considered a REC. However, the presence of a historical gasoline service station adjacent to the Site is considered a Business Environmental Risk (BER).

Selected federal and state environmental regulatory databases as well as responses from state and local regulatory agencies were reviewed, as available. Several off-Site facilities were located within the EDR search radius from the Site. None of the listed facilities are considered to be a REC to the Site based on several factors, including distance from the Site, location relative to the regional groundwater flow direction (e.g. hydraulically downgradient or crossgradient to the Site), database listing type, and/or affected media (soil only).

Based on the completion of the Vapor Encroachment Condition (VEC) screening matrix, it is presumed unlikely that a VEC currently exists beneath the Site.

Site Reconnaissance

On March 10, 2025, Mr. Luke Swickard with Ninyo & Moore conducted a Site reconnaissance of the property that included a visual inspection of the Site, and observations of adjoining properties. At the time of the Site reconnaissance, the Site was improved with a single story, commercial office building. The building was built for health services for adults, and therefore

had a lobby area, multiple offices, multiple appointment rooms, two large bathrooms, a large central area, a loft storage area, and a concrete patio. A parking lot was located on the eastern portion of the Site.

Adjoining Properties

The areas surrounding the Site consist primarily of commercial, residential, and school properties. The Site is bordered on the north by an apartment building (1871 Alcatraz Ave), and Pelican Plumbers (1881 Alcatraz Ave); on the south by an apartment building (6321 Dover St), and residential house (1839 63rd St); on the east by an apartment building (1896 Alcatraz Ave); and on the west by Mi Mundo Preschool (1866 Alcatraz Ave).

Based on observations made during the Site reconnaissance and review of agency file information, the adjoining properties were not identified as a REC.

8.1 Recognized Environmental Conditions

Recognized Environmental Conditions:

This assessment has revealed no evidence of RECs in connection with the Site or adjoining properties.

8.2 Controlled Recognized Environmental Conditions

Controlled Recognized Environmental Conditions:

This assessment has revealed no evidence of CRECs in connection with the Site.

8.3 Historical Recognized Environmental Conditions

Historical Recognized Environmental Conditions:

This assessment has revealed no evidence of HRECs in connection with the Site.

8.4 Business Environmental Risks

Business Environmental Risks:

The following Business Environmental Risks were identified:

- Due to the age of the Site building, it is likely that asbestos-containing building materials (ACBMs) and lead-based paint (LBP) is present on the Site.
- Due to the presence of a historical gasoline service station adjacent to the east of the Site, and a lack of records indicating the complete removal of the station, it is possible contamination associated with the historical gasoline service station remains beneath the Site and property adjoining to the east.

9 DATA GAPS

No data gaps were encountered during this Phase I ESA.

10 CONCLUSIONS

CONCLUSIONS

Ninyo & Moore has performed this Phase I ESA in conformance with the scope and limitations of ASTM E1527-21 of the 1890 Alcatraz Avenue property located at 1890 Alcatraz Avenue in Berkeley, Alameda County, California (the Site). Based on the information compiled during the preparation of this report, this assessment has revealed no evidence of Recognized Environmental Conditions (RECs), Controlled RECs (CRECs), or Historical RECs (HRECs) in connection with the Site, and no RECs were identified on the adjoining properties.

11 RECOMMENDATIONS

RECOMMENDATIONS

Based on the findings of this ESA, no further investigation is recommended at this time.

12 LIMITING CONDITIONS/DEVIATIONS

This report was prepared in accordance with ASTM E1527-21. No deviations from the standard occurred in this ESA. Based on the information gathered by Ninyo & Moore for the purposes of this ESA, it is Ninyo & Moore's opinion the data obtained from the Site reconnaissance, records reviewed, and interviews conducted, is adequate to make a conclusion on the environmental condition of the Site with respect to the existence or lack of RECs.

14 ENVIRONMENTAL PROFESSIONAL STATEMENT

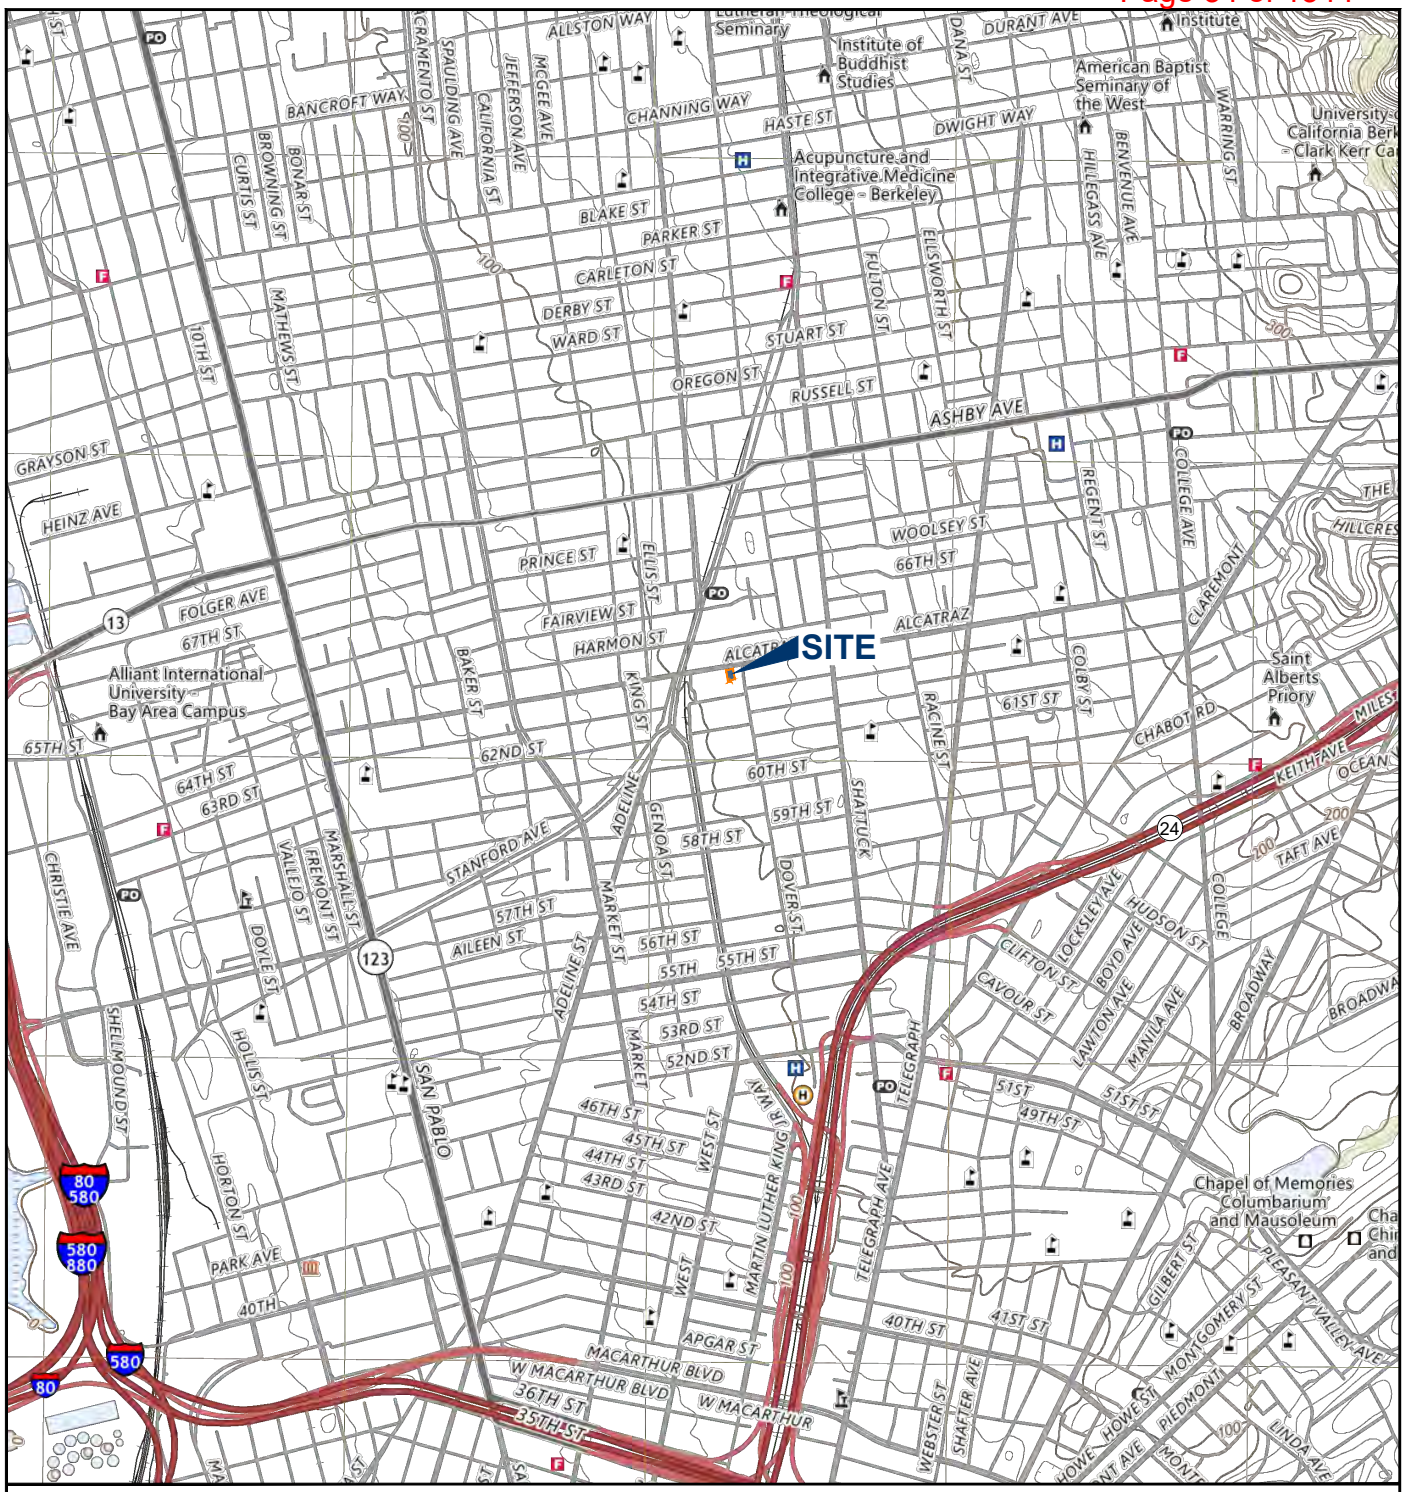

I declare that, to the best of my professional knowledge and belief, I meet the definition of Environmental Professional as defined by 312.10 of 40 CFR 312. I have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the subject property. I have developed and performed the all appropriate inquires in conformance with the standards and practices set forth in 40 CFR Part 312.

Resumes

Luke I. Swickard

Project Manager

EDUCATION

B.S., Environmental Science and Management, 2017, University of California, Davis, California

REGISTRATIONS/CERTIFICATIONS

AHERA Accredited Asbestos Inspector, #45593

40-Hour HAZWOPER with Annual Updates

As a Project Manager for Ninyo & Moore, Mr. Swickard has 6 years of experience in various environmental field work, including Phase I and Phase II ESAs, corridor studies, oversight of soil boring drilling, well installation and UST removal activities, as well as water, soil and soil vapor sampling. He has also conducted Spill Prevention, Control, and Countermeasure (SPCC) audits, prepared Storm Water Pollution Prevention Plan (SWPPP), and designed stormwater Best Management Practices (BMP).

EXPERIENCE

FCS New Solano County Hall of Justice Phase I Environmental Site Assessment (ESA), **Fairfield**, California: Provided project management for the completion of a Phase I ESA on the approximately 15-acre Solano County Justice Campus that includes the Solano County Courthouse, Law Library, Office of Emergency Operations, Solano County Coroner, and the Solano County Jail. The Phase I ESA was conducted to evaluate the potential for Recognized Environmental Conditions (RECs) on and adjacent to the site for ongoing use of the property. Phase I ESA activities included reviewing historical and regulatory environmental data, conducting a site reconnaissance and preparing the Phase I ESA Report.

US Agriculture Phase I ESA, **Yakima, Washington:** Provided project management for the completion of four Phase I ESAs on approximately 350-acres of agricultural property that are utilized as fruit orchards. The Phase I ESAs were conducted to evaluate the potential for RECs on and adjacent to the sites for ongoing use of the properties. Phase I ESA activities included reviewing historical and regulatory environmental data, conducting a site reconnaissance and preparing the Phase I ESA Reports.

SWCA, Transmission Line Corridor Assessments, California: Provided project management for the completion of three corridor assessments on over 1,000 parcels along over 100-mile long transmission line routes in San Jose and the California Valley. Activities included the created of parcel information databases, reviewing historical and regulatory environmental data, conducting site reconnaissance and preparing the corridor assessments and figures.

Mikesell Avenue Properties Reports Manteca, California: Provided project management and oversight for the completion of six Phase I ESAs, Pipeline Risk Analyses, Railroad Safety Studies, Geotechnical Hazard Surveys, and California Department of Education Checklists, for the Manteca Unified School District. The reports were conducted to evaluate the potential for environmental hazards and RECs. Activities included reviewing historical and regulatory environmental data, conducting a site reconnaissance and preparing the Phase I ESA Report.

City of West Sacramento Sacramento River West North Levee Corridor Assessment, West Sacramento, California: Provided project management and implementation for the completion of a corridor assessment on over 200 parcels along a 5.8-mile long area, as part of the Sacramento River levee expansion project. Activities included reviewing historical and regulatory environmental data, conducting site reconnaissance and preparing the corridor assessment. The project was conducted in accordance with EPA Brownfields Grant guidelines and requirements.

Luke I. Swickard

Project Manager

MIG Anthony Chabot Sewer Line Project San Leandro, California: Provided project management for the completion of a Phase I ESA for the nee sewer line installation in the Anthony Chabot Regional Park. Ninyo & Moore conducted the Phase I ESA to evaluate the potential for Recognized Environmental Conditions (RECs) along the 8-mile long project route, through the regional park and adjacent golf course. Activities included reviewing historical and regulatory environmental data, conducting a site reconnaissance and preparing the Phase I ESA Report.

Floating Photovoltaic (PV) Solar Array, Windsor, California: Provided project support for the completion of a Phase I Environmental Site Assessment (ESA) of a proposed floating PV solar array on an existing water treatment facility. Ninyo & Moore conducted the Phase I ESA to evaluate the potential for Recognized Environmental Conditions (RECs) adjacent to the site so that electrical infrastructure could be installed from the floating PV solar array to a collection system. Phase I ESA activities included reviewing historical and regulatory environmental data, conducting a site reconnaissance and preparing the Phase I ESA Report.

Duncan Enterprises Phase I Environmental Site Assessment (ESA), Fresno, California: Provided project management for the completion of a Phase I ESA on an approximate 14-acre industrial property that is utilized for paint, ceramics, and craft goods manufacturing and distribution. The Phase I ESA was conducted to evaluate the potential for Recognized Environmental Conditions (RECs) on and adjacent to the site for ongoing use of the property. Phase I ESA activities included reviewing historical and regulatory environmental data, conducting a site reconnaissance and preparing the Phase I ESA Report.

Lemoine Ranch Property Phase I ESA, Alturas, California: Provided project management for the completion of a Phase I ESA on an approximate 2,026-acre agricultural property that is utilized for cattle grazing. The Phase I ESA was conducted to evaluate the potential for RECs on and adjacent to the site for ongoing use of the property. Phase I ESA activities included reviewing historical and regulatory environmental data, conducting a site reconnaissance and preparing the Phase I ESA Report.

Former Richmond Hospital, Richmond, California: Provided project support for the completion of a Phase I Environmental Site Assessment (ESA) of the former Richmond Hospital for potential redevelopment. Ninyo & Moore conducted the Phase I ESA to evaluate the potential for Recognized Environmental Conditions (RECs) on or adjacent to the site. Phase I ESA Activities included reviewing historical and regulatory environmental data, conducting a site reconnaissance and preparing the Phase I ESA Report.

City of Sacramento, 3739 Marysville Boulevard Phase II ESA, Sacramento, California: Staff Environmental Scientist a Community Wide Assessment under an existing US EPA Brownfields grant. Review of historical information indicated the site was formerly a gasoline station and convenience store and a former dry cleaner was also identified on the adjacent parcel. Soil samples collected from beneath seven former USTs and the associated piping and dispensers indicated that an unauthorized release of petroleum hydrocarbons had occurred from the former fuel dispensing system. In 2018, Ninyo & Moore conducted a Phase I ESA on the site and the adjoining dry cleaner property. Results of the Phase I ESA, along with the results of the prior sampling and remediation were used to prepare a Sampling and Analysis Plan (SAP) for review by the RWQCB to conduct a Phase II ESA, which included installing and sampling 33 temporary soil gas samples, collecting soil samples from five soil borings, and collecting grab groundwater samples from three on-site borings.

Brandon S. Wilken, PG

Principal Geologist

EDUCATION

B.S., Geology, 1996, University of Nebraska-Lincoln

REGISTRATIONS/ CERTIFICATIONS

PG 7564 (California)

OSHA 8 hour Refresher

PROFESSIONAL AFFILIATIONS

California Groundwater Resource Association (GRA)

Geologic Society of America (GSA) – Hydrogeology Division

As a Principal Geologist for Ninyo & Moore, Mr. Wilken has 25 years of experience in the Environmental industry and started his career working in the field all over North America for a hard rock mineral exploration company. His experience in field geophysics led him to the contaminant assessment and remediation industry, providing professional geologic services including environmental hydrogeology, site investigation, remedial planning and implementation, health risk screening, due diligence, regulatory negotiations, and litigation support. Mr. Wilken has lead investigation and remediation projects driving risk-based solutions to successfully close environmental projects and reduce client's costs. He works closely with regulators, stakeholders, and clients to negotiate effective solutions utilizing sound science, strong technical expertise, and clear communication skills. Mr. Wilken has completed projects for a wide range of clients, including major oil companies, municipalities, manufacturing groups, and individual small business owners.

EXPERIENCE

Aerospace Manufacturing, Confidential Manufacturing Business, Torrance, California: Principal Geologist for the PFAS assessment at an operating Aerospace manufacturing facility. Assessed PFAS in soil, wastewater effluent, storm water, and groundwater by advancing five soil borings, installing three monitoring wells, collecting wastewater effluent, municipal water, and storm water samples. The data was compared, and recommendations were provided to the RWQCB.

Major Oil Company Refinery, Martinez, California: Principal Geologist for the environmental services at a 640-acre refining complex. The team is developing a PFAS assessment strategy for the facility to comply with a RWQCB request for assessment. Furthermore, the project team was planning to demolish an old wastewater treatment pond and developing a replacement treatment facility. Lastly the team operated, maintained, and optimized 27 groundwater extraction systems for contaminant plume control, to limit impacts to adjacent wetlands and surface water bodies.

S Street Redevelopment Project, Sacramento, California: Principal Geologist for the soil, soil vapor, and groundwater assessment and in situ ELSTM and zero valent iron injections to remediate site CVOC's. Assessment included advancement of soil borings, installation of groundwater monitoring and soil vapor wells, and routine sampling. Remedial activities included closing an UST in-place and injecting approximately 6,900 pounds of ELSTM and 58,000 pounds of zero valent iron into targeted areas. Interfaced with multiple stakeholders and agencies including property owner/client (Capitol Area Development Authority), City of Sacramento, RWQCB, and SCEMD.

Former Orchard Supply Facility, Sacramento, California: Principal Geologist for in situ EHC® injections to remediate site VOC's. Approximately 24,525 gallons of 30% EHC® slurry was injected into the subsurface; approximately 1,272 gallons of EHC® slurry was injected into the shallow zone aquifer; and approximately 23,253 gallons of EHC® slurry was injected into the deep zone aquifer. Interfaced with multiple stakeholders and agencies including property owner, client (Capitol Area Development Authority), DTSC, City of Sacramento, RWQCB, and SCEMD.

Stewart's Automotive, Sacramento, California: Principal Geologist for

Brandon S. Wilken
Principal Geologist

soil, soil vapor, and groundwater assessments, SVE system operation, and in situ EDS-ERTM and zero valent iron injections to remediate site CVOC's. Assessment included vertical delineation of groundwater, the installation of soil vapor wells, and routine sampling. Remedial activities included upgrading and operating an SVE system and the injection of approximately 31,900 pounds of EDS-ERTM; 19,900 pounds of mZVI; and 82 liters of KB-1 into targeted areas. Interfaced with multiple stakeholders and agencies including property owner/client, site tenant, City of Sacramento, Caltrans, RWQCB, and SCEMD.

Manufacturing Facilities, San Carlos, California: Principal Geologist and previous Senior Project Manager for assessment and remediation of PCBs and CVOCs at two adjacent manufacturing facilities. Project required managing corrective action account between two clients that at times had competing interests. Also, over saw the sale of one of the properties and the development of a plan to meet redevelopment goals which included a cap for PCBs, stormwater infrastructure decontamination, and other redevelopment activities.

Ecodyne Pond Site, Windsor, California: Principal Geologist for the assessment and remediation of a former wood treatment facility that utilized creosote and pentachlorophenol to treat lumber. The facility also had a lead dip-treatment tank for coating metal hardware. Brandon's team designed a remedial excavation to remove residual dioxin, lead, and poly aromatic hydrocarbons from soil at the site. The excavation extended offsite, which involved removing soil beneath a concrete-lined drainage ditch that conveyed stormwater from the site to a nearby creek. In addition, a natural gas transmission line was located approximately 2 to 4 feet below the grade of the drainage ditch. To minimize potential damage, Brandon's team worked closely with the owner of the natural gas line and excavated soil by hand digging around the natural gas line. The work was completed safely without incident. A total of 15,587 tons of non-hazardous and 6,411 tons of hazardous soil were excavated, and 4,718,739 gallons of water were extracted, and properly handled and disposed of offsite. The team also provided technical assistance to the client's legal team prior to and during remedial activities for several lawsuits related to the site. All lawsuits were resolved in our client's favor.

Ranch Headquarters, Woodland, California: Principal Geologist and previous Senior Project Manager for fixed fee remediation of a several acre light non aqueous phase liquid plume near a network of irrigation canals at an operating ranch/farm headquarters. He managed a cost cap and a pollution liability limit insurance policy to provide long term liability protection for the client. This project also utilized a land discharge permit obtained from the RWQCB to discharge treated groundwater from the multi-phase extraction treatment system. Successfully negotiated with the RWQCB to shut down and remove the remediation system after no reoccurrences of LNAPL were observed and approximately 1 month after the treatment system's mass removal rate went asymptotic. Post-remediation groundwater monitoring has ceased. He was working with the stakeholders to get a land covenant in place to facilitate case low threat case closure.

Former Paint Manufacturing Facility, San Leandro, California: Senior Project Manager for a former paint manufacturing facility contaminated with various chlorinated and non-chlorinated volatile organic compounds (VOCs). The project consisted of environmental investigations, agency liaison, and the operation and maintenance of a multi-phase extraction treatment system. The team successfully implemented a carbohydrate injection program, after active mechanical remediation reached asymptotic recovery, to increase the rate of reductive dechlorination to accelerate the timeframe to regulatory case closure.

Service Station Site, Fremont, California: Senior Project Manager for a service station that has petroleum hydrocarbons impacts in the first water-bearing zone, in an aquitard, and the Newark Aquifer. He was given this site to manage, and he completely reevaluated the conceptual site model during the production of a remedial action plan proposing the installation of multiple groundwater extraction recirculation wells screened in the Newark Aquifer. He convinced the client to not invest in the $1,800,000 remediation project and to challenge the regulatory agency. He was successful in negotiating with the regulatory agency that remediation in the drinking water aquifer was not necessary. Allowing the client to pursue a more cost feasible remedial solution.

Former Bulk Terminal, Rio Vista, California: Senior Project Manager for a former bulk terminal with LNAPL detections directly adjacent to the Sacramento River. The site had been utilized by many businesses in its history and the first known crude oil above ground storage tank (AST) was onsite as early as 1896. Defined the extent of hydrocarbons in soil and groundwater, including LNAPL plume. Planned and submitted a remedial excavation along the Sacramento River to the Army Corps of Engineers and received approval without further review. During negotiations with the RWQCB, successfully negotiated a soil cleanup goal of 1,000 milligrams per kilogram (mg/kg) total petroleum hydrocarbons (TPH), which saved the client hundreds of thousands of dollars in cleanup costs.

Mr. Wilken has lead investigation and remediation projects driving risk-based solutions to successfully close environmental projects and reduce client's costs. He works closely with regulators, stakeholders, and clients to negotiate effective solutions utilizing sound science, strong technical expertise, and clear communication skills. Mr. Wilken has completed projects for a wide range of clients, including, school districts and universities, municipalities, manufacturing groups, major oil companies, and individual small business owners.

REPRESENTATIVE EXPERIENCE

Judicial Council of California, San Francisco Civic Center Courthouse, Phase I ESA, San Francisco, California: Principal Geologist during a Phase I Environmental Site Assessment (ESA) on the San Francisco Civic Center Courthouse ito evaluate the suitability of the Site for facility improvements. The courthouse consisted of six floors including 33 courtrooms, judge's chambers, judge's conference room, staff offices, mechanical rooms, seven elevators, sheriff's offices, holding cells, bathrooms, and a cafeteria. A basement floor consisted of an underground parking area, a security room, maintenance supply room, and mechanical rooms. The Phase I ESA consisted of evaluating the Site's historical uses, past investigations, adjoining properties, utilities, occupants, regulatory database records, maps, city directories, as well as geography, topography, and hydrology, for recognized environmental conditions (RECs). Historical research revealed that the Site was developed sometime prior to the late 1880s with a residential building and several store buildings. Residential and store buildings, a warehouse, auto repair shop, fire station, gas station, office building, and parking lot were added and removed from the Site until the late 1990s, when all of the buildings were removed and replaced with the current municipal courthouse building. The Site had a leaking underground storage tank case in 1993 and 1994. No corresponding records for the former gasoline stations, or records indicating the type of leak, the contaminant of concern, the affected media, nor any environmental investigations, or remediation activities related to the leaking UST case were found. The lack of records for these items were considered a REC.

Smiling Monkey Ranch, Factory Road, Sunnyside, California: Principal Geologist during a Phase I ESA on the Smiling Monkey Ranch property located on Factory Road. We reviewed the historical aerial photographs, Sanborn fire insurance maps, topographic maps, city directories, as well as records in the State, County, and Local databases for the Site. We concluded that no evidence of RECs, HRECs, or CRECs were found. Concerning the agricultural history of the site, irrigated cultivated surficial soils can become contaminated with hazardous substances as a result of the application of agricultural chemicals. Certain organochlorine pesticides are persistent in the environment and residual pesticide concentrations in surface soils are consequently a possible contaminant on irrigated agricultural sites. We encountered no evidence during review of historic information suggesting that the site contained any agricultural chemicals mixing or staging area, or manufacturing

Brandon S. Wilken
Principal Geologist

or warehousing facility, where pesticide residuals in soils could accumulate at concentrations greater than those that can occur as a result of normal cultivated field applications. However, a pesticide/insecticide/fungicide storage shed was observed on the site during site reconnaissance, but no signs of leaks or spills were observed. Based on these circumstances, the health risk associated with former applications of agricultural chemicals to the property is likely low, and no further investigation for potential pesticides in soil is recommended at this time.

Robla School District, Bell Avenue Elementary School Phase I ESA, Sacramento, California: Principal Geologist during a DTSC compliant Phase I ESA for a site, which is located in a mixed residential/commercial land use area to assist Robla School District complete a redevelopment of the Site. Additionally, a supplemental evaluation to comply with the California Department of Education checklist requirements was completed. At the time of the Site reconnaissance, the Site was a portion of the Bell Avenue Elementary School campus. The Site was improved with a portable preschool and transitional Kindergarten classroom building consisting of 5 classrooms and an office. The classrooms were open floor plans with an attached bathroom, and the office included a reception area, offices, storage rooms, a staff kitchen, and bathrooms. Based on historical information compiled during this Phase I ESA, no evidence of Recognized Environmental Conditions (RECs), Historical RECs (HRECs), or Controlled RECs (CRECs) associated with the Site. No evidence of RECs was identified for the adjoining or nearby properties.

San Pablo Avenue, Phase I ESA, Berkeley, California: Principal Geologist during a Phase I Environmental Site Assessment (ESA) on the San Pablo Avenue property, which was developed with two 2-story apartment buildings and occupied by the tenants of the apartment buildings. Services included a site reconnaissance to visually and/or physically observe the interior and exterior of structures and other features on the site as well as visible exterior features of adjoining properties to identify areas of possibly contaminated surface soil or surface water, and possible risks of contamination from activities at the site and adjoining properties; review of reasonably ascertainable standard environmental record sources including federal, state, and tribal regulatory agency databases for the site and for properties located within a specified radius of the site; review of reasonably ascertainable additional environmental record resources including local records and/or additional state or tribal records for the site and for properties located within a specified radius of the site; review of reasonably ascertainable standard physical setting sources including a current United States Geological Survey (USGS) 7.5-minute topographic map, and possibly including USGS and/or state groundwater and geologic maps, and soil maps; performance of interviews with present owners, operators, and occupants of the site as well as other knowledgeable parties as appropriate; review of reasonably ascertainable standard historical sources including aerial photographs, historical fire insurance rate maps, topographic maps, and city directories, as available; performance of a preliminary vapor encroachment screening assessment on the site and adjoining properties; and preparation of an ESA report documenting the methodology, findings and opinions regarding RECs on and adjoining the site.

Judicial Council of California, Solano County Hall of Justice, Phase I ESA, Fairfield, California: Principal Geologist during a Phase I Environmental Site Assessment (ESA) on the Solano County Hall of Justice to evaluate the suitability of the Site. The property consisted of three separate Sites which included a parking lot associated with the adjacent Old Solano County Courthouse, a portion of the Solano County Justice Campus including the Solano County Courthouse, Fleet Services, and the UC Cooperative Agricultural Extension building, and a parking lot, and two vacant lots. The Phase I ESA consisted of evaluating the Site's historical uses, past investigations, adjoining properties, utilities, occupants, regulatory database records, maps, city directories, as well as geography, topography, and hydrology, for recognized environmental conditions (RECs). Historical research revealed that the Sites were developed sometime prior to the late 1880s with the old Solano County Jail, Union High School, and several commercial and residential buildings. By the late 1990s, the majority of the buildings had been removed and replaced with the current buildings. The parking associated with the adjacent Old Solano County Courthouse and the area of the old Solano County Jail, had two underground storage tanks (USTs) that were removed in the late 1990s. No corresponding confirmation sampling or regulatory closure letters related to the removal of the USTs were found. The lack of records for these items were considered a REC.

Manteca Unified School District, 4th Street, Phase I Environmental Site Assessment, French Camp, California: Principal Geologist during environmental services for two properties adjacent to the existing French Camp Elementary School property. The California Department of Education (CDE) Reports are required by the State of California for property that will be developed with school buildings. The CDE Checklist Reports included a Phase I Environmental Site Assessment (ESA), which consisted of evaluating the site's historical uses, past investigations, adjoining properties, utilities, occupants, regulatory database records, maps, city directories, as well as geography, topography, and hydrology, for recognized environmental conditions (RECs). The ESA concluded that no

Brandon S. Wilken
Principal Geologist

evidence of RECs were identified for the site. However, the power lines in the vicinity of the site were a maximum of 60 kV and are within 100 feet of the site, in violation of Title 5, Section 14010 of the California Code of Regulations (CCR).

SJ Distributors, Cold Producers Storage Facility, Environmental Site Assessment and UST Investigation, Fresno, California: Principal Geologist for a Phase I Environmental Site Assessment (ESA), a Limited Phase II ESA, and an additional investigation to verify the potential presence of underground storage tanks (USTs) for a Cold Producers Storage Facility. Based on information reviewed during preparation of the Phase I ESA, the site had a 12,800-gallon and a 7,775-gallon oil underground storage tank (UST) depicted on a 1918 Sanborn Fire Insurance Map of the site. Review of historical information and agency records did not provide any details as to the disposition of the two USTs, therefore, a Limited Phase II ESA to assess the potential presence of USTs was recommended.

Santa Clara County Facilities and Fleet Department and Parks and Recreation On Call Environmental Service Contract, Santa Clara County, California: Technical Advisor for two On-Call Environmental Services contracts with separate Santa Clara County Agencies, including the Facilities and Fleet Department and the Department of Parks and Recreation. Our contract with the Facilities and Fleet Department (FFD) is mainly for conducting Phase I and Phase II ESAs on properties that the County is interested in purchasing. The types of properties that interest the FFD are generally commercial properties; however, in some cases the FFD has expressed interest in properties that have been involved in light industrial and manufacturing. The Phase I ESAs conducted for the FFD following of the Phase I ESA ASTM E1527-13 guidelines, which includes a review of historical and regulatory documents and databases, a site reconnaissance, interviews with persons associated and familiar with the property, and preparation of the Phase I ESA report. We have also conducted Phase II ESAs for the FFD, and our services have included soil, soil vapor and groundwater sampling, analysis, and reporting and regulatory agency correspondence. Our Phase I ESAs prepared for the Parks and Recreation District (PRD) have a much broader scope due to the rural nature of the properties the County is interested in purchasing for either new park lands, or augmenting current park properties. As part of Santa Clara County's Charter Park Fund, they have been provided $72 million for park land acquisition until the year 2026. Most of the sites we have investigated as part of our contract with the PRD were either vacant properties with limited historical site use or cattle ranches.

Robla School District, Bell Avenue Elementary School, Sacramento, California: Principal Geologist during a Phase I Environmental Site Assessment (ESA) for a site located in a mixed residential/commercial land use area at the corner of Bell Avenue and Pinell Street to assist Robla School District complete a redevelopment of the Site. At the time of the Site reconnaissance, the Site was a portion of the Bell Avenue Elementary School campus. The Site was improved with a portable preschool and transitional-Kindergarten classroom building consisting of 5 classrooms and an office. The classrooms were open floor plans with an attached bathroom, and the office included a reception area, offices, storage rooms, a staff kitchen, and bathrooms. Historical research revealed that the Site was vacant land from sometime prior to 1891 until the late 1960s, when the current portable classroom building was constructed on the Site. No significant changes have occurred on the Site since the late 1960s. The Site has historically been occupied by the Robla School District as the Robla Pre-School. Based on the information compiled during this Phase I ESA, no evidence of Recognized Environmental Conditions (RECs), Historical RECs (HRECs), or Controlled RECs (CRECs) associated with the Site. No evidence of RECs was identified for the adjoining or nearby properties.

Appendix B -

Assessor's Information and Questionnaires

Site Name: African American Holistic Resource Center
Site Address: 1890 Alcatraz Ave. Berkeley, CA

Type of Business: Health Clinic and Community Center
Current Owner: City of Berkeley
Dates of Ownership: 1974 to present
Previous Owner: Joseph and Jeanne Landisman
Dates of Ownership: 1968 to 1974
Type(s) of Business: unknown
Date of Original Construction of Site Building(s): 1958

BACKGROUND & USE

What is the current use of the property?

	Hotel/Motel		Industrial/Storage/Warehouse: Type:
	Warehouse (type):		Vacant Land/Farming/Agricultural/Cattle Grazing
	Office		Multi-Family Residential
	Retail	x	Other: vacant

What is the intended future use of the property? Health Clinic and Community Building

Site Tenant History

Year(s)	Tenant / Type of Business
1936-1958	Gas service station
1958-1968	Wholesale refrigeration equipment sales
1968-1972	unknown
1972-1982	Young Adult Program/Community Resources Office
1982-2023	Various health organizations

Please fill in the following information regarding the site utilities, as appropriate and indicate the date service was originally initiated/installed:

Water Provider: EBMUD
Sewer Provider: EBMUD
Electrical Provider: PG&E
Natural Gas Provider: PG&E

Is the property currently used, or previously been used, for an industrial or manufacturing operation, as a gasoline station, a motor repair facility, a commercial printing facility, a dry cleaners, a photo developing laboratory, a junkyard or a landfill, or as a waste treatment, storage, disposal, processing or recycling facility?

x Yes Type: gas station
___ No
___ Unknown

Has the facility or the property ever generated, treated, stored, transported or disposed of hazardous waste or hazardous substances other than on an incidental basis? Are waste manifest forms available?

___ Yes Description:_____
___ No
_X_ Unknown

Have any demolition debris, hazardous substances, petroleum products, unidentified waste materials, automotive or industrial batteries, tires, trash or refuse been dumped, buried and/or burned on the property?

___ Yes Description:_____
___ No
_X_ Unknown

TANKS (fuel tanks, oil tanks, etc)

Are there currently, or have there been previously, any underground storage tanks on the property such as gasoline/diesel fuel tanks, waste oil tanks?

___Yes _____ No _X_Unknown

If YES, please provide number, size, age of tanks

Tanks_____ Size_____ Contents_____ Age_____
Tanks_____ Size_____ Contents_____ Age_____
Tanks_____ Size_____ Contents_____ Age_____
Tanks_____ Size_____ Contents_____ Age_____

Has there ever been a reported or unreported release or spill (including failed leak tests) from the tank? (If YES, provide details).

___Yes _____ No _X_Unknown

Are there currently, or have there been previously, any above ground storage tanks on the property?

___Yes _____ No _X_Unknown

If YES, please provide number, size, age of tanks

Tanks_____ Size_____ Contents_____ Age_____
Tanks_____ Size_____ Contents_____ Age_____
Tanks_____ Size_____ Contents_____ Age_____
Tanks_____ Size_____ Contents_____ Age_____

Has there ever been a reported or unreported release or spill (including failed leak tests) from the tank? (If YES, provide details).

___Yes _____ No _X_Unknown

Has there ever been a reported or unreported release or spill from the tank? (If YES, provide details).

___Yes _____ No _X_Unknown

Details:_____

_____

UTILITIES/DISCHARGES

Is the property served, or has the property been served, by a private water well?

___Yes _____ No ___X___Unknown

If yes, is groundwater under the property used as a source of drinking water?

___Yes _____ No ___Unknown

Has the water from the well ever been tested? (If YES, please provide test results)

___Yes _____ No ___Unknown

Has the well water been identified as contaminated by any governmental agency?

___Yes _____ No ___Unknown

Are there any groundwater monitoring wells or irrigation wells on the property?

___Yes _____ No ___X___Unknown

If Yes, how many____ and when were they installed?_____

Does the property discharge waste water, or storm water into a municipal sanitary sewer system? If Yes, does the facility discharge under an NPDES Permit or Waste Discharge Permit?

___X___Yes _____ No ___Unknown Permit Number/Agency:_____

Are there any current or previous sumps used for waste-water collection/treatment on the property?

___Yes ___X___ No ___Unknown

Are there any septic systems, dry wells or leach fields on the property?

___Yes _____ No ___X___Unknown If Yes, Where?:_____

ENVIRONMENTAL COMPLIANCE

Is there knowledge of environmental liens or governmental notification or involvement relating to past or current use or disposal of hazardous substances?

___Yes ___X___ No ___Unknown

Is there any environmental litigation, administrative action or cleanup action involving the property related to a release or threatened release of any hazardous substance or petroleum product?

___Yes ___X___ No ___Unknown

Has the property or related facilities or operations ever been the subject of enforcement actions by governmental authorities resulting in penalties of any kind?

___Yes ___X___ No ___Unknown

ENVIRONMENTAL CONDITIONS

Has groundwater or soils on the property ever been tested?

___Yes __X__ No ___Unknown

If Yes, provide details:

_____

Have any contaminants been identified which exceed standards or guidelines levels?

___Yes __X__ No ___Unknown

If Yes, provide details:

_____

BUILDING CONDITIONS

What is/are the age of the structure(s)? Built in 1958.

Have any major renovations been completed and if so, describe type and when completed:

Yes, 1989

Has an asbestos and/or lead-based paint survey been performed on the site structure(s)?

__X__ Yes ____ No ___Unknown

If Yes, was asbestos containing materials identified?

__X__ Yes ____ No

If Yes, was lead-based paint present identified?

___Yes ____ No

PHASE I ESA/AAI REQUIREMENTS

According to the All Appropriate Inquiry (AAI, 40 CFR 312) requirements and ASTM (E 1527-21) guidance on conducting Phase I Environmental Site Assessments, the "user" of the assessment must provide the following information, if available, to the environmental professional in order to qualify for Landowner Liability Protections (LLPs) offered by the Small Business Liability Relief and Brownfields Revitalization Act of 2001. Please check yes or no and provide any additional information you may have regarding the site. Failure to provide this information could result in a determination that "all appropriate inquiry" is not complete.

(1) Environmental cleanup liens that are filed or recorded against the site (40 CFR 132.25).
Are you aware of any environmental cleanup liens against the property that are filed or recorded under federal, tribal, state, or local law?

☐ Yes ☑ No

If yes, please explain:

(2) Activity and land use limitations that are in place on the site or that have been filed or recorded in a registry (40 CFR 312.26).
Are you aware of any activity use limitations (AULs), such as engineering controls, land use restrictions, or institutional controls that are in place at the site and/or have been filed or recorded in a registry under federal, tribal, state or local law?

☐ Yes ☑ No

If yes, please explain:

(3) Specialized knowledge or experience of the person/department requesting the Phase I ESA and seeking to qualify for the landowner liability protections (40 CFR 312.28).
As the user of this ESA, do you have any specialized knowledge or experience related to the property or adjoining properties? For example, are you involved in the same line of business as the current or former occupants of the property or an adjoining property so that you would have specialized knowledge of the chemicals and processes used by this type of business?

☐ Yes ☑ No

If yes, please explain:

(4) Relationship of the purchase price to the fair market value of the property, if it were not contaminated (40 CFR 312.29).
Does the purchase price offered for this property reasonably reflect the fair market value of the property? If there is a difference between the purchase price and the fair market value, have you considered whether the lower purchase price is because contamination is known or believed to be at the property?

Please discuss: no property transaction planned

(5) Commonly known or reasonably ascertainable information about the property (40 CFR 312.30).
Are you aware of commonly known or reasonably ascertainable information about the property that would help the environmental professional to identify conditions indicative of releases or threatened releases? For example, as user,
(a) Do you know the past uses of the property? yes
(b) Do you know of specific chemicals that are present or once were present at the property? no
(c) Do you know of spills or other chemical releases that have taken place at the property? no
(d) Do you know of any environmental cleanups that have taken place or are ongoing at the property? no

☐ Yes ☑ No

If yes, please explain:

(6) The degree of obviousness of the presence or likely presence of contamination at the property and the ability to detect the contamination by appropriate investigation (40 CFR 312.31).
As the user of this ESA, based on your knowledge and experience related to the property, are there any obvious indicators that point to the presence or likely presence of contamination at the property?

☑ Yes ☐ No

If yes, please explain: Former use of property as gas station

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E1527 - 21), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E2247 - 16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E1528 - 22) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE: SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

A review of the SEMS-ARCHIVE list, as provided by EDR, and dated 12/19/2024 has revealed that there

is 1 SEMS-ARCHIVE site within approximately 0.5 miles of the target property.

Lists of Federal RCRA generators

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 09/16/2024 has revealed that there is 1 RCRA-LQG site within approximately 0.25 miles of the target property.

6 UNIT COMPLEX EPA ID:: CAP000216853	***818 61ST STREET***	***SW 1/8 - 1/4 (0.197 mi.)***	***46***	***181***

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 09/16/2024 has revealed that there are 3 RCRA-SQG sites within approximately 0.25 miles of the target property.

EXECUTIVE SUMMARY

RCRA-VSQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

A review of the RCRA-VSQG list, as provided by EDR, and dated 09/16/2024 has revealed that there is 1 RCRA-VSQG site within approximately 0.25 miles of the target property.

Lists of state- and tribal (Superfund) equivalent sites

RESPONSE: Identifies confirmed release sites where DTSC is involved in remediation, either in a lead or oversight capacity. These confirmed release sites are generally high-priority and high potential risk.

A review of the RESPONSE list, as provided by EDR, has revealed that there is 1 RESPONSE site within approximately 1 mile of the target property.

Lists of state- and tribal hazardous waste facilities

ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the ENVIROSTOR list, as provided by EDR, and dated 10/21/2024 has revealed that there are 7 ENVIROSTOR sites within approximately 1 mile of the target property.

Lists of state and tribal leaking storage tanks

LUST: Leaking Underground Storage Tank (LUST) Sites included in GeoTracker. GeoTracker is the Water Boards data management system for sites that impact, or have the potential to impact, water quality in California, with emphasis on groundwater.

A review of the LUST list, as provided by EDR, has revealed that there are 22 LUST sites within approximately 0.5 miles of the target property.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Lists of Hazardous waste / Contaminated Sites

HIST Cal-Sites: Formerly known as ASPIS, this database contains both known and potential hazardous substance sites. The source is the California Department of Toxic Substance Control. No longer updated by the state agency. It has been replaced by ENVIROSTOR.

A review of the HIST Cal-Sites list, as provided by EDR, and dated 08/08/2005 has revealed that there is 1 HIST Cal-Sites site within approximately 1 mile of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 09/16/2024 has revealed that

EXECUTIVE SUMMARY

there are 49 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

PFAS ECHO: Regulators and the public have expressed interest in knowing which regulated entities may be using PFAS. EPA has developed a dataset from various sources that show which industries may be handling PFAS. Approximately 120,000 facilities subject to federal environmental programs have operated or currently operate in industry sectors with processes that may involve handling and/or release of PFAS.

A review of the PFAS ECHO list, as provided by EDR, and dated 12/30/2024 has revealed that there is 1 PFAS ECHO site within approximately 0.25 miles of the target property.

UST FINDER RELEASE: US EPA's UST Finder data is a national composite of leaking underground storage tanks. This data contains information about, and locations of, leaking underground storage tanks. Data was collected from state sources and standardized into a national profile by EPA's Office of Underground Storage Tanks, Office of Research and Development, and the Association of State and Territorial Solid Waste Management Officials.

A review of the UST FINDER RELEASE list, as provided by EDR, and dated 06/08/2023 has revealed that there are 19 UST FINDER RELEASE sites within approximately 0.5 miles of the target property.

E MANIFEST: EPA established a national system for tracking hazardous waste shipments electronically. This system, known as ?e-Manifest,? will modernize the nation?s cradle-to-grave hazardous waste tracking process while saving valuable time, resources, and dollars for industry and states.

A review of the E MANIFEST list, as provided by EDR, and dated 09/16/2024 has revealed that there are 33 E MANIFEST sites within approximately 0.25 miles of the target property.

EXECUTIVE SUMMARY

DRYCLEANERS: A list of drycleaner related facilities that have EPA ID numbers. These are facilities with certain SIC codes: power laundries, family and commercial; garment pressing and cleaners' agents; linen supply; coin-operated laundries and cleaning; drycleaning plants except rugs; carpet and upholster cleaning; industrial launderers; laundry and garment services.

A review of the DRYCLEANERS list, as provided by EDR, has revealed that there are 2 DRYCLEANERS sites within approximately 0.25 miles of the target property.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR Hist Cleaner: EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Cleaner list, as provided by EDR, has revealed that there is 1 EDR Hist Cleaner site within approximately 0.125 miles of the target property.

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Hazardous Waste Summary:
Waste Code: D002
Waste Description: Corrosive Waste

Waste Code: F002
Waste Description: The Following Spent Halogenated Solvents: Tetrachloroethylene,

MONSEN SILVERSMITHS (Continued) **1000379853**

Methylene Chloride, Trichloroethylene, 1,1,1-Trichloroethane, Chlorobenzene, 1,1,2-Trichloro-1,2,2-Trifluoroethane, Ortho-Dichlorobenzene, Trichlorofluoromethane, And 1,1,2, Trichloroethane; All Spent Solvent Mixtures/Blends Containing, Before Use, A Total Of Ten Percent Or More (By Volume) Of One Or More Of The Above Halogenated Solvents Or Those Solvents Listed In F001, F004, And F005; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

Waste Code: F006
Waste Description: Wastewater Treatment Sludges From Electroplating Operations, Except From The Following Processes: (1) Sulfuric Acid Anodizing Of Aluminum; (2) Tin Plating On Carbon Steel; (3) Zinc Plating (Segregated Basis) On Carbon Steel; (4) Aluminum Or Zinc-Aluminum Plating On Carbon Steel; (5) Cleaning/Stripping Associated With Tin, Zinc, And Aluminum Plating On Carbon Steel; And (6) Chemical Etching And Milling Of Aluminum.

Waste Code: F008
Waste Description: Plating Bath Residues From The Bottom Of Plating Baths From Electroplating Operations In Which Cyanides Are Used In The Process.

Site History:	Alameda County Environmental Health Department (ACEHD) is the lead regulatory agency for oversight of investigation and cleanup of the subject property (the "Site") for the Cleanup Program Site (CPS) Case (the "Case") under a Voluntary Remedial Action Agreement (VRAA) executed on April 11, 2024 between ACEHD and 3370 Adeline LLC. The Site was referred to ACEHD by the City of Berkeley Toxics Management Department (the lead agency for oversight of closure of the former plating facility at the Site) in February 2024 based on a history of discharge violations including plating bath tanks plumbed directly into the sanitary sewer and illegal disposal of solid hazardous waste at the City Transfer Station. The VRAA was executed with the new property owners, due to historical land use as a metal finishing and repair business that operated at the Site from 1904 to 2023. The Site formerly housed plating room, spray room, storage room adjacent to plating room, exterior drain collector in back, and sump pump basin.

MONSEN SILVERSMITHS (Continued) **1000379853**

Based on review of available documents in the Case record, ACEHD has determined that additional investigation is warranted due to the historic presence of the former plating shop infrastructure, poor housekeeping and violations associated with hazardous materials storage and use including past unauthorized chemical discharges/disposal to the sanitary sewer.

FINDS:
Registry ID: 110002763787

Click Here for FRS Facility Detail Report:

Environmental Interest/Information System:
All generators and treatment, storage, and disposal (TSD) facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years. The data collected is used to create the National Biennial Resource Conservation and Recovery Act (RCRA) Hazardous Waste Report. This data is processed within the RCRA Information (RCRAInfo) database
The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS),EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), andToxic Release Inventory (TRI).
The National Pollutant Discharge Elimination System (NPDES) module of the Integrated Compliance Information System (ICIS). Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.
California's Hazardous Waste Tracking System Data Mart (HWTS-DATAMART) provides information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

Registry ID: 110071682113

Citation: HSC 6.95 Multiple - California Health and Safety Code, Chapter 6.95, Section(s) Multiple
Violation Description: Business Plan Program - Training - General
Violation Notes: Returned to compliance on 10/29/2014. business submitted proof of training for staff and used oil disposal records.
Violation Division: Berkeley City Toxics Management Division
Violation Program: HMRRP
Violation Source: CERS,

Site ID: 74864
Site Name: THE BUSLAB
Violation Date: 09-15-2020
Citation: 40 CFR 1 265.31 - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 265.31
Violation Description: Failure to maintain and operate the facility to minimize the possibility of a fire, explosion, or any unplanned sudden or non-sudden release of hazardous waste or hazardous waste constituents to air, soil, or surface water which could threaten human health or the environment.
Violation Notes: Returned to compliance on 10/16/2020. Observation: Secondary containment is degraded and filled with waste. Paved outdoor area around waste storage is stained with oil. Waste oil is sitting on lids of waste drums, and drums are left open when not actively adding waste. Metal waste oil filters are present in secondary containment structure. This is a repeat violation for The Buslab. Corrective Action: Drain secondary containment of waste and re-evaluate efficacy and structural integrity, and submit proof to TMD. Keep all containers closed when not in use, keep secondary containment area waste-free, and ensure waste hauler does not spill waste during removal.

Eval General Type: Compliance Evaluation Inspection
Eval Date: 10-29-2021
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: Toxics Management Division (TMD) was on site to conduct an unannounced, routine inspection of the Hazardous Materials Business Plan (HMBP), Hazardous Waste (HW), and Stormwater (SW) program elements. TMD met with facility representative Adrian Migotti. TMD observed Emergency Response Posting, Site Map posted in facility, and fire extinguishers current as of April 2021. Hazardous waste manifests were made readily available to the inspector. Per operator, oily rags are laundered. Per operator, mop water is disposed of into oily water drum. Per operator, no paper oil filter waste is generated because paper filters are not used in the specific types of cars serviced at this facility. TMD observed - 2x 55gal waste oil - 2x 55gal waste coolant - 2x 55gal waste oily water - 1x 55gal waste metal filters

Eval Program: HMRRP
Eval Source: CERS,

Eval General Type: Compliance Evaluation Inspection
Eval Date: 06-11-2014
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: Facility claimed informal training but was unable to provide documentation.
Eval Division: Berkeley City Toxics Management Division
Eval Program: HMRRP
Eval Source: CERS,

Eval General Type: Compliance Evaluation Inspection
Eval Date: 09-15-2020
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: Employee training records were not available at time of inspection. TMD observed First Aid Kit and Fire Extinguishers current as of April 2020. Air compressor on-site to power pneumatic machines. In CERS, the Site Map is accurate and the inventory is reflective of on-site storage, but inventory needs to be updated to utilize the newly adopted federal hazard categories. CERS inventory accurately reflects the materials observed on-site. TMD observed: - 10gal~ of aerosol cans in cabinet - 7 55gal waste drums outdoors (unlabeled) including 1 used oil filter drum - lead acid batteries (new and used) - ~25 gal transmission fluid - 1x oxygen cylinder, 1x acetylene cylinder, 2x argon cylinder - 2x 30gal~ motor oil - 75gal~ antifreeze

Environmental Interest/Information System:
All generators and treatment, storage, and disposal (TSD) facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years. The data collected is used to create the National Biennial Resource Conservation and Recovery Act (RCRA) Hazardous Waste Report. This data is processed within the RCRA Information (RCRAInfo) database
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Claim Number:	19781
Claim Status:	Active
Site History:	On October 1, 2009, three 2,000-gallon gasoline, two 1,000-gallon gasoline, and one 55-gallon waste oil underground storage tanks were removed from the site. Following UST removal activities, compliance soil samples were collected from the excavations at the site. Total petroleum hydrocarbons as gasoline and diesel were detected from previous release of gasoline and diesel fuel. A work plan to define the extent of contamination on and off-site has been requested. Not all historic documents for the fuel leak case may be available on GeoTracker. A more complete historic case file for this site is located on the Alameda County Environmental Health website at:

comments from the public prior to the start of potential case closure notification process that appear to identify possible data gaps. ACEH will review the data prior to proceeding.

Claim Number:	20265
Claim Status:	Active
Site History:	The Site consists of an automotive repair facility that previously housed two fuel underground storage tanks (USTs) and dispensers for retail fuel sales. In 1986, the two USTs and dispensers were removed from the Site. On June 3, 2006, three soil borings were drilled by Pangea at the site to determine the extent of soil and groundwater impact. Up to 3,000 milligrams per kilogram (mg/kg) total petroleum hydrocarbons as gasoline and 850 mg/kg TPH diesel were detected in soil samples. Groundwater at the Site was monitored between 2015 to 2023, via a network of five monitoring wells. a Corrective Action Plan (CAP) was prepared in 2022, which proposed excavation to remove petroleum impacted soil up to 13 feet below the ground surface at the

AUTOMASTERS (Continued) **S108277093**

Site. Beginning in September of 2023, the Site was excavated in an area of approximately 1,300 square feet between 12 to 13 feet bgs resulting in the removal of more than 675 tons of soil (approximately 600 cubic yards) which was transported to Hay Road Landfill. During the excavation, a 550-gallon single walled steel UST was uncovered, removed and disposed, and soil beneath the UST was excavated to 12 feet bgs. Based on the Case record of soil investigations, virtually all soil containing residual concentrations of TPH-g greater than 100 mg/kg within the confines of the property line was excavated. The excavation was backfilled with controlled density fill and resurfaced with a two-inch thick asphalt pad.

Environmental Interest/Information System:
THE EMISSION INVENTORY SYSTEM (EIS) MAINTAINS AN INVENTORY OF LARGE STATIONARY SOURCES AND VOLUNTARILY-REPORTED SMALLER SOURCES OF AIR POINT POLLUTANT EMITTERS. IT CONTAINS INFORMATION ABOUT FACILITY SITES AND THEIR PHYSICAL LOCATION, EMISSIONS UNITS, EMISSIONS PROCESSES, RELEASE POINTS, CONTROL APPROACHES, AND REGULATIONS. FACILITY INVENTORY DATA ARE KEPT SEPARATE FROM THE EMISSIONS DATA AND HAVE STABLE IDENTIFIERS TO IMPROVE CONTINUITY FROM YEAR TO YEAR AND TO HELP IDENTIFY DUPLICATE OR MISSING FACILITIES
The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS),EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), andToxic Release Inventory (TRI).
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.
California's Hazardous Waste Tracking System Data Mart (HWTS-DATAMART) provides information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

CERS HAZ WASTE:
Name: ROCKRIDGE TWO WHEELS
Address: 6432 SHATTUCK AVE
City,State,Zip: OAKLAND, CA 94609
Site ID: 148884
CERS ID: 10407172
CERS Description: Hazardous Waste Generator

Violations:
Site ID: 148884
Site Name: Rockridge Two Wheels
Violation Date: 05-05-2023
Citation: HSC 6.5 25123.3(h)(1) - California Health and Safety Code, Chapter 6.5, Section(s) 25123.3(h)(1)
Violation Description: Failure to send hazardous waste offsite for treatment, storage, or disposal of acute/extremely hazardous waste after the first 1-kilogram threshold amount was accumulated within a 90 day period.
Violation Notes: Returned to compliance on 08/22/2023. Owner/Operator who is a generator of <100 kg/mth failed to send hazardous waste offsite for treatment, storage, or disposal within 180/270 days of accumulating 100 kilograms, or within 90 days of accumulating 1 kg of extremely/acutely hazardous waste. The facility had used oil on site longer than 180 days. Dispose of hazardous waste and submit a copy of the manifest/receipt to the CUPA. Ensure that hazardous waste is not stored for more than 180/270 days after the accumulation period begins, and that acute/extremely hazardous waste is not stored for more than 90 days after accumulating 1 kilogram.
Violation Division: Alameda County Environmental Health
Violation Program: HW
Violation Source: CERS,

Site ID: 148884
Site Name: Rockridge Two Wheels
Violation Date: 06-13-2016
Citation: HSC 6.95 25508(a)(1) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(1)
Violation Description: Failure to complete and electronically submit a business plan when storing/handling a hazardous material at or above reportable quantities.
Violation Notes: Returned to compliance on 06/29/2016.

Environmental Interest/Information System:
THE EMISSION INVENTORY SYSTEM (EIS) MAINTAINS AN INVENTORY OF LARGE STATIONARY SOURCES AND VOLUNTARILY-REPORTED SMALLER SOURCES OF AIR POINT POLLUTANT EMITTERS. IT CONTAINS INFORMATION ABOUT FACILITY SITES AND THEIR PHYSICAL LOCATION, EMISSIONS UNITS, EMISSIONS PROCESSES, RELEASE POINTS, CONTROL APPROACHES, AND REGULATIONS. FACILITY INVENTORY DATA ARE KEPT SEPARATE FROM THE EMISSIONS DATA AND HAVE STABLE IDENTIFIERS TO IMPROVE CONTINUITY FROM YEAR TO YEAR AND TO HELP IDENTIFY DUPLICATE OR MISSING FACILITIES
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.
California's Hazardous Waste Tracking System Data Mart (HWTS-DATAMART) provides information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

site. Tank Removal Report indicates minor TPH impact to soil. A total of three soil samples were taken during the May 1985 UST removal: one beneath each of the two USTs and one below the product piping. Each

SHATTUCK IMPORT SERVICE (Continued) **S101624463**

soil sample was analyzed only for the volatile organic compounds (VOCs): benzene, toluene, and xylenes (BTX). Benzene was detected in all three soil samples, up to a maximum of 0.47 mg/kg, exceeding the benzene residential and commercial Environmental Screening Levels (ESLs) of 0.044 milligrams per kilogram (mg/kg) (San Francisco Bay Regional Water Quality Control Board, Table A ESLs for Shallow Soil, Groundwater is Current or Potential Source of Drinking Water, December 2013). Toluene and total xylenes detections for the UST samples were less than the ESLs. Xylenes were detected in the product piping soil sample up to 26 mg/kg exceeding the ESL of 2.3 mg/kg. Depth to groundwater ranged from approximately 2.9 to 8.6 feet below ground surface (bgs) in groundwater monitoring wells at neighboring Fuel Leak Case RO0003066. During the UST removal, groundwater was observed at 95 inches (7.9 feet) bgs and rising in the UST pit. Similarly, during the UST removal at neighboring Fuel Leak Case RO0003066, groundwater was observed in the UST pit at 11 feet bgs. Holes were observed in the product piping, but the USTs appeared to be intact and no odors or sheen were observed in the UST pit water. The primary source (two USTs and product piping) was removed and impacted soils aerated onsite for two weeks to reduce potential concentrations. MTBE was not an analyte during the UST removal. However, analytical results from three groundwater monitoring wells at neighboring downgradient Fuel Leak Case RO0003066, 330 feet southwest of the site, were historically non-detect for TPHg, BTEX, and MTBE, suggesting a lack of impact from a potential contaminant plume emanating from RO0003045. The UST and product piping removal (source removal), the lack of VOCs detected during the source removal, the onsite aeration of backfill, and the lack of downgradient off-site impact to neighboring Fuel Leak Case RO0003066 are lines of evidence that support probable low residual source mass and low potential impact to groundwater and vapor intrusion to indoor air. The primary source (two USTs and product piping) was removed and excavated backfill was aerated onsite for two weeks to reduce potential concentrations prior to use as UST backfill in addition with clean fill material. Volatiles (benzene, toluene, and xylenes) in the three soil samples do not support the presence of a source mass with adequate magnitude or lateral extent to suspect a vapor intrusion risk. Ethylbenzene was not analyzed in soil for the tank removal. Ethylbenzene concentrations theoretically would be less than benzene concentrations based on average weight percent composition of gasoline. The State Water Resource Control Board s Leaking Underground Fuel Tank Guidance Manual CA LUFT (September 2012) indicates that fresh gasoline contains an average of 1.7% by weight of ethylbenzene and an average of 2.0% by weight of benzene. Because benzene concentrations did not exceed the LTCP Table 1 Criteria, it is expected that ethylbenzene concentrations, if present, would similarly not exceed the LTCP Table 1 Criteria. Naphthalene was not included in the analysis of soil samples collected at the site. This apparent data gap can be addressed using the published relative concentrations of naphthalene and benzene in gasoline. This approach has been used by SWRCB staff in recent Closure Orders pursuant to the Policy (e.g., SWRCB WQ Order 2013-0003): Gasoline mixtures contain an average of approximately 2% benzene and 0.25% naphthalene (Potter and Simmons 1998); therefore, benzene concentrations can be directly substituted for naphthalene concentrations with a safety factor of about 10. The maximum benzene concentrations from the Site are less than the naphthalene criteria in Table 1 of the Policy. Therefore,

SHATTUCK IMPORT SERVICE (Continued) **S101624463**

the estimated naphthalene concentrations at the Site meet the Policy criteria for direct contact by a factor of about 10. It is highly unlikely that naphthalene concentrations in the soil, if any, exceed the Policy criteria. Soil samples were not analyzed for PAHs as there was no waste oil UST.

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Environmental Interest/Information System:
The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California

Environmental Reporting System (CERS),EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), andToxic Release Inventory (TRI).
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.
California's Hazardous Waste Tracking System Data Mart (HWTS-DATAMART) provides information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

Site ID:	136495
Site Name:	MOTOR CITY AUTOMOTIVE
Violation Date:	02-26-2023
Citation:	HSC 6.5 25123.3(h)(1) - California Health and Safety Code, Chapter 6.5, Section(s) 25123.3(h)(1)
Violation Description:	Failure to send hazardous waste offsite for treatment, storage, or disposal within 180 days (or 270 days if waste is transported over 200 miles) for a generator who generates less than 1000 kilogram per month if all of the following conditions are met: (1) The quantity of hazardous waste accumulated onsite never exceeds 6,000 kilograms. (2) The generator complies with the requirements of 40 Code of Federal Regulations section 262.34(d), (e) and (f). (3) The generator does not hold acutely hazardous waste or extremely hazardous waste in an amount greater than one kilogram for more than 90 days.
Violation Notes:	Observation: Used oil, waste coolant, waste aerosols, and waste oil filters have been on-site for longer than 180 days. Corrective Action: Ship waste off-site, email photo of manifest to TMD within 30 days.
Violation Division:	Berkeley City Toxics Management Division

Violation Source: CERS,

Site ID: 136495
Site Name: MOTOR CITY AUTOMOTIVE
Violation Date: 01-27-2017
Citation: HSC 6.5 25244.19 - California Health and Safety Code, Chapter 6.5, Section(s) 25244.19
Violation Description: Failure of a generator to conduct, when required, a source reduction evaluation review and plan every four years, and/or failure of the review and plan to contain all required information.
Violation Notes: Returned to compliance on 05/08/2017.
Violation Division: Berkeley City Toxics Management Division
Violation Program: HW
Violation Source: CERS,

Site ID: 136495
Site Name: MOTOR CITY AUTOMOTIVE
Violation Date: 02-26-2023
Citation: 22 CCR 15 66265.32 - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.32
Violation Description: Failure of the facility to maintain the following emergency equipment or equivalents: 1) An internal communications or alarm system; 2) A device, such as a telephone (immediately available at the scene of Operations/ Maintenance) or a hand-held two-way radio, capable of summoning emergency assistance from local police departments, fire departments, or State or local emergency response teams; 3) Portable fire extinguishers, fire control equipment, spill control equipment, and decontamination equipment; and 4) Water at adequate volume and pressure to supply water hose streams, or foam producing equipment, or automatic sprinklers, or water spray systems.
Violation Notes: Observation: Fire extinguisher was last serviced in October 2020, but requires annual servicing. Corrective Action: Service fire extinguisher, submit photo to TMD via email within 30 days.
Violation Division: Berkeley City Toxics Management Division
Violation Program: HW
Violation Source: CERS,

Site ID: 136495
Site Name: MOTOR CITY AUTOMOTIVE
Violation Date: 02-26-2023
Citation: HSC 6.95 25508(a)(3) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(3)
Violation Description: Failure to establish and electronically submit an adequate emergency response plan and procedures for a release or threatened release of a hazardous material.
Violation Notes: Returned to compliance on 05/04/2023. Observation: CERS submittal has outdated Emergency Response form with outdated phone number for Office of the State Fire Marshal. Operator completed new form, TMD uploaded form for operator. Corrective Action: Hit submit in CERS within 30 days.

Site History:	Alameda County Department of Environmental Health (ACDEH) has been providing regulatory environmental oversight for the investigation and cleanup activities associated with Cleanup Site Program Case No. RO0003442 since August 2020 subsequent to referral by the City of Berkeley Planning and Building Department. To redevelop the Site, environmental investigations are required to evaluate impacts to the subsurface from historic land use and develop corrective actions to reduce potential risk to construction workers, the surrounding community, and occupants of the new development. Subsurface investigations have been conducted to evaluate historical operations at the Site including but not limited to residential dwellings and various commercial configurations such as automobile service and

2001 ASHBY REDEVELOPMENT (Continued) **S126421110**

repair operations with associated former underground storage tanks, and a bank. Results of these subsurface investigations has identified chemicals of concern (COCs) in environmental media (soil, soil vapor, and groundwater). To address this contamination prior to development, proposed corrective actions include the hazardous material survey and abatement of the existing onsite building and hardscape; demolition of existing Site buildings and above ground infrastructure; remediation and/or off-Site disposal of impacted soil at a permitted disposal facility; extraction, treatment, and discharge of groundwater to the sanitary sewer; and installation of vapor mitigation engineering controls to control potential vapor intrusion to indoor air of the proposed development and migration along new utility corridors. Proposed redevelopment of the Site includes a six-story multi-family residential building with 87 affordable family housing apartments and commercial tenant space, community facilities, utility and mechanical rooms, and garage parking on the ground floor. Construction will consist of a slab on grade foundation, with elevators and subterranean car stacker pits.. The Site is located in a mixed commercial and residential area of South Berkeley at the northeast corner of Adeline Street and Ashby Avenue. The property consists of one parcel, assessor parcel number (APN) 53-1591-18-3, totaling approximately 0.64 acres. According to the Phase I Environmental Site Assessment (Phase I ESA), dated December 4, 2019, the current parcel consisted of at least 6 historical parcels with associated addresses including 2031 & 2033 Ashby Avenue and 2925-2933 Adeline Street. APN for these address could not be located in County Assessor records. The Site is bound to the northwest by Adeline Street and further north by various mixed commercial and residential buildings; to the east by additional commercial properties; to the south by a church and residential land-use; and to the west by commercial properties. The Site is currently occupied by one building (6,297 square feet) used as a credit union/bank surrounded by an asphalt paved parking lot. Demolition of existing structures and redevelopment is proposed at this Site, however, at this time limited information is available for the proposed redevelopment that will include both commercial and residential land use. Various configurations and historical operations were conducted at the Site. These site configurations and operations included dwellings as early as 1903 in the northern portion of the Site as observed in the Sanborn maps provided in the Phase I ESA. By 1911, the Site also contained a store building in the southeast corner and a structure labeled as waiting room in the southwest corner. A building permit reviewed dated December 19, 1936 was a certificate of occupancy for a service station at the Site. The 1939 aerial photograph shows this gasoline service station. The city directory listings show that a gasoline service station was present at the Site (2001 Ashby Avenue) in 1945 through at least 1962. The city directory also showed that a store building with various commercial/retail businesses occupied the historical building (2031 & 2033 Ashby Avenue) from at least 1920 to 1970. A further look at building permits show an original building permit dated July 30, 1946 was issued for a gasoline service station. The City of Berkeley approved of a building permit for the construction of a bank on February 11, 1969 and signed off on the demolition of the former Site buildings on February 13, 1969. Fire Department records confirm that on February 12, 1969, the Site buildings and two underground storage tanks (USTs) (size and contents not provided) were removed. The present-day Site bank building and

parking lot is assumed to have been constructed in 1969. The City of Berkeley Toxics Management Division records identified a letter dated November 2, 1998 review a Phase 1 ESA, dated July 17, 1998 in addition to a soil & groundwater report, dated October 13, 1998. Phase I ESA results indicated recognized environmental conditions (REC) related to the former gasoline service station at the Site and also identified REC-related activities upgradient from active Leaking Underground Storage Tank (LUST) cases. The findings and conclusions of the soil & groundwater report prepared by ATC Associates, Inc., indicated that petroleum hydrocarbons and halogenated volatile organic compounds in the groundwater were detected at levels below the maximum contaminant levels (MCL) or levels relatively low and not considered to pose significant threat to human health or to the environment. Based on these findings, no further action was required regarding soil and groundwater at the Site, however, the City of Berkeley recommended a limited site investigation for the Site prior to a change in use of the Site. Copies of the 1998 Phse I ESA or Subusrface Investigation Report have not been provided to ACDEH at this time. Additional subsurface investigation activities were conducted at the Site in April 2019 and described in the Limited Subsurface Investigation Report, dated May 9, 2019, prepared by Ninyo & Moore. These subsurface investigation activities included the advancement of five shallow borings (S-1 through S-5) to a depth of 2.0 feet below ground surface (bgs) or less. Two temporary soil vapor probes were advanced to a total depth of 5.5 feet bgs and included the collection of soil and soil vapor between 5.0 feet to 5.5 feet bgs. Soil samples were selectively analyzed for gasoline-, diesel-, and motor oil-range total petroleum hydrocarbons (TPH-g, TPH-d, TPH-mo) volatile organic compounds (VOCs) including benzene, toluene, ethylbenzene, and xylene (BTEX), Leaking Underground Fuel Tank (LUFT) 5 metals, and California Title 22 metals. Petroleum related chemicals of concern (COCs) were detected in the soil samples sample at 2 feet bgs, however ACDEH notes these soil samples were collected at a depth above the former USTs. Soil samples also detected metal COCs including arsenic, lead and nickel above applicable regulatory screening levels for residential land use. Soil vapor samples were only collected from one soil vapor probe (SV-1) and indicated VOCs were detected above laboratory detection levels. Petroleum and non-petroleum related COCs were detected in soil vapor including but not limited tert-Butyl alcohol (TBA), ethylbenzene, toluene, chloromethane, carbon disulfide, and methyl ethyl ketone (MEK). Groundwater was not collected during the April 2019 investigations.

RWQCB Region:	SAN FRANCISCO BAY RWQCB (REGION 2)
Claim Number:	2158
Claim Status:	Active
Site History:	In 1986 a preliminary site assessment was completed and three groundwater monitoring wells were installed. SPH was detected in all three onsite monitoring wells confirming that a release to soil and groundwater had occurred. Interim remediation including plume migration control and groundwater extraction have been in operation since 1992. In 1998 three USTs were replaced and 997 tons of contaminated soil was removed. Confirmation soil sampling detected high concentrations of hydrocarbon contamination in the former tank pit. In 2006 and 2007 additional investigative activity evaluated the offsite extent of contamination. Currently, soil vapor sampling and interim remedial action by multi-phase extraction are proposed.

Site History:	Not all historic documents for the fuel leak case may be available on GeoTracker. A more complete historic case file for this site is located on the Alameda County Environmental Health website at

occupied by a car wash. A retail gasoline service station was reported to have operated on the property from at least 1954 until about 1976. Chevron has been contractually obligated to provide investigation and cleanup at the subject site. This case was opened in 2016 following an inquiry to ACDEH from a property owner representative regarding the status of investigation and cleanup activities. Following the station closure, the underground storage tanks (USTs) and appurtenant piping and dispensers were reportedly removed. In January 2006, four soil bores, SB1 thru SB4, were advanced to a depth of 15- to 21 feet bgs for the recovery of soil and GGW samples. Laboratory analysis of soil samples were reported to include up to 320 mg/kg TPHg, 1.6 mg/kg benzene, and 3.6 mg/kg ethyl benzene. Laboratory analysis of GGW samples were reported to include up to 7,400 ug/L TPHg, 370 ug/L benzene, and 250 ug/L ethyl benzene with MTBE and naphthalene reported to 14 ug/L and 230 ug/L, respectively. A heavy hydrocarbon LNAPL was observed in one soil bore (SB-4). The results of the investigation indicated an unauthorized release occurred at the site, resulting in opening this fuel leak case. Previous environmental investigations included the installation of six (6) groundwater monitoring wells in March 2006 for the Chevron Environmental Management Company. Since 2017 the six on-site wells have undergone quarterly monitoring after a nine year hiatus. The maximum concentrations reported in groundwater since monitoring resumed in 2017 are 520 and 150 micrograms per liter (ug/L) for total petroleum hydrocarbons (TPH) as gasoline (TPHg) and TPH as diesel (TPHd), respectively, 9.4 ug/L benzene and 1.0 ug/L ethyl benzene. The maximum concentration of MTBE reported since groundwater monitoring resumed in 2017 is 0.8 ug/L. Analysis of water from the most recent event (January 15, 2019) indicates well MW-2 has the highest TPHg concentration (520 ug/L). As there are no down gradient wells to support plume definition in the direction from the tank pit beyond MW-2, the plume is undefined. ACDEH observes that since the resumption of groundwater monitoring in 2017 well MW-2 is demonstrating increasing concentration trends for TPHg and TPHd. Groundwater at the site ranges from 1.88 feet bgs (MW-4 on 4/18/2018) to 8.61 feet (MW-4 on 10/31/2017). In 2019 a sensitive receptor survey was conducted.

Completed Info:

Completed Area Name:	PROJECT WIDE
Completed Sub Area Name:	Not reported
Completed Document Type:	Phase 1
Completed Date:	10/10/1997
Comments:	Pursuant to the MOU, DTSC has reviewed a risk assessment and other documents for the Lifelong Medical Care (LMC) facility. The propery, owned by LMC, is a vacant lot which was formerly the site of a Chevron service station. The underground tanks have been removed per City of Berkeley oversight. A risk assessment has been completed and approved by the City of Berkeley and Alameda County. An Indemnification Agreement has been signed by Chevron. A Supplemental Phase I Environmental Assessment was prepared by DTSC and concluded that no action was needed for this property, there is no contamination on the property.

Claim Number:	9624
Claim Status:	Active
Site History:	The Site is currently an active ARCO fueling station with a station building, two dispenser islands, and three 12,000-gallon gasoline underground storage tanks (USTs). Surrounding land use is primarily single- and multi-family residences with commercial buildings located east and southeast of the property. In June 1988, during removal of four gasoline underground storage tanks (USTs), a release of petroleum hydrocarbons was identified from a former UST at the west side of the station building. The release has resulted in a shallow groundwater petroleum plume. Since the release was identified, cleanup has included groundwater extraction and treatment (1993 to 1995) and placement of oxygen release compound into groundwater to enhance biodegradation (1995 to 2000). Concentrations of gasoline and benzene in groundwater have remained elevated, averaging approximately 5,000 and 1,000 micrograms per liter respectively, since 2001. Due to the remaining presence of petroleum hydrocarbon contamination, Alameda County Department of Environmental Health has requested that the responsible party initiate cleanup activities to remove petroleum contamination and thus reduce risk to downgradient residential receptors from potential vapor intrusion or incidental exposure to shallow contaminated groundwater that may intrude into basements, sumps, French drains, etc. A dual phase extraction (DPE) pilot test in the area of the historic release demonstrated that dual phase extraction is an effective remedial technology. ACDEH has met with the community and received feedback. Based on the demonstrated effectiveness of the pilot test, ACDEH requested a feasibility study and updated SCM to include the use of DPE as an evaluated remedial option utilizing an alternative power source (electrical connection) to avoid diesel fumes and noise generation.

Claim Number:	19338
Claim Status:	Active
Site History:	Two underground storage tanks and one above-ground storage tank were removed from the site in March and April 2008. The tanks were cleaned and recycled. Soil samples collected from beneath UST-A (The 1,300 gallon UST) were below all the respective detection limits for all constituents. Initial water samples contained 430,000 g/L TPHd, 140,000 g/L TPHmo and 11,000 g/L TPHg. After dewatering, the water sample contained 16,000 g/L TPHd, 7,600 g/L TPHmo, and 160 g/L TPHg. Samples collected from soil beneath UST-B (425-gallon UST) at 10 feet bgs contained 120 ppm TPHd, 32 ppm TPHmo and 49 ppm TPHg. The soil sample collected at 11 feet bgs contained 15 ppm TPHmo and 26 ppm TPHd. No benzene was detected in any sample collected during the removals. Water samples contained 370 ppb TPHmo, 310 ppb TPHd and 5 ppb TPHg. Ninyo and Moore performed a preferential pathway survey to identify potential conduits such as utilities and wells. One industrial well was identified within a +-mile radius. On March 12 and 13, 2010, Ninyo and Moore performed a site investigation which included advancing 8 borings. Maximum concentrations of 4,800 ppm TPHd and 15,000 ppm TPHmo were detected in soil samples from the surface near the above-ground storage tank. The consultant stated that these concentrations were likely due to asphalt contained in the sample. No BTEX oxygenates or lead scavengers were detected in soil. Samples collected from groundwater contained maximum concentrations of 2,500 ppb TPHd and TPHg and 560 pppb TPHmo near the location of the 425 gallon UST. No BTEX was detected in groundwater. On May 1, 2010, Ninyo and Moore advanced boring B-9 adjacent to boring B-8 to confirm the consultant s hypothesis that the TPHmo detected in the previous investigation was asphalt and not representative of soil concentrations. TPHd was detected at 110 ppm and TPHmo was detected at 460 ppm. Soil samples collected from step-out borings B-10 to B-12 were not analyzed since B-9 analytical results were low.

Comments: CEQA Notice of Preparation (NOP) for Marchant Corporation. DTSC determined that the proposed project would not conflict with the remedial design and previous indoor air investigations. The remedy is in the basement boiler room and would not be affected by the proposed project, which consists of converting previous office spaces to

MARCHANT CORPORATION SITE (Continued) **S108054471**

Medical Practitioner use on portions of the first and second floors, plus all of the third and fourth floors (delineated in the Project Plans on the City of Berkeley website:

Level_3_-_ZAB/2017-02-09_ZAB_ATT2_3100%20San%20Pablo_Project%20Plans.pdf). The NOP anticipates that the project will not have significant impacts related to Hazards and Hazardous Materials and, therefore, analysis of Hazards and Hazardous Materials will be included in the IS checklist as an appendix, but not studied and analyzed at length in the DEIR. However, the NOP anticipates that Air Quality will be analyzed in the DEIR. According to the State Clearinghouse memo, DTSC must respond to the Lead Agency if review of the Notice of Preparation (NOP) indicates that DTSC has discretionary approval power over the project as a Responsible Agency . Based on review, DTSC does not need to act as a Responsible Agency and provide discretionary review/approval of the DEIR, so DTSC response to the NOP (due by 2/24/207) is not required.

Completed Date: 02/21/2017
Comments: CEQA Notice of Preparation (NOP) for Marchant Corporation. DTSC determined that the proposed project would not conflict with the remedial design and previous indoor air investigations. The remedy is in the basement boiler room and would not be affected by the proposed project, which consists of converting previous office spaces to Medical Practitioner use on portions of the first and second floors, plus all of the third and fourth floors (delineated in the Project Plans on the City of Berkeley website:

Level_3_-_ZAB/2017-02-09_ZAB_ATT2_3100%20San%20Pablo_Project%20Plans.pdf). The NOP anticipates that the project will not have significant impacts related to Hazards and Hazardous Materials and, therefore, analysis of Hazards and Hazardous Materials will be included in the IS checklist as an appendix, but not studied and analyzed at length in the DEIR. However, the NOP anticipates that Air Quality will be analyzed in the DEIR. According to the State Clearinghouse memo, DTSC must respond to the Lead Agency if review of the Notice of Preparation (NOP) indicates that DTSC has discretionary approval power over the project as a Responsible Agency . Based on review, DTSC does not need to act as a Responsible Agency and provide discretionary review/approval of the DEIR, so DTSC response to the NOP (due by 2/24/207) is not required.

Background Info:	The site was a drum recycling facility located in a commercial, industrial, and residential area. Due to poor drum recycling practices, there were releases of hazardous substances at the site.
Comments Date:	02231996
Comments:	Amended RIFS. Feasibility Study amended to propose soil and
Comments Date:	02231996
Comments:	groundwater removal to residential use standards.
Comments Date:	03211999
Comments:	Completed Remedial Action. The RA included excavation of
Comments Date:	03211999
Comments:	contaminated soil for residential development. Approximately
Comments Date:	03211999
Comments:	22,500 tons of contaminated soils were excavated and disposed
Comments Date:	03211999
Comments:	off-site. Approximately 20,000 gallons of groundwater were
Comments Date:	03211999
Comments:	encountered during excavation and disposed off-site.
Comments Date:	04121995
Comments:	Completed RIFS. Feasibility Study approved proposing soil and
Comments Date:	04121995
Comments:	groundwater removal to industrial use standards.
Comments Date:	04281989
Comments:	DHS inspected site as part of drum recycling project.
Comments Date:	05222000
Comments:	In-situ groundwater treatment was performed using
Comments Date:	05222000
Comments:	hydrogen-releasing compounds (HRC). In order to measure the
Comments Date:	05222000
Comments:	effectiveness of the HRC treatment, groundwater was sampled
Comments Date:	05222000
Comments:	approximately every 4-6 weeks over a 12 month period.
Comments Date:	05241996
Comments:	Approved CEQA Negative Declaration.
Comments Date:	05281996

Completed Info:

Completed Area Name:	PROJECT WIDE
Completed Sub Area Name:	Not reported
Completed Document Type:	Operation & Maintenance Order/Agreement
Completed Date:	12/20/2004
Comments:	DTSC entered into an Operations and Maintenance Agreement with Myers Container Corporation. The Agreement provides for ongoing, semi-annual sampling of two monitoring wells.
Completed Area Name:	PROJECT WIDE
Completed Sub Area Name:	Not reported
Completed Document Type:	Land Use Restriction
Completed Date:	09/21/2004
Comments:	A deed restriction was recorded for the area where residual groundwater contamination remains to prevent use of the underlying groundwater.
Completed Area Name:	PROJECT WIDE
Completed Sub Area Name:	Not reported
Completed Document Type:	Land Use Restriction - Site Inspection/Visit
Completed Date:	07/09/2008
Comments:	The landscaped driveway entrance that overlies the area of groundwater contamination was observed to be in good condition during the annual site inspection by DTSC staff.
Completed Area Name:	PROJECT WIDE
Completed Sub Area Name:	Not reported
Completed Document Type:	Correspondence
Completed Date:	07/08/2024
Comments:	Not reported

MYERS CONTAINER CORPORATION (Continued) **1000369037**

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Correspondence
Completed Date: 06/29/2023
Comments: Correspondence for 2022 calendar year.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Monitoring Report
Completed Date: 04/02/2008
Comments: Report approved April 2, 2008; electronic copy of report to follow.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Monitoring Report
Completed Date: 09/29/2008
Comments: The Report presents the results of sampling of two groundwater monitoring wells performed in June 2008. Vinyl chloride and cis-1,2-dichloroethylene still exceed the groundwater cleanup goals in one monitoring well and the detected concentrations were 29 and 180 micrograms per liter, respectively.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Public Notice
Completed Date: 08/10/2011
Comments: The Public Notice was published in the Oakland Tribune on page A7 on August 10, 2011.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported

Completed Date: 06/30/2006
Comments: Not reported

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Land Use Restriction - Site Inspection/Visit
Completed Date: 06/15/2007
Comments: Site conditions observed at the property comply with the O & M agreement and deed restriction

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported

MYERS CONTAINER CORPORATION (Continued) **1000369037**

Completed Document Type: Certification
Completed Date: 12/21/2004
Comments: Certified Site. A residential/commercial development is being constructed on the property.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: CEQA - Initial Study/ Neg. Declaration
Completed Date: 05/24/1996
Comments: Approved CEQA Negative Declaration.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Unilateral Order (I/SE, RAO, CAO, EPA AO)
Completed Date: 06/28/1991
Comments: Order issued to IMACC Corporation, the parent company of Myers Container Corporation, and Dorothy Warburton, the Site owner.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Fieldwork
Completed Date: 07/26/2006
Comments: Monitoring well installed in deed restricted area.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Remedial Investigation Report
Completed Date: 09/03/1992
Comments: RI approved. VOCs and SVOCs found in soil to depths ranging from 3 to 5 feet. VOCs detected in groundwater. No contaminants detected by air monitoring.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Risk Assessment Report
Completed Date: 05/01/1994
Comments: Site COCs, migration pathways, and exposure scenarios evaluated. Total cancer risks ranged from 1E-08 to 3E-03. Non-cancer hazard indices ranged from 9E-04 to 1E+01. Adverse impacts to ecological receptors in the Bay determined to be unlikely.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Well Installation Workplan
Completed Date: 06/20/2006
Comments: DTSC approved workplan for installation of monitoring well in capped area of site.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Fact Sheets
Completed Date: 11/20/2003
Comments: Fact Sheet and Public Notice announced changes proposed to Remedial Action Plan.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported

MYERS CONTAINER CORPORATION (Continued) **1000369037**

Completed Document Type: Monitoring Report
Completed Date: 10/04/2007
Comments: Approval letter signed 10/2/2007.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Monitoring Report
Completed Date: 10/01/2009
Comments: The report recommended continuation of the semi-annual monitoring program.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Monitoring Report
Completed Date: 02/23/2011
Comments: Not reported

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Monitoring Report
Completed Date: 02/23/2011
Comments: Not reported

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Monitoring Report
Completed Date: 09/22/2011
Comments: The report included responses to DTSC's comment letter dated June 23, 2011. In response the those comments the report included information related to boring logs, monitoring well construction details, and groundwater elevation data and gradient evaluations; the responses that were provided were adequate. The results of the groundwater monitoring program were consistent with previous results which showed low levels of chlorinated volatile organic compounds (VOCs) in shallow groundwater; the groundwater data also showed that natural biodegradation of those chlorinated VOCs is occurring since breakdown compounds are present.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Monitoring Report
Completed Date: 06/23/2011
Comments: The monitoring results are consistent with historical results. DTSC's Geological Services Unit requested that copies of the monitoring wells borehole logs should be submitted and a compilation of all groundwater gradient evaluations should be completed. DTSC requested that information to be submitted in the next monitoring report.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Fieldwork
Completed Date: 01/27/2011
Comments: Groundwater samples were collected.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: *Correspondence - Received

MYERS CONTAINER CORPORATION (Continued) **1000369037**

Completed Date: 01/06/2010
Comments: Not reported

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Fieldwork
Completed Date: 07/21/2011
Comments: Groundwater monitoring wells were sampled.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Land Use Restriction Monitoring Report
Completed Date: 09/04/2018
Comments: The site is in compliance with the Land Use Covenant which restricts groundwater usage.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Land Use Restriction Monitoring Report
Completed Date: 01/27/2020
Comments: Certification was received from the consultant the the site is in compliance with the Land Use Covenant and that groundwater extraction is not occurring at the site.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Land Use Restriction Monitoring Report
Completed Date: 06/25/2020
Comments: The site remains in compliance with the Land Use Covenant that groundwater should not be used in the restricted area of the site.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Land Use Restriction Monitoring Report
Completed Date: 09/03/2021
Comments: The report certfied that the use of the site is consistent with land use restrictions which were placed on a portion of the property.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Land Use Restriction Monitoring Report
Completed Date: 05/19/2023
Comments: DTSC received certification that the site is compliance with the Land Use Covenant. Groundwater usage at the site is prohibited by the land use restriction and groundwater at the site is not being used.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Annual Oversight Cost Estimate
Completed Date: 09/12/2018
Comments: Estimate of costs for DTSC to provide regulatory oversight for the fiscal year (July 1, 2018-June 30, 2019).

Completed Document Type: Annual Oversight Cost Estimate
Completed Date: 10/05/2011
Comments: Estimate of DTSC costs to provide regulatory oversight from 7/1/2011 to 6/30/2012.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Annual Oversight Cost Estimate
Completed Date: 10/23/2012
Comments: The cost estimate covers anticipated regulatory oversight expenses from 7/1/12 to 6/30/13.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Annual Oversight Cost Estimate
Completed Date: 10/06/2023
Comments: Cost estimate for DTSC to provide regulatory oversight for the fiscal year (July 1, 2023-June 30, 2024).

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Preliminary Assessment Report
Completed Date: 06/15/1989
Comments: Completed PA. Periodic releases of hazardous substances were determined to have occurred at the site from drum recycling activities.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Remedial Action Plan w/ESD
Completed Date: 12/31/2003
Comments: Explanation of Significant Differences approved. The groundwater remedy was changed from extraction and treatment to long-term groundwater monitoring and deed restrictions.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Design/Implementation Workplan
Completed Date: 08/05/2002
Comments: DTSC approved Groundwater Remediation Workplan. Primary activities included in scope of Workplan are soil excavation from two areas of groundwater contamination and pumping of groundwater from open excavation areas.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Design/Implementation Workplan
Completed Date: 06/26/1998
Comments: DTSC approved Phase I Remedial Design and Implementation Plan. The Plan scope included excavation and off-site disposal of soil with contaminants exceeding residential cleanup levels. Groundwater cleanup was addressed in a subsequent ESD.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Design/Implementation Workplan

MYERS CONTAINER CORPORATION (Continued) **1000369037**

Completed Date: 10/25/1996
Comments: Approved Phase IA Design for building demolition.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Remedial Action Completion Report
Completed Date: 03/21/1999
Comments: Completed Remedial Action. The RA included excavation of contaminated soil for residential development. Approximately 22,500 tons of contaminated soils were excavated and disposed off-site. Approximately 20,000 gallons of groundwater were encountered during excavation and disposed off-site.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Remedial Action Plan
Completed Date: 05/28/1996
Comments: Approved RAP. The plan required excavation of contaminated soil to residential cleanup levels and groundwater extraction and treatment.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Remedial Investigation / Feasibility Study
Completed Date: 04/12/1995
Comments: Completed RIFS. Feasibility Study approved proposing soil and groundwater removal to industrial use standards.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Removal Action Completion Report
Completed Date: 09/30/1991
Comments: Completed RA. Eleven sumps were drained and the integrity of the sumps were checked. 250 cubic yards of waste were removed.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Monitoring Report
Completed Date: 03/03/2009
Comments: Not reported

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Monitoring Report
Completed Date: 09/28/2015
Comments: A groundwater sample from the single site well continues to exceed the drinking water standard for vinyl chloride. For that reason, the request for site closure which was included in the groundwater monitoring report could not be approved.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Fieldwork
Completed Date: 03/21/2012
Comments: Groundwater samples were collected.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported

MYERS CONTAINER CORPORATION (Continued) **1000369037**

Completed Document Type: Fieldwork
Completed Date: 07/31/2012
Comments: Groundwater samples were collected.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Monitoring Report
Completed Date: 01/24/2013
Comments: The schedule for collection of groundwater samples has been reduced to bi-annual (once every other year). Two groundwater monitoring wells were sampled this period however DTSC recently approved decommissioning of one well (MW-10) so only one well will continue to be monitored. The samples were tested for chlorinated solvents and only vinyl chloride exceeded the drinking water Maximum Contaminant Level (MCL) of 0.5 micrograms per liter (ug/L). The next sampling event is scheduled to occur by January 31, 2013.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Monitoring Report
Completed Date: 05/01/2013
Comments: The groundwater monitoring is conducted on a biennial schedule (one sampling event every 2 years). There is only 1 monitoring well that is sampled and tested; a low concentration of vinyl chloride was detected. The vinyl chloride is a biodegradation breakdown product of the former chlorinated solvent plume in groundwater at the Site.

Alias Name: 01340111
Alias Type: Envirostor ID Number

Completed Info:
Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Operation & Maintenance Order/Agreement
Completed Date: 12/20/2004
Comments: DTSC entered into an Operations and Maintenance Agreement with Myers Container Corporation. The Agreement provides for ongoing, semi-annual sampling of two monitoring wells.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Land Use Restriction
Completed Date: 09/21/2004
Comments: A deed restriction was recorded for the area where residual groundwater contamination remains to prevent use of the underlying groundwater.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Land Use Restriction - Site Inspection/Visit
Completed Date: 07/09/2008
Comments: The landscaped driveway entrance that overlies the area of groundwater contamination was observed to be in good condition during the annual site inspection by DTSC staff.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Correspondence
Completed Date: 07/08/2024

Completed Document Type: Correspondence
Completed Date: 06/29/2023
Comments: Correspondence for 2022 calendar year.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Monitoring Report
Completed Date: 04/02/2008
Comments: Report approved April 2, 2008; electronic copy of report to follow.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Monitoring Report
Completed Date: 09/29/2008
Comments: The Report presents the results of sampling of two groundwater monitoring wells performed in June 2008. Vinyl chloride and cis-1,2-dichloroethylene still exceed the groundwater cleanup goals in one monitoring well and the detected concentrations were 29 and 180 micrograms per liter, respectively.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported

MYERS CONTAINER CORPORATION (Continued) **1000369037**

Completed Document Type: Public Notice
Completed Date: 08/10/2011
Comments: The Public Notice was published in the Oakland Tribune on page A7 on August 10, 2011.

Completed Document Type: Land Use Restriction - Site Inspection/Visit
Completed Date: 06/15/2007
Comments: Site conditions observed at the property comply with the O & M agreement and deed restriction

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Certification
Completed Date: 12/21/2004
Comments: Certified Site. A residential/commercial development is being constructed on the property.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: CEQA - Initial Study/ Neg. Declaration
Completed Date: 05/24/1996
Comments: Approved CEQA Negative Declaration.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Unilateral Order (I/SE, RAO, CAO, EPA AO)
Completed Date: 06/28/1991
Comments: Order issued to IMACC Corporation, the parent company of Myers Container Corporation, and Dorothy Warburton, the Site owner.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Fieldwork
Completed Date: 07/26/2006
Comments: Monitoring well installed in deed restricted area.

MYERS CONTAINER CORPORATION (Continued) **1000369037**

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Remedial Investigation Report
Completed Date: 09/03/1992
Comments: RI approved. VOCs and SVOCs found in soil to depths ranging from 3 to 5 feet. VOCs detected in groundwater. No contaminants detected by air monitoring.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Risk Assessment Report
Completed Date: 05/01/1994
Comments: Site COCs, migration pathways, and exposure scenarios evaluated. Total cancer risks ranged from 1E-08 to 3E-03. Non-cancer hazard indices ranged from 9E-04 to 1E+01. Adverse impacts to ecological receptors in the Bay determined to be unlikely.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Well Installation Workplan
Completed Date: 06/20/2006
Comments: DTSC approved workplan for installation of monitoring well in capped area of site.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Fact Sheets
Completed Date: 11/20/2003
Comments: Fact Sheet and Public Notice announced changes proposed to Remedial Action Plan.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Monitoring Report
Completed Date: 10/04/2007
Comments: Approval letter signed 10/2/2007.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Monitoring Report
Completed Date: 10/01/2009
Comments: The report recommended continuation of the semi-annual monitoring program.

Comments: Not reported

Completed Area Name: PROJECT WIDE

MYERS CONTAINER CORPORATION (Continued) **1000369037**

Completed Sub Area Name: Not reported
Completed Document Type: Monitoring Report
Completed Date: 09/22/2011
Comments: The report included responses to DTSC's comment letter dated June 23, 2011. In response the those comments the report included information related to boring logs, monitoring well construction details, and groundwater elevation data and gradient evaluations; the responses that were provided were adequate. The results of the groundwater monitoring program were consistent with previous results which showed low levels of chlorinated volatile organic compounds (VOCs) in shallow groundwater; the groundwater data also showed that natural biodegradation of those chlorinated VOCs is occurring since breakdown compounds are present.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Monitoring Report
Completed Date: 06/23/2011
Comments: The monitoring results are consistent with historical results. DTSC's Geological Services Unit requested that copies of the monitoring wells borehole logs should be submitted and a compilation of all groundwater gradient evaluations should be completed. DTSC requested that information to be submitted in the next monitoring report.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Fieldwork
Completed Date: 01/27/2011
Comments: Groundwater samples were collected.

Completed Area Name: PROJECT WIDE

Completed Document Type: Fieldwork
Completed Date: 07/21/2011
Comments: Groundwater monitoring wells were sampled.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Land Use Restriction Monitoring Report
Completed Date: 09/04/2018
Comments: The site is in compliance with the Land Use Covenant which restricts groundwater usage.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Land Use Restriction Monitoring Report
Completed Date: 01/27/2020
Comments: Certification was received from the consultant the the site is in compliance with the Land Use Covenant and that groundwater extraction is not occurring at the site.

MYERS CONTAINER CORPORATION (Continued) **1000369037**

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Land Use Restriction Monitoring Report
Completed Date: 06/25/2020
Comments: The site remains in compliance with the Land Use Covenant that groundwater should not be used in the restricted area of the site.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Land Use Restriction Monitoring Report
Completed Date: 09/03/2021
Comments: The report certfied that the use of the site is consistent with land use restrictions which were placed on a portion of the property.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Land Use Restriction Monitoring Report
Completed Date: 05/19/2023
Comments: DTSC received certification that the site is compliance with the Land Use Covenant. Groundwater usage at the site is prohibited by the land use restriction and groundwater at the site is not being used.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Annual Oversight Cost Estimate
Completed Date: 09/12/2018
Comments: Estimate of costs for DTSC to provide regulatory oversight for the fiscal year (July 1, 2018-June 30, 2019).

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Annual Oversight Cost Estimate
Completed Date: 10/08/2019
Comments: Cost estimate for DTSC oversight for the fiscal year (July 1, 2018 to June 30, 2019).

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Annual Oversight Cost Estimate
Completed Date: 09/30/2020
Comments: The annual cost estimate is for DTSC to provide regulatory oversight activities for the fiscal year (from July 1, 2020 to June 30, 2021).

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Annual Oversight Cost Estimate
Completed Date: 09/15/2021
Comments: Estimate of DTSC oversight costs for the fiscal year (July 1, 2021 - June 30, 2022).

Completed Document Type: Annual Oversight Cost Estimate
Completed Date: 10/06/2023
Comments: Cost estimate for DTSC to provide regulatory oversight for the fiscal year (July 1, 2023-June 30, 2024).

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Preliminary Assessment Report

MYERS CONTAINER CORPORATION (Continued) **1000369037**

Completed Date: 06/15/1989
Comments: Completed PA. Periodic releases of hazardous substances were determined to have occurred at the site from drum recycling activities.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Remedial Action Plan w/ESD
Completed Date: 12/31/2003
Comments: Explanation of Significant Differences approved. The groundwater remedy was changed from extraction and treatment to long-term groundwater monitoring and deed restrictions.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Design/Implementation Workplan
Completed Date: 08/05/2002
Comments: DTSC approved Groundwater Remediation Workplan. Primary activities included in scope of Workplan are soil excavation from two areas of groundwater contamination and pumping of groundwater from open excavation areas.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Design/Implementation Workplan
Completed Date: 06/26/1998
Comments: DTSC approved Phase I Remedial Design and Implementation Plan. The Plan scope included excavation and off-site disposal of soil with contaminants exceeding residential cleanup levels. Groundwater cleanup was addressed in a subsequent ESD.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Design/Implementation Workplan
Completed Date: 10/25/1996
Comments: Approved Phase IA Design for building demolition.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Remedial Action Completion Report
Completed Date: 03/21/1999
Comments: Completed Remedial Action. The RA included excavation of contaminated soil for residential development. Approximately 22,500 tons of contaminated soils were excavated and disposed off-site. Approximately 20,000 gallons of groundwater were encountered during excavation and disposed off-site.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Remedial Action Plan
Completed Date: 05/28/1996
Comments: Approved RAP. The plan required excavation of contaminated soil to residential cleanup levels and groundwater extraction and treatment.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Remedial Investigation / Feasibility Study

MYERS CONTAINER CORPORATION (Continued) **1000369037**

Completed Date: 04/12/1995
Comments: Completed RIFS. Feasibility Study approved proposing soil and groundwater removal to industrial use standards.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Removal Action Completion Report
Completed Date: 09/30/1991
Comments: Completed RA. Eleven sumps were drained and the integrity of the sumps were checked. 250 cubic yards of waste were removed.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Monitoring Report
Completed Date: 03/03/2009
Comments: Not reported

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Monitoring Report
Completed Date: 09/28/2015
Comments: A groundwater sample from the single site well continues to exceed the drinking water standard for vinyl chloride. For that reason, the request for site closure which was included in the groundwater monitoring report could not be approved.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Fieldwork
Completed Date: 03/21/2012
Comments: Groundwater samples were collected.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Fieldwork
Completed Date: 07/31/2012
Comments: Groundwater samples were collected.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Monitoring Report
Completed Date: 01/24/2013
Comments: The schedule for collection of groundwater samples has been reduced to bi-annual (once every other year). Two groundwater monitoring wells were sampled this period however DTSC recently approved decommissioning of one well (MW-10) so only one well will continue to be monitored. The samples were tested for chlorinated solvents and only vinyl chloride exceeded the drinking water Maximum Contaminant Level (MCL) of 0.5 micrograms per liter (ug/L). The next sampling event is scheduled to occur by January 31, 2013.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Monitoring Report
Completed Date: 05/01/2013
Comments: The groundwater monitoring is conducted on a biennial schedule (one sampling event every 2 years). There is only 1 monitoring well that

MYERS CONTAINER CORPORATION (Continued) **1000369037**

is sampled and tested; a low concentration of vinyl chloride was detected. The vinyl chloride is a biodegradation breakdown product of the former chlorinated solvent plume in groundwater at the Site.

Environmental Interest/Information System:
The National Compliance Database (NCDB) supports implementation of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) and the Toxic Substances Control Act (TSCA).
California's Department of Toxic Substances Control's (DTSC's)-EnviroStor database is an online search and Geographic Information System (GIS) tool for identifying sites that have known contamination or sites for which there may be reasons to investigate further. The EnviroStor database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites.
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Completed Sub Area Name: Not reported
Completed Document Type: Monitoring Report
Completed Date: 10/06/2009
Comments: Per letter dated 10/06/2009, data from report incorporated into draft RAW. Results from monitoring event consistent with previous site characterization.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Other Report
Completed Date: 10/07/2008
Comments: Indoor air sampling performed without approval from DTSC. Per letter dated 10/06/2009, data from sampling incorporated into draft RAW. Results indicate concentrations of VOCs above indoor air CHHSLs detected under worst case scenario (sampling performed without ventilation, after years of being closed.)

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Other Report
Completed Date: 01/08/2009
Comments: Indoor air sampling performed without formal approval from DTSC. Per letter dated 10/06/2009, data from sampling incorporated into draft RAW. Results indicate concentrations of VOCs were not detected if HVAC system was operated on a normal schedule. A follow up indoor air survey was performed subsequently to show results from worst case scenario under HVAC operation (run HVAC Friday, turn off end of Friday and leave off for duration of weekend, and samples taken on Monday.)

Completed Sub Area Name: Not reported
Completed Document Type: Remedial Investigation Report
Completed Date: 09/12/2006
Comments: Supplement to Phase II Investigation: 32 soil samples, 10 Groundwater grab samples tested. Highest TCE detection in groundwater: 5200 ug/L at 36 ft bgs (middle of parcel, closer to 1171 Ocean Avenue.) No soil source for TCE Identified.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Removal Action Completion Report
Completed Date: 10/26/2011
Comments: Approval of the Removal Action Completion and Third Quarter 2010 Groundwater Monitoring Report for the site located at 1171 Ocean Avenue in Oakland, California. The report documents the implementation of the Removal Action Workplan, which was approved by the Department of Toxic Substance Control in June 2010. The remedy entailed the injection of the in-situ Regenesis compounds RegenOx and HRC . These compounds were advanced into separate areas of the trichloroethylene-dominated plume underlying the site. Following a year of quarterly post injection monitoring a workplan will be developed to propose the additional injections along with additional wells and monitoring analytes indicated by the data reviewed.

Completed Document Type:	Monitoring Report
Completed Date:	04/04/2010
Comments:	First quarter 2010 groundwater monitoring report.This report documents the Q1-2010 groundwater monitoring event conducted on February 26, 2010. This is the seventh consecutive groundwater monitoring event at this site.
Completed Area Name:	PROJECT WIDE
Completed Sub Area Name:	Not reported
Completed Document Type:	Remedial Investigation Report
Completed Date:	09/26/2007
Comments:	Report with results of sampling to supplement Phase III and IV Investigations- greatest detections of TCE found in southeast corner of site near warehouse roll-up door: greatest groundwater detection of 10,000 micrograms per liter TCE at 36 feet below ground surface, and soil-gas detection of 860 micrograms per cubic meter (only soil gas detection onsite.) Five off-site soil and groundwater samples taken- no detections of same magnitude as onsite detections, indicating onsite TCE is not from an upgradient, off-site source.
Completed Area Name:	PROJECT WIDE
Completed Sub Area Name:	Not reported
Completed Document Type:	Remedial Investigation Report
Completed Date:	11/22/2006
Comments:	Supplement to Phase III Investigation: 4 grab groundwater samples taken. Highest detection was an on-site sample from the southeast corner near the warehouse roll-up door: 6,000 micrograms per liter TCE at 36 feet below ground surface.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Monitoring Report
Completed Date: 08/08/2016
Comments: Groundwater monitoring well sampling results shown concentrations of Trichloroethene (TCE) and cis-Dichloroethere (DCE) in the three shallow zone wells and two of the deeper wells relatively similar to the historical concentrations.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Monitoring Report
Completed Date: 08/16/2012
Comments: All wells show TCE levels above the MCL, with the highest concentration of 20,000 g/L at the remnant source area represented by well MW-3B. At this time, due to the property owner s fiscal constrains, the groundwater monitoring will continue at a reduced period of annual monitoring during the recharge season (February) sampling.

Completed Document Type:	Other Report
Completed Date:	10/07/2008
Comments:	Indoor air sampling performed without approval from DTSC. Per letter

1171 OCEAN AVENUE (Continued) **S102425028**

dated 10/06/2009, data from sampling incorporated into draft RAW. Results indicate concentrations of VOCs above indoor air CHHSLs detected under worst case scenario (sampling performed without ventilation, after years of being closed.)

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Other Report
Completed Date: 01/08/2009
Comments: Indoor air sampling performed without formal approval from DTSC. Per letter dated 10/06/2009, data from sampling incorporated into draft RAW. Results indicate concentrations of VOCs were not detected if HVAC system was operated on a normal schedule. A follow up indoor air survey was performed subsequently to show results from worst case scenario under HVAC operation (run HVAC Friday, turn off end of Friday and leave off for duration of weekend, and samples taken on Monday.)

Completed Date: 12/09/2008
Comments: Per letter dated 10/06/2009, data from report incorporated into draft RAW. Results from monitoring event consistent with previous site characterization.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Remedial Investigation Report
Completed Date: 09/12/2006
Comments: Supplement to Phase II Investigation: 32 soil samples, 10 Groundwater grab samples tested. Highest TCE detection in groundwater: 5200 ug/L at 36 ft bgs (middle of parcel, closer to 1171 Ocean Avenue.) No soil source for TCE Identified.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Removal Action Completion Report
Completed Date: 10/26/2011
Comments: Approval of the Removal Action Completion and Third Quarter 2010 Groundwater Monitoring Report for the site located at 1171 Ocean Avenue in Oakland, California. The report documents the implementation of the Removal Action Workplan, which was approved by the Department of Toxic Substance Control in June 2010. The remedy entailed the injection of the in-situ Regenesis compounds RegenOx and HRC . These compounds were advanced into separate areas of the trichloroethylene-dominated plume underlying the site. Following a year of quarterly post injection monitoring a workplan will be developed to propose the additional injections along with additional wells and monitoring analytes indicated by the data reviewed.

Completed Date: 04/04/2010
Comments: First quarter 2010 groundwater monitoring report.This report documents the Q1-2010 groundwater monitoring event conducted on February 26, 2010. This is the seventh consecutive groundwater monitoring event at this site.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Remedial Investigation Report
Completed Date: 09/26/2007
Comments: Report with results of sampling to supplement Phase III and IV Investigations- greatest detections of TCE found in southeast corner of site near warehouse roll-up door: greatest groundwater detection of 10,000 micrograms per liter TCE at 36 feet below ground surface, and soil-gas detection of 860 micrograms per cubic meter (only soil gas detection onsite.) Five off-site soil and groundwater samples taken- no detections of same magnitude as onsite detections, indicating onsite TCE is not from an upgradient, off-site source.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Remedial Investigation Report

1171 OCEAN AVENUE (Continued) **S102425028**

Completed Date: 11/22/2006
Comments: Supplement to Phase III Investigation: 4 grab groundwater samples taken. Highest detection was an on-site sample from the southeast corner near the warehouse roll-up door: 6,000 micrograms per liter TCE at 36 feet below ground surface.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal NPL (Superfund) sites

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Date of Government Version: 12/19/2024

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 12/19/2024

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Lists of Federal Delisted NPL sites

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

Lists of Federal RCRA TSD facilities

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Lists of Federal RCRA generators

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

RCRA-VSQG: RCRA - Very Small Quantity Generators (Formerly Conditionally Exempt Small Quantity Generators)

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

Lists of state- and tribal hazardous waste facilities

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites
Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

Other Ascertainable Records

RCRA NonGen / NLR: RCRA - Non Generators / No Longer Regulated

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

EPA WATCH LIST: EPA Watch List

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines
An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

PFAS RCRA MANIFEST: PFAS Transfers Identified In the RCRA Database Listing

To work around the lack of PFAS waste codes in the RCRA database, EPA developed the PFAS Transfers dataset by mining e-Manifest records containing at least one of these common PFAS keywords: PFAS, PFOA, PFOS, PERFL, AFFF, GENX, GEN-X (plus the VT waste codes). These keywords were searched for in the following text fields: Manifest handling instructions (MANIFEST_HANDLING_INSTR), Non-hazardous waste description (NON_HAZ_WASTE_DESCRIPTION), DOT printed information (DOT_PRINTED_INFORMATION), Waste line handling instructions (WASTE_LINE_HANDLING_INSTR), Waste residue comments (WASTE_RESIDUE_COMMENTS).

PFAS NPDES: Clean Water Act Discharge Monitoring Information

Any discharger of pollutants to waters of the United States from a point source must have a National Pollutant Discharge Elimination System (NPDES) permit. The process for obtaining limits involves the regulated entity (permittee) disclosing releases in a NPDES permit application and the permitting authority (typically the state but sometimes EPA) deciding whether to require monitoring or monitoring with limits. Caveats and Limitations: Less than half of states have required PFAS monitoring for at least one of their permittees and fewer states have established PFAS effluent limits for permittees. New rulemakings have been initiated that may increase the number of facilities monitoring for PFAS in the future.

PFAS ECHO: Facilities in Industries that May Be Handling PFAS Listing

Regulators and the public have expressed interest in knowing which regulated entities may be using PFAS. EPA has developed a dataset from various sources that show which industries may be handling PFAS. Approximately 120,000 facilities subject to federal environmental programs have operated or currently operate in industry sectors with processes that may involve handling and/or release of PFAS.

PFAS ECHO FIRE TRAIN: Facilities in Industries that May Be Handling PFAS Listing

A list of fire training sites was added to the Industry Sectors dataset using a keyword search on the permitted facilitys name to identify sites where fire-fighting foam may have been used in training exercises. Additionally, you may view an example spreadsheet of the subset of fire training facility data, as well as the keywords used in selecting or deselecting a facility for the subset. as well as the keywords used in selecting or deselecting a facility for the subset. These keywords were tested to maximize accuracy in selecting facilities that may use fire-fighting foam in training exercises, however, due to the lack of a required reporting field in the data systems for designating fire training sites, this methodology may not identify all fire training sites or may potentially misidentify them.

PFAS PT 139 AIRPORT: All Certified Part 139 Airports PFAS Information Listing

Since July 1, 2006, all certified part 139 airports are required to have fire-fighting foam onsite that meet military specifications (MIL-F-24385) (14 CFR 139.317). To date, these military specification fire-fighting foams are fluorinated and have been historically used for training and extinguishing. The 2018 FAA Reauthorization Act has a provision stating that no later than October 2021, FAA shall not require the use of fluorinated AFFF. This provision does not prohibit the use of fluorinated AFFF at Part 139 civilian airports; it only prohibits FAA from mandating its use. The Federal Aviation Administration?s document AC 150/5210-6D - Aircraft Fire Extinguishing Agents provides guidance on Aircraft Fire Extinguishing Agents, which includes Aqueous Film Forming Foam (AFFF).

Next Scheduled EDR Contact: 04/14/2025
Data Release Frequency: Varies

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

WASTEWATER PITS: Oil Wastewater Pits Listing
Water officials discovered that oil producers have been dumping chemical-laden wastewater into hundreds of unlined pits that are operating without proper permits. Inspections completed by the Central Valley Regional Water Quality Control Board revealed the existence of previously unidentified waste sites. The water boards review found that more than one-third of the region's active disposal pits are operating without permission.

WDR: Waste Discharge Requirements Listing
In general, the Waste Discharge Requirements (WDRs) Program (sometimes also referred to as the "Non Chapter 15 (Non 15) Program") regulates point discharges that are exempt pursuant to Subsection 20090 of Title 27 and not subject to the Federal Water Pollution Control Act. Exemptions from Title 27 may be granted for nine categories of discharges (e.g., sewage, wastewater, etc.) that meet, and continue to meet, the preconditions listed for each specific exemption. The scope of the WDRs Program also includes the discharge of wastes classified as inert, pursuant to section 20230 of Title 27.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants
The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations
EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data
Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

Version Date:	2021

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

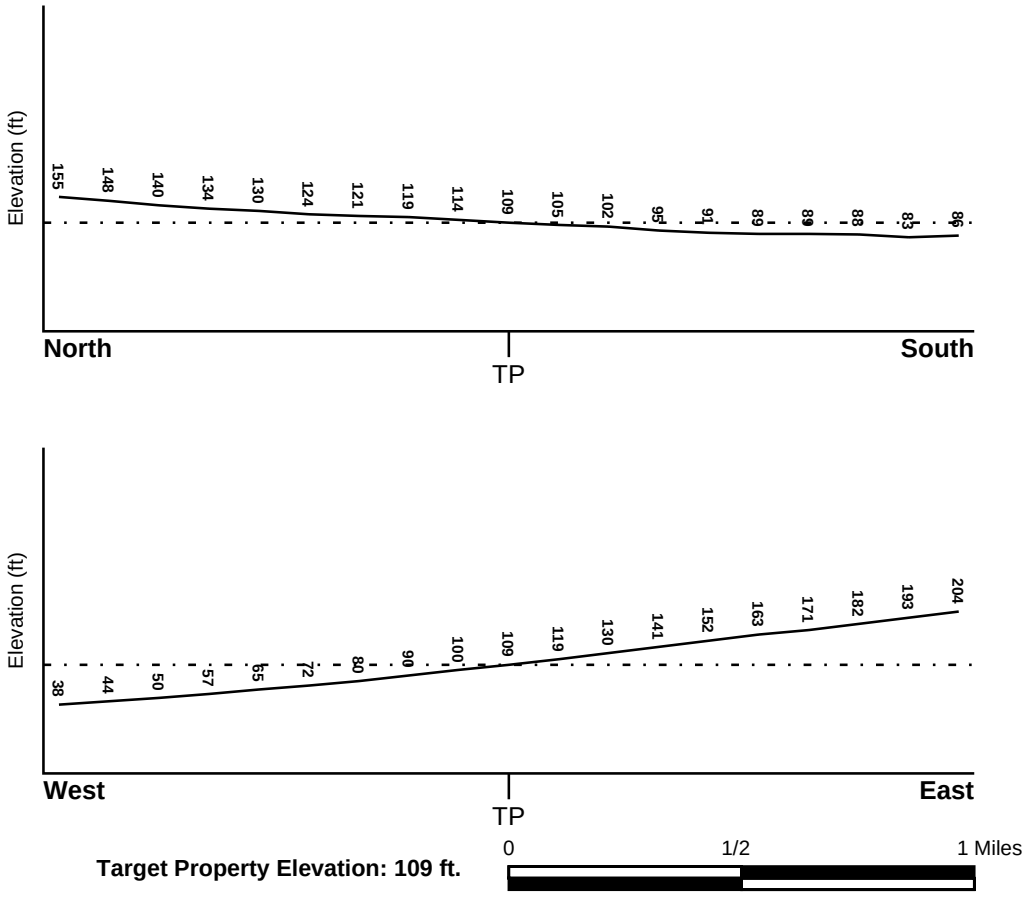

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General WSW

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Target Property Elevation: 109 ft.

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

Flood Plain Panel at Target Property	FEMA Source Type
06001C0057G	FEMA FIRM Flood data

Additional Panels in search area:	FEMA Source Type

06001C0059G	FEMA FIRM Flood data

NATIONAL WETLAND INVENTORY

NWI Quad at Target Property	NWI Electronic Data Coverage
OAKLAND WEST	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Status:	Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

For additional site information, refer to Physical Setting Source Map Findings.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name: Tierra

Soil Surface Texture: loam

Hydrologic Group: Class D - Very slow infiltration rates. Soils are clayey, have a high water table, or are shallow to an impervious layer.

Soil Drainage Class: Moderately well drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0 inches	11 inches	loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay	Max: 1.4 Min: 0.42	Max: 8.4 Min: 5.6
2	11 inches	31 inches	clay	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay	Max: 1.4 Min: 0.42	Max: 8.4 Min: 5.6
3	31 inches	59 inches	sandy clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay	Max: 1.4 Min: 0.42	Max: 8.4 Min: 5.6

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)
Source: United States Geologic Survey
EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map
Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.
Source: FEMA
Telephone: 877-336-2627
Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005, 2010 and 2015 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetland Inventory
Source: Department of Fish and Wildlife
Telephone: 916-445-0411

HYDROGEOLOGIC INFORMATION

AQUIFLOW^{R} Information System
Source: EDR proprietary database of groundwater flow information
EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit
Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
Telephone: 800-672-5559
SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)
This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

OTHER STATE DATABASE INFORMATION

Groundwater Ambient Monitoring & Assessment Program
State Water Resources Control Board
Telephone: 916-341-5577
The GAMA Program is Californias comprehensive groundwater quality monitoring program. GAMA collects data by testing the untreated, raw water in different types of wells for naturally-occurring and man-made chemicals. The GAMA data includes Domestic, Monitoring and Municipal well types from the following sources, Department of Water Resources, Department of Heath Services, EDF, Agricultural Lands, Lawrence Livermore National Laboratory, Department of Pesticide Regulation, United States Geological Survey, Groundwater Ambient Monitoring and Assessment Program and Local Groundwater Projects.

Water Well Database
Source: Department of Water Resources
Telephone: 916-651-9648

California Drinking Water Quality Database
Source: Department of Public Health
Telephone: 916-324-2319
The database includes all drinking water compliance and special studies monitoring for the state of California since 1984. It consists of over 3,200,000 individual analyses along with well and water system information.

Geothermal Wells Listing
Department of Conservation
Telephone: 916-445-9686
Geothermal well means a well constructed to extract or return water to the ground after it has been used for heating or cooling purposes. Geothermal wells in California (except for wells on federal leases which are administered by the Bureau of Land Management) are permitted, drilled, operated, and permanently sealed and closed (plugged and abandoned) under requirements and procedures administered by the Geothermal Section of the Department of Conservations Geologic Energy Management Division (CalGEM, formerly DOGGR).

California Oil and Gas Well Locations
Source: Dept of Conservation, Geologic Energy Management Division
Telephone: 916-323-1779
Oil and Gas well locations in the state.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

California Earthquake Fault Lines
Source: California Division of Mines and Geology
The fault lines displayed on EDR's Topographic map are digitized quaternary fault lines prepared in 1975 by the United State Geological Survey. Additional information (also from 1975) regarding activity at specific fault lines comes from California's Preliminary Fault Activity Map prepared by the California Division of Mines and Geology.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E1527 - 21), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E2247 - 16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E1528 - 22) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE: A review of the SEMS-ARCHIVE list, as provided by EDR, and dated 12/19/2024 has

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

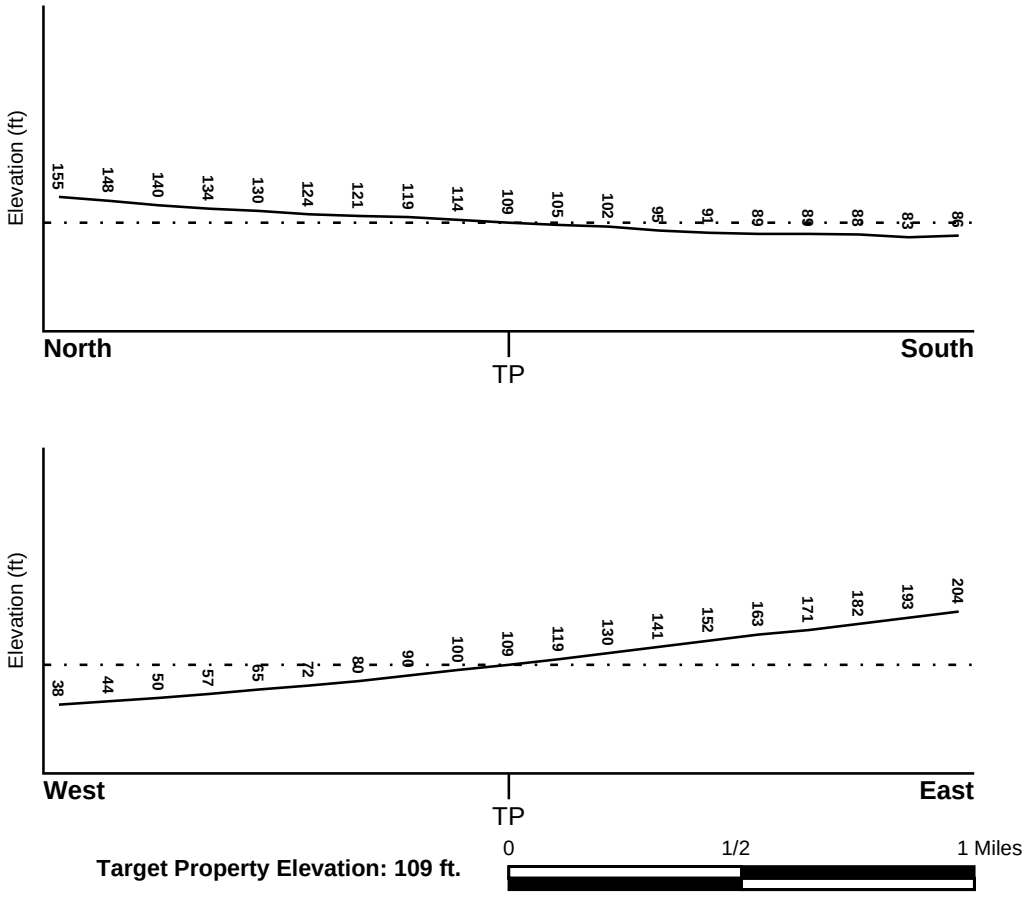

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General WSW

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Target Property Elevation: 109 ft.

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

OAKLAND WEST	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Status:	Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name: Tierra

Soil Surface Texture: loam

Hydrologic Group: Class D - Very slow infiltration rates. Soils are clayey, have a high water table, or are shallow to an impervious layer.

Soil Drainage Class: Moderately well drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0 inches	11 inches	loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay	Max: 1.4 Min: 0.42	Max: 8.4 Min: 5.6
2	11 inches	31 inches	clay	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay	Max: 1.4 Min: 0.42	Max: 8.4 Min: 5.6
3	31 inches	59 inches	sandy clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay	Max: 1.4 Min: 0.42	Max: 8.4 Min: 5.6

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)
Source: United States Geologic Survey
EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.
Source: FEMA
Telephone: 877-336-2627
Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005, 2010 and 2015 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetland Inventory
Source: Department of Fish and Wildlife
Telephone: 916-445-0411

HYDROGEOLOGIC INFORMATION

AQUIFLOW^{R} Information System
Source: EDR proprietary database of groundwater flow information
EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit
Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
Telephone: 800-672-5559
SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)
This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

OTHER STATE DATABASE INFORMATION

Groundwater Ambient Monitoring & Assessment Program
State Water Resources Control Board
Telephone: 916-341-5577
The GAMA Program is Californias comprehensive groundwater quality monitoring program. GAMA collects data by testing the untreated, raw water in different types of wells for naturally-occurring and man-made chemicals. The GAMA data includes Domestic, Monitoring and Municipal well types from the following sources, Department of Water Resources, Department of Heath Services, EDF, Agricultural Lands, Lawrence Livermore National Laboratory, Department of Pesticide Regulation, United States Geological Survey, Groundwater Ambient Monitoring and Assessment Program and Local Groundwater Projects.

Water Well Database
Source: Department of Water Resources
Telephone: 916-651-9648

California Drinking Water Quality Database
Source: Department of Public Health
Telephone: 916-324-2319
The database includes all drinking water compliance and special studies monitoring for the state of California since 1984. It consists of over 3,200,000 individual analyses along with well and water system information.

Geothermal Wells Listing
Department of Conservation
Telephone: 916-445-9686
Geothermal well means a well constructed to extract or return water to the ground after it has been used for heating or cooling purposes. Geothermal wells in California (except for wells on federal leases which are administered by the Bureau of Land Management) are permitted, drilled, operated, and permanently sealed and closed (plugged and abandoned) under requirements and procedures administered by the Geothermal Section of the Department of Conservations Geologic Energy Management Division (CalGEM, formerly DOGGR).

California Oil and Gas Well Locations
Source: Dept of Conservation, Geologic Energy Management Division
Telephone: 916-323-1779
Oil and Gas well locations in the state.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

California Earthquake Fault Lines
Source: California Division of Mines and Geology
The fault lines displayed on EDR's Topographic map are digitized quaternary fault lines prepared in 1975 by the United State Geological Survey. Additional information (also from 1975) regarding activity at specific fault lines comes from California's Preliminary Fault Activity Map prepared by the California Division of Mines and Geology.

RADON

State Database: CA Radon
Source: Department of Public Health
Telephone: 916-210-8558
Radon Database for California

Area Radon Information
Source: USGS
Telephone: 703-356-4020
The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

EPA Radon Zones
Source: EPA
Telephone: 703-356-4020
Sections 307 & 309 of IRAA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.

OTHER

Airport Landing Facilities: Private and public use landing facilities
Source: Federal Aviation Administration, 800-457-6656

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by Ninyo & Moore were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

EDR Topographic Map Library has been searched by EDR and maps covering the target property location as provided by Ninyo & Moore were identified for the years listed below. EDR's Historical Topo Map Report is designed to assist professionals in evaluating potential liability on a target property resulting from past activities. EDRs Historical Topo Map Report includes a search of a collection of public and private color historical topographic maps, dating back to the late 1800s.

Search Results:

P.O.# NA
Project: 404439003

Coordinates:

Latitude:	37.848729 37° 50' 55" North
Longitude:	-122.269547 -122° 16' 10" West
UTM Zone:	Zone 10 North
UTM X Meters:	564263.77

This Report contains certain information obtained from a variety of public and other sources reasonably available to Environmental Data Resources, LLC. It cannot be concluded from this Report that coverage information for the target and surrounding properties does not exist from other sources. This Report is provided on an "AS IS", "AS AVAILABLE" basis. **NO WARRANTY EXPRESS OR IMPLIED IS MADE WHATSOEVER IN CONNECTION WITH THIS REPORT. ENVIRONMENTAL DATA RESOURCES, LLC AND ITS SUBSIDIARIES, AFFILIATES AND THIRD PARTY SUPPLIERS DISCLAIM ALL WARRANTIES, OF ANY KIND OR NATURE, EXPRESS OR IMPLIED, ARISING OUT OF OR RELATED TO THIS REPORT OR ANY OF THE DATA AND INFORMATION PROVIDED IN THIS REPORT, INCLUDING WITHOUT LIMITATION, ANY WARRANTIES REGARDING ACCURACY, QUALITY, CORRECTNESS, COMPLETENESS, COMPREHENSIVENESS, SUITABILITY, MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE, TITLE, NON-INFRINGEMENT, MISAPPROPRIATION, OR OTHERWISE. ALL RISK IS ASSUMED BY THE USER. IN NO EVENT SHALL ENVIRONMENTAL DATA RESOURCES, LLC OR ITS SUBSIDIARIES, AFFILIATES OR THIRD PARTY SUPPLIERS BE LIABLE TO ANYONE FOR ANY DIRECT, INCIDENTAL, INDIRECT, SPECIAL, CONSEQUENTIAL OR OTHER DAMAGES OF ANY TYPE OR KIND (INCLUDING BUT NOT LIMITED TO LOSS OF PROFITS, LOSS OF USE, OR LOSS OF DATA), ARISING OUT OF OR IN ANY WAY CONNECTED WITH THIS REPORT OR ANY OF THE DATA AND INFORMATION PROVIDED IN THIS REPORT.** Any analyses, estimates, ratings, environmental risk levels, or risk codes provided in this Report are provided for illustrative purposes only, and are not intended to provide, nor should they be interpreted as providing any facts regarding, or prediction or forecast of, any environmental risk for any property. Only an assessment performed by a qualified environmental professional can provide findings, opinions or conclusions regarding the environmental risk or conditions in, on or at any property.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at approximately five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1920 through current. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 660 feet of the target property.

Summary information obtained is provided in the text of this report.

RECORD SOURCES

The EDR City Directory Report accesses a variety of business directory sources, including Haines, InfoUSA, Polk, Cole, Bresser, and Stewart. Listings marked as EDR Digital Archive access Cole and InfoUSA records. The various directory sources enhance and complement each other to provide a more thorough and accurate report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer.

RESEARCH SUMMARY

The following research sources were consulted in the preparation of this report. An "X" indicates where information was identified in the source and provided in this report.

EDR Aerial Photo Decade Package

03/06/25

Site Name:

1890 Alcatraz Avenue
1890 Alcatraz Avenue
Berkeley, CA 94703
EDR Inquiry # 7917334.8

Client Name:

Ninyo & Moore
1401 Halyard Drive, Suite 110
West Sacramento, CA 95691
Contact: Luke Swickard

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

Good morning,

The City of Berkeley operates a separate Environmental Health Department from Alameda County. You will need to contact their office for records: toxics@berkeleyca.gov.

Thank you,

Division of Environmental Protection
Environmental Health Department
Alameda County Health

1131 Harbor Bay Pkwy
Alameda, CA 94502
TEL (510) 567-6700

Subject:

E-mail submitted from: Alameda County Environmental Health

Assessor Parcel Number:	52-1527-24-1
Property Address Number:	1890
Property Address Street:	Alcatraz Avenue
Property Address City:	Berkeley

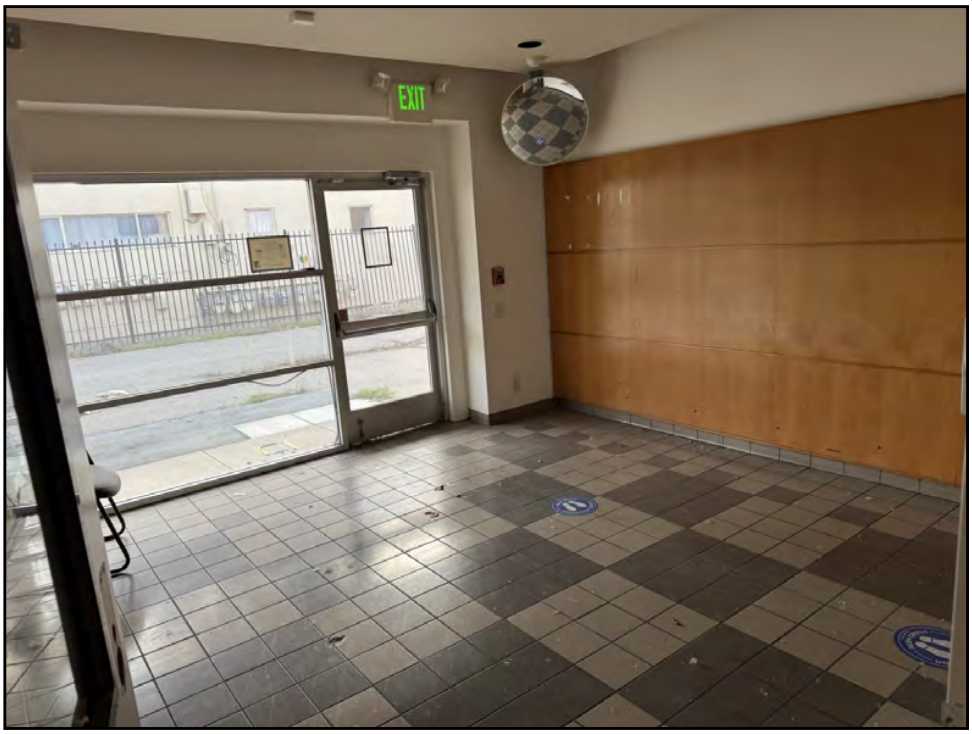

Contact Full Name:	Luke I. Swickard
Contact Email:	lswickard@ninyoandmoore.com
Reason for Request:	Hello, I am requesting any and all environmental, hazardous materials, AST, UST, etc records for the above address. Thanks

Appendix F -

Site Photographs

1: View of the exterior of the Site building.

2: View of the lobby area.

3: View of the large central area.

4: View of a typical office.

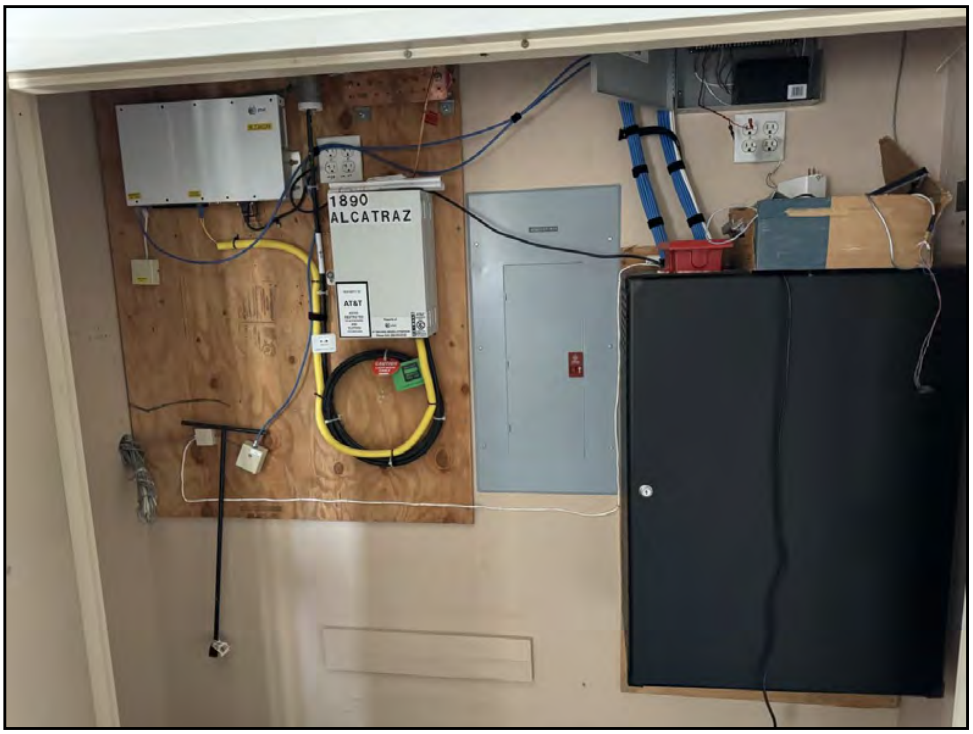

5: View of a typical appointment room.

6: View of a typical bathroom.

7: View of the loft storage area.

8: View of the electrical and security panels.

9: View of several containers of paints and primers.

10: View of two containers of paint.

11: View of a typical storm drain inlet.

12: View of the concrete patio area.

13: View of an apartment building (1871 Alcatraz Ave) to the north of the Site.

14: View of Pelican Plumbers (1881 Alcatraz Ave) to the north of the Site.

15: View of an apartment building (6321 Dover St) to the south of the Site.

16: View of a residential house (1839 63rd St) to the south of the Site.

17: View of an apartment building (1896 Alcatraz Ave) to the east of the Site.

18: View of Mi Mundo Preschool (1866 Alcatraz Ave) to the west of the Site.

19: View down Alcatraz Avenue, facing east.

20: View down Alcatraz Avenue, facing west.

Appendix G -

Vapor Encroachment Screening Matrix

Vapor Encroachment Screening Matrix

Phase I ESA Vapor Encroachment Conditions (VEC) matrix includes a (1) Search Radius Test, (2) Chemicals of Concern Test (COC), and (3) a Critical Distance Test [1].

(1) Search Radius Test: Are there any known or suspect contaminated properties in the primary area of concern within the corresponding search radii (1/3 mile radius for non-petroleum hydrocarbons, and 1/10 mile radius for petroleum hydrocarbons)?

☐ Yes ☒ No — If ***No***, then screening for a VEC is complete and no VEC *currently* exists, go to #4. If ***Yes***, then:

(2) Chemicals of Concern Test: Are COC likely to be present within the area of concern for those known or suspect contaminated sites identified based on the Search Distance Test?

☐ Yes ☒ No — If ***No***, then screening for a VEC is complete and no VEC *currently* exists, go to #4. If ***Yes***, then:

(3) Critical Distance Test*: A plume test to determine whether or not COC in the contaminated plume(s) may be within the critical distance.

☐ Yes ☒ No — (3a) Is information related to the contaminated(s) plume available (i.e. isoconcentration maps, site drawings, etc.)?

(3b) If ***No***, then a VEC cannot be ruled out; check ***Yes*** in #4 below indicating it is likely a VEC exists. If ***Yes***, then:

☐ Yes ☒ No — (3c) Is the site less than 100 feet to the nearest edge of a contaminated [non-petroleum hydrocarbon] plume(s)? If ***Yes***, then check ***Yes*** in #4 below indicating it is likely a VEC exists.

☐ Yes ☒ No — (3d) Is the site less than 30 feet to the nearest edge of a dissolved petroleum hydrocarbon plume(s)? If ***Yes***, then check ***Yes*** in #4 below indicating it is likely a VEC exists.

*If the distance from the nearest edge of a contaminated plume to the nearest existing or planned structure on the site is less than 100 feet for non-petroleum hydrocarbon COC, or less than 30 feet for dissolved petroleum hydrocarbons, then it is presumed that a VEC *currently* exists beneath the site. If the distance from the nearest edge of the contaminated plume is greater than or equal to 100 feet for non-petroleum hydrocarbons, or 30 feet for dissolved petroleum hydrocarbon chemicals of concern, then it is presumed unlikely that a VEC *currently* exists beneath the site.

(4) Is it likely that a VEC *currently* exists beneath the site?

☐ Yes ☒ No — If ***No***, then the VEC screening is complete and no further investigation is recommended at this time. If ***Yes***, Ninyo & Moore recommends performing additional assessment, such as a Tier 2 VEC assessment according to ASTM E 2600-10.

[1] Based on guidance presented in the ASTM E 2600-10 Standard.
