The CISD should be facilitated by a Peer Support Team Member selected by the Peer Support Coordinator. Attendance at debriefings shall be mandatory for all employees directly involved in the critical incident; however, participation in the discussion is not required. CISD's should consist of a Peer Support Mental Health Professional, and generally one Peer Support Team Member for every 5 employees. A Chaplain is optional but recommended, see Chaplain Policy for further. Excused absences may only be granted by the employee's respective Division Commander, or their designee.

1032.17.2 CISD OBJECTIVES

The CISD should be conducted with the following objectives in mind:

- (a) Mitigating the impact of a traumatic incident;
- (b) Facilitating the normal recovery process;
- (c) Providing emotional support to the employee;
- (d) Providing information regarding possible reactions the employee or his/her family may experience;
- (e) Suggesting resources and referrals to the employee; and/or
- (f) Helping to identify members who may benefit from additional support or professional care.

1032.17.3 CISD LOCATION

The CISD should be conducted in any location, preferably outside of the Public Safety Building, which provides ample space, privacy, and freedom from distractions. The site selection is subject to the approval of the Peer Support Coordinator, who may request an alternate location if he/she determines the site to be unsuitable.

Berkeley Police Department

Law Enforcement Manual

Law Enforcement Manual

The Critical Incident Stress Management (CISM) and Peer Support Program

1032.18 ADDITIONAL FACTORS

If the employee has caused injury or death to another (i.e., vehicle accident, shooting, etc.), the employee's Commanding Officer may:

- (a) Schedule a mandatory appointment for the employee with a licensed psychologist.
 1. The mandated visit shall be educational and informative in nature and arranged through the Professional Standards Division Captain. The visit with the psychologist is to meant provide the employee with the opportunity to discuss the incident in a completely confidential environment and to provide helpful information to the employee regarding possible psychological reactions to the incident. The psychologist shall not furnish information about the visit to the Department unless he/she determines the employee is experiencing complications which may result in danger to the employee or others. Any subsequent counseling would be completely voluntary.
- (b) Grant paid administrative leave to the employee for a period of time (as determined by the Chief of Police) if the employee is scheduled to work immediately following the incident.
- (c) Direct the employee to contact his/her supervisor to discuss a temporary reassignment which will ensure a lapse of time before possible exposure to similar, additional traumatic incidents.

1032.19 OVERTIME

Any member of the Peer Support Team who is required, asked, or authorized to perform his/her peer support duties by a supervisor or above shall be paid overtime or compensatory time if the time involved in the Peer Support Team duties is outside of his/her regular duty hours and such payment does not conflict with overtime eligibility provisions of a collective bargaining agreement.

1032.20 PEER SUPPORT ADVISORY COMMITTEE

The committee should be made up of the following personnel

- (a) Peer Support Team Liaison
- (b) Peer Support Team Coordinator(s)
- (c) Employee Labor Group Representative(s)
- (d) At Large member – Professional Staff
- (e) At Large member – CSO
- (f) At Large member – PSD
- (g) At Large member – Peer Support Team
- (h) Peer Support Mental Health Professional

1032.20.1 PURPOSE

The purpose of the Advisory Committee shall be to support the Peer Support Team. The Advisory Committee shall perform the following support services for the Peer Support Team:

Berkeley Police Department

Law Enforcement Manual

Law Enforcement Manual

The Critical Incident Stress Management (CISM) and Peer Support Program

- (a) Provide recommendations for program continuity
- (b) Assess training needs and provide recommendations to the Department
- (c) Assess and recommend program utilization goals
- (d) Assess and make recommendations to enhance program effectiveness
- (e) Explore sources of funding and make recommendations for materials or equipment that would enhance peer team operations such as team shirts, team events, additional training or conferences, additional outside resources, etc.

1032.20.2 MEETINGS

- (a) The committee should meet quarterly, or as needed, for the first 12 months following the program introduction.
- (b) The committee should meet semi-annually, or as needed, during the second 12 months of program operation
- (c) The committee should meet annually, as needed, thereafter
- (d) The committee may be disbanded any time after the first 12 months if, in the opinion of the Team Liaison, Team Coordinator(s) and Team Mental Health Professional, the committee is no longer needed.

1032.21 REMOVAL OF A TEAM MEMBER

Any member of the Peer Support Team may be removed for any of the following reasons:

- (a) Breach of confidentiality
- (b) Failure to follow the standard of care
- (c) Abuse of Team membership or Team resources
- (d) Conduct unbecoming

A team member may be suspended and/or removed from the team based on a completed investigation by the Team Liaison, or in the instance where the Team Liaison is investigated, the Professional Standards Captain.

A team member will have the right to appeal any suspension or removal, within 30 days of notification of said suspension or removal, to the Professional Standards Captain via a memo or in person meeting. The Captain's decision will be final.

A team member may be able to return to the team after suspension or removal based on the recommendation of the Team Liaison, Team Coordinator(s) and the Team Mental Health Professional. The recommendation will go to the Professional Standards Captain and they will determine when the suspension is finished and/or if the team member may return.

1032.22 TEMPORARY OR PERMANENT LEAVE FROM THE TEAM

Team Members may choose to leave the Team at any time. This leave can be temporary, so as to relieve them from their duties for a short time or it can be permanent. If a member leaves permanently, but later wish to return, the member will need to be re-nominated in another round.

Berkeley Police Department

Law Enforcement Manual

Law Enforcement Manual

The Critical Incident Stress Management (CISM) and Peer Support Program

1032.23 USE OF CHAPLAINS

Chaplains should be utilized whenever possible. Peer Support Team Members may refer employees to contact the Chaplains where applicable. The Chaplains may also be called upon to provide support services to the general public, other City employees, or individuals outside of the Department. See the Chaplains Policy for further.

Employee Absences

1033.1 PURPOSE AND SCOPE

This policy defines the Department's reporting procedures for employee absences.

1033.2 POLICY

It is the policy of the Berkeley Police Department that all employees adhere to prescribed procedures relative to all anticipated and unanticipated absences.

1033.3 PROCEDURES

The Absence Report form shall be used whenever an employee will be absent from his/her assigned duty or becomes absent during the assigned duty.

- (a) The form should be used whenever an employee is absent, or expected to be absent, because of vacation, floating holiday, recovery (compensatory time off), sick leave, family sick leave, military leave, death leave, parental leave, Worker's Compensation leave, suspension, leave without pay, organizational leave or other absences not amounting to an extended leave without pay.

1033.4 ANTICIPATED ABSENCE

When an employee requests a day off, he or she should complete an Absence Report form.

- (a) If the time off requested is more than two weeks away and staffing has not been completed, the employee shall:
 - 1. For Operations/Patrol: Place the request form in the designated location within the Lieutenant's Office.
 - 2. For Special Assignments: Place the request form in the designated location within their unit/detail or deliver the form directly to their supervisor.
- (b) If the time off requested is less than two weeks away, the employee shall:
 - 1. For Operations/Patrol: Place the request form in the Team tray, or deliver the form directly to their supervisor.
 - 2. For Special Assignments: Deliver the request form directly to their supervisor.

The employee has the responsibility to submit supporting documents with the request form (e.g. military leave orders, etc.).

1033.5 UNANTICIPATED ABSENCE

When an employee makes a request for sick leave, family sick leave, death leave, Worker's Compensation leave or another unanticipated (emergency) absence, the request shall be made to a supervisor or commanding officer of the employee's division or, if none are available, the Communications Center supervisor on duty or in his/her absence an Operations Division supervisor or commanding officer.

Berkeley Police Department

Law Enforcement Manual

Law Enforcement Manual

Employee Absences

- (a) Except in the case of emergencies, absence because of illness or injury shall be reported at least one hour prior to the start of the employee's shift. Other absences shall be reported as far in advance of the effective date/time as possible.

Upon notification of an employee's unanticipated absence the supervisor shall prepare the Absence Report and, if applicable, forward it to the employee's actual supervisor.

1033.6 BPA ASSOCIATION RELEASE TIME

Berkeley Police Association Members are allotted a specified number of hours for "Release Time" each year for Association related activities (BPA meetings, negotiations, PRC representation and preparation, training, etc.). A BPA member using Release Time, should notify their supervisor as far in advance as possible so that a supervisor may fill any vacancies and post overtime if necessary.

Complaint Review Board

1034.1 PURPOSE AND SCOPE

This policy establishes a process for the Berkeley Police Department to review complaints involving its employees.

This review process shall be in addition to any other review or investigation that may be conducted by any outside or multi-agency entity having jurisdiction over the investigation or evaluation of the complaint.

1034.2 POLICY

A Review Board will objectively evaluate complaints involving its members to ensure that their authority is used lawfully, appropriately and is consistent with training and policy.

The Chief of Police has the sole authority to convene a Review Board.

1034.3 ESTABLISHED REVIEW BOARDS

The Chief of Police has established the following standing Review Boards:

- (a) Complaint Board of Review
- (b) Traffic Collision Board of Review (see the Traffic Collision Review Board Policy)
- (c) Use of Force Review Board (see the Use of Force Review Board Policy)
- (d) Use of Force Training Review Board (see the Use of Force Policy)

1034.4 RESPONSIBILITY

The Complaint Review Board aka “Board of Review” shall be responsible for the examination of Internal Affairs Bureau investigations of external personnel complaints and, if directed by the Chief of Police, policy complaints.

1034.5 INVESTIGATIVE REPORTS

IAB’s investigative report is a confidential document that will not be released to the subject officer or his/her chosen representative prior to the time that copies are sent to members of the Board of Review and/or the Chief of Police.

- (a) In cases of great sensitivity, the Chief of Police may keep the report confidential until such time as required by law to release the information.

1034.6 COMPOSITION

The Complaint Review Board shall be composed of the following:

- (a) The Professional Standards Division Captain (Chair/Hearing Officer)
- (b) An Internal Affairs Sergeant
- (c) A designated on-duty patrol sergeant,
- (d) The division captain of the subject employee,

Berkeley Police Department

Law Enforcement Manual

Law Enforcement Manual

Complaint Review Board

- (e) A representative of the City Manager's Office, and
- (f) 2 representatives of the subject employee's labor group
- (g) The subject employee (optional)

All sworn participating members of the Board of Review must be of equal or higher rank than the subject officer in the complaint under consideration.

The Chief of Police shall consider the nature of the subject matter under inquiry and the relevant qualifications of the employees selected to serve as members.

1034.7 REPRESENTATION

As provided by law or as directed by the Chief of Police, the Board will allow a subject employee to have a representative (e.g., legal counsel, a collective bargaining unit representative, etc.) present during a Board proceeding in which he/she is participating.

1034.8 ATTENDANCE

The subject employee and his/her chosen representative are encouraged to attend the Board of Review hearing to present arguments or explanations and to answer questions which may be presented to them by Board members. Subject employees are not required to attend unless specifically ordered to do so by the Chief of Police.

1034.9 ADDITIONAL ATTENDEES

In addition to the Board, additional attendees may be needed/requested as follows:

- (a) The Chief of Police may invite other person(s) to sit with the Board as participating members as he/she deems appropriate.
- (b) Any Board member may select a qualified subject matter expert or resource person to provide relevant information to the Board.

1034.10 REVIEW BOARD PROCEDURES

The Complaint Board of Review shall examine the evidence thoroughly and may ask clarifying questions to the investigator and parties present.

Following the Board's review and discussion, each Board member will make a recommendation to the Chair relative to their finding(s). If the subject officer is in attendance, he/she shall be excused during this portion of the review. The Board will need to reach a majority decision in order to present the recommendation for disposition to the Chair.

Recommendations for disposition are as follows:

- **Unfounded** - When the investigation discloses that the alleged acts did not occur or did not involve department members. Complaints that are determined to be frivolous will fall within the classification of unfounded (Penal Code § 832.8).
- **Exonerated** - When the investigation discloses that the alleged act occurred but that the act was justified, lawful, within policy and/or proper.

Berkeley Police Department

Law Enforcement Manual

Law Enforcement Manual

Complaint Review Board

- **Not sustained** - When the investigation discloses that there is insufficient evidence to sustain the complaint or fully exonerate the member.
- **Sustained** -When the investigation discloses that the alleged act occurred and is in violation of departmental policy.

The Chair will listen to the recommendations made by the other Board members but will have the responsibility for making the final disposition recommendation to the Chief of Police.

1034.11 FINAL REPORT TO THE CHIEF OF POLICE

Unless otherwise directed by the Chief of Police, the Chair shall submit a final report to the Chief of Police within ten business days of the hearing. The final report shall contain:

- (a) The findings of the Board
- (b) The concurring or non-concurring signatures of each member.
 1. Dissenting Board members may submit a minority report which shall be included with the final report.
- (c) Recommendations of the Board (when directed)
- (d) Documents, photographs, and related evidence used during the Board's examination shall be submitted with the final report.

The Chief of Police retains the right to agree or disagree with the final recommendations of the Board, and to limit or augment those recommendations.

Upon approval of the final report by the Chief of Police, the Board shall be deactivated.

1034.12 NOTIFICATION OF SUBJECT EMPLOYEE

The subject employee shall be notified of the Chief's decision as soon as possible (see Personnel Complaints Policy for further).

1034.13 FINAL REPORT FORMAT

The memorandum format below shall be used when preparing a final report:

EXEMPLAR

To: (Chief of Police)

From: (Name of Review Board)

Subject: (XXXXXXXXXXXXXXXXXXXX)

Composition of the Board:

The Chair and members of the Board will be identified.

Summary of the Investigation:

This will be a statement in chronological sequence of the incident and the Board's examination.

Traffic Collision Review Board

1035.1 PURPOSE AND SCOPE

This policy establishes a process for the Berkeley Police Department to review the traffic collisions and complaints involving its employees.

This review process shall be in addition to any other review or investigation that may be conducted by any outside or multi-agency entity having jurisdiction over the investigation or evaluation of the complaint or traffic collision.

1035.2 POLICY

A Review Board will objectively evaluate traffic collisions involving its members to ensure that their authority is used lawfully, appropriately and is consistent with training and policy.

The Chief of Police has sole authority to convene a Review Board as provided by this policy.

1035.3 ESTABLISHED REVIEW BOARDS

The Chief of Police has established the following standing Review Boards which may be convened as needed or directed by policy:

- (a) Complaint Board of Review (see the Complaint Review Board Policy)
- (b) Traffic Collision Board of Review
- (c) Use of Force Review Board (see the Use of Force Review Board Policy)
- (d) Use of Force Training Review Board (see the Use of Force Policy)

1035.4 RESPONSIBILITY

The Traffic Collision Review Board shall be responsible for the review of all traffic collisions involving a Department employee operating a City-owned vehicle.

1035.5 INVESTIGATIVE REPORTS

The collision report will be distributed to the Board Members prior to the review.

1035.6 COMPOSITION

The Traffic Collision Board of Review shall be composed of the following:

- (a) Three lieutenants (one lieutenant shall be selected as the Chair)
- (b) The subject employee (optional)
- (c) The subject employee's representative (optional)

1035.7 REPRESENTATION

As provided by law or as directed by the Chief of Police, the Board will allow a subject employee to have a representative (e.g., legal counsel, a collective bargaining unit representative, etc.) present during a Board proceeding in which he/she is participating.

1035.9 ADDITIONAL ATTENDEES

In addition to the Board, additional attendees may be needed/requested as follows:

- (a) The Chief of Police may invite other person(s) to sit with the Board as participating members as he/she deems appropriate.
- (b) Any Board member may select a qualified subject matter expert or resource person to provide relevant information to the Board.

1035.10 REVIEW BOARD PROCEDURES

The Traffic Collision Review Board shall examine the evidence thoroughly and may ask clarifying questions to the involved employee, if present.

Following the Board's review and discussion, each Board member will make a recommendation to the Chair. Once a majority decision is reached the Chair will prepare a final report to the Chief of Police indicating that the collision was "Preventable" or "Not Preventable".

1035.11 FINAL REPORT TO THE CHIEF OF POLICE

Unless otherwise directed by policy or the Chief of Police, the Chair shall submit a final report of the Board's examination and any other related reports within ten (10) business days following the end of the hearing to the Chief of Police.

- (a) The final report shall contain the findings of the Board and the concurring or non-concurring signatures of all its members.
 1. Dissenting members of a Board may submit a minority report which shall be included with the final report.
 2. The final report shall contain the findings and, when so directed, recommendations of the Board.
 3. Upon approval of the final report by the Chief of Police, the Board shall be deactivated.
- (b) Documents, photographs, and related evidence used during the Board's examination shall be submitted with the final report.

The Chief of Police retains the right to agree or disagree with the final recommendations of the Board of Review, and to limit or augment those recommendations.

1035.12 NOTIFICATION OF SUBJECT EMPLOYEE

The subject employee shall be notified of the decision of the Chief of Police as soon as possible after the decision is made (see Personnel Complaints Policy for further).

LGBTQ+ Liaison Officer

1040.1 PURPOSE AND SCOPE

This Department procedure establishes guidelines for the role of the Berkeley Police Department's LGBTQ+ Liaison Officer with the LGBTQ+ community.

1040.2 POLICY

Outline the role of the LGBTQ+ Liaison Officer within the Berkeley LGBTQ+ community.

1040.3 INTRODUCTION

The Berkeley Police Department is committed to fostering a healthy, trusting, and inclusive relationship with the City of Berkeley's LGBTQ+ community through on-going training and with designated LGBTQ+ Liaison Officers.

1040.4 PROCEDURES

TQ+ Liaison Officers strengthen the relationship between the LGBTQ+ community and the Police Department by creating mutual trust and confidence through community involvement, department education, and the provision of fair and professional policing serv The LGBTQ+ Liaison Officers strengthen the relationship between the LGBTQ+ community and the Police Department by creating mutual trust and confidence in the Police through community involvement, departmental education, and the provision of fair and professional policing services.

- Serves as a personal, point of contact between the Police Department and the LGBTQ+ community.
- Assists, advises, and consults with the Police Department leadership and other officers on cases involving the LGBTQ+ community or LGBTQ+ issues.
- Provides/coordinates training for members of the department on LGBTQ+ topics.
- Meets with and provides a forum for business owners, community groups, and individuals of the LGBTQ+ community, and presents information on relevant law enforcement issues.
- Provides a forum for the LGBTQ+ community to express its concerns regarding crimes directed against the LGBTQ+ community.
- Attends events in the LGBTQ+ community(when possible) as a representative of the Police Department.
- Collaborates with community leaders, residents and businesses to design and implement public safety projects and programs to establish a closer, more effective dialogue between the police and the LGBTQ+ community.
- Identifies and attends training related to LGBTQ+ topics.
- Facilitates an overall open relationship between the LGBTQ+ community and the Police Department.

EARLY WARNING SYSTEM

1041.1 PURPOSE

The purpose of this Order is to establish policy and procedures for an informal performance review and intervention program, the “Early Warning System” (EWS). The program monitors employee performance that may be inconsistent with professional police conduct and cooperatively engages employees to resolve areas of concern. The goal of EWS is early identification of employee performance issues and correction of these issues through constructive counseling sessions rather than the formal disciplinary process.

1041.2 POLICY

All employees shall participate in the EWS program and comply with the guidelines set forth in this Order.

Participation in the EWS program shall not be deemed punitive, nor a formal disciplinary process.

- (a) Notwithstanding the initiation of the EWS process, the Department retains its right and responsibilities with regard to investigation of policy violation and enforcement of employee discipline.

1041.3 PROCEDURES

Employee behavior or performance that is subject to EWS review includes, but is not limited to:

- (a) Poor attendance and/or abusive use of leave;
- (b) Multiple formal sustained or not sustained complaints;
- (c) Multiple informal complaint inquiries;
- (d) Multiple use of force incidents;
- (e) Multiple obstructing/resisting arrest incidents;
- (f) Multiple vehicle collisions; and,
- (g) Substandard conduct/performance concerns observed by a superior officer.
- (h) Irregular demographic stop data on pedestrian, bike, and vehicle enforcement, while considering the factors of the assignment (geographical area of the city the officer is working, the specific detail/assignment, and the nature of enforcement).

The Racial and Identify Protection Act (RIPA) data will be available to supervisors in the form of an electronic data dashboard. This will provide supervisors and commanders with the ability to review stop data created by officers assigned under their span of control. The individual stop data for individual officers should be considered a personnel record as it may provide supervisory guidance for specific officer stop data, if necessary. The public release of any RIPA data will remain anonymized as previously agreed upon Meet and Confer with the Berkeley Police Association and provisions of Government Code 3300 et.al.

Supervisors, commanders and managers shall monitor the activity of their subordinate employees to identify actual or perceived unprofessional behavior and/or substandard performance that is

Berkeley Police Department

Law Enforcement Manual

Law Enforcement Manual

EARLY WARNING SYSTEM

subject to EWS review, and if identified, communicate such information to the Chief of Police via the Chain of Command.

Personnel assigned to the Internal Affairs Bureau (IAB) shall monitor all formal and informal allegations of employee misconduct received by their office for behavior or performance that is subject to EWS review, and if identified, communicate such information to the Chief of Police.

Personnel assigned to the Support Services Division Report Review Detail shall forward to the Chief of Police copies of all reports pertaining to:

- (a) Obstruction/resisting arrests cases (i.e., Penal Code §§148, 69, etc.)

Administrative reports regarding use of force shall be forwarded to the Chief of Police as directed in Policy 300.

1041.4 MANAGEMENT OF PROGRAM RECORDS

The Office of the Chief of Police shall be responsible for aggregation and administrative management of information, data and records associated with the EWS program.

- (a) The administrative assistant assigned to the Office of the Chief of Police shall be responsible for preparing a quarterly report summarizing information and activities associated with the EWS program for use in administrative review.

Information, data and records associated with the EWS program are used for personnel purposes. Accordingly, they are confidential personnel files and not public records.

Documents, data and records shall be maintained by the Office of the Chief of Police for a period of two (2) years.

Access to EWS records shall be restricted to the supervisor, commander and/or manager involved in the monitoring of a particular employee, subject to the approval of the Chief of Police.

- (a) An individual employee may be granted access to EWS records that pertain to him/her.

1041.5 ADMINISTRATIVE REVIEW BOARD

The Chief of Police will convene a quarterly Review Board comprised of all Division Commanders to review program records to determine if initiation of the EWS Program is recommended.

Upon consideration of the Review Board's recommendation, the Chief of Police may direct an employee to participate in the EWS program.

1041.6 INITIATION OF EWS PROGRAM

Upon the direction of the Chief of Police, an informal counseling meeting will be held that may include:

- (a) The subject employee;
- (b) The employee's supervisor;
- (c) An Internal Affairs Bureau sergeant;
- (d) The employee's Lieutenant; and,

Berkeley Police Department

Law Enforcement Manual

Law Enforcement Manual

EARLY WARNING SYSTEM

- (e) The employee's Division Commander, who shall preside over the meeting.

Unless impractical, the counseling meeting shall be held during the employee's regularly scheduled working hours.

- (a) If the meeting cannot be scheduled during the employee's regularly scheduled working hours, personnel participating while off-duty shall be compensated with compensatory time (minimum time as may be authorized by the employee's MOU) or, with Division Commander approval, allowed to flex an equal amount of time within that same work week.

The subject employee may have one fellow employee accompany him/her to the counseling meeting.

- (a) The accompanying employee's presence is allowed to offer general support to the subject employee, not to be an active participant in the counseling meeting.

As in general supervisor counseling meetings, the employee shall be informed of the behavioral and/or performance concern(s) at issue, and he/she shall be allowed an opportunity to offer a response.

The subject employee may be given information regarding the City of Berkeley Employee Assistance Program.

No formal document will be generated referencing this meeting, and the meeting shall not be deemed a punitive or disciplinary proceeding against the employee. There shall be no permanent record of the meeting.

Extra Duty Employment

1043.1 PURPOSE AND SCOPE

This policy covers extra duty employment, which consists of officers working special details wherein the City of Berkeley has a contractual agreement to provide services for a fee to private third parties.

1043.1.1 DEFINITIONS

Extra Duty Employment- Extra Duty Employment occurs when a member of this Department performs police services at the request of a private third party and receives overtime compensation or wages paid directly into their routine pay, the cost of which the City will recover pursuant to a Service Agreement between the private third party and the City. Approval shall be obtained from the Chief of Police prior to any overtime being posted for Extra Duty Employment.

1043.2 OBTAINING APPROVAL FOR EXTRA DUTY EMPLOYMENT

All requests for Extra Duty Employment will be offered only after a third party has signed a Service Agreement and completed an Application for Extra Duty Services prior to the officers being assigned.

The City is under no obligation to provide or approve Extra Duty Employment and all requests must consider the following criteria:

- The overall staffing needs of the Department, including Investigations and specialized patrols such as the Bike Force Team
- The impact of the request on officer wellness and fatigue mitigation
- The degree to which the extra duty employment supports overall public safety and builds connections with the community.
- The potential the extra duty employment has to cast discredit upon or create embarrassment for the Department or City Government.

In instances where the Department chooses not to staff an Extra Duty Employment opportunity, the private third party will not incur any charges.

The completion of a Service Agreement and Application for Extra Duty Services is required for all events in which the Berkeley Police Department will seek reimbursement. All police grant work is excluded from this policy. Mutual Aid response from the Berkeley Police Department may

Berkeley Police Department

Law Enforcement Manual

Law Enforcement Manual

Extra Duty Employment

include incidents wherein reimbursement is expected, however it is explicitly excluded from the provisions of the Extra Duty Employment, and is covered under General Order M-02, and Policy 327 (upon its publication).

Any private third party seeking Extra Duty Employment shall complete the following:

- The private third party must complete the **Service Agreement** in order to request Extra Duty Employment. This form is available on the Police Department's website, and is attached to this policy.
- The **Service Agreement** may be entered into for a one-time event, for repeating events, or to cover continuous service. **Service Agreements** for Extra Duty Employment will span no longer than the duration of one calendar year, automatically resetting every January 1st for events that seek continuous services. In circumstances like the Berkeley Unified School District which may have different events spanning the year, the **Service Agreement** for Extra Duty Employment should identify what activities or events (i.e. sporting events, dances, graduation) are anticipated. Extra Duty Employment outside of these events will require an additional application. This allows for adjusted staffing consistent with the needs of each respective event.
- City Manager approval must be obtained for all **Service Agreements**.
- The private third party must complete an **Application for Extra Duty Employment**. This form is available on the Police Department's website, and is attached to this policy.
- The private third party must submit the **Application for Extra Duty Employment** and any additional supporting documents to the Special Events Sergeant.
- Chief of Police approval must be obtained for all **Applications for Extra Duty Employment**
- The Special Events Sergeant will be the contact person between the Department and the private third party on the status of their respective application.
- The Special Events Sergeant will be responsible for posting the overtime.

Berkeley Police Department

Law Enforcement Manual

Law Enforcement Manual

Extra Duty Employment

- The Special Event Sergeant shall maintain records of all submitted Extra Duty Employment requests and shall be responsible for annual renewal of Service Agreements.

1043.3 EXTRA DUTY EMPLOYMENT- SWORN PERSONNEL

Sworn personnel are subject to the following provisions regarding Extra Duty Employment while working in a law enforcement function representing the Berkeley Police Department:

- Officers will treat Extra Duty Employment overtime like regular patrol duty, and shall be dressed in full Police Uniform, and adhere to all policies and procedures of the Berkeley Police Department. Officers are permitted to use marked police vehicles as appropriate while working in this capacity.
- All officer conduct will be highly professional, and all law enforcement actions taken will be those authorized by the employee's status as a California police officer.
- In all Extra Duty Employment instances, the police personnel shall at all times be subject to the exclusive direction, supervision, and control of the Police Department.
- Equipment, including vehicles, may be assigned by the Police Department based on the nature and duration of the work to be performed.

[See attachment: Application for Extra Duty Services.pdf](#)

Chapter 11 - Special Orders

Special Order 2018-0001

1100.1 PC 647(E) ENFORCEMENT AND 9TH CIRCUIT DECISION

The Ninth Circuit Court of Appeals recently held in *Martin v. City of Boise* that municipalities may not enforce general laws prohibiting sleeping on public property when there is nowhere else for a homeless individual to sleep. The Court noted that its decision did not address enforcement of ordinances "prohibiting sitting, lying, or sleeping outside at particular times or in particular locations."

Effective immediately and until further notice, officers shall not enforce PC § 647(e) (lodging on public property without the owner's consent) unless authorized to do so by the Chief of Police, such as when participating in a coordinated effort with City of Berkeley staff engaged in an encampment resolution activity.

This decision applies only to the enforcement of PC § 647(e). Officers shall enforce other provisions of Penal Code and Berkeley Municipal Codes using existing policy and discretion, including, but not limited to:

Laws relating to trespass on private property:

- 06.32.020 Park curfew violation 2200 - 0600 hrs;
- 06.32.030 No structures (including tents), large objects, or collection of objects covering over 10 square feet may be placed in city parks without a permit;
- 13.36.065 City building rules - remaining on curtilage without COB business; and
- 14.32.040 Standing in roadway, use of divisional islands; i.e., on the median

Comm Center personnel should dispatch officers to assess complaints called in by the public, and officers should evaluate calls on a case-by-case basis when attempting to address a complaint. Should a given incident have no other enforcement option (e.g. there is only a PC § 647(e) complaint) the officer should advise the reporting party of this issue.

This order is meant to clarify enforcement restrictions in light of the recent Ninth Circuit Court decision, and will be in effect until it is rescinded or issued in the form of a policy.

Andrew R. Greenwood

Special Order 2020-0001

1101.1 PC 835; CHANGES IN PENAL CODE

On January 1, 2020, CA Penal Code 835a, which governs use of force by police officers, became law. Per Departmental Training Order 2019-00277, all sworn personnel were required to view POST's Training video, "AB 392: California's New Use of Force Standards: What You Need to Know", which can be found at <https://lp.post.ca.gov/activity/3023>. POST also created a publicly available resource page which includes this video and other resources, at <https://post.ca.gov/use-of-force-standards>.

BPD's current Use of Force Policy, General Order U-2, is being revised not only to incorporate provisions of PC 835a, but also as a result of a Council referral. The revised policy will be issued as Policy 300 in 2020.

Effective immediately, and until such time as the revised Use of Force policy is issued, General Order U-2 remains in effect, and sworn personnel shall further ensure their actions are in accordance with the new requirements of PC 835a, including but not limited to the provisions below:

PC 835a(b) amends the "reasonable force" standard to "objectively reasonable force."

PC 835a(c)(1) amends deadly force standards to include "totality of the circumstances" when:

- Defending against imminent threat of death or serious bodily injury to an officer or to another person.
- Apprehending a fleeing person for a felony
 - Involving threatened or actual death or serious bodily injury;
 - Where immediate apprehension is reasonably believed to be needed in order to prevent death or serious bodily injury to another; and
 - Which requires, when reasonable, that officers identify themselves and warn of intent to use force.

PC 835a(c)(2) prohibits using deadly force against persons who pose a danger only to themselves.

PC 835a(d) amends self-defense language to include "objectively reasonable" force.

PC 835a(e) adds definitions for deadly force, imminent, and totality of the circumstances.

This order is meant to highlight legal requirements pertaining to use of force by sworn personnel in light of the recent changes to CA Penal Code 835a, and will be in effect until it is rescinded or issued in the form of a revised use of force policy.

Special Order 2020-0005

1102.1 BMC CHAPTER 2.99--BAN ON FACIAL RECOGNITION TECHNOLOGY

The purpose of this Special Order is to (1) ensure all members are aware of the Berkeley Municipal Code's prohibition on the use of Facial Recognition Technology, including but not limited to use of the Clearview application, or any software service or application providing facial recognition search capabilities, and; (2) to provide a procedure to report the inadvertent or unintentional receipt of information obtained through Facial Recognition Technology to the Chief of Police.

On March 27, 2018, the Berkeley City Council enacted Berkeley Municipal Code (BMC) Chapter 2.99, Acquisition and Use of Surveillance Technologies. This ordinance governs the use and acquisition of certain described surveillance technologies by the Berkeley Police. The ordinance included "facial recognition software" among those surveillance technologies governed by the ordinance.

On October 15, 2019, the Berkeley City Council amended BMC Chapter 2.99, in order to formally ban the Department's use of any "Facial Recognition Technology", defined as "an automated or semi-automated process that assists in identifying or verifying an individual based on an individual's face."

It is a violation of BMC 2.99 and this policy for any employee to "obtain, retain, request, access, or use any facial recognition technology."

There are two exceptions to the ban, as provided BMC 2.99.030(5):

1. Facial recognition technology may be used to unlock personal communication devices, such as an cellular phone, iPad, or similar device, which is used in the regular course of conducting City business, whether city-owned or personally owned; and
2. The inadvertent or unintentional receipt, access to, or use of information obtained from Face Recognition Technology, provided that the BPD employee did not request or solicit the receipt, access to, or use of such information, and all copies of the information are promptly destroyed upon discovery of the information, and the information is not used for any purpose.
 - (a) However, in the case of inadvertent receipt of information received relating to the investigation of a specific crime that may have been generated from Face Recognition Technology, but which was not intentionally solicited, shall *not* be a violation of this ordinance, and may be used in connection with a specific criminal investigation.

Should any employee inadvertently or unintentionally receive information obtained from Face Recognition Technology, that employee shall report the receipt of the information through their chain of command to the Chief of Police, who shall ensure such receipt is reported in the Annual Surveillance Technology Report, as required by the ordinance (2.99.030(5)).

Use of Clearview or any other facial recognition application or software service providing facial recognition search capabilities is not allowed under the ordinance and this policy.

Special Order 2020-0005

This order is meant to highlight legal requirements pertaining to use of Surveillance Technology by Berkeley Police personnel in light of the recent changes to Berkeley Municipal Code. 2.99, and will be in effect until it is rescinded or issued in the form of a self-standing policy.

Andrew R. Greenwood

Chief of Police

Issued: July 21, 2020

Special Order 2020-0006

1103.1 BMC CHAPTER 2.99--PRIOR APPROVAL REQUIRED FOR TEMPORARY ACQUISITION AND USE OF NEW SURVEILLANCE EQUIPMENT; EXIGENT CIRCUMSTANCES EXCEPTION

The purpose of this Special Order is to (1) ensure BPD personnel are aware of department-owned surveillance technologies and policies; and (2) to provide a procedure to request the temporary acquisition and use of surveillance technology not already owned by the Berkeley Police Department, under the exigent circumstances exception to BMC 2.99, Acquisition and Use of Surveillance Technology.

On March 27, 2018, the Berkeley City Council enacted Berkeley Municipal Code (BMC) Chapter 2.99, Acquisition and Use of Surveillance Technologies. This ordinance governs the use and acquisition of certain surveillance technologies by the Berkeley Police Department.

The Department currently owns and utilizes the following three Surveillance Technologies: Body Worn Cameras, Automated License Plate Readers, and Global Positioning System Tracking Devices. Use of these technologies is governed by existing policies.

BMC Chapter 2.99.030(1) prohibits BPD from seeking, acquiring, sharing or using any new Surveillance Technology without obtaining authorization from the City Council, except in exigent circumstances, and as approved by the City Manager.

Surveillance Technology is defined in Section 2.99.020(1) as follows:

“Surveillance Technology” means an electronic device, system utilizing an electronic device, or similar technological tool used, designed, or primarily intended to collect audio, electronic, visual, location, thermal, olfactory, biometric, or similar information specifically associated with, or capable of being associate with, any individual or group. Examples of covered Surveillance Technology include, but are not limited to: cell site simulators (Stingrays); automatic license plate readers, body worn cameras, gunshot detectors (ShotSpotter); facial recognition software; thermal imaging systems, except as allowed under Section 1(d); social media analytics software; gait analysis software; and video cameras that record audio or video and can remotely transmit or can be remotely accessed.

Exigent Circumstance is defined in Section 2.99.020(5) as follows:

... a good faith belief that an emergency involving imminent danger of death or serious bodily injury to any person, or imminent danger or significant property damage, requires the use of Surveillance Technology or the information it provides.

The Exigent Circumstance exception for using new Surveillance Technology without prior City Council approval is set forth in Section 2.99.040 as follows:

... the City Manager may borrow, acquire, and/or temporarily use Surveillance Technology in Exigent Circumstances. In such cases, the City Manager must: (1) Provide written notice of that acquisition or use to the City Council within 30 days following the commencement of such

Berkeley Police Department

Law Enforcement Manual

Law Enforcement Manual

Special Order 2020-0006

exigency; (2) if the use of the technology is anticipated to continue beyond the exigency, the Department must submit an Acquisition Report and Use Policy to Council; and (3) include the surveillance technology in the next City Manager's Annual Surveillance Technology Report.

Effective immediately, any Department member wishing to use any new Surveillance Technology (not already in use at BPD) due to an Exigent Circumstance must, in writing, formally request permission to use the technology. This request shall describe the exigency, the new technology to be used, and how the new technology is anticipated to be successful. This request shall be made through the employee's chain of command, to the Chief of Police, who will convey the request to the City Manager for consideration and approval. If approved, the Chief will provide written authorization for the use of the new technology.

Should use be approved, the use shall be reported publicly to the Council within 30 days of the commencement of the exigency, and again in the following year's Annual Surveillance Technology Report.

This order is meant to highlight legal requirements pertaining to use of Surveillance Technology by Berkeley Police personnel in light of the recent changes to Berkeley Municipal Code. 2.99, and will be in effect until it is rescinded or issued in the form of a self-standing policy.

Chief of Police

Issued: July 21, 2020

Special Order 2020-0007

1104.1 COUNCIL POLICY: PROHIBITIONS ON THE USE OF TEAR GAS, PEPPER SPRAY, AND SMOKE.

On June 9, 2020, The Berkeley City Council established an official City of Berkeley policy 1) prohibiting the use of tear gas by the Berkeley Police Department, or any outside department or agency called to respond to mutual aid in Berkeley, and 2) prohibiting the use of pepper spray or smoke for crowd control by the Berkeley Police Department, or any outside department or agency called to respond to mutual aid in Berkeley, during the COVID-19 pandemic, until such time that the City Council removes this prohibition. Based on their actions, the following policies are now in effect.

1104.2 EFFECTIVE IMMEDIATELY AND UNTIL FURTHER NOTICE:

1. Tear Gas shall not be carried in the field or deployed in any way on any operation.

- (a) This Order overrides all existing policies with regards to the use of tear gas, including but not limited to Policy 303.6 Tear Gas Guidelines, and Policy 428 First Amendment Assemblies.

2. The use of pepper spray or smoke for crowd control is prohibited during the COVID-19 pandemic, until such time as the City Council removes this prohibition, except as set forth in (c) and (d) below.

- (a) The use of pepper spray during routine patrol duties is not affected by this prohibition, and is governed by Policy 303 and General Order U-2.
- (b) The use of pepper projectiles (aka "Pava" rounds) is not affected by this prohibition, except for crowd control purposes, and is governed by Policy 303.
- (c) General Order U-2 Use of Force, Section 20, still applies. Pepper spray may still be used in accordance with Council's existing policy.
 - i. Officers shall not use pepper spray as a crowd control technique to disperse or move a crowd. Oleoresin Capsicum (pepper spray) shall not be directed against a person or persons who are engaged in legal speech or other expression that is protected by the First Amendment, nor upon those committing unlawful acts by non-violent or passive resistant means, (e.g. sitting or lying down to block a street or doorway).
- (d) General Order U-2, Use of Force, Section 18 remains in effect.

18 - In crowd situations, less-than-lethal force and/or chemical agents [including smoke] shall not be used without the prior approval of the Chief of Police, or his/her designee, unless exigent circumstances prevent the request from being made and the delay would likely risk injury to citizens or police personnel (e.g., [incendiary weapons, explosives] rocks, bottles, or other

Berkeley Police Department

Law Enforcement Manual

Law Enforcement Manual

Special Order 2020-0007

projectiles are being thrown and immediate crowd dispersal is necessary).

(a) In the event immediate use is necessary, notification to the Chief of Police, or his/her designee, should be made as soon as possible after the deployment.

(b) In the event a use of force as described in Section 23 of this Order occurs during an unusual occurrence as described in General Order U-4, the officer shall prepare a supplemental report as soon as practical following the incident.

(c) Each officer shall include in the report, to the extent possible, specific information regarding each use of force, e.g., the reason for the use of force, location, description of the individual(s) upon whom force was used, type of force used, etc.

(d) Officers deploying pepper spray in a crowd situation shall attempt to limit collateral exposure to non-involved parties. Where there is probable cause to arrest for a crime, officers shall prioritize where practical the arrest of individuals upon whom pepper spray has been deployed.

This Order will remain in effect until it is rescinded or otherwise issued in the form of a policy.

Issued: August 5th, 2020

Special Order 2021-0001

1106.1 RESPONSE TO AB 1950

AB-1950 (Kamlager) - Probation: Length of Terms

Penal Code 1203a and 1203.1 (Amend)

PURPOSE AND SCOPE:

This Special Order is intended to provide temporary guidance and clarity to the recently implemented AB 1950, which limits the term of probation to no longer than two years for a felony conviction, and one year for misdemeanor conviction, except for offenses that include a specific probation term in statute. Additionally this order provides an outline of the workflow for the alignment process with the stakeholders, the main highlights of AB 1950, the list of exceptions, and method for officers and dispatchers to apply AB 1950 to individuals with active Alameda County Probation terms.

BACKGROUND:

AB 1950 was signed into law on Sept. 30, 2020. This new law amended PC 1203a and 1203.1, reducing probation terms for felony and misdemeanors. It is now being understood to apply retroactively to people already on probation, thus shortening their probation terms. At the Alameda County Chiefs of Police and Sheriff Association recent meeting the Alameda County District Attorney announced their interpretation of AB 1950. The Alameda County DA has chosen to apply the AB 1950 probation limits to pre-2021 probations. The DA's office will be compiling a list of eligible probation and dockets, ultimately terminating the applicable probations on the record. These will effectively be updated in CRIMS.

AB 1950 provides that the two-year probation limit does not apply to offenses defined by law as violent felonies, or to an offense that includes a specific probation term within its provisions. It provides that for these offenses, the court, in the order granting probation, may suspend the imposing or the execution of the sentence and may direct that the suspension may continue for a period of time not exceeding the maximum possible term of the sentence and under conditions as it shall determine

It should also be noted that there may be exceptions to this list in the future plea agreements post-2021, for example:

It's possible that post 1/1/21 a person commits a robbery (PC 211). The suspect agrees to a plea of PC 487 and may waive their right to AB 1950 and accept a 5 year probation. This would be reflected in CRIMS in the probation and dockets for cases resolved in 2021 and beyond.

PROCEDURES:

While the Alameda County District Attorney is addressing the modification to applicable active probationers and dockets, Officers and Dispatchers will need to take the following steps to ensure lawful applications of those with reduced 4th Amendment waiver conditions.

Berkeley Police Department

Law Enforcement Manual

Law Enforcement Manual

Special Order 2021-0001

If an individual with an active probation term is detained for a lawful purpose, and an Officer elects to exercise their respective search clause, one additional step will be necessary. Officers and Dispatchers shall check the conviction date on the individual's active docket. Per AB 1950 Officers or Dispatch shall add two years from the conviction date on felony convictions, or one year from misdemeanor convictions in order to get an accurate term length on the individual's respective probation. AB 1950 only applies to the term length of probation, it does nothing to change any other terms of the probation.

AB 1950 provides the following two-year probation limit does not apply to:

- Murder or voluntary manslaughter
- Mayhem
- PC 261 and 262 rape
- Sodomy
- Oral copulation
- Lewd or lascivious acts
- Felony punishable by death or LWOP
- Felony with GBI infliction
- Robbery
- Arson
- Sexual penetration
- Attempted murder
- Kidnapping
- Assault with intent to commit a felony
- Child sex abuse
- Carjacking
- Rape, spousal rape, or penetration
- Extortion
- First degree burglary
- Some financial crimes – [convictions under PC 487(b)(3), 503 or 532a – where the amount of loss is > \$25,000.00]

AB 1950 provides the following one-year probation limit does not apply to:

- DUI probation, because they are outlined under VC 23600 as 3 and 5 year terms.
- Child endangerment
- Child abuse

Berkeley Police Department

Law Enforcement Manual

Law Enforcement Manual

Special Order 2021-0001

- Domestic Violence (m 243(e)(1) and m 273.5)
- Violation of a protective or stay away order
- Elder and dependent abuse

Officers should document their review of the probationer's conviction date and application of AB 1950 in their police reports. Additionally Officers should document any search of a probationer that falls into one of the above exceptions.

This Order will remain in effect until it is rescinded or issued in the form of a policy.

Andrew R. Greenwood

Chief of Police

Issued: January 28, 2021

Special Order 2023-0001

1107.1 FAIR AND IMPARTIAL POLICING

On February 23rd, 2021 the Berkeley City Council directed the Berkeley Police Department to make several policy and procedural changes to reflect their recommendations. This policy provides context and guidance for complying with those recommendations.

1107.2 TRAFFIC ENFORCEMENT MODEL

One of the FIP recommendations was to "focus the basis for traffic stops on safety and not just low-level offenses." In order to address this recommendation, a working group consisting of various members of the Police Department with varying levels of experience was formed. The Chief reviewed the recommendations of this working group as well as collision statistics and directed that the Berkeley Police Department adopt a three-pronged approach to traffic enforcement. Officers are provided access to Berkeley data and statistics including primary collision factors, and are directed to focus on those safety violations wherever they are observed.

Prong #1 - Primary Collision Factors- (Berkeley Specific data)

Vehicle code violations resulting in severe and fatal collisions in Berkeley. Examples:

- Unsafe speed
- Pedestrian right-of-way at crosswalks
- Failure to yield for turns
- Red light violations
- Stop sign violations

Prong #2 - Community Reports

Responding to calls from community members. Examples:

- Possible DUI driver (i.e. car reportedly swerving)
- Driver that's fallen asleep at a red light
- A variety of unsafe driving incidents occurring, including sideshows
- Crime involving vehicle
 - Hit and Run
 - Crime with get-away vehicle description

Prong #3 - Community Caretaking-

Violations that are safety concerns not necessarily Primary Collision Factors. Examples:

- Seatbelt violations
- Distracted driving (hands free law)

Berkeley Police Department

Law Enforcement Manual

Law Enforcement Manual

Special Order 2023-0001

- Expired registration/more than 6 months
- DUI
- Moving violations

1107.3 REAFFIRMATION OF CONSENT SEARCHES

In collaboration with the Police Accountability Board, the Berkeley Police Department has adopted a new consent search form that officers are expected to use when seeking consent search. See Policy 311 for further details.

1107.4 LIMIT WARRANTLESS SEARCHES OF INDIVIDUALS ON SUPERVISED RELEASE

The City Council made a final change to limit the acceptable instances that officers may exercise search conditions on respective parole and probationers. Per Policy 311, subsection 6:

In accordance with California law, individuals on probation, parole, Post Release Community Supervision, or other supervised release status may be subject to warrantless search as a condition of their probation. Officers shall only conduct probation or parole searches to further a legitimate law enforcement purpose or rehabilitative purpose. Searches shall not be conducted in an arbitrary, capricious, or harassing fashion.

Individuals contacted or detained who are found to be on searchable Supervised Release for Violent Offenses¹ may be searched pursuant to the terms of their Supervised Release conditions. The decision to detain a person and conduct a probation or parole search, or otherwise enforce probation or parole conditions for those on supervised release for nonviolent crimes², should be made, at a minimum, in connection with articulable facts that create a reasonable suspicion that a person may have committed a crime, be committing a crime, or be about to commit a crime or which demonstrate that the individual is connected in some way to criminal activity or that the individual is an imminent threat to officer or citizen safety. In the conduct of all such detentions and searches, officers shall consciously avoid the application of bias, shall not use such detentions or searches as a means to harass or annoy, and shall not conduct such detentions and searches in a manner that targets or is discriminatory toward any protected class.

1. *Offenses involving the use of force, the threat of force, the use or possession of a weapon, sexual violations against the person of another, human trafficking, and the use of force or threats to public safety. Battery on a Peace Officer (Penal Code § 243(b)), Reckless Evasion in a Vehicle (Vehicle Code § 2800.2(a)), or a violent felony as defined in Penal Code § 667.5(c)., fall into the categories of violent crimes, weapons offenses, sex crimes and/or crimes involving threats to public safety in accordance with state law.*
2. *"Non-Violent Offenses" are defined as offenses in which violence or use of a weapon or threat to life safety is not a factor.*

1107.5 PROFILING BY PROXY

The Berkeley Police Department is committed to fair and impartial policing, including recognizing the act of profiling by proxy and the detrimental impact it has on our community. The Berkeley

Berkeley Police Department

Law Enforcement Manual

Law Enforcement Manual

Special Order 2023-0001

Police Department encourages leadership at every level of the organization - from call takers (dispatchers) to officers to supervisors – to act within their individual span of influence and control to combat profiling by proxy. To that end, the steps to identify, intercept, and document profiling by proxy shall be included in the Communications Center Operations Manual and Policy 401, Fair and Impartial Policing.

1107.6 REGULAR ANALYSIS OF STOP DATA

The police department released the requested historical data in December of 2020. BPD stop, arrest, and calls for service data are regularly updated in the Open Data Portal and will be updated in near real time on the Transparency Hub.

1107.7 UPDATED BUSINESS CARDS

BPD Officers shall offer business cards to all detained individuals. All future business cards ordered will have a QR code which directs to a link for commendations, concerns, and information on police-civilian encounters.

Chapter 12 - Training and Information

Social Host Ordinance

1200.1 BACKGROUND

In 2007, the Berkeley City Council enacted the Social Host Ordinance (SHO). By enacting the Ordinance, Council formally recognized the harm caused by the unsupervised and illegal consumption of alcohol by minors at unlicensed premises, public places and private property, including private residences.

The Council stated that parties, gatherings and/or events where minors are consuming alcohol can lead to physical altercations, drunk driving, binge drinking, unprotected or unplanned sex, sexual assaults, vandalism and excessive neighborhood noise. The control of parties, gatherings and/or events where minors are consuming alcohol is necessary when such activity is determined to be a threat to the peace, health, safety or general welfare of the public (BMC §13.49.030).

1200.2 PURPOSE

The purpose of the SHO is to address the problems identified above and protect the public health, safety and general welfare by enhancing the enforcement of laws prohibiting the consumption of alcohol by minors and reducing the costs of providing police services to parties, gatherings, or events requiring a response, by requiring hosts to ensure minors are not consuming alcoholic beverages (BMC 13.49.010B).

1200.3 DEFINITIONS

Minor: Any person under 21 years of age.

Gathering: A group of persons who have assembled or are assembling for a social occasion or social activity.

Host: The person or person(s) who permit, allow, or host a gathering under his/her/their control where minors will be present (e.g., resident tenant, owner, event organizer, house president, etc.).

Premises: Any residence or other private property, individual unit or place, including any commercial or business property.

Public Place: Any place to which the public or a substantial group of the public has access and includes, but is not limited to, streets, highways, and the common areas of schools, hospitals, apartment houses, office buildings, transport facilities and shops.

1200.4 THE STATUTE

BMC §13.49.030(A) provides it is unlawful for any person to:

- (a) Permit, allow, or host a party, gathering or event at his or her place of residence or other private property, public place, or any other premises under his or her control where alcoholic beverages are being consumed by any minor.

The SHO does not apply:

1. If all minors consuming an alcoholic beverage are being supervised by their parents or guardians [BMC §13.49.030(B)]; or,

Berkeley Police Department

Law Enforcement Manual

Law Enforcement Manual

Social Host Ordinance

2. At any location or place regulated by the California Department of Alcoholic Beverage Control (i.e., bars, restaurants, special events with an issued 1-day ABC license.) [BMC §13.49.030(C)];

1200.5 CRIMINAL CHARGING AND PENALTIES

A violation of the SHO may be cited as either a misdemeanor or an infraction. However, a violation shall not be charged as a misdemeanor unless the citing officer observes egregious behavior or aggravating circumstances (BMC §13.49.040A). The fine for the first violation is \$250 and will increase for subsequent violations by the same person (BMC §13.49.040B).

1200.6 HOST SELF-REPORTING - NO CRIMINAL LIABILITY

A person hosting the gathering shall not be in violation if he/she seeks assistance from the Police Department or other law enforcement agency to remove any person who refuses to abide by the host's responsibilities imposed by this Ordinance, or end the event because he/she has been unable to prevent minors from consuming alcoholic beverages, despite having taken all reasonable steps to do so, as long as such a request for assistance is made before any other person makes a complaint (BMC §13.49.030E).

1200.7 RESPONSIBILITY OF THE HOST

The SHO requires the Host take reasonable steps to prevent the consumption of alcoholic beverages by any minor at the gathering.

To be held responsible for a SHO violation, the Host must have knowledge of the prohibited activity. The Host shall be deemed to have actual or constructive knowledge that a minor has consumed an alcoholic beverage under either of the following conditions:

- (a) If the Host is present at the premises of the gathering at the time any minor consumes an alcoholic beverage; or,
- (b) If the Host has **not** taken all reasonable steps to prevent the consumption of alcoholic beverages by minors, as set forth in BMC §13.49.030(D):
 1. Controlling access to alcoholic beverages at the gathering.
 2. Controlling the quantity of alcoholic beverages at the gathering.
 3. Verifying the age of persons attending the gathering by inspecting driver's licenses or other government issued identification.
 4. Monitoring the activities of persons at the gathering.
 5. Monitoring the conduct of minors at the gathering.

1200.8 PROCEDURES

To successfully enforce the SHO, the prohibited activity and the standards of 'reasonableness' and 'knowledge', as related to any criminal liability on the part of the Host(s), should be identified and evaluated. Therefore, investigating officers should:

- (a) Make observations and conduct interviews that clarify the factual circumstances of a gathering or event wherein minors may be consuming alcoholic beverages.

Berkeley Police Department

Law Enforcement Manual

Law Enforcement Manual

Social Host Ordinance

- (b) Request the assistance of additional officers, if available, to ensure officer safety and accomplish desired detentions.
- (c) Interview detainees to verify their identity and age, and explore how they gained access to the event and came into possession of an alcoholic beverage.
- (d) Note the presence or absence of anyone collecting money at the door or checking identification cards, etc.
- (e) Document all relevant observations (i.e., dozens of minors running around with red cups attempting to elude officers, several high school age or other minors detained with alcohol on their person or breath, etc.)

If any of the detainee(s) are determined to be under 21 years of age, determine if the Host took reasonable steps (as outlined above in 1200.7(b)) to control their access to alcoholic beverages. If the Host is determined not to have taken reasonable steps, he/she should be issued a citation for a violation of BMC §13.49.030, or if necessary, taken into custody for a misdemeanor violation.

1200.9 DOCUMENTATION

An investigation of a Social Host Ordinance (SHO) violation shall be documented on a case report.

Enforcement of the SHO does not preclude enforcement of other observed criminal violations.

A SHO violation may also constitute a violation of the "Second Response" Ordinance (BMC §13.48.040), see the Second Response Policy for further.

Taxicab Enforcement

1201.1 PURPOSE AND SCOPE

The Professional Standards Bureau has prepared this enforcement guide to provide assistance in identifying, and enforcing the Berkeley Municipal Code (BMC), and California Vehicle Code (CVC) as they apply to taxicabs being operated in the City of Berkeley. It is intended to serve as a general summary of ordinances that pertain to taxicab enforcement, but is not an exhaustive list of enforcement options (use of non-taxicab related CVC statutes, or Penal Code statutes). The codes are abbreviated for ease of reading, and to focus on codes that are reasonably enforceable by BPD officers. There are other administrative codes that govern taxicabs, but it would not be feasible for BPD officers to enforce these codes.

1201.2 GENERAL GUIDELINES

There are three classes of taxicabs operating within the City of Berkeley: permitted taxicabs, non-permitted taxicabs, and illegal taxicabs.

Permitted taxicabs have been inspected for safety, have paid fees to the City, and are operated by permitted drivers. They are required to follow City of Berkeley taxicab regulations.

Non-permitted taxicabs are those with permits issued by other cities. Some City of Berkeley requirements also apply to them, such as, for instance the requirement that they not obstruct the right of way.

Illegal taxicabs are those not allowed to operate at all, whether or not they do so in compliance with Ordinance.

Permitted taxicabs may use taxi stands and pick up customers in the City, but are not allowed to create their own taxi stands by waiting near exits to crowded venues such as University of California football games, concerts, etc. Non-permitted taxicabs are prohibited from taking on any customers within the City, or attempting to do so.

When enforcing violations of the Ordinance by non-permitted taxicabs, specifically whether they have picked up a customer in Berkeley, the investigating officer should question both the taxicab driver, and the passengers independently to ascertain where the customer was picked up.

The following are examples of a driver's permit and vehicle permit:

A permitted taxicab is required to have these two items in the vehicle (see below for further detail), and to have a business owner permit on file with the City. A BPD officer is not expected to investigate whether a taxicab operator has a business owner permit, but can refer this matter to the Code Enforcement Unit (see contact information at the conclusion of this policy), if the officer suspects the taxicab operator is not in compliance with this ordinance.

Berkeley Police Department

Law Enforcement Manual

Law Enforcement Manual

Taxicab Enforcement

1201.3 AUTHORITY TO ENFORCE

9.52.170 Enforcement--Violation--Public Nuisance--Penalty.

- A. The City Manager and authorized employees are empowered to investigate and conduct inspections to determine whether permittees and other persons are complying with this chapter.
- B. It is unlawful for any person to violate any provision or to fail to comply with any of the requirements of this chapter. Any person violating any provision of this chapter shall be deemed guilty of a misdemeanor, but may be charged with an infraction at the discretion of the citing officer.
- C. Violation of this chapter is hereby declared to be a public nuisance.
- D. The remedies set forth in this chapter are cumulative. (Ord. 6874-NS § 7 (part), 2005; Ord. 6325-NS § 19, 1996)

1201.4 PERMITS REQUIRED

9.52.020 Annual permits required for business owners, drivers, and vehicles--Fees, expiration and limitation on number of permits

- A. Annual Permits--Approval Required. No person, corporation, partnership, cooperative, business, fictitious name, or dispatch center shall engage in the business of operating any taxicab or vehicle for hire within the City without a taxicab business owner's permit, driver's permit and vehicle permit issued by the City. Such permits shall not be assigned, sold or transferred to another business owner, driver or vehicle.

9.52.030 Business owner's permits

- A. Permit Applications. Any person or entity seeking to operate as a business owner shall apply in the manner set forth herein. The application shall be in writing, signed by the business owner, and shall set forth all the information required in the permit application form and accompanying documentation, including but not limited to the following:

9.52.040 Vehicle permits

- A. Permit Application. Each vehicle for hire operated in the City must be subject to a vehicle permit from the City as set forth herein. The application shall be in writing, signed by the owner, and shall set forth all the information required in the permit application form and accompanying documentation, including, but not limited to the following:

9.52.050 Driver's permits

- A. Permit Application. Any person seeking to operate a vehicle for hire as a driver shall apply for a permit in the manner set forth herein. No person under the age of 21 years shall be issued a driver's permit. The application shall be in writing, signed by the driver, and shall set forth all the information required in the permit application form including, but not limited to, the following:

1201.5 REGISTRATION AND INSURANCE

9.52.060 Registration and licensing requirements--Conspicuous posting in vehicle

Berkeley Police Department

Law Enforcement Manual

Law Enforcement Manual

Taxicab Enforcement

C. Vehicle Permit Affixed to Vehicle. Every vehicle for hire authorized to operate under this chapter shall have attached to the left rear window a current vehicle permit issued by the City in accordance with the provisions of this chapter and all expired permits will be removed.

E. Driver's Permit--Required Posting. The driver's permit shall be posted in full view of the passenger at all times while said driver is operating the vehicle. Every driver's permit shall show the photograph of the driver, driver's permit number, name of the business owner by which the driver is employed, if any, a telephone number of the business and a City telephone number such that passengers may communicate complaints.

9.52.070 Insurance requirements

A. Motor Vehicle Liability Policy--Required.

1. It is unlawful to operate any vehicle for hire in the City unless there is on file with the City a valid motor vehicle liability insurance policy.,

1201.6 RIGHT OF WAY OBSTRUCTION

9.52.120 Standards for driver conduct

C. Unlawful Obstruction of Public Right-of-Way - It is unlawful for the driver of any vehicle for hire at any time or place when waiting for or engaged in his or her employment, to obstruct any street or sidewalk.

1201.7 USE OF TAXI STANDS

9.52.140 Taxicab stands

- A. Taxicab Stands - Joint Use and Regulation. The City Council may approve the establishment and removal of taxicab stands by resolution.
1. All approved taxi stands shall be for the joint use of all taxicab business owners and drivers permitted to operate within the City.
 2. During the period of use of the spaces referred to in this section, vehicles shall at all times be parked in accordance with existing markings on the pavement or, in event that specific space is set aside for the use of taxicabs, parking by taxicabs shall be restricted to such specific location.
 3. No taxicab shall stand or park while awaiting employment at any place other than at a joint use taxicab stand as specified in this chapter.
 4. No taxicab shall be parked unattended in any taxicab stand for a period of time exceeding five minutes.

1201.8 SMOKING PROHIBITED

12.70.030 Locations where smoking is prohibited

Smoking shall be prohibited in all public places including but not limited to the following unless otherwise provided and in all places where the owner or person in charge of the establishment has posted a nonsmoking sign:

Berkeley Police Department

Law Enforcement Manual

Law Enforcement Manual

Taxicab Enforcement

I. In buses, trains, taxicabs and other means of public transit while operating within the boundaries of the City, and in ticket areas and waiting rooms of transit terminals and stations.

1201.9 CONCLUSION

Code Enforcement Officers are also available during normal business hours to assist in investigations or provide guidance. The Code Enforcement Unit is located at 2180 Milvia St. (City Hall) on the first floor. The supervisor of the unit is Wanda Drouillard, and she can be reached at 981-2482, or by email at wdrouillard@cityofberkeley.info.

Officers should use the appropriate citation forms (moving citation or parking citation) to cite for BMC violations. The violations will be handled in Traffic Court as infractions.

Second Response

1202.1 BACKGROUND

In 1993, the Berkeley City Council stated,

“Due to inadequate supervision, some large gatherings of people, such as parties, frequently become loud and unruly to the point that they constitute a threat to the peace, health, safety, or general welfare of the public as a result of conduct such as one or more of the following: excessive noise, excessive traffic, obstruction of public streets or crowds who have spilled over into public streets, public drunkenness, the service of alcohol to minors, fights, disturbances of the peace, and litter.

The City of Berkeley is required to make multiple responses to such unruly gatherings in order to restore and maintain the peace and protect public safety. Such gatherings are a burden on scarce City resources and can result in police responses to regular and emergency calls being delayed and police protection to the rest of the City being reduced. In order to discourage the occurrence of repeated loud and unruly gatherings, the persons responsible for the public nuisance created by these gatherings should be fined.”

1202.2 THE ORDINANCE

Berkeley Municipal Code §13.48.020 states it shall be unlawful and a public nuisance to conduct a gathering, which incorporates the following criteria:

- Ten or more persons are involved;
- The event is occurring on private property; and,
- The gathering is occurring in a manner which constitutes a substantial disturbance of the quiet enjoyment of private or public property in a significant segment of a neighborhood, as a result of unlawful conduct.

Examples of such unlawful conduct may include the following: excessive noise or traffic, obstruction of public streets by crowds or vehicles, public intoxication, the service of alcohol to minors, public urination, fights, disturbances of the peace and littering. A gathering constituting a public nuisance may be abated by all reasonable means including, but not limited to, an order requiring the gathering be disbanded, and citation and/or arrest of any law violators under any applicable local laws and state statutes.

The Ordinance explicitly prohibits targeted enforcement against student housing. However, nothing in the Ordinance precludes the City from setting priorities in the use of its resources by employing the Ordinance against events that are the most disruptive, against properties at which disruptive events are held most often, or on the basis of other similar legitimate factors.

1202.3 EXHIBIT A

When the police intervene at a gathering which constitutes a nuisance under the Ordinance, a “Notice” must be prominently posted at the premises at which the nuisance occurred. The Notice, referred to in the Ordinance as an “Exhibit A,” states that the intervention by the police has been

Berkeley Police Department

Law Enforcement Manual

Law Enforcement Manual

Second Response

necessitated as a result of a public nuisance caused by an event at the premises. The “Exhibit A” also indicates:

- The date and time of the police intervention;
- Any subsequent police intervention at the same premises within a one hundred twenty-day (120) period, including an intervention on the same day as the posting of the “Exhibit A,” shall result in civil penalties; and,
- Liability may fall upon any guests causing the public nuisance, all sponsors of the gathering, all residents of the premises, all persons in control of the premises, and all owners of the premises that reside on or adjacent to the premises or are present at the premises when the notice is posted.

The residents or persons in control of the property, if present, must be consulted regarding a location where the Notice can be conspicuously and securely posted. When consulted, those persons, as well as sponsors of the nuisance event, if involved in the decision, become responsible for ensuring that the “Exhibit A” is neither removed nor defaced. If either occurs, those responsible for the security of the notice become liable for a civil penalty of \$100.00, in addition to any other penalties which may be due under the Ordinance.

1202.4 EXHIBIT B

Should the police intervene at a premises with an active “Exhibit A”, a new notice shall be posted and a fine imposed against the property by means of an administrative citation. The new notice, referred to in the Ordinance as an “Exhibit B,” states that the intervention by the police has been necessitated as a result of a public nuisance caused by an event at the premises. The “Exhibit B” also indicates:

- The date and time of the police intervention;
- Whether the nuisance is the second, third, fourth, etc. at the premises within the last 120 days;
- The fine amount associated with the violation (second - \$750, third - \$1,500, fourth and subsequent violations - \$2,500);
- The 120 day period is extended another 120 days from the date of the “Exhibit B” posting;
- Liability may fall upon any guests causing the public nuisance, all sponsors of the gathering, all residents of the premises, all persons in control of the premises, and all owners of the premises that reside on or adjacent to the premises or are present at the premises when the nuisance occurs.

For every subsequent violation of the Ordinance, a new “Exhibit B” form shall be completed and posted. The residents or persons in control of the property, if present, must be consulted regarding a location where the Notice can be conspicuously and securely posted. When consulted, those persons, as well as sponsors of the nuisance event, if involved in the decision, become responsible for ensuring that the “Exhibit B” is neither removed nor defaced. If either occurs, those responsible

Berkeley Police Department

Law Enforcement Manual

Law Enforcement Manual

Second Response

for the security of the notice become liable for a civil penalty of \$100.00, in addition to any other penalties which may be due under the Ordinance.

1202.5 PROCEDURE - OFFICER

An officer responding to a “loud party”, “unruly gathering”, etc. type call for service should:

- (a) Contact the resident, person in control of the property, or event organizer, and determine if Ordinance enforcement is appropriate.
- (b) Complete an “Exhibit A” or “Exhibit B” form.
- (c) Confer with the resident, person in control of the property, or event organizer and identify a conspicuous and secure location to post the “Exhibit” form. Should the resident, person in control of the property, or event organizer decline to confer, the officer should choose an appropriate posting location and inform the parties present that removal or defacement of the notice within the 120 day period may result in a \$100.00 fine.
- (d) Post the duplicate copy of the Exhibit form at the premises and retain the original for the report.
- (e) Complete a Case Report and document the following information
 - Known complainant’s identification and report information;
 - Identification of parties responsible for the property hosting the gathering;
 - The overall condition and/or general environment of the premises;
 - The number of people involved at the gathering;
 - Whether or not alcohol was a factor;
 - Any traffic conditions affected by the gathering;
 - Any other information that may be relevant to the Ordinance violation; and,
 - The exact location the Exhibit form was posted.
- (f) Submit the report in AEGIS, route the original Exhibit form to Records Management and place a copy in the CSB mailbox to ensure proper administrative follow-up.

1202.6 REPEAT VIOLATIONS

Officers should be aware of what properties in their assigned area have been posted for Ordinance violation(s) and should monitor them for repeat violations within the prescribed term. If, within 120 days of the initial posting, an officer investigates another unruly gathering as described in the Ordinance, the officer should replace the Exhibit A posting with an Exhibit B, document their observations and actions on a new Case Report and forward a copy of the report CSB for administrative follow-up.

It is important to know that with each subsequent occurrence of a nuisance at a previously posted property, the 120 day “clock” resets. For example, if an address was initially posted on January 1st, and there was a reported violation on March 1st, the 120 day period restarts and would

Berkeley Police Department

Law Enforcement Manual

Law Enforcement Manual

Second Response

conclude, absent a subsequent violation, on June 28th. As such, knowing the date of the most recent documented Ordinance violation at a posted property will allow an officer to determine if the 120 day term is still in effect or has expired.

1202.7 CSB AREA COORDINATOR FOLLOW-UP PROCEDURES

- (a) An Area coordinator receiving a follow up request for a Second Response violation should: Ensure a Premise Alert has been entered into CAD for the subject property: Minimally, the CAD entry should include: the date/time the Exhibit form was posted; the name and phone number of the liable person(s) contacted; and, the location where the notice form was posted. Additionally, if regarding an Exhibit B, the alert should include the violation number (second, third, fourth, etc.) and the fine amount to be imposed against the property. Having this information available in CAD will help patrol officers enforce the Ordinance should they respond to subsequent loud, unruly parties during the 120 day period. Additionally, requesting the Communication Center staff to revise the CAD event description to "2nd Response" will help with event tracking and future administrative research efforts.
- (b) Mail a notice of the police intervention to the property owner(s): BMC 13.48.030(B) requires a notice of police intervention be mailed to the property owner(s) on file in the City's property tax assessment records. The notice is a letter from the responsible Area Coordinator along with a copy of the Exhibit form, which advises the property owner(s) that any subsequent event within 120 days on the same premises necessitating police intervention shall result in liability of the property owner for all penalties associated with such intervention as more particularly set forth in the Ordinance.
- (c) Set a three week follow-up inspection: The Area Coordinator should set a three week follow-up in order to conduct an initial inspection visit of the site to examine the Exhibit A posting. In the event the form has been removed, a new Exhibit A form shall be posted. Observed violations of the Ordinance and related enforcement actions must be documented in a supplemental report, which will support a demand for the prescribed civil fine.
- (d) Conduct additional inspections to ensure Ordinance compliance and document any subsequent violations on a Case Report.
- (e) Mail an Exhibit B notice letter for each subsequent violation: For each instance wherein an Ordinance violation is identified, the Area Coordinator is responsible for mailing an Exhibit B notice letter to the person(s) liable for the civil penalty.
- (f) Provide the City of Berkeley Finance Department with copies of all reports and letters associated with any Ordinance violation to facilitate billing of the responsible parties.

1202.8 CIVIL PENALTIES AND COLLECTION PROCEDURES

Civil penalties may be assessed against all persons liable for the City's intervention to abate a gathering deemed a public nuisance. The schedule of penalties is as follows:

- For a second violation of the Ordinance during the 120-day period, the penalty shall be the sum of \$750.

Berkeley Police Department

Law Enforcement Manual

Law Enforcement Manual

Second Response

- For a third violation of the Ordinance response during the 120-day period, the penalty shall be the sum of \$1,500.
- For any subsequent violation of the Ordinance during the 120-day period, the penalty shall be the sum of \$2,500 for each intervention by police.

Billed by the Exhibit B form, all persons liable for applicable civil penalties will be directed to remit payment within thirty days of the letter's postmark to the City of Berkeley Finance Department, who will be responsible for collections. If payment is not received within the stated term, the bill will be deemed delinquent, and all persons liable for the penalties will be subject to accrued interest at the maximum legal rate, as well as an additional penalty of \$100.

1202.9 SUMMARY

A tool wielded to quell public nuisances, the "2nd Response" Ordinance can improve, if not restore, the quality of life in neighborhoods adversely affected by loud and unruly gatherings. This result cannot occur, however, unless the Ordinance is used effectively. Knowing the elements of the statute and the role the police officer plays in its enforcement will help ensure success. Make and document detailed observations in your report, post the Exhibit A form appropriately, and route the report package properly so the administrative effort that follows may be readily accomplished.

Smoking Ordinance

1203.1 BACKGROUND

Numerous studies have found that tobacco smoke is a major contributor to indoor air pollution and that breathing secondhand smoke can cause lung cancer in nonsmokers. Those who are at special risk include elderly people, individuals with cardiovascular disease and individuals with impaired respiratory function, including asthmatics and those with obstructive airway disease. Other health hazards induced by breathing secondhand smoke include lung cancer, heart disease, respiratory infection, decreased respiratory function, broncho-constriction and broncho-spasm.

1203.2 PURPOSE

This policy describes the City of Berkeley Ordinance regarding smoking restrictions and tobacco control policies, and the expanded locations at which smoking is prohibited. The Berkeley City Council's findings are included as background and rationale for the Ordinance, and to promote an understanding of enforcement recommendations.

1203.3 SMOKING POLLUTION CONTROL ORDINANCE

1203.3.1 LEGISLATIVE INTENT

The intent of the City Council in enacting this Ordinance was to:

- (a) Protect public health and welfare by prohibiting smoking in public places, places of employment, and specially designated public play areas where small children are at risk of choking on or ingesting cigarette butts and other toxic tobacco litter;
- (b) Guarantee the rights of nonsmokers to breathe smoke-free air, and to recognize that the right to breathe smoke-free air shall have priority over the desire to smoke; and,
- (c) Promote self-enforcement through educational outreach regarding smoking prohibitions.

1203.3.2 DEFINITIONS

"Smoke" or "smoking" means and includes either (1) inhaling or exhaling upon, burning, or carrying any lighted smoking equipment for tobacco, nicotine or any other plant or product used for personal habit commonly known as smoking or (2) inhaling or exhaling upon, vaporizing, or otherwise using any electronic smoking device.

"Electronic smoking device" means an electronic and/or battery-operated device, the use of which may resemble smoking, which can be used to deliver an inhaled dose of nicotine or other substances, including but not limited to any device manufactured, distributed, marketed, or sold as an electronic cigarette, an electronic cigar, an electronic cigarillo, an electronic pipe, an electronic hookah, or any other product name or descriptor. "Electronic smoking device" does not include any product specifically approved by the United States Food and Drug Administration for use in the mitigation, treatment, or prevention of disease.

Berkeley Police Department

Law Enforcement Manual

Law Enforcement Manual

Smoking Ordinance

"Commercial area sidewalk" means any sidewalk in front of or adjoining any property designated with a C on the City's Official Zoning Map attached hereto.

"Commercial Area Sidewalk" includes:

- (a) Shattuck Avenue between Rose Street and Dwight Way;
- (b) Telegraph Avenue between Bancroft Way and Parker Street;
- (c) College Avenue between Russell Street and Webster Street;
- (d) Avenue; Tulare Solano Avenue between The Alameda and
- (e) 4th Street between Virginia Street and Addison Street;
- (f) Avenue; Shattuck Bancroft Way between College Avenue and
- (g) San Pablo Avenue between Channing Way and Parker Street;
- (h) Street; 62nd Adeline Street between Fairview Street and
- (i) Euclid Avenue between Hearst Street and Ridge Road;
- (j) Street; Camelia Gilman Street and
- (k) University Avenue between Oxford Street and 4th Street;
- (l) Addison Street between Oxford Street and Martin Luther King, Jr. Way;
- (m) Way between Oxford Street and Martin Luther King, Jr. Way; and, Allston
- (n) Kittredge Street between Oxford Street and Milvia Street.

1203.3.3 REGULATED LOCATIONS

The Ordinance prohibits smoking in the following venues:

- Bars.
- Restaurants.
- Public restrooms.
- All indoor worksites and at outdoor worksites having more than two employees.
- Sidewalks in all commercial zones.
- Recreational locations (i.e., bingo/gaming parlors, museums, libraries, aquariums, etc.) and other outdoor venues open to the public (i.e., stadiums, parks, athletic fields, hiking trails, biking paths, outdoor theaters, parking garages, etc.).
- Within 25 feet of doorways, windows, and air intake vents of any building open to the public; bus and other transit stops; and, service areas, such as ATMs, ticket lines, and cab stands.
- Within 50 feet of any building used as a health care facility, hospital, licensed child or adult care facility or senior center.
- All units of multi-unit residences and all common areas of multi-unit residences.
- Inside all public transit, including taxis, while operating in Berkeley.

Berkeley Police Department

Law Enforcement Manual

Law Enforcement Manual

Smoking Ordinance

- See BMC §12.70.030 and 12.70.035 for more affected locations.

Appendix A offers maps specifying commercially zoned areas.

1203.3.4 PLACES NOT REGULATED BY ORDINANCE

The Ordinance does not regulate smoking in retail tobacco stores or private residences, unless the residence is used as a child or health care facility. Notwithstanding this exemption, the owner or person in control of the business may designate the entire establishment as nonsmoking.

1203.3.5 SMOKING MEDICAL CANNABIS AT DISPENSARIES

Notwithstanding anything to the contrary in this Ordinance, the inhalation of medical cannabis through the use of an electronic smoking device inside a dispensary and on the public right of way within 50 feet of such a Dispensary, by a member of that dispensary, is not prohibited by this Chapter. (Ord. 7369-NS § 3, 2014)

1203.3.6 VIOLATIONS AND PENALTIES

Set forth in BMC §12.70.110, any person who violates the provisions of this Ordinance shall be guilty of an infraction and subject to fine. The following subsections describe particular unlawful activity:

(A) It shall be unlawful for any person who owns, manages, operates or otherwise controls the use of any premises subject to the restrictions of this Ordinance to fail to comply with its provisions.

(B) It shall be unlawful for any person to smoke in any area where smoking is prohibited by the provisions of this Ordinance.

1203.4 ENFORCEMENT

The Ordinance states, “any owner, manager, operator or employee of any establishment controlled by this [Ordinance] shall have the right to inform persons violating this [Ordinance] of the appropriate provisions thereof.” Similarly, private citizens may “bring legal action” to enforce this Ordinance. Officers should be responsive to public requests for law enforcement assistance.

Keeping with the Council’s intent, gaining compliance through education and responsible party cooperation is the preferred method of enforcement. In most cases, advice and a warning should prove sufficient to resolve the complaint. Enforcement of this Ordinance is not intended to consume an inordinate amount of an officer’s time and should not be considered a high priority.

In some instances, however, the issuance of a citation may be necessary. For example, citing a chronic violator who has disregarded repeated warnings may be appropriate in order to abate a violation and convey the desired public health message. Similarly, a community member reporting an Ordinance violation may be insistent that a citation be issued. In such cases where the reported offense is observed by the investigating officer, a citation may be written.

1203.5 ATTACHMENTS

See attachment: [1203 Zoning Map 2019.pdf](#)

Enforcement of Isolation and Quarantine Orders

1204.1 ENFORCEMENT GUIDANCE

The City of Berkeley Public Health Officer has the authority to issue civil orders for the isolation of persons diagnosed with or under investigation for having an infectious disease, and for the quarantine of persons who have been exposed to an infectious disease. This Training and Information Order establishes Berkeley Police Department policy for the enforcement of such isolation and quarantine orders.

Isolation is defined as "separation of infected persons from other persons for the period of communicability in such places and under such conditions as will prevent the transmission of the infectious agent." (17 CCR § 2515.) The Public Health Officer may require strict or modified isolation of an infected person. (17 CCR §§ 2516-17.)

Quarantine is defined as "the limitation of freedom of movement of persons or animals that have been exposed to a communicable disease for a period of time equal to the longest usual incubation period of the disease, in such manner as to prevent effective contact with those not so exposed." (17 CCR § 2520.) If a disease requires quarantine of persons having contacts in addition to isolation of the infected person, "the local health officer shall determine the contacts who are subject to quarantine, specify the place to which they shall be quarantined, and issue instructions accordingly."

Isolation and quarantine may be enforced pursuant to the order of the Public Health Officer without a prior court order based on the Health Officer's determination that there is reasonable cause that a person is infected with or has been exposed to a communicable disease. (Health and Safety Code § 120130(d); *In re Application of Arata* (1921) 52 Cal. App. 380, 383.) The Health Officer's order must inform the isolated or quarantined person of the right to seek administrative review of the order by the Public Health Division and the right to seek judicial review pursuant to Penal Code § 1473.

Any person who violates an isolation or quarantine order is guilty of a misdemeanor, punishable by a fine of not less than \$50 nor more than \$1,000, or by imprisonment for a term of not more than 90 days, or by both. (Health and Safety Code § 120295.) Each day of the violation may be charged a separate offense. (*Ibid.*)

The Chief of Police may enforce any isolation or quarantine order issued by the Public Health Officer. (Gov. Code § 41601.) If any person refuses to comply with the Health Officer's order, a Police Officer or an authorized employee (as defined in Policy 300) may arrest and/or detain the person to enforce the order. Any arrest of a person for a violation of an isolation or quarantine order shall be made in accordance with the Use of Force Policy (Policy 300). The isolated or quarantined person shall be detained at home, in a medical facility, or at some other location consistent with the requirements of the isolation or quarantine order, as directed by the Public Health Officer. It may be necessary for a Police Officer or an authorized employee to remain present to ensure compliance with the terms of the isolation or quarantine order.

Berkeley Police Department

Law Enforcement Manual

Law Enforcement Manual

Enforcement of Isolation and Quarantine Orders

All Berkeley Police Department members assisting with the enforcement of an isolation or quarantine order shall comply with infection control procedures to control the risk of transmission of aerosol transmissible diseases. (8 CCR § 5199(c).)

Tuberculosis Isolation and Quarantine: It should be noted that special procedures apply for the isolation or quarantine of persons infected with or exposed to tuberculosis. Those procedures are outside the scope of this policy . Berkeley Police Department members shall direct inquiries regarding enforcement of an isolation or quarantine order arising from infection with or exposure to tuberculosis through their chain of command to the Chief of Police or his/her designee, who shall in turn consult with the Public Health Officer and the City Attorney's Office prior to issuing direction.

Chapter 13 - Surveillance Technology

Surveillance Use Policy - Body Worn Cameras

1300.1 PURPOSE

This Surveillance Use Policy is issued in compliance and fulfills the requirements of Berkeley Municipal Code (BMC) Chapter 2.99, and incorporates by reference language from the Berkeley Police Department Body Worn Camera Policy #425- Body Worn Cameras and adds elements as required by BMC Chapter 2.99. Guidelines, procedures, and practices for the use of Body Worn Cameras by members of the Berkeley Police Department while in performance of their duties are fully set forth in the Berkeley Police Department Law Enforcement Manual Policy 425- Body Worn Cameras.

The Berkeley Police Department recognizes that video recording of contacts between department personnel and the public provides an objective record of these events, and that the use of a recording system complements field personnel in the performance of their duties by providing a video record of enforcement and investigative field contacts, which can enhance criminal prosecutions, limit civil liability, increase transparency, and enhance professionalism in the delivery of police services to the community. A video recording of an event or contact also enables the delivery of timely, relevant, and appropriate training to maximize safety for both community members and BPD personnel. (Ref. policy 425.2)

1300.2 AUTHORIZED USE

This policy is not intended to describe every possible situation in which the BWC should be used. Members shall activate the BWC as required by this policy in (a)-(f) below, and may activate the BWC at any time the member believes it would be appropriate or valuable to record an incident within the limits of privacy described herein.

The BWC shall be activated in any of the following situations:

- (a) All in-person enforcement and investigative contacts including pedestrian stops and field interview (FI) situations.
- (b) Traffic stops including, but not limited to, traffic violations, stranded motorist assistance and all crime interdiction stops.
- (c) Self-initiated field contacts in which a member would normally notify the Communications Center.
- (d) Any search activity, including the service of search or arrest warrants; probation, parole, or consent searches where the member is seeking evidence of an offense, or conducting a safety sweep or community caretaking sweep of the premises. Once a location has been secured and the member is not interacting with detainees or arrestees, the member may mute their BWC when conducting a search for evidence.
- (e) Any other contact that the member determines has become adversarial after the initial contact in a situation where the member would not otherwise activate BWC recording.

Berkeley Police Department

Law Enforcement Manual

Law Enforcement Manual

Surveillance Use Policy - Body Worn Cameras

- (f) Transporting any detained or arrested person and where a member facilitates entry into or out of a vehicle, or any time the member expects to have physical contact with that person.

At no time is a member expected to jeopardize his or her safety in order to activate a BWC. The BWC should be activated by members in anticipation of situations described above, and in any unanticipated, rapidly unfolding situation where activation becomes required, as soon as the member can do so safely.

Members should activate their BWC when conducting custodial interviews unless there are other recording devices being used. Members shall document and explain in their report the reason for not recording custodial interviews, should a BWC be de-activated while conducting a custodial interview or interrogation. (Ref. policy 425.7)

1300.2.1 PROHIBITED USE

Members are prohibited from using a department-issued BWC for personal use and are prohibited from making personal copies of recordings.

Members are prohibited from retaining BWC recordings. Members shall not duplicate or distribute such recordings, except for department business purposes. All such recordings shall be retained at the Department.

Recordings shall not be used by any member for the purpose of embarrassment, intimidation or ridicule. (Ref. policy 425.13)

1300.3 DATA COLLECTION

BWC use is limited to enforcement and investigative activities involving members of the public. The BWC recordings will capture video and audio evidence for use in criminal investigations, administrative reviews, training, civil litigation, and other proceedings protected by confidentiality laws and department policy. Improper use or release of BWC recordings may compromise ongoing criminal and administrative investigations or violate the privacy rights of those recorded and is prohibited. (Ref. policy 425.3)

1300.4 DATA ACCESS

Members are authorized to review their own BWC video files at any time in furtherance of official business. Such official business includes, but is not limited to, preparing written reports, prior to or while providing testimony in a case or being deposed. Members may review recordings as an evidentiary resource, except as stated in subsection 1300.4.1 below. Pursuant to 1300.2.1, members shall not retain personal copies of recordings. Members shall not use the fact that a recording was made as a reason to write a less detailed report. (Ref. policy 425.17)

1300.4.1 OFFICER INVOLVED INCIDENTS RESULTING IN GRAVE BODILY INJURY OR DEATH

- (a) In the event of a critical incident that results in grave bodily injury or death, including an officer-involved shooting or an in-custody death, the BWC of the involved member(s) shall be taken from them and secured by a supervisor, commander, or appropriate

Berkeley Police Department

Law Enforcement Manual

Law Enforcement Manual

Surveillance Use Policy - Body Worn Cameras

investigator, as necessary. The involved member(s) shall not access or obtain their footage of the incident until such time as the criminal investigator(s) have reviewed the video files. It will be the responsibility of the investigation team's supervisor to coordinate with the involved member's supervisor to obtain footage of the incident on behalf of the member.

- (b) Personnel uploading secured BWC video files shall not view the files unless authorized.
- (c) No member involved in a critical incident may view any video recordings prior to an interview by the appropriate criminal investigative unit, and receiving command approval.
- (d) Prior to the conclusion of the criminal interview process, the involved member and/or the member's representative will have an opportunity to review the member's recording(s). The involved member may choose to provide additional information to supplement his or her statement by providing a supplemental statement or separate supplemental document. In no case shall a member alter a report made prior to reviewing the recording. Where both an original statement and supplemental statement or document have been produced, both the original statement, without alteration, and the supplemental statement or document shall be included in the report.
- (e) The Department acknowledges that recordings taken during critical incidents obtained from BWCs do not necessarily reflect the full extent of the nature of the event or the experience, analysis, training, threat assessment or state of mind of the individual officers(s) in a given incident. Moreover, the recordings, especially video, have limitations and may depict events differently than the events recalled by the involved officer. Specifically, it is understood that the recording device will capture information that may not have been heard and/or observed by the involved officer and that officers may see and hear events that are not captured by the camera.

Officers who are involved in any critical incident where video recordings exist depicting the involved officer, either as a subject officer or witness, shall be provided the following admonishment to the initial interview or submission of the initial written report:

"In this case, there is video evidence that you will have an opportunity to view. Video evidence has limitations and may depict the events differently than you recall, and may not depict all of the events as seen or heard by you. Video has a limited field of view and may not capture events normally seen by the human eye. The "frame rate" of video may limit the camera's ability to capture movements normally seen by the human eye. Lighting as seen on the video may be different than what is seen by the human eye. Videos are a two-dimensional medium and may not capture depth, distance or positional orientation as well as the human eye. Remember, the video evidence is intended to assist your memory and ensure that your statement explains your state of mind at the time of the incident." (Ref. policy 425.17.1)

1300.4.2 SUPERVISORY REVIEW

With the exception of section 1300.4.1 above, supervisors are authorized to review relevant recordings any time they are reviewing and approving case reports from their subordinates. (Ref. policy 425.17.2)

Berkeley Police Department

Law Enforcement Manual

Law Enforcement Manual

Surveillance Use Policy - Body Worn Cameras

1300.4.3 INVESTIGATORY REVIEW

Supervisors are authorized to review relevant recordings any time they are investigating alleged misconduct or reports of meritorious conduct, or whenever such recordings support review of the member's performance. (Ref. policy 425.17.3)

(a) Recorded files may also be reviewed:

1. Upon approval by a supervisor, by any member of the Department who is participating in conduct of an official investigation, such as a personnel complaint, an administrative investigation or a criminal investigation.
2. Pursuant to lawful process or by court or District Attorney personnel who are otherwise authorized to review evidence in a related case.
3. By personnel assigned to investigatory units who are authorized to view any BWC video file associated to their active investigations, unless otherwise prohibited by policy.
4. Upon approval by the Chief of Police, Internal Affairs investigators may review BWC video with a complainant.
5. Pursuant to 1300.9, access to recordings will be granted to the Police Review Commission Officer and/or Investigator investigating a specific complaint where BWC evidence files are available, and are not part of any ongoing criminal investigation of an officer.

(b) Investigators conducting criminal or internal investigations shall:

1. Advise the coordinator to restrict access to the BWC file in criminal or internal investigations, as necessary.
2. Review the file to determine whether the BWC file is of evidentiary value and process it in accordance with established protocols.
3. Notify the coordinator to remove the access restriction when the criminal/internal investigation is closed.

1300.4.4 TEACHING OR LEARNING TOOL

BWC files may also be reviewed by training staff regarding specific incidents where such files may serve as an internal learning or teaching tool. In the event that videos are intended to be used for training purposes, the involved officer(s) will first be consulted. If he/she objects to the use of the video, such objection shall be submitted to the person in charge of training who shall weigh the value of the video for training against the officer(s) objections and basis for the objection. Should the person in charge of training refuse to grant the request of the involved officer(s), the matter shall be heard by the Chief of Police, or his/her designee, prior to utilizing the video. (Ref. policy 425.17.4). Any member(s) of the public that appears in video footage used for outside training purposes (e.g. if video footage is shown by an authorized member of the Police Department for training purposes outside of the Berkeley Police Department such as at a conference or other training), to the extent feasible, will be blurred out or redacted in a manner to protect the privacy rights of those involved in the incident.

Berkeley Police Department

Law Enforcement Manual

Law Enforcement Manual

Surveillance Use Policy - Body Worn Cameras

1300.4.5 COB CIVIL CLAIMS AND LAWSUITS

BWC recordings may be reviewed and used by City of Berkeley counsel for civil claims and lawsuits. (Ref. policy 425.17.5)

1300.5 DATA PROTECTION

To assist with identifying and preserving data and recordings, members shall tag and download recordings in accordance with procedure, and document the existence of the recording in the related case report. Transfers must occur at the end of the member's shift, and any time the member is aware that the storage capacity of the BWC is nearing its limit. In circumstances when the officer cannot complete this task, the officer's supervisor shall immediately take custody of the BWC and be responsible for uploading the data. Officers shall tag each file with the appropriate case/incident number, provide a descriptive title, and select an appropriate category for each recording, using the Axon View app or via the Evidence.com site.

Members are prohibited from intentionally erasing, altering, reusing, modifying or tampering with original audio video recordings.(Ref. policy 425.14)

1300.6 CIVIL LIBERTIES AND RIGHTS PROTECTION

The Berkeley Police Department's mission is to safeguard our diverse community through proactive law enforcement and problem solving, treating all people with dignity and respect. The Berkeley Police Department recognizes the need to protect its ownership and control over shared information and to protect the privacy and civil liberties of the public, in accordance with federal and state law and City of Berkeley rules and regulations. The procedures described within this policy (Data Access, Data Protection, Data Retention, Public Access and Third Party Data Sharing) protect against the unauthorized use of BWC data. These policies will ensure the data is not used in a way that would violate or infringe upon anyone's civil rights and/or liberties, including but not limited to potentially disparate or adverse impacts on any communities or groups.

1300.7 DATA RETENTION

The Department shall retain all recordings for a minimum of 60 days. Incidents involving consensual contacts, and aid to citizens will be retained for six months, and cold reports will be retained for one year. Recordings of incidents involving use of force by a police officer, detentions, arrests, or recordings relevant to a formal or informal complaint shall be retained for a minimum of two years and one month. Recordings relating to court cases and personnel complaints that are being adjudicated will be manually deleted at the same time other evidence associated with the case is purged in line with the Department's evidence retention policy. Any recordings related to administrative or civil proceedings shall be maintained until such matter is fully adjudicated, at which time it shall be deleted in line with the Department's evidence retention policy, and any applicable orders from the court.

Recordings created by equipment testing or accidental activation may be deleted after 60 days. (Ref. policy 425.15)

Berkeley Police Department

Law Enforcement Manual

Law Enforcement Manual

Surveillance Use Policy - Body Worn Cameras

1300.8 PUBLIC ACCESS AND THIRD PARTY DATA SHARING

All recordings should be reviewed by the Custodian of Records and the City Attorney's Office prior to public release, see General Order R-23 (Release of Public Records and Information). (Ref. policy 425.18) and Government Code § 6254(f).

General Order R-23 does not authorize release of investigative files or documents that would constitute an unwarranted invasion of privacy. Circumstances where this might arise in video include footage taken inside a home, a medical facility, the scene of a medical emergency, or where an individual recorded has a "reasonable expectation of privacy."

In the event that the Police Department or City intends to release or publish for any purpose video recordings where officers are captured on video or the video depicts actions taken by them in the course of the performance of their official duties, those officers shall be given written notice of the intention to release or publish said video at least 48 hours prior to such release.

BPD may, without prior notice to involved officers, share video footage of specific incidents with law enforcement agencies outside of Berkeley, when there is reasonable suspicion that criminal activity has occurred or is about to occur. (Ref. policy 425.18). Pursuant to Berkeley Police Department Policy 415, video footage may not be shared with federal immigration enforcement officials.

Access to recorded files may be granted for the purposes of review to media personnel or the general public with permission of the Chief of Police, or his/her designee, subject to General Order R-23, privacy protections indicated in this policy, Government Code section 6254(f), other applicable law and policy governing the release of public records, and subject to the review of the City Attorney's Office. (Ref. policy 425.18)

1300.9 POLICE REVIEW COMMISSION

Access to recorded files will be granted for the purposes of review to the Police Review Commission (PRC) Officer and/or Investigator investigating a specific complaint where BWC evidence files are available, and are not part of any ongoing criminal investigation of a complainant or an officer. (Ref. policy 425.18.1)

- (a) The PRC Officer and PRC Investigator will be provided user account access to evidence files through the evidence management system for their use during a complaint investigation and to facilitate viewing by Board of Inquiry members during a Board of Inquiry.
- (b) The PRC Officer and PRC investigator shall not make or create a copy of any evidence file, nor make or allow to be made any audio or video recording of any evidence file while it is being streamed and viewed from the evidence management system.
- (c) The PRC Officer and PRC Investigator shall not allow any unauthorized individuals to view or access evidence files.
- (d) The evidence management system associates an audit trail record with each evidence file, thereby logging the date, time, user, activity, and client IP address occurring during each evidence file access.

Berkeley Police Department

Law Enforcement Manual

Law Enforcement Manual

Surveillance Use Policy - Body Worn Cameras

- (e) The evidence management system shall only be accessed on City premises.
- (f) The Department retains custody and control of the recordings, and content of the video will be subject to applicable legal standards including, but not limited to the confidentiality requirements of the Public Safety Officers' Procedural Bill of Rights, (Government Code § 3300, et seq., Penal Code § 832.7, and the California Public Records Act; Government Code § 6250, et seq.)

1300.10 TRAINING

Training for the operation of BWC's shall be provided by BPD personnel. All BPD personnel who use BWC's shall be provided a copy of this Surveillance Use Policy.

1300.11 AUDITING AND OVERSIGHT

Division Captains for divisions utilizing BWC's shall ensure compliance with this Surveillance Use Policy.

1300.12 MAINTENANCE

The BWC system will be maintained by the Applications Programmer Analyst and assigned Department of Information and Technology (IT) staff.

The Chief of Police, or his/her designee shall appoint a member of the Department to coordinate the use and maintenance of BWCs and the storage of recordings, including (Penal Code § 832.18) (Ref policy 425.4):

- (a) Establishing a system for uploading, storing and security of recordings.
- (b) Designating persons responsible for uploading recorded data.
- (c) Establishing a maintenance system to ensure availability of BWCs.
- (d) Establishing a system for tagging and categorizing data according to the type of incident captured.
- (e) Establishing a system to prevent tampering, deleting and copying recordings and ensure chain of custody integrity.
- (f) Working with the City Attorney's office to ensure an appropriate retention schedule is being applied to recordings and associated documentation.
- (g) Maintaining an audit trail record for all access to evidence files, wherein access information for each evidence file is logged through use of a secure log-in system. The Department's storage system associates an audit trail record with each evidence file, thereby logging the date, time, user name, activity and client IP address occurring during each evidence file access.
- (h) All recordings shall remain the property of the Department. Subject to the provisions of this Policy, members shall have no expectation of privacy or ownership interest in the content of these recordings.

1300.13 APPENDIX A

[See attachment: 1300 BWC APPENDIX A.pdf](#)

Surveillance Use Policy- GPS Tracking Devices

1301.1 PURPOSE

Global Positioning System (GPS) tracking devices track the movements of vehicles, bicycles, cargo, machinery, other items, and/or individuals. GPS trackers electronically relay their precise location in real time, and thereby assist BPD in the recovery of evidence and arrest of suspects.

1301.2 AUTHORIZED USE

GPS trackers shall only be used during active criminal investigations. GPS trackers shall only be used pursuant to a lawfully issued search warrant, or with consent of the owner of the object to which the GPS tracker is attached.

GPS trackers shall only be utilized for law enforcement purposes.

1301.3 DATA COLLECTION

Location data may be obtained through the use of a GPS Tracker.

1301.4 DATA ACCESS

Access to GPS tracker data shall be limited to Berkeley Police Department (BPD) personnel utilizing the GPS Tracker(s) for active criminal investigations. Information may be shared in accordance with 1301.9 below.

In support of active criminal investigations, BPD personnel may receive GPS tracker data from probation or parole agencies which utilize GPS trackers (e.g. ankle monitors) as a condition of probation or parole.

1301.5 DATA PROTECTION

The data from the GPS tracker is encrypted by the vendor. The data is only accessible through a secure website to BPD personnel who have been granted security access.

1301.6 CIVIL LIBERTIES AND RIGHTS PROTECTION

The Berkeley Police Department is dedicated to the most efficient utilization of its resources and services in its public safety endeavors. The Berkeley Police Department recognizes the need to protect its ownership and control over shared information and to protect the privacy and civil liberties of the public, in accordance with federal and state law. Provisions of this policy, including 1301.4 Data Access, 1301.5 Data Protection, 1301.7 Data Retention, 1301.8 Public Access and 1301.9 Third Party Data Sharing serve to protect against any unauthorized use of GPS tracker data. These procedures ensure the data is not used in a way that would violate or infringe upon anyone's civil rights and/or liberties, including but not limited to potentially disparate or adverse impacts on any communities or groups.

Berkeley Police Department

Law Enforcement Manual

Law Enforcement Manual

Surveillance Use Policy- GPS Tracking Devices

1301.7 DATA RETENTION

A GPS Tracker data record consists of date, time, latitude, longitude, map address, and tracker identification label. This data is stored indefinitely by the vendor. The data does not contain any images, names of subjects, vehicle information, etc.

Tracker data received from the vendor shall be kept in accordance with applicable laws, BPD policies that do not conflict with applicable law or court order, and/or as specified in a search warrant.

1301.8 PUBLIC ACCESS

Data collected and used in a police report shall be made available to the public in accordance with department policy and applicable state or federal law.

1301.9 THIRD-PARTY DATA-SHARING

Data collected from the GPS trackers may be shared with the following:

- (a) The District Attorney's Office for use as evidence to aid in prosecution, in accordance with laws governing evidence;
- (b) Other law enforcement personnel as part of an active criminal investigation;
- (c) Other third parties, pursuant to a Court Order.

1301.10 TRAINING

Training for the operation of the GPS trackers shall be provided by BPD personnel. All BPD personnel shall be provided with this Surveillance Use Policy.

1301.11 AUDITING AND OVERSIGHT

Division Captains or their designee shall ensure compliance with this Surveillance Use Policy.

1301.12 MAINTENANCE

GPS trackers shall only be obtained with the permission of the Investigations Division Captain or his/her designee. The Investigations Division Captain or his/her designee will ensure the trackers are returned when the mission/investigation is completed.

Surveillance Use Policy- Automated License Plate Reader

1302.1 PURPOSE

This Surveillance Use Policy is legally-enforceable pursuant to BMC 2.99.

The policy of the Berkeley Police Department is to utilize ALPR technology to capture and store digital license plate data and images for Parking Enforcement Operations, Parking Analysis, and limited criminal enforcement purposes associated with Parking Enforcement Operations while recognizing the established privacy rights of the public.

1302.2 DEFINITIONS

"Alleged Parking Violation" means an alleged violation of time limits in parking areas designated by state and local law, or a violation of time limits and/or non-permit parking in the City's RPP zones.

"ALPR Read Image" means images of license plates, vehicles, wheels or any other incidentally captured image.

"ALPR Read" means computer-readable data captured by an ALPR Reader, including ALPR Read Image and associated ALPR Read Metadata. ALPR Reads are transient means to create potential government records, to include Parking Analysis data and Enforced Citations.

"ALPR Hit" means an Alleged Parking Violation or Stolen Vehicle System alert resulting from computer generated analysis of ALPR Reads by the Genetec ALPR System resulting in an apparent:

1. match between an ALPR Read and ALPR Read Metadata stored in the Genetec ALPR System, to include the Stolen Vehicle System; or
2. cross checking between ALPR Read and permit information which is stored on the Genetec ALPR System.

"ALPR Read Metadata" means any image-based or other metadata, including but not limited to, global positioning system coordinates, block face information, tire position information, digitized license plates in alphanumeric characters, and timestamps.

"Automated License Plate Reader" or **"ALPR"** means one or more Genetec AutoVu mobile cameras affixed to Parking Enforcement Vehicles and combined with computer software and algorithms to read and convert images of license plates, the characters they contain, and associated ALPR Read Metadata related to Parking Enforcement Operations or Parking Analysis into computer-readable data.

"Deploy" or **"Deployment"** means any operation or use of ALPR Readers affixed to Parking Enforcement Vehicles.

Berkeley Police Department

Law Enforcement Manual

Law Enforcement Manual

Surveillance Use Policy- Automated License Plate Reader

"Enforced ALPR Hit" means an Alleged Parking Violation confirmed by a Parking Enforcement Officer that results in the transmission of associated ALPR Read Image and ALPR Read Metadata to the Passport Parking Management System for storage in a database as a government record for the purpose of citation processing.

"Genetec ALPR System" means the computerized Genetec server and database that stores all ALPR Reads, metadata and hits, and also pushes an Enforced ALPR Hit metadata to the Passport Parking Management System.

"Residential Preferential Parking" or **"RPP"** permit means an annual, visitor, merchant or in-home care parking permit, typically represented by a vehicle's license plate, and associated with the City's Residential Preferential Parking program across designated zones.

"Parking Enforcement Vehicle" means the GO-4 three-wheeled parking enforcement vehicle.

"Parking Enforcement Officers" means employees of the City who work weekly rotations on Parking Enforcement Operations beats throughout the City and are properly trained to operate ALPRs and access the Genetec ALPR System.

"Parking Enforcement Operations" means Parking Enforcement Officer enforcement of parking regulations associated with local ordinances, the California Vehicle Code, and Stolen Vehicle System enforcement through Parking Enforcement Vehicle-based automated (ALPR) and non-automated means.

"Personally Identifiable Information" or **"PII"** means information:

1. that directly identifies an individual (e.g., name, address, telephone number, email address, etc.) or
2. by which the City or other agency intends to identify specific individuals in conjunction with other data elements, i.e., indirect identification.

"Parking Analysis" means ongoing computational or algorithmic analyses performed by the City of Berkeley and/or a third-party data analysis and visualization vendor contracted by Public Works on ALPR Read Metadata regarding the occupancy and/or turnover of public parking spaces as part of goBerkeley, the City's data-driven, demand-responsive parking management program. ALPR Read Metadata data associated with Parking Analysis may include non-randomized license plates, to be maintained by Public Works and/or a third-party data analysis and visualization vendor contracted by Public Works for Parking Analysis.

"Parking Permit Application" means an application submitted to the City for RPP or other permit that may include but is not limited to PII such as names, address, photo identification, vehicle registration (license plate and vehicle identification number), phone number and email address.

"Passport Parking Management System" means the servers and databases maintained by Passport Labs Incorporated, containing the database of the license plate numbers and other PII associated with Parking Permit Applications and Residential Parking Permits, and including historic parking citation data, to include Enforced Hits.

Berkeley Police Department

Law Enforcement Manual

Law Enforcement Manual

Surveillance Use Policy- Automated License Plate Reader

"**OPSMAN Mobile**" means a mobile device providing handheld ticket issuance and ALPR data reference capabilities.

"**Stolen Vehicle System**" or "**SVS**" means information from the California Law Enforcement Telecommunications System's (CLETS) Department of Justice (DOJ) Stolen Vehicle System (SVS) database providing data regarding wanted and stolen vehicles.

1302.3 AUTHORIZED AND PROHIBITED USES

Use of an ALPR is restricted to the purposes outlined below.

All data and images gathered by the ALPR are for official use by the Berkeley Police Department (BPD) for Parking Enforcement Operations and may be retroactively queried in limited circumstances only as specified by this policy and/or federal, state, local law.

ALPR data may be used by the Finance, Information Technology (IT), Customer Service, and Public Works Departments only as specified in this policy, and consistent with Parking Enforcement Operations and Parking Analysis. Data that is considered confidential pursuant to case law, state statutes, and BPD Policy 804 Records Release Management and/or applicable federal, state, or local law is not open to public review.

Berkeley Police Department members or other Departments shall not use, or allow others to use the equipment or database records for any unauthorized purpose, and will enforce this policy pursuant to Section 1302.11(1).

- (a) An ALPR shall only be Deployed and used for Parking Enforcement Operations, and Parking Analysis.
- (b) ALPR data obtained from Parking Enforcement Operations and retained pursuant to this use policy, including data and metadata associated with ALPR Reads and Hits, may be queried and used to support a specific BPD criminal investigation when an officer has a good faith belief that an emergency involving the danger of, or imminent threat of death or serious physical injury to any person requires such a query or use, and the officer reasonably believes there is a nexus between a vehicle and the alleged crime scene. Approval to query the data must be granted by the Chief of Police, or the Acting Chief of Police. The City Manager shall log any queries or use of such information pursuant to this subsection in its Annual Surveillance Technology Report pursuant to BMC 2.99.
- (c) Notwithstanding subsection (b), officers may investigate hits based on reasonable suspicion resulting from apparent matches, discovered in the regular course of work of Parking Enforcement Operations, between the Genetec ALPR System and the following databases: Stolen Vehicles System, Amber, Silver, and Blue Alerts, local missing persons, scoff law violator, gig car, general permit, or other non-criminal local lists.
- (d) Data obtained from Parking Analysis shall not be queried or used for criminal investigations.
- (e) The following uses of the Genetec ALPR System are specifically prohibited:

Berkeley Police Department

Law Enforcement Manual

Law Enforcement Manual

Surveillance Use Policy- Automated License Plate Reader

1. Invasion of Privacy
 - (a) It is a violation of this Policy to utilize the Genetec ALPR system to capture license plates not on a public road or street, or in a place not accessible to the public.
2. Crowd Control
 - (a) ALPRs shall not be deployed in crowd control operations except strictly for the purposes of Parking Enforcement Operations.
3. Criminal Enforcement
 - (a) It is a violation of this Policy to use or Deploy ALPRs to scan or canvass license plates in connection with any crime scene, patrol operation, or investigation except pursuant to Section 1302.3(c) of this policy.
4. Use of Lists and Databases
 - (a) It is a violation of this Policy to use the Genetec ALPR System or associated ALPR Read data in conjunction with any list or database other than those specified pursuant to Section 1302.3(c) of this Policy, or for any personal use.

1302.4 DATA COLLECTION AND RETENTION

The Investigations Division Captain, or their designee, is responsible for ensuring proper collection and retention of ALPR data. Technical support and assistance shall be provided by the City of Berkeley's Information Technology (IT) Department and associated Genetec ALPR system providers/vendors as identified below.

IT's role will be limited to providing initial infrastructure set-up and accessing or viewing individual records or reports (potentially including PII or CLETS information as authorized by the Chief of Police), and testing the accuracy of the equipment. Genetec ALPR System data provided to Parking Control Officers may also contain confidential CLETS information and is not open to public review.

(a) ALPR Read Images

ALPR Reads Images are license plate images which are uploaded daily Genetec server and shall be purged pursuant to the retention guidelines in subsection (b).

(b) ALPR Reads Not Resulting in ALPR Hits

All ALPR Read Images and ALPR Read Metadata transmitted to and stored in the Genetec ALPR System shall be purged within fourteen (14) days to allow for the City's enforcement of its 72-Hour Rule (BMC Section 14.36.050).

ALPR Read Metadata in the form of license plate data or other non-PII data may be transmitted to Public Works staff for Parking Analysis purposes. ALPR Read Metadata data associated with Parking Analysis may include non-randomized license plates, to be maintained by Public Works

Berkeley Police Department

Law Enforcement Manual

Law Enforcement Manual

Surveillance Use Policy- Automated License Plate Reader

and/or a third-party data analysis and visualization vendor contracted by Public Works for Parking Analysis.

(c) ALPR Hits

All ALPR Hits and related metadata resulting from ALPR Reads should be uploaded daily to the Genetec server and shall be purged from Genetec within fourteen (14) days to allow for the City's enforcement of its 72-Hour Rule (BMC Section 14.36.050).

(d) Unenforced ALPR Hits

All erroneous and unenforced ALPR Hit data shall be purged locally at least nightly.

(e) Enforced ALPR Hits

Only ALPR Read Images and Metadata associated with Enforced ALPR Hits shall be downloaded to the Passport Parking Management System servers, with a minimum retention period of one (1) year in Passport and in accordance with the established records retention schedule.

1302.5 DATA ACCESS

- (a) Only properly trained Parking Enforcement Officers, Sworn Officers as selected by the Investigation's Division Captain, and Information Technology personnel are allowed access to the Genetec ALPR system or to collect ALPR information.
- (b) No member of the BPD shall operate ALPR equipment or access ALPR data without first completing department-approved training, which shall include compliance with this use policy.
- (c) No ALPR operator may access California Law Enforcement Telecommunications System (CLETS) data unless otherwise authorized to do so.
- (d) If a Sworn officer is called to verify a stolen vehicle, if practicable, the officer should verify an ALPR response through CLETS before taking enforcement action that is based solely on an ALPR Hit.
- (e) Sworn Officers shall visually verify that the license plate of interest matches identically with the ALPR Read Image of the license plate number captured (ALPR Read) by the ALPR, including both the alphanumeric characters of the license plate, state of issue, and vehicle descriptors before proceeding. BPD members alerted to the fact that an observed motor vehicle's license plate is entered as an ALPR Hit in a specific Stolen Vehicle System list are required to make a reasonable effort to confirm that a wanted person is actually in the vehicle and/or that a reasonable basis exists before a Department member would have a lawful basis to stop the vehicle.

1302.6 DATA PROTECTION

All saved data will be safeguarded and protected by both procedural and technological means. The Berkeley Police Department will observe the following safeguards regarding access to and use of stored data:

Berkeley Police Department

Law Enforcement Manual

Law Enforcement Manual

Surveillance Use Policy- Automated License Plate Reader

- (a) All ALPR data downloaded to any workstation or server shall be accessible only through a login and/or password-protected system capable of documenting all access of information by name, date and time.
- (b) Berkeley Police Department members approved to access ALPR data under these guidelines are permitted to access the data for Parking Enforcement Operations or specific BPD criminal or civil investigations authorized by a court order, subpoena, or search warrant.
- (c) Measures will be taken to ensure the accuracy of ALPR information. Errors discovered in ALPR data collected by ALPR units shall be marked, corrected or deleted in accordance with the type and severity of the error in question. If a Berkeley Police Department member becomes aware of an inaccurate manual entry into the ALPR databases, that member shall immediately contact the originating agency or officer to notify the agency of the inaccuracy. The member shall then notify both the Investigations Division Captain and the Inspections and Audit Sergeant of the data error for appropriate follow up and tracking.

1302.7 CIVIL LIBERTIES AND RIGHTS PROTECTION

The Berkeley Police Department is dedicated to the most efficient utilization of its resources and services in its public safety endeavors. The Berkeley Police Department recognizes the need to protect its ownership and control over shared information and to protect the privacy and civil liberties of the public, in accordance with federal, state, and local law. The procedures described within this policy (Data Access, Data Protection, Data Retention, Public Access and Third-Party Data Sharing) protect against the unauthorized use of ALPR data. These policies ensure the data is not used in a way that would violate or infringe upon anyone's civil rights and/or liberties, including but not limited to impacts that may violate the First and Fourth Amendments and other potentially disparate or adverse impacts on any communities or groups.

The Berkeley Police Department does not permit the sharing of ALPR data gathered by the City or its contractors/subcontractors for the purpose of federal immigration enforcement, pursuant to the California Values Act (Government Code § 7282.5; Government Code § 7284.2 et seq) – these federal immigration agencies include Immigrations and Customs Enforcement (ICE) and Customs and Border Patrol (CPB).

1302.8 PUBLIC ACCESS

Non-law enforcement requests for information regarding a specific vehicle's license plate may be honored when the requester is the registered owner of the vehicle in question, and when providing such information will not invade the privacy of a third party. The requester in such cases must provide acceptable proof of their identity and of ownership of the vehicle in question. All requests will be evaluated on a case-by-case basis to ensure they conform to the requirements and limitations of public records requests and other applicable law.

1302.9 THIRD PARTY DATA-SHARING

- (a) Non-law enforcement requests for anonymized ALPR bulk data related to parking enforcement and access to stored ALPR data related to parking management shall

Berkeley Police Department

Law Enforcement Manual

Law Enforcement Manual

Surveillance Use Policy- Automated License Plate Reader

be processed according to this policy, the Records Maintenance and Release Policy and applicable federal, state, and local law.

- (b) ALPR data obtained from Parking Enforcement Operations and retained pursuant to this use policy, including data and metadata associated with ALPR Reads and Hits, may be queried and used to support a specific criminal investigation when an officer has a good faith belief that an emergency involving the danger of, or imminent threat of death or serious physical injury to any person requires such a query or use, and the officer reasonably believes there is a nexus between a vehicle and the alleged crime scene. Approval to query the data must be granted by the Chief of Police, or the Acting Chief of Police. The City Manager shall log any queries or use of such information pursuant to this subsection in its Annual Surveillance Technology Report pursuant to BMC 2.99. ALPR data shall not be shared with federal immigration enforcement officials consistent with this policy and other applicable City policy.

Requests for ALPR data by non-law enforcement or non-prosecutorial agencies will be processed as provided by this policy and the Records Maintenance and Release Policy.

Aggregated ALPR data not related to specific criminal or civil investigations authorized by a court order, subpoena, or search warrant shall not be released to any local, state or federal agency or entity without the express written consent of the City Manager and only in accordance with this Use Policy.

Such third-party data-sharing shall be subject to non-privileged and non-confidential City Council notification pursuant to BMC 2.99.020 (2) (a).

The Berkeley Police Department is prohibited from selling any ALPR data.

1302.10 TRAINING AND ALPR ADMINISTRATOR

Training for the operation of ALPR technology shall be provided by BPD personnel. All BPD employees who utilize ALPR technology shall be provided a copy of this Surveillance Use Policy.

(1) The Investigations Division Captain shall be responsible for compliance with the requirements of Civil Code § 1798.90.5 et seq. This includes, but is not limited to (Civil Code § 1798.90.51; Civil Code § 1798.90.53):

- i. Ensuring that training requirements are completed for authorized users. The Administrator shall ensure that members receive department-approved training for those authorized to use or access ALPRs (Civil Code § 1798.90.51; Civil Code § 1798.90.53).
- ii. Procedures for system operators to maintain records of access in compliance with Civil Code § 1798.90.52 and this Use Policy
- iii. Ensuring this policy and related procedures are conspicuously posted on the City's website.

Berkeley Police Department

Law Enforcement Manual

Law Enforcement Manual

Surveillance Use Policy- Automated License Plate Reader

1302.11 AUDITING AND OVERSIGHT

Genetec ALPR System audits will be conducted by the Professional Standards Bureau's Audit and Inspections Sergeant on a regular basis, at least biannually.

1. Any unauthorized access or data breach shall be reported immediately to the City Manager. BPD will enforce against prohibited uses of the Genetec ALPR system, associated ALPR Read and Hit metadata, and lists and databases pursuant to Policy P-26, or other applicable law or policy.
2. The audit shall be documented in the form of an internal department memorandum to the Chief of Police. The memorandum shall include any data errors found so that such errors can be corrected. After review by the Chief of Police, the memorandum and any associated documentation shall be placed into the annual report filed with the City Council pursuant to BMC Section 2.99.020 2. d., published on the City of Berkeley website in an appropriate location, and retained within Professional Standards Bureau.

1302.12 MAINTENANCE

Any installation and maintenance of ALPR equipment, as well as ALPR data retention and access, shall be managed by the Investigations Division Captain. The Investigations Division Captain will assign members under their command to administer the day-to-day operation of the ALPR equipment and data.

Surveillance Use Policy-Unmanned Aerial System (UAS)

1303.1 PURPOSE

The purpose of this policy is to establish guidelines for the use of an unmanned aerial system (UAS) and for the storage, retrieval and dissemination of images and data captured by the UAS. Department personnel shall adhere to requirements for Unmanned Aerial Systems covered in this policy as well as the corresponding Use Policy -611.

1303.2 AUTHORIZED USE

The use of the UAS shall only occur as the result of a mutual assistance request, and no BPD personnel will be allowed to operate a UAS. UAS may only be requested for the purposes of remote surveillance and monitoring in the following specified situations:

- (a) Mass casualty incidents (e.g. large structure fires with numerous casualties, mass shootings involving multiple deaths or injuries);
- (b) Disaster management;
- (c) Missing or lost persons;
- (d) Hazardous material releases;
- (e) Sideshow events where many vehicles and reckless driving is present
- (f) Rescue operations;
- (g) Training;
- (h) Hazardous situations which present a high risk to officer and/or public safety, to include:
 - i. Armed suicidal persons;
 - ii. Hostage situations;
 - iii. Barricaded suspects;
- (i) Arrest of armed and/or dangerous persons
- (j) Service of high risk search and arrest warrants involving armed and/or dangerous persons
- (k) Other unforeseen exigent circumstances

Unmanned Aerial Systems shall only be utilized for law enforcement purpose.

1303.3 DATA COLLECTION

If equipped, it shall be the request on all BPD deployments that the "video recording only" function of the UAS be activated whenever the UAS is deployed, and deactivated whenever the UAS deployment is completed. The UAS operator will rely on SD Cards for video recordings.

Berkeley Police Department

Law Enforcement Manual

Law Enforcement Manual

Surveillance Use Policy-Unmanned Aerial System (UAS)

1303.4 DATA ACCESS

Access to UAS data shall be limited to Berkeley Police Department (BPD) personnel and the mutual assistance agency, in connection with an active investigation. Information may be shared in accordance with 1303.9 below. It shall be at the discretion of the Commander or senior supervisor to discern which members have a need to know, and limit access to those members. BPD is prohibited from selling any data obtained from the UAS.

1303.5 DATA PROTECTION

Whenever feasible, the data from the UAS should be encrypted by the vendor or operator. The data should only be accessible to BPD personnel who have been granted security access.

1303.6 CIVIL LIBERTIES AND RIGHTS PROTECTION

The Berkeley Police Department is dedicated to the most efficient utilization of its resources and services in its public safety endeavors. The Berkeley Police Department recognizes the need to protect its ownership and control over shared information and to protect the privacy and civil liberties of the public, in accordance with federal and state law. The procedures described within this policy (Data Access, Data Protection, Data Retention, Public Access and Third-Party Data Sharing) protect against the unauthorized use of Unmanned Aerial Systems (UAS). These procedures ensure the data is not used in a way that would violate or infringe upon anyone's civil rights and/or liberties, including but not limited to potentially disparate or adverse impacts on any communities or groups.

1303.7 DATA RETENTION

If available, any data collected by the use of a UAS should be purged by BPD within 60 days if it doesn't contain any data of evidentiary value. If the data has evidentiary value, it should be uploaded into BPD's evidence database and kept pursuant to the established retention guidelines set forth in policy 804-Records Maintenance and Release.

1303.8 PUBLIC ACCESS

UAS data which is collected and retained under this policy is considered a "law enforcement investigatory file" pursuant to Government Code § 6254, and shall be exempt from public disclosure. UAS data which is retained pursuant to this policy shall be available via public records request pursuant to applicable law regarding Public Records Requests as soon as the criminal or administrative investigation has concluded and/or adjudicated.

All requests and deployments shall be reported annually in the Surveillance Technology Report as outlined in BMC 2.99.070. Additionally, the Department shall publish data regarding the specific requests and deployments on the Department's transparency portal within 14 days of use.

1303.9 THIRD-PARTY DATA-SHARING

Data collected from the UAS may be shared with the following:

- (a) The District Attorney's Office for use as evidence to aid in prosecution, in accordance with laws governing evidence;

Berkeley Police Department

Law Enforcement Manual

Law Enforcement Manual

Surveillance Use Policy-Unmanned Aerial System (UAS)

- (b) Other law enforcement personnel as part of an active criminal investigation;
- (c) Other third parties, pursuant to a Court Order or Search Warrant.

1303.10 TRAINING

The use of a UAS shall only occur as the result of a mutual assistance request, and no BPD personnel will be allowed to operate a UAS. All BPD personnel shall be provided with this Surveillance Use Policy. BPD recognizes that the assisting agency will need to satisfy their respective training requirements to operate the UAS, however BPD personnel shall follow this policy and all relevant policies, including Records Management, Policy 804 while access or retaining any of the captured data from the UAS.

1303.11 AUDITING AND OVERSIGHT

Division Captains or their designee shall ensure compliance with this Surveillance Use Policy.

The security and integrity of the Surveillance Technology and collected information will be completed in the form of a random biennial audit of the uses from the Audit and Inspection's Sergeant. This audit will be routed to the Captain of Professional Standards Bureau and the Chief of Police for review.

Intentional violation of this policy may serve as grounds for disciplinary action pursuant to Policy 1010, Personnel Complaints.

1303.12 MAINTENANCE

UAS's will only be used in a mutual assistance request, and thereby must be obtained from the City Manager via the Chain of Command. All UAS maintenance shall be conducted by the owner/operator of the device consistent with all other mutual assistance response agreements.

Surveillance Use Policy-External Fixed Video Surveillance Cameras

1304.1 PURPOSE

This policy provides guidance for the use of City of Berkeley external fixed video surveillance cameras by the Berkeley Police Department (BPD).

This policy only applies to fixed, overt, marked external video surveillance systems utilized by BPD. It does not apply to mobile audio/video systems, covert audio/video systems or any other image-capturing devices used by the Department. Department personnel shall adhere to the requirements for External Fixed Video Surveillance Cameras covered in this policy as well as the corresponding Use Policy-351.

This Surveillance Use Policy is legally-enforceable pursuant to BMC 2.99.

1304.2 AUTHORIZED USE

Only BPD members who receive training on this policy, who are then granted access by an administrator may access the data from the video surveillance cameras. This data may only be accessed to further a legitimate law enforcement purpose, as listed in this Policy. Members must follow the necessary logging mechanisms, such as case number and case type when querying the database.

The cameras shall only record video images and not sound. Recorded images pursuant to Section 351.5 may be accessed, reviewed, and used for specific criminal or BPD administrative investigations and video surveillance may be accessed and reviewed by authorized BPD personnel for the following purposes:

- (a) To support specific and active criminal investigations.
- (b) To support serious traffic-related investigations.
- (c) To support police misconduct investigations, and
- (d) To respond to and review critical incidents or natural disasters.

Unauthorized recording, viewing, reproduction, dissemination, or retention of video footage is prohibited.

The following are prohibited uses of the video surveillance system:

- (a) Unauthorized recording, viewing, reproduction, dissemination, or retention of video footage is prohibited.
- (b) Video surveillance systems will not intentionally be used to invade the privacy of individuals or observe areas where a reasonable expectation of privacy exists.
- (c) Video surveillance systems shall not be used in an unequal or discriminatory manner and shall not target protected individual characteristics including, but not limited to race, ethnicity, national origin, religion, disability, gender or sexual orientation.

Berkeley Police Department

Law Enforcement Manual

Law Enforcement Manual

Surveillance Use Policy-External Fixed Video Surveillance Cameras

- (d) Video surveillance equipment shall not be used to harass, intimidate or discriminate against any individual or group.
- (e) Video surveillance systems and recordings are subject to the Berkeley Police Department's Immigration Law Policy, and hence may not be shared with federal immigration enforcement officials.

1304.3 DATA COLLECTION

The cameras will film and store video on City of Berkeley encrypted servers. License plate and facial recognition data hardware is not installed on the cameras and may not be installed or used unless approved by the City council. Audio is a standard feature of the camera, but is deactivated by the system administrator and may not be activated or used unless approved by the City Council. The cameras and storage devices shall be wholly owned and operated/maintained by the City of Berkeley.

1304.4 DATA ACCESS

Access to video surveillance cameras data shall be limited to BPD personnel utilizing the camera database for uses described above and pursuant to Use Policy 351, with technical assistance from Public Works Department and Department of Information Technology personnel. Information may be shared in accordance with 1304.9 below. BPD members seeking access to the video surveillance system shall obtain the approval of the Investigations Division Captain, or their designee.

Supervisors should monitor camera access and usage to ensure BPD members are complying with this policy, other applicable department policy, and applicable laws. Supervisors should ensure such use and access is appropriately documented.

1304.5 DATA PROTECTION

All data transferred from the cameras and the servers shall be encrypted. Access to the data must be obtained through the Public Works Department according to this policy and published regulations that limit access and use of data by Public Works and other City Departments and personnel. All system access including system log-in, access duration, and data access points is accessible and reportable and shall be documented by the Public Works Department's authorized administrator. All relevant recordings that are utilized will be collected pursuant to Policy 802, Property and Evidence, and retained pursuant to Policy 804 Records and Maintenance.

1304.6 CIVIL LIBERTIES AND RIGHTS PROTECTION

The Berkeley Police Department is dedicated to the most efficient utilization of its resources and services in its public safety endeavors. The Berkeley Police Department recognizes the need to protect its ownership and control over shared information and to protect the privacy and civil liberties of the public, in accordance with federal and state law. Provisions of this policy, including 1304.4 Data Access, 1304.5 Data Protection, 1304.7 Data Retention, 1304.8 Public Access and 1304.9 Third Party Data Sharing serve to protect against any unauthorized use of video surveillance camera data. License plate and facial recognition data hardware is not installed on the cameras. Audio is a standard feature of the camera, but is deactivated by the system administrator.

Berkeley Police Department

Law Enforcement Manual

Law Enforcement Manual

Surveillance Use Policy-External Fixed Video Surveillance Cameras

These procedures ensure the data is not used in a way that would violate or infringe upon anyone's civil rights and/or liberties, including but not limited to potentially disparate or adverse impacts on any communities or groups.

1304.7 DATA RETENTION

Video surveillance recordings are not government records pursuant to California Government Code 34090 in and of themselves. Except as otherwise permitted in this section, video surveillance recordings shall be purged within one hundred and eighty (180) days of recording. Recordings of incidents involving use of force by a police officer or involving detentions, arrests, or recordings relevant to a formal or informal complaint against a police officer shall be retained for a minimum of two years and one month. Recordings relating to court cases and complaints against BPD sworn officers that are being adjudicated will be manually deleted at the same time other evidence associated with the case is purged in line with the Department's evidence retention policy. Any recordings related to BPD administrative proceedings pursuant to this section shall be maintained until such matter is fully adjudicated, at which time it shall be deleted in line with the Department's evidence retention policy, and any applicable orders from the court. All data will automatically delete after the aforementioned retention period by the System Administrator from Public Works.

Any recordings needed as evidence in a criminal or police misconduct proceeding shall be copied to a suitable medium and booked into evidence in accordance with current evidence procedures.

1304.8 PUBLIC ACCESS

Data collected and used in a police report shall be made available to the public in accordance with department policy and applicable state or federal law.

Requests for recorded video images from the public or the media shall be processed in the same manner as requests for department public records pursuant to Policy 804.

Recorded video images that are the subject of a court order or subpoena shall be processed in accordance with the established department subpoena process.

1304.9 THIRD-PARTY DATA-SHARING

Requests for recorded video from other law enforcement agencies shall be referred to the Investigations Division Captain, or their designee for release in accordance with this policy, and must be related to a specific active criminal investigation.

Data collected from the video surveillance system may be shared with the following:

- (a) The District Attorney's Office for use as evidence to aid in prosecution, in accordance with laws governing evidence;
- (b) Other law enforcement personnel as part of an active criminal investigation;
- (c) Recorded video images that are the subject of a court order or subpoena shall be processed in accordance with the established department subpoena process

Berkeley Police Department

Law Enforcement Manual

Law Enforcement Manual

Surveillance Use Policy-External Fixed Video Surveillance Cameras

Requests for recorded video from the Office of Director of Police Accountability and Police Accountability Board shall be referred to the Investigations Division Captain, or their designee, for release in accordance with Charter Article XVIII, Section 125, Subdivision (20)(a).

1304.10 TRAINING

All BPD members authorized to operate or access video surveillance systems shall receive appropriate training. Training should include guidance on the use of cameras, associated software, and review of relevant policies and procedures, including this policy as well as review of relevant City of Berkeley laws and regulations.

Training should also address state and federal law related to the use of video surveillance equipment and privacy. All relevant recordings that are utilized will be collected pursuant to Policy 802 Property and Evidence, and retained pursuant to Policy 804 Records Maintenance.

1304.11 AUDITING AND OVERSIGHT

The video surveillance software generates a site log each time the system is accessed. The site log is broken down by server, device, user or general access. The site log is kept on the server for two years and is exportable for reporting. Video surveillance system audits will be conducted by the Professional Standards Bureau's Audit and Inspections Sergeant on a regular basis, at least biennial.

BPD will enforce against prohibited uses of this policy pursuant to Policy 1010, Personnel Complaints or other applicable law or policy. The City Manager shall enforce against any prohibited use of the cameras and/or access to data by other City of Berkeley personnel.

The audit shall be documented in the form of an internal department memorandum to the Chief of Police. The memorandum shall include any data errors found so that such errors can be corrected. After review by the Chief of Police, the memorandum and any associated documentation shall be placed into the annual report filed with the City Council pursuant to BMC Section 2.99.020 2. d., published on the City of Berkeley website in an appropriate location, and retained within the Professional Standards Bureau.

1304.12 MAINTENANCE

It shall be the responsibility of the Public Works Department to facilitate and coordinate any updates and required maintenance with access limited to that detailed in the City Manager's promulgated policies.

Surveillance Use Policy-Fixed Automated License Plate Readers (ALPRs)

1305.1 PURPOSE

The purpose of this policy is to provide guidance for the capture, storage and use of digital data obtained through the use of Automated License Plate Reader (ALPR) technology. Department Personnel shall adhere to the requirements of the Surveillance Use-Fixed ALPRs in this policy as well as the corresponding Use Policy -422.

The policy of the Berkeley Police Department is to utilize ALPR technology to capture and store digital license plate data and images while recognizing the established privacy rights of the public.

All data and images gathered by the ALPR are for the official use of this department. Because such data may contain confidential information, it is not open to public review.

The Berkeley Police Department does not permit the sharing of ALPR data gathered by the City or its contractors/subcontractors for federal immigration enforcement, pursuant to the California Values Act (Government Code § 7282.5; Government Code § 7284.2 et seq) – these federal immigration agencies include Immigrations and Customs Enforcement (ICE) and Customs and Border Patrol (CBP).

1305.2 DEFINITIONS

- (a) Automated License Plate Reader (ALPR): A device that uses cameras and computer technology to compare digital images to lists of known information of interest.
- (b) ALPR Operator: Trained Department members who may utilize ALPR system/equipment. ALPR operators may be assigned to any position within the Department, and the ALPR Administrator may order the deployment of the ALPR systems for use in various efforts.
- (c) ALPR Administrator: The Investigations Bureau Captain or the Chief's designee, serves as the ALPR Administrator for the Department.
- (d) Hot List: A list of license plates associated with vehicles of interest compiled from one or more databases including, but not limited to, NCIC, CA DMV, Local BOLO's, etc.
- (e) Vehicles of Interest: Including, but not limited to vehicles which are reported as stolen, display stolen license plates or tags; vehicles linked to missing and/or wanted persons and vehicles flagged by the Department of Motor Vehicle Administration or law enforcement agencies.
- (f) Detection: Data obtained by an ALPR of an image (such as a license plate) within public view that was read by the device, including potential images (such as the plate and description of vehicle on which it was displayed), and information regarding the location of the ALPR system at the time of the ALPR's read.
- (g) Hit Alert from the ALPR system that a scanned license plate number may be in the National Crime Information Center (NCIC) or other law enforcement database for a

Berkeley Police Department

Law Enforcement Manual

Law Enforcement Manual

Surveillance Use Policy-Fixed Automated License Plate Readers (ALPRs)

specific reason including, but not limited to, being related to a stolen car, wanted person, missing person, domestic violation protective order or terrorist-related activity.

1305.3 AUTHORIZED AND PROHIBITED USES

An ALPR shall only be used for official law enforcement business.

Use of an ALPR is restricted to the purposes outlined below. Department members shall not use, or allow others to use the equipment or database records for any unauthorized purpose (Civil Code § 1798.90.51; Civil Code § 1798.90.53).

- (a) An ALPR shall only be used for official law enforcement business.
- (b) An ALPR may be used in conjunction with any routine patrol operation or to support criminal investigations. Reasonable suspicion or probable cause is not required before using an ALPR database.
- (c) Partial license plates and unique vehicle descriptions reported during crimes may be entered into the ALPR system in an attempt to identify suspect vehicles.
- (d) No member of this department shall operate ALPR equipment or access ALPR data without first completing department-approved training.
- (e) If feasible, the officer should verify an ALPR response through the California Law Enforcement Telecommunications System (CLETS) before taking enforcement action that is based solely on an ALPR alert. Once an alert is received, the operator should confirm that the observed license plate from the system matches the license plate of the observed vehicle. Before any law enforcement action is taken because of an ALPR alert, the alert will be verified through a CLETS inquiry via MDT or through Dispatch.
- (f) Members will not take any police action that restricts the freedom of any individual based solely on an ALPR alert unless it has been validated. Because the ALPR alert may relate to a vehicle and may not relate to the person operating the vehicle, officers are reminded that they need to have reasonable suspicion and/or probable cause to make an enforcement stop of any vehicle. (For example, if a vehicle is entered into the system because of its association with a wanted individual, Officers should attempt to visually match the driver to the description of the wanted subject prior to making the stop or should have another legal basis for making the stop.)
- (g) Hot Lists. Designation of hot lists to be utilized by the ALPR system shall be made by the ALPR Administrator or his/her designee. Hot lists shall be obtained or compiled from sources as may be consistent with the purposes of the ALPR system set forth in this Policy. Hot lists utilized by the Department's LPR system may be updated by agency sources more frequently than the Department may be uploading them and thus the Department's LPR system will not have access to real time data. Occasionally, there may be errors in the LPR system's read of a license plate. Therefore, an alert alone shall not be a basis for police action (other than following the vehicle of interest). Prior to initiation of a stop of a vehicle or other intervention based on an alert, Department members shall undertake the following:
 - 1. Verification of status on a Hot List. An officer must receive confirmation, from a Berkeley Police Department Communications Dispatcher or other department

Berkeley Police Department

Law Enforcement Manual

Law Enforcement Manual

Surveillance Use Policy-Fixed Automated License Plate Readers (ALPRs)

computer device, that the license plate is still stolen, wanted, or otherwise of interest before proceeding (absent exigent circumstances).

2. Visual verification of license plate number. Officers shall visually verify that the license plate of interest matches identically with the image of the license plate number captured (read) by the LPR, including both the alphanumeric characters of the license plate, state of issue, and vehicle descriptors before proceeding. Department members alerted to the fact that an observed motor vehicle's license plate is entered as a Hot Plate (hit) in a specific BOLO (be on the lookout) list are required to make a reasonable effort to confirm that a wanted person is actually in the vehicle and/or that a reasonable basis exists before a Department member would have a lawful basis to stop the vehicle.
3. Department members will clear all stops from hot list alerts by indicating the positive ALPR Hit, i.e., with an arrest or other enforcement action. If it is not obvious in the text of the call as to the correlation of the ALPR Hit and the arrest, then the Department member shall update with the Communications Dispatcher and original person and/or a crime analyst inputting the vehicle in the hot list (hit).
4. General Hot Lists (SVS, SFR, and SLR) will be automatically downloaded into the ALPR system a minimum of once a day with the most current data overwriting the old data.
5. All entries and updates of specific Hot Lists within the ALPR system will be documented by the requesting Department member within the appropriate general offense report. As such, specific Hot Lists shall be approved by the ALPR Administrator.
6. Administrator (or his/her designee) before initial entry within the ALPR system. The updating of such a list within the ALPR system shall thereafter be accomplished pursuant to the approval of the Department member's immediate supervisor. The hits from these data sources should be viewed as informational; created solely to bring the officers attention to specific vehicles that have been associated with criminal activity.

All Hot Plates and suspect information entered into the ALPR system will contain the following information as a minimum:

- Entering Department member's name
 - Related case number.
 - Short synopsis describing the nature of the originating call
- (a) Login/Log-Out Procedure. To ensure proper operation and facilitate oversight of the ALPR system, all users will be required to have individual credentials for access and use of the systems and/or data, which has the ability to be fully audited.

Permitted/Impermissible Uses. The ALPR system, and all data collected, is the property of the Berkeley Police Department. Department personnel may only access and use the ALPR system for official and legitimate California law enforcement purposes consistent with this Policy. The following uses of the ALPR system are specifically prohibited:

Berkeley Police Department

Law Enforcement Manual

Law Enforcement Manual

Surveillance Use Policy-Fixed Automated License Plate Readers (ALPRs)

1. **Invasion of Privacy:** Except when done pursuant to a court order such as a search warrant, is a violation of this Policy to utilize the ALPR to record license plates except those of vehicles that are exposed to public view (e.g., vehicles on a public road or street, or that are on private property but whose license plate(s) are visible from a public road, street, or a place to which members of the public have access, such as the parking lot of a shop or other business establishment).
2. **Harassment or Intimidation:** It is a violation of this Policy to use the ALPR system to harass and/or intimidate any individual or group.
3. **Use Based on a Protected Characteristic.** It is a violation of this policy to use the LPR system or associated scan files or hot lists solely because of a person's, or group's race, gender, religion, political affiliation, nationality, ethnicity, sexual orientation, disability, or other classification protected by law.
4. **Personal Use:** It is a violation of this Policy to use the ALPR system or associated scan files or hot lists for any personal purpose.
5. **First Amendment Rights.** It is a violation of this policy to use the LPR system or associated scan files or hot lists for the purpose or known effect of infringing upon First Amendment rights.
 - (a) Anyone who intentionally engages in an impermissible use of the ALPR system or associated scan files or hot lists shall be subject to administrative sanctions, up to and including termination, pursuant to and consistent with the relevant collective bargaining agreements and departmental policies. Partial license plates reported during crimes may be entered into the ALPR system in an attempt to identify suspect vehicles.
 - (a) Anyone who negligently engages in an impermissible use of the ALPR system or associated scan files or hot lists may be subject to administrative sanctions, up to and including termination, pursuant to and consistent with the relevant collective bargaining agreements and departmental policies. Partial license plates reported during crimes may be entered into the ALPR system in an attempt to identify suspect vehicles.

No ALPR operator may access California Law Enforcement Telecommunications System (CLETS) data unless otherwise authorized to do so. If practicable, the officer should verify an ALPR response through the California Law Enforcement Telecommunications System (CLETS) before taking enforcement action that is based solely on an ALPR alert.

1305.4 DATA COLLECTION

The Investigations Division Captain is responsible for ensuring systems and processes are in place for the proper collection and retention of ALPR data. Data will be transferred from vehicles to the designated storage in accordance with department procedures. Evidentiary hit data shall be transferred into the Department's digital evidence repository through secure integration.

All ALPR data downloaded to the ALPR server should be stored for no longer than 30 days, and in accordance with the established records retention schedule. Thereafter, ALPR data should be purged unless it has become, or it is reasonable to believe it will become, evidence in a criminal

Berkeley Police Department

Law Enforcement Manual

Law Enforcement Manual

Surveillance Use Policy-Fixed Automated License Plate Readers (ALPRs)

or civil action or is subject to a discovery request or other lawful action to produce records. In those circumstances the applicable data should be downloaded from the server and uploaded into BPD's digital evidence repository.

ALPR vendor, will store the data (data hosting) and ensure proper maintenance and security of data stored in their data towers. The ALPR vendor will purge their data at the end of the 30 days of storage. However, this will not preclude Berkeley Police Department from maintaining any relevant vehicle data obtained from the system after that period pursuant to the established City of Berkeley retention schedule mentioned above or outlined elsewhere. Relevant vehicle data are scans corresponding to the vehicle of interest on a hot list. The ALPR vendor and Department shall ensure that the necessary data is captured and stored to accurately report the relevant data required in the Annual Surveillance Technology report. Once the City Council approves the Annual Surveillance Technology report all said data may be purged so long as it doesn't violate the Retention guidelines.

Restrictions on use of vendor Data: Information gathered or collected, and records retained by the vendor's cameras or any other Berkeley Police Department ALPR system will not be sold, accessed, or used for any purpose other than legitimate California law enforcement or public safety purposes.

1305.5 DATA ACCESS

- (a) No member of this department shall operate ALPR equipment or access ALPR data without first completing department-approved training.
- (b) No ALPR operator may access California Law Enforcement Telecommunications System (CLETS) data unless otherwise authorized to do so.
- (c) If practical, an operator should verify an ALPR response through the California Law Enforcement Telecommunications System (CLETS) before taking enforcement action that is based solely on an ALPR alert.

1305.6 DATA PROTECTION

All saved data will be safeguarded and protected by both procedural and technological means. The Berkeley Police Department will observe the following safeguards regarding access to and use of stored data (Civil Code § 1798.90.51; Civil Code § 1798.90.53):

- (a) Non-law enforcement requests for access to stored ALPR data shall be processed according to the Records Maintenance and Release Policy in accordance with applicable law.
- (b) All ALPR data downloaded to any workstation or server shall be accessible only through a login/password-protected system capable of documenting all access of information by name, date and time (Civil Code § 1798.90.52).
- (c) Berkeley Police Department members approved to access ALPR data under these guidelines are permitted to access the data for legitimate California law enforcement purposes only, such as when the data relate to a specific criminal investigation or department-related civil or administrative action.

Berkeley Police Department

Law Enforcement Manual

Law Enforcement Manual

Surveillance Use Policy-Fixed Automated License Plate Readers (ALPRs)

- (d) Aggregated ALPR data not related to specific criminal investigations shall not be released to any local, state or federal agency or entity without the consent of the Chief of Police or City Manager (i.e. If transportation department requested volume of vehicular traffic associated with specific events, it could conceivably be provided with the count of vehicles, but not the specific license plates with appropriate permissions).
- (e) Measures will be taken to ensure the accuracy of ALPR information. Errors discovered in ALPR data collected by ALPR units shall be marked, corrected or deleted in accordance with the type and severity of the error in question.
- (f) ALPR system audits will be conducted by the Professional Standards Bureau's Audit and Inspections Sergeant on a regular basis, at least biennial.
- (g) Such ALPR data may be released to other authorized and verified law enforcement officials and agencies for legitimate California law enforcement purposes.
- (h) Every ALPR Detection Browsing Inquiry must be documented by either the associated Berkeley Police case number or incident number, and/or a reason for the inquiry

For security or data breaches, see the Records Release and Maintenance Policy.

1305.7 CIVIL LIBERTIES AND RIGHTS PROTECTION

The Berkeley Police Department is dedicated to the most efficient utilization of its resources and services in its public safety endeavors. The Berkeley Police Department recognizes the need to protect its ownership and control over shared information and to protect the privacy and civil liberties of the public, in accordance with federal and state law. The procedures described within this policy (Data Access, Data Protection, Data Retention, Public Access and Third-Party Data Sharing) protect against the unauthorized use of ALPR data. These policies ensure the data is not used in a way that would violate or infringe upon anyone's civil rights and/or liberties, including but not limited to potentially disparate or adverse impacts on any communities or groups.

1305.8 DATA RETENTION

All ALPR data belongs to the Department. All ALPR data downloaded to the ALPR server should be stored for no longer than 30 days, and in accordance with the established records retention schedule. Thereafter, ALPR data should be purged unless it has become, or it is reasonable to believe it will become, evidence in a criminal or civil action or is subject to a discovery request or other lawful action to produce records. In those circumstances the applicable data should be downloaded from the server and uploaded into BPD's digital evidence repository.

ALPR vendor, will store the data (data hosting) and ensure proper maintenance and security of data stored in their data towers. The ALPR vendor will purge their data at the end of the 30 days of storage. However, this will not preclude Berkeley Police Department from maintaining any relevant vehicle data obtained from the system after that period pursuant to the established City of Berkeley retention schedule mentioned above or outlined elsewhere. Relevant vehicle data are scans corresponding to the vehicle of interest on a hot list. The ALPR vendor and Department shall ensure that the necessary data is captured and stored to accurately report the relevant data required in the Annual Surveillance Technology report. Once the City Council approves the

Berkeley Police Department

Surveillance Use Policy-Fixed Automated License Plate Readers (ALPRs)

Annual Surveillance Technology report all said data may be purged so long as it doesn't violate the Retention guidelines.

1305.9 PUBLIC ACCESS

All data and images gathered by the ALPR are for the official use of this department. Because such data may contain confidential information, it is not open to public review.

The Department shall to the extent feasible aim to offer a transparency portal wherein the number of scans, hits, and queries is available to the public in real-time, or as near as real-time as feasible. All data shall be reported in the Annual Surveillance Technology Report.

1305.10 THIRD PARTY DATA-SHARING

The ALPR data may be shared only with other law enforcement or prosecutorial agencies for official law enforcement purposes or as otherwise permitted by law.

- (a) A supervisor at the requesting agency will sign an acknowledgment letter stating that the shared data will only be used for the purposes that are aligned with the Berkeley Police Department's policy. The Berkeley Police Department does not permit the sharing of ALPR data gathered by the City or its contractors/subcontractors for purpose of federal immigration enforcement, these federal immigration agencies include Immigrations and Customs Enforcement (ICE) and Customs and Border Patrol (CBP).
- (b) The signed letter is retained on file. Requests for ALPR data by non-law enforcement or non-prosecutorial agencies will be processed as provided in the Records Maintenance and Release Policy (Civil Code § 1798.90.55).
- (c) All signed letters shall be routed to the Audit and Inspection Sergeant for compliance and reporting.

ALPR data is subject to the provisions of the Berkeley Police Department's Immigration Law Policy, and hence may not be shared with federal immigration enforcement officials.

1305.11 TRAINING

Training for the operation of ALPR Technology shall be provided by BPD personnel. All BPD employees who utilize ALPR Technology shall be provided a copy of this Surveillance Use Policy.

1305.12 AUDITING AND OVERSIGHT

ALPR system audits will be conducted by the Professional Standards Bureau's Audit and Inspections Sergeant on a regular basis, at least biannually. The data from the fixed ALPRs shall be reported annually in the Surveillance Technology Report.

Any ALPR data or images that are utilized for an investigation that becomes evidence in a case will be made available to the Office of the Director of Police Accountability (ODPA) as it relates to a specific complaint of misconduct. Additionally, the results of any audits will be shared with the ODPA upon their completion.

Chapter 15 - Legislative Updates

2019 Legislative Update

1500.1 PURPOSE

The Professional Standards Bureau has prepared this legislative update for the 2019 calendar year. It is intended to serve as a general summary of legal changes that pertain to law enforcement and is not meant to cover every legislative change enacted in 2018. The 2019 Legislative Update Manual published by the California Peace Officers' Association is the main source used for this summary. All personnel are invited to click on the links within this document and read these various codes in their entirety for a more detailed explanation. The changes outlined below go into effect January 1, 2019, unless otherwise indicated.

1500.2 BUSINESS AND PROFESSIONS CODE

CANNABIS IN ALCOHOLIC BEVERAGES - [AB 2914 \(Cooley\)](#) - BP §§ 25621.5 and 26070.2: Prohibits an alcoholic beverage licensee from selling, offering, or providing cannabis or cannabis products, including the sale of an alcoholic beverage that contains cannabis, and clarifies existing laws banning alcoholic beverages containing tetrahydrocannabinol or cannabinoids, regardless of source.

PAWN SHOPS - [AB 1993 \(Gipson\)](#) - BP §§ 21636 and 21636.1: Revises the current requirement for secondhand dealers to hold (and not sell) property from 30 days to seven days, with the exception of firearms. In addition, it authorizes the dealer to sell the property after 5 days, if specified information is collected.

1500.3 CIVIL CODE

HUMAN TRAFFICKING - BUSINESSES - [AB 2034 \(Kalra\)](#) - CC § 52.6: Requires businesses and establishments that operate in transportation or handle high volumes of traffic to train their employees in recognizing the signs of human trafficking and reporting suspected human trafficking.

HUMAN TRAFFICKING - EMPLOYEES - [SB 970 \(Atkins\)](#) - GC § 12950.3: Requires, by January 1, 2020, hotels and motels to provide at least 20 minutes of classroom or other effective interactive training and education regarding human trafficking awareness to each employee who is likely to interact or come into contact with victims of human trafficking and who is employed as of July 1, 2019.

1500.4 GOVERNMENT CODE

BODY CAMERAS - FOOTAGE DISCLOSURE - [AB 748 \(Ting\)](#) - GC § 6254: Commencing July 1, 2019, an audio or video recording that relates to a critical incident, as defined, may only be withheld during an active criminal or administrative investigation for 45 days. Agencies will need to show cause for non-release after the 45 days. If not released, the agency will need to continue to show cause and notify the requesting party every 30 days thereafter.

Berkeley Police Department

Law Enforcement Manual

Law Enforcement Manual

2019 Legislative Update

1500.5 LABOR CODE

WORKERS COMP - OFF DUTY POLICE - [AB 1749 \(Daly\)](#) - Labor Code Section 3600.2 (Amend): Clarifies that certain peace officers injured out of state while performing defined law enforcement duties are eligible to receive workers' compensation benefits, in the discretion of the employing agency.

1500.6 PENAL CODE

FELONY MURDER - ACCOMPLICE - [SB 1437 \(Skinner\)](#) - PC §§ 188 and 189: Limits liability for individuals based on a theory of first- or second-degree felony murder. Specifies that in order for an accomplice to be convicted of murder, he/she must have had the mental state described as malice, unless certain criteria are met. States that malice shall not be imputed to a person based solely on his or her participation in a crime. It's a retroactive bill which will allow those in custody for murder, based on the felony murder rule, to be released or receive a reduced sentence.

FIREARMS - DOMESTIC VIOLENCE - [AB 3129 \(Rubio\)](#) - PC § 29805: Prohibits a person who is convicted of a misdemeanor domestic violence offense, which currently results in a 10-year prohibition against possessing a firearm, from possessing a firearm for life.

FIREARMS - RETIRED PEACE OFFICERS - [AB 1192 \(Lackey\)](#) - PC § 16690: Exempts retired Level I reserve peace officers who meet specified length of service requirements from the ban on possessing high-capacity magazines.

FIREARMS - VEHICLE STORAGE - [SB 1382 \(Vidak\)](#) - PC § 25140: Permits the leaving of a handgun in an unattended vehicle if the handgun is locked in a tool box or utility box and defines a locked tool box or utility box as: "a fully enclosed container that is permanently affixed to the bed of a pickup truck or vehicle that does not have a trunk, and is locked by a padlock, key lock, combination lock, or other similar locking device."

GUN VIOLENCE RESTRAINING ORDERS - [SB 1200 \(Skinner\)](#) - PC §§ 11106, et al.: Makes various changes to existing laws related to gun violence restraining orders (GVROs). States that for purposes of the GVRO law, "ammunition" includes a "magazine," as defined in existing law. Requires an officer serving a GVRO to verbally ask the restrained person if he or she has any firearms, firearm parts or components, ammunition, or magazines in his or her possession or under his or her custody or control.

RECORDS - POST ON INTERNET - [SB 978 \(Bradford\)](#) - PC Title 4.7 §13650: Requires, commencing January 1, 2020, POST and each local law enforcement agency to conspicuously post on their Internet websites all current standards, policies, practices, operating procedures, and education and training materials that would otherwise be available if a request was made pursuant California Public Records (CPRA), and makes Legislative findings and declarations.

RECORDS - POLICE OFFICERS - [SB 1421 \(Skinner\)](#) - PC §§ 832.7 and 832.8: Provides the public with access, through the CPRA, to records related to reports, investigation, or findings of incidents involving:

- The discharge of a firearm at a person by an officer

Berkeley Police Department

Law Enforcement Manual

Law Enforcement Manual

2019 Legislative Update

- The use of force by an officer which results in death or serious bodily injury.
- A sustained finding that an officer engaged in the sexual assault of a member of the public.
- A sustained finding that an officer was dishonest relating to the reporting, investigation, or prosecution of a crime, or relating to the misconduct of another peace officer, including but not limited to perjury, false statements, filing false reports, destruction/falsifying/or concealing evidence, or any other dishonesty that undermines the integrity of the criminal justice system.

WOBBLERS - [AB 1941 \(Jones-Sawyer\)](#) - PC § 17: Allows the court to reduce an offense punishable as a felony or a misdemeanor to a misdemeanor upon successful completion of probation, regardless of whether the court had previously imposed a sentence.

WARRANTS - [AB 2710 \(Oberholte\)](#) - PC §§ 817 and 1526: Eliminates the requirement that a judge take the oath over the telephone when an officer makes an application for a search warrant or arrest warrant. “The magistrate shall verify that all the pages sent have been received, that all pages are legible, and that the declarant’s signature, digital signature, or electronic signature is genuine.”

1500.7 VEHICLE CODE

BICYCLES - HELMETS - [AB 3077 \(Caballero\)](#) - VC §§ 21212 and 40303.5: Requires a citation issued to a person under the age of 18 for not wearing a helmet when riding a bicycle, scooter, skateboard, or roller or in-line skates to be non-punitive and correctable if the minor’s parent or legal guardian shows proof of correction within 120 days to the issuing law enforcement agency. It requires the officer to keep the citation for 120 days to allow for the parent or guardian to show proof of correction. If proof is shown, the citation may not be turned in to the court.

BICYCLES - HIT AND RUN - [AB 1755 \(Steinorth\)](#) - VC § 21200: Extends the provisions of Vehicle Code Section 20001 to persons operating bicycles on Class I bikeways. A bicyclist, if involved in an accident on a Class I bikeway which results in injury to another involved person, is required to stop, provide identifying information, and render assistance as necessary. A bicyclist who fails to follow these requirements is in violation of the “hit and run” law to the same extent as a vehicle or a bicyclist on a roadway.

DRIVER’S HANDBOOK - [AB 2918 \(Holden\)](#) - VC § 1656.3: The Department of Motor Vehicles Driver’s Handbook will include information addressing the extent and limitations of a peace officer’s authority during a traffic stop and the legal rights of drivers and passengers. The information will be developed by the civil rights section of the Department of Justice in consultation with the Department of Motor Vehicles, California Highway Patrol, Commission on Peace Officer Standards and Training, and civil rights organizations.

DUI - BLOOD TESTS - [AB 2717 \(Lackey\)](#) - VC §§ 23577, 23578, 23612: Modifies California law regarding the refusal to submit to a test of blood alcohol when a person is suspected of driving under the influence (DUI) to attempt to comply with the United States (U.S.) Supreme Court’s

Berkeley Police Department

Law Enforcement Manual

Law Enforcement Manual

2019 Legislative Update

ruling in *Birchfield v. North Dakota*, (2016) 136 S. Ct. 2160, by deleting the criminal penalty for refusing to submit to a blood test.

INSURANCE AT COLLISION SCENE - [AB 3246](#) - VC § 16028: Clarifies that Section 16028(a) of the Vehicle Code (not 16028(c)) is the appropriate section for officers to cite if a driver fails to provide proof of financial responsibility at the scene of a traffic collision.

MOTORIZED SCOOTER - HELMET - [AB 2989 \(Flora\)](#) - VC § 21235: Removes the bicycle helmet requirement for riders of motorized scooters who are 18 years of age or older. It is still illegal to operate a motorized scooter upon a sidewalk, except as necessary to enter or leave adjacent property.

VEHICLES - TOWING AND STORAGE - [AB 2392 \(Santiago\)](#) - VC §§ 10652.5, et al.: Provides additional consumer protections when a vehicle is towed or stored for any reason. There have been instances where towing and storage operators capitalize on consumer confusion by charging excessive fees. This law aims to curb these practices by ensuring that fees are reasonable and do not exceed those that are approved by the California Highway Patrol or local law enforcement's Tow Service Agreements.

1500.8 WELFARE AND INSTITUTIONS CODE

JUVENILES - DNA COLLECTION - [AB 1584 \(Gonzalez Fletcher\)](#) - W&I § 625.4: Law enforcement shall not request a voluntary DNA sample be collected directly from a minor, without first obtaining written consent from the minor and the minor's parent or legal guardian, or attorney representing the minor.

JUVENILES - 12 YEAR OLDS - [SB 439 \(Mitchell\)](#) - W&I §§ 601, et al.: Establishes that a minor under the age of 12 who has committed a minor crime may not be adjudged a ward of the court and should be released to their parent or guardian. However, a minor under 12 who is alleged to have committed specified violent felonies, including murder and rape by force, remains within the jurisdiction of the juvenile court.

JUVENILES - TRIED AS ADULTS - [SB 1391 \(Lara\)](#) - W&I § 707: Repeals the authority of a prosecutor to make a motion to transfer a minor from juvenile court to adult criminal court if the minor was alleged to have committed certain serious offenses when he or she was 14 or 15 years old.

MENTAL HEALTH - FORMS - [AB 2099 \(Gloria\)](#) - W&I § 5150: Allows copies of the 5150 application to be treated as the original by hospitals and mental health facilities.

MENTAL HEALTH - FIREARMS - [AB 1968 \(Low\)](#) - W&I § 8103: Beginning January 1, 2020, requires that a person placed on a W&I 5150 hold more than once within a one-year period be prohibited from owning a firearm for the remainder of his or her life.

2020 Legislative Update

1501.1 PURPOSE AND SCOPE

The Professional Standards Bureau has prepared this legislative update for the 2020 calendar year. It is intended to serve as a general summary of legal changes that pertain to law enforcement and is not meant to cover every legislative change enacted in 2019. The 2020 Legislative Update Manual published by the California Peace Officers' Association is the main source used for this summary. All personnel are invited to click on the links within this document and read the various codes in their entirety for a more detailed explanation. The changes outlined below go into effect January 1, 2020, unless otherwise indicated.

1501.2 DEADLY FORCE - USE OF

[AB 392 \(Weber\)](#) Revises the standards for use of deadly force by peace officers. Specifies that homicide is justifiable when committed by a peace officer and those acting by their command in their aid and assistance, under either of the following circumstances:

- (a) In obedience to any judgment of a competent court; or
- (b) When the homicide results from a peace officer's use of force that is in compliance with the standards of Penal Code Section 835a.

1501.3 DEADLY FORCE - TRAINING

[SB 230 \(Caballero\)](#) Requires law enforcement agencies to maintain a policy by January 1, 2021 that provides guidelines on the use of force, utilizing de-escalation techniques and other alternatives to use of force, specific guidelines for the application of deadly force, and factors for evaluating and reviewing all use of force incidents.

1501.4 DMV PRIVILEGE

[AB 1168 \(Mullin\)](#) Removes the ability of the court to delay, suspend or revoke, or order DMV to delay, suspend, or revoke a person's driving privilege as a result of a conviction for various offenses. Repeals the license suspensions for vandalism, controlled substance or alcohol use, possession or related conduct and/or firearm use.

1501.5 CONDOMS - EVIDENCE CODE

[SB 233 \(Wiener\)](#) Provides that possession of a condom is not admissible in the prosecution of a violation of specified crimes related to prostitution.

1501.6 TEXT TO 911

[SB 485 \(Beall\)](#) Requires each public safety agency to deploy a text to 911 service that enables an individual to text "911" for emergency services, by January 1, 2021.

1501.7 EMBEZZLED VEHICLES

[AB 391 \(Voepel\)](#) Decreases the five-day period following the expiration of an auto-rental agreement or lease for the presumption of embezzlement to apply to 72 hours.

Berkeley Police Department

Law Enforcement Manual

Law Enforcement Manual

2020 Legislative Update

1501.8 DISCOVERY

[AB 1600 \(Kalra\)](#) Shortens the notice requirement in criminal cases when a defendant files a motion to discover police officer misconduct from 16 days to 10 days.

1501.9 GVROS DURATION

[AB 12 \(Irwin\)](#) Extends the duration of gun violence restraining orders (GVRO) and their renewals to a maximum of five years. Authorizes the employing law enforcement agency to be named in a GVRO petition filed by a law enforcement officer in place of the individual officer's name. Delays implementation until September 1, 2020.

1501.10 GVROS - CATEGORY

[AB 61 \(Ting\)](#) Expands the category of persons that may file a petition requesting a court to issue an ex parte temporary gun violence restraining order (GVRO), a one year GVRO, or a renewal of a GVRO, to include an employer, a coworker who has substantial and regular interactions with the subject of the petition for at least one year and has obtained the approval of the employer, and an employee or teacher of a secondary school, or postsecondary school the subject has attended in the last six months and has the approval of the school administration staff. Delays implementation of this measure until September 1, 2020.

1501.11 GVROS - PROCEDURES

[AB 339 \(Irwin\)](#) Requires each law enforcement agency to develop and adopt written policies and standards regarding the use of gun violence restraining orders (GVRO) on or before January 1, 2021.

1501.12 RAPE KITS - RAPID TURNAROUND

[SB 22 \(Leyva\)](#) Requires law enforcement agencies to submit sexual assault forensic evidence to a crime lab within 20 days after it is booked, and requires crime labs to either process the evidence for DNA profiles and upload them into the Combined DNA Index System (CODIS) or transmit the evidence to another crime lab for processing and uploading.

1501.13 MENTAL ILLNESS - TERMS

[AB 46 \(Carrillo\)](#) Replaces terminology used to describe mental health conditions and individuals with mental health conditions.

Replaces, in various sections of California's code:

- "Insane" with "mental health disorder"
- "Mentally incapacitated" with "lacks mental capacity"
- "Mentally or severely disordered" with "mental or severe mental health disorder"
- "Developmentally disabled" with "developmental disability"
- "Mental disorder" and "mental defect" with "mental health disorder"
- "Mentally ill" with "mental illness."

Berkeley Police Department

Law Enforcement Manual

Law Enforcement Manual

2020 Legislative Update

1501.14 FACIAL RECOGNITION

[AB 1215 \(Ting\)](#) Prohibits, until January 1, 2023, a law enforcement officer or agency from installing, activating, or using a biometric surveillance system in connection with a law enforcement agency's body-worn camera or any other camera.

1501.15 PEER SUPPORT

[AB 1117 \(Grayson\)](#) Enacts the Law Enforcement Peer Support and Crisis Referral Services Program authorizing a local or regional law enforcement agency to establish a peer support and crisis referral program (Peer support program).

1501.16 POSSE COMITATUS

[SB 92 \(Hertzberg\)](#) Repeals the posse comitatus provision of the Penal Code, which makes an able-bodied person 18 years of age or older who neglects or refuses to assist a peace officer or a judge in making an arrest, retaking an escaped person into custody, or preventing the breach of the peace, subject to a fine between \$50-\$1000.

1501.17 JURY SERVICE

[SB 310 \(Skinner\)](#) Allows for a person with a prior felony conviction to serve on a jury. Provides that a person is ineligible for jury service if they are a 290 registrant, currently on parole, PRCS, or felony probation, or currently incarcerated in any prison or jail.

1501.18 PTSD - WORKER'S COMPENSATION

[SB 542 \(Stern\)](#) Creates a rebuttable presumption for specified peace officers that a diagnosis of post-traumatic stress disorder (PTSD) is occupational, and therefore covered by the workers' compensation system.

1501.19 CHILDHOOD SEXUAL ASSAULT - STATUTE OF LIMITATIONS

[AB 218 \(Gonzalez\)](#) Extends the civil statute of limitations for childhood sexual assault by 14 years, revives, for three years, old claims, and increases certain penalties for childhood sexual assault.

1501.20 BICYCLES

[AB 1266 \(Rivas\)](#) This bill allows bicycles to travel straight through a right or left-hand-turn-only lane while at an intersection, if an official traffic control device indicates the movement is permitted. The Department of Transportation (Caltrans) would be required to develop standards to implement the provisions.

1501.21 MUFFLER CITATIONS

[SB 112 \(Budget and Fiscal Review Committee\)](#) This bill will allow law enforcement to issue a correctable citation for muffler noise to the drivers of vehicles however, citations for motorcyclists would remain non-correctable.

1501.22 DOMESTIC VIOLENCE

[SB 273 \(Rubio\)](#) Extends the window to prosecute a felony domestic violence crime from three years to five years and makes changes to domestic violence training for peace officers.

Berkeley Police Department

Law Enforcement Manual

Law Enforcement Manual

2020 Legislative Update

1501.23 CASE LAW - BLOOD DRAWS

[Mitchell v. Wisconsin \(2019\) 139 S.Ct. 2525](#) RULE: When a DUI suspect is unconscious “the general rule is that a warrant is not needed” for a blood test.

1501.24 CASE LAW - MIRANDA

[People v. Anthony \(2019\) 32 Cal.App.5th 1102](#) RULE: When a suspect invokes Miranda but later decides he wants to speak with officers after all, officers must re-advise him/her of their Miranda rights anew or limit the second interview to questions that are not likely to elicit an incriminating response.

2021 Legislative Update

1502.1 PURPOSE AND SCOPE

The Professional Standards Bureau has prepared this legislative update for the 2021 calendar year. It is intended to serve as a general summary of legal changes that pertain to law enforcement and is not meant to cover every legislative change enacted in 2020. The 2021 Legislative Update Manual published by the California Peace Officers' Association is the main source used for this summary. All personnel are invited to click on the links within this document and read the various codes in their entirety for a more detailed explanation. The changes outlined below go into effect January 1, 2021, unless otherwise indicated.

1502.2 FALSE REPORTS AND HARASSMENT

AB 1775 (Jones-Sawyer)

https://leginfo.ca.gov/faces/billTextClient.xhtml?bill_id=201920200AB1775

Makes it a "wobblette" to knowingly use the 911 emergency system for the purpose of harassing another, and increases the penalty for this crime by up to one year in county jail, or a fine of no more than \$2,000 if the harassment is also an act defined to be a hate crime or is an offense committed against a person based on their perceived race, ethnicity, religion, nationality, country of origin, ancestry, disability, gender, gender identity, gender expression, or sexual orientation.

1502.3 CRIMINAL PROCEDURE: DISCRIMINATION

AB 2542 (Kalra)

https://leginfo.ca.gov/faces/billNavClient.xhtml?bill_id=201920200AB2542

A LE officer's potential bias, if found by the court, may be the cause for vacation of a conviction.

1502.4 DRIVING PRIVILEGE: SUSPENSION OR DELAY

SB 485 (Beall)

https://leginfo.ca.gov/faces/billTextClient.xhtml?bill_id=201920200SB485

Repeals ability of court to delay, or order to DMV to delay, suspend or revoke a DL as a result of conviction for: Vandalism, Controlled substance or alcohol use or possession, or firearm use.

1502.5 INVASION OF PRIVACY: FIRST RESPONDERS

AB 2655 (Gibson)

https://leginfo.ca.gov/faces/billTextClient.xhtml?bill_id=201920200AB2655

Makes it a misdemeanor for a first responder, as defined, operating under color of authority, to use an electronic at the scene of an accident or crime to capture the image of a deceased person for any purpose other than an official law enforcement purpose or for a genuine public interest.

1502.6 FIREARMS: GUN VIOLENCE RESTRAINING ORDERS

AB 2617 (Gabriel)

Berkeley Police Department

Law Enforcement Manual

Law Enforcement Manual

2021 Legislative Update

Updates PC 18140 language to note that a copy of a GVRO be filed with the court no later than 3 court days after issuance.

1502.7 FIREARM TRANSFERS

AB 1292 (Bauer-Kahan)

http://leginfo.legislature.ca.gov/faces/billTextClient.xhtml?bill_id=201920200AB1292

Specifies circumstances which allow a firearm to be transferred from one person to another by operation of law without the need to go through a firearms dealer. PC 25570:Exempts an individual from specified prohibitions on possession and transfer of firearms (including open carry) when the individual is delivering a firearm to law enforcement these circumstances:

- Person gives prior notice to the LE agency that they are transporting the gun
- Person took the gun from someone who was committing a crime against them and notified a LE agency that they are transporting it for disposition

1502.8 FIREARM TRANSFERS II

SB 61 (Portantino)

https://leginfo.legislature.ca.gov/faces/billNavClient.xhtml?bill_id=201920200SB61

Extends the prohibition on purchasing more than one handgun a month to include semiautomatic centerfire rifles.

Exempts the following from the “one gun a month” prohibition:

- Any law enforcement agency
- Any state or local correctional facility
- Any person who is properly identified as a full-time peace officer and who is authorized to and does carry a firearm during the course and scope of employment as a peace officer.

1502.9 JUVENILE MIRANDA

SB 203 (Bradford)

https://leginfo.legislature.ca.gov/faces/billTextClient.xhtml?bill_id=201920200SB203

Previously Juveniles 15 and under required legal counsel prior to Miranda. As of Jan 1st, 2021 the law has changed to Juveniles 17 and under per SB 203.

1502.10 ELDER AND DEPENDENT ADULT ABUSE POLICIES

SB 338 (Hueso)

https://leginfo.legislature.ca.gov/faces/billTextClient.xhtml?bill_id=201920200SB338

Requires a LE agency that adopts or amends its policy regarding senior and disability victimization after **April 13, 2021** to include information and training on elder and dependent abuse.

Berkeley Police Department

Law Enforcement Manual

Law Enforcement Manual

2021 Legislative Update

1502.11 PROBATION: LENGTH OF TERMS

AB 1950 (Kamlager)

https://leginfo.legislature.ca.gov/faces/billTextClient.xhtml?bill_id=201920200AB1950

Limits the term of probation to no longer than two years for a felony conviction and one year for a misdemeanor conviction, except offenses that include a specific probation term in statute. Provides that the two-year probation limit does not apply to offenses defined by law as violent felonies, or to an offense that includes a specific probation term within its provisions. Provides that the two-year probation limit does not apply to a felony conviction for grand theft from an employer, embezzlement, or theft by false pretenses, if the total value of property taken exceeds \$25,000. More to follow after this bill is examined by the DA's Office.

1502.12 CHILD ABUSE: REPORTABLE CONDUCT

AB 1145 (Garcia, Cristina)

https://leginfo.legislature.ca.gov/faces/billTextClient.xhtml?bill_id=201920200AB1145

Specifies that "sexual assault" for purposes of reporting incidents of abuse under the Child Abuse and Neglect Reporting Act (CANRA) does not include voluntary sodomy, oral copulation, or sexual penetration, if there are no indicators of abuse, unless the conduct is between a person who is 21 years of age or older and a minor who is under 16 years of age. Specifies that "sexual assault" for purposes of reporting incidents of abuse under the Child Abuse and Neglect Reporting Act (CANRA) does not include voluntary sodomy, oral copulation, or sexual penetration, if there are no indicators of abuse, unless the conduct is between a person who is 21 years of age or older and a minor who is under 16 years of age.

1502.13 SEARCH WARRANTS: VEHICLE RECORDING DEVICES

AB 1638 (Oberholte)

https://leginfo.legislature.ca.gov/faces/billTextClient.xhtml?bill_id=201920200AB1638

Amends PC 1524 to allow law enforcement to obtain a search warrant to access vehicle event data recorder (EDR) information in cases of death or serious injury involving a motor vehicle.

1502.14 CLETS, DOCUMENTATION OF REASONS FOR INQUIRIES

AB 1747 (Gonzalez)

https://leginfo.legislature.ca.gov/faces/billTextClient.xhtml?bill_id=201920200AB1747

You will be required, commencing July 1, 2021 to document the reason for the initiation of all non-criminal history inquiries on CLETS (i.e. the non-criminal history inquiries routinely made during traffic stops and at traffic collisions scenes).

1502.15 OPEN CONTAINERS OF ALCOHOL IS PERMITTED ON PEDICABS WITH LOCAL ORDINANCE APPROVAL

SB 543 (Pan)

Berkeley Police Department

Law Enforcement Manual

Law Enforcement Manual

2021 Legislative Update

https://leginfo.ca.gov/faces/billTextClient.xhtml?bill_id=201920200SB543

Alcohol consumption will continue to be allowed on pedicabs. Pedicabs allowing alcohol consumption can only be operated once an operator has met significant safety standards and operating requirements including local government approval have been met. This includes; all passengers being 21 years of age or older, alcohol may only be consumed by passengers while physically onboard the pedicab, alcohol beverages may only be supplied by the passengers of the pedicab, the operator or safety monitor shall have met the safety training course requirement, and the consumption of alcoholic beverages onboard the pedicab shall be authorized by local ordinance or resolution. See VC 21215.2 for the parameters that must be met.

1502.16 EMERGENCY VEHICLES

SB 909 (Dodd)

https://leginfo.ca.gov/faces/billTextClient.xhtml?bill_id=201920200SB909

Allows authorized emergency vehicles to be equipped with a device which emits a “Hi-Lo” audible warning sound that meets regulations established by the California Highway Patrol (CHP).

1502.17 POLICE USE OF FORCE

AB 1506 (McCARTY)

Provides that a state prosecutor shall conduct an investigation of any officer-involved shooting that resulted in the death of an unarmed civilian, and beginning July 1, 2023, to operate a Police Practices Division within the Department of Justice to, upon request of a local law enforcement agency, review the use of deadly force policies of that law enforcement agency.

1502.18 CASE LAW: FOURTH AMENDMENT: SEIZURE OF PROPERTY

People v. Tran (2019) 42 Cal.App.5th 1: Under what circumstances may a police officer seize a digital

device pending an application for a search warrant?

RULE: Law enforcement may seize a digital device to prevent the destruction or loss of evidence pending

an application for a search warrant.

1502.19 CASE LAW: FOURTH AMENDMENT: DETENTION OF SUSPECT ON FOOT

People v. Flores (2019) 38 Cal.App.5th 617: Can a person be detained solely based on the facts that they are in a high-crime area and fled from law enforcement?

RULE: Flight from a high-crime area is not sufficient, on its own, to establish a reasonable suspicion to detain.

1502.20 CASE LAW: DETENTION VIA VEHICLE STOP

People v. Tacardon (2020) 53 Cal.App.5th 89: Was a suspect detained when an officer made a U-turn, parked 15-20 feet behind the suspect’s legally parked car, turned his spotlight onto the suspect’s car, and immediately got out and approached?

Berkeley Police Department

Law Enforcement Manual

Law Enforcement Manual

2021 Legislative Update

RULE: When an officer parks a marked patrol car behind a legally parked car and illuminates the car with a spotlight, the driver may well feel he or she is “the object of official scrutiny,” but such directed scrutiny does not amount to a detention.

1502.21 CASE LAW: FOURTH AMENDMENT: REASONABLE SUSPICION FOR VEHICLE STOPS

Kansas v. Glover (2020) 140 S.Ct. 1183: If an officer runs a license plate and learns that the registered owner’s driver’s license was suspended or revoked, may the officer stop the vehicle to confirm that the driver was the registered owner and, therefore, citable?

RULE: If the registered owner’s license of a vehicle has been revoked or suspended, a vehicle stop is reasonable unless the officer has information (e.g., wrong sex or wrong race) negating the inference that the owner is the driver.

1502.22 CASE LAW: FOURTH AMENDMENT: VEHICLE SEARCH- MARIJUANA, PROBABLE CAUSE, AND THE AUTOMOBILE EXCEPTION

People v. Shumake (2019) 45 Cal.App.5th Supp. 1: May officers search a vehicle upon finding cannabis flower in a closed container in the center console of a vehicle?

RULE: (1) Automobile exception permitting warrantless search applies when there is probable cause to believe evidence of a crime or contraband may be found; (2) Veh. Code, § 2322 prohibits possession of loose cannabis flowers “not in a container” while driving a motor vehicle.

2. FACTS: An officer conducted a traffic stop; Def. was driver. Officer noticed a strong smell of marijuana, both fresh and burnt, coming from his car. The officer asked Def. if he had marijuana, and he stated that he had “some bud” in the center console. The officer searched the car and discovered 1.14 grams of “dried flower” marijuana in a closed tube in the center console. Upon further search, the officer discovered a loaded pistol under the driver’s seat.

3. HELD: Reversed. Vehicle Code, § 23222 prohibits the possession of “loose cannabis flower not in a container” while driving a motor vehicle. Because Def. possessed cannabis flower in a closed container, the possession was lawful and could not be relied upon to justify the search. Absent the discovery of the cannabis, there was no probable cause to search the vehicle under the automobile exception, and the firearm would not have been inevitably discovered.

1502.23 CASE LAW: FOURTH AMENDMENT: VEHICLE SEARCH- MARIJUANA, PROBABLE CAUSE, AND THE AUTOMOBILE EXCEPTION

People v. McGee (2020) 53 Cal.App.5th 796: Did officers have probable cause to search the vehicle after observing, in plain view, an open container of marijuana?

RULE: The presence of an unsealed bag of marijuana plainly visible on a passenger’s person constitutes probable cause to search the vehicle, including containers.

2. FACTS: Officers initiated a traffic stop of the car Def. was driving for expired registration. After Def. pulled over, one officer approached the driver’s side of the car and encountered Def., while his partner approached the passenger’s side and encountered a female passenger. As they

Berkeley Police Department

Law Enforcement Manual

Law Enforcement Manual

2021 Legislative Update

approached the car, both officers noted the scent of unburned marijuana. When asked about the scent, Def. denied having any marijuana in the car; however, the officer speaking with the female passenger saw an unsealed bag of marijuana in her cleavage. The officers searched the vehicle. On the passenger floorboard was a zipped purse, and inside was a loaded handgun. After Miranda warnings, Def. (a felon) admitted the gun was his and that he had placed it in the passenger's purse when he saw the officers behind his car.

3. HELD: Conviction affirmed. The search of the vehicle, including the passenger's purse, was justified pursuant to the automobile exception. While the mere presence of a lawful amount of marijuana is not sufficient to establish probable cause to search under the automobile exception, and there must be some additional evidence of illegality, here there was sufficient additional evidence because the officer observed an open container on the passenger's person (and possession of an unsealed or open container of marijuana in a vehicle is still illegal, no

matter the amount). The presence of this contraband provided probable cause to believe the passenger possessed other open containers, and therefore the officers had probable cause to search the passenger and the vehicle for further evidence of contraband.

1502.24 CASE LAW: FOURTH AMENDMENT: VEHICLE SEARCH- MARIJUANA, PROBABLE CAUSE, AND THE AUTOMOBILE EXCEPTION

People v. Lee (2019) 40 Cal.App.5th 853: Does the seizure of a small amount of marijuana from Def.'s person constitute probable cause to search a vehicle? When may law enforcement impound a vehicle when a driver's license is suspended?

RULE: The warrantless search of a vehicle is allowed: (1) under the automobile exception when there is probable cause to believe evidence of a crime or contraband may be found; or (2) during a vehicle inventory properly conducted in the course of impounding an automobile. A vehicle may be impounded only if it serves a community caretaking function.

2. FACTS: When Def. failed to produce a license after a traffic stop and exiting the vehicle, officers conducted a pat-down search and found a small amount of marijuana and cash in Def.'s pocket. When the officer began to handcuff him, Def. tensed up and leaned back in the car to tell something to his passenger. The officers learned that Def. was driving on a suspended license. They handcuffed Def., detained the passenger, and proceeded to search Def.'s car, telling Def. they were going to impound the vehicle due to his suspended license. During the search, officers found cocaine, a gun, and indicia of drug sales. Def. was charged with drug-and-weapon-related offenses and moved to suppress the evidence. The prosecution argued that the search was justified as an automobile search and a vehicle inventory prior to its impound.

3. HELD: Reversed. The officers lacked probable cause under the automobile exception. Finding a small (legal) amount of marijuana and money on Def. did not provide a reasonable basis to believe contraband would be found in the car. There was no evidence that would cause a reasonable person to believe the Def. had more marijuana than the legal amount he possessed (e.g. no odor, open container, or signs of illegal sales activity).

Berkeley Police Department

Law Enforcement Manual

Law Enforcement Manual

2021 Legislative Update

The decision to impound the vehicle was not justified because no community caretaking function was served by impounding the car. The car was parked in or next to an apartment complex. It was not blocking a roadway, the sidewalk, or a driveway. And the trial court reasonably found the officer's primary motive was to investigate, rather than inventory, the car.

- A motive to impound the vehicle was belied by how the search was conducted and the officer's repeated questions to Def. about whether there was anything illegal inside the vehicle. The officer who performed the search did not complete a required San Diego Police Department form (ARJIS-11) for towing and impound. And he did not assist the officer who ultimately completed the vehicle inventory (after discovery of the contraband).
- Although the Vehicle Code authorizes law enforcement to impound a car when a person is found to be driving on a suspended license, "the fact that an inventory search is authorized is not determinative of the search's constitutionality."

2022 Legislative Update

1503.1 PURPOSE AND SCOPE

The Professional Standards Bureau has prepared this legislative update for the 2022 calendar year. It is intended to serve as a general summary of legal changes that pertain to law enforcement and is not meant to cover every legislative change enacted in 2021. The 2022 Legislative Update Manual published by the California Peace Officers' Association is the main source used for this summary. All personnel are invited to click on the links within this document and read the various codes in their entirety for a more detailed explanation. The changes outlined below go into effect January 1, 2022, unless otherwise indicated.

1503.2 ARREST WARRANTS: DECLARATION OF PROBABLE CAUSE

AB-127 (Kamlager)

https://leginfo.legislature.ca.gov/faces/billNavClient.xhtml?bill_id=202120220AB127

Authorizes an employee of a public prosecutor's office to make a declaration of probable cause to arrest to a magistrate *if the defendant is a peace officer*.

1503.3 WITNESS CREDIBILITY: SEXUAL CONDUCT, SOCIAL MEDIA CONTENT

AB 341 (Horvath)

https://leginfo.legislature.ca.gov/faces/billNavClient.xhtml?bill_id=202120220AB341

EC 782 (Amended)

Provides additional protections under the Rape Shield Law to victims of sexual assault by requiring evidence mined from their social media accounts to first be evaluated by a judge to demonstrate relevance and admissibility before being introduced in open court to attack the victim's credibility in a sexual assault prosecution

1503.4 ORGANIZED RETAIL THEFT

AB 331 (Jones-Sawyer)

https://leginfo.legislature.ca.gov/faces/billNavClient.xhtml?bill_id=202120220AB331

PC 490.4 (Added)

Re-establishes the crime of organized retail theft until to January 1, 2026, and also empowers the existence of a taskforce established by the California Highway Patrol to analyze organized retail theft and vehicle burglary and assist local law enforcement in counties identified as having elevated property crime.

1503.5 PARTICIPATION IN A CRIMINAL STREET GANG: ENHANCED SENTENCE

AB 333 (Kamlager)

https://leginfo.legislature.ca.gov/faces/billNavClient.xhtml?bill_id=202120220AB333

Effective: January 1, 2023

Berkeley Police Department

Law Enforcement Manual

Law Enforcement Manual

2022 Legislative Update

PC 186.22 (Amended) and 1109 (Added)

Redefines the terms "pattern of criminal gang activity" and "criminal street gang" for the purposes of the gang offense, enhancement, and alternate penalty under the STEP Act and requires bifurcation of gang-related prosecutions from prosecutions that are not gang-related.

PC 186.22 (f) definition of "Criminal Street Gang:"

An ongoing, organized association or group of three or more persons, whether formal or informal, having as one of its primary activities the commission of one or more of the criminal acts enumerated in subdivision (e), having a common name or common identifying sign or symbol, and whose members collectively engage in, or have engaged in, a pattern of criminal gang activity.

1503.6 PEACE OFFICERS: MINIMUM QUALIFICATIONS

AB 89 (Jones-Sawyer)

https://leginfo.legislature.ca.gov/faces/billNavClient.xhtml?bill_id=202120220AB89

GC 1031.4 (Added)

(a) In addition to the standards in Section 1031, each state officer and employee designated as peace officers as described in Sections 830.1, with the exception of those described in subdivision (c) of that section, 830.2, with the exception of those described in subdivision (d) of that section, 830.3, 830.32, or 830.33 of the Penal Code, or any other peace officer employed by an agency that participates in the Peace Officer Standards and Training (POST) program shall be at least 21 years of age at the time of appointment.

Penal Code 13511.1 (Added)

"Modern policing degree program" to be recommended to the Legislature by January 1, 2023, by the Chancellor of California Community Colleges, with POST, Law Enforcement stakeholders (admin and employees), California State University, and community organizations to serve as advisors.

1503.7 PEACE OFFICERS: CERTIFICATION, CIVIL RIGHTS

SB 2 (Bradford)

<https://legiscan.com/CA/bill/SB2/2021>

Disqualifying Provisions (GC 1029 (Amended))

Specifies that any person who, after January 1, 2004, has been convicted of a crime based upon a verdict or finding of guilt of a felony by the trier of fact, or upon the entry of a plea of guilty or nolo contendere to a felony, is disqualified from being a peace officer, even if the court sets aside, vacates, withdraws, expunges or otherwise dismisses or reverses the conviction, unless the court finds the person to be factually innocent of the crime for which they were convicted at the time of entry of the order.

Berkeley Police Department

Law Enforcement Manual

Law Enforcement Manual

2022 Legislative Update

Provides that any person who has been issued peace officer certification and has had that certification revoked by POST, or who has voluntarily surrendered that certification permanently, or having met the minimum requirement for issuance of certification, has been denied issuance of certification, is disqualified from being a peace officer.

Requires the Department of Justice (DOJ) to supply POST with necessary disqualifying felony and misdemeanor conviction data for all persons known to be current/former peace officers.

Provides that POST shall be permitted use of the information from DOJ for de-certification purposes and that the data, once received by POST, will become information releasable under the California Public Records Act (CPRA), including documentation of the person's appointment, promotion, and demotion dates, as well as certification/licensing status and reason/disposition for leaving service.

POST

Grants POST the power to investigate and determine the fitness of any person to serve as a peace officer within the POST training program, as specified, in the State of California

Grants POST the power to audit any law enforcement agency that employs peace officers, as specified, without cause and at any time.

Creates a Peace Officer Standards Accountability Division within POST.

To review investigations conducted by law enforcement agencies or any other investigative authority and to conduct additional investigations, as necessary, into serious misconduct that may provide grounds for decertification, present findings and recommendations to the advisory board created by this bill and to POST and bring proceedings seeking the revocation of certification of peace officers as directed by the board and POST.

Requires POST to establish procedures for accepting complaints from members of the public regarding peace officers or law enforcement agencies that may be investigated by the accountability division or referred to the peace officers' employing agency or the Department of Justice (DOJ).

Peace Officer Standards Accountability Division

Creates a 9-member Advisory Board for the purpose of making recommendations on the decertification of peace officers to POST.

Members:

- One peace officer (or former) appointed by the Governor
- One peace officer (or former) with substantial experience at a management rank in IA or disciplinary proceedings, appointed by the Governor
- Two members of the public, working in nonprofit or academic institutions on issues related to police misconduct (one by Governor, other by Speaker of the Assembly)

Berkeley Police Department

Law Enforcement Manual

Law Enforcement Manual

2022 Legislative Update

- Two members of the public working at community-based organizations on issues related to police misconduct (one by Governor and one by Senate Rules Committee)
- Two members shall be members of the public, who shall not be former peace officers, with strong consideration given to individuals who have been subject to wrongful use of force likely to cause death or serious bodily injury by a peace officer, or who are surviving family members of a person killed by the wrongful use of deadly force by a peace officer, appointed by the Governor.
- One attorney with substantial professional experience involving oversight of peace officers, as appointed by the Governor.

Grounds for Decertification, Investigation, Appeal

Requires that a certified peace officer have their certification revoked, and an applicant have their application for certification denied, upon a determination that the peace officer or applicant has done any of the following:

- (a) The person is or has become ineligible to hold office as a peace officer, as specified;
- (b) The person has been terminated for cause from employment as a peace officer for, or has, while employed as a peace officer, otherwise engaged in, any “serious misconduct,” as defined.

Requires definitions of “*serious misconduct*,” without limitation.

Requires, beginning no later than January 1, 2023, that each law enforcement agency be responsible for the completion of investigations of allegations of serious misconduct by a peace officer, regardless of their employment status.

POST may consider the officer’s prior conduct and service record in determining whether revocation is appropriate for serious misconduct.

Serious Misconduct

(b) By January 1, 2023, the commission shall adopt by regulation a definition of “serious misconduct” that shall serve as the criteria to be considered for ineligibility for, or revocation of, certification.

This definition shall include all of the following:

1. Dishonesty relating to the reporting, investigation, or prosecution of a crime, or relating to the reporting of, or investigation of misconduct by, a peace officer or custodial officer, including, but not limited to, false statements, intentionally filing false reports, tampering with, falsifying, destroying, or concealing evidence, perjury, and tampering with data recorded by a body-worn camera or other recording device for purposes of concealing misconduct.
2. Abuse of power, including, but not limited to, intimidating witnesses, knowingly obtaining a false confession, and knowingly making a false arrest.
3. Physical abuse, including, but not limited to, the excessive or unreasonable use of force.

Berkeley Police Department

Law Enforcement Manual

Law Enforcement Manual

2022 Legislative Update

4. Sexual assault, as described in subdivision (b) of Section 832.7.
5. Demonstrating bias on the basis of race, national origin, religion, gender identity or expression, housing status, sexual orientation, mental or physical disability, or other protected status in violation of law or department policy or inconsistent with a peace officer's obligation to carry out their duties in a fair and unbiased manner. This paragraph does not limit an employee's rights under the First Amendment to the United States Constitution.
6. Acts that violate the law and are sufficiently egregious or repeated as to be inconsistent with a peace officer's obligation to uphold the law or respect the rights of members of the public, as determined by the commission. Whether a particular factual or legal determination in a prior appeal proceeding shall have preclusive effect in proceedings under this chapter shall be governed by the existing law of collateral estoppel.
7. Participation in a law enforcement gang. For the purpose of this paragraph, a "law enforcement gang" means a group of peace officers within a law enforcement agency who may identify themselves by a name and may be associated with an identifying symbol, including, but not limited to, matching tattoos, and who engage in a pattern of on-duty behavior that intentionally violates the law or fundamental principles of professional policing, including, but not limited to, excluding, harassing, or discriminating against any individual based on a protected category under federal or state anti-discrimination laws, engaging in or promoting conduct that violates the rights of other employees or members of the public, violating agency policy, the persistent practice of unlawful detention or use of excessive force in circumstances where it is known to be unjustified, falsifying police reports, fabricating or destroying evidence, targeting persons for enforcement based solely on protected characteristics of those persons, theft, unauthorized use of alcohol or drugs on duty, unlawful or unauthorized protection of other members from disciplinary actions, and retaliation against other officers who threaten or interfere with the activities of the group.
8. Failure to cooperate with an investigation into potential police misconduct, including an investigation conducted pursuant to this chapter. For purposes of this paragraph, the lawful exercise of rights granted under the United States Constitution, the California Constitution, or any other law shall not be considered a failure to cooperate.
9. Failure to intercede when present and observing another officer using force that is clearly beyond that which is necessary, as determined by an objectively reasonable officer under the circumstances, taking into account the possibility that other officers may have additional information regarding the threat posed by a subject.

1503.8 FIREARMS TRACING

AB 1191 (McCarty)

https://leginfo.legislature.ca.gov/faces/billNavClient.xhtml?bill_id=202120220AB1191

PC 11108.3 (Amended)

Specifies that DOJ shall, by no later than January 1, 2023, and annually thereafter, prepare and submit a report to the Legislature summarizing the data that *law enforcement agencies are required to report to DOJ* regarding information necessary to identify and trace the history of all

Berkeley Police Department

Law Enforcement Manual

Law Enforcement Manual

2022 Legislative Update

recovered firearms for trends relating to the sources and origins of firearms used in crimes if the firearms:

- o Are illegally possessed;
- o Have been used in a crime; or,
- o Are suspected of having been used in a crime.

1503.9 MILITARY EQUIPMENT: ACQUISITION AND USE

AB 481 (Chiu)

https://leginfo.legislature.ca.gov/faces/billNavClient.xhtml?bill_id=202120220AB481

GC 7071 (a) (to be added)

STAGE 1 – January 1, 2022- Approval of new equipment

A law enforcement agency will have to obtain approval of their governing body (as defined) by ordinance, prior to requesting, seeking, or using new ‘military equipment’ either permanently or temporarily.

STAGE 2- Approval of existing equipment

No later than May 1, 2022, a law enforcement agency seeking to continue the use of any military equipment that was acquired prior to January 1, 2022, shall commence a governing body approval process in accordance with this section.

If the governing body does not approve the continuing use of the equipment, including by adoption of a military equipment use policy within 180 days of submission of the proposed military equipment use policy to the governing body, the law enforcement agency shall cease its use of the military equipment until it receives the approval of the governing body.

GETTING APPROVAL:

In seeking the approval, a law enforcement agency shall submit a proposed military equipment use policy to the governing body and make those documents available on the law enforcement agency’s internet website at least 30 days prior to any public hearing (i.e., agendaized mtg with public comment) concerning the equipment at issue.

WHAT’S IN A “MILITARY EQUIPMENT USE POLICY?”

“Military equipment use policy” means a publicly released, written document governing the use of military equipment by a law enforcement agency or a state agency that addresses, at a minimum, all of the following:

- o A description of each type (i.e., same manufacturer model #) of military equipment
- o The purposes and authorized uses for each type of military equipment.
- o The fiscal impact of each type of military equipment
- o The legal and procedural rules that govern each authorized use.

Berkeley Police Department

Law Enforcement Manual

Law Enforcement Manual

2022 Legislative Update

- The training that must be completed before agency is allowed to use
- Mechanisms to ensure compliance
- Public complaint procedures

Collaboration with another Law Enforcement Agency in deployment of equipment within governing body's jurisdiction.

WHAT'S INCLUDED MILITARY EQUIPMENT?

- Unmanned, remotely piloted, powered aerial or ground vehicles
- MRAPs or armored personnel carriers (Police versions of standard consumer vehicles excluded)
- Humvees, or wheeled vehicles with breaching or entry apparatus attached
- Tracked armored vehicles providing ballistic protection
- Command and control vehicles built or modified to facilitate the operational control and direction of public safety units.
- Weaponized aircraft, vessels, or vehicles of any kind.
- Battering rams, slugs, and breaching apparatuses that are explosive in nature.
- Firearms and ammunition of .50 caliber or greater (standard issue shotguns specifically excluded)
- Specialized firearms and ammunition of less than .50 caliber, including assault weapons as defined in Sections 30510 and 30515 of the Penal Code, (with the exception of standard issue service weapons and ammunition of less than .50 caliber that are issued to officers, agents, or employees of a law enforcement agency or a state agency.)
- Any firearm or firearm accessory that is designed to launch explosive projectiles.
- "Flashbang" grenades, explosive breaching tools, "tear gas," and "pepper balls"
- Taser Shockwave, microwave weapons, water cannons, and LRAD.
- The following projectile launch platforms and their associated munitions: 40mm projectile launchers, "bean bag," rubber bullet, and SIM weapons.

ONGOING USE

A law enforcement agency shall submit to the governing body an annual military equipment report for each type of military equipment approved by the governing body within one year of approval, and annually thereafter for as long as the military equipment is available for use and make each annual report publicly available on its internet website for as long as the military equipment is available for use.

The annual military equipment report shall, at a minimum, include the following information for the immediately preceding calendar year for each type of military equipment:

1. A summary of how the military equipment was used and the purpose of its use.

Berkeley Police Department

Law Enforcement Manual

Law Enforcement Manual

2022 Legislative Update

2. A summary of any complaints or concerns received concerning the military equipment.
3. The results of any internal audits, any information about violations of the military equipment use policy, and any actions taken in response.
4. The total annual cost for each type of military equipment, including acquisition, personnel, training, transportation, maintenance, storage, upgrade, and other ongoing costs, and from what source funds will be provided for the military equipment in the calendar year following submission of the annual military equipment report.
5. The quantity possessed for each type of military equipment.
6. If the law enforcement agency intends to acquire additional military equipment in the next year, the quantity sought for each type of military equipment.
 - (a) Within 30 days of submitting and publicly releasing an annual military equipment report pursuant to this section, the law enforcement agency shall hold at least one well-publicized and conveniently located community engagement meeting, at which the general public may discuss and ask questions regarding the annual military equipment report and the law enforcement agency's funding, acquisition, or use of military equipment.

1503.10 POSITIONAL ASPHYXIA

AB 490 (Gipson)

https://leginfo.legislature.ca.gov/faces/billNavClient.xhtml?bill_id=202120220AB490

GC 7286.5 (a)- (amended)

1. A law enforcement agency shall not authorize the use of a carotid restraint or choke hold by any peace officer employed by that agency.
2. A law enforcement agency shall not authorize techniques or transport methods that involve a substantial risk of positional asphyxia.
 - (a) "Positional asphyxia" means situating a person in a manner that compresses their airway and reduces the ability to sustain adequate breathing. This includes, without limitation, the use of any physical restraint that causes a person's respiratory airway to be compressed or impairs the person's breathing or respiratory capacity, including any action in which pressure or body weight is unreasonably applied against a restrained person's neck, torso, or back, or positioning a restrained person without reasonable monitoring for signs of asphyxia.

1503.11 PEACE OFFICER: LAW ENFORCEMENT GANGS

AB 958 (Gipson)

https://leginfo.legislature.ca.gov/faces/billNavClient.xhtml?bill_id=202120220AB958

PC 13670 (to be added)

Berkeley Police Department

Law Enforcement Manual

Law Enforcement Manual

2022 Legislative Update

Requires all law enforcements agencies to maintain a policy that prohibits participation in a law enforcement gang, cooperate with external investigations (by Inspector General and/or Attorney General) and makes a violation of that policy grounds for termination.

“Law enforcement gang” means a group of peace officers within a law enforcement agency who may identify themselves by a name and may be associated with an identifying symbol, including, but not limited to, matching tattoos, and who engage in a pattern of on-duty behavior that intentionally violates the law or fundamental principles of professional policing, including, but not limited to, excluding, harassing, or discriminating against any individual based on a protected category under federal or state anti-discrimination laws, engaging in or promoting conduct that violates the rights of other employees or members of the public, violating agency policy, the persistent practice of unlawful detention or use of excessive force in circumstances where it is known to be unjustified, falsifying police reports, fabricating or destroying evidence, targeting persons for enforcement based solely on protected characteristics of those persons, theft, unauthorized use of alcohol or drugs on duty, unlawful or unauthorized protection of other members from disciplinary actions, and retaliation against other officers who threaten or interfere with the activities of the group.

Except as specifically prohibited by law, a law enforcement agency shall disclose the termination of a peace officer for participation in a law enforcement gang to another law enforcement agency conducting a preemployment background investigation of that former peace officer.

1503.12 LAW ENFORCEMENT: SOCIAL MEDIA

AB 1475 (Low)

https://leginfo.legislature.ca.gov/faces/billNavClient.xhtml?bill_id=202120220AB1475

PC 13665 (added)

Prohibits a Police Department from sharing on social media the booking photos of an individual arrested on suspicion of committing a nonviolent crime unless any of the following circumstances exist:

- (a) Agency has determined that the suspect is a fugitive or an imminent threat to an individual or to public safety and releasing or disseminating the suspect's image will assist in locating or apprehending the suspect or reducing or eliminating the threat;
- (b) A judge orders the release or dissemination of the suspect's image based on a finding that the release or dissemination is in furtherance of a legitimate law enforcement interest;
- (c) There is an exigent circumstance that necessitates the dissemination of the suspect's image in furtherance of an urgent and legitimate law enforcement interest.

Applies retroactively to any booking photo shared on social media

1503.13 PUBLIC PEACE: MEDIA ACCESS

SB 98 (McGuire)

Berkeley Police Department

Law Enforcement Manual

Law Enforcement Manual

2022 Legislative Update

https://leginfo.legislature.ca.gov/faces/billNavClient.xhtml?bill_id=202120220SB98

PC 409.7. (to be added)

(a) If peace officers close the immediate area surrounding any emergency field command post or establish any other command post, or establish a police line, or rolling closure at a demonstration, march, protest, or rally where individuals are engaged in activity that is protected pursuant to the First Amendment to the United States Constitution or Article I of the California Constitution, the following requirements shall apply:

1. A duly authorized representative of any news service, online news service, newspaper, or radio or television station or network may enter the closed areas described in this section.
2. A peace officer or other law enforcement officer shall not intentionally assault, interfere with, or obstruct the duly authorized representative of any news service, online news service, newspaper, or radio or television station or network who is gathering, receiving, or processing information for communication to the public.
3. A duly authorized representative of any news service, online news service, newspaper, or radio or television station or network that is in a closed area described in this section shall not be cited for the failure to disperse, a violation of a curfew or violation of paragraph (1) of subdivision (a) of Section 148. If the duly authorized representative is detained by a peace officer or other law enforcement officer, that representative shall be permitted to contact a supervisory officer immediately for the purpose of challenging the detention, unless circumstances make it impossible to do so.

1503.14 PEACE OFFICERS: RELEASE OF RECORDS

SB 16 (Skinner)

https://leginfo.legislature.ca.gov/faces/billNavClient.xhtml?bill_id=202120220SB16

PC 832.5 (b) (to be amended)

- Complaints and any reports or findings relating to these complaints shall be retained for a period of no less than 5 years (not sustained) and no less than 15 years for sustained findings of misconduct.

PC 832.7 (to be amended)

- 832.7(b)(ii): Requires disclosure of an incident involving use of force that resulted in death or Great Bodily Injury.
 - A sustained finding involving a complaint that alleges unreasonable or excessive force.
 - A sustained finding that an officer failed to intervene against another officer using force that is clearly unreasonable or excessive.

Provides a phased-in implementation of this bill so that records relating to incidents (that relate to the new categories of offenses added by this bill) which occurred before January 1, 2022, shall

Berkeley Police Department

Law Enforcement Manual

Law Enforcement Manual

2022 Legislative Update

not be subject to the time limitations of the bill until January 1, 2023. However, records of incidents that occur after January 1, 2022, shall be subject to the time limitations of the bill.

1503.15 USE OF FORCE: DUTY TO INTERCEDE

AB 26 (Holden)

https://leginfo.legislature.ca.gov/faces/billTextClient.xhtml?bill_id=202120220AB26

GC 7286(a)

Law enforcement agency policies must include:

(a)(9)- A requirement that an officer intercede when present and observing another officer using force that is *clearly beyond* that which is necessary, as determined by an objectively reasonable officer under the circumstances, taking into account the possibility that other officers may have additional information regarding the threat posed by a subject.

A requirement that an officer that has received all required training on the requirement to intercede and fails to act pursuant to paragraph (9) be disciplined *up to and including* in the same manner as the officer that committed the excessive force.

1503.16 KINETIC ENERGY PROJECTILES AND CHEMICAL AGENTS

AB 48 (Gonzalez)

https://leginfo.legislature.ca.gov/faces/billNavClient.xhtml?bill_id=202120220AB48

PC 13652 (to be added)

Kinetic energy projectiles and chemical agents shall not be used by any law enforcement agency to disperse any assembly, protest, or demonstration.

Exceptions:

- Deployed by a peace officer who has received training (from POST) on their proper use for crowd control is the use if objectively reasonable to defend against life or serious bodily injury and in accordance with several requirements
- To bring an objectively dangerous and lawful situation safely and effectively under control.
- Not aimed at the head, neck, or any other vital organs
- If the chemical agent is tear gas, only a commanding officer at the scene (of assembly, protest, etc.) may authorize the use of tear gas.

Kinetic energy projectiles and chemical agents can be only be used if all of the following are met:

- **De-escalation techniques are attempted and have failed**
- **Repeated, audible announcements are made (and attempted in various languages, if necessary) noting intent to use**
- **Persons are given objectively reasonable (OR) opportunity to disperse**

Berkeley Police Department

Law Enforcement Manual

Law Enforcement Manual

2022 Legislative Update

- **OR effort made to identify persons engaged in violent acts and projectiles and agents are used only towards those individuals**
- **Used only with frequency, intensity and in a manner proportional to the threat**
- **OR effort made to extract individuals in distress**
- **Medical assistance is promptly procured or provided for injured persons**

Kinetic energy projectiles and chemical agents cannot be used:

- **Due to violation of curfew**
- **In response to verbal threat**
- **Noncompliance with a law enforcement directive**

2023 Legislative Update

1504.1 PURPOSE AND SCOPE

The Professional Standards Bureau has prepared this legislative update for the 2023 calendar year. It is intended to serve as a general summary of legal changes that pertain to law enforcement and is not meant to cover every legislative change enacted in 2022. The 2023 Legislative Update Manual published by the California Peace Officers' Association is the main source used for this summary. All personnel are invited to click on the links within this document and read the various codes in their entirety for a more detailed explanation. The changes outlined below go into effect January 1, 2023, unless otherwise indicated.

1504.2 THEFT: JURISDICTION

AB 1613 (Irwin)

https://leginfo.legislature.ca.gov/faces/billNavClient.xhtml?bill_id=202120220AB1613

Provides that when multiple offenses of theft, organized retail theft, or receipt of stolen property that all involve the same defendant or defendants and the same merchandise, or all involving the same defendant or defendants and the same scheme or substantially similar activity, occur in multiple jurisdictions, then any of those jurisdictions are a proper venue for all of the offenses.

1504.3 CRIMES: FALSE PERSONATION

AB 1899 (Mathis)

Penal Code Sections 538d, 538e, 538f, 538g, and 538h (Amend)

https://leginfo.legislature.ca.gov/faces/billNavClient.xhtml?bill_id=202120220AB1899

Prohibits the false impersonation of peace officers, firefighters, and other public officers and employees through, or on, an Internet website, or by other electronic means.

1504.4 HATE CRIMES: NOOSES, CROSSES AND SWASTIKAS

AB 2282 (Bauer-Kahan)

Penal Code Section 11411 (Amend)

https://leginfo.legislature.ca.gov/faces/billNavClient.xhtml?bill_id=202120220AB2282

Equalizes the penalty for the crimes of hanging a noose, displaying a symbol of hate, including a Nazi swastika, and burning or desecrating religious symbols, on specified property, for the purpose of terrorizing, and expands and aligns the places where this conduct is prohibited for each offense.

"Terrorize" - to cause a person of *ordinary emotions* and sensibilities to fear for personal safety.

1504.5 DIVERSION OF REPEAT RETAIL THEFT CRIMES

AB 2294 (Jones-Sawyer)

Berkeley Police Department

Law Enforcement Manual

Law Enforcement Manual

2023 Legislative Update

Penal Code Sections 853.6 and 978.5 (Amend, Repeal and Add), 1210.2 (Add and Repeal), 1001.81 (Add and Repeal)

https://leginfo.legislature.ca.gov/faces/billNavClient.xhtml?bill_id=202120220AB2294

States that a peace officer may take into custody a person who has been cited, arrested, or convicted for misdemeanor or felony theft from a store in the previous six months or if there is probable cause to believe the person committed organized retail theft, as specified.

1504.6 THEFT: AGGREGATION

AB 2356 (Rodriguez)

Penal Code Section 487 (Amend)

https://leginfo.legislature.ca.gov/faces/billTextClient.xhtml?bill_id=202120220AB2356

If the value of the money, labor, real property, or personal property taken exceeds \$950 over the course of distinct but related acts, the value of the money, labor, real property, or personal property taken may properly be aggregated to charge a count of grand theft, if the acts are motivated by one intention, one general impulse, and one plan.

States that the change made by this bill is declaratory of existing law in *People v. Bailey* (1961) 55 Cal.2d 514

"In a series of takings from the same individual, there is a single theft if the takings are pursuant to one continuing impulse, intent, plan or scheme, but multiple counts if each taking is the result of a separate independent impulse or intent."

1504.7 CRIMES: OBSTRUCTION OF JUSTICE

AB 2588 (Maienschein)

PC 146e

https://leginfo.legislature.ca.gov/faces/billTextClient.xhtml?bill_id=202120220AB2588

Presently, it is "a crime to maliciously, and with the intent to obstruct justice or the due administration of laws, or with the intent or threat to inflict imminent bodily harm in retaliation for the due administration of the laws, to publish, disseminate, or otherwise disclose the residence address or telephone number of any peace officer, nonsworn police dispatcher, employee of a city police department or county sheriff's office, or public safety official, or that of the spouse or children of those persons..."

AB 2588 extends these protections to the immediate family of these officials, or anyone who regularly resided in the household within the prior 6 months.

1504.8 LOITERING FOR THE PURPOSES OF PROSTITUTION

SB 357 (Wiener)

https://leginfo.legislature.ca.gov/faces/billTextClient.xhtml?bill_id=202120220SB357

Berkeley Police Department

Law Enforcement Manual

Law Enforcement Manual

2023 Legislative Update

Existing law prohibits soliciting or engaging in an act of prostitution, as specified. Existing law also prohibits loitering in a public place with the intent to commit prostitution, as defined, or directing, supervising, recruiting, or aiding a person who is loitering with the intent to commit prostitution, or collecting or receiving all or part of the proceeds of an act of prostitution. Under existing law, a violation of any of these provisions is a misdemeanor.

This bill would repeal those provisions related to loitering with the intent to commit prostitution and would make other conforming changes. This bill would also authorize a person convicted of a violation of loitering with the intent to commit prostitution to petition the court for the dismissal and sealing of their case, and resentencing, if applicable.

Section 653.20 of the Penal Code is repealed.

Section 653.22 of the Penal Code is repealed.

Section 653.23 of the Penal Code is amended to read:

PC 653.23:

(a) It is unlawful for a person to do either of the following:

(1) Direct, supervise, recruit, or otherwise aid another person in the commission of a violation of subdivision (b) of Section 647.

(2) Collect or receive all or part of the proceeds earned from an act or acts of prostitution committed by another person in violation of subdivision (b) of Section 647.

(b) Nothing in this section shall preclude the prosecution of a suspect for a violation of Section 266h or 266i or for any other offense, or for a violation of this section in conjunction with a violation of Section 266h or 266i or any other offense.

1504.9 DISORDERLY CONDUCT: PEEPING, RECORDING, AND DISTRIBUTION OF INTIMATE IMAGES AKA "REVENGE PORN"

SB 1081 (Rubio)

PC 647

<https://legiscan.com/CA/text/SB1081/id/2609336>

Defines the terms "distribute" and "identifiable" for purposes of the existing crime of unlawful distribution of a private image, also known as "revenge porn."

Provides that it is also unlawful for a person who intentionally causes the image to be distributed.

- "Intentionally causes an image to be distributed" to mean "when that person arranges, specifically requests, or intentionally causes another person to distribute the image."
- "Distribute" to include exhibiting in public or giving possession.
- "Identifiable" through cross-reference to the definition that currently exists in the Penal Code section, which provides that the term means "capable of identification, or capable

Berkeley Police Department

Law Enforcement Manual

Law Enforcement Manual

2023 Legislative Update

of being recognized, meaning that someone, including the victim, could identify or recognize the victim. It does not require the victim's identity to actually be established."

1504.10 DNA SAMPLES

SB 1228 (Weiner)

PC 680 and 679.12

https://leginfo.legislature.ca.gov/faces/billTextClient.xhtml?bill_id=202120220SB1228

Prohibits entering samples from a victim or a person who voluntarily gave DNA for exclusion purposes into any DNA databank.

1504.11 CA LAW ENFORCEMENT ACCOUNTABILITY REFORM ACT

AB 655 (Karla)

PC 13680

https://leginfo.legislature.ca.gov/faces/billNavClient.xhtml?bill_id=202120220AB655

Existing law requires that a candidate for a peace officer position be of good moral character, as determined by a thorough background investigation.

This bill would require that background investigation to include an inquiry into whether a candidate for specified peace officer positions has engaged in membership in a hate group, participation in any hate group activity, or advocacy of public expressions of hate, as specified, and as those terms are defined.

- "Hate group" means an organization that supports, advocates for, threatens, or practices genocide or the commission of hate crimes.
- "Participation in any hate group activity" means active and direct involvement in, or coordination or facilitation of, any hate crime by hate group members.
- "Public expressions of hate" means any statement or expression to another person, including any statement or expression made in an online forum that is accessible to another person, that explicitly supports, or explicitly threatens to commit genocide or any hate crime or that explicitly advocates for or explicitly supports any hate group.

1504.12 PEACE OFFICER: MINIMUM STANDARDS: BIAS EVALUATION

AB 2229 (Rivas)

https://leginfo.legislature.ca.gov/faces/billNavClient.xhtml?bill_id=202120220AB2229

Requires that prospective officers' evaluations for physical, emotional and mental fitness including that they be found free of bias against race or ethnicity, gender, nationality, religion, disability, or sexual orientation.

1504.13 PEACE OFFICERS: CITIZENSHIP

SB 960 (Skinner)

https://leginfo.legislature.ca.gov/faces/billTextClient.xhtml?bill_id=202120220SB960

Berkeley Police Department

Law Enforcement Manual

Law Enforcement Manual

2023 Legislative Update

Eliminates the requirement that a person be a United States citizen or a permanent resident in order to become a peace officer and instead requires that the person be legally authorized to work in the United States per federal law.

1504.14 FIREARM: PROHIBITED PERSONS

AB 2239 (Maienschein)

https://leginfo.legislature.ca.gov/faces/billNavClient.xhtml?bill_id=202120220AB2239

Creates a 10-year firearm prohibition for individuals convicted, on or after January 1, 2023, of child abuse and elder and dependent adult abuse involving violence.

1504.15 FIREARM: PROHIBITED PERSONS

AB 2551 (McCarty)

https://leginfo.legislature.ca.gov/faces/billNavClient.xhtml?bill_id=202120220AB2551

Requires DOJ, upon notification that a specified prohibited person attempted to purchase a firearm, to notify local authorities in the jurisdiction where the prohibited person resides of such attempt.

1504.16 CUSTODIAL INTERROGATION OF MINORS

AB 2644 (Holden)

WI 627 and 627.5

https://leginfo.legislature.ca.gov/faces/billNavClient.xhtml?bill_id=202120220AB2644

PART 1 (Takes effect: January 1, 2023)

627. (a) When an officer takes a minor before a probation officer at a juvenile hall or to any other place of confinement pursuant to this article, the probation officer shall take immediate steps to notify the minor's parent, guardian, or a responsible relative that such minor is in custody and the place where he the minor is being held.

(b) Immediately after being taken to a place of confinement pursuant to this article and, except where physically impossible, no later than one hour after the minor has been taken into custody, the minor shall be advised and has the right to make at least two telephone calls from the place where he the minor is being held, one call completed to the minor's parent or guardian, a responsible relative, or their employer, and another call completed to an attorney. The calls shall be at public expense, if the calls are completed to telephone numbers within the local calling area, and in the presence of a public officer or employee. Any public officer or employee who willfully deprives a minor taken into custody of their right to make such telephone calls is guilty of a misdemeanor.

(c) Immediately after being taken to a place of confinement pursuant to this article, and no later than two hours after a minor has been taken into custody, the probation officer shall immediately

Berkeley Police Department

Law Enforcement Manual

Law Enforcement Manual

2023 Legislative Update

notify the public defender or if there is no public defender, the indigent defense provider for the county, that the minor has been taken into custody.

PART 2 (Takes effect: January 1, 2024)

Commencing January 1, 2024, prohibits law enforcement officers from employing threats, physical harm, deception, or psychologically manipulative interrogation tactics, as specified, during a custodial interrogation of a person 17 years of age or younger.

Does not apply to interrogations of a person 17 years of age or younger if both of the following criteria are met:

- The law enforcement officer who questioned the person reasonably believed the information the officer sought was necessary to protect life or property from an imminent threat.
- The questions by law enforcement officers were limited to those questions that were reasonably necessary to obtain information related to the imminent threat.

1504.17 SPEED CONTESTS

AB 2000 (Gabriel)

VC 23109

https://leginfo.legislature.ca.gov/faces/billTextClient.xhtml?bill_id=202120220AB2000

Expands the crimes of motor vehicle exhibition of speed and speed contest on highways to include occurrences in parking lots.

- Makes it a crime for a person to engage in a motor vehicle speed contest in an off-street parking facility or an exhibition of speed in an off-street parking facility (VC 12500c).
- Makes it a crime for a person to aid or abet or to engage in a motor vehicle speed contest in an off-street parking facility or an exhibition of speed in an off-street parking facility.

1504.18 VEHICLES: DRIVER EDUCATION

AB 2537 (Gipson)

VC 12800.6

https://leginfo.legislature.ca.gov/faces/billNavClient.xhtml?bill_id=202120220AB2537

Requires DOJ, in conjunction with DMV and POST, to develop and create a video demonstrating the proper conduct by a peace officer and an individual during a traffic stop. DOJ will post the video on its website.

1504.19 TRAFFIC OR PEDESTRIAN STOPS

AB 2773 (Holden)

https://leginfo.legislature.ca.gov/faces/billNavClient.xhtml?bill_id=202120220AB2773

Berkeley Police Department

Law Enforcement Manual

Law Enforcement Manual

2023 Legislative Update

Requires, beginning **January 1, 2024**, a peace officer making a traffic or pedestrian stop to state the reason for the stop before asking any questions related to a criminal investigation or traffic violation, unless the officer reasonably believes that withholding the reason for the stop is necessary to protect life or property from imminent threat.

Chapter 16 - Departmental Orders

CAPTAIN'S INSTRUCTION 2021-001

1600.1 CALL-TAKING PROCEDURES INCLUDING AN UPDATED SECTION ON PROFILING BY PROXY

The effective period of a departmental order shall be specified therein or, absent a "sunset clause", will automatically become inoperative with the passage of the incident or assignment which caused its issuance. If no effective period is provided, it shall be understood that the departmental order will expire after one year from the date of issuance.

This Order will remain in effect until it is rescinded or otherwise permanently issued in the form of a policy.

BPD Retiree Firearms Waiver and Release Form.pdf

Berkeley Police Department

RETIREE CONCEALED CARRY

QUALIFICATION AGREEMENT AND WAIVER OF LIABILITY

I am a retired peace officer of the Berkeley Police Department. I am eligible to attempt to qualify to carry a concealed firearm, pursuant to the Law Enforcement Officers Safety Act of 2004 and/or California Law (18 USC § 926C; Penal Code § 25455).

I understand that the Berkeley Police Department is not legally required to provide a firearms qualification course or provide me with firearms instruction.

I understand that to attempt to qualify to carry a concealed firearm, I may only fire my weapon under the direct supervision of a certified firearms instructor.

I agree to defend and indemnify and hold harmless the City of Berkeley Police Department and/or its officers, agents and employees, for any injury caused by my participation in this qualification process. I further waive any claim for damages against the City of Berkeley Police Department and its officers, agents and employees, for any injury suffered by me while participating in this qualification process.

I agree to defend, indemnify, and hold harmless the City of Berkeley Police Department and/or its officer, agents and employees, from any and all liability resulting from my carrying and/or use of any weapon allowed under the Law Enforcement Officers Safety Act of 2004 or California Law, including, but not limited to, civil litigation.

Furthermore, I have read, understand, and agree to the following conditions under LEOSA or California Law.

LEOSA CONDITIONS

I understand that I am personally responsible for all acts taken related to carrying a concealed firearm and that these acts were not taken as an employee or former employee of the Berkeley Police Department. _____ (initial)

I understand that I remain subject to all applicable Berkeley Police Department policies and federal, state and local laws. _____ (initial)

Berkeley Police Department

I will demonstrate good judgment and character commensurate with carrying a loaded and concealed firearm. _____ (initial)

I understand that the Berkeley Police Department may run a criminal history background check to confirm my good character. _____ (initial)

CALIFORNIA CCW CONDITIONS (Penal Code § 26305)

I agree to qualify annually with the authorized firearm at a course approved by the Berkeley Police Department at my own expense. _____ (initial)

I understand that I remain subject to all applicable Berkeley Police Department policies and federal, state and local laws. _____ (initial)

I will not engage in conduct that compromises public safety. _____ (initial)

I understand that I am only authorized to carry a concealed firearm inspected and approved by a certified firearms instructor. _____ (initial)

Former officers of the Berkeley Police Department only: I shall immediately notify the Berkeley Police Department Communication Center of my arrest or conviction in any jurisdiction, or if I become the subject of a court order, and advise that I hold a CCW endorsement through the Berkeley Police Department. _____ (initial)

Failure to satisfy any of these conditions may result in denial, suspension, or revocation of a LEOSA or California CCW endorsement.

INTRODUCTION

On May 11, 2021 the Berkeley City Council passed Ordinance NO. 7,760-N.S., the Police Equipment and Community Safety Ordinance. Section 2.100.020 of the ordinance mandates an impact statement for certain equipment that the Berkeley Police Department possesses. An impact statement is defined in section 2.100.020 (C) and is a publicly released written document that includes the following details for each equipment:

- 1) Description
- 2) Purpose
- 3) Fiscal cost
- 4) Impact
- 5) Mitigation
- 6) Alternatives
- 7) Third Party Dependence

An impact statement for each of the following equipment has been authored by subject matter experts in their respective fields:

- M4 rifle/Patrol Rifle
- Penn Arms 40MM launcher
- Milkor LTL multi-launcher
- FN 303 Launcher & FN Pava rounds
- Oleoresin capsicum (OC spray)
- Chlorobenzylidene Malonitrile and Oleoresin capsicum (tear gas)
- Remington 700 Rifle
- ReconRobotics Recon Scout XT Robots
- Andros Remotec HD-1 Hazardous Duty Robot
- Light/sound distraction device
- Long Range Acoustic Device (LRAD)
- 36" batons
- Mobile Command Vehicle
- Barret Model 99

The impact statements required by the City ordinance also fulfill the obligations set forth in Assembly Bill 481. Impact statements were compiled in this report in a

prioritized ranking for the Police Accountability Board to consider in determining the order in which to perform its review per the Police Equipment and Community Safety Ordinance.

M4 Rifle and Associated Ammunition

(1) **Description:**

A. **Background:**

The “M4” was developed and produced for the United States government by Colt Firearms and was based off of the original Armalite Rifle (AR) patent purchased by Colt in 1959. Although Colt owned the trademarked name of “M4”, a number of other manufacturers offer M4-like firearms under various model names. The M4 and its variants fire 5.56×45mm NATO (and .223 Remington) ammunition, and are a gas-operated, magazine-fed firearm with a barrel length ranging from 11.5” to 16”.

The current Berkeley Police Department (BPD) rifle ammunition used is the .223 Remington, a rimless, bottlenecked rifle cartridge. The round was developed in 1957 by Remington Arms and Fairchild Industries. The .223 Remington is considered one of the most popular cartridges and is currently used by a wide range of semi-automatic and manual-action rifles as well as handguns. While the military uses the similar 5.56x45 NATO cartridge, BPD uses the more common and often regarded civilian cartridge of .223 Remington for all training and duty uses.

Currently, BPD uses two different kinds of .223 Remington ammunition: 55 grain FMJ (full metal jacket) for training purposes and 62 grain soft point for duty purposes. This is done for several reasons.

1. FMJ ammunition is cheaper to purchase. While many agencies use the same ammunition for training and duty use, the department saves a significant amount of money by using FMJ ammunition for training.
2. The observed performance between the two rounds is negligible for training purposes. Officers can use the FMJ ammunition in a training course and see no difference in operation and performance versus using 62 grain soft point duty ammunition.
3. The 62-grain soft point ammunition has been shown to have less over penetration and over travel compared to FMJ ammunition.

This means that rounds fired are less likely to hit unintended targets.

B. Quantity:

The Berkeley Department currently owns and maintains 96 rifles.

Quantity of rifle ammunition fluctuates significantly depending on training attended, including the standard basic police academy, officer assignments, and yearly mandate training cycles. For example, most police academy recruits are required to bring approximately 1,000 rounds to the basic POST approved academy. Most academies have a 16-24-hour rifle training course. The training is required for all officers who are issued a rifle and mandates between 800 and 1,200 rounds. As such, the inventory at the Berkeley Police Department fluctuates significantly depending on how many officers are attending state mandated training and can range from 10,000 round (our current inventory) to less than 1,000 rounds (our anticipated inventory at the end of December after scheduled department training in November.)

C. Capability:

The M4 pattern rifle is used only in situations when a potential life-threatening situation exists. While a pistol is the common firearm used by police in these dangerous situations, the M4 patterned rifle has numerous advantages over it. The ability to shoulder the rifle, coupled with the rifle's lengthened barrel and ammunition, result in higher accuracy and lessens the chance of officers missing the intended target. Additionally, due to the design of the rifle's bullet, the round is less likely to over penetrate commercial and residential walls should the officer miss the intended target. The rifle is also easier to use compared to a pistol because of the bullet's low recoil. Finally, as the rifle can be adjusted and customized, it can be configured to accommodate officers of any stature (hand size, strength, etc.).

The .223 Remington cartridge, depending on the weight of the bullet, 55 grain or 62 grain, travel at approximately 3,000 feet per second and 2,700 feet per second respectively. The round is highly regarded as having a high degree of consistency and accuracy, which is why it is the most common rifle round used in Law Enforcement around the world.

D. Lifespan:

Due to the rifle's ability to be maintained by department armorers, these rifles have a relatively long-life span if properly maintained. However, the design has

changed little in the last 60 years and we can expect new variations and designs to become the new industry standard in the coming years.

Like all ammunition, if kept cool and dry, ammunition lifespan can exceed ten years. Due to BPD's and State mandates on training, the majority of ammunition is cycled through within a year of purchase.

E. Use:

Used in the defense of life or great bodily injury to potential victims of violent crimes, general public, and officers.

F. How it Works:

The M4 patterned rifle works the same as a majority of all modern firearms. When the trigger is pressed, a firing pin strikes the primer of a bullet loaded into the chamber of the rifle. The ignited primer ignites gun powder contained in the bullet which pushes the bullet down the barrel and out the muzzle. As the bullet travels down the barrel, gas from the ignited powder also escapes from the muzzle. Some of that gas is recycled back into the chamber of the firearm which causes the firearm to cycle its action and load another bullet. From there the process repeats with each pull of the trigger.

The .223 Remington cartridge is made up of several parts, primarily the primer, casing, gunpowder, and bullet. The bullet is seated into the front or opening of the casing. Gunpowder is placed between the bullet and the interior of the casing and a primer is seated in the rear part of the casing. When the trigger of a firearm is pulled, it releases the hammer, which strikes the firing pin, driving it forward. The firing pin collides with the rear of the cartridge, where the primer is seated, which ignites the primer. The spark from the primer ignites the gunpowder. Gas converted from the burning powder rapidly expands in the cartridge. The expanding gas forces the bullet out of the cartridge and down the barrel with great speed. The rifling in the barrel causes the bullet to spin as it travels out of the barrel. The bullet's speed and escaping gases produce a "bang."

After the bullet exits the barrel, the spent casing which housed the bullet, gunpowder, and primer are ejected from the firearm.

(2) Purpose:

The M4 patterned rifle and associated ammunition is intended as a means to safely stop a lethal threat. While a pistol is the firearm that all officers are minimally

equipped with, the rifle is an ancillary firearm for situations where increased distance and accuracy are needed to safely resolve the situation.

(3) Fiscal Cost:

A. Initial Cost:

Rifle prices, like other firearms, will range depending on current market demand and availability. While M4 rifles purchased several years ago cost between \$1,000 and \$1,200 a piece, current rifles cost between \$1,400 and \$1,600. It should be expected that these prices will fluctuate and likely increase over time.

Ammunition costs fluctuate with the costs of components (brass, primers, gunpowder, and bullets) and supply/demand. Current costs for .223 Remington range from \$0.50 to \$0.75 a round for training ammunition (55 grain) and \$1.25 to \$1.50 a round for duty ammunition (62 grain).

B. Cost of Use:

Cost of use for all firearms should be based on the ammunition used in training and on duty. This will fluctuate based on whether the rifle is issued to a patrol officer, a firearms instructor, or a Special Response Team member as each assignment has different training requirements.

C. Cost of Potential Adverse Effects:

Adverse effects of improper use of a firearm are not calculable. It could lead to the loss of life or serious injury. Additionally, the improper use could result in civil liabilities.

D. Annual and Ongoing Costs:

See section B. above, these costs are determined based on the rifle's assignment.

E. Training Costs:

Every officer that is authorized to carry a rifle on duty must attend a 16-hour CA POST approved rifle instruction course before being authorized to carry the rifle on duty. This course may be administered by Berkeley Police Firearm Instructors or by other POST approved agencies. Tuition for the CA POST approved class is dependent on the hosting agency. If conducted in house the cost only includes the officer's hourly wage, range fee, and ammunition costs (all vary). Outside agencies charge between \$25 to \$500 depending on the range location and duration (some classes are 32-hours while POST only requires 16-hours.)

Additionally, all officers issued a rifle receive specific 8-hour rifle training every two years by POST certified BPD firearm instructors.

Typical round count for such classes range between 800 rounds and 1200 rounds per student. Additionally, all officers issued a rifle receive specific 8-hour rifle training every two years by a BPD firearm instructor which constitutes an additional 500 or so rounds per officer.

F. Maintenance and Storage Costs:

Maintenance costs vary depending on use over time. Traditionally, various springs and pins need to be replaced every five years and may cost between \$3 and \$30 per rifle. Other parts such as the barrel and bolt need replaced around ten years and range between \$150 and \$300 per rifle.

There are no costs associated with maintenance or storage of ammunition. All ammunition is stored in a climate-controlled room in the Berkeley Police Department.

G. Upgrade Costs:

Upgrade costs and Maintenance cost are synonymous due to the consistent design and lack of changes of the rifle over the last 60 years. Improvements in technology and new designs may be an additional cost but we can't predict what those will be at this time.

Should advancements be made in ammunition manufacturing, those upgrade costs are unknown at this time.

(4) Impact:

The Berkeley Police Department is committed to preserving and protecting human life and welfare. The M4 patterned rifle, which fires the .223 Remington cartridge, is a superior firearm to stop a lethal threat compared to the issued pistols to police officers, in that officers equipped with this firearm shoot less rounds, fire more accurately, and are less likely to fire errant rounds. Highly volatile and violent incidents, such as a hostage situation, can be more safely and efficiently resolved with a rifle.

The M4 patterned rifle, and the accompanying .223 Remington cartridge it fires, is intended as a tool to increase the safety and welfare of citizens and officers alike. The M4 patterned rifle and .223 Remington cartridge, both inanimate objects, have zero impact on things such as civil rights or civil liberties of the public. Any abuses of authority or power would be the result of an individual who violates the Berkeley Police Department's policies, including state and federal laws.

(5) **Mitigations:**

Per Policy 300, “Deadly force may only be used when it is objectively reasonable that such action is immediately necessary to protect the officer or another person from imminent danger of death or serious bodily harm.

Officers shall not use deadly force if it is objectively reasonable that alternative techniques will eliminate the imminent danger and ultimately achieve the law enforcement purpose with less risk of harm to the officer or to other persons.”

(6) **Alternatives:**

There are no suitable alternatives to the M4 rifle for the intended purpose. The M4 rifle is a law enforcement standard across the US and other countries due to its reliability, ease of use, ease of maintenance, and increased accuracy over other options.

There are no suitable alternatives to the .223 Remington cartridge, as the current BPD M4 rifle is designed for that particular cartridge. The .223 Remington cartridge is a law enforcement standard across the US and other countries due to its reliability, availability, and increased accuracy over other options.

(7) **Third Party Dependence:**

Berkeley Police Department armorers are trained and capable to handle any and all issues related to the maintenance or repair of the M4 rifles. Additionally, BPD firearm instructors are fully certified by state and private training institutes to fully educate and train BPD officers. No third party is required for maintenance, repair, or instruction.

All ammunition purchased by BPD, like all equipment, is dependent on Third Party vendors. Vendor stock and availability is outside BPD control or management. Once ammunition is purchased and in BPD custody there is no additional need for Third Party assistance.

Penn Arms 40mm Single Launcher

(1) **Description:**

A. **Background:**

The 40mm impact projectile was developed as an alternative to the 12-gauge bean bag round and other more indiscriminate less lethal options. Early 12-gauge

bean bag round designs had somewhat unpredictable flight patterns and could cause significant unwanted injury. The 40mm foam baton round was developed as a direct fire projectile designed to minimize the risk of unintended injuries. Currently, the Berkeley Police Department utilizes the CTS 4557 foam baton projectile and the Penn Arms L-140 single shot launcher.

B. Quantity:

The Berkeley Police Department currently owns and maintains 20 Penn Arms less lethal launchers.

C. Capability:

The Penn Arms single launcher is capable of firing a single projectile out to a maximum manufacturer recommended range of 45 meters. The Penn Arms 40mm projectiles are direct fire with a pliable “sponge” tip designed to mold to the body. The projectiles are about the size of a large egg. Upon impact, the projectile transfers kinetic energy to the body to gain pain compliance. Large muscle groups such as the upper legs or lower abdomen are approved target areas unless a higher level of force is justified. This level of force is considered to be similar to that of a baton strike.

D. Lifespan:

The manufacturer expected lifespan is about 10 years depending on use and regular maintenance.

E. Use:

The Penn Arms 40mm single launcher is designed to reduce the potential for a violent confrontation. Less lethal projectiles are less likely to result in serious bodily injury or death and can be used to de-escalate a potentially deadly situation.

F. How it works:

The Penn Arms 40mm single launcher is a double action, break open less lethal launcher. The launcher is capable of firing a single 40mm projectile. When fired, the hammer strikes the munition primer which ignites gun powder in the primer insert. Expelled gases propel the projectile through the rifled barrel. The projectile has a rear plastic portion called the ogive which catches the barrel rifling and provides spin. The spin provides a greater degree of accuracy and eliminates any potential the projectile will tumble when exiting the barrel.

The projectiles utilized by the Berkeley Police Department are the CTS 4557 40mm sponge baton round. The CTS 4557 has a maximum effective range of 45 meters. The tip of the projectile is a pliable rubber material which molds to the body upon impact. The projectile travels at an estimated 240 feet per second which is slower than the FN 303 projectile. However, the larger mass, about 60 grams, creates more kinetic energy upon impact which is similar to that of a baseball thrown by a pitcher. The additional kinetic energy becomes important when the suspect has on thick or layered clothing or demonstrates a high pain tolerance.

The Penn Arms single launcher is a basic design making it easy to operate and maintain.

(2) **Purpose:**

The purpose of kinetic energy impact projectiles, commonly referred to as “less lethal” is to preserve life, minimize the use of force and allow time for de-escalation. Less lethal projectiles allow the user to maintain a safe distance from a subject who is armed and/or demonstrates the intent to be violent. The ability to maintain a safe distance – while still providing a level of control over the subject – allows officers to employ de-escalation techniques, request additional resources and develop a plan to safely resolve the situation with the least amount of risk.

Violent or armed confrontations are inherently dangerous to all those involved. Officers are required to make split second judgments in circumstances that are tense, uncertain and rapidly evolving. An Officer’s threat perception of a person who is in close proximity as opposed to a person who is at a distance of 20 yards is naturally different. A person in close proximity intent on violence has the ability to immediately utilize personal body weapons, a bludgeoning device or cutting instrument. The immediacy requires the Officer to react instantly and there is a greater potential that a higher level of force will be needed.

On the other hand, a person at a distance of 20 yards may not be perceived as having the immediate ability to violently attack the Officer. The person must first close the distance before certain weapons can be utilized. This fact may allow the Officer time to decide the most appropriate course of action, such as the use of a “less lethal” projectile.

The projectiles are designed to provide a high level of accuracy which minimizes the risk of unwanted impacts. The ability to apply force from a distance reduces the

potential for violent confrontation and aides in reducing the level of force needed to safely resolve a conflict.

Additionally, it has been our experience that a 40mm projectile impact will almost always resolve a violent confrontation with 1 or 2 applications. The larger projectile produces more kinetic energy than the FN 303, which may require several applications to gain compliance.

Since 2015, there have been 31 incidents where Officers utilized less lethal applications. These applications have potentially prevented higher-level uses of force.

(3) **Fiscal Cost:**

A. **Initial Cost:**

Less lethal prices, like other equipment, varies depending on market demand and availability. The most recent Penn Arms purchased by the department cost \$815.00 each.

B. **Cost of Use:**

Cost for Penn Arms single launcher use should be based on the projectiles used in training and on duty. This will fluctuate based on department trainings, projectile availability and events that unfold in the city and surrounding region.

C. **Cost of Potential Adverse Effects:**

Adverse effects from improper use of less lethal are not calculable. Improper use could lead to serious bodily injury or death.

D. **Annual and Ongoing Costs:**

See section B above

E. **Training Costs:**

Every officer authorized to deploy a less lethal launcher must pass a certification course administered by a Berkeley Police Department Firearms Instructor. The certification class consists of classroom, range qualification and scenario application if the venue allows. This class is largely handled in house thus the cost only includes staff time, range fees, and projectile costs which all vary.

F. Maintenance and Storage Costs:

Maintenance costs vary depending on use. Generally, various springs and pins need to be replaced every 5 years which can cost \$3 to \$30.

G. Upgrade Costs:

There are no foreseeable upgrade costs. The Penn Arms single launcher has few working parts and is of a simple design.

(4) Impact:

The main function of a less lethal device is to preserve the sanctity of human life. The Berkeley Police Department is committed to reducing the potential for violent confrontations. Less lethal projectiles, when used properly, are less likely to result in serious bodily injury or death and can be used to de-escalate a potentially deadly situation. A less lethal application is an acknowledgment a given situation has the potential to elevate to lethal force and the Officers determined a less lethal application is not only objectively reasonable and objectively necessary, but hopefully the minimal amount of force needed to safely resolve the incident.

The Penn Arms single launcher, with its high level of accuracy can be utilized in a large violent group confrontation to specifically target those who are committing acts of violence on other members of the group, involved persons, or law enforcement personnel. It allows a more immediate action to stop a violent assault, overcome their resistance, and aid in the attempt to safely take them into custody. This tool does not require officers to overcome a hostile crowd to stop a violent assault.

(5) Mitigation:

Per Policy 300, "In all cases where physical force is used, officers shall use a minimum amount of force that is objectively reasonable, objectively necessary, and proportional to effectively and safely resolve a conflict." All uses of force require documentation that is completed by the supervisor in a use of force report and reviewed by the Chain of Command. Furthermore, all deployments of equipment outlined in the Police Equipment and Community Safety Ordinance are documented according to the reporting requirements as mandated in the ordinance.

Per Policy 303, "Officers are not required or compelled to use approved projectiles in lieu of other reasonable tactics if the involved officer determines that deployment of these projectiles cannot be done safely. Circumstances appropriate for deployment include, but are not limited to, situations in which: (a) The suspect is armed with a weapon and the tactical circumstances allow for the safe application of approved

projectiles. (b) The suspect has made credible threats to harm him/herself or others. (c) The suspect is engaged in riotous behavior or is throwing rocks, bottles or other dangerous projectiles at people and/or officers. (d) There is probable cause to believe that the suspect has already committed a crime of violence and is refusing to comply with lawful orders.”

The Berkeley Police Department also trains a recommended range of 3 to 30 meters. Berkeley Police Firearm Instructors recommend a minimum standoff of 3 meters to reduce the potential for unintended injury at a closer distance. The 30-meter maximum recommended range is intended to reduce the possibility of an unintended impact area if the suspect moves or the projectile trajectory begins to deteriorate.

Each officer is trained to aim for large muscle groups, such as the thigh or buttocks area, and avoid areas that may cause serious injury. The department also equips each launcher with a red dot optic. The optic greatly increases an officer’s ability to target approved impact areas.

(6) Alternative:

This is the only piece of less lethal equipment (other than the FN 303) that allows officers to address a potentially deadly threat from a distance. The TASER allows an officer to maintain distance but limits the range to about 15 to 25 feet. Furthermore, the TASER requires two prongs (barbs) to penetrate the subject’s clothing to be effective and if that is not accomplished the TASER will have no effect. Additionally, the TASER is not an approved less lethal device for the department.

(7) Third Party Dependence:

The Berkeley Police Department armorers are trained and capable of handling all issues related to the repair or maintenance of the Penn Arms single launcher. Additionally, Berkeley Police Department Less Lethal Instructors are fully certified by state and private training institutes to educate and train BPD officers. No third party is required for maintenance, repair, or instruction.

Milkor LTL Multi-launcher

(1) Description:

A. Background:

The 40mm impact projectile was developed as an alternative to the 12-gauge bean bag round and other more indiscriminate less lethal options. Early 12-gauge

bean bag round designs had somewhat unpredictable flight patterns and could cause significant unwanted injury. The 40mm foam baton round was developed as a direct fire projectile designed to minimize the risk of unintended injuries. Currently, the Berkeley Police Department utilizes the CTS 4557 foam baton projectile and the Milkor LTL multi-shot launcher.

B. Quantity:

The Berkeley Police Department currently owns and maintains 2 Milkor LTL less lethal launchers. One Milkor launcher is assigned to the Berkeley Special Response Team.

C. Capability:

The Milkor LTL is capable of firing six 40mm projectiles before reloading is necessary. The Milkor LTL 40mm projectiles are direct fire with a pliable “sponge” tip designed to mold to the body. The projectiles are about the size of a large egg. Upon impact, the projectile transfers kinetic energy to the body to gain pain compliance. Large muscle groups such as the upper legs or lower abdomen are approved target areas unless a higher level of force is justified. This level of force is considered to be similar to that of a baton strike.

D. Lifespan:

The manufacturer expected lifespan is about 10 to 15 years depending on use and regular maintenance.

E. Use:

The Milkor LTL multi-shot launcher is designed to reduce the potential for a violent confrontation. Less lethal projectiles are less likely to result in serious bodily injury or death and can be used to de-escalate a potentially deadly situation.

F. How it works:

The Milkor LTL multi-shot launcher utilizes a spring actuated cylinder allowing it to fire 6 individual 40mm projectiles. When fired, the hammer strikes the munition primer which ignites gun powder in the primer insert. Expelled gases propel the projectile through the rifled barrel. The projectile has a rear plastic portion called the ogive which catches the barrel rifling and provides spin. The spin provides a greater degree of accuracy and eliminates any potential the projectile will tumble when exiting the barrel. The spring assisted cylinder automatically turns and loads the next projectile.

The projectiles utilized by the Berkeley Police Department are the CTS 4557 40mm sponge baton round. The CTS 4557 has a maximum effective range of 45 meters. The tip of the projectile is a pliable rubber material which molds to the body upon impact. The projectile travels at an estimated 240 feet per second which is slower than FN 303 projectile. However, the larger mass, about 60 grams, creates more kinetic energy upon impact which is similar to that of a baseball thrown by a pitcher. The additional kinetic energy becomes important when the suspect has on thick or layered clothing or demonstrates a high pain tolerance.

The benefit to the Milkor LTL is its ability to provide a quick follow up less lethal application, if necessary. The Milkor holds 6 projectiles while the Penn Arms launcher only holds one. Reloading the Penn Arms single launcher can be time consuming and requires the officer to briefly change focus from the suspect to the reload procedure. The Milkor LTL on the other hand, allows the officer to maintain focus on the suspect and assess whether a follow up application is necessary. This ability is significant when the suspect is advancing, attempting to flee, or demonstrates a high pain compliance threshold.

(2) **Purpose:**

The purpose of kinetic energy impact projectiles, commonly referred to as “less lethal” is to preserve life, minimize the use of force and allow time for de-escalation attempts. Less lethal projectiles allow the user to maintain a safe distance from a subject who is armed and/or demonstrates the intent to be violent. The ability to maintain a safe distance – while still providing a level of control over the subject – allows officers to employ de-escalation techniques, request additional resources and develop a plan to safely resolve the situation with the least amount of risk.

Violent confrontations are inherently dangerous to all those involved. Officers are required to make split second judgments in circumstances that are tense, uncertain and rapidly evolving. An Officer’s threat perception of a person who is in close proximity as opposed to a person who is at a distance of 20 yards is naturally different. A person in close proximity intent on violence has the ability to immediately utilize personal body weapons, a bludgeoning device or cutting instrument. The immediacy requires the Officer to react instantly and there is a greater potential that a higher level of force will be needed.

On the other hand, a person at a distance of 20 yards may not be perceived as having the immediate ability to violently attack the Officer. The person must first close the distance before such weapons can be utilized. This may allow the Officer

time to decide the most appropriate course of action, such as the use of a “less lethal” projectile.

The “less lethal” projectiles utilized by the Berkeley Police Department are generally considered discriminate versus indiscriminate uses of force. The projectiles are designed to provide a high level of accuracy which minimizes the risk of unwanted impacts. The ability to apply force from a distance reduces the potential for violent confrontation and aides in reducing the level of force needed to safely resolve a conflict.

Additionally, it has been our experience that a 40mm projectile impact will generally resolve the violent confrontation with 1 or 2 applications. The larger projectile produces more kinetic energy than the FN 303, which may require several applications to gain compliance.

Since 2015, there have been 31 incidents where Officers utilized less lethal applications. These applications have potentially prevented higher-level uses of force.

(3) **Fiscal Cost:**

A. **Initial Cost:**

Less lethal prices, like other equipment, varies depending on market demand and availability. The most recent Penn Arms purchased by the department cost \$3950.00 each.

B. **Cost of Use:**

Cost for the Milkor LTL launcher use should be based on the projectiles used in training and on duty. This will fluctuate based on department trainings, projectile availability and events that unfold in the city and surrounding region.

C. **Cost of Potential Adverse Effects:**

Adverse effects from improper use of less lethal are not calculable. Improper use could lead to serious bodily injury or death.

D. **Annual and Ongoing Costs:**

See section B above

E. **Training Costs:**

Every officer authorized to deploy a less lethal launcher must pass a certification course administered by a Berkeley Police Firearm Instructor. The certification

class consists of classroom, range qualification and scenario application if the venue allows. This class is largely handled in house thus the cost only includes the officer's hourly wage, range fees, and projectile costs which all vary.

F. Maintenance and Storage Costs:

Maintenance costs vary depending on use.

G. Upgrade Costs:

There are no foreseeable upgrade costs.

(4) Impact:

The main function of a less lethal device is to preserve the sanctity of human life. The Berkeley Police Department is committed to reducing the potential for violent confrontations. Less lethal projectiles, when used properly, are less likely to result in serious bodily injury or death and can be used to de-escalate a potentially deadly situation. A less lethal application is an acknowledgment a given situation has the potential to elevate to lethal force and the Officers determined a less lethal application is not only objectively reasonable and objectively necessary, but also the minimal amount of force needed to safely resolve the incident.

The Milkor LTL launcher, with its high level of accuracy and 6 projectile capacity, can be utilized in a large violent group confrontation to specifically target those who are committing acts of violence on other members of the group, involved persons, or law enforcement personnel. It allows a more immediate action to stop a violent assault, overcome their resistance, and aid in the attempt to safely take them into custody. It also allows officers to prevent a more indiscriminate use of force, such as entering the group or crowd, to take a subject into custody.

(5) Mitigation:

Per Policy 300, "In all cases where physical force is used, officers shall use a minimum amount of force that is objectively reasonable, objectively necessary, and proportional to effectively and safely resolve a conflict." All uses of force require documentation that is completed by the supervisor in a use of force report and reviewed by the Chain of Command. Furthermore, all deployments of equipment outlined in the Police Equipment and Community Safety Ordinance are documented according to the reporting requirements as mandated in the ordinance.

Per Policy 303, "Officers are not required or compelled to use approved projectiles in lieu of other reasonable tactics if the involved officer determines that deployment of these projectiles cannot be done safely. The safety of hostages, innocent persons

and officers takes priority over the safety of subjects engaged in criminal or suicidal behavior. Circumstances appropriate for deployment include, but are not limited to, situations in which: (a) The suspect is armed with a weapon and the tactical circumstances allow for the safe application of approved projectiles. (b) The suspect has made credible threats to harm him/herself or others. (c) The suspect is engaged in riotous behavior or is throwing rocks, bottles or other dangerous projectiles at people and/or officers. (d) There is probable cause to believe that the suspect has already committed a crime of violence and is refusing to comply with lawful orders.”

The Berkeley Police Department also trains a recommended range of 3 to 30 meters. Berkeley Police Firearm Instructors recommend a minimum standoff of 3 meters to reduce the potential for unintended injury at a closer distance. The 30-meter maximum recommended range is intended to reduce the possibility of an unintended impact area if the suspect moves or the projectile trajectory begins to deteriorate.

Each officer is trained to aim for large muscle groups, such as the thigh or buttocks area, and avoid areas that may cause serious injury. The department also equips each launcher with a red dot optic. The optic greatly increases an officer’s ability to target approved impact areas.

(6) Alternative:

This is the only piece of less lethal equipment (other than the FN 303) that allows officers to address a potentially deadly threat from a distance. The TASER allows an officer to maintain distance but limits the range to about 15 to 25 feet. Furthermore, the TASER requires two prongs (barbs) to penetrate the subject’s clothing to be effective and if that is not accomplished the TASER will have no effect. Additionally, the TASER is not an approved less lethal device for the department.

(7) Third Party Dependence:

The Berkeley Police Department armorers are trained and capable of handling most issues related to the repair or maintenance of the Milkor LTL launcher. In the event of a catastrophic malfunction, the Milkor LTL will need to be sent to the manufacturer for repair. To date, there have been no significant repairs needed to the Milkor LTL. Additionally, Berkeley Police Department Less Lethal Instructors are fully certified by state and private training institutes to educate and train BPD officers. No third party is required for regular maintenance, repair, or instruction.

FN 303 and FN Pava Impact Projectile

(1) Description:

A. Background:

The FN 303 was developed in 2003 by Fabrique Nationale de Herstal as a less lethal option. The FN 303 is based on a concept developed by Monterey Bay Corporation. The development team consisted of designers and researchers from two paintball related companies. The FN 303 uses compressed air to propel a .68 caliber projectile similar to that of most manufactured paintball guns.

B. Quantity:

The Berkeley Police Department currently owns and maintains 8 FN 303 less lethal launchers.

C. Capability:

The FN 303 is capable of firing 15 projectiles out to a maximum manufacturer recommended range of 50 meters. The FN 303 projectiles are direct fire and designed to fragment upon impact to prevent penetration injury. Upon impact, the projectile transfers kinetic energy to the body to gain pain compliance. Large muscle groups such as the upper legs or lower abdomen are approved target areas. This level of force is considered to be similar to that of a baton strike.

D. Lifespan:

The manufacturer expected lifespan is about 10 years depending on use and regular maintenance.

E. Use:

The FN 303 is designed to reduce the potential for a violent confrontation. Less lethal projectiles are less likely to result in serious bodily injury or death and can be used to de-escalate a potentially deadly situation.

F. How it works:

An air reservoir attaches to the FN 303 through an air hose coupler and provides pressure through compressed air. When fired, the compressed air drives a piston that pushes the .68 caliber projectile through the barrel at approximately 280 feet per second. For comparison, the FN projectile is the size of a paintball and the velocity is the same as a commercially manufactured paintball gun.

The projectiles are 8.5 grams in weight and utilize a polystyrene fin stabilized body with a non-toxic forward payload to aid in stability and accuracy. The

projectile will deliver approximately 24-foot pounds of kinetic energy at the muzzle which is about double the kinetic energy of most paintball guns. Most paintballs have a mass of 3 grams while the FN 303 projectile has a mass of 8.5 grams which increases the kinetic energy produced.

Available projectiles are impact, impact + non-permanent marking, impact + permanent marking, and impact + PAVA (0.5% PAVA/Oleoresin Capsicum).

The impact + PAVA projectile is intended to be direct fired at an individual. In addition to delivering pain through kinetic energy upon impact, the PAVA projectile will deliver a secondary chemical irritant, which is the Oleoresin Capsicum (O.C.) payload. Oleoresin Capsicum generally causes irritation/burning at the application site, irritation to the eyes, and coughing. According to the National Institute of Health, the effects of O.C. power exposure tend to resolve on their own within 30 minutes.

Pain is highly subjective and other circumstances, such as heavy clothing, may render the impact ineffective. The application of a secondary chemical irritant may assist in gaining compliance and successfully resolving a potentially violent incident with the minimal amount of force necessary.

(2) **Purpose:**

The purpose of kinetic energy impact projectiles, commonly referred to as “less lethal” is to preserve life, minimize the use of force and allow time for de-escalation attempts. Less lethal projectiles allow the user to maintain a safe distance from a subject who is armed and/or demonstrates the intent to be violent. The ability to maintain a safe distance – while still providing a level of control over the subject – allows officers to employ de-escalation techniques, request additional resources and develop a plan to safely resolve the situation with the least amount of risk.

Violent confrontations are inherently dangerous to all those involved. Officers are required to make split second judgments in circumstances that are tense, uncertain and rapidly evolving. An Officer’s threat perception of a person who is in close proximity as opposed to a person who is at a distance of 20 yards is naturally different. A person in close proximity intent on violence has the ability to immediately utilize personal body weapons, a bludgeoning device or cutting instrument. The immediacy requires the Officer to react instantly and there is a greater potential that a higher level of force will be needed.

On the other hand, a person at a distance of 20 yards may not be perceived as having the immediate ability to violently attack the Officer. The person must first close the distance before such weapons can be utilized. This may allow the Officer time to decide the most appropriate course of action, such as the use of a “less lethal” projectile.

The “less lethal” projectiles utilized by the Berkeley Police Department are generally considered discriminate versus indiscriminate uses of force. Discriminate projectiles are designed to provide a high level of accuracy which minimizes the risk of unwanted impacts. The ability to apply force from a distance reduces the potential for violent confrontation and aides in reducing the level of force needed to safely resolve a conflict.

Since 2015, there have been 31 incidents where Officers utilized less lethal applications. These applications have potentially prevented higher-level uses of force.

(3) Fiscal Cost:

A. Initial Cost:

Less lethal prices, like other equipment, varies depending on market demand and availability. The most recent FN 303s purchased by the department cost \$800.00 each.

B. Cost of Use:

Cost for FN 303 use should be based on the projectiles used in training and on duty. This will fluctuate based on department trainings, projectile availability and events that unfold in the city and surrounding region.

C. Cost of Potential Adverse Effects:

Adverse effects from improper use of less lethal are not calculable. Improper use could lead to serious bodily injury or death. Only trained officers are authorized to use the FN 303.

D. Annual and Ongoing Costs:

See section B above

E. Training Costs:

Every officer authorized to deploy a less lethal launcher must pass a certification course administered by a Berkeley Police Firearm Instructor. The certification class consists of classroom, range qualification and scenario application if the

venue allows. This class is largely handled in house thus the cost only includes the officer's hourly wage, range fees, and projectile costs which all vary.

F. Maintenance and Storage Costs:

Maintenance costs vary depending on use. Generally, O-rings need to be replaced every 3000 rounds and cost \$30 per kit.

G. Upgrade Costs:

The overall design of the FN 303 has changed little since its initial release in the early 2000s thus anticipated upgrade costs will be minimal.

(4) Impact:

The main function of a less lethal device is to preserve the sanctity of human life. The Berkeley Police Department is committed to reducing the potential for violent confrontations. Less lethal projectiles, when used properly, are less likely to result in serious bodily injury or death and can be used to de-escalate a potentially deadly situation. A less lethal application is an acknowledgment a given situation has the potential to elevate to lethal force and the Officers determined a less lethal application is not only objectively reasonable and objectively necessary, but also the minimal amount of force needed to safely resolve the incident.

The FN 303, with its high level of accuracy can be utilized in a large violent group confrontation to specifically target those who are committing acts of violence on other members of the group, involved persons, or law enforcement personnel. It allows a more immediate action to stop a violent assault, overcome their resistance, and aid in the attempt to safely take them into custody. It also allows officers to prevent a more indiscriminate use of force, such as entering the group or crowd, to take a subject into custody.

(5) Mitigation:

Per Policy 300, "In all cases where physical force is used, officers shall use a minimum amount of force that is objectively reasonable, objectively necessary, and proportional to effectively and safely resolve a conflict." All uses of force require documentation that is completed by the supervisor in a use of force report and reviewed by the Chain of Command. Furthermore, all deployments of equipment outlined in the Police Equipment and Community Safety Ordinance are documented according to the reporting requirements as mandated in the ordinance.

Per Policy 303, "Officers are not required or compelled to use approved projectiles in lieu of other reasonable tactics if the involved officer determines that deployment of

these projectiles cannot be done safely. The safety of hostages, innocent persons and officers takes priority over the safety of subjects engaged in criminal or suicidal behavior. Circumstances appropriate for deployment include, but are not limited to, situations in which: (a) The suspect is armed with a weapon and the tactical circumstances allow for the safe application of approved projectiles. (b) The suspect has made credible threats to harm him/herself or others. (c) The suspect is engaged in riotous behavior or is throwing rocks, bottles or other dangerous projectiles at people and/or officers. (d) There is probable cause to believe that the suspect has already committed a crime of violence and is refusing to comply with lawful orders.”

The Berkeley Police Department also trains a recommended range of 3 to 30 meters. Berkeley Police Firearm Instructors recommend a minimum standoff of 3 meters to reduce the potential for unintended injury at a closer distance. The 30-meter maximum recommended range is intended to reduce the possibility of an unintended impact area if the suspect moves or the projectile trajectory begins to deteriorate.

Each officer is trained to aim for large muscle groups, such as the thigh or buttocks area, and avoid areas that may cause serious injury. The department also equips each launcher with a red dot optic. The optic greatly increases an officer’s ability to target approved impact areas.

(6) Alternative:

This is the only piece of equipment that allows officers to address a potentially deadly threat from a distance. The TASER allows an officer to maintain distance but limits the range to about 15 to 25 feet. Furthermore, the TASER requires two prongs (barbs) to penetrate the subject’s clothing to be effective and if that is not accomplished the TASER will have no effect. Additionally, the TASER is not an approved less lethal device for the Berkeley Police Department.

Unlike the Penn Arms 40mm single shot and the Milkor LTL multi-shot launcher, the FN 303 is capable of propelling 15 projectiles before a reload is required. The 15 round magazine allows for a quick follow-up application should the situation warrant with an effective range of over 160 feet; compared to the Penn Arms 40mm single shot and the Milkor LTL multi-shot launcher’s 100 feet. The FN303’s smaller and faster projectiles also generally allow for a higher level of accuracy compared to the 40mm foam baton rounds. The FN 303 rounds is also capable of carrying payloads such as paint or PAVA (Oleoresin capsicum).

(7) **Third Party Dependence:**

The Berkeley Police Department armorers are trained and capable of handling regular maintenance and most repairs. In the event of a catastrophic failure, the device will be sent to the manufacturer for repair. To date there have been 2 devices that required manufacturer repair, both of which were under warranty.

Additionally, department firearm instructors are fully certified by state and private training institutes to educate and train BPD officers. No third party is required for maintenance, most repairs, or instruction.

OC (oleoresin capsicum) Spray

(1) **Description:**

A. Background:

For the purposes of this portion of the Impact Statement, OC (Oleoresin capsicum) will be referred to in the spray form as opposed to the aerosol canister form. First Defense manufactures different sizes of OC sprays. OC is the chemical agent that is most widely used amongst Law Enforcement (LE) and the general public. OC has a pungent and irritating pepper odor. It is classified as an inflammatory agent. Besides being effective on humans, OC based chemical agents usually work on animals as well. In a liquid form, OC can appear as a clear, amber, or heavy dark red solution depending on the manufacturer. It is mixed with several types of solutions which act as carriers.

B. Quantity:

Qty 23 – First Defense MK-9 OC spray (13- ounces)

Qty 178 – First Defense MK-3 OC spray (3 ounces)

Most of the MK-3 OC sprays are issued to and maintained by individual officers; however, a small amount of these sprays is stored in a secured equipment room as spares in case of damage or new personnel issue.

C. Capability:

The First Defense MK-3 OC sprays are standard issued to all police officers and are worn on the police officers' belt. It has an effective range of 10-12 feet. The larger First Defense MK-9 OC sprays are 13 ounces and are used in violent crowd situations. It has an effect range of 18-20 feet.

The use of the First Defense OC spray can render a dangerous and violent situation safe without using a higher level of force.

D. Lifespan:

Aerosol products eventually lose pressure over time. The lifespan of both the MK-9 and MK-3 OC spray are dependent on how well the pressure in the can is maintained, but is recommended to be replaced after 5 years.

E. Use:

OC spray may be considered for use to bring under control an individual or groups of individuals who are engaging in or about to engage in violent behavior. OC spray should not, however, be used against individuals or group who merely fail to disperse or do not reasonably appear to present a risk to the safety of officers or the public.

F. How it Works:

A person subjected to OC can expect heavy tearing due to a burning sensation, involuntary closing or blinking of the eyes, burning/stinging skin sensation, redness of the skin, irritation and burning of the nose, runny nose, salivation and burning sensation of the mouth, cough, gagging sensation, shortness of breath, temporary paralysis of the larynx (person unable to speak) and nausea (caused by shock, not the OC itself). A person may also feel disorientated, anxiety, and/or panic. A complete recovery usually takes place within 45-60 minutes depending on the level of exposure.

(2) Purpose:

There are a variety of situations where officers may use OC spray such as: self-defense, overcoming the resistance of a noncompliant individual, effecting an arrest, preventing escape, violent crowd or riot control, barricade or hostage situations and dealing with dangerous animals.

(3) Fiscal Cost:

A. Initial Cost:

The MK-3 OC spray cost approx. \$19 per unit and the MK-9 OC spray costs approx. \$60 per unit. The manufacturer is Defense Technology and the Berkeley Police Department purchase each unit from Galls Police Supply or LC Action Police Supply. Purchases for these tools are made when inventory gets low which is typically determined by how many new officers are sworn in, as well as if they are utilized in dangerous situations.

B. Cost of Use:

The cost of each usage is unpredictable due to the unknown nature of crime, timelines of dangerous situations, and number of applications.

C. Cost of Potential Adverse Effects:

Adverse effects of improper use of OC spray are not calculable. It could lead to serious injury. Additionally, the improper use could result in civil liabilities.

D. Annual and Ongoing Costs:

See below cost of training.

E. Training Cost:

Training is conducted in the police academy and in-house by a Police Officer Standard Training (POST) certified Berkeley Police chemical agent training officer. The cost of training is staff time.

F. Maintenance and Storage Costs:

The majority of the MK-3 OC sprays are either stored within the Police Department or with each sworn police officer while they conduct official duties. All MK-9 OC sprays are stored in the basement. There are no additional storage costs or associated costs to transporting, maintain, or upgrade.

G. Upgrade Costs:

No upgrades exist for this equipment as of this report.

(4) Impact:

The physical effects of being subjected to OC may significantly reduce an individual's aggressive behavior. Reports have shown that the use of OC can reduce the amount of officer and arrestee injuries due to its effectiveness. Chemists assigned to the FBI Forensic Science Research and Training Center report no long-term health risks associated with the use of OC. The use of the MK-3 or MK-9 OC spray can render a dangerous and violent situation safe without using a higher level of force.

(5) Mitigations:

Law Enforcement Officers attend a Police Officer Standard Training (POST) approved academy before they enter into a Field Training Program and continue their training. During this academy they are taught about OC, how to deploy it, its effects, and the decontamination process. They are also subjected to OC to physically feel the effects themselves. After the academy, each officer is issued a MK-3 OC spray which they

are to keep on their person while on duty. If deployed and when practical, medical personnel should be summoned for the affected person(s) per policy 303. All uses of force require documentation that is completed by the supervisor in a use of force report and reviewed by the Chain of Command. Furthermore, all deployments of equipment outlined in the Police Equipment and Community Safety Ordinance are documented according to the reporting requirements as mandated in the ordinance.

(6) **Alternatives:**

Alternatives to utilizing OC sprays are tools such as expandable batons, less lethal launchers, and/or physical body weapons. The rationale to use OC spray depends on the circumstances of each individual incident and the individual officer involved in the incident. As mentioned above, reports have shown that OC spray may significantly reduce an individual's aggressive behavior which can minimize the amount of force necessary to apprehend that subject. Per our Use of Force policy (Lexipol 300), we shall use the minimal amount of force possible during each incident, thus making OC spray a valuable option.

(7) **Third Party Dependence:**

There is no third-party dependence for the First Defense OC spray. Once they are purchased, they are secured in their designated locations within the Police Department or with sworn police officers while they conduct official duties.

Chlorobenzylidene Malonitrile and Oleoresin Capsicum

(1) **Description:**

A. **Background:**

Chlorobenzylidene malonitrile (CS):

Chlorobenzylidene malonitrile (CS) is one of the most commonly used "tear gases" in the world. It can be liquid, gaseous, or solid substance intended to produce temporary discomfort through being vaporized or otherwise dispersed in the air. Law enforcement (LE) agencies have found this agent invaluable when faced with combative suspects, for crowd/riot control, and for alleviating barricaded subject situations. LE use it to help control individuals or groups without the need for a higher level of force. There are four different deployment methods of chemical agents (Aerosol - most commonly used by police departments, Fogging, Pyrotechnics, and blast expulsion). All methods of deployment can be affected by certain environmental and physical conditions (wind, rain, temperature, distance, and proximity to others). At standard daily

temperatures and pressures, CS forms a white crystal with a low vapor pressure and poor solubility in water.

Oleoresin capsicum (OC):

For this portion of the Impact Statement, Oleoresin capsicum (OC) will be referred to in the aerosol canister form. OC is the chemical agent that is most widely used amongst Law Enforcement (LE) and the general public. OC has a pungent and irritating pepper odor. It is classified as an inflammatory agent. OC is mixed with several types of solutions which act as carriers.

B. Quantity:

Inventory for CS canisters:

Qty 6 – 5230 CS Canisters

Qty 24 – 6230 CS Canisters

Qty 20 – 5230B CS Baffled Canister (flameless)

Qty 17 – 5231 CS Tri-Phaser Canisters

Qty 21 – 4630 CS Muzzle Blast (used with 40 mm less lethal launcher)

Qty 4 – 4530 CS Impact Rounds (used with 40 mm less lethal launcher)

Qty 19 – 4330 CS Barricade Projectile Rounds (used with 40 mm less lethal launcher)

Inventory for OC canisters:

Qty 54 - 9440 OC Tear Ball

Qty 19 - 5440 OC Flameless

Qty 20 - 6340 OC Vaper

C. Capability:

CS aerosols with microscopic particles which are potent sensory irritants

becoming attached primarily to moist mucous membranes and moist skin.

Common effects are: coughing, increased mucous secretion, difficulty breathing, skin reactions, and excessive salivation. The onset of symptoms typically occurs within 20 to 60 seconds, and if the exposed individual is placed in fresh air these effects generally cease in 10 to 30 minutes.

A person subjected to OC can expect heavy tearing due to a burning sensation, involuntary closing or blinking of the eyes, stinging skin sensation, redness of the skin, irritation of the nose, runny nose, salivation, cough, gagging sensation, and shortness of breath. A person may also experience anxiety and panic. A complete recovery usually takes place within 45-60 minutes depending on the level of exposure.

Both CS and OC canisters can render a dangerous and violent situation safe without using a higher level of force.

D. Lifespan:

CS and OC canisters expire in approximately 5 years.

E. Use:

Tear gas may be used for crowd control, crowd dispersal or against barricaded suspects based on the circumstances. Only the Chief of Police may authorize the delivery and use of tear gas, and only after evaluating all conditions known at the time and determining that such force reasonably appears justified and necessary.

(2) Purpose:

There are a variety of situations where peace officers may use chemical agents such as: self-defense, overcoming the resistance of a noncompliant individual, effecting an arrest, preventing escape, violent crowd or riot control, barricade or hostage situations and dealing with dangerous animals.

(3) Fiscal Cost:

A. Initial Cost:

The cost for CS canisters ranges from \$20.00 to \$39.00 per unit. The cost for OC canisters ranges from \$36.00 to \$44.00 per unit. The Berkeley Police Department prefers the use of the Combined Tactical Systems (CTS) chemical agents and we purchase them from LC Action Police Supply.

B. Cost of Use:

The cost of each proposed use is unpredictable due to the demand, unknown nature and timelines of dangerous crowd/riots situations, dangerous barricade situations, and hostage situations.

C. Cost of Potential Adverse Effects:

Adverse effects of improper use of OC and CS are not calculable. It could lead to serious injury. Additionally, the improper use could result in civil liabilities.

D. Annual and Ongoing Costs:

See below cost of training.

E. Training Cost:

When purchased, each unit is given an expiration date which typically falls within a 2-3-year range. Every 2-3 years, new chemical agents are purchased to honor

the expiration dates. The expired agents are then used during annual trainings thus minimizing the overall cost. Training is conducted by a Police Officer Standard Training (POST) certified Berkeley Police chemical agent training officer. The cost of training is staff time.

F. Maintenance and Storage Costs:

The majority of agents are stored inside of a marked chemical agent room within the Police Department, in the Special Response Team vehicle, or in the rescue Vehicle. There are no additional storage costs. There are no associated costs to transporting, maintenance, or upgrades.

G. Upgrade Costs:

No upgrades exist for this equipment as of this report.

(4) Impact:

BPD is committed to preserving and protecting human life and welfare. These tools allow us to fulfill our commitment to our community.

Law Enforcement, under Penal Code 12403.1, is able to lawfully purchase, possess, or use chemical agents in the discharge of their duties. CS and/or OC canisters have been prominently used to resolve dangerous barricaded suspect situations and violent crowd control/riot situations.

Berkeley Police officers are trained to utilize time and distance to de-escalate dangerous barricaded situations in order to resolve each incident with minimal the use of force (per Use of Force Policy 300). In some circumstances when all other options are exhausted, CS and/or OC can be inserted into the structure in which the barricaded suspect is, denying access to certain areas inside. Unless exigent circumstances arise, all attempts to evacuate the structure are made prior to any deployment. When CS and/or OC are deployed into a structure the suspect may be forced outside allowing the situation to resolve safely with no use further use of force.

CS and/or OC chemical agents can be utilized to create order in dangerous crowd control/riot situations that have demonstrated violence or destruction. During these incidents, typically a clear and direct warning has been given to the crowd to disperse before the chemical agents are deployed. The ability to disperse crowds from a distance limits injury to Police Officers as well as damage to critical structures.

(5) **Mitigations:**

Regarding the already mentioned impacts, the decision to utilize chemical agents (unless there are exigent circumstances) flows through the chain of command and ultimately makes its way to the Chief of Police and the City Manager. If there are exigent circumstances, the Field Commander makes the decision and then advises the Chief of Police as soon as practical. All uses of force require documentation that is completed by the supervisor in a use of force report and reviewed by the Chain of Command. Furthermore, all deployments of equipment outlined in the Police Equipment and Community Safety Ordinance are documented according to the reporting requirements as mandated in the ordinance.

With these procedures incorporated in BPD's policies, this mitigates many potential negative impacts. Per Policy 428 – First Amendment Assemblies - The Field Commander shall determine the type and quantity of chemical agents to be used. After use of chemical agents, the Field Commander shall re-evaluate the scene to determine if additional chemical agents are needed. Less-than-lethal munitions (40 mm CS impact rounds), chemical agents (including OC spray), and/or smoke shall only be deployed in crowd control situations as outlined in the Use of Force Policy. For planned events, inventories shall be conducted before and at the conclusion of the incident. Outside agency inventories shall also be tracked.

In addition to the mitigations in place, the Berkeley Police Special Response Team also receives annual training on the use of chemical agents, the effects, and the decontamination process. Per policy 303, when practical, medical personnel should be summoned for the affected person(s).

(6) **Alternatives:**

There are no direct alternatives for CS and OC. They are the industry's leading way to resolve barricaded suspects while reducing the likelihood of injury to the subject, community, and officers. Additionally, it is one of the only tools that allows officers to stop acts of violence or regain order during crowd control/riot situations. They are very distinct in nature and have direct purposes. The rationale to use CS or OC depends on the circumstances of each incident. The Berkeley Police Department shall use the minimal amount of force per our Use of Force Policy 300. The use of CS or OC allows the police personnel to maintain distance, giving officers more time to react and avoid a potential need for a higher level of force to safely resolve the situation.

(7) **Third Party Dependence:**

There is no third-party dependence for CS and OC chemical agents. Once they are purchased, they are secured in their designated areas and stay there until they are either used during incidents or training.

Remington 700 Rifle

(1) **Description:**

A. **Background:**

The Remington 700 is a series of bolt-action rifles designed in 1962 by the Remington Arms Company. The “700” designator is the generic name for multiple models of rifles with various parts, barrel lengths, stocks, etc. The Remington 700 rifle has long been used by law enforcement agencies and continues to be an industry standard for issued equipment. The Berkeley Police Department utilizes a custom Remington 700 action, chambered in the common .308-caliber round, with a 20” barrel and an Accuracy International chassis/stock. The rifle also includes a Nightforce 3-15x magnified optic and bipod.

BPD utilizes Hornady .308-caliber ammunition. This particular ammunition is specially designed for law enforcement applications due to its increased and consistent accuracy and performance.

B. **Quantity:**

The Berkeley Police Department Special Response Team (SRT) currently possesses six Remington 700 rifles, all configured in the same manner.

Currently, BPD has approximately 1,800 Hornady .308-caliber rounds. That quantity of ammunition fluctuates depending on supply from distributors and training schedules of those trained officers.

C. **Capability:**

The Remington 700 rifle, with the appropriate ammunition, training, and practice, is capable of consistent and highly accurate shooting out to a distance of approximately 500-yards.

The Remington 700 is intended to be used in emergency situations where there is a high potential for violence, where the need exists to put distance between officers and a specific individual, such as an armed hostage situation.

D. Lifespan:

The Remington 700 bolt-action rifles have an expected life span of 10-years if properly maintained.

E. Use:

Used in the defense of life or great bodily injury to potential victims of violent crimes, general public, and officers.

F. How it Works:

The Remington 700 is a manually operated rifle. It requires the officer to physically maneuver a handle to expel a spent cartridge and to load another unspent round of ammunition in order to fire a second round. When the trigger is pressed, a firing pin strikes the primer of a bullet loaded into the chamber of the rifle. The ignited primer ignites gun powder contained in the bullet which pushes the bullet down the barrel and out the muzzle. The officer must then pull a handle attached to the bolt to the rear, ejecting the spent cartridge. The officer then pushes the bolt forward, which picks up another bullet from the magazine, and closes the chamber, making the rifle ready to fire again.

(2) Purpose:

This rifle is to be used in the defense of life or great bodily injury to potential victims of violent crimes, general public, and officers. This rifle provides police with the benefit of adding distance to a volatile situation which can increase the safety for community members and officers. This rifle is an ancillary firearm for situations where increased distance and accuracy is needed to safely resolve the situation.

(3) Fiscal Cost:

A. Initial Cost:

The initial cost to purchase this rifle with its associated components is approximately \$10,000 dollars each. Their average life span is 10-years at which time it will likely need to be replaced.

B. Cost of Use:

Cost of use for all firearms should be based on the ammunition used in training and on duty. This will fluctuate based on training.

C. Cost of Adverse Effects:

Adverse effects and improper usage of a firearm are not calculable. It could lead to the loss of life or serious injury. Additionally, the improper use could result in civil liabilities.

D. Annual and Ongoing Costs:

If this rifle is not cared for or maintained well, then a potential financial adverse impact would be the premature purchasing of a replacement rifle or replacement parts. However, authorized and trained Berkeley Police armorers service and provide regular maintenance of the rifles. The cost of maintenance is staff time.

E. Training Costs:

The cost associated with training is the staff time, range fees, and cost of spent ammunition. SRT members train once a month and, on average, each member shoots approximately 50-rounds. Currently, there are only 4 members shooting at each training day. This equates to approximately 2,400 rounds of ammunition being fired per year. This does not include special training days or attendance to training schools/classes. A single box of 20-rounds costs approximately \$20-dollars or \$1 dollar per round.

F. Maintenance and Storage Costs:

Maintenance costs vary depending on use over time. Firing pins need to be replaced every 5 to 7 years. The maintenance cost associated with this rifle is minimal.

There are no costs associated with maintenance or storage of ammunition. All ammunition is stored in a climate-controlled room in the Berkeley Police Department.

G. Upgrade Costs:

Upgrade costs and maintenance cost are synonymous due to the consistent design. Improvements in technology and new designs may be an additional cost but we can't predict what those will be at this time.

Should advancements be made in ammunition manufacturing; those upgrade costs are unknown at this time.

(4) Impact:

The primary purpose of this rifle is to further SRT's goal of adding time and distance when dealing with a violent and dangerous individual(s). The rifle may allow SRT additional time by increasing the distance between law enforcement and the specific individual, thereby increasing the likelihood of a more peaceful resolution. Like all tools, it has a time and place for its intended operational efficacy.

(5) **Mitigations:**

Mitigating impacts from this tool's primary purpose is done through regular training. The training includes accuracy, decision making, scenarios, and various other training points. All uses of force require documentation that is completed by the supervisor in a use of force report and reviewed by the Chain of Command. Furthermore, all deployments of equipment outlined in the Police Equipment and Community Safety Ordinance are documented according to the reporting requirements as mandated in the ordinance.

(6) **Alternatives:**

The Remington 700 rifle is an industry standard tool used to deliver precision accuracy on an intended target. This tool can deliver accuracy and predictability through intermediate barriers like glass windows. It can be used at distances greater than any other tool currently possessed or authorized. No alternate tool or method would accomplish the same goal.

(7) **Third Party Dependence:**

These rifles are fairly simple in their design and operation. They do require regular maintenance which is commonly performed by each individual member. BPD Armorers are also capable of performing additional maintenance. If an issue arises which is beyond the scope of our Armorers we would seek professional assistance from the manufacturer. However, the need for this is very rare.

ReconRobotics Recon Scout XT

(1) **Description:**

A. **Background:**

The Recon Scout XT is a throwable micro-robot manufactured by ReconRobotics for use in law enforcement applications. The Recon Scout XT enables officers to obtain instantaneous video footage and audio within indoor or outdoor environments. Designed to withstand repeated drops onto concrete, the Recon Scout XT robot can be thrown into hazardous situations (hostage rescue, barricaded subjects, natural disasters, etc.) in order to allow officers to quickly and safely make informed decisions when seconds count.

B. **Quantity:**

The Berkeley Police Department has two Recon Scout XT throwable robots, both purchased in 2010.

C. Capability:

The Recon Scout XT robot is designed to be able to crawl over a variety of terrain, clearing obstacles up to 2" (5 cm) tall. It could be thrown into hazardous situations, indoor and outdoor, and provide live audio and video feed back to the controller.

D. Lifespan:

Both Recon Scout XT robots are over 10 years old and ReconRobotics have developed and manufactured more advanced robots. ReconRobotics have stopped manufacturing certain parts for the Recon Scout XT, so the lifespan is dependent on what parts need to be replaced.

E. Use:

The Recon Scout XT robot may be deployed to help police officers safely view potentially dangerous environments before entering them.

F. How it Works:

The Recon Scout XT robot has a cylindrical body with a finned-wheel at either end of its body, and is stabilized by a rubber "tail". It measures approximately 6 ½" wide, and each wheel is about 5" in diameter (fin to fin) and weights just over one pound (1.2 lbs.). The Recon Scout XT robot sends digital video and audio back to an Operator Control Unit (OCU; controller with a screen and joystick), which allows the officer to control the robot, which provides a live feedback containing audio and visual feeds. The Recon Scout XT robot does not record audio or video footage; there is no data storage capability.

(2) Purpose:

The Recon Scout XT robot is intended to safely provide police officers valuable information during high-risk, rapid evolving situations via real-time audio and video footage. It can be driven a distance away from the OCU, creating space between the officer and potential danger, thus decreasing the likelihood of injury to those involved in the event, or even a violent encounter between police officers and a dangerous subject. This asset furthers our commitment to the sanctity of life by offering time and distance in critical incidents.

(3) Fiscal Cost:

A. Initial cost:

The initial cost for the Recon Scout XT robot was about \$12,500 per unit (2010 cost).

B. Cost of Use:

There is no "per use" cost of this equipment. The Recon Scout XT is powered by a rechargeable battery.

C. Cost of Potential Adverse Impacts:

The likelihood of adverse impacts due to the use of the Recon Scout XT robot is low – it is small, lightweight and is not likely to injure persons or damage personal property when deployed; however, there is a small chance that the Recon Scout XT robot might cause damage to personal property when deployed (thrown) into a structure. Due caution is used when it becomes necessary to throw, rather than place, the robot into a structure.

D. Annual and Ongoing Cost:

There are no ongoing or annual costs associated with the use of the Recon Scout XT robot. Being that it is battery operated, there is a nominal cost associated with charging the Recon Scout XT robot's batteries, and the batteries of the OCU. The Recon Scout XT robot is fairly simple to operate, thus there is no cost associated with training officers in its use. There are no costs with transportation or storage of the Recon Scout XT robot. While there are newer models of this robot available, there does not appear to be any upgrades available for the Recon Scout XT. The Recon Scout XT robot has been damaged on occasion, and there are costs associated with repair. But generally, the Recon Scout XT robot is robust and does not need regular repair.

E. Training Cost:

The Recon Scout XT robot is user friendly and simple to operate. Training is conducted by Berkeley Police personnel familiar with the operations and procedures of the Recon Scout XT robot. The cost of training is staff time.

F. Maintenance and Storage Costs:

There are no annual or storage costs.

G. Upgrade Costs:

There are no upgrades available at the time of this report.

(4) Impact:

The Recon Scout XT robot is used to safely gather information in situations where it may be dangerous to expose an officer, or officers, to gather the same information. Putting officers in such unknown, tense situations has the potential to create violent encounters, or otherwise place officers in unnecessary peril and danger that might otherwise be avoided by the use of a tool like the Recon Scout XT robot. The Recon Scout XT robot is not likely to have a negative impact on the welfare or safety of the public as its role is to gather real-time information during high-risk incidents such as hostage or potentially life-threatening situations. The Recon Scout XT robot is likely to improve the welfare and increase the safety of the public through its ability to gather real-time information and feed it back to police officers. The Recon Scout XT robot does not have the capability to record or store data.

(5) Mitigations:

The use of the Recon Scout XT robot is limited to sworn police officers, and guided by field supervisors (Lieutenants and Sergeants). Procedurally, the Recon Scout XT robot is used when exigent circumstances exist (hostage situation, barricaded subject, natural disaster

necessitating rescue, etc.) and real-time information is necessary to safely and effectively resolve the situation. The robot does not record or store data.

(6) **Alternatives:**

Unmanned aerial vehicles (UAV) are an alternative to robots such as the Recon Scout XT robot. However, the Berkeley City Council has prohibited the Berkeley Police Department from using UAVs. They are not constrained by obstacles on the ground and provide far superior perspective and situational awareness; at times, obstacles halt the Recon Scout XT robot's movement. There are several other robots on the market, however, the Recon Scout XT robot is compact, lightweight (weighing in at just over a pound), very maneuverable, and can easily be carried by an officer. It can also be introduced into structures by throwing it through any opening – an option not possible with other robot models.

(7) **Third Party Dependence:**

The Recon Scout XT robot does not currently rely on a third-party company or vendor for its use or maintenance. Should maintenance or parts be required beyond the scope of the members of the Berkeley Police Department, the robot would be sent to ReconRobotics for service.

Andros Remotec HD-1 Hazardous Duty Robot

(1) **Description:**

A. **Background:**

The Andros Remotec HD-1 Hazardous Duty Robot, hereinafter referred to as Remotec HD-1 robot, was designed to support a wide range of missions in demanding environments. The Remotec HD-1 robot is capable of lifting up to 125 pounds, tracked articulators stair climbing, and has an integrated Talisman radio system for a stronger radio wave connection between the controller and the robot.

Remotec has served explosive ordinance disposal units, hazardous materials units, and other first responders as a provider of mobile robotic systems for application into a variety of undesirable, hazardous and potentially life-threatening environments. The Remotec HD-1 robot allows individuals to approach hazardous devices to examine and manipulate the device without putting people in harm's way.

B. **Quantity:**

The Berkeley Police Department Bomb Squad has one robot, the Remotec HD-1 robot.

C. **Capability:**

Remotec HD-1 robot is used in situations where a potential life-threatening situation exists and is too hazardous for a bomb technician to approach in person. The Remotec HD-1 robot is also used to survey an area prior to a bomb technician approaching a

scene to check for trip wires and ascertain a good approach path. The Remotec HD-1 robot has three cameras and audio monitoring that stream live video and audio back to the control module; however, it is unable to record and does not have any data storage capabilities. It has several attachment mounting options as well. The Remotec HD-1 robot also has the ability to carry a variety of tools. Some of the tools are:

- 1) A spike to break glass and access vehicles or homes with potential explosive devices inside
- 2) An X-ray mount in order to remotely X-ray suspected explosive devices.
- 3) Percussion actuated non-electric disruptors which are smooth barrels that are filled with water and fired at high speed with a blank shotgun round to open backpacks, suitcases, and packages from a distance
- 4) A hook with cutting blades that are used to cut backpack straps, ropes, etc.
- 5) PAN rounds containing various fills, from sand to slugs, in order to open sturdier packages made from metal or other hard covers.
- 6) Electrical connections to connect explosives that can be detonated remotely and from a safe distance.

D. Lifespan:

The Remotec HD-1 robot has an expected life span of 10 years. It is currently 13 years old and has begun exhibiting issues. The Remotec HD-1 robot weighs just over 200 lbs. and has been near multiple explosions over the years and crossed a variety of off-road terrain

E. Use:

Used to examine and possible destroy hazardous materials such as an explosive device.

F. How it Works:

The Remotec HD-1 robot is piloted by a bomb technician into a hazardous area to locate, examine, and render suspicious packages and explosive devices safe by utilizing a variety of attachable tools.

(2) Purpose:

The Remotec HD-1 robot is used as a means to approach hazardous situations where a potentially lethal threat such as an explosive device exist. The Remotec HD-1 robot allows for the examination and manipulation of an object or potential explosive device without unnecessarily putting a bomb technician's life at risk.

(3) Fiscal Cost:

A. Initial Cost:

Procured in 2008 for \$214,496 including on-site training through a UASI Grant. (64,292-N.S.)

B. Cost of Use:

None. The robot is electric and operated through the City's electricity for charging.

C. Cost of Potential Adverse Effects:

The Remotec HD-1 robot interacts with inanimate objects. However, should it encounter a package that explodes, it could potentially destroy the robot and damage other property.

D. Annual and Ongoing Costs:

There is no annual cost. Maintenance of the Remotec HD-1 robot is conducted by Berkeley Police Bomb Technicians.

E. Training Costs:

Berkeley Police Bomb Technicians are trained during regular bomb squad training sessions and maintain their skills through training scenarios. The cost of training is limited to staff time.

F. Maintenance and Storage Costs:

Remotec offers occasional maintenance and upkeep workshops free of charge.

G. Upgrade Costs:

There are no costs for upgrades as the company has stopped manufacturing the robot and any applicable upgrades.

(4) Impact:

The Remotec HD-1 robot is used by the Berkeley Police Department Bomb Squad as a means to examine a potentially explosive device in order to keep the community safe. Since April 2020, the Berkeley Police Department Bomb Squad has responded to 14 incidents. The impact of the Remotec HD-1 robot has been to reduce and minimize the danger posed by calls of possible explosive devices to the Berkeley Police Department's Bomb Technicians.

(5) Mitigations:

The Remotec HD-1 robot is used in situations where a hazardous device exists. In these situations, the area is always evacuated in order to ensure community safety.

(6) Alternatives:

The Remotec HD-1 robot is 13 years old and there has been significant development in technology. There are several alternatives that are far superior than our current Remotec HD-1; Mark V-A1 robot developed by Remotec Andros, Caliber Flex developed by ICOR Technology, Digital Vanguard-S developed by Med-Eng and T7 and T4 developed by L3Harris Technologies. These are alternatives that have newer and better technology and capabilities than the Remotec HD-1 robot.

(7) **Third Party Dependence:**

Remotec representatives are the only ones used to diagnose and maintain complex issues on the robot that cannot be done in-house. Since it is proprietary technology, Remotec may void warranties on any repairs made by outside vendors or by untrained personnel. Therefore, all complex issues with the Remotec HD-1 robot must be repaired by Remotec.

Light/Sound Diversionary Device

(1) **Description:**

A. **Background:**

Light/Sound Diversionary devices also known as distraction device, flashbang, light/sound and noise/flash devices have been available for approximately 40 years and are a safe and effective tool for Law Enforcement (LE) to use during challenging tactical incidents. The device will be referred to a diversionary device throughout this document.

B. **Quantity:**

Qty 50 - CTS 7290 Diversionary Device

C. **Capability:**

When a diversionary device is deployed they create a loud noise, heat and brilliant light and create an effective diversion. They can create psychological and physiological effects such as: hearing a loud noise beyond that of everyday living, seeing a short bright light, and feeling of a change in atmospheric pressure. These effects may disorient/confuse subjects for a short time giving tactical teams the ability to apprehend that subject without using a higher level of force.

D. **Lifespan:**

The lifespan of the CTS 7290 Diversionary Device is 5 years.

E. **Use:**

The use of a diversionary device is to create a diversion in order to facilitate entry and enable arrest. Circumstances justifying the use of a diversionary device may include, but not limited to barricaded subject or hostage situations and high-risk search warrants services.

F. **How it Works:**

The main charge of a modern diversionary device typically contains flash powder which is sometimes called photoflash powder. Upon initiation, this chemical compound causes the device to deflagrate (not detonate). The powder mixture is

rapidly changed into gases that expand outward reaching upwards to 3,800 times the original volume of the charge itself. This process releases the desired effects of loud noise, bright light and the feeling of atmospheric pressure. Flash powder is typically made up of an oxidizer and some type of fuel. The oxidizer is needed to initiate and sustain the flash powder's rapid combustion. This is required since sufficient oxygen cannot be obtained from just the surrounding air.

(2) **Purpose:**

The purpose of a diversionary device is to create a reactionary gap of a person by temporarily disorienting them. This gap gives tactical teams an opportunity to apprehend a suspect while using the minimal amount of force possible. They can also be used to safely invoke a response or redirect the attention of subjects who are either feigning injury, ignoring police commands or are unresponsive while posing a threat to the public.

(3) **Fiscal Cost:**

A. **Initial Cost:**

Diversionary Devices cost approximately \$45 per unit and are purchased through LC Action Police Supply. Purchases for these tools are made when inventory becomes low, based upon critical incident usage and Special Response Team trainings that incorporate live devices.

B. **Cost of Use:**

The cost of each proposed use is unpredictable due to the unknown nature and timelines of dangerous barricade situations, critical incident, and hostage situations. The devices may be stored inside of the Police Department, in the Special Response Team Vehicle, or in the rescue vehicle. There are no additional storage costs. There are no associated costs for transporting, maintenance, training, or upgrades.

C. **Cost of Potential Advert Effects:**

Adverse effects of improper use of a diversionary device are not calculable. It could result in serious injury. Additionally, the improper use could result in civil liabilities.

D. **Annual and Ongoing Costs:**

See below training cost.

E. Training Cost:

Only trained and qualified personnel are permitted to deploy diversionary devices. These trained Berkeley Police officers are typically members of the Berkeley Police Department Special Response Team who receive monthly training which includes training in the deployment of diversionary devices. The cost of training is staff time.

F. Maintenance and Storage Costs:

The majority of diversionary devices are stored inside of a room in the basement within the Police Department. There are no additional storage costs. There are no associated costs to transporting, maintenance, or upgrades.

G. Upgrade Costs:

No upgrades exist for this equipment as of this report.

(4) Impact:

The Berkeley Police Department is committed to preserving and protecting human life and welfare. These tools allow us to fulfill our commitment to our community.

Diversionsary Devices may be utilized in many situations to include potentially dangerous barricaded subject situations, hostage situations, and critical incidents. Some criteria considered prior to a deployment is dependent upon whether the suspect is a dangerous felon, causes a life-threatening situation and/or other unique incidents where it appears to be a reasonable method in which to resolve the situation. When deployed appropriately these devices can assist in safely apprehending suspects and resolving high risk critical incidents with minimal or no injuries to suspects and/or officers.

(5) Mitigations:

Since Diversionsary Devices are considered low explosives, there are several protocols in place to mitigate possible negative results (i.e. minor or major injuries).

Only trained and qualified personnel are permitted to deploy diversionary devices; typically, members of the Special Response Team who receive constant training regarding the deployment, effects, and post deployment protocols.

Pre-deployment concerns are typically gathered and evaluated, such as:

- The number of people at a location and the individual location of suspects within the structure.

- Evaluation if there are children or elderly people present
- An evaluation of the suspect's mental and physical conditioning
- Evaluation of the building/room layout
- Possible combustible/flammable substances present
- Lighting conditions

When a diversionary device is deployed, the officer shall utilize a helmet, hearing protection, eye protection, body armor, and nomex (fire resistive) gloves.

If a diversionary device is used, a supervisor shall be notified, medical treatment/screening is conducted, and a collection of the deflagrated device is completed. Documentation utilizing the device serial number is recorded.

Per Policy 351 - Except in extreme emergencies (i.e., life-threatening situations), flash/sound diversionary devices shall not be used without prior authorization of the incident commander/on-scene supervisor. Whenever diversionary devices are carried by personnel in an actual situation or incident, that fact shall be noted in the after-action report or police report. In the event devices are deployed, the circumstances surrounding their deployment shall be fully described. The Chief of Police or his or her designee shall be responsible for reviewing any deployment of diversionary devices to ensure that policy was followed. Diversionary devices are registered by serial number with the Bureau of Alcohol, Tobacco, and Firearms (ATF). Typically, the police department's purchase of new devices is reported directly (by case-lot serial numbers) to ATF by the device manufacturer via ATF Form 5. The National Firearms Act requires the police department to notify ATF upon the use/expenditure of diversionary devices. A Special Response Team member shall be responsible for submitting written notification to ATF when all devices listed on a single ATF form 5 have been used/expended.

(6) Alternatives:

A possible alternative to a diversionary device (flashbang) is the Tactical Electronic Distraction Device (T.E.D.D.) which emits 2600 lumen light and high pitched 120 decibel sound to disorientate subjects. This could be a good tool as it is not a low explosive however it has its negative aspects as well:

- There is no feeling of atmospheric pressure, limiting the desired momentary physiological effect.
- A suspect could pick up and throw the device at potential victims and at police officers. The currently used diversionary devices are too hot to attempt this.
- In certain circumstances, a suspect could potentially steal the device during an escape.
- The individual cost per unit is approx. \$200 which is much more than a diversionary device
- This device is significantly less effective in disorienting subjects compared to a diversionary device.

(7) **Third Party Dependence:**

There is no third-party dependence for Diversionary Devices with the exception of communication with ATF of the purchase. Once they are purchased, they are secured within their designated locations where they are stored until they are either used during incidents or training.

Long Range Acoustic Device (LRAD)

(1) **Description:**

A. **Background:**

The Long-Range Acoustic Device (LRAD) is a high intensity directional acoustical array for long range, crystal clear notification system. The use of the LRAD is for communications.

B. **Quantity:**

The Berkeley Police Department possesses 2 Long Range Acoustic Devices (LRAD) speakers. One is an LRAD 450XL and the other is an LRAD 100X.

C. **Capability:**

Both of these speakers are able to focus sound in directional pattern allowing the user to make sound audible over distances much greater than conventional public address speakers. The LRAD 450XL is the larger of the two and designed to either be used in a fixed location or mounted on a vehicle to make it portable. It

has a usable range of approximately 1 mile. The LRAD 100X is smaller and more portable. It can be carried or mounted to a person's chest for mobility or mounted to a vehicle. Its range is approximately 1/3 of a mile. Both of these systems allow for clear long-range communication, they are also able to play recorded messages.

D. Lifespan:

The lifespan for both LRADs is 25 years.

E. Use:

The LRADs are used to communicate with the community during natural disasters, crowd management and control situations, or when other forms of communications are ineffective or inoperable to unequivocally communicate messages from Police or Fire and safely resolve uncertain situations where communicating with the public is paramount.

F. How it Works:

The LRADs are essentially a long-range speaker or long-range megaphone and operates as such.

(2) Purpose:

The LRADs are designed for clear long-range communication. The LRAD's ability to communicate over a long distance is far superior to any megaphone or Public Address (PA) system mounted to a police vehicle. Additionally, LRAD's may be used to:

- Communicate lifesaving information to residents during disasters
- Communicate to large crowds during parades, festivals, concerts and sporting events
- Establish safety zones and perimeters
- Control traffic congestion
- Conduct Special Response Team operations
- Broadcast a dispersal order
- Communicate during hostage and barricaded subject situations
- Announce and serve high risk warrants
- Communicate to protesters
- Communicate to persons threatening suicide who are in an inaccessible location
- Conduct search and rescue operations

The ability to communicate with the public in a large area increases the safety of all members of the public and law enforcement. It allows everyone in a given area to know what is being communicated, gives more situational awareness to everyone in a given area and allows people to know where to go or not to go.

(3) **Fiscal Cost:**

A. **Initial Cost:**

The LRAD 450XL and the LRAD 100X were purchased in 2018. The total cost for both LRADs, rechargeable battery packs and accessories was \$49,999.

B. **Cost of Use:**

There is no cost associated with each use of the LRADs. The systems run on batteries or can plug into a vehicle.

C. **Cost of Potential Adverse Effects:**

Adverse effects of improper use of the LRADs are not calculable. It could lead to hearing loss. Additionally, the improper use could result in civil liabilities.

D. **Annual and Ongoing Costs:**

BPD has not incurred any additional cost to date for this equipment.

E. **Training Costs:**

Training is conducted by Berkeley Police personnel who are trained in the use and procedures of the LRAD. The cost to train is staff time.

F. **Maintenance and Storage Costs:**

There are no maintenance or storage costs for this equipment.

G. **Upgrade Costs:**

No upgrades exist for this equipment as of this report.

(4) **Impact:**

The Berkeley Police Department is committed to ensuring the safety of our community. Having the ability to communicate efficiently and effectively in different situations is crucial in providing potentially life-saving information to the public. The LRAD provides BPD personnel the ability to communicate long distances to people that are in a given area, inside structures, or barricaded inside a structure. The LRAD is very effective any situation involving communicating information to large crowds, or entire communities.

(5) **Mitigations:**

The only potential negative impact of the LRAD's is that they are capable of producing a high pitched "deterrent tone" that is designed to disperse a potential threat. This "deterrent tone" does have the ability to cause hearing damage. BPD Policy 707 strictly prohibits any member of BPD from using the LRAD as a weapon. Additionally, the LRAD can only be deployed at the direction of a Watch Commander or Incident Commander and may only be used by personnel specifically trained in the use of the LRAD.

(6) **Alternatives:**

BPD is not aware of any other sound speakers that are able to clearly communicate over long distances of up to 1 mile.

(7) **Third Party Dependence:**

To date, BPD has not depended on any third party for the use or maintenance of this equipment.

36" Baton

(1) **Description:**

A. **Background:**

The Berkeley Police Department issues a knurled grip, polycarbonate, fixed-length straight baton for crowd control purposes. The baton is 36" long and 1.25" in diameter and weighs about 1.64 pounds. Polycarbonate is a thermoplastic, which means it is durable, resistant to splintering and heat.

B. **Quantity:**

In 2017, BPD purchased 175 polycarbonate 36" batons to replace aging wood batons of the same purpose. Additional polycarbonate batons were purchased over the past four years to ensure all sworn police officers as well as trained reserve police officers are equipped with the 36" baton. BPD possesses approximately 195 - 36" polycarbonate batons. Most of these batons are issued to and maintained by individuals. However, a small amount of these batons is stored in a secure equipment room as spares in case of damage or new personnel issue.

C. Capabilities:

The 36" baton is carried in a "baton ring" on an officer's belt just as any other baton. It is used as a safety tool and is a means for officers to defend themselves in certain crowd control or riot situations. Trained officers may employ particular applications of force with their 36" batons when directed by their chain of command. The 36" baton is the desirable baton in a crowd control situation as it is 7" longer than the standard 29" baton. The longer baton creates more distance between the officer and others, which is critical when dealing with violent or aggressive crowds.

D. Lifespan:

The manufacturer provides a lifetime repair or replacement guarantee.

E. Use:

The 36" baton is a less-lethal force tool and is intended to be used in crowd control situations in close quarters, where officers may defend an attack, or when engaging in physical contact with combative or aggressive crowd members. The 36" baton is only used for crowd situations.

F. How it Works:

There are a number of appropriate blocking or striking techniques an officer may use when force is justified and the decision is made to use the 36" baton to effectively gain control of a person or situation. The use of the baton requires the officer to continually monitor and assess effectiveness of any delivered strikes. The reason this type of force is administered is to stop a person's attack, threat or resistance, with the goal to place them under lawful arrest for their actions.

(2) Purpose:

The 36" baton is a less-lethal tool that may be used when a crowd becomes aggressive, hostile or violent. It is the most effective individual tool of choice when officers are in formation and engaged in crowd control duties.

When officers are deployed to maintain, disperse, or protect others from a violent crowd or civil disobedience, it is imperative that they have an adequate safety zone to protect themselves or others. The 36" baton provides officers additional distance from a potential threat than the standard issue 29" baton.

When the baton is used to strike a subject, kinetic energy transfer occurs. Kinetic energy is the energy of motion. The amount of translational kinetic energy which an object has depends upon two variables: the mass of the object and the speed of the

object. The desired effect is for the officer to apply a baton strike with the necessary energy to stop the threat as quickly and safely as possible. By targeting the large muscle areas of the arms or legs with sufficient kinetic energy, motor and sensory nerves can be affected. When the nerves are affected this will create momentary muscle dysfunction or pain, which will allow the officer the ability to gain control of the subject, while minimizing the possibility of long-term injury to the subject.

The head, neck, throat, spine, heart, kidneys and groin should not be intentionally targeted except when the person's conduct is creating an immediate threat of serious bodily injury or death to an officer or any other person as outlined in policy 303 and 300.

(3) Fiscal Cost:

A. Initial Cost:

The cost of the Monadnock MP36 2004 36" polycarbonate baton with knurled grip was \$53.00 per baton in September 2017. After tax, \$10,132.94 was spent for the purchase of 175 batons. The department placed an additional order for 20 batons in December 2019. It is anticipated that the cost of the baton will fluctuate a few dollars based on supply and demand over time.

B. Cost of Use:

The only cost associated with use that of ongoing departmental training to ensure officers are proficient in authorized baton techniques.

C. Costs of Potential Adverse Impacts:

Adverse effects from improper use of the 36" baton cannot be anticipated. Improper use could lead to serious bodily injury or death. Additionally, the improper use could result in civil liabilities.

D. Annual and Ongoing Costs:

There is no additional annual or ongoing cost associated with the 36" baton.

E. Training costs:

Training on the applications of the batons are conducted at the police academy. Police Office Standard Training (POST) requires "arrest and control" training every 2 years which includes portions of baton training. This training is conducted in-house by POST certified defensive tactics instructors.

F. Maintenance and Storage Costs:

There are no associated costs to transporting, maintenance, or upgrades.

G. Upgrade Costs:

No upgrades exist for this equipment as of this report.

(4) Impact:

Per Policy 300, “The Berkeley Police Department’s highest priority is safeguarding the life, dignity, and liberty of all persons. The Department is committed to accomplishing this mission with respect and minimal reliance of the use of force by using rapport-building communication, crisis intervention, and de-escalation tactics before resorting to force.”

At times, it may become necessary for police officers to use force in crowd control situations to move a crowd, stop violent behavior, overcome resistance or make a lawful arrest. Officers have been trained that they must do everything possible to avoid unnecessary uses of force, and minimize the force that is used, while still protecting themselves and the public. When deemed necessary, use of the 36” baton may be used as a tool to strike a person, create a barrier or used in formation in order to move a crowd in a certain direction. The use of the baton may cause discomfort, pain, blunt trauma and has the potential to cause serious injury. Their use is subject to the totality of the circumstances, proper training, department policy, as well as federal and state law.

Officers who use the 36” baton are trained to continuously assess each situation where force is used and only use the force that is reasonably necessary and proportional to respond to the threat or resistance to effectively and safely resolve the incident.

(5) Mitigations:

Per Policy 300, “In all cases where physical force is used, officers shall use a minimum amount of force that is objectively reasonable, objectively necessary, and proportional to effectively and safely resolve a conflict.”

Per Policy 303, “Only officers who have successfully completed department-approved training in the use of any control device are authorized to carry and use the device. Control devices may be used when a decision has been made to control, restrain or arrest a subject who is violent or who demonstrates the intent to be violent, and the use of the device appears reasonable under the circumstances. When reasonable, a verbal warning and opportunity to comply should precede the use of these devices. When using control devices, officers should carefully consider potential impact areas in order to minimize injuries and unintentional targets.”

Every officer who carries a 36” baton has been trained how to properly carry the equipment, it’s intended use, target areas and non-target areas. Large muscle groups such as the upper legs or lower abdomen are approved target areas and areas to be avoided at the groin and head. When a baton strike is directed at an intended target area and the subject moves simultaneously, it is possible for the officer to unintentionally strike a non-target area. Officers are trained to consider the placement of baton strikes, and to immediately render medical aid to the subject as soon as it is safe to do so.

All uses of force require documentation that is completed by the supervisor in a use of force report and reviewed by the Chain of Command. Furthermore, all deployments of equipment outlined in the Police Equipment and Community Safety Ordinance are documented according to the reporting requirements as mandated in the ordinance.

(6) **Alternatives:**

The alternatives to the 36” crowd control baton are the 29” standard issue baton and collapsible 26” Rapid Containment Baton (RCB). The standard issue baton and RCB are shorter in length and require officers to be closer to the person they are engaging, thereby increasing the risk of injury to the officer and the person. A longer baton provides an officer with more distance which creates a small safety zone and allows the officer time to react and assess the situation before making use of force decisions.

(7) **Third Party Dependence:**

There is no requirement for a third-party service provider to issue the 36” crowd control baton. Berkeley Police Department Defensive Tactics Instructors provide in-house training on the proper use of the baton.

Mobile Command Vehicle

(1) **Description:**

A. Background

The Berkeley Police Department owns one Mobile Command Vehicle (MCV). Our MCV is a 2003 Freightliner MT55. This vehicle’s most common use is as a commercial delivery vehicle. Our 2003 Freightliner MT55 was converted into a MCV by adding desktop work stations, additional police radios and emergency lighting. The MCV is 30’ long and has a gross vehicle weight (GVW) of approximately 23,000 pounds.

B. Quantity:

The Berkeley Police Department owns 1 MCV.

C. Capability:

The MCV is a mobile office that provides shelter and may be used as a mobile command and communication center.

D. Lifespan:

This vehicle is approximately 20 years old and is at the tail end of its serviceable lifespan. All emergency vehicles need to be completely dependable and vehicles of this age start to lose dependability as old parts start to fail without warning. The modern versions of this type of vehicle are typically converted motorhomes.

E. Use:

This vehicle is used as a mobile command post for large scaled events.

F. How it Works:

This vehicle operates and drives like other vehicles.

(2) Purpose:

This vehicle may be used as a mobile command post for any larger scaled events or as a communications center in the event the communications center in the Public Safety Building is inoperable. Some examples of large-scale events include Solano Stroll, Juneteenth, 4th of July, critical incidents or natural disasters.

(3) Fiscal Cost:

A. Initial cost:

The initial cost of the MCV (2003 Freightliner MT55) was \$230,800.

B. Cost of Use:

The cost of use is the cost of fuel from the City Corporation Yard.

C. Cost of Potential Adverse Effects:

Adverse effects of improper use of the MCV are not calculable, but is the same as improper use of any vehicles. The improper use could result in civil liabilities.

D. Annual and Ongoing Costs:

There is no annual or ongoing cost associated with this vehicle. Maintenance of the vehicle is conducted by the City's Corporation Yard.

E. Training Costs:

Training is conducted in-house by Berkeley Police personnel who are trained in the operation of the vehicle. The training cost is staff time.

F. Maintenance and Storage Costs:

There are no storage costs and maintenance would be conducted by the City of Berkeley Corporation Yard.

G. Upgrade Cost:

The MCV is almost 20 years old and upgrades would involve replacing different parts of the vehicle. This work would be conducted by the City of Berkeley's Corporation Yard. The cost would be staff time plus the cost of any necessary parts.

(4) Impact:

The MCV is used as a command post for any large scaled event. It works as a mobile central location where resources can stage and be deployed from. It provides the police department with on-site command, supplying a control and communications hub that is needed for large community events, or critical incidents such as natural disasters in order to maintain public safety.

(5) Mitigations:

The MCV shall only be operated by trained personnel that have demonstrated proficiency in the operations of this vehicle per Berkeley Police Department Policy 811.

(6) Alternatives:

The MCV is almost 20 years old. Current MCV from other agencies are large mobile homes converted into MCVs.

(7) Third Party Dependence:

All maintenance is completed through the Cities Corp Yard so there is no dependence on a third party.

Barrett Model 99 Rifle

(1) Description:

A. Background:

The Barrett Model 99 rifle is a single shot bolt-action 50-caliber rifle first

introduced in 1999. It is intended to be used in emergency situations where there is a high potential for violence.

B. Quantity:

Berkeley Police Department Special Response Team (SRT) currently possess 1 (one) of these rifles and is not looking to purchase any others.

Currently BPD has approximately 100 Summit Ammunition .50-caliber BNG rounds.

C. Capability:

This rifle is used only in situations where a potential life-threatening situation exists. The length of the rifle's barrel coupled with the ammunition result in precision accuracy. This rifle is capable of disabling any vehicle engine block because of the large caliber round.

D. Lifespan:

This rifle has been in our possession for almost 15-years and we expect it to last for an additional 20 years or more considering how in-frequently it's used.

E. Use:

This rifle is used primarily in emergency situations where a life-threatening situation exists, necessitating a vehicle to be disabled.

F. How it Works:

This is a bolt-action rifle that fires one round at a time and needs to be reloaded by hand after each round. The Barrett Model 99 rifle works similar to all modern bolt-action rifles. When the trigger is pressed, a firing pin strikes the primer of a bullet loaded into the chamber of the rifle. The ignited primer ignites gun powder contained in the bullet which pushes the bullet down the barrel and out the muzzle. The operator pulls the bolt back, ejecting the spent cartridge. The operator then loads another bullet into the breach, pushes the bolt forward, and closes the chamber, making the rifle ready to fired again.

(2) Purpose:

The Barrett rifle is a firearm that may be used to stop a vehicle which poses a lethal threat to the public, or to disable a vehicle which presents a threat to the safety of another person(s) by its continued use. There are vehicle disabling tools that may disable vehicles by slowly deflating the tires; however, even with tires deflated a vehicle has the ability to operate and remain a threat to the public. Furthermore,

these tools must be hand deployed and, in most circumstances, require officers to expose themselves to deadly threats. The Barrett rifle creates the ability to effectively disable vehicles instantaneously from a distance away.

(3) **Fiscal Cost:**

A. **Initial Cost:**

The Barrett Model 99 50-caliber rifle has a retail cost of approximately \$12,500 dollars. The Department of Justice provided the Barrett rifle to the Berkeley Police Department on 04/04/2007. There was no initial cost related to BPD taking possession of it.

B. **Cost of Use:**

The costs associated with its proposed uses is in the expenditure of its ammunition. The ammunition has a retail cost of approximately \$6 dollars per bullet; \$60 for a box of 10 and \$600 for a case of 10 boxes, plus shipping and handling. We currently possess 100 rounds of BMG ammunition.

C. **Cost of Potential Adverse Effects:**

Adverse effects of improper use of a firearm are not calculable. It could lead to the loss of life or serious injury. Additionally, the improper use could result in civil liabilities.

D. **Annual and Ongoing Costs:**

The annual cost of the equipment is minimal and includes ammunition expenditure, cleaning equipment, and possibly replacing the optics at some point in the future.

E. **Training Costs:**

The cost associated with training is the staff time, range fees, and cost of spent ammunition.

F. **Maintenance and Storage Costs:**

Maintenance costs vary depending on use over time and will vary. There are no costs associated with maintenance or storage of ammunition. All ammunition is stored in a climate-controlled room in the Berkeley Police Department.

G. **Upgrade Costs:**

Improvements in technology and new designs may be an additional cost but we can't predict what those will be at this time.

Should advancements be made in ammunition manufacturing; those upgrade costs are unknown at this time.

(4) **Impact:**

The Berkeley Police Department is committed to preserving and protecting human life and welfare. The Barrett rifle is a firearm the department would primarily use to stop a vehicle which poses a lethal threat to the public or used to disable a vehicle that presents a threat to the safety of another person(s) by its continued use.

The Barrett rifle is intended as a tool to increase the safety and welfare of community members and officers alike.

The Barrett rifle has minimal or no impact on civil rights or civil liberties as it will only be deployed in very specific situations, by very select members of the SRT. This is not a piece of equipment that is carried by an officer on routine patrol, and is highly unlikely that any members of our community would ever see this equipment due to its very selective use in the most critical of instances.

(5) **Mitigations:**

Only four BPD members are authorized to utilize this rifle. Authorized members are trained in its use as well as the very specific and limited circumstances where this equipment would be utilized.

(6) **Alternatives:**

There is no other alternative tool or asset available that could accomplish the same goal of this rifle. An alternative rifle to the Barrett model 99 is a different rifle of equal capability, such as a Lapua .338 caliber rifle.

(7) **Third Party Dependence:**

These rifles are simple in their design and operation. They do require regular maintenance which is performed by an SRT Team Leader. If an issue arises which is beyond the scope of our Armorers we would seek manufacturer assistance. However, the need for this is expected to be very rare.

Appendix:

Applicable Lexipol Policies Respective to Each Equipment

M4 rifle/Patrol Rifle

- Policy 300 (Use of Force)
- Policy 349 (Tactical Rifle Operator Program)

Penn Arms 40MM launcher

- Policy 300 (Use of Force)
- Policy 303 (Control Devices and Techniques)

Milkor LTL multi-launcher

- Policy 300 (Use of Force)
- Policy 303 (Control Devices and Techniques)

FN 303 Launcher & FN Pava rounds

- Policy 300 (Use of Force)
- Policy 303 (Control Devices and Techniques)

Chlorobenzylidene Malononitrile and Oleoresin Capsicum (canister and spray)

- Policy 300 (Use of Force)
- Policy 303 (Control Devices and Techniques)

Remington 700 Rifle

- Policy 300 (Use of Force)
- Policy 354 (Precision Rifle)

ReconRobotics Recon Scout XT Robots & Andros Remotec HD-1 Hazardous Duty Robot

- Policy 708 (Robot Cameras)

Light/Sound Diversionary Device

GUIDELINES FOR RELEASE OF REPORTS AND INFORMATION THEREIN

General Policy Statement Regarding Release Of Police Reports To The Public and the Police Accountability Board (PAB):

It shall be the general policy of the Police Department to release a copy of a police report to any member of the public or the PAB, unless the release of the report, or a part of the report, or the information in the report would: (1) endanger a person; (2) endanger the successful completion of the investigation or a related investigation; (3) constitute an unwarranted invasion of privacy as defined in this Policy; or, (4) is prohibited by law.

A release of a police report to a City department, such as the City Attorney’s office, the Office of Transportation, or the City Manager’s office, is not a release to the public and is not governed by this Policy.

NAMES AND ARRESTEE INFORMATION			
Subject	Release	No Release Reason	Further Direction
Adult arrestee’s <u>name</u> , occupation, physical description including date of birth, color of eyes and hair, sex, height and weight, the time and date of arrest, the time and date of booking, the location of the arrest, the factual circumstances surrounding the arrest, the amount of bail set, the time and manner of release or the location where the individual is currently being held, and all charges the individual is being held on, including any outstanding warrants from other jurisdictions and parole or probation holds.	Yes, release of this information is required by law, unless the release would: (1) endanger a person’s safety; or, (2) endanger the successful completion of the investigation or a related investigation. [Government Code §6254(f)(1)]		

GUIDELINES FOR RELEASE OF REPORTS AND INFORMATION THEREIN

NAMES AND ARRESTEE INFORMATION (continued)			
Subject	Release	No Release Reason	Further Direction
Adult suspect <u>name</u> (e.g., when suspect not arrested)	<p>No to general public, but yes to the general public, if the adult suspect's name was already released to the public through the PRC process.</p> <p>Release is also authorized to assist in specific public safety effort, such as locating the suspect.</p>	Unwarranted invasion of privacy.	<p>For PRC to investigate, when relevant to a PRC investigation, the PRC shall get the name of an adult suspect, if ALL of the following conditions apply: (1) the release will not endanger a person's safety; (2) the release will not endanger the successful completion of the investigation or a related investigation; and, (3) the release will not result in the release of highly personal information of a very sensitive nature such as sex crimes information, suicide, or mental health information.</p> <p>With respect to this third category, if the only person affected is the requesting party, and the person has filed a complaint with the PRC, then this information can be released to the PRC.</p>
Juvenile arrestee <u>name</u> and Juvenile suspect <u>name</u>	No. The entire report cannot be released without a Court Order, except that the juvenile's name and address information may be released to the victim, or his/her representative, after the criminal case against the juvenile suspect/arrestee is final in Juvenile Court, but only if the victim is seeking damages in civil court.	Release prohibited (except in limited circumstance noted) by Alameda County Court Order, dated 4/7/1995; Welfare & Institutions Code §§ 601 and 602; [TNG v. Sup. Ct.]	Prior to release to victim, confirm status of case is no longer active in Juvenile Court.

GUIDELINES FOR RELEASE OF REPORTS AND INFORMATION THEREIN

NAMES AND ARRESTEE INFORMATION (continued)			
Subject	Release	No Release Reason	Further Direction
Adult and juvenile victim <u>name</u> .	<p>No, if there is an active criminal case pending or a criminal case is likely to be filed, the name of the victim should not be released. [Penal Code §964]</p> <p>If no criminal case is pending or likely to be filed, then:</p> <p>Yes, release of a victim's name is required by law, unless the release of the adult victim's name would: (1) endanger a person's safety; (2) endanger the successful completion of the investigation or a related investigation; or (3) the victim of one of the crimes listed in GC §6254(f)(2) (e.g., sex crimes, domestic violence, stalking or hate crime) has been asked and has requested or, if a juvenile victim, his or her parent or guardian has requested, that his or her name be kept confidential. [GC §6254(f)(2).]</p>	<p>PC §964 sets forth certain restrictions on the release of a victim's name if a criminal case is pending.</p>	

GUIDELINES FOR RELEASE OF REPORTS AND INFORMATION THEREIN

NAMES AND ARRESTEE INFORMATION (continued)			
Subject	Release	No Release Reason	Further Direction
<p>Adult or juvenile witness or “other party” <u>name</u>; an “other party” is a person who is not an arrestee, suspect, or witness.</p>	<p>No, if there is an active criminal case pending or a criminal case is likely to be filed, the name of the witness (or other party) should not be released. [PC §964]</p> <p>If no criminal case is pending or likely to be filed, then, for an adult witness name:</p> <p>Yes, unless release of the adult witness name would: (1) endanger a person’s safety; (2) endanger the successful completion of the investigation or a related investigation; or, (3) result in the release of highly personal information of a very sensitive nature such as sex crimes information, suicide, or mental health information.</p> <p>Note: The name of a juvenile witness will not be disclosed to the general public, unless it has already been disclosed through the PRC process. The name of a juvenile witness will only be disclosed to the PRC, if the parent or guardian consents to the disclosure.</p>	<p>Protection of witness and potential witnesses; PC §964 sets forth certain restrictions on the release of a witnesses’ name if a criminal case is pending</p>	<p>If the PRC requests the name of a witness, the name can only be disclosed if: (1) there is no active criminal case pending or a criminal case is likely to be filed; (2) the release of the name would not endanger a person’s safety; and, (3) the release of the name would not endanger the successful completion of the investigation or a related investigation. In addition, if the witness is a juvenile, the parent or guardian must consent to the disclosure to the PRC.</p>

GUIDELINES FOR RELEASE OF REPORTS AND INFORMATION THEREIN

PHONE NUMBERS			
Subject	Release	No Release Reason	Further Direction
Phone number of person whose name IS released under this Policy	No, to general public, but yes to the general public, if the phone number was already released to the public through the PRC process.	Unwarranted invasion of privacy.	For PRC to investigate, PRC shall get the phone number of any adult person whose name is released to the PRC. However, if the person whose name is released is a juvenile, the phone number will not be released to the PRC without the consent of the juvenile's parent or guardian.
Phone number of any person whose name is NOT released under this Policy	No.	Unwarranted invasion of privacy.	

ADDRESS INFORMATION			
Subject	Release	No Release Reason	Further Direction
Adult arrestee <u>address.</u> Adult suspect <u>address</u> Adult/juvenile victim <u>address.</u> Adult/juvenile witness <u>address.</u> Adult/juvenile "other party" <u>address.</u>	No, if the <i>name</i> is not released under this Policy and/or applicable law. In cases in which the <i>name</i> is released: No, to general public, but yes to the general public: if the person's address was already released to the public through the PRC process.	Unwarranted invasion of privacy	For PRC to investigate, when relevant to a PRC investigation, PRC shall get the address of an adult arrestee, or adult suspect, or any victim, witness, or other party, but only if ALL of the following conditions apply: (1) the PRC obtained the name from BPD under this Policy; (2) the person has no working telephone number; (3) the release will not endanger a person's safety; (4) the release will not endanger the successful completion of the investigation or a related investigation; [cont.]

GUIDELINES FOR RELEASE OF REPORTS AND INFORMATION THEREIN

ADDRESS INFORMATION (continued)			
Subject	Release	No Release Reason	Further Direction
			<p>and, (5) the release will not result in the release of highly personal information of a very sensitive nature such as sex crimes information, suicide, or mental health information.</p> <p>In the case of a juvenile victim, juvenile witness, or juvenile other party, in addition to the above conditions, the address shall not be released to the PRC without consent of the juvenile's parent or guardian.</p> <p>Juvenile arrestee and juvenile suspect addresses are not releasable to the PRC. See below.</p>
<p>Juvenile arrestee <u>address</u> and Juvenile suspect <u>address</u>.</p>	<p>No. The entire report cannot be released without a Court Order, except that name and address information may be released to the victim or his or her representative after the criminal case against the juvenile suspect/arrestee is final in Juvenile Court, but only if the victim is seeking damages in civil court.</p>	<p>Release prohibited (except in limited circumstance noted) by Alameda County Court Order dated 4/7/1995; WIC §§601, 602. [TNG v. Superior Court]</p>	<p>Prior to release to victim confirm status of case is no longer active in Juvenile Court.</p>

GUIDELINES FOR RELEASE OF REPORTS AND INFORMATION THEREIN

OTHER PERSONAL INFORMATION			
Subject	Release	No Release Reason	Further Direction
Date of birth of <u>non</u> -arrestee. (Date of birth of arrestee is required by law to be released. See above)	No.	Unwarranted invasion of privacy and potential identity theft.	As an alternative, release victim, witness, or suspect's age.
CDL, Social Security #, Bank Account #.	No.	Unwarranted invasion of privacy and potential identity theft.	
Vehicle license plate numbers.	No.	Unwarranted invasion of privacy.	
Medical treatment records.	No, unless a person is requesting his or her own medical records, or the person whose medical records are being requested has signed an authorization for the release of the medical records to the requesting party.	Civil Code §56, et seq. provides that medical records are to be kept confidential; WIC §5328 provides that WIC §5150 records (such as the Berkeley Mental Health staff person's report re a WIC §5150) are confidential. Note: An officer's report re a WIC §5150 call is not a medical treatment record; it is a police report. Information provided by a medical treater noted in a police report is not a medical treatment record, but it should be deleted as an unwarranted invasion of privacy if it is highly sensitive information such as information involving sex crimes, suicide, or mental health.	Medical records can be given to the PRC if the person whose medical records are being requested has signed an authorization for the release of the medical records to the PRC. Alternatively, a person can obtain his or her own medical records held by BPD, if any, directly from BPD, and then give them to the PRC.

GUIDELINES FOR RELEASE OF REPORTS AND INFORMATION THEREIN

MUG SHOTS			
Subject	Release	No Release Reason	Further Direction
PFN photos taken by BPD (mug shots.)	Yes, unless release would: (1) endanger a person's safety; or, (2) endanger the successful completion of the investigation or a related investigation.		Obtain Detective Bureau approval for release in all criminal cases.
PFN photos taken by another agency.	No, unless release is made for a public safety purpose.	Policy decision.	Obtain approval from Office of the Chief.

THE POLICE REPORT NARRATIVE, STATEMENTS, DIAGRAMS, PHOTOS, AND COMMUNICATION TAPE			
Subject	Release	No Release Reason	Further Direction
Oral (paraphrased) and written statements from victims, witnesses, and suspects. Investigative narrative. Diagrams. Evidence list.	Yes, unless release would: (1) endanger a person's safety; (2) endanger the successful completion of the investigation or a related investigation; or, (3) result in the release of highly personal information of a very sensitive nature such as sex crimes information, suicide, or mental health information. With respect to this third category, if the only person affected is the requesting party, and the person has filed a complaint with the PRC, then this information can be released to the PRC.		

GUIDELINES FOR RELEASE OF REPORTS AND INFORMATION THEREIN

THE POLICE REPORT NARRATIVE, STATEMENTS, DIAGRAMS, PHOTOS, AND COMMUNICATION TAPE (cont.)			
Subject	Release	No Release Reason	Further Direction
Evidence photographs.	<p>Yes, unless release would: (1) endanger a person's safety; (2) endanger the successful completion of the investigation or a related investigation; or, (3) result the release of highly personal information of a very sensitive nature such as the condition of person's body or a corpse.</p> <p>With respect to this third category, if the only person affected is the requesting party, and the person has filed a complaint with the PRC, then this information can be released to the PRC.</p>		
Communications center audio tapes	<p>Yes, unless release is prohibited under PC §964 (pending criminal case), or release results in an unwarranted invasion of a citizen's privacy.</p> <p>No, as to continuing police radio communications in lengthy incidents occurring more than one hour after the incident first started.</p>	Unwarranted invasion of citizen's privacy and undue burden on staff.	For PRC to investigate, PRC shall get the tapes. However, if witness or victim information is not releasable to the PRC under this Policy or by law (e.g., PC §964), then that information must be deleted. Also, if the tape contains highly personal information of a very sensitive nature such as a victim screaming as she is violently assaulted or killed, such segments shall be deleted before release to the PRC, unless the only person affected is the requesting party, and the person has filed a complaint with the PRC.

GUIDELINES FOR RELEASE OF REPORTS AND INFORMATION THEREIN

THE POLICE REPORT NARRATIVE, STATEMENTS, DIAGRAMS, PHOTOS, AND COMMUNICATION TAPE (cont.)			
Subject	Release	No Release Reason	Further Direction
Investigative techniques: Trackers, undercover, surveillance locations, 'Johns'/decoy, tactics, interview tactics.	No.	Evidence Code §§1040-1042	
Confidential informant's name or identifying information.	No.	EC §§1040-1042	If the report uses "x" to refer to the confidential informant, release is permitted as no identifying information is included.
Complete, unredacted police report in ID theft (PC530.5) cases.	Yes, to victim only (PC §530.6(a)).		

CRIMINAL HISTORY INFORMATION			
Subject	Release	No Release Reason	Further Direction
PFN Number.	No.	Unwarranted invasion of privacy.	
Criminal history: Actual RAP sheet or actual RMS print-out for an individual.	No. However, local criminal history information contained in the RMS print out must be released to the subject of that information, if requested by the subject. [PC §13330(b)(11)]	PC §§11075, 11076, 11105 and 13300.	Okay to release serious felony conviction information only to Housing Authority managing Section 8 program.
Limited criminal history: Fact of prior crime or similar arrests relevant to the investigation, or relevant to the arrest charge, such as felon with a gun.	Yes. Although this information may be contained within a Rap sheet, it can be disclosed as a relevant part of a single police report, which in itself is not a Rap sheet. It can also be disseminated to the public generally for the purpose of assisting in the apprehension of a wanted person. [PC §13305]		

GUIDELINES FOR RELEASE OF REPORTS AND INFORMATION THEREIN

CRIMINAL HISTORY INFORMATION (continued)			
Subject	Release	No Release Reason	Further Direction
Information taken out of CLETS.	No.	CLETS "Policies, Practices & Procedures" provides that CLETS information (which includes DMV) is confidential and for OFFICIAL USE ONLY.	
Probation or parole hold on an arrestee.	Yes. Release of this information is required by law, unless the release of the probation or parole hold on the arrestee would: (1) endanger a person's safety; or, (2) endanger the successful completion of the investigation or a related investigation. [GC §6254(f)(1)]		
Probation or parole status when it is related to the investigation or arrest charge.	Yes, unless release of the arrest charge or investigation would: (1) endanger a person's safety; or, (2) endanger the successful completion of the investigation or a related investigation.		
Probation or parole, general status when there is no "hold" and it is not related to the investigation or arrest charge, and it is not being disclosed for a public safety purpose.	No.	PC §§11075, 11076, 11105 and 13300.	

GUIDELINES FOR RELEASE OF REPORTS AND INFORMATION THEREIN

OPEN AND CLOSED INVESTIGATIONS, HOMICIDE REPORTS			
Subject	Release	No Release Reason	Further Direction
Open, Suspended, and Closed investigations.	<p>Yes, unless release would: (1) endanger a person’s safety; (2) endanger the successful completion of the investigation or a related investigation; or, (3) result the release of highly personal information of a very sensitive nature such as sex crimes information, suicide, or mental health information.</p> <p>With respect to this third category, if the only person affected is the requesting party, and the person has filed a complaint with the PRC, then this information can be released to the PRC.</p>		<p>Obtain approval from effected Detective Bureau unit prior to release, if a criminal prosecution is still possible.</p> <p>For homicide reports, obtain approval from Homicide Unit and Custodian of Records prior to release.</p>

SPECIAL POLICE REPORTS			
Subject	Release	No Release Reason	Further Direction
Juvenile arrest or juvenile suspect reports.	No. The entire report cannot be released without a Court Order, except that the name and address information may be released to the victim or his or her representative after the criminal case against the juvenile suspect/arrestee is final in Juvenile Court, but only if the victim is seeking damages in civil court.	Release prohibited (except in limited circumstance noted) by Alameda County Court Order dated 4/7/1995; WIC §§601 and 602. [TNG v. Superior Court]	Prior to release to victim confirm status of case is no longer active in Juvenile Court.
Child abuse reports.	No.	PC §§11167 and 11167.5.	
Elder abuse reports.	No.	WIC §15633 prohibits release.	
Vehicle collision reports.	No, except to persons authorized in VC §20012.	VC §20012 limits the release of collision reports to certain interested parties.	

GUIDELINES FOR RELEASE OF REPORTS AND INFORMATION THEREIN

SPECIAL POLICE REPORTS (continued)			
Subject	Release	No Release Reason	Further Direction
Reports from other agencies.	No.	Policy decision.	

REQUESTS BY UNINVOLVED PARTIES, VICTIMS, AND SPECIAL REQUESTS			
Subject	Release	No Release Reason	Further Direction
Can an uninvolved party obtain a police report?	<p>Uninvolved parties will have access to the same information as involved parties, except in the following three situations:</p> <p>(1) in compliance with Alameda County Superior Court Juvenile Court Order dated 4/7/95 (release certain information to victim only in juvenile cases in certain circumstances, except if it will endanger a person or investigation);</p> <p>(2) in accordance with GC §6254(f) (may withhold from an uninvolved party certain information releaseable to a victim of a misdemeanor or felony crime); and,</p> <p>(3) pursuant to VC §§16005 and 20012 (release to involved parties only re: collision reports.)</p> <p>A release of information to a crime victim, involved party, or their representative, under these three circumstances does not modify otherwise applicable rules regarding release to others.</p>		

GUIDELINES FOR RELEASE OF REPORTS AND INFORMATION THEREIN

REQUESTS BY UNINVOLVED PARTIES, VICTIMS, AND SPECIAL REQUESTS (continued)			
Subject	Release	No Release Reason	Further Direction
<p>Can a victim of a misdemeanor or felony (but not an infraction), or their agent or insurance company, obtain a police report?</p>	<p>In part. Release of the following information to the victim (or their agent or insurer) is required under Government Code section 6254(f), except where: the release is prohibited by law (e.g., certain juvenile cases (see above)); is witness information in pending criminal cases; the release would endanger a person's safety; or, impede the successful completion of the investigation or a related investigation:</p> <ul style="list-style-type: none"> (1) names and addresses of persons involved in the incident; (2) names and addresses of witnesses (other than confidential informants) to the incident; (3) description of any property involved; (4) date, time and location of the incident; (5) statements of parties involved in the incident; (6) statements of witnesses (other than confidential informants); and, (7) all diagrams. 		

GUIDELINES FOR RELEASE OF REPORTS AND INFORMATION THEREIN

REQUESTS BY UNINVOLVED PARTIES, VICTIMS, AND SPECIAL REQUESTS (continued)			
Subject	Release	No Release Reason	Further Direction
Categorical requests, such as all reports pertaining to a certain address, all reports regarding a certain type of incident, or all reports related to a particular individual.	<p>Yes, unless:</p> <ul style="list-style-type: none"> (1) the release will impact citizen privacy issues; (2) the potential assembly of information will reveal criminal history; or, (3) if gathering the information will create an undue burden on staff. <p>Yes, when release will enhance public safety (e.g., in a neighborhood effort to abate a nuisance such as drug dealing at a certain property where the reports are needed for a civil lawsuit.)</p>		Custodian of Records to decide.

SEARCH WARRANTS			
Subject	Release	No Release Reason	Further Direction
Search Warrants and Returns.	Yes, unless sealed.	If sealed by Court.	
Search Warrant applications or affidavits, and any police reports attached to application.	Yes, but delete all identifying information pertaining to a victim or a witness in the application, affidavit, or a police report attached to the application.	PC §964 prohibits the release of a witness or victim's identifying information in a Search Warrant application or a police report attached to the application.

BPD Service Agreement-final.pdf

CITY OF BERKELEY POLICE DEPARTMENT SERVICE AGREEMENT

This agreement for services (“Agreement”) is by and between the City of Berkeley, a chartered California municipal corporation (“City”) and _____ (“Organization”). The City and the Organization may be referred to herein individually as a “Party”, or collectively as the “Parties”.

The Parties agree to the following terms and conditions:

1. DATES: Unless this paragraph is subsequently modified by a written amendment to this Agreement, the term of this Agreement shall begin on _____ and terminate on _____.
2. SERVICES; CONDITIONS; CITY EMPLOYEES: In exchange for the compensation from the Organization, as described in this Agreement, the City’s Police Department Peace Officer Personnel (“Personnel”) shall provide security services, crowd control, and/or traffic control (collectively, “Services”) as may be separately requested by the Organization and agreed upon by the City. In performing such Services, the Personnel shall be utilized only in their capacity as Peace Officers, as defined by California Government Code Section 50920 and Penal Code Sections 830 and 830.1.

The Personnel shall, at all times, be subject to the exclusive direction, supervision, and control of the City. The Personnel shall remain employees of the City when performing Services under this Agreement, and shall not be deemed employees of the Organization.

Services shall be provided only upon written request by the Organization via the completion of an Application for Extra Duty Services, attached hereto as Exhibit A. Any request shall include the date and time-period for which Services are required, the number of Personnel anticipated, and a description of the Services. The City may reject any request for any reason in its sole discretion.

The City’s ability to perform such Services is subject to the availability of its Personnel, as such availability may be determined by the City in its sole discretion. It is understood and agreed that the City assumes no liability for its rejection of any request for Services or its inability to provide Personnel for Services on any particular date and/or time.

3. BILLING: The Organization will be billed by the City for Services rendered by the Personnel at the overtime rate of the individual Personnel who provide the Services plus indirect costs of 10% of the hourly rate. The specific hourly rate for the individual Personnel shall be determined by the City and shall include a three-hour minimum charge per individual Personnel. Billing for Services shall begin from the time the officer leaves the police station to travel to the off-site work area and will continue until the officer has returned from the off-site work area to the police station.
4. INDEMNITY/HOLD HARMLESS: To the maximum extent permitted by law, and excluding the gross negligence or willful misconduct by the Personnel while providing the Services, the Organization shall defend, indemnify, and hold harmless, the City (including any City employee, officer, or agent), from any claim, injury, loss, or damage,

including all costs and reasonable attorney's fees, in any way arising from the Services provided under this Agreement.

5. **LIABILITY INSURANCE/ADDITIONAL INSURED:** The Organization shall provide and maintain certificates of insurance for a Commercial General Liability and Automotive Liability insurance policy (in a form acceptable to the City Attorney's Office), which carries general policy coverage limits of at least one million dollars (\$1,000,000).

The Organization shall also provide an endorsement to such insurance policy providing coverage at least as broad as Insurance Services Office Endorsement CG 2010, 1985 Edition, which names the City of Berkeley and its employees, officers, and agents as additional insureds under said policy. Such insurance shall be primary and non-contributing, and shall include a waiver of any right of subrogation against the City. The Additional Insureds endorsement must include the following, or very similar, language: The City of Berkeley and its employees, officers, and agents are hereby added as additional insureds with respect to liability arising out of the paid services the City provides to the Organization under the terms of the Berkeley Police Department Service Agreement.

6. **WORKER'S COMPENSATION CLAIMS**

An employee's worker's compensation claim for an injury sustained while performing Services under this Agreement shall be primarily covered by the City's Workers' Compensation Insurance Plan.

7. **BINDING and NON-DELEGATION:** The City and Organization bind themselves to the terms and conditions of this Agreement, and except as otherwise set forth in this Agreement, no interest in this Agreement or any of the Services provided for in a request under this Agreement shall be assigned, delegated, or transferred, either voluntarily or by operation of law, without the prior written approval of the Parties.

8. **NOTICES:** All notices prescribed by this Agreement shall be in writing and shall be deemed effective once delivered and properly received by:

To City: Chief of Police
Berkeley Police Department
2100 Martin Luther King, Jr., Way
Berkeley, CA 94704

To Organization: _____

9. **GOVERNING LAW:** This Agreement shall be governed and construed in accordance with City of Berkeley Municipal Code and the laws and regulations of the State of California.

10. AMENDMENTS: The City or Organization may, from time to time, request changes in the terms and conditions of this Agreement. Such changes, which are mutually agreed upon in writing by the City and Organization shall be incorporated in amendments to this Agreement.
11. COUNTERPARTS: This Agreement may be executed in counterparts, each of which shall be deemed to be an original, but both of which shall constitute one and the same instrument; and, the Parties agree that signatures on this Agreement, including those transmitted by facsimile or scanned email attachment, shall be sufficient to bind the Parties.
12. OTHER AGREEMENTS: This Agreement shall not supersede, amend, or otherwise alter any other contract, memorandum of understanding, or any other written agreement between the Parties.
13. UNDERSTANDING/AUTHORITY TO SIGN: The Parties hereby certify that they have read the above terms and conditions, and agree to conform to them and all laws and regulations pertaining to the use of City Personnel for the purposes as set forth in this Agreement. The signatories below warrant and represent they have the authority to bind the Party to the terms of this Agreement.

Statutes and Legal Requirements.pdf

Statutes and Legal Requirements

Items listed in this section include sections from the California Penal Code (CPC), Welfare and Institutions Code (WI) and Government Code (GC).

Definitions

CPC 422.55 - Provides general definition of hate crimes in California.

CPC 422.56- Provides definitions of terms included in hate crimes statutes.

GC 12926- Disability-related definitions applicable to some hate crime statutes.

Felonies

Hate Crimes

CPC 422.7 - Commission of a crime for the purpose of interfering with another's exercise of civil rights.

Related Crimes

CPC 190.2(a)(16) - Homicide penalties related to certain hate crime related acts.

CPC 190.03(a) - Homicide penalties related to certain hate crime related acts.

CPC 288(b)(2) - Sexual assault of dependent person by caretaker

CPC 368(b) - Dependent adult abuse generally - may apply as disability-related hate crime.

CPC 594.3 - Vandalism of places of worship.

CPC 11412 - Causing or attempting to cause other to refrain from exercising religion by threat.

CPC 11413 - Arson or destructive device at place of worship.

Misdemeanors

Hate Crimes

CPC 422.6 - Use of force, threats, or destruction of property to interfere with another's exercise of civil rights.

CPC 422.77 - Violation of civil order (Bane Act) protecting the exercise of civil rights

Related Crimes

CPC 302 - Disorderly conduct during an assemblage of people gathered for religious worship at a tax-exempt place of worship.

CPC 538(c) - Unauthorized insertion of advertisements in newspapers and redistribution to the public.

CPC 640.2 - Placing handbill, notice of advertisement on a consumer product or product packaged without authorization.

CPC 11411 - Terrorism of owner or occupant of real property. Placement or display of sign, symbol, or other physical impression without authorization, engagement in pattern of conduct, or burning or desecration of religious symbols.

Enhancements

CPC 190.2(a)(16) - Special circumstances imposing the Death Penalty or Life Without Possibility of Parole, if the victim was intentionally killed because of sexual orientation, gender, or disability.

CPC 190.3 - Special circumstances imposing LWOP if the victim was intentionally killed because of sexual orientation, gender, or disability.

CPC 422.75 - Penalty for felony committed because of victim's race, color, religion, nationality, country or origin, ancestry, disability, or sexual orientation shall be enhanced one, two, or three years in prison, if the person acts alone; and two, three, or four years if the person commits the act with another.

CPC 1170.8 - Enhancement for robbery or assault at a place of worship.

CPC 1170.85(b) - Felony assault or battery enhancement due to age or disability.

Reporting

CPC 13023- Requirement for law enforcement agencies to report hate crime data to DOJ.

WI 15630 – Elder and Dependent Adult Abuse Mandated Reporting (may apply in disability-related hate crimes).

Training and Policy Requirements

CPC 422.87 - Hate crimes policy adoption and update requirements (AB 1985, Effective January 1, 2019).

CPC 13519.6 - Defines hate crime training requirements for peace officers.

CPC 13519.41 - Training requirements on sexual orientation and gender identity-related hate crimes for peace officers and dispatchers (AB 2504, Effective January 1, 2019).

Miscellaneous Provisions

CPC 422.78 - Responsibility for prosecution of stay away order violations.

CPC 422.86 - Public policy regarding hate crimes.

CPC 422.89 - Legislative intent regarding violations of civil rights and hate crimes

CPC 422.92 - Hate crimes victims brochure requirement for law enforcement agencies.

CPC 422.93 - Protection of victims and witnesses from being reported to immigration authorities.

GC 6254 - Victim confidentiality.

1300 BWC APPENDIX A.pdf

BODY WORN CAMERAS (BWCs)

A. DESCRIPTION

The BWC system consists of four main components: The camera, the docking station, and the Digital Information Management System (DIMS) and smartphone applications.

The first component, the Axon camera, is a system which incorporates an audio and video recording device. It is designed to record events in real time for secure storage, retrieval, and analysis. The camera is to be attached to an officer's uniform and is powered by an internal rechargeable battery. The camera features low-light performance, full-shift battery life, a capture rate of 30 frames per second with no dropped frames, HD video, pre-event buffering, multi-camera playback, and the ability to automatically categorize video using the police department's computer aided dispatch system. An officer can start and stop recording by pressing a button on the front of the camera. The camera does not contain a screen for footage review.

The second component of the system is the docking station. Once the Axon camera is placed in the docking station it recharges the camera's battery. The dock also triggers the uploading of data from the camera to a cloud based Digital Information Management System (DIMS) called Evidence.com. The dock does not directly provide functionality to view, modify or delete video data stored on Axon cameras.

The third component is the Digital Information Management System called Evidence.com. Evidence.com streamlines data management and sharing on one secure platform. The evidence management system is comprehensive, secure, and intuitive to use. The DIMS is located in a cloud-based data center for security, scalability, and ease of administration. Users can add

metadata to existing videos such as associated case numbers, incident type, incident dispositions, etc. to make the videos easier to find. However, the videos themselves cannot be altered by the user.

The fourth component of the system to be utilized are two Axon mobile applications, which allow officers to collect and review evidence in the field and more effectively use their BWCs. The applications use secure Bluetooth and Wi-Fi technology to access the BWC systems and footage. These applications are compliant with US Department of Justice evidentiary standards, meaning that they are both secure and are set up in a way that prohibits the altering or destruction of evidence. The applications are called Axon View and Axon Capture. Axon View allows users to change their camera settings, view live video, and review and tag recorded videos while they are stored on the BWC. Recorded videos remain in the BWC's memory, and cannot be manipulated or deleted. Axon Capture allows officers to use their city-issued smartphone's camera and microphone to take photographs, and record audio and video, and to upload this data directly to Evidence.com. These applications do not allow users to alter, manipulate, or edit any of the footage recorded by the BWC. These applications use secure technology to add value and efficiency to the BWC program.

B. PURPOSE

The primary objective of the BWC system is to document officer contacts, arrests, and critical incidents. Video footage collected by the BWCs will be used as evidence in both criminal and administrative investigations. Video footage not relevant to any investigation will be discarded after a defined retention period.

In instances where the officer might be expected to take law enforcement action of any kind, the officer is expected to record the encounter for the benefit of both the officer and the member of the public.

1. The BWC shall be activated in any of the following situations:
 - i. All in-person enforcement and investigative contacts including pedestrian stops and field interview (FI) situations.
 - ii. Traffic stops including, but not limited to, traffic violations, stranded motorist assistance and all crime interdiction stops.
 - iii. Self-initiated field contacts in which a member would normally notify the Communications Center.
 - iv. Any search activity, including the service of search or arrest warrants; probation, parole, or consent searches where the member is seeking evidence of an offense, or conducting a safety sweep or community caretaking sweep of the premises. Once a location has been secured and the member is not interacting with detainees or arrestees, the member may mute their BWC when conducting a search for evidence.

- v. Any other contact that the member determines has become adversarial after the initial contact in a situation where the member would not otherwise activate BWC recording.
- vi. Transporting any detained or arrested person and where a member facilitates entry into or out of a vehicle, or any time the member expects to have physical contact with that person.

At no time is an officer expected to jeopardize his or her safety in order to activate a BWC. The BWC should be activated in anticipation of situations described above, and in any unanticipated, rapidly unfolding situation where activation becomes required, as soon as the user can do so safely.

Officers should activate their BWC when conducting custodial interviews unless there are other recording devices being used. Officers shall document and explain in their report the reason for not recording custodial interviews, should a BWC be de-activated while conducting a custodial interview or interrogation.

2. Prohibited uses of the BWC system include:

- i. Officers shall not surreptitiously record another department member without a court order unless lawfully authorized by the Chief of Police, or his/her designee.
- ii. Officers are prohibited from using a department-issued BWC for personal use and are prohibited from making personal copies of recordings created while on duty or while acting in their official capacity.
- iii. Officers are prohibited from retaining BWC recordings.
- iv. Officers shall not duplicate or distribute such recordings, except for department business purposes.

C. LOCATION

Officers may use BWCs anywhere where officers have jurisdiction to operate as sworn officers, in accordance with BPD policy #425.

D. IMPACT

With the introduction of BWCs, officers record all enforcement contacts with the public. To that end, an officer could find themselves engaged in their lawful duties in both public and private areas. Additionally, due to the nature of law enforcement work, an officer may be required to engage in sensitive conversations with individuals of all ages, including children.

The right to maintain someone's anonymity versus the need to gain information to maintain public safety is of paramount concern. The Department recognizes that all people have a right to privacy and is committed to protecting and safeguarding civil rights by adhering to the

strictest requirements of both state and federal law concerning release of audio/video recordings.

E. MITIGATION

In order to minimize violations of privacy, BWC policy provides that:

1. Officers should record any incident they feel would be appropriate or valuable to document. The BWC policy shall require officers to activate the BWC under the criteria listed above.
2. Officers should not activate the BWC and/or use caution when entering a public locker room, changing room, restroom, doctor's or attorney's office, or other place where individuals unrelated to the investigation are present and would have a heightened expectation of privacy unless the officer is investigating criminal activity or responding to a call for service.
3. BWC use is limited to enforcement and investigative activities involving members of the public. The BWC recordings will capture video and audio evidence for use in criminal investigations, administrative reviews, training, civil litigation, and other proceedings protected by confidentiality laws and department policy.
4. BWC footage will be retained or released in accordance with applicable state and federal law. Criminal defendants will have access to relevant BWC footage via the court discovery process.
5. Officers are prohibited from retaining BWC recordings, Officers shall not duplicate or distribute such recordings, except for department business purposes. All such recordings shall be retained at the Department.
6. Officers are prohibited from intentionally erasing, altering, reusing, modifying or tampering with original audio video recordings. Officers may request restriction and subsequent deletion of an accidental recording according to the BWC policy.
7. Access to recorded files will be granted for the purposes of review in response to a public records request, as permitted by law and department policy. Department policy does not authorize release of investigative files or documents that would constitute an unwarranted invasions of privacy. Circumstances where this might arise in video include footage taken inside a home, a medical facility, the scene of a medical emergency, or where an individual recorded has a "reasonable expectation of privacy"

F. DATA TYPES AND SOURCES

BWC use is limited to enforcement and investigative activities involving members of the public. The BWC recordings will capture video and audio evidence for use in criminal investigations, administrative reviews, training, civil litigations, and other proceedings protected by confidentiality laws and department policy.

The BWC collects video and audio recordings of events occurring in the user's presence. As each video is created, the system automatically stamps the video with the current date/time and the camera user's identity. The user has the option to add metadata manually to existing recordings after they are created. Such metadata may include but is not limited to:

1. Category of contact (from Department's defined list)
2. Disposition of contact (arrest, citation, etc.)
3. Associated case number

G. DATA SECURITY

To assist with identifying and preserving data and recordings, members shall tag and download recordings in accordance with procedure, and document the existence of the recording in the related case report. Transfers must occur at the end of the member's shift, and any time the member is aware that the storage capacity of the BWC is nearing its limit. In circumstances when the officer cannot complete this task, the officer's supervisor shall immediately take custody of the BWC and be responsible for transferring the data into the digital evidence management system. Officers shall tag each file with the appropriate case/incident number, provide a descriptive title, and select an appropriate category for each recording, using the Axon View app or via the Evidence.com site.

Members are prohibited from intentionally erasing, altering, reusing, modifying or tampering with original audio video recordings.

Improper use or release of BWC recordings may compromise ongoing criminal and administrative investigations or violate the privacy rights of those recorded and is prohibited. The Chief of Police, or his/her designee shall appoint a member of the Department to coordinate the use and maintenance of BWCs and the storage of recordings, including (Penal Code Section 832.18) (Ref. policy 425.14):

1. Establishing a system for uploading, storing and security of recordings.
2. Designating persons responsible for uploading recorded data.
3. Establishing a maintenance system to ensure availability of BWCs.
4. Establishing a system for tagging and categorizing data according to the type of incident captured.
5. Establishing a system to prevent tampering, deleting and copying recordings and ensure chain of custody integrity.
6. Working with the City Attorney's office to ensure an appropriate retention schedule is being applied to recordings and associated documentation.
7. Maintaining an audit trail record for all access to evidence files, wherein access information for each evidence file is logged through use of a secure log-in system. The Department's storage system associates an audit trail record with each evidence file,

thereby logging the date, time, user name, activity and client IP address occurring during each evidence file access.

H. FISCAL COST

In 2017, the Berkeley City Council approved a resolution authorizing a contract between BPD and Axon. Axon was chosen after a competitive Request for Proposal (RFP) process. The contract will not exceed \$1,218,103 and includes the cost of 200 body worn cameras, charging stations, accessories, software licenses, training and unlimited storage for five years. The purchase also includes replacement cameras and charging stations during the third and fifth year of the contract.

There will be an annual cost of approximately \$250,000 to the police department's budget for a staff person to administer the body worn camera program beginning in FY 2019.

I. THIRD PARTY DEPENDENCE AND ACCESS

All BWC data will be uploaded and stored on Axon Cloud Services, Evidence.com. Axon complies with the EU-U.S. Privacy Shield Framework and the Swiss-U.S. Privacy Shield Framework as set forth by the U.S. Department of Commerce regarding the collection, use, and retention of personal information transferred from the European Union and Switzerland to the United States (collectively, "Privacy Shield"). Axon has certified to the U.S. Department of Commerce that it adheres to the Privacy Shield Principles.

J. ALTERNATIVES

Officers rely primarily on traditional policing techniques to gather evidence related to criminal investigations such as speaking to witnesses and suspects, gathering information from observations, and using standard data aggregation systems. These methods will continue to be employed as primary investigative tools that will be supplemented by use of BWCs to document police activity.

BWC technology provides video and audio documentation of policing activity in addition to the oral and written statements of officers, victims, and witnesses. Alternatives to the use of BWCs would be vehicle-based cameras and/or not utilizing BWCs. However, BPD sees the use of BWCs as an integral strategy to strengthen police transparency, prevent and resolve complaints against the police by civilians, document police-public interaction, and promote the perceived legitimacy and sense of procedural justice that communities have about their departments. There is a broad consensus – among community leaders, the ACLU, the Department of Justice, the Berkeley Police Department, and elected officials – that body-worn cameras can be an important tool for improving the high-quality public service expected of police officers.

K. EXPERIENCE OF OTHER ENTITIES

Numerous police agencies have adopted BWCs as a tool to help combat crime, to reduce citizen complaints and to reduce use of force situations. Many departments have developed their own usage policies which may include standards for required officer use, supervisory review, storage and data retention standards, and internal and public access.

A report for the U.S. Bureau of Justice Administration, https://www.bja.gov/bwc/pdfs/14-005_Report_BODY_WORN_CAMERAS.pdf - pages 6-8, cites a 2013 Rialto, CA study that showed that the use of BWCs led to a 59 percent decrease in UOF and an 87.5 percent decrease in citizen complaints. Likewise, the Mesa, AZ report noted in “Impact” Section above also points to large decreases in UOF and citizen complaints.

The 2017 Police Body Worn Cameras: A Policy Scorecard, <https://www.bwccscorecard.org/>, provides an analysis of how scores of different police agencies have employed BWCs through a defined list of metrics.

Captain Instruction - Call Taking 2021.pdf

Police Department

MEMORANDUM

Date: February 24, 2021
To: Communications Center Personnel
From: Captain J. Louis #C2 *JL C-2*
Subject: Captain's Instruction: Call-Taking

This Captain's Instruction on the Call-Taking procedure now includes a section on profiling by proxy. This instruction is effective immediately pending an update into the Communications Center Operations Manual.

CALL TAKING

SCOPE

The function of the Dispatcher working call taking is to provide 24 hour a day service to the public for information as well as routine or emergency assistance. Dispatchers shall follow these standardized procedures and expectations for call processing.

CALL TAKER EXPECTATIONS

1. **CONTROLLING THE CALL: Where, What, When, Weapons, Who:** The call taker should maintain control of the call in order to receive the answers to the most important questions in the shortest period of time.
2. **VERIFICATION AND ACCURACY: Verify details that are received through the initial line of questioning:** The call taker will use active listening and repeat back to the caller the information he/she provided in order to confirm the documented details.
3. **COMPASSION AND PATIENCE**
 - a. **Help the caller understand what is happening:** The call taker will use a firm yet reassuring tone of voice with the caller, stating that you are going to help and will need to ask a number of questions in order to do so.
 - b. **Commit the caller to staying on the line and working with you as long as it is safe to do so:** The call taker will state that it is very important for the caller to remain on the line as long as it is safe to do so, and to provide the best information possible in response to the questions being asked. The call taker will inform the caller that there will be some moments of silence or side conversations with other Dispatchers as the details are being entered, they are not being ignored, nor ending the call, and not to hang up during these periods.
 - c. **Explain what will happen next:** The call taker will remain on the line with the caller as long as practicable to continue information gathering. However, if it is necessary to end the call the call taker will advise the caller a call for service request has been completed. If the caller asks when officers might arrive, the call taker may state they cannot estimate the time and there may be delays due to higher-priority calls or high call volume.
4. **PROFESSIONALISM: Speak calmly and clearly and with enough volume for the caller to hear you.** The call taker should project authority, yet portray understanding and empathy through a steady and reassuring tone. Speak in clear and understandable terms; do not use departmental codes or jargon.

5. **RESPECT:**
- a. **Do not demonstrate an argumentative demeanor**, and do not question the integrity or validity of the caller or the reported incident. What may appear improbable or unlikely upon first report may in fact be what has occurred.
 - b. **Do not use sarcasm or diminish the caller's perceived importance/urgency of the reported situation. Do not patronize the caller.** All callers should be treated with understanding and dignity, regardless of how well they can articulate or explain what has occurred and/or how well they are able to cooperate/comply with the call intake process.

PROCEDURE FOR INFORMATION GATHERING

The call taker shall obtain the basic information from the caller using the **5 W's format (Where, What, When, Weapons, Who)**, as well as any secondary questioning necessary to provide pertinent information. When appropriate, the call taker may ask callers near the end of the call if there is anything they would like to add. All information must be documented in the narrative window of the CAD mask.

1. **WHERE (Location):** The call taker will make every attempt to enter an accurate location of **where** the Incident occurred into the CAD call mask.

The call taker shall request the exact location of the incident (structure addresses, intersections).

If the specific location is unknown, the call taker shall request landmarks or estimated proximity to landmarks.

The call taker will tell the caller and any witnesses to remain at their current location (unless determined unsafe) until officers arrive.

Address Verification. The call taker shall verify all addresses reported. This can be accomplished by matching the ALI display, repeating the address, and/or enunciating each digit of the address.

2. **WHAT (Nature of the Incident):** The call taker will question the caller in order to ascertain **what** happened.

Determine the appropriate call type.

Ask the caller if there are injuries or if anyone requires medical attention. If **medical attention is required, copy call to Fire, document the nature of the injuries and status of scene security in the call's narrative.** If there are injuries and no police response is required, the call taker will then transfer the caller to ACCREC for pre-arrival instructions (ref. EMD policy).

3. **WHEN (Time of Occurrence):** The call taker will question the caller to ascertain **when** the incident occurred. The call taker will determine if the incident is in-progress, just prior, or a cold report.

In Progress: Incidents occurring now or within past 2 minutes

Just Prior: Incidents occurring 2-10 minutes prior or incidents occurring more than 10 minutes prior and the responsible is still on scene or in the area.

Cold Reports: Incidents occurring more than 10 minutes prior and the responsible is no longer in the area.

If the call type is a priority 1 or 2 and the incident is in-progress, just prior (10 minutes or less), or if the suspect is still on scene, the call taker will make the call "**ready for dispatch**" as soon as practicable after the incident location is verified and the call type is determined.

4. **WEAPONS (First Responder/Citizen Safety Hazards):** The call taker will ascertain if there are any weapons involved or other potential on-scene hazards.

Weapons: The call taker will ask the caller if any weapons were seen, simulated or threatened.

Intoxicated or Mentally Disturbed Subjects: The call taker will ask secondary questions when a caller reports a subject behaving erratically or unusually.

The call taker will ask the caller if there are any other on-scene **hazards** that could potentially harm responding units.

5. **WHO (Descriptions of Involved Subjects):** The call taker will attempt to obtain full subject descriptions using the following questioning sequence:

Race and/or Complexion; Gender; Age (or Approximate); Height, Weight, Hair/Facial (Color, length, style); Eyes (Glasses); Headwear; Coat; Shirt/Dress; Pants/Shorts/Skirt; Shoes; and Other Distinctive Features

For in-progress or just prior priority 1 and 2 calls, the call taker will ascertain whether the subject is still in sight or if they have left the scene. If the subject has left the scene, the call taker will first ask the caller for the direction of travel, time element and a description of the method of transportation (i.e. foot, vehicle, or bicycle). The call taker will enter this information as soon as practicable into the narrative.

The following order should be used to document descriptions of **transportation methods**:

1. **Vehicles:** The call taker will use the CYMBAL format (Color, Year, Make, Body type, Additional Characteristics, License plate) to ask the caller for a description of a vehicle. The call taker will also ask the number of occupants, position of suspect (i.e. Driver, front or rear seat passenger) and direction of travel.
2. **Bus:** The call taker will ask the caller the Bus Company, coach number, route number and direction of travel.
3. **BART:** The call taker will ask the caller the BART station name, platform information and train destination information (i.e. Richmond, Fremont, San Francisco) and train direction
4. **Bicycle:** The call taker will ask the caller the bike color, type, brand (i.e. Black, mountain bike, Diamondback) and direction of travel.

PROFILING BY PROXY

Bias, racism or profiling by proxy occurs in a call for service when an individual calls the police and makes false or ill-informed claims about persons they dislike or are biased against. Dispatchers and Officers have a role in mitigating bias-based calls for service (CFS), and proper handling of these calls is important to maintain and build trust between the police and the community.

Call takers have a responsibility to do an initial screen and triage of all calls to ensure they are accurately entered as the correct CFS with the appropriate priority attached. Call takers should ask questions and explore whether there are concrete, observable behaviors that form the basis of the suspicious activity or crime the RP is reporting. Calls for service (CFS) should focus on behaviors of involved parties, not appearance. Reports of suspicious activity require the reporting party (RP) to articulate something criminal or reasonably suspicious about a person's behavior.

If a Call Taker believes an RP is making a bias-based call for service, they should:

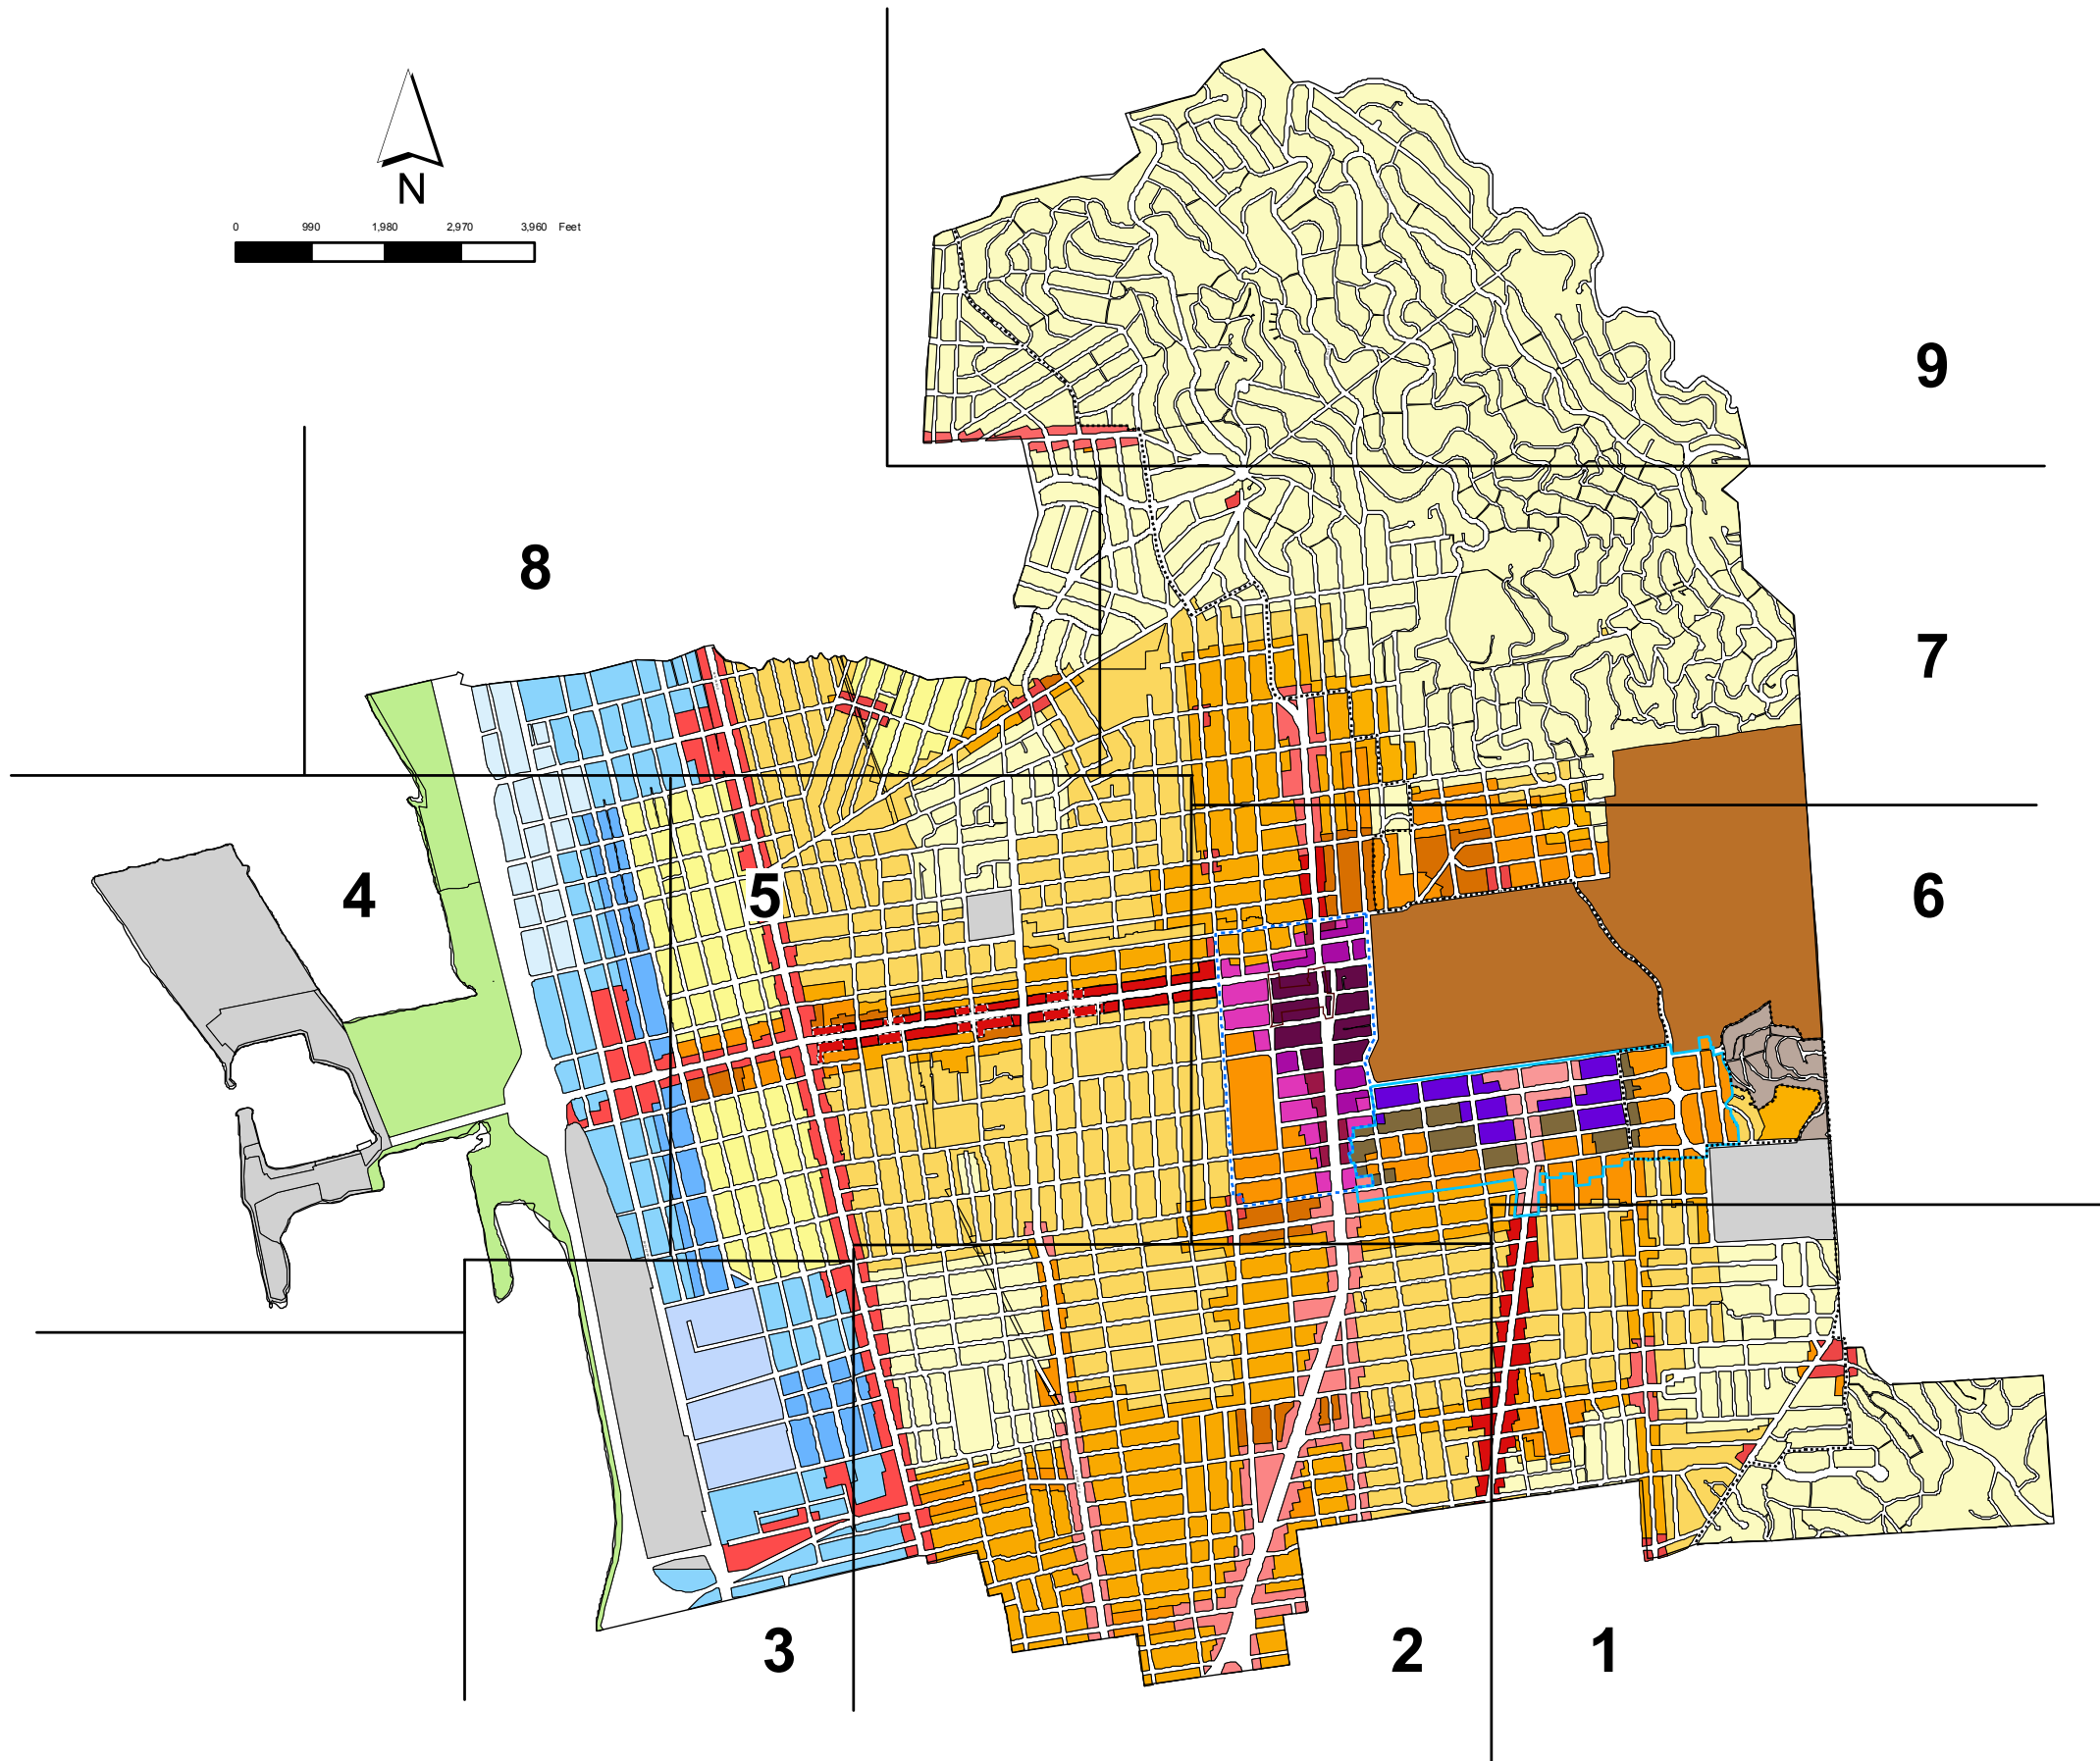

1. **Create a call for service,**
2. **Enter the details** provided by the RP in the call narrative
3. **In the Nature of Call field enter: "Supervisor review required"** which will ensure that the call is not ready for dispatch, and
4. **Notify the on duty supervisor.** Supervisor will review the merits of the call for service and either approve for dispatching or notify a Watch Commander (or designee)
5. **Watch Commander** will determine if a response will be provided and/or follow-up with the RP for more information.

Court Order 14602.7 Notification Template.pdf

Berkeley Police Department

June 27, 2022

John Smith
123 Main Street,
Berkeley, Ca 94704

This priority document is to serve notice that your vehicle, a silver 2020 Toyota Rav4, CA LP #1ABC123, was seized by the Berkeley Police Department on 06/27/2022, at 06:22 P.M. BPD Incident # 2022-02159.

The vehicle was seized pursuant to the court order attached in this packet.

The vehicle is currently impounded at Towing Company, tow company's address.

I have also attached the California Vehicle Code section CVC 14602.7(a) for your reference and guidance.

Sincerely,

Officer Name and Badge Number
Patrol division
Berkeley Police Department
510-981-5900
Officer's Email

VEH_14602.7..pdf

State of California

VEHICLE CODE

Section 14602.7

14602.7. (a) A magistrate presented with the affidavit of a peace officer establishing reasonable cause to believe that a vehicle, described by vehicle type and license number, was an instrumentality used in the peace officer's presence in violation of Section 2800.1, 2800.2, 2800.3, or 23103, shall issue a warrant or order authorizing any peace officer to immediately seize and cause the removal of the vehicle. The warrant or court order may be entered into a computerized database. A vehicle so impounded may be impounded for a period not to exceed 30 days.

The impounding agency, within two working days of impoundment, shall send a notice by certified mail, return receipt requested, to the legal owner of the vehicle, at the address obtained from the department, informing the owner that the vehicle has been impounded and providing the owner with a copy of the warrant or court order. Failure to notify the legal owner within two working days shall prohibit the impounding agency from charging for more than 15 days impoundment when a legal owner redeems the impounded vehicle. The law enforcement agency shall be open to issue a release to the registered owner or legal owner, or the agent of either, whenever the agency is open to serve the public for regular, nonemergency business.

(b) (1) An impounding agency shall release a vehicle to the registered owner or his or her agent prior to the end of the impoundment period and without the permission of the magistrate authorizing the vehicle's seizure under any of the following circumstances:

(A) When the vehicle is a stolen vehicle.

(B) When the vehicle is subject to bailment and is driven by an unlicensed employee of the business establishment, including a parking service or repair garage.

(C) When the registered owner of the vehicle causes a peace officer to reasonably believe, based on the totality of the circumstances, that the registered owner was not the driver who violated Section 2800.1, 2800.2, or 2800.3, the agency shall immediately release the vehicle to the registered owner or his or her agent.

(2) No vehicle shall be released pursuant to this subdivision, except upon presentation of the registered owner's or agent's currently valid driver's license to operate the vehicle and proof of current vehicle registration, or upon order of the court.

(c) (1) Whenever a vehicle is impounded under this section, the magistrate ordering the storage shall provide the vehicle's registered and legal owners of record, or their agents, with the opportunity for a poststorage hearing to determine the validity of the storage.

(2) A notice of the storage shall be mailed or personally delivered to the registered and legal owners within 48 hours after issuance of the warrant or court order, excluding weekends and holidays, by the person or agency executing the warrant or court order, and shall include all of the following information:

(A) The name, address, and telephone number of the agency providing the notice.

(B) The location of the place of storage and a description of the vehicle, which shall include, if available, the name or make, the manufacturer, the license plate number, and the mileage of the vehicle.

(C) A copy of the warrant or court order and the peace officer's affidavit, as described in subdivision (a).

(D) A statement that, in order to receive their poststorage hearing, the owners, or their agents, are required to request the hearing from the magistrate issuing the warrant or court order in person, in writing, or by telephone, within 10 days of the date of the notice.

(3) The poststorage hearing shall be conducted within two court days after receipt of the request for the hearing.

(4) At the hearing, the magistrate may order the vehicle released if he or she finds any of the circumstances described in subdivision (b) or (e) that allow release of a vehicle by the impounding agency. The magistrate may also consider releasing the vehicle when the continued impoundment will cause undue hardship to persons dependent upon the vehicle for employment or to a person with a community property interest in the vehicle.

(5) Failure of either the registered or legal owner, or his or her agent, to request, or to attend, a scheduled hearing satisfies the poststorage hearing requirement.

(6) The agency employing the peace officer who caused the magistrate to issue the warrant or court order shall be responsible for the costs incurred for towing and storage if it is determined in the poststorage hearing that reasonable grounds for the storage are not established.

(d) The registered owner or his or her agent is responsible for all towing and storage charges related to the impoundment, and any administrative charges authorized under Section 22850.5.

(e) A vehicle removed and seized under subdivision (a) shall be released to the legal owner of the vehicle or the legal owner's agent prior to the end of the impoundment period and without the permission of the magistrate authorizing the seizure of the vehicle if all of the following conditions are met:

(1) The legal owner is a motor vehicle dealer, bank, credit union, acceptance corporation, or other licensed financial institution legally operating in this state or is another person, not the registered owner, holding a financial interest in the vehicle.

(2) (A) The legal owner or the legal owner's agent pays all towing and storage fees related to the seizure of the vehicle. No lien sale processing fees shall be charged to the legal owner who redeems the vehicle prior to the 15th day of impoundment. Neither the impounding authority nor any person having possession of the vehicle shall collect from the legal owner of the type specified in paragraph (1), or the legal

owner's agent any administrative charges imposed pursuant to Section 22850.5 unless the legal owner voluntarily requested a poststorage hearing.

(B) A person operating or in charge of a storage facility where vehicles are stored pursuant to this section shall accept a valid bank credit card or cash for payment of towing, storage, and related fees by a legal or registered owner or the owner's agent claiming the vehicle. A credit card shall be in the name of the person presenting the card. "Credit card" means "credit card" as defined in subdivision (a) of Section 1747.02 of the Civil Code, except, for the purposes of this section, credit card does not include a credit card issued by a retail seller.

(C) A person operating or in charge of a storage facility described in subparagraph (B) who violates subparagraph (B) shall be civilly liable to the owner of the vehicle or to the person who tendered the fees for four times the amount of the towing, storage and related fees, but not to exceed five hundred dollars (\$500).

(D) A person operating or in charge of a storage facility described in subparagraph (B) shall have sufficient funds on the premises of the primary storage facility during normal business hours to accommodate, and make change in, a reasonable monetary transaction.

(E) Credit charges for towing and storage services shall comply with Section 1748.1 of the Civil Code. Law enforcement agencies may include the costs of providing for payment by credit when making agreements with towing companies on rates.

(3) The legal owner or the legal owner's agent presents, to the law enforcement agency, impounding agency, person in possession of the vehicle, or any person acting on behalf of those agencies, a copy of the assignment, as defined in subdivision (b) of Section 7500.1 of the Business and Professions Code; a release from the one responsible governmental agency, only if required by the agency; a government-issued photographic identification card; and any one of the following, as determined by the legal owner or the legal owner's agent: a certificate of repossession for the vehicle, a security agreement for the vehicle, or title, whether paper or electronic, showing proof of legal ownership for the vehicle. Any documents presented may be originals, photocopies, or facsimile copies, or may be transmitted electronically. The law enforcement agency, impounding agency, or any other governmental agency, or any person acting on behalf of those agencies, shall not require any documents to be notarized. The law enforcement agency, impounding agency, or any person acting on behalf of those agencies, may require the agent of the legal owner to produce a photocopy or facsimile copy of its repossession agency license or registration issued pursuant to Chapter 11 (commencing with Section 7500) of Division 3 of the Business and Professions Code, or to demonstrate, to the satisfaction of the law enforcement agency, impounding agency, or any person acting on behalf of those agencies that the agent is exempt from licensure pursuant to Section 7500.2 or 7500.3 of the Business and Professions Code.

No administrative costs authorized under subdivision (a) of Section 22850.5 shall be charged to the legal owner of the type specified in paragraph (1), who redeems the vehicle unless the legal owner voluntarily requests a poststorage hearing. No city, county, city and county, or state agency shall require a legal owner or a legal owner's

agent to request a poststorage hearing as a requirement for release of the vehicle to the legal owner or the legal owner's agent. The law enforcement agency, impounding agency, or other governmental agency, or any person acting on behalf of those agencies, shall not require any documents other than those specified in this paragraph. The law enforcement agency, impounding agency, or other governmental agency, or any person acting on behalf of those agencies, shall not require any documents to be notarized. The legal owner or the legal owner's agent shall be given a copy of any documents he or she is required to sign, except for a vehicle evidentiary hold logbook. The law enforcement agency, impounding agency, or any person acting on behalf of those agencies, or any person in possession of the vehicle, may photocopy and retain the copies of any documents presented by the legal owner or legal owner's agent.

(4) A failure by a storage facility to comply with any applicable conditions set forth in this subdivision shall not affect the right of the legal owner or the legal owner's agent to retrieve the vehicle, provided all conditions required of the legal owner or legal owner's agent under this subdivision are satisfied.

(f) (1) A legal owner or the legal owner's agent that obtains release of the vehicle pursuant to subdivision (e) shall not release the vehicle to the registered owner or the person who was listed as the registered owner when the vehicle was impounded of the vehicle or any agents of the registered owner, unless a registered owner is a rental car agency, until the termination of the impoundment period.

(2) The legal owner or the legal owner's agent shall not relinquish the vehicle to the registered owner or the person who was listed as the registered owner when the vehicle was impounded until the registered owner or that owner's agent presents his or her valid driver's license or valid temporary driver's license to the legal owner or the legal owner's agent. The legal owner or the legal owner's agent shall make every reasonable effort to ensure that the license presented is valid and possession of the vehicle will not be given to the driver who was involved in the original impoundment proceeding until the expiration of the impoundment period.

(3) Prior to relinquishing the vehicle, the legal owner may require the registered owner to pay all towing and storage charges related to the impoundment and the administrative charges authorized under Section 22850.5 that were incurred by the legal owner in connection with obtaining the custody of the vehicle.

(4) Any legal owner who knowingly releases or causes the release of a vehicle to a registered owner or the person in possession of the vehicle at the time of the impoundment or any agent of the registered owner in violation of this subdivision shall be guilty of a misdemeanor and subject to a fine in the amount of two thousand dollars (\$2,000) in addition to any other penalties established by law.

(5) The legal owner, registered owner, or person in possession of the vehicle shall not change or attempt to change the name of the legal owner or the registered owner on the records of the department until the vehicle is released from the impoundment.

(g) (1) A vehicle impounded and seized under subdivision (a) shall be released to a rental car agency prior to the end of the impoundment period if the agency is either the legal owner or registered owner of the vehicle and the agency pays all towing and storage fees related to the seizure of the vehicle.

(2) The owner of a rental vehicle that was seized under this section may continue to rent the vehicle upon recovery of the vehicle. However, the rental car agency shall not rent another vehicle to the driver who used the vehicle that was seized to evade a police officer until 30 days after the date that the vehicle was seized.

(3) The rental car agency may require the person to whom the vehicle was rented and who evaded the peace officer to pay all towing and storage charges related to the impoundment and any administrative charges authorized under Section 22850.5 that were incurred by the rental car agency in connection with obtaining custody of the vehicle.

(h) Notwithstanding any other provision of this section, the registered owner and not the legal owner shall remain responsible for any towing and storage charges related to the impoundment and the administrative charges authorized under Section 22850.5 and any parking fines, penalties, and administrative fees incurred by the registered owner.

(i) (1) This section does not apply to vehicles abated under the Abandoned Vehicle Abatement Program pursuant to Sections 22660 to 22668, inclusive, and Section 22710, or to vehicles impounded for investigation pursuant to Section 22655, or to vehicles removed from private property pursuant to Section 22658.

(2) This section does not apply to abandoned vehicles removed pursuant to Section 22669 that are determined by the public agency to have an estimated value of three hundred dollars (\$300) or less.

(j) The law enforcement agency and the impounding agency, including any storage facility acting on behalf of the law enforcement agency or impounding agency, shall comply with this section and shall not be liable to the registered owner for the improper release of the vehicle to the legal owner or the legal owner's agent provided the release complies with the provisions of this section. The legal owner shall indemnify and hold harmless a storage facility from any claims arising out of the release of the vehicle to the legal owner or the legal owner's agent and from any damage to the vehicle after its release, including the reasonable costs associated with defending any such claims. A law enforcement agency shall not refuse to issue a release to a legal owner or the agent of a legal owner on the grounds that it previously issued a release.

(Amended by Stats. 2009, Ch. 322, Sec. 6. (AB 515) Effective January 1, 2010.)

1602-Livestreaming BWC Captains Instruction.pdf

Police Department

CAPTAINS INSTRUCTION

Date: February 16, 2023
To: Sworn Personnel
Form: Captain Dan Montgomery #C2
Subject: **Livestreaming of Body Worn Cameras**

The Berkeley Police Department recognizes that video recording of contacts between department personnel and the public provides an objective record of these events, and that the use of a recording system complements field personnel in the performance of their duties by providing a video record of enforcement and investigative field contacts, which can enhance criminal prosecutions, limit civil liability, increase transparency, and enhance professionalism in the delivery of police services to the community. (BPD Policy 425.2)

As Body Worn Camera technology develops, new procedures or rules may become necessary. One of the new functions of our Axon Body 3 Body Worn Camera (BWC) is that a supervisor can remotely livestream into another officer's camera view while the officer is actively recording. If a camera is not actively recording it cannot be viewed remotely. When a supervisor remotes into an officer's camera, the officer is notified in the following ways:

- The BWC will give one short vibration.
- On the digital screen the word "Live" will be visible.
- The camera will give one audible beep. *
- The BWC's light will change from red to purple. *

(*If the officer has the sound muted and lights off, then the purple light and beep will not happen.)

A supervisor should only live stream into another officer's BWC in the following situations:

- Incidents that are pre-planned between the officer and supervisor.
- Incidents where the officer requests a supervisor live stream in.
- Situations where an officer is not responding to their radio.
- Situations deemed exigent by the supervisor.

- Situations authorized by the Watch Commander

In no case should livestreaming an officers BWC be used to substitute in person supervision. Under ideal circumstances, a supervisor should contact the officer and advise them before remoting into their BWC. In situations where it is not practical to notify the officer, the supervisor shall notify them that they activated the live stream function as soon as safe to do so.

INCIDENT REPORT
Supervisor's Investigation

Human Resources

Provide any other details associated with items # 11-24.

INCIDENT REPORT

Supervisor's Investigation

Human Resources

Itemized instructions and additional information:

1	Enter today's date.
2	Enter the date on which the injury occurred.
3	Enter the time of the incident, check a.m. or p.m.
4	Enter the exact location of the incident.
5	Select the best option for weather conditions, approximate the wind speed and temperature.
6	Enter the first name, middle initial and last name of the injured employee.
7	Enter the job classification title of the injured employee.
8	Enter the injured employee's department and division.
9	Indicate if you witnessed the employee being injured.
9 (a)	Indicate if you visited the scene of the incident during your investigation.
10	Enter the names and phone numbers of the witnesses you interviewed for this incident.
11	Enter the employee's and witness's account of the incident, as told to you.
12	Indicate if the employee was performing the immediate tasks associated with the incident according to a Policy or Procedure.
12 (a)	If established Policies/Procedures were not followed, using information gathered during your investigation, indicate why not.
13	Indicate if PPE was required for the tasks that were being performed immediately prior to the incident.
13 (a)	If PPE was involved, specifically identify the PPE; e.g. <i>right latex glove, full-face APR with HEPA pancake filters.</i>
13 (b)	If PPE was involved in the incident, indicate who owns the PPE.
14	Indicate if a tool, or a piece of equipment, was a factor in the incident. If yes, list the equipment.
14 (a)	Indicate who owns the tool/equipment involved with this incident.
14 (b)	Indicate if the absence of the proper tool contributed to this incident.
15	Indicate if any physical evidence associated with this incident has been collected and secured (e.g. broken ladder).
15 (a)	If physical evidence has been collected, identify what has been collected and where it is being secured.
16	After reviewing all known facts, plainly state other contributing factors
17	Identify any and all corrective actions that will be taken. .
18	Indicate if medical care was immediately provided to the injured employee. If so, describe the care.
19	Indicate if the injured employee was transported to an Emergency Room. If so, identify the Emergency Room.
20	Indicate if the employee was admitted as an inpatient and hospitalized overnight. If so, identify the hospital.
20 (a)	If #20 is 'yes', indicate if Occupational Health and Safety Dept. was notified of the overnight hospitalization. Enter date and time.
21	Indicate if the employee received medical treatment from the City's Occupational Clinic (U.S. HealthWorks).
22	Indicate if the employee received medical treatment from a predesignated medical provider. Identify the medical provider.
23	Indicate if a DWC-1 Form was provided to the employee. If so, identify when.
24	Indicate if the employee lost time from work beyond the date of incident. If so, enter date last worked.
25 - 30	Enter your information.
31 - 36	Enter your Supervisors' information

INCIDENT REPORT

Employee Incident Report

Itemized instructions and additional information:

1	Enter today's date.
2	Enter the date of the incident.
3	Enter the time of the incident, check a.m. or p.m.
4	Enter the exact location of the incident.
5	Enter your first name, middle initial and last name.
6	Enter your Employee Number.
7	Enter your Department and Division.
8	Enter your job classification title.
9	Enter your home address, include city and zip code.
10	Enter your home phone number, include area code.
11	Please PRINT or TYPE the specific description of what you were doing immediately prior to the incident. Describe the exact work task(s) and movements you were performing immediately prior to the incident. For example: <i>I was climbing up an A-frame ladder and my left foot slipped off the 3rd step causing me to fall approx. three feet to the ground, where a sprained my right ankle.</i>
12	Enter the full names of any witnesses, and provide a phone number for each witness.
13	Identify any other factors which may have contributed to the incident.
14	Identify any actions which may minimize the potential for similar incidents in the future.
15	Enter the date and time you first reported the incident to you supervisor.
16	Enter the name of the person to whom you reported the incident.
17	Indicate if you did seek medical treatment at this time for an injury sustained from this incident. If you did seek medical treatment, enter the name of the medical provider. Enter your signature if you did not require medical treatment.
18	Indicate if you were supplied with a DWC-1 form. Indicate if you completed the form and the date you completed it.
19	Print your name, sign your name and enter the date.
20	Name of the person to whom the incident was reported.
21	Signature of the person to whom the incident was reported.
22	Title of the person to whom the incident was reported.
23	Indicate the body part injured; check as many as applicable.

**CONSENT TO BLOODBORNE
PATHOGEN TEST BLOOD .pdf**

CONSENT TO BLOODBORNE PATHOGEN TEST BLOOD AND/OR ORAL FLUID / RELEASE OF TEST RESULTS

I understand that a possible transfer of bodily fluid took place between me and:

Name(s) of Exposed Party(-ies)

I understand that the Human Immunodeficiency Virus (HIV), and other communicable diseases, may be transmitted through bodily fluids.

I agree to provide specimens of my blood and/or oral fluid. I understand the analysis of my blood and/or oral fluid for HIV and other communicable diseases will be performed in a licensed medical laboratory.

I understand I will receive the test results subsequent to completion of the aforementioned analysis, and the results of the analysis will be provided to the individuals named above who may have been exposed to my bodily fluids.

As a condition of my consent for testing, I understand that all persons, other than me, who receive the test results, will maintain the confidentiality of the personal identifying data relating to the test results, except for disclosure that may be necessary to obtain medical or psychological care or advice. I also understand that the specimen and the test results will not be admissible as evidence in a criminal proceeding.

I agree that the people performing the test, transmitting the test results, or disclosing information pursuant to this consent, will be immune from civil liability. My consent is voluntary. No promises or threats have been made to obtain my consent.

AR2-7 DWC-1 29.pdf

**WORKERS' COMPENSATION
CLAIM FORM (DWC 1)**

**PETITION DEL EMPLEADO PARA DE
COMPENSACIÓN DEL TRABAJADOR (DWC 1)**

Employee: Complete the "Employee" section and give the form to your employer. Keep a copy and mark it "Employee's Temporary Receipt" until you receive the signed and dated copy from your employer. You may call the Division of Workers' Compensation and hear recorded information at (800) 736-7401. An explanation of workers' compensation benefits is included as the cover sheet of this form.

You should also have received a pamphlet from your employer describing workers' compensation benefits and the procedures to obtain them.

Empleado: Complete la sección "Empleado" y entregue la forma a su empleador. Quédese con la copia designada "Recibo Temporal del Empleado" hasta que Ud. reciba la copia firmada y fechada de su empleador. Ud. puede llamar a la División de Compensación al Trabajador al (800) 736-7401 para oír información grabada. En la hoja cubierta de esta forma esta la explicación de los beneficios de compensación al trabajador.

Ud. también debería haber recibido de su empleador un folleto describiendo los beneficios de compensación al trabajador lesionado y los procedimientos para obtenerlos.

Any person who makes or causes to be made any knowingly false or fraudulent material statement or material representation for the purpose of obtaining or denying worker' compensation benefits or payments is guilty of a felony.

Toda aquella persona que a propósito haga o cause que se produzca cualquier declaración o representación material falsa o fraudulenta con el fin de obtener o negar beneficios o pagos de compensación a trabajadores lesionados es culpable de un crimen mayor "felonía".

Employer: You are required to date this form and provide copies to your insurer or claims administrator and to the employee, dependent or representative who filed the claim within **one working day** of receipt of the form from the employee.

Empleador: Se requiere que Ud. feche esta forma y que provea copias a su compañía de seguros, administrador de reclamos, o dependiente/representante de reclamos y al empleado que hayan presentado esta petición dentro del plazo de **un día hábil** desde el momento de haber sido recibida la forma del empleado.

SIGNING THIS FORM IS NOT AN ADMISSION OF LIABILITY

EL FIRMAR ESTA FORMA NO SIGNIFICA ADMISION DE RESPONSABILIDAD

Employer copy/Copia del Empleo Employee copy / Copia del Empleado

Claims Administrator / Administrador de Reclamos Temporary Receipt / Recibo del Empleado

If you are injured or become ill, either physically or mentally, because of your job, including injuries resulting from a workplace crime, you may be entitled to workers' compensation benefits. Attached is the form for filing a workers' compensation claim with your employer. **You should read all of the information below.** Keep this sheet and all other papers for your records. You may be eligible for some or all of the benefits listed depending on the nature of your claim. If required you will be notified by the claims administrator, who is responsible for handling your claim, about your eligibility for benefits.

To file a claim, complete the "Employee" section of the form, keep one copy and give the rest to your employer. Your employer will then complete the "Employer" section, give you a dated copy, keep one copy and send one to the claims administrator. Benefits can't start until the claims administrator knows of the injury, so complete the form as soon as possible.

Medical Care: Your claims administrator will pay all reasonable and necessary medical care for your work injury or illness. Medical benefits may include treatment by a doctor, hospital services, physical therapy, lab tests, x-rays, and medicines. Your claims administrator will pay the costs directly so you should never see a bill. For injuries occurring on or after 1/1/04, there is a limit on some medical services.

The Primary Treating Physician (PTP) is the doctor with the overall responsibility for treatment of your injury or illness. Generally your employer selects the PTP you will see for the first 30 days, however, in specified conditions, you may be treated by your predesignated doctor. If a doctor says you still need treatment after 30 days, you may be able to switch to the doctor of your choice. Special rules apply if your employer offers a Health Care Organization (HCO) or after 1/1/05, has a medical provider network. Contact your employer for more information. If your employer has not put up a poster describing your rights to workers' compensation, you may choose your own doctor immediately.

Within one working day after an employee files a claim form, the employer shall authorize the provision of all treatment, consistent with the applicable treating guidelines, for the alleged injury and shall continue to provide treatment until the date that liability for the claim is accepted or rejected. Until the date the claim is accepted or rejected, liability for medical treatment shall be limited to ten thousand dollars (\$10,000).

Disclosure of Medical Records: After you make a claim for workers' compensation benefits, your medical records will not have the same privacy that you usually expect. If you don't agree to voluntarily release medical records, a workers' compensation judge may decide what records will be released. If you request privacy, the judge may "seal" (keep private) certain medical records.

Payment for Temporary Disability (Lost Wages): If you can't work while you are recovering from a job injury or illness, you will receive temporary disability payments. These payments may change or stop when your doctor says you are able to return to work. These benefits are tax-free. Temporary disability payments are two-thirds of your average weekly pay, within minimums and maximums set by state law. Payments are not made for the first three days you are off the job unless you are hospitalized overnight or cannot work for more than 14 days.

Si Ud. se lesiona o se enferma, ya sea física o mentalmente, debido a su trabajo, incluyendo lesiones que resulten de un crimen en el lugar de trabajo, es posible que Ud. tenga derecho a beneficios de compensación para trabajadores. Se adjunta el formulario para presentar un reclamo de compensación para trabajadores con su empleador. **Ud. debe leer toda la información a continuación.** Guarde esta hoja y todos los demás documentos para sus archivos. Es posible que usted reúna los requisitos para todos los beneficios, o parte de éstos, que se enumeran, dependiendo de la índole de su reclamo. Si se requiere, el/la administrador(a) de reclamos, quien es responsable del manejo de su reclamo, le notificará a usted, lo referente a su elegibilidad para beneficios.

Para presentar un reclamo, complete la sección del formulario designada para el "Empleado", guarde una copia, y déle el resto a su empleador. Entonces, su empleador completará la sección designada para el "Empleador", le dará a Ud. una copia fechada, guardará una copia, y enviará una al/a la administrador(a) de reclamos. Los beneficios no pueden comenzar hasta, que el/la administrador(a) de reclamos se entere de la lesión, así que complete el formulario lo antes posible.

Atención Médica: Su administrador(a) de reclamos pagará toda la atención médica razonable y necesaria, para su lesión o enfermedad relacionada con el trabajo. Es posible que los beneficios médicos incluyan el tratamiento por parte de un médico, los servicios de hospital, la terapia física, los análisis de laboratorio y las medicinas. Su administrador(a) de reclamos pagará directamente los costos, de manera que usted nunca verá un cobro. Para lesiones que ocurren en o después de 1/1/04, hay un límite de visitas para ciertos servicios médicos.

El Médico Primario que le Atiende-Primary Treating Physician PTP es el médico con toda la responsabilidad para dar el tratamiento para su lesión o enfermedad. Generalmente, su empleador selecciona al PTP que Ud. verá durante los primeros 30 días. Sin embargo, en condiciones específicas, es posible que usted pueda ser tratado por su médico pre-designado. Si el doctor dice que usted aún necesita tratamiento después de 30 días, es posible que Ud. pueda cambiar al médico de su preferencia. Hay reglas especiales que son aplicables cuando su empleador ofrece una Organización del Cuidado Médico (HCO) o después de 1/1/05 tiene un Sistema de Proveedores de Atención Médica. Hable con su empleador para más información. Si su empleador no ha colocado un anuncio (poster) describiendo sus derechos para la compensación para trabajadores, Ud. puede seleccionar a su propio médico inmediatamente.

El empleador autorizará todo tratamiento médico consistente con las directivas de tratamiento aplicables a la lesión o enfermedad, durante el primer día laboral después que el empleado efectúa un reclamo para beneficios de compensación, y continuará proveyendo este tratamiento hasta la fecha en que el reclamo sea aceptado o rechazado. Hasta la fecha en que el reclamo sea aceptado o rechazado, el tratamiento médico será limitado a diez mil dólares (\$10,000).

Divulgación de Expedientes Médicos: Después de que Ud. presente un reclamo para beneficios de compensación para los trabajadores, sus expedientes médicos no tendrán la misma privacidad que usted normalmente espera. Si Ud. no está de acuerdo en divulgar voluntariamente los expedientes médicos, un(a) juez de compensación para trabajadores posiblemente decida qué expedientes se revelarán. Si Ud. solicita privacidad, es posible que el/la juez "selle" (mantenga privados) ciertos expedientes médicos.

Pago por Incapacidad Temporal (Sueldos Perdidos): Si Ud. no puede trabajar, mientras se está recuperando de una lesión o enfermedad relacionada con el trabajo, Ud. recibirá pagos por incapacidad temporal. Es posible que estos pagos cambien o paren, cuando su médico diga que Ud. está en condiciones de regresar a trabajar. Estos beneficios son libres de impuestos. Los pagos por incapacidad temporal son dos tercios de su pago semanal promedio, con cantidades mínimas y máximas establecidas por las leyes estatales. Los pagos no se hacen durante los primeros tres días en que Ud. no trabaje, a menos que Ud. sea hospitalizado(a) de noche, o no pueda trabajar durante más de 14 días.

Livestreaming BWC Captains Instruction.pdf

Police Department

CAPTAIN'S INSTRUCTION

Date: February 16, 2023
To: Sworn Personnel
Form: Captain Dan Montgomery #C2
Subject: **Livestreaming of Body Worn Cameras**

One of the functions of our Axon Body 3 Body Worn Camera (BWC) is that a supervisor can remotely livestream into another officer's camera view while the officer is actively recording. If a camera is not actively recording it cannot be viewed remotely. When a supervisor remotes into an officer's camera, the officer is notified in the following ways:

- The BWC will give one short vibration.
- On the digital screen the word "Live" will be visible.
- The camera will give one audible beep. *
- The BWC's light will change from red to purple. *

(*If the officer has the sound muted and lights off, then the purple light and beep will not happen.)

A supervisor should only live stream into another officer's BWC in the following situations:

- Incidents that are pre-planned between the officer and supervisor.
- Incidents where the officer requests a supervisor live stream in.
- Situations where an officer is not responding to their radio.
- Situations deemed exigent by the supervisor.
- Situations authorized by the Watch Commander

In no case should livestreaming an officers BWC be used to substitute in person supervision. Under ideal circumstances, a supervisor should contact the officer and advise them before remoting into their BWC. In situations where it is not practical to notify the officer, the supervisor shall notify them that they activated the live stream function as soon as safe to do so.

Workers' Compensation
SUPERVISOR'S INSTRUCTIONS and QUICK GUIDE

WHEN AN EMPLOYEE REPORTS A WORK-RELATED INJURY TO YOU...

If the employee does not need or request medical treatment:

- . The employee completes: **Incident Report – Employee Incident Report**
- . The supervisor completes: **Incident Report - Supervisor's Investigation**

OR

If the employee NEEDS or REQUESTS MEDICAL TREATMENT:

Give the employee the following forms:

- .. **Incident Report – Employee Incident Report** *(employee completes)*
- .. **Workers' Compensation Claim Form (DWC-1)** *(Supervisor completes "Employer Section" (9 through 18) before you give to employee)*
 - 9: *Name of Employer:* City of Berkeley
 - 10: *Address:* 2180 Milvia St., 1st Floor, Berkeley, CA 94704 (attn: WC Analyst)
 - 11: *Date employer first knew of injury.* This is the date you were informed that the employee needed medical attention.
 - 12: *Date employer provided claim form to employee:* Date you gave the claim form to the employee.
 - 13: *Date employee returned claim form to employer:* Date the employee returned the claim form to you. Otherwise leave blank.
 - 14: *Name and address of insurance carrier or adjusting agency:* N/A (the City is self-insured).
 - 15: *Insurance Policy Number:* Self-insured – Cert. #4-7149-02-269
 - 16: *Signature of employer representative:* Your signature.
 - 17: *Title:* Your title
 - 18: *Telephone:* Your telephone number.
- . **City of Berkeley Work Status Slip**
 - *Supervisor completes Section 2 for initial visit only.*

The supervisor completes:

- . **Incident Report - Supervisor's Investigation**
- . **State of California Employer's Report of Occupational Injury or Illness (Form 5020)** *noted on lower left-corner*

Fax completed forms to Human Resources (510-981-6860) within 24-hours of employee report to the supervisor that the employee needs or requests medical treatment as a result of a work-related injury.

Mather, CA 95655

March 2019

NOTES

PREFACE

As you read this; somewhere in California, a law enforcement agency is providing mutual aid. Mutual aid is an everyday occurrence in a state as large and diverse as California. This is the continuation of a Cal OES decades-long process of “neighbor helping neighbor.” The law enforcement mutual aid system is an ongoing cooperative effort among law enforcement agencies to ensure an effective and organized response to a wide range of emergencies. There may be a misconception that mutual aid is used only during a civil unrest and/or natural disaster; however, this system has been used successfully for many other situations, including large criminal investigations, deployment of special teams such as Special Weapons and Tactics Teams, Bomb Squads, etc.

How will your agency use the mutual aid system? Planning, preparation and operational activities of law enforcement agencies in support of the mutual aid system must be consistent with each department’s policies and procedures and must also comply with the Standardized Emergency Management System (SEMS) and the National Incident Management System (NIMS).

All law enforcement executives, administrators, managers, and field supervisors should familiarize themselves with this plan and its application. The personnel of the Cal OES Law Enforcement Branch are available to assist you with planning, training and when necessary, emergency response coordination. It is important to note that Cal OES does not “own” the mutual aid system. It is a part of California law enforcement; and those that participate benefit and share in the concept of “neighbor helping neighbor.”

Mark N. Pazin, Chief
Law Enforcement Branch

INTRODUCTION/PURPOSE

The California Governor's Office of Emergency Services original *Law Enforcement Guide for Emergency Operations* was developed in response to the need for standardization and uniformity of organization and response on the part of law enforcement agencies involved in major multi-jurisdictional and multi-agency incidents such as a civil disorder, technological disaster, or natural disaster.

The revised and expanded *2019 Law Enforcement Guide for Emergency Operations* is designed to be a practical field-oriented guide to assist law enforcement personnel throughout the State of California with *implementation* of the *Field Level Incident Command System*. The intended primary users of this guide are watch commanders and field supervisors. The guide can also be an excellent emergency response tool for law enforcement managers, as well as line officers and deputies.

This updated edition incorporates the concept and statutory requirement of the Standardized Emergency Management System (SEMS). Additionally, the Law Enforcement Incident Command System, as approved by the SEMS Law Enforcement Specialist Committee, is presented in this publication. **Please disregard earlier editions of this guide.**

The *Law Enforcement Guide for Emergency Operations* is organized in a user-friendly format consisting of overview text, diagrams, organization charts, checklists, forms, and a glossary. Several sections are suitable for photocopying and distribution to field personnel.

The ultimate goal is to provide practical guidance for California law enforcement agencies in using the SEMS and ICSS organizational framework for efficient and safe response, management, and coordination of major emergencies and disasters.

Mark N. Pazin, Chief
Law Enforcement Branch

SECTION I

OVERVIEW OF THE STANDARDIZED EMERGENCY MANAGEMENT SYSTEM

The Standardized Emergency Management System (SEMS) is the emergency management organization required by California statute, Government Code 8607(a) for emergency response and disaster management in multi-agency and multi-jurisdiction emergencies. California local governments ***must*** use SEMS in emergency response and disaster management to be eligible for any available disaster reimbursement funding for its personnel related costs provided through state disaster assistance programs. SEMS incorporates the use of:

The Incident Command System (ICS): Field level emergency management response system and organization.

Multi/Inter-Agency Coordination: The participation of agencies and disciplines involved at any level of the SEMS organization working together in a coordinated effort to facilitate decisions for overall emergency response activities, including the sharing of critical resources and the prioritization of incidents.

Mutual Aid Systems: Voluntarily provided local government services, resources and facilities when emergency impacted jurisdiction resources are exhausted or inadequate.

The Operational Area Concept: The management and application of resources of all political subdivisions (cities and special districts) of a county.

PURPOSE OF SEMS:

SEMS was established to provide an effective and coordinated response to multi-agency and multi-jurisdictional emergencies in California. By standardizing key components of the emergency management system, SEMS is intended to:

- Facilitate the flow of information within and between all levels of the system.
- Facilitate interaction and coordination among all responding agencies.

The use of SEMS will improve the processes of mobilization, deployment, tracking, and demobilization of needed mutual aid resources.

The use of SEMS will reduce the incidence of ineffective coordination and communications, and avoid duplication of resource ordering in multi-agency and multi-jurisdiction response actions.

SEMS is designed to be flexible and adaptable to the varied types of disasters that occur in California and to meet the needs of all emergency responders.

LEVELS OF SEMS:

SEMS provides for five distinct organizational levels of emergency response and disaster management, which may be activated as necessary:

- Field Response
- Local Government
- Operational Area
- Regional
- State

Field Response Level: Emergency response level where personnel and resources carry out tactical decisions and activities under the command of an appropriate authority in direct response to an incident or threat.

Local Government Level: The level that includes cities, counties, and special districts. Local governments manage and coordinate the overall emergency response and recovery activities within their jurisdiction.

Operational Area Level: An intermediate level of the state's emergency services organization, which includes the county and all political subdivisions situated within the county. The operational area manages and/or coordinates information, resources, and priorities among local governments within the Operational Area and serves as the coordination and communication link between the local government level and the regional level.

Regional Level: The level that manages and coordinates information and resources among operational areas within the mutual aid region and between the operational areas and the state level. This level also coordinates overall state agency support for emergency response activities within the region.

State Level: The level that manages state resources in response to emergency needs of the other levels, and manages and coordinates mutual aid among the mutual aid regions and between the regional level and the state level. State level also serves as the initial coordination and communication link with the federal response system.

**COMMUNICATIONS BETWEEN EMERGENCY OPERATIONS CENTERS (EOC),
DEPARTMENT OPERATIONS CENTERS (DOC) AND INCIDENT COMMANDER (IC):**

SEMS regulations require that upon activation of a Local Government Emergency Operations Center (EOC), communications and coordination will be established between the Incident Commander and the response Department's Operations Center (DOC) to the EOC, or directly between the Incident Commander and the Local Government EOC.

The regulations further require that communications and coordination be established between an activated Local Government EOC and any state or local emergency response agency having responsibilities at an incident occurring within that local government's jurisdictional boundary.

ICS field response organizations must establish communications with the local government level. The jurisdiction's dispatching procedures, communication capabilities, and local policies, will determine how the field level is linked to the local government level.

In many instances, the ICS field response units will be linked primarily to its DOC having jurisdictional responsibility for the incident. In such cases, the DOC retains agency-level authority over their assigned Incident Commander(s). The DOC is then responsible for coordinating with the Local Government EOC.

In some incidents, ICS field response organizations may have a direct communications link with the Local Government EOC when it is activated. The ICS field unit may receive policy direction from the Local Government EOC in certain circumstances. Whether or not this direct linkage occurs will depend upon the size of the emergency event, existing policies of the jurisdiction and the available lines of communication.

ESSENTIAL MANAGEMENT FUNCTIONS:

SEMS has five essential functions adopted from the Incident Command System. The field response level uses the five primary ICS functions:

- Command
- Operations
- Planning/Intelligence
- Logistics
- Finance/Administration

At the Local Government, Operational Area, Regional and State levels, the term *management* is appropriately substituted for the term *command*. The titles given the other functions remain the same at all levels.

The concept of using this structure within the SEMS Field Response organization is based on the following:

- Develop the form of the organization to match the function or task to be performed.
- Staff only those functional elements that are required to perform the task.
- Observe the recommended span-of-control guidelines.
- Perform the function of any non-activated organizational element at the next highest level.
- Deactivate elements no longer required by the incident.

COMMON FEATURES OF ALL ORGANIZATIONAL/RESPONSE LEVELS:

SEMS has several features based on ICS. The field response level uses functions, principles, and components of ICS as required in SEMS regulations.

Many of these field response level features also are applicable at local government, operational area, regional and state levels. In addition, there are other ICS features that have application to all SEMS levels.

Listed below are the features of ICS, which are applicable to all SEMS levels:

- Organizational Flexibility/Modular Organization
- Organizational Unity and Hierarchy of Command/Management
- Manageable Span of Control
- Personnel Accountability
- Common Terminology
- Compressive Resource Management
- Integrated Communications
- Action Planning

SEMS Functions and the Incident Command System

Field Level Response

PRIMARY SEMS/ICS FUNCTION	FIELD RESPONSE LEVEL	EOC LEVELS
Command/Management	<u>Command</u> is responsible for directing, ordering, and/or controlling of resources by virtue of explicit legal, agency or delegated authority.	<u>Management</u> is responsible for overall emergency policy and coordination through the joint efforts of governmental agencies and private organizations.
Operations	Responsible for the coordinated tactical response of all field operations directly applicable to, or in support of, the missions(s) in accordance with the Incident Action Plan.	Responsible for coordinating all jurisdictional operations in support of the response to the emergency through implementation of the organizational level's action plan.
Planning/Intelligence	Responsible for the collection, evaluation, documentation, and use of information about the evaluation of the incident, and the status of resources.	Responsible for collecting, evaluating, and disseminating information; developing the organizational level's action plan in coordination with the other functions, and maintaining documentation.
Logistics	Responsible for providing facilities, services, personnel, equipment, and materials in support of the incident.	Responsible for providing facilities, services, personnel, equipment, and materials.
Finance/Administration	Responsible for all financial and cost analysis aspects of the incident, and for any administrative aspects not handled by the other functions.	Responsible for financial activities and administrative aspects not assigned to the other functions.

LOCAL GOVERNMENT OR OPERATIONAL AREA EOC

FUNCTION	STAFFING CONSIDERATIONS
Management	City/County administrative personnel, emergency management, fire, law enforcement is recommended for use in initial EOC activations.
Operations	Fire, and/or law enforcement, or emergency management generally will coordinate these activities within the EOC during initial activations.
Planning/ Intelligence	Emergency Management, CAO, fire, law enforcement, planning department, and other departments can contribute personnel depending upon the nature of the emergency.
Logistics	Department of General Services or Public Works are good candidates to provide personnel for this EOC function. Other departments also may have the background to manage or assist in this function.
Finance/ Administration	City/County CAO, finance departments are candidates for managing this function within an EOC.

REGIONAL/STATE EOC

FUNCTION	STAFFING CONSIDERATIONS
Management	<u>SOC Director</u> - Cal OES Director, Assistant Director. REOC Director - Regional Administrators
Operations	To fill Section/Branch Positions: Cal OES, Cal Fire, Fire Marshall, Cal EPA, DHS, CHP, CNG, EMSA, DMH, DSS, ARC, OSHPD, PUC, etc.
Planning/ Intelligence	Cal OES staff, DOJ, Cal Fire, CNG, Caltrans, plus Technical advisors as necessary from CDMG, DHS, etc.
Logistics	To fill Section/Branch Positions: Cal OES, CNG, DPA, EDD, and DGS
Finance/ Administration	Cal OES, DOF

SECTION II

Applying the Incident Command System

REQUIREMENT TO USE ICS:

SEMS regulations state that where an agency has jurisdictional authority over a *multiple-agency incident*, it shall organize the field response using ICS. An incident is defined as an occurrence or event, human-caused or by natural phenomena, which requires action by emergency response personnel to prevent or minimize loss of life or damage to property, including natural resources.

In the most rigid sense, ICS within the SEMS Regulations need only be used in incidents, which require multiple agencies, or multiple jurisdictional involvement whether they are single discipline (e.g., all fire services or all law enforcement) or multi-discipline. Establishing the ICS would be required whenever an emergency incident involves more than one response agency.

LAW ENFORCEMENT ICS TRAINING GUIDELINES:

As use of the ICS in the law enforcement profession continues, new training methods may be developed to meet specific needs. At the present time there are two principle training reference documents that outline the acceptable SEMS/ICS curriculum approved by the Commission on Peace Officer Standards and Training (POST).

POST requires that a law enforcement agency train its personnel according to the curriculum set forth in the *SEMS Approved Course of Instruction* (which provides a multi-discipline SEMS overview) and the *Cal OES Law Enforcement Guide for Emergency Operations* (which provides a law enforcement-specific field level ICS guidance). Together, these documents will provide an agency with information to train and implement ICS for emergency response with the added benefit of focusing on law enforcement organizational concerns.

Will it be necessary to establish minimum qualifications and certifications for law enforcement ICS practitioners? No; not at the present time. ICS certification and qualifications are found in the fire service where ICS has developed over time and this has worked well for them. Within law enforcement, where training time is in constant competition with response time and calls for service, the certification and qualification of ICS practitioners may not be imposed. It is sufficient for an Agency, to *self-certify* that its personnel have received the appropriate level of SEMS/ICS proficiency training for law enforcement and to *effectively implement that training in an actual incident* requiring the use of ICS.

For information on SEMS/ICS training, the following websites are provided for reference:

- For a copy of the of the *Cal OES Law Enforcement Guide for Emergency Operations*:
<http://www.caloes.ca.gov>
- For copies of the SEMS guidelines and approved courses of instruction:
contact the California Specialized Training Institute (CSTI) from the Cal OES web site:
<http://www.caloes.ca.gov>

ICS IS RECOMMENDED FOR ANY INCIDENT:

As a matter of practice and training, it is of great benefit for agencies to utilize ICS for managing routine incidents. This practice provides a seamless integration of ICS into larger emergency operations as the situation evolves.

Typically, incidents begin with a single response discipline but may expand rapidly to multi-discipline incidents requiring additional resources. One of the dilemmas often confronting field response agencies has been a "gray area" of when exactly to establish ICS or to continue using an existing agency emergency response system that does not incorporate ICS principles.

There may be reluctance or hesitancy for an emergency response agency engaged in emergency operations using its own department's emergency configuration to attempt a transition to form the Incident Command System. *This dilemma may be avoided by adopting ICS as the agency's sole emergency management organization. ICS is a management system, which can be used virtually in any emergency or incident.*

A basic premise of ICS use is that in each emergency or incident, regardless of its size, the principles of ICS apply. The first on-scene emergency responder has single-discipline management responsibility. If the responder is aware of and follows the primary ICS functions, then that person and that department are actually using ICS in day-to-day performance.

Initial response to an emerging situation may consist of one or two officers in a patrol car. Generally, the senior officer assumes the role of the Incident Commander (IC). As IC, this officer is responsible for the accomplishment of all the applicable functions under the ICS organization. In a small incident the officer (as IC) may gather information (intelligence), formulate a plan (planning), request one or two units (logistics), deploy the officers, and resolve the problem (operations), release the requested units (demobilize), complete required reports (administration), and perhaps submit a request for overtime (finance).

In a rapidly expanding emergency, the need may increase to hundreds of officers. In such a scenario, the IC is still responsible for the accomplishment of all applicable ICS functions. Clearly, the IC cannot do all the functions alone as in a small incident. So, to spread the workload into manageable components, the IC appoints individual Officers-in-Charge (OIC) to oversee specific areas of the ICS to ensure effective task completion.

ICS provides numerous functional elements to assist operational and organizational needs. The organizational levels and ICS elements activated for any particular incident should be limited to that necessary to mitigate the emergency. The theory is that *form* (ICS structure) follows *function* (getting the job done). A basic ICS concept is any ICS element that is not staffed is the functional responsibility of the next higher supervising OIC, or ultimately rests with the IC.

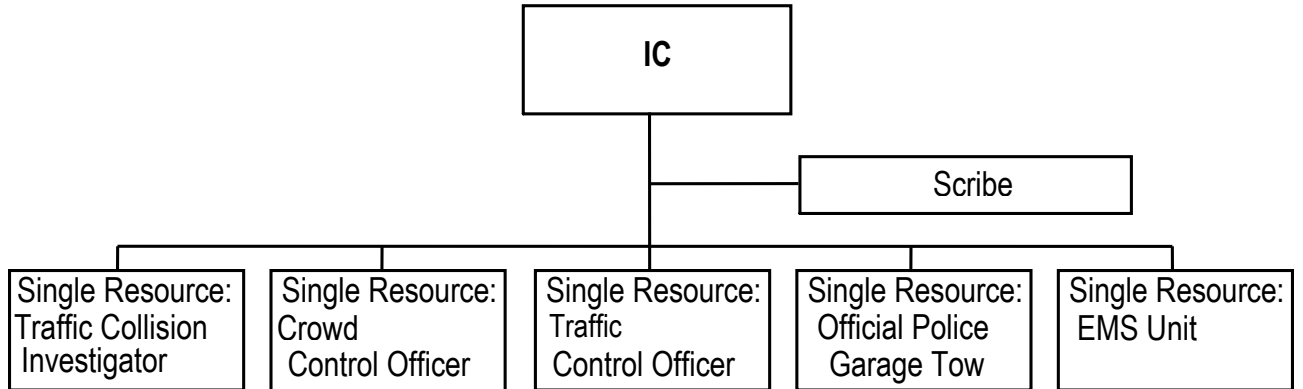

For example, in an incident requiring aircraft coordination, the Operations OIC would be responsible for that coordinating function in the absence of an Air Operations Branch OIC. In a smaller incident without an Operations OIC, all functions would be assumed by the IC, including aircraft coordination. *The key to ICS is remembering to focus on the functions and,*

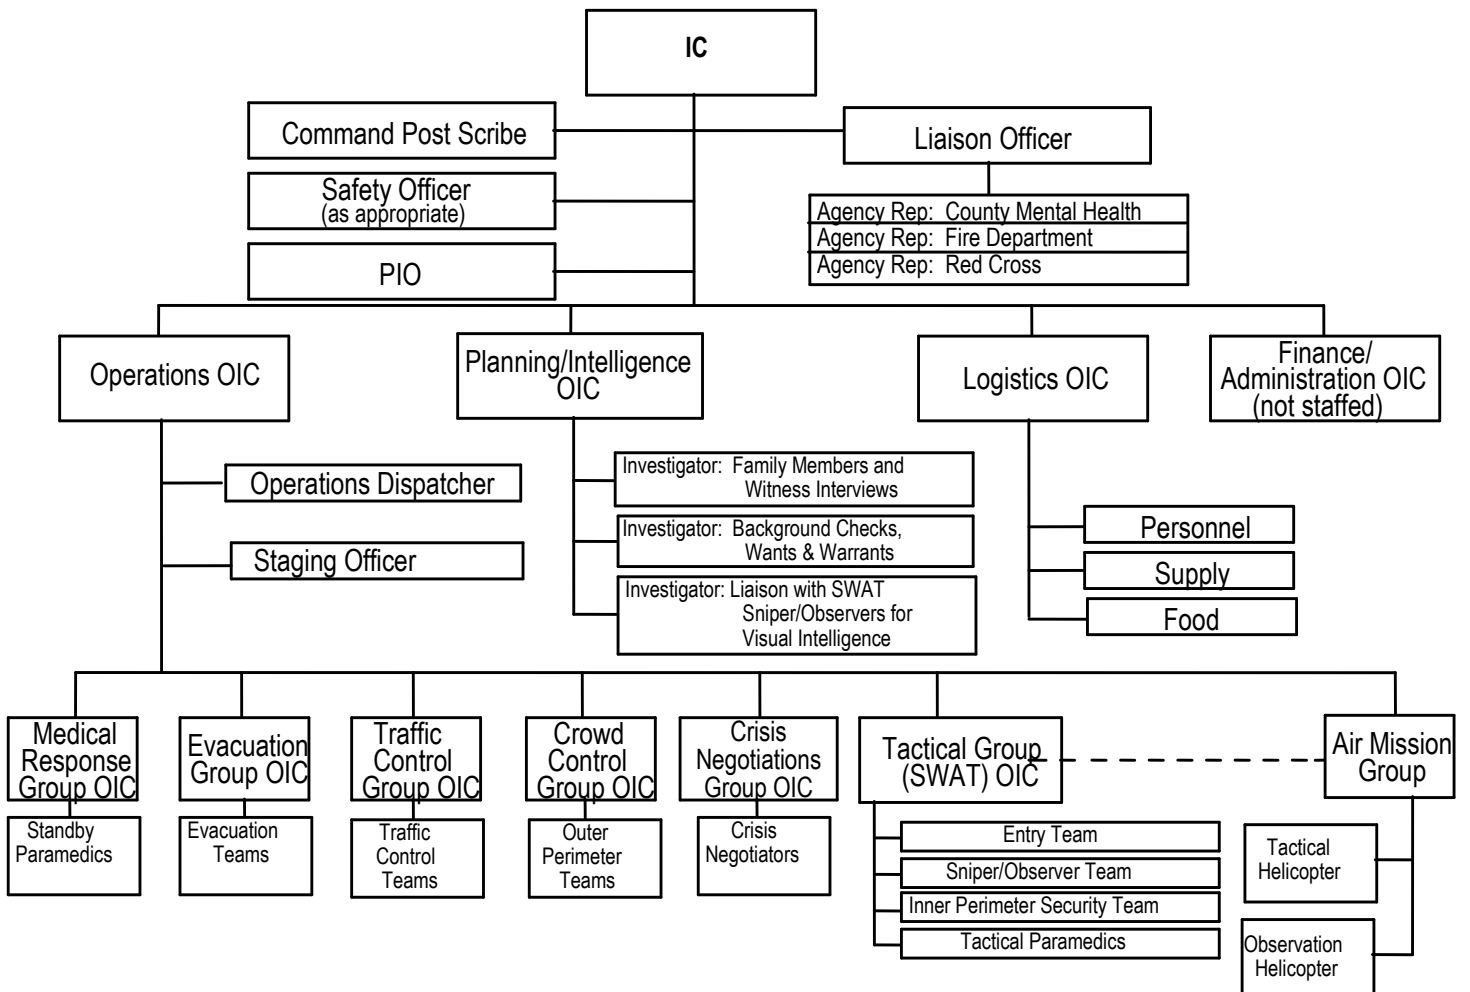

where possible, delegate authority to staff essential functions to distribute the workload. ICS provides a built-in capability for modular development so that the form or shape of the ICS organization always meets the functional need.

Examples When ICS Should Be Used: The Incident Command System is applicable easily to the following small and large incidents and events:

Small: INCIDENT ORGANIZATION (e.g., Fatal Traffic Collision)

Larger: INCIDENT ORGANIZATION (e.g., Barricaded Suspect with Hostages)

Incidents: (Unplanned)

- Major Traffic Collision
- Hostage Situation
- Bomb Incident
- Air Crash
- Hazardous Materials Spill
- Officer Involved Shooting
- Civil Disorder/Riot
- Terrorist Incident
- Fires and Explosions
- Landslide

Events: (Planned)

- Dignitary Visit
- Large Sporting/Concert Event
- Parades or Marches

Disasters: (Major Emergencies Generating Several Incident Sites)

- Earthquake
- Flood
- Severe Winter Storms
- Wildfires

SOLUTIONS TO COMMON PITFALLS IN EMERGENCY RESPONSE:

- Use the Critical Incident Response Plan and initiate ICS from the onset of the incident.
- Identify key jurisdictional agencies and collocate – utilizing the principles of Unified Command.
- Establish common communications channels for all incident personnel.
- Utilize the most competent people in key roles, regardless of rank, and let them do their job.
- Know **your** role.
- Keep all non-essential personnel away from the Command Post.
- Control the information flow.
- Assign a scribe as soon as practical.
- Critically re-examine assumptions that are part of the decision-making process.
- Return to normal operations as soon as practical.

TRANSITIONAL STEPS:

Some of the important “transitional” steps that are necessary in applying ICS in a field incident environment include:

- Recognize and anticipate the requirement that organizational elements will be activated and take the necessary steps to delegate the authority to others.
- Establish incident facilities as needed, strategically located, to support operations.
- Establish the use of common terminology for organizational functional elements, position titles, facilities and resources.
- Rapidly evolve from providing verbal orders and instructions to the development of a written Incident Action Plan.

DISTINCTIONS BETWEEN LAW ENFORCEMENT ICS AND OTHER DISCIPLINES' ICS:

The Law Enforcement Incident Command System is essentially identical to the “generic” SEMS Incident Command System. However, minor modifications have been made to enhance the needs of law enforcement. Some of the significant distinctions are:

- The term “Officer-In-Charge” (OIC) is used in the law enforcement model to describe positions of leadership at the Section, Branch, Group, and Unit levels. Under ICSS, the emphasis is on identifying an individual in charge of a function rather than confusing rank designations with position titles that infer specific meanings and expectations within different organizations (“Chief,” “Director,” or “Manager”). In disciplines other than law enforcement, the term OIC, also may be referred to as *Section Chief, Branch Director, Group Supervisor, Unit Leader, or Team Leader*.
- Traditional FIRESCOPE ICS places the staging function under the Operations Section. The 1999 edition of The Redbook presented a model in which staging was organized under Logistics. The committee tasked with producing this edition has returned Staging to Operations, in accordance with the FIRESCOPE model. There are sizeable California law enforcement agencies that have a history of successful use of ICS in both configurations. However, with the need for joint, multi-disciplinary operations and common terminology on a national scale, California law enforcement has seen the need to present a model ICS structure that more closely conforms with FIRESCOPE, which is not only the original ICS, but is also the system used and advocated by many federal agencies, as well as the model for the National Incident Management System (NIMS).
- An incident commander may choose to establish the staging function under the Logistics Section, based on the incident and the needs of the agency. Regardless of which model is used by an agency, it is essential to ensure that officers are properly checked-in, equipped (particularly with appropriate radio communications) and available to be deployed by the Operations Section. This is accomplished by a mandatory check-in procedure, a comprehensive resource status function, and a Staging Area Manager. The flexibility of ICS allows an agency to build an organization that fits a specific incident, utilizing the various organizational components as needed, within the general framework of ICS.

Staging areas under ICS are locations set up at an incident where resources can be placed while awaiting assignment; *not necessarily ready for immediate deployment*.

In some law enforcement agencies, staging areas are managed by the Logistics Section OIC. Under the traditional FIRESCOPE ICS, a staging area is where resources are placed *for deployment* within three minutes at the direction of the Operations Chief. In this traditional configuration, the Staging Area Manager reports to the Operations Section Chief

- The “Incident Scribe” (also referred to as the Command Post Scribe) is a position that may be activated to assist the Incident Commander.
- The “Mutual Aid Response Mobile Field Force” is an example of *resource typing* in ordering law enforcement mutual aid resources.
- “Personnel” as a resource category in law enforcement emergency operations is singularly the most crucial and important. Therefore, it is necessary to provide oversight within the Logistics Section commensurate with the anticipated need for personnel ordering, coordination and preparation for deployment.

The following organizational illustration appropriately depicts the Logistics/Personnel relationship in ICS:

Note: In traditional or generic ICS, ordering personnel is handled by the Supply Unit.

INTEGRATING ICS WITH OTHER DISCIPLINES:

Today, with the variety of disasters and emergencies, ICS is seldom purely a fire suppression or law enforcement activity. Rather, it is more likely a mix of fire service, law enforcement, public works, emergency medical, building and safety, school personnel and a host of other possible disciplines. SEMS/ICS provides a system that is adaptable by all disciplines.

The inherent requirement to implement SEMS/ICS is the need to facilitate emergency response among varying disciplines by way of a coordinated management system which successfully integrates law enforcement with fire service, emergency services, public works, and other response organizations. When considering an ICS response that is exclusively fire or exclusively law enforcement, the organization works reasonably well because of the consistent make-up of the responding organizations.

In many cases the Incident Commander will be from the fire fighting discipline. If law enforcement is collocated with fire service, it is reasonable to assume that the ICS organization will reflect the distinctions discussed earlier and will not reflect a purely ICS organization. When working within a fire-oriented ICS, officers should be mindful of the differences and make allowances so that the law enforcement function can perform as expeditiously as possible.

Usually law enforcement participation in a fire-oriented ICS will consist of an *Agency Representative* with the authority to commit law enforcement resources, or this individual may become elevated to *Deputy Incident Commander* under a Unified Command structure. There also may be other law enforcement personnel assigned to a *Law Division* with groups assigned to crowd control, traffic, security, and evacuation functions.

Law enforcement personnel assigned as an Agency Representative or collocated with personnel from other disciplines should, as necessary, relay mission-tasking requests to the appropriate law enforcement function (such requests may be directed to a Police or Sheriff's Department Operations Center). The circumstances may be reversed if there is a law enforcement Incident Commander. The ICS organization should be flexible enough to absorb discipline-related idiosyncrasies without causing delays in emergency response operations.

Flexibility by law enforcement personnel also is required to accommodate members of other disciplines whose day-to-day activities are not geared to emergency response. Although it is their responsibility to fit into the ICS environment, any assistance and courtesy shown will ease tensions and facilitate future cooperation.

Under some conditions, there will be representatives of the federal government participating at the Incident Command Post. In some cases federal agents will be providing federal resources in a support mode and in other cases involving terrorism, weapons of mass destruction, or national security, a federal agency (e.g., FBI) becomes the lead Federal Agency, locals remain the lead local agency.

Refer to the Glossary of this guide for formal definitions of “Terrorism” and “Weapons of Mass Destruction.”

Usually local government provides the first response. If a federal agency becomes involved, typically there will be policy level discussions to determine jurisdictional imperatives and an orderly transition of authority, if necessary. If such a transition occurs, levels of continued local involvement will be clearly communicated. The federal government does respect the SEMS/ICS system; therefore, state and local agencies will continue to function within that structure.

Should an emergency or incident occur where a local agency would like guidance in implementing ICS, the Law Enforcement Branch of the California Governor’s Office of Emergency Services will maintain a roster of personnel who are proficient in the use of ICS and will respond under mutual aid to provide consultation and make recommendations to facilitate the use of ICSS principles.

Contact the Law Enforcement Branch Duty officer at **(916) 845-8700** or **(916) 845-8911**

REIMBURSEMENT INFORMATION:

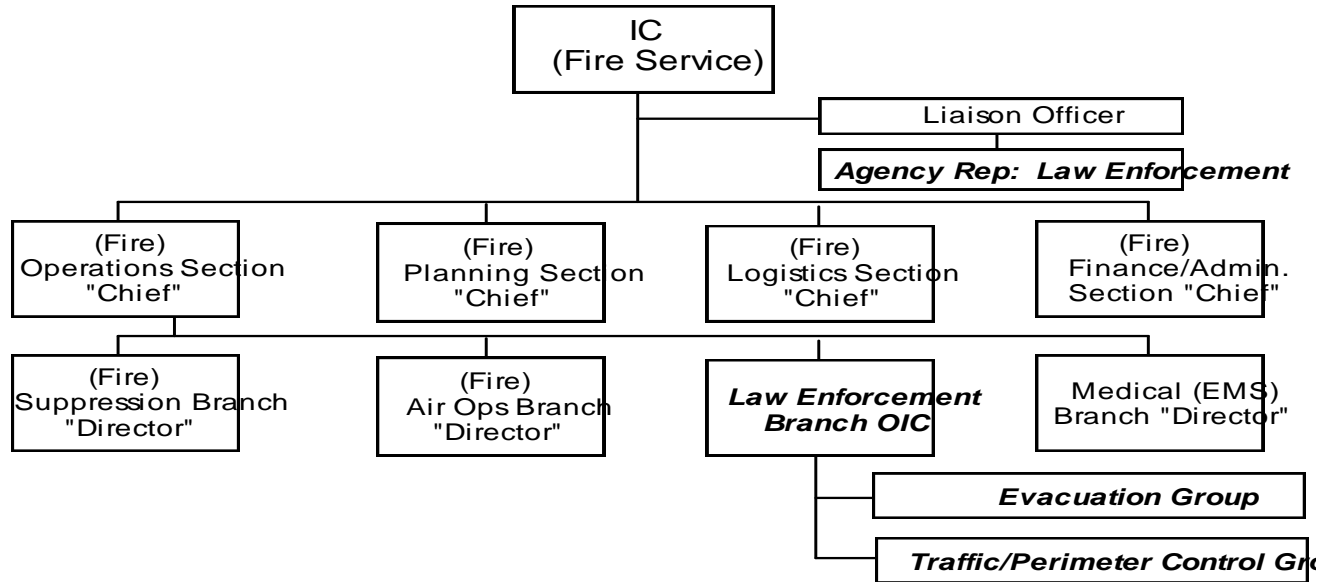

Law Enforcement Mutual Aid (LEMA) is typically provided voluntarily as agreed to statewide in the California Master Mutual Aid Agreement. The California Emergency Services Act, Article 11, Sections 8615 through 8619, outlines circumstances under which mutual aid provisions are implemented.

For some incidents, extraordinary emergency or disaster response costs may be incurred. California Emergency Services Act, Section 8690.6 establishes parameters and provides financial assistance for LEMA cost recovery when the incident or disaster results in a Governor's State of Emergency Proclamation.

Although financial assistance may not be available in every case, the California Governor’s Office of Emergency Services Law Enforcement Branch will respond to inquiries from local law enforcement to facilitate the reimbursement process. Please contact the Law Enforcement Branch at **(916) 845-8700** to obtain reimbursement advice and application documents.

EXAMPLE 1: Limited Law Enforcement Involvement (Wildland Fire)

EXAMPLE 2: Extensive Law Enforcement Involvement (Major Civil Disorder with Numerous Fires and Injuries)

ICS ADVISORS

SECTION III

Law Enforcement Incident Command System:

In 1970, Southern California experienced a fire season of disastrous proportion. In a 13 day period, 16 lives were lost, 772 structures were destroyed and 600,000 acres were burned. The disaster of Southern California provided the impetus for the subsequent development of the *Incident Command System (ICS)*.

Following the Southern California fires, the U.S. Forest Service issued a formal Research Development and Application Charter to design an all risks management system that would assist firefighting agencies in improving effectiveness and coordination in combating multi-jurisdictional fires. The system was to provide an effective means to deal with emergencies of any nature.

The five-year design effort led to a program named FIRESCOPE (Firefighting Resources of Southern California Organized for Potential Emergencies), who's main product turned out to be the Incident Command System. The origins of the Incident Command System actually can be traced back to the Military Re-Organization Act of 1920 that brought the entire United States military under the G-1, G-2, G-3, G-4 organizational system for the management of our total military efforts.

Today, ICS forms the basis of the National Incident Management System (NIMS) that has been mandated under the February 28, 2003 Homeland Security Presidential Directive – 5, *Management of Domestic Incidents*. In his September 8, 2004, letter to all the U.S. Governors, Homeland Security Secretary Tom Ridge stated: *“The 9/11 Commission Report recommended national adoption of the Incident Command System (ICS) to enhance command, control, and communications capabilities. All federal, state, territory, tribal, and local jurisdictions will be required to adopt ICS in order to be compliant with the NIMS. In order to receive fiscal year 2006 preparedness funding, the minimum fiscal year 2005 compliance requirements must be met.”*

Because of our efforts here in California with SEMS, we are significantly ahead of this requirement. Please see: www.fema.gov/nims. ICS has been tried, proven, and highly refined since its conception. Its effectiveness as an emergency management system is now mandated throughout the United States.

The *Law Enforcement Incident Command System (ICS)* provides a management structure and system for conducting on-site emergency operations. It is applicable to small-scale daily operational activities as well as major mobilizations. Because of its standardized operational structure and common terminology, ICS provides a useful and flexible management system that is particularly adaptable to incidents involving multi-jurisdictional or multi-discipline responses.

ICS provides the flexibility needed to rapidly activate and establish an organizational format around those functions that need to be performed.

ICS Operating Requirements:

The following are operating requirements of the Incident Command System (ICS):

The system provides for the following types of operations:

- Single jurisdiction responsibility with single agency involvement.
- Single jurisdiction responsibility with multi-agency involvement.
- Multi-jurisdiction responsibility with multi-agency involvement.

The system's organizational structure is able to adapt to any emergency to which public safety would be expected to respond.

- The system is applicable and acceptable to all user agencies.
- The system is able to expand in a rapid manner from an initial response to a major incident. It is able to reduce its size just as rapidly as the organizational needs of the situation decrease.
- The system has common elements in organization terminology and procedure, which allows maximum application. Implementation of the ICS system should cause the least disruption to existing systems.
- The system is effective in fulfilling all the above requirements and is simple enough to insure ease of understanding.

The Law Enforcement Incident Command System (ICS):

Management Concepts:

- Common Terminology
- Modular Organization
- Unified Command Structure
- Action Planning
- Manageable Span of Control
- Pre-designated Incident Facilities
- Comprehensive Resource Management
- Integrated Communications
- Area Command

Common Terminology:

It is essential for any management system that common terminology be established for the following components: organizational functions, resources, and facilities.

Organizational Functions:

Refers to a standard set of five major pre-designated functions:

- Command
- Operations
- Planning/Intelligence
- Logistics
- Finance/Administration

Resources:

This refers to the combination of personnel and equipment used in tactical operations.

Facilities:

Refers to common identifiers used for those facilities in and around the incident area, which will be used during the course of the incident. These facilities include the Command Post, staging areas, etc.

Modular Organization:

The ICS organizational structure develops in a modular fashion based on the nature, size, and anticipated duration of an incident. The intent of this modular feature is that at each level:

1) only those functional elements that are required to meet current objectives need to be activated, and 2) that all elements of the organization can be arranged in various ways within or under the five SEMS essential functions.

The functions of any non-activated element will be the responsibility of the next highest element in the organization. Each activated element must have a person in charge of it that is based on job expertise and qualifications. Rank is not necessarily the sole determinant when filling ICS positions. It is also possible that one OIC may be in charge of more than one functional element.

The concept of using this structure within the SEMS Field Response organization is based on the following:

- Develop the form of the organization to match the function(s) to be performed.
- Fill only those organizational elements that are required.
- Stay within recommended span of control guidelines.
- Perform the function of any non-activated organizational element at the next highest level.
- De-activate elements no longer required by the incident.

The designated organizational elements established for use in the Incident Command System are listed below. How these are applied in ICS will vary slightly from section to section within the organization.

- Command
- Section
- Branches
- Divisions or Groups
- Units
- Teams, Task Forces (e.g., Mobile Field Force), single resources or other elements are defined by agency policy.

Within the ICS the first management assignments will be made by the Incident Commander and will normally be a Section Officer-In-Charge (OIC). The purpose of the Section OIC is to manage specific functional areas. Section OICs may delegate further management authority for their areas as required. If the Section OIC realizes the need, other functional branches may be added within the section. Similarly, each functional Branch OIC will assign further individual tasks within the branch as needed.

Most law enforcement operations remain at a level that the organization does not expand. It remains small in most instances, so only activate what is actually needed!

Unified Command Structure:

Unified Command is a procedure that allows all agencies with significant geographical, legal or functional responsibility over an incident to avoid operational conflicts, economize resources by collocating at a single Incident Command Post and communicate their operational goals and strategies to each other during structured planning meetings.

The value of establishing a single Unified Incident Command Post during the initial response to a multi-jurisdictional or multi-disciplinary incident cannot be over-emphasized. It is essential to an effective response.

Unified Command is not a committee process. Rather, it is a cooperative process by which agencies share their objectives and operational plans in a structured process, thereby facilitating timely communication of accurate information and avoiding operational conflicts. Agencies do not relinquish their lawful authority, responsibility or jurisdiction and retain appropriate accountability.

Ideally, for incidents of long duration, a collective set of incident objectives is established and an integrated Incident Action Plan is developed.

Unified Command is highly flexible. As the incident changes over time with different disciplines moving into primary roles; the Unified Command structure and personnel assignments change to meet the need.

Primary Features of a Unified Command:

- A single unified Incident Command Post.
- An integrated planning process and Incident Action Plan.
- Shared operations, planning, logistical and finance/administration functions.
- Coordinated resource ordering.
- Coordinated information released to the news media, community, and others.

Advantages of a Unified Command:

- One set of objectives is developed for the entire incident.
- A collective approach is used to develop strategies to achieve incident goals.
- Information flow and coordination is improved between all jurisdictions and agencies involved in the incident.
- All agencies with responsibility for the incident have an understanding of joint priorities and restrictions.
- No agency's authority or legal requirements will be compromised or neglected.
- Each agency is fully aware of the plans, actions and constraints of all others.
- The combined efforts of all agencies are optimized as they perform their respective assignments under a single Incident Action Plan.
- Duplicative efforts are reduced or eliminated, thus reducing cost and chances for frustration and conflict.

Collective goals and strategies on major multi-jurisdictional incidents should be in written format. The goals and strategies will then guide development of the action plan. Under the Unified Command structure of ICS, the implementation of the action plan is still accomplished under the direction of the designated Operations OIC.

The Operations OIC will usually be selected from the agency having the most jurisdictional involvement. All agencies involved with functional responsibilities in the incident and represented in the Unified Command structure will agree on the selection and designation of the Operations OIC. Other jurisdictional agencies may be represented as deputies to the Operations OIC.

Action Planning:

An Action Plan is also referred to as "Incident Action Plan, Consolidated Action Plan, or Operations Plan."

Every incident requires an action plan. Though not always accomplished in a documented format for small incidents of short duration, a *written* action plan should be developed and implemented when:

- Resources from multiple agencies are used.
- Multiple jurisdictions are involved.
- The incident will require a change in shifts of personnel and/or equipment.

The plan should cover all tactical and support activities. The Incident Commander (or Unified Command) will establish goals and determine strategies for the incident based upon the requirements of the jurisdiction. Within the Unified Command, the incident objectives must adequately reflect the policy needs of participating agencies.

Manageable Span of Control:

Safety factors, as well as sound management principles, will dictate span of control considerations. The span of control should range from three to seven subordinates with a span of control of five being established as optimal and acceptable, generally.

The type of incident, nature of tasks to be performed, and safety factors are all important management considerations in determining OIC/subordinate ratio. The changes that occur during a rapidly developing situation are another consideration in determining span of control. Planning for change is essential at such times to avoid indiscriminate resources ordering, which will directly affect span of control effectiveness.

Pre-Designated Incident Facilities:

Certain facilities and locations should be designated in the pre-emergency phase for use during emergency events. The determination of these facilities and their locations will be based upon the requirements of the incident and at the direction of the Incident Commander. The Incident Commander will cause the activation of these facilities as needed at the outbreak of the emergency event. These facilities may be used as:

- Staging Areas
- Command Posts
- Mass Care Centers
- Evacuation Centers

Comprehensive Resource Management:

Resources may be organized as either single resources or as task forces (e.g., mobile field force). Strict accountability is absolutely essential and can be accomplished by:

- Establishing mandatory initial check-in procedures.
- Assigning a current status condition.
- Ensuring all changes to resources, locations and status conditions are reported promptly to the appropriate functional unit.

Check-In Procedures:

ICSS has a simple and effective check-in process for personnel, supplies, and equipment.

Personnel: Most personnel responding to an incident should report to the Staging Area and check-in with the Staging Manager (or the Check-In Recorder assigned to the Staging Area from the Personnel Unit, if activated). However, when it is not practical to report directly to the Staging Area, such as the case when units respond directly to field assignments, then it is the responsibility of the single units or the appropriate OIC to report (usually via radio) all checked-in personnel under his/her command to the Personnel Unit in the Logistics Section.

Supplies and Equipment: Most supplies and equipment assigned to an incident should be delivered to the Staging Area and checked-in with the Staging Area Manager (or the Receiving/Distribution Officer assigned to the Staging Area from the Supply Unit if activated). However, when it is not practical to report directly to the Staging Area, such as the case when

supplies are delivered directly to field assignments, and then it is the responsibility of the single units or the appropriate OIC receiving the supplies or equipment to report receipt of supplies and equipment to the Supply Unit in the Logistics Section.

To summarize, personnel check-in with the Personnel Unit (Check-In Recorder) at the Staging Area and *supplies and equipment* check-in with the Supply Unit (Receiving/Distribution Officer). If neither of these positions are activated (or if in doubt), then simply report to the Staging Area Manager for direction.

ICS Form 211 (Check-In List) is designed to assist OICs with recording checked-in personnel, equipment, and supplies.

Integrated Communications:

Communication systems require advanced planning. This planning should include the development of frequency inventories, which will support tactical and support resources, frequency sharing agreements, use of synthesized mobile/portable radio equipment, cellular phones, and the use of available state and federal communications equipment.

Communications should be established at an incident based communications center.

Note: All radio communications should be transmitted in *clear text*, agency specific codes should not be used.

Area Command:

As a part of the general guidance related to the SEMS Field Response, it may be appropriate to consider the use of Area Command.

In ICS, Area Command is an organization that is established primarily to oversee the management of multiple incidents that are each being handled by an Incident Command System organization. An Area Command also may be conducted as a Unified Area Command.

The Purpose of an Area Command is to:

- Set overall priorities within the geographical area covered by the Area Command.
- Determine appropriate strategies for use in achieving the priorities.
- Allocate critical resources based on priorities.
- Ensure that incidents are properly managed.
- Ensure that objectives are met, and strategies followed.

Area Command Reporting Relationships: When Area Command is established, Incident Commander(s) for the incidents under the authority of the Area Command will report to the Area Commander. The Area Commander is accountable to his/her agency or jurisdictional executive or administrator. This could be the DOC, EOC, or another location. It is important to note that Area Command is a command function of *field* response and not an EOC function.

At a minimum, this would include:

- Collect and review incident action plans for all incidents within the area.
- Coordinate priorities and objectives for all incidents within the established area.
- Ensure communication and coordination between all incident commands within the area.
- Collect, review and coordinate incident communication plans.
- Ensure effective span of control.

- Use common terminology as appropriate to the situation.
- Delegate authority and activate organizational elements within the ICS structure as needed or anticipated.
- Provide for personnel accountability and a safe environment.

Advantages of Using Area Command:

Much of the inter-incident coordination normally required of each IC will be accomplished at the Area Command level. Using an Area Command allows the Incident Commanders and their incident management teams to focus attention on their assigned incident.

Area Command sets priorities between incidents and allocates critical resources according to priorities established by the Agency Executive.

Area Command helps the agency executive by ensuring that agency policies, priorities, constraints and guidance are being made known to the respective Incident Commanders.

Area Command also reduces the workload of the agency executive, especially if there are multiple incidents occurring at the same time.

Requirements in Establishing Area Command:

The following requirements apply to either an Area Command or a Unified Area Command:

Incident Commanders covered by the Area Command must be notified that an Area Command is being established.

The Area Command team should consist of the best qualified personnel with respect to their functional areas. The functions of Area Command require personnel that have experience in, and are qualified to oversee, complex incident situations.

The Area Command organization operates under the same basic principles as does the Incident Command System.

The Area Command organization should always be kept as small as possible.

Area Command organizational positions could consist of:

- Area Commander and, only as necessary:
- Area Command Logistics OIC (Section Chief)
- Area Command Planning/Intelligence OIC (Section Chief)
- Area Command Critical Resources Unit OIC (Leader)
- Area Command Situation Unit OIC (Leader)
- Area Command Public Information Officer
- Area Command Liaison Officer

It is important to remember that Area Command does not in any way replace the incident level ICS organizations or functions. The above positions, if established, are strictly related to Area Command operations. Specific duties and responsibilities will be established by the Area Commander.

Incident Commanders under the designated Area Commander are responsible to, and should be considered as part of, the overall Area Command organization. They must be provided adequate and clear delegation of authority.

An Area Command or Unified Area Command should develop an action plan concerning the priorities, objectives and needs of the Area Command.

The plan should:

- Clearly state agency policy, objectives, and priorities, including priorities for critical resource allocations.
- Provide an organization with clear lines of authority and communications.
- Identify specific functions to be performed at the Area Command versus those incidents such as in the area of public information.

Area Command facilities may be co-located at department operations centers, EOCs, or other locations. It is recommended that they not be established in conjunction with an existing Incident Command Post (ICP).

A training module dedicated to Area Command is included in the SEMS Field Level course of instruction.

ICS Position Assignment and Responsibilities:

Command Staff:

The Command Staff consists of the Incident Commander, Deputy Incident Commander, Public Information Officer, Incident Scribe, Safety Officer (when activated), and Liaison Officer. See organization chart on page 47.

Incident Commander (IC):

The Incident Commander is responsible for all incident activities including the development of strategies and tactics and the ordering of and the release of resources. The Incident Commander has complete authority and responsibility for the conduct of overall operations.

It is operationally imperative that the Incident Commander delegate authority and assignments to qualified subordinates. This is best accomplished through "mission tasking." Mission tasking allows the IC to give direction to subordinate OICs in broad parameters without suppressing initiative of those responsible for the detailed execution of action plans. The authority of the Incident Commander is exercised to direct and control the work effort of subordinates and influence the outcome of the coordinated actions.

Duties and Responsibilities:

- Establish incident command post.
- Assess the evolving emergency situation and establish priorities of action.
- Assign necessary staff.
- Activate needed ICS elements and selected Section OICs.
- Conduct initial briefing and begin planning and intelligence process.
- Approve all plans, incident action plan, resources orders, media releases, and the demobilization plan.
- Ensure coordination of staff actions and activities.
- Manage incident operations through the use of an Operations Section OIC.

Deputy Incident Commander:

In large incidents, the Deputy Incident Commander position may be activated. The Deputy Incident Commander is the principal assistant to the IC and possesses the qualifications and authority to act on the IC's behalf in his/her absence. The Deputy Incident Commander receives duty assignments and staff direction from the IC.

Duties and Responsibilities:

- Assume interim command of all operational functions in the absence of the IC.
- Verify task completion by functional areas.
- Appoint agency representatives to outside agencies' EOCs.
- Request liaison personnel from outside agencies involved in the emergency.
- Review and ensure completion of all administrative duties, situation reports, logs, journals, section activities reports.
- Assist the IC as directed.

Public Information Officer (PIO):

The Public Information Officer, a member of the Command Staff, is the sole person responsible for the formulation and release of information to the media as directed by the IC. In the Unified Command, though many agencies represented may have a PIO, a single Public Information Officer for the Unified Command is appointed. All releases are approved by the Incident Commander or Unified Command Structure.

Duties and Responsibilities:

- Establish an information center separate from all other activities when possible.
- Arrange for work space, materials and staffing.
- Prepare initial information summary and maintain file of all subsequent summaries.
- Obtain IC approval for all press releases.
- Releases approved current information to the media and post the releases at the incident command post promptly.
- Arrange meetings between incident personnel and the media.
- Provide media escort services for media and VIPs.
- Observe all constraints on news releases imposed by the IC.
- Maintain a unit log.

Incident Scribe:

The activation of this position is at the discretion of the Incident Commander. The functions of this position generally are conducted by the Planning/Intelligence Section when activated. At the direction of the Incident Commander, the Incident Scribe shall record information from all incident message forms with reference to time, message, and action taken.

Duties and Responsibilities:

- Maintain and periodically distribute a situation report.
- Gather incident-related information from other sections for entry into the Command Post Log.
- Refer newsworthy information to the Public Information Officer.
- Ensure all messages are appropriately routed.

Safety Officer:

The Safety Officer reports directly to the IC. This position is *mandated* by Cal OSHA for all hazardous materials incidents. For other incidents, when activated, the Safety Officer is responsible for monitoring and assessing hazardous and unsafe situations and developing measures for assuring personnel safety. The Safety Officer has the authority to stop all unsafe activity on an incident that is deemed to be *outside the scope of the incident action plan*.

At major disasters or at particularly traumatic events, the Safety Officer typically coordinates the response and deployment of Critical Incident Stress Management (CISM) personnel. It should be noted that CISM is a professional psychological function and should not be attempted at a layperson level without professional guidance. Nevertheless, CISM is an important health issue for response personnel and planning efforts should include provisions for its implementation.

Liaison Officer:

The Liaison Officer is a member of the Command Staff and is the point of contact for assisting agency representatives. This may include representatives from other law enforcement agencies, fire services, emergency medical providers, Red Cross, Public Works, Coroner's Office, Health Services, etc. The Liaison Officer will be from the agency having jurisdictional responsibility for the emergency.

Duties and Responsibilities:

- Obtain a briefing from the Incident Commander.
- Provide a point of contact for assisting mutual aid agency representatives.
- Identify agency representatives from each agency including the Communications link and their location.
- Respond to requests from incident personnel for their inter-organizational contacts.
- Monitor the incident operations to identify what might be potential inter-organizational problems.
- Provide information and maintain a liaison with other Government and Law Enforcement agencies.
- Maintain a unit log.

Agency Representatives:

An individual is assigned from an assisting agency that has the delegated authority to make decisions affecting that agency's participation in emergency operations. Upon arriving at the designated staging area, the Agency Representative reports to the Liaison Officer. Each responding agency should assign only one representative to the incident.

Duties and Responsibilities:

- Ensure that all agency resources have checked-in.
- Obtain situation briefing from the Liaison Officer.
- Establish a working location and notify agency personnel that the Agency Representative position has been filled.
- Attend planning meetings as required.
- Provide input regarding the use of agency resources.

Operations Section:

The Operations Section holds the responsibility for the coordinated tactical response of the incident. This may include, but is not limited to, the deployment of personnel in response to a civil disorder, coordinated response to an evacuation, support of fire services, coordinated response to rescue operations, etc.

Operations Section OIC:

The Operations Officer, also identified as the Operations Officer-In-Charge (OIC), is responsible for the implementation and management of all operational plans and supervises the Operations Section. The Operations Section OIC activates and supervises the organizational elements of the response in accordance with the Incident Action Plan and directs its implementation. The Operations Section OIC also coordinates unit tactics with other staff members, requests or releases resources, makes situational changes to the plan as necessary and reports such changes to the Incident Commander.

Duties and Responsibilities:

- Obtain a briefing from the IC.
- Exercise direction and control over on-going operational activities in accordance with the incident action plan.
- Supervise and direct section personnel.
- Coordinate Operations Section activities with all other staff sections.
- Recommend a location for a Staging Area to the Incident Commander.
- Recommend the site locations for support activities.
- Assist in determining additional needed resources.
- Ensure that all resources in the field have been reported to the Logistics Section for proper check-in accounting and to secure proper support for food, lodging, supplies, etc.
- Advise the IC on all developments and changes in the tactical situation.
- Maintain a unit log.

Operations Dispatcher:

The Operations Dispatcher functions under the control of the Operations OIC. The dispatcher manages and controls all tactical radio and data frequencies used in support of the emergency incident. In major disasters or complex emergency events, a supervising dispatcher may be activated.

Duties and responsibilities:

- Dispatch field units as directed by the Operations OIC.
- Maintain unit designation board depicting status and availability of field operations staff.
- Coordinate activities of the unit and with other agency dispatchers.
- Maintain a unit log.

Branch:

The Branch OIC functions within the Operations Section. The Operations Section OIC will assign specific portions of the incident action plan to the Branch OIC for implementation. The Branch OIC retains authority and control of resources assigned to accomplish tasks. Routine status on conditions and progress are provided to the Operations OIC.

Duties and Responsibilities:

- Review assignments with subordinate staff and modify where appropriate.
- Attend planning meetings when requested.
- Assign specific tasks to mission group OICs.
- Provide timely information to the Field Operations OIC on situation changes, rescues, plans modifications and hazards.
- Maintain a unit log.

Group/Division:

The Group (or Division) OIC functions within the Operations Section. "Groups" are activated upon identified need in the incident action plan for a specific *function* (i.e., Perimeter Control Group, Security Group, Traffic Control Group, and Evacuation Group). "Divisions" are activated to coordinate operations in a specific *geographic* area.

Duties and Responsibilities:

- Implementation of assigned portions of the action plan.
- Task assignments within the group or division.
- Progress and situation reports to the Branch OIC or the Operations Section OIC.
- Maintain a unit log.

Mobile Field Force:

The Mobile Field Force is a type of specialized "Task Force." It is similar to the concept of a "Strike Team" in the fire service. The Mobile Field Force OIC functions within the Operations Section. When activated it is responsible for specific tactical assignments. Assignments may include: traffic/crowd control, site evacuations and security; reports progress on mission assignments to the next higher OIC level.

Duties and Responsibilities:

- Reviews assignment with subordinates.
- Makes essential changes to plans.
- Coordinates with adjacent task forces and units.
- Reports situation and resources status to next higher level.
- Maintains a unit log.

Staging Officer:

The Staging Officer, also referred to as the Staging Area Manager, under the direction of the Operations OIC is responsible for maintaining a location where personnel and equipment can be staged to support an incident.

Duties and Responsibilities:

- Obtain a briefing from the Operations OIC.
- Establish a staging area layout.
- Determine any support needs for equipment, feeding, sanitation and security.
- Coordinate with the Personnel Unit (Check-In Recorder) and the Supply Unit (Receiving/Distribution Officer) so that arriving resources (personnel, supplies, and equipment) can easily find the check-in and stand-by locations. If these positions are not staffed, then the Staging Officer is responsible for the check-in process at the Staging Area and making resource status reports to the Resources Unit.
- Request maintenance service for equipment at the staging area as appropriate.

- Arrange for storage facilities for impounded vehicles.
- Supervise the parking and safeguarding of law enforcement personnel's private vehicles, which may be parked at or near the staging area.
- Demobilize the staging area in accordance with incident demobilization plan:
- Ensure a clean up of the staging area.
- Assess any damage to the staging area property/facilities.
- Remove all equipment and supplies from within the staging area.
- Maintain a unit log.

Air Operations Branch:

Decision to Activate: *The Air Operations Branch may be activated whenever aircraft are deployed on an incident requiring mission assignment coordination, establishment of helispots or a helibase, or to address any aviation safety concerns requiring full time attention. Only persons knowledgeable in aircraft operations and aviation procedures should be assigned to the leadership positions within the Air Operations Branch. Refer to "Air Operations Checklist" in the Annex Section of this guide.*

The Air Operations Branch OIC reports to the Operations Section OIC. The Air Operations Branch OIC, who is ground based, is primarily responsible for input to the air operations portion of the Incident Action Plan. The plan will reflect agency restrictions that have an impact on the operational capability or utilization of resources (e.g., night flying, hours per pilot). After the plan is approved, the Air Operations Branch is responsible for implementing its strategic aspects - those that relate to the overall strategy as opposed to those that pertain to tactical operations. Specific tactical activities are normally performed by the Air Mission Group OIC working with ground and air resources. Additionally, the Air Operations Branch OIC is responsible for providing logistical support to aircraft operation on the incident.

Air Mission Group:

The Air Mission Group OIC is primarily responsible for the coordination of aircraft operations when fixed and/or rotary-wing aircraft are operating on an incident. The Air Mission Group OIC reports to the Air Operations Branch OIC.

Aviation Support Group:

The Aviation Support Group OIC is primarily responsible for supporting and managing helibase and helispot operations and maintaining liaison with fixed-wing air bases. This includes providing (1) fuel and other supplies, (2) maintenance and repair of aircraft, (3) keeping records of aircraft activity, and (4) providing enforcement of safety regulations. Helicopters during landing and take-off and while on the ground are under the control of the Aviation Support Group's Helibase or Helispot Managers. The Aviation Support Group OIC reports to the Air Operations Branch OIC.

Planning/Intelligence Section:

The Planning/Intelligence Section collects, evaluates, processes, and disseminates information for use at the incident. Additionally, the Planning/Intelligence Section reviews and develops incident intelligence information to assist in development of contingency plans for the Incident Commander. The section also prepares briefings for the Incident Commander and the Emergency Operations Center's staff related to new or updated intelligence information.

Planning/Intelligence Section OIC:

The Planning/Intelligence Officer, also identified as the Planning/Intelligence Section OIC, is a member of the General Staff and is responsible for the operation of the Planning/Intelligence Section. This position provides information needed to understand the current situation, predicts probable course of incident events, assists in preparing alternative strategies and control operations for the incident, and coordinates with other staff members.

Duties and Responsibilities:

- Collect and process situation information about the incident.
- Provide input to the Incident Commander (IC) and Operations Section OIC in preparing the Incident Action Plan.
- Supervise preparation of the Incident Action Plan.
- Establish information requirements and reporting schedules for Planning Section units (e.g., Resources, Situation Units).
- Determine need for any specialized resources in support of the incident and serve as liaison to all technical specialists.
- If requested, assemble and disassemble task forces not assigned to operations.
- Establish special information collection activities as necessary. Examples: weather, toxic hazards, suspect profiles.
- Assemble information on alternative strategies.
- Provide periodic predictions on incident potential.
- Report any significant changes in incident status.
- Compile and display incident status information.
- Inform the IC of termination trends in the incident and oversee preparation of Incident demobilization plan.
- Incorporate the incident traffic plan (from Ground Support) and other supporting plans into the Incident Action Plan.
- Obtain briefings from the IC and the Operations Officer.
- Activate and supervise the needed Planning/Intelligence Branches/Groups.
- Schedule and conduct intelligence briefings and debriefings.
- Deploy intelligence group(s) as needed to gather information.
- Maintain a unit log.

Resources Unit (RESTAT):

The Resource Unit OIC, also referred to as the RESTAT Unit OIC, functions within the Planning/Intelligence Section. The Resource Unit is responsible for the preparation, processing and reporting of resource *status change* information. The Resources Unit tracks personnel and equipment status relating to the incident.

Duties and Responsibilities:

- Obtain briefings and special instructions from Planning/Intelligence Section OIC.
- Maintain liaison between Operations and Logistics Sections concerning needed and acquired resource movement.
- Prepare and maintain command post displays.
- Assign duties to Resource Unit personnel.
- Participate in Planning/Intelligence Section meetings.
- Maintain incident tactical resource status log.
- Prepare Organizational Assignment List and the Organizational Chart.

- Prepare appropriate parts of Division Assignment Lists.
- Provide resources summary information to Situation Status Unit as required.

Situation Unit (SITSTAT):

The Situation Unit OIC, also known as the SITSTAT Unit OIC, functions within the Planning/Intelligence Section. The OIC is responsible for the collection and organization of incident situation and status information. The OIC performs analysis, evaluations and displays that information for use by ICS staff and agency personnel.

Duties and Responsibilities:

- Obtain a briefing and special instructions from Planning/Intelligence Section OIC.
- Supervise the preparation and maintaining of command post displays of incident information.
- Assign duties to Situation Unit personnel.
- Collect incident data for duration of incident.
- Monitor media broadcasts.
- Obtain sound and video recordings, photographs, of the incident when feasible.
- Prepare estimates at periodic intervals or upon request.
- Post data on unit work displays and command post displays at scheduled intervals.
- Participate in incident planning meetings as required.
- Prepare Incident Status Summaries.
- Prepare Traffic Plan (external and internal to the incident).
- Provide photographic services and maps.
- Provide resource and situation status information in response to specific requests.
- Maintain Situation Unit records.

Field Observers:

Field Observers are a part of the Situation Status Unit. When activated they are responsible for the collection of information by personal observations at the incident (e.g., law enforcement officers working plain clothes as part of a large demonstration). They provide information to the Situation Unit OIC.

Duties and Responsibilities:

- Obtain a briefing from the Situation Unit OIC.
- Make a determination of the assignment, type of information, and priorities.
- Set time limits for completion, method of communication, and method of transportation.
- Obtain the necessary equipment and supplies for field duties.
- Perform field observations.
- Report information to Situation Unit by established procedure.

Casualty Information:

Casualty Information is a part of the Situation Status Unit and establishes a centralized location for recording all incident-related casualties. Information sources for casualty information may include, but are not limited to, the County Coroner's or Medical Examiner's Office, Emergency Medical Services, Fire Services, Red Cross, etc.

Casualty Information shall ensure that there is accurate reporting of information concerning deaths, injuries, missing and returned persons and that Casualty Information is not released to the media or public without authorization of the Incident Commander.

NOTE: Information regarding casualties of law enforcement, fire services, and other involved response agencies shall remain separate from other casualty information.

Duties and Responsibilities:

- Liaison is established with the American Red Cross and others to obtain information regarding evacuation centers and evacuees.
- Liaison is established with the Coroner for the flow of information regarding incident-related deaths.
- Liaison is established with medical providers to obtain casualty information.
- Personnel are assigned and deployed to hospitals, first-aid stations, and morgues to acquire casualty information.
- A listing of designated hospitals, evacuation centers, temporary first-aid stations and morgue facilities is compiled and available to the Operations Section.
- Maintain a unit log.

Display Processor:

The Display Processor is a part of the Situation Status Unit, and is responsible for the display of incident status information obtained from field observers, casualty information, resource status reports, aerial and other photos, and other informational data.

Duties and Responsibilities:

- Obtain a briefing and assignment from the SITSTAT Unit OIC.
- Make a determination of:
 - Numbers, types and locations of displays required and priorities.
 - Map requirements for incident action plan and time limits for completion.
- Obtain the necessary equipment and supplies.
- Obtain a copy of the incident action plan for each operational period.
- Assist the SITSTAT OIC in analyzing and evaluating field reports.
- Develop required displays in accordance with the time limits for completion.

Weather Observer:

The Weather Observer functions within the Situation Status Unit and is responsible for collecting incident-related weather information - past, present, and forecasted. Providing weather information is especially critical during fires, a hazardous materials incident, or during times of heavy rains.

Duties and Responsibilities:

- Obtain a briefing from the SITSTAT OIC.
- Make a determination of:
 - Nature and location of weather systems.
 - Weather data collection methods to be used and priorities for collection;
 - Frequency of reports and method of reporting.
- Record and report weather observations.

Documentation Unit:

The Documentation Unit OIC functions within the Planning/Intelligence Section and is responsible for maintaining accurate and complete incident files. The unit also provides duplication services to incident staff personnel and at the termination of the emergency incident packs and stores incident files for legal and historical purposes.

Duties and Responsibilities:

- Establish and organize incident files.
- Establish duplication services.
- Retain and file copies of official forms and reports.
- Collect and file reports and forms submitted by other incident organizational units.
- Check accuracy and completeness of records submitted for files.
- Contact appropriate units regarding errors or omissions.
- Provide copies of forms and reports to authorized personnel.
- Prepare incident documentation for the Planning/Intelligence Section OIC.
- Store and maintain incident files for after incident use.
- Collect other section/unit logs for historical record purposes.
- Maintain a unit log.

Demobilization Unit

The Demobilization Unit OIC functions within the Planning/Intelligence Section and is responsible for the preparation of the demobilization plan and assisting incident sections/units to ensure that an orderly, safe and cost effective movement of personnel and equipment is accomplished following the emergency incident.

Duties and Responsibilities:

- Review incident resources records to determine probable size of demobilization effort.
- Assess and fill Unit's Demobilization needs for additional staff personnel.
- Confirm the Incident Command objectives, priorities, and constraints on demobilization.
- Meet with Agency Representatives to determine those agencies not requiring formal demobilization; personnel rest and safety considerations; coordination procedures with cooperating/assisting agencies.
- Be aware of ongoing Operations Section resource needs.
- Identify surplus resources and probable release times.
- Determine finance, supply and other incident check-out procedures.
- Evaluate incident logistics and transportation capabilities to support the demobilization effort.
- Establish communications links with appropriate off-incident facilities.
- Prepare demobilization plan - plan to include the following sections:
 - General - Discussion of demobilization procedures.
 - Responsibilities - Specific implementation responsibility and activity.
 - Release Priority - According to agency, kind, and type of resources.
 - Release Procedures - Detailed steps and process to be followed.
 - Directories - Maps, telephone numbers, instructions, etc.
- Confirm approval of Demobilization Plan. Distribute plan to all processing points (on and off incident).
- Ensure that all section/units understand their responsibilities within the plan.
- Assist in the implementation and coordination of the Demobilization Plan.

- Brief Planning/Intelligence Section OIC on progress of demobilization.
- Complete all records prior to departure.
- Maintain a unit log.

Technical Specialists:

Technical Specialists are advisors with special skills, which may be needed to support incident operations. When activated they usually function within the Planning/Intelligence Section, but could be assigned to other sections as appropriate.

Technical Specialists may function within an existing branch or form a separate branch, if required, or be reassigned to other sections of the organization (e.g., a chemist may be assigned to the Operations Section to advise the OIC on the technical aspects of probable health hazards or extent of an evacuation for a hazardous materials incident).

A type of technical specialist referred to as a "**Legal Officer**" (usually staffed by a government attorney) can be assigned to the Command Staff to advise the Incident Commander on such legal matters as emergency proclamations, legality of evacuation orders, and legal rights and restrictions pertaining to media access.

Duties and Responsibilities:

- Report to the Planning/Intelligence Section OIC to obtain a briefing and special instructions.
- Participate in the development of an incident action plan and review the general control objectives, including alternative strategies as requested.
- Respond to requests for information about the limitations and capabilities of resources.
- Collect and transmit records and logs to the Documentation Unit at the end of each operational period.

Logistics Section:

All incident support needs (e.g., personnel, equipment, supplies) are provided by the Logistics Section, with the exception of aviation support. Aviation support is handled by the Air Support Group in the Air Operations Branch.

An additional responsibility of the Logistics Section is to develop sources for obtaining materiel support from resources outside of the jurisdiction involved. The Logistics Section will anticipate the staffing needs for the duration of the incident, as well as the acquisition of equipment and supplies, to facilitate an immediate response to a request for logistical support.

This Section will maintain a liaison with stations, facilities, EOCs, Counties and Cities that can provide logistical and personnel support.

The responsibility for maintaining a list of private vendors that can provide logistical support, which includes the DOC/EOC or Command Post operation, is held by the Logistics Section as well as the Security staffing for the DOC/EOC or Command Post.

Logistics Section OIC:

The Logistics Section Officer, also referred to as the Logistics OIC, is responsible for providing facilities, services, staffing and material in support of the incident. In smaller incidents, the Logistics OIC may also be responsible for all financial and cost analysis aspects

of the incident. The Logistics OIC will participate in the development and implementation of the incident action plan as well as activating and supervising the Branches and Groups within the Logistics Section.

Duties and Responsibilities:

- Obtain a briefing from the Incident Commander.
- Plan and coordinate the activities of the Logistics Section and supervising assigned personnel.
- Recommend a location for a staging area to the Incident Commander after consulting with the Operations OIC.
- Assign personnel to staff the Logistics Section as needed.
- Determine the extent of current and anticipated field operations and planning for necessary logistical support.
- Establish contact with Cal OES Mutual Aid Regional Coordinator and other potential resource agencies if applicable.
- Provide, maintain and control selected equipment, supplies, facilities, and commercial services required by the Operations Section.
- Provide security for the Incident Command Post and staging area, and other areas as required.
- Participate in the preparation of an incident action plan.
- Coordinate and process requests for additional resources.
- Provide and advise on current services, support and personnel capabilities.
- Estimate future services, support and personnel requirements.
- Ensure that incident communications equipment requirements are met.
- Recommend the release of resources in conformity with a demobilization plan.

Security Officer:

The Security Officer shall coordinate activities of the Security Unit and supervise assigned personnel under the direction of the Logistics OIC. Additionally, they shall provide security for Incident Command Posts, staging areas, and any location being staffed for the incident. This would also include the security at a DOC/EOC.

Duties and Responsibilities:

- Preparing and submitting a security plan for the Incident Command Post, staging area and other facilities to the Logistics Officer.
- Provide necessary security for the staging area to safeguard equipment and personnel.
- Provide escorts for dignitaries admitted to the Field Command Post or staging area.
- Ensure that security posts are staffed as required.
- Issue various passes to authorized personnel, as needed.
- Deny entrance to unauthorized officers and other persons.
- Notify the Incident Commander of City/County officials and dignitaries requesting to visit the Command Post.
- Maintain a unit log.

Service Branch:

The Service Branch OIC, when activated, is under the supervision of the Logistics Section OIC and is responsible for the management of all service activities at the incident. The Service Branch provides and maintains communication equipment (radio technician may fill this spot), provides medical support to incident personnel, and makes provisions so that assigned personnel can be fed.

Duties and Responsibilities:

- Obtain a briefing from Logistics Section OIC.
- Obtain working materials (e.g., radio equipment, order forms, food ordering procedures).
- Determine the level of service required to support operations (e.g., the number of portable radios needed).
- Participate in planning meetings of the Logistics Section personnel to assist in developing information on service activities (e.g., the amount of food needed, the location personnel can be fed).
- Maintain a unit log.

Communications Unit:

This unit, under the direction of the Service Branch OIC or Logistics Section OIC, is responsible for developing plans for the effective use of incident communications and equipment such as available frequencies or communication capabilities, distribution of communication equipment to incident personnel, and the maintenance and repair of communications equipment.

Duties and Responsibilities:

- Obtain a briefing from the Service Branch OIC or Logistics Section OIC.
- Determine the Communications Unit personnel.
- Advise the Logistics Section OIC regarding communications capabilities/limitations.
- Prepare and implement the incident radio communications plan, if appropriate.
- Ensure that the incident communications and message systems are established.
- Set-up telephone and public address systems.
- Establish appropriate communications distribution/maintenance locations.
- Ensure that communications systems are installed and tested.
- Ensure that an equipment accountability system is established.
- Ensure that radio equipment is distributed, per radio plan, giving special attention to battery re-supply and/or recharging.
- Supervise the Communications Unit activities.
- Maintain records on all communications equipment.
- Recover equipment from relieved or released units.
- Provide technical information as required on the adequacy of communications systems currently in operation and the geographic limitations on communications systems, equipment capabilities, the amount and types of equipment available, and the anticipated problems in the use of communications equipment.
- Maintain a unit log.

Medical Unit:

This unit is responsible for the development of the Medical Plan to support ICS personnel under the direction of the Service Branch OIC. The plan will include information regarding obtaining medical aid, transportation for injured personnel, and preparation of reports and records.

Duties and Responsibilities:

- Obtain a briefing from the Service Branch OIC or the Logistics Section OIC.
- Determine the level of medical activities prior to activation of the medical group. Prepare a Medical Plan, if appropriate.

- Prepare procedures for major medical emergencies with the appropriate health or medical authorities.
- Arrange for medical aid (e.g., paramedics).
- Arrange for medical transportation.
- Arrange for medical supplies.
- Prepare medical reports.
- Maintain a log of all serious injuries/deaths occurring to incident personnel.
- Advise compensation/claims unit of all serious injuries/deaths occurring to incident personnel.
- Maintain a unit log.

Food Unit:

The Food Unit, under the direction of the Service Branch OIC (when activated) or the Logistics Section OIC, is responsible for determining feeding requirements at all incident facilities and/or operational locations. The Food Unit will meet these feeding requirements by procurement or production, as appropriate, to the situation and unit capabilities. Overall responsibilities may include menu planning, determining cooking facilities required for food preparation, serving requirements, providing potable water, and general maintenance of the food service areas.

Duties and Responsibilities:

- Obtain a briefing from the Service Branch OIC or the Logistics Section OIC.
- Determine a method of feeding, which is most appropriate to the situation, and coordinate with the Logistics and Finance Sections.
- Obtain the necessary equipment and supplies to operate the food service facilities.
- Set-up food equipment.
- Ensure that appropriate health and safety measures are taken.
- Ensure that sufficient potable water is available to meet the incident needs.
- Provide a supply unit with food supply orders in advance of feeding time.
- Demobilize the Food Unit in accordance with incident demobilization plan.
- Maintain a unit log.

Support Branch:

When activated, the Support Branch OIC is under the direction of the Logistics Section OIC and is responsible for the development and implementation of logistics plans in support of the incident action plan. This may vary from the ordering of expendable supplies to providing and maintaining vehicular support. The Support Branch OIC supervises the operations of the Facilities, Maintenance, Ground Support, and Supply units.

Duties and Responsibilities:

- Obtain a briefing from the Logistics Section OIC.
- Identify Support Branch Personnel.
- Determine the initial support operations in coordination with the Logistics Officer and the Service Branch.
- Prepare initial organization and assignment for support operations.
- Assemble and brief the Support Branch Personnel.
- Determine if assigned branch resources are sufficient.
- Resolve any problems associated with requests from the Operations Section.
- Maintain a unit log.

Facilities Unit:

The Facilities Unit OIC reports to the Support Branch OIC and is responsible primarily for the layout and activation of support facilities such as sanitation, eating, resting, etc. These types of facilities are especially important for long-term operations.

Duties and Responsibilities:

- Obtain a briefing from the Support Branch OIC, or if appropriate, the Staging Officer.
- Receive a copy of the incident action plan.
- Participate in the Logistics Section planning activities.
- Determine the requirements for each facility to be established.
- Ensure that all facilities are set up and properly functioning.
- Notify group OICs of the facility layout.
- Obtain personnel to operate facilities.
- Provide rest facilities.
- Provide facility maintenance services (e.g., sanitation, lighting, clean-up).
- Participate in the demobilization of the staging area.
- Report any damage to the Support Branch OIC, or if appropriate, the Staging Officer.
- Report the amount of supplies used to the Support Branch OIC, or if appropriate, the Staging Officer.
- Maintain a record of all units using facilities.
- Maintain a unit log.

Maintenance Unit:

The Maintenance Unit OIC, who reports to the Support Branch OIC, is tasked with the facilities and equipment maintenance.

Duties and Responsibilities:

- Obtain a briefing from the Support Branch OIC, or if appropriate, the Logistics Section OIC.
- Participate in the Support Branch/Logistics Section Planning activities.
- Fuel, maintain, and repair ground support vehicles.
- Requisition maintenance and repair supplies.
- Maintain reports of damage/loss, and maintenance of department equipment.
- Maintain a unit log.

Ground Support Unit:

The Ground Support Unit is responsible primarily for the transportation of personnel, supplies, food and other ground support equipment.

Duties and Responsibilities:

- Obtain a briefing from Support Branch or Logistics Section OIC.
- Participate in Support Branch/Logistics Section planning activities.
- Maintain out-of-service resources.
- Notify the Support Branch of all status changes on support and transportation vehicles.
- Maintain an inventory of support and transportation vehicles.
- Provide transportation services.
- Collect information on rented equipment (e.g., number of hours on a generator, mileage, etc.).

- Receive and assign vehicles that have arrived at the staging area.
- When required, establish and maintain a helicopter landing site.
- Maintain a unit log.

Supply Unit:

The Supply Unit OIC is responsible primarily for ordering equipment and supplies; receiving and storing all supplies for incident; maintaining an inventory of supplies; and serving non-expendable supplies and equipment. The unit is under the direction of the Support Branch OIC (when activated) or the Logistics Section OIC.

Duties and Responsibilities:

- Obtain briefing from Support Branch OIC or Logistics Section OIC.
- Participate in Logistics Section/Support Branch planning activities.
- Activate and supervise Ordering Officers and Receiving/Distribution Officers to coordinate material acquisition and distribution.
- Provide Resources Unit with periodic updates on status of equipment and supplies received and distributed.
- Provide Command, Operations, Planning/Intelligence, Logistics, and Finance/Administration with work materials.
- Determine the type and amount of supplies en route.
- Review Incident Action Plan for information on operations of the Supply Unit.
- Develop and implement safety and security requirements for supplies and equipment.
- Order, receive, distribute, and store supplies and equipment.
- Receive and respond to requests for supplies and equipment.
- Maintain inventory of supplies and equipment.
- Service reusable equipment.
- Demobilize Supply Unit.
- Submit reports to the Support Branch OIC.
- Maintain a unit log.

Armorer:

The Armorer is responsible for the repair and/or replacement of appropriate authorized weapons. The Armorer reports to the Supply Unit OIC.

Duties and Responsibilities:

- Obtain briefing from Supply Unit OIC.
- Determine location of work station; identify weapons and total number of weapons deployed to the incident.
- Set-up secure storage/work area.
- Establish inventory and accountability system.
- Obtain spare parts and/or replacement weapons as necessary.
- Receive, replace, or repair all weapons as required.
- Ensure that all appropriate safety measures are taken in work/testing area.

Personnel Branch:

When activated, the Personnel Branch OIC is under the direction of the Logistics Section OIC and is responsible for providing the staffing needed to respond to the incident (e.g., law enforcement personnel and volunteers). The Personnel Branch OIC supervises the staffing for the operation and coordinates with the Operations Section, Plans Section and Logistics Section to provide the required personnel.

Duties and Responsibilities:

- Obtain a briefing from the Logistics OIC.
- Attend planning meetings to gather information on all overall strategy and personnel requirements.
- Identify Personnel Branch staff.
- Prepare initial organization and assignment for personnel support operations.
- Assemble and brief the Personnel Branch staff.
- Determine if assigned branch resources are sufficient.
- Resolve any problems associated with requests from the Operations Section.
- Maintain a unit log.

Note: The Personnel Branch OIC oversees the functions of the Personnel Unit, Volunteer Services Unit, and Mutual Aid Unit. If any of these units are not activated, then the Personnel Branch OIC is responsible for directly implementing the duties and responsibilities of the appropriate unit(s).

Personnel Unit:

When activated, this unit is under the direction of the Personnel Branch OIC and is responsible for providing the staffing needed to respond to the incident. The Personnel Unit also is responsible for establishing the personnel check-in function at the incident.

Duties and Responsibilities:

- Obtain a briefing from the Personnel Branch OIC.
- Establish a check-in function in coordination with Staging Officer.
- Establish contacts with incident facilities by telephone or through communications center and initiate a status of personnel resource availability record (a visual display of personnel status may be helpful).
- As directed, identify and maintain a ready reserve of personnel.
- Make recommendations to the Logistics OIC regarding suitable locations for the feeding of personnel, and a ready reserve personnel pool (this is to be coordinated with the Service Branch).
- Maintain time keeping and assignment records of all volunteer, liaison, and outside agency personnel assigned to the incident and coordinate with the Time Unit in the Finance/Administration Section.
- Confirm the dispatch of and estimate arrival times of ordered personnel.
- Transmit check-in information to the Resource Unit.
- Receive and assign responding officers to appropriate sections as requested by the Operations Section.
- Periodically brief ready reserve personnel to ensure they are aware of the field situation.
- Provide a means for rest and recuperation for the personnel pool in conjunction with the Facilities Unit.
- Maintain a unit log.

Check-In Recorder:

The Check-In Recorder functions as a part of the Personnel Unit. The Recorder responds to check-in locations to ensure accountability of all resources assigned to an emergency incident.

Duties and Responsibilities:

- Receive briefings from the Personnel Unit OIC.
- Establish communications with the Communication Center.
- Record check-in information on appropriate lists.
- Transmit check-in information to Personnel Unit on determined schedule.
- Forward completed check-in lists and all status changes to the Personnel Unit.

Volunteer Services Unit:

Volunteer Services Unit will be utilized when authorized by the Incident Commander. This will be accomplished under the direction of the Personnel Branch OIC.

Duties and Responsibilities:

- Coordinate all aid offered to the incident by volunteer personnel.
- Select a suitable location for volunteers to assemble, and ensure that incident personnel are advised of this location.
- Ensure that all volunteers who will be deployed are registered as disaster services workers.
- Maintain time cards for all volunteers and indicate group affiliation on the cards, if applicable.
- Coordinate the assignments, meal breaks, and relief of volunteer personnel.
- Refer to the appropriate charitable organization or agency all offers of aid and volunteer sources not consistent with law enforcement requirements.
- Debrief volunteer personnel after the incident or tour of duty.
- Maintain a unit log.

Mutual Aid Unit:

This function is under the direction of the Personnel Branch OIC and is responsible for the coordination and preparation of mutual aid requests adhering to established law enforcement mutual aid practices.

Duties and Responsibilities:

- Request mutual aid forces to report to the staging area.
- Arrange for the briefing of mutual aid forces.
- Make provisions for mutual aid liaison personnel to be at the Incident Command Post.
- Ensure that these units are released as soon as possible, consistent with proper incident management.
- Debrief mutual aid forces after the incident or tour of duty.
- Coordinate with the Services Branch and the Support Branch to ensure that mutual aid personnel are provided with all necessary support services, equipment and supplies to ensure deployment. Such services and supplies could include radios (to ensure compatible communications at the incident), local maps, and subsistence items such as food and shelter in the event of prolonged incidents.

Finance/Administration Section:

The Finance/Administration Section is responsible for the compilation of all information related to the cost of the emergency operation. This may include, but is not limited to, equipment and its usage, personnel hours, supplies, etc.

At the conclusion of the emergency operation, the Finance/Administration Section may have the responsibility for presenting the accumulated emergency response cost information to the appropriate authority (e.g., Division OIC, CAO, etc.).

Finance/Administration Section OIC:

The Finance Officer, also referred to as the Finance/Administration Section OIC, is responsible for all financial and cost requirements of the incident. This position coordinates with other section OICs and supervises the members of the Finance/Administration Section. The Finance/Administration Officer should be thoroughly familiar with all procedures and financial record-keeping requirements of agencies responsible for reimbursements.

Duties and Responsibilities:

- Obtain a briefing from IC.
- Provide input in all planning sessions on financial and cost analysis matters.
- Maintain daily contact with agency administrative departments on response cost matters.
- Ensure that supplies and other support needs for the Finance/Administration Section are identified and ordered.
- Ensure that personnel time records are transmitted to home agencies according to agreement or policy.
- Participate in all demobilization planning.
- Ensure all obligation documents initiated at the incident are properly prepared and completed.
- Brief agency administration personnel on all incident-related business management issues, which require follow-up prior to departing the incident.
- Maintain a section log.

Procurement Unit:

The Procurement Unit OIC functions within the Finance/Administration Section and is responsible for administering all financial matters pertaining to commercial vendors.

Duties and Responsibilities:

- Obtain a briefing from the Financial/Administration Section OIC.
- Contact appropriate unit OICs to determine incident needs.
- Coordinate with local jurisdictions on plans and supply sources.
- Obtain and understand the incident logistics plan.
- Prepare contracts and land use agreements, as needed.
- Establish and interpret contracts/agreements.
- Resolve all purchasing issues or disputes.
- Complete final processing forwarding invoice documents for payment.
- Receive and retain copies of all purchase orders and invoices of supplies/equipment ordered and/or received by Logistics/Support Branch.
- Maintain a unit log.

Compensation/Claims Unit:

The Compensation/Claims Unit OIC functions within the Finance/Administration Section and is responsible for the overall management and direction of all Compensation/Claims Specialists assigned to the emergency incident.

Duties and Responsibilities:

- Obtain a briefing from the Financial/Administration Section OIC.
- Determine the need for Compensation/Claims Specialist and request necessary personnel.
- Brief Compensation Claims Specialist on emergency incident activity.
- Coordinate and process incoming claims for ICS personnel-related injuries and property loss or damages relating to the emergency incident.
- Ensure that compensation/claims, logs, and forms are current and routed to the proper agency for post-incident processing.
- Establish procedures with the appropriate authority to ensure prompt notification of injuries or deaths to emergency response personnel.
- Provide billing forms for transmittal to vendors and other providers.
- Maintain listing of all injuries occurring on the emergency incident.
- Arrange for investigation of claims (e.g., personal injury and property damage claims), where necessary.
- Maintain a unit log.

Compensation/Claims Specialists:

Compensation/Claims Specialist, within the Finance/Administration Section, is responsible for administering financial matters arising from serious injuries, deaths, and other claims related to the emergency incident.

Duties and Responsibilities:

- Obtain a briefing from the Compensations/Claims Unit OIC.
- Develop and maintain a log of potential claims.
- Coordinate claims prevention plan with applicable incident functions.
- Initiate investigation on all claims.
- Ensure that site and property involved in investigation are protected.
- Obtain witness statements pertaining to claims.
- Establish procedure with Medical Unit OIC on prompt notification of injuries or deaths.
- Obtain copy of Incident Medical Plan.
- Remain informed on status of hospitalized personnel.
- Coordinate and handle all administrative paperwork on serious injuries or deaths.
- Advise the Compensation/Claims Unit OIC on nature and status of all existing and potential claims.
- Obtain Demobilization Plan and ensure that necessary follow-up action is completed.
- Coordinate with appropriate agencies having responsibility for hospitalized personnel following demobilization.

Time Unit:

The Time Unit OIC is responsible for equipment and personnel time recording.

Duties and Responsibilities:

- Obtain a briefing from the Financial/Administration Section OIC.
- Determine the incident requirements for the time recording function.
- Establish contact with appropriate agency personnel/representatives.
- Organize and establish the Time Unit.
- Ensure all records are current or completed prior to demobilization.

- Ensure time reports for assisting agencies are released to the respective agency representatives prior to demobilization.
- Brief the Finance/Administration Section OIC on current problems and make recommendations.
- Maintain a unit log.

Personnel Time Recorder:

The personnel time recorder ensures that proper recording of hours worked by emergency incident response personnel is accurately accomplished.

Duties and Responsibilities:

- Obtain a briefing from the Time Unit OIC.
- In coordination with the Personnel Branch, establish and maintain a file for employee time reports. *This must be done within the first operational period.*
- Initiate time reports for all response personnel assigned to the emergency incident for each operational period.
- Ensure that employee identification information is verified correct on time reports.
- Ensure time reports are signed.
- Close time documents prior to personnel departure from the emergency incident.
- Distribute time documents according to agency policy.
- Ensure all records, personnel time recording forms, and other finance documents are in order and submitted for processing prior to incident demobilization.

Equipment Time Recorder:

The Equipment Time Recorder ensures that an accurate record of equipment usage is accomplished.

Duties and Responsibilities:

- Obtain a briefing from the Time Unit OIC.
- Establish equipment time recording function in locations designated by the Time Unit OIC.
- Advise the appropriate groups/branches of the requirement to establish and maintain files for daily record of equipment time (e.g., ground support).
- Assist units in establishing a system for collecting equipment time reports.
- Submit data to the Time Unit OIC for cost analysis.
- Maintain current postings on all charges or credits for fuel, parts, services, etc.
- Complete forms according to agency specifications.
- Close forms prior to demobilization.
- Maintain list of any damaged or lost equipment for after incident billing or claim.
- Distribute lists of any damaged or lost equipment to each agency and provide information regarding damage/claims policy.

SECTION IV

MUTUAL AID RESPONSE MOBILE FIELD FORCE

Law Enforcement Mutual Aid Response

Mutual Aid is the backbone of assistance between law enforcement agencies in time of emergency. The entire program is outlined in the document "Law Enforcement Mutual Aid Plan," but the following critical excerpts are provided for reference.

Levels of Mutual Aid

Local Mutual Aid

When an unusual occurrence may become, or is already beyond the control of local law enforcement resources, the chief of police (or duly authorized representative) may request assistance from the Operational Area Mutual Aid Coordinator (Sheriff).

Operational Area Mutual Aid

In response to a request for mutual aid by a chief of police, the sheriff will coordinate law enforcement resources from within the Operational Area. This includes the response of law enforcement resources from unaffected municipalities, local CHP and other state agencies, as well as his/her own resources, to assist the affected chief of police.

Regional Mutual Aid

Should the emergency situation be of such magnitude as to require resources of more than one Operational Area, the Regional Law Enforcement Mutual Aid Coordinator will request resources from other Operational Areas within the region.

Statewide Mutual Aid

If the combined resources of a region are insufficient to cope with the emergency situation, the Regional Coordinator may request additional assistance through the State Law Enforcement Mutual Aid Coordinator. Assistance from regions statewide will then be mobilized.

Day-to-Day Mutual Aid

During the course of normal, everyday law enforcement, smaller incidents occur that may require immediate assistance from adjoining or nearby agencies. Officers from nearby jurisdictions may respond to emergency broadcasts on their own initiative (departmental policy permitting) without a formal mutual aid request.

Planned Events

Planned or permitted events are not mutual aid incidents for planning purposes. As a matter of responsible planning, the event planners should meet with local law enforcement to ensure the public safety is protected. Policing costs are frequently recovered through event revenues and this should be considered during the planning process. The mutual aid system is not intended to provide reimbursement to various law enforcement agencies that may provide services under contract.

Even with adequate planning, an unforeseen emergency may occur at a planned event that results in a mutual aid response.

Fifty Percent Guideline

No jurisdiction is required to unnecessarily deplete its own personnel, equipment and service capabilities to furnish mutual aid resources. When requested to provide mutual aid, it is generally accepted that a reasonable response will consist of up to 50% of available on-duty uniformed personnel.

Mission Numbers

When mutual aid resources are assigned from beyond the boundaries of the requesting Operational Area, the Law Enforcement Branch of the California Governor's Office of Emergency Services will issue a Mission Number to track resource movement. Mission Numbers do not assure reimbursement of response costs; they track and document the mutual aid response.

Mutual Aid Response Mobile Field Force, Defined

Emergency operations' planning is best achieved in advance, anticipating needs that may arise during emergencies. One of the tools that have proven successful is the formation of the Mutual Aid Response Mobile Field Force. A Mutual Aid Response Mobile Field Force is a regionally-organized, trained and equipped group of officers and supervisors, from a coalition of independent agencies that may be deployed, as needed, to mitigate potential or real problems.

Development

The Mutual Aid Response Mobile Field Force concept has been developed to provide an efficient and effective method for assembling and deploying a platoon-size, tactical force for mutual aid missions within the state of California. Similar to the development of the fire service's concept of a *Strike Team*, the Mutual Aid Response Mobile Field Force is a specified combination of single resources assembled for a particular tactical need, with common communications and a leader.

The Mutual Aid Response Mobile Field Force concept is based upon the initial work of several law enforcement agencies within California. In 1993, considerable effort toward improving the Law Enforcement Mutual Aid Response Plan was undertaken. The recommendation of the plan was that municipal law enforcement agencies within specified geographical areas form mutual aid response mobile field forces for law enforcement mutual aid situations affecting areas both within and outside the impacted jurisdiction.

As a result of that suggestion, consensus was reached to commit participating departments' staff resources to develop the concept of and proposal for multi-agency Mobile Field Forces (MFF).

This law enforcement emergency response coalition formally established the joint-agency Mobile Field Force configuration, protocols, and standards. Since its inception, mobile field forces have been deployed successfully on numerous major incidents.

In 1997, the SEMS Law Enforcement Specialist Committee, under the guidance of the California Governor's Office of Emergency Services, refined and adopted the Mobile Field Force concept for statewide application. The operating, administrative, and fiscal guidelines presented in this text are provided as the *recommended State guidance* for the formation and operation of a Mutual Aid Response Mobile Field Force.

Operating Guidelines

Call-Outs/Activation:

The Mutual Aid Response Mobile Field Force should be made available for response pursuant to mutual aid agreements in the event of a natural disaster, civil unrest, or other major incidents, when:

All available resources in the affected jurisdiction have been *reasonably* depleted; and,

The normal delivery of police services has been significantly disrupted.

Utilizing the law enforcement mutual aid system, the request should be made to the Mobile Field Force OIC who should have the rank and commensurate authority to activate the Mobile Field Force.

Responses to regions outside the area of contributing agencies should be coordinated by the regional mutual aid coordinator identified by the California Governor's Office of Emergency Services.

Member agency participation in the Mutual Aid Response Mobile Field Force is a cooperative agreement and is not bound by any contractual considerations.

Activation Protocol:

In the event of a Mobile Field Force activation request, contact should be made in the following order:

Notification to the Operational Area Mutual Aid Coordinator.

Concerned agency Incident Commander, or Department Executive, who will notify their agency Mobile Field Force commander.

- The Mobile Field Force OIC will contact the Watch Commander at each of the participating agencies and advise of the Mobile Field Force activation. The Watch Commander should be advised of the assembly point for the Mobile Field Force, the expected duration of the activation, and any other pertinent information.
- The Watch Commander of every participating agency will contact and provide the agreed number of personnel. Efforts should be made to assign personnel who have trained with the Mobile Field Force. If that is not possible, the Watch Commander will assign other personnel to meet that agency commitment.

After Action Reports:

After Action Reports should be completed by the Mobile Field Force OIC and forwarded to the Incident Commander as soon as possible following an event for which the Mobile Field Force was activated. After action reports, should be forwarded to the Chief Executive Officer of the contributing agency and the Regional Mutual Aid Coordinator. The contents of the After Action Report will typically include:

- Synopsis of Events
- Personnel Deployed and Hours Worked
- Arrests (if any)
- Expenditures/Reimbursements
- Significant Problems Encountered
- Recommendations for Improvements

Communications:

Some member agencies may not have compatible radio frequencies. A workable communications plan will be necessary at the time of the formation of the Mutual Aid Response Mobile Field Force. Common communication ability is essential to the tactical success of a Mobile Field Force.

Mobile Field Force Kits:

Pursuant to the Mobile Field Force Concept, participating agencies should collectively assemble mobile field force kits, which will be basic to all responses. The kits will contain sufficient and appropriate equipment for each Mobile Field Force. Mobile Field Force OICs will facilitate the assembly and warehousing of the field force kits. *See the standardized equipment lists in this section.*

Training:

Appropriate training is crucial to the maintenance of an effective Mobile Field Force. Training should be provided prior to activation of the Mobile Field Force and should be conducted on a regular and frequent basis.

Every effort should be made to schedule training in conjunction with the normal working hours of personnel assigned to the Mobile Field Force. This training can be POST certified.

Administrative Guidelines

Use of Force:

Individual officers are bound by use of force policies of their employing agency. However, use of less-lethal devices (e.g., chemical agents, Tasers, ARWEN, Sting balls, or Stun bags) should be used decisively when the situation dictates.

Firearms:

Every officer assigned to a Mutual Aid Response Mobile Field Force shall carry a firearm in accordance with their employing agency's policies and procedures. Minimum departmental standards for qualification must be met.

Officer-Involved Shootings:

The investigation of officer-involved shootings should be the primary responsibility of the jurisdiction in which the incident occurred. Appropriate staff personnel from the involved officer(s) department may assist or conduct cooperative independent and/or joint investigations.

On-Duty Motor Vehicle Accidents:

If an officer assigned to a Mutual Aid Response Mobile Field Force is involved in a traffic collision while on duty, a detailed report will be completed by the jurisdictional agency. Copies will be forwarded to the officer's agency and the Mobile Field Force OIC for further review and necessary action.

Injuries Sustained On-Duty:

When an officer assigned to a Mutual Aid Mobile Field Force is injured on duty, the respective agency policy for on-duty injuries should be followed. To expedite immediate medical attention, every officer assigned to a Mutual Aid Response Mobile Field Force should supply his/her Mobile Field Force OIC with a packet containing the applicable forms and processing instructions.

Citizen Complaints:

Any complaint from an individual alleging misconduct by personnel assigned to a Mutual Aid Response Mobile Field Force will be directed to the Mobile Field Force OIC for immediate assignment and investigation. All complaints will be reviewed by the Mobile Field Force OIC. The Mobile Field Force OIC should immediately notify the involved officer's respective agency and facilitate any subsequent investigation thoroughly.

It should be the policy of the Mutual Aid Response Mobile Field Forces to receive, record, and properly investigate all citizen complaints against assigned personnel without exception. All findings should be forwarded to the involved officer's respective agency head.

Fiscal Guidelines

Payroll:

All officers, when assigned to a Mutual Aid Response Mobile Field Force, will be paid by their respective agency. It is the responsibility of the Mobile Field Force OIC to ensure that personnel record keeping has been coordinated with the Logistics Section (Personnel Branch) and the Finance/Administration Section (Time Unit).

Illness:

If an officer becomes ill while assigned to a Mutual Aid Response Mobile Field Force, sick time will be utilized in accordance with the respective agency's policy and procedure. Reporting of sick time will be made to the Mobile Field Force OIC who will notify the involved officer's agency.

Overtime:

If necessary, all overtime beyond normal shift hours should be approved in advance by the Mobile Field Force OIC. All assigned personnel should respond to call-outs as deemed necessary by the Mobile Field Force OIC.

Mutual Aid Response Mobile Field Force Organization

Configuration (State Standard):

The Mutual Aid Response Mobile Field Force (Platoon) consists of four 12-person squads, with an OIC (minimum rank of Lieutenant) and Deputy OIC (minimum rank of Sergeant), each with a driver. *The minimum total personnel are 52.*

Rarely can one department staff an entire Mutual Aid Response Mobile Field Force. Most often, the Mobile Field Force will consist of a coalition of personnel from several law enforcement agencies within an operational area.

The Mutual Aid Response Mobile Field Force can be augmented with additional personnel, vehicles, or equipment depending on the mission.

The Mutual Aid Response Mobile Field Force configuration described here is considered to be the *State standard for mutual aid ordering purposes*. This configuration has been established to create a reference or "baseline" standard for ordering, providing, and/or receiving law enforcement personnel in a mutual aid situation.

Although law enforcement agencies are not required to configure or define their daily operations utilizing the State standard configuration, it is recommended that agencies use the agreed upon standard terminology and organizational structure for requesting or providing mutual aid. *Any deviation from the established standards should be identified at the time of ordering so as to facilitate efficient planning, logistical support, and deployment of resources.*

For example, if a jurisdiction needs a Mobile Field Force for civil unrest purposes, the requesting agency needs to identify that purpose at the time of ordering. This will help to ensure that the Mutual Aid Response Mobile Field Force is properly configured, and brings with it appropriate resources such as prisoner vans, counter-snipers, and less-lethal munitions.

In another instance, a requesting jurisdiction may need a Mobile Field Force for perimeter and traffic control around a huge wildland fire. In this case, it would be more advantageous to have two officers per vehicle in order to cover the largest possible area. Since the standard configuration is four officers per vehicle, the requesting agency should identify the need for deviation in the standard configuration at time of the initial request.

By establishing a standard Mobile Field Force configuration, ICS overhead teams can accurately plan for deploy, and support the logistical needs of mutual aid resources (i.e., how many people to feed and how many vehicles to stage and fuel).

Mobile Field Force Capability:

The Mutual Aid Response Mobile Field Force can be configured for a variety of mutual aid response needs, including civil unrest and large scale natural or human-caused disasters.

The Mutual Aid Response Mobile Field Force is capable of performing the following functions:

- Provide 12 4-person mobile patrols within an assigned area of responsibility.
- Provide approximately 20 traffic control posts.
- Provide approximately 12 roadblocks under civil disturbance conditions.
- Provide security for critical facilities.
- Provide 4 squad-sized crowd control elements with the ability to deploy chemical agents while not maintaining security of its own vehicles.
- Provide 3 squad-sized crowd control elements with the ability to deploy chemical agents while maintaining security of its own vehicles.
- Civil disturbance control.
- Limited first-aid capability.
- If implemented, mass arrest capability.
- If implemented, limited counter-sniper capability.

In order to be fully effective in civil disturbance operations, a Mobile Field Force may be augmented with two prisoner transportation vans. A male/female deputy/officer team assigned to each van would be beneficial for prisoner search and transportation.

NOTE: The Incident Commander should describe the Mobile Field Force's intended mission at the time it is requested, so that appropriate logistical support may be supplied at the time of deployment.

Personnel Commitment:

The personnel commitment from contributing agencies will need to be agreed upon in advance of the formation of the Mobile Field Force.

Duration of Deployment:

Duration of initial deployment may vary. Typically during extended operations, 12-hour shifts (on-station) would be implemented. Therefore, travel time should be taken into account in all cases. Mental and physical fatigue is a critical factor and should be considered by the Incident Commander when developing deployment schedules.

MUTUAL AID RESPONSE MOBILE FIELD FORCE PERSONNEL:

MOBILE FIELD FORCE LIEUTENANT (OIC)

- OFCR-DRIVER
- VIDEO (optional)
- OFCR-COUNTER SNIPER (optional)

MOBILE FIELD FORCE SERGEANT (Deputy OIC)

- OFCR-DRIVER
- VIDEO (optional)
- OFCR-COUNTER SNIPER (optional)

The following section describes the duties and responsibilities of each member as well as the standard configuration of the Mutual Aid Response Mobile Field Force.

Standard Mobile Field Force Personnel:

The Mobile Field Force normally is led by a Lieutenant (OIC). The second in command is the Mobile Field Force Sergeant (Deputy OIC). Normally the Mobile Field Force consists of four (12-person) squads, each commanded by a Squad Sergeant, and specified support personnel. This configuration can be modified by the Incident Commander to meet specific requirements of the situation. The standard State Mutual Aid Response Mobile Field Force will normally consist of 52 personnel, in a total of 14 *patrol vehicles (general purpose)*, organized as follows:

Mobile Field Force OIC (Lieutenant) - Commands the Mobile Field Force in the field. Once given a mission, the OIC establishes the method to accomplish the mission. In developing the plan, the OIC must remain within the policies established by the Incident Commander's Incident Action Plan.

Mobile Field Force Deputy OIC (Sergeant) - Is usually delegated the responsibility of equipment issuance and recovery by the Mobile Field Force OIC. For maximum personnel control, two squads can be assigned to the Mobile Field Force OIC and two squads can be assigned to the Mobile Field Force Deputy OIC.

Squad Sergeants - Acting under the direction of the Mobile Field Force OIC, the Squad Sergeant is responsible for the supervision of the 11 deputies/officers in the squad. The Sergeant should be assisted by two experienced deputies/officers as Car Commanders.

Car Commanders - The Squad Sergeant should select an experienced officer/deputy to act as Car Commander for the other two cars in the squad. The Car Commander assists the Squad Sergeant in the direction of the squad.

Officers/Deputies - Perform line functions as directed by their Squad Sergeants or Car Commanders.

Linebackers - Each squad should have two trained deputies/officers who will give the squads the ability to deploy less-lethal devices and chemical agents. In squad formation, these deputies/officers should normally fill the position of linebackers and be equipped to deploy such devices and agents.

Optional Mobile Field Force Personnel:

The following personnel can be added to a Mobile Field Force based on mission requirements:

Video Camera - Two individuals should be trained and equipped with video camera capabilities. *Although this is an optional position, it is highly recommended that this position be staffed.*

Counter-Sniper - Staffing of this function is discretionary based upon agency policy concerning counter-sniper tactics. Two officer/deputy personnel should be trained in the use of an appropriate shoulder weapon (rifle). It is recommended that one officer/deputy be assigned to the Mobile Field Force OIC and the second officer/deputy be assigned to the Mobile Field Force Deputy OIC. Deployment of the rifles should be a specific responsibility of the Mobile Field Force OIC. The counter-sniper's purpose is to provide longer range fire capability for sniper situations, pending the arrival of a Special Weapons Team.

Prisoner Transportation Team- Two vans with two deputies/officers each. A male/female officer/deputy team assigned to each van would facilitate prisoner search and transportation.

Mutual Aid Response Mobile Field Force Member Equipment

Each member of the Mobile Field Force should be equipped as follows:

- Department Authorized Handgun and Ammunition
- Complete Field Officer Equipment Belt (Sam Browne)
- Helmet with Face Shield
- Baton or Approved Impact Weapon
- Ballistic Protective Vest
- Chemical Agent Mask
- Flashlight (with extra batteries)
- Flex Cuffs (4 minimum, squad officers/deputies)

The Mobile Field Force OIC or Deputy OIC should be responsible for conducting a personnel inspection and equipment inventory prior to deployment.

Mutual Aid Response Mobile Field Force Equipment:

The following section describes the equipment recommended for an entire Mutual Aid Response Mobile Field Force.

MUTUAL AID RESPONSE MOBILE FIELD FORCE EQUIPMENT LIST:

Minimum Standard Equipment

Vehicles:

Patrol Vehicles, General Purpose 14

Radios:

Portable Handheld Radios 16

Extra Batteries for Radios 16

One portable radio per vehicle, plus an additional radio for the Mobile Field Force Lieutenant (OIC) and the Mobile Field Force Sergeant (Deputy OIC)

Weapons:

Handguns (1 per officer) 52

Shotguns (1 per vehicle) 14

Additional Ammunition:

12 Gauge 350 rounds

12 Gauge Rifled Slugs 140 rounds

Handgun Ammunition 700 rounds

Emergency Equipment:

Dry Chemical Fire Extinguisher (5 lb., 1 per vehicle) 14

First Aid Kit (Large Trauma Type) 1

Road Flares (4 boxes per vehicle) 56

Blankets (2 per vehicle) 28

Tactical Equipment:

Map (one per Sergeant and Lieutenant, and each van) 8 minimum

Binoculars 2

Bullhorn (in Mobile Field Force OIC's Vehicle) 1

Administrative Supplies:

Gasoline Credit Card (Mobile Field Force OIC's vehicle) 1

ICS forms (at least one set per Squad Sergeant, OIC, and Deputy OIC) 6 sets minimum

"Police/Sheriff's Line" Tape (1 roll per Sergeant) 5 rolls

Recommended Additional Equipment:

Prisoner Field Booking and Transportation:

Prisoner Transportation Vans	2
Digital Camera (with adequate disc space for 200 pictures)	2 (one for each van)
Flex Cuffs (4 per each officer/deputy assigned to a squad)	176

Video Equipment:

Digital Video Recording Device	1 minimum
Charged Video Camera Batteries	2 minimum
Blank Video Discs	2 minimum

Counter Sniper Equipment:

Rifles	2
Rifle Ammunition	120 rounds

Less-Lethal Equipment and Munitions:

Chemical Agent Masks	52
37mm Gas/Less Lethal delivery weapon	1
Shotguns equipped with sling (2 per squad; minimum one with launcher)	8
Gas Vest and/or pouch (2 per squad and assigned to gas trained personnel)	8
Launching Cartridges	24
Launchable Canisters	24
Triple Chaser Type Canisters	24
Baseball Grenades	24
Blast Dispersion Type Grenades	24
Sting Ball Grenades (30 per squad)	120
Stun Bags (150 per squad)	600

NOTE: It is recommended that a Mobile Field Force be supported by two vans. These vans may be used for prisoner transportation, equipment storage and security, or as a command post vehicle.

MUTUAL AID ESSENTIALS

Guidelines for Requesting Mutual Aid:

- Identify numbers and types of mutual aid resources to be requested.
- Identify specific missions for mutual aid responder tasking.
- Advise responders what equipment they should bring.
- Establish an assembly area for responding resources.
- Identify communications channels compatible with command and control of field resources.
- Designate a liaison officer to facilitate a coordinated assimilation of responding mutual aid resources.
- Prepare a situation briefing for responders, including maps as appropriate.
- Provide logistical support such as food, lodging, rest intervals, and equipment maintenance as appropriate, for mutual aid personnel.

Guidelines for Receiving Mutual Aid:

- Properly equip responding personnel.
- Assign a supervisor whenever possible to maintain unit integrity.
- Complete response rosters.
- Dispatch personnel to the staging area.
- Provide relief for assigned personnel at protracted events.
- Maintain records of arrival and departure times, rank, timekeeping, mileage, damage or injury, and expended resources of those responding.

CROWD CONTROL SQUAD FORMATION

Squad formation with drivers:

LAUNCHER & SLING

CHEMICAL AGENTS
STINGBALLS
STUNBAGS
SHOTGUN WITH
LAUNCHER & SLING

SGT

MODIFIED CROWD CONTROL SQUAD FORMATION

To better deal with and react to organized civil disobedience groups, the standard 12 person squad may be supplemented with four additional personnel. The four additional officers will take the positions of “Gas Officer”, “Less Lethal” and two “Spotters”. This frees the linebackers to properly support the skirmish line and perform “Arrest/Rescue” missions.

SECTION V

INCIDENT ACTION PLAN (OPERATIONS PLAN):

The *Incident Action Plan (IAP)* may also be referred to as an "Action Plan" or "Consolidated Action Plan." The Incident Action Plan developed at the field response level contains objectives reflecting the overall incident strategy, and specific tactical actions and supporting information for the next operational period. The plan may be verbal or written.

It is important that all incidents have some form of Incident Action Plan. The plan is developed around a time period called an "Operational Period." It sets forth the objectives to be achieved and describes the strategy, tactics, resources and other support necessary to achieve the objectives within the designated operational period.

Incident Action Plans will vary in content and form depending upon the nature and size of the incident. ICS provides for the use of a systematic planning process and provides forms as well as formats for developing the Incident Action Plan (*see ICS Forms*).

A small incident does not require an elaborate Incident Action Plan. Most short-term, single-agency incidents do not require written Action Plans. Listed below are general guidelines for determining when written plans should be developed:

- Two or more jurisdictions are involved.
- The incident continues into another Operational Period.
- A number of organizational elements have been activated.
- Written plans are required by agency policy.

For incidents operating under a Unified Command, the Incident Action Plan should be written. This provides all agencies with a clear set of objectives, actions and assignments, and ensures a unified focus of effort. ***SEMS requires that agencies operating under a Unified Command, develop and implement a singular common Incident Action Plan.***

INCIDENT ACTION PLANNING AND OPERATIONS PLANNING:

It is important to define the relationship between these two processes to ensure uniformity and inter-agency coordination, particularly in events or incidents involving multiple agencies and disciplines.

It is common for law enforcement agencies to plan for scheduled events or anticipated incidents. Such events could be annual parades, sporting events, concerts or festivals. Operations planning can also occur based on intelligence reports that indicate a strong likelihood that an incident will take place such as a demonstration or civil unrest.

Although the most common use of Operations Plans are for known or anticipated events or incidents, they also may be developed during an incident response. For this to occur, the Incident Commander must understand thoroughly the agency's priorities and overall objectives for the incident. This information should be obtained from the current Incident Action Plan.

An "agency specific" Operations Plan is particularly valuable in Unified Command incidents, where multiple agencies are operating under a single Incident Action Plan. The Operations Plan can focus on policies and procedures specific to individual agencies responsible for a designated mission or objective(s).

It is important to note that fully developed Incident Action Plans are used by many agencies as an "Operations Plan." In these instances, a separate Operations Planning document is not necessary. Incident Action Plans, which follow SEMS guidance, may include the following planning areas:

- Overall Objectives and Priorities
- Incident Objectives
- Organization Chart
- Assignment Lists
- Resources Plan
- Communications Plan
- Medical Plan
- Facilities Traffic Plan
- Safety Plan
- Demobilization Plan

Note: *The contents of the Action Plan will vary based on the scope of the incident.*

These specific areas provide direction and guidance for the command and supervisory structure and their corresponding field units. It is important to note that ICS Forms should be used, as required, for the completion of the Incident Action Plan.

Overall Objectives: These are initial operational objectives, which can either be established by agency executives and implemented by the Incident Commander, or established and implemented on-scene by the Incident Commander. Typically they are broad in scope and based on early situation reports emanating from the incident. An example of an overall objective for law enforcement could be, "To ensure the safety and security of the affected population." USE ICS FORM 202

Incident Objectives: Incident objectives are more specific in nature and are intended to provide tasking for individual field units. Incident objectives are outcomes of Action Planning Meetings held on-scene. Action Planning Meetings are convened by the Incident Commander who provides the command structure with the overall objective for the incident and then identifies and assigns, in conjunction with the command structure, specific incident objectives to appropriate field units. Action Planning Meetings can take place at established ICPs or initially around a patrol vehicle on-scene. Meetings should be brief and concise. An example of an incident objective could be, "To evacuate all residents in Sector #3 within 5 blocks of the river before 6PM today." Another example might be, "To set up and maintain security checkpoints along River Drive at Elm, Maple, and Spruce Avenues until 6PM tomorrow." USE ICS FORM 202

Organization Chart: If the Action Plan is written, it should include an Organization Chart, which identifies the Incident Command elements activated for the incident or event. It is traditionally structured hierarchically and includes the Incident Commander, Command Staff, General Staff sections, and activated branches, groups, task forces, or units. USE ICS FORM 207

Assignment Lists: Field assignment lists may be developed *initially* by the Incident Commander, Section OICs or Group/Unit OICs. They are lists of personnel assigned to specific positions within the Incident Command. Assignment lists may also be developed to identify branch personnel tactically deployed at specific sites. Once developed, all assignment lists should be maintained by the Personnel Branch in Logistics. USE ICS FORM 204

Resources Plan: A brief description of resources required to perform each Incident Objective. The Resources Plan may also include details on staging area locations, resources staged and status of key resources ordered. The Resources Plan is prepared by the Logistics Section in close coordination with the Operations Section OIC, Branch OICs and Mobile Field Force OICs. USE ICS FORM 215

Communications Plan: Briefly describes logistical procedures for issuance, use, maintenance, and check-in of communications equipment. It also lists primary and secondary or tactical frequencies to be used. This plan is usually developed by the Communications Unit in Logistics and is included in the operations briefing for incident personnel prior to deployment. USE ICS FORM 204

Medical Plan: Briefly describes procedures for first aid or other medical treatment for *personnel assigned to the incident* in the event of injury or illness. This plan is usually developed by the Medical Unit in Logistics. These procedures are included in the operations briefing for incident personnel prior to deployment. USE ICS FORM 201

Facilities Traffic Plan: Briefly describes traffic patterns in and out of the Incident Command Post. Patterns must be based on the physical layout of facilities in and around the ICP. This plan also must consider traffic patterns for staging if the Staging Area is collocated with the ICP. Usually this plan is developed by the Facilities Unit in the Logistics Section. It is included in the operations briefing for incident personnel prior to deployment. NO SPECIFIC FORM - Attach Facilities Traffic Plan to ICS FORM 202

Safety Plan: A brief update on existing or potential safety hazards associated with the incident. The Safety Plan focuses on reducing hazards through the use of proper procedures and encourages supervisors to be vigilant in detecting and correcting unsafe conditions. In most incidents a Safety Officer prepares the Safety Plan with the approval of the Incident Commander and ensures that pertinent information is included in operations briefings for incident personnel. In some law enforcement incidents, the *Safety Function* may be assigned to an Operations or Logistics OIC. While it is recognized that most law enforcement field operations may be hazardous in nature, the safety function can reduce unsafe conditions through the use of proper procedures and awareness. NO SPECIFIC FORM - Attach Safety Plan to ICS FORM 202

Demobilization Plan: Outlines the specific procedures for demobilization of incident personnel. The Demobilization Plan is prepared by the Demobilization Unit assigned to Planning/Intelligence. Close coordination is required with Operations and Logistics to determine current and projected staffing needs as the incident progresses. Timing is a critical part of the demobilization process. NO SPECIFIC FORM

ELEMENTS OF A COMPLETED WRITTEN INCIDENT ACTION PLAN

A completed written Incident Action Plan typically consists of the following:

- ICS FORM 202 "Incident Objectives"
- ICS FORM 203 "Organization Assignments"
- ICS FORM 204 "Division/Unit Assignments"
- Support Material such as:
 - Maps
 - Communications Plan
 - Medical Plan
 - Traffic Plan
 - Safety Plan

COMPREHENSIVE OPERATIONS PLANS

As previously indicated, law enforcement agencies may desire to utilize *operations plans* that are more "specific" to internal policies and procedures. In these situations, it is important that operations plans are based on common action planning objectives, thus ensuring consistency and coordination between all agencies and disciplines involved in the response.

While there are several acceptable formats for developing agency-specific operation plans, this guide illustrates one model presently in use by some agencies. This format utilizes the "five-paragraph" concept described as follows:

Situation:

Provide a brief description of the situation. Describe the incident or event that requires intervention. Include any aggravating or mitigating factors. Describe the organization of supporting agencies, both law enforcement and others, involved in the operation.

This component should be a brief overview of the circumstances. If more detailed information is desired it should be included in a separate annex, usually an "Intelligence Annex."

Generally, this paragraph establishes the Who, What, Where, When and Why of the problem. A clearly articulated situation paragraph is critical to the development of the rest of the plan, and essential to provide situation briefings to the executives who are responsible for determining the posture of the organization relative to the event.

Mission:

The mission is determined by the Incident Commander after receiving a situation briefing. The statement should define clearly the goal of the department in as concise a manner as possible. If there is more than one mission involved, there must be a priority established and stated.

The most effective mission statements do not involve a significant departure from normal department operational concepts. The mission statement is critical because it provides the foundation and focus for all subsequent planning.

Concept of Operations:

This paragraph is best described as the written intent of the Incident Commander relative to the conduct of the operation. It is best when it projects the event in chronological order from the briefing through critique and demobilization. Specific mission assignments are not made in this paragraph. For example, the establishment of traffic control posts must be discussed; however, the unit assigned to staff those posts is not designated here.

The following topics are critical to the operation and demand full explanation in this section:

- Arrest Policy
- Use of Force Policy
- Rules of Engagement
- Decisions reserved for the Incident Commander or designee

Execution:

This paragraph is used to make specific assignments to all units involved in the operation. Each element must be identified and assigned a specific mission in the operation. Failure to make these assignments leads to confusion and can often mean that an element is not committed at a critical time, causing the entire mission to fail.

A subparagraph entitled “Coordinating Instructions” may be included if any areas requiring coordination are needed. Examples may include instructions for communications or briefings and assignments for supporting and/or mutual aid units.

The execution paragraph is often a complex and difficult task. The planner must ensure that there is no duplication of assignments, no conflicting assignments, and still ensure that all essential tasks are completed.

EVENT MATRIX

EVENT UNIT	Command Post	Site Security	Traffic Control	Public Works Liaison	Crowd Control	Fire Liaison	Logistical Support	Evacuation
Unit 1	0900				1000			
Unit 2	0800	0900	0900					
Unit 3	0900				1000			
Unit 4	0900				1000			
Unit 5	0900							
Unit 6	0800						0900	
Unit 7	0900				1000		1200	

The figure above is an example of an event matrix that has proven effective in the completion of the execution paragraph. It is used in addition to the written instructions and provides a quick reference to assignments and serves as a check to ensure that there is no duplication of effort in the execution phase.

Completing the matrix is fairly simple, with significant events related to the operation being listed in chronological order across the top boxes (one event per box) and the involved units listed in the boxes along the left side of the matrix. A note is made in the intersecting boxes as events are assigned to units (refer to example). This note may be a time or simply a check mark if the event is not time-critical. Each row and column must have some notation upon completion of the matrix, or is left blank if an event has not been assigned, or a unit has no assignment.

During the conduct of operations, questions arise relating to events or assignments for units. Rather than having to find the answers in the narrative portion of the plan, the Incident Commander, or his designee, may use the matrix to find the answer.

Administrative Instructions:

This paragraph addresses any administrative announcements that are necessary to make the operation work. For large operations, a separate logistics annex or plan may be produced. However, for smaller operations logistics questions are addressed within this paragraph.

The following topics are typical to this paragraph:

- Reporting Instructions
- Uniform Requirements
- Timekeeping/Fiscal Reporting
- Medical Support
- Communication Issues
- Feeding of Personnel
- Location of Incident Facilities

The five paragraph operations plan discussed above has been effective in all types of operations for many years. It is easy to produce and provides a thorough plan from which to conduct operations. Once the plan is written, it must be approved by the Incident Commander or superior, briefed to all concerned personnel, and disseminated in a timely manner.

SUMMARY:

A comprehensive Incident Action Plan is an important component of a successful and effective incident response. The Incident Commander must ensure that the initial planning meeting is convened as soon as possible, and that the incident planning process is initiated and maintained by the Planning/Intelligence OIC.

If an agency specific *Operations Plan* is utilized, it should be consistent with overall incident objectives identified in the *Incident Action Plan*.

SECTION VI

COMMUNICATIONS

COMMUNICATIONS:

Radio communications are an essential component of any emergency response. The challenge of multi-agency and multi-discipline response is difficult, but may be addressed through use of tactical communications planning and interoperable interfaces. Several mutual aid frequencies are available for on-scene use and coordination. Planning and usage of these frequencies is essential to ensure units or levels are able to communicate. Proper communications planning identifies those units or sections that need to communicate directly, and those which do not. Current interoperability standards allow different frequencies on different bands the ability to be linked and transmit directly.

The following is an excerpt from the California Law Enforcement Mutual Aid Radio System Plan. Critical response sections are provided for emergency operations. Refer to the Plan for complete guidelines, eligibility and application procedures.

CALIFORNIA LAW ENFORCEMENT MUTUAL AID RADIO SYSTEM (CLEMARS):

CLEMARS is the California Law Enforcement Mutual Aid Radio System. It is an extension of the law enforcement mutual aid concept and is provided and managed by the California Governor's Office of Emergency Services (Cal OES). The purpose of the system is to enhance the ability for law enforcement agencies to communicate on common frequencies during emergencies and other special operations.

Examples of situations wherein use of CLEMARS would be an asset include:

- An interagency team operation designed to serve a search or arrest warrant.
- An emergency call requiring two or more units from the same agency to coordinate response to a crime in progress.
- A mutual aid response team, assigned to assist a neighboring jurisdiction.
- Law enforcement operations conducted at a parade, concert, or other special event involving one or more law enforcement agencies.
- Operations required in response to a major disaster, involving units from several assisting agencies that come from outside the impacted area.
- A transient law enforcement unit enroute to an out-of-town court appearance comes upon an injury collision and requires a local dispatch center within range to relay an assistance request.

NATIONAL LAW ENFORCEMENT MUTUAL AID RADIO SYSTEM (NALEMARS):

There is a nationwide counterpart to CLEMARS, known as NALEMARS. This system, the National Law Enforcement Mutual Aid Radio System consists of one channel, set aside by the FCC as a mutual aid intercommunication channel, similar to our channels here in California. The NALEMARS frequency is 155.475 MHz. NALEMARS is one of the California CLEMARS channels. The application process for authorization is the same as that involved in the other CLEMARS channels.

Note that NALEMARS may not be used for administrative or secondary communications. It is only to be used in emergency or urgent situations.

OPERATING PROCEDURES:

CLEMARS channels should be considered an open “party line,” to the extent that only one user in a given area can use the system at any one time. As a result, careful attention must be paid to operating procedures. Improper procedures often involve “covering” another agency’s radio transmission. This is not only illegal—it *can endanger peace officer safety*. For this reason, careful adherence to these procedures is mandatory.

General Operations:

Agencies generally have an established radio procedure. The same communications “style” applies to CLEMARS. When using the system, units identify the unit or station they wish to speak with, and then identify them. The message(s) transmitted must be official, as in use of all other police radio systems. At the end of the message sequence, the units switch back to their home radio channel. Note that the channel must be identified per FCC regulations, usually by the base station.

Identification:

Mobile units must use their agency-assigned unit designator during transmissions. These should not be shortened, but should include the entire set of letters and/or numbers. For example, a unit that has an agency-assigned call sign of “Sheriff’s 48 Sam” should identify using those very words. “Sam by” is insufficient identification. Likewise, “21 to 62” would be incorrect, if the units’ true designators were “6 Paul 21” and “5 Tom 62.”

An exception would be during interagency operations. In this case, units should add identification to indicate their agency as well, i.e. “Shasta 5201.”

Base stations should identify by using their agency name, along with any other usual identifier. For example, “Control” would not be sufficient identification, and would constitute a violation of proper procedure. More appropriate would be “Visalia Control,” “Tulare Sheriff’s Control,” etc. Again, base stations must also use the FCC call sign shown on their CLEMARS license.

Monitor First:

As users must switch to CLEMARS before transmitting, the operator or officer may not be aware of other personnel already using the channel. As such, it is a requirement that personnel monitor the channel prior to transmitting, to minimize the possibility of interference with communications in progress.

Use of Radio Codes:

While there are a few radio codes that almost everyone in law enforcement would understand, many agencies utilize codes that are incompatible with those used in neighboring agencies. While “Code 33” in one agency means “emergency traffic,” an agency a few miles away uses the same radio code to mean “no warrants, past record not checked.” As such, operations on CLEMARS are to be in “clear text,” avoiding the use of radio codes that could cause confusion, and potentially jeopardize officer safety.

Encryption:

The use of any CLEMARS channel for transmission of any encoded, encrypted, digital, or scrambled message is prohibited.

CLEMARS / NALEMARS FREQUENCY LIST

Statewide

CLEMARS 1	154.920 MHz Simplex	Gold 1/CLEMARS
CLEMARS 2	154.935 MHz Simplex	Gold 2/CLEMARS Tactical
CLEMARS 3	155.475 MHz Simplex	Gold 3/NALEMARS
CLEMARS 4	460.025 MHz Simplex	Gold 4/CLEMARS UHF Simplex
CLEMARS 5	460.025 MHz Repeat 465.025 MHz Input	Gold 5/CLEMARS UHF Repeat
CLEMARS 6	39.46 MHz Simplex	Gold 6/CLEMARS Low Band
CLEMARS 7	39.46 MHz Repeat 45.86 MHz Input	Gold 7/CLEMARS Low Band
CLEMARS 8	868.5125 MHz Simplex	Gold 8/CLEMARS 800 Simplex
CLEMARS 9	868.5125 MHz Repeat 823.5125 MHz Input	Gold 9/CLEMARS 800 Repeat

REGION-SPECIFIC CHANNELS

CLEMARS 20	866.2000 MHz Simplex	Gold 20/CLEMARS North Simplex
CLEMARS 21	866.2000 MHz Repeat 821.2000 MHz Input	Gold 21/CLEMARS North Repeat
CLEMARS 22	484.2375 MHz Simplex	Gold 22/CLEMARS 480-Los Angeles

SYSTEM PRIORITIES:

The CLEMARS Plan establishes four priority levels for use of the system. In each case, traffic of a higher priority level must be given use of the channel, with agencies utilizing it for lower priority traffic yielding the frequency immediately.

- **Priority 1** Disaster and extreme emergency operations for mutual aid and interagency communications.
- **Priority 2** Emergency or urgent operations involving imminent danger to the safety of life or property.
- **Priority 3** Special event control activities, generally of a preplanned nature, and generally involving joint participation of two or more agencies.
- **Priority 3a** Drills, tests and exercises.
- **Priority 4** Single agency secondary communications.

Agencies must inform other area user agencies when they are involved in high priority usage of CLEMARS channels. A broadcast should be made on CLEMARS as to restrictions on their use of the channel. Additional notifications might take any of three forms:

1. CLETS message to adjoining CLEMARS users.
 2. Notification via CLERS (point-to-point radio system).
 3. Telephone calls to area frequent users.
- In all cases where a CLETS message is sent, a courtesy copy to mnemonic "OES0" (Cal OES at Mather) is appreciated.
 - Consider use of the CLETS User Group Notification System.
 - This system has been modernized and upgraded in many areas of the state for use as a dispatcher's "hotline" net.

COMMON OPERATING VIOLATIONS:

CLEMARS/NALEMARS FREQUENCIES

- **FAILURE TO UNDERSTAND AND OBEY PRIORITIES**

The CLEMARS Plan details four levels of priority operation. Some users fail to observe these rules.

- **USE AS A PRIMARY DISPATCH OR INQUIRY CHANNEL**

Use for these types of transmissions is restricted to short-term situations. Such use on a day-to-day basis is not consistent with CLEMARS operating philosophy.

- **FAILURE TO IDENTIFY**

FCC regulations and the CLEMARS Plan require units to use their full agency Unit designator and stations to use their FCC call-sign.

- **FAILURE TO USE UNIVERSAL CODES OR CLEAR TEXT**

Each agency has different interpretations of radio codes. Avoid use of all but the most common codes.

- **FAILURE TO MONITOR PRIOR TO TRANSMITTING**

When switching to CLEMARS/NALEMARS, monitor before transmitting to avoid covering other units that may also be using the channel.

- **USE OF SCRAMBLING**

Scrambling is not permitted on CLEMARS channels.

- **IMPROPER USE OF CODED SQUELCH**

The CLEMARS Plan details appropriate use of tone or digital coded squelch.

- **POOR OPERATION PROCEDURES**

Officer safety could be hindered by use of the channels for unauthorized or unprofessional transmissions.

Instructions

Mission Tasking Definitions

Type of Request	Usually this will be a "Search for a Missing Person," but may be an "Evidence Search," "Aircraft Down", etc.
Location	Refers to the general area of the operation such as "Tuolumne Meadows, Yosemite" or "Mt. San Geronio."
Agency	County Sheriff or Police Department (via County Sheriff) or Federal/State Parks.
Resources Requested	A brief description of what and how many is needed (15 ground searchers, 2 tracking dogs etc.)
Cal OES Law Mission Number	This will be given automatically to the requestor and responder by the Cal OES LDO, once the mission has been approved. If a request is received directly from another county, they should be advised that they need to follow the Cal OES Mutual Aid Plan.
Contact Individual	This is the actual caller's name. It should be someone with knowledge of the incident in case a callback is needed.
Callback Number	This is that person's number, in case we need additional information.
ICP/Search Base Location and Telephone Number	This should be the exact location of the ICP/Search Base, or where the responders are needed. The phone number is important if directions are needed, when there is a long transit time or to call enroute and insure that the operation is still active.
Requested Arrival Time	When resources are needed at ICP/Search Base.
12/24 Hour	Is the search going to be continuous or will it be a daylight search only?
Radio Frequencies	To insure the responding resources take the proper radios and are able to communicate with the requesting agency en route.
Situation Brief	A few details about the request, i.e., 70-year-old Alzheimer patient missing two days.
Map Coordinates	Location for the ICP/Search Base with major cross streets and highways.
Weather and Terrain Conditions	Responders need to know to plan their equipment needs.
Special Equipment Needed	Some examples are: Avalanche Beacons, ELT, PLBs, Mine Rescue Equipment, etc.

Key Contacts:

California State Warning Center 24-HR – (916) 845-8911
CNG Notification (916) 854-3440

FIRST RESPONDER RESPONSIBILITIES; FIRST RESPONDER Checklist:

Upon arrival at a critical incident, the first responding officers must organize and take command of the scene. Their duties can include such critical tasks as: establishing on-scene command, formulating an action plan, broadcasting a situation assessment, setting up a command post location, requesting necessary personnel and equipment, appointing others to control activities, assigning missions, gathering intelligence, and delegating other tasks as necessary to establish control and providing a Staging Area for responding personnel.

To accomplish these tasks, the first responder should assume command responsibility until properly relieved by an officer of higher rank.

To assist the first responders and all the following resources and staff, Cal OES has published a manual entitled The Critical Incident Response Plan for First Responders, by Lt. John Kane (ret.) of the Sacramento Police Department.

The main purpose of this manual is to give the first responder a user friendly four-step plan that can control a wide variety of Critical Incidents from a barricaded gunman to natural and human caused disasters. The four-steps are:

LIE – Locate, Isolate, Evacuate.

MCI – Assess for a Mass Casualty Incident.

CHECKLIST – Use the Emergency Action Checklist.

ICS – Use the Incident Command System to best organize the Event.

Each step is explained in detail, along with a host of other important topics, such as: Evacuations v. Rescues, Crisis Media Relations and Role of the Fire Department in Emergency Operations.

The Critical Incident Response Plan for First Responders manual has been designed to compliment the California Law Enforcement Guide for Emergency Operations in order to provide the First Responder an operational plan that can be applied under stressful conditions ensuring positive control of a wide variety of Critical Incidents.

A series of Checklists has been developed specific to the initial stages of different kinds of Critical Incidents:

Situation Assessment:

A situation assessment is information developed by the first officer at the scene of an emergency. It is basic intelligence conveyed to the communication center, and elements concerned with the control of the event. Situation assessments should be updated as the event evolves. The initial situation assessment should include:

- Type of emergency
- Location of emergency
- Type of structure/vehicles involved
- Size of area involved
- Number of additional officers required
- Incident Command Post location
- Staging Area locations
- Ingress/Egress routes for emergency vehicles

- Assistance required (e.g., ambulance, fire, public utility)
- Number and type of casualties/injuries

Once the situation assessment has been completed, the first responder (as Incident Commander) can direct attention to control measures related to the event. These would include:

- Establishing a journal/log for recording major activities.
- Establishing a communication link with the communications center.
- Requesting personnel and equipment resources needed for the control of the event.
- Assigning personnel to staff ICS functions:
 - Operations
 - Planning/Intelligence
 - Logistics
 - Finance/Administration

Developing and implementing an operations plan that may include:

- Perimeter control provisions
- Interior patrol provisions
- Evacuation procedures
- Liaison with other emergency agencies
- Traffic control plans
- Mobilization of on-duty personnel
- Mutual Aid contingencies

An agency's role at the scene of disasters and other emergencies may be to support the local fire department or other emergency response force. The first responder (Incident Commander) can be of assistance by providing the following:

- A liaison officer to the Fire Commander or other Command Staff
- Control of emergency vehicle ingress/egress routes
- Perimeter traffic control
- Evacuation, if necessary

INCIDENT COMMAND POST Checklist:

This checklist assists the first responder and field supervisors in establishing an Incident Command Post (ICP). The guidelines are flexible and can be modified to deal with specific field situations. The purpose of an Incident Command Post is to:

- Establish a facility that is located strategically to command the overall operation of the emergency.
- Maintain centralized and systematized communication.
- Logistically monitor and regulate personnel and equipment needs.
- Acquire, analyze and properly distribute intelligence and other relevant information.
- Coordinate activities with associated agencies.

Incident Command Post (ICP) Selection Factors:

- Strategically, but safely located.
- Accessible to responding personnel.
- Defensible against crowds, snipers, fire bombs, etc.
- Sufficient space for responding personnel and equipment.
- Accessible to restroom facilities.
- Have communication capabilities or access to telephones, radio, television, microwave, etc.
- Accessible to electricity and water service.
- Contain structures for personnel briefing and protection against weather.
- Storage space and area for vehicles available.

Potential Command Post Sites:

- Schools/Universities
- Parks
- Large parking lots
- Water/Power facilities
- Churches
- Military armory

Establish Command Post:

- Notify communications, Commander/Chief, and responding units of Command Post location and staging area if at another location.
- Request sufficient personnel for Command Post.
- Identify routes to Command Post/Staging Area.
- Appoint Command Post staff, as needed:
 - Radio Operator
 - Command Post Scribe
 - Personnel Officer to make assignments
 - Logistics Officer to receive/issue equipment/vehicles
 - Planning/Intelligence Officer to gather information
 - Command Post Security Officer for perimeter security
 - Public Information Officer

Additional Assistance Needed:

- Air support
- Mutual Aid
- Fire Department
- Ambulance/Paramedics
- Red Cross

- Identify radio frequency to be used.
- Identify and isolate Command Post area with ropes or barrier tape.
- Identify an area for Public Information Officer to coordinate news media activities.
- Maintain open lines with communication center.
- Keep all concerned personnel briefed as to status of problem.
- Notify other concerned agencies:
 - Hospitals
 - Public Agencies
 - Other jurisdictions requiring information

AIR OPERATIONS Checklist:

This checklist is intended to assist the Incident Commander (or Operations OIC) in determining when and how to integrate aircraft operations into incident emergency response operations. These guidelines are flexible and can be modified to deal with specific field situations.

Typical Aircraft Missions:

- *Standard Law Enforcement* - reconnaissance, surveillance, suspect searches, direction and control
- *Tactical Law Enforcement* - SWAT rappelling platform, insertion and extraction, intelligence gathering
- *Medical Evacuation* - transport and insertion of emergency medical teams, extraction and transport of litter patients and other injured persons
- *Search and Rescue (SAR)* - search patterns, medical evacuation, ground team insertions and extractions, equipment and supply drops
- *Fire Control* - retardant drops, reconnaissance, fire crew insertions and extractions, heavy equipment transport
- *Major Disasters* - reconnaissance, situation and damage assessment, logistical support
- *Other Applications* - communications relay, airborne command and control, photo mapping, video aerial platform, searchlight illumination

Aircraft Limitations:

- *Weather* - Obscured weather such as fog and rain may preclude air operations. Warm, moist air, above 90 degrees with no or low wind conditions (especially at high altitudes) can severely limit rotor performance. Extremely high or gusty winds can damage helicopters, preclude rotor turn-up, and prevent flying near buildings or mountains.
- *Visual Flight Rules* - Helicopters generally fly under Visual Flight Rules (VFR), which require continual visual contact with the ground from a safe altitude.
- *Night Operations* - Operations during darkness with limited or no horizon are potentially dangerous and can place aircraft and crew in jeopardy. Night operations should not be attempted without special equipment and training.
- *Altitude and Temperature* - High altitude and/or high temperatures reduce rotor performance and lifting capability. Expert aviation advice should be sought.
- *Operating Conditions* - Helicopters generally should not be operated near soft dust, gravel or sand. This may result in engine damage or loss of visual contact with the ground. Salt water spray should also be avoided.
- *Small Arms Fire* - Helicopters are vulnerable to small arms fire.

Decision to Activate an Air Operations Branch:

The Air Operations Branch may be staffed whenever aircraft are deployed on an incident requiring mission assignment coordination, establishment of helispots or a helibase, or to address any aviation safety concerns requiring full time attention. If air operations are to be conducted in conjunction with incident command post operations, then safety must be a primary consideration. To ensure safe air operations are maintained it is recommended strongly that only persons knowledgeable in aircraft operations and aviation procedures be assigned to leadership positions within the Air Operations Branch.

Air Operations Branch Organization:

Air Operations Branch:

The Air Operations Branch OIC, who is ground based, is primarily responsible for input to the air operations portion of the Incident Action Plan. The plan will reflect agency restrictions that have an impact on the operational capability or utilization of resources (e.g., night flying, hours per pilot). After the plan is approved, the Air Operations Branch is responsible for implementing its strategic aspects - those that relate to the overall strategy as opposed to those that pertain to tactical operations. Specific tactical activities normally are performed by the Air Mission Group OIC working with ground and air resources. Additionally, the Air Operations Branch OIC is responsible for providing logistical support to aircraft operation on the incident.

Duties and Responsibilities – Air Operations Branch OIC:

- Obtain briefing from Operation OIC.
- Organize preliminary air operations.
- As appropriate, request declaration (or cancellation) of restricted air space area (Federal Air Regulation 91.137).
- Participate in preparation of the Incident Action Plan.
- Perform operational planning for air operations.

- Determine coordination procedures and communication for use by air organization with ground Branches, Divisions or Groups.
- Supervise all Air Operations Branch activities associated with the incident.
- Establish procedures for emergency reassignment of aircraft.
- Schedule approved flights of non-incident aircraft in the restricted air space area.
- Inform the Air Mission Group OIC of the air traffic situation external to the incident.
- Consider requests for non-tactical use of incident aircraft.
- Resolve conflicts concerning non-incident aircraft.
- Coordinate with Federal Aviation Agency (FAA).
- Update air operations plans.
- Report to the Operations Section OIC on air operations activities.
- Assure approved crash-rescue, refueling, and maintenance support through Logistics for extended operations.
- Report special incident/accidents.
- Arrange for an accident investigation team when warranted.
- Participate in safety/procedural meetings with other agencies pilots and air personnel in multi-agency incident.
- Maintain unit log.

Air Mission Group:

The Air Mission Group OIC is primarily responsible for the coordination of aircraft operations when fixed and/or rotary-wing aircraft are operating on an incident. The Air Mission Group OIC reports to the Air Operations Branch OIC.

Duties and Responsibilities – Air Mission Group OIC:

- Check-in and receive incident assignment.
- Determine what aircraft (fixed wing and helicopters) are operating within area of assignment.
- Obtain briefing from Air Operations Branch OIC or Operations Section OIC.
- Manage air activities based upon Incident Action Plan.
- Establish and maintain communications with the Air Operations Branch, Fixed Wing and Helicopter Coordinators, Aviation Support Group, and Support bases.
- Coordinate approved flights in restricted air space area.
- Obtain information about air traffic external to the incident.
- Receive and document reports of non-incident aircraft violating restricted air space area.
- Inform Air Operations Branch OIC of tactical recommendations affecting the air operations portion of the Incident Action Plan.
- Report on air operations activities to the Air Operations Branch OIC.
- Coordinate the use of assigned ground to air and air-to-air communications frequencies with Communications Unit and local agency dispatch center.

Aviation Support Group:

The Aviation Support Group OIC is responsible primarily for supporting and managing helibase and helispot operations and maintaining liaison with fixed-wing air bases. This includes providing (1) fuel and other supplies, (2) maintenance and repair of aircraft, (3) keeping records of aircraft activity, and (4) providing enforcement of safety regulations. Helicopters, during landing, take-off, and while on the ground, are under the control of the Aviation Support Group's Helibase or Helispot Managers. The Aviation Support Group OIC reports to the Air Operations Branch OIC.

Duties and Responsibilities – Aviation Support Group OIC:

- Obtain briefing from Air Operations Branch OIC or Operations Section OIC.
- Obtain copy of the Incident Action Plan from the Air Operations Branch OIC.
- Participate in Air Operations Branch OIC planning activities.
- Inform Air Operations Branch OIC of group activities.
- Identify resources/supplies dispatched for Aviation Support Group.
- Request special air support items from appropriate sources through Logistics Section.
- Identify helibase and helispot locations (from Incident Action Plan) or from Air Operations Branch OIC.
- Determine need for assignment or personnel and equipment at each helibase and helispot.
- Coordinate special requests for air logistics.
- Maintain coordination with airbases supporting the incident.
- Coordinate activities with Air Operations Branch OIC.
- Obtain assigned ground-to-air frequency for helibase operations from Communications Unit Leader or Communications Plan.
- Inform Air Operations Branch OIC of capability to provide night-flying service.
- Ensure compliance with each agency's operations checklist for day and night operations.
- Ensure dust abatement procedures are implemented at helibase and helispots.
- Provide crash-rescue service for helibase and helispots.
- Maintain unit log.

Aviation Mutual Aid:

Generally, air operations in support of an incident are conducted at the local level within an Operational Area (OA), which is the county.

If an OA exhausts its resources (including commercial) and it becomes necessary to request aviation assets in support of a law enforcement mission from outside the OA, the request should be directed by the local sheriff to the Regional Law Enforcement Coordinator. Exception: During *search and rescue incidents*, the OA may contact Cal OES directly to expedite response for life safety purposes. (*See Cal OES publication "Law Enforcement Mutual Aid Plan, SAR Annex" for details.*)

The Law Enforcement Branch of the Governor's Office of Emergency Services may endorse the Regional Coordinator's loan of aviation assets from outside the requesting OA by assigning a mission number. ***This does not result in reimbursement of costs! It may; however, facilitate cost recovery should funds later become available.***

If a disaster is widespread resulting in activation of the State Operations Center (SOC) to coordinate simultaneous incidents in multiple OA's or Regions, the SOC will activate its Air Operations Branch to facilitate state and federal aviation mutual aid.

Helibase:

This is the main location for parking, fueling, maintenance, and loading of helicopters operating in support of an incident. It is usually located at or near the incident base.

Helispot:

This is any designated location where a helicopter can take off and land safely. Some helispots may be used for loading of supplies, equipment, or personnel.

Helipad:

The specially designed and designated location, where a helicopter can take off and land safely *on a physical structure* such as a building or ship.

Helicopter Landing Zone (LZ)

A generic term that can be applied to a helibase, helispot, or helipad.

Helicopter Landing Zone Considerations

Law enforcement helicopters may land at civil airports, heliports, and private heliports with prior permission. Sparsely populated areas also may serve as landing sites depending on land-use restrictions. Except as stated, a helicopter may not land in a densely populated area unless an emergency exists. These restrictions do not preclude hovering at low altitudes to assist in law enforcement operations. When planning for a landing zone, consider the following:

- ❑ Establish a minimum landing area of 100 feet by 100 feet that is a level surface, free of debris and overhead obstructions (such as power lines).
- ❑ Choose an LZ that will not disrupt operations in the surrounding area (e.g., tents, map boards, feeding areas, briefing areas)
- ❑ Secure all loose items or potentially loose items.
- ❑ Maintain clear ingress and egress to the landing location.
- ❑ Ground personnel operating an LZ, or in the immediate area, should wear eye and ear protection.
- ❑ Steep aircraft approach angles are undesirable. Evaluate the height of adjacent obstacles to minimize risks.
- ❑ Try to avoid establishing an LZ near a body of water.
- ❑ Do not establish an LZ within 1000 feet of a school unless an immediate emergency exists.
- ❑ Night use of an LZ requires appropriate lighting. Plan ahead.
- ❑ Rooftop helipad weight limitations may preclude landing larger aircraft on buildings.

FIRE Checklist:

This checklist is intended to assist the field supervisor in the initial stages of a fire. These guidelines are flexible and can be modified to deal with specific field situations. Generally, the Incident Commander will be from the fire service and law enforcement will assume a support role.

Situation Assessment:

Ensure that a Situation Assessment has been prepared by field units and has been communicated to the communications center. It should contain:

- Location of emergency
- Size of involved area, actual and potential
- Apparent direction of the fire
- Type of area (e.g., business, residential, hillside, etc.)
- Ingress/egress routes for emergency vehicles
- Additional law enforcement personnel needed
- Location of staging area
- Location and radio designation of Command Post

Liaison:

Establish liaison with fire command.

Deploy Personnel To:

- Maintain ingress and egress routes for emergency vehicles.
- Establish perimeter control, keeping unauthorized vehicles and pedestrians out of involved area.
- Establish anti-looting security patrols for evacuated areas within the perimeter.
- Conduct an evacuation, if required.
- Relieve (demobilize) personnel as activity is reduced.
- Maintain a unit log.

TERRORISM RESPONSE: CHEMICAL, BIOLOGICAL, RADIOLOGICAL AND EXPLOSIVE Checklist:

THREATENED ACT OF TERRORISM OR BOMB THREAT

This checklist is intended to assist the field supervisor in the initial stages of a bomb threat response. These guidelines are flexible and can be modified to deal with specific field situations.

Immediate Considerations:

- Establish incident command and unified command, as required
- Time call received
- Type of call received
- When detonation/release is expected
- Location of device or intended target
- Description or appearance of the device
- Immediate evacuation
- Prior Threats - If this venue has had prior threats, use new locations for Incident Command Post and Staging areas.

Evacuation:

- Establish evacuation procedures. It is recommended that the person in charge of the location make the decision to evacuate
- In event of evacuation, instruct occupants to take personal possessions (purses, briefcases, etc.) with them and leave position of electric switches, doors, windows unchanged.

Note: Authority to order an evacuation under emergency conditions is listed in Section 409.5 of the California Penal Code.

Search:

- Conduct systematic visual search with persons familiar with the facility/location.
- Prohibit radio transmission within a half mile of the scene.
- Conduct visual search only.
- Issue instructions to not touch, move, or attempt to disarm any suspicious object/package/item.
- Mark location of any suspected devices using crime scene tape, twine or other bright, long item, string the marker from the area of the device to an area where the bomb team will access the location or make a sketch or diagram the location of the suspected device for the bomb unit.
- Notify Bomb Team of suspected devices.

Notification:

- Agency entities, concerned personnel, and property owners
- Bomb Team
- Investigative Unit
- Fire Department
- County Health Department
- Activate Emergency Medical Service
- National Guard Civil Support Team through the Mutual Aid System
- FBI, DHS, if terrorism is suspected

WEAPONS OF MASS DESTRUCTION (WMD) ATTACK, POST BLAST EVENT AND HAZARDOUS MATERIALS (HAZMAT) Checklist:

This checklist is intended to assist the first responder or incident commander in the initial stages of the response to an act of terrorism wherein a chemical, biological, radiological or nuclear weapon and/or an explosive were the mechanism of attack. These guidelines are flexible and can be modified to suit specific situations. A WMD attack is, first and foremost, a HAZMAT release. In fact, the intentional nature of such an act may not be immediately clear. Generally, during the initial stages of an incident, fire suppression, rescue, and emergency medical services dominate the incident operations. Therefore, during early stages of an event, the fire service is the lead agency. As the scene stabilizes, and a criminal act is suspected, the incident command will shift to law enforcement. The items listed in the checklist should be prioritized according to the requirements of each specific incident.

Immediate Considerations:

Establish the Incident Command System and Unified Command as required.

SAFETY:

- Consider secondary devices/releases.
- Approach from uphill, upstream and upwind (monitor wind direction changes).
- Do not drive through, or otherwise enter, any possible contaminated area.
- Be aware of and avoid self-contamination.
- Do not eat, drink, or smoke near the area.
- Do not use flares — request barricades for traffic blocks.
- Be alert for damaged utilities (electric lines, natural gas, etc.) structures in danger of collapse/falling debris, hazardous substances, including un-detonated explosive material from the initial explosion.
- Utilize Personal Protective Equipment per training, as necessary.

ISOLATE:

- Establish a perimeter at a radius from the seat of the explosion equal to one and one half times the distance to the farthest debris for explosions where a hazardous materials release has been ruled out.
- Establish a perimeter at a radius of 1000 feet for a hazardous materials or unknown release.
- Establish area to contain and identify uninjured witnesses.
- Keep all non-essential personnel away from scene.
- Establish an area to contain contaminated people for decontamination.

NOTIFY:

- Incoming responders of ingress/egress routes
- County Health Officer/Department
- Local hospitals, if mass casualties are involved
- Bomb Team (Technicians)
- Hazardous Materials Team
- Investigative Unit
- Utility companies
- Coroner, as necessary
- FBI (if terrorism or weapons of mass destruction are suspected)
- Public Information Officer
- Cal OES on all incidents
- CHP, if state highway and/or unincorporated roadway
- Administering agency
- Request National Guard Civil Support Team through the Mutual Aid System.

Special Considerations:

- Establish Incident Command to include liaison with fire, medical, and other necessary agencies.
- Maintain log of activities.
- Establish Incident Command Post in a location far enough outside of the perimeter that it will not have to be moved for any reason.
- Establish Incident Command Post Security.
- Establish Staging Area(s).
- Notify all incoming units of the staging area location.
- Establish staging area security.
- Assist injured victims.
- Request/facilitate necessary fire suppression.
- Request/facilitate necessary medical assistance.
- Facilitate necessary triage area(s).
- Request enough assistance to maintain an effective perimeter.
- Have utilities turned off to area as necessary.
- Identify potential witnesses.
- Establish traffic control around the effected area.
- Document initial response.
- Establish and preserve ingress and egress routes for emergency vehicles.
- Protect evidence.

Situation Assessment:

- Type of explosive/release, type of premises, vehicles involved.
- Location of incident, size of involved area.
- Direction of fluid, vapor or debris travel.
- Weather conditions, wind direction, speed, and any expected changes.
- Property and/or vehicle owner's name.
- Contents (NFPA 701 signage, placards, UN numbers), color of smoke and any odors.
- Name of substance, if known.
- Determine health hazards.
- Symptoms of injured persons, and number of people involved.
- Degree of danger at site, potential danger to surrounding area, city, and emergency crews.

Evacuation:

- Give situation estimate to Incident Commander.
- Decision to evacuate should be made by Incident Commander (see 409.5PC).
- Develop plan to evacuate.
- Refer to evacuation checklist for further information.

Contaminated Personnel:

- Isolate from non-contaminated personnel.
- Follow established hazardous materials decontamination procedures.

Note: Some hazardous materials react with water. Seek the advice of a qualified hazardous materials technician/specialist.

Investigation:

- Interviewing and identification of witnesses and/or possible suspects should begin as soon as practical.
- Evidence should not be disturbed until it can be evaluated and collected by a properly trained and equipped Crime Scene Technician.
- Collect information for incident reporting.
- Investigations may be jointly conducted with other involved agencies.

AMBER ALERT CRITERIA Checklist:

All four criteria must be met before an AMBER alert may be requested:

- Is this a confirmed abduction?
- Is the child 17 years of age or younger?
- Is the person in imminent danger of serious bodily injury or death?
- Is there information available to provide to the general public, which could assist in the safe recovery of the victim?

GUIDANCE:

The initial four hours after an abduction occurs are the most critical for putting out an AMBER alert; however, this does not constitute a maximum time limit for issuing an alert. Respond to any disappearance of a child as an abduction case until further information is developed.

Some examples that tend to qualify for broadcast:

- A child is taken from home.
- A vehicle was stolen or carjacked and a child was left inside the vehicle.
- A child is taken by an adult without parental consent.
- The child has been reported missing, there is evidence of foul play and law enforcement believes the child was kidnapped.

Examples that do not meet the preceding criteria:

- Children that have run away from home.
- Missing children involved in child custody disputes (parental kidnapping), unless bodily harm to the child is feared.
- The child is over the age of 17 and not mentally or physically impaired.

NON-FAMILY Abduction Checklist:

The Initial Investigation:

- Assign an Officer to victim's residence with the ability to record and "trace" all incoming calls. Consider establishing a separate telephone line or cellular telephone for agency use.
- Conduct neighborhood/vehicle canvass.
- Compile a list of known sex offenders in the region.
- Develop profile on possible abductor.
- Consider using polygraphs for parents and other key individuals.
- In cases of infant abduction, investigate claims of home births in that area.
- Fully load NCIC Missing Person File (involuntary category) with complete descriptive, medical, and dental information.
- Utilize NLETS and other information systems to alert local, state, regional and federal Law Enforcement agencies.
- Provide support for family through nonprofit missing children's organization.

The Ongoing Investigation:

- Review all reports and transcripts of interviews.
- Revisit the crime scene.
- Review all potential witness/suspect information obtained in the initial investigation and consider background checks on anyone identified in the investigation.
- Review all photographs and videos.
- Reexamine all physical evidence collected.
- Review child protective agency records for reports of abuse on child.
- Develop time lines and other visual exhibits.
- Re-interview key individuals.
- Interview delivery personnel: employees of gas, water, electric, and cable companies; taxi drivers; post office personnel; garbage handlers; etc.
- Critique results of the on-going investigation with appropriate investigative resources.
- Arrange for periodic media coverage.
- Contact CHP-Emergency Notification & Tactical Alert Center (ENTAC) (916) 657-8287.
- Contact NCMEC, (800) THE-LOST (843-5678) for photo dissemination, age-progression, and other case assistance.
- Update NCIC Missing Person File information necessary.

Recovery/Case Closure:

- Arrange for a comprehensive physical examination of the victim.
- Conduct a careful interview of the child, document the results of the interview, and involve all appropriate agencies.
- Provide effective reunification techniques.
- Cancel alarms and remove case from NCIC and other information systems.
- Perform constructive post-case critique.

AIRCRAFT CRASH Checklist:

This checklist is intended to assist the first responders with the initial response to an aircraft crash. It is recommended that *Unified Command* be established to ensure a coordinated response with other involved agencies. Local law enforcement generally will *not* have an investigative responsibility for aircraft crashes, but will provide perimeter control, site security, evidence protection, and facilitate response with the fire service, medical-rescue, and federal authorities that have investigative responsibility.

Situation Assessment:

Ensure that a situation estimate has been obtained, that it has been shared with the communication center, and that it contains the following information:

- Location of accident.
- Type of structure involved.
- Type of aircraft involved: military or civilian, passenger or cargo, helicopter or jet, private or commercial.
- Class of aircraft: single engine or multiple.
- Estimated toll of injured and dead.
- Additional assistance needed: police, fire, medical, military, etc.
- Location of Command Post and Staging Area.
- Best available ingress/egress routes for emergency personnel and vehicles.

Special Considerations:

- Approach from up wind.
- Do not approach on same path as aircraft.
- Avoid breathing smoke, possible toxic materials.
- Potential for fire/explosions.
- Military aircraft may contain weapons, ammunition, ejection seats.
- No smoking or flares.
- Crash site security and adequate perimeter control to keep unauthorized persons from the scene.
- Traffic control, crowd control, perimeter control (keep a 2,000 foot clearance).
- Evacuation (at least 2,000 feet upwind).

Crash Site Management:

- Establish Command Post.
- Restrict air traffic over scene.
- Establish liaison with incident commander.
- Identify all witnesses, obtain following data:
 - Time of crash.
 - Location of witnesses at time of crash.
 - Weather at time of crash.
 - Aircraft direction in flight.
 - Aircraft fire in flight.
 - Explosion prior to crash.
 - Location of objects falling from aircraft prior to crash.
 - Impact angle and position of survivors.
 - Anything removed from scene and by whom.

Deceased or injured victims may be displaced by impact. Conduct a thorough, wide search for survivors and other evidence, and take both video and photographs of the scene, if possible. Ensure all crash debris is protected, but do not disturb wreckage, evidence, human remains, or personal property unless advised to do so by the investigator in charge or the coroner in charge.

Subsequent Situation Assessment:

- Aircraft identification numbers, owner(s) of involved aircraft and structures
- Identification of pilot(s)
- Property damage
- Location of deceased and known survivors

Notification:

- Military, if applicable
- National Transportation Safety Board
- Federal Aviation Administration
- All necessary fire/rescue services
- Hospitals of potential influx of patients
- County Coroner

EARTHQUAKE Checklist:

This checklist is intended to assist the field supervisor with the initial response to an earthquake.

Immediate Considerations:

- Initiate a roll call of all units.
- Initiate a check of "*Critical Facilities*" and confirm their status (Non-uniformed officers in unmarked vehicles are recommended.) Checks to include:
 - High occupancy structures (depends on time of day).
 - Damage to roads, critical emergency facilities (police stations, fire stations, and hospitals), refineries, dams, etc. (Note: every jurisdiction should have a pre-established list of critical facilities.)
- Initiate a critical facilities log that indicates which facilities have been checked and their disposition.
- Direct field units to initiate a general area survey after completing their critical facility checks.

Accurate Situation Assessment is essential in an earthquake:

A quick evaluation of the situation must be made so that appropriate decisions can be made to coordinate response efforts. Situation reports can be sent to local or regional Emergency Operations Centers (EOC) so that appropriate emergency resources can be obtained and safely deployed to the areas with the most critical need.

Specifics to look for:

- Utility Disruptions
- Flooding
- Fire
- Hazmat Spills or Plumes
- Collapsed Buildings
- Casualties (Injuries vs. Fatalities)
- Damaged Roadways and Bridges

Deploy Personnel To:

- Conduct evacuations, if required.
- Assist in establishing evacuation centers and directing people to them.
- Establish ingress/egress routes for emergency vehicles.
- Maintain perimeter control to keep unauthorized people and vehicles out of the involved area (size of area depends on magnitude of the earthquake, which may be beyond your resources and require mutual aid).
- Direct traffic around major damaged sites.
- Provide emergency information to residents of area.
- Determine operability of telephone, water, gas, electricity, public transportation, and other systems serving residents of the area.

Special Considerations:

Contrary to other emergencies, after an earthquake, watch commanders should consider remaining at their stations to facilitate the damage assessment process until the extent of damage and casualties are known and have been communicated to the EOC.

Field officers generally should *not* become involved in rescue operations unless such incidents are immediately life threatening and rescue can be accomplished rapidly. Officers must fulfill their primary functions of observing, estimating, and communicating the overall situation assessment. This is best accomplished by non-uniformed officers in unmarked vehicles. Ultimately, this approach will save numerous lives in a major disaster, instead of the few that each officer could personally rescue.

If a significant after-shock occurs – "REPEAT THIS PROCESS"

CIVIL UNREST/DISORDER Checklist:

This checklist is intended to assist the Incident Commander and field supervisors with initial response to a riot or crowd/looting situation. Law enforcement agencies should concentrate on the basic law enforcement mission of protecting life and property. This should be done in rapid, firm, fair and impartial manner, using the minimum force necessary to accomplish the mission.

Tactical Objectives:

- ESTABLISH:** An Incident Command Post and Staging Area.
- ISOLATE:** Prevent the growth of the disorder. Cordon off the area. Deny access to those not involved.
- CONTAIN:** Confine the disorder to the smallest area possible.
- DISPERSE:** Make arrests, if appropriate.

Situation Assessment:

- Location of emergency
- Number of participants
- Activities of participants (looting, burning, blocking traffic, passive demonstration, etc.)
- Direction of movement
- Additional law enforcement personnel required
- Access to Incident Command Post/Staging Area by responding personnel

Initial Response:

- Assemble responding personnel into squads and Mobile Field Forces (MFF).
- Assign a Public Information Officer to work with the media.
- Brief the Squad/MFF leaders as soon as possible.
- Establish Tactical Missions (e.g., crowd control, traffic control, site security, etc.).
- Request Air Support (e.g., a police helicopter for observation and assistance in coordinating tactical missions).

Liaison:

- Establish liaison with the Law Enforcement Mutual Aid Coordinator and Cal OES.

Other Considerations:

- Know location of emergency medical services.
- Maintain an operations log.
- Determine the capabilities for less than lethal and chemical agents for each squad.
- Utilize a tactical *and* command radio frequency.
- Use serialized flex cuffs.
- Use a video camcorder.
- Arrange for the response of a field booking team.
- Arrange for transportation of suspects from field booking area to detention facility.

Helpful Hints:

- Individual*** action should be avoided (e.g., maintain squad formation integrity).
- Simple formations (e.g., Squad Skirmish Line/Wedge or Arrest Circles) need minimal explanation and/or coordination.
- Passive demonstrators --- Don't get involved until you have sufficient personnel.
- Use standby time for scouting (gathering information and analyzing intelligence).

After Dispersal:

- Establish a continuing highly visible law enforcement presence.
- Use mobile units to respond to problems (squad size is the smallest recommended maneuverable tactical element).
- Arrange for relief and feeding of personnel.

QUARANTINE Information:

This information is presented to provide guidance for law enforcement personnel in the assistance of Public Health Officials during times of medical emergency.

Public Health Officials at the State and local levels have the legal authority to impose Quarantine and Isolation, or request a voluntary Containment of the public to assist in the control of a communicable disease. It is possible that Public Health Officials may request law enforcement to assist in these efforts.

Definitions: In order of severity:

Isolation (Most Severe) Isolation applies to persons with symptoms of a communicable disease. They may be isolated at a hospital, home, or in another facility, in order to limit the spread of the disease. Isolation can be either strict or modified depending upon the type of disease and the conditions imposed by the Public Health Officer. Patients remain in isolation until their status is changed by Public Health Officials.

Quarantine (Severe) Quarantine applies to persons who may have been exposed to a communicable disease but are not yet ill. They are asked to remain at home or another location and not interact with others in order to limit the spread of the disease.

Containment (Least Severe) Containment is an attempt to separate potentially contaminated persons voluntarily. This may simply be accomplished by directing exposed persons to a decontamination area or to health professionals. Public Health Officials may raise containment to an Isolation or Quarantine status.

The following is a list of California Health and Safety Codes that allow state and local Public Health Officials the authority to impose Quarantines and Isolations or request a voluntary Containment. Additional codes within this list allow law enforcement to enforce the Quarantines, Isolations and Containments.

These are examples of the most pertinent state codes, followed by information regarding Federal Health procedures. The definitions are a summation of each code and are not complete. For complete definitions and additional local authorities, one should consult with their department for legal guidance.

Officers should be aware of the fact that all codes and statues pertaining to Quarantine, Isolation or voluntary containment are Misdemeanors.

CA H&S Code 100182 Neglect of Duty

California Health and Safety Code Section 100182 makes it a misdemeanor for a person charged with the performance of any duty under the laws of this state relating to the preservation of the public health to willfully neglect or refuse to perform that duty.

CA H&S Code 101040 Authority for Health Officer

California Health and Safety Code Section 101040 declares that a county Health Officer may take any preventive measure that may be necessary to protect and preserve the public health from any public health hazard during any “state of emergency” or “local emergency”.

CA H&S Code 120130 Authority for Isolation or Quarantine

California Health and Safety Code Section 120130 authorizes a health officer to require isolation (strict or modified) or quarantine for any case of contagious, infectious, or communicable diseases when this action is necessary for the protection of the public health.

CA H&S Code 120140 Authority for Health Measures

California Health and Safety Code Section 120140 empowers the local Health Officer to take any measures as are necessary to ascertain the nature of the disease and prevent its spread. These measures can include taking possession or control of the body of any living person or the corpse of any deceased person.

CA H&S Code 120175 Requirement to Take Action

California Health and Safety Code Section 120175 requires any health officer having reason to believe that any case of any contagious infectious or communicable disease exists within his or her jurisdiction to take measures as may be necessary to prevent the spread of the disease.

CA H&S Code 120220 Obey Health Officer

California Health and Safety Code Section 120220 requires all persons to obey the rules, orders, and regulations of a health officer for the establishment of a quarantine or isolation.

CA H&S Code 120225 Violate Isolation or Quarantine

California Health and Safety Code Section 120225 requires all persons in a quarantine or isolation to remain in the place of the quarantine or isolation and only communicate with a health official or others authorized by the health official.

CA H&S Code 120235 Quarantine Raised

California Health and Safety Code Section 120235 requires that no quarantine shall be raised until all persons having been under strict isolation are considered noninfectious.

CA H&S Code 120275 Violate Regulations - Punishment

California Health and Safety Code Section 120275 makes it a misdemeanor for any person to violate, refuse or neglect to conform to, any rule, order, or regulation prescribed by the state Department of Health Services for the quarantine or disinfection of persons.

CA H&S Code 120290 Willfully Expose Another

California Health and Safety Code Section 120290 makes it a misdemeanor for any person afflicted with any contagious, infectious, or communicable disease to willfully expose himself or herself to another person. It also makes it a misdemeanor for a person to willfully expose a person afflicted with the disease to someone else.

CA Code of Regulations, Title 17, Section 2516 Instructions for Strict or Modified Isolation

For cases of disease requiring strict isolation, Title 17, California Code of Regulations Section 2516 requires that the health officer give instructions to the patient and members of the household defining the area in which the patient is to be isolated, the isolation technique to be followed and the measures to be taken to prevent the spread of the disease. It requires that these measures be followed. The isolation techniques will depend upon the disease.

FEDERAL GOVERNMENT RESPONSE:

The Secretary of the Department of Health and Human Services has statutory responsibility for preventing the introduction, transmission, and spread of communicable diseases in the United States.

Under its delegated authority, the Division of Global Migration and Quarantine, works to fulfill this responsibility through a variety of activities, including the operation of Quarantine Stations at ports of entry, establishment of standards for medical examination of persons destined for the United States, and administration of interstate and foreign quarantine regulations, which govern the international and interstate movement of persons, animals, and cargo.

Just as in the State of California, violation of these statutes is considered a Misdemeanor.

The legal foundation for these activities is found in Titles 8 and 42 of the US Code and relevant supporting regulations. The main regulations to restrict potential communicable diseases from entering the United States or from moving interstate are:

US CODE, Title 42, Section 70.2 – Measures in the event of inadequate local control.

Whenever the Director of the Centers for Disease Control and Prevention determines that the measures taken by health authorities of any state or possession (including political subdivisions thereof) are insufficient to prevent the spread of any of the communicable diseases from such state or possession to any other state or possession, he/she may take such measures to prevent such spread of the diseases as he/she deems reasonably necessary, including inspection, fumigation, disinfection, sanitation, pest extermination, and destruction of animals or articles believed to be sources of infection.

US CODE, Title 42, Section 264. – Regulations to control communicable diseases

(a) Promulgation and enforcement by Surgeon General

The Surgeon General, with the approval of the Secretary, is authorized to make and enforce such regulations as in his judgment are necessary to prevent the introduction, transmission, or spread of communicable diseases from foreign countries into the States or possessions, or from one state or possession into any other state or possession. For purposes of carrying out and enforcing such regulations, the Surgeon General may provide for such inspection, fumigation, disinfection, sanitation, pest extermination, destruction of animals or articles found to be so infected or contaminated as to be sources of dangerous infection to human beings, and other measures, as in his judgment may be necessary.

(b) Apprehension, detention, or conditional release of individuals

Regulations prescribed under this section shall not provide for the apprehension, detention, or conditional release of individuals except for the purpose of preventing the introduction, transmission, or spread of such communicable diseases as may be specified from time to time in Executive orders of the President upon the recommendation of the National Advisory Health Council and the Surgeon General.

(c) Application of regulations to persons entering from foreign countries

Except as provided in subsection (d) of this section, regulations prescribed under this section, insofar as they provide for the apprehension, detention, examination, or conditional release of individuals, shall be applicable only to individuals coming into a state or possession from a foreign country or a possession.

(d) Apprehension and examination of persons reasonably believed to be infected

On recommendation of the National Advisory Health Council, regulations prescribed under this section may provide for the apprehension and examination of any individual reasonably believed to be infected with a communicable disease in a communicable stage and

(1) to be moving or about to move from a State to another State; or

(2) to be a probable source of infection to individuals who, while infected with such disease in a communicable stage, will be moving from a State to another State. Such regulations may provide that if upon examination any such individual is found to be infected, he may be detained for such time and in such manner as may be reasonably necessary. For purposes of this subsection, the term "state" includes, in addition to the several states, only the District of Columbia.

US CODE, Title 42, Section 271. – Penalties for violation of quarantine laws

(a) Penalties for persons violating quarantine laws

(b) Penalties for vessels violating quarantine laws

(c) Remittance or mitigation of forfeitures

US CODE, Title 42, Section 70.5 – Certain communicable diseases and special requirements.

The following provisions are applicable with respect to any person who is in the communicable period of cholera, plague, smallpox, typhus or yellow fever, or who, having been exposed to any such disease, is in the incubation period thereof:

(a) Requirements relating to travelers.

(b) Requirements relating to operation of conveyances.

ICS FORMS

Overview information of each ICS Form:

Form 201	Incident Briefing
Form 202	Incident Objectives
Form 203	Organization Assignments
Form 204	Division/Unit Assignment List
Form 207	Organization Chart
Form 209	Public Information Summary
Form 211	Check-In List
Form 211P	Check-In List: Personnel
Form 211E	Check-In List: Equipment
Form 215	Incident Planning Worksheet
Form 220	Air Operations Worksheet/Summary

OVERVIEW INFORMATION OF EACH ICS FORM

Form 201: Incident Briefing

- Prepared by the Incident Commander, or designee.
- To document initial response and brief on-duty or incoming Command and General Staff.
- Copies distributed to Command Staff, Section OICs, Branch OICs, Group OICs, Mobile Field Force OICs, and appropriate Logistics and Planning/Intelligence Units.

Form 202: Incident Objectives

- Prepared by Incident Commander and Command and General Staffs during the Planning Meeting.
- Used to develop the Incident Action Plan (can be used as the face sheet).
- Copies distributed to *all* supervisory personnel.

Form 203: Organization Assignments

- Prepared and maintained by Resource Unit under the direction of the Planning/Intelligence OIC.
- Used to keep track of currently activated units and names of personnel staffing each position.
- Attached to Incident Objectives (Form 202) and distributed to *all* supervisory personnel.

Form 204: Division/Unit Assignment List

- Prepared by the Resources Unit.
- Used to indicate what ICS organizational elements currently are activated and the names of personnel staffing each element.
- Chart should be posted on display board near Incident Command Post.

Form 207: Organization Chart

- Prepared by the Resources Unit.
- Used to indicate what ICS organizational elements currently are activated and the names of personnel staffing each element.
- Chart should be posted on display board near Incident Command Post.

Form 209: Public Information Summary/Incident

- Prepared and maintained by Situation Unit under the direction of the Planning/Intelligence OIC and usually presented to Command and General Staff members prior to each Planning Meeting.
- Used to inform and update all incident personnel; provide the basic information to the PIO for media releases; provide incident information to off-site communication centers, EOCs, and other involved agencies, and provide basic information for use in planning for the next operational period.
- Distributed to *all* supervisory personnel, posted on display board.

Form 211: Check-In List

- Completed by assigned supervisors or recorders (e.g., Staging Officer or designee, Personnel Unit Check-In Recorder, Supply Unit Receiving/Distribution Officer) at designated check-in locations (e.g., Staging Areas, Command Posts, and Communications Center) as personnel (or equipment) arrive.

- Used to track units, teams, squads, or mobile field forces of personnel and/or caches/units of equipment, arrival times, and agencies represented. Also used to support demobilization.
- Use Form 211P to check-in *individual officers* and use Form 211E to check-in *individual items* of equipment or supplies.
- Copies of completed Check-in Lists should be forwarded as appropriate to the Personnel Unit (for personnel), Supply Unit (for equipment and supplies), the Resource Unit (for both personnel and equipment/supplies), and to the Finance/Administration Section (for both personnel and equipment/supplies).

Form 211P: Check-In List: *Personnel*

- Used to track *individual* officers.
- Each Form 211P has space to record 12 officers/deputies (standard squad size).
- Copies of the completed Form 211P *Check-in List: Personnel* should be forwarded to the Personnel Unit, the Resource Unit, and to the Finance/Administration Section.

Form 211E: Check-in List: *Equipment*

- Used to track *individual items* of equipment or supplies
- Copies of the completed Form 211E *Check-in List: Equipment* should be forwarded to the Supply Unit, the Resource Unit, and to the Finance/Administration Section.

Form 215: Incident Planning Worksheet

- Initiated by the Incident Commander and General Staff at the Planning Meeting.
- Used to communicate the decisions made during the Planning Meeting concerning resource assignments to the Resources Unit. The worksheet is used by the Resources Unit to complete Assignment Lists and by the Logistics Section OIC for ordering resources for the incident.
- Completed worksheet should be forwarded to Resource Unit and a copy to Logistics Section.

Form 220: Air Operations Worksheet/Summary

- Completed by the Operations Section OIC or the Air Operations Branch OIC during each Planning Meeting.
- Used by the Air Operations Branch to record number, type, location, and specific assignments of aircraft assigned to the incident.
- Completed form should be forwarded to the Resources Unit.

Special Notes:

- ICS, **Form 205 (Communications Plan)** has been integrated into *Form 204*.
- ICS, **Form 206 (Medical Plan)** has been integrated into *Form 201*.
- ICS, **Form 214 (Unit Log)** has been integrated into *Form 201*.
- The Unit Log is completed by all Command Staff personnel and all personnel who supervise a Section, Division, Group, Mobile Field Force, Team, Squad, or Unit.
- Used to record details and activities of all basic ICS organizational elements.

Law Enforcement Mutual Aid Resource Typing

PURPOSE

Definitions are intended as a statewide standard *for mutual aid purposes only*. These definitions were established to create a level of expectation in resource configuration and resource capabilities for statewide mutual aid responses.

Although law enforcement agencies are not required to configure or define their daily operations utilizing the below criteria, it is recommended that agencies use the agreed upon standards, terms, and definitions for requesting or providing mutual aid. Any deviation from the established standards should be identified at time of ordering to facilitate efficient planning, logistical support, and deployment of resources.

RESOURCE DEFINITIONS:

Resource Typing: A means of categorizing, defining, or identifying *mutual aid* resources, which are commonly requested by law enforcement agencies.

Allocated Resources: Resources dispatched to an incident that have not yet completed check-in procedures.

Assigned Resources: Resources checked-in and assigned missions at an incident.

Available Resources: Resources checked-in to an incident and available for a mission assignment. These resources are usually found in the staging area.

Out-of-Service Resources: Resources checked-in to an incident but not yet available for a mission assignment due to mechanical, rest, or other personnel reasons.

GENERAL PERSONNEL:

Officer/Deputy: A full-time salaried peace officer in full agency uniform; armed with a handgun and ammunition equipped with handcuffs, baton, flashlight, and notebook. Preferred additional equipment includes: soft body armor, helmet with face shield, hand-held radio, additional ammunition, and personal chemical agent (mace/OC spray).

Unit: Two officers/deputies in an emergency equipped vehicle (marked patrol vehicle preferred).

Squad: An organizational element of a mutual aid response mobile field force consisting of 11 deputies/officers and a supervisor (sergeant). Total of 12 personnel in a minimum of 3 *Patrol Vehicles (General Purpose)*.

Mutual Aid Response Mobile Field Force (Platoon): Consists of four 12-person squads with an OIC (minimum rank of Lieutenant) and Deputy OIC (minimum rank of Sergeant), each with a driver. The total minimum personnel are 52. The Mutual Aid Response Mobile Field Force can be augmented for specific missions (configured for civil unrest, major evacuations, etc.). The number of personnel assigned to each vehicle may vary depending on mission requirements (i.e., 4 officers/deputies per vehicle for civil unrest, 2 officers/deputies per vehicle for major wildland fire evacuations).

SPECIALIZED RESOURCES

Armored Vehicle: A vehicle that is designed to withstand penetration from small arms fire. Capabilities of armored vehicles differ considerably. Some armored vehicles do *not* protect against rifle fire. Vehicle capabilities need to be understood clearly prior to deployment.

Arson Investigator: A peace officer trained and equipped to conduct a criminal investigation of the scene of arson or suspected arson.

Bomb Technician: A peace officer trained and equipped to investigate explosive devices and render them safe, and to conduct a criminal investigation of the scene of an explosion.

Chemical Agent Delivery Specialist: A peace officer trained and equipped to deliver chemical agents in both outdoor situations and those involving structures. May be deployed as a "Linebacker" in a mutual aid response mobile field force.

Coroner/Medical Examiner: A person with statutory authority to carry out the duties of the Coroner of the County.

Counter-Sniper: A full-time salaried peace officer (usually a member of a SWAT Team) trained and equipped to carry out precision marksmanship assignments.

Crime Scene Technician: A peace officer (or civilian technician employed by a law enforcement agency) specially trained and equipped to: (a) obtain latent prints, (b) take photographs, (c) and to collect, categorize, and book evidence.

Crisis Negotiation Team: A person or team of people specifically trained to negotiate with dangerous individuals.

Critical Incident Stress Debriefing (CISD) Team: An individual or team trained to facilitate a formal, open, discussion of incident events with emergency response personnel, in order to resolve or to help cope with the emotional aftermath of an incident.

Dive Team: A team of peace officers (certified SCUBA divers) specially trained and equipped to conduct underwater criminal investigations, evidence collection, and body recovery assignments.

Field Booking Team: A team of peace officers (or correctional officers employed by a law enforcement agency) trained to respond to field incidents and set up a booking site to facilitate the booking process and transportation of arrestees. The size of the team depends upon the nature of the incident and the number of arrests expected.

Homicide Investigator: A peace officer specially trained and equipped to conduct a criminal investigation of a homicide.

K-9 Team: A *Police Service Dog* with a peace officer handler and a patrol vehicle.

ICS Technical Advisor: A subject-matter expert trained in the principles, procedures, and organization of the Law Enforcement Incident Command System who will respond under mutual aid to consult, recommend and facilitate the implementation of ICSS. Cal OES Law Enforcement Branch maintains a roster of qualified ICS Advisors.

ICS Overhead Team: A team trained in the principles, procedures, and organization of the Law Enforcement Incident Command System that will respond under mutual aid to provide staff-level management services to facilitate the implementation of ICS.

Medical Personnel: Emergency Medical Technician or Responder: A peace officer (or person employed by a law enforcement agency, fire department, hospital, or ambulance company) certified as an EMT-B (Basic), EMT-1, or EMR (Emergency Medical Responder) who has been trained specially to handle field medical emergencies and can handle BLS (Basic Life Support) emergencies.

Medical Personnel: Paramedic (Medic): A peace officer (or person employed by a law enforcement agency, fire department, hospital, or ambulance company) certified as an EMT-P (Paramedic) who has been trained specially to handle field medical emergencies and can handle BLS and ALS (Advanced Life Support) emergencies.

Medical Personnel: Tactical Paramedic (Tact-Medic): An armed peace officer (usually a member of a SWAT Team) certified as an EMT-P (Paramedic) who has been trained to handle field medical emergencies *in the law enforcement tactical environment* (i.e., during hostile gunfire and can handle BLS and ALS (Advanced Life Support) emergencies.

Mobile Command Post: A vehicle capable of being deployed to a field location for use as an Incident Command Post.

Mobile Communications Unit: A vehicle capable of being deployed to a field location for use as a communications center or communications link staffed by at least one technician capable of setting up and maintaining the unit and its equipment.

Motorcycle Unit, General Purpose: A marked law enforcement agency motorcycle equipped with emergency lights and siren, radio, first aid kit, flares, blanket, and traffic accident investigation equipment; operated by a trained and licensed uniformed peace officer/deputy (defined above) capable of traffic enforcement/investigation.

Motorcycle Unit, Off-Road: A marked law enforcement agency motorcycle specially equipped for rough-road or off-road applications; driven by a properly trained and licensed uniformed peace officer/deputy (defined above) who is capable of safe motorcycle operations within the particular off-road or hazardous road environment.

Mounted Unit: A specially trained and equipped horse ridden by a uniformed peace officer/deputy (defined above) who is capable of crowd control and other civil disorder crowd and escort assignments.

Patrol Boat: A marked law enforcement agency powerboat equipped with emergency lights and siren, radio, public address (PA) system, first aid kit, fire extinguisher, flares, blankets, flotation devices, and a tow line; operated by a trained and uniformed peace officer/deputy (defined above) or public officer capable of safe boat operations within the particular aquatic environment.

Patrol Vehicle, 4WD: A marked law enforcement agency 4-wheel drive vehicle capable of seating a minimum of four persons; equipped with emergency lights and siren, radio, PA system, mud/snow tires, first aid kit, fire extinguisher, flares, blankets, shotgun, and prisoner cage or restraints, and if requested, a tow chain or strap, shovel, ax, and tire chains; driven by a properly trained and licensed uniformed peace officer/deputy (defined above) capable of safe vehicle operations within the particular off-road or hazardous road environment.

Patrol Vehicle, General Purpose: A marked law enforcement agency vehicle capable of seating a minimum of 4 persons; equipped with emergency lights and siren, radio, public address (PA) system, first aid kit, fire extinguisher, flares, blanket, shotgun, and prisoner cage or restraints; driven by a properly trained and licensed uniformed peace officer/deputy (defined above).

Post-Blast Investigator: A peace officer (or civilian technician employed by a law enforcement agency) trained and equipped to investigate the scene of an explosion. Post Blast Investigators do *not* handle live explosive devices or attempt to render them safe. Compare to *Bomb Technician*.

Prisoner Transportation Team: A team consisting of at least two peace officers (or correctional officers employed by a law enforcement agency), trained and equipped to transport prisoners.

Public Information Officer (PIO): A peace officer (or civilian employed by a law enforcement agency) specially trained in disseminating information to the public through the media and other means. PIO skills and knowledge include preparing for and conducting media interviews, knowledge of public information law, SEMS PIO reporting relationship, knowledge of media deadlines, working with photographers and reporters, public speaking, and interfacing effectively with other agencies. The PIO should have a dedicated vehicle and be equipped with a cell phone (with accessories), pager, PIO Kit, and PIO Vest.

Public Safety Dispatcher (PSD): A person who has been trained to operate communications equipment and to conduct radio and computer traffic with field law enforcement units. A PSD is trained in 9-1-1 call procedures and should have training in pre-arrival medical instructions, hazardous materials awareness, high-risk law enforcement response call procedures, and fire service response call procedures.

SWAT Team: A group of full-time, salaried peace officers specially trained and equipped to deal with high-risk law enforcement incidents such as barricaded suspects, armed criminals, victim rescues, and hostage situations. Technical capabilities include delivery of chemical irritant agents, forced entry, and precision marksmanship. The team must possess the necessary vehicles for self-mobility.

Undercover Officer: A full-time, salaried, armed peace officer in civilian attire (with *no* identifiable law enforcement clothing). Generally, undercover officers are used for observation and intelligence gathering assignments during a mutual aid response incident.

AVIATION RESOURCES

Airborne Accessories: Helicopters may be equipped with fixed or detachable components that provide the incident commander with specialized airborne capabilities as follows:

Cable Hoist: A hoist fitted to a helicopter airframe used to lift victims and objects into the aircraft while hovering. Cables come in varying lengths and lifting capability. An approximation of the task should be stated upon request.

Forward Looking Infrared (FLIR) Imaging Device: A system utilizing temperature differentials to conduct searches without the need for a searchlight. It is useful in discovering subjects in heavy brush and on roof tops.

High Intensity Airborne Searchlight: An airborne searchlight capable of illuminating subjects and objects on the ground.

Night Vision Goggles: Specialized glasses that amplify ambient light making it possible to see in an otherwise dark environment.

Public Address (PA) System: Speakers that permit airborne announcements to be directed to individuals or small groups. Generally this is not effective for large groups.

Video: Some helicopters are equipped to function as an airborne video platform and can broadcast real time video pictures via microwave transmission to the ICP. Also some are able to record the signal in the aircraft for later playback.

Air Operations Branch Safety Officer: Under the direction of the Air Operations Branch OIC, will have responsibility for all ground-based aviation safety matters. Duties may include determination of landing zone (LZ) location, LZ hazard control, LZ flight operations, air crew relief, air crew briefings, aircraft communications, and contact with local Federal Aviation Administration (FAA) personnel as appropriate.

Air Crew Members: The following is a list of the most common personnel found on board aircraft:

Crew Chief: An *observer* who has been trained to handle specialized helicopter operations (rappelling, extraction's, hoisting, etc.). The specific mission operation should be identified at time of ordering.

Observer: A peace officer trained in helicopter operations and who coordinates and directs the helicopter in regards to law enforcement activities.

Pilot: A licensed individual, sworn, military or civilian, trained to operate a helicopter for specific mission requirements. The pilot has ultimate authority for the operation, conduct, and safety of the aircraft, its crew and passengers.

Fixed Wing Aircraft (Observation): This is a high-wing aircraft able to fly slowly, and maneuver in remote locations, while carrying two or more persons (one pilot and one observer).

Fixed Wing Aircraft (Transportation): A high or low wing aircraft with one or two engines capable of transporting one pilot and two or more passengers on cross-country flights. The aircraft should have an FAA certificate of air worthiness, and comply with part 135 of the federal aviation regulations concerning maintenance standards and equipment for Instrument Flight Rules (IFR) operation.

Helicopters: Helicopters are categorized by capacity and lifting capability as Observation, Light, Medium, and Heavy, and where possible, should be certificated by the FAA as air worthy. Helicopters may be configured for passenger or load carrying to include medical evacuation litters, tactical personnel insertion, equipment hauling, water dropping and other applications. *Specialized mission tasking should be stated at the time of request to ensure adequate aviation response.*

Observation: A helicopter primarily used for observation; crewed by a pilot or a pilot and observer. It should be equipped with a searchlight, public address system, a multi-frequency radio, and scanner. Typical *Observation* Helicopters include: Bell Model 47, Enstrom, Hughes Model 300, and Robinson Model R-22.

Light: A helicopter capable of transporting two to seven persons that can be used as an observation helicopter may be configured for medical evacuation with medical personnel on board. In an emergency evacuation, a light helicopter is able to carry either one or two litter patients and should be equipped with multi-frequency radio and scanner.

Typical Light Helicopters include: A-Star AS 350, Bell Model 206 (Jet Ranger), Bell 206 L3 (Long Ranger), Eurocopter MBB 105 (BO 105), MBB 117 (BK 117), and Hughes Model 500D.

Medium: A helicopter primarily used for transportation and medical evacuation staffed by a crew of one or two pilots, crew chief, and/or two medical personnel. It is able to carry seven to thirteen passengers, the crew, and one to three litter patients. Normal crewing for medical evacuation is a pilot, crew chief, and two medical personnel. It should be equipped with a multi-frequency radio and scanner. A searchlight, hoist, or public address systems are not required as part of this configuration.

Typical Medium Helicopters include: Agusta Model 109, Bell UH1H (Bell 205 A-1 Huey), Bell UH1B (Bell 204 Huey), Bell UH1N (Bell 212), Bell Model 222, Dauphin Model SA (365C), Sikorsky Model S-58 (H-34), Sikorsky S-76, and Sikorsky UH 60 (Blackhawk).

Heavy: A helicopter staffed by a crew of two pilots, a crew chief, and/or two medical personnel, and used mainly for transportation. Able to carry 26 to 55 passengers and crew or 15 to 24 litter patients. Normal crewing for medical evacuation is two pilots, crew chief, and two medical personnel. It should be equipped with multi-frequency radio and scanner. Most have hoist capability and searchlight, hoist or public address systems are not required.

Typical Heavy Helicopters include: Boeing Model 107 (CH-46), Boeing 114 (CH-47), Sikorsky S-61 (H3F), and Sikorsky S-65 (H-53).

SEARCH AND RESCUE (SAR) RESOURCES

Statutory Authority: In the State of California, the statutory authority and responsibility for SAR operations resides with the County Sheriff (California Government Code Section 26614). Refer to the California Emergency Management Agency publication: *Law Enforcement Mutual Aid Plan, SAR Annex* (commonly referred to as the “*Green Book*”) for additional information on Search and Rescue Mutual Aid.

Variety of SAR Personnel and Resources: Search and Rescue personnel and resources vary considerably within the State of California. There are a variety of generic and specialty rescue teams available for mutual aid purposes consisting of both volunteers and paid professionals, or a combination thereof. The most common SAR unit composition in California typically consists of well-trained civilian volunteers (Registered Disaster Service Workers) affiliated with a County Sheriff’s Department having a sworn-member as the unit supervisor or liaison. Additionally; the California Governor’s Office of Emergency Services, Law Enforcement Branch can access a variety of State and Federal Search and Rescue resources.

Ordering SAR Mutual Aid Resources: Due to the large variation in SAR team sizes, capabilities, and resources, it is crucial that the agency requesting SAR mutual aid clearly define the specific mission, anticipated duration, and the terrain and environmental characteristics.

GENERAL SAR PERSONNEL:

SAR Member: A law enforcement agency member (sworn, non-sworn, reserve) or civilian member of an organized, trained, and equipped *Search and Rescue Unit/Team* recognized by the County Sheriff.

SAR Unit/Team: A unit of a public agency, or non-agency affiliated civilian group that is recognized by the County Sheriff; organized, trained and equipped to carry out search and rescue/recovery missions. A SAR Unit may contain several specialty teams.

SAR PERSONNEL TYPE DESIGNATORS:

SAR – Incident Commander: A *SAR Member* qualified and capable of managing a search and rescue incident. Generally, a qualified SAR Incident Commander has completed ICS National Training Curriculum Modules for Basic, Intermediate, and Advanced ICS or the SEMS equivalent; and has completed the “Managing the Search Function (Lost Person Incident) Course” and/or the “Incident Commander for Search and Rescue Course;” and has prior experience as a *SAR Overhead Team* member.

SAR – Overhead Team: A team of *SAR Members* trained to manage the operations, planning, logistics, and administrative functions of a search and rescue incident. Generally, SAR Overhead Team members have completed ICS National Training Curriculum Modules for Basic, Intermediate, and Advanced ICS or the SEMS equivalent; and have completed the “Managing the Search Function (Lost Person Incident) Course.”

SAR – Technician Program: The SAR Technician program is a *voluntary* program for certification of SAR personnel that is administered by the National Association for Search and Rescue (NASAR). In California, local SAR units may elect to require that their personnel become certified at one of the three SAR Technician levels. It is important to note that this certification is an *optional* program and is *not mandated* by the State of California. Currently,

SAR Technician designators are not utilized for statewide mutual aid purposes. However, since these designators are becoming more accepted and utilized within various SAR units, the following descriptions of the SAR Technician types have been provided for informational purposes.

SAR – Technician Type I: A SAR Member that has received National Association for Search and Rescue (NASAR) certification for SAR Technician Type I. A SAR Technician I has *advanced knowledge and field performance competence*; knowledge and field performance skills in the use of SAR tactics including K-9 attachments to a SAR team, advanced land navigation skills, group leadership, and management. Generally, a SAR Technician I has completed the NASAR-approved “Advanced Search and Rescue Course.”

SAR – Technician Type II: A SAR Member that has received National Association for Search and Rescue (NASAR) certification for SAR Technician Type II. A SAR Technician II has *basic knowledge skills and field performance competence*. Generally, a SAR Technician II has completed the NASAR-approved “Fundamentals of Search and Rescue Course.”

SAR – Technician Type III: A SAR Member that has received National Association for Search and Rescue (NASAR) certification for SAR Technician Type III. A SAR Technician III has *basic knowledge skills*. Generally, a SAR Technician III has completed the NASAR-approved “Introduction to Search and Rescue Course.”

SPECIALIZED SAR RESOURCES:

SAR – Aero Squadron: The volunteer air-arm of search and rescue is comprised of trained aviators supplying their privately-owned aircraft in support of field operations. Typically, they will be deployed under the Fixed Wing Coordinator, Air Mission Group, and also used to staff various positions within ICSS Aviation Support Group.

SAR – Communications Team: A SAR team organized, trained, and equipped to provide mobile field communication capabilities in support of search and rescue operations. This team should be capable of providing multiple avenues of communication; including police service radio frequencies, as well as citizens’ band (CB) radio, amateur radio (Ham), teletype, and mobile/field telephones (cell phone).

SAR – Desert Rescue Team: A SAR team organized, trained, and equipped to conduct search and rescue operations over vast expanses of varied desert terrain. This team should be fully self supporting for extended field operations under adverse conditions of terrain and weather of the desert environment. Often these teams use four-wheel drive vehicles.

SAR – Dive Team: A SAR team of certified SCUBA divers specially trained and equipped to deal with water emergencies such as drowning, boating accidents, aircraft crashes in lakes and rivers; as well as non emergency functions such as evidence retrieval from water. Team should be trained in black-water diving techniques. SAR dive teams also may be trained and equipped to carry out ice rescues, swift water rescues, surface-supplied-air underwater operations, hazardous dives, and/or contaminated water operations.

SAR – Ground Team: A “general” description of a SAR team capable of conducting ground searches. Ground teams may be defined further according to the type of environment in which they are designed to be deployed (e.g., desert, mountain). Ground teams may have other specialized resources attached (trackers, search dogs, medics, litter team, etc.).

SAR – Horse (Mounted) Team: A SAR team capable of conducting search and rescue operations utilizing horses as their primary means of transportation.

SAR – Search Dog Team: A SAR team consisting of a search dog with handler capable of locating lost persons based on human scent. Search dogs should be certified as *Mission Ready* by a recognized rescue dog association. There are two disciplines of search dogs:

Tracking/Trailing Dogs are trained to follow the path that a lost person has taken. These dogs require a properly preserved scent guide (i.e., a scent article like a sock or glove) and are not distracted by other people in the area. These dogs work on long lead (leashes). Trailing dogs most frequently work trails that are several days old. Trailing dogs can be useful in determining Point Last Seen (PLS) and in establishing the probable boundaries of a search area.

Air Scent/Area Search Dogs are trained to alert to human scent in the area. Although not required, scent guides can be of assistance to area search dogs. Area search dogs work most frequently off-lead (no leashes) and can cover large areas. Area dogs are useful in hasty searches and in determining Probability of Detection (POD) by “clearing” an area or by detecting an area where the subject has been.

Search dogs also may be certified in the following *specialty areas*:

Avalanche Dog is a search dog trained and experienced in locating victims of an avalanche.

Cadaver Dog is a search dog trained and experienced in locating cadavers or human remains.

Disaster Dog is a search dog trained and experienced in locating victims of a structural collapse.

Evidence Search Dog is a search dog trained and experienced in locating human scent articles and firearms.

Water Search Dog is a search dog trained and experienced in locating drowning victims.

SAR – Litter Team: A SAR team capable of packaging and transporting an injured person over rough terrain from a remote wilderness location. A Litter Team may be a component of a *Medical Team*, *Ground Team* or a *Technical Rescue Team*.

Generally, a Litter Team consists of one “Litter Captain/Boss” (supervises the litter operation), several “Litter Tenders” (usually one tender for the vertical environment and six tenders for transportation over ground terrain or to assist as “Haulers” in the vertical environment), “Relief Litter Tenders” (minimum of six), one “Belayer,” one “Rope Handler” (to assist the Belayer), two to four “Trail Scouts” (to clear the trail), and one or two EMTs to render patient care while enroute.

Note: A wilderness litter carry operation is demanding, difficult, time consuming, and labor intensive. It should be considered the evacuation method of last resort. However, adverse weather, unsuitable landing zones, steep terrain, or wilderness area restrictions on mechanized vehicles may require the use of a Litter Team.

SAR – Medical Team: A SAR team of certified *Emergency Medical Technicians* (EMT) specially trained and equipped to provide emergency medical care (minimum BLS-level) to patients in the *wilderness environment*. Some SAR Medical Teams may be staffed with paramedics, nurses, and/or doctors who can provide ALS patient care.

SAR – Mountain Rescue Team: A SAR team trained and equipped to carry out Alpine style search and rescue operations including high-angle rock work, rescues from vehicles driven off

mountain roads, and avalanche rescue operations. Team should be capable of carrying out search and rescue missions under the most extreme conditions of elevation and weather. Mountain Rescue Teams are accredited by the Mountain Rescue Association (MRA).

SAR – Swift Water Rescue Team: A SAR team trained and equipped to conduct swift water rescues from rivers and streams, flood control channels, flooded streets, etc. Swift water rescue team members should have a background in technical rescue and have completed *Swift Water Rescue Technician Training* or equivalent. Some swift water rescue teams may have boat and/or helicopter capabilities.

SAR – Technical Rescue (Climb) Team: A SAR team trained and equipped to conduct high angle rescue operations including: rappelling, ascending, slope evacuation, high angle lowering, hauling systems, litter operations, and high lines. Technical rescue team members should have completed *Rope Rescue Technician Training* or equivalent. Some technical rescue teams also may have helicopter capabilities or be able to work from a helicopter that is provided at the incident.

SAR – Tracker: A SAR member trained in man-tracking techniques and found through actual experience to have developed tracking skills to a high degree of competency.

SAR – Underground Rescue Team (Cave Rescue Type): A SAR team trained and equipped to conduct rescue operations in natural caves. Cave rescue teams are capable of operating in an environment where natural light is absent.

SAR – Underground Rescue Team (Mine Rescue Type): A SAR team trained and equipped to conduct rescue operations (in accordance with Mine Safety Health Administration (MSHA) regulations) in man-made underground environments such as mine shafts, sewers, wells, and pipes. Mine rescue teams are capable of conducting shoring operations and advanced teams are capable of operating in an oxygen deprived atmosphere and/or in an atmosphere found to contain poison gases.

SAR – Vehicle Team: A SAR team trained and equipped to conduct search and rescue operations utilizing four-wheel drive vehicles over rugged terrain.

GLOSSARY OF TERMS:

Definitions of terms used in this publication:

Action Planning: Consideration of strategies and tactics developed by General and Command Staff personnel for incident control operations and for services and support required; this is a continuing process for the duration of the emergency incident. See also Incident Action Plan.

Aerial Reconnaissance: An aerial assessment of an area of concern, which includes geographic extent of damage, potential hazards, facilities site selection, other information related to the emergency.

Agency: Any government organization that participates in or provides resources to an emergency incident.

Agency Representative: An individual assigned to an emergency incident from an assisting or cooperating agency. Agency Representative(s) have delegated authority to make decisions on matters affecting that agency's participation in the emergency incident. Agency Representatives report to the Liaison Officer.

After Action Report: A report covering response actions, application of SEMS, modifications to plans and procedures, training needs, and recovery activities. After action reports are required under SEMS after any emergency requiring a declaration of an emergency. Reports are required within 90 days.

Air Mission Group OIC: The Air Mission Group OIC primarily is responsible for the coordination of aircraft operations when fixed and/or rotary-wing aircraft are operating on an incident. The Air Mission Group OIC reports to the Air Operations Branch OIC.

Air Operations Branch OIC: The person primarily responsible for preparing and implementing the air operations portion of the Incident Action Plan and for providing logistical support to helicopters operating on the incident.

Allocated Resources: Resources dispatched to an emergency incident that have yet completed check-in procedures.

Area Command: An organization established to: 1) oversee the management of multiple, simultaneous incidents that are each being handled by an Incident Command System organization; or 2) to oversee the management of a very large incident that has multiple Incident Management Teams assigned to it. Area Command has the responsibility to set overall strategy and priorities, allocate critical resources based on priorities, ensure that incidents are properly managed, and ensure that objectives are met and strategies followed. See also Unified Command.

ARWEN: a breech-loaded less-lethal launcher. It fires 37mm less-lethal rounds (foam or wooden payload) and is designed for crowd control. Anti Riot Weapon ENfield.

Assigned Resources: Resources checked-in and assigned missions in an incident.

Assisting Agency: An agency directly contributing support, service, or resources to another agency.

Available Resources: Resources checked-in and available for a mission assignment.

Aviation Support Group OIC: The Aviation Support Group OIC is primarily responsible for supporting and managing helibase and helispot operations and maintaining liaison with fixed-wing air bases. This includes providing (1) fuel and other supplies, (2) maintenance and repair of aircraft, (3) keeping records of aircraft activity, and (4) providing enforcement of safety regulations. Helicopters, during landing and take-off and while on the ground, are under the control of the Aviation Support Group's Helibase or Helispot Managers. The Aviation Support Group OIC reports to the Air Operations Branch OIC.

Base: The location at an incident at which the primary logistics support functions are coordinated and conducted (incident name or other designator may be added to the term "Base"). The Incident Command Post also may be collocated with the Base. Usually there is a single Base per emergency incident.

Branch: The organizational level within ICS having functional responsibility for major segments of incident operations.

Branch OIC: The officer assigned functional OIC responsibility at the branch level. Other ICS disciplines may refer to this position as Branch Director.

Cal OES: California Governor's Office of Emergency Services.

Cal OSHA: California's Occupational Safety and Health Agency responsible for protecting workers and the public from safety hazards.

Camp: A designated site within the general incident area separate from the Base, but staffed and equipped to provide subsistence and personal services for incident response personnel.

Casualty Collection Point (CCP): A designated location within the incident area for the assembly, triage (sorting), medical stabilization, and subsequent evacuation of casualties. It also may be used for the assembly of incoming medical resources (doctors, nurses, supplies, etc.). The site should be adjacent to, or include, open areas suitable for helicopter operations.

Casualty Information: A member of the Situation Status Unit is responsible for establishing and providing a central location for documenting all incident-related casualties.

CCP: See Casualty Collection Point

Chain of Command: A series of management positions in order of authority.

Check-in: The process whereby resources first report to an incident.

Chemical Agent/Gas Team: A peace officer specially trained according to POST standards and equipped to deliver chemical irritant agents in outdoor situations and within structures.

Clear Text: The use of plain English in telecommunications transmissions; no "Ten Codes" or agency specific codes are authorized when using Clear Text.

Closed Area(s): A portion or all of the involved area and/or surrounding area, which presents a hazard or law enforcement problem requiring some form of restriction. The perimeter of the closed area may be smaller or larger than the perimeter of the actual involved area.

Command: The act of directing and/or controlling resources at an incident by virtue of explicit legal, agency, or delegated authority. Also may refer to the Incident Commander.

Command Post: See Incident Command Post.

Command Staff: The Command Staff usually consists of the Public Information Officer, Deputy Incident Commander, Liaison Officer, Safety Officer and/or other specialists who report directly to the Incident Commander.

Communications Unit: An organizational unit in the Logistics Section responsible for providing communication services at an incident. A Communications Unit also may be a facility (e.g., a trailer or mobile van) used to provide the major part of an Incident Communications Center.

Communications Unit OIC: A member of the Services Branch staff responsible for supervision of unit personnel, to develop plans for effective use, distribution, and maintenance of incident communications equipment and facilities.

Compensation/Claims Unit: Functional unit within the Finance/Administration Section responsible for financial concerns resulting from property damage, injuries or fatalities at the incident or within an EOC.

Cooperating Agency: An agency supplying assistance other than direct tactical or support functions or resources to the incident control effort (e.g., American Red Cross, Telephone Company).

Coordination: The process of systematically analyzing a situation, developing relevant information, and informing appropriate command authority of viable alternatives for the selection and use of available resources to meet stated objectives. The coordination process does not involve dispatch actions. Personnel responsible for coordination may perform command or dispatch functions within parameters established by specific agency delegation, procedure, or legal authority

Coroner: A trained specialist having statutory authority to perform the duties of the Coroner of the County.

Critical Facility/Service: Any facility or service posing unusually high risks to public health and safety in the event of damage, malfunction or disruption. Examples of critical facilities and services include: communication systems, public utilities, hospitals and clinics, fire stations, police stations, public works facilities, transportation infrastructure, shelter sites, and drinking water systems.

Critical Incident Stress Debriefing: A formal, yet open, discussion of incident events, which is specifically directed to emergency response personnel to resolve the emotional aftermath of the incident.

Delegation of Authority: A statement provided to the Incident Commander by the Agency Executive delegating authority and assigning responsibility. The Delegation of Authority can include objectives, priorities, expectations, constraints and other considerations or guidelines as needed. Many agencies require written Delegation of Authority to be given to Incident Commanders prior to their assuming command on larger incidents.

Demobilization Unit: Functional unit within the Planning/Intelligence Section responsible for assuring orderly, safe, and efficient demobilization of incident or EOC assigned resources.

Department Operations Center (DOC): A facility used by a distinct discipline, such as flood operations, law enforcement, fire service, medical, hazardous materials, or a unit, such as Department of Public Works or Department of Health. DOCs may be used at all SEMS levels above the field response level depending upon the requirements of the emergency.

Deputy Incident Commander: A member of the Command Staff assigned duties by the Incident Commander, who, in the absence of the Incident Commander, assumes command of the incident.

Disaster: A sudden calamitous emergency causing great damage, loss, or destruction.

Disaster Service Worker: Any person who is registered with a disaster council or Cal OES for the purpose of engaging in disaster service pursuant to the California Emergency Services Act without pay or other consideration. This includes public employees and any unregistered person impressed into service during a state of war emergency, a state of emergency, or a local emergency by a person having authority to command the aid of citizens in the execution of his/her duties.

Dispatch: The ordered movement of a resource or resources to an assigned tactical mission, or an administrative move from one location to another

Dispatch Center: A facility from which resources are directly assigned to an incident.

Division: The organization level responsible for operations within a defined *geographic area* (compare Division to "Group").

Division or Group OIC: The position title for individuals responsible for command of a Division or Group at an Incident.

DOC: See Department Operations Center

Documentation Unit: Functional unit within the Planning/Intelligence Section responsible for collecting, recording and safeguarding all documents relevant to an incident or within an EOC.

EAS: See Emergency Alert System

Emergency Alert System (EAS): A system by which information may be disseminated to the public by official sources during an emergency, or potential emergency, using broadcast and print media. Uses of EAS include instructions on survival and health preservation actions (shelter, shelter-in-place, evacuation procedures, etc.).

Emergency: Any incident(s), natural or human-caused, requiring responsive action to protect life and/or property.

Emergency Operations Center (EOC): A location from which centralized emergency management can be performed. EOC facilities are established by an agency or jurisdiction to coordinate the overall agency or jurisdictional response and support to an emergency.

EOC: See Emergency Operations Center

Essential Facilities: Facilities essential for maintaining the health, safety, and well-being of the public following a disaster (hospitals, police and fire department buildings, utility facilities, etc). This may include buildings that have been designated for use as mass care facilities (schools, churches, etc).

Event: A planned, non-emergency activity. ICS can be used as the management system for a wide range of events such as parades, concerts, or sporting events.

Facilities Unit OIC: Supervises Facilities Unit within the Support Branch of the Logistics Section at the SEMS Field Response Level that provides fixed facilities for the incident. These facilities may include the Incident Base, feeding areas, sleeping areas, sanitary facilities, etc. If the Support Branch is not activated, then the Facilities Unit OIC reports to the Staging Officer.

FCP: See Incident Command Post

Field Booking Team: A team of officers that will respond to field incidents and set up a booking site to facilitate the booking process and transportation of those arrested. The size of the team depends upon the nature of the incident and number of arrests expected.

Field Kitchen: A self-contained mobile facility for the preparation and serving of meals under varied conditions of weather and terrain; capable of preparing hot or cold meals for transport to remote feeding locations. Usually operates under the Food Unit OIC within the Service Branch of the Logistics Section.

Finance/Administration Section: A part of the general structure of the incident command system activated on long-duration and responsible for cost accounting and financial analysis of the incident. At the incident, the Section can include the Time Unit, Procurement Unit, Compensation/Claims Unit, and Cost Unit.

Finance/Administration Section OIC: A member of the General Staff, responsible for the supervision of group and unit personnel, coordinating the cost and financial analysis of the incident. This member reports directly to the Incident Commander.

First Aid Station: A location within a mass care facility or casualty collection point where first aid is administered to disaster victims.

Food Unit OIC: A member of the Services Branch staff responsible for supervision of unit personnel and coordinating feeding requirements at all incidents facilities.

Function: Function refers to the five major activities within ICS: Command, Operations, Planning/Intelligence, Logistics, and Finance/Administration. These same five functions also are performed at all SEMS EOC levels. At the EOC, the term Management replaces Command. The term function also is used when describing an activity, e.g., "the logistics function."

General Staff: The primary group of incident management personnel comprised of:

- Incident Commander
- Operations OIC
- Planning/Intelligence OIC
- Logistics OIC
- Finance/Administration OIC

Grounds Support Group OIC: A member of the Support Branch Staff responsible for transportation of personnel, supplies, food and equipment, the fueling, service, maintenance and repair of vehicles and equipment used in the incident.

Group: Groups are established to divide the incident into *functional* areas of operation. Groups are composed of resources assembled to perform a special function not necessarily within a single geographic division (see "Division" for comparison).

Group OIC: A member of the Operations Section staff, who is responsible for the implementation and assignment of resources for a specific mission or function and reporting on the progress and status of resources within the group. The Group OIC has complete tactical control and supervision of the resources and personnel performing the assigned mission, and is under the direction of the Operations Section OIC.

Helibase: The main location for parking, fueling, maintenance, and loading of helicopters operating in support of an incident and is usually located at or near the incident base.

Helispot: Any designated location where a helicopter can safely take off and land. Some helispots may be used for loading of supplies, equipment, or personnel.

IAP: See Incident Action Plan

ICP: See Incident Command Post

ICS: See Incident Command System

Incident: An occurrence, natural or human-caused, that requires an emergency response action to protect life and/or property.

Incident Action Plan (IAP): A written document containing general objectives reflecting the overall strategy and specific action plans for the use of responding forces. The Incident Action Plan may have a number of attachments, which support the operational strategy and tactics.

Incident Base: That location at which the primary logistics functions are coordinated and performed (incident name or other designator will be added to the term "base"). The Incident Command Post may be collocated with the base. There should be one designated base per incident.

Incident Commander: The individual responsible for the command of all functions at the field response level.

Incident Command Post (ICP): The field location at which the primary incident command function is performed. This was previously referred to as the *Field Command Post (FCP)*.

Incident Command System (ICS): The nationally used standardized on-scene emergency management concept specifically designed to allow its user(s) to adopt an integrated organizational structure equal to the complexity and demands of single or multiple incidents without being hindered by jurisdictional boundaries. ICS is the combination of facilities, equipment, personnel, procedures, and communications operating within a common organizational structure, and with responsibility for the management of resources to effectively accomplish stated objectives pertinent to an incident.

Incident Objectives: Statements of guidance and direction necessary for the selection of appropriate strategy(s), and the tactical direction of resources. Incident objectives are based on realistic expectations of what can be accomplished when all allocated resources have been effectively deployed. Incident objectives must be achievable and measurable, yet flexible enough to allow for strategic and tactical alternatives.

Information Officer: See Public Information Officer.

Jurisdictional Agency: The agency having jurisdiction and responsibility for a specific geographical area, or a mandated function.

Liaison Officer: A member of the Command Staff at the field SEMS level responsible for coordinating with representatives from cooperating and assisting agencies.

Local Emergency: The duly proclaimed existence of conditions of disaster or of extreme peril to the safety of persons and property within the territorial limit of a County/City and County or City, caused by such conditions as pollution, fire, flood, storm, epidemic, riot, earthquake, or other conditions other than conditions resulting from a labor controversy, which conditions are, or are likely to be, beyond the control of the services, personnel, equipment, and facilities of that political subdivision and require the combined forces of political subdivisions to combat.

Local Mutual Aid: Assistance provided in accordance with local agreements on a voluntary basis or in time of a declared local emergency.

Logistics Section: One of the five primary functions found at all SEMS levels. This is the section responsible for providing personnel, facilities, support services and materials for the incident.

Logistics Section OIC: A member of the General Staff, responsible for the supervision of group and unit personnel; responsible for providing personnel, facilities, support services and materials for the incident. This person reports directly to the Incident Commander.

MACS: See Multi-Agency Coordination System.

Management by Objectives: In SEMS field and EOC levels, this is a top-down management activity, which involves a three-step process to achieve the desired goal. The steps are: establishing the objectives, selection of appropriate strategy(s) to achieve the objectives, and the direction or assignments associated with the selected strategy.

Mass Care Facility: A designated location, such as a school, at which registration and temporary lodging, feeding, clothing, welfare inquiry, first aid, and other essential social services may be provided to disaster victims.

Master Mutual Aid Agreement: An agreement entered into by and between the State of California, its various departments and agencies, and the various political subdivision, municipal corporations, and other public agencies of the State of California to assist each other by providing resources during an emergency. Mutual aid occurs when two or more parties agree to furnish resources and facilities and to render services to each other to prevent and combat any type of disaster or emergency.

Media: Radio, television, and print sources for providing information and instructions to the public.

Medical Unit: Functional unit within the Service Branch of the Logistics Section at SEMS field levels responsible for the development of the Medical Emergency Plan, and for providing emergency medical treatment of incident personnel.

Message Center: The message center is part of the communications complex and is collocated or placed adjacent to it. Its functions include receiving, recording, and routing message information concerning arriving resources, resources status, and administrative and tactical message traffic.

Mobilization: The process and procedures used by all organizations federal, state and local for activating, assembling, and transporting all resources that have been requested to respond to, or support an incident.

Mobilization Center: An off-incident location at which emergency service personnel and equipment are temporarily located pending assignment, release or reassignment.

Multi-Agency or Inter-Agency Coordination: The participation of agencies and disciplines involved at any level of the SEMS organization working together in a coordinated effort to facilitate decisions for overall emergency response activities, including the sharing of critical resources and the prioritization of incidents.

Multi-Agency Coordination System (MACS): The combination of personnel, facilities, equipment, procedures and communications integrated into a common system. When activated, MACS has the responsibility for coordination of assisting agency resources and support in a multi-agency or multi-jurisdictional environment. A MAC Group functions within MACS. MACS organizations are used within the California Fire Services.

Multi-Discipline Incident: An incident involving concurrent tactical field operations requiring interactions between law enforcement, fire, medical personnel, and/or other disciplines as required by the incident, and also referred to as Multi-Agency Incident.

Mutual Aid Agreement: Written agreement between agencies and/or jurisdictions in which they agree to assist one another upon request by furnishing personnel and equipment.

Mutual Aid Region: A mutual aid region is a subdivision of Cal OES established to assist in the coordination of mutual aid and other emergency operations within a geographical area of the state consisting of two or more county (operational) areas.

Mutual Aid Response Mobile Field Force: Consists of four 12-person squads with an OIC (minimum rank of Lieutenant) and Deputy OIC (minimum rank of Sergeant), each with a driver. The total minimum personnel are 52. The Mutual Aid Response Mobile Field Force can be

augmented for specific missions (configured for civil unrest, major evacuations, etc.). Number of personnel assigned to each vehicle may vary depending on mission requirements (i.e., 4 officers/deputies per vehicle for civil unrest, 2 officers/deputies per vehicle for major wildland fire evacuations).

Mutual Aid Response Platoon: See Mutual Aid Response Mobile Field Force.

Mutual Aid Unit OIC: A member of the Personnel Branch Staff responsible for coordination, preparation and mobilization of mutual aid operations.

Office of Emergency Services (OES): In this guide, OES refers to the County level of emergency services in California.

Officer/Deputy: For law enforcement mutual aid purposes, a full-time salaried peace officer in full agency uniform armed with a handgun and at least minimum department-authorized ammunition, and also is equipped with handcuffs, baton, flashlight, and notebook. Preferred additional equipment includes: soft body armor, helmet with face shield, handheld radio, additional ammunition, and personal chemical agent (mace/OC spray).

Officer-In-Charge (OIC): The term used in ICS to describe a person in charge of a section, branch, group, field force, squad, unit, or team. This term also may be referred to as *Section Chief, Branch Director, Group Supervisor, Unit Leader, or Team Leader* in disciplines other than law enforcement.

OIC: See Office-In-Charge.

Operational Area: An intermediate level of the state emergency organization, consisting of a county and all political subdivisions within the county area.

Operational Area Law Enforcement Coordinator: The Sheriff is the Operational Area Coordinator for law enforcement mutual aid except in the City of San Francisco where the responsibility is that of the Chief of Police.

Operational Period: The period of time scheduled for execution of a given set of operational objectives as specified in the Incident Action Plan, and usually is less than 24 hours.

Operations Dispatcher: A member of the Operations Section Staff, under the direction of the Operations Section OIC, dispatches Operations section personnel, maintains designation boards, and the status of Operations Section units.

Operations Plan: A plan describing the tactical deployment of resources at an incident or event to meet the objectives of the Incident Action Plan.

Operations Section: One of the five primary functions found in ICS and at all SEMS levels. The section is responsible for all tactical operations at the incident, or for the coordination of operational activities at an EOC. The Operations Section at the SEMS Field Response level may include branches, divisions and/or groups, task forces, teams, and single resources.

Operations Section OIC: A member of the general staff, responsible for the overall tactical operations of the incident that reports directly to the Incident Commander, and also may be referred to as the *Operations Chief, Operations Officer, or Operations OIC*

Out-of-Service Resources: Resources checked-in to an incident, but temporarily unavailable due to mechanical problems, crew rest, or administrative reasons.

Outer Perimeter Unit: Personnel assigned to limit and control access into the emergency incident area.

Overhead Team: Personnel who are assigned to the primary staff OIC positions, which include Incident Commander, General Staff, Command Staff, and Unit OICs.

Personnel Branch OIC: A member of the Logistics Section staff responsible for unit personnel, providing a personnel pool for the emergency incident, and also maintains timekeeping records when the Time Unit in the Finance/Administration Section is not activated.

Personnel Unit: Functional unit within the Logistics Section responsible for providing a personnel pool for the incident, and staffs Check-In Recorders to perform the check-in function.

PIO: See Public Information Officer.

Planning/Intelligence Section: One of the five primary functions found at all SEMS levels responsible for the collection, evaluation, and dissemination of information related to the incident or an emergency, and for the preparation and documentation of Incident Action Plans. The section also maintains information on the current and forecasted situation, and on the status of resources assigned to the incident. At the SEMS Field Response Level, the Section will include the Situation, Resource, Documentation, and Demobilization Units, as well as Technical Specialists.

Planning/Intelligence Section OIC: A member of the general staff, responsible for the collection, evaluation, and dissemination of information related to the incident and for the preparation and documentation of Incident Action Plans. The OIC also is responsible for maintaining information on the current and forecasted situation, and on the status of resources assigned to the incident. This person reports directly to the Incident Commander.

Planning Meeting: A meeting that is held as needed throughout the duration of an incident to select specific strategies and tactics for incident control operations and for service and support planning. On larger incidents, the planning meeting is a major element in the development of the Incident Action Plan.

Platoon: See Mutual Aid Response Mobile Field Force.

Procurement Unit: Functional unit within the Finance/Administration Section responsible for financial matters involving vendor contracts.

Public Information Officer (PIO): The individual assigned at field or EOC level who has delegated authority to prepare public information releases and to interact with the media. Duties may vary depending upon the agency and SEMS level.

Public Information Center: A facility and function of the Command Staff; with responsibilities for the formulation and release of approved information about the incident to the news media.

Regional Law Enforcement Coordinator: An Operational Area Law Enforcement Coordinator elected by other operational area coordinators within a defined region to act as the over all mutual aid coordinator for that region.

Regional Emergency Operations Center (REOC): Facilities situated at Cal OES Administrative Regions. REOCs function to coordinate information and resources among operational areas and between the operational areas and the State SOC level.

REOC: See Regional Emergency Operations Center.

Reporting Locations: Specific locations or facilities where incoming resources can check-in at the incident.

Resources: All personnel and major items of equipment available or potentially available for assignment to emergency incident tasks.

Resources Unit: Functional unit within the Planning Section at the SEMS Field Response level responsible for recording the status of resources committed to the incident. The Unit also evaluates resources currently committed to the incident, the impact that additional responding resources will have on the incident, and anticipated resource needs.

RESTAT: Acronym for Resources Status. A Resource Status Report is prepared by the Resources Unit in the Planning/Intelligence Section.

Safety Officer: A member of the Command Staff at the incident or within an EOC responsible for monitoring and assessing safety hazards or unsafe situations, and for developing measures for ensuring personnel safety. The Safety Officer may have assistants.

Scribe: An optional member of the Command Staff, under the direction of the Incident Commander, who shall record all incident-related information, incident message forms noting time, message content, and actions taken. This person is also referred to as *Command Post Scribe* or *Incident Scribe*.

Section: That ICS organization level having functional responsibility for primary segments of incident operations. The sections are Operations, Planning/Intelligence, Logistics, and Finance/Administration.

Section Officer: The ICSS title for individuals responsible for command of Operations, Planning/Intelligence, Logistics and Finance/Administration functional sections.

Security Officer: A member of the Logistics Section staff responsible for supervision of *Security Unit* personnel, preparing and implementing security plans for Incident Command Post, staging area, and other facilities used in the incident.

SEMS: See Standardized Emergency Management System.

Service Branch OIC: A member of the Logistics Section staff responsible for service activities at the incident, and includes Communications, Medical and Food Units.

Single Resource: An individual, a piece of equipment and its personnel complement, or a crew or team of individuals with an identified OIC that can be used on an incident.

SITSTAT: Acronym for Situation Status. A Situation Status Report is prepared by the Situation Unit in the Planning/Intelligence Section.

Situation Report: A periodic progress report and record of significant items, completed for submission to concerned staff officers. It includes control measures and a summary of the situation.

Situation Unit: Functional unit within the Planning/Intelligence Section responsible for the collection, organization and analysis of incident status information, and for analysis of the situation as it progresses. This unit reports to the Planning/Intelligence Section Officer.

SOC: See State Operations Center

Span of Control: The supervisory ratio maintained within an ICS or EOC organization. A span of control of five positions reporting to one supervisor is considered optimum.

Squad: An organizational element of a mutual aid response mobile field force consisting of 11 deputies/officers and a supervisor.

Staging Area: Staging areas are locations set up at an incident where resources can be placed while awaiting a tactical assignment. In ICSS, staging areas are managed within the Operations Section.

Staging Officer: The Staging Officer is a member of the Operations Section staff responsible for supervising *Staging Unit* staff and activities within the staging area. This position also is referred to as the *Staging Area Manager*.

Standardized Emergency Management System (SEMS): Is a system required by California Government Code for managing response to multi-agency and multi-jurisdiction emergencies in California. SEMS consists of five organizational levels, which are activated as necessary: Field Response, Local Government, Operational Area, Region, and State.

State Law Enforcement Coordinator: The State Coordinator is the Chief, Law Enforcement Branch for the California Governor's Office of Emergency Services. The State Coordinator is responsible for administrative actions and coordination between state and local law enforcement agencies during emergencies.

State Operations Center (SOC): An EOC facility established by the California Governor's Office of Emergency Services for coordinating and supporting operations within a disaster area and controlling the response efforts of state and federal agencies in supporting local governmental operations. The SOC will be staffed by representatives of state and federal agencies.

Supply Unit: A component of the Logistics Section responsible for the ordering, receiving and storing of equipment and supplies.

Support Branch: A Branch within the Logistics Section responsible for providing equipment and supplies to support incident operations which includes the Supply, Facilities and Ground Support Units.

Tactical Alert: A preliminary step to personnel mobilization. It alerts specific units to a potential law enforcement problem that may require assets greater than those of the handling units.

Tactical Direction: Direction given by the Operations Section OIC at the SEMS field level, which includes the tactics appropriate for the selected strategy, the selection and assignment of resources, tactics implementation, and performance monitoring for each operational period.

Team: See Single Resource.

Technical Specialists: Personnel with special skills that can be used anywhere within the ICS or EOC organization.

Terrorism: The unlawful use of force or violence committed by a group of two or more individuals against persons or property to intimidate or coerce a government, the civilian population, or any segment thereof, in furtherance of *political or social objectives*.

Time Unit: Functional unit within the Finance/Administration Section responsible for recording time for incident or EOC personnel and hired equipment.

Unified Command: In ICS, Unified Command is a unified team effort, which allows all agencies with responsibility for the incident, either geographical or functional, to manage an incident by establishing a common set of incident objectives and strategies. This is accomplished without losing or abdicating agency authority, responsibility or accountability.

Unit: This term has two meanings. (1) In *ICS*, a "Unit" is an organizational element having functional responsibility. Units are commonly used in the Planning, Logistics, or Finance/Administration Sections and can be used in the Operations Section for some applications. (2) For law enforcement *mutual aid purposes*, a "Unit" is defined as two officers/deputies in an emergency-equipped vehicle (marked patrol vehicle preferred).

Unity of Command: The concept by which each person within an organization reports to one and only one designated person.

Unusual Occurrence (UO): Any event/incident involving potential or actual personal injury or property damage requiring exceptional law enforcement response.

Volunteers: Individuals who make themselves available for assignment during an emergency. Volunteers may have particular skills needed during an emergency, and may not be part of a regularly organized group. *All volunteers must be registered as Disaster Service Workers before actual field deployment.*

Volunteer Services Unit OIC: A member of the Personnel Branch staff responsible for coordination of all volunteer personnel aid offered to/or used at the emergency incident.

Weapons of Mass Destruction: Chemical, biological, nuclear, or radiological weapons or materials that can either through threat of employment or actual detonation or dispersal of components, cause mass casualties among innocent civilians or government forces.

FOREWORD

Hate Crimes (i.e. crimes motivated by bias) convey a message of terror and exclusion, not just to the immediate victims but to entire communities. They often target victims who are least able to defend themselves. They cause trauma that is more extreme and longer lasting than similar crimes committed for other motivations. They can spark retaliatory crimes, escalating the cycle of crime and violence. If not addressed professionally and thoroughly they may undermine public confidence in law enforcement.

The 2018 California State Auditor's Report, titled "Hate Crimes in California," found that California law enforcement has not taken adequate action to identify, report, and respond to hate crimes. The report found that agencies did not properly identify some hate crimes, and underreported or misreported hate crimes as well. The report also noted that hate crimes are on the rise in California, increasing in both 2015 and 2016.

California Penal Code (CPC) 422.87 added new language and requirements to any newly created or updated agency hate crimes policy. Effective January 1, 2019, any local law enforcement agency that updates an existing hate crimes policy, or adopts a new one, shall include the content of the model policy framework provided in this document as well as any revisions or additions to the model policy in the future.

These guidelines are the primary elements that law enforcement executives are now required to incorporate into their hate crimes policy if an agency creates a new hate crimes policy or updates an existing one. The guidelines are designed for department-wide application and are intended to reflect a values-driven "top-down" process. They are intended to assist with the development and delivery of training and ensure proper identification, investigation, and reporting of hate crimes within each agency's jurisdiction.

POLICY GUIDELINES

GUIDELINE #1

Develop the foundation for the agency's hate crimes policy.

The law enforcement executive is responsible for providing leadership, communicating organizational values to the department and the community, paying attention to hate crime trends and current events that could trigger hate incidents and/or hate crimes in the community, and providing education and training to establish the foundation for the agency's hate crimes policy. Employees' ability to respond appropriately to hate crimes and hate incidents is maximized when the executive effectively establishes and communicates the foundational values of the organization.

GUIDELINE #2

Develop a hate crimes policy for the agency.

- I. An agency's hate crimes policy shall include the statutory definition of a hate crime, and its policy and programs should minimally include the following:
 - A. Response
 - B. Training
 - C. Planning and Prevention
 - D. Reporting

The law enforcement executive is responsible for the initial development of the policy and should be actively involved in its implementation. See the appendix for the exemplar "Message from the Agency Chief Executive".

GUIDELINE #3

Develop expertise to identify and investigate hate crimes.

The law enforcement executive is responsible for ensuring that the agency possesses expertise to identify and investigate hate crimes, as well as ensuring compliance with state and federal

reporting and public information requirements. Agencies should assign identified personnel to appropriate training to develop expertise and knowledge to investigate hate crimes.

Hate crimes are low-frequency events with high-risk consequences for the agency and community. Agencies shall provide a checklist to first responders to provide direction for the investigation of all hate crimes as mandated by CPC 422.87.

GUIDELINE #4

Develop and implement cooperative hate crimes plans with other law enforcement agencies.

- I. Coordinate cooperative efforts among regional, state, federal, and tribal law enforcement agencies to share information and training, and develop strategies to prevent hate crime activity.
- II. Develop and/or participate in law enforcement intelligence networks to enhance the agency's ability to anticipate potential hate crime targets. This interaction should include sharing intelligence information with other jurisdictions and cooperative investigations, arrests, and prosecutions if appropriate.

GUIDELINE #5

Develop and implement cooperative hate crime plans with the community and related governmental and non-governmental organizations, as appropriate.

- I. Collaborate with the community, including human relations/civil rights organizations, advocacy groups, service organizations, neighborhood associations, religious institutions, local schools and colleges, to do the following:
 - Develop a network to build rapport with community groups

-
- Develop a protocol for response to hate crimes
 - Obtain witness and victim cooperation
 - Provide support services to victims
 - Collect demographic information about specific communities
 - Identify hate crime trends based upon current events and activity (hate crimes and/or hate incidents)
 - Identify periods of increased vulnerability based on significant dates and events for affected communities
- II. Law enforcement should identify and seek out cultural diversity training and information from/about specific communities within its jurisdiction (immigrant, Muslim, Arab, LGBTQ, Black or African American, Jewish, Sikh, disability, etc.) to strengthen agency awareness.

GUIDELINE #6

Conduct an annual assessment of the agency's hate crimes policy and its ongoing implementation.

The assessment should include:

- I. A review to ensure compliance with the POST Hate Crimes Model Policy and California law.
- II. A review and analysis of the agency's data collection, policy, and annual mandated reporting of hate crimes.
- III. A review and updating of the agency's hate crimes brochure to ensure compliance with CPC 422.92.
- IV. A review of any existing or available data or reports, including the annual California Attorney General's report on hate crimes, in preparation for, and response to, future hate crime trends.

- V. Annual outreach to the community including human relations/civil rights organizations, advocacy groups, service organizations, neighborhood associations, religious institutions, local schools, and colleges assessing the agency's responsiveness to hate crimes.

MINIMUM LEGAL REQUIREMENTS FOR AN AGENCY'S HATE CRIMES POLICY

CPC 13519.6, effective January 1, 2005, minimally requires:

1. A message from the law enforcement agency's chief executive officer to the agency's officers and staff concerning the importance of hate crime laws and the agency's commitment to enforcement.
2. The definition of "hate crime" in Penal Code section 422.55.
3. References to hate crime statutes including Penal Code section 422.6.
4. A title-by-title specific protocol that agency personnel are required to follow, including, but not limited to, the following:
 - a. Preventing and preparing for likely hate crimes by, among other things, establishing contact with persons and communities who are likely targets, and forming and cooperating with community hate crime prevention and response networks.
 - b. Responding to reports of hate crimes, including reports of hate crimes committed under the color of authority.
 - c. Accessing assistance, by, among other things, activating the Department of Justice hate crimes rapid response protocol when necessary.
 - d. Providing victim assistance and follow-up, including community follow-up.
 - e. Reporting

CPC 422.87, effective January 1, 2019, states and minimally requires:

Each local law enforcement agency may adopt a hate crimes policy. Any local law enforcement agency that updates an existing hate crimes policy or adopts a new one shall include, but not limited to, the following:

1. The definitions in Penal Code sections 422.55 and 422.56.
2. The content of the model policy framework that the Commission on Peace Officer Standards and Training developed pursuant to Section 13519.6 (above) and any content that the commission may revise or add in the future, including any policy, definitions, response and reporting responsibilities, training resources, and planning and prevention methods.
3. Information regarding bias motivation
 - a. For the purposes of this paragraph, "bias motivation" is a preexisting negative attitude toward actual or perceived characteristics referenced in Section 422.55. Depending on the circumstances of each case, bias motivation may include, but is not limited to, hatred, animosity, resentment, revulsion, contempt, unreasonable fear, paranoia, callousness, thrill-seeking, desire for social dominance, desire for social bonding with those of one's "own kind," or a perception of the vulnerability of the victim due to the victim being perceived as being weak, worthless, or fair game because of a protected characteristic, including, but not limited to, disability or gender.
 - i. In recognizing suspected disability-bias hate crimes, the policy shall advise officers to consider whether there is any indication that the perpetrator was motivated by hostility or other bias, occasioned by factors such as, but not limited to, dislike of persons who arouse

fear or guilt, a perception that persons with disabilities are inferior and therefore “deserving victims,” a fear of persons whose visible traits are perceived as being disturbing to others, or resentment of those who need, demand, or receive alternative educational, physical, or social accommodations.

- ii. In recognizing suspected disability-bias hate crimes, the policy also shall advise officers to consider whether there is any indication that the perpetrator perceived the victim to be vulnerable and, if so, if this perception is grounded, in whole or in part, in anti-disability bias. This includes, but is not limited to, if a perpetrator targets a person with a particular perceived disability while avoiding other vulnerable-appearing persons such as inebriated persons or persons with perceived disabilities different than those of the victim, those circumstances could be evidence that the perpetrator’s motivations included bias against persons with the perceived disability of the victim and that the crime must be reported as a suspected hate crime and not a mere crime of opportunity.
- b. Information regarding the general underreporting of hate crimes and the more extreme underreporting of anti-disability and anti-gender hate crimes *and a plan for the agency to remedy this underreporting* (emphasis added).
- c. A protocol for reporting suspected hate crimes to the Department of Justice pursuant to Penal Code section 13023.
- d. A checklist of first responder responsibilities, including, but not limited to, being sensitive to effects of the crime on the victim, determining whether any additional resources are needed on the scene to assist the victim or whether to refer the victim to appropriate community and legal services, and giving the victims and any interested persons the agency’s hate crimes brochure, as required by Section 422.92.
- e. A specific procedure for transmitting and periodically retransmitting the policy and any related orders to all officers, including a simple and immediate way for officers to access the policy in the field when needed.
- f. The title or titles of the officer or officers responsible for assuring that the department has a hate crime brochure as required by Section 422.92 and ensuring that all officers are trained to distribute the brochure to all suspected hate crime victims and all other interested persons.
- g. A requirement that all officers be familiar with the policy and carry out the policy at all times unless directed by the chief, sheriff, director, or other chief executive of the law enforcement agency or other command-level officer to whom the chief executive officer formally delegates this responsibility.
- h. Any local law enforcement agency that updates an existing hate crimes policy or adopts a new hate crimes policy may include any of the provisions of a model hate crime policy and other relevant documents developed by the International Association of Chiefs of Police that are relevant to California and consistent with this chapter.

MODEL POLICY FRAMEWORK

Purpose

This model policy framework is designed to assist in identifying and handling crimes motivated by hate or other bias toward individuals and groups with legally defined protected characteristics, to define appropriate steps for assisting victims, and to provide a guide to conducting related investigations. It outlines the general policy framework for prevention, response, accessing assistance, victim assistance and follow up, and reporting as related to law enforcement's role in handling hate crimes. It also serves as a declaration that hate crimes are taken seriously and demonstrates how law enforcement agencies may best use its resources to investigate and solve an offense, in addition to building community trust and increasing police legitimacy.

Policy

It is the policy of this agency to safeguard the rights of all individuals irrespective of their disability, gender, nationality, race or ethnicity, religion, sexual orientation, and/or association with a person or group with one or more of these actual or perceived characteristics. Any acts or threats of violence, property damage, harassment, intimidation, or other crimes motivated by hate or bias should be viewed very seriously and given high priority.

This agency will employ necessary resources and vigorous law enforcement action to identify and arrest hate crime perpetrators. Also, recognizing the particular fears and distress typically suffered by victims, the potential for reprisal and escalation of violence, and the far-reaching negative consequences of these crimes on the community, this agency should attend to the security and related concerns of the immediate victims and their families as feasible.

The agency policy shall include a requirement that all officers be familiar with the policy and carry out the policy at all times unless directed by the chief, sheriff, director, or other chief executive of the law enforcement agency or other command-level officer to whom the chief executive officer formally delegates this responsibility.

The agency policy shall provide a specific procedure for transmitting and periodically retransmitting the policy and any related orders to all officers, including a simple and immediate way for officers to access the policy in the field when needed.

Response, Victim Assistance and Follow-up

Initial response

First responding officers should know the role of all department personnel as they relate to the agency's investigation of hate crimes and/or incidents. Responding officers should evaluate the need for additional assistance, and working with supervision and/or investigations, access needed assistance if applicable. Responding officers should ensure the crime scene is properly protected, preserved and processed.

At the scene of a suspected hate or bias crimes, officers should take preliminary actions deemed necessary, to include, but not limited to, the following:

1. Use agency checklist (per CPC 422.87) to assist in the investigation of any hate crime (see appendix, page 21, for exemplar checklist based on the Los Angeles Police Department Hate Crimes Supplemental Report with the agency's permission).

-
2. Stabilize the victim(s) and request medical attention when necessary.
 3. Ensure the safety of victims, witnesses, and perpetrators.
 - a. Issue a Temporary Restraining Order (if applicable).
 4. Notify other appropriate personnel in the chain of command, depending on the nature and seriousness of the offense and its potential inflammatory and related impact on the community.
 5. Ensure that the crime scene is properly protected, preserved, and processed and that all physical evidence of the incident is removed as soon as possible after the offense is documented. If evidence of an inflammatory nature cannot be physically removed, the property owner should be contacted to ensure that it is removed or covered up as soon as possible. Agency personnel should follow-up to ensure that this is accomplished in a timely manner.
 6. Collect and photograph physical evidence or indicators of hate crimes such as:
 - a. Hate literature.
 - b. Spray paint cans.
 - c. Threatening letters.
 - d. Symbols used by hate groups.
 7. Identify criminal evidence on the victim.
 8. Request the assistance of translators or interpreters when needed to establish effective communication with witnesses, victims, or others as appropriate.
 9. Conduct a preliminary investigation and record pertinent information including, but not limited to:
 - a. Identity of suspected perpetrator(s).
 - b. Identity of witnesses, including those no longer at the scene.
 - c. The offer of victim confidentiality per Government Code (GC) 5264.
 - d. Prior occurrences, in this area or with this victim.
 - e. Statements made by suspects; exact wording is critical.
 - f. The victim's protected characteristics and determine if bias was a motivation "in whole or in part"¹ in the commission of the crime.
 1. "Bias motivation" is a preexisting negative attitude toward actual or perceived characteristics referenced in Section 422.55. Depending on the circumstances of each case, bias motivation may include, but is not limited to, hatred, animosity, resentment, revulsion, contempt, unreasonable fear, paranoia, callousness, thrill-seeking, desire for social dominance, desire for social bonding with those of one's "own kind," or a perception of the vulnerability of the victim due to the victim being perceived as being weak, worthless, or fair game because of a protected characteristic, including, but not limited to, disability or gender.
 - (a) In recognizing suspected disability-bias hate crimes, the policy shall advise officers to consider whether there is any indication that the perpetrator was motivated by hostility or other bias, occasioned by factors such as, but not limited to, dislike of persons

¹See Appendix, page 15, for definition

who arouse fear or guilt, a perception that persons with disabilities are inferior and therefore “deserving victims,” a fear of persons whose visible traits are perceived as being disturbing to others, or resentment of those who need, demand, or receive alternative educational, physical, or social accommodations.

(b) In recognizing suspected disability-bias hate crimes, the policy also shall advise officers to consider whether there is any indication that the perpetrator perceived the victim to be vulnerable and, if so, if this perception is grounded, in whole or in part, in anti-disability bias. This includes, but is not limited to, if a perpetrator targets a person with a particular perceived disability while avoiding other vulnerable-appearing persons such as inebriated persons or persons with perceived disabilities different than those of the victim, those circumstances could be evidence that the perpetrator’s motivations included bias against persons with the perceived disability of the victim and that the crime must be reported as a suspected hate crime and not a mere crime of opportunity.

10. Adhere to CPC 422.93, which protects hate crime victims and witnesses from being reported to federal immigration authorities if they have not committed any crime under state law.
11. Provide information regarding immigration remedies available to victims of crime. (U-Visa, T-Visa, S-Visa, etc.).
12. Provide the agency’s Hate Crimes Brochure (per CPC 422.92) if asked, if necessary or per policy (if applicable).
13. Utilize proper techniques for interviewing people with disabilities and being aware of and providing appropriate accommodations (such as ADA standards, Braille, visuals, translators for the deaf or hard of hearing, etc.).
14. Report any suspected multi-mission extremist crimes to the agency Terrorism Liaison Officer (TLO), or assigned designee, and direct the TLO/ designee to send the data to the Joint Regional Information Exchange System.

Investigation

Investigators at the scene of or while performing follow-up investigation on a suspected hate or bias crimes (or hate incident if agency policy requires it) should take all actions deemed necessary, including, but not limited to, the following:

1. Consider typologies of perpetrators of hate crimes and incidents, including but not limited to thrill, reactive/defensive, and mission (hard core).
2. Utilize investigative techniques and methods to handle hate crimes or hate incidents in a professional manner.
3. Utilize proper techniques for interviewing people with disabilities and being aware of and providing appropriate accommodations (such as ADA standards, Braille, visuals, translators for the deaf or hard of hearing, etc.).
4. Fully investigate any report of hate crime committed under the color of authority per CPC 422.6 and CPC 13519.6.

-
5. Collect and photograph physical evidence or indicators of hate crimes such as:
 - a. Hate literature.
 - b. Spray paint cans.
 - c. Threatening letters.
 - d. Symbols used by hate groups.
 - e. Desecration of religious symbols, objects, or buildings.
 6. Request the assistance of translators or interpreters when needed to establish effective communication.
 7. Conduct a preliminary investigation and record information regarding:
 - a. Identity of suspected perpetrator(s).
 - b. Identity of witnesses, including those no longer at the scene.
 - c. Offer of victim confidentiality per GC 5264.
 - d. Prior occurrences, in this area or with this victim.
 - e. Statements made by suspects; exact wording is critical.
 - f. Document the victim's protected characteristics.
 8. Provide victim assistance and follow-up.
 9. Canvass the area for additional witnesses.
 10. Examine suspect's social media activity for potential evidence of bias motivation.
 11. Coordinate the investigation with agency, state, and regional intelligence operations. These sources can provide the investigating officer with an analysis of any patterns, organized hate groups, and suspects potentially involved in the offense.
 12. Coordinate the investigation with the crime scene investigation unit (if applicable) or other units of the agency.
 13. Determine if the incident should be classified as a hate crime.
 14. Take steps to ensure appropriate assistance is provided to hate crime victim(s), including the following measures:
 - a. Contact the victim periodically to determine whether he/she is receiving adequate and appropriate assistance.
 - b. Provide ongoing information to the victim about the status of the criminal investigation.
 - c. Provide the victim and any other interested person the brochure on hate crimes per CPC 422.92 and information on any local advocacy groups (if asked).
 15. Report any suspected multi-mission extremist crimes to the agency TLO, or assigned designee, and direct the TLO or designee to send the data to the Joint Regional Information Exchange System.
 16. Coordinate with other law enforcement agencies in the area to assess patterns of hate crimes and/or hate incidents (if directed by policy), and determine if organized hate groups are involved.

Supervision

The supervisor shall confer with the initial responding officer(s) and ensure that necessary preliminary actions have been taken. The supervisor shall request any appropriate personnel necessary to accomplish the following:

1. Provide immediate assistance to the crime victim by:
 - a. Expressing the law enforcement agency's official position on the importance of these cases and the measures that will be taken to apprehend the perpetrators.
 - b. Expressing the department's interest in protecting victims' anonymity (confidentiality forms GC 6254) to the extent possible. Allow the victim to convey his/her immediate concerns and feelings.
 - c. Identifying individuals or agencies that may provide victim assistance and support. Local victim assistance resources may include family members or close acquaintances, clergy or departmental chaplain, as well as community service agencies that provide shelter, food, clothing, child care, or other related services (per CPC 422.92).
2. Ensure that all relevant facts are documented on an incident and/ or arrest report and make an initial determination as to whether the incident should be classified as a hate crime for federal and state bias-crimes reporting purposes.
3. Notify other appropriate personnel in the chain of command, depending on the nature and seriousness of the offense and its potential inflammatory and related impact on the community.
4. In cases of large-scale hate crime waves, or in circumstances where the potential exists for subsequent hate crimes or incidents, consider directing resources to protect vulnerable sites (such as assigning an officer at specific locations that could become targets).
5. Ensure hate crimes are properly reported, including reporting to the Department of Justice, pursuant to CPC 13023.
6. Ensure adherence to CPC 422.93, which protects hate crime victims and witnesses from being reported to federal immigration authorities if they have not committed any crime under state law. Supervisors should also be aware of the immigration remedies available to victims of crime. (U-Visa, T-Visa, S-Visa, etc.)
7. Respond to and investigate any reports of hate crimes committed under the color of authority.
8. Provide appropriate assistance, including activating the California Department of Justice hate crime rapid response protocol if necessary. For information see the California Department of Justice webpage or use following link: <https://oag.ca.gov/sites/all/files/agweb/pdfs/civilrights/AG-Rapid-Response-Team-Protocol-2.pdf>
9. Report or ensure any suspected multi-mission extremists crimes are reported to the agency TLO, or assigned designee, and direct the TLO/ designee to send the data to the Joint Regional Information Exchange System.
10. Make a final determination as to whether the incident should be classified as a hate crime.

Training

All staff, including dispatch, desk personnel, volunteers, records, support staff, officers, supervisors, and managers shall be properly trained on the department's hate crimes policy. The agency will follow all legislatively mandated training requirements.

POST offers training and video courses to assist law enforcement in the identification, investigation, documentation and reporting of hate crimes. These courses provide officers with information and skills necessary to effectively identify, investigate, document and report hate crimes. Various training programs include the history and definitions of hate crimes, recognition of hate groups, international terrorism, legal considerations, victims' considerations, initial response duties, victim interviewing and care, suspect identification and interrogation, evidence identification, report writing, the role of law enforcement, investigative strategies, intelligence collection, supervisory roles, community relations, media relations and local program training development, and other topics such as proper use of computer systems and methods for reporting. POST also maintains an extensive array of training videos on applicable topics such as working with those with mental illness and intellectual disabilities, hate crimes, and working with minority communities.

For more information on POST training opportunities and available videos, visit the POST website at www.post.ca.gov. In conjunction with POST training opportunities, trainers may utilize other state and federal agencies that offer training courses, such as the U.S. Department of Justice.

Planning and Prevention

The general underreporting of hate crimes is an identified issue in California. Underreporting is caused by victims not reporting hate crimes or hate incidents due to a number of factors, including fear of reprisal and the belief that law enforcement will not properly investigate them. A report by the State Auditor in 2018 determined that California law enforcement has not taken adequate action to identify, report and respond to hate crimes. There is also an extreme underreporting of anti-disability and anti-gender hate crimes. The agency's plan to remedy this underreporting *shall be inserted into the policy* (emphasis added).

In order to facilitate the recommendations contained within this policy, it is strongly recommended that agencies build and strengthen relationships with the community, engage in dialogue, and provide education to the community about this policy. Agency personnel are also encouraged to learn about the inherent issues concerning their communities in relation to hate crimes. Assigned personnel should perform the following:

1. Meet with residents in target communities to allay fears; emphasize the agency's concern over this and related incidents; reduce the potential for counter-violence; and provide safety, security, and crime prevention information. Cultural diversity education and immersion programs (if available) could facilitate this process.
2. Provide direct and referral assistance to the victim and his/her family.
3. Conduct public meetings on hate crime threats and violence in general.
4. Establish relationships with formal community-based organizations and leaders.
5. Expand, where appropriate, preventive programs such as hate, bias, and crime reduction seminars for school children.

-
6. Review the Attorney General's latest opinion on hate crime statistics and targets in order to prepare and plan for future crimes, specifically for Arab/Middle Eastern and Islamic communities.²
 7. Provide orientation of and with communities of specific targeted victims such as immigrants, Muslims, Arabs, LGBTQ, Black or African-American, Jewish, Sikh, disabled persons, etc.

Hate crimes are not only a crime against the targeted victim(s) but also have impacts on the victim's family and community. Working constructively with segments of this larger community after such crimes is essential to help reduce fears, stem possible retaliation, prevent additional hate crimes, and encourage any other previously victimized individuals to step forward and report such crimes. This is particularly important if an upward trend has been identified in these crimes.

Although hate incidents are not criminal events, they can be indicators of, or precursors to, hate crimes. Most California law enforcement agencies do not track hate incidents. It is recommended that hate incidents be investigated and documented, if directed by policy, as part of the overall planning to prevent hate crime.

Tracking social media is also another identified area to find indicators of, or precursors to, hate crimes. It is recommended that agencies assign personnel to find, evaluate and monitor public social media sources to identify possible suspects in reported hate crimes, or to determine suspects or suspect groups in future hate crimes or hate incidents affecting the identified individuals, groups or communities that may be victimized, and planned hate-based events.

Release of Information

Agencies should have procedure and/or policy on public disclosure of hate crimes. Establishing a relationship with stakeholders, before any incident occurs, to develop a network and protocol for disclosure would assist greatly in any disclosure.

The benefit of public disclosure of hate crime incidents includes:

1. Dissemination of correct information.
2. Assurance to affected communities or groups that the matter is being properly and promptly investigated.
3. The ability to request information regarding the commission of the crime(s) from the victimized community.

Agencies should provide the supervisor, public information officer, or designee with information that can be responsibly reported to the media. When appropriate, the law enforcement media spokesperson should reiterate that the hate crimes will not be tolerated, will be taken seriously, and will be prosecuted to the full extent of the law.

Agencies are encouraged to consider the following when releasing information to the public regarding hate crimes and hate incidents that have been reported within the jurisdiction:

²As described in CPC 13519.6(b)(8)

-
1. Informing community organizations in a timely manner when a community group has been the target of a hate crime.
 2. Informing the community of the impact of these crimes on the victim, the victim's family, and the community, and the assistance and compensation available to victims.
 3. Informing the community regarding hate crime law and the legal rights of, and the remedies available to, victims of hate crimes.
 4. Providing the community with on-going information regarding hate crime and/or hate incidents (if policy requires it).

Reporting

The agency policy shall require development of a procedure for data collection, documentation, and mandated reporting requirements. The agency shall:

1. Ensure that hate crimes are properly investigated, documented and reported.
2. During documentation, ensure hate crimes are flagged properly to allow for required reporting to the California Department of Justice. This is typically indicated by the title/penal code section identifying the report as a hate crime. Some agencies have added a check box specifically indicating a hate crime that could, if required by the agency policy, require a secondary review by an investigator/detective, supervisor or other identified party. It is the agency executive's responsibility to determine the form of documentation and type of indicators on crime reports.
3. The agency head or their designee (identified in the agency policy) should make a final determination as to whether the incident should be classified as a hate crime by the agency.
4. Agencies shall develop procedures to comply with legally mandated reporting, including the California Department of Justice, pursuant to CPC 13023.

Checklist for the agency's policy creation

- Message from the law enforcement's agency's chief executive is included
 - The updated existing policy or newly adopted policy includes the content of the model policy framework from POST.
 - Definition of "hate crime" included from:
 - CPC 422.55
 - CPC 422.56
 - CPC 422.6
 - Title by title specific protocol regarding:
 - Prevention
 - Is contact is established with identified persons and/or communities who are likely targets?
 - Have we formed and/or are we cooperating with hate crime prevention and response networks?
 - Has a plan for the agency to remedy underreporting of hate crimes and the more extreme underreporting of anti-disability and anti-gender hate crimes been created?
 - Response
 - Requirement that all hate crimes be properly investigated and supervised
 - Requirement that any hate crimes committed under the color of authority are investigated
 - Accessing Assistance
 - Information provided for activating the Department of Justice hate crime rapid response protocol when necessary
 - Victim assistance and follow-up
 - Reporting
 - Protocol for reporting suspected hate crimes to the Department of Justice per CPC 13023
 - Training
 - Has a checklist for first responders been created and provided personnel (see exemplar officer checklist in appendix)
 - Does the checklist include first responder responsibilities include:
 - Determining the need for additional resources if necessary?
 - Referral information for appropriate community and legal services?
 - The requirement to provide the agency's hate crimes brochure per CPC 422.92?
 - Information regarding bias motivation from CPC 422.87
 - Information regarding the general underreporting of hate crimes and the more extreme underreporting of anti-disability and anti-gender hate crimes
- Definitions of terms used in the policy are listed
- Specific procedure for transmitting and periodically retransmitting the policy and any related orders to officers is included.
 - Procedure shall include a simple and immediate way for officers to access the policy in the field when needed
- Title or titles of the officer or officers responsible for assuring the department has a hate crime brochure (per CPC 422.92) and ensuring that all officers are trained to distribute the brochure to all suspected hate crime victims and all other interested persons.
- A requirement that all officers be familiar with the policy and carry out the policy at all times unless directed by the law enforcement chief executive or the chief executive's designee.

APPENDIX

Definitions and Laws

In accordance with CPC sections 422.55, 422.56, 422.6, and 422.87, for purposes of all other state law unless an explicit provision of law or the context clearly requires a different meaning, the following shall apply:

Hate crime

“Hate crime” means a criminal act committed, in whole or in part, because of one or more of the following actual or perceived characteristics of the victim:

- (1) Disability.
- (2) Gender.
- (3) Nationality.
- (4) Race or ethnicity.
- (5) Religion.
- (6) Sexual orientation.
- (7) Association with a person or group with one or more of these actual or perceived characteristics.

(b) “Hate crime” includes, but is not limited to, a violation of Section 422.6.

“Association with a person or group with these actual or perceived characteristics” Includes advocacy for, identification with, or being on the ground owned or rented by, or adjacent to, any of the following: a community center, educational facility, family, individual, office, meeting hall, place of worship, private institution, public agency, library, or other entity, group, or person that has, or is identified with people who have, one or more of those characteristics listed in the definition of “hate crime” under paragraphs 1 to 6, inclusive, of CPC 422.55 subdivision (a).

Note: A “hate crime” need not be motivated by hate but may be motivated by any bias against a protected characteristic.

Hate Speech

The First Amendment to the U.S. Constitution protects most speech, even when it is disagreeable, offensive, or hurtful. The following types of speech are generally not protected: fighting words, true threats, perjury, blackmail, incitement to lawless action, conspiracy and solicitation to commit any crime.

Hate incident

A hate incident is an action or behavior motivated by hate or bias but legally protected by the First Amendment right to freedom of expression. Examples of hate incidents include:

- Name-calling
- Insults and epithets
- Distributing hate material in public places
- Displaying hate material on your own property

Bias Motivation

Bias motivation is a preexisting negative attitude toward actual or perceived characteristics referenced in Section 422.55. Depending on the circumstances of each case, bias motivation may include, but is not limited to, hatred, animosity, resentment, revulsion, contempt, unreasonable fear, paranoia, callousness, thrill-seeking, desire for social dominance, desire for social bonding with those of one's "own kind," or a perception of the vulnerability of the victim due to the victim being perceived as being weak, worthless, or fair game because of a protected characteristic, including, but not limited to, disability or gender.

Disability Bias

In recognizing suspected disability-bias hate crimes, officers should consider whether there is any indication that the perpetrator was motivated by hostility or other bias, occasioned by factors such as, but not limited to, dislike of persons who arouse fear or guilt, a perception that persons with disabilities are inferior and therefore "deserving victims," a fear of persons whose visible traits are perceived as being disturbing to others, or resentment of those who need, demand, or receive alternative educational, physical, or social accommodations.

In recognizing suspected disability-bias hate crimes, officers should consider whether there is any indication that the perpetrator perceived the victim to be vulnerable and, if so, if this perception is grounded, in whole or in part, in anti-disability bias. This includes, but is not limited to, if a perpetrator targets a person with a particular perceived disability while avoiding other vulnerable-appearing persons such as inebriated persons or persons with perceived disabilities different than those of the victim, those circumstances could be evidence that the perpetrator's motivations included bias against persons with the perceived disability of the victim and that the crime must be reported as a suspected hate crime and not a mere crime of opportunity.

Disability

Disability includes mental disability and physical disability as defined in GC 12926, regardless of whether those disabilities are temporary, permanent, congenital or acquired by heredity, accident, injury, advanced age or illness.

Gender

Gender means sex and includes a person gender identity and gender expression. Gender expression means a person's gender-related appearance and behavior, whether or not stereotypically associated with the persons assigned sex at birth. A person's gender identity and gender related appearance and behavior, whether or not stereotypically associated with the person's assigned sex at birth.

In Whole or In Part

"In whole or in part because of" means that the bias motivation must be a cause in fact of the offense whether or not other causes also exist. When multiple concurrent motives exist, the prohibited bias must be a substantial factor in bringing about the particular result. There is no requirement that the bias be a main factor, or that crime would not have been committed but for the actual or perceived characteristic.

Nationality

Nationality includes citizenship, country of origin, and national origin.

Race or Ethnicity

Race or ethnicity includes ancestry, color, and ethnic background.

Religion

Religion includes all aspects of religious belief, observance, and practice and includes agnosticism and atheism.

Sexual orientation

Sexual orientation means heterosexuality, homosexuality, or bisexuality.

Victim

Victim includes, but is not limited to, a community center, educational facility, entity, family, group, individual, office, meeting hall, person, place of worship, private institution, public

Statutes and Legal Requirements

Items listed in this section include sections from the California Penal Code (CPC), Welfare and Institutions Code (WI) and Government Code (GC).

Definitions

CPC 422.55 - Provides general definition of hate crimes in California.

CPC 422.56- Provides definitions of terms included in hate crimes statutes.

GC 12926- Disability-related definitions applicable to some hate crime statutes.

Felonies

Hate Crimes

CPC 422.7 - Commission of a crime for the purpose of interfering with another's exercise of civil rights.

Related Crimes

CPC 190.2(a)(16) - Homicide penalties related to certain hate crime related acts.

CPC 190.03(a) - Homicide penalties related to certain hate crime related acts.

CPC 288(b)(2) - Sexual assault of dependent person by caretaker

CPC 368(b) - Dependent adult abuse generally - may apply as disability-related hate crime.

CPC 594.3 - Vandalism of places of worship.

CPC 11412 - Causing or attempting to cause other to refrain from exercising religion by threat.

CPC 11413 - Arson or destructive device at place of worship.

Misdemeanors

Hate Crimes

CPC 422.6 - Use of force, threats, or destruction of property to interfere with another's exercise of civil rights.

CPC 422.77 - Violation of civil order (Bane Act) protecting the exercise of civil rights

Related Crimes

CPC 302 - Disorderly conduct during an assemblage of people gathered for religious worship at a tax-exempt place of worship.

CPC 538(c) - Unauthorized insertion of advertisements in newspapers and redistribution to the public.

CPC 640.2 - Placing handbill, notice of advertisement on a consumer product or product packaged without authorization.

CPC 11411 - Terrorism of owner or occupant of real property. Placement or display of sign, symbol, or other physical impression without authorization, engagement in pattern of conduct, or burning or desecration of religious symbols.

Enhancements

CPC 190.2(a)(16) - Special circumstances imposing the Death Penalty or Life Without Possibility of Parole, if the victim was intentionally killed because of sexual orientation, gender, or disability.

CPC 190.3 - Special circumstances imposing LWOP if the victim was intentionally killed because of sexual orientation, gender, or disability.

CPC 422.75 - Penalty for felony committed because of victim's race, color, religion, nationality, country or origin, ancestry, disability, or sexual orientation shall be enhanced one, two, or three years in prison, if the person acts alone; and two, three, or four years if the person commits the act with another.

CPC 1170.8 - Enhancement for robbery or assault at a place of worship.

CPC 1170.85(b) - Felony assault or battery enhancement due to age or disability.

Reporting

CPC 13023- Requirement for law enforcement agencies to report hate crime data to DOJ.

WI 15630 – Elder and Dependent Adult Abuse Mandated Reporting (may apply in disability-related hate crimes).

Training and Policy Requirements

CPC 422.87 - Hate crimes policy adoption and update requirements (AB 1985, Effective January 1, 2019).

CPC 13519.6 - Defines hate crime training requirements for peace officers.

CPC 13519.41 - Training requirements on sexual orientation and gender identity-related hate crimes for peace officers and dispatchers (AB 2504, Effective January 1, 2019).

Miscellaneous Provisions

CPC 422.78 - Responsibility for prosecution of stay away order violations.

CPC 422.86 - Public policy regarding hate crimes.

CPC 422.89 - Legislative intent regarding violations of civil rights and hate crimes

CPC 422.92 - Hate crimes victims brochure requirement for law enforcement agencies.

CPC 422.93 - Protection of victims and witnesses from being reported to immigration authorities.

GC 6254 - Victim confidentiality.

The recipient may use my health information only for the following purposes:

- Criminal Investigation Voluntary Testing
- Other _____ Case # _____

DURATION: The authorization shall become effective immediately and will expire one year from the date of signature or a different date specified here: _____ (Date)

RESTRICTIONS / REDISCLOSURE: California law prohibits the recipient from making further disclosure of your health information unless the recipient obtains another authorization from you or unless the disclosure is required or permitted by law. This protection does not extend to recipients outside the State of California.

REFUSAL / REVOCATION: I understand that I may refuse to sign this authorization and my refusal will not affect my ability to obtain treatment. I may revoke this authorization at any time. My revocation must be in writing, signed by me or on my behalf and delivered to: Berkeley Police Department – Investigations Division, 2100 Martin Luther King Jr. Way, Berkeley, CA 94704.

My revocation will be effective upon receipt, but will have no impact on uses or disclosures made while my authorization was valid. I have a right to receive a copy of this authorization. I may inspect and obtain a copy of the health information that I am authorizing for use or disclosure.

6.2 COB Emergency Plan - 2016.pdf

Office of the City Manager

CONSENT CALENDAR
April 25, 2017

To: Honorable Mayor and Members of the City Council
From: Dee Williams-Ridley, City Manager
Submitted by: Gil Dong, Fire Chief
Subject: 2016 Emergency Operations Plan

RECOMMENDATION

Adopt a Resolution adopting the 2016 Emergency Operations Plan (EOP), authorizing the City Manager to revise any Annexes, Appendices and/or Attachments to the EOP, and rescinding Resolution No. 58,659-N.S.

FISCAL IMPACTS OF RECOMMENDATION

No immediate impacts. The 2016 EOP establishes processes for Citywide fiscal coordination during emergency response. These processes will help the City to maintain maximum eligibility for financial assistance from State/federal government during disaster response and recovery.

CURRENT SITUATION AND ITS EFFECTS

The 2016 Emergency Operations Plan (EOP) establishes the foundation for Berkeley's response to and short-term recovery from emergencies, disasters, incidents and events.

The EOP is scalable in order to address incidents that develop into emergencies, planned events, and incidents, emergencies, or disasters that occur without warning. The EOP utilizes an all-hazards planning approach, and is flexible enough to use for all natural and manmade emergencies/events to which Berkeley is exposed, including earthquake, Wildland-Urban Interface (WUI) fire, and terrorism.

The scope of this EOP is not tactical, nor does it focus on incident command at the field level. Rather, the EOP addresses overall support and coordination of Berkeley's response to an emergency/event.

The EOP incorporates and complies with the principles and requirements found in laws, regulations and guidelines of the federal, State of California, County of Alameda, and City of Berkeley government. It is intended to conform to the requirements of the Standardized Emergency Management System (SEMS), the California State Emergency Plan, and the National Incident Management System (NIMS), and to be consistent with federal emergency planning concepts such as the National Response Framework.

EOP Structure

The Base Plan (Exhibit A) forms the foundation of the EOP. The Base Plan outlines the authorities, structures and responsibilities of the Policy Level, departments and the Emergency Operations Center (EOC). It describes the City's coordination with County, regional, State and federal entities, as well as external Berkeley partners.

In addition to this Base Plan, staff and partners will develop Functional Annexes and Hazard-Specific Appendices to this EOP:

- Functional Annexes will detail the operations involved in particular Emergency Support Functions (see Base Plan Section 2.3.1: *Emergency Support Functions*);
- Hazard-Specific Appendices (see Base Plan Attachment 2: *List of Functional Annexes and Hazard-Specific Appendices*) will detail particular response requirements and challenges involved in response to specific hazard events. Hazard-Specific Appendices will build on both the Base Plan and the *2014 Local Hazard Mitigation Plan*, which describes potential hazards, and maps hazard exposure areas, and indicates hazards' potential severity, frequency, and affected population estimates.

BACKGROUND

The City of Berkeley's most currently adopted citywide emergency response plan is the Multi-Hazard Functional Plan (MHFP). The City Council adopted the MHFP on September 24, 1996. Since then, the State of California has determined that the MHFP format does not meet Standardized Emergency Management System (SEMS) requirements.

Since MHFP adoption in 1996, City staff has been continually developing, testing and revising citywide emergency response plans. In 2015, the Office of Emergency Services embarked on a concerted effort to finalize this 2016 EOP using current emergency management concepts and requirements and bring it to the City Council for formal adoption.

On September 2, 2016, the City of Berkeley Disaster Council convened to discuss the 2016 EOP. The Disaster Council is comprised of staff and external partner representatives who are responsible for implementing Berkeley's disaster response. The Disaster Council recommends that the City Council adopt the 2016 EOP.

On December 7, 2016, the Disaster and Fire Safety Commission (DFSC) convened to discuss the 2016 EOP. The DFSC recommended that the City Council adopt the 2016 EOP. Vote: (7 Ayes: Flasher, Jones, Legg, Grimes, Couzin, Degenkolb, Golomb; 0 Noes; 2 Absent.)

ENVIRONMENTAL SUSTAINABILITY

Broadly speaking, the three priorities used in emergency response are protection of life, property, and environment. Adopting the 2016 EOP will formalize these priorities on a Citywide basis. This will in turn help the City to respond more effectively to emergencies with negative environmental impacts.

RATIONALE FOR RECOMMENDATION

The City's currently-adopted citywide emergency response plan is the MHFP, which was adopted in 1996 and no longer meets State requirements for such plans. The 2016 Emergency Operations Plan meets local, State and federal requirements. Both the Disaster Council and the Disaster and Fire Safety Commission have recommended that the City Council adopt the 2016 EOP.

ALTERNATIVE ACTIONS CONSIDERED

Do not adopt the 2016 EOP and continue to remain out of compliance with State and federal requirements for citywide emergency response plans.

CONTACT PERSON

Dave Brannigan, Deputy Chief, Fire Department, 981-5501

1: Resolution

Exhibit A: 2016 Emergency Operations Plan – Base Plan

RESOLUTION NO. ##,###-N.S.

ADOPTING THE 2016 EMERGENCY OPERATIONS PLAN; AUTHORIZING THE CITY MANAGER TO REVISE ANY ANNEXES, APPENDICES AND/OR ATTACHMENTS TO THE EOP AS NECESSARY TO MAINTAIN ACCURATE AND UP-TO-DATE SUPPORTING INFORMATION TO THE EOP; AND RESCINDING RESOLUTION NO. 58,659-N.S.

WHEREAS, the City of Berkeley's most currently adopted citywide emergency response plan is the 1996 Multi-Hazard Functional Plan (MHFP), and the State of California has determined that the MHFP format does not comply with requirements of the Standardized Emergency Management System (SEMS); and

WHEREAS, the Office of Emergency Services used current emergency management practices to develop the 2016 Emergency Operations Plan (EOP), which establishes the foundation for Berkeley's response to and short-term recovery from emergencies, disasters, incidents and planned events; and

WHEREAS, the 2016 EOP utilizes an all-hazards planning approach, and incorporates and complies with the principles and requirements found in laws, regulations and guidelines of the federal, State of California, County of Alameda, and City of Berkeley government; and

WHEREAS, the City of Berkeley Disaster Council and the Disaster and Fire Safety Commission recommend that the City Council adopt the 2016 EOP.

NOW THEREFORE, BE IT RESOLVED by the Council of the City of Berkeley that the 2016 Emergency Operations Plan (EOP) attached hereto as Exhibit A, is hereby adopted.

BE IT FURTHER RESOLVED that the City Manager is authorized to revise the Annexes, Appendices, and/or Attachments to the EOP to maintain accurate and up-to-date supporting information to the EOP, and that the City Manager shall inform the City Council of such revisions.

BE IT FURTHER RESOLVED that Resolution No. 58,659-N.S. is hereby rescinded.

Section 1: Introduction

1.1 Overview

1.1.1 Berkeley's Emergency Management Program and Multi-Agency Coordination System

The City of Berkeley's Emergency Management Program coordinates the City's actions to mitigate, prevent, prepare for, respond to, and recover from any emergency, disaster, or event. The program encompasses all City organizations, agencies, departments, entities, and individuals responsible for emergency management activities.

Berkeley's Multi-Agency Coordination (MAC) System is the element of Berkeley's Emergency Management Program focused on response to and short-term recovery from emergencies, disasters, incidents and events¹. Berkeley's MAC System is made up of the facilities, equipment, personnel, communications and procedures that City government and external partners use to respond.

The purpose of this Emergency Operations Plan (EOP) is to establish procedures to implement Berkeley's MAC System. This document is the EOP *Base Plan*.

1.1.2 Emergency Operations Plan Scope

This EOP Base Plan establishes the authorities, structures and responsibilities of the Policy Level, departments and the Emergency Operations Center (EOC). It describes the City's coordination with County, regional, State and federal entities, as well as external Berkeley partners.

This EOP Base Plan is scalable in order to address both incidents that develop into emergencies, planned events, as well as incidents, emergencies or disasters that occur without warning.

The scope of this EOP is not tactical, nor does it focus on Incident Command at the field level. Rather, the EOP addresses overall support and coordination of Berkeley's response to an emergency/event.

¹SEMS uses four related terms to describe conditions that impact normal government and community functions and could require MAC System use:

- Incident: An occurrence or event, either human-caused or by natural phenomena, that requires action by emergency response personnel to prevent or minimize loss of life or damage to property and/or natural resources.
- Emergency: A condition of disaster or of extreme peril to the safety of persons and property caused by such conditions as air pollution, fire, flood, hazardous material incident, storm, epidemic, riot, drought, sudden and severe energy shortage, plant or animal infestations or disease, the Governor's warning of an earthquake or volcanic prediction, or an earthquake or other conditions, other than conditions resulting from a labor controversy.
- Disaster: A sudden calamitous emergency event bringing great damage loss or destruction.
- Event: A planned, non-emergency activity.

Unless specified otherwise, references to "emergency/event" in this EOP describe an incident, emergency, disaster or event requiring MAC System use.

2016 City of Berkeley Emergency Operations Plan

In addition to this Base Plan, Functional Annexes to this EOP will detail the operations involved in particular Emergency Support Functions (see Section 2.3.1: *Emergency Support Functions*).

This EOP utilizes an all-hazards planning approach, and is flexible enough to use for all natural and manmade emergencies/events to which Berkeley is exposed. These include:

- Earthquake
- Wildland-Urban Interface (WUI) fire
- Landslide
- Severe storms and flooding
- Tsunami
- Hazardous materials release
- Terrorism

Berkeley's *Local Hazard Mitigation Plan* summarizes Berkeley's hazard analysis. It includes a description of potential hazards and maps of their exposure areas, as well as information about their severity potential, affected population estimates, and frequency. Some of these hazards have particular response requirements and challenges. Specific response coordination necessary for these hazard events will be further detailed in the Hazard-Specific Appendices to this EOP (see Attachment 2: *List of Functional Annexes and Hazard-Specific Appendices*).

1.1.4 Standardized Emergency Management System and National Incident Management System

The Standardized Emergency Management System (SEMS) is the cornerstone of California's emergency response system and the fundamental structure for the response phase of emergency management. SEMS is required by the California Emergency Services Act for managing multiagency and multijurisdictional responses to emergencies in California. The system unifies all elements of California's emergency management community into a single integrated system and standardizes key elements. SEMS incorporates the use of the Incident Command System (ICS), California Disaster and Civil Defense Master Mutual Aid Agreement (MMAA), the Operational Area (OA) concept and multi-agency or inter-agency coordination. State agencies are required to use SEMS and local government entities must use SEMS in order to be eligible for any reimbursement of response-related costs under the State's disaster assistance programs.

In addition to SEMS, the State of California and its political subdivisions are responsible for compliance with National Incident Management System (NIMS) requirements as defined in the Homeland Security Presidential Directives. The State promotes and encourages NIMS adoption by associations, utilities, Nongovernmental Organizations (NGOs), private sector emergency management, and incident response organizations to enhance emergency management effectiveness. SEMS and NIMS are designed to be compatible and are based on similar organizational principles.

The plan incorporates and complies with the principles and requirements found in laws, regulations and guidelines of the federal, State of California, County of Alameda, and City of Berkeley government. It is intended to conform to the requirements of SEMS, the California State Emergency Plan, and NIMS, and to be consistent with federal emergency planning

2016 City of Berkeley Emergency Operations Plan

concepts such as the National Response Framework.

All references to SEMS from this point forward in this Emergency Operations Plan, its attachments, its annexes and its appendices, will additionally imply NIMS compliance.

1.1.4 Access and Functional Needs

The City of Berkeley is committed to ensuring that all emergency plans and response/recovery activities integrate all community members, including persons with access and functional needs². Access and functional needs may occur in areas including but not limited to: physical accessibility, communications, medical care, access to medications and assistive technology, independence maintenance, and transportation.

To this end, this Emergency Operations Plan and its attachments, functional annexes and hazard-specific appendices will include provisions to ensure that described emergency/event response and recovery activities effectively integrate community members with access and functional needs.

When Berkeley's MAC System operationalizes this EOP during emergency/event response and recovery, leaders at all levels will be responsible for using the provisions outlined in this EOP and detailed in its attachments, annexes and appendices to ensure that the response meets community members' access and functional needs.

² *Access and Functional Needs* are "those actions, services, accommodations, and programmatic, architectural, and communication modifications that a covered entity must undertake or provide to afford individuals with disabilities a full and equal opportunity to use and enjoy programs, services, activities, goods, facilities, privileges, advantages, and accommodations in the most integrated setting, in light of the exigent circumstances of the emergency and the legal obligation to undertake advance planning and prepare to meet the disability related needs of individuals who have disabilities defined by the ADA Amendments Act of 2008, P.L. 110-325, and those associate with them." (FEMA, Functional Needs Support Services Shelter Support Guide Page 41)

People with disabilities are protected from discrimination under a variety of laws, including the Americans with Disabilities Act (ADA), Section 504 of the Rehabilitation Act of 1973, and portions of the California Civil Code. Public programs, including but not limited to those initiated during disaster response, may not discriminate against people based upon a disability and must offer all services, programs, and activities in ways that allow equal participation.

2016 City of Berkeley Emergency Operations Plan

1.2 Document Organization

The following sections provide the policy framework that guides the organization of City emergency operational procedures:

Document Organization

Section 1: Introduction	Provides the objectives of the plan, its legal authorities, and document management procedures.
Section 2: Concept of Operations	Provides an overview of the sequence and scope of actions to be taken for a citywide response to an emergency/event.
Section 3: EOC General Staff	Provides a detailed description of the responsibilities of and actions to be taken by each EOC Section, to include responsibility during an EOC activation and information to be used by each staff member with an assigned role.
Section 4: Mutual Aid	Provides an overview of the mutual aid system in California and discusses the City's role in that system.

Attachments

Attachment #1 – List of Abbreviations and Acronyms	Defines abbreviations and acronyms used in the EOP.
Attachment #2 – List of Functional Annexes and Hazard-Specific Appendices	Identifies and defines EOP: <ul style="list-style-type: none"> • Annexes for particular emergency support functions • Appendices for response to specific hazard events, such as earthquake and wildfire.
Attachment #3 – Distribution List	Distribution list for this EOP.
Attachment #4 – Department-EOC Emergency Support Function Chart	Illustrates the department and EOC coordination and support roles for each Emergency Support Function.

2016 City of Berkeley Emergency Operations Plan

1.3 Authorities and References

The following authorities form the basis for the organizational and planning principles presented in this EOP.

City of Berkeley

- Berkeley Municipal Code Chapter 2.88
 - § 2.88.020: Definition of Emergency
 - § 2.88.030: Director of Emergency Services – office created
 - Concurrently serves as City Manager and Director of Emergency Services
 - § 2.88.040: Director of Emergency Services Powers and Duties
 - Proclaims Local Emergency if City Council is not in session
 - Controls City’s Emergency Organization
 - Establishes emergency laws and regulations
 - Obtains or commandeers resources
 - Requires emergency services of City staff
 - Requisitions personnel or material of any City department or agency
 - Designates line of succession for Director of Emergency Services role
 - § 2.88.050: City of Berkeley’s Emergency Organization
 - Includes all City officers, employees and volunteers
 - Uses the Standardized Emergency Management System (SEMS) and subscribes to the principles of the National Incident Management System
 - § 2.88.060: Emergency expenditures
 - Also: City Charter Article XI, § 67.4: Emergencies
 - § 2.88.080 – 2.88.090: Disaster Council
 - Develops, reviews and recommends emergency plans and mutual aid agreements for Council adoption
 - Oversees process of registration, direction and management of disaster service worker volunteers
 - § 2.88.100 – 2.88.120: Disaster and Fire Safety Commission
 - Advises City Council on all matters affecting fire safety and/or disaster resilience in Berkeley
 - Serves as citizens’ oversight committee for the Special Tax to Fund Fire Protection and Emergency Response and Preparedness
- City of Berkeley Resolution No. 32,629—N.S., “Adopting the California Master Mutual Aid Agreement,” December 12, 1950

1.4 Document Management and Distribution

The City of Berkeley EOP Base Plan will be reviewed biennially and revised as necessary. The Fire Department – Office of Emergency Services (OES) will initiate the process and engage the support of departments with relevant EOC responsibilities. Each plan revision will be authorized by identified approval and advisory authorities, as stated by current City administrative codes. The plan may be modified as a result of analyses of actual responses or exercises. It may also be modified if responsibilities, procedures, laws, rules, or regulations pertaining to emergency management operations change. Records of revisions to the EOP will be maintained by OES on the register at the beginning of this document. The distribution list for this EOP is included as Attachment 3: *Distribution List*.

Those departments having assigned responsibilities under this plan are obligated to inform Fire-OES when organizational or operational changes affecting this plan occur or are imminent. Changes will be published and distributed to relevant organizations.

Section 2: Concept of Operations

The City of Berkeley must be prepared to promptly and effectively respond to any foreseeable emergency/event and to take all appropriate actions, including requesting and providing resources. To do so, Berkeley City government will work with many other governmental, non-governmental, and private organizations. This Concept of Operations (ConOps) guides City decision-makers and plan users regarding the sequence and scope of actions to be taken during a citywide emergency response.

The ConOps outlines general concepts guiding Berkeley's MAC System and the emergency proclamation process; describes the structure and positions managing Berkeley's MAC System; outlines practices for emergency management coordination within City government and with external partners; and describes standard operating procedures for Berkeley's Emergency Operations Center.

2.1 General Concepts

First, this section uses the Standardized Emergency Management System (SEMS) to describe interactions between field responders, City government, the Alameda County Operational Area (OA), and the State of California emergency management organizations. Second, this section outlines the emergency proclamations process.

2.1.1 SEMS Organizational Levels¹

In accordance with SEMS, California's emergency response operations rely on a system in which government levels work together from the Field Level upward, in a single, integrated structure. Incidents are managed at the lowest possible level. Local government has primary responsibility for emergency response activities within its jurisdiction. Operational Areas, the region, and the State support local jurisdictions.

SEMS also provides a standardized response structure for emergencies involving multiple jurisdictions or multiple agencies in California. It defines a standard management structure and standard terminology for Statewide use. SEMS is applicable to all organizational levels and functions in the emergency response system. There are five designated levels in the SEMS organization, which are identified in the figure that follows.

¹ Standardized Emergency Management System (SEMS) Guidelines, 2006, Part I: System Description

2016 City of Berkeley Emergency Operations Plan

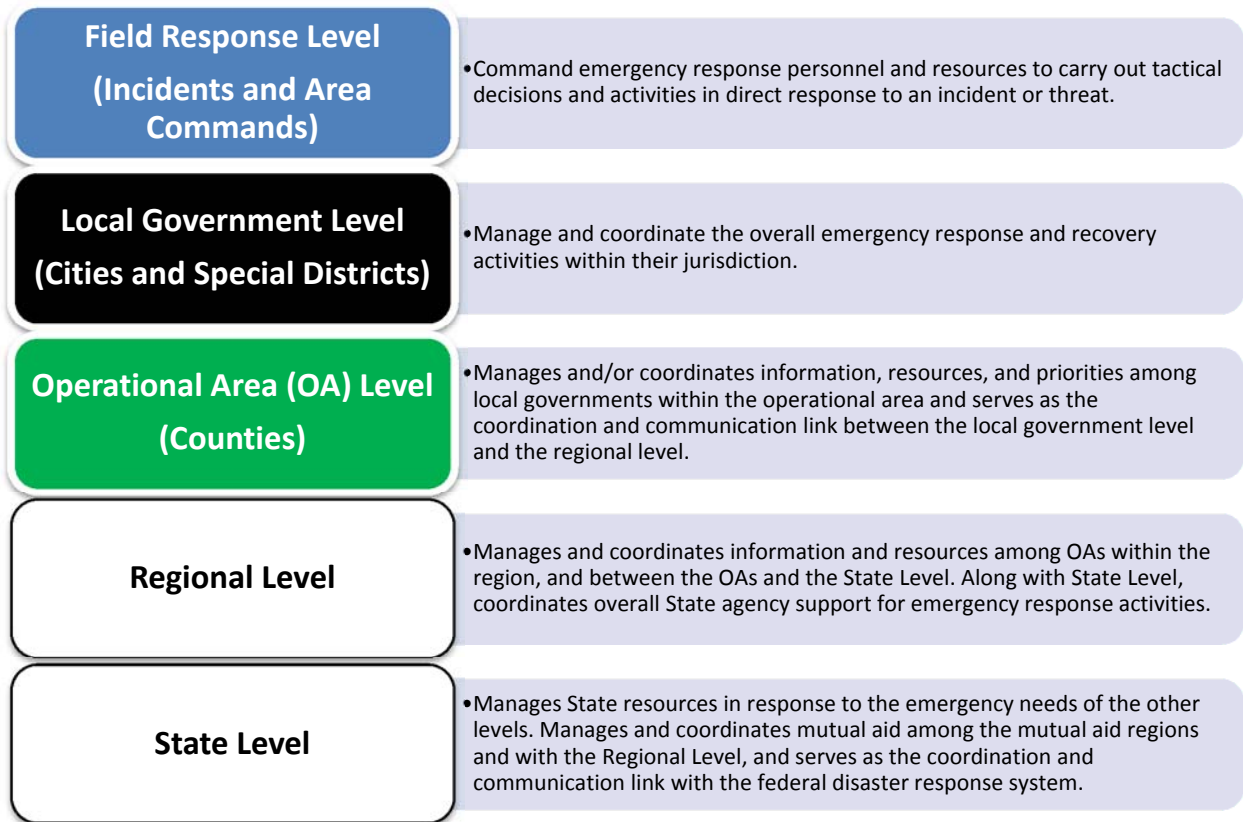

Figure 2-1: SEMS Organizational Levels and Functions
(CCR Title 19, Division 2, Chapter 1, Section 2403)

SEMS Field Level

The SEMS Field Level is where emergency response personnel and resources, under the command of responsible officials, carry out tactical decisions and activities in direct response to an incident or threat. SEMS uses ICS, as defined in Section 1: *Introduction*, to control and coordinate Field Level response activities. ICS provides a standard organizational structure to facilitate coordination of multiple organizations in the Field Level. During Field Level response operations, DOCs and/or the EOC may or may not be activated depending on the severity and type of emergency/event. Generally, if day-to-day response activities can resolve an emergency situation, response will remain at the Field Level. Incident Command Posts, Unified Command Posts, and Area Command Posts are all Field Level organizations.

SEMS Local Government Level

The Local Government Level includes cities and special districts. Local governments manage and coordinate the overall emergency response and recovery activities within their jurisdiction. The Local Government Level supports, but does not command, Field Level operations. Departments/DOCs and EOCs are Local Government Level organizations. In order to be eligible for State reimbursement of response-related costs, local governments are required to use SEMS when their Emergency Operations Center (EOC) is activated or a local emergency is declared or proclaimed.

SEMS Operational Area (OA) Level

An OA is the intermediate level of the State’s emergency management organization, which

2016 City of Berkeley Emergency Operations Plan

encompasses a county's boundaries and all political subdivisions located within that county, including special districts. The OA facilitates and/or coordinates information, resources and decisions regarding priorities among local governments within the OA. The OA serves as the coordination and communication link between the Local Government Level and Regional Level. State and federal jurisdictions in the OA (e.g., the California Highway Patrol and the University of California at Berkeley) may have statutory authorities for response similar to that at the Local Level. In the Alameda County Operational Area (ALCO OA), the Alameda County Office of the Sheriff serves in the capacity of the OA emergency management agency (referred to as the Alameda County Office of Emergency Services [ALCO OES]).

SEMS Region Level

California is divided into three California Office of Emergency Services (Cal OES) Administrative Regions – Inland, Coastal and Southern. The Alameda County OA is part of the Cal OES Coastal Region, which includes the 16 OAs in and around the San Francisco Bay Area. These OAs are: Alameda, Contra Costa, Del Norte, Humboldt, Lake, Marin, Mendocino, Monterey, Napa, San Benito, San Francisco, San Mateo, Santa Clara, Santa Cruz, Solano, and Sonoma.

The three Cal OES Administrative Regions are further divided into six mutual aid regions. The Alameda County OA is part of Mutual Aid Region II.

The Cal OES Administrative Region Level manages information and supports the coordination of resources (1) among OAs within the region, and (2) between the OAs and the State Level. The Region Level also coordinates overall State agency support for emergency response activities within the region.

Region Level activities are generally carried out at the Regional Emergency Operations Center (REOC), located in Walnut Creek. The REOC serves as a link between OAs and the State Operations Center (SOC), located in Mather.

SEMS State Level

The State Level prioritizes tasks and coordinates State resources in response to requests from the Regional Level. Cal OES manages and coordinates mutual aid (1) among the mutual aid regions, and (2) between the regions and the State Level. The State Level operates out of the SOC.

The State Level also serves as the coordination and communication link between the State and the federal emergency response system. In the event that OAs and the region require federal assistance, requests are made from the local Level through the appropriate SEMS channel to the SOC. The State Level requests assistance from other state governments through the Emergency Management Assistance Compact (EMAC) and similar interstate compacts/agreements and coordinates with the Federal Emergency Management Agency (FEMA) when federal assistance is requested.

City of Berkeley and SEMS

According to State law, the City is required to adopt and implement SEMS. As stated earlier, under SEMS and the California Emergency Services Act, the City has local government responsibility to manage information and coordinate resources for all City departments, and to serve as the link between Berkeley and the ALCO OA.

2016 City of Berkeley Emergency Operations Plan

2.1.2 Emergency Proclamations and Declarations

Local Emergency Proclamation

When conditions of extreme peril exist that threaten the safety of persons and property within Berkeley, and these conditions are likely to be beyond the control of the City of Berkeley's services, personnel, equipment, and facilities, the Director of Emergency Services requests the City Council to proclaim a Local Emergency. If City Council cannot be convened, the DES may proclaim a Local Emergency.

A Proclamation of a Local Emergency:

- Authorizes the undertaking of extraordinary police powers
- Provides limited immunity for emergency actions of public employees and governing bodies
- Authorizes the issuance of orders and regulations to protect life and property (e.g., curfews)
- Activates pre-established local emergency provisions such as special purchasing and contracting
- Serves as a prerequisite for requesting a Governor's Proclamation of a State of Emergency and/or a Presidential Declaration of an Emergency or Major Disaster

Local emergency proclamations are not required for fire or law mutual aid, or for Red Cross response.

Deadlines

The Proclamation of Local Emergency must be:

- Issued within 10 days of the occurrence of a disaster if assistance will be requested through the California Disaster Assistance Act (CDAA).
- Ratified by City Council within 7 days of issuance (if issued by Director of Emergency Services)
- Reviewed and renewed at regularly scheduled City Council meetings until terminated
 - Note: no review period is to exceed 21 days from last review
- Terminated when conditions warranting proclamation have ended

State and Federal Proclamations and Declarations

Should the situation necessitate State or federal disaster assistance, the Director of Emergency Services/City Council has the authority to request the Governor (through the ALCO OA) to proclaim a "State of Emergency." State OES must receive request from local government within 10 days of the incident.

Four levels of disaster assistance are available, including:

- Director's Letter of Concurrence
- Governor's State of Emergency Proclamation
- Federal (Presidential) Declaration of an Emergency
- Federal (Presidential) Declaration of a Major Disaster

Each is used for unique circumstances and provides specific types of aid.

Notification and Coordination

When issuing a Proclamation of Local Emergency, the following notifications should be made:

- City of Berkeley notifies the ALCO OA via whatever communications are available (email,

2016 City of Berkeley Emergency Operations Plan

fax, phone, radio) and provides a copy of the Local Emergency Proclamation as soon as possible

- Alameda County Operational Area notifies Cal OES Coastal Region and provides a copy of the proclamation as soon as possible
- Cal OES Coastal Region notifies the Cal OES Director and Deputy Directors; Cal OES Coastal Region shall be the primary contact between the Cal OES Director, the Alameda County Operational Area and the City for updates or on any requests for assistance
- Cal OES Director will respond in writing to the City concerning the status of any requests for assistance included within Berkeley's Proclamation of Local Emergency or accompanying letter

Note: If the ALCO OA proclaims a local emergency for Alameda County and makes its own request to the Governor for a State of Emergency, the City of Berkeley does not need to send the State its own written Proclamation of Local Emergency.

2016 City of Berkeley Emergency Operations Plan

2.2 MAC System Management Structures

Berkeley's MAC System is organized according to SEMS requirements and guidance for the Local Government and Field Levels. The following Local Government Level management structures may be activated depending on the needs of the emergency/event:

- City Manager/Director of Emergency Services
- Policy Group
- City Council
- Emergency Operations Center
- Department Operations Center (DOC)

This section outlines the roles and responsibilities of positions in each management structure. For the EOC, Section 2.2: *Management Structures* outlines roles and responsibilities of the EOC Management Section only. Section 3: *EOC Sections* details the roles and responsibilities of personnel in the other EOC sections.

2.2.1 City Manager/Director of Emergency Services²

The Director of Emergency Services (DES) is a policy authority. The DES is ultimately responsible for the efforts of the City's Emergency Organization. It is the DES's duty to exercise his/her powers in order to protect life and property within Berkeley during an emergency. In an emergency/event, the DES serves over consecutive shift changes and operational periods.

The City Manager serves as the DES. If the City Manager is unavailable to serve as DES, the individual serving as DES³ concurrently serves as City Manager. City Manger duties may include:

- Coordinating with the Policy Group (see below) to review situation information and establish citywide priorities based upon operational requirements and City capabilities.
- Serving as the EOC Director (see Section 2.2.4: *Emergency Operations Center (EOC)*).

2.2.2 Policy Group

The Policy Group is a policy authority. According to the requirements of the situation, the City Manager may assemble appropriate City department and external agency representatives to form a Policy Group. Per SEMS⁴, the Policy Group serves as Berkeley's multi-agency coordination group (MAC Group). The Policy Group establishes citywide priorities among multiple competing incidents and develops policy directives to guide the SEMS Local Government Level and Field Level response.

The City Manager can convene a Policy Group with or without an EOC activation. The Policy Group supports emergency/event response efforts, continuity of government, and continuity of City operations, and advises the City Manager on policy issues affecting Berkeley.

Per City Manager direction, Policy Group responsibilities may include:

² City of Berkeley Municipal Code, Chapter 2.88 Emergency Services And Disaster And Fire Safety Commission

³ In order to ensure continuity of government, the City of Berkeley has a line of succession for the Director of Emergency Services position.

⁴ California Statewide Multi-Agency Coordination System Guide, February 2013, p. 2

2016 City of Berkeley Emergency Operations Plan

- Convene as needed to address policy issues (e.g., curfew, authorization of evacuation orders, authorization of responder/EOC requests to deviate from City/department policies)
- Prepare and execute rules, regulations, proclamations and/or orders as necessary
- Respond to requests from the Public Information Officer
- Interface with City Council and community leaders
- Act as a liaison to federal, State, and County elected officials
- Act as a liaison to local jurisdictions
- When the EOC is activated:
 - Respond to requests for policy direction from the EOC
 - Ensure EOC adherence to Policy Group's citywide priorities and directives
 - Support decisions and actions of the EOC

Because the Policy Group is a policy authority, Policy Group members may serve over consecutive shift changes and operational periods. A Policy Group member may also concurrently serve in a functional position in the EOC or a Department. However, to ensure members' ongoing availability to the City Manager, as well as continuity of EOC/Department operations, each Policy Group member serving in the EOC or a Department must have an assigned deputy with authority to serve in his/her EOC/Department role as he/she performs his/her Policy Group duties.

The City Manager may also activate/utilize three staff positions for support in implementing policy decisions:

- **City Attorney:** The City Manager may utilize the City Attorney to provide legal counsel on matters pertaining to emergency/event response. The City Attorney may also assist in the preparation of proclamations, ordinances, and other legal documents. The City Attorney may concurrently serve as the EOC Legal Officer (see Section 2.2.4: *Emergency Operations Center (EOC)*).
- **City Clerk:** If the emergency/event will require emergency proclamations and declaration requests (see 2.1.2 *Emergency Proclamations and Declarations*), the City Manager will utilize the City Clerk to coordinate emergency Council sessions.
- **Council Liaison:** The City Manager may activate the Council Liaison position to ensure that City Councilmembers have a central point of contact during high-profile emergencies or events, and/or in situations requiring City Council ratification of DES orders and proclamations.

Because these positions are not policy authorities, their staffing will be in accordance with operational period staffing patterns used by the Emergency Operations Center (see Section 2.2.4: *Emergency Operations Center (EOC)*).

2.2.3 City Council

In an emergency or disaster, the Mayor and City Councilmembers and their Standby Officers must be ready to ensure continuity of government and support emergency response.

The responsibilities of City Council are as follows:

- Obtain briefings from the City Manager and/or Council Liaison and convey information about community impacts
- Consider the need to replace Mayor or Councilmembers unable to perform their responsibilities due to absence, injury, or death

2016 City of Berkeley Emergency Operations Plan

- If needed, conduct an emergency City Council Session to ratify Proclamation of Local Emergency within 7 days of issuance by DES
- Review proclamation at regularly-scheduled Council meetings (no review to exceed 21 days from last review)
- Terminate proclamation as soon as emergency conditions are over
- Work with the Council Liaison to assist in the distribution of information to the community, and to provide interviews with the press as needed.

City Council is a policy authority, and members may serve over consecutive shift changes and operational periods.

City Council chambers are located at 2134 Martin Luther King Jr. Way. In the event that this location is unusable, the alternate site for City Council meetings will be Longfellow Middle School at 1500 Derby Street. In the event that City Council chambers and Longfellow Middle School are unusable or unavailable, an alternate site will be determined based on the nature of the event and the needs of the City.

2.2.4 Emergency Operations Center (EOC)

In accordance with SEMS, the Emergency Operations Center supports the MAC function at the Local Government Level, ensuring that all response systems are interconnected and complementary rather than duplicative. The EOC is a coordination and support structure that is separate from departments or on-scene Incident Command Post(s). The EOC exchanges information with the Field Level, Departments/DOCs (see Section 2.2.5 *Departments/Department Operations Centers*), and other governmental and non-governmental agencies.

The EOC supports all levels of the MAC System, facilitating actions necessary to protect the Berkeley community, property and environment during a citywide emergency/event. The primary responsibilities of the EOC are:

- Collect, analyze, and disseminate information
- Maintain a citywide common operating picture of City response activities
- Prepare citywide situation reports
- Coordinate/communicate the City Manager/DES's citywide priorities and directives to other levels of the MAC System
- Communicate policy questions to the City Manager/DES and Policy Group from the EOC and other levels of the MAC System
- Implement emergency/event management-by-objective
 - Reconcile competing objectives
 - Coordinate resource allocation priorities
- Organize and activate Berkeley's Emergency Support Functions (see Section 2.3.1: *Emergency Support Functions*).

The EOC is staffed with specially-trained personnel and equipped with systems and tools that aid in data collection and sharing, resource allocation, and other critical functions.

EOC Structure

The EOC is organized per the SEMS Guidelines for Local Government,⁵ providing EOC staff with a standardized operational structure and common terminology based on five major functional areas: Management, Plans/Intelligence, Operations Support, Logistics, and Finance/Administration. The

⁵ SEMS Guidelines, November 2009, Part I.C: System Description – Local Government Level, p. 10

figure below depicts the standard SEMS organizational structure for Local Government. Further details of the SEMS positions are described in Section 3: *EOC Sections*.

Figure 2-2: Standard SEMS Local Government Organization Structure

Berkeley's EOC and policy staff organization chart is displayed on the following page. The graphic identifies the policy staff positions in the MAC System, as well as the main branches and units of the EOC. (Note: The EOC Operations Support and Logistics Sections have additional units that are outlined in detail in Section 3: *EOC Sections*.)

Figure 2-3: Berkeley MAC System EOC and Policy Level Organization Chart

2016 City of Berkeley Emergency Operations Plan

EOC Management Section and EOC Section Coordinators

Per the organizational chart on the prior page, the EOC Management Section and Section Coordinator positions are:

- Management Section
 - EOC Director
 - EOC Coordinator
 - Liaison Officer
 - Legal Officer
 - Security Officer
 - Safety Officer
 - Public Information Officer (PIO)
- EOC Section Coordinators
 - Operations Support Section Coordinator
 - Plans/Intelligence Section Coordinator
 - Logistics Section Coordinator
 - Finance/Administration Section Coordinator

Together, these EOC positions establish overall EOC objectives and guide EOC activities in support of the City Manager/DES's priorities and the Field Level response.

Management Section and Section Coordinator positions are illustrated in the figure below.

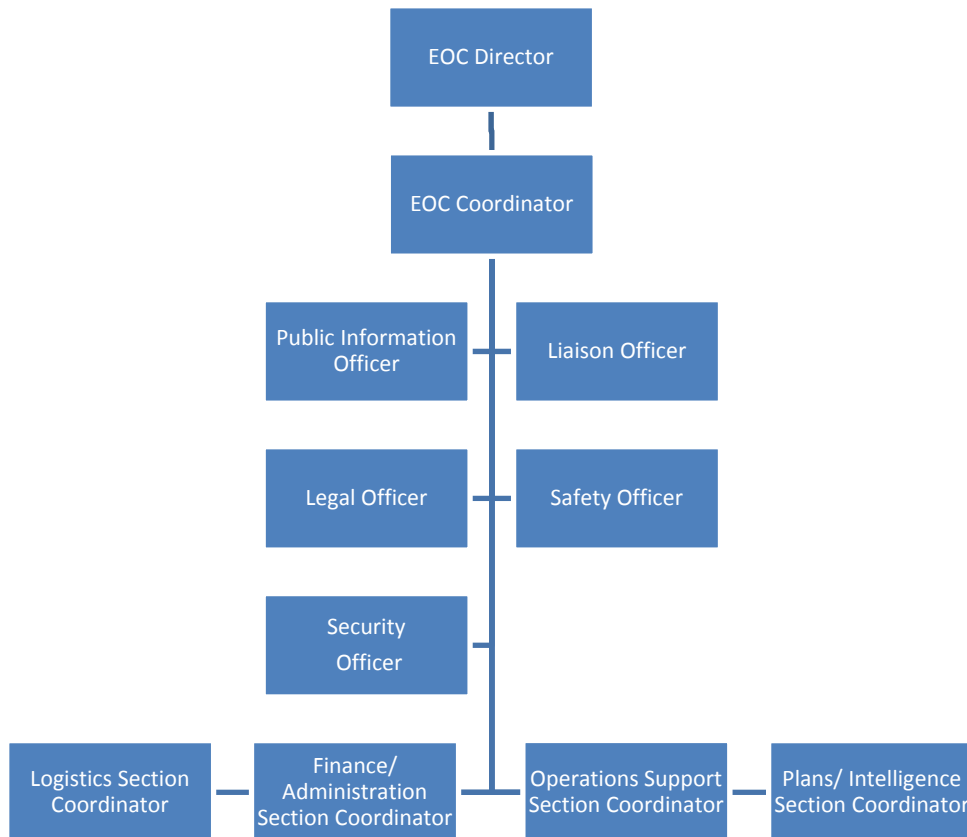

Figure 2-4: EOC Management Section and Section Coordinator Structure

2016 City of Berkeley Emergency Operations Plan

EOC Management Section

The EOC Management Section will support overall activities put forth by the EOC Section Coordinators. Management Section positions are functional positions and not policy authorities, and therefore will be staffed in accordance with EOC staffing patterns and operational periods.

Management Section positions and responsibilities are outlined in the table below.

EOC Management Section Positions and Responsibilities

<p>EOC Director</p>	<p>Responsible for overall <i>management of the EOC</i>, coordinating with the ALCO OA EOC, and other outside assisting organizations. As a standalone position, the EOC Director does not have a command role in any emergency/event. Assigns support positions as needed for management of EOC facility, information technology (IT), and other related services.</p> <p>Note: For continuity of EOC management, EOC Coordinator assumes EOC Director duties when EOC Director is in meetings or offsite.</p>
<p>EOC Coordinator</p>	<p>Facilitates EOC workflow. Ensures appropriate information exchange among EOC members and from the EOC to other levels of the MAC System.</p> <p>Note: Responsible for overall management of the EOC when the EOC Director is offsite.</p>
<p>Public Information Officer (JIC Coordinator)</p>	<p>Serves as the point of contact for the Joint Information Center, which coordinates and disseminates emergency/event information to the public, the media, and other relevant stakeholders.</p>
<p>Legal Officer</p>	<p>Advises EOC staff on legal matters and directs inquiries to the City Attorney’s Office as appropriate. (Legal Officer may concurrently serve as City Attorney in support of City Manager/Policy Group.)</p>
<p>Liaison Officer</p>	<p>Coordinates with all outside agency representatives that have been assigned to the EOC, but are not integrated into the Operations Support Section.</p>
<p>Safety Officer</p>	<p>Monitors all aspects of emergency operations to ensure the safety of all City personnel involved with response activities.</p>
<p>Security Officer</p>	<p>Controls personnel access to and from the EOC and other facilities, as determined and in accordance with policies established by the EOC Director.</p>

EOC Section Coordinators

In addition to the Management Section, the EOC has four functional sections with coordinators for the EOC’s Operations Support, Plans/Intelligence, Logistics, and

2016 City of Berkeley Emergency Operations Plan

Finance/Administration Sections. These Sections are described further in Section 3: *EOC Sections*.

2.2.5 Departments/Department Operations Centers (DOCs)

In an emergency, the primary responsibilities of a City department are:

- 1) Maintain internal department operations (continuity of operations)
- 2) Maintain and share operational status of department resources (staff, equipment, supplies and facilities) at all times. This includes the status of staff members, facilities, equipment and supplies. Departments perform this tracking as part of day-to-day operations, and in emergency/event response, they are additionally responsible for making that information available to the MAC System.
- 3) When necessary, contribute to citywide response through communication and coordination with the EOC.

In order to accomplish these activities in an emergency/event, a Department Director or designee may choose to establish a Department Operations Center (DOC) to coordinate department operations. A department is not required to establish a DOC; however, each department must perform its three primary responsibilities resources at all times.

Per SEMS, a DOC should provide for the five primary SEMS functions of Management, Operations, Plans/Intelligence, Logistics, and Finance/Administration. Depending on situation needs and department capabilities, the five functions may be performed by a single person, a few people, or a highly-structured DOC organization with sections, branches and units.

2016 City of Berkeley Emergency Operations Plan

EOC-Department/DOC Connections

All City departments may utilize the DOC structure to coordinate department operations. DOCs can be activated with or without an associated EOC activation.

If the EOC is activated, all departments must coordinate with the EOC. If the department is leading implementation of an Emergency Support Function (see Section 2.3.1: *Emergency Support Functions*), the department must staff associated department representative(s) in the EOC per the table below. These EOC representatives will connect the department to citywide operations.

Department/DOC	EOC Representatives
Fire	<ul style="list-style-type: none"> • Operations Support Section – Fire and Rescue Branch
Police	<ul style="list-style-type: none"> • Operations Support Section – Law Enforcement Branch
Planning and Development	<ul style="list-style-type: none"> • Operations Support Section – Construction and Engineering Branch
Public Works	<ul style="list-style-type: none"> • Operations Support Section – Construction and Engineering Branch • Logistics Section – Radio Unit
Health, Housing and Community Services	<ul style="list-style-type: none"> • Operations Support Section – Health and Medical Branch • Operations Support Section – Mass Care Branch
Parks, Recreation and Waterfront	<ul style="list-style-type: none"> • Operations Support Section – Construction and Engineering Branch • Operations Support Section – Mass Care Branch
Information Technology	<ul style="list-style-type: none"> • Logistics Section – Information Systems Unit
Finance	<ul style="list-style-type: none"> • Logistics Section – Supply/Procurement Unit • Finance/Administration Section
Human Resources	<ul style="list-style-type: none"> • Logistics Section – Personnel Unit
City Attorney’s Office	<ul style="list-style-type: none"> • Management Section – Legal Officer

2016 City of Berkeley Emergency Operations Plan

2.3 Emergency Management Coordination

This section outlines the Emergency Support Functions that organize Berkeley's EOC operations, as well as the levels of coordination and communication in Berkeley's MAC System. This section outlines the decision-making, resource management, and public information activities that occur at each level and among the levels.

2.3.1 Emergency Support Functions

As utilized by the City of Berkeley, an Emergency Support Function (ESF) represents a function-specific grouping of activities needed during emergency/event response. Berkeley adopted the federal ESF concept and tailored it to create Berkeley-specific ESFs, which will be used to coordinate and organize Berkeley's Local Government Level operations.

Berkeley's ESFs are organized as follows:

1. Transportation
2. Communications
3. Public Works and Engineering
4. Fire and Rescue
5. Emergency Management
6. Mass Care and Recovery Support
7. Logistics
8. Public Health and Medical Services
9. Urban Search and Rescue
10. Oil and Hazardous Materials Response
11. Animal Response
12. Utilities
13. Law Enforcement
14. Long-Term Recovery
15. Public Information
16. Evacuation
17. Community Support

Appropriate Departments or EOC branches will be charged with the "coordinating" responsibility for each ESF. If activities under the ESF are primarily the responsibility of one department (e.g., ESF 13: Law Enforcement) then that department will coordinate the ESF (in this case, the Police Department). If activities under the ESF rest among multiple departments (e.g., ESF 16: Evacuation or ESF 6: Mass Care and Recovery Support), they will be coordinated in the EOC by the section or branch staffed with representatives of those departments. Other EOC branches and departments may support the coordinating department or EOC section/branch. A single department or EOC section/branch may be involved in more than one ESF.

ESF roles and responsibilities are further detailed in the ESF Annexes to this EOP, which are outlined in Attachment 2. Section 3: *EOC Sections* outlines ESF coordinating/supporting assignments for particular EOC sections/branches.

2.3.2 Levels of Coordination and Communication

This section describes coordination and communication between the various levels of the MAC System, from the Field Level through the Local Government Level to the OA Level EOC.

The figure below illustrates the possible communication pathways among all levels of the MAC

2016 City of Berkeley Emergency Operations Plan

System.

Figure 2-5: Coordination Linkages throughout the MAC System

In the graphic above and those that follow in this plan:

- **SEMS Field Level organizations** (Area Commands, Incident Commands and Unified Commands) are represented in blue. This level commands emergency response personnel and resources in the field.
- **SEMS Local Government Level organizations** (Departments/DOCs, the EOC, the City Manager/DES and Policy Group, and City Council) are represented in black. This level manages and coordinates Berkeley’s overall emergency response and recovery activities.
- **SEMS Operational Area Level organizations** (ALCO OA EOC) are represented in green. The ALCO OA EOC manages and coordinates information, resources, and priorities among local governments within Alameda County.

The graphic above illustrates how the EOC acts as a hub between all layers of Berkeley’s MAC System. The EOC can connect directly with Incident Commands and/or Unified Commands, and/or additional layers may be activated as follows:

- Departments/DOCs provide an additional layer of coordination at the Local Government Level
- Area Command(s) provide an additional layer of command at the Field Level

2016 City of Berkeley Emergency Operations Plan

SEMS Field Level

Incident Command/Unified Command

- Coordinates with Area Command (if activated)
 - If Area Command not activated, coordinates with DOC(s) affiliated with IC/UC members
 - If authorized by department/DOC, coordinates with EOC Operations Support Section Branch(es) affiliated with IC/UC discipline(s)

Area Command (if activated)

- Coordinates with assigned ICs
- Coordinates with Department/DOC affiliated with Area Command discipline
 - If authorized by department/DOC, coordinates with EOC Operations Support Section Branch affiliated with AC discipline

SEMS Local Government Level

Department/DOC (if activated)

- Coordinates with department representatives at Area Command(s), if activated
 - If Area Command not activated, communicates with department representatives at ICPs/UCPs
- Coordinates with EOC
- Coordinates with City Manager/DES (for simplicity, this relationship is not visually represented)

**Figure 2-6:
Department/DOC
Communications to
Multiple ACs/ICPs/UCPs**

**Figure 2-7:
UCP Communications to
Multiple
Departments/DOCs**

2016 City of Berkeley Emergency Operations Plan

EOC

- Coordinates with each discipline's Department/DOC, if activated
 - If a discipline's DOC is not activated, coordinates with Department representatives at Area Command(s)
 - If a discipline's Area Command(s) is/are not activated, coordinates with ICPs/UCPs
- Coordinates with the City Manager/DES and Policy Group
- Coordinates with the ALCO OA EOC

City Manager/DES

- Coordinates with EOC
- Coordinates with City Council (via Council Liaison, see Section 2.2.2: *Policy Group* for details)
- Coordinates with City Departments (for simplicity, this relationship is not visually represented)

Sections 2.3.3 – 2.3.5 describe the key information being shared by these groups and the processes for action planning, resource management and public information.

2.3.3 Information Management

The MAC System is designed to facilitate information-sharing among all of its levels. Information-sharing facilitates effective decision-making at both the Local Government and Field Levels.

The EOC and Departments/DOCs are activated to provide decision-makers with awareness of the entire situation. The EOC also provides information to the City Manager/DES and Policy Group to enable the City Manager/DES to make informed policy decisions. This situational awareness is vital to the effective coordination of support for responders in the Field Level. The EOC also facilitates the development and distribution of accurate and consistent public information.

The EOC and Departments/DOCs provide information, including the City Manager/DES's citywide priorities and policy directives, to the Field Level. Information-sharing facilitates tactical decision-making by incident commanders.

2016 City of Berkeley Emergency Operations Plan

The table below outlines the information management roles throughout the MAC System:

Management Structure	Information Management Role
City Manager/ DES and Policy Group	<ul style="list-style-type: none"> • Receives intelligence from EOC (through citywide situation reports and as-needed)
EOC	<ul style="list-style-type: none"> • Receives information and intelligence from: <ul style="list-style-type: none"> ○ Departments/DOCs ○ Field ○ External sources • Verifies information to establish intelligence • Synthesizes intelligence into citywide situation reports • Disseminates citywide situation reports to: <ul style="list-style-type: none"> ○ City Manager/DES and Policy Group ○ Departments/DOCs ○ Field Level ○ External partners
Department/ DOC	<ul style="list-style-type: none"> • Receives information and intelligence from: <ul style="list-style-type: none"> ○ EOC (through citywide situation reports and as-needed) ○ Field (through department staff in the Field) • Maintains information on department operations • Consolidates information on incident operations • Disseminates department situation reports to EOC and field
Field	<ul style="list-style-type: none"> • Receives information and intelligence from: <ul style="list-style-type: none"> ○ EOC (through citywide situation reports and as-needed) ○ Department/DOC (through department situation reports) • Maintains information on incident operations • Disseminates incident status reports to Department/DOC

The figure below illustrates information-sharing pathways throughout the MAC System.

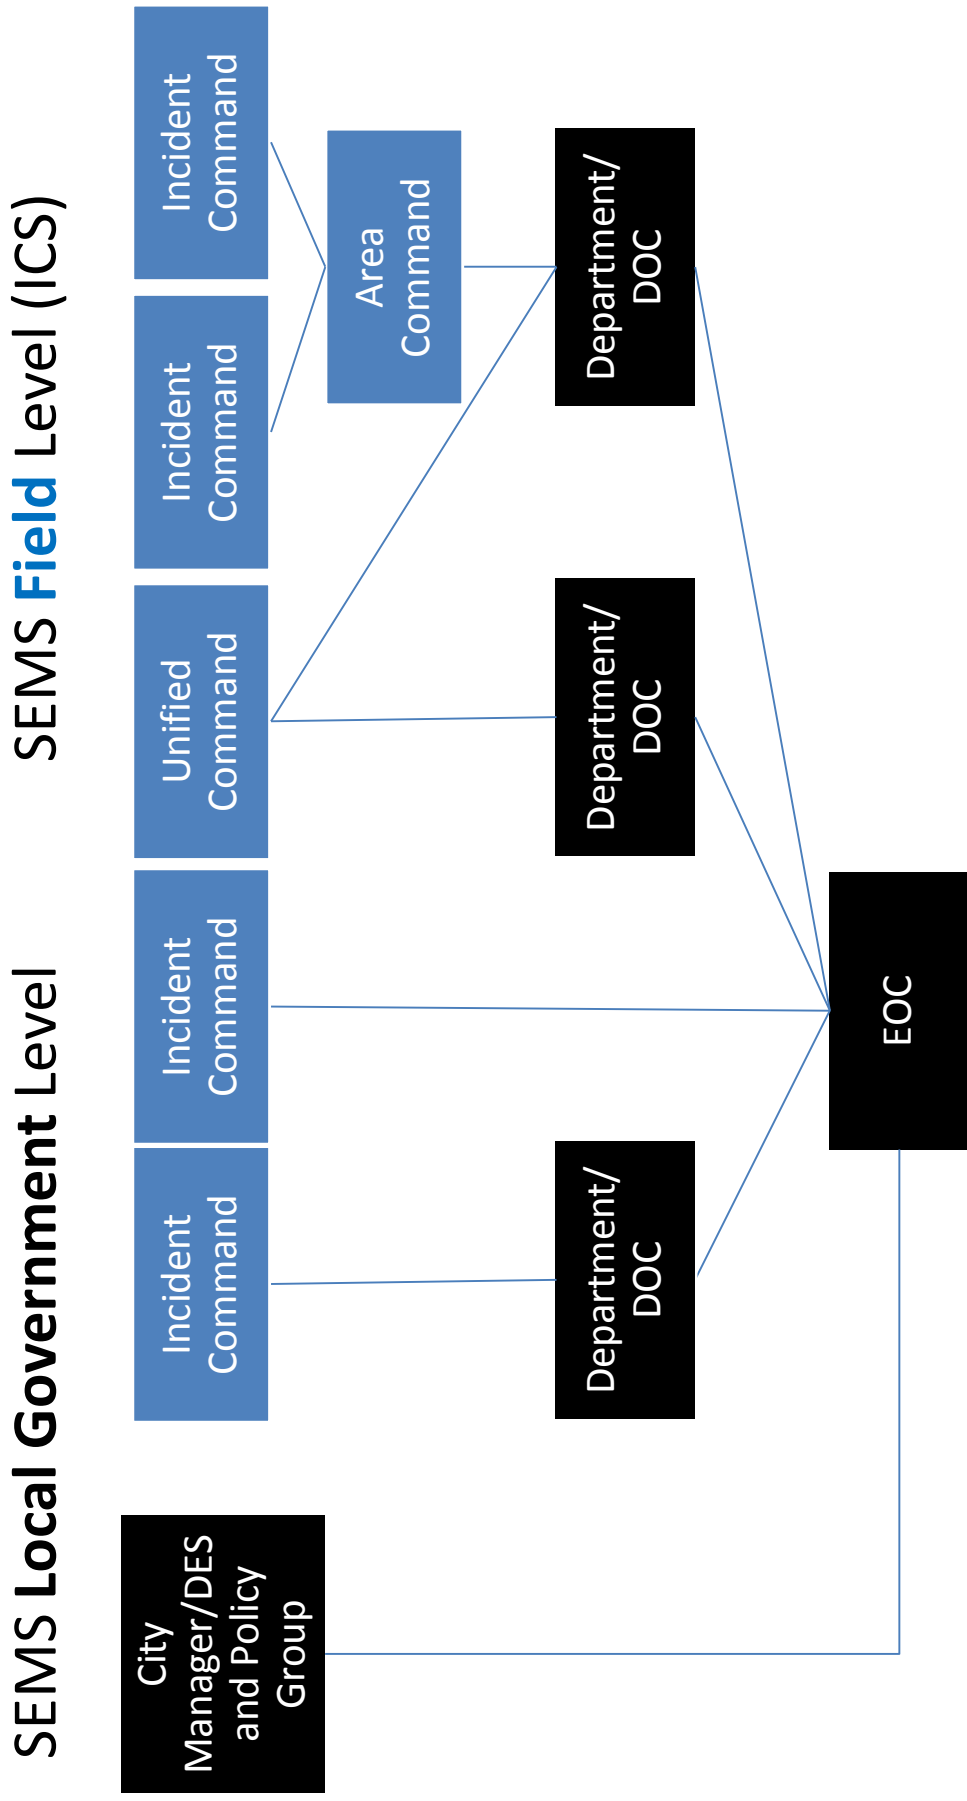

Figure 2-8: Information-Sharing Pathways throughout the MAC System

2016 City of Berkeley Emergency Operations Plan

2.3.4 Action Planning⁶

Action planning is an essential SEMS-based emergency management process. Action plans are created by each IC/UC/AC, Department/DOC and the EOC. Action plans created at each level are coordinated with one another.

Field Level: Incident Action Plan (IAP)

At the Field Level, an IAP contains objectives reflecting the overall incident strategy and specific tactical actions and supporting information for the next operational period. The plan may be oral or written.

Local Government Level: EOC/Department/DOC Action Plan

The Action Plan created in the EOC or Department/DOC contains the EOC/Department/DOC's objectives to coordinate and support emergency/event response for a designated period. Action Plan objectives reflect the Policy Group's citywide priorities. The Plans/Intelligence Section is responsible for developing the Action Plan in coordination with the other EOC sections. The Action Plan is approved by the EOC/Department/DOC Director and shared with supporting agencies.

The City Manager/DES and Policy Group do not create an Action Plan. Instead, the City Manager/DES makes policy decisions and establishes directives and citywide priorities that guide action planning at all levels of the MAC System. The EOC is responsible for sharing these citywide priorities, decisions, and directives with the other elements of the MAC System through the EOC Action Plan.

The figure that follows illustrates the scope of the Action Plan objectives developed by each organization in the MAC System.

⁶ CCR Title 19, Division 2, Chapter 1, Section 2402: Definitions

SEMS Local Government Level SEMS Field Level (ICS)

Figure 2-9: Action Planning Roles throughout the MAC System

2016 City of Berkeley Emergency Operations Plan

The table below outlines the action planning roles throughout the MAC System:

Management Structure	Action Planning Role
City Manager/DES	<ul style="list-style-type: none"> • Establishes citywide priorities and policy directives • Provides direction on policy questions • Vets EOC/Department/DOC Action Plan objectives to ensure they support citywide priorities and policy directives • Approves EOC Action Plan
EOC Coordinator	<ul style="list-style-type: none"> • Per citywide priorities and policy directives, and in coordination with Management Section and section coordinators, establishes <u>overall EOC objectives</u>, which describe how the EOC will support: <ul style="list-style-type: none"> ○ Incident operations (by allocating and requesting resources) • Departments' continuity of operationsSends policy questions to the City Manager/DES and Policy Group
EOC Sections	<ul style="list-style-type: none"> • Per citywide priorities and policy directives, and per overall EOC objectives, establishes objectives for each EOC section • Communicates citywide priorities and policy directives to Department/DOCs and incidents
Department/DOC	<ul style="list-style-type: none"> • Per citywide priorities and policy directives, establishes <u>Department/DOC objectives</u>, which describe how the department/DOC will support: <ul style="list-style-type: none"> ○ Incident operations (by allocating department resources) ○ Department continuity of operations • Communicates citywide priorities and policy directives to incidents • Sends policy questions to the EOC Operations Support Section for vetting by the City Manager/DES and Policy Group
Field	<ul style="list-style-type: none"> • Per citywide priorities and policy directives, establishes <u>incident objectives</u>, which describe how responders will use allocated resources to meet incident needs • Sends policy questions to the Department/DOC (if activated)/EOC Operations Support Section for vetting by the Policy Group

2016 City of Berkeley Emergency Operations Plan

2.3.5 Resource Management

SEMS defines resources as “personnel and major items of equipment, supplies, and facilities available or potentially available for assignment to incident operations and for which status is maintained.”⁷ For the purposes of this document, other resources may include funding sources, pre-designated agreements, policies, and protocols. All levels of the MAC System work together to locate, assign, move, use and track resources to address emergency/event needs.

Resource Management Assumptions

The following assumptions are in place:

- All City departments are responsible for maintaining information on the status of department resources at all times. If necessary, a department should activate a DOC to facilitate department operations and resource management. (See Section 2.2.5: *Departments/Department Operations Centers (DOCs)* for details.)
- If the EOC has not been activated, departments/DOCs may request resources from another department/DOC or citywide contract.
- When the EOC is activated:
 - All City departments participating in emergency/event response should be represented in the EOC.
 - The resources of a department remain the assets of the department as well as a shared asset of the EOC branch/section under which the department is serving in the emergency/event response. For example, a Public Works Department bulldozer remains the responsibility of the Department but is a shared resource of the EOC Operations Support Section’s Construction and Engineering Branch, where Public Works is represented.
 - The MAC System will shift into Single-Point Ordering structure (see *Single-Point Ordering* below). All Field Level resource requests will be routed through the EOC Operations Support Section for confirmation before they are filled.

Single-Point Ordering

When the EOC is activated, the MAC System will use a single-point resource ordering structure. Single-point ordering is a SEMS concept that establishes one centralized point to receive and manage all resource requests for an emergency/event. For Berkeley’s MAC System, that single point will be the EOC Operations Support Section. This means that before assigning department resources to an incident, departments/DOCs must confirm deployment of the resource with their representative in the EOC Operations Support Section.

Single-point ordering enables centralized coordination, tracking, and allocation of resources. By centralizing resource requests in the EOC, the EOC Operations Support Section ensures that department resources are being allocated to the highest-priority incidents, per the citywide priorities established by the City Manager/DES.

Single-point ordering will not change communication between departments/DOCs and their AC/ICP/UCPs. Additionally, even if an AC/ICP/UCP is communicating directly with the EOC Operations Support Section, the Section will first attempt to fill resource requests through the appropriate department(s)/DOC(s), and if unsuccessful, will forward the request to the EOC Logistics Section.

Mutual Aid

⁷ California Statewide Multi-Agency Coordination System Guide, February 2013, p. 50

2016 City of Berkeley Emergency Operations Plan

Mutual Aid agreements are department-specific resources. If the EOC is not activated, departments/DOCs will initiate mutual aid requests through their own discipline-specific mutual aid agreements.

When the EOC is activated, departments/DOCs will continue to initiate mutual aid requests through their own discipline-specific mutual aid agreements, with two additional steps for coordination and tracking:

- 1) Prior to making a mutual aid request, a departments/DOC will confirm the request with its representative in the EOC Operations Support Section
- 2) In the event that the department/DOC needs additional resources in support of invoking mutual aid, the department/DOC can submit resource requests to its representative in the EOC Operations Support Section.

Resource Management Roles and Responsibilities

The table below summarizes the respective resource management roles of the City Manager/DES, EOC, department/DOC, Area Command and Incident Command/Unified Command.

All resource management activities are performed in accordance with the citywide priorities and policy directives established by the City Manager/DES, as well as with the objectives established for each SEMS organizational level/function.

Management Structure	Resource Management Role
City Manager/DES	<ul style="list-style-type: none"> • Establishes citywide priorities to guide resource management throughout the MAC System • As needed, provides policy directives to address resource-related policy questions
EOC	<ul style="list-style-type: none"> • Anticipates resource needs • Receives resource requests <ul style="list-style-type: none"> ○ From departments/DOCs ○ From the Field Level • Processes resource requests <ul style="list-style-type: none"> ○ Prioritizes requests based on citywide priorities ○ Requests additional resources from departments/DOCs ○ Requests additional resources from external sources • In coordination with departments/DOCs: <ul style="list-style-type: none"> ○ Tracks department resources assigned to incidents and available for assignment ○ Projects resource shortfalls • Sends resource-related policy questions to the City Manager/DES and Policy Group
Department/DOC	<ul style="list-style-type: none"> • Identifies department resources available for Field Level assignment • Receives resource requests <ul style="list-style-type: none"> ○ From the EOC Operations Support Section ○ From the Field Level • Processes resource requests <ul style="list-style-type: none"> ○ Confirms resource deployment with EOC Operations Support Section before filling Field Level resource requests

2016 City of Berkeley Emergency Operations Plan

	<ul style="list-style-type: none"> ○ Allocates available resources to Field Level (Area Commands/Incident Commands), per Field Level and/or EOC requests ○ Requests additional resources through discipline-specific mutual aid channels ○ Forwards unfillable Field Level resource requests to EOC Operations Support Section ● In coordination with EOC and Field Level: <ul style="list-style-type: none"> ○ Tracks department resources assigned to incidents and available for assignment ○ Anticipates resource needs ○ Projects department resource shortfalls ● Sends resource-related policy questions to the EOC for vetting by the City Manager/DES and Policy Group
<p>Field: Area Command <i>(if established)</i></p>	<ul style="list-style-type: none"> ● Allocates resources assigned to the Area to particular incidents ● Requests additional resources from Department/DOC/EOC Operations Support Section, as appropriate ● Sends resource-related policy questions to the Department/DOC/EOC for vetting by the City Manager/DES and Policy Group
<p>Field: Incident Command/ Unified Command</p>	<ul style="list-style-type: none"> ● Commands resources assigned to the incident ● Requests additional resources from Area Command or department/DOC or EOC Operations Support Section, as appropriate ● Sends resource-related policy questions to Area Command or department/DOC or EOC Operations Support Section for vetting by the City Manager/DES and Policy Group

The graphic that follows illustrates resource management responsibilities throughout the MAC System when the EOC is activated.

SEMS Local Government Level SEMS Field Level (ICS)

Figure 2-10: Resource Management throughout the MAC System

2016 City of Berkeley Emergency Operations Plan

Resource Requesting Process

Field Level commanders submit resource requests to the appropriate Department/DOC or to the EOC Operations Support Section, if authorized by the Department/DOC.

When a Department/DOC receives the request, it will determine if the request can be filled with department resources.

- If the Department/DOC can fill the request, the Department/DOC will confirm resource deployment with the EOC Operations Support Section before filling the request.
- If the Department/DOC cannot fill the request, the Department/DOC will forward the request to the EOC Operations Support Section.

Discipline-specific mutual aid (e.g., fire service and rescue, law enforcement, and medical health) will be handled by the appropriate department/DOC, in coordination with the appropriate representative in the EOC Operations Support Section as outlined in Section 4: *Mutual Aid*.

When the EOC Operations Support Section receives the request (from a Department/DOC or directly from the Field Level), the Section will verify that the resource is not available from within City inventories, by checking with:

- 1) Department representatives in the Operations Support Section, which will check with their Department/DOCs if necessary
- 2) Plans/Intelligence Section Resource Status Unit (which will maintain information for other City departments not represented in the Operations Support Section)

When no internal source exists to fulfill the resource request, or when a shortage is anticipated, the Operations Support Section will forward the request to the EOC Logistics Section.

The EOC Logistics Section will attempt to fulfill the request through the following methods:

- Locating inventories from known sources, including nongovernmental organizations
- Acquisition through renting, leasing or purchasing from established vendors
- Acquisition from alternate vendors

When the Logistics Section cannot fill a resource request, the Logistics Section will route the resource request to the Logistics Section at the ALCO OA EOC.

Resource Mission Tasking

A Resource Mission Tasking is a necessary action identified by the EOC Operations Support Section to fulfill an operational objective, which involves the dispatching of personnel outfitted with the appropriate supplies and equipment to complete a task or assignment. This differs from a resource request, which is used to order resources such as supplies, equipment, facilities, and personnel in support of and supervised by those responsible for operational objectives and assigned tasks. The EOC Operations Support Section must only submit specific resource requests to the EOC Logistics Section. The Logistics Section does not fill Mission Tasks.

The graphic below outlines the flow of a single resource request through Berkeley's MAC System.

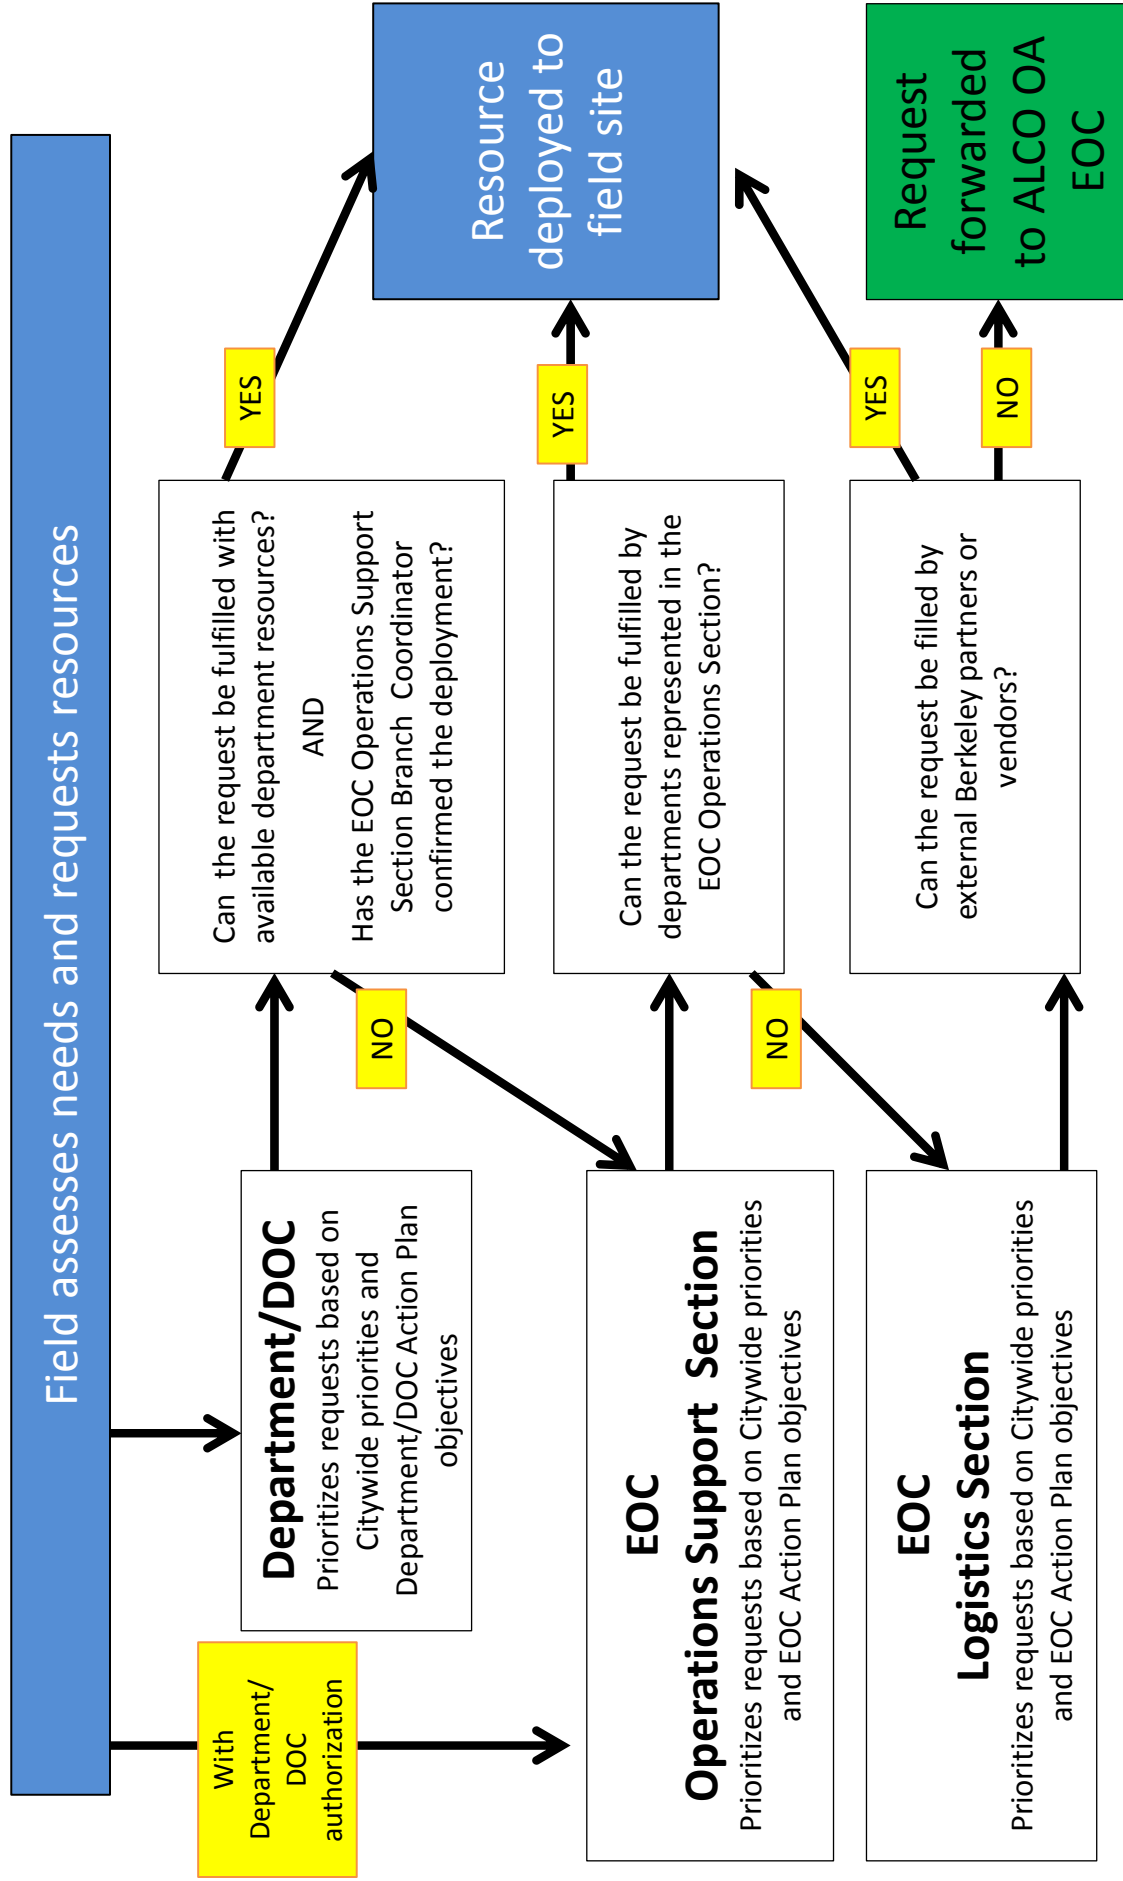

Figure 2-11: Resource Request Flow through the MAC System

2016 City of Berkeley Emergency Operations Plan

Resource Tracking Roles and Responsibilities

Real-time tracking of incidents and resources is critical during the response phase. Resources may be in short supply, and multiple requests for limited resources can occur. EOC sections and departments/DOCs coordinate their resource management activities to provide a citywide assessment of resource allocation and shortfalls, as outlined in the table below.

Management Structure	Resource Tracking Role
EOC Operations Support Section	<ul style="list-style-type: none"> • Tracks resources assigned to the Field Level <ul style="list-style-type: none"> ○ City resources ○ External resources • Tracks information from departments/DOCs about available City resources • Tracks resource requests sent to the Logistics Section
EOC Plans/ Intelligence Section Resource Status Unit	<ul style="list-style-type: none"> • Gathers information about assigned/available/requested resources from: <ul style="list-style-type: none"> ○ Operations Support Section ○ Departments/DOCs not represented in EOC Operations Support Section ○ Logistics Section • Uses available information to project resource shortfalls
EOC Logistics Section Resource Tracking Unit	<ul style="list-style-type: none"> • Tracks resource requests received from the Operations Support Section • Tracks external resources ordered and assigned to the Field Level • Tracks resource requests sent to the ALCO OA EOC
Department/DOC	<ul style="list-style-type: none"> • Tracks information regarding: <ul style="list-style-type: none"> ○ Department resources (equipment, materials and personnel): <ul style="list-style-type: none"> ▪ Assigned to incidents ▪ Available for assignment ▪ Unavailable ○ Discipline-specific mutual aid resource requests • Forwards information to: <ul style="list-style-type: none"> ○ EOC Operations Support Section Representatives (if activated), or ○ Plans/Intelligence Section Situation Status Unit

2016 City of Berkeley Emergency Operations Plan

2.3.6 Levels of Public Information Coordination and Dissemination

Significant, large-scale emergencies/events require accurate, coordinated and timely public information. This plan distinguishes between ESF 15: *Public Information* and *emergency public information and warning*:

- Public Information: providing accurate, coordinated, timely, and accessible information to affected audiences, including governments, media, the private sector, and the Berkeley community overall. Examples of public information messages include updates on citywide response and notifications of shelter openings.
- Emergency Public Information and Warning (EPIW): disseminating life-safety instructions to affected populations during emergencies. Examples of EPIW messages include evacuation and shelter-in-place orders.

Because of the extremely time-sensitive nature and life safety content of EPIW messages, delivery of EPIW messages will be handled by the EOC Operations Support Section as outlined in Section 3: *EOC Sections*. Public information messages will use the vetting and distribution process outlined below.

Berkeley will coordinate its public information efforts among all levels of the MAC System. The City may have individual Public Information Officers in the Field Level and at the EOC. The following describes the coordination and the public information dissemination roles throughout Berkeley's MAC System.

Figure 2-12: Public Information Structure in the MAC System

Field Level: On-Scene PIO

- Coordinates with on-scene responders
 - Advises incident commander on all public information matters related to the emergency/event
- Provides information to the JIC from the incident site
- Receives approved talking points from the JIC
- Public information role: Discuss Field Level activities

Local Government Level: Department/DOC

- Provides Department-specific information to the Operations Support Section representative, who provides it to the EOC PIO/JIC to be included in coordinated City of Berkeley public information dissemination (through press releases, leadership talking points, etc)
- No public information role

2016 City of Berkeley Emergency Operations Plan

Local Government Level: EOC

- The Operations Support Section receives site-specific information from the Field Level and sends citywide talking points to the Field Level.
- The Plans/Intelligence Section gathers and shares intelligence with the EOC and PIO/JIC to help develop public information messages and delivery strategy.
- A Joint Information Center (JIC) may be established to coordinate public information. A JIC is a central location where PIOs involved in an emergency/event may co-locate to gather, verify, coordinate, and disseminate emergency/event information.
 - Receives information from EOC Section Coordinators and Management Section
 - Coordinates dissemination of information internally to ensure that all involved City of Berkeley Departments and the EOC are kept informed of messages being released by the EOC PIO/JIC

2016 City of Berkeley Emergency Operations Plan

2.4 MAC System Coordination with Other Entities

This section outlines how Berkeley's MAC System integrates and coordinates with external partners. When appropriate, partner representatives are integrated directly into Berkeley's MAC System at the Local Government and/or Field Levels. Otherwise, the MAC System will coordinate with Partners at the Local Government Level through the Liaison Officer at the EOC. Particular considerations for each type of external partner are outlined below.

2.4.1 Alameda County – Operational Area Emergency Operations Center

The City EOC will communicate and coordinate directly with the ALCO OA EOC. ALCO OA coordination with cities in Alameda County is outlined in the Alameda County Emergency Operations Plan. The Alameda County EOP provides a framework for the County to coordinate response activities of its cities, special districts and unincorporated areas. Coordination between the City of Berkeley EOC and the ALCO OA EOC will occur through the appropriate SEMS channels (Management, Plans/Intelligence, Operations Support, Logistics and Finance/Administration).

2.4.2 State and Federal Organizations

In some instances, a federal or State agency will have a Field Level response role, due to its jurisdictional responsibility of the emergency/event. For example, the Federal Aviation Administration will have jurisdictional responsibility for an aircraft accident within Berkeley.

When a federal or State agency is involved in Field Level operations, the agency will also coordinate with the City EOC and any appropriate Department/DOCs. Federal or State agencies operating in the Field Level may be found in any ICS section, or as part of a Unified Command. The emergency/event type will determine their location and scope of involvement.

2.4.3 Special Districts

The emergency response roles of special districts and governmental institutions in Berkeley are generally focused on their normal services or functional area of responsibility. Examples of special districts include: East Bay Municipal Utility District, AC Transit and Bay Area Rapid Transit.

Special districts will establish their own response systems. They will coordinate directly with the City either by sending a representative to the EOC or appropriate Department/DOC, or by establishing communications with the EOC section/branch or Department/DOC coordinating the associated ESF (see Section 2.3.1: *Emergency Support Functions*). Special districts with a pre-established role during an emergency/event will coordinate with the pre-designated EOC section/branch or Department/DOC. Special districts without pre-established responsibilities during an emergency/event will coordinate first with the EOC Liaison Officer and then, if appropriate, with a designated EOC section/branch or Department/DOC.

Note: In emergencies/events with regional impacts, special districts may not have adequate staff to send representatives to the City EOC or Department/DOCs. In this case, special district representatives may only be available through their own operations centers or the ALCO OA EOC. In this case, the City would coordinate with special district representatives either through their own operations centers or through the representative at the ALCO OA EOC.

2.4.4 Non-City Governmental Institutions in Berkeley

Non-City governmental institutions in Berkeley include the University of California – Berkeley, the Berkeley Unified School District, and the Berkeley Lab. These institutions in Berkeley generally

2016 City of Berkeley Emergency Operations Plan

participate in Berkeley's MAC System in two ways:

- 1) Supporting Berkeley community members affiliated with their institutions (e.g., staff and/or students)
- 2) Providing resources to assist with the citywide response effort (e.g., transportation, facilities, personnel, etc.)

These institutions will establish their own response systems. They will coordinate directly with the City either by sending a representative to the EOC or appropriate Department/DOC, or by establishing communications with the EOC section/branch or Department/DOC coordinating the associated ESF (see Section 2.3.1: *Emergency Support Functions*). Institutions with a pre-established role during an emergency/event will coordinate with the pre-designated EOC section/branch or Department/DOC. Institutions without pre-established responsibilities during an emergency/event will coordinate first with the EOC Liaison Officer and then, if appropriate, with a designated EOC section/branch or Department/DOC.

For resource requesting, non-City governmental institutions are considered to be part of the Berkeley community and will be expected to coordinate their resource requests through City government channels. Institutions with a pre-established role during an emergency/event in Berkeley will send resource requests through the pre-designated Department/DOC or EOC branch. Institutions without pre-established responsibilities during an emergency/event in Berkeley will send resource requests through with the City EOC's Liaison officer until directed otherwise.

2.4.5 Volunteer Organizations

The City EOC coordinates with non-governmental volunteer organizations that have response roles within City. Some of the major volunteer organizations that may be involved in Berkeley's MAC System include the following:

- American Red Cross: By congressional mandate and in accordance with its corporate policy, the Red Cross has a longstanding disaster relief mission. The Red Cross will work with the City to provide mass care and recovery support services to all Berkeley community members. The Red Cross will coordinate with the City at Field Level mass care sites. If possible, the Red Cross will also provide staffing to the EOC Mass Care Branch. Otherwise, the Berkeley MAC System Local Government Level will coordinate with the Red Cross through the ALCO OA EOC.
- Community Emergency Response Team: The Community Emergency Response Team (CERT) program trains Berkeley community members to be self-sufficient in an earthquake by building teams of volunteers trained in basic emergency skills. CERT volunteers may conduct initial search and rescue and basic first aid. CERT volunteers are trained to communicate and participate in emergency response efforts. CERT Teams will communicate with the EOC through the Operations Support Section's Community Branch.
- Northern Alameda County Amateur Radio Emergency Services/Radio Amateur Civil Emergency Services (NALCO ARES): NALCO ARES members provide civil emergency communication services. NALCO ARES is represented in the EOC Logistics Section.

2.4.6 Private Sector Involvement

The emergency response roles of private sector organizations are generally focused on their normal services or functional area of responsibility.

Private sector organizations will establish their own response systems. They will coordinate directly with the City either by sending a representative to the EOC or appropriate Department/DOC, or by establishing communications with the EOC section/branch or Department/DOC coordinating the

2016 City of Berkeley Emergency Operations Plan

associated ESF (see Section 2.3.1: *Emergency Support Functions*). Private sector organizations with a pre-established role during an emergency/event will coordinate with the pre-designated EOC section/branch or Department/DOC. Private sector organizations without pre-established responsibilities during an emergency/event will coordinate first with the EOC Liaison Officer and then, if appropriate, with a designated EOC section/branch or Department/DOC.

Examples of private sector organizations include, but are not limited to: Pacific Gas & Electric, Bayer, and Wareham.

2016 City of Berkeley Emergency Operations Plan

2.5 EOC Standard Operating Procedures

This section describes standard procedures for EOC site selection, EOC activation and EOC staff mobilization. It also outlines communication systems that will be used by the EOC, and procedure for After Action Reporting.

2.5.1 EOC Location and Alternate Site

Per SEMS guidelines, the EOC facility should be capable of activation within one hour and should be able to maintain full operational status under all emergency conditions. EOC readiness is primarily the responsibility of the Fire Department – Office of Emergency Services.

The primary EOC is located at the City of Berkeley's Public Safety Building, at 2100 Martin Luther King, Jr. Way. If this EOC site is not operable, the EOC will be relocated to the alternate EOC site, at the Fire Department Division of Training, at 997 Cedar Street. Relocation to the alternate EOC site may be considered when any of (but not limited to) the following situations are encountered at the primary EOC site:

- Structural or non-structural damage making the building unsafe or uninhabitable
- Loss of power, water, phone service, or other utilities
- Toxic or hazardous material releases in the building or neighborhood presenting a safety hazard to occupants
- Presence of a significant security threat
- EOC operations during a disaster significantly exceed available space

The EOC Director, in consultation with Field Level personnel commanding an incident that may impact the EOC site, is responsible for determining if/when relocation of the EOC is necessary.

2.5.2 EOC Activation and Deactivation Procedures

EOC Activation Levels

EOC activation levels and procedures are scalable based on the changing needs of an emergency/event. An activation level is defined as *an organization's readiness to carry out its mission during an emergency*. The City EOC may be activated to Level 1 (Situation Monitoring), Level 2 (Partial Activation), or Level 3 (Full Activation) according to the needs of the emergency/event.

The table below identifies the three EOC activation levels and provides examples of potential events for each.

- Examples in this table are not guidelines or directives for EOC activation. The activation level for each event will be dependent upon the specific situation and needs.
- The *Minimum Staffing* column indicates the positions that should be staffed for each activation level. Depending on event needs, EOC staff may serve in-person at the EOC, on call away from the EOC, or in a combination of the two during a particular staffing rotation.

2016 City of Berkeley Emergency Operations Plan

Activation Levels

Emergency, Event or Situation (examples only)	Activation Level	Minimum Staffing
<ul style="list-style-type: none"> Severe Weather Advisory Small incidents involving 2 or more departments Tsunami Watch Flood Watch/Warning 	One: Situation Monitoring	<ul style="list-style-type: none"> EOC Director EOC Coordinator Plans/ Intelligence Section Coordinator
<ul style="list-style-type: none"> Significant power outage Severe storm Tsunami Warning Significant civil unrest Major scheduled event (such as World Cup, Papal visit, Olympics, etc.) 	Two: Partial Activation	<ul style="list-style-type: none"> EOC Director EOC Coordinator Public Information Officer All Section Coordinators Branches and Units as appropriate to situation Liaison Representatives as appropriate
<ul style="list-style-type: none"> Major city or regional emergency Major earthquake Wildland fire in the Hills areas 	Three: Full Activation	<ul style="list-style-type: none"> All EOC positions

Note: The Policy Group is an advisory body comprised of City and external officials. The City Manager/DES can convene the group with or without an EOC activation.

Activation Authorities

The City Manager or his/her designee may activate the EOC during any situation where the need for EOC coordination is evident. Additionally, any senior city official or department head may contact the City Manager to request EOC activation. Such requests should be related to the facilitation of interdepartmental coordination for the purposes of managing an emergency. If the EOC mission is unclear or if such a response need is not clearly evident, the City Manager may request Policy Group input prior to authorizing an EOC activation.

Additionally, if a department director recognizes a need for EOC activation during pre-event planning, (s)he may submit an activation request to the City Manager for consideration. Examples of planned events may include, but are not limited to: protests, demonstrations, parades, and political, sporting and/or holiday events.

In any circumstance when interdepartmental coordination is necessary and the City Manager is unavailable for consultation, activation authority may also extend to the City's:

- Fire Department Duty Chief or above
- Police Department Watch Commander or above
- Director of the Department of Public Works
- Director of the Department of Health, Housing and Community Services
- Director of the Department of Parks, Recreation and Waterfront
- Health Officer
- Building Official

2016 City of Berkeley Emergency Operations Plan

Notification and Mobilization

If the EOC is activated, the City’s Communications Center staff will use an automated notification system to mobilize EOC staff as necessary per the activation level. As backup, the City maintains contact lists for all EOC staff.

Individual departments are responsible for maintaining procedures to call staff back for DOC activations or Field Level response activities.

EOC Deactivation Overview

The EOC will be deactivated or the activation level will be lowered as required by the needs of the situation. Deactivation or change in activation level may also occur as a result of a transition of the EOC mission from response to recovery. The City Manager/DES may change EOC activation status based on the recommendation of the EOC Coordinator, who will consult with the Management Section and Section Coordinators.

Prior to EOC deactivation or a change in activation level, all demobilization responsibilities and remaining activities will be completed or transferred to the appropriate City departments.

2.5.3 Communications Systems

The EOC is equipped with a wide variety of communications systems in addition to the public dial network (phone and Internet access). The systems provide alternate modes of communications to City departments and support agencies and to a broad range of County, State and other agencies. In addition to radio-based communications, the EOC has several satellite phones for use if local circuits are busy or disrupted. Currently, the City maintains alternate systems for emergency communications.

2.5.4 After Action Reporting

Fire-OES is responsible for conducting the After Action Report process. The purpose of an After Action Report is to analyze response efforts, identify strengths to be maintained and built upon, identify potential areas for further improvement, and to support the development of corrective actions.

Section 3: EOC Sections

3.1 Introduction

In addition to the EOC Management Section discussed in Section 2.2.4, the EOC is organized into *Four Functional Sections*: Operations Support, Plans/Intelligence, Logistics, and Finance/Administration. Each section has a designated section coordinator, and if activated, branch coordinator(s) and unit coordinator(s).¹

Sections 3.2 – 3.5 detail for each of the *Four Functional Sections*:

- Section leadership, indicating the Section's leadership positions and the department(s) that can staff each position
- Section organization, including the branch(es) and unit(s) that can be activated in the section and the department(s), divisions and/or external partners that can staff each position
- The section's role in Berkeley's EOC, and the other organizational elements of the MAC System that coordinate with the section
- The section's responsibilities in information-sharing, resource management and coordinating/supporting Emergency Support Functions (ESFs)

The chart that follows illustrates the EOC sections and the branches and units that can be activated for each.

¹ Per 2009 SEMS Guidelines (Part I-C, System Description – Local Government Level p. 5), the position title "coordinator" refers to the supervisor of each of the organizational elements in the EOC. The term coordinator is used in lieu of "chief," "director," or other ICS terminology because the role of EOC elements is to coordinate.

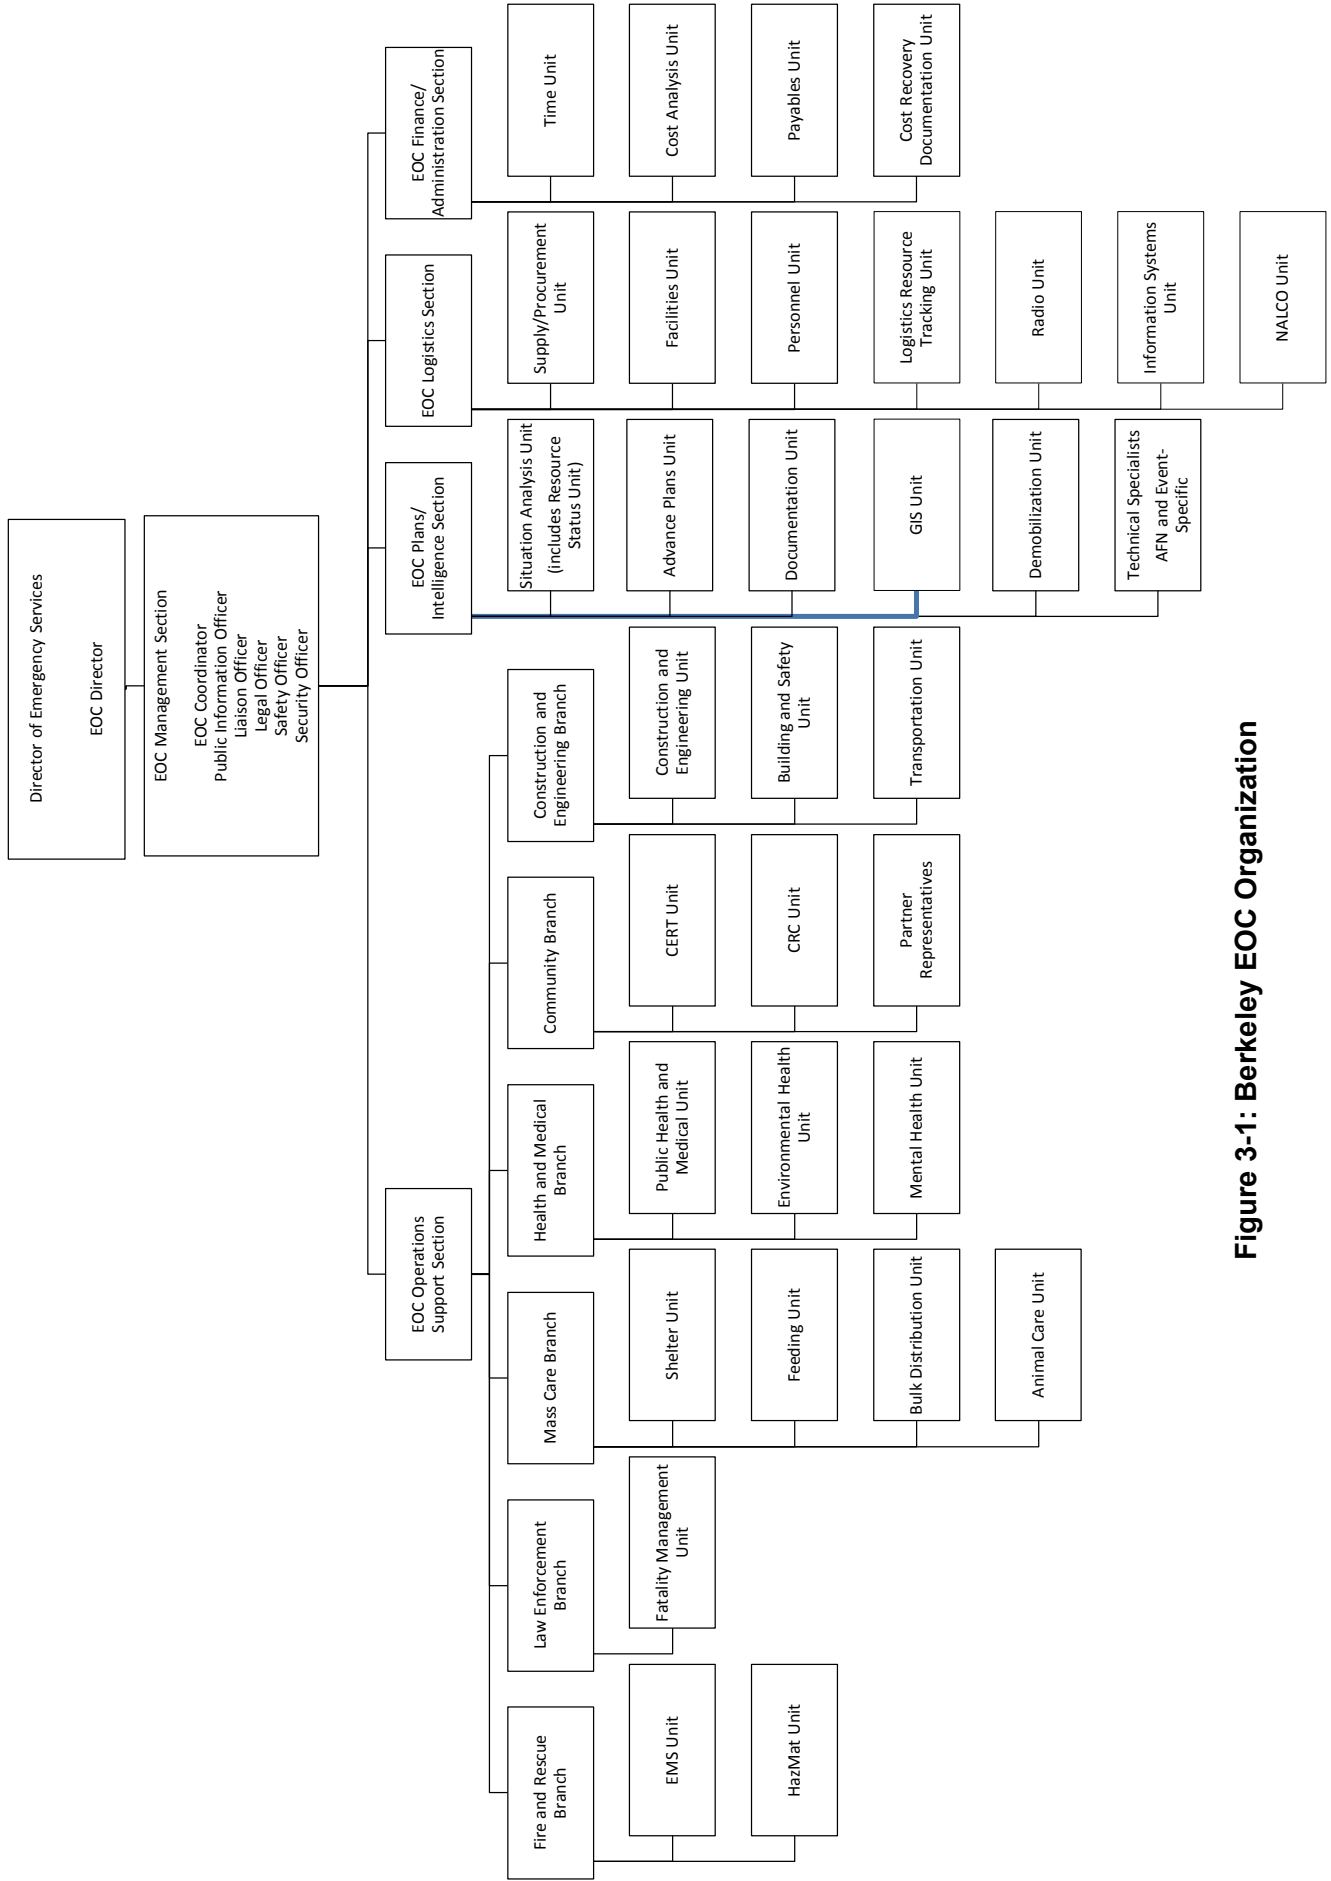

Figure 3-1: Berkeley EOC Organization

3.2 Operations Support Section

3.2.1 Operations Support Section Overview

The Operations Support Section is one of five sections of the City EOC. The Section coordinates support for all emergency/event response operations.

Leadership

The Operations Support Section is led by the Section Coordinator, who is responsible for carrying out the Emergency Management Function. The department fulfilling the Section Coordinator position will vary according to the primary department responding to the emergency/event.

Position	Staffing Department(s)/Division(s)
Operations Support Section Coordinator	Emergency/event-Specific: Police Fire Health, Housing and Community Services Public Works Parks, Recreation and Waterfront Planning-Building and Safety

Organization

The Operations Support Section will be organized into functional branches, depending on emergency/event needs. Each branch is listed below, along with the ESF(s) that the branch coordinates or supports. (See Section 2.4.1: *Emergency Support Functions* for an overview of all ESFs).

Figure 3-2: Operations Support Section Organization

Branches of the EOC Operations Support Section work together, with DOCs, and with the SEMS Field Level to carry out ESFs. The table below identifies the ESF(s) coordinated or supported by each Operations Support Section branch.

2016 City of Berkeley Emergency Operations Plan

3.2.2 Operations Support Section Coordinator

Role

The Operations Support Section Coordinator will connect to the following:

- Operations Support Section Branch Coordinators
- EOC Management Section staff, including EOC Director
- Other EOC Section Coordinators

Note: Operations Support Section staff will also coordinate directly with staff from other sections.

Responsibilities

The Operations Support Section Coordinator ensures that the section meets the objectives of the EOC Action Plan assigned to the section.

The Operations Support Section Coordinator:

- Monitors field operations
- Receives and passes on key field information and intelligence
 - Ensures that branches share information with Plans/Intelligence Section staff to facilitate development and maintenance of a common operating picture
- Coordinates branch support of Field Level activities
 - Ensures that branches share key information and intelligence with Department/DOC/field staff
 - Ensures that branches communicate Citywide Priorities and Policy Directives to Department/DOC/field staff
 - Ensures that DOC/Field Level resource requests are quickly addressed or passed on to the Logistics Section
 - Ensures that Operations Support Section branches coordinate with each other and their departments/DOCs to assign available City resources to resource requests per citywide priorities
 - As needed, passes branches' resource requests to the EOC Logistics Section
- Vets emergency public information and warning messages from Operations Support Section branches and forwards approved messages to Law Enforcement Branch/Emergency Communications Center for delivery
- Works with Management Section and branches to ensure that activities are coordinated with appropriate external partners, including private business, nonprofits and County, State and federal agencies
- Ensures that branch staff perform disaster cost recovery-related activities in a federally-compliant manner to facilitate potential reimbursement of response and recovery costs
- Ensures that required activities are completed in the absence of a Branch Coordinator.

2016 City of Berkeley Emergency Operations Plan

3.2.3 Operations Support Section: Emergency Support Functions**Operations Support Section: Branch Coordination/Support Responsibilities**

Emergency Support Function (ESF)	Operations Support Section Branches C = Coordinate S = Support					
	Fire and Rescue	Law Enforcement	Health and Medical	Mass Care	Construction and Engineering	Community
1. Transportation		S			C	
2. Communications

14. Long-Term Recovery	S	S	S	S	S	
15. Public Information	S	S	S	S	S	S
16. Evacuation	S	C		S	S	S
17. Community Support						C

Sections 3.2.4 – 3.2.9 further describe the role and responsibilities of each branch.

Attachment 4: *Department-EOC Emergency Support Function Chart* indicates the coordinating and supporting departments and sections of the EOC for each ESF.

2016 City of Berkeley Emergency Operations Plan

3.2.4 Fire and Rescue Branch

The Fire and Rescue Branch in the Operations Support Section will coordinate the following ESF:10. Oil and Hazardous Materials response

The Branch will also support the following ESFs:

- 4. Fire and Rescue
- 5. Emergency Management
- 7. Logistics
- 8. Public Health and Medical Services
- 9. Urban Search and Rescue
- 14. Long-Term Recovery
- 15. Public Information
- 16. Evacuation

Organization and Staffing

The positions that can be activated for this branch, as well as the departments staffing those positions, are as follows:

Position	Staffing Department(s)/Division(s)
Fire and Rescue Branch Coordinator	Fire
EMS Unit	Fire
HazMat Unit	Fire Public Works Health, Housing and Community Services-Environmental Health Planning-Toxics Parks, Recreation and Waterfront – for emergencies/events involving waterways

Role

The Fire and Rescue Branch will link the EOC to the following:

- Berkeley Fire Department DOC (if activated). If the Fire DOC is not activated, the EOC Fire and Rescue Branch connects directly with the Field Level: Area Command(s) (if activated) and/or directly to:
 - Incident Command Posts at incidents under the management of the fire service, and
 - Unified Command Posts with the fire service in the Unified Command.
 - OA Fire and Rescue mutual aid coordinator at the ALCO OA EOC, who in turn connects to mutual aid resources for:
 - Firefighting
 - Urban search and rescue (federal, State, and local teams)

2016 City of Berkeley Emergency Operations Plan

- Alameda County Medical Health Operational Area Coordinator (MHOAC), which connects to mutual aid ambulance resources

Figure 3-3: Fire and Rescue Branch Organization**Responsibilities**

The Fire and Rescue Branch will work to meet the objectives of the EOC Action Plan assigned to the Branch. The Fire and rescue Branch has the following responsibilities:

ESF 5: Emergency Management and ESF 7: Logistics

- Communicate with the Fire DOC (if activated), or directly with fire service Incident Commanders to:
 - Supply fire service Field Level commanders with information, situational awareness and citywide priorities developed in the EOC.
 - Obtain field situation reports and resource requests from the fire service Field Level commanders
- Prioritize and allocate available resources to incidents per Fire and Rescue Branch operational support priorities
 - Receive requests for resources from:
 - Fire DOC/Field Level commanders
 - Other EOC Branches
 - Work with Fire DOC to fill requests for Fire Department resources
 - Send fire and rescue resource requests from other departments or EOC units to the Fire DOC to be sent to the Alameda County OA Fire and Rescue Mutual Aid Coordinator
 - Coordinate logistical support for mutual aid assets ordered through Fire and Rescue Mutual Aid System with EOC Operations Support and Logistics Sections
 - Coordinate any requests for resource support that fall outside of the Fire and Rescue Mutual Aid System
- Support the Resource Status Unit of the EOC Plans/Intelligence Section by proactively sharing resource status information received from Field Level commanders and Fire DOC
- Support the Situation Analysis Unit of the EOC Plans/Intelligence Section by proactively sharing response information and situation assessments received from Field Level commanders and Fire DOC

The EOC Fire and Rescue Branch will also coordinate and support ESFs as follows:

ESF 4: Fire and Rescue

- Support Fire Department as it coordinates fire response operations in Berkeley

ESF 9: Urban Search and Rescue

- Support Fire Department as it coordinates urban search and rescue operations in Berkeley
- Coordinate with the Law Enforcement Branch on search and rescue activities

ESF 10: Oil and Hazardous Materials Response

- Coordinate support of hazardous materials response operations in Berkeley
- Coordinate with the Health and Medical Branch on health and medical needs resulting from hazardous materials release
- Coordinate with the Law Enforcement Branch on evacuation/shelter in place needs

2016 City of Berkeley Emergency Operations Plan

resulting from hazardous materials release

- Coordinate with Construction and Engineering Branch on cleanup following hazardous materials release

ESF 8: Public Health and Medical Services (Emergency Medical Services)

- Provide ambulance-based care and transport in Berkeley

ESF 14: Long-Term Recovery

- Communicate to Fire Department/DOC the current procedures to facilitate potential disaster cost recovery

ESF 15: Public Information

- Send emergency public information and warning (life-safety) messages to the Operations Support Section Coordinator to identify any conflicts with other life-safety messaging
- Forward conflict-free life safety messages to the Law Enforcement Branch/Emergency Communications Center for delivery with EPIW systems
- Share other important public information messages and updates with the Operations Support Section Coordinator, to be vetted and forwarded to the PIO/JIC for delivery

ESF 16: Evacuation

- Support Law Enforcement Branch in evacuations due to fires or hazardous materials incidents.

2016 City of Berkeley Emergency Operations Plan

3.2.5 Law Enforcement Branch

The Law Enforcement Branch in the Operations Support Section will coordinate the following ESFs:

- 16. Evacuation

The Branch will also support the following ESFs:

- 1. Transportation
- 5. Emergency Management
- 7. Logistics
- 8. Public Health and Medical Services (fatality management)
- 13. Law Enforcement
- 14. Long-Term Recovery
- 15. Public Information (emergency public information and warning)

Organization and Staffing

The positions that can be activated for this branch, as well as the departments staffing those positions, are as follows:

Position	Staffing Department(s)/Division(s)
Law Enforcement Branch Coordinator	Police
Fatality Management Unit	Police

Role

The Law Enforcement Branch will link the EOC to the following:

- Berkeley Police Department DOC (if activated). If the PD DOC is not activated, the EOC Law Enforcement Branch connects directly with the Field Level: Area Command(s) (if activated) and/or directly to:
 - Incident Command Posts at incidents under the management of law enforcement, and
 - Unified Command Posts with the law enforcement in the Unified Command.
 - OA Law Enforcement mutual aid coordinator at the ALCO OA EOC, who in turn connects to mutual aid resources for law enforcement.
- The City’s Emergency Communications Center
- Local law enforcement partners
 - UC Berkeley PD
 - BART PD
 - Alameda County Sheriff
- The Alameda County Coroner, which is responsible for decedent management (as needed).

Figure 3-4: Law Enforcement Branch Organization

Responsibilities

2016 City of Berkeley Emergency Operations Plan

The Law Enforcement Branch will work to meet the objectives of the EOC Action Plan assigned to the Branch. The Law Enforcement Branch has the following responsibilities:

ESF 5: Emergency Management and ESF 7: Logistics

- Communicate with the PD DOC (if activated), or directly with law enforcement Incident Commanders to:
 - Supply law enforcement Field Level commanders with information, situational awareness and citywide priorities developed in the EOC.
 - Obtain field situation reports and resource requests from the law enforcement Field Level commanders
- Prioritize and allocate available resources to incidents per Law Enforcement Branch operational support priorities
 - Receive requests for law enforcement resources from:
 - Police DOC/Field Level commanders
 - Other EOC Branches
 - Work with Police DOC to fill requests for Police Department resources
 - Send law enforcement resource requests from other departments or EOC units to the Law Enforcement DOC to be sent to the Alameda County OA Law Enforcement Mutual Aid Coordinator
 - Coordinate logistical support for mutual aid assets ordered through the Law Enforcement Mutual Aid System with EOC Operations and Logistics Sections
 - Coordinate any requests for resource support that fall outside of the Law Enforcement Mutual Aid System
- Support the Resource Status Unit of the EOC Plans/Intelligence Section by proactively sharing resource status information received from Field Level commanders and PD DOC
- Support the Situation Analysis Unit of the EOC Plans/Intelligence Section by proactively sharing response information and situation assessments received from Field Level commanders and PD DOC

The EOC Law Enforcement Branch will also coordinate and support ESFs as follows:

ESF 1: Transportation

- Coordinate with Operations Support Section Construction and Engineering Branch to:
 - Perform general traffic and access control
 - Designate ingress/egress routes for emergency response vehicles and personnel
 - Transport those in custody

ESF 8: Public Health and Medical (Fatality Management)

The Health and Medical Branch will coordinate the Citywide public health and medical ESF. The Law Enforcement Branch will support the Health and Medical Branch by coordinating decedent management activities with the Alameda County Coroner's Bureau. The Coroner's Bureau is responsible for the collection, identification and disposition of decedents during conditions of disaster or extreme peril. If the Coroner's Bureau is unable to provide assistance, the Law Enforcement Branch will coordinate these services until the Coroner's Bureau becomes available.

- Determine Alameda County Coroner's Bureau's response capacity. If contact is made with Coroner's Bureau, get Coroner permissions and instructions on decedent management.
- If Coroner can respond, coordinate City support of Coroner activities. Send mass fatality-related mutual aid requests to the Alameda County Coroner's Bureau through the

2016 City of Berkeley Emergency Operations Plan

Alameda County Law Enforcement Mutual Aid Coordinator.

- If decedent management activities are deemed necessary prior to Coroner arrival, coordinate those activities.
- If the Coroner cannot be contacted, coordinate fatality management:
 - Provide guidance to the Field Level on fatality management procedures
 - Coordinate Field Level fatality management resource requests (personnel, equipment and supplies)
 - Work with Operations Support Section Branches and Logistics Section – Facilities Branch to identify locations for temporary morgues

ESF 13: Law Enforcement

- Support Police Department as it coordinates:
 - Law enforcement operations during emergencies
 - Site security at incidents
 - With federal, State, and local public and private sector partners

Coordinate with the Fire and Rescue Branch on search and rescue activities
ESF 14: Long-Term Recovery

- Communicate to Police Department/DOC the current procedures to facilitate potential disaster cost recovery

ESF 15: Public Information

- Send emergency public information and warning (life-safety) messages to the Operations Support Section Coordinator to identify any conflicts with other life-safety messaging
- Route conflict-free Emergency Public Information and Warning messages to the City's Emergency Communications Center to ensure that warnings, weather advisories and critical emergency/event information are efficiently and appropriately delivered to the public
- Share other important public information messages and updates with the Operations Support Section Coordinator, to be vetted and forwarded to the PIO/JIC for delivery

ESF 16: Evacuation

- Coordinate with other EOC Sections and Branches to support evacuations in Berkeley.
- Coordinate evacuation operations during emergencies
 - Coordinate with Construction and Engineering Branch and Fire and Rescue Branch to designate evacuation routes
 - Provide appropriate evacuation information to emergency responders and the PIO
 - Assist with the transportation of individuals unable to evacuate themselves

2016 City of Berkeley Emergency Operations Plan

3.2.6 Health and Medical Branch

The Health and Medical Branch in the Operations Support Section will coordinate the following ESF:

- 8. Public Health and Medical Services

The Branch will also support the following ESFs:

- 5. Emergency Management
- 6. Mass Care and Recovery Support
- 7. Logistics
- 10. Oil and Hazardous Materials Response
- 14. Long-Term Recovery
- 15. Public Information

Organization and Staffing

The positions that can be activated for this branch, as well as the departments staffing those positions, are as follows:

Position	Staffing Department(s)/Division(s)
Health and Medical Branch Coordinator	Health, Housing and Community Services
Public Health and Medical Unit	Health, Housing and Community Services-Public Health
Environmental Health Unit	Health, Housing and Community Services-Environmental Health
Mental Health Unit	Health, Housing and Community Services-Mental Health

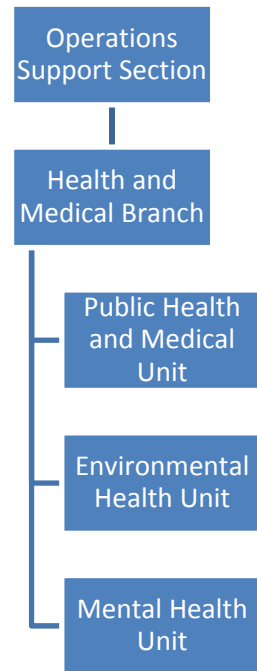

Each unit is led and supported by staff from the Department/Division best qualified to fulfill the corresponding roles and responsibilities. The Health and Medical Branch Coordinator is initially staffed by the first arriving branch member, then transferred to the most appropriate Health and Medical Branch representative according to the nature and specific needs of the emergency/event.

Role

The Health and Medical Branch will link the EOC to the following:

- HHCS DOC, which in turn connects to:
 - City of Berkeley Health Officer²
 - Field Level health and medical sites (e.g., Points of Dispensing)
 - Hospitals, clinics and skilled nursing facilities
 - Alameda County Medical Health Operational Area Coordinator (MHOAC), which connects to mutual aid health and medical resources
- If the HHCS DOC is not activated, the

Figure 3-5: Health and Medical Branch Organization

² Per the needs of the emergency/event and at the discretion of the Director of Emergency Services, the Health Officer may also serve as a member of the Policy Group.

2016 City of Berkeley Emergency Operations Plan

Health and Medical Branch of the EOC connects directly to these entities.

Responsibilities

The Health and Medical Branch will implement the priorities of the EOC Action Plan assigned to the Branch. The Health and Medical Branch has the following responsibilities:

ESF 5: Emergency Management and ESF 7: Logistics

- Communicate with the HHCS DOC (if activated), or directly with health and medical facilities and field sites to:
 - Supply facilities and field sites with information, situational awareness and citywide priorities developed in the EOC.
 - Obtain field situation reports and resource requests from facilities and field sites
- Prioritize and allocate available resources to incidents per Health and Medical Branch operational support priorities
 - Receive requests for health and medical resources from:
 - Health and medical facilities and field sites
 - Other EOC Branches
 - Work with HHCS DOC to fill requests for HHCS Department resources
 - Send health and medical resource requests from other departments or EOC units to the HHCS DOC to be sent to the Medical Health Operational Area Coordinator
 - Coordinate logistical support for mutual aid assets ordered through the MHOAC with EOC Operations and Logistics Sections
 - Coordinate any requests for resource support that fall outside of the Medical/Health Mutual Aid System
- Support the Resource Status Unit of the EOC Plans/Intelligence Section by proactively sharing resource status information received from facilities, field sites and HHCS DOC
- Support the Situation Analysis Unit of the EOC Plans/Intelligence Section by proactively sharing response information and situation assessments received from facilities, field sites and HHCS DOC
- Coordinate with the JIC or appropriate PIO to craft public messaging related to health and medical services, or to inform the public of health precautions or to provide health-related safety instructions for the general public (based on information released from the HHCS DOC)
- Submit policy-level questions to the EOC Policy Group (via the Operations Support Section Coordinator)

The EOC Health and Medical Branch will also coordinate and support ESFs as follows:

ESF 6: Mass Care and Recovery Support (Support)

- Support shelter sites with staffing to provide basic health services, including:
 - First aid
 - Refill of prescription medications
 - Monitoring of people with chronic health conditions
 - Contagious disease monitoring and control
 - Inspections of mass care sites to ensure environmental health regulations are being observed and that no unsafe conditions are present
 - Behavioral health services

ESF 8: Public Health and Medical Services

- Support HHCS DOC efforts to minimize loss of life, subsequent disability, and human

2016 City of Berkeley Emergency Operations Plan

suffering by ensuring timely and coordinated medical, public health, and mental health assistance

- Coordinate with Fire and Rescue Branch and HHCS DOC to provide ambulance-based care and transport, and to coordinate ambulance mutual aid requests

ESF 10. Oil and Hazardous Materials Response

- Provide public health and environmental health support for oil and hazardous materials incident response

ESF 14: Long-Term Recovery

- Communicate to HHCS Department/DOC the current procedures to facilitate potential disaster cost recovery

ESF 15: Public Information

- Send emergency public information and warning (life-safety) messages to the Operations Support Section Coordinator to identify any conflicts with other life-safety messaging
- Forward conflict-free life safety messages to the Law Enforcement Branch/Emergency Communications Center for delivery with EPIW systems
- Share other important public information messages and updates with the Operations Support Section Coordinator, to be vetted and forwarded to the PIO/JIC for delivery

2016 City of Berkeley Emergency Operations Plan

3.2.7 Mass Care Branch

The Mass Care Branch in the Operations Support Section will coordinate the following ESFs:

- 6. Mass Care and Recovery Support

The Branch will also support the following ESFs:

- 5. Emergency Management
- 7. Logistics
- 8. Public Health and Medical Services
- 11. Animal Response
- 14. Long-Term Recovery
- 15. Public Information
- 16. Evacuation

Organization and Staffing

The positions that can be activated for this branch, as well as the departments staffing those positions, are as follows:

Position	Staffing Department(s)/Division(s)
Mass Care Branch Coordinator	Health, Housing and Community Services- Housing and Community Services, Aging Services Parks, Recreation and Waterfront-Recreation
Shelter Unit	Health, Housing and Community Services-Housing and Community Services, Aging Services Parks, Recreation and Waterfront-Recreation Red Cross
Feeding Unit	
Bulk Distribution Unit	
Animal Care Unit	City Manager’s Office – Animal Care Services

2016 City of Berkeley Emergency Operations Plan

Each unit is led and supported by staff from the Department/Division best qualified to fulfill the corresponding roles and responsibilities. The Mass Care Branch Coordinator is initially staffed by the first arriving branch member, then transferred to the most appropriate Mass Care Branch representative according to the nature and specific needs of the emergency/event.

Role

The Mass Care Branch will link the EOC to the following:

- HHCS DOC, which connects to:
 - Senior centers
 If the HHCS DOC is not activated, the Mass Care Branch of the EOC connects directly to these entities.
- PRW DOC, regarding mass care and recovery support and animal response issues. (The EOC Construction and Engineering Branch will communicate with the PRW DOC on all other topics.)
- Field Level mass care sites, e.g., human and animal shelter sites, feeding sites and bulk distribution sites
- Red Cross. If activated, Red Cross liaison(s) will help to staff the Mass Care Branch. If this is not possible, the Mass Care Branch will connect with the Red Cross representative at the ALCO OA EOC
- Animal Care Services Division/City Animal Shelter.

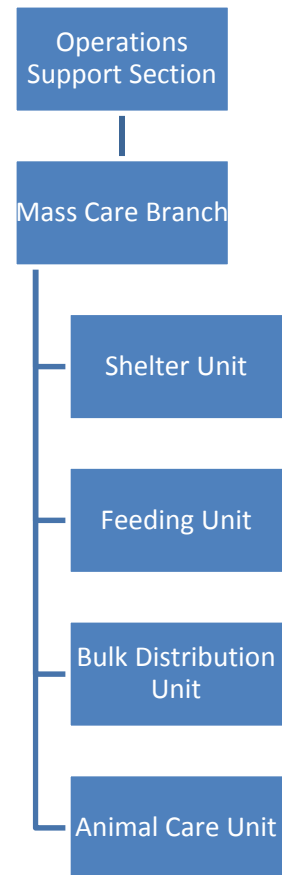

The Mass Care Branch will also work closely with community partner representatives such as the Berkeley Unified School District and UC Berkeley, to ensure close coordination and support for their mass care and recovery support activities. Those representatives may be stationed in the Community Branch or the Mass Care Branch, per the staffing availability and coordination needs of the emergency/event.

Responsibilities

The Mass Care Branch will implement the priorities of the EOC Action Plan assigned to the Branch. The Mass Care Branch has the following responsibilities:

ESF 5: Emergency Management and ESF 7: Logistics

- Communicate with the HHCS DOC (if activated), the PRW DOC (if activated), the Animal Care Services Division and/or directly with mass care field sites to:
 - Supply mass care field sites and the Animal Shelter with information, situational awareness and citywide priorities developed in the EOC.
 - Obtain field situation reports and resource requests from the Animal Shelter and mass care field sites
- Prioritize and allocate available resources to incidents per Mass Care Branch operational priorities
 - Receive requests for mass care and animal care resources from:
 - Mass care field sites
 - Animal Shelter
 - Other EOC Branches

**Figure 3-6:
Mass Care
Branch
Organization**

2016 City of Berkeley Emergency Operations Plan

- Work with HHCS DOC to fill requests for HHCS Department resources
- Work with PRW DOC to fill requests for PRW Department resources
- Work with Animal Care Services Division to fill requests for animal care resources
- Work with Red Cross representative to fill requests for Red Cross resources
- Forward resource requests that cannot be filled from available City inventories to the Logistics Section
- Support the Resource Status Unit of the EOC Planning/Intelligence Section by proactively sharing resource status information received from mass care field sites, the HHCS DOC, the PRW DOC, the Red Cross and the Animal Shelter
- Support the Situation Analysis Unit of the EOC Planning/Intelligence Section by proactively sharing response information and situation assessments received from mass care field sites, the HHCS DOC, the PRW DOC, the Red Cross and the Animal Care Services Division
- Submit policy-level questions to the EOC Policy Group (via the Operations Support Section Coordinator)

The EOC Mass Care Branch will also coordinate and support Local Emergency Functions as follows:

ESF 6: Mass Care and Recovery Support

- Establish shelter operations, including staffing and equipping shelters and sheltering the pets and service or support animals of displaced owners
- Coordinate provision of feeding and basic health services at shelters
- Establish feeding operations, including the preparation and distribution of food
- Establish bulk distribution operations to support persons outside of emergency shelters (such as individuals sheltering in place at home)
- Coordinate and support household reunification efforts
- Coordinate recovery support operations, including:
 - Development and location of temporary and replacement housing
 - Establishment of Local Assistance Centers

ESF 8: Public Health and Medical Services

- Coordinate with Health and Medical Branch to provide basic physical and behavioral health services to support the shelter population, including:
 - First aid
 - Contagious disease monitoring and control
 - Refill of prescription medications
 - Monitoring of people with chronic health conditions.

ESF 11: Animal Response

- Support the City's Animal Services Division as it coordinates:
 - Domestic animal response and recovery activities, to include rescue, triage, medical treatment, transport, care, shelter, and domestic animal reunification
 - Wildlife response and recovery activities, mitigating loss of life whenever possible
 - Identification and documentation of animals for effective reunification

ESF 14: Long-Term Recovery

- Communicate to HHCS Department/DOC, PRW Department/DOC and Animal Care Services Division the current procedures to facilitate potential disaster cost recovery

2016 City of Berkeley Emergency Operations Plan

ESF 15: Public Information

- Send emergency public information and warning (life-safety) messages to the Operations Support Section Coordinator to identify any conflicts with other life-safety messaging
- Forward conflict-free life safety messages to the Law Enforcement Branch/Emergency Communications Center for delivery with EPIW systems
- Share other important public information messages and updates with the Operations Support Section Coordinator, to be vetted and forwarded to the PIO/JIC for delivery

ESF 16: Evacuation

- Support Law Enforcement Branch by establishing evacuation centers as necessary.

2016 City of Berkeley Emergency Operations Plan

3.2.8 Construction and Engineering Branch

The Construction and Engineering Branch in the Operations Support Section will coordinate the following ESFs:

- 1. Transportation
- 3. Public Works and Engineering
- 12. Utilities

The Branch will also support the following ESFs:

- 5. Emergency Management
- 7. Logistics
- 10. Oil and Hazardous Materials Response
- 14. Long-Term Recovery
- 15. Public Information
- 16. Evacuation

Organization and Staffing

The positions that can be activated for this branch, as well as the departments staffing those positions, are as follows:

Position	Staffing Department(s)/Division(s)
Construction and Engineering Branch Coordinator	Public Works Parks, Recreation and Waterfront Planning-Building and Safety
Construction and Engineering Unit	Public Works Parks, Recreation and Waterfront
Building and Safety Unit	Planning-Building and Safety
Transportation Unit	Public Works Police

2016 City of Berkeley Emergency Operations Plan

Each ESF is led and supported by those departments best qualified to fulfill all corresponding roles and responsibilities. The overall coordinating department for the Construction and Engineering Branch is initially established by the first-arriving branch member, then transferred to the most appropriate Construction and Engineering Branch representative according to the nature and specific needs of the emergency/event.

Role

The Construction and Engineering Branch will link the EOC to the following:

- Public Works Department/DOC (if activated)
- Planning Department-Building and Safety Division/DOC (if activated)
- Parks, Recreation and Waterfront Department/DOC (if activated).
- If the any of these DOCs is not activated, the Construction and Engineering Branch connects directly with Field Level commanders for the particular department.
- Utility representatives including Pacific Gas & Electric and the East Bay Municipal Utility District. If activated, these utility liaison(s) will be part of the Construction and Engineering Unit staff. If this is not possible, the Construction and Engineering Unit will connect with these representatives through the Alameda County OA EOC.
- Transportation representatives including Caltrans and AC Transit. If activated, these utility liaison(s) will be part of the Transportation Unit staff. If this is not possible, the Construction and Engineering Unit will connect with these representatives through the Alameda County OA EOC Transportation Unit.

**Figure 3-7:
Construction and Engineering Branch Organization**

Responsibilities

The Construction and Engineering Branch will work to meet the objectives of the EOC Action Plan assigned to the Branch. The Construction and Engineering Branch has the following responsibilities:

ESF 5: Emergency Management and ESF 7: Logistics

- Communicate with the PW, Planning-B&S and PRW Departments/DOC(s) (if activated), or directly with their Field Level commanders to:
 - Supply Field Level commanders with information, situational awareness and citywide priorities developed in the EOC.
 - Obtain field situation reports and resource requests from the Field Level commanders
- Prioritize and allocate available resources to incidents per Construction and Engineering Branch operational support priorities
 - Receive requests for construction and engineering resources from:
 - PW, Planning-B&S and PRW Departments/DOC(s)/Field Level commanders
 - Other EOC branches

2016 City of Berkeley Emergency Operations Plan

- Work with PW Department/DOC to fill requests for public works resources
- Work with Planning-B&S Department/DOC to fill requests for building safety assessments
- Work with PRW Department/DOC to fill requests for PRW resources unrelated to mass care. (The EOC Mass Care Branch will work with the PRW Department/DOC on mass care response.)
- Forward resource requests that cannot be filled from available City inventories to the Logistics Section
- Support the Resource Status Unit of the EOC Plans/Intelligence Section by proactively sharing resource status information received from Field Level commanders and PW, Planning-B&S and PRW Departments/DOCs
- Support the Situation Analysis Unit of the EOC Plans/Intelligence Section by proactively sharing response information and situation assessments received from Field Level commanders and PW, Planning-B&S and PRW Departments/DOCs.

The EOC Construction and Engineering Branch will also coordinate and support ESFs as follows:

ESF 1: Transportation

- Coordinate with Law Enforcement Branch to:
 - Coordinate general traffic and access control
 - Designate ingress/egress routes for emergency response vehicles and personnel
 - Assist with transportation of those in custody under the Law Enforcement function
- Coordinate with the Health and Medical Branch and Fire and Rescue Branch to assist with transportation of the ill and injured
- Coordinate with the Mass Care Branch to assist with mobile bulk distribution and transportation of displaced persons
- Coordinate activities to support restoration and maintenance of public and private mass transportation systems

ESF 3: Public Works and Engineering

- Initiate and coordinate damage assessment reports for:
 - Damaged roads
 - City facilities
 - Municipal infrastructures
- Coordinate the inspection, restoration, and repair of:
 - Disrupted municipal services (such as the City water and wastewater facilities, City-owned traffic lights, etc.)
 - Damaged City-owned infrastructure (buildings, facilities and transportation infrastructure (streets, bridges, etc.))
- Obtain equipment, supplies, and personnel services as necessary to support response and recovery efforts
- Manage the collection and disposal of emergency/event debris

ESF 10: Oil and Hazardous Materials Response

- Provide support to oil and hazardous materials incident response efforts through coordination of ESF 3: Public Works and Engineering and ESF 12: Utilities efforts

ESF 12: Utilities

- Coordinate status reporting of all utility systems

2016 City of Berkeley Emergency Operations Plan

- Coordinate with utility service providers for the assessment and restoration of disrupted non-municipal services, such as:
 - Electricity and natural gas: Pacific Gas & Electric
 - Water: East Bay Municipal Utility District (EBMUD)
 - Cable and internet: Comcast, LAN Minds, etc.
 - Hard line phone: AT&T
 - Wireless phone service: AT&T, Verizon, etc
- Coordinate the restoration and repair of disrupted municipal services with utility services, such as EMBUD water and City wastewater systems

ESF 14: Long-Term Recovery

- Communicate to Public Works Department/DOC, PRW Department/DOC, and Building and Safety Division the current procedures to facilitate potential disaster cost recovery

ESF 15: Public Information

- Send emergency public information and warning (life-safety) messages to the Operations Support Section Coordinator to identify any conflicts with other life-safety messaging
- Forward conflict-free life safety messages to the Law Enforcement Branch/Emergency Communications Center for delivery with EPIW systems
- Share other important public information messages and updates with the Operations Support Section Coordinator, to be vetted and forwarded to the PIO/JIC for delivery

ESF 16: Evacuation

- If evacuation is necessary, coordinate with Law Enforcement branch to:
 - Designate evacuation routes
 - Assist with the transportation of individuals unable to evacuate themselves

2016 City of Berkeley Emergency Operations Plan

3.2.9 Community Branch

The Community Branch in the Operations Support Section coordinates the following ESF:

- 17. Community Support

The Branch will also support the following ESFs:

- 5. Emergency Management
- 7. Logistics
- 15. Public Information
- 16. Evacuation

Organization and Staffing

The positions that can be activated for this branch, as well as the departments staffing those positions, are as follows:

Position	Staffing Department(s)/Division(s)
Community Support Branch Coordinator	Emergency Management Staff
CERT Unit	CERT volunteer
CRC Unit	Health, Housing and Community Services
Partner Representatives	UC Berkeley, BUSD, Berkeley Lab, nongovernmental organizations, private sector

Role

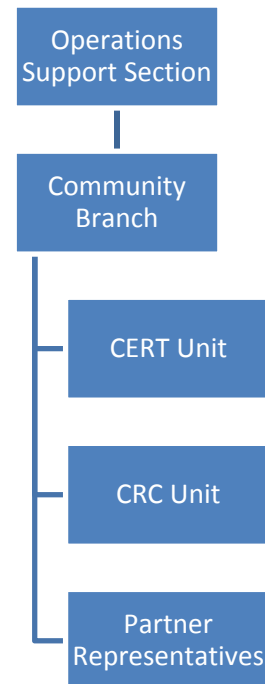

The Community Branch is the primary coordination center for information and requests originating from within the community. The branch will maintain communications between community-based organizations and the EOC, and distribute resource requests and relevant information to the appropriate branches or sections within the EOC.

The Community Branch will link the EOC to the following:

- Berkeley Community Emergency Response Teams (CERT)
- Community Resilience Centers (CRCs) in Berkeley
- Organizations in the Berkeley Emergency Accessible Community Organizations Network (BEACON)
- External partners including UC Berkeley, BUSD, Berkeley Lab, nongovernmental organizations, private sector

Responsibilities

The Community Branch will work to meet the objectives of the EOC Action Plan assigned to the Branch. The Community Branch has the following responsibilities:

2016 City of Berkeley Emergency Operations Plan

ESF 17: Community Support

(Note: The Community Branch supports ESF 5: Emergency Management and ESF 7: Logistics through its coordination activities in ESF 17: Community Support. For the Community Branch, there is not a significant distinction between its coordination of ESF 17: Community Support and its support of ESFs 5 and 7.)

**Figure 3-8:
Community Branch
Organization**

Community Emergency Response Team Unit

- Communicate with CERT neighborhood teams representatives to:
 - Obtain situation reports from CERT teams
 - Supply information and situational awareness to CERT teams
- Support the Situation Analysis Unit of the EOC Plans/Intelligence Section by proactively sharing received response information and situation assessments
 - Notify Community Branch Coordinator of hazard information indicating a possible need for an emergency public information and warning message
- Work with CERT leadership to identify and maintain information on CERT volunteers available for deployment as DSW volunteers. Share this information with the Logistics Section Personnel Unit.

See ESF 17 Annex: *Community Support* for further details on the CERT program.

CRC Unit

- Communicate with CRC and BEACON organization representatives to:
 - Supply information and situational awareness to organization representatives
 - Obtain situation reports and resource availability information from each organization
 - Notify Community Branch Coordinator of hazard information indicating a possible need for an emergency public information and warning message
- Support the Situation Analysis Unit of the EOC Plans/Intelligence Section by proactively sharing situation assessments and resource availability information.

See ESF 17 Annex: *Community Support* for further details on CRCs and BEACON.

Partner Representatives

- Communicate back to home organization representatives to:
 - Supply information and situational awareness to organization representatives
 - Obtain situation reports and resource availability information from home organization
 - Notify Community Branch Coordinator of hazard information indicating a possible need for an emergency public information and warning message
 - Where appropriate, forward City resource requests to the home organization
 - Where appropriate, obtain resource requests from home organization for fulfillment by the City
- Support the Situation Analysis Unit of the EOC Plans/Intelligence Section by proactively sharing situation assessments and resource availability information.

See ESF 17 Annex: *Community Support* for further details on partner representatives.

ESF 16: Evacuation

2016 City of Berkeley Emergency Operations Plan

- If evacuation is necessary, coordinate with Law Enforcement Branch and external organizations to:
 - Communicate evacuation information and instructions through community networks
 - Identify external resources (personnel, equipment and services) to assist with evacuation, including transportation of individuals unable to evacuate themselves

2016 City of Berkeley Emergency Operations Plan

3.3 Plans/Intelligence Section

3.3.1 Plans/Intelligence Section Overview

The Plans/Intelligence Section supports the following ESFs:

- 5. Emergency Management
- 7. Logistics
- 14. Long-Term Recovery
- 15. Public Information

Leadership and Staffing

The Plans/Intelligence Section is led by the Section Coordinator, who is responsible for carrying out the Emergency Management function.

Position	Staffing Department(s)/Division(s)
Plans/Intelligence Section Coordinator	Emergency Management Staff

Organization and Staffing

The Plans/Intelligence Section is one of five sections of the EOC. The Plans/Intelligence Section collects, analyzes and displays information related to Emergency Management operations. The Plans/Intelligence Section conducts EOC Planning meetings, prepares EOC Action Plans, disseminates situation briefings, and supports the overall EOC Plans process.

The positions that can be activated for this section, as well as the departments staffing those positions, are as follows:

Position	Staffing Department(s)/Division(s)
Situation Analysis Unit	Emergency Management Staff
Resource Status Unit	Emergency Management Staff
Advance Plans Unit	Emergency Management Staff
Documentation Unit	Emergency Management Staff
GIS Unit	Emergency Management Staff
Technical Specialist: AFN	Emergency Management Staff
Technical Specialists	Emergency/event-Specific
Demobilization Unit	Emergency Management Staff

The Situation Analysis Unit of the Plans/Intelligence Section will be activated in any EOC activation.

2016 City of Berkeley Emergency Operations Plan

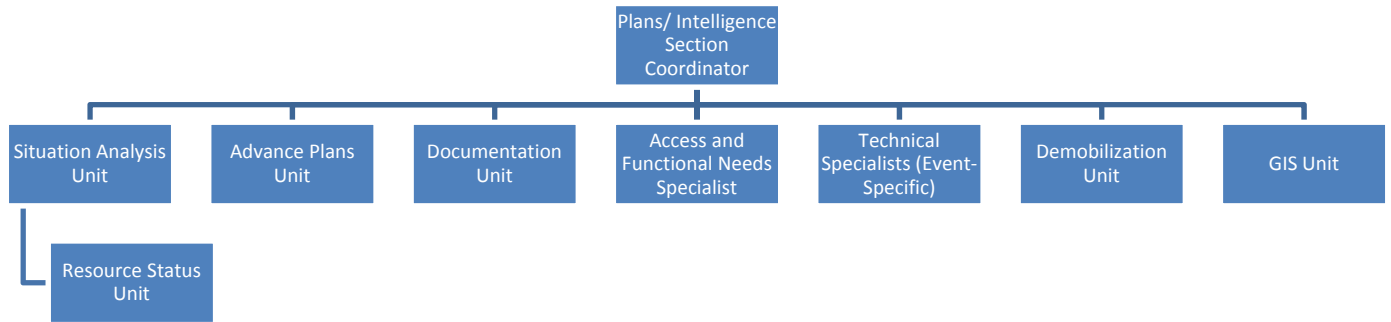

Figure 3-9: Plans/Intelligence Section Organization

Role

The Plans/Intelligence Section Coordinator will connect to the following:

- Plans/Intelligence Section Branch Coordinators
- EOC Management Section staff, including EOC Director
- Other EOC Section Coordinators
- DOCs/City Departments not represented in the Operations Support Section

Note: Plans/Intelligence Section staff will also coordinate directly with staff from other sections.

Responsibilities

The Plans/Intelligence Section will work to meet the objectives of the EOC Action Plan assigned to the Section. The Plans/Intelligence Section has the following responsibilities:

Plans/Intelligence Section Coordinator

The Plans/Intelligence Section Coordinator:

- Provides overall coordination for the collection, analysis and display of response information.
- Conducts EOC Plans meetings, ensures EOC Action Plans are prepared, and supports the overall EOC Action Planning process.
- Coordinates the activities of the Plans/Intelligence Section Units
- Ensures that branch staff perform disaster cost recovery-related activities in a federally-compliant manner to facilitate potential reimbursement of response and recovery costs
- Ensures that units communicate current Citywide Priorities and Policy Directives to Departments/DOCs/field staff who are not represented in the Operations Support Section or communicating with another EOC section
- Ensures that required activities are completed in the absence of a Unit Coordinator.

Situation Analysis Unit

The Situation Analysis Unit supports response decision-making of the overall MAC System. The Unit manages information to provide a common operating picture for all responders, and supports the EOC Action Planning process.

Information-Sharing

- Collects, organizes, analyzes and validates situation information related to the

2016 City of Berkeley Emergency Operations Plan

emergency, including impact information, safety/damage assessment information, response activities, details regarding the field operating environment

- Notifies Plans/Intelligence Section Coordinator of hazard information indicating a possible need for an emergency public information and warning message
- Coordinates with other EOC sections to develop situation reports for dissemination to staff in the EOC/DOC/Policy Group on a regular basis
- Shares current emergency/event information on maps, status boards and other displays
- Coordinates with the Documentation Unit for manual distribution and reproduction of situation reports as required.
- Coordinates with PIO to ensure two-way access to most current information
- Ensures that an EOC Action Plan is developed for each operational period
 - Prepares situation reports for EOC Action Plans meetings
 - Ensures that each EOC section provides objectives prior to Action Plans meetings
 - Ensures that the Documentation Unit publishes and distributes the EOC Action Plan prior to the next operational period
- Assumes responsibility for all Resource Status Unit activities, or activates the Resource Status Unit to perform those duties if necessary.

Resource Status Unit

- The Resource Status Unit is a Unit under the Situation Analysis Unit.
- Collects, organizes, analyzes and validates information on the status of all City resources
 - Coordinates with the Operations Support Section to maintain information on the status of departments' unassigned personnel, supplies, equipment and facilities
 - Coordinates with DOCs/representatives of departments not present in the Operations Support Section to:
 - Maintain information on the status of unassigned department personnel, supplies, equipment and facilities
 - Communicate current Citywide Priorities and Policy Directives
 - Coordinates with the Operations Support Section, DOCs, and the Logistics Section to identify potential resource shortfalls

Advance Plans Unit

The Advance Plans Unit develops plans necessary to cope with evolving situations over multiple future operational periods.

- Reviews current documentation and determines potential future impacts of the emergency, particularly issues which might modify Citywide priorities and/or EOC objectives
- Develops Advance Plan, identifying future policy-related issues, social and economic impacts, significant response/recovery needs and key issues likely to affect EOC operations in 36-72 hours
- With approval of Plans/Intelligence Section Coordinator, provides periodic briefings for EOC Management Section and EOC Section Coordinators re: Advance Plans issues

Documentation Unit

The Documentation Unit makes a record of entire response effort details and preserves this documentation during and following the emergency/event. The Unit:

- Coordinates with the Plans/Intelligence Section Coordinator and the

2016 City of Berkeley Emergency Operations Plan

Finance/Administration Section Cost Recovery Branch to determine which records need to be preserved

- Collects, organizes and archives all completed emergency-related forms just prior to the end of each operational period, to include:
 - All EOC position logs
 - All EOC situation reports
 - All EOC Action Plans
 - Any other related information
- Maintains a permanent electronic archive of all situation reports and Action Plans associated with the emergency
- Reproduces and distributes documents in support of EOC staff
- Distributes EOC situation reports, EOC Action Plan, and other documents as required
- Assists the EOC Coordinator in preparation and distribution of the After Action Report

GIS Unit

The GIS Unit receives, tracks, and responds to requests for map products, data, and/or analyses. The Unit:

- Coordinates with the Plans/Intelligence Section Coordinator to prioritize requests according to Citywide priorities
- Provides requestors with estimated delivery times for their requests.
- Provides map products, data, and/or analyses as requested.
- At the end of each operational period, coordinates with the Documentation Unit to file all products/data/analyses produced
- Ensures the current situation and all significant events are included on the EOC Plans/Intelligence Section map (can be hand-drawn)

Technical Specialists

Technical Specialists provide technical observations to EOC staff in specialized areas as required by the emergency. This involves:

- Contributing to EOC Action Plans meetings and Policy Group meetings as requested
- Ensuring that all recommendations are appropriately documented
- Notifying Plans/Intelligence Section Coordinator of hazard information indicating a possible need for an emergency public information and warning message

Technical Specialists: Access and Functional Needs

The Access and Functional Needs (AFN) Specialist helps to ensure that Berkeley's response meets the access and functional needs of impacted community members. The AFN Specialist is a resource for all EOC sections and responders at all levels of Berkeley's MAC System. The AFN Specialist:

- Connects the MAC System to external organizations that support or represent community members with AFN, in coordination with the Operations Support Section Community Branch.
- Works with Advance Plans Unit to proactively identify/anticipate AFN by gathering intelligence from:
 - Operations Support Section Community Branch
 - Organizations contracted with the City to provide services relating to access and functional needs issues
- Provides guidance on AFN-related issues originating at any level of the MAC System. (Note: Just as policy questions are forwarded from any level of the MAC

2016 City of Berkeley Emergency Operations Plan

System to the Policy Group for direction, AFN questions may be forwarded from any level of the MAC System to the AFN Specialist for guidance.)

- Works with Advance Plans Unit, Operations Support Section, and Logistics Section to ensure that response operations and resource requests are designed to meet AFN
- Provides information regarding known and potential AFN:
 - To the Situation Analysis Unit for inclusion in the EOC Situation Report and update briefings
 - At Action Planning meetings for inclusion in the EOC Action Plan
 - To the Policy Group (per DES/Policy Group request), to support establishment of Citywide priorities and policy directives

Demobilization Unit

The Demobilization Unit coordinates across the EOC to develop a Demobilization Plan and procedures, and to ensure that demobilization efforts are integrated into the EOC Action Plan.

- The Demobilization Plan includes:
 - Triggers for demobilizing/downsizing each activated EOC unit
 - Estimated timetables for deactivating/downsizing units
 - Individual transition plans for functions completed by each demobilizing EOC unit:
 - Unit's functions cease
 - Unit's functions are transitioned to a City Department/agency
 - Unit's functions are transitioned to the recovery organization
 - EOC staff demobilization procedures (developed in coordination with the Logistics Section-Personnel Unit)
- To develop the EOC Demobilization Plan, the Demobilization Unit:
 - Reviews all pertinent documents and status reports
 - Interviews all EOC staff
 - Tracks key findings using the *Demobilization Planning Worksheet*
- To inform the staffing patterns for future EOC Action Plans, the Demobilization Unit shares key findings from Demobilization Planning Worksheet on a regular basis with:
 - Situation Analysis Unit
 - Advance Plans Unit
 - Logistics Section Personnel Unit
 - EOC Coordinator
- The Demobilization Unit coordinates with the Logistics Section-Personnel Unit to ensure that all EOC staff are demobilized per the established procedure on their final shifts

2016 City of Berkeley Emergency Operations Plan

3.4 Logistics Section

3.4.1 Logistics Section Overview

The Logistics Section coordinates ESF 7: Logistics and ESF 2: Communications.

The Logistics Section supports ESF 5: Emergency Management and ESF 14: Long-Term Recovery.

Leadership and Staffing

The Logistics Section is led by the Section Coordinator, who is responsible for carrying out the Emergency Management function.

Position	Departments
Logistics Section Coordinator	Emergency Management staff

Organization and Staffing

The Logistics Section is one of five sections of the City EOC. The Logistics Section acquires external resources and coordinates communication systems in support of an emergency/event.

Position	Departments
Supply/Procurement Unit	Finance
Facilities Unit	Public Works
Personnel Unit	Human Resources
Logistics Resource Tracking Unit	Emergency Management staff
Radio Unit	Public Works
Information Technology Unit	IT
NALCO Unit	NALCO
External representatives (as-needed)	External communications/IT companies

Figure 3-10: Logistics Section Organization

2016 City of Berkeley Emergency Operations Plan

Role

The Logistics Section will connect the City EOC to:

- Departments/DOCs
 - Finance
 - Human Resources
 - Information Technology
 - Public Works
- Northern Alameda County Amateur Radio Emergency Service (NALCO ARES)
- Facilities not owned or managed by the City
- Non-City personnel (professional and volunteers)
- Non-mutual-aid resources managed by private vendors
- The ALCO OA EOC's Logistics Section.
- External communications/IT representatives including AT&T, Comcast and Verizon. If activated, these external representatives can be integrated into the Logistics Section staff. If this is not possible, the Logistics Section will connect with these representatives through preexisting channels and/or through the ALCO OA EOC.

Responsibilities

The Logistics Section works to meet the objectives of the EOC Action Plan assigned to the section. The Logistics Section has the following responsibilities:

Resource Management

- Work with other sections to acquire, track, and deliver the following resources as needed during an emergency/event:
 - Materials and supplies
 - Rental equipment
 - Vehicles (including refueling and repair)
 - Professional and personal services
 - Staffing (including volunteers)

Note: It is assumed that all requests to the Logistics Section are for resources that either have been depleted or are unavailable from within City government. The Logistics Section responds to resource requests by:

- Seeking out donations/volunteers
- Purchasing or renting from local vendors for immediate delivery, or
- Requesting resources through County, State and federal agencies.
- Work with other sections to pre-identify vendors and other sources
- Work with other sections to forecast and identify material, equipment, and staffing shortfalls
- Allocate scarce resources consistent with Citywide priorities and EOC Action Plan objectives.

Communications/Information Technology Support

- Coordinate communications and information technology support throughout the response
- Work with EOC Operations Support Section and Departments/DOCs to assess the status of external infrastructure
- Work with Plans/Intelligence Section Situation Analysis Unit to maintain summary of emergency/event impacts on communications and IT infrastructure

2016 City of Berkeley Emergency Operations Plan

- Forward communications/IT resource requests to Public Works/IT Departments/DOCs
- Provide direct support for EOC communications/IT needs
- Coordinate development of the EOC Action Plan's Communications Plan. The Communications Plan identifies all systems in use, and ensures that enough radio frequencies are allocated to facilitate operations, and lists specific radiofrequencies allotted for the emergency

EOC Action Planning

- Coordinate with the EOC Plans/Intelligence Section regarding resource status and requirements for the next operational period pursuant to the Planning "P."
- Coordinate with the EOC Plans/Intelligence and EOC Finance/Administration Sections to ensure EOC resource acquisitions and issuance are documented for reimbursement.

Disaster Cost Recovery

- Perform disaster cost recovery-related activities in a federally-compliant manner to facilitate potential reimbursement of response and recovery costs
- Communicate current procedures to facilitate potential disaster cost recovery to the Finance, Human Resources, Information Technology, and Public Works Departments/DOCs (if they are not already represented in the Operations Support Section)

If activated, each unit of the Logistics Section will support specific functions that are further described below. If a unit is not activated, the Logistics Section Coordinator retains the unit's responsibilities.

Supply/Procurement Unit

The Supply/Procurement Unit will connect the City EOC to:

- City vendors
- Other agencies and organizations that control resources that can support emergency/event response operations, including:
 - Public agencies
 - Private entities

The Supply/Procurement Unit will work to meet the objectives of the EOC Action Plan assigned to the Unit. The Supply/Procurement Unit has the following responsibilities:

- Oversee the procurement and allocation of supplies and materials not normally provided through discipline-specific mutual aid channels (e.g. food, water, fuel)
- Verify costs data in the pre-established vendor contracts and/or agreements
- Prepare vendor contracts not previously addressed by existing approved vendor lists with concurrence from Finance/Administration Section Coordinator
 - Coordinate with Payables Unit on all matters involving the need to exceed established purchase order limits
 - Ensure all contracts identify scope of work and specific site locations
 - Negotiate rental rates not already established, or purchase price with vendors as required
 - Admonish vendors as necessary regarding unethical business practices, such as inflating rental rates for merchandise and equipment during emergencies
- Expedite delivery of supplies and materials as required
- Coordinate with the Finance/Administration Section Coordinator to manage the collection and maintenance of cost and other procurement data

2016 City of Berkeley Emergency Operations Plan

Facilities Unit

The Facilities Unit will link the EOC to:

- Non-City (public and private) agencies and organizations that control facilities or sites that can support emergency/event response operations

The Facilities Unit will work to meet the objectives of the EOC Action Plan assigned to the Unit.

The Facilities Unit has the following responsibilities:

- Locate and coordinate use of public facilities, private facilities, or staging areas required to support the emergency/event response.
- Coordinate the relocation of work space for essential City staff dislocated by the emergency/event, including relocating or leasing office furniture and configuring the workspace, as appropriate
- Support requests to locate and rent or lease alternate locations for the EOC/DOCs in the event that they are forced to relocate due to damage or space limitations; support environmental and safety standards for those facilities
- Coordinate pre-occupancy environmental inspections
- Locate space for feeding and housing requirements, as requested
- Coordinate provision of adequate essential facilities for the response effort, as requested
- Ensure acquired buildings are returned to their original state when no longer needed

Personnel Unit

The Personnel Unit will connect the City EOC to:

- The Human Resources Department/DOC, which will connect to:
 - Volunteer Reception Center, if established.

With permission from the Human Resources Department, the Personnel Branch of the EOC may connect directly with the Volunteer Reception Center.

The Personnel Unit will work to meet the objectives of the EOC Action Plan assigned to the Unit.

The Personnel Unit has the following responsibilities:

- Coordinate the acquisition, tracking, basic orientation/training, and support of additional Disaster Service Workers, which include City staff and convergent volunteers.
 - Support the HR Department/DOC and Volunteer Reception Center's efforts to identify and register convergent volunteers
 - Coordinate with the HR Department/DOC and Volunteer Reception Center to maintain a list of DSWs and convergent volunteers based on occupational skills, experience, and certification to use for response and recovery efforts
- Coordinate with the HR Department to provide guidance to the City Manager/Policy Group regarding any current or potential union issues that may arise from the reassignment of staff to "out-of-class" tasks during the emergency
- Coordinate with the Operations Support Section Mass Care Branch to ensure that DSWs are provided with food and shelter and other personal support while in the jurisdiction on assignment
- Coordinate with the Human Resources Department/DOC to track injury claims arising from the emergency.
- Coordinate with the Plans/Intelligence Section – Demobilization Unit to ensure that all EOC staff members are demobilized per the established procedure on their final shifts.

Logistics Resource Tracking Unit

The Logistics Resource Tracking Unit will work to meet the objectives of the EOC Action Plan

2016 City of Berkeley Emergency Operations Plan

assigned to the Unit. The Unit will:

- Maintain a system to collect, track, and provide shipment information for resource requests received by the Logistics Section.

Radio Unit

The Radio Unit will implement the priorities of the EOC Action Plan assigned to the Unit. The Radio Unit has the following responsibilities:

- Coordinate with the Public Works Department/DOC and Operations Support Section Construction and Engineering Branch to assess functionality of:
 - City of Berkeley radio systems, including EBRCS
 - External/private radio infrastructure
- Report findings and impacts to Plans and Intelligence Section Situation Analysis Unit
- Coordinate radio support requests for Local Government and Field Level sites
 - Receive radio support requests from the Operations Support Section
 - Forward radio support requests to the Public Works Department/DOC
- Provide direct support for radio needs in the EOC

Information Technology Unit

The Information Technology Unit will implement the priorities of the EOC Action Plan assigned to the Unit. The IT Unit has the following responsibilities:

- Coordinate with the IT Department/DOC and Operations Support Section Construction and Engineering Branch to assess functionality of:
 - City of Berkeley IT infrastructure, including the City network and phones
 - External/private IT infrastructure
- Report findings and impacts to Plans and Intelligence Section Situation Analysis Unit
- Coordinate IT support requests for Local Government and Field Level sites
 - Receive IT support requests from the Operations Support Section
 - Forward IT support requests to the IT Department/DOC
- Provide direct support for IT needs in the EOC

NALCO Unit

- Serve as the NALCO ARES Emergency Coordinator (EC)³:
 - Receive resource requests from the City of Berkeley for NALCO radio support. Radio support requests will come from the Operations Support Section for Local Government and Field Level sites, which may include:
 - Departments/Department Operations Centers
 - Incident Command Posts and other field sites
 - Outside agencies, including healthcare facilities and schools
 - Assign and/or deploy available NALCO ARES resources to support establishment of one or more radio stations. Resources include organizationally-owned communications equipment and operators with personally-owned radio equipment.
 - Track the status of assigned/deployed/available NALCO ARES resources and communicate resource status to the Logistics Section Coordinator as requested.

Note: the individual(s) staffing the NALCO Unit may not be concurrently serving as the NALCO ARES EC. If the NALCO ARES EC separately staffed offsite, the NALCO Unit is responsible for communicating with the NALCO ARES EC to ensure that resources

³ Per the NALCO ARES Activation Plan Rev. 1/12/14 (or current)

2016 City of Berkeley Emergency Operations Plan

- are managed effectively.
- As requested by EOC staff members, send messages over the amateur radio network on behalf of the City of Berkeley EOC.
 - If necessary, prioritize EOC messages based on Citywide priorities and EOC Action Plan objectives.

3.5 Finance/Administration Section

3.5.1 Finance/Administration Section Overview

The Finance/Administration Section supports the following ESFs:

- 5. Emergency Management
- 7. Logistics
- 14. Long-Term Recovery

Leadership

The Finance/Administration Section is led by the Section Coordinator, who is responsible for carrying out the Emergency Management function.

Positions	Staffing Department(s)/Division(s)
Finance/Administration Section Coordinator	Finance

Organization and Staffing

The Finance/Administration Section is one of five sections of the City EOC. The Finance/Administration Section coordinates all employee compensation, cost accounting, accounts payable, and cost recovery related to an emergency/event. The positions that can be activated for this section, as well as the departments staffing those positions, are as follows:

Positions	Staffing Department(s)/Division(s)
Time Unit	Emergency Management Staff
Cost Analysis Unit	Finance City Manager's Office - Budget
Payables Unit	Finance
Cost Recovery Documentation Unit	Finance City Manager's Office - Budget

These units will carry out the Emergency Management function, and are described further below. These units may be collocated offsite with the Finance Department, the City Manager's Office, and the Auditor's Office, respectively. Even if they are off-site, each branch will still maintain EOC unit functions. The EOC Finance/Administration Section Coordinator will be onsite at the EOC and will act as a liaison to those offsite branches.

2016 City of Berkeley Emergency Operations Plan

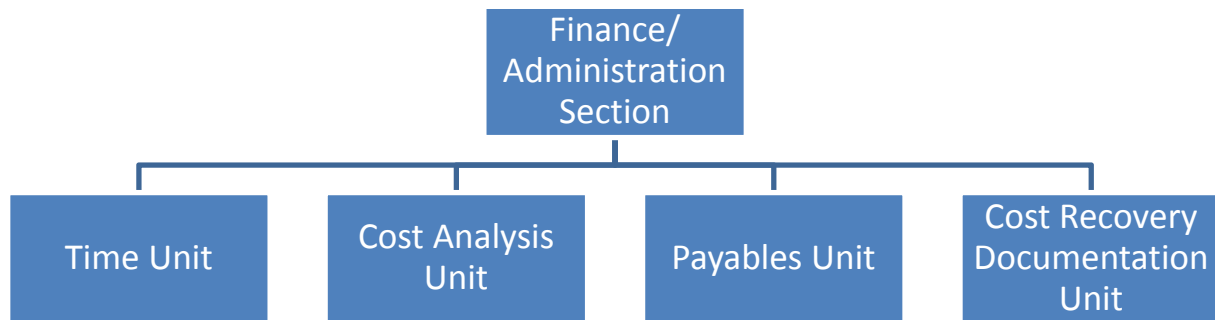

Figure 3-11: Finance/Administration Section Organization

Role and Responsibilities

The Finance/Administration function in the EOC coordinates all financial, administrative and cost analysis aspects of the emergency. The EOC Finance/Administration Section carries out the objectives of the EOC Action Plan.

Finance/Administration Section Coordinator

The Finance/Administration Section Coordinator will:

- Per City Manager direction, coordinate with Departments to ensure that they activate the City's disaster procedures, including the:
 - Disaster purchasing program⁴
 - Disaster procedures for reporting time, equipment and material use
 - Disaster employee compensation program⁵
- Coordinate within the Finance/Administration Section, with other EOC Sections, and with Departments (either directly or through their EOC representatives) to support EOC, Department and field staff in disaster procedure implementation
 - Provide guidance on disaster procedures or forward questions to the appropriate department or City Manager
 - Ensure that disaster procedure activation is documented in EOC Action Plan
- Provide administrative support to all EOC Sections as required, in coordination with the Logistics Section Personnel Unit
- Ensure that unit staff perform disaster cost recovery-related activities in a federally-compliant manner to facilitate potential reimbursement of response and recovery costs
- Ensure that required activities are completed in the absence of a Unit Coordinator.

The activities of each unit of the Finance/Administration Section are described below. In the initial stages of an emergency, these functions will be coordinated by the Finance/Administration Section Coordinator at the EOC. When these units are staffed, they may be collocated with the Finance Department, the City Manager's Office, and/or the Auditor's Office. In this case, the Finance/Administration Section Coordinator will function primarily as a liaison among the units of the EOC Finance/Administration Section.

⁴ The Disaster Purchasing program will direct procedures for use during a proclaimed emergency to authorize the commitment and payment of funds; purchase order limits for the purchasing function in the Logistics Section, use of credit and/or debit cards, etc.

⁵ Will establish employee compensation and leave guidelines during a proclaimed emergency.

2016 City of Berkeley Emergency Operations Plan

Time Unit

The Time Unit in the Finance/Administration Section will track and quantify time for all emergency response personnel and equipment during the response and recovery effort, and will provide support and guidance to departments to ensure that employees continue to receive pay, health insurance, and retirement benefits.

The Time Unit will implement the priorities of the EOC Action Plan assigned to the Unit. The Unit will:

- Via EOC Finance Section Coordinator, request current City Manager direction on emergency time tracking and payroll policy
- Establish and maintain contact with department Payroll Clerks and other staff involved in the timekeeping/payroll process regarding time tracking and payroll issues to ensure that:
 - Departments' timekeeping/payroll staff have necessary infrastructure support (e.g., power, internet access, FUNDS\$ access) to perform their duties
 - On-duty time is tracked and quantified for all emergency response personnel during the response and recovery efforts:
 - Collect all on-duty timesheets from EOC personnel
 - Ensure that Departments are collecting all on-duty timesheets from Field Level Supervisors or Incident Commanders and their staffs
 - Collect data from Department timesheets
 - Ensure that timesheets are completed correctly and work through appropriate channels to address errors
 - There is a continuum of the payroll process for all employees responding to the emergency.
- Consolidate personnel time records, travel expense claims and related forms and transmit to the Payables Unit for payment
- Coordinate with the EOC Plans/Intelligence Section Documentation Unit regarding storage of emergency time tracking documents

Payables Unit

The Payables Unit in the Finance/Administration Section will track and process payments of vendor purchase orders, contracts, claims, and other payments during the emergency.

The Payables Unit in the Finance/Administration Section may be offsite at the Finance Department, and if so will connect to the City EOC via the Finance/Administration Section Coordinator.

The Payables Unit will implement the priorities of the EOC Action Plan assigned to the Unit. The Unit will:

- Receive vendor invoices from vendor purchase orders and contracts and process for payment within a reasonable time, given the nature of the situation.
- Receive equipment and property damage claims resulting from the emergency/event and its response and process for payment within a reasonable time, given the nature of the situation.
- Receive travel and expense claims from the Time Unit, and process for payment within a reasonable time, given the nature of the situation.
- Track information on all payments and provide consolidated updates to the Cost Analysis Unit at regular intervals.
- Consolidate necessary documentation and provide to the Cost Recovery Documentation Unit at regular intervals.

2016 City of Berkeley Emergency Operations Plan

- Coordinate with the Logistics Section Supply/Procurement Unit on all matters involving the need to exceed established purchase order limits, consulting with the City Manager when a policy-level question arises or a change is necessary.
- Ensure that financial institutions honor City warrants and have adequate cash available during the emergency period.

Cost Analysis Unit

The Cost Analysis Unit in the Finance/Administration Section will ensure that an accurate accounting of the cost of responding to the emergency/event (including both response and recovery) is maintained.

The Cost Analysis Unit in the Finance/Administration Section may be offsite at the Finance Department or City Manager's Office, and if so will connect to the City EOC via the Finance/Administration Section Coordinator.

The Cost Analysis Unit will implement the priorities of the EOC Action Plan assigned to the Unit. The Unit will:

- Coordinate with the City's Budget Office to establish project codes associated with the emergency/event
 - Ensure codes are communicated to the EOC and departments
- Coordinate with other Finance/Administration Section units to implement disaster procedures for reporting time, equipment and material use⁶
- Receive consolidated cost information from the Time and Payables Units
- Prepare and maintain a cost report to include cumulative analysis, summaries and total expenditures related to the emergency
- Review existing documentation to determine if additional cost items may have been overlooked
- Consolidate cost analysis documentation and provide to the Cost Recovery Documentation Unit at regular intervals

Cost Recovery Documentation Unit

The Cost Recovery Documentation Unit in the Finance/Administration Section will coordinate collection and preparation of necessary documentation to support the cost recovery process.

The Cost Recovery Documentation Unit in the Finance/Administration Section may be offsite at the Finance Department or the City Manager's Office, and if so will connect to the City EOC via the Finance/Administration Section Coordinator.

The Cost Recovery Documentation Unit will implement the priorities of the EOC Action Plan assigned to the Unit. The Unit will:

- Communicate documentation requirements within the EOC and to Departments (either directly or through their EOC representatives)
- Coordinate with the Finance/Administration Section units to ensure that an accurate accounting of the cost of responding to the emergency/event (including both response and recovery) is maintained either on paper and/or within City financial systems

⁶ Disaster procedures for reporting time, equipment and material use will include an accounting system to collect and compile cost information at the end of each shift from all EOC sections and units, DOCs, and field units, including information on personnel, equipment, rental/contract equipment, supplies from outside vendors, and contracts for special or emergency services.

2016 City of Berkeley Emergency Operations Plan

- Ensure that the EOC and Departments have accurate records to document the cost of emergency response and recovery, including accounting codes, reimbursement forms, and other backup documentation, so that it can be submitted on the appropriate forms to the Federal Emergency Management Agency (FEMA) and/or the Governor's Office of Emergency Services.
 - Receive consolidated documentation from the Payables Unit, Time Unit, and Cost Analysis Unit at regular intervals
 - Work with Time Unit to ensure that all equipment used is tracked and quantified for all City and contract emergency personnel
 - Work with Payables Unit to ensure that all supplies procured are tracked and quantified for all City and contract emergency personnel
 - Receive and organize photo documentation from the Operations Support Section/DOCs
 - Prepare all required State and federal documentation as necessary to recover allowable costs

Section 4: Mutual Aid

Under the terms of California’s Disaster and Civil Defense Master Mutual Aid Agreement, Statewide emergency assistance is provided on a voluntary basis from one jurisdiction to another at no cost to the receiving jurisdiction. Mutual aid is intended to ensure that adequate resources, facilities, and other emergency support are provided to jurisdictions whenever their own resources prove to be inadequate to cope with a given situation.

To facilitate coordination and flow of mutual aid, Cal OES oversees six mutual aid regions among the three administrative regions, as shown in the figure at right. The City of Berkeley is located in Mutual Aid Region II within the Cal OES Coastal Region.

4.1 Mutual Aid Systems

The California Mutual Aid System operates within the framework of the Master Mutual Aid Agreement and under the authority of the California Emergency Services Act. The system is a formal process designed to mobilize resources to and from emergency response agencies, local governments, OAs, regions, and the State with the intent to provide requesting agencies with sufficient resources.

4.1.1 California Master Mutual Aid Systems

California’s master mutual aid systems are discipline-specific, and include Fire Service and Rescue, Law Enforcement, Emergency Services and Medical/Health Services as shown in the table below.

California Master Mutual Aid Systems

Coordinated by Cal OES			Coordinated by EMSA ¹
Fire Service and Rescue	Law Enforcement	Emergency Services ²	Medical/Health
Fire Service and Rescue Mutual Aid	Law Enforcement Mutual Aid	All other emergency services mutual aid not included in other systems	Disaster Medical/Health Mutual Aid
Urban Search and Rescue Mutual Aid	Coroner Mutual Aid	Emergency Managers Mutual Aid	Mental Health Mutual Aid
Hazardous Materials Mutual Aid	Search and Rescue Mutual Aid	Safety Assessment Program	Mass Care and Shelter Mutual Aid

4.1.2 Fire Service and Rescue Mutual Aid System

¹ California Emergency Medical Services Authority

² For the purposes of this plan, the term Emergency Services Mutual Aid also refers to non-discipline-specific mutual aid.

2016 City of Berkeley Emergency Operations Plan

The Fire Service and Rescue Mutual Aid System is designed to coordinate the mobilization, organization, and operation of necessary fire and rescue resources on a local, OA, regional, and statewide basis in order to mitigate the effects of disasters. The day-to-day operations of the Fire Service and Rescue Mutual Aid System are managed by the Cal OES Fire and Rescue Branch. For additional information regarding this system's organization, responsibilities, and procedures, refer to the *California Fire Service and Rescue Emergency Mutual Aid System, Mutual Aid Plan*.

4.1.3 Law Enforcement Mutual Aid System

Maintained by the Cal OES Law Enforcement Branch, the Law Enforcement Mutual Aid System is an ongoing cooperative effort among law enforcement agencies to coordinate State resources in support of local law enforcement during a wide range of emergencies. Law enforcement mutual aid is coordinated through seven mutual aid regions in California. Additional information on procedures, concepts, and state agency roles and resources within the system is available in the *California Law Enforcement Mutual Aid Plan*.

4.1.4 Emergency Services Mutual Aid System

The Emergency Services Mutual Aid System is also known as non-discipline-specific mutual aid, encompassing all other mutual aid that is not included in other systems.

- The Emergency Managers Mutual Aid (EMMA) is a sub-system that provides emergency management personnel from unaffected areas to support disaster operations in affected jurisdictions. Further information on EMMA can be found in the *Emergency Managers Mutual Aid Plan*.
- The Safety Assessment Program (SAP) is a sub-system that utilizes volunteers and mutual aid resources to provide professional engineers and architects and certified building inspectors to assist local governments in safety evaluation of their built environment in the aftermath of a disaster. Further information on SAP can be found in the *Post-Disaster Safety Assessment Program: Guideline to the Activation and Utilization of Program Resources* (March 2015).

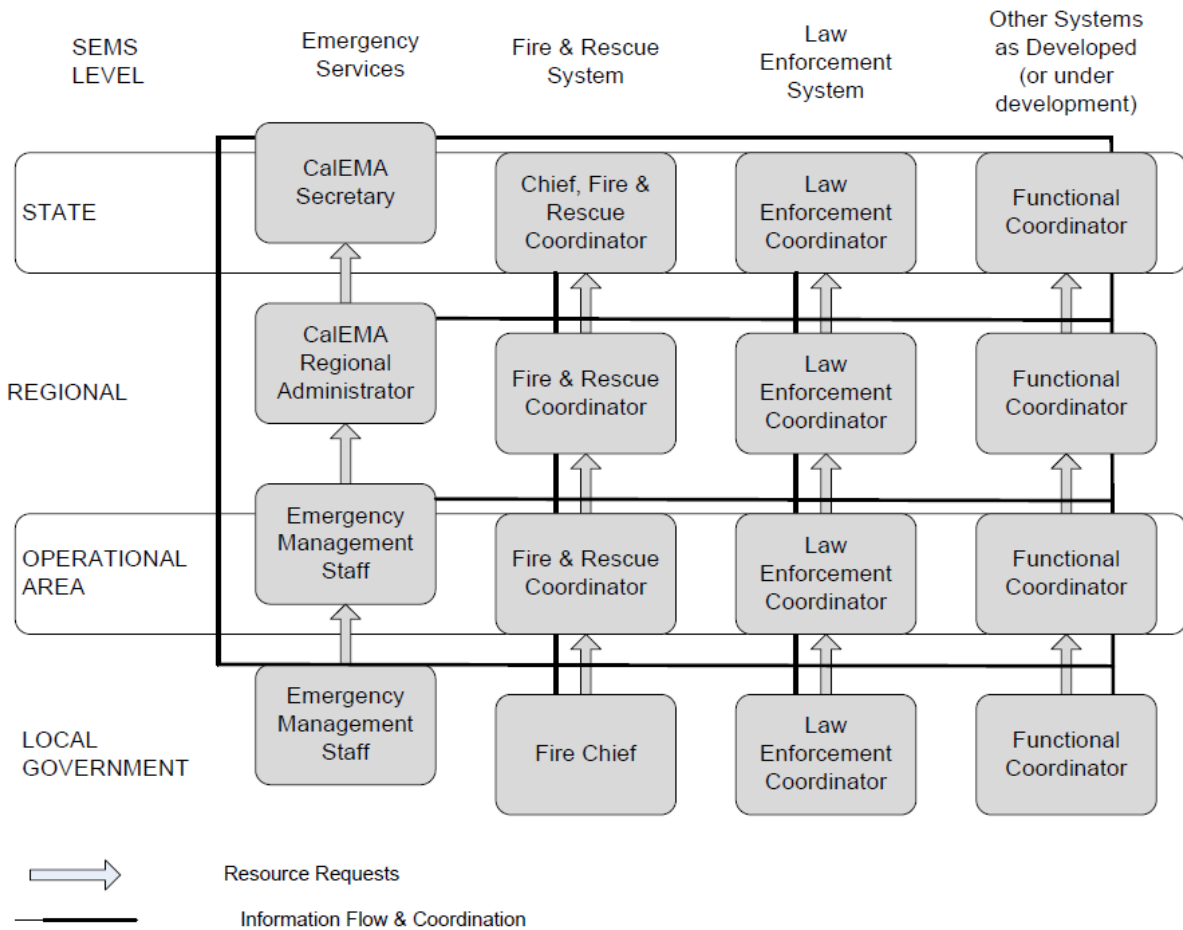

Requests are coordinated and met through utilization of the Standardized Emergency Management System (SEMS).

4.1.5 Medical/Health Mutual Aid System

The California Emergency Medical Services Authority (EMSA) administers the Medical/Health Mutual Aid System. The purpose of the system is to identify, attain, and mobilize medical supplies and personnel from unaffected regions of the state to meet the needs of disaster victims. The coordination and acquisition of Medical/Health Mutual Aid resources involves federal, State, and local agencies as well as the private sector (hospitals, medical supply vendors, ambulance companies, etc).

The figure that follows is from the *State of California Emergency Plan* (July 2009). It illustrates the flow of the four mutual aid channels and how they are coordinated at each SEMS level.

2016 City of Berkeley Emergency Operations Plan

Discipline-Specific Mutual Aid Systems

4.2 Mutual Aid Coordination

To facilitate mutual aid, mutual aid coordinators are designated at the OA, regional, and State levels. The basic role of a mutual aid coordinator is to receive requests, coordinate the provision of resources from within the coordinator's geographic area of responsibility, and pass on unfilled requests to the next level.

Representatives at Berkeley's DOCs and/or the EOC Operations Section will work with discipline-specific Mutual Aid Coordinators at the ALCO OA. Mutual aid requests that do not fall into one of the discipline-specific mutual aid systems will be handled through normal emergency services resource requesting processes, as outlined in Section 2.3.5 *Resource Management*.

4.3 Non-Governmental Organizations, Special Districts, and Private Sector Organizations Mutual Aid

The involvement of NGOs, special districts, and private sector organizations with City of Berkeley mutual aid will vary according to the resources that may be made available and the types of resources needed. Some organizations may use internally-established mutual aid systems/arrangements in order to acquire needed resources. For example, the American Red Cross will utilize the American Red Cross Disaster Operations Human Resources System (DOHR) when a disaster response

2016 City of Berkeley Emergency Operations Plan

requires greater resourcing than can be provided from the local district.

Resource needs that cannot be met through internal means will be requested through the California Mutual Aid System at the appropriate SEMS level. Organizations with extensive involvement in emergency response, such as the American Red Cross, may be represented in the City of Berkeley EOC or at an appropriate DOC. Other organizations may be asked to provide a representative to the EOC or a DOC if further collaboration is needed.

2016 City of Berkeley Emergency Operations Plan

Attachment I: List of Abbreviations and Acronyms

The following abbreviations and acronyms are used in this Emergency Operations Plan.

AC	Area Command
AFN	Access and Functional Needs
ALCO	Alameda County
B&S	Building & Safety
BEACON	Berkeley Emergency Accessible Community Organizations Network
Cal OES	State of California Office of Emergency Services
CERT	Community Emergency Response Team
ConOps	Concept of Operations
CRC	Community Resilience Center
DES	Director of Emergency Services
DOC	Department Operations Center
DOHR	American Red Cross Disaster Operations Human Resources System
DSW	Disaster Service Worker
EAP	Emergency Operations Center Action Plan
EBMUD	East Bay Municipal Utility District
EC	Emergency Coordinator (NALCO ARES)
EMAC	Emergency Management Assistance Compact
EMMA	Emergency Managers Mutual Aid
EMSA	California Emergency Medical Services Authority
EOC	Emergency Operations Center
EOP	Emergency Operations Plan
EPIW	Emergency Public Information and Warning
ESF	Emergency Support Function
FEMA	Federal Emergency Management Agency
GIS	Geographic Information System
HHCS	Health, Housing and Community Services Department
HR	Department of Human Resources
IAP	Incident Action Plan
ICP	Incident Command Post
ICS	Incident Command System
IT	Information Technology
LHMP	Local Hazard Mitigation Plan
MAC	Multi-Agency Coordination
MHOAC	Medical/Health Operational Area Coordinator
MMAA	California Disaster and Civil Defense Master Mutual Aid Agreement
NALCO ARES	Northern Alameda County Amateur Radio Emergency Service
NGO	Non-Governmental Organization

2016 City of Berkeley Emergency Operations Plan

NIMS	National Incident Management System
OA	Operational Area
OES	Office of Emergency Services
PIO	Public Information Officer
PRW	Department of Parks, Recreation, and Waterfront
PW	Department of Public Works
REOC	Regional Emergency Operations Center (State of California)
SAP	Safety Assessment Program
SEMS	Standardized Emergency Management System
UC	Unified Command
UCP	Unified Command Post
WUI	Wildland-Urban Interface

Attachment 2: List of Functional Annexes and Hazard-Specific Appendices

This attachment describes other Annexes and Appendices that will join this Base Plan to become part of the City of Berkeley's Emergency Operations Plan (EOP).

These plans are termed either:

- *Functional Annexes*, which will detail the operations involved in one Emergency Support Function (ESF). See Section 2.3.1: *Emergency Support Functions* for additional information about ESFs; or
- *Hazard-Specific Appendices*, which will build on Functional Annexes to address particular response needs, challenges, and ESF coordination requirements for particular hazard events.

Emergency Operations Plan: Functional Annexes	
Emergency Support Function (ESF)	Description
1. Transportation	<ul style="list-style-type: none"> • Traffic restrictions • Transportation safety • Citywide Transportation Plan development • Restoration and recovery of transportation systems, facilities, and infrastructure • Community transportation support • Coordination with ESF 12: Utilities • Coordination with transportation partners (federal, State, County, and local, including private and public)
2. Communications and Information Systems	<ul style="list-style-type: none"> • Monitoring, inspection, restoration and repair of communication system infrastructure, including: <ul style="list-style-type: none"> ○ Phone ○ Radio ○ Wireless ○ Fiber ○ City network ○ Internet ○ Auxiliary communications • Citywide Communications Plan development • Coordination with communication system partners (federal, State, and local, including private and public)
3. Public Works and Engineering	<ul style="list-style-type: none"> • Inspection, restoration and repair of infrastructure, including: <ul style="list-style-type: none"> ○ Roadways, bridges, and traffic signals ○ Buildings and facilities (City-owned and other) ○ City-managed storm drain and wastewater

Emergency Operations Plan: Functional Annexes	
Emergency Support Function (ESF)	Description
	<ul style="list-style-type: none"> systems <ul style="list-style-type: none"> ○ Privately-managed utility systems, including water, gas and electricity • Coordination with ESF 1: Transportation and ESF 12: Utilities • Safety assessment • Damage assessment • Debris management in coordination with ESF 10: Oil and Hazardous Materials Response, including: <ul style="list-style-type: none"> ○ Street clearance/removal ○ Storage, sorting, recycling and recovery ○ Coordination with contract providers • Engineering services • Construction management • Coordination with public works and engineering partners (federal, State, and local, including private and public)
4. Fire and Rescue	<ul style="list-style-type: none"> • Detection and suppression of fires • Coordination with the Fire and Rescue Mutual Aid System for firefighting personnel, equipment and supplies • Coordination with fire and rescue partners (federal, State, and local, including private and public)
5. Emergency Management	<ul style="list-style-type: none"> • Emergency Operations Center support during incident response, including information collection, analysis, operations support, planning, requests for assistance, resource management, deployment and staffing, mutual aid, facilities management, and financial management • Communication and coordination among key elements of Berkeley’s Multi-Agency Coordination System and external emergency management partners, including: <ul style="list-style-type: none"> ○ EOC sections and branches ○ City Manager/DES ○ Policy Group and policy support staff ○ Departments/Department Operations Centers (DOCs) ○ Alameda County Operational Area (ALCO OA) EOC ○ Other OA/State/federal partners who establish a direct relationship with the City ○ Other private and public EOCs that establish a direct relationship with the City. • Coordination with the Emergency Management Mutual Aid (EMMA) System

Emergency Operations Plan: Functional Annexes	
Emergency Support Function (ESF)	Description
6. Mass Care and Recovery Support	<ul style="list-style-type: none"> • Mass care operations, including: <ul style="list-style-type: none"> ○ Sheltering, including: <ul style="list-style-type: none"> ▪ Basic health services (in coordination with ESF #8: Health and Medical) ▪ Animal sheltering (in coordination with ESF #11: Animal Response) ○ Feeding ○ Bulk distribution ○ Family reunification • Recovery support operations, including: <ul style="list-style-type: none"> ○ Temporary or interim housing ○ Local Assistance Centers • Coordination with mass care and recovery support partners (federal, State, and local, including private and public)
7. Logistics	<ul style="list-style-type: none"> • Coordination of resources needed to support planned events, emergency response, and recovery operations • Management of supplies and materials not normally provided through discipline-specific mutual aid channels (e.g. food, water, fuel), including: <ul style="list-style-type: none"> ○ Resource tracking and inventory ○ Procurement, allocation, delivery, and demobilization ○ Forecasting of material and equipment shortfalls ○ Pre-identification of vendors and other sources • Facilities management, including: <ul style="list-style-type: none"> ○ Identification of City facilities and facilities from other sources ○ Facility status tracking (in coordination with ESF #3: Public Works and Engineering) ○ Facility assignment, agreements, inspections, and demobilization/restoration post-use ○ Forecasting of facility needs/shortfalls • Personnel and staffing management, including: <ul style="list-style-type: none"> ○ Tracking personnel needs ○ Acquisition, tracking, basic orientation/training, and support of additional Disaster Service Workers (DSWs), including City response personnel and volunteers. ○ Spontaneous volunteer management, including identification, registration, basic orientation/training, and support ○ Food and shelter for assigned personnel/volunteers

Emergency Operations Plan: Functional Annexes	
Emergency Support Function (ESF)	Description
	<ul style="list-style-type: none"> • Donations management, including: <ul style="list-style-type: none"> ○ Management and tracking of: <ul style="list-style-type: none"> ▪ Monetary donations ▪ In-kind donations ▪ Materials and equipment for clean-up, repair, and rebuilding ▪ Goods and services for medical care and public health ▪ Case management, technical services, information and support services, and other forms of volunteered expertise ○ Public messaging related to donated goods and services (in coordination with ESF 15: Public information) ○ Coordination with pre-designated Disaster Relief Agencies to effectively manage call centers, donations management staging areas and distribution sites • Coordination with ESF 14: Long-Term Recovery to ensure that activities are performed to facilitate maximum disaster cost recovery
8. Public Health and Medical Services	<ul style="list-style-type: none"> • Public health, medical, environmental health, and behavioral health services, including: <ul style="list-style-type: none"> ○ Assessment of public health/medical needs ○ Health surveillance ○ Health/medical personnel, equipment and supplies ○ Patient evacuation ○ Patient care (in coordination with ESF #6: Mass Care and Recovery Support) ○ Food safety and security ○ Public health and medical information (in coordination with ESF 15: Public information) ○ Vector control ○ Potable water/wastewater and solid waste disposal ○ Fatality management, including coordination with the County Coroner on law enforcement-related issues • Coordination with the Medical/Health Mutual Aid System (local, State and federal) • Coordination with public health and medical partners (federal, State, and local, including private and public)
9. Urban Search and Rescue	<ul style="list-style-type: none"> • Location, rescue (extrication), and initial medical stabilization of victims trapped in confined spaces

2016 City of Berkeley Emergency Operations Plan

Emergency Operations Plan: Functional Annexes	
Emergency Support Function (ESF)	Description
	<ul style="list-style-type: none"> • Includes heavy rescue, collapsed structure rescue, confined space rescue, high- and low- angle rescue • Coordination with the Fire and Rescue Mutual Aid System (local, State and federal) • Coordination with urban search and rescue partners (federal, State, and local, including private and public)
10. Oil and Hazardous Materials Response	<ul style="list-style-type: none"> • Inland and marine oil and hazardous materials (chemical, biological, radiological, etc.) response • May include household hazardous waste collection, monitoring of debris disposal, water quality monitoring and protection, air quality sampling and monitoring, and protection of natural resources. • Coordination with oil/hazardous materials response partners (federal, State, and local, including private and public)
11. Animal Response	<ul style="list-style-type: none"> • Response and recovery during emergencies involving animals, including: <ul style="list-style-type: none"> ○ Public information (in coordination with ESF 15: Public information) ○ Field response ○ Animal sheltering (in coordination with ESF #6: Mass Care and Recovery Support) ○ Reunification of domestic animals with owners • Coordination with animal response partners (federal, State, and local, including private and public)
12. Utilities	<ul style="list-style-type: none"> • Assessment, restoration and repair of utilities, including stabilizing or resuming utility operations and replacing temporary and permanent infrastructures • Municipal and non-municipal utilities <ul style="list-style-type: none"> ○ Water and wastewater systems; electric service; natural gas, oil, and fuel pipelines in coordination with ESF 1: Transportation and ESF 3: Public Works and Engineering ○ Telecommunications, internet, and cable TV and satellite service, in coordination with ESF 2: Communications • Coordination of restoration/repair efforts for disrupted municipal services with utility services • Coordination with utility partners (federal, State, and local, including private and public) to ensure timely restoration of utilities
13. Law Enforcement	<ul style="list-style-type: none"> • Public safety/security support • Support for access, traffic, and crowd control issues • Coordination with the Law Enforcement Mutual Aid

Long-Term Recovery	<ul style="list-style-type: none"> • Coordination and support to ensure all activities and supporting processes are performed and documented in a manner that enables maximum disaster cost recovery, especially through close coordination with: <ul style="list-style-type: none"> ○ ESF 7: Logistics ○ ESF 5: Emergency Management • Long-term recovery assistance, including restoration of: <ul style="list-style-type: none"> ○ Infrastructure ○ Housing ○ Local economy • Protection and restoration of natural and cultural resources and historic properties
15. Public Information	<ul style="list-style-type: none"> • Joint information center establishment • Public warnings: collection, analysis and dissemination of life-safety instructions using public warning systems • Emergency public information: collect, analyze, and disseminate critical event information • Traditional and social media relations • Coordination with regional Joint Information System partners (federal, State and local, including private and public)
16. Evacuation	<ul style="list-style-type: none"> • Coordination to identify and define the population requiring evacuation with: <ul style="list-style-type: none"> ○ ESF 4: Fire and Rescue for evacuation due to fire ○ ESF 8: Public Health and Medical Response for evacuation due to public health hazards ○ ESF 10: Oil and Hazardous Materials Response for evacuation due to hazardous materials release ○ ESF 12: Utilities for evacuation due to utility outages or related utility hazards ○ With ESF 13: Law Enforcement for evacuation due to crime-related hazards • Coordination to execute evacuation with: <ul style="list-style-type: none"> ○ ESF 1: Transportation and ESF 3: Public Works and Engineering to define evacuation routes and transportation support needs ○ ESF 11: Animal Support to support animal evacuation ○ ESF 13: Law Enforcement to issue evacuation orders and facilitate evacuation operations

2016 City of Berkeley Emergency Operations Plan

Emergency Operations Plan: Functional Annexes	
Emergency Support Function (ESF)	Description
	<ul style="list-style-type: none"> • Coordination to support evacuation operations with: <ul style="list-style-type: none"> ○ ESF 6: Mass Care and Recovery Support and ESF 11: Animal Support to manage mass care and shelter support needs of evacuated populations ○ ESF 7: Logistics to coordinate identification and deployment of needed resources (supplies/materials/equipment/personnel/facilities) ○ ESF 15: Public Information and ESF 17: Community Support to communicate evacuation orders and maintain communication with evacuated populations and community stakeholders
17. Community Support	<ul style="list-style-type: none"> • Coordination of information and requests originating from external response partners in the community, including: <ul style="list-style-type: none"> ○ Private Sector ○ Educational institutions ○ Community-based organizations, including Community Resilience Centers and Berkeley Emergency Accessible Community Organization Network (BEACON) organizations ○ Community Emergency Response Teams

Hazard-Specific Appendix List

When developed, the EOP’s Hazard-Specific Appendices will address particular hazard events, including but not limited to:

- Earthquake
- Wildland-Urban Interface (WUI) fire
- Landslide
- Severe storms and flooding
- Tsunami
- Hazardous materials release
- Terrorism

Attachment 3: Distribution List

City of Berkeley

City Manager

Deputy City Manager

City Attorney

City Auditor

City Clerk

Finance Department Director

Fire Chief

Fire Department Special Operations Division Assistant Chief

Health, Housing and Community Services Department Director

Human Resources Department Director

Information Technology Department Director

Library Director

Planning and Development Department Director

Police Chief

Parks, Recreation and Waterfront Department Director

Public Works Department Director

External Partners

Alameda County Office of Emergency Services - Emergency Services Supervisor

American Red Cross – Alameda/Contra Costa Disaster Program Manager

Berkeley Unified School District - Superintendent

Lawrence Berkeley National Lab - Protective Services Manager

Northern Alameda County Amateur Radio Emergency Services/Radio Amateur Civil
Emergency Services - President

UC Berkeley Office of Emergency Management - Manager

Attachment 4: Department-EOC Emergency Support Function Chart

Each of Berkeley's Emergency Support Functions (ESFs):

- Is coordinated by one department or Emergency Operations Center (EOC) Section, and
- May be supported by multiple departments and/or EOC Section(s).

If the activities involved in an ESF (see Attachment 2: *List of Functional Annexes and Hazard-Specific Appendices* for details) are primarily the responsibility of one department, that department will coordinate the ESF. If multiple departments have primary roles in implementing the ESF, the ESF's activities will be coordinated from the EOC.

The chart below identifies Berkeley's ESFs, and coordinating (C) and supporting (S) departments or EOC Sections.

DOJ Medical Release Form BCIA 4048 Spanish.pdf

**AUTORIZACIÓN PARA
DIVULGAR RADIOGRAFÍAS
DENTALES/ESQUELÉTICAS/
NOTAS DE TRATAMIENTO/FOTOGRAFÍA
DE UN MENOR DESAPARECIDO**

NOMBRE DEL MENOR DESAPARECIDO	
AGENCIA DENUNCIANTE Y NÚMERO DE CASO	PARTE DENUNCIANTE

Bajo la sección 14212 del Código Penal de California, los familiares o las personas más cercanas a cualquier menor de 18 años de edad que cuya desaparición haya sido reportada y a quien no se haya podido ubicar en un plazo de 30 días, pueden autorizar la divulgación de radiografías dentales y/o esqueléticas, notas de tratamiento y una fotografía reciente del menor desaparecido. Este formulario de divulgación **deberá** ser entregado al dentista, médico o cirujano, o a la institución médica de la persona desaparecida, para conseguir que se libere el uso de sus radiografías dentales o esqueléticas y las notas de tratamiento. Las radiografías dentales y/o esqueléticas **deberán** ser entregadas a la persona que presenta esta solicitud. La persona que reciba esta documentación **deberá**, en un plazo de 10 días, llevarla al departamento de policía o del alguacil, o a otra agencia del orden público que tenga jurisdicción sobre la investigación.

Si se encuentra al menor desaparecido, notifique a la agencia del orden público **inmediatamente**.

AUTORIZACIÓN

Soy un familiar o la persona más cercana del menor desaparecido nombrado precedentemente, y por la presente autorizo la divulgación de todas sus radiografías dentales o esqueléticas y notas de tratamiento, con el fin de ayudar a las agencias del orden público a localizarlo. También doy permiso para que se divulgue una fotografía, la descripción física y las circunstancias que rodean la desaparición del menor nombrado precedentemente. El Departamento de Justicia podrá incluir esta información en los boletines y afiches de niños desaparecidos que se distribuirán a lo largo de California a las agencias del orden público, escuelas primarias y preparatorias, edificios del estado, áreas de descanso apropiadas en las carreteras y otras partes que el Departamento de Justicia considere apropiadas para ayudar a ubicar al menor desaparecido, como el sitio web del Procurador General, www.caag.state.ca.us.

**AUTHORIZATION TO RELEASE
DENTAL/SKELETAL X-RAYS/TREATMENT
NOTES/PHOTOGRAPH OF MISSING
JUVENILE**

NAME OF MISSING JUVENILE	
REPORTING AGENCY AND CASE NUMBER	REPORTING PARTY

Under California Penal Code Section 14212, the family or next-of-kin of any person under the age of 18 years who is reported missing and has not been located within 30 days may authorize the release of the dental or skeletal X-rays, or both, and treatment notes and a recent photograph of the missing juvenile. This release form **shall** be taken to the dentist, physician and surgeon, or medical facility of the missing person to obtain the release of the dental or skeletal X-rays and treatment notes. The dental or skeletal X-rays, or both, **shall** be released to the person presenting this request. The person to whom the records are released **shall**, within 10 days, bring those records to the police or sheriff's department or other law enforcement agency having jurisdiction over the investigation.

If your missing juvenile is found, please notify the law enforcement agency **immediately**.

AUTHORIZATION

I am a family member or next-of-kin of the above-named missing juvenile and I hereby authorize the release of all dental or skeletal X-rays and treatment notes to assist law enforcement agencies in locating the above-named missing juvenile. I also consent to the release of the above-named missing juvenile's photograph, physical description, and circumstances surrounding the disappearance. This information may be used by the Department of Justice for inclusion in missing children bulletins and posters which will be distributed throughout California to law enforcement agencies, elementary and secondary schools, state buildings, appropriate roadside rest areas, and other parties determined appropriate by the Department of Justice to assist in locating the missing juvenile, including the Attorney General's Web Site at www.caag.state.ca.us.

DEPARTMENTAL ORDER

CAPTAIN'S INSTRUCTION #2018-001

DATE ISSUED: 05/10/18

SUBJECT: AEGIS PASSWORD POLICY

Effective immediately, the following **Aegis password** polices will be in place:

- Passwords must be a minimum length of 8 characters
- Passwords require at least one number
- Passwords must differ from your user ID
- Passwords must differ from your previous 10 passwords
- Passwords must be changed every 90 days
- Auto-login to all modules will be disabled

DOJ National Protocol.pdf

A National Protocol for Sexual Assault Medical Forensic Examinations

**Adults/Adolescents
Second Edition**

**U.S. Department of Justice
Office on Violence Against Women**

April 2013

NCJ 228119

Acknowledgments

Many individuals contributed their skills and expertise to the development of this protocol. Special appreciation goes to Kristin Littel, who served as the primary writer and researcher for the protocol. We would also like to thank the Office for Victims of Crime for initiating this project and for providing feedback and guidance throughout the drafting process. We are grateful to all of the women and men who gave their time and energy to attend the focus groups, participate in the conference calls, and review numerous drafts of the protocol; their efforts greatly enhanced the final product. We are particularly grateful for the assistance of Gail Burns Smith who, in addition to participating in focus groups and conference calls and submitting insightful comments on drafts, also was responsible for suggesting and organizing conference calls with victims to ensure the victim-centeredness of the protocol.

Foreword

Sexual violence continues to plague our Nation and destroy lives. All members of society are vulnerable to this crime, regardless of race, age, gender, ability, or social standing. When sexual assault does occur, victims deserve competent and compassionate care. This second edition of the *National Protocol for Sexual Assault Medical Forensic Examinations* provides detailed guidelines for criminal justice and health care practitioners in responding to the immediate needs of sexual assault victims. We know that effective collection of evidence is of paramount importance to successfully prosecuting sex offenders. Just as critical is performing sexual assault forensic exams in a sensitive, dignified, and victim-centered manner. For individuals who experience this horrendous crime, having a positive experience with the criminal justice and health care systems can contribute greatly to their overall healing.

As we have learned in the years since the implementation of the 1994 Violence Against Women Act, coordinated community efforts are the best way to stop violence against women, hold offenders accountable for their crimes, and promote victim healing and recovery. That is why this protocol was designed as a guide for practitioners who respond to victims of sexual assault, including health care professionals, law enforcement officers, prosecutors, interpreters, advocates, and others. Combining cutting edge response techniques with collaboration among service providers will greatly enhance our ability to treat and support victims as well as identify and prosecute the sex offenders. We hope that this protocol lays the foundation for these efforts.

Since this protocol was initially released in 2004, the “state of the art” for forensic medical examinations has improved. This revised edition of the protocol has the same emphasis and values as the original but has been updated to reflect current technology and practice. It has also been updated to include additional information reflecting changes from the Violence Against Women Act of 2005. It also includes minor technical changes identified in May, 2013.

Appendix C. Impact of <i>Crawford v. Washington</i>, <i>Davis v. Washington</i> and <i>Giles v. California</i>	135

Goals of the National Protocol for Sexual Assault Medical Forensic Examinations

Sexual assault is a crime of violence against a person's body and will. Sex offenders use physical and/or psychological aggression or coercion to victimize, in the process often threatening a victim's sense of privacy, safety, autonomy, and well-being. Sexual assault can result in physical trauma and significant mental anguish and suffering for victims. In some communities, sexual violence is considered a form of oppression. Victims may be reluctant, however, to report the assault to law enforcement and to seek medical attention for a variety of reasons. For example, victims may blame themselves for the sexual assault and feel embarrassed. They may fear their assailants or worry about whether they will be believed. Victims may also lack the ability or emotional strength to access services. For example, they may not have their own transportation or access to public transportation. They may also not speak English well or fear that reporting the assault may jeopardize their immigration status.¹ They may lack health insurance and believe it would be too costly to get the medical care they need. They may not be aware that as a crime victim, they are eligible for financial reimbursements for certain services. Their budgets may not allow them to pay out-of-pocket expenses and then await reimbursements. Those who do have access to services may perceive the medical forensic examination as yet another violation because of its extensive and intrusive nature in the immediate aftermath of the assault. Rather than seek assistance, a sexual assault victim may simply want to go somewhere safe, clean up, and try to forget the assault ever happened.² It is our hope that this protocol will help jurisdictions in their efforts to respond to sexual assault victims in the most competent, compassionate, and understanding manner possible.

This protocol was developed with the input of national, local, and tribal experts throughout the country, including law enforcement representatives, prosecutors, advocates, medical personnel, forensic scientists, and others. We hope that this protocol will be useful in helping jurisdictions develop a response that is sensitive to victims of sexual assault and that promotes offender accountability. Specifically, the protocol has the following goals:

- Supplement, but not supersede, the many excellent protocols that have been developed by states, tribes, and local jurisdictions, as well as those created at the national level. We hope that this protocol will be a useful tool for jurisdictions wishing to develop new protocols or revise their existing ones. **It is intended as a guideline for suggested practices rather than a list of requirements.** In many places, the protocol refers to "jurisdictional policies" because there may be multiple valid ways to handle a particular issue and which one is best should be determined by the jurisdiction after consideration of local laws, policies, practices, and needs.
- Provide guidance to jurisdictions on responding to adult and adolescent victims. Adolescents are distinguished in the protocol from prepubertal children who require a pediatric exam. **Pediatric exams are not addressed in this document. This protocol generally focuses on the examination of females who have experienced the onset of menarche and males who have reached puberty.** Legally, jurisdictions vary in the age at which they consider individuals to be minors, laws on child sexual abuse, mandatory reporting policies for sexual abuse and assault of minors, instances when minors can consent to treatment and evidence collection without parental/guardian involvement, and the scope of confidentiality that minors are afforded. **If the adolescent victim is a minor under the jurisdictional laws, the laws of the jurisdiction governing issues such as consent to the exam, mandatory reporting, and confidentiality should be followed.**
- Support the use of coordinated community responses to sexual violence, such as Sexual Assault Response Teams (SARTs) or Sexual Assault Response and Resource Teams (SARRTs). Although

¹ Carolyn Ham, *Reducing Language Barriers to Combating Domestic Violence: The Requirements of Title VI*, Battered Women's Justice Project, October 2004, http://new.vawnet.org/summary.php?doc_id=1621&find_type=web_desc_GC.

² Paragraph adapted in part from the *Ohio Protocol for Sexual Assault Forensic and Medical Examination*, 2004, p. 2. <http://www.odh.ohio.gov/~media/ODH/ASSETS/Files/hpr/sexual%20assault/adultprotocol2011.ashx>.

this document is directed primarily toward medical personnel and facilities, it also provides guidance to other key responders such as advocates and law enforcement representatives. This type of coordinated community response is supported by the Violence Against Women Act and subsequent legislation. Such a response can help afford victims access to comprehensive immediate care, minimize the trauma victims may experience, and encourage them to utilize community resources. It can also facilitate the criminal investigation and prosecution, increasing the likelihood of holding offenders accountable and preventing further sexual assaults.

- Address the needs of victims while promoting the criminal justice system response. Stabilizing, treating, providing social and legal services, including knowledge of immigration protections, and engaging victims as essential partners in the criminal investigation are central aspects of the protocol. Thus, this protocol includes information about concepts such as “anonymous reporting,” which may give victims needed time to decide if and when they are ready to engage in the criminal justice process. An anonymous report may also provide law enforcement agencies with potentially useful information about sex crime patterns in their jurisdictions.³ The objective is to promote better and more victim-centered⁴ evidence collection, in order to provide better assistance in court proceedings and hold more offenders accountable.
- Promote high-quality, sensitive, and supportive exams for all victims, regardless of jurisdiction and geographical location of service provision. The protocol offers recommendations to help standardize the quality of care for sexual assault victims throughout the country and is based on the latest scientific evidence. It also promotes timely evidence collection that is accurately and methodically gathered, so that high-quality evidence is available in court.

This protocol discusses the roles of the following responders: health care providers, advocates, law enforcement representatives, forensic scientists, and prosecutors, as well as interpreters. Clearly, each of these professions has a distinct and complementary role in responding to sexual assault. But rather than dictate who is responsible for every component of the response or within the exam process, the protocol is designed to help communities consider what each procedure involves and any related issues. With this information, each community can make decisions for its jurisdiction about the specific tasks of each responder during the exam process and the coordination needed among responders. The following is a general description of the responsibilities with which each responder may assist:⁵

- **Advocates** may be involved in initial victim contact (via 24-hour hotline or face-to-face meetings); offer victims advocacy, support, crisis intervention, information, language assistance services, including interpreters, and referrals before, during, and after the exam process; and help ensure that victims have transportation to and from the exam site. They often provide comprehensive, longer term services designed to aid victims in addressing any needs related to the assault, including but not limited to counseling, legal (civil, criminal, and immigration), and medical system advocacy.
- **Law enforcement representatives** (e.g., 911 dispatchers, patrol officers, officers who process crime scene evidence, detectives, and investigators) respond to initial complaints, work to enhance victims’ safety, arrange for victims’ transportation to and from the exam site as needed, interview victims in a language they understand, collect evidence from the scene, coordinate collection and delivery of evidence to designated labs or law enforcement facilities, interview suspects, and conduct other investigative activities (such as interviewing suspects and witnesses in a language they

³ States are responsible for ensuring that the costs associated with performing a medical forensic examination are paid and ensuring that all victims of sexual assault are provided the opportunity to have a medical forensic examination conducted, regardless of whether they choose to participate in the criminal justice system.

⁴ Please see the section on “Victim-Centered Care” beginning on page 29 for more explanation of this term.

⁵ There are instances where a case may be prosecuted concurrently in two or more jurisdictions. For example, sexual assault cases occurring on Indian reservations can be prosecuted concurrently in tribal and state or federal court. In such situations, each sovereign will likely have its own victims’ advocate, law enforcement, prosecutor, and judicial/court officers. Coordination of services in multijurisdictional investigations and prosecutions is critical to the success of the criminal case and the well-being and healing of the victim.

understand, requesting crime lab analyses, reviewing medical and lab reports, preparing and executing search and arrest warrants, writing reports, and presenting the case to a prosecutor).

- **Health care providers** assess patients for acute medical needs and provide stabilization, treatment, and/or consultation. Ideally, sexual assault forensic examiners perform the medical forensic exam, gather information for the medical forensic history, collect and document forensic evidence, and document pertinent physical findings from patients. They offer information, treatment, and referrals for sexually transmitted infections (STIs),⁶ and other nonacute medical concerns; assess pregnancy risk and discuss treatment options with the patient, including reproductive health services; and testify in court if needed. They coordinate with advocates to ensure patients are offered crisis intervention, support, and advocacy before, during, and after the exam process and encourage use of other victim services. They may follow up with patients for medical and forensic purposes. Other health care personnel who may be involved include, but are not limited to, emergency medical technicians, staff at hospital emergency departments, gynecologists, surgeons, private physicians, health care interpreters, and/or local, tribal, campus, or military health services personnel.
- **Forensic scientists** analyze forensic evidence and provide results of the analysis to investigators and/or prosecutors. They also may testify at trial regarding the results of their analysis.
- **Prosecutors** determine if there is sufficient evidence for prosecution and, if so, prosecute the case. They should be available to consult with first responders as needed. A few jurisdictions involve prosecutors more actively, paging them after initial contact and having them respond to the exam site so that they can become familiar with the case and help guide the investigation.

This document is intended only to improve the criminal justice system’s response to victims of sexual assault and the sexual assault forensic examination process. It does not address the remedies that may be available to victims through the civil justice system, and does not create a right or benefit, substantive or procedural, for any party.

⁶ STIs are also commonly known as sexually transmitted diseases (STDs).

Recommendations at a Glance: A National Protocol for Sexual Assault Medical Forensic Examinations

The National Protocol for Sexual Assault Medical Forensic Examinations offers guidance to jurisdictions in creating and implementing their own protocols, as well as recommending specific procedures related to the exam process. *Recommendations at a Glance* highlights key points discussed in the protocol, but it is not designed to be a stand-alone checklist on exam procedures or responsibilities of each involved responder. The protocol should be read to understand and respond to the complex issues presented during the exam process. See the protocol introduction for an explanation of select terms used in this chapter and the protocol.

Goal of the Protocol

A timely, high-quality medical forensic examination can potentially validate and address sexual assault patients'⁷ concerns, minimize the trauma they may experience, and promote their healing. At the same time, it can increase the likelihood that evidence collected will aid in criminal case investigation, resulting in perpetrators being held accountable and further sexual violence prevented.

The examination and the related responsibilities of health care personnel are the focus of this protocol. Recognizing that multidisciplinary coordination is vital to the success of the exam, the protocol also discusses the responses of other professionals, as they relate to the exam process.

A. Overarching Issues

1. Coordinated approach: A coordinated, multidisciplinary approach to conducting the exam provides victims⁸ with access to comprehensive immediate care, helps minimize trauma they may experience, and encourages their use of community resources. Such a response can also enhance public safety by facilitating investigation and prosecution, which increases the likelihood that offenders will be held accountable for their actions. Raising public awareness about the existence and benefits of a coordinated response to sexual assault may lead more victims to disclose the assault and seek help. (SEE PAGES 23–29)

Recommendations for jurisdictions to facilitate a coordinated approach to the exam process:

- Understand that the purposes of the exam process are to address patients' health care needs and collect evidence suitable for possible use by the criminal justice system.
- Identify key responders and their roles.
- Develop quality assurance measures to ensure effective response during the exam process.

2. Victim-centered care: Victim-centered care is paramount to the success of the exam process. Response to victims should be timely, appropriate, sensitive, and respectful. (SEE PAGES 30-45)

Recommendations for health care providers and other responders to facilitate victim-centered care:

- Give sexual assault patients priority as emergency cases.
- Provide the necessary means to ensure patient privacy.
- Adapt the exam process as needed to address the unique needs and circumstances of each patient.

⁷ Sexual assault patients are also referred to as victims, depending on which responders are primarily being discussed. The term "patients" is generally used by health care professionals.

⁸ The term "victim" is not used in a strictly criminal justice context. The use of "victim" simply acknowledges that persons who disclose that they have been sexually assaulted should have access to certain services.

- Develop culturally responsive care and be aware of issues commonly faced by victims from specific populations.
- Recognize the importance of victim services within the exam process.
- Accommodate patients' requests to have a relative, friend, or other personal support person (e.g., religious and spiritual counselor/advisor/healer) present during the exam, unless considered harmful by responders.
- Accommodate patients' requests for responders of a specific gender throughout the exam as much as possible.
- Prior to starting the exam and conducting each procedure, explain to patients in a language the patients understand what is entailed and its purpose.
- Assess and respect patients' priorities.
- Integrate medical and evidentiary procedures where possible.
- Address patients' safety during the exam.
- Provide information that is easy for patients to understand, in the patient's language, and that can be reviewed at their convenience.
- Address physical comfort needs of patients prior to discharge.

3. Informed consent: Patients should understand the full nature of their consent to each exam procedure. By presenting them with relevant information, in a language they understand, patients are in a position to make an informed decision about whether to accept or decline a procedure. However, they should be aware of the potential impact of declining a particular procedure, as it may negatively affect the quality of care, the usefulness of evidence collection, and, ultimately, any criminal investigation and/or prosecution. They should understand that declining a particular procedure might also be used against them in any justice system proceeding. If a procedure is declined, reasons why should be documented if the patient provides such information. (SEE PAGES 47-49)

Recommendations for health care providers and other responders to request patients' consent during the exam process:

- Seek the informed consent of patients as appropriate throughout the exam process.
- Make sure policies exist to guide the process of seeking informed consent from specific populations.

4. Confidentiality: Involved responders must be aware of the scope and limitations of confidentiality related to information gathered during the exam process. Confidentiality is intricately linked to the scope of patients' consent. Members of a sexual assault response team (SART) or other collaborating responders should inform victims of the scope of confidentiality with each responder and be cautious not to exceed the limits of victim consent to share information in each case. (SEE PAGES 51-53)

Recommendations that jurisdictions may take to maintain confidentiality of patients:

- Be sure jurisdictional policies address the scope and limitations of confidentiality as it relates to the exam process and with whom information can be legally and ethically shared.
- Increase the understanding of relevant confidentiality issues. .
- Consider the impact of the federal privacy laws regarding health information on victims of sexual assault.
- Strive to resolve intrajurisdictional conflicts.

5. Reporting to law enforcement: Reporting the crime provides the criminal justice system with the opportunity to offer immediate protection to victims, collect evidence from all crime scenes, investigate cases, prosecute if there is sufficient evidence, and hold offenders accountable for crimes committed. Given the danger that sex offenders pose to the community, reporting can serve as a first step in efforts to stop them from reoffending. Equally important, reporting gives the justice system the chance to help victims address their needs, identify patterns of sexual violence in the jurisdiction, and educate the public about such patterns. Service providers should discuss all reporting options with victims in a language they understand

and the pros and cons of each, including the fact that delayed reporting may be detrimental to the prosecution of an offender. Even if a victim does not get a forensic medical exam, the victim can still report the crime at a later time. However, it will be much more difficult for criminal justice personnel to investigate and prosecute the crime if evidence was not collected.

Reporting requirements in sexual assault cases vary from one jurisdiction to another. Every effort should be made to facilitate treatment and evidence collection (if the patient agrees), regardless of whether the decision to report has been made at the time of the exam. Victims who are undecided about reporting who receive respectful and appropriate care and advocacy at the time of their exam are more likely to assist law enforcement and prosecution. Because immigrant victims may be more reticent to report crimes, they need to be aware of crime victim protections for immigrants. Access to immigration relief for crime victims will enhance the ability of law enforcement to detect, investigate, and prosecute crimes. (SEE PAGES 55-59)

Recommendations for jurisdictions and responders to facilitate victim-centered reporting practices:

- Except in situations covered by mandatory reporting laws, patients, not health care workers, make the decision to report a sexual assault to law enforcement.
- Inform patients about reporting consequences.
- As a result of VAWA 2005, many jurisdictions have implemented alternatives to standard reporting procedures.
- Promote a victim-centered reporting process.

6. Payment for the examination under VAWA: Under the Violence Against Women Act (VAWA),⁹ a state, territory, or the District of Columbia is entitled to funds under the STOP Violence Against Women Formula Grant Program only if it, or another governmental entity, incurs the full out-of-pocket cost of medical forensic exams for victims of sexual assault. "Full out-of-pocket costs" means any expense that may be charged to a victim in connection with the exam for the purpose of gathering evidence of a sexual assault.¹⁰ In addition, under the Violence Against Women Act of 2005, states may not require victims to participate in the criminal justice system or cooperate with law enforcement in order to receive a forensic medical exam.¹¹ (SEE PAGES 61-62)

Recommendations for jurisdictions to facilitate payment for the sexual assault medical forensic exam:

- Understand the scope of the VAWA provisions related to exam payment.
- Notify victims of exam facility and jurisdictional policies regarding payment for medical care and the medical forensic exam.

B. Operational Issues

1. Sexual Assault Forensic Examiners: These are the health care professionals who conduct the examination. It is critical that all examiners, regardless of their discipline, are committed to providing compassionate and quality care for patients disclosing sexual assault, performing the physical examination, collecting evidence competently, documenting all findings, and testifying in court as needed. (SEE PAGES 65-67)

Recommendations for jurisdictions to build the capacity of examiners performing these exams:

- Encourage the development of specific knowledge, skills, and victim-centered approaches in examiners.
- Encourage advanced education and supervised clinical practice of examiners, as well as certification for all examiners.

⁹ 42 U.S.C. § 3796gg-4.

¹⁰ 28 C.F.R. § 90.14(a).

¹¹ 42 U.S.C. 3796gg-4(d).

- Provide access to experts on anti-sexual assault initiatives who can participate in sexual assault examiner training, mentoring, proctoring, case review, photograph review, and quality assurance.

2. Facilities: Health care facilities have an obligation to provide services to sexual assault patients. Designated exam facilities or sites served by specially educated and clinically prepared examiners increase the likelihood of a state-of-the-art exam, enhance coordination, encourage quality control, and increase quality of care for patients. (SEE PAGES 71-74)

Recommendations for jurisdictions to build capacity of health care facilities to respond to sexual assault cases:

- Recognize the obligation of health care facilities to serve sexual assault patients in a culturally and linguistically appropriate manner.
- Ensure that exams are conducted at sites served by examiners with advanced education and clinical experience, if possible.
- Explore possibilities for optimal site locations.
- Communities may wish to consider developing basic requirements for designated exam sites.
- If a transfer from one health care facility to a designated exam site is necessary, use a protocol that minimizes time delays and loss of evidence and addresses patients' needs.

3. Equipment and supplies: Certain equipment and supplies are essential to the exam process (although they may not be used in every case). These include a copy of the most current exam protocol used by the jurisdiction, standard exam room equipment and supplies, comfort supplies for patients (e.g., changes of clothes, food, and water), sexual assault evidence collection kits, an evidence drying device/method, a forensic imaging system, testing and treatment supplies, a purified water source, an alternate light source, an anoscope, and written materials for patients. A microscope and/or toluidine blue dye may be required, depending on jurisdictional policy. A colposcope or other magnifying instrument may also be used. Some jurisdictions are also beginning to use advanced technology (telemedicine), which allows examiners offsite consultation with medical experts by using computers, software programs, and the Internet. Jurisdictions using such technology should be careful to protect patient confidentiality. (SEE PAGES 75-77)

Recommendations for jurisdictions and responders to ensure that proper equipment and supplies are available for examinations:

- Consider what equipment and supplies are necessary to conduct a medical forensic exam.
- Address cost barriers to obtaining necessary equipment and supplies.

4. Sexual assault evidence collection kit (for evidence from victims): Most jurisdictions have developed their own sexual assault evidence collection kits or purchased premade kits through commercial vendors. Kits often vary from one jurisdiction to another. Despite variations, however, it is critical that every kit meets or exceeds minimum guidelines for contents: broadly including a kit container, instruction sheet and/or checklist, forms, and materials for collecting and preserving all evidence required by the applicable crime laboratory. Evidence that may be collected includes, but is not limited to, clothing, foreign materials on the body, hair (including head and pubic hair samples and combings), oral and anogenital swabs and smears, body swabs, blood and urine samples for possible alcohol and/or toxicology testing, and a blood or saliva sample for DNA analysis and comparison. The instruction sheet and/or checklist should guide examiners on maintaining the chain of custody for evidence collected. (SEE PAGES 79-80)

Recommendations for jurisdictions and responders when developing/customizing kits:

- Use kits that meet or exceed minimum guidelines for contents.
- Work to standardize sexual assault evidence collection kits within a jurisdiction and across a state or territory, or for federal cases.

5. Timing considerations for collecting evidence: Although many jurisdictions have traditionally used 72 hours after the assault as the standard cutoff time for collecting evidence, a large number of jurisdictions have

moved toward longer time frames as cut off points. Many jurisdictions have now extended the standard cutoff time (e.g., to 5 days or 1 week). The use of such timeframes is supported by empirical evidence. Advancing DNA technologies continue to extend time limits because of the stability of DNA and sensitivity of testing. These technologies are even enabling forensic scientists to analyze evidence that was previously unusable when it was collected years ago. Thus, it is critical that in every case where patients are willing, examiners obtain the pertinent medical forensic history, examine patients, and document findings. Not only can the information gained from the relevant history and exam help health care providers address patients' medical needs, but it can guide examiners in determining whether there is evidence to collect and, if so, what to collect. (SEE PAGES 81-82)

Recommendations for health care providers and other responders to maximize evidence collection:

- Recognize the importance of gathering information for the medical forensic history, examining patients, and documenting exam findings, separate from collecting evidence.
- Examine patients promptly to minimize loss of evidence and identify medical needs and concerns.
- Make decisions about whether to collect evidence and what to collect on a case-by-case basis, guided by knowledge that outside time limits for obtaining evidence vary due to factors such as the location of the evidence or type of sample collected.
- Responders, examiners, and law enforcement representatives should seek education and resources to aid them in making well-informed decisions about evidence collection.

6. Evidence integrity: Properly collecting, preserving, and maintaining the chain of custody of evidence is critical to its subsequent use in criminal justice proceedings. (SEE PAGES 83-84)

Recommendations for health care providers and other responders to maintain evidence integrity:

- Follow jurisdictional policies for drying, packaging, labeling, and sealing evidence.
- Make sure transfer policies maximize evidence preservation.
- Make sure storage policies maximize evidence preservation.
- Document the handling, transfer, and storage of evidence.

C. The Examination Process

1. Initial contact: Some sexual assault patients may initially present at a designated exam facility, but most who receive immediate medical care initially contact a law enforcement or advocacy agency for help. If 911 is called, law enforcement or emergency medical services (EMS) may be the first to provide assistance to victims. Communities need to have procedures in place to promptly respond to disclosures/reports of sexual assault in a standardized and victim-centered manner. (SEE PAGES 87-90)

Recommendations for jurisdictions and responders to facilitate initial contact with victims:

- Build consensus among involved agencies regarding procedures for a coordinated initial response when a recent sexual assault is disclosed or reported. Educate responders to follow procedures
- Recognize essential elements of initial response.

2. Triage and intake: Once patients arrive at the exam site, health care personnel must evaluate, stabilize, and treat for life-threatening and serious injuries according to facility policy. Standardized procedures for response in these cases should be followed, while respecting patients and maximizing evidence preservation. (SEE PAGES 91-92)

Recommendations for health care providers to facilitate triage and intake that addresses patients' needs:

- Consider sexual assault patients a priority.

- First perform a prompt, competent medical assessment. Then respond to acute injury, the need for trauma care, and safety needs of patients before collecting evidence.
- Alert examiners of the need for their services.
- Contact victim advocates so they can offer services to patients, if not already done.
- Assess and respond to safety concerns upon arrival of patients at the exam site, such as threats to patients or staff.
- Assess patients' needs for immediate medical or mental health intervention prior to the evidentiary exam, following facility policy.

3. Documentation by health care personnel: Examiners document exam findings, the medical forensic history, and evidence collected in the medical forensic report. (SEE PAGE 93-94)

Recommendations for health care providers to complete needed documentation:

- Ensure completion of all appropriate documentation.
- Educate examiners on proper documentation.
- Ensure the accuracy and objectivity of medical forensic reports.

4. The medical forensic history: Examiners ask the patient questions in a language the patient understands to obtain this history. This information guides them in examining the patient and collecting evidence. (SEE PAGES 95-98)

Recommendations for health care providers to facilitate gathering information from patients:

- Coordinate medical forensic history taking and investigative interviewing.
- Advocates should be able to provide support and advocacy during the history, if desired by patients.
- Consider patients' needs prior to and during information gathering.
- Obtain the medical forensic history.

5. Photography: Photographic documentation of injury or other visible evidence on the patient's body can supplement the medical forensic history and the written documentation of physical findings and evidence. (SEE PAGES 99-102)

Recommendations for health care providers and other responders to photograph documentation:

- Consider the extent of forensic photography necessary.
- Consider the equipment.
- Consider patient comfort and privacy.
- Explain forensic photography procedures to patients.
- Take initial and follow-up photographs as appropriate, according to jurisdictional policy.

6. Exam and evidence collection procedures: Examiners examine patients and collect evidence according to jurisdictional policy. Findings from the exam and collected evidence often help reconstruct the events in question in a scientific and objective manner. (SEE PAGES 103-113)

Recommendations for health care providers to conduct the exam and facilitate evidence collection:

- Recognize the evidentiary purpose of the exam.
- Strive to collect as much evidence from patients as possible, guided by the scope of informed consent, the medical forensic history, exam findings, and instructions in the evidence collection kit.
- Be aware of and document evidence and injuries that may be pertinent to the issue of whether the patient consented to the sexual contact with the suspect.
- Understand how biological evidence is tested.

- Prevent exposure to infectious materials and risk of contamination of evidence.
- Understand the implications of the presence or absence of seminal evidence.
- Modify the exam and evidence collection to address the specific needs and concerns of patients.
- Explain exam and evidence collection procedures to patients.
- Conduct the general physical and anogenital exam and document findings on body diagram forms.
- Collect evidence to submit to the crime lab for analysis, according to jurisdictional policy.
- Collect other evidence.
- Keep medical specimens separate from evidentiary specimens collected during the exam.

7. Alcohol and drug-facilitated sexual assault: Responders must consider the possibility that drugs and/or alcohol may have been used to facilitate an assault. They must know how to screen for suspected alcohol and drug-facilitated sexual assault, obtain informed consent of patients for testing, and collect toxicology samples when appropriate. (SEE PAGES 114-118)

Recommendations for jurisdictions and responders to facilitate response in suspected alcohol- or drug-facilitated sexual assault:

- Promote training and develop jurisdictional policies.
- Plan response to voluntary use of drugs and/or alcohol by patients.
- Be clear about the circumstances in which toxicology testing may be indicated. Routine testing is not recommended.
- Toxicology testing procedures should be explained to patients.
- Toxicology samples should be collected as soon as possible after a suspected drug-facilitated case is identified and informed consent is obtained, even if patients are undecided about reporting to law enforcement.
- Identify toxicology laboratories.
- Preserve evidence and maintain the chain of custody.

8. Sexually transmitted infection (STI) evaluation and care: Because contracting an STI from an assailant is of significant concern to patients, it should be addressed during the exam. (SEE PAGES 119-124)

Recommendations for health care providers to facilitate STI evaluation and care:

- Offer patients information in a language they understand.
- Consider the need for STI testing on an individual basis.
- Encourage patients to accept prophylaxis against STIs if indicated.
- Encourage follow-up STI exams, testing, immunizations, counseling, and treatment as directed.
- Address concerns about HIV infection.

9. Pregnancy risk evaluation and care: Patients may fear becoming pregnant as a result of an assault. Health care providers must address this issue according to facility and jurisdictional policy. (SEE PAGES 125-126)

Recommendations for health care providers to facilitate pregnancy evaluation and care:

- Discuss the probability of pregnancy with patients who have reproductive capability.
- Administer a pregnancy test for all patients with reproductive capability (with their consent).
- Discuss treatment options with patients in their preferred language.

A victim of sexual assault should be offered prophylaxis for pregnancy, subject to informed consent and consistent with current treatment guidelines. Conscience statutes will continue to protect health care providers who have moral or religious objections to providing certain forms of contraception. In a case in which a provider refuses to offer certain forms of contraception for moral or religious reasons, victims of sexual assault must receive information on how to access these services in a timely fashion.

10. Discharge and follow-up: Health care personnel have specific tasks to accomplish before discharging patients, as do advocates and law enforcement representatives (if involved). Responders should coordinate discharge and follow-up activities as much as possible to reduce repetition and avoid overwhelming patients. (SEE PAGES 129-131)

Recommendations to facilitate discharge and follow-up:

- Address issues related to medical discharge and follow-up care.
- Advocates, law enforcement representatives, and other involved responders can coordinate with health care providers to discuss a range of other issues with patients prior to discharge.

11. Examiner court appearances: Health care providers conducting the exam should expect to be called on to testify in court as fact and/or expert witnesses. (SEE PAGES 133-135)

Recommendations for jurisdictions to maximize the usefulness of examiner testimony in court:

- Encourage broad education for examiners on testifying in court.
- Promote prompt notification of examiners if there is a need for them to testify in court.
- Encourage pretrial preparation of examiners.
- Encourage examiners to seek feedback on testimony to improve effectiveness of future court appearances.

Introduction

Sexual assault is a prevalent crime in our society that has a devastating and long-term impact on individuals from all walks of life. Although an assault can be traumatizing in and of itself, it can result in a range of problems for the victim, such as acute and chronic mental health problems, physical injuries, pregnancy, and sexually transmitted infections (STIs).¹² It is essential that communities offer assistance to victims in the immediate aftermath of an assault. Communities must also work to hold offenders accountable for their actions and stop them from committing further sexual violence. Elements of response typically include the following:

- Provision of a prompt medical screening exam and treatment, including stabilization and/or referral for medical care for victims as needed;
- Collection of evidence from victims and documentation of findings, which may aid investigation and prosecution;
- Responding to, documenting, and investigating sexual assault, which generally includes collection of evidence from the scene of the sexual assault, which may lead to charges against suspects and prosecution;
- Support, crisis counseling, information and referrals for victims, as well as advocacy to ensure that victims receive appropriate assistance; and
- Support and information for victims' families and friends.

This document focuses on elements of immediate response that are the responsibility of health care providers—medical care for sexual assault patients and collection of evidence from them. It seeks to assist health care personnel in validating and addressing patients' health concerns, minimizing the trauma patients may experience, promoting healing, and maximizing the collection and preservation of evidence from patients, including documentation of findings, for potential use in the legal system. (A sexual assault medical forensic examination as described in this document addresses both medical and evidentiary needs of the patient following sexual assault).

This protocol also addresses the role of advocates, law enforcement representatives, prosecutors, forensic scientists, and other responders in the medical forensic exam process. For various reasons (such as fear, stigma, lack of information, lack of access, or mental trauma), many sexual assault victims choose not to seek medical care or have evidence collected. However, coordination among professionals involved in immediate response may be instrumental in reversing this trend. It is often found that victims will seek assistance when responders work together to ensure that victims are informed of their options for assistance, encouraged to address their needs, have their spiritual and psychological needs respected, and are aided in obtaining the help they want. In addition, multidisciplinary coordination has proven to enhance medical care provided to victims as well as evidence collection and preservation efforts.¹³

Background

This national protocol was developed by the Office on Violence Against Women (OVW) under the direction of the Attorney General pursuant to the Violence Against Women Act of 2000.¹⁴ In developing the protocol, OVW reviewed existing protocols on sexual assault forensic examinations and consulted with national, state, local, and tribal experts on sexual assault. Experts were consulted from rape crisis centers; state and tribal sexual assault and domestic violence coalitions and programs; and programs for criminal justice, forensic

¹² STI are also commonly known as sexually transmitted diseases (STDs).

¹³ For example, when first responders explain to victims how to preserve evidence on their bodies and clothing prior to arrival at the exam site, they may increase the likelihood that the evidence will be collected rather than contaminated or destroyed.

¹⁴ The statutory requirement to develop this protocol can be found in Section 1405 of the Violence Against Women Act of 2000, Public Law 106-386. The statutory requirement also mandates the development of a national recommended standard for training for health care professionals performing these examinations, as well as related training for all health care students. These training standards were released in June, 2006 and are available at <http://www.dna.gov/>.

nursing, forensic science, emergency-medicine, law, social services, and sex crimes in underserved communities.¹⁵

Starting in the summer of 2001, the Department of Justice (DOJ) began gathering information on resources, issues, and gaps related to sexual assault medical forensic exams. The first task was to identify and obtain relevant materials and data. Existing national and jurisdictional protocols on the exam and immediate multidisciplinary responses to sexual assault were sought,¹⁶ as well as documents that analyzed jurisdictional response. Input was solicited on issues, gaps, and promising practices from numerous organizations, associations, and individuals representing disciplines involved in the response to sexual assault. In addition, numerous persons were contacted who could offer perspectives on particular issues related to the exam process. State sexual assault coalitions and state government agencies that oversee violence against women programs, as well as tribal coalitions, were also contacted to gain information on their activities concerning protocol development and training. In some states, data was obtained through discussions with sexual assault forensic examiners and coordinators of examiner programs or sexual assault response teams.

A series of forums was held in the summer and fall of 2002, calling upon practitioners and policymakers involved in victim advocacy, health care, forensic science, and criminal justice fields to assist in developing a national protocol. After a draft protocol for adult and adolescent victims was developed in early 2003, it was distributed to a wide array of individuals and organizations for their review and feedback.¹⁷ Comments were first solicited from the individuals who were invited to the forums. Then input was sought from sexual assault survivors, as well as tribal sexual assault and domestic violence coalitions and local advocacy programs. Members of the National Advisory Committee on Violence Against Women also reviewed the draft and provided input. After several revisions of the document, feedback was solicited during the summer of 2003 from many national and state organizations and some local agencies that deal with sexual assault issues or serve diverse populations, as well as other individuals representing relevant disciplines. Comments received were incorporated into the document where appropriate.

Many of the revisions from the original protocol are based on recommendations made by the consulted experts. Some of the recommendations are based on empirical research. Although research has been and continues to be done in many areas related to the medical forensic exam, much more research needs to be done to evaluate the impact of the exam process and specific exam components on victim well-being and criminal justice outcomes. For this revision, OVW solicited input from technical assistance providers representing the relevant disciplines, such as forensic nurses, doctors, prosecutors, law enforcement, advocates, and civil attorneys, as well as the National Institute of Justice. We also held a webinar with relevant experts.

The national protocol recommends, rather than mandates, methods for conducting the medical forensic exam.¹⁸ It serves as an informational guide to communities as they develop or revise their own protocols.¹⁹ In no way does it invalidate previously established jurisdictional protocols, policies, or practices.

About This Document

Organization. Protocol recommendations are organized into several broad sections: A) overarching issues, B) operational issues, and C) the examination process. Each section builds on information presented in

¹⁵ Such consultation was required under Section 1405 of the Violence Against Women Act of 2000, Public Law 106-386.

¹⁶ Protocols reviewed varied in scope, focus, targeted audiences, and level of detail. Most addressed to some extent exam and evidence collection procedures, drug-facilitated assault, evidence integrity, and evaluation and care for STIs, HIV, and pregnancy. Some also addressed roles of involved responders, multidisciplinary coordination, reporting, crime lab testing, court testimony, issues related to victims' needs, working with specific populations of victims, payment for the exam, and crime victims' compensation.

¹⁷ The scope of this protocol is limited to the sexual assault medical forensic exam of adult and adolescent victims. A separate protocol should be developed on child exams. Not only is child sexual victimization a complex topic in and of itself, but response to child victims can be considerably different from response to adult and adolescent victims.

¹⁸ The protocol has no regulatory purpose and is not intended to nor does it provide legal advice. (Statement adapted from the *Hawaii State Sexual Assault Protocol for Forensic and Medical Examinations*, Introduction, 1999.)

¹⁹ Those involved in the development of this protocol strove to create a document that addressed the many issues facing communities across the nation related to the exam process. However, there may be instances where the document falls short of adequately addressing specific needs or challenges facing a jurisdiction or a specific population of victims. See appendix A on customizing protocols for ways that jurisdictions can address these limitations when they are developing/revising their own protocols.

previous sections and comprises tasks to be addressed, issues to be considered and related recommendations. Although an effort has been made to avoid repetition of information throughout the document, there are instances where data are repeated for clarity or emphasis. The appendixes discuss the topics of protocol customization by jurisdictions and creation of sexual assault response teams.

Protocol foundation. This protocol is based on a belief that it is possible, with a victim's consent, to simultaneously address the immediate health needs of a victim and the future needs of the justice system.

Key principles underlying response to sexual assault victims as discussed in this document include:

- Recognition of victim safety and well-being as paramount goals of response.
- Recognition that victims know far more about themselves and their needs than responders.
- Respect for victims' right to make their own choices.
- Recognition that providing victims with information about their options during the exam process, expected consequences of choosing one option over another, and available resources can help them make more informed decisions.
- Recognition that all victims, regardless of differences in backgrounds and circumstances, and regardless of their decision to report the crime or not, have the right to receive a high-quality medical forensic exam and to be treated with respect and compassion.
- Respect for victims' right to confidentiality.
- Recognition of the importance of victims' feedback to improving the exam process.

Another important principle is recognition that the vast majority of sexual assaults are committed by assailants known to victims. Historically, sexual assault committed by nonstrangers was not taken seriously and interventions were less than adequate. It is imperative that all involved responders acknowledge that sexual assaults committed by persons known to victims are as grave a crime as those committed by strangers. Responders should be aware that victims' reactions to an assault are affected by a multitude of factors: one of them being the prior relationship between the victim and the offender. They should also understand that many variables may affect the relevance of certain types of evidence to a particular case, including whether an assault was committed by a stranger, a known offender who claims no sexual contact with the victim, or a known offender who claims the victim consented to the contact.²⁰

Use of Terms

Many terms are explained throughout the protocol to clarify the context in which they are used.²¹ However, it may be helpful to discuss briefly the following terms in advance (in alphabetical order):

Adolescent: Adolescents are distinguished in the protocol from prepubertal children who require a pediatric exam. This document focuses on the examination of females who have experienced the onset of menarche and males who have reached puberty. However, it is important to recognize that age also plays a role in whether a person is treated as a child or adolescent. For example, some adolescent girls may not start menstruating until their later teen years. While the physical developmental level of these patients must be taken into account when performing the exam, they should otherwise be treated as adolescents rather than children. Legally, jurisdictions vary in the age at which they consider individuals to be minors, laws on child sexual abuse, mandatory reporting policies for sexual abuse and assault of minors, instances in which minors can consent to treatment and evidence collection without parental/guardian involvement, and the scope of confidentiality that minors are afforded. Involved responders should be well versed in their jurisdictional laws and policies regarding the above issues, screening procedures for determining whether a pediatric exam is needed (particularly in the case of younger adolescents), and local protocols for response to prepubertal victims. Exam sites are to follow the jurisdictional laws regarding parental/guardian consent.

²⁰ For example, evidence that identifies a suspect in a stranger case, such as DNA evidence, is critical to the continuing investigation. In cases in which the victim knows the suspect, evidence that identifies suspects is important if suspects claim they had no sexual contact with victims. In cases in which suspects claim that victims consented to the sexual contact, evidence identifying suspects is less crucial and evidence and documentation related to whether force or coercion was used against victims is often more important.

²¹ Keep in mind that these definitions may vary from those used generally or in exam protocols developed by states, territories, tribes, and local communities.

Communitywide sexual assault coordinating councils: These multidisciplinary groups typically work to facilitate a communitywide response to sexual assault that is appropriate, coordinated, and comprehensive. They tend not to be involved in direct response, but rather endeavor to improve overall services, interventions, and prevention efforts. Communitywide coordinating council is a broad term for such a group, but possibilities are endless for what a jurisdiction may call such a group. This group may be a subcommittee of an entity that more generally promotes coordinated response to violence in the community.

Coordinated community response: This term refers to immediate and longer term community response to sexual assault that is coordinated among involved responders. The idea is that while each responder provides services and/or interventions according to agency-specific policies, they also work with responders from other agencies and disciplines to ensure that they coordinate responses. The desired result is a collective response to victims and offenders that is appropriate, streamlined, and as comprehensive as possible. Coordinated community response to sexual assault is a concept that developed out of a need to reduce the historically fragmented approach to these cases and the negative impact of fragmentation on victim well-being, offender accountability, and prevention of future assault. These community responses may be known as sexual assault response teams or sexual assault response and resource teams (SARTs or SARRTs).

Culture: This term refers to a body of learned beliefs, traditions, and guides for behaving and interpreting behavior that may be shared among members of a particular group. Aspects of a culture include its values, beliefs, customs, communication styles, behaviors, practices, and institutions.²² In this document, a cultural group refers not only to an ethnic, racial, or religious group, but also to other groups with distinct cultures such as senior citizen; Deaf and hard-of-hearing communities; populations with differing sexual orientations, gender identities, or gender expressions; immigrants; refugees; the homeless; military personnel and their dependents; adolescents; prison inmates; and victims of sex trafficking or victims of commercial sexual exploitation. Individuals often belong to multiple cultural groups.

An immediate response to victims should sensitively and appropriately address their related cultural needs and concerns. It is important that responders acknowledge that victims from certain cultures in a community may be underserved, unserved, or misserved by the systems responsible for response and should work to improve response to these populations.

Disability: A person with a disability is an individual who has a physical or mental impairment that substantially limits one or more of that individual's major life activities, who has a record of such impairment, or is regarded as having such impairment.

Major life activities include, but are not limited to, caring for oneself, performing manual tasks, seeing, hearing, eating, sleeping, walking, standing, lifting, bending, speaking, breathing, learning, reading, concentrating, thinking, communicating, and working. A major life activity also may include the operation of major bodily functions, including but not limited to, functions of the immune system, normal cell growth, digestive, bowel, bladder, neurological, brain, respiratory, circulatory, endocrine, and reproductive functions.

An impairment need not prevent, or significantly or severely restrict, the individual from performing a major life activity in order to be considered a disability. Determining whether an impairment substantially limits a major life activity is done without regard to the ameliorative effects of mitigating measures. Mitigating measures include medication, medical supplies, equipment, appliances, prosthetics, hearing aids and cochlear implants, mobility devices, oxygen therapy equipment, use of assistive technology, and learned behavioral or adaptive neurological modifications.

An impairment that substantially limits one major life activity need not limit other major life activities in order to be considered a disability. An impairment that is episodic or in remission is a disability if it would substantially limit a major life activity when active.

²² The first two sentences in this paragraph are drawn from A. Blue, *The Provision of Culturally Competent Health Care*, from the Web site of the Medical University of South Carolina College of Medicine (http://academicdepartments.musc.edu/fm_ruralclerkship/curriculum/culture.htm).

An individual is “regarded as” a person with a disability if that individual is discriminated against because of an actual or perceived physical or mental impairment, whether or not the impairment limits a major life activity.

Domestic violence: This term broadly refers to any abusive and coercive behavior used to control an intimate partner (a spouse, boyfriend/girlfriend, or former spouse or boyfriend/girlfriend) and/or a family member.²³ Some examples of tactics employed by abusers to control victims are use of coercion, threats, and intimidation; emotional, physical, and sexual abuse; economic manipulation; use of privilege; use of children and pets; isolation of victims; minimization and denial of violence; and blaming victims for violence.²⁴ An episode of domestic violence often includes multiple actions, and the violence typically escalates over time. In this protocol, it is important to be aware that sexual assault can be a significant part of domestic violence. Response to sexual assault occurring within a domestic violence context requires understanding of the overlapping dynamics of sexual assault and domestic violence, the complex needs of victims, the potential dangerousness of offenders, the resources available for victims, and adherence to jurisdictional policies on response to domestic violence.

Exam site: Emergency health care facilities, such as those in hospitals, traditionally have been the setting for provision of medical forensic services to sexual assault patients. However, nonemergency health care programs, such as hospital-based or community-based examiner programs, community clinics, mobile health clinics, tribal health clinics, local health departments, military hospitals or clinics, and college and university health centers, may also offer full or partial sexual assault medical forensic services. Sexual assault forensic examiners also may conduct exams at additional health care and non-health care sites. The facility conducting the exam may be referred to in this protocol as the “exam site,” in recognition of the fact that not all sites performing the exam are health care facilities. Clinical staff providing care at exam sites are broadly referred to in this document as “health care providers,” “health care staff,” “health care personnel,” and “health care clinicians.” In some communities, forensic exams may be conducted by lay health care providers, community health aides, or others who have been trained to perform forensic exams.

Examiner: The term refers to the health care provider conducting the sexual assault medical forensic examination. The examiner is also referred to in this document as the “sexual assault forensic examiner,” “sexual assault examiner,” and “forensic examiner.” Many communities refer to their sexual assault examiners by more specific acronyms based upon the discipline of practitioners and/or specialized education and clinical experiences.

First responder: A first responder is a professional who initially responds to a disclosure of a sexual assault (there is often more than one first responder). These professionals typically must follow agency-specific policies for responding to victims. Those who traditionally have been responsible for immediate response to adult and adolescent sexual assaults include victim advocates, 911 dispatchers, law enforcement representatives, and health care providers. A wide range of other responders also may be involved, such as emergency medical technicians, public safety officials, protective service workers, prosecutors and victim/witness staff, private physicians, staff from local health care facilities, mental health providers, social service workers, corrections and probation staff, religious and spiritual counselors/advisors/leaders, school personnel, employers, qualified interpreters, and providers from organizations that address needs of specific populations (e.g., persons with disabilities, racial and cultural groups, senior citizens, the poor and homeless, runaways and adolescents in foster care, and domestic violence victims). Families and friends of victims also can play an important role in the initial response, because victims may first disclose the assault to them, ask for their help in seeking professional assistance, and want their ongoing support. However, they are not considered first responders in this document, because they are not responding to these disclosures in an official capacity.

Forensic scientist: The forensic scientist is responsible for analyzing evidence in sexual assault cases. This evidence typically includes DNA and other biological evidence, toxicology samples, latent prints, and trace evidence. Some forensic scientists specialize in the analysis of specific types of evidence. In this protocol, forensic scientists working in jurisdictional crime laboratories are often referred to as “crime lab/laboratory

²³ Drawn from M.A. Dutton, “The Dynamics of Domestic Violence: Understanding the Response from Battered Women,” *Florida Bar Journal* 68(9), January 24, 1994.

²⁴ Drawn from the Power and Control Wheel developed by the Domestic Violence Intervention Project of Minnesota.

personnel” and “crime lab/laboratory scientists.” Forensic scientists analyzing drug and alcohol samples are also referred to as “toxicologists.” Forensic scientists in many communities may respond to crime scenes to collect evidence and to process the scene.

Jurisdiction: This term is used in two ways in the protocol. One is to broadly describe a community that has power to govern or legislate for itself. For example, a jurisdiction may be a local area, a state, a territory, or tribe. A jurisdiction may also be referred to in the protocol as a “community.” The term also describes the authority to interpret and apply laws and is used in this context mainly when identifying who has “jurisdiction” over a particular case.

Language assistance services (LAS): Language assistance services are oral language services for interpretation and written language services, translation of written materials into languages other than English for limited English proficient (LEP) individuals.

Law enforcement representative: Different types of law enforcement agencies exist at the local, state, territory, tribal, and federal levels (e.g., state, county, tribal, or local police or sheriff, sworn police on college campuses, the FBI, the Bureau of Indian Affairs (BIA), and military police). Any of these agencies could potentially be involved in responding to sexual assault cases. Also, in areas without a local law enforcement agency, public safety officials may assist in immediate response to sexual assault victims. Some agencies may have staff with specialized education and experience in sexual assault investigations, which may be dedicated to investigating sexual assault cases and/or may be part of a special unit for investigating sexual assaults. In this protocol, personnel from law enforcement agencies are referred to as “law enforcement officers” or “law enforcement representatives,” unless more specificity is required.

Limited English Proficient (LEP): Refers to individuals who do not speak English as their primary language and have a limited ability read, speak, write, or understand English. LEP individuals may be entitled to language assistance services to ensure they have meaningful access to a benefit, program, or service that receives federal financial assistance.

Prosecutor: Different types of prosecution offices exist at the local, tribal, state, territory, and federal level (e.g., tribal prosecutor’s office, county prosecutor’s office, district attorney’s office, state attorney’s office, United States Attorney’s office, and military judicial branches). Any of these offices could be involved in responding to sexual assault cases. In addition, some offices may have personnel with specialized education and experience in sexual assault prosecutions, who may be dedicated to prosecuting sexual assault cases and/or may be part of a special unit for prosecuting sexual assaults. In this protocol, attorneys from prosecution offices will be referred to as “prosecutors” unless more specificity is required.

Sexual assault: Generally speaking, sexual assault is the sexual contact of one person with another without appropriate legal consent. This definition includes, but is not limited to, a wide range of behavior classified by state, territory, federal, and tribal law as rape, sexual assault, sexual misconduct, and sexual battery. Refer to applicable statutes for precise definitions in a specific jurisdiction.²⁵

Sexual assault medical forensic examination: The sexual assault medical forensic exam is an examination of a sexual assault patient by a health care provider, ideally one who has specialized education and clinical experience in the collection of forensic evidence and treatment of these patients. The examination includes gathering information from the patient for the medical forensic history; an examination; coordinating treatment of injuries, documentation of biological and physical findings, and collection of evidence from the patient; documentation of findings; information, treatment, and referrals for STIs, pregnancy, suicidal ideation, alcohol and substance abuse, and other nonacute medical concerns; and follow-up as needed to provide additional healing, treatment, or collection of evidence. This exam is referred to as the “forensic medical examination” under the Violence Against Women Act (VAWA).

Sexual assault response team (SART) also called a sexual assault response and resource team (SARRT): A SART/SARRT is a multidisciplinary team that provides specialized immediate response to victims of recent

²⁵ Drawn from the American College of Emergency Physicians’ *Evaluation and Management of the Sexually Assaulted or Sexually Abused Patient*, 1999, Overview, p. 7.

sexual assault. The team typically includes health care personnel, law enforcement representatives, victim advocates, prosecutors (usually available on-call to consult with first responders, although some may be more actively involved at this stage), and forensic lab personnel (typically available to consult with examiners, law enforcement, or prosecutors, but not actively involved at this stage). However, SART/SARRT components vary by community. The term “SARRT” (written with two “R”s) stands for “Sexual Assault Response and Resource Team.” This term is used for communities that involve a wider array of agencies and disciplines in their collaborative effort. A SARRT (with two “R”s) will thus involve all of the first responders who are typically included in a SART (with one “R”), but it may also include professionals who coordinate services for victims beyond the immediate response (e.g., representatives from mental health, public health, substance abuse treatment, and other social services). Many of these SARRTs meet monthly and often engage in systems review to ensure that the best victim-centered services are being provided in their communities.

Suspected sex offender: A suspected sex offender is an individual suspected of committing a sexual assault. In this document, the suspected sex offender is typically referred to as a “suspect.” When litigation is discussed, the suspected sex offender may be referred to as a “defendant.” When talking more broadly about sex offenders, they may be referred to as “sex offenders,” “assailants,” or “perpetrators.”

Victim: A sexual assault victim is someone who has been sexually assaulted. In this document, a victim can be a female or male; a person whose gender identity may not conform to his or her sex, or may be someone who doesn’t identify as either male or female; either adult or adolescent. There may be instances where individuals, such as unconscious persons or persons with cognitive disabilities, do not actually disclose that they have been assaulted, but others suspect that this may be this case and may be lawfully able to seek help for them. The term “survivor” is used in this document when referring to victims who are involved in long-term healing or have healed from sexual assault. It is important to note that because this document addresses a multidisciplinary response, the term “victim” is not used in a strictly criminal justice context. The use of “victim” simply acknowledges that persons who disclose they have been sexually assaulted should have access to certain services and interventions designed to help them be safe, recover, and seek justice. The term “patient” is also used when discussing the role of medical providers.

Victim service provider/advocate: A victim service provider/sexual assault victim advocate (also referred to as “victim advocate” and “advocate”) may offer victims and their significant others a range of services during, and following, the exam process. These services may include support, crisis intervention, information and referrals, interpretation or translation, and advocacy to ensure those victims’ interests are represented, their wishes respected, and their rights upheld. In addition, advocates and other victim service providers may provide follow-up services, such as support groups, counseling, accompaniment to related appointments, and legal advocacy (civil, criminal, and immigration) to help meet the needs of victims, their families, and friends.

A number of agencies may offer some or all of the services described above, including community-based sexual assault victim advocacy programs,²⁶ criminal justice system victim-witness offices, patient advocate programs at health care facilities, campus or military victim service programs, tribal social services, adult protective services, and others. Where they exist, community-based sexual assault victim advocacy programs are typically best positioned to provide these specific services. Community-based advocacy programs may use paid and/or volunteer advocates to provide services 24 hours a day, every day of the year. It is important to know that information victims share with government-based service providers usually becomes part of the criminal justice record, while community-based advocates typically can provide some level of confidential communication for victims. In addition, community-based advocates commonly receive education specific to the medical forensic exam process and sexual assault issues in general.

Victim-centered: A “victim-centered” approach as used in this protocol recognizes that sexual assault victims are central participants in the medical forensic exam process, and they deserve timely, compassionate, respectful, and appropriate care. Victims have the right to be fully informed in order to make their own decisions about participation in all components of the exam process. Responders need to do all that is

²⁶ In some areas, the community-based sexual assault victim advocacy program is a component of an umbrella organization serving additional populations (e.g., a dual sexual assault/domestic violence advocacy agency, a center for women, or a mental health agency). In others, the community-based sexual assault victim advocacy program is a stand-alone organization.

possible to explain possible options, the consequences of choosing one option over another, and available resources, as well as support victims in their choices. Medical personnel may refer to this as “patient-centered care.”

Vulnerable adults: This term is used in this document to refer to adult individuals with impaired and/or reduced mental capacity who have difficulty or cannot comprehend events that occurred or will occur (e.g., the assault itself or initial response by professionals), questions they will be asked during the exam, or the exam process itself. Exam sites should have internal policies based on jurisdictional statutes governing consent for treatment for and evidence collection from such patients.

A. Overarching Issues

This section presents issues that impact all or most of the sexual assault medical forensic exam process. The following chapters are included:

- Coordinated Team Approach
- Victim-Centered Care
- Informed Consent
- Confidentiality
- Reporting to Law Enforcement
- Payment for the Examination Under VAWA

1. Coordinated Team Approach

Recommendations at a glance for jurisdictions to facilitate a coordinated team approach:

- Understand that the purpose of the exam is to address patients' health care needs and collect evidence when appropriate for potential use within the criminal justice system.
- Identify key responders and their roles.
- Develop quality assurance measures to ensure effective response during the exam process.

Communities should ensure that victims, regardless of their backgrounds or circumstances, have access to medical, legal, and advocacy services. Use of a coordinated, multidisciplinary approach in conducting the medical forensic examination can afford victims access to comprehensive immediate care, help minimize trauma they may be experiencing, and encourage the use of community resources. Such a response can also enhance public safety by facilitating investigation and prosecution, thereby increasing the likelihood that offenders will be held accountable for their behavior and further sexual assaults will be prevented. Raising public awareness about the existence and benefits of a coordinated response to sexual assault may lead more victims to disclose the assault and seek the help they need.²⁷

Understand that the purpose of the exam is to address patients' health care needs and collect evidence when appropriate for potential use within the criminal justice system. The medical/forensic examination in its entirety addresses the medical and evidentiary needs of the consenting patient:

- Conducting prompt examinations.
- Providing support, crisis intervention, and advocacy.
- Obtaining a history of the assault.
- Performing a complete assessment.
- Documenting exam findings.
- Evaluating and treating injuries.
- Properly collecting, handling, and preserving potential evidence.
- Providing information, treatment, and referrals for STIs and pregnancy.
- Providing follow-up care for medical and emotional needs as well as further forensic evaluation.
- Providing language assistance services for limited English proficient, Deaf and hard-of-hearing individuals, and those with sensory or communication disabilities.

It is also possible that examiners may provide the following as a routine part of their post-examination process depending upon the criminal justice system response:

- Interpreting and analyzing examination findings.
- Presenting findings and providing factual and/or expert opinion related to the medical forensic examination.

Coordination among involved disciplines is strongly recommended to simultaneously address the needs of both victims and the justice system. Ensuring that victims' needs are met often can increase their level of comfort and involvement with the legal system.

Identify key responders and their roles. Two types of teams are recommended to facilitate a coordinated community response to sexual assault. Some form of a sexual assault response team (SART/SARRT) is useful to coordinate immediate interventions and services, including victim support, medical care, evidence collection and documentation, and the initial criminal investigation. A communitywide coordinating group (often called a "council") can help promote efforts to improve comprehensive response to sexual violence,

²⁷ This paragraph is drawn partially from American College of Emergency Physicians' *Evaluation and Management of the Sexually Assaulted or Sexually Abused Patient*, 1999, p. 7.

including prevention education and outreach,²⁸ training and technical assistance, improvement of victim services, protocol development, public policy advocacy, dissemination of materials, and evaluation of the effectiveness of these efforts.²⁹ A communitywide coordinating council may also oversee activities of a SART/SARRT. Military bases, school campuses, and tribes may develop coordinating councils or SARTs or SARRTs of their own to allow for a more specialized response tailored to the needs of their populations. Coordinating councils may also exist to encourage consistent responses across a state, territory, tribal land or region.

SART/SARRT membership. A SART/SARRT is composed of professionals involved in immediate response to disclosures of sexual assault. A core SART/SARRT commonly includes health care providers, law enforcement representatives, and victim advocates. Prosecutors and forensic scientists also are often involved, but more as consultants than first responders. Civil attorneys who represent victims are sometimes involved as well. Broad roles for SART/SARRT members include (listed in alphabetical order):³⁰

- **Advocates** may be involved in initial victim contact (via 24-hour hotline or face-to-face meetings), offer victim advocacy, support, crisis intervention, information, translation or interpretation, and referrals before, during, and after the exam process, and facilitate transportation for the victim to and from the exam site. They often provide comprehensive, longer term services designed to aid victims in addressing any needs related to the assault, including but not limited to counseling and legal (civil, criminal, and immigration) and medical systems advocacy.
- **Civil attorneys** protect the interests of sexual assault victims, address concerns that affect immediate everyday life and long-term wellbeing of victims, and represent victims in civil legal matters. Civil legal matters may include: privacy, safety, immigration, education, housing, employment, and financial issues. Because civil attorneys represent the individual victim, and not the prosecutor, they play a very different role from that of the prosecutor.
- **Forensic scientists** analyze forensic evidence and provide results of the analysis to investigators and/or prosecutors. They may respond to crime scenes to assist in the collection and processing of evidence. They also testify at trial regarding the results of their analysis.
- **Health care providers** assess patients for acute medical needs and provide stabilization, treatment, and/or consultation. Ideally, sexual assault forensic examiners perform the medical forensic exam, gather information for the medical forensic history, collect and document forensic evidence, and document pertinent physical findings from patients. They offer information, treatment, and referrals for sexually transmitted infections (STIs), pregnancy, and other nonacute medical concerns. They may also testify in court if needed. They coordinate with advocates to ensure that patients are offered crisis intervention, support, and advocacy during and after the exam process and encourage use of other victim services. They may follow up with patients for medical and forensic purposes. Other health care personnel that may be involved include, but are not limited to, emergency medical technicians, staff at hospital emergency departments, gynecologists, surgeons, private physicians, and/or local, tribal, campus, or military health services personnel.
- **Law enforcement representatives** (e.g., 911 dispatchers, patrol officers, officers who process crime scene evidence, investigators, and federal law enforcement officers) respond to initial complaints, work to enhance victims' safety, arrange for victims' transportation to and from the exam site as needed, interview victims, coordinate collection and delivery of evidence to designated labs or law enforcement property facilities, and investigate cases (e.g., interviewing suspects and witnesses, requesting crime lab analysis, reviewing medical and lab reports, preparing and executing search warrants, writing reports, and presenting the case to a prosecutor).
- **Prosecutors** determine if there is sufficient evidence for prosecution and, if so, prosecute the case. They should be available to consult with first responders as needed. A few jurisdictions more actively

²⁸ Although victim advocacy programs and coordinating councils often lead local prevention efforts, SARTs play a role in prevention by helping victims plan for their safety and well-being and connecting them with resources that may reduce the likelihood of their future revictimization (e.g., emergency shelters and longer term housing programs, protective orders, programs offering free cell phones that automatically dial 911 when activated, or businesses that can help change locks and install alarm systems). Initial evidence collection and investigative efforts can play a pivotal role in holding offenders accountable and preventing them from reoffending.

²⁹ American College of Emergency Physicians' *Evaluation and Management of the Sexually Assaulted or Sexually Abused Patient*, 1999, p. 19.

³⁰ Bulleted section partially adapted from Pennsylvania's *SART Guidelines*, 2002, created by the Pennsylvania Coalition Against Rape.

involve prosecutors, paging them after initial contact and having them respond to the exam site so that they can become familiar with the case and help guide the investigation.³¹

- **Victims' rights attorneys** ensure victims' rights are upheld during the criminal justice process. Examples in the sexual assault cases include independent motions to quash subpoenas filed in the criminal case (e.g., subpoenas for counseling, medical, educational, and employment records), independent rape shield arguments, motions to close courtrooms or limit media access, and motions for alternative means of testifying and/or support during testifying.

Each responder should be able to explain to victims the roles of other team members. Depending on the case and jurisdictional policies, other professionals or agencies - from perhaps multiple jurisdictions - may also be involved in immediate interventions and service provision. They need information about the SART/SARRT and its procedures to guide their responses and facilitate coordination of activities with the SART/SARRT. SART/SARRT members also need information about those professionals and agencies, their roles in sexual assault response, and how to contact and interact with them.

Team efforts are enhanced when SART/SARRT members reflect the communities being served. At the least, SART/SARRT members should strive to understand the needs and concerns of specific populations living in the area served. SART/SARRTs should reach out to agencies that serve these populations so that team members can promptly access their services if needed.

See *Appendix B* for more information on the creation of SARTs/SARRTs.

Membership of a coordinating council. A coordinating council typically comprises a wide array of professionals and citizens who develop the community's response to sexual assault. Organizations with an interest in or a responsibility for sexual assault victims should be considered for membership.³² For example, members might include³³ victim advocates; legal services providers (civil, criminal, and immigration); survivors of sexual assault and their families and friends; health care workers; public health and safety officials; law enforcement personnel; prosecutors; victim/witness staff; judicial personnel;³⁴ corrections and probation staff; sex offender treatment providers; forensic lab personnel; staff from mental health agencies; personnel serving persons with disabilities; substance abuse treatment staff, staff from residential living settings such as nursing homes, assisted living programs, and group homes; educators from all levels; legislators and government policymakers; exam site administrators; religious and spiritual leaders; and the media and business community. Representation from all levels of government that potentially have jurisdiction over these cases in the area served should be involved. Equally important are members who can address the needs of diverse populations in the community (e.g., racial and cultural groups, senior citizens, persons with disabilities, immigrants, the poor and homeless, runaways and adolescents in foster care, domestic violence victims, college students, military personnel and dependents, and populations with differing sexual orientations and gender identities or expressions). Agencies that provide qualified interpreters in sexual assault cases should also be invited to participate.

Attempting to involve all agencies and individuals listed above is an enormous task and could prove to be a barrier to council formation and initial council efforts. Therefore, communities should make their own decisions about which stakeholders are critical to initial efforts and form a core membership, and then

³¹ In addition to seeking prosecution of offenders, victims who attend institutions of higher education may have the option of filing disciplinary charges. When that happens, members of the judiciary board review the case to decide if the institutional code of conduct has been violated and, if so, to determine sanctions. Tribes may also have their own codes related to sexual assault and/or processes through which victims can seek remedies, beyond what is available through state or federal prosecution.

³² American College of Emergency Physicians' *Evaluation and Management of the Sexually Assaulted or Sexually Abused Patient*, 1999, p. 19.

³³ List adapted from the American College of Emergency Physicians' *Evaluation and Management of the Sexually Assaulted or Sexually Abused Patient*, 1999, p. 19.

³⁴ Judges' conduct in and out of the courtroom is governed by a code of judicial conduct that requires that they do nothing that would give the appearance of partiality. Depending on local interpretation of the code, the participation of judicial personnel on a council should not negate their ability to be impartial in court. In the unlikely instance that the council is involved with individual cases, judges can excuse themselves from those activities.

identify which agencies and individuals would be useful to have at the table at some point but are not essential to getting started.³⁵

Develop quality assurance measures to ensure effective response during the exam process. Involved agencies should have mechanisms to ensure that the quality of discipline-specific response and coordinated response is optimal. Some tools to ensure consistent high-quality response by involved professionals include training, ongoing education, supervision, periodic performance evaluations, and peer reviews (e.g., medical forensic reports). Also useful in facilitating improvements to immediate response are feedback from victims and involved professionals and collection and analysis of data from the exam process (as discussed below). Review of both active and resolved cases provides many opportunities to improve the performance of individual team members and the team as a whole, although certain team members, such as community based advocates, may need to be careful about confidentiality in case discussions.

Obtain feedback on victim impact, the exam process, and criminal justice outcomes. All involved responders can benefit from victims' feedback about whether they felt response to the crime was adequate and if anything could have been done to improve response or better address their needs. It can be useful to talk with victims about their experiences during the exam process, including the location of the exam, and explore how the process might be changed to better minimize trauma. Victim feedback can be obtained in several ways: by requesting completion of an evaluation form (not immediately after the exam), conducting a follow-up phone survey, and inviting participation in focus group discussions. It is important to solicit feedback from diverse populations in the community (e.g., racial and cultural groups, senior citizens, persons with disabilities, persons with limited English proficiency, immigrants, the poor and homeless, runaways and adolescents in foster care, domestic violence victims, college students, military personnel and dependents, and populations with differing sexual orientations and gender identities). Ask victims prior to medical discharge if they will allow such subsequent contacts and the best method of contacting them. Responders should be careful to ask victims for a safe manner to contact them, particularly in situations involving sexual assault by intimate partners. Advocates can help design a victim feedback system that is sensitive, does not harm victims, and has mechanisms to quickly link victims with appropriate victim services if needed. Families and friends of victims may also be able to provide useful feedback.

Obtaining feedback from and facilitating dialogue among the first responders (law enforcement, advocate, medical personnel) to the sexual assault and the individual who conducted the exam is also critical. Some of this information could be routinely solicited and discussed at SART/SARRT meetings and jurisdictional sexual assault coordinating council meetings (to assess what works and what needs improvement). Also, periodic evaluation of the exam process by examiners, medical supervisors/examiner program directors, advocates, law enforcement representatives, and prosecutors can help ensure that victims' needs are addressed, problems are resolved, cutting-edge practices and technologies are utilized as much as possible, and training needs are identified. In terms of getting feedback on how the exam process impacts criminal justice outcomes, examiners can benefit from access to crime lab reports on evidence collected and feedback from crime lab personnel about improving their evidence collection techniques. Prosecutors can provide examiners and law enforcement representatives with information about the usefulness of evidence collected in case prosecution. Advocates can encourage discussion on how the exam process can affect victims' interest in and willingness to be involved in the criminal justice system. Law enforcement representatives and other first responders can discuss with examiners and crime lab personnel optimal methods to preserve evidence from victims prior to their arrival at the exam site. Again, review of both active and resolved cases by the team as a whole is a rich opportunity for improvement. These are but a few examples of how first responders could use feedback on criminal justice outcomes to improve the exam process.

Consider collecting and analyzing data from the exam process to better understand the nature of assaults in the community and evaluate effectiveness of responses. (Information that identifies victims should not be

³⁵ The protocol does not further explore issues related to more comprehensive coordinated response to sexual assault. However, one useful resource for communities interested in the development of a multidisciplinary response is the National Center for Victims of Crime's *Looking Back, Moving Forward: A Guidebook for Communities Responding to Sexual Assault*.

included in collected data. Attention must be given to protecting victims' identity in communities where residents tend to know one another or word of a crime travels quickly). Over time, such data may help to:³⁶

- Track the participation of involved responders, agencies, and facilities.
- Evaluate the strengths and weaknesses of agency and coordinated responses.
- Assess the effectiveness of response in different types of cases (e.g., stranger assaults versus nonstranger assaults).
- Improve the quality of the examination.
- Evaluate the impact of the collected evidence on criminal justice outcomes.
- Track and evaluate victim service outcomes.

Some jurisdictions have developed centralized databases to collect and analyze information across disciplines. **However, such a venture requires significant resources, coordination, and thought regarding how to maintain victims' confidentiality.** Coordination can be particularly challenging in communities where cross-jurisdictional issues arise frequently (e.g., in tribal lands). A centralized database may be more easily accomplished if it is built into multidisciplinary coordination planning. For example, involved agencies can together determine how to utilize existing resources, seek new funding, maintain victims' privacy, and systematically obtain data. Jurisdictions considering such databases should take into consideration the fact that pooling empirical data (such as patient age, Zip Code, or use of a weapon) is likely to be reliable while use of pooled interpretive data (such as blunt cervical trauma or findings of strangulations) is risky and may be unreliable because of uncontrollable variables in examiner training and experience.

³⁶ Bulleted section partially adapted from the *County of San Diego Sexual Assault Response Team Systems Review Committee Report: Five-Year Review, 2005*, San Diego County, California.

<http://www.sdcounty.ca.gov/hhsa/programs/phs/documents/EMS-SARTReportJuly2005.pdf>.

2. Victim-Centered Care

Recommendations at a glance for health care providers and other responders to facilitate victim-centered care during the exam process:

- Give sexual assault patients priority as emergency cases.
- Provide the necessary means to ensure patient privacy.
- Adapt the exam process as needed to address the unique needs and circumstances of each patient.
- Develop culturally responsive care and be aware of issues commonly faced by victims from specific populations.
- Recognize the importance of victim services within the exam process.
- Accommodate patients' requests to have a relative, friend, or other personal support person (e.g., religious -and spiritual counselor/advisor/healer) present during the exam, unless considered harmful by responders.
- Accommodate patients' requests for responders of a specific gender throughout the exam as much as possible.
- Prior to starting the exam and conducting each procedure, explain to patients in a language the patients understand what is entailed and its purpose.
- Assess and respect patients' priorities.
- Integrate medical and evidentiary procedures where possible.
- Address patients' safety during the exam.
- Provide information that is easy for patients to understand, in the patient's language, and that can be reviewed at their convenience.
- Address physical comfort needs of patients prior to discharge.

It is critical to respond to individuals disclosing sexual assault in a timely, appropriate, sensitive, and respectful way.³⁷ Every action taken by responders during the exam process should be useful in facilitating patient care and healing and/or the investigation (if the case was reported).

Give sexual assault patients priority as emergency cases. This includes a prompt medical screening exam. Recognize that every minute patients spend waiting to be examined may cause loss of evidence and undue trauma. Individuals disclosing a recent sexual assault should be quickly transported to the exam site, promptly evaluated, treated for serious injuries, and offered a medical forensic exam. (For more discussion on this topic, see *C.2. Triage and Intake*.) Have plans for what to do, if the examiner is not available right away. For example, is there a quiet, private place the patient can wait? Is there a phone available so the patient can talk to an advocate or a friend or family member while waiting? Jurisdictions should consider policies and training for facility staff and administration regarding what to do while sexual assault patients are waiting.

Provide the necessary means to ensure patient privacy. Exercise discretion to avoid the embarrassment for individuals of being identified in a public setting as a sexual assault victim. Some health care facilities use code plans to avoid inappropriate references by staff to sexual assault cases. Also, do not leave sexual assault patients in the main waiting area at the exam site. Instead, give them as much privacy as possible (e.g., a private treatment room and waiting area) and be cognizant of their sense of safety (e.g., do not examine suspects in same location at the same time). Make sure that the first responding health care providers attend to patients' initial medical needs and arrange for an on-call advocate to offer onsite support, crisis intervention, and advocacy. It may be useful to give patients the option of speaking with an advocate via a 24-hour crisis hotline (if one exists) until an advocate arrives. Health care providers should provide patients with access to a phone to contact family members and/or support persons as desired, and should promptly contact law enforcement, if not already involved, if patients want to report the assault.

³⁷ The chapter was partially built on information from the *North Carolina Protocol for Assisting Sexual Assault Victims*, 2000.

Health care providers should explain, in a language the patients understand, the scope of confidentiality during the exam process and during communication with advocates. (For information on this topic, see *A.4. Confidentiality*.)

Adapt the exam process as needed to address the unique needs and circumstances of each patient.

Patients' experiences during the crime and the exam process, as well as their post-assault needs, may be affected by multiple factors, such as:

- Age.
- Gender and/or perceived gender identity/gender expression.
- Physical health history and current status.
- Mental health history and current status.
- Disability.
- Language needs for limited English proficient patients, Deaf and hard-of-hearing individuals, and those with sensory or communication disabilities.
- Ethnic and cultural beliefs and practices.
- Religious and spiritual beliefs and practices.
- Economic status, including homelessness.
- Immigration and refugee status.
- Sexual orientation.
- Military status.
- History of previous victimization.
- Past experience with the criminal justice system.
- Whether the assault involved drugs and/or alcohol.
- Prior relationship with the suspect, if any.
- Whether they were assaulted by an assailant who was in an authority position over them.
- Whether the assault was part of a broader continuum of violence and/or oppression (e.g., intimate partner and family violence, gang violence, hate crimes, war crimes, commercial sexual exploitation, sex and/or labor trafficking).
- Where the assault occurred.
- Whether they sustained physical injuries from the assault and the severity of the injuries.
- Whether they were engaged in illegal activities at the time of the assault (e.g., voluntary use of illegal drugs or underage drinking) or have outstanding criminal charges.
- Whether they were involved in activities prior to the assault that traditionally generate victim blaming or self-blaming (e.g., drinking alcohol prior to the assault or agreeing to go to the assailant's home).
- Whether birth control was used during the assault (e.g., victims may already have been on a form of birth control or the assailant may have used a condom).
- Capacity to cope with trauma and the level of support available from families and friends.
- The importance they place on the needs of their extended families and friends in the aftermath of the assault.
- Whether they have dependents who require care during the exam, were traumatized by the assault, or who may be affected by decisions patients make during the exam process.
- Community/cultural attitudes about sexual assault, its victims, and offenders.
- Frequency of sexual assault and other violence in the community and historical responsiveness of the local justice system, health care systems, and community service agencies.

Clearly, the level of trauma experienced by patients can also influence their initial reactions to an assault and to post-assault needs. While some may suffer physical injuries, contract an STI, or become pregnant as a result of an assault, many others do not. The experience of psychological trauma will be unique to each patient and may be more difficult to recognize than physical trauma. People have their own method of coping with sudden stress. When severely traumatized, they can appear to be calm, indifferent, submissive, jocular, angry, emotionally distraught, or even uncooperative or hostile towards those who are trying to help.³⁸

³⁸ Paragraph adapted from Iowa's *Sexual Assault: A Protocol for Forensic and Medical Examination*, 1998, pp. 1–4.

Examiners should ensure they do not make credibility determinations based on myths or misconceptions about victim behavior.

In addition, patients' fears and concerns can affect their initial reactions to the assault, their post-assault needs, and decisions before, during, and after the exam process. For example, female and transgender patients may be worried about getting pregnant. If they are already pregnant or have just given birth, they may be concerned about how the assault will affect their children. Patients may be concerned about being infected with HIV or another STI. They may not want anyone to know about the assault, or may be afraid that family members and friends will reject or blame them. They may fear bringing shame to their families or be concerned that family members will seek revenge against the assailant. They may fear perceived consequences of reporting to law enforcement. They may be concerned how their cultural background could affect the way they are treated by responders. They may wonder if the assailant will harm or harass them or their loved ones if they tell anyone about the assault. They may worry about losing their home, children, ability to remain in the United States, job, and other sources of income as a result of disclosure, particularly if an intimate partner assaulted them.³⁹ They may be concerned about costs related to the exam and subsequent care of injuries.⁴⁰

It is important to avoid making assumptions about patients, offenders, and the assault itself. Forms used during the exam process and discussions with patients should be framed in a way that does not assume they are of a specific background or gender identity and gender expression. Always ask questions and actively look and listen to understand patients' circumstances and tailor the exam process to address their needs and concerns. Whatever the response, it should be respectful to patients and adhere to jurisdictional policies.

Recognize that patients control the extent of personal information they share. While it is useful for responders to get a full picture of patients' circumstances, it is up to patients to decide whether and to what extent to share personal information. During the exam process, responders may ask patients to divulge some data, such as age or whether they think the assault was alcohol- or drug-facilitated. Some information, such as language needs, may be obvious. There is no reason for responders to question patients about certain data, such as sexual orientation and gender identity, immigration status, or religious or spiritual beliefs, beyond certain information that medical providers may need for appropriate care.

Develop culturally responsive care and be aware of issues commonly faced by patients from specific populations. Develop culturally competent and sensitive care by building awareness about and sensitivity to the ways that culture can impact a person's experience in the immediate aftermath of sexual assault and across their lifespan. Be aware and responsive to the ways in which cultural identities (e.g., race, ethnicity, gender, religion, ability/disability, language (limited English proficiency), immigration status, socioeconomic status, sexual orientation, gender identity or expression, age) may influence a person's experience during the exam process as well. Education for responders on issues facing a specific population may serve to enhance care, services, and interventions provided during the exam process. Responders should identify different populations that exist in their jurisdiction and determine what information they should have readily available to help them serve patients from these populations, including what languages are spoken by the populations and how to access interpreters for each language needed. Building understanding of the perspectives of a specific population may help increase the likelihood that the actions and demeanor of responders will mitigate victim trauma. However, do not assume that patients will hold certain beliefs or have certain needs and concerns merely because they belong to a specific population. And, as pointed out earlier, recognize that patients' experiences are affected by a plethora of other personal and external factors.

Develop policies and plans. Involved agencies and SART/SARRTs should develop policies and plans to meet the needs of specific patient populations (e.g., to obtain necessary interpreter services and translated documents for limited English proficient patients, qualified interpreters for Deaf and hard-of-hearing patients and individuals with sensory or communication disabilities, and identify legal referrals for immigrant victims of sexual assault, domestic violence, dating violence, and stalking.) When creating these plans, consider what barriers exist for patients from different populations to receiving a high-quality exam and what can be done to

³⁹ Minors may fear being removed from their homes if suspects live with them. Persons living in residential settings, such as group homes or nursing facilities, may fear being removed from their homes if they report an assault that occurred in that setting.

⁴⁰ Paragraph partially adapted from the *Ohio Protocol for Sexual Assault Forensic and Medical Examination*, 2002, p. 2.

remove these barriers. Also, consider what equipment and supplies might be needed to assist persons from specific populations (e.g., a hydraulic lift exam table may be useful with victims who have a physical disability or non-gendered body maps for transgender patients). Relevant responders need to have access to and know how to use such equipment or supplies.

Partner with those who serve specific populations. Involved responders should seek expertise from and collaborate with organizations and leaders that serve specific populations. Not only may they be willing to provide information and training on working with victims from the population they serve, but they also may be a resource before, during, and after the exam process. If responders may be involved in the immediate response to victims, they should be trained on the dynamics of sexual victimization and procedures for getting help for victims and work with the multidisciplinary response team to clarify their roles and procedures for response.

Explore the needs of specific populations. To gain a basic understanding of potential issues and concerns facing different groups of sexual assault victims, this section explores several specific populations.⁴¹ Clearly, this exploration is not inclusive of all populations of victims, but a more comprehensive discussion on this topic is beyond the scope of this document.

—Victims from various cultural groups

- Understand that culture can influence beliefs about sexual assault, its victims, and offenders. It can affect health care beliefs and practices related to the assault and medical treatment outcomes. It can also influence beliefs and practices related to emotional healing from an assault. In addition, it can impact beliefs and practices regarding justice in the aftermath of a sexual assault, the response of the criminal justice system, and the willingness of victims to be involved in the system.⁴²
- Understand that some victims may be apprehensive about interacting with responders from ethnic and racial backgrounds different from their own. They may fear or distrust responders or assume they will be met with insensitive comments or unfair treatment. They may benefit from responders of the same background or at least who understand their culture. Conversely, in smaller ethnic and racial communities, victims may be more likely to know the responder and doubt the responder's ability to maintain confidentiality.
- Be aware that cultural beliefs may preclude a member of the opposite sex from being present when victims disrobe. Also, it may be uncomfortable for victims from some cultures to speak about the assault with members of the opposite sex.
- Understand that victims may not report or discuss the assault because the stigma associated with it is so overwhelmingly negative. In some cultures, for example, the loss of virginity prior to marriage is devastating and may render victims unacceptable for an honorable marriage. Even discussing an assault or sexual terms may be linked with intense embarrassment and shame in some cultures.
- Be aware that beliefs about women, men, sexuality, sexual orientation, gender identity or expression, race, ethnicity, and religion may vary greatly among victims of different cultural backgrounds. Also, understand that what helps one victim deal with a traumatic situation like sexual assault may not be the same for another victim.
- Help victims obtain culturally specific assistance and/or provide referrals where they exist.⁴³

—Victims with limited English proficiency⁴⁴

⁴¹ This section was adapted partially from Connecticut's *Technical Guidelines for Health Care Response to Victims of Sexual Assault*, 1998, pp. 12–14, and from Iowa's *Sexual Assault: A Protocol for Forensic and Medical Examination*, 1998, pp. 1–4.

⁴² Bullet drawn from A. Blue, *The Provision of Culturally Competent Health Care*, from the Web site of the Medical University of South Carolina College of Medicine (http://academicdepartments.musc.edu/fm_ruralclerkship/curriculum/culture.htm).

⁴³ For example, to raise their level of hope and comfort during the exam, some patients may benefit from talking about culturally specific models of healing (where they exist) and their application to recovery from sexual assault. To facilitate such a discussion, they may wish to speak with a religious or spiritual healer from their culture.

⁴⁴ The Joint Commission on Accreditation of Healthcare Organizations (Joint Commission) *New & Revised Standards & EPs for Patient-Centered Communication, Accreditation Program: Hospital*, HR.01.02.01, PC.02.01.21, RC.02.01.01, RI.01.01.01, RI.01.01.03, effective January 1, 2011, http://medicine.osu.edu/orgs/ahec/Documents/Post_PatientCenteredCareStandardsEPs_20100609.pdf (PDF); Joint

- Be patient and understanding toward victims' language skills and barriers, which may worsen with the crisis of sexual assault.⁴⁵
- Develop policies and train responders to be able to identify a victim's limited English proficiency and primary language spoken and written.
- Make every attempt to provide same language service through the use of demonstrably bilingual examiners or by providing monolingual examiners with support from professional interpretation services and translated materials for victims who are not proficient in English,⁴⁶ are LEP or who may prefer to communicate in a non-English language. Use qualified interpreters when possible and not victims' families or friends.⁴⁷ Take the victim's country of origin, acculturation level, and dialect into account when responding or arranging interpretation.⁴⁸ Remember to speak directly to victims when interpreters are used. Consider the victim's need for modesty and privacy when determining where interpreters should be located in the exam room.
- Train interpreters about issues related to sexual assault and the exam process⁴⁹ whenever they are needed to facilitate communication in these cases. Ensure that the examiners are trained in the proper utilization and ethical requirements of using an interpreter.
- Make sure that interpreters understand that they may need to testify.⁵⁰
- Understand that immigrant victims may fear that assisting law enforcement may identify them to immigration authorities for deportation.
- All sexual assault victims should be provided information regarding U-Visa relief, in the event that this information would be helpful. Even if this information is not helpful to them directly, the information is often passed on to others by word of mouth and can benefit others in the future.
- Work with law enforcement partners to develop and publicize protocols precluding detention or other immigration enforcement against victims who come forward to report a sexual assault.
- Work with law enforcement to develop and publicize U-Visa certification protocols.
- While it is not appropriate to ask a victim's immigration status, anticipate that an immigrant victim will not self-identify as undocumented for fear of deportation. Such information about their rights should be offered in a non-judgmental manner to all victims and in coordination with a referral to an immigration service provider expert in working with immigrant victim populations.

—Victims with disabilities

- Understand that victims with disabilities may have physical, sensory, cognitive, developmental, or mental health disabilities, or a combination of disabilities. Make every effort to recognize issues that arise for victims with disabilities (both in general and in relation to their specific disability) and provide reasonable accommodations when working with them.
- Be aware that the risk of criminal victimization (including sexual assault) for people with disabilities is much higher than for people without disabilities. People with disabilities are often victimized

Commission, *Advancing Effective Communication, Cultural Competence, and Patient- and Family-Centered Care*, Appendix B, August 2010, <http://www.jointcommission.org/assets/1/6/ARoadmapforHospitalsfinalversion727.pdf>.

⁴⁵ Carolyn Ham, Reducing Language Barriers to Combating Domestic Violence: The Requirements of Title VI, Battered Women's Justice Project, October 2004, http://new.vawnet.org/summary.php?doc_id=1621&find_type=web_desc_GC.

⁴⁶ Health care providers generally are covered by language access requirements under Title VI which requires them to take reasonable steps to provide language-appropriate health care, including the use of qualified bilingual staff, interpreters, and translators.

⁴⁷ Use of such informal and biased interpreters may result in unreliable communication, violate the patient's privacy, undermine the patient's claim of privilege, and jeopardize the use of the victim's statements in court. In cases of intimate partner sexual assault, it is particularly important not to use family members who are not likely to adopt a neutral stance or maintain the confidentiality necessary.

⁴⁸ For example, a Cuban interpreter may encounter language and trust obstacles when trying to communicate with a victim from rural Mexico. (L. Zarate, Suggestions for Upgrading the Cultural Competency Skills of SARTs, Arte Sana Web site, <http://www.arte-sana.com>, 2003.)

⁴⁹ Professional interpreters are expected to be familiar with confidentiality requirements and cultural issues.

⁵⁰ Interpreters would not be expected to act as witnesses as to what was said in the examination room if they are present solely to facilitate direct communication between the patient and examiner.

repeatedly by the same offender.⁵¹ Caretakers, family members, or friends may be responsible for the sexual assault. In such cases, offenders may bring victims to the exam site, and jurisdictional and facility policies should be in place to provide guidance on how staff should screen for and handle situations that are threatening to patients or facility personnel.

- Respect victims' wishes to have or not to have caretakers, family members, or friends present during the exam. Although these individuals may be accustomed to speaking on behalf of persons with disabilities, it is critical that they not influence the statements of victims during the exam process. If aid is required (e.g., from a language interpreter or mental health professional), those providing assistance should not be associated with victims.
- Follow exam facility and jurisdictional policy for assessing vulnerable adults' ability to consent to the exam and evidence collection and involving protective services. Again, note that guardians could be offenders. (For a more detailed discussion on seeking informed consent of patients, including consent by victims from specific populations, see *A.3. Informed Consent*.)
- Speak directly to victims with disabilities, even when interpreters, intermediaries, or guardians are present.
- Assess a victim's level of ability and need for assistance during the exam process. Explain exam procedures to victims and ask what help they require, if any (e.g., people with physical disabilities may need assistance to get on and off the exam table or to assume positions necessary for the exam, or may need an alternative to the standard table). But, do not assume they will need special aid. Ask for permission before proceeding to help them (or touch them, handle a mobility or communication device, or touch a service animal).⁵²
- Note that not all individuals who are Deaf or hard-of-hearing understand sign language or can read lips. Not all blind persons can read Braille. Communication equipment that may be beneficial to victims with sensory disabilities include TTY machines, word boards, speech synthesizers, anatomically correct dolls, materials in alternative formats, and access to interpreter services. Responders should familiarize themselves with the basics of communicating with an individual using such devices.⁵³ Let the individual specify the preferred method of communication. Be aware that victims with sensory disabilities may prefer communicating through an intermediary who is familiar with their patterns of speech.
- Recognize that individuals may have some degree of cognitive disability: mental retardation, traumatic brain injury, neurodegenerative conditions such as Alzheimer's disease, or stroke. Speak to victims in a clear and calm voice and ask very specific and concrete questions. Be exact when explaining what will happen during the exam process and why. Be aware that victims with cognitive disabilities may be easily distracted and have difficulty focusing. To reduce distractions, conduct the exam in an area that is void of bright lights and loud noises. It may also be helpful if examiners and others present in the exam room refrain from wearing uniforms with ornamental designs and jewelry.
- Keep in mind that victims with disabilities may be reluctant to report the crime or consent to the exam for a variety of reasons, including fear of not being believed, fear of getting in trouble, and fear of losing their independence. For example, they may have to enter a long-term care facility if their caretakers assaulted them or may need extended hospitalization to treat and allow injuries to heal. The perpetrator may also be their caregiver and the only person they rely on for daily living assistance.
- Recognize that it may be the first time victims with disabilities have an internal exam. The procedure should be explained in detail in language they can understand.⁵⁴ They may have limited knowledge of reproductive health issues and not be able to describe what happened to them. They may not know how they feel about the incident or even identify that a crime was committed against them.
- Some victims with disabilities may want to talk about their perceptions of the role their disability might have played in making them vulnerable to an assault. Listen to their concerns and what the

⁵¹ The above two sentences are drawn from the Office for Victims of Crime, *First Response to Victims of Crime Who Have a Disability*, 2002, p. 1.

⁵² Examples of service animals include guide dogs and hearing-assistance dogs, and therapy dogs.

⁵³ Note that individuals may have their own assistive devices, but words needed to communicate may have to be programmed.

⁵⁴ Drawn from A. Conrad, *SANE/SAFE Organizing Manual*, 1998, p. 7, developed for the New York State Coalition Against Sexual Assault.

experience was like for them.⁵⁵ Assure them that it was not their fault they were sexually assaulted. If needed, encourage discussion in a counseling/advocacy setting on this issue as well as on what might help them feel safer in the future.

- Recognize that the exam may take longer to perform with victims with disabilities. Avoid rushing through the exam—such action not only may distress victims, it can lead to missed evidence and information.

—Male victims⁵⁶

- Help male victims understand that male sexual assault is not uncommon and that the assault was not their fault. Many male victims focus on the sexual aspect of the assault and overlook other elements such as coercion, power differences, and emotional abuse. Broadening their understanding of sexual assault may help reduce their self-blame.
- Because some male victims may fear public disclosure of the assault and the stigma associated with male sexual victimization, emphasis may need to be placed on the scope of confidentiality of patient information during the exam process.
- Offer male victims assistance in considering how friends and family members will react to the fact that they were sexually assaulted (e.g., by a male offender or a female offender).
- Male victims may be less likely than females to seek and receive support from family members and friends, as well as from advocacy and counseling services. Their ability to seek support may vary according to the level of stigmatization they feel, the circumstances of the assault, the sensitivity of care they initially receive, and the appropriateness of referrals provided.
- Encourage advocacy programs and the mental health community to build their capacity to serve male sexual assault victims and increase their accessibility to this population. Requests by male victims to have an advocate of a particular gender should be respected and honored if possible.⁵⁷

—Adolescent victims⁵⁸

- Adolescents may be brought to the exam site by their parents or guardians. The presence of parents or guardians creates an additional challenge for those involved in the exam process because they are often traumatized by their child's victimization.
- Understand that parents or guardians may blame victims for the assault if the victim disobeyed them or engaged in behaviors perceived as increasing risk for victimization.
- Health care providers must assess the physical development of adolescent victims and take their age into consideration when determining appropriate methods of examination and evidence collection.⁵⁹ Involved professionals should be well versed in jurisdictional policies related to response to minor victims.
- Be aware of jurisdictional laws governing minors' ability to consent to forensic exams and medical treatment. Follow exam facility and jurisdictional policy in obtaining appropriate consent. (For a more detailed discussion on seeking informed consent of patients, including consent by victims from specific populations, see A.3. *Informed Consent*.)
- Recognize that the sexual assault medical forensic exam may be the first time an adolescent female victim has an internal exam. There may be a need to go into detail when explaining what to expect.⁶⁰

⁵⁹ For example, the size of the speculum used with adolescent female victims and exam positions of victims may vary.

⁶⁰ Drawn partially from L. Ledray, *SANE Development and Operation Guide*, 2000, p. 7.

<http://www.ojp.usdoj.gov/ovc/publications/infores/sane/saneguide.pdf>.

- Adolescence is often a time of experimentation. Reassure these victims that regardless of their behavior (e.g., using alcohol and drugs, engaging in illegal activities, or hitchhiking), no one has the right to sexually assault them, and they are not to blame for the assault.
- Ideally, attending health care providers should gather information from adolescents without parents or guardians in the room, subject to victims' consent. The concern is that parents or guardians may influence or be perceived as influencing victims' statements.
- Inform victims, particularly those who do not involve parents or guardians in the exam process, of facility billing practices (e.g., that their parents may get a bill from the medical facility for medical treatment provided or an explanation of benefits from their insurance provider).⁶¹
- Be aware of mandatory reporting laws regarding minor victims and explain to the victim any mandatory reporting obligations.

—Older victims

- Keep in mind that the emotional impact of the assault may not be felt by older victims until after the exam when they are alone in the days, weeks, and months following an attack. Older victims may feel common trauma reactions such as being physically vulnerable, reduced resiliency, and mortality. Fear, anger, and depression can be especially severe in older victims who are isolated, have little support, and live on a fixed or limited income.⁶²
- Be aware that caretakers may sexually assault older adults. Older adults may be dependent on these sexual offenders for emotional or financial support or housing. Offenders may bring victims to the exam site. Some offenders may be charming to staff while others may be threatening or menacing. Jurisdictional and facility policies should be in place to provide guidance on how staff should screen for and handle situations that are threatening to patients or facility personnel.
- Note that older victims may be more physically fragile than younger victims and thus may be at risk for tissue or skeletal damage and exacerbation of existing illnesses and vulnerabilities.⁶³
- Hearing impairment and other physical conditions attendant to advancing age, coupled with the initial trauma reaction to the assault, may render some older victims unable to make their needs known, which could result in prolonged or inappropriate treatment.⁶⁴
- Do not mistake disabilities (such as hearing loss or aphasia) or acute stress reaction following assault for senility. Use of appropriate communication remedies, for example, a personal listening device, may enable an older adult with a severe hearing loss to communicate effectively. Also, be aware that older adults typically process information more slowly than younger adults and take longer to put their thoughts into words. This is a normal age-related change and should not be viewed as evidence of lack of mental capacity. Health care professionals treating elders need to speak slowly and clearly and give elders ample time to process information provided and formulate responses. If questions about the victim's capacity arise, contact trained experts to conduct an assessment.
- If a forensic medical exam has been requested by a law enforcement officer, guardian, or other authority, it is still important to obtain the victim's consent and cooperation to forensic evidence-gathering procedures. Those making the request may argue that evidence collection may be especially important because the victim may be unable to provide a statement or testify. However, when victims lack capacity and are unable to provide consent and cooperation, they should not be

⁶¹ Drawn partially from L. Ledray, *SANE Development and Operation Guide*, 2000, p. 98.

<http://www.ojp.usdoj.gov/ovc/publications/infores/sane/saneguide.pdf>.

⁶² Ibid.

⁶³ Older women are at an increased risk for vaginal tears and injury when they have been vaginally assaulted. Decreased hormonal levels following menopause result in a reduction in vaginal lubrication and cause the vaginal wall to become thinner and more friable. Because of these physiological changes, a Pedersen speculum, which is longer and thinner than the Graves speculum, should be used during the pelvic exam for evidence collection. Special care should also be taken to assess for intravaginal injury. In some older women, examiners will need to simply insert the swabs and avoid the trauma of inserting a speculum. If there are external tears in the introitus, internal injuries must also be considered. The recovery process for older victims also tends to be longer than for younger victims. (Drawn partially from L. Ledray, *SANE Development and Operation Guide*, 2000, p. 86-87.

<http://www.ojp.usdoj.gov/ovc/publications/infores/sane/saneguide.pdf>.)

⁶⁴ Drawn partially from L. Ledray, *SANE Development and Operation Guide*, 2000, p. 87.

<http://www.ojp.usdoj.gov/ovc/publications/infores/sane/saneguide.pdf>.

forcibly examined or subjected to forensic procedures that are not necessary for their own health and safety.

- Health care personnel should follow facility policy for assessing a vulnerable adult's ability to consent to the exam and evidence collection, as well as involving adult protective services.
- Some older victims may want to talk about their perceptions of the role their age and physical condition might have played in making them vulnerable to an assault. Others may be traumatized by being harmed sexually by a family member or trusted caregiver. Listen to their concerns and what the experience was like for them.⁶⁵ Assure them that it was not their fault they were sexually assaulted. If needed, encourage further discussion on this issue in a counseling/advocacy setting.
- Some older victims may be reluctant to report the crime or seek treatment because they fear losing their independence. Some older sexual assault victims may need a significant amount of time to recover from injuries that are the result of the abuse or attack. When a change in a living environment, such as placement in a residential facility, is truly needed, older victims who have not been adjudicated as lacking mental capacity and requiring guardians have the legal right to make their own decisions regarding choice of residence. Health care providers must avoid colluding with relatives who want to force older adults into unwanted lifestyle changes subsequent to assault.
- Older adults who have been sexually assaulted in care facilities often experience intense feelings of vulnerability in those facilities following sexual assault and desperately want to be relocated. Elders who rely upon others for care are likely to need the assistance of relatives and involved professionals in being safely relocated.
- Encourage use of follow-up medical, legal, and nonlegal assistance. Older victims may be reluctant to seek these services or proceed with prosecution. If barriers to accessing services or ongoing health care exist, such as lack of transportation, work with local service providers to identify potential remedies.

—Victims in the military⁶⁶

- The military offers victims the option of restricted reporting or unrestricted reporting.⁶⁷ Restricted reporting allows a sexual assault victim to confidentially disclose the details of his or her assault to specified individuals and receive medical treatment and counseling without triggering the official investigative process or command notification. Restricted Reporting can be voided if the medical facility contacts law enforcement or other professionals other than advocates, chaplains, and military sexual assault response coordinators.
- Exam sites that provide exams for military installations are encouraged to draft Memoranda of Understanding to address such issues as confidentiality and storage of evidence.

—American Indian and Alaska Native victims

- Keep in mind that American Indian and Alaska Native victims may have unique cultural or language needs, whether they are assaulted in Indian Country or an Alaska Native village or in an urban area.
- Recognize that Indian tribes may have their own laws and regulations, as well as their own police, prosecutors, advocates, courts, and service providers to address sexual assault. Responders should be familiar with procedures for coordinating services and interventions for victims from these

⁶⁵ Drawn partially from L. Ledray, *SANE Development and Operation Guide*, 2000, pp. 82-85.

<http://www.ojp.usdoj.gov/ovc/publications/infores/sane/saneguide.pdf>.

⁶⁶ The Office for Victims of Crime (OVC) has developed a resource to assist address sexual assault in the military. *Strengthening Military-Civilian Community Partnerships to Respond to Sexual Assault* is a training curriculum and tool kit for community-based civilian rape crisis centers and state sexual assault coalitions to use in their work with the military installations in their regions. Funding for this project was provided by OVC and the Office on Violence Against Women (OVW), and was developed by the Pennsylvania Coalition Against Rape (PCAR) and the National Sexual Violence Resource Center (NSVRC) in coordination with the Department of Defense's Sexual Assault Prevention and Response Office. Through OVC's Training and Technical Assistance Center (OVC TTAC) the curriculum and tool kit will be available for communities to use in their regions to train on enhancing community response, and effectively responding to the needs of sexual assault victims in the military.

⁶⁷ For more information on reporting in the military, please see <http://www.sapr.mil/>.

communities and should work with community groups to develop plans for providing exams to members of Indian tribes. These plans should address evidence preservation and provide examination payment and reimbursement information. Responders within tribal communities should share resources and information to enable them to develop their own protocols and programs that address the community's unique needs.

- Promote partnerships among tribal and relevant federal and state agencies so they better coordinate responses and resources, learn from past mistakes, and strive towards a shared vision of aiding and empowering victims.
- Be aware that tribal jurisdictions may have their own SAFE protocol in place that addresses the tribe's unique needs and incorporates its cultural traditions, practices, and language.
- As in many cultures, American Indian/Alaska Native women are of central and primary importance to the family and the community. Be mindful that sexual violence against a Native woman may be seen as an assault on both the individual and her community.
- Be sensitive to victims' cultural beliefs and practices. The best practice is to always ask victims rather than assume what they need to be safe, address their health concerns, be supported in inner healing, and feel a sense of justice.
- Be aware of the tribe's history. Responders should have an understanding of the impact of history on American Indian/Alaska Native people as it may influence victims' reactions and needs. Adequate self-education combined with training by tribal members can prepare non-Native responders to be sensitive to the historical context in which victimization occurs and to avoid assumptions about victims' cultural practices.
- Recognize that there are multiple ways for victims to seek justice—through criminal justice interventions, tribal justice systems, and use of more traditional practices of the tribe related to holding perpetrators accountable, and/or other victim-identified strategies.
- Include American Indian/Alaska Native populations in Limited English Proficiency protocols for victims of sexual assault.

—Lesbian, gay, bisexual, or transgender (LGBT) victims

- Intake forms and other documents that ask about gender or sex should allow patients to write in a response, or include transgender and intersex options. Make sure questions appropriately distinguish between sexual orientation (the gender(s) someone is attracted to), gender identity (the internal sense of being woman, man, or gender non-conforming), and their sex.
- Always refer to victims by their preferred name and pronoun, even when speaking to others. If unsure of what to call the person or what pronoun to use, ask.
- Treat the knowledge that the person is LGBT as protected medical information subject to all confidentiality and privacy rules. Be aware that companions of LGBT victims may not know their gender identity or sexual orientation.

Additional suggestions specific to victims who are transgender or gender non-conforming:

- It is critical to not show surprise, shock, dismay, or concern when you are either told or inadvertently discover that a person is transgender. Be especially careful about your body language – gasping, sighing, a sharp intake of breath, or widening eyes can all be very upsetting to someone who may worry that you are making a judgment or assessment of their body.
- Understand that transgender people have typically been subject to others' curiosity, prejudice, and violence. Keep in mind that transgender victims may be reluctant to report the crime or consent to the exam for fear of being exposed to inappropriate questions or abuse. If the victim does consent to an exam, be especially careful to explain what you want to do and why before each step, and respect their right to decline any part of the exam.
- Be aware that transgender individuals may have increased shame or dissociation from their body. Some use nonstandard labels for body parts, and others are unable to discuss sex-related body

- parts at all. Reflect the victim's language when possible and use alternative means of communication (such as anatomically correct dolls or paper and pen for the victim to write or draw) if necessary
- Vaginas that have been exposed to testosterone or created surgically are more fragile than vaginas of most non-transgender women and may sustain more damage in an assault. There may be additional layers of psychological trauma for patients with a male identity or a constructed vagina when they have been vaginally assaulted.
 - Transgender male individuals who still have ovaries and a uterus can become pregnant even when they were using testosterone and/or had not been menstruating.
 - Transgender people may engage in self-harm as a coping mechanism. However, cutting and genital mutilations are also frequently part of anti-transgender hate crimes. Be nonjudgmental and careful when documenting such injuries.
 - Some transgender victims may want to talk about their perceptions of the role their gender identity might have played in making them vulnerable to an assault. Because of their value in possible prosecutions under hate crime laws, document any anti-transgender statements the victim says were made during the assault. Otherwise, listen to the victim's concerns and what the experience was like for them. Assure them that it was not their fault they were sexually assaulted. If needed, encourage discussion in a counseling/advocacy setting on this issue as well as on what might help them feel safer in the future.
 - Ensure that all referrals given to a transgender victim have been trained on or have significant experience with the special needs of transgender survivors of sexual assault.
 - Include opportunities for LGBT individuals to influence the development of sensitive responses for victims of sexual assault.

Recognize the importance of victim services within the exam process. In many jurisdictions, sexual assault victim advocacy programs and other victim service programs offer a range of services before, during, and after the exam process (see below for a description of typical services). Ideally, advocates should begin interacting with victims in a language the victims understand prior to the exam, as soon after disclosure of the assault as possible. Victims who come to exam sites in the immediate aftermath of an assault are typically coping with trauma, anticipating the exam, and considering the implications of reporting. Most responders that victims come in contact with are focused on objective tasks. Law enforcement officials gather information and collect crime scene evidence to facilitate the investigation. Health care personnel assess medical needs, offer treatment, and collect evidence from victims. Victims must make many related decisions that may seem overwhelming. Advocates⁶⁸ can offer a tangible and personal connection to a long-term source of support and advocacy. Community-based advocates, in particular, have the sole purpose of supporting victims' needs and wishes. Typically, these advocates are able to talk with victims with some degree of confidentiality, depending on jurisdictional statutes, while statements victims make to examiners become part of the medical forensic report.⁶⁹ When community-based advocates support victims, examiners can more easily maintain an objective stance.⁷⁰ In addition, civil attorneys may be able to help victims assess legal needs and options, including privacy, safety, immigration, housing, education, and employment issues.

Be aware of the extent of services. Services offered by advocates during the exam process may include:⁷¹

- Accompanying the victims through each component (advocates may accompany victims from the initial contact and the actual exam through to discharge and follow-up appointments).
- Serving as an information resource for victims (e.g., to answer questions; explain the importance of prompt law enforcement involvement if the decision is made to report; explain the value of medical and evidence collection procedures; explain legal aspects of the exam; help them understand their

⁶⁸ To prepare them to competently provide sexual assault victim services, community-based advocates are typically trained according to the policies of the sexual assault advocacy agency where they are employed/volunteer and receive supervision related to their interactions with victims. In addition, many jurisdictions have specific requirements that community-based advocates must meet in order to fit within jurisdictional confidentiality or privilege laws. Advocates should meet these requirements. System-based advocates may be required to have specific credentials based on system and jurisdictional policies and laws.

⁶⁹ K. Littel, *SANE Programs: Improving the Community Response to Sexual Assault Victims*, 2001, p. 6.

⁷⁰ Ibid. See also IAFN position statement Dated Nov 19, 2008: Collaboration with Advocates <http://iafn.org/associations/8556/files/IAFN%20Position%20Statement-Advocate%20Collaboration%20Approved.pdf>.

⁷¹ This bulleted section was drawn partially from Iowa's *Sexual Assault: A Protocol for Forensic and Medical Examination*, 1998, p. 7, and the 1989 *Volunteer Manual* of Virginians Aligned Against Sexual Assault (VAASA).

treatment options for STIs, HIV, and pregnancy; serve as a resource and follow-up point of contact for any future inquiries such as payment method for the exams; and provide referrals).

- Assisting in coordination of victim transportation to and from the exam site.
- Providing victims with crisis intervention⁷² and support to help cope with the trauma of the assault⁷³ and begin the healing process.
- Actively listening to victims to assist in sorting through and identifying their feelings.
- Letting victims know their reactions to the assault are normal and dispelling misconceptions regarding sexual assault.
- Advocating for victims' self-articulated needs to be identified and their choices to be respected, as well as advocating for appropriate and coordinated response by all involved professionals;
- Supporting victims in voicing their concerns to relevant responders.
- Responding in a culturally and linguistically sensitive and appropriate manner to victims from different backgrounds and circumstances and advocating for the elimination of barriers to communication.
- Providing replacement clothing when clothing is retained for evidence, as well as toiletries.
- Aiding victims in identifying individuals who could support them as they heal (e.g., family members, friends, counselors, employers, religious or spiritual counselors/advisors, and/or teachers).
- Helping victims' families and friends cope with their reactions to the assault, providing information, and increasing their understanding of the type of support victims may need from them.
- Assisting victims in planning for their safety and well-being.

Postexam, advocates can continue to advocate for victims' rights and wishes; offer victims ongoing support, counseling,⁷⁴ information, and referrals for community services; assist with applications for victim compensation programs;⁷⁵ and encourage victims to obtain follow-up testing and treatment and take medications as directed. They can also accompany victims to follow-up appointments, including those for related medical care and criminal and civil justice-related interviews and proceedings. They can work closely with the responders involved to ensure that postexam services and interventions are coordinated in a complementary manner and are appropriately based on victims' needs and wishes.

Contact the victim service/advocacy program immediately. Utilize a system in which exam facility personnel, upon initial contact with a sexual assault patient, call the victim service/advocacy program and ask for an advocate to be sent to the exam site (unless an advocate has already been called).⁷⁶ Prior to introducing the advocate to a patient, exam facility personnel should explain briefly, in a language the patient understands, the victim services offered and ask whether the victim wishes to speak with the onsite advocate. Note that some jurisdictions require that patients be asked whether they want to talk with an advocate before the advocate is contacted.⁷⁷ If possible, victims should be allowed to meet with advocates in a private place prior to the exam. Ideally, a patient should be assisted by the same advocate during the entire exam process.⁷⁸

⁷² Crisis intervention counseling is short term in nature, aimed at returning individuals to their precrisis state through the development of adaptive coping responses. Broadly, it entails establishing a relationship with the individual in crisis, gathering information about what is occurring, clarifying the problem, helping the individual identify options and resources so that they are able to make an informed decision as to what, if any, actions will be taken. (Adapted from the 1991 Women Helping Women *Volunteer Training Manual*, Cincinnati, Ohio.) Note: Crisis intervention is not intended to address longer term counseling and advocacy needs.

⁷³ See A. Burgess and L. Holmstrom, Rape Trauma Syndrome, *American Journal of Psychiatry*, 131: 981-986, September 1974, for a summary of the psychological, somatic, and behavioral impact of sexual assault on victims.

⁷⁴ Many advocacy agencies offer ongoing support and advocacy to victims. Some also provide professional mental health counseling, but many refer victims to community or private agencies.

⁷⁵ For more information on crime victim's compensation, please see

<http://www.ovc.gov/publications/factsheets/companassist/welcome.html>.

⁷⁶ Use community-based sexual assault victim advocates where possible. If not available, victim service providers based in the exam facility, criminal justice system, social services, or other agencies may be able to provide some advocacy services if educated to provide those services. Patients should be aware that government-based service providers typically cannot offer confidential communication.

⁷⁷ In very small communities, patients may know some or all advocates (e.g., a small, close-knit community that speaks an uncommon dialect). Some patients may feel comfortable being supported by an advocate known to them while others may not. Patients concerned about anonymity should be provided with as many options as possible. For example, ask if they would like to speak with an on-call advocate on the phone prior to making their decision about whether they want an advocate present during the exam. Another option may be for the local advocacy program to partner with an advocacy program in a neighboring jurisdiction, so they can provide one another with backup to handle situations such as this one.

⁷⁸ Continuity of advocates can be challenging when response by other professionals is delayed, the exam process is lengthy, or travel to the exam site is considerable. Volunteers may or may not be able to continue providing services after the end of their on-call shift.

Understandably, immigrant victims may be reluctant to discuss or report the victimization. It is inappropriate to ask patients about aspects of their health, body, legal status, or identity that are not related to the assault. It is, however, appropriate to ensure that all victims are provided with information regarding U-Visas, in the event that this relief would be appropriate.⁷⁹

Accommodate patients' requests to have a relative, friend, or other personal support person (e.g., religious and spiritual counselor/advisor/healer) present during the exam, unless considered harmful by responders.⁸⁰ An exception would be if responders consider the request to be potentially harmful to the patient or the exam process.⁸¹ Patients' requests to not have certain individuals present in the room should also be respected (e.g., adolescents may not want their parents present). Examiners should get explicit consent from patients to go forward with the exam with another person present. When others are present, appropriately drape patients and position additional persons. (It is also important to inform patients of confidentiality considerations regarding the presence of support persons during the medical forensic history. For a discussion of this topic, see *C.4. The Medical Forensic History.*)

Strive to limit the number of persons (beyond the patient, examiner, advocate, personal support person, and any necessary interpreters) in the exam room during the exam. The primary reason is to protect patients' privacy, but also because exam rooms often cannot accommodate more than a few individuals. Law enforcement representatives should not be present during the exam. When additional health care personnel are needed for consultation (e.g., a surgeon), patients' permission should be sought prior to their admittance. In cases in which examiners are supervising an examiner-in-training/licensed health care student, patients' consent should be obtained prior to the student's admittance to examine patients or observe the exam. It is inappropriate to ask patients to allow a group of nonlicensed medical students to view the exam. It is also inappropriate to ask patients about aspects of their health, body, legal status, or identity that are not related to the assault.

Accommodate patients' requests for responders of a specific gender throughout the exam as much as possible. For a variety of reasons, some patients may prefer to work with a male or female law enforcement official, advocate, and/or examiner.

Prior to starting the exam and conducting each procedure, explain to patients in a language the patients understand what is entailed and its purpose. In addition, it is important to explain the exam process and the purpose of the exam more generally (e.g., how the evidence may be used by the criminal justice system). A clear explanation is particularly important for individuals who may not previously have had a pelvic exam or medical care, or who have difficulty understanding what has happened and why they are being asked to undergo a medical forensic exam. Remember that some exam procedures may be uncomfortable and painful to patients, considering the nature of the trauma they have experienced. By taking the time to explain procedures and their options, patients may be able to better relax, feel more in control of what's occurring, and make decisions that meet their needs. After providing the needed information, seek patients' permission to proceed with exam procedures. (For a more detailed discussion on seeking informed consent of patients, see *A.3. Informed Consent.*)

Address and respect patients' priorities. Although medical care and evidence collection may be encouraged during the exam process, responders should provide patients with information about all of their options and assess and respect their priorities.

Integrate medical and evidentiary procedures where possible. Medical care and evidence collection procedures should be integrated to maximize efficiency and minimize trauma to patients. For example, draw blood needed for medical and evidentiary purposes at the same time. Also, coordinate information-gathering by health care and legal personnel to minimize the need for patients to repeat their statements. (For more information on coordination in information gathering, see *C.4. The Medical Forensic History.*) Consider the

⁷⁹ Legal Momentum has extensive resources available regarding U-Visas. See: <http://www.legalmomentum.org/our-work/immigrant-women-program/u-visa.html>. Additionally, immigrant women are entitled to emergency medical and post-assault healthcare. For a state-by-state breakdown of the benefits afforded see: http://www.legalmomentum.org/assets/pdfs/4_nilc_table_10.pdf.

⁸⁰ Paragraph partially drawn from the *California Medical Protocol for Examination of Sexual Assault and Child Sexual Abuse Victims*, 2001, p. 15.

⁸¹ For example, in cases involving adolescents or vulnerable adults, caretakers should not be allowed in the exam room if they are suspected of committing the assault or of being otherwise abusive to the patient.

implications of the evolving law on hearsay exceptions when determining the level and nature of coordination. See *Appendix C* for more information on the relevant case law and how it relates to medical forensic examinations.

Address patients' safety during the exam. When patients arrive at the exam site, health care providers should assess related safety concerns. For example, a caretaker, partner, or family member who is suspected of committing the assault may have accompanied the patient to the facility. Some victims, including transgender people, may also fear assault or belittlement by health care professionals' and/or law enforcement officials' responses to their gender identity or expression and/or transgender body. Follow facility policy on response to this and other types of threatening situations. Also, exam sites should have plans in place to protect patients from exposure to potentially infectious materials during the examination. (See *B.1. Sexual Assault Forensic Examiners.*) Prior to discharge, assist victims in planning for their safety and well-being. Planning should take into account needs that may arise in different types of cases. For example, patients who know the assailants may not be concerned only about their ongoing safety but also about the safety of their families and friends. Local law enforcement may be able to assist facilities in addressing patients' safety needs. (See *C.10. Discharge and Follow-up.*)

Provide information that is easy for patients to understand, in the patient's language, and that can be reviewed at their convenience.⁸² Information should be tailored to patients' communication skill level/modality and language. This includes providing interpreter services and the translation of documents into languages other than English for limited English proficient (LEP) patients. Developing material in alternative formats may be useful, such as information that is taped, in Braille, in large print, in various languages, or uses pictures and simple language.⁸³ A victim booklet or packet that includes information about the following topics may be helpful:

- The crime itself (e.g., facts about sexual assault and related criminal statutes).
- Normal reactions to sexual assault (stressing that it is never the victim's fault), and signs and symptoms of traumatic response.
- Victims' rights.
- Victim support and advocacy services.
- Civil, criminal, and immigration legal services.
- Mental health counseling options and referrals.
- Resources for the victim's significant others.
- The examination—what happened and how evidence/findings will be used.
- Medical discharge and follow-up instructions.
- Planning for the victim's safety and well-being.
- Examination payment and reimbursement information.
- Steps and options in the criminal justice process.
- Civil and immigration remedies that may be available to sexual assault victims.
- Procedures for victims to access their medical record or applicable law enforcement reports.

Address physical comfort needs of patients prior to discharge. For example, provide them with the opportunity to wash in privacy (offering shower facilities if at all possible⁸⁴), brush their teeth, change clothes (clean and ideally new replacement clothing should be available); get food and/or a beverage, and make needed phone calls. They may also require assistance in coordinating transportation from the exam site to their home or another location.

⁸² Many local sexual assault advocacy programs and state coalitions of sexual assault programs offer publications that speak to victims' concerns in the aftermath of an assault. However, any involved agency, SART, or coordinating council could develop such literature.

⁸³ For example, one sexual assault advocacy program offers a booklet "for those who read best with few words" designed for people with developmental disabilities who have been sexually assaulted. For more information on this publication, contact the Los Angeles Commission on Assaults Against Women by phone (213-955-9090) or e-mail info@lacaaw.org.

⁸⁴ It would be useful for the exam room to have an attached bathroom with a shower.

3. Informed Consent

Recommendations at a glance for health care providers and other responders for requesting patients' consent throughout the exam process:

- Seek the informed consent of patients as appropriate throughout the exam process.
- Make sure policies exist to guide the process of seeking informed consent from specific populations.

Seek the informed consent of patients as appropriate throughout the exam process. There are two essential but separate consent processes—one for overall medical evaluation and treatment and a second for evidence collection and release. Patients should understand the full nature of their consent to each procedure, whether it is medical or evidentiary (e.g., what the procedure entails, possible side effects, limits of confidentiality, and potential impact). The only way to put patients in the position of being able to make informed decisions about whether to allow a procedure is by presenting them with all relevant information in a language they understand. Patients can decline any part or all of the examination. However, the informed consent process includes making patients aware of the impact of declining a procedure, as it may negatively affect the quality of care and the usefulness of evidence collection. It may also have a negative impact on a criminal investigation and/or prosecution both because evidence not collected may have been useful and because defense attorneys in a civil or criminal case may use the fact that the victim declined a procedure to claim that the victim is hiding something that would have been revealed by that procedure. They should understand that declining a procedure might also be used by opposing counsel to discredit the victim at trial.

Before making any disclosures, patients should be advised whether their communications are confidential and whether the confidentiality of the statements is covered by a privilege. Understanding what will happen to the information provided and the extent to which it may be protected is an important component of informed consent.

Health care providers and other responders must refrain from any judgment or coercive practice in seeking patients' consent. It is contrary to ethical and professional practices to influence their decisions.

Seek both verbal and written consent as required by policy. In addition to verbally providing information and seeking consent throughout the exam process, written consent of patients may be needed in order to carry out specific procedures. Verbal and written consent from patients who are limited English proficient may require the use of foreign language interpreters for verbal consent and for written consent to have the interpreters provide a sight translation of written documents and the translation of consent forms and other documents into non-english languages.⁸⁵ It is important that jurisdictions, agencies, and exam facilities make it very clear to responders when written consent is necessary, how it should be sought, and provide appropriate checklists and forms to facilitate obtaining written consent in a consistent manner.

Methods to inform patients verbally and seek their consent vary significantly across jurisdictions and individuals requesting consent. For example, some examiners ask patients to voice their consent to each exam procedure while others explain from the start that they need patients to tell them if they want to stop at any time. While respecting the individual communication styles of responders, the process of obtaining consent can be enhanced when they are educated on how to seek verbal consent logistically in a way that is consistent across patients and helps facilitate the exam process as specified by the jurisdiction and facility.

Verbal and written information given to patients to facilitate the consent process should be complete, clear, and concise. This information, along with consent forms, should be tailored to the communication skill level/modality and language of patients. Responders should be aware of verbal and nonverbal cues from patients and adjust their methods of seeking consent to meet patients' needs. Encourage patients to ask questions and to inform relevant responders if they need a break or information repeated or do not want a particular part of the exam process done. Make sure all signatures and dates needed are obtained on written

⁸⁵ See The Joint Commission on Accreditation of Healthcare Organizations (Joint Commission) New & Revised Standards & EPs for Patient-Centered Communication, Accreditation Program: Hospital, RI, 01.01.03, effective January 1, 2011.

consent forms and document consent or reasons for declining to consent as appropriate (either on the medical record or forensic report forms).

Seek consent for medical evaluation and treatment in a language that the patient understands. Follow facility policy for seeking patients' consent for medical evaluation and treatment. Any written medical consent forms developed for the purpose of the exam may need to be reviewed and approved by facility administration. Documentation on consent for medical evaluation and treatment becomes part of the medical record. Informed consent of patients for medical evaluation and treatment typically is needed for the following:

- General medical care.
- Pregnancy testing and care.
- Testing and prophylaxis for STIs.
- HIV prophylaxis.
- Photographs, including colposcopic images.
- Permission to contact the patient for medical purposes.
- Release of medical information.

Seek consent for evidence collection and release in a language that the patient understands. Follow jurisdictional procedure for obtaining informed consent for the exam and evidence collection. Informed consent of patients typically is needed for:

- Notification to law enforcement or other authority (depends upon reporting requirements).
- Evidence collection and release.
- Toxicology screening.
- Release of information and evidence to criminal justice system personnel, SART/SARRT members, and partnering service providers.
- Contact with patients for reasons related to their criminal sexual assault case.
- Patient notification in case of a DNA match or additional victims.

Patients should be informed that data without patient identity can be collected from the report for health and forensic purposes by health authorities or other qualified persons with a valid educational or scientific interest for demographic and/or epidemiologic studies.

Responders should coordinate efforts to seek patients' consent. On a jurisdictional level, SART/SARRTs (or involved responders if a SART/SARRT does not exist) can identify all procedures where consent is needed during the exam process. They can make sure appropriate written consent forms are developed as well as procedures for requesting verbal and written consent. They should determine which responder has the knowledge needed to provide patients with information about each procedure and consider from whom patients might feel the most comfortable receiving this information. For example, while each responder may provide discipline-specific information to patients, advocates may provide a broad overview of all components of the exam process. Checklists that clarify discipline-specific roles in obtaining consent may be useful.

Make sure policies exist to guide the process of seeking informed consent from specific populations.

In order to provide informed consent, patients should be able to weigh the risks and benefits of different treatment and evidence collection options. It is always important for examiners to assess patients' ability and legal capacity to provide informed consent.⁸⁶ Providers should be aware of jurisdictional laws governing the ability of specific populations to provide consent (e.g. minors, individuals with cognitive disabilities, etc.).

In addition, facilities should have internal policies based on applicable jurisdictional statutes governing consent for treatment of vulnerable adult patients. The medical provider will generally need to assess whether the patient has the cognitive capacity to give consent for the examination, and, if not, the provider should follow these internal policies and jurisdictional statutes. Policies should include procedures to

⁸⁶ Drawn partially from L. Ledray, *SANE Development and Operation Guide*, 2000, p.82.
<http://www.ojp.usdoj.gov/ovc/publications/infores/sane/saneguide.pdf>.

determine whether or not patients are their own guardians; if there is a guardian, to determine the extent of the guardianship; to obtain consent from a guardian if needed; and what to do if the guardian is not available or is suspected of abuse or neglect. Exam facilities should also have policies in place to address consent for treatment in cases in which patients are unconscious, intoxicated, or under the influence of alcohol or drugs, and are therefore temporarily incompetent to give consent.

In cases of adolescent patients, jurisdictional statutes governing consent and access to the exam should be followed. For instance, a state statute may allow minors to receive care for STIs and pregnancy, but not a medical forensic examination without parental or guardian consent. In some jurisdictions, a minor may consent to the examination but not keep the results private from a parent or legal guardian. Exceptions to parental consent requirements also exist when the parent or guardian is the suspected offender or where the parent or guardian can't be found and the collection of evidence needs to be done quickly. In such cases, the law generally specifies who may give consent in lieu of the parent or guardian, such as a police officer, representative from the jurisdiction's children's services department, or judge.⁸⁷

It should be clarified whether policies and statutes regarding consent for medical evaluation and treatment for the above populations encompass consent for the forensic component of the exam. If not, additional guidance from the jurisdiction is needed to develop the appropriate policies. Also, jurisdictional statutes regarding mandatory reporting to law enforcement or protective services in cases of vulnerable adult and minor sexual assault victims must be observed.

Examiners should develop policies and procedures for providing sexual assault care to the unconscious patient. Such care should respect the autonomy of the individual and be consistent with jurisdictional interpretations of emergency exceptions to informed consent. Policies should ideally be approved by hospital ethics committees. Similarly, examiners should have policies for patients that present with altered mental status, which could be from alcohol or drug intoxication or for other reasons. At a minimum, if serious problems are ruled out, the patient will likely need to be observed until consent and cooperation can be obtained which will delay the start of the examination.

In all cases, the medical forensic examination should never be done against the will of patients. Responders should not touch patients or otherwise perform exam procedures without their permission.

⁸⁷ Drawn partially from L. Ledray, *SANE Development and Operation Guide*, 2000, p. 97.
<http://www.ojp.usdoj.gov/ovc/publications/infores/sane/saneguide.pdf>.

4. Confidentiality

Recommendations at a glance for jurisdictions to maintain confidentiality:

- Be sure jurisdictional policies address the scope and limitations of confidentiality as it relates to the examination process and with whom information can be legally and ethically shared.
- Increase the understanding of relevant confidentiality issues.
- Consider the impact of the federal privacy laws regarding health information on victims of sexual assault.
- Strive to resolve intrajurisdictional conflicts.

Be sure jurisdictional policies address the scope and limitations of confidentiality as it relates to the examination process and with whom information can be legally and ethically shared. The confidentiality of records (as well as forensic evidence and photographic and video images) is intricately linked to the scope of patients' consent. Members of a SART/SARRT or other collaborating responders should inform victims of the scope of confidentiality with each individual responding to the sexual assault victim and be cautious not to exceed the limits of victim consent.

Increase the understanding of relevant confidentiality issues. Individuals responding to the sexual assault victim need education on the basics of maintaining the confidentiality of their patients (e.g., knowing what information is confidential and with whom confidential data can be shared, and being aware of their surroundings and who may be listening when discussing cases). They also should build their understanding of the scope and limitations of confidentiality of each agency and responder involved.

In addition, individuals responding to sexual assault victims should be aware of the laws in their jurisdiction pertaining to privileged communications.⁸⁸ More than half of the states have laws in place providing some level of privilege to the communications of sexual assault/rape crisis and domestic violence counselors. A few states' laws apply to victim counselors in general. In most states, counselors must complete a certain number of training hours to qualify for the privilege. However, privileges vary from state to state.

Responders should be aware that victims in the military who choose restricted reports can confidentially speak with a sexual assault victim advocate, a sexual assault response coordinator, military chaplain, or other specified military professional. Jurisdictions should be careful in their local response to protect any privileges that are available to victims. This can be done by limiting who speaks with the victim at each stage of the process, who will be present during discussions and/or interviews, and who will be the recordkeeper or notetaker.

In some jurisdictions, patients who are minors have fewer or more limited confidentiality rights than adults. For example, in some jurisdictions, minor patients have the right to grant or withhold consent to a forensic examination but not to keep the results of the exam private from their parent or legal guardian.

Involved responders should be able to explain the following to patients:

- Community-based advocates usually can provide patients with some level of confidentiality (depending upon applicable jurisdictional statutes). It is important to convey to patients the scope and limits of confidentiality of this communication. System-based advocates (such as those based in police departments, prosecutor's offices, or military installations) usually have limited or no ability to keep information confidential.

⁸⁸ Traditionally, many types of communication have been protected from disclosure in court. These include communication between husband and wife, physician and patient, attorney and client, clergy and parishioner, and psychotherapist and patient. Confidential communication generated in the course of a counseling relationship has more recently been afforded some statutory protection. In general, victim-counselor privilege laws enable counselors (such as community-based victim advocates) to maintain confidentiality of information revealed to them. This does not usually apply to system-based advocates, such as those in law enforcement departments or prosecutor's offices. In addition to preventing counselors from testifying in court, many privilege laws extend protection to their written records. (Drawn from *Privacy of Victims' Counseling Communications*, Office for Victims of Crime, Legal Series, Bulletin #8 (November 2002), pp. 1–2.)

- Absent a court order, patients' medical records are confidential—exam facilities typically have policies in place to protect these records. It is important that patients understand the scope and limits of confidentiality of these records.
- If the assault is reported to law enforcement, health care providers provide to the criminal justice system information collected during the examination that is related to forensic evidence.
- If the victim chooses to get an exam, but not make a police report, the evidence collection kit is typically held in a secure setting for a period of time as determined by jurisdictional policy. Patients' identity should not be revealed to law enforcement. Patients usually need to make an official report by the end of the designated period of time or the evidence and information will be destroyed.
- Information that patients share with law enforcement representatives, prosecutors, justice system based advocates, and adult/child protective services becomes part of the criminal justice record. This record is typically available to investigators and prosecutors handling the patient's case. It also may have to be provided to the defense pursuant to the government's discovery obligations⁸⁹ (although prosecutors may request the court to shield certain information from the defense, such as history of prior pregnancies, abortions, and STIs).⁹⁰
- Each case potentially involves individuals from different agencies responding to the sexual assault victim that may have their own confidentiality policies (e.g., school counselors and mental health providers).
- Both prosecutors and defense attorneys can call witnesses, including responders, to testify in court;
- Court documents and proceedings are generally matters of public record, with the exception of certain excluded materials (e.g., some states' statutes prohibit victim contact information from appearing on public court documents).
- Patients may at some point wish to view or obtain applicable medical records and/or law enforcement reports. They should have access to such documentation, and exam site and jurisdictional procedures for accessing this data should be conveyed to patients.
- Military members can confidentially⁹¹ report being sexually assaulted to specified officials within the military and therefore can be eligible to receive medical care, counseling, and victim advocacy services without requiring command notification or triggering the investigatory process. This is known as restricted reporting. Release of the information regarding the sexual assault to anyone other than the specified officials who may receive a restricted report will result in the loss of confidentiality for the victim and command and law enforcement will have to be notified of the sexual assault.

Consider the impact of federal privacy laws regarding health information on victims of sexual

assault. The Health Insurance Portability and Accountability Act of 1996 (HIPAA) Privacy Rule and its implementing regulations (found at 45 CFR Part 160 and Subparts A and E of Part 164), established national standards for the protection of certain individually identifiable health information created or held by health plans, certain health care providers, and health clearinghouses. With respect to disclosures to victim advocacy organizations, the HIPAA Privacy Rule permits hospitals and other health care providers to alert a victim advocacy organization to the presence of a victim of sexual assault at the hospital without giving any identifying information about the victim. Further, once the advocate is at the hospital, if the victim is informed in advance and agrees or does not object, or the hospital reasonably infers from the circumstances, based on professional judgment, that the victim does not object, then the Privacy Rule permits hospital staff to introduce the advocate to the victim and share information pertinent to the advocate's involvement in the victim's care. For more information on the ability of a health care provider to communicate with persons identified by an individual as involved in the individual's care, see *A Health Care Provider's Guide to the HIPAA Privacy Rule: Communicating with a Patient's Family, Friends, or Others Involved in a Patient's Care*, available at http://www.hhs.gov/ocr/privacy/hipaa/understanding/coveredentities/provider_ffg.pdf.

⁸⁹ Discovery in a criminal case is the turning over of any evidence or information that the prosecutor is obligated by jurisdictional statute or case law to turn over to the defense. (Drawn from electronic communications with Norm Gahn, Assistant District Attorney, Office of the District Attorney for Milwaukee County, Wisconsin, during the fall of 2003.)

⁹⁰ Depending on jurisdictional law, law enforcement reports and reports of other governmental agencies may be subject to open public records laws or Freedom of Information Act laws. In such instances, jurisdictional policy would govern when such information could be released to the general public upon request. (Drawn from electronic communications with Robert Laurino, Deputy Chief Assistant Prosecutor, Essex County Prosecutor's Office, New Jersey, during the fall of 2003.)

⁹¹ Within the U.S. Department of Defense's Restricted Reporting Policy, a military member may make a restricted report to a Sexual Assault Response Coordinator (SARC), victim advocate, or health care provider.

For more information about the HIPAA Privacy Rule generally, including the conditions under which other disclosures are permitted, visit the Department of Health and Human Services Office for Civil Rights (OCR) Web Site at <http://www.hhs.gov/ocr/privacy/> for an array of helpful guidance documents and Frequently Asked Questions.

HIPAA is not the only federal law that governs victims' privacy rights. Agencies that receive funding under the Violence Against Women Act (VAWA) must also comply with VAWA's confidentiality provisions. These provisions require that a victim's personally identifying information may not be released without a victim's written, time-limited, informed consent or a court or statutory mandate.

Strive to resolve intrajurisdictional conflicts. For example, maintaining confidentiality is often difficult in isolated or small communities where people know one another or word of a crime travels quickly (e.g., school campuses and tribal, military, religious, or immigrant communities). Special precautions must be taken in these situations to preserve confidentiality. Every effort should be made to avoid conflicts of interest (e.g., the investigator is the cousin of the suspect or the health care provider, or the advocate or interpreter is an acquaintance of the patient). Give patients as many options as possible to avoid these dilemmas (e.g., allow them to work with a different investigator or be examined at another site or by another examiner, if possible).

5. Reporting to Law Enforcement

Recommendations at a glance for jurisdictions and individual responding to the sexual assault victims to facilitate victim-sensitive reporting practices:

- Except in situations covered by mandatory reporting laws, patients, not health care workers, make the decision to report a sexual assault to law enforcement
- Inform patients about reporting consequences.
- As a result of VAWA 2005, many jurisdictions have implemented alternatives to standard reporting procedures.
- Promote a victim-centered reporting process.

Many sexual assault victims who come to health care facilities or other exam sites for the medical forensic exam choose to report the assault to law enforcement. Reporting provides the criminal justice system with the opportunity to offer immediate protection to the victim, collect evidence from all crime scenes, investigate the case, prosecute it if there is sufficient evidence, and hold the offender accountable for crimes committed. Given the danger that sex offenders pose to the community, reporting can serve as a first step in efforts to stop them from reoffending. Equally important, reporting gives the justice system the chance to encourage victims to seek assistance to address their needs, identify patterns of sexual violence in the jurisdiction, and educate the public about such patterns. Service providers should discuss all reporting options with victims and the pros and cons of each, including the fact that delayed reporting may be detrimental to the prosecution of an offender. Victims need to know that even if they are not ready to report at the time of the exam, the best way to preserve their option to report later is to have the exam performed. Information should be provided in a language victims understand.

Some victims, however, are unable to make a decision about whether they want to report or be involved in the criminal justice system in the immediate aftermath of an assault. Pressuring these victims to report may discourage their future involvement. Yet, they can benefit from support and advocacy, treatment, and information that focuses on their well-being. Recognizing that traumatic injuries heal and evidence on their bodies is lost as time passes and that they may report at a later date, victims can also be encouraged to have the medical forensic exam conducted. Victims who are recipients of compassionate and appropriate care at the time of the exam are more likely to cooperate with law enforcement and prosecution in the future.

Except in situations covered by mandatory reporting laws, patients, not health care workers, make the decision to report a sexual assault to law enforcement. Health care workers in some jurisdictions are bound by law to report some or all forms of sexual assault, regardless of patients' wishes.⁹² In the remaining jurisdictions, no report should be made without the consent of patients. (Exceptions typically include cases involving vulnerable adults and minors victimized by caretakers or other authority figures). All involved health care providers should be aware of the reporting requirements in the jurisdiction in which they work.

In jurisdictions in which mandatory reporting by health care personnel is required, patients should be informed of the legal obligations of health care personnel, what triggers a mandatory report, that a report is being made, and the contents of the report. Patients should understand that even if health care personnel make a mandatory report, they are not obligated to talk with law enforcement officials⁹³

⁹² Some jurisdictions mandate reporting for some or all violent crimes, requiring health care workers to notify law enforcement in cases involving a gunshot or knife wound, strangulation/choking, or other serious bodily injury. They vary, however, in whether they require acts of sexual violence without serious physical injuries to be reported. Health care personnel should be aware that these reporting laws may come into conflict with military policy allowing for restricted reporting for victims in the military.

⁹³ Some victims may fear possible consequences of reporting (e.g., retaliation by offenders; rejection by family members and friends; being discriminated against if they are males). Victims may have these and other fears because they are from populations with differing sexual orientations or gender identities, or they are from racially or otherwise oppressed groups; they are inmates; or they fear being deported or refused citizenship (in the case of recent immigrants and refugees). Some recent immigrants or refugees may fear law enforcement because of past experiences of oppression by authorities in their countries of origin. In addition, many victims are not willing to deal with the humiliation, loss of privacy, and negativity they perceive would accompany reporting, an investigation, and prosecution. If an intimate partner or a family member committed the assault, victims may also be concerned about the consequences of

States are required, as a condition of eligibility for STOP Violence Against Women Formula Grant funds, to allow victims to receive examinations and to have the examinations paid for regardless of the level of participation of victims in the criminal justice process. Documentation and evidence collected could be invaluable to the investigation and prosecution if patients should report at a later date, which often occurs. Patients also have the right to receive medical care for assault-related injuries and concerns, regardless of their decision to report and/or have evidence collected, although the state is not required to pay for medical care.

Jurisdictions need to consider the challenges of storing evidence in cases where victims go through the medical forensic exam but opt not to participate with the criminal justice process. In some communities, it is a challenge to find adequate space to hold evidence in cases where a report has not been made. For more information on this topic, see *B.6. Evidence Integrity*.

In addition, under VAWA 2005 as a condition of STOP Formula Grant funding, states must also certify that law enforcement officers, prosecutors, and other government officials do not ask or require victims of sex offenses to submit to polygraph exams or other truth telling devices as a condition for proceeding with the investigation or prosecution of the offense.

Inform patients about reporting consequences. Prior to making a decision about reporting, patients need information about issues related to reporting. For example, they should be informed of the following:

- The process of reporting the sexual assault to law enforcement and the information that will typically be requested from the victim.
- Procedures dealing with reporting in the jurisdictional protocol for immediate response to sexual assault.
- Whether health care personnel are mandated by law to report the assault.
- The fact that the report will trigger an investigation. Depending upon the results of the investigation, the case may be referred to the prosecutor, and the prosecutor may file charges.
- The purposes of the exam and how documented injuries as well as evidence gathered could be used during investigation and prosecution.
- Types of evidence (beyond that found on patients) that may be gathered during an investigation.⁹⁴
- The fact that delays in reporting, especially extended ones, can result in loss of evidence and may negatively affect the ability of the criminal justice system to investigate and prosecute a case.⁹⁵
- Practices regarding prosecution of sexual assault victims for unrelated criminal charges.
- The right to accept or decline exam procedures and the possible consequences of declining.
- The right to copies of any communication or report issued to law enforcement and procedures for accessing such data.
- Policies related to payment for the exam, evidence collection, and medical care, whether or not a report is made.
- Policies on collecting/holding evidence in cases where patients are undecided about reporting, and, if evidence can be collected with no report, the amount of time they have to make a reporting decision.

prosecution on their families (e.g., loss of income, employment, profession, attorney fees, and childcare costs) and being blamed for “tearing the families apart.” Incest victims may be deterred from reporting because offender registries might indirectly identify them.

⁹⁴ For example, other evidence may be found on the suspect’s bodies and clothing, at the locations of actual assaults, and locations victims went to immediately after the assaults.

⁹⁵ Prompt reporting can facilitate a thorough investigation. Collecting evidence from patients is but one piece of investigative information gathering. Other investigative activities may include, but are not limited to, identifying and collecting evidence from all crime scenes; identifying, apprehending, and interviewing suspects; interviewing witnesses (both eyewitnesses and persons to whom victims initially disclose); obtaining search warrants as needed (e.g., to search for drugs that might have been used to facilitate an assault or for evidence used during an assault such as clothing, ropes, or condoms). Investigative activities depend on the specifics of each case.

In response to VAWA 2005, many jurisdictions have implemented alternatives to standard reporting procedures.⁹⁶ Many communities have implemented alternatives to traditional reporting procedures, such as anonymous or blind reporting. These procedures are used when victims do not want to immediately report or are undecided about reporting with their own name and contact information (but are willing to report anonymously).⁹⁷ Government entities that mandate reporting for sexual assaults, in particular, have implemented an option of third-party anonymous reporting for mandated reports, which allow a third-party, such as the medical personnel, to make the report without including identifying information about the victim.⁹⁸ Although the practice of anonymous reporting is not widespread it allows victims and/or third-party reporters to share critical information about the assault with law enforcement without sacrificing privacy. It also enables investigators to gain information about sex crimes that would otherwise go unreported.

To develop an anonymous/blind reporting system, law enforcement agencies can:

- Establish and uphold a policy of victim confidentiality.
- Allow victims to disclose as little or as much information as they wish.
- Accept the information whenever victims might offer it—a delay in disclosure is not an indicator of the validity of the statement.
- Develop procedures and forms to facilitate anonymous information from third parties (e.g., examiners).
- Clarify options with victims for future contact—where, how, and under what circumstances they may be contacted by the law enforcement agency or by another agency.
- Maintain these reports in separate files from official complaints to avoid inappropriate use.

Informed consent from victims for notification should be sought during the initial report, as well as appropriate times, reasons, and methods to recontact them.⁹⁹ For example, a victim may want to be contacted if another victim who was likely assaulted by the same suspect comes forward.

Promote a victim-centered reporting process. Some approaches for communities to consider:

- Explore the myriad reasons why victims are reluctant to report and how the actions or attitudes of agencies may help perpetuate these fears. Help agencies consider how to address reluctance and fears (e.g., immigrant victims who fear deportation and immigration enforcement may benefit from immediate access to legal services or information about their rights as potential U-Visa holders). Information regarding U-Visas should be universally provided to all victims. The resource, if not appropriate for the victim being seen, may be passed along to others through word of mouth.¹⁰⁰
- Evaluate local trends regarding reporting and victims' involvement in the criminal justice system. Based on feedback, develop and implement a plan to improve multidisciplinary response to sexual assault.
- Improve and increase professional training for first responders (e.g., training for law enforcement investigators on effective interviewing techniques for sexual assault victims, training for health care personnel on the clear use of language in documentation, training for prosecutors on strategies for

⁹⁶The first two paragraphs in this section are drawn from S. Garcia and M. Henderson, *Blind Reporting of Sexual Violence*, FBI Law Enforcement Bulletin, June 1999, pp. 12–16.

⁹⁷ For example, the Chapel Hill, North Carolina, Police Department's blind reporting system for sexual assault enables victims to disclose as much or as little information as they want. A detective records the information but does not initiate an investigation unless victims decide to file a formal complaint. The blind reporting system has been credited with contributing to a steady increase in sexual assault reporting. The number of male victims who reported during that time also rose. (K. Littel, M. Malefyt, and A. Walker, *Assessing the Justice System Response to Violence Against Women: A Tool for Law Enforcement, Prosecution, and the Courts to Use in Developing Effective Response*, 1998, pp. 18–9.)

⁹⁸ For example, all health care providers in Massachusetts who attend to, treat, or examine a sexual assault patient are required to submit a third-party anonymous report (with no identifying information) to law enforcement in the community where the assault occurred as well as to the state police. This report is required even if patients report the assault themselves. (Commonwealth of Massachusetts *SANE Protocol*, 2002, pp. 8–9.)

⁹⁹ All those involved in immediate response, including victims, need to understand the nature of DNA evidence and how CODIS can be used to match offenders with DNA in the database. They also need to know the status of CODIS in their jurisdiction (states have varying laws regarding which crimes qualify for inclusion in the database).

¹⁰⁰ Legal Momentum has extensive resources available regarding U-Visas. See <http://www.legalmomentum.org/our-work/immigrant-women-program/u-visa.html>. Additionally, immigrant women are entitled to emergency medical and post-assault healthcare. For a state-by-state breakdown of the benefits afforded, see http://www.legalmomentum.org/assets/pdfs/4_nilc_table_10.pdf.

overcoming a consent defense, and training for first responders on effective use of interpreters when responding to sexual assault cases).

- Encourage reporting of criminal justice statistics that accurately reflect the full range of sexual assaults that are reported in a jurisdiction.
- Initiate community education, outreach, and services targeting groups that may be reluctant to seek assistance after an assault.
- Expand community collaboration to include immigrant victim advocates who can work with the local coordinating council and SART/SARRT to inform immigrant victims of their rights as soon as possible post-assault.
- Offer viable options for reimbursement of exam costs for which victims are responsible, such as costs that are purely medical in nature.¹⁰¹
- Ensure that victims who opt not to participate in the criminal justice process have access to the same comprehensive medical forensic examination as those who do.
- Encourage the development of a coordinating council and/or SART/SARRT to facilitate a more coordinated, victim-centered, comprehensive community response to sexual violence.
- Support the formation of specialized examiner programs, investigative and prosecution units, and sexual assault victim advocacy programs to handle these cases. Specialization can potentially increase the knowledge base and commitment of those responding to sexual assault victims, increase adherence to jurisdictional protocols for immediate response to sexual assault, encourage a victim-centered response, and positively advertise services offered.
- Develop jurisdiction-wide public information initiatives on mandatory reporting—mandatory reporters need to know applicable statutes regarding reporting sexual assault cases that involve older vulnerable adults, persons with disabilities, and minors. A toll-free hotline number exclusively dedicated to abuse reports may also help simplify reporting and ensure a written report of each case and referrals to appropriate agencies. Such a hotline could be operated at a state, tribal, regional, or local level. To encourage both reporting and follow-through, protective agencies that investigate these cases should work collaboratively with local law enforcement agencies to ensure that each case is dealt with in the best possible manner and that further harm does not occur.¹⁰²
- In institutional settings such as prisons, jails, immigrant detention centers, nursing homes and assisted living programs, inpatient treatment centers, and group homes, ensure that victims can report assaults to outside agencies and are offered protection from retaliation for reporting.
- In each case, strive to create an environment in which victims are supported and respected throughout the criminal justice process and beyond.¹⁰³
- After steps have been taken to identify and remove barriers to reporting sexual assaults, educate the public about the potential benefits of reporting, how to go about reporting, what happens once a report is filed, and jurisdictional legal advocacy services available (if any) for sexual assault victims. Build upon already existing public awareness efforts of local advocacy programs.

¹⁰¹ It would be ideal if victims did not have to cover any costs for the exam and related medical care. However, jurisdictions and exam facilities vary in the costs that victims are required to cover. In some jurisdictions, victims are responsible for the costs of treatment for injuries and possible pregnancy, STIs, and HIV infection. Some exam facilities are flexible—they may allow victims to pay as they are financially able or may be willing to waive some or all charges.

¹⁰² Bullet drawn from A. Vachss, *Redefining Rape Response: When the Victim is Elderly or Has a Disability*, 2004, pp. 6 and 18.
<http://www.nj.gov/lps/dcj/agguide/standards/standardssartsane.pdf>

¹⁰³ Bullet adapted from the New Jersey Office of the Attorney General's *Standards for Providing Services to Survivors of Sexual Assault*, 1998, pp. 6 and 18.

6. Payment for the Examination Under VAWA

Recommendations at a glance for jurisdictions to facilitate payment for the sexual assault medical forensic exam:

- Understand the VAWA provisions related to exam payment.
- Notify victims of exam facility and jurisdictional policies regarding payment for medical care and the medical forensic exam.

Understand the VAWA provisions related to exam payment.¹⁰⁴ Under the Violence Against Women Act (VAWA) and subsequent legislation, grantees of the STOP Violence Against Women Formula Grant Program must meet certain requirements concerning payment for the forensic medical exam in order to receive funds. The STOP Program is a formula grant program which provides funds to all states, Territories, and the District of Columbia.¹⁰⁵

Each of these entities certifies each year that it is in compliance with the requirements of VAWA.¹⁰⁶ Specifically, the state, territory, or the District of Columbia must certify that it or another governmental entity "incurs the full out-of-pocket cost of forensic medical exams" for victims of sexual assault. If one part of a state or territory, such as a county or city, is forcing victims to incur these costs, then the state or territory will not be able to certify and will be ineligible for the grant funds. In addition, under the Violence Against Women Act of 2005, states must also certify that they do not require victims to participate with the criminal justice process in order to be provided with an exam.¹⁰⁷

States are permitted to use STOP Program funds to pay for the exams if they meet two conditions.¹⁰⁸ First, the exam must be performed by a "trained examiner for victims of sexual assault." Second, the state may not require victims of sexual assault to seek reimbursement from their insurance carriers.

In cases of victims associated with the U.S. military services, sexual assault forensic examinations may be covered under Tricare for service members.

By regulation, "full out-of-pocket cost" means "any expense that may be charged to a victim in connection with a medical forensic examination for the purpose of gathering evidence of a sexual assault."¹⁰⁹ Examples of such expenses may include the full cost of the exam or a fee established by the facility conducting the exam, or a copayment or deductible in jurisdictions that require victims to submit the charges to insurance. Often, medical services that are not related to evidence gathering will not be covered by this requirement.

Notify victims of exam facility and jurisdictional policies regarding payment for medical care and the medical forensic exam. Victims must be aware of exam facility and jurisdictional policies regarding payment for other medical care related to the sexual assault. Many jurisdictions will not pay for medical care provided as part of the medical forensic examination, such as the costs of treatment for injuries or treatment for STIs, or may require victims to apply separately for crime victim compensation to be reimbursed for such

¹⁰⁴ As a result of the Violence Against Women Reauthorization Act of 2013, states can no longer pay for exams by reimbursing the victim, instead they need to either provide the exams free of charge to the victim or arrange for victim to obtain the exams free of charge to the victims.

¹⁰⁵ Its purpose is to assist these jurisdictions in developing and strengthening law enforcement and prosecution strategies to combat violence against women, as well as in developing and strengthening victim services in cases involving violence against women.

¹⁰⁶ For American Indian/Alaska Native victims, the costs of the exam will be born by either the state or in some cases the federal government. Although tribes are not directly eligible for STOP Formula Grants, they are eligible for subgrants from the states, as well as other Office on Violence Against Women grant programs that can address sexual assault.

¹⁰⁷ Under 42 U.S.C. § 10607, a federal investigating agency that conducts a sexual assault investigation shall pay for the cost of a forensic exam "which an investigating officer determines was necessary or useful for evidentiary purposes." However, in most cases where the victim does not choose to report the assault to law enforcement or to participate with the criminal justice process, a state that receives STOP funds will still be responsible for payment because at that stage there will be no federal investigation. The state's responsibility for payment applies regardless of whether the crime occurred in Indian Country or within the special maritime and territorial jurisdiction of the United States.

¹⁰⁸ 42 U.S.C. 3796gg-4(c).

¹⁰⁹ 28 C.F.R. § 90.14(a).

expenses. Individuals responding to the sexual assault victim need to be informed regarding payment policies and procedures for all aspects of the medical forensic examination, so that they can accurately inform victims.¹¹⁰ For example, responders can help them apply for crime victims' compensation (if available) or arrange a payment plan with the exam facility.¹¹¹ When victims are billed by the exam facility for costs that are their responsibility, procedures to protect their privacy should be incorporated into the billing process. Personnel in facility billing departments should be educated regarding coding and billing practices in these cases, as determined by facility and/or jurisdictional policy.

Reporting to law enforcement. States, territories, and the District of Columbia must pay for sexual assault medical forensic exams without requiring victims to report the assault to law enforcement. Some victims are unable to make a decision about whether they want to report to law enforcement in the immediate aftermath of the assault. Recognizing that injuries heal and that evidence is lost as time progresses, victims should be encouraged to have the physical findings documented and evidence collected right away, and then have time to decide about reporting the crime.

See <http://www.ovw.usdoj.gov/faq-forensic-examinations.html> and <http://www.ovw.usdoj.gov/docs/stop-formula-faq.pdf> for more information on the STOP Formula Grant Program medical forensic exam payment requirement.

¹¹⁰ Victims in federal cases should first apply to the state or territory crime victim compensation program for reimbursement of costs that are their responsibility. If they are unable to obtain reimbursement via this channel, they should work with victim-witness specialists in the federal agency investigating or prosecuting the case to identify other possible sources of funding or reimbursement. For more information about crime victim compensation, please see <http://www.ovc.gov/publications/factsheets/companassist/welcome.html>.

¹¹¹ Exam facilities are sometimes willing to waive some related medical care costs that are not covered by government entities.

B. Operational Issues

This section discusses components essential to conducting the sexual assault forensic examination: the health care providers conducting the exam, the facilities where exams are performed, the equipment and supplies needed during the exam, and the sexual assault evidence collection kit. It also discusses timing considerations in collecting evidence and evidence integrity during and after the exam.

The following chapters are included:

1. Sexual Assault Forensic Examiners
2. Facilities
3. Equipment and Supplies
4. Sexual Assault Evidence Collection Kit
5. Timing Considerations for Collecting Evidence
6. Evidence Integrity

1. Sexual Assault Forensic Examiners

Recommendations at a glance to build capacity of examiners to conduct these exams:

- Encourage the development of specific knowledge, skills, and victim-centered approaches in examiners.
- Encourage advanced education and supervised clinical practice of examiners, as well as certification for all examiners.
- Provide access to experts on anti-sexual assault initiatives who can participate in sexual assault examiner training, mentoring, proctoring, case review, photograph review, and quality assurance.

It is critical that health care providers conducting the sexual assault medical forensic exam are committed to providing compassionate and competent health care, collecting evidence in a thorough and appropriate manner, and testifying in court if needed. Their commitment should be grounded in an understanding that sexual assault is a serious crime that can have profound acute and chronic consequences for those victimized. Providers should recognize the role of advanced education and clinical experience in building competency to perform the exam.

A growing trend across the United States is the use of sexual assault nurse examiners (SANEs) to conduct the exam. SANEs are registered nurses who receive specialized education and fulfill clinical requirements to perform these exams. Some nurses have been certified as SANEs—Adult and Adolescent (SANE—A) through the International Association of Forensic Nurses (IAFN).¹¹² Others are specially educated and fulfill clinical requirements as forensic nurse examiners (FNEs), enabling them to collect forensic evidence for a variety of crimes. The terms “sexual assault forensic examiner” (SAFE) and “sexual assault examiner” (SAE) are often used more broadly to denote a health care provider (e.g., a physician, physician assistant, nurse, or nurse practitioner) who has been specially educated and completed clinical requirements to perform this exam.

All communities should strive to ensure that victims of a recent sexual assault have access to specially educated and clinically prepared examiners to perform the medical forensic exam. As much as possible, examiners should be permanent rather than on temporary assignment in a jurisdiction. It can be challenging for examiners who are temporary (e.g., at an Indian Health Service facility) to understand needs of victims from the community or to be familiar with jurisdictional policies and procedures. If they move to another job assignment, arranging for them to testify in court can be complicated.¹¹³

Encourage the development of specific knowledge, skills, and victim-centered approaches in examiners. Conducting a sexual assault medical forensic examination is a complex and time-consuming procedure. It is useful for examiners to have specific knowledge and skills that can guide them as they perform these exams.¹¹⁴ For example, it is beneficial for them to know about the following:

- The dynamics and impact of sexual victimization.
- Jurisdictional laws related to sexual offenses.
- Coordinated multidisciplinary response, roles of each responding agency, and procedures for communicating with each agency during immediate response.
- The importance of examiner neutrality and objectivity during the examination.

¹¹² Eligibility criteria for IAFN SANE Adult/Adolescent certification includes: registered license as an R.N. in the United States or its Territories, or a license as a first-level general nurse in the jurisdiction of current practice; a minimum of 2 years of practice as an R.N. in the United States or as a first-level general nurse in the country of licensure; successful completion of an adult/adolescent SANE education program that includes either (a) a minimum of 40 continuing education contact hours of classroom instruction, or (b) 3 semester hours (or the equivalent) of academic credit in an accredited school of nursing, and sufficient supervised clinical practice until determined competent in SANE practice. An appropriate clinical authority, as outlined in the adult section of the IAFN *SANE Education Guidelines* (2008) must validate current SANE competency. (Drawn from the *IAFN Web Site Certification Area* at <http://www.iafn.org>.)

¹¹³ Most hospitals or medical clinics that physicians or advanced practice nurses are employed by or affiliated with require them to apply for facility privileges. Those requesting privileges usually must agree to provide forwarding addresses when they leave. Also, medical licenses can be tracked to the state or territory where the health care provider is working.

¹¹⁴ The next two bulleted sections are adapted from the *California Medical Protocol for Examination of Sexual Assault and Child Sexual Abuse Victims*, 2001, pp. 25–26, produced by the California Governor’s Office of Criminal Justice Planning. Also see the National Training Standards..

- The broad spectrum of potential evidence and physical findings in these cases.
- The importance of the medical forensic history and other documentation.
- Proper evidence collection and preservation procedures.
- Preexisting needs and circumstances of patients that may affect how the exam is conducted.
- Treatment options and procedures for common concerns such as pregnancy, STIs, and HIV infection.
- Equipment, supplies, and medication typically used during the exam.
- Precautions to prevent exposure to potentially infectious materials.¹¹⁵
- Indications for follow-up health care and documentation of injuries.
- Applicable laws and protocols regarding performance of medical forensic exams and standardized forms used to document findings.
- Patients' needs for support, crisis intervention, advocacy, information, and referrals during the exam process, local resources for addressing these needs, and procedures for accessing resources.
- The importance of establishing vehicles to ensure the quality of the exam and related documentation.
- Examiner court testimony (what it involves and how examiners can prepare for it).
- Applicable research findings, technological advances, and promising practices.

It is critical for examiners to be able to:

- Preserve their neutrality and objectivity in each case.
- Assess patients' clinical condition (physical and psychological assessment¹¹⁶) and provide appropriate treatment and medical referrals (e.g., to a surgeon).
- Adapt exam procedures to address patients' needs and circumstances as much as possible.
- Take measures during the exam process to reduce the likelihood of patients' retraumatization.
- Take precautions according to facility policy to prevent exposure to potentially infectious materials.
- Contact advocates (where available) upon initial contact with patients so they can offer patients support, crisis intervention, advocacy, information, and community referrals before, during, and after the exam.¹¹⁷
- Explain the obligation and scope of mandatory reporting to the patient, if mandatory reporting is required.
- Gather information sensitively from patients for a medical forensic history and use the history as a guide when performing an exam.
- Explain to patients what items need to be collected for evidence and for what purposes.
- Involve law enforcement representatives promptly if patients want to report and work with them to optimize the collection of evidence from patients, suspects, and crime scenes.
- Identify and describe pertinent genital and anorectal anatomical structures and external landmarks.

¹¹⁵ See the U.S. Department of Labor, Occupational Safety and Health Administration (OSHA) for its Bloodborne Pathogens Standard (CFR 1910.1030). It may be accessed at <http://www.osha.gov> or by calling 800-321-OSHA. According to this standard, bloodborne pathogens are pathogenic microorganisms that are present in human blood and can cause disease in humans. Among other things, the standard requires employers who have employees at risk for occupational exposure to bloodborne pathogens and other potentially infectious materials to develop plans to eliminate or minimize employee exposure. It also advises universal precautions that should be observed to prevent contact with blood or other potentially infectious materials (this approach treats all human blood and certain human body fluids as if they are known to be infectious). In addition, the standard requires employers to ensure that all employees at risk participate in a training program to inform them of risks, related facility policies, and necessary precautions. Employers must also establish and maintain a record for each employee with occupational exposure.

¹¹⁶ Examiners typically assess patients' psychological functioning to determine whether there is a risk for suicide and whether patients are oriented to person, place, and time. They may request a mental health evaluation for patients, if necessary.

¹¹⁷ It is helpful if jurisdictions clarify the specific roles of advocates and examiners during the exam process. In the absence of advocates or other victim service providers, examiners may be responsible for providing crisis intervention and support to patients. In situations where examiners are both collectors of evidence and crisis counselors, it is important to understand how these dual roles affect the perception of their ability to testify in an unbiased manner.

- Identify and document injuries and interpret physical findings; this documentation should include a diagram of the finding on an appropriate anatomic drawing, a written description of the finding (including any indication of tenderness or induration), and forensic imaging of any visible finding.
- Use enhancement techniques for detection and documentation of findings.
- Collect and preserve evidence for analysis by the crime laboratory.
- Collect and preserve toxicology samples in suspected alcohol- or drug-facilitated sexual assault cases.
- Maintain and document the chain of custody for evidence.
- Maintain the integrity of the evidence to ensure that optimal lab results are obtained.
- Evaluate the possibility of STIs and HIV infection and provide prophylactics and/or treatment.
- Assess pregnancy risk and discuss treatment options with the patient.
- Recognize evidence-based conclusions and limitations in the analysis of findings.
- Complete standard forms for documenting the medical forensic results of the exam.
- Discuss evidentiary findings with investigators, prosecutors, and defense attorneys as requested (according to jurisdictional policy).
- Testify in court if needed.

Encourage advanced education and supervised clinical practice for health care personnel conducting the exam, as well as certification for all examiners. Such a standard must speak to specific education and supervision needs of involved disciplines. For example, nonphysician examiners may require medical supervision and backup, in addition to completing necessary training and clinical requirements. Certification through the IAFN is currently available only to nurses trained as SANEs. When designing classroom education for examiners, make sure the examiners understand the importance of a multidisciplinary response during the exam process. Consider involving trainers from health care, advocacy, law enforcement, prosecution, judiciary, and crime laboratories.

Standardized curricula on sexual assault exams in medical school, nursing and nurse practitioner programs, and physician assistant programs are recommended. Consideration must be given to how to systematically secure, supervise, and retain examiners in/for poor, rural, or remote areas, institutional settings,¹¹⁸ military bases, college campuses, tribal lands, migrant farm worker communities, and other areas needing increased victim outreach. Examiners need to know how to respond in a respectful manner to various populations within their community (e.g., local tribal victim service providers may be able to provide training on cultural beliefs and practices that might be relevant in sexual assault cases).

In addition, other health care providers who come into contact with patients who disclose a recent assault need information on procedures for obtaining immediate patient assistance and caring for patients prior to their arrival at the exam site.

Provide access to experts on anti-sexual assault/violence initiatives who can participate in sexual assault examiner training, mentoring, proctoring, case review, photograph review, and quality assurance. Access to such experts can help increase examiner competence and the consistency of high quality forensic examinations. Telemedicine may help provide this expertise, especially to rural and underserved areas.

¹¹⁸ Examples of institutional settings include prisons, jails, immigration detention centers, juvenile detention centers, nursing homes, assisted living and rehabilitation programs, and inpatient treatment centers.

2. Facilities

Recommendations at a glance to build the capacity of health care facilities to respond to sexual assault cases:

- Recognize the obligation of health care facilities to serve sexual assault patients in a culturally and linguistically appropriate manner.
- Ensure that exams are conducted at sites served by examiners with advanced education and clinical experience, if possible.
- Explore possibilities for optimal site locations.
- Communities may wish to consider developing basic requirements for designated exam sites.
- If a transfer from one health care facility to a designated exam site is necessary, use a protocol that minimizes time delays and loss of evidence and addresses patients' needs.

Recognize the obligation of health care facilities to serve sexual assault patients in a culturally and linguistically appropriate manner.¹¹⁹ It is essential that all sexual assault patients who present to health care facilities be thoroughly evaluated. Treating injuries alone is not sufficient in these cases. Staff who examine these patients must be educated and clinically prepared to collect evidence and document findings while maintaining the chain of custody. They should be able to coordinate crisis intervention and support for patients, as well as provide STI evaluation and care, pregnancy assessment, and discuss treatment options. They must be aware of and follow jurisdictional reporting policies, and be able to provide court testimony if necessary.

The Joint Commission on Accreditation of Healthcare Organizations (JCAHO)¹²⁰ requires emergency and ambulatory care facilities to have established policies for identifying and assessing possible victims of sexual assault. It also requires staff to be trained on these policies. As part of the assessment process, JCAHO requires these facilities to define their responsibilities related to the collection and preservation of evidentiary materials.¹²¹ Sexual assault examiner programs are helping many health care facilities to carry out these requirements. Facilities should also familiarize themselves with the federal Emergency Medical Treatment and Active Labor Act (EMTALA), which has provisions pertaining to the ability of hospitals to turn away patients with emergency medical conditions.¹²²

Ensure that exams are conducted at sites served by examiners with advanced education and clinical experience, if possible. Some jurisdictions designate specific facilities as exam locations because they employ or have ready access to specially educated and clinically prepared examiners, as well as the necessary space, equipment, supplies, and policies to facilitate the exam process. Jurisdictions may rely on examiner programs to serve multiple exam sites within a specific area.¹²³ Communities can benefit from designated exam facilities and examiner programs that use specially educated and clinically prepared examiners to conduct the exam because they:

- Increase the quality of care for patients and attention to their needs.
- Increase the likelihood of a state-of-the-art examination.

¹¹⁹ This and the next paragraph were drawn from L. Ledray, *Evidence Collection and Care of the Sexual Assault Survivor: The SANE-SART Response*, 2001, p. 1.

¹²⁰ JCAHO standards for accreditation address a health care organization's level of performance in specific areas—not just what the organization is capable of doing, but what it actually does. The standards set forth maximum achievable performance expectations for activities that affect the quality of care. These standards are developed in consultation with health care experts, providers, measurement experts, purchasers, and consumers, and usually are updated every 2 years. (Drawn from http://www.jointcommission.org/standards_information/standards.aspx).

¹²¹ The JCAHO requirements are discussed at <http://www.mincava.umn.edu/documents/commissioned/2forensicevidence/2forensicevidence.html>.

¹²² 42 U.S.C. § 1395dd. See <http://www.emtala.com> for more information about EMTALA.

¹²³ A mobile examiner program may be based in a health care facility—in addition to providing services at that facility, it also may contract with other exam sites to provide services as requested. Such a program may also be independent, with administrative offices only, and solely contract with exam sites to provide examiner services.

- Enhance a coordinated team approach.
- Encourage quality control (e.g., through use of competent and dedicated examiners, established procedures for evidence collection, and standards for medical care).

Explore possibilities for optimal site locations. SART/SARRTs (or involved agencies) should determine where exams should be conducted. Some factors to consider when identifying sites include safety and security for patients and staff, physical and psychological comfort for patients, capacity to accommodate victims with disabilities,¹²⁴ availability of examiners with advanced education and clinical experience, access to a pharmacy for medication, access to medical support services for care of injuries, access to lab services, and access to the supplies and equipment needed to complete an exam.¹²⁵ Decisions about site location should reflect the needs of victims (e.g., for accessible care close to their home and local referrals), what is most efficient for the multidisciplinary response team, and the need to maintain the neutrality and objectivity of examiners (e.g. if the site location is at a rape crisis center, it may be seen as biased against the offender). Designated facilities may be in hospitals, health clinics, mobile health units, or other alternative sites, including family justice centers¹²⁶ or nonprofit sexual assault victim services programs.¹²⁷ The majority of medical forensic exams are conducted in hospital emergency departments. This location typically offers some level of security, is open 24 hours a day, and provides access to a wide array of medical and support services. Clinical staff often have the experience and expertise to perform the exam and collaborate with appropriate disciplines. Some jurisdictions have or are developing specialized hospital or community-based examiner programs.¹²⁸

SART/SARRTs may need to decide whether a tribal, local, regional, or state/territorial system of designated facilities best serves community needs. Some issues that might impact this decision include community demographics and geography; the need for and availability of specialized services; availability of local health care facilities; local capacity to secure competent examiners and necessary space, equipment, and supplies; willingness of involved disciplines to coordinate with a local facility or examiner program; distance to/from tribal, regional, or state/territorial facilities; and service capacity of tribal, regional or state/territorial facilities. Communities are encouraged to first consider using local designated exam sites. However, some may ultimately opt for tribal-, regional- or state/territorial-level facilities. For example, a small state, tribe, or sparsely populated region may establish one or more designated facilities to serve all of its localities.

Exam facilities and examiners that serve at the local level may benefit from networking with examiners in other facilities or areas for support for peer review of medical forensic reports, quality assurance, and information sharing (e.g., on training opportunities, practices, and referrals for patients).

Communities may wish to consider developing basic requirements for designated exam sites.

Examples of such requirements include:¹²⁹

- The site will be within a reasonable distance from any point in the area it serves (“reasonable” is locally defined).
- The site will promptly alert a SART/SARRT member, if one exists, when sexual assault patients arrive.
- Urgent or emergent physical injuries (or other acute medical needs) will be treated immediately.

¹²⁴ Title II and Title III of the Americans with Disabilities Act explains requirements for facilities in accommodating persons with disabilities (which may vary depending on the type of facility). Title II prohibits discrimination against persons with disabilities in all programs, activities, and services of public entities. Title III requires places of public accommodation to make reasonable modification in their policies, practices, and procedures in order to accommodate individuals with disabilities. See <http://www.ada.gov/> for related information and resources.

¹²⁵ Drawn from L. Ledray, *SANE Development and Operation Guide*, 2000, pp.35–36.

¹²⁶ Particularly on tribal land that is devoid of or a significant distance from a hospital, and the tribe is serviced by an Indian Health Service (IHS) facility; consideration should be given to securing and maintaining examiners and necessary space, equipment, and supplies to conduct these exams. Ideally, all IHS facilities should have examiners and a minimum standard for examiner training.

¹²⁷ For more information on the President’s Family Justice Center Initiative, see <http://www.ovv.usdoj.gov>.

¹²⁸ The pros and cons of developing hospital versus community-based examiner programs are discussed in more detail in L. Ledray’s *SANE Development and Operation Guide*, 2000, pp.35–9; L. Ledray’s *Sexual Assault: Clinical Issues*, SANE Program Pros and Cons, *Journal of Emergency Nursing*, 23(2), p.183; and in K. Littel’s *SANE Programs: Improving the Community Response to Sexual Assault Victims*, pp.10–11.

¹²⁹ Adapted from Pennsylvania’s *SART Guidelines*, 2002, p.21.

- Responding examiners will be competent in their knowledge and skills.
- The site will ensure that admissions staff have the necessary resources and knowledge to best accommodate the patient until the examiner or victim advocate arrives.
- The site will arrange for interpretation as needed in patients' preferred languages and/or obtain devices that facilitate communication for individuals with sensory or communication disabilities.
- Patients will be provided with a comprehensive medical forensic exam and resources to address their immediate emotional and psychological needs.
- The site will provide a private, secure, and quiet waiting area for patients and for personal support persons accompanying them.
- The site will provide a private and secure setting for the investigative interview.
- The site will provide a private exam room and other measures to assure patients' privacy.
- The site will have a bathroom (preferably with shower facilities) available for patients' use following completion of the exam.
- The site or examiner program that serves the site will have/provide proper equipment and supplies to facilitate a comprehensive exam ("proper equipment and supplies" are locally defined).
- The site or examiner program that serves the site will have a mechanism to ensure that evidence collection kits are available and up to date.
- Patients will be offered medications for possible exposure to sexually transmitted infections.
- Patients will be assessed for pregnancy risk, informed about treatment options, and offered treatment.
- Patients will be offered information about how exams are paid for in their jurisdiction and reimbursement sources (if they exist) for related expenses that are their responsibility.
- Site billing departments will adhere to proper coding and billing practices for sexual assault cases, as determined by the facility and informed by jurisdictional policy.

If designated facilities or sites served by examiner programs are selected, their success depends on getting information about them to victims and agencies that provide immediate response or refer victims for treatment and evidence collection. At a minimum, the list of designated exam sites should be provided to all local hospitals, law enforcement agencies, emergency medical services, sexual assault victim advocacy programs, and protective services. Promoting community public awareness about these sites is also important given that victims may first disclose an assault to family members, friends, teachers, faith-based leaders, employers, coworkers, and others. In addition, success will depend on interagency cooperation in explaining facility options to victims and transporting them to designated exam sites (with their permission). Law enforcement representatives and advocates may need guidance on how to recommend an exam location to victims without mandating that they go to a specific site.

If a transfer from one health care facility to a designated exam site is necessary, use a protocol that minimizes time delays and loss of evidence and addresses patients' needs.¹³⁰ Avoid transferring sexual assault patients whenever possible. If transfer is necessary, explore options to ensure that the patient's comfort is prioritized. Every transfer can destroy evidence and cause patients further stress. However, if a sexually assaulted individual arrives at a health care facility that, for some reason, is not able to provide a medical forensic exam, interagency transfer procedures must be in place to transfer that individual to the nearest designated exam site. Evidence should be preserved when examining, treating, or transferring patients and providers should take care to preserve the chain of custody of such evidence. If there are acute medical or psychological injuries that must be treated immediately, treatment should be provided at the initial receiving facility. It may be helpful to offer patients support and advocacy from advocates at both the receiving facility and exam site. A copy of all records, including any X-rays taken, should be transported with patients to the exam facility. (However, it may not be necessary to send all medical records if patients' medical needs are met before they are transferred to a nonmedical exam site for evidence collection.) All health care facilities receiving federal funds, including Medicare and Medicaid payments, are required to screen patients medically before transferring them to another exam site.¹³¹

¹³⁰ This section was drawn from the *North Dakota Sexual Assault Evidence Collection Protocol*, 2005, p. 12, and the *Texas Evidence Collection Protocol*, 1998, p. 14.

¹³¹ Emergency Medical Treatment and Active Labor Act, 42 U.S.C. 1395dd.

Patients have a right to decline a transfer. They should be aware, however, of the impact of refusing transfer, as it may negatively affect the quality of care, the usefulness of evidence collection, and, ultimately, any criminal investigation and/or prosecution. They should understand that declining a transfer might also be used to discredit them in court. Providers should carefully discuss with patients the benefits of the transfer, the possible benefits of refusing the transfer and the drawbacks of both options, so that patients can make an informed decision. Providers should avoid pressuring patients to accept a transfer.

3. Equipment and Supplies

Recommendations at a glance to ensure proper equipment and supplies are available for exams:

- Consider what equipment and supplies are necessary to conduct a medical forensic exam.
- Address cost barriers to obtaining necessary equipment and supplies.

Examiners should know how to use all equipment and supplies (including medications) properly during the exam. It is important that examiners and other individuals involved in sexual assault cases stay abreast of the latest research on the use of equipment and supplies used in caring for sexual assault patients and/or collecting evidence from them.

Consider what equipment and supplies are necessary to conduct a medical forensic exam. Plan to have the following equipment and supplies readily available for the exam, according to jurisdictional policies:¹³²

- A copy of the most current exam protocol used by the jurisdiction.
- Standard exam room equipment and supplies for a physical assessment and pelvic exam. Access for patients with physical disabilities should be taken into account.¹³³
- Comfort supplies for patients, even if minimal. Suggested items: clean and ideally new replacement clothing, toiletries, food and drink, and a phone or at least easy access to a phone in as private a location as possible. It is also important during the exam process to help patients obtain items they request related to their spiritual healing.¹³⁴ It may be useful for facilities to have items on hand that are commonly requested in that jurisdiction (e.g., things that are used for local tribal traditional healing practices) and policies for their use in the facility.¹³⁵
- Sexual assault evidence collection kits and related supplies. (See *B.4. Sexual Assault Evidence Collection Kit* for information on minimal kit contents.) Related supplies might include tweezers, tape, nail clippers and scrapers, scissors, collection paper, saline solution or distilled water, extra swabs, sterile containers, envelopes, paper bags, and pens/pencils.
- A method or device to dry evidence. Drying evidence is critical to preventing the growth of mold and bacteria that can destroy an evidentiary sample. With any drying method or device used, ensure minimal contamination of evidence, and maintain the chain of custody. The kit's design can also aid in the drying process (e.g., by providing clear instructions and supplies to allow drying to occur).
- A camera and related supplies (using the most up-to-date technology possible) for forensic photography during initial and follow-up examinations. Related supplies might include digital media, batteries and/or charger, a flash, a color bar, and a scale ruler for size reference. (Also see *C.5. Photography*.)
- Testing and treatment supplies needed to evaluate and care for patients medically (follow exam facility policies). Also, testing supplies may be needed that are not included in the evidence collection kit. For example, supplies for toxicology testing are often not in the kit.
- An alternate light source (using the most up-to-date technology possible) can aid in examining patients' bodies, hair, and clothing. It can be used to scan for evidence, such as dried or moist

¹³² All the equipment and supplies discussed will not be needed in every exam. What is appropriate in each case will depend on the circumstances of the assault and medical and forensic attention called for, patients' needs, and patients' consent to utilize equipment and supplies. Jurisdictional and/or facility policies will also influence what equipment and supplies are used.

¹³³ For example, it would be ideal to have an exam table with a hydraulic lift for persons with mobility impairments. If this exam table is not available, health care personnel must be aware of how to assist patients with physical disabilities onto standard exam tables. If it is determined that a patient can only be examined on an exam table with a hydraulic lift, procedures should be in place to get the patient to a site with such a table with as little loss of evidence as possible.

¹³⁴ Along with these items, patients may want the opportunity to speak with a trusted religious or spiritual leader, such as a medicine man/woman, a rabbi, a priest, or a pastor, before, during, or after the exam.

¹³⁵ Involved responders/facilities should be aware of local traditional healing practices and support patients if they wish to use such practices at some point before, during, or after the exam. Keep in mind that each tribe has its own traditional practices to promote healing, but not all Native people follow traditional spiritual paths. Rather, spiritual values and belief systems among Native people are as widely diverse as they are among the general population.

secretions, fluorescent fibers not visible in ambient light, and subtle injury.¹³⁶ While the exam can be done without a light source, it is a relatively inexpensive piece of equipment that is commonly used during exams.¹³⁷ (Also see *C.6. Exam and Evidence Collection Procedures*.)

- An anoscope may be used in cases involving potential anorectal penetration or anal/rectal trauma.¹³⁸ This instrument may be used to assist in visualizing an anal injury, obtaining reliable rectal swabs (if there is a concern about contamination), and identifying and collecting trace evidence. (Also see *C.6. Exam and Evidence Collection Procedures*.)
- Written materials for patients. (For details on this topic, see *A.2. Victim-Centered Care*.)

In addition:

- A colposcope with photographic capability may be used. Although some injuries can be detected visually by examiners without the colposcope, the colposcope is an important asset in the identification of microscopic trauma. Photographic equipment, both still and video, can be attached for forensic documentation. (Also see *C.6. Exam and Evidence Collection Procedures*.)
- A microscope. In some jurisdictions, examiners are required to prepare a wet mount slide and immediately examine vaginal/cervical secretions for motile and nonmotile sperm.¹³⁹ In these cases, an optically staining microscope is used to highlight cellular material and facilitate the search for sperm.¹⁴⁰ (Also see *C.6. Exam and Evidence Collection Procedures*.)
- Toluidine blue dye. In some jurisdictions, the dye is used to assist in highlighting observed genital and perianal injuries. (Also see *C.6. Exam and Evidence Collection Procedures*.)

(See *C. The Examination Process* for more discussion on use of equipment and supplies during the exam.)

Note that some jurisdictions, particularly those in rural and remote areas, are beginning to utilize advanced technology (equipment and methods) such as real-time video consultation, store and forward video consultation, and interactive video consultation to support examiners conducting exams. Using this type of technology, examiners can eliminate the barriers of geography and consult with offsite medical “experts.” (This use of such technology in medicine is sometimes called telemedicine.) Equipment needed to facilitate use of telemedicine may include, but is not limited to, computers, software programs, and the Internet.¹⁴¹ Jurisdictions that use such technology should consider ways to protect victim confidentiality.

Address cost barriers to obtaining necessary equipment and supplies. Obtaining equipment and supplies that can increase the quality and quantity of evidence collected can have a significant impact on case outcomes. However, the costs of equipment and training on equipment use can be prohibitive for some jurisdictions and examiner programs. Some ideas to address cost barriers:

- Seek used or donated equipment or alternative, less-expensive equipment where it exists.

¹³⁶ Drawn from the *California Medical Protocol for Examination of Sexual Assault and Child Sexual Abuse Victims*, 2001, p. 37.

¹³⁷ A Wood’s Lamp is perhaps the most commonly used type of light source in sexual assault exams. Examiners should be aware of what the light sources they use will detect and their limitations. For example, many examiners find the Wood’s Lamp useful in helping to detect secretions, stains, and fibers on patients. However, one research study questioned its utility as a screening device for the detection of semen. (K. Santucci, D. Nelson, K. McQuillen, S. Duffy, and J. Linakis, “Wood’s Lamp Utility in the Identification of Semen,” *Pediatrics*, 104(6), 1999.) Continued research is needed (and being conducted) on the utility of this and other light sources in evidence collection. Ongoing refinement of these instruments is encouraged.

¹³⁸ The examiner should use discretion in determining whether a case warrants the use of the anoscope for medical and/or forensic purposes, as well as obtain patients’ informed consent for anoscopy. Particularly if a patient has been anorectally penetrated, that patient may be uncomfortable with the use of the anoscope and could possibly even feel revictimized by it. The discomfort this procedure may cause the patient should be weighed against its potential medical or forensic benefits.

¹³⁹ Wet-mount evaluation of vaginal secretions for infection (e.g., yeast infection and STIs) may be conducted if medically or forensically indicated, whether or not wet-mount evaluation for sperm is done. Hospital lab personnel rather than examiners usually analyze these samples.

¹⁴⁰ The most commonly used optically staining instrument by hospital labs is the phase contrast microscope. In jurisdictions that require examiners to do wet-mount evaluations for sperm, an optically staining microscope should be readily available to them at all times. Ideally, due to chain-of-custody issues and the fact that the slide will dry in 5 to 10 minutes, examiners should not have to leave the exam room to evaluate the slide.

¹⁴¹ Keep in mind that telemedicine in sexual assault cases is in its infancy—further research and debate is needed to address concerns related to logistics of use, patients’ consent, confidentiality, and impact; legal implications; affordability; and accessibility.

- Apply for grant or foundation funding for equipment where eligible.¹⁴²
- Ask for help from community groups in raising funds for one-time equipment or ongoing supply costs;
- Consider sharing costs and equipment with other departments in an exam facility or among other near-by local health care facilities.
- Consider the benefits of a mobile examiner program where costs of equipment, examiner education and clinical preparation, and on-call costs may be shared by multiple exam sites.
- Since the information gathered in the exam is used to investigate and prosecute the offense, ask for assistance from local law enforcement and prosecutor's offices in obtaining equipment and supplies used specifically for forensic evidence collection.

¹⁴² Funding under the STOP Violence Against Women Formula Grant Program and the Grants to Indian Tribal Governments Program may be used to cover costs of some equipment. For more information, see <http://www.ovw.usdoj.gov>.

4. Sexual Assault Evidence Collection Kit

Recommendations at a glance when developing/customizing kits:

- Use kits that meet or exceed minimum guidelines for contents.
- Work to standardize sexual assault evidence collection kits within a jurisdiction and across a state or territory, or for federal cases.

Use kits that meet or exceed minimum guidelines for contents. Many jurisdictions have developed their own sexual assault evidence collection kits (for evidence from victims) or have purchased premade kits through commercial vendors. Kits may vary from one another in types of samples collected, collection techniques, materials used for collection, and terms used to describe categories of evidence. Despite variations, however, it is critical that every kit meets or exceeds the following minimum guidelines for contents.¹⁴³

- A kit container. It is suggested that this container have a label with blanks for identifying information and documenting the chain of custody. Most items gathered during evidence collection are placed into the container, after being dried, packaged, labeled, and sealed according to jurisdictional policy. Bags are typically provided for more bulky items that will not fit in the container (e.g., clothing). Some jurisdictions provide large paper bags to hold the container and additional evidence bags.
- An instruction sheet or checklist that guides examiners in collecting evidence and maintaining the chain of custody.
- Forms that facilitate evidence collection and analysis, including patients' authorization for collection and release of evidence and information to the law enforcement agency; the medical forensic history; and anatomical diagrams.
- Materials for collecting and preserving the following evidence, according to jurisdictional policy:¹⁴⁴
 - Patients' clothing and underwear and foreign material dislodged from clothing.
 - Foreign materials on patients' bodies, including blood, dried secretions, fibers, loose hairs, vegetation, soil/debris, fingernail scrapings and/or cuttings, matted hair cuttings, material dislodged from mouth,¹⁴⁵ and swabs of suspected semen, saliva, and/or areas highlighted by alternate light sources.¹⁴⁶
 - Hair if required in the jurisdiction.¹⁴⁷
 - Vaginal/cervical swabs.
 - Penile swabs.
 - Anal/perianal swabs.
 - Oral swabs.
 - Body swabs.¹⁴⁸

¹⁴³ The following resources were helpful in developing this list: the *Sexual Assault Evidence Collection Kit, VEC100*, by Sirchie Finger Print Laboratories, the *Texas Customized Sexual Assault Evidence Collect Kit* by Tri-Tech, Inc., the Commonwealth of Virginia's *Physical Evidence Recovery Kit*, the state of California's *Medical Forensic Report: Adult/Adolescent Sexual Assault Examination, Less than 72 Hours (OCJP 923)*, the *Ohio Department of Health's Sexual Assault/Abuse Evidence Collection Kit* (as found in their protocol), *Detailed Instructions*; *Connecticut's Sexual Assault Evidence Collection Kit* (as found in their protocol), and the American College of Emergency Physicians' *Evaluation and Management of the Sexually Assaulted or Sexually Abused Patient*, 1999, pp. 101–107.

¹⁴⁴ Some samples that historically have been collected are no longer recommended in many jurisdictions, unless the medical forensic history and physical exam indicate otherwise (e.g., collection of a saliva sample for "secretor status").

¹⁴⁵ Flossing for evidence is not routinely done across jurisdictions. Any related safety risks to patients (e.g., potential increased risk of HIV exposure if there is semen in the mouth and flossing causes gums to bleed) must be considered and flossing for evidence can potentially expose the patient to that risk.

¹⁴⁶ It is acknowledged that approaches to categorizing evidence vary. For example, one kit may collect external genital swabs when gathering foreign materials, while in another kit, collection of genital swabs may be a separate category of evidence.

¹⁴⁷ Some jurisdictions collect pubic and head hair combings, others collect only pubic combings. Some also collect pubic and/or head hair reference samples. Materials should be included in the kit to collect and preserve hair evidence required by jurisdictional policy. Jurisdictions should evaluate the necessity of routinely collecting hair samples based on discussions of how often such evidence is actually useful or used in the jurisdiction.

¹⁴⁸ Material may be present on any body surfaces from contact with blood or body fluids. The swabs available as a standard in each kit varies by jurisdiction.

- Known blood, saliva sample, or buccal swab for DNA analysis and comparison.

(See *C.6. Exam and Evidence Collection Procedures* for specifics about evidence collection techniques.)

All forms included in the kit should be designed to facilitate optimal forensic evidence collection, analysis, and examiner testimony. Extra copies of forms should be available to examiners for cases when the kit is not used, but documentation of the medical forensic history is completed.

Materials and forms for collecting toxicology samples should be available to examiners (and to responding law enforcement officers and emergency medical technicians, according to jurisdictional policy).

Work to standardize sexual assault evidence collection kits within a jurisdiction and across a state or territory, or for federal cases.¹⁴⁹ A designated agency in the jurisdiction should be responsible for oversight of kit development and distribution.¹⁵⁰ It should:

- Ensure that facilities that conduct sexual assault medical forensic exams are involved in kit development and supplied with kits.¹⁵¹
- Work with relevant agencies (e.g., crime labs, law enforcement agencies, exam facilities and examiner programs, advocacy programs, and prosecutors' offices) to keep abreast of related changes in technology, scientific advances, and cutting-edge practice.
- Review periodically (e.g., every 2 to 3 years) kit efficiency and usefulness.
- Make adjustments to the kit as necessary.
- Establish mechanisms to ensure that kits at exam facilities are kept up to date (e.g., if a new evidence collection procedure is added, facilities need to know what additional supplies should be readily available).

(See *B.6. Evidence Integrity* for handling and storage of kits.)

¹⁴⁹ It may be useful to consider developing a standardized kit across all communities, states, and territories, and for federal cases. Further analysis is needed to assess the benefits and disadvantages of such a kit and the feasibility of development and implementation. Some challenges could include building consensus across communities regarding best practices and obtaining buy-in from involved agencies.

¹⁵⁰ It is important to consider costs to the state/territory/tribe/federal agencies and local community, and ability of local communities to cover costs. In some states, one state agency (e.g., the crime laboratory) assumes the costs. In others, the costs are passed onto local criminal justice agencies.

¹⁵¹ As a backup to having kits readily available at exam sites or with examiner programs, jurisdictions may also want to discuss the feasibility of storing a few kits at local law enforcement agencies or in law enforcement patrol cars. Before storing kits in patrol cars, however, make sure that the temperatures the kit will be exposed to will not affect kit contents.

5. Timing Considerations for Collecting Evidence

Recommendations at a glance for health care providers and other individuals responding to sexual assault victims to optimize evidence collection:

- Recognize the importance of gathering information for the medical forensic history, examining patients, and documenting exam findings, separate from collecting evidence.
- Examine patients promptly to minimize loss of evidence and identify medical needs and concerns.
- Make decisions about whether to collect evidence and what to collect on a case-by-case basis, guided by knowledge that outside time limits for obtaining evidence vary due to factors such as the location of the evidence or type of sample collected.
- Examiners and law enforcement representatives should seek education and resources to aid them in making well-informed decisions about evidence collection.

Recognize the importance of gathering information for the medical forensic history, examining patients, and documenting exam findings, separate from collecting evidence. Examiners should obtain the medical forensic history as appropriate, examine patients, and document findings when patients are willing, whether or not evidence is gathered for the sexual assault evidence collection kit. The history and documentation of exam findings can help in determining if and where there may be evidence to collect and in addressing patients' medical needs. In addition, they can be invaluable in and of themselves to an investigation and prosecution if a report is made. It is also important to document patients' demeanor during the exam process using specific, concrete terms (e.g., crying, shaking) and their statements made related to the assault because if the case is reported, this information could be admitted as evidence at trial. When documenting patient statements, it is important to write down the exact wording of the statement.

Examine patients promptly to minimize the loss of evidence and identify medical needs and concerns. Evidence can be lost from the body and clothing through a number of mechanisms. For example, degradation of some seminal fluid components can occur within body orifices, semen can drain from the vagina or wash from the mouth, sperm can lose motility, bodily fluids can get washed away, and dried secretions and foreign materials can fall from the body and clothing.¹⁵² Prompt examination also helps to quickly identify patients' medical needs and concerns.

Due to the stability of DNA and sensitivity of tests, advancing DNA technologies also continue to extend time limits. These technologies are even enabling forensic scientists to analyze stored evidence from crimes that occurred years before.¹⁵³ Such breakthroughs demonstrate the importance of collecting all possible evidence.

Make decisions about timeliness issues for evidence collection on a case-by-case basis, guided by the knowledge that outside time limits for obtaining evidence vary due to factors such as the location of the evidence or type of sample collected. Examiners and law enforcement representatives, in particular, should be aware of the standard cutoff time for evidence collection in their jurisdictions, which is typically indicated in instructions in evidence collection kits. But it is important to remember that evidence collection beyond the cutoff point is conceivable and may be warranted in particular cases. In any case where the utility of evidence collection is in question, encourage dialogue between law enforcement representatives (if involved), examiners, and forensic scientists regarding potential benefits or limitations.

¹⁵² Paragraph drawn from the *California Medical Protocol for Examination of Sexual Assault and Child Sexual Abuse Victims*, 2001, p. 29.

¹⁵³ When the evidence was initially collected after the assault, it was not of adequate quality to allow crime lab analysis using existing technologies. See . T.S. Corey, A.R. Wetherton, P.J. Foncek, and D. Katz, Investigation of Time Interval for Recovery of Semen and Spermatozoa from Female Internal Genitalia, from the Office of the Chief Medical Examiner, the Department of Pathology and Laboratory Medicine, University of Louisville School of Medicine, and the Kentucky State Police Forensic Science Laboratory. See also K. A. Mayntz-Press, L.M. Sims, A. Hall, and J. Ballantyne, "Y-STR Profiling in Extended Interval (≥ 3 days) Postcoital Cervicovaginal Samples", *Journal of Forensic Sciences*, V. 53, Issue 2, pp. 342–348, March, 2008.

Individuals responding to sexual assault victims should avoid basing decisions about whether to collect evidence on how they think patients' characteristics or circumstances will affect the investigation and prosecution. For example, the fact that an adolescent may have lied to her parents about where she was going the night of the assault should in no way influence the decision of the examiner and/or the law enforcement representative to collect evidence.

Examiners and law enforcement representatives should seek education and resources to aid them in making well-informed decisions about evidence collection. Examiners and law enforcement representatives require training and resources to allow them to make informed decisions about whether to collect evidence and what to collect in each case. They also need local policies and kit instructions that encourage them to make informed decisions in each case, rather than applying a limiting general standard to all.¹⁵⁴ First responders also need instructions on collecting a urine sample if there is any suspicion of alcohol- or drug-facilitated sexual assault and victims cannot wait to urinate until their arrival at the exam site.

¹⁵⁴ For many communities, moving away from the 72-hour cutoff time represents a major shift in policy. Training and policies should discourage decision making about evidence collection that is based on extraneous factors, such as reluctance of a criminal justice agency to pay for sexual assault evidence collection in general.

6. Evidence Integrity

Recommendations at a glance to maintain evidence integrity:

- Follow jurisdictional policies for drying, packaging, labeling, and sealing evidence.
- Make sure transfer policies maximize evidence preservation.
- Make sure storage policies maximize evidence preservation.
- Document the handling, transfer, and storage of evidence.

Follow jurisdictional policies for drying,¹⁵⁵ packaging, labeling, and sealing evidence. Examiners should be educated regarding these policies. It is critical to air-dry wet evidence at room temperature in a clean, sterile environment and quick manner that prevents contamination.¹⁵⁶ A drying box or other device may be used to facilitate the drying process. Jurisdictions should have policies for handling evidence that cannot be dried thoroughly at the exam site (e.g., wet clothing, tampons, sanitary napkins, tissues, diaphragms, and condoms), as well as for liquid evidence such as urine and drawn blood samples. When packaging dry evidence, use paper containers rather than plastic, because plastic containers retain moisture and promote degradation of biological evidence. Following proper drying and packaging procedures is vital to prevent the growth of mold and bacteria that can destroy an evidentiary sample.

Keep in mind that evidentiary materials include exam documentation. Follow jurisdictional policies for documenting exam findings and the medical forensic history and for packaging, labeling, and sealing such documentation. Properly recording and preserving this information is critical for its admissibility during a trial.

Make sure transfer policies maximize evidence preservation. Minimize transit time between collection of evidence and storage of kits. To avoid potential degradation of evidence, it is important to transport kits containing liquid samples and other wet evidence in a timely fashion. Only a law enforcement official or duly authorized agent should transfer evidence from the exam site to the appropriate crime laboratory or other designated storage site (e.g., a law enforcement property facility). Jurisdictional procedures for evidence management and distribution must be in place and followed. Those involved in evidence management and distribution should be educated on the specifics of these procedures and their responsibilities.

Make sure storage policies maximize evidence preservation. Secure storage sites should be designated and storage requirements should be consistent across a jurisdiction. Storage requirements depend on what types of specimens are being collected and on jurisdictional policy. For example, kits without drawn blood or other wet evidence generally do not need to be refrigerated. Follow jurisdictional policy for refrigeration of drawn blood samples and other wet evidence. The use of dried blood samples on blood collection cards is encouraged because they do not require refrigerated storage.¹⁵⁷ Urine should be refrigerated or frozen when stored.¹⁵⁸ Those involved in storing biological evidence should be knowledgeable regarding optimal storage conditions as well as the hazards for handling and storing evidence such as blood and urine. Evidence should be retained for as long as possible, as storage space permits. Some jurisdictions require storage of evidence for the full statute of limitations of the offense.

Make sure jurisdictional policies are in place to address evidence storage in cases where patients are undecided about reporting. Finding adequate storage space for these kits is a challenge for many facilities and agencies (e.g., community-based or hospital examiner programs may lack the capacity for secure long-term storage of kits at their facilities). Local responders, particularly examiners, law enforcement representatives, and crime lab staff, should discuss and address these and related challenges and develop

¹⁵⁵ Dry evidence unless indicated otherwise (e.g., freezing).

¹⁵⁶ With the ever-increasing sensitivity of DNA analysis, there is a greater chance that accidental contamination and dilution by foreign DNA can be detected. Every precaution should be taken to reduce outside contamination and dilution of evidence.

¹⁵⁷ The National Institute of Standards and Technology is conducting a 10-year project on DNA storage. Thus far, it confirms that refrigeration of dried DNA is generally unnecessary.

¹⁵⁸ Liquid blood and urine are generally required for toxicology purposes. These samples require refrigeration, preferably in a locked refrigerator. If a locked refrigerator is not immediately available, these samples can be kept at room temperature for no longer than 24 hours.

procedures that allow for the secure storage of these kits without revealing patients' identity. Storing the evidence as long as necessary is the ideal (e.g., until the patient decides whether to report or until the jurisdiction's statute of limitations for retaining evidence expires). However, due to lack of storage space, kits in some jurisdictions are stored for a limited period of time (e.g., 1, 5, or 10 years) and then destroyed if no report is made. Many jurisdictions have elected to store kits for the duration of the statute of limitations for the offense. If a limited-time policy is implemented, it is important that patients are informed regarding the amount of time they have to decide to report and procedures for reporting. It is also critical that the period of time given to patients to decide allows them the chance to consider their decision thoroughly; a short time such as a week or a month may not be sufficient to make such a decision.

Document the handling, transfer, and storage of evidence. Examiners must maintain control of evidence during the exam, while evidence is being dried, and until it is in the kit container and sealed (and then follow jurisdictional procedures for storing evidence securely or handing it over to a duly authorized agent for transfer to a storage site). Documentation should continue with each transfer of the evidence to law enforcement, the crime laboratory, and others involved in the investigative process.¹⁵⁹ Patients, advocates, family members, and other support persons should not handle the evidence. Documentation of the chain-of-custody information is vital to ensuring that there has been no loss or alteration of evidence prior to trial. Educate all those involved in handling, transferring, and storing evidence regarding the specifics of maintaining the chain of custody. If the patient is transferred between facilities, staff at both facilities should be careful to complete this documentation.

¹⁵⁹ Adapted from the *California Medical Protocol for Examination of Sexual Assault and Child Sexual Abuse Victims*, 2001, p. 34.

C. The Examination Process

This section focuses on the various medical and forensic components of the exam process, starting with the initial contact with victims to the court testimony by examiners on exam findings.

The following chapters are included:

1. Initial Contact
2. Triage and Intake
3. Documentation by Health Care Personnel
4. The Medical Forensic History
5. Photography
6. Exam and Evidence Collection Procedures
7. Alcohol- and Drug-Facilitated Sexual Assault
8. STI Evaluation and Care
9. Pregnancy Risk Evaluation and Care
10. Discharge and Follow-up
11. Examiner Court Appearances

1. Initial Contact

Recommendations at a glance to facilitate initial contact with victims:

- Build consensus among involved agencies regarding procedures for coordinated initial response when a recent sexual assault is disclosed or reported. Educate responders to follow procedures.
- Recognize essential elements of initial response.

Build consensus among involved agencies regarding procedures for coordinated initial response when a recent sexual assault is disclosed or reported. Educate responders to follow procedures.

First responders from these agencies (e.g., 911 dispatchers, law enforcement representatives, emergency medical services (EMS) technicians, hospital emergency department staff, sexual assault examiners, and advocates) need to be educated about and follow these procedures. Responders also need discipline-specific procedures (e.g., EMS procedures should stress the importance of preserving evidence when caring for acute injuries and treating victims with sensitivity).

In addition, other community professionals to whom victims may disclose need to know procedures for activating the SART/SARRT or obtaining immediate assistance for victims if a SART/SARRT does not exist. (For information on this topic, see *A.1. Coordinated Team Approach* and *Appendix B. Creation of SART/SARRTs*.) Also, recognize that some institutions and residential living programs have internal procedures for handling sexual assault disclosures. SART/SARRT members should work with these entities to ensure that their procedures address the needs of victims and are coordinated with jurisdictional multidisciplinary response.

Recognize essential elements of initial response. Some victims may initially present at an exam site. But most victims who receive immediate medical care for sexual assault initially contact 911, law enforcement, or an advocacy agency for help.

Law enforcement, 911, and EMS response. Steps that should be taken during initial law enforcement, 911, or EMS contact include:

- Assess victims' needs for immediate care for potentially life-threatening or serious injuries. Administer necessary first aid and request/obtain emergency medical assistance according to jurisdictional policy.
- Address safety needs of victims and others at the scene (e.g., offenders may be present), calling for assistance/backup if needed.
- Assess quickly the age, abilities, communication modality, and health condition of victims and tailor your response as appropriate (e.g., a qualified interpreter, assistive devices, or protective service worker may be needed).
- Respond to requests for victim assistance as quickly as possible.¹⁶⁰ Understand that victims need immediate assistance for many reasons: they may not be safe, may be physically injured, and/or are experiencing trauma. Be aware that time delays in response can cause loss of evidence and increased trauma.
- If injuries do not appear serious, emphasize to victims the need for medical evaluation and address related health concerns. Also, explain the purpose of the exam and what happens during the exam process, keeping in mind that the amount of information that victims want at this time varies.

¹⁶⁰ In some areas, law enforcement representatives may not respond promptly because they must travel considerable distances and through rough terrain to get to victims' locations. Some law enforcement agencies may not have enough representatives to respond to each case in a timely manner (e.g., a rural sheriff's office may only have one officer). In communities with such limitations, it is important that agencies and professionals involved in these cases advocate for increasing the capacity of law enforcement agencies to respond promptly. They also can work jointly to ensure that there is at least one responder/agency from which victims can consistently receive initial help (e.g., EMS or the advocacy program). That professional/agency should be trained in initial response and be able to access emergency medical assistance if needed and coordinate transportation to the exam facility. Information about which agency/responder to call for help must be publicized in the community.

- Inform victims about exam facility options (if options exist) and seek their consent to transport them to the facility of their choice (if they had options) for treatment and/or medical/forensic evaluation.¹⁶¹
- Encourage victims' interaction with advocates as soon as possible after disclosure of the assault, even if victims choose not to receive medical care and/or have the medical forensic exam. In a few jurisdictions, advocates may be dispatched directly to the scene to provide victim support and advocacy, if appropriate. Follow local procedures for activating an advocate.
- Ask victims if they would like family members or friends to be contacted.
- Explain options for interpretation and translation for victims who are not proficient in English or who may prefer to communicate in a non-English language.
- Take measures to preserve crime scene evidence, including evidence on the body and clothing of victims. Document victims' demeanor and statements related to the assault, according to jurisdictional policy.
- Explain to victims their reporting options. Keep in mind that the amount of information desired will vary per individual.
- Responding law enforcement officials should seek basic information from victims about the assault in order to apprehend suspects and facilitate crime scene preservation in a timely manner.

If victims agree to seek emergency care and/or have evidence collected:

- Explain to victims in a language they understand how to preserve bodily evidence until it can be collected (e.g., do not wash, change clothes, urinate, defecate, smoke, drink, eat, brush hair or teeth, or rinse mouth).
- Explain to victims in a language they understand that clothing most likely will be taken as evidence. They may wish to bring or have someone bring a clean change of clothes to the exam facility. If applicable, let victims know that replacement clothing will be available at the exam site. If they changed clothes since the assault, the clothing worn during and immediately after the assault will be needed. Follow law enforcement procedures for retrieving clothing or other items from a crime scene so that evidence is not inadvertently destroyed or contaminated.
- In suspected cases of alcohol- or drug-facilitated assault, victims' first available urine sample should be sought if they cannot wait to urinate until arrival at the exam site. (For information on procedures, see *C.7. Drug-Facilitated Sexual Assault*.) Victims might have been drugged without their knowledge. If they or their families, friends, or responders suspect alcohol- or drug-facilitated assault, a urine sample should be sought.
- Transport or arrange transportation for victims to the exam site that has the most appropriate forensic medical examination capability.¹⁶² Victims with disabilities may have equipment (e.g., wheelchairs and other assistive devices) and/or service animals that also need to be transported.¹⁶³ Keep in mind that victims may consider such equipment as extensions of themselves, so any such equipment should be treated with care.
- Follow jurisdictional policy on alerting exam facilities about the pending arrival of patients.
- Do not take suspects to the same exam facility as victims at the same time, if possible.

Advocate response. If victims have initial contact with advocates, this contact typically occurs through a phone hotline call or a face-to-face meeting. Advocates should follow agency-specific and jurisdictional policy for first response. For example, advocates should assess victims' safety and need for medical assistance and call 911 in cases of serious injuries or when there is an imminent threat to someone. Advocates should describe potential medical concerns related to sexual assault, support victims in seeking care for possible injuries, provide information about their options (e.g., health care, advocacy and counseling, interpretation and translation, evidence collection, exam site options, and reporting to law enforcement), and offer referrals.

¹⁶¹ Inform victims of the approximate amount of time it will take to travel to the facility and how long they will be at the exam site. This information can help them prepare for what to expect and make needed arrangements (e.g., childcare, getting time off from work or school, or informing family members). In some areas, it may take considerable time to get to the exam site (i.e., several hours). Involved agencies in these areas may want to consider the feasibility of having a specially trained examiner located in their community.

¹⁶² Many jurisdictions have designated exam sites. For more information on this topic, see *B.2. Facilities*.

¹⁶³ In addition, evidence may be found on assistive devices and/or service animals.

They can explain to victims how to preserve bodily evidence for evidence collection and the importance of prompt toxicology testing if alcohol- or drug-facilitated assault is suspected. In general, advocates can help victims identify and consider how to address their needs and concerns, as well as identify individuals who might support them in dealing with the aftermath of the assault. They can activate the SART/SARRT (if one exists) with victims' permission. Alternately, advocates can offer to help victims arrange transportation to the exam site, obtain nonemergency medical care, and obtain assistance from law enforcement. They can also accompany them through medical forensic procedures.

Regardless of which agencies are first responders, responders should always be sensitive to the victim's needs and level of trauma. It is common for victims of sexual violence to have showered, eaten or taken other self-protective actions that may have destroyed evidence prior to engaging any service providers. Responders should react in an understanding and non-judgmental manner to ensure they receive appropriate care.

2. Triage and Intake

Recommendations at a glance for health care providers to facilitate a triage and intake process that addresses patients' needs:

- Consider sexual assault patients a priority.
- Perform a prompt, competent medical assessment. Then respond to acute injury, the need for trauma care, and safety needs of patients before collecting evidence.
- Alert examiners of the need for their services.
- Contact victim advocates so they can offer services to patients, if not already done.
- Assess and respond to safety concerns of victims upon arrival at the exam site, such as threats to patients or staff.
- Assess patients' needs for immediate medical or mental health intervention prior to the evidentiary exam, following facility policy.

Consider sexual assault patients a priority.¹⁶⁴ (For a discussion of this topic, see *A.2. Victim-Centered Care*.)

Utilize a private location within the exam facility for patient intakes, as well as for a waiting area for patients' family members and friends and law enforcement interviews. (Also see *A.2. Victim-Centered Care*.)

Perform a prompt, competent medical assessment. Then respond to acute injury, the need for trauma care, and safety needs of patients before collecting evidence. In addition to promoting physical health, sensitive and timely medical care can help reduce the likelihood of acute psychological trauma and its aftereffects, support patients' existing and emerging coping skills, and set the tone for patients' resumption of normal functioning.

Acute medical needs take precedence over evidentiary needs. Patients should be instructed to not wash, change clothes, urinate, defecate, smoke, drink, or eat until initially evaluated by examiners, unless necessary for treating acute medical injuries. If alcohol- or drug-facilitated sexual assault is suspected, and patients need to urinate prior to the arrival of examiners, ensure that the urine sample is collected properly while maintaining the chain of custody.

The forensic examiner should be involved in all aspects of the medical forensic examination of the sexual assault patient. As soon as possible after the initial triage, management, and stabilization of acute medical problems and before treating non-acute injuries, the evidentiary exam can be conducted (with patients' permission). In circumstances in which patients are seriously injured or impaired, examiners must be prepared to work alongside other health care providers who are stabilizing and treating them. In such cases, examiners may need to perform exams in settings such as a health care facility's emergency department, an operating room, a recovery room, or an intensive care unit.

Alert examiners of the need for their services. The SART/SARRT, if one exists, can work with exam facilities to identify acceptable timeframes to conduct a medical forensic exam after a patient's arrival and medical evaluation, management, and stabilization. If examiners are not based at the site or need to be dispatched, the facility should contact them immediately after identifying a sexual assault patient.¹⁶⁵

¹⁶⁴ Historically, sexual assault patients who came to a health care facility (namely hospital emergency departments) for medical care and forensic evidence collection had to wait a long time to be examined. Often, they were not considered priority cases because they lacked visible physical injuries or their physical injuries were less serious than others coming into the facility. The psychological trauma they were experiencing often was not taken into account, nor was the fact that evidence can be destroyed or contaminated if collection is delayed. Many communities are addressing this problem by establishing examiner programs. At busy health care facilities that make life or death decisions about prioritizing patients, these programs can help ensure that sexual assault patients are offered and receive a medical forensic examination promptly.

¹⁶⁵ It is possible that examiners could also be dispatched by first responders at the crime scene or by health care staff after being alerted that a sexual assault patient will be arriving at their facility. Although activating examiners as early as possible seems like it would benefit these patients, such a procedure can potentially cause confusion. For example, after activating an examiner to go to a particular

Examiners are often required to arrive at the exam site within a certain period of time (e.g., 30 minutes) after being dispatched.

Contact victim advocates so they can offer services to patients, if not already done. (For a discussion of this topic, see *A.2. Victim-Centered Care*.)

Assess and respond to safety concerns of victims upon arrival at the exam site, such as threats to patients or staff. The facility should have procedures to assess such safety concerns at the exam site and to respond to such threats or dangerous situations. (For a discussion of this topic, see *A.2. Victim-Centered Care*.) Communicating any information may require a qualified interpreter¹⁶⁶ for victims who are LEP.¹⁶⁷

Assess patients' needs for immediate medical or mental health intervention prior to the evidentiary exam, following facility policy. Seek informed consent of patients before providing treatment. (For more information on this topic, see *A.3. Informed Consent*.) Also, inform them that they have a right to receive medical care regardless of whether the assault is reported to law enforcement. (For more information on this topic, see *A.5. Reporting to Law Enforcement*.)

exam facility, there may be significant delays in getting the patient to the site or changes en route to the facility. Sexually assaulted individuals may also change their minds about care or evidence collection.

¹⁶⁶ There is currently no certification process for health care interpreters or translators. For more information about qualifications including standards of practice for health care interpreters and translators, please see *What's in a Word: A Guide to Understanding Interpreting and Translation in Health Care*, National Health Law Program (2010).

¹⁶⁷ Title VI of the Civil Rights Act of 1964 and its implementing regulations require that entities that receive federal financial assistance provide meaningful access to their programs, services, and activities for persons with limited English proficiency.

3. Documentation by Health Care Personnel

Recommendations at a glance for completing needed documentation:

- Ensure completion of all appropriate documentation.
- Educate examiners on proper documentation.
- Ensure the accuracy and objectivity of medical forensic reports.

Ensure completion of all appropriate documentation. Examiners are responsible for documenting the details of the medical forensic exam and treatment provided in the medical record, as well as documenting required data for the evidence collection kit, according to jurisdictional policy. This evidence collection kit report usually includes patient consent forms related to evidence, the history of the assault, and information pertaining to evidence collection that will assist the crime lab in material identification for analysis.¹⁶⁸ (The medical forensic history and documentation of exam findings are discussed in more depth in later chapters in this section.) The only medical issues documented in this report are findings that potentially relate to the assault or preexisting medical factors that could influence interpretation of findings. If the case is reported, the criminal justice system will use the entire medical forensic record of the sexual assault visit, along with collected evidence, photographs and video images, and victim/witness statements, as a basis for investigation and possible prosecution. If examiners are required to testify in court, they will use the report to recall the incident.

The overall medical forensic record kept by examiners and other clinicians follows a standard approach of addressing acute complaints; gathering pertinent historical data; describing physical findings, laboratory and x-ray findings, consultation reports (if done) and evidence collection procedures; and documenting treatment (and response to treatment) and follow-up care. The complete medical forensic record of the sexual assault visit should be maintained separately from the patient's medical record to limit disclosure of unrelated information and to preserve confidentiality. The medical record is stored at the exam site. The exam site should have clear policies about who is allowed access to these records.¹⁶⁹

The medical record is not part of the evidence collection kit and it should not be submitted to the crime lab or given to law enforcement. Much of the record is not relevant to case prosecution, and releasing it infringes upon patients' privacy rights. Although all or part of the medical record may be subpoenaed, if patients do not consent to its release, it is ultimately up to the court to decide whether such information is pertinent to the case and should be released.

Educate examiners on proper documentation. It is vital that the exam documentation be thorough, precise, and accurate. It is essential that examiners receive education on the importance of proper documentation and on writing reports that are relevant to their role. As previously discussed, forensic documentation must include diagrammatic rendering, written description (including assessment for tenderness and induration), and forensic imaging of any visible finding (traumatic or evidence).

Law enforcement representatives and advocates who are involved in the response should understand the importance of examiner documentation and be able to convey that importance to patients.

Ensure the accuracy and objectivity of medical forensic reports. It is suggested that examiners within an exam site, jurisdiction, or region devise an appropriate review process tailored to their needs. Consider having a clinical director or supervisor at the exam site systematically review documentation related to the exam. (In some jurisdictions, review of nonphysician examiner's documentation by a medical director/supervisor is required.) These reviews can serve to increase the overall effectiveness of the examiner program by ensuring that reports are completed according to policy, assessing staff training needs,

¹⁶⁸ Documentation of exam findings should include patients' demeanor and statements related to the assault not already recorded on the medical forensic history. Such documentation can be admitted as evidence at trial in most states. Local prosecutors can provide more detailed information on this type of documentation.

¹⁶⁹ Mechanisms to restrict access to records related to the exam are particularly important in small communities where exam site employees may be acquaintances, friends, and family members of patients or suspects.

considering adjustments needed to paperwork, troubleshooting for potential problems, and identifying trends in presenting the issues of patients. All identifying patient information should be removed when a document is copied for a review. The clinical director or supervisor can also be involved in broader multidisciplinary quality assurance efforts related to the exam process.

4. The Medical Forensic History

Recommendations at a glance for health care providers to facilitate gathering information from patients:

- Coordinate medical forensic history taking and investigative interviewing.
- Advocates should be able to provide support and advocacy during the history, if desired by patients.
- Consider patients' needs prior to and during information gathering.
- Obtain the medical forensic history.

Coordinate medical forensic history taking and investigative interviewing. Examiners typically ask patients to provide a medical forensic history after initial medical care for acute problems and before the examination and evidence collection. This history, obtained by asking patients detailed forensic and medical questions related to the assault, is intended to guide the exam, evidence collection, and crime lab analysis of findings. In cases where the victim reports the assault, law enforcement representatives should also collect information from patients to help in the apprehension of suspects and in case investigation.¹⁷⁰

Gathering information from patients often takes place soon after they have experienced the assault. Not only can discussing the assault cause patients to feel re-violated, but their emotional and physical condition may make communication difficult. They may also be uncomfortable discussing personal matters with involved responders. Those seeking information about the assault should work collaboratively to create an information-gathering process that is as respectful to patients as possible and minimizes repetition of questions.¹⁷¹ However, jurisdictions should consider the implications of the evolving law on hearsay exceptions when determining the level and nature of coordination. See *Appendix C* for more information on the relevant case law and how it relates to medical forensic examinations.

Promote a streamlined, victim-centered information-gathering process. Jurisdictions employ several methods, including the following:

- Communication and coordination among responding officers, examiners, investigators, and prosecutors as they go about their separate information-gathering processes.
- Examiners and investigators together ask patients basic questions in a language that she or he understands. One asks questions while the others listen. They then speak to patients separately to gather any remaining information required.
- The medical forensic history and investigative interviews are conducted simultaneously to the extent feasible. The SART/SARRT should determine the information-gathering process, reflecting the best use of resources and needs and consent of patients. The team may agree that a particular person or agency will be the primary interviewer.¹⁷²

Whatever the method selected, jurisdictions should carefully plan how they will coordinate the logistics of medical forensic history taking and investigative interviewing.

Advocates should be able to provide support and advocacy during the history if desired by patients.

The presence of an advocate may help patients feel more comfortable answering questions. Advocates may also assist patients in voicing their concerns about questions being asked and clarifying their needs during this time. Advocates should be careful not to answer questions asked of patients or otherwise influence their statements.

¹⁷⁰ The website of the Violence Against Women Online Resources offers several resources on law enforcement investigation of sexual assault crimes. See <http://www.vaw.umn.edu/categories/2.8>.

¹⁷¹ Some repetition of questions is likely to occur during the exam process.

¹⁷² Caution should be exercised if combining medical forensic history taking with investigative interviewing. At the time of such information gathering, patients may not want to speak with law enforcement or be ready to go into the extensive details needed for investigative purposes. Patients may withhold information from law enforcement representatives or not want to talk with them about certain issues (e.g., their menstrual cycle or types of penetration). They might feel more comfortable talking to examiners in private about these topics. There is also a concern about questioners asking questions outside of their realm of responsibility.

Presence of family members, friends, and other personal support persons. Prior to taking the history, patients should be informed that the presence of personal support persons (other than advocates) may influence or be perceived as influencing their statements.¹⁷³ These individuals could be subpoenaed as witnesses in their case.¹⁷⁴ If, after receiving this information, patients choose to have personal support persons present during the history, these individuals should be advised not to actively participate in the process. For example, they should not answer questions for patients, comment on patients' answers, interrupt patients, or make facial expressions in response to patients' answers.¹⁷⁵

Consider patients' needs prior to and during information gathering. Pressing issues (e.g., for treatment of serious injuries, crisis intervention and support, translation and interpretation, and childcare during the exam process) should be addressed before commencing with information gathering. Be mindful of patients' capacity to answer questions during a lengthy information-gathering process, and take breaks as needed.

The facility should have procedures in place and examiners should be educated to accommodate patients' communication skill level and preferred mode of communicating. This is particularly important for patients with communication-related disabilities and limited English proficient patients. If interpreters are necessary, they should be present prior to questioning and there should be space for them in the exam room and other rooms where information is gathered. Patients with communication-related disabilities may wish to use wordboards, speech synthesizers, or other assistive communication devices to help them communicate. The use of cards with pictures (e.g., of medical procedures and human anatomy) may facilitate communication with patients with some types of cognitive disabilities or limited vocabularies.¹⁷⁶

It is important that examiners are aware of and responsive to verbal and nonverbal cues from patients. For example, patients may react negatively as they recall experiences during the assault or are reminded of previous violence committed upon them. (It is important to document this information.) What they may need most at this point is a break, the understanding of examiners, and opportunities to talk about what they are experiencing. Advocates can be particularly helpful to patients who are dealing with these emotions.

Use a private and quiet setting for information gathering. Ideally, there should be no interruptions and no time constraints for questioners or for use of the room where the information is being gathered. Although some facilities may lack space, an effort should be made to secure a private and quiet setting for this purpose. In many jurisdictions, history-taking takes place in the exam room prior to the exam.

Obtain the medical forensic history. The specific questions asked of patients by examiners for the medical forensic history vary from one jurisdiction to the next, as do forms used to record the history.¹⁷⁷ However, the following information should be sought routinely from patients:¹⁷⁸

1. Date and time of the sexual assault(s): It is essential to know the period of time that has elapsed between the assault and the physical examination/collection of evidence as well as documentation of

¹⁷³ Ideally, these individuals should not be present when giving patients this information or when patients make the decision whether they want the support person present.

¹⁷⁴ They should also be informed that the presence of these individuals during the medical forensic history could potentially reduce the degree of confidentiality advocates can offer patients (e.g., they may be called on to provide testimony regarding the interactions between patients and family members or friends present during this time). Also, in jurisdictions that have physician/patient privilege, but not a victim advocate privilege, the advocate could be required to testify. Victims should be informed of this before disclosing non-medically relevant information.

¹⁷⁵ Requests to have family, friends, and other personal support persons present during the medical forensic history should be allowed unless it is considered potentially harmful to the exam process by the SART/involved responders. For example, in cases involving adolescents, parents or guardians should not be allowed in the exam room if they are suspected of committing the assault or of being abusive to patients.

¹⁷⁶ Carolyn Ham, *Reducing Language Barriers to Combating Domestic Violence: The Requirements of Title VI*, Battered Women's Justice Project, October 2004, http://new.vawnet.org/summary.php?doc_id=1621&find_type=web_desc_GC.

Paragraph partially drawn from N. Baladerian, *Skills for Interviewing Adult Abuse Victims Who Have Developmental Disabilities*, p. 1.

¹⁷⁷ In some jurisdictions, examiners ask for investigative details during history taking. In others, examiners only ask for information related to treatment and collecting/interpreting physical and lab findings. One concern is that investigative details reported by examiners that differ from the law enforcement report may be used to undermine the credibility of patients. Patients should be told that if they are too uncomfortable or embarrassed to talk about something, they should say so rather than saying something that contradicts information that may be in the law enforcement report. (Drawn from L. Ledray, *SANE Development and Operation Guide*, 1998, p. 77.) Another concern is that asking investigative questions is outside the examiner's role.

¹⁷⁸ Drawn from California's *Medical Forensic Report: Adult/Adolescent Sexual Assault Examination, Less Than 72 Hours* (OCJP 923), the *Tulsa Sexual Assault Report Form*, and the *West Virginia Protocol for Responding to Victims of Sexual Assault*, 2008, pp. 40–42.

injuries. Evidence collection may be influenced by the time interval since the assault as well as the interpretation of both the physical exam and evidence analysis.

2. Pertinent patient medical history: The interpretation of physical findings may be affected by medical data related to menstruation, recent anal-genital injuries, surgeries, or diagnostic procedures, blood-clotting history, and other pertinent medical conditions or treatment.
3. Recent consensual sexual activity: The sensitivity of DNA analysis makes it important to gather information about recent consensual intercourse, whether it was anal, vaginal, and/or oral, and whether a condom was used. A trace amount of semen or other bodily fluid, as well as genital microtrauma, may be identified that is not associated with the crime. Once identified, it may need to be associated with a consensual partner, and then used for elimination purposes to aid in interpreting evidence.¹⁷⁹
4. Post-assault activities of patients: The quantity and quality of evidence is affected both by actions taken by patients and the passage of time. It is critical to know what, if any, activities were performed prior to the examination (e.g., have patients urinated, defecated, had consensual sexual intercourse, wiped genitals or the body, douched, removed/inserted a tampon/sanitary pad/diaphragm, used oral rinse/gargled, washed, brushed teeth, eaten or drank, smoked, used drugs, or changed clothing?).
5. Assault-related patient history: Information such as the location of nongenital injury, tenderness, pain and/or bleeding, and anal-genital injury, pain, and/or bleeding can direct evidence collection and medical care. Patients should also be questioned about strangulation since this type of injury can result in airway obstruction if swelling occurs and strangulation is a very common occurrence in sexual assault cases.
6. Suspect information (if known): Forensic scientists seek evidentiary items that may have had cross-contact or transfer among patients, suspects, and crime scenes. The gender and number of suspects may offer guidance to types and amounts of foreign materials that might be found on patients' bodies and clothing. Suspect information gathered during this history should be limited to that which will guide the exam and forensic evidence collection. Detailed questions about suspects are asked during the investigative interview.
7. Nature of the physical assault(s): Information about the physical surroundings of the assault(s) (e.g., indoors, outdoors, car, alley, room, rug, dirt, mud, or grass) and tactics employed by suspects is crucial to the detection, collection, and analysis of physical evidence. Tactics may include, but are not limited to, use of weapons (threatened and/or injuries inflicted), physical blows, grabbing, holding, pinching, biting, using physical restraints, strangulation, burns (thermal and/or chemical), threat(s) of harm, and involuntary ingestion of alcohol/drugs. Knowing whether suspects may have been injured during the assault may be useful when recovering evidence from patients (e.g., blood) or from suspects (e.g., bruising, fingernail marks, or bite marks).
8. Detection of alcohol- or drug-facilitated sexual assault: It is critical in these cases to collect information such as whether there was memory loss, lapse of consciousness, or vomiting; whether the patient was given food or drink by the suspect (if the patient knows); or whether the patient voluntarily ingested drugs or alcohol. Collecting toxicology samples within 120 hours of the suspected ingestion is recommended if there was either loss of memory or lapse of consciousness, according to jurisdictional policy.
9. Description of the sexual assault(s): An accurate but brief description is crucial to detecting, collecting, and analyzing physical evidence. The description should include any:¹⁸⁰
 - Penetration of genitalia (e.g., vulva, hymen, and/or vagina of female patient), however slight, including what was used for penetration (e.g., finger, penis, or other object);
 - Penetration of the anal opening, however slight;
 - Oral contact with genitals (of patients by suspects or of suspects by patients);
 - Other contact with genitals (of patients by suspects or of suspects by patients);
 - Oral contact with the anus (of patients by suspects or of suspects by patients);
 - Nongenital act(s) (e.g., licking, kissing, suction injury, strangulation, and biting);
 - Other act(s) including use of objects;
 - If known, whether ejaculation occurred and location(s) of ejaculation (e.g., mouth, vagina, genitals, anus/rectum, body surface, on clothing, on bedding, or other); and

¹⁷⁹ Patients should be aware that there might be a need at a later time to obtain an elimination sample from consensual partners. Jurisdictions may have policies in place for seeking such samples within a certain timeframe following the exam.

¹⁸⁰ Specific questions asked will depend on case facts (e.g., the gender of the patient and the gender of the suspect).

- Use of contraception or lubricants.¹⁸¹

These questions require specific and sometimes detailed answers. Some may be especially difficult for patients to answer. Examiners should explain that these questions are asked during every sexual assault medical forensic exam. They should also explain why each question is being asked.

¹⁸¹ Certain contraceptive preparations can interfere with accurate interpretation of preliminary chemical tests frequently used in the analysis of potential seminal stains. In addition, contraceptive foams, creams, or sponges can destroy sperm. Lubricants of any kind are trace evidence and may be compared with potential sources left at the crime scene or recovered from bodies of suspects. Knowing whether a condom was used also may be useful in explaining the absence of semen.

5. Photography

Recommendations at a glance to photograph evidence on patients:

- Consider the extent of forensic photography necessary.
- Consider the equipment.
- Be considerate of patient comfort and privacy.
- Explain forensic photography procedures to patients.
- Take initial and follow-up photographs as appropriate, according to jurisdictional policy.
- Consider policies on storage, transfer, and retention of photographs.

Consider the extent of forensic photography necessary. Taking photographs of patients' anatomy that was involved in the assault should be part of the medical forensic examination process in sexual assault cases. Such photographs can supplement the medical forensic history, evidence documentation, and physical findings.¹⁸² As to the extent of photographs necessary, communities appear to take two different approaches. Some routinely take photographs, with patients' permission, of both detected injuries and normal (apparently uninjured) anatomy involved in the assault. These jurisdictions encourage examiners to collect and document all evidence and leave the determination about the value of the evidence to litigants. Other communities limit photographs to detected injuries. However, photographs should not be used to interpret subtle and/or nonspecific findings (e.g., erythema or redness) that are not noted on exam documentation. Review of photographs cannot reliably diagnose injuries not seen by examiners.

Involved prosecutors, law enforcement officials, examiners, and advocates should further discuss the extent of photography they view as critical, examine any related case law, consider their concerns on this issue and how to be sensitive to victims, and, ultimately, determine what strategy is right for their community.

Consider the equipment. Examiners should take these photographs, due to the highly personal nature of the photography involved. Examiners are responsible for forensic photography during the exam because patients are often more comfortable and less traumatized when they take photographs.¹⁸³ Any photographs taken by nonmedical personnel should include only the head and extremities and should not document findings on the torso or genital region.

Examiners should be familiar with equipment operation and be educated on forensic photography in sexual assault cases. Photographic equipment should be used that can clearly document the level of injury. Consult with local criminal justice agencies regarding the types of equipment that should be used (e.g., prosecutors can assess which types of equipment produce results that are acceptable to the court).¹⁸⁴ Also consult with local examiners, because they are often knowledgeable regarding photographic and video equipment used in these cases and their effectiveness in capturing images during the exam.

Be considerate of patient comfort and privacy. Minimize patients' discomfort while they are being photographed and respect their need for modesty and privacy. Drape them appropriately while taking photographs.¹⁸⁵

Also, consider how to best provide support to patients during this time. Patients may want an advocate and/or a personal support person to be present. Take measures to avoid allegations of impropriety when photographing patients. For instance, if for some reason a male examiner is photographing a female patient, another woman should be present at this time.

¹⁸² The *California Medical Protocol for Examination of Sexual Assault and Child Sexual Abuse Victims*, 2001, p. 56.

¹⁸³ Avoid requiring that patients go to another site (e.g., the law enforcement agency) to have initial photographs taken.

¹⁸⁴ For a discussion of the admissibility of digital photographs, please see D. Nagosky, *The Admissibility of Digital Photographs in Criminal Cases*, *FBI Law Enforcement Bulletin*, December, 2005.

¹⁸⁵ Drawn from the *California Medical Protocol for Examination of Sexual Assault and Child Sexual Abuse Victims*, 2001, p. 56, and the American College of Emergency Physicians' *Evaluation and Management of the Sexually Assaulted or Sexually Abused Patient*, 1999, p. 113.

Explain forensic photography procedures to patients. Taking photographs of patients in the aftermath of an assault can be retraumatizing. To help reduce the chances of retraumatization, examiners can help patients understand the purpose of photography in forensic evidence collection, the extent to which photographs will be taken and procedures that will be used, potential uses of photographs during investigation and prosecution (especially anogenital images if taken), and the possible need to obtain additional photographs following the exam. (Also see *A.3. Informed Consent*.)

Take initial and follow-up photographs as appropriate, according to jurisdictional policy.¹⁸⁶ Strive to control every element in the photograph to produce a clear, powerful statement. Photographs should be taken prior to evidence collection.

Patient identification. Link patients' identity and the date to the photographs, according to jurisdictional policy.¹⁸⁷ For example, print the patient's name, date of exam, and the examiner's name/initials on a plain sheet of paper, or using a patient label. Photograph this sheet at the beginning and end of the roll of film for identification. Some jurisdictions also photograph the face of patients for identification purposes. Some cameras offer the option of imprinting the date and/or time on the negative, and some have the ability to enter a case number so the face or name of a patient is not on the film. Digital imaging can automatically embed the date/time and a variety of other technical data in each image. This information can be accessed when the image is downloaded onto the computer.

Mechanisms should be in place (e.g., at law enforcement agencies and exam facilities) to protect patients' privacy and confidentiality related to the photographs.

Clear and accurate photographs. Use the shutter speed and lens aperture to control exposure (automated cameras and flash units can give incorrect exposures). Use adequate lighting whether the source is natural, flood, or flash. Use of flashes and lighting in the exam room can change the color of evidence; a filter may help adjust lighting so that the photograph is truer to color (noting in records any alterations to the environment to enhance photographs). Include a color bar in the photograph to ensure accurate color reproduction.

Strive for undistorted photographs with good perspective (whenever possible, use a normal focal length lens, and keep the plane of the film or digital sensor parallel to the plane of the object to be documented. Maintain sharp focus (keep the camera steady, focus carefully, use maximum depth of field, and look at the frame of the scene).

A good-quality macro lens with a ring strobe flash offers the best quality and most flexibility for forensic photography involving sexual assault.

Scale. Use a forensic scale or ruler for size reference in photographs. In addition to those photographs that identify patients and anatomical locations being photographed, take at least two photographs of each area—one with and one without scale. Taking two photographs in this manner demonstrates that the scale was not concealing anything important. Photograph evidence in place before moving it or collecting it. Do not alter or move evidence when photographing, and make every effort to minimize background distraction in photographs while maintaining the focus of areas being photographed.

Orientation of shots. Take at least two shots at three orientations:

1. Take medium-range photographs of each separate injury, including cuts, bruises, swelling, lacerations, and abrasions. Work from one side to the other and then top to bottom, or design a workable method. Be consistent. Take "regional" shots to show injuries in the context and orientation of a body region; these photographs should include easily identifiable anatomical landmarks.
2. Take closeup images of particular injuries, using the scale. When photographing a wound, show its relationship to another part of the body. Take at least three photographs involving a wound area. Shield

¹⁸⁶ This section is drawn from the American College of Emergency Physicians' *Evaluation and Management of the Sexually Assaulted or Sexually Abused Patient*, 1999, pp. 113–115.

¹⁸⁷ The *California Medical Protocol for Examination of Sexual Assault and Child Sexual Abuse Victims*, 2001, p. 56.

uninvolved breast or genital areas when possible; highly graphic photos may be deemed inadmissible in court and make the case less credible. All injuries should be recorded with a closeup view using a macro lens or setting. Try to capture subtleties in texture and color. Document pattern injuries caused by an object. Do not use a flash function around an injured eye as it can cause retinal damage.

3. In some cases, a full body photograph may be appropriate to show scope of injury or state of clothing. However, such photos should be taken ensuring as much modesty and privacy as possible, through draping and other techniques. Photos taken solely for the purpose of identification should be done with patients fully clothed or in a gown.

Photographing skin. Closeup photographs of hands and fingernails may show traces of blood, skin, or hair. Be sure to look for damage to nails or missing nails. Photograph marks of restraint or bondage around wrists, ankles, or neck; they may be compared later with the object in question that made the marks. Photograph transfer evidence present on the body or clothing, such as dirt, gravel, or vegetation.

Bite mark evidence. Photograph bite marks, according to jurisdictional policy.¹⁸⁸

Accountability. All photographs should be clearly labeled and the chain of custody maintained. Follow jurisdictional policy for development of film, transfer, duplication or additional prints, and storage of photographs. Do not include photographs in the evidence collection kit sent to the crime lab.

Follow-up photographs. Photography should be repeated as new or different evidence on patients' bodies is found following the exam (e.g., bruising may appear days later). Create procedures that examiners, law enforcement investigators, and patients follow to ensure this evidence is documented. In addition to documenting emerging or evolving injuries, follow-up photographs provide documentation of healing or resolving injuries and clarify findings of stable, normal variants in anatomy and nonspecific findings like redness or swelling that could be confused with acute injuries.

Consider policies on storage, transfer, and retention of photographs. Photographs taken by examiners should primarily be considered as part of the patient's medical forensic record and should not be automatically turned over to law enforcement. Law enforcement should be guided by the body diagrams used in documentation in deciding what photographs to subpoena.

¹⁸⁸ When bite mark evidence is presented, it may be helpful to consult a forensic odontologist, if one is available. However, this type of evidence is controversial. It is more important to ensure swabbing of bite marks.

6. Exam and Evidence Collection Procedures

Recommendations at a glance to facilitate the exam and evidence collection:

- Recognize the evidentiary purpose of the exam.
- Strive to collect as much evidence from patients as possible, guided by the scope of informed consent, the medical forensic history, exam findings, and instructions in the evidence collection kit.
- Be aware of and document evidence and injuries that may be pertinent to the issue of whether the patient consented to the sexual contact with the suspect.
- Understand how biological evidence is tested.
- Prevent exposure to infectious materials and risk of contamination of evidence.
- Understand the implications of the presence or absence of seminal evidence.
- Modify the exam and evidence collection to address the specific needs and concerns of patients.
- Explain exam and evidence collection procedures to patients.
- Conduct the general physical and anogenital exam and document findings on body diagram forms.
- Collect evidence to submit to the crime lab for analysis, according to jurisdictional policy.
- Collect other evidence.
- Keep medical specimens separate from evidentiary specimens collected during the exam.

Recognize the evidentiary purpose of the exam. During the exam, examiners methodically document physical findings and facilitate the collection of evidence from patients' bodies and clothing. The findings in the exam and collected evidence often provide information to help reconstruct the details about the events in question in an objective and scientific manner.¹⁸⁹ Of course, health care needs and concerns of patients may be presented in the course of the exam that should be addressed prior to discharge. However, patients must understand that the exam does not provide routine medical care. For example, a pap smear will not be done during the female pelvic exam.¹⁹⁰ (This chapter focuses on evidentiary components of the exam. Other chapters in the protocol discuss more fully medical and other related needs and concerns of patients.)

Collect as much evidence from patients as possible, guided by the scope of informed consent, the medical forensic history, exam findings, and instructions in the evidence collection kit. Evidence collected during the exam mainly includes biological and trace evidence. To reconstruct the events in question, evidence collected is used in four potential ways in sexual assault cases:

- To identify the suspect;
- To document recent sexual contact;
- To document force, threat, or fear; and
- To corroborate the facts of the assault.

Be aware of and document evidence and injuries that may be pertinent to the issue of whether the patient consented to the sexual contact with the suspect. In the majority of sexual assaults, patients know the suspects. For example, according to the National Crime Victimization Survey, in 2008, 57 percent of rapes/sexual assaults involved offenders who were nonstrangers.¹⁹¹ Most nonstranger suspects and many stranger suspects (if confronted by professionals in the criminal justice system) will claim that the patient consented to the sexual contact.¹⁹² Consent claims typically stem from a lack of evidence and documentation concerning force and coercion. Thus, evidence and documentation of physical findings related to whether

¹⁸⁹ Note that while exam findings and evidence collected from patients are important in reconstructing the events in question, during a criminal investigation, law enforcement officials look for additional evidence that will create a more complete picture of the event.

¹⁹⁰ Drawn from L. Ledray, SANE Development and Operation Guide, 2000, p. 79.

<http://www.ojp.usdoj.gov/ovc/publications/infores/sane/saneguide.pdf>, SANE Development and Operation Guide, 1998, p. 63.

¹⁹¹ U.S. Department of Justice, Bureau of Justice Statistics, *Female Victims of Violence*, <http://www.bjs.gov/content/pub/pdf/fvv.pdf>

¹⁹² J. Archambault and D.K. Faugno, Overcoming a Consent Defense to Sexual Assault, *Journal of Emergency Nursing*, 27:204–208, April 2001.

force or coercion was used against patients (e.g., findings that reveal injuries, alcohol or drugs taken involuntarily, or signs of a struggle) are important in these types of cases. However, the absence of physical trauma does not mean that coercion/force was not used or prove that patients consented to sexual contact.¹⁹³ Also, some physical findings that suggest force are not necessarily indicative of a sexual assault. It is important to remember that if an investigation takes place, law enforcement officials will look for additional evidence that may help to overcome a claim of consent.

Understand how biological evidence is tested.¹⁹⁴ Semen, blood, vaginal secretions, saliva, vaginal epithelial cells, and other biological evidence may be identified and profiled by a crime lab. The information derived from the analysis can often help determine whether sexual contact occurred, provide information regarding the circumstances of the incident, and be compared to reference samples collected from patients and suspects for identification purposes. A primary method used by crime labs for testing biological evidence is DNA (deoxyribonucleic acid) analysis.¹⁹⁵ The most common form of DNA analysis used in crime labs for identification is called polymerase chain reaction (PCR). PCR allows the analysis of evidence samples of limited quality and quantity by making millions of copies of very small amounts of DNA. Using an advanced form of PCR testing called “short tandem repeats” (STR); the laboratory is able to generate a DNA profile, which can be compared to DNA from a suspect or a crime scene.¹⁹⁶

Distinguish patients’ DNA from suspects’ DNA. Blood or buccal (inner cheek) swabbings should be collected from patients for DNA analysis to distinguish their DNA from that of suspects. (Procedures for collecting these samples are provided later in this chapter.) If the case is reported to law enforcement, patients’ biological samples and DNA profiles should be used only for investigation of the sexual assault, and their DNA profiles should not be uploaded into CODIS.¹⁹⁷ Neither biological samples nor DNA profiles should be provided to law enforcement or prosecution for another case in which patients may be suspects, inadvertently given to health insurance carriers, or used for research purposes without patients’ consent.¹⁹⁸ Criminal justice agency policies should be in place and followed for the secure storage of biological samples and appropriate disposal of these samples and DNA profiles.

Prevent exposure to infectious materials and risk of contamination of evidence. Examiners should take precautions during the exam to prevent exposure (to both patients and health care staff) to bloodborne pathogens and other potentially infectious materials. For example, it is important to follow facility policies on washing hands, handling contaminated needles and other contaminated sharps, wearing protective equipment, and minimizing splashing, spraying, and spattering of these materials. (For more information on this topic, see *B. 1. Sexual Assault Forensic Examiners.*)

With the ever-increasing sensitivity of DNA analysis, there is a greater chance that accidental contamination can be detected. Forensic evidence, which is usually small in volume, can be contaminated and diluted by foreign DNA. Every precaution should be taken by all first responders to reduce outside contamination and dilution of evidence. For example, examiners should wear non-powdered gloves¹⁹⁹ and change them throughout the exam/evidence collection whenever cross-contamination could occur or when moving to different body surface areas. Examiners and other responders should seek guidance from their crime labs on procedures to prevent contamination.

¹⁹³ L. Ledray, *SANE Development and Operation Guide*, 2000, p. 63.

<http://www.ojp.usdoj.gov/ovc/publications/infores/sane/saneguide.pdf>.

¹⁹⁴ Section drawn from *Understanding DNA Evidence: A Guide for Victim Service Providers* by the National Commission on the Future of DNA Evidence; the *West Virginia Protocol for Responding to Victims of Sexual Assault*, 2002, pp. 31–32; and the *California Medical Protocol for Examination of Sexual Assault and Child Sexual Abuse Victims*, 2001, p. 40.

¹⁹⁵ DNA determines each person’s individual characteristics. An individual’s DNA is unique except in identical twins. DNA in the cell nucleus is genetic material inherited from biological parents. (Drawn from Arkansas’ *Sexual Assault: A Hospital/Community Protocol for Forensic and Medical Examination*, 2001.)

¹⁹⁶ There is a concern that if DNA evidence is found, prosecutors may not utilize other evidence, especially when labs have limited resources. But because persons known to victims commit the vast majority of sexual assaults, DNA findings must be used in conjunction with other forensic evidence recovered, particularly when issues of consent arise. Law enforcement investigators and prosecutors should receive training on maximizing the use of all forensic evidence collected.

¹⁹⁷ In the fall of 2003, legislation was introduced to implement the President’s DNA Initiative provisions that would bar the inclusion of elimination samples in CODIS. These samples include those obtained from sexual assault victims, as well as individuals with whom they had recent consensual sex prior to the exam.

¹⁹⁸ An exception is that a forensic lab may input frequency information related to the DNA profiles in its statistical database. Victims’ identity remains anonymous.

¹⁹⁹ Drawn from Connecticut’s Video Training Program, Part 1, *The Examination: Sexual Assault Evidence Collection*, 1998.

Understand the implications of the presence or absence of seminal evidence.²⁰⁰ The relevance of semen evidence in cases involving male suspects covers the spectrum, depending upon case facts. Semen is composed of cellular and liquid components known as spermatozoa (sperm) and seminal fluid. Semen evidence is valuable because it can be used to positively identify suspects.²⁰¹ However, it is critical to note that failure to recover semen is not an indication that a sexual assault did not occur. There are a number of reasons why semen might not be recovered in these cases: Assailants may have used condoms, ejaculated somewhere other than in an orifice or on patients' clothes or bodies, or not ejaculated at all. Semen may have been depleted by frequent ejaculation prior to the sample in question.²⁰² Chronic alcohol or drug abuse, chemotherapy, cancer, infection (e.g., mumps or tuberculosis), or congenital abnormalities also may suppress semen production. Other factors may contribute to the absence of detectable amounts of semen evidence. For example, significant time delays between the assault and collection of evidence may cause loss of semen evidence, semen may be washed away prior to the exam or improperly collected, and an object other than a penis may have been used for penetration.

Modify the exam and evidence collection to address the specific needs and concerns of patients. Examiners should be aware that patients' beliefs might affect whether and how certain evidence is collected. For example, patients from certain cultures or religious backgrounds may view hair or fingernails as sacred and decline collection of hair evidence. (For more information on this topic, see *A.2. Victim-Centered Care*. Accommodating mobility impairments is discussed in footnotes for this chapter. For details on accommodating communication needs and responding to verbal and nonverbal cues, see *C.4. The Medical Forensic History*.)

Explain exam and evidence collection procedures to patients. Whatever the methods used for seeking informed consent from patients for the exam and evidence collection, the full nature of procedures and options should be explained. Examiners may provide some basic information prior to starting the exam and additional information as the exam proceeds. For example, if specialized equipment is used, examiners can explain to patients, at some point prior to its use, what the equipment is, how it will be used, for what purpose, and how long the procedure will take. Encourage patients to ask questions and to inform examiners if they need a break or do not want a particular part of the exam or evidence collection done. (For more information on obtaining informed consent of patients, see *A.3. Informed Consent*.)

Conduct the general physical and anogenital exam and document the physical findings on body diagram forms.²⁰³ In addition to instructions included in the evidence collection kit, the exam should be guided by the scope of informed consent and the medical forensic history.

In the course of the exam, examiners may question patients about trauma related to the assault. These questions should be specific enough to yield clinically relevant information. For example, simply asking if patients are injured or hurt anywhere is not focused enough—they may not know where they are injured until examined and/or asked questions such as if they hurt in specific body locations.

General physical examination. Obtain patients' vital signs, note the date and time of the exam, physical appearance, general demeanor, behavior, and orientation, and condition of clothing on arrival. Record all physical findings (which include observable or palpable tissue injuries; physiologic changes; and foreign materials such as grass, sand, stains, dried or moist secretions, or positive fluorescence) on body diagram forms. Be observant for redness, abrasions, bruises, swelling, lacerations, fractures, bites, burns, and other forms of physical trauma. Potential traumatic findings should be palpated to assess for tenderness and induration. On dark-skinned individuals, it may be difficult to identify these areas and they may need to be sought out specifically.

²⁰⁰ Drawn from the *West Virginia Protocol for Responding to Victims of Sexual Assault*, 2082, pp. 32, and New Hampshire's *Sexual Assault: A Hospital Protocol for Forensic and Medical Examination*, 1998, pp. 26–27.

²⁰¹ In the absence of sperm, certain seminal fluid components may be used to identify semen.

²⁰² If assailants who had a vasectomy ejaculated, their seminal fluid would not contain sperm.

²⁰³ This section on performing the exam is primarily drawn from the American College of Emergency Physicians' (ACEP) *Evaluation and Management of the Sexually Assaulted or Sexually Abused Patient*, 1999, pp. 103–107. Much of the ACEP exam procedures were based on the *California Medical Protocol for Examination of Sexual Assault and Child Sexual Abuse Victims*.

Anogenital examination.²⁰⁴ During the female genital exam,²⁰⁵ examine the external genitalia and perineal area for injury, foreign materials, and other findings in the following areas: abdomen, thighs, perineum, labia majora, labia minora, clitoral hood and surrounding area, perurethral tissue/urethral meatus, hymen,²⁰⁶ fossa navicularis, and posterior fourchette. The use of a colposcope during the external genital exam enhances viewing microscopic trauma and may provide photographic documentation.²⁰⁷

Then examine the vagina and cervix for injury, foreign materials, and foreign bodies. Use a colposcope or other magnifying device if available. In some jurisdictions, toluidine blue dye may be used to highlight trauma, either with or without the use of a colposcope.²⁰⁸ Examine the buttocks, perianal skin, and anal folds for injury, foreign materials, and other findings. If rectal penetration is reported or suspected, an anoscope can be used as a tool to identify and evaluate trauma (it may also be used to help obtain anal swabs and trace evidence).

For male patients, examine the external and perineal area for injury, foreign materials, and other findings, including from the abdomen, buttocks, thighs, foreskin, urethral meatus, shaft, scrotum, perineum, glans, and testes. Document whether patients are circumcised.

Documentation of findings. Record findings from the general physical and anogenital exam on appropriate body diagram forms. Detailed descriptions of findings should be provided as required. During the exam, collect evidence as specified in the evidence collection kit and photograph anatomy involved in the assault according to jurisdictional policy. Follow jurisdictional policy regarding documentation, photography, and collection of bite mark evidence.²⁰⁹

Collect evidence to submit to the crime lab for analysis, according to jurisdictional policy.²¹⁰ The following evidence from patients, along with completed documentation forms, typically is submitted to the crime lab designated by the jurisdiction.²¹¹ Jurisdictions may require collection of additional or different

²⁰⁴ If patients are mobility impaired, review their history at this stage. In patients with spinal cord injury (SCI), the level of injury and any history of autonomic dysreflexia will have to be noted and given special attention. Other considerations in these patients are histories of muscle spasm and triggers for both muscle spasm and autonomic dysreflexia. Examiners should be sure to ask about things such as whether these patients have ever had a speculum exam, what this experience was like, what the most comfortable position would be for the anogenital exam, and any history of autonomic dysreflexia with a speculum exam. (Commonwealth of Massachusetts's *SANE Protocol*, 2002, p. 36.) Transgender individuals with a masculine identity and those with a constructed vagina may sustain additional physical and emotional damage when vaginally assaulted.

²⁰⁵ Some patients may not have previously had a gynecological exam and need a detailed explanation and support during this part of the exam. (Drawn from L. Zarate, 2003, *Suggestions for Upgrading the Cultural Competency Skills of SARTs*, Arte Sana Web site, 2003.)

²⁰⁶ The Tanner Scale of Secondary Sexual Development is a sexual maturity rating scale that defines a child's stage of puberty. (American Professional Society on the Abuse of Children, *Glossary of Terms and the Interpretation of Findings for Child Sexual Abuse Evidentiary Examinations*, p. 7.) These developmental stages are relevant to the interpretation of physical findings in child and adolescent cases. There is a relationship between Tanner Stages and hymenal development. Physical findings must be evaluated in the context of hymenal development for the interpretation of findings. (The *California Medical Protocol for Examination of Sexual Assault and Child Sexual Abuse Victims*, 2001, p. 61.)

²⁰⁷ Colposcopes have magnifying lenses ranging from 4x to 30x power and can have 35-mm camera or video camera attachments. Colposcopes have a green filter that enhances the visualization of scars, unusual vascular patterns, and genital warts. Examiners can use the colposcope to obtain magnified images of the oral pharynx, genital, and rectal areas. Minor skin and/or mucosal trauma such as abrasions, lacerations, petechiae, focal edema, hymeneal tears, and anal fissures are more easily seen with magnification, and photographs can be taken for documentation. Attached video cameras can also record images. (Drawn from the *California Medical Protocol for Examination of Sexual Assault and Child Sexual Abuse Victims*, 2001, p. 58).

²⁰⁸ The use of toluidine blue dye is controversial in some jurisdictions (e.g., it may be perceived by the court as changing the appearance of the tissue) and not universally used. When employed, toluidine blue dye (1-percent aqueous solution) should be applied by cotton swab before any internal or digital speculum examination. Although DNA evidence will be preserved, care should be taken to avoid letting dye enter the vaginal vault. Excess dye may be blotted away with 1-percent acetic acid solution or lubricating jelly. Toluidine blue dye cannot separate consensual from nonconsensual lesions. Patients should be advised that small traces of the dye might shed in their clothing over the 2 days following the exam. (Information on use of this dye is drawn from the American College of Emergency Physicians' *Evaluation and Management of the Sexually Assaulted or Abused Patient*, 1999, p. 117.)

²⁰⁹ In addition to documenting, swabbing, and photographing bite marks, an odontologist may need to make casts. Without a cast, teeth cannot be matched to suspects. The American College of Emergency Physicians' *Evaluation and Management of the Sexually Assaulted or Abused Patient*, 1999, pp. 111–112, offers guidelines for bite mark documentation.

²¹⁰ Much of this section was drawn from the American College of Emergency Physicians' *Evaluation and Management of the Sexually Assaulted or Abused Patient*, 1999, pp. 103–107.

²¹¹ In some cases, it may be appropriate to submit evidence to the FBI Laboratory. It accepts cases from any duly authorized law enforcement agency. However, if the case is not a FBI case and the jurisdiction has capability to analyze DNA, then the DNA Unit of the FBI Lab will generally not accept the case. Cases that occur on Indian reservations may be submitted directly to the FBI Lab from local or tribal law enforcement agencies, the Bureau of Indian Affairs, or the FBI and will be worked on by the Indian Country Evidence Task

specimens. Trained examiners should use the medical forensic history and the physical assessment of the patient to guide the evidence collection process. Instructions supplied in the kit may be helpful as a guide for those who are not experienced in the process of evidence collection. However, it should be recognized that the kit instructions should not be read in front of the patient, which could be cause further emotional trauma in the aftermath of the assault. If any requested evidence is not collected, examiners should note reasons on documentation forms.

Collect clothing evidence. Clothing frequently contains important evidence in sexual assault cases. It provides a surface upon which traces of foreign materials, such as semen, saliva, blood, hairs, fibers, and debris from the crime scene, may be found. While foreign matter can be washed off or worn off the body, the same substances often can be found intact on clothing for a considerable length of time following an assault. Damaged or torn clothing may be significant, as damage may be evidence of force (do not cut through any existing holes, rips, or stains on clothing). If the examiner detects damage to the clothing, ask the patient if that damage was related to the assault or present prior to the events in question. Evidence on patients' clothing can be compared with evidence collected from suspects and crime scenes. Common items collected from patients include underwear, hosiery, blouses, shirts, and pants. Coats and shoes are collected less frequently because they are less likely to have evidentiary value and their loss may represent a significant financial burden for victims.²¹² Transgender individuals may be unwilling to part with prostheses and similar items for reasons of safety and/or cost.

Procedures for collecting clothing, underwear, and foreign material dislodged while undressing include the following:

- Place a clean hospital sheet on the floor as a barrier. Then place the collection paper on the barrier sheet. Be careful to prevent evidence transfer. Document all findings. Ask patients to disrobe (assisting them as requested and then draping them appropriately).²¹³ When disrobing, have patients remove shoes and then undress over the collection paper to catch any foreign material that is dislodged.²¹⁴ If someone assists, she/he should wear gloves.
- Collect clothing pertinent to the assault. First determine if patients are wearing the same clothes worn either during or immediately following the assault. If so, the clothing should be examined for any apparent foreign material, stains, or damage. When the determination has been made that items may contain possible evidence, those items should be collected. If it is determined that patients are not wearing the same clothing that they did either during or immediately after the assault, examiners should inquire as to the location of that clothing. If that clothing has not been brought to the exam site, information on clothing location should be provided to law enforcement (if involved) so that clothing can be retrieved and examined before any potential evidence is destroyed.²¹⁵ In addition to collecting underwear worn at the time of or immediately after the assault, it may also be important to collect underwear patients are wearing at the time of the exam (if relevant to the case).
- Be sensitive about how much clothing to take as evidence. For example, take patients' coats or shoes only if it is determined that there may be evidence on them. The exam site can coordinate with advocacy programs to ensure that replacement clothing is available for patients in a range of

Force. Should a jurisdictional lab not have a hair examiner but have the capability to analyze DNA, items requiring only DNA analysis should not be submitted. Items such as clothing that will be examined for both DNA and trace evidence should be submitted to the FBI Lab first. These items will be returned after processing for trace evidence and can then be sent along with DNA-only evidence to the jurisdictional lab. Do not submit items to the FBI Lab for trace evidence analysis after they have been previously examined by another lab. For more information or help submitting a case to the FBI Lab, contact your local FBI office or see the *Handbook of Forensic Services* at <http://www.fbi.gov/about-us/lab/handbook-of-forensic-services-pdf>.

²¹² Paragraph drawn from the *West Virginia Protocol for Responding to Victims of Sexual Assault*, 2008, p. 32.

<http://www.fris.org/Resources/PDFs/Books/WVProtocol.pdf>.

²¹³ If patients are concerned about disrobing in front of advocates and/or personal support persons, they can turn around, hold up a sheet to shield patients, or leave the room while patients disrobe.

²¹⁴ For patients with mobility impairments, put the foreign material collection sheet on the exam table and leave in place until the exam is completed. If patients prefer to disrobe in their wheelchairs, sheets can be tucked in around the wheelchair to catch debris. Avoid putting chairs on paper, as debris from wheels may contaminate evidence. (Commonwealth of Massachusetts *SANE Protocol*, 2002, p. 33.)

²¹⁵ Paragraph drawn from the *West Virginia Protocol for Responding to Victims of Sexual Assault*, 2008, p. 33.

<http://www.fris.org/Resources/PDFs/Books/WVProtocol.pdf>. In the course of the exam process, additional crime scene items that could be potential evidence may be identified and should be collected and preserved.

sizes. This clothing is critical in some instances (e.g., a patient may own only the clothing that is being collected).

- If female or transgender male patients are menstruating, collect tampons and sanitary napkins. Air-dry them as much as possible and then place them in a separate paper collection bag.
- Follow jurisdictional policy for handling and transporting wet evidence that cannot be dried thoroughly at the exam site (e.g., wet clothing, tampons, and sanitary napkins). Ensure that it is packaged in leak-proof containers and separated from other evidence when being transported. It is critical to alert involved law enforcement representatives and crime lab personnel about the presence of wet evidence and the need for its immediate analysis or further drying.²¹⁶
- After drying items according to jurisdictional policy, place each piece of clothing and collection paper in a separate paper bag, label, seal, and initial the seal. If additional bags are needed, use new grocery-style paper bags only. The barrier sheet is not submitted as evidence.
- Tape/seal bags closed; label, seal,²¹⁷ and initial the seal.

Collect debris.²¹⁸

- Collect obvious debris on patients' bodies (e.g., dirt, leaves, fibers, and hair) on a collection sheet—package, label, seal, and initial the seal.
- Fingernail evidence: ask patients whether they scratched the suspects' face, body, or clothing. If so, or if fibers of other materials are observed under patients' fingernails, collect fingernail clippings, scrapings, and/or swabbings, according to jurisdictional policy.²¹⁹ If fingernail scrapings are collected, package fingernail scrapings and tools used to obtain the sample, label, seal, and initial the seal. Cut broken fingernails at the remaining jagged edge for later comparison. If artificial fingernails or nail extensions are being worn by the patient, another nail should be enclosed as a known sample if one is missing. Package, label, seal, and initial the seals.
- If requested, assist patients in putting on exam gowns after clothing and debris are collected.

Collect foreign materials and swabs from the surface of the body. Carefully inspect the body, including head, hair, and scalp, for dried or moist secretions and stains (e.g., blood, seminal fluid, sweat, and saliva) and other foreign material. Use an alternate light source to assist in identifying evidence. Obtain swabs from any suspicious area that may be a dry secretion or stain, any moist secretion, any area that fluoresces with longwave ultraviolet light, and any area for which patients relate a history or suspicion of bodily fluid transfer (e.g., licking, kissing, biting, splashed semen, or suction injury). Also collect swabs from potentially high-yield areas (e.g., neck, breasts, or external genitalia) if the history is absent or incomplete.

- Use a moist swab to collect dry secretions, followed by a dry swab. Swab moist secretions with a dry swab. Separate swabs should be used for every sample area collected. Follow jurisdictional policies regarding the number of swabs required to collect each specimen.
- Swab bite marks. In some jurisdictions, an initial moist swabbing followed by a dry swabbing has been shown to result in full DNA profiles.
- Optional—smear swabs onto microscope slides, according to jurisdictional policy.
- Cut matted head, facial, or pubic hairs bearing crusted material (or flake off material if possible) and place in an envelope.
- According to jurisdictional policy, air-dry all specimens, package swabs and slides separately, label, seal, and initial the seals. Note that coding of evidence must allow the crime lab to know which swab was used to prepare which slide.
- If teeth are flossed prior to oral swab collection, package used floss (if available), label, seal, and initial the seal.

²¹⁶ Drawn from Connecticut's Video Training Program, Part 1, *The Examination: Sexual Assault Evidence Collection*, 1998.

²¹⁷ Do not use saliva to seal envelopes; rather, try using moistened gauze pads or paper towels. (Drawn from Connecticut's Video Training Program, Part 1, *The Examination: Sexual Assault Evidence Collection*, 1998.)

²¹⁸ Debris-containing evidence may be found on equipment, such as wheelchairs, scooters, canes, wheelchair pads, assistive communication devices, catheters, and service animals, used by some patients with physical impairments. Swab equipment and/or animals for evidence, if appropriate, according to jurisdictional policy. Always ask patients for permission to do so.

²¹⁹ Some jurisdictions routinely collect fingernail samples and photograph fingernail damage that may have been related to the assault.

Collect hair combings. Follow jurisdictional policy for collecting hair combings. The purpose of this procedure is to collect hair shed by suspects that may have been transferred to patients' hair. Hair combings may also reveal other foreign materials. It is important to examine head, facial, and pubic hair for secretions, foreign materials, and debris and collect as appropriate (see above for collection of debris and foreign materials). Pubic hair combings may be necessary if the assault involved the genital area of patients, according to jurisdictional policy. To collect pubic hair combings:

- Use the comb and collection paper provided for this procedure.
- Place the unfolded paper under patients' buttocks and comb hair toward paper (patients may comb).
- Fold comb with debris/hair into paper. Package paper, label, seal, and initial the seal.

Collect hair reference samples as needed.²²⁰ Follow jurisdictional policy for collection of hair reference samples.²²¹ Many jurisdictions do not routinely collect plucked head and pubic hair reference samples. Some will only collect these samples if the lab requests it at a later time. In other jurisdictions, both samples are collected routinely unless otherwise indicated or declined by patients.²²² Whatever the jurisdictional policy, patients should always be informed about the purpose of collection, procedures used to collect samples, discomfort that may be involved, and how these samples may be used during the investigation and prosecution. If hair reference samples are not collected at the initial exam, it is important to inform patients that there might be a need to collect these samples for crime lab analysis at a later date. They should be aware that hair evidence collected at a later date may not be as conclusive as if it is collected at the time of the initial exam (e.g., due to the fact that hair characteristics can change over time).

When these samples are collected, the indications, timing, and techniques vary. Jurisdictional policies should be in place and followed. Give patients the option of collecting samples themselves.

Collect oral and anogenital swabs and smears. Patients' consent, the medical forensic history, and exam findings should guide collection of oral and anogenital specimens. In general, specimens should be collected only from orifices and areas surrounding the orifices that patients report to be involved in the assault.²²³ Keep in mind that some patients may be vague about the type(s) of sexual contact that occurred. Examiners can help clarify which orifices were involved by asking appropriate questions. If there is uncertainty about involved orifices (e.g., because patients have little memory of the assault, were unconscious or incoherent, or do not understand what occurred), collection from oral, vaginal, and anal orifices (with patients' permission) may be appropriate. In some jurisdictions, policy calls for collection from all three orifices. Again, patients' consent is needed to collect these samples. Things to note when collecting these swabs and smears:

- Caution patients who use a bathroom prior to the exam that evidence may be present in pubic, genital, and anal areas and urge them not to wash or wipe away secretions until after evidence collection.
- When taking a swab, examiners should take care not to contaminate the collection with secretions or materials from other areas, such as vaginal to rectal or penile to rectal.

²²⁰ See footnote under hair combing regarding patients with limited mobility.

²²¹ Crime labs use reference samples to determine whether or not evidence specimens collected are foreign to patients. There is a lack of consensus across jurisdictions about whether to collect these samples routinely during the initial exam. Head and pubic hair reference samples from patients can provide a source of comparative information for forensic scientists, but these samples are not needed in many cases and can be retrieved from patients at a later date if necessary. If the samples are not taken at the time of the exam, however, patients may be reluctant to return later for collection. Also, hair characteristics may change over time. For patients, gathering these samples can be a painful and embarrassing procedure that follows the trauma of the assault. But, given the choice of having samples taken at the initial exam or at a later date, many opt to get it over with during the exam. Hair pulled or cut from patients is rarely used to prosecute a case. With the advent of DNA technology, the court's use of these reference samples declined. Yet, particularly in cases where DNA evidence is not available, hair reference samples could be useful evidence. SARTs (or involved responders) should ensure that their decisions about collecting hair reference samples reflect current best forensic practices, advances in technology, and the need for sensitivity to patients.

²²² Note that a patient may believe hair is sacred and thus may be reluctant or decline to have hair evidence collected.

²²³ It is important to note, however, that there is a lack of consistency across jurisdictions as to whether specimen collection from all orifices is routine or conducted on a case-by-case basis, based on the assault history and exam findings.

- Follow jurisdictional policy for collecting swabs (and the number of swabs used to collect a sample), smearing swabs on slides, and drying and packaging swabs and slides. Also, follow jurisdictional policy for timeframes in which samples should be collected unless otherwise indicated.
- Do not stain or chemically fix swabs or smears.
- When preparing slides, note that coding of evidence material must allow the crime lab to know which swab was used to prepare which slide.
- Document any foreign substance or material introduced by health care providers (e.g., lubricating jelly on a speculum or betadine prior to introduction of a catheter).

Oral sample²²⁴

- Place swabs together to collect specimen from oral cavity between gums and cheeks and under tongue. Remove dentures and swab with same swabs.
- Optional—smear swabs onto two microscopic slides.
- Air-dry swabs and slides.
- Package slides and swabs, place in envelope, label, seal, and initial the seal.

External genital sample²²⁵

- Swab external genital dry-skin areas with swabs (blind swabbing by protocol or history), at least one dry and one moistened with a drop of sterile, distilled, or deionized water, according to jurisdictional policy.
- Optional—smear swabs on two microscope slides.
- Air-dry swabs and slides.
- Package slides and swabs, place in envelope, label, seal, and initial the seal.

Vaginal/cervical sample

- Use swabs together to collect a sample from vaginal pool. It is prudent to collect swabs from both the vagina and cervix, regardless of time between assault and exam.
- Optional—smear swabs onto microscope slides.
- Air dry swabs and slides.
- Package slides and swabs, place in envelope, label (specifically indicating sampling site), seal, and initial the seal.

Wet-mount evaluation.²²⁶ Some jurisdictions require examiners to conduct wet-mount examinations of vaginal/cervical secretions for motile and nonmotile sperm in cases in which a male suspect may have ejaculated in a patient's vagina.²²⁷ Because sperm motility decreases quickly with time and removal from the vagina/cervix,²²⁸ wet-mount evaluation during the exam can provide the only opportunity to see sperm motility.²²⁹ The presence of motile sperm may help narrow the timeframe that the crime could have occurred.

²²⁴ One jurisdiction also collects a lip/lip area swab and smear and an oral rinse if there was oral contact.

²²⁵ Note that cleansing the area for catheterization and/or applying Lidocaine may dilute or contaminate the evidence. Therefore, when Lidocaine is applied to the perineal and anal areas to minimize the risk of autonomic dysreflexia, it should be done only after swabbing the external genitalia for evidence. If catheterization is required either for evidence collection or to empty the bladder for speculum examination, it should be done only after swabbing the external genitalia. (Commonwealth of Massachusetts *SANE Protocol*, 2002, p. 38.)

²²⁶ Note for clarity that this and the next paragraph discuss wet-mount evaluation for sperm. However, wet-mount evaluation of vaginal secretions for infection (e.g., yeast infection and STIs) may also be done during the exam if medically or forensically indicated. Hospital lab personnel usually analyze these samples.

²²⁷ If and when wet-mount evaluation for sperm is done, examiners should exercise discretion conducting this procedure in the presence of patients and be sensitive in explaining the implications of positive and negative wet mounts to patients (if they want to know). Examiners should remind law enforcement investigators that a lack of sperm does not mean an assault did not occur and that the crime lab will later examine prepared slides using stains and other techniques not available to examiners. Thus, if sperm is present, the lab's rate of identification will probably be higher than it was for examiners. Providing this information might help deter misinterpretation of results.

²²⁸ In most cases, sperm becomes nonmotile in the vagina within 10 to 12 hours after ejaculation. (Drawn from W. Green, M. Kaufhold, and E. Schulman, *Sexual Assault Evidentiary Exam Training for Health Care Providers*, Participant Manual, 2001, p. 39 of Module 7.) Both motile and nonmotile sperm may be found in the cervix for longer periods of time after the assault than in the vagina. Sperm may not be found after an assault for many reasons (see section in this chapter on the importance of semen evidence).

²²⁹ Drawn from W. Green, M. Kaufhold, and E. Schulman, *Sexual Assault Evidentiary Exam Training for Health Care Providers*, Participant Manual, 2001, p. 39 of Module 7.

In most jurisdictions, however, the crime lab is responsible for all analysis of evidence²³⁰ and examiners do not do the wet-mount evaluation for sperm.²³¹ Follow jurisdictional policy on whether wet-mount evaluation for sperm is needed and methods of evaluation. If it is required, examiners must be educated on use of the microscope, identification of sperm, and reporting their findings and have quality assurance mechanisms in place to assure the accuracy of their findings.

- If necessary, prepare a wet-mount slide according to jurisdictional policy. Dab one swab collected from the vaginal pool on a slide.²³² Typically, the slide is prepared by placing one drop of normal saline onto the “dab” of vaginal material just placed on the slide. Place a cover slip on the slide.
- View for presence of sperm under a microscope at 400x or by using a phase contrast or other optically staining microscope (within 10 minutes of preparing slide).²³³
- Air-dry this swab and slide (not removing the cover slip).
- Package swab and slide, place in envelope, label as “wet mount” (specifically indicating sampling site), seal, and initial the seal.

While the speculum is still in place and after all swabs and evidence have been collected, any necessary medical cultures may be taken, if medically indicated.

Penile sample

- Slightly moisten swabs with distilled water and thoroughly swab the external surface of the penile shaft and glans. Swab all outer areas of the penis and scrotum where contact is suspected. Avoid swabbing the urethral meatus.
- Gently roll the swabs over one of the microscope slides, according to jurisdictional policy.
- Air-dry swabs and slides.
- Package slides and swabs, place in envelope, label, seal, and initial the seals.

Immediately following this procedure, any necessary medical cultures should be taken.

Perineal area sample²³⁴

- If there was vaginal/anal contact, there may be leakage of semen in the perineal area. Use an alternate light source on the anal area and flake off or swab areas of dried secretions using a moist swab followed by a dry swab.
- Optional—smear swabs on microscopic slides, according to jurisdictional policy.
- Flaked dried secretions should be placed into the provided container. Air-dry swabs and slides and package them separately. Place in envelope, label, seal, and initial the seal.
- Avoid contaminating anal/rectal samples by cleansing the perianal area after external secretions and foreign materials have been collected.

Anal/rectal sample²³⁵

²³⁰ A possible exception may be toxicology analysis.

²³¹ While crime labs can reliably identify the presence of sperm on permanent stained slides, they cannot identify motile sperm due to time delays. Information about the presence or absence of sperm and motile sperm obtained at the time of the exam can impact the investigation and patients' decision making. One concern related to examiners doing wet-mount evaluations for sperm is that their findings may be different than those of crime labs (e.g., the examiner may not detect sperm, while the crime lab does).

²³² Alternate methods for obtaining materials for wet mounts: a sample may be collected from a vaginal aspirate or fluid from the lower bill of speculum after withdrawing it from vagina, or sperm are occasionally found on microscopic urinalysis. (W. Green, M. Kaufhold, and E. Schulman, *Sexual Assault Evidentiary Exam Training for Health Care Providers*, Participant Manual, 2001, p. 38 of Module 7.)

²³³ Examiners rather than hospital lab personnel should view these slides. Otherwise, delays between preparation of slides in the exam room and analysis in the hospital lab could cause a negative result (e.g., sperm present, but not motile). Also, those involved in the chain of custody of this evidence should be kept to a minimum.

²³⁴ See the next footnote for patients with spinal cord injury and/or history of autonomic dysreflexia.

²³⁵ Note that for patients with spinal cord injury and/or history of autonomic dysreflexia, collection of anal/rectal samples is performed only with the highest level of awareness of risks and with observance of precautionary steps. Possible triggers for autonomic dysreflexia are anxiety, pelvic exam (a cold speculum or the pressure of manipulating a speculum or manipulation of the cervix and pressure on the uterus), rectal exam or swabbing, impacted bowel, urinary retention, a kinked catheter, a bladder infection, and deep skin lesion. Some symptoms are highly elevated blood pressure, nasal congestion, sudden onset of headache, flushing, sweating, shortness of breath, and muscle spasm. Precautions against a possible attack requires an empty bladder or leg bag for the exam; application of lidocaine gel to perineum and/or anal area before exam; examination performed in a semi-supine position; slow insertion and minimal manipulation of a warm speculum; constant monitoring of blood pressure and “checking in” with patients; having rapid acting anti-hypertensive

- Collect swabs from the anal cavity.²³⁶ Avoid contact with external skin surfaces.
- Optional—smear swabs on microscopic slides, according to jurisdictional policy.
- Air-dry swabs and slides.
- Package swabs and slides, place in envelope, label, seal, and initial the seal.

At this time, any additional examinations or tests involving the anus should be conducted.

Known blood or saliva sample or buccal (inner cheek) swab for DNA analysis and comparison. Many samples collected during the exam contain a mixture of secretions. To interpret DNA profile results obtained from these swabs, it is essential to know the DNA profile of patients. Patients' DNA reference samples are used for this purpose. Follow jurisdictional policy regarding the type of samples accepted by the crime lab. Collection of a buccal swab or saliva sample is encouraged unless it is medically or forensically necessary to take blood. If a blood sample is collected, the most noninvasive method of collection should be used.

Buccal swabs: Decide on a case-by-case basis whether it is appropriate to collect a buccal swab reference sample for DNA typing rather than a blood sample. For example, a blood sample may not be needed or patients might not allow blood to be drawn. (Note that buccal swabs and saliva samples are not suitable for blood typing and serology.) If oral copulation is asserted or suspected, a buccal swab or saliva sample for patients' DNA reference may be contaminated. In those cases, blood is usually the better reference sample. However, examiners should consult local crime labs to ensure their collection methods reflect the lab's preferred method.

- Buccal swab: Have patients rinse their mouths with tap water and then expose the inner cheek area. Swab this area with gentle pressure. Air-dry the swab, package, place in envelope, label, seal, and initial the seal.

Dry Blood

- If drawn blood is not being collected for medical or toxicological purposes, consider dry blood collection because it is a less invasive method of blood collection and is easier to store.²³⁷
- Using a betadine swab, wipe the tip of the left or right ring finger.
- Using a sterile lancet, prick the finger.
- While holding the finger over the circles on the blood collection card, milk the finger, allowing two drops of blood to fall in a circle. Repeat procedure for any remaining circles as required by jurisdictional policy (it may not be necessary to fill all circles).
- Allow blood to air-dry according to jurisdictional policy. Fill out the patient's name on the first line. Package according to jurisdictional policy, then place in envelope, label, seal, and initial the seal.

Drawn Blood

- In order to minimize patients' discomfort, collect drawn blood needed for the reference sample at the same time blood is collected for medical or toxicological purposes.
- Blood for the reference sample may be collected in lavender-top and/or yellow-top blood drawing tubes. These colored tubes contain preservatives suitable for forensic blood typing. The color to use

medication on hand; and making health care staff aware of risks and on alert. Treatment for autonomic dysreflexia includes stopping the exam, bringing patients to sitting or semi-supine position, and involving emergency medical staff immediately who can administer a fast-acting anti-hypertensive medication. (Commonwealth of Massachusetts *SANE Protocol*, 2002, p. 40.)

²³⁶ If needed, an anoscope can be used to identify anal injuries and obtain anal swabs after perianal cleansing. These swabs should be obtained by direct visualization from the rectal mucosa visible above the tip of the anoscope. If patients are unable to tolerate a water-moistened anoscope or anal speculum, lightly coat the instrument with lidocaine jelly or use manual traction and obtain samples from the anal canal. If a lubricant (other than water or saline) or lidocaine jelly is used, document its use and the reason for it. (The *California Medical Protocol for Examination of Sexual Assault and Child Sexual Abuse Victims*, 2001, p. 48.) The examiner should use discretion in determining whether a case warrants the use of the anoscope for medical and/or forensic purposes, as well as obtain patients' informed consent for anoscopy. Particularly if a patient has been anorectally penetrated, that patient may be uncomfortable with the use of the anoscope and could possibly even feel revictimized by it. The discomfort this procedure may cause the patient should be weighed against its potential medical or forensic uses.

²³⁷ Several state protocols indicate dry blood collection is an acceptable method to obtain known DNA samples.

is typically specified by the designated crime lab.²³⁸ If tubes are included in the evidence collection kit, check expiration dates and replace if expired.²³⁹ Mix according to jurisdictional policy.

- Write the patient's name, date and time of collection, and the collector's initials on the tube. Package according to jurisdictional policy, then place in envelope, label, seal, and initial the seal.

Collect other evidence. Other evidence may be collected beyond what is needed for the sexual assault evidence collection kit. This could include toxicology samples or other evidence based on the unique facts and circumstances of the case.

Miscellaneous swabs may be collected, depending upon the area of contact noted in the medical forensic history. Some jurisdictions are collecting wet to dry swabs from the surfaces surrounding orifices that were penetrated or that had touch contact during an assault (e.g. area surrounding the mouth in the case of an oral assault, or the inner thighs in a vaginal penetration).

Toxicology samples. Make the decision about whether to collect toxicology samples for forensic purposes, what to collect, and collection methods according to jurisdictional policy. Do not put toxicology samples in the sexual assault evidence collection kit, unless otherwise indicated. Identify which forensic labs the jurisdiction has selected to analyze these samples, choose a lab, and follow transfer policies. (See C.7. *Alcohol- and Drug-Facilitated Sexual Assault* for more information on collecting toxicology samples.)

Dental floss. Use of dental floss is not recommended for additional evidence collection in cases with oral penetration. Flossing can create increased opportunity for infection through microtrauma to the gums.

Keep medical specimens separate from evidentiary specimens collected during the exam. Specimens collected for medical purposes should be kept and processed at the medical facility, and specimens collected for forensic analysis should be transferred to the crime laboratory or other specified laboratories for analysis (with patients' consent). It is not necessary to maintain the chain of custody on medical specimens—instead, follow exam facility policy for documenting medical care and storing medical records. Exam sites that perform exams for military installations should consider Memoranda of Understanding to address such issues as storage of evidence.

²³⁸ The *California Medical Protocol for Examination of Sexual Assault and Child Sexual Abuse Victims*, 2001, p. 52.

²³⁹ Drawn from Connecticut's Video Training Program, Part 1, *The Examination: Sexual Assault Evidence Collection*, 1998.

7. Alcohol and Drug-Facilitated Sexual Assault

Recommendations at a glance to facilitate response in suspected alcohol- and drug-facilitated sexual assault:

- Promote training and develop jurisdictional policies.
- Plan response to voluntary use of drugs and/or alcohol by patients.
- Be clear about the circumstances in which toxicology testing may be indicated. Routine testing is not recommended.
- Toxicology testing procedures should be explained to patients.
- Toxicology samples should be collected as soon as possible after a suspected drug-facilitated case is identified and informed consent is obtained, even if patients are undecided about reporting to law enforcement.
- Identify toxicology laboratories.
- Preserve evidence and maintain the chain of custody.

Promote training and develop jurisdictional policies. It is essential that examiners and other relevant health care personnel, 911 dispatchers, law enforcement representatives, emergency medical technicians, prosecutors, judges, and advocates receive training and information on alcohol and drug-facilitated sexual assault. They need to be educated on the use of drugs and alcohol to facilitate sexual assault, screening for alcohol- or drug-facilitated assault, and how to handle situations in which an alcohol- or drug-facilitated sexual assault is suspected. Both agency-specific and multidisciplinary policies should be developed to guide immediate response to a suspected alcohol- or drug-facilitated sexual assault.²⁴⁰

First responders must recognize that although Rohypnol and gamma hydroxy butyrate (GHB) are widely publicized as the “drugs of choice” in drug-facilitated sexual assault, assailants may use numerous other substances (including alcohol) to facilitate sexual assault.²⁴¹ They must understand the urgency of collecting toxicology samples, if it is medically necessary, or if an alcohol- or drug-facilitated sexual assault is suspected, as well as the importance of obtaining informed consent from patients prior to sample collection. They should also be aware that collection of toxicology samples is typically separate from the sexual assault forensic evidence collection kit, and procedures for toxicology analysis may be different from that of other evidence analysis.

Ideally, the first available urine sample should be collected in suspected alcohol- or drug-facilitated sexual assault cases. Law enforcement agencies and emergency medical services should develop procedures and staff training for collection in cases where patients must urinate before arriving at the exam site. Advocates and other professionals who may have contact with patients prior to their arrival at the exam site should also be educated to provide those who suspect that alcohol or drugs were used to facilitate the assault with information on how to collect a sample if they cannot wait to urinate until they get to the site.

Plan response to voluntary use of drugs and/or alcohol by patients. It may be revealed during the exam process or through toxicological analysis that patients voluntarily used drugs and/or alcohol shortly prior to the assault.²⁴² Voluntary drug and/or alcohol use by patients during this period should not diminish the perceived seriousness of the assault. Law enforcement officers and prosecutors should guard against disqualifying cases in which patients voluntarily used illegal drugs or used alcohol (whether legal or illegal use). Patients should understand that information related to voluntary alcohol or drug use may be used to undermine their credibility in court, but also that in some instances it might be helpful in prosecuting a case by documenting their vulnerability (see the following section on explaining procedures). Also, before pursuing

²⁴⁰ These policies should clarify that patients should not be responsible for costs related to toxicology testing. Testing done as part of forensic evidence collection is typically paid for by the involved government entity.

²⁴¹ For more information about use of Rohypnol and GHB in drug-facilitated cases, see American Prosecutors Research Institute, Violence Against Women Program, *The Prosecution of Rohypnol and GHB Related Sexual Assaults*, 1999.

²⁴² Health care personnel involved in sexual assault cases should adhere to facility policy regarding 1) asking patients about alcohol and drug use in the course of intake and treatment and 2) testing for alcohol and/or drugs if deemed medically necessary.

charges related to illegal drug or alcohol use by patients, prosecutors should give great weight to the impact that the threat of such charges may have on patients' willingness to report the sexual assault and be involved in subsequent criminal justice proceedings. Some jurisdictions have statutes protecting sexual assault victims regarding drug and alcohol testing.²⁴³

It is important to document patient voluntary use of drugs and alcohol between the time of the assault and the exam. Some patients may self-medicate to cope with post-assault trauma and require immediate medical treatment. In addition, ingestion of drugs and/or alcohol during this period may affect the quality of evidence and negatively impact patients' ability to make informed decisions about treatment and evidence collection.

SART/SARRT members should have training on alcohol and substance abuse and how it is not uncommon for victims to use drugs and alcohol to cope with past sexual assault experiences or trauma. It is important to provide referrals and resources for victims who may reveal that they have a chemical dependency.

Be clear about the circumstances in which toxicology testing may be indicated.²⁴⁴ Routine toxicology testing is not recommended. However, in any of the following situations, the collection of a urine and/or blood sample may be indicated:²⁴⁵

- If a patient's medical condition appears to warrant toxicology screening for optimal care (e.g., the patient presents with drowsiness, fatigue, light-headedness, dizziness, physiologic instability, memory loss, impaired motor skills, or severe intoxication).
- If a patient or accompanying persons states the patient was or may have been drugged.
- If a patient suspects drug involvement because of a lack of recollection of event(s).²⁴⁶

Toxicology testing procedures should be explained to patients. Seek informed consent from patients to collect toxicology samples. Patients should understand the following before agreeing to toxicology testing:²⁴⁷

- The purposes of toxicology testing and the scope of confidentiality of results.²⁴⁸
- The ability to detect and identify drugs and alcohol depends on collection of urine and/or blood within a limited time period following ingestion.
- There is no guarantee that testing will reveal that drugs were used to facilitate the assault.
- Testing may or may not be limited to drugs commonly used to facilitate sexual assault²⁴⁹ and may reveal other drugs or alcohol that patients may have ingested voluntarily.
- Whether any follow-up treatment is necessary if testing reveals the presence of drugs used to facilitate sexual assault.²⁵⁰

²⁴³ See Cal. Pen. Code Section 13823.11 which states that testing to determine if alcohol or other drugs were associated with an attempted or completed sexual assault as part of a forensic exam is not admissible against the victim in a civil or criminal proceeding and provides other immunity and confidentiality safeguards.

²⁴⁴ There is some controversy related to if and when to collect toxicology samples and test patients for drug and/or alcohol use. Some jurisdictions only collect these samples if drug-facilitated sexual assault is suspected or if a medical need arises. They seek to minimize patients' discomfort and avoid collecting unnecessary items. Other jurisdictions collect toxicology samples from every patient (with permission) and analyze these samples as case facts and jurisdictional policy dictate. In addition to cases of suspected drug-facilitated assault, some jurisdictions may request a toxicology sample if there is indication that patients voluntarily used drugs and/or alcohol prior to the assault. One rationale for such a policy is that prosecutors will want all information on drug and alcohol use to prepare for the case. When developing jurisdictional policy about when and if to collect toxicology samples, involved professionals should consider the perspective of patients and the criminal justice system and make thoughtful, victim-centered decisions.

²⁴⁵ Bullets drawn from Connecticut's *Interim Sexual Assault Toxicology Screen Protocol*, 2002.

²⁴⁶ Often, drugs used to facilitate sexual assault are mixed with alcohol and other beverages to further incapacitate patients, usually without their knowledge. Once patients recover from the effects of drugs and/or alcohol, anterograde amnesia may make it difficult to recall events. Consequently, patients may not be aware of the assault or even of how they were drugged. (Drawn from Connecticut's *Interim Sexual Assault Toxicology Screen Protocol*, 2002.)

²⁴⁷ List adapted partially from Connecticut's *Interim Sexual Assault Toxicology Screen Protocol*, 2002.

²⁴⁸ If the patient authorizes the release of toxicology testing results to law enforcement and/or prosecution, this information will most likely be discoverable by the defense. If toxicology testing is done for purely clinical purposes and results are documented only in the patient's medical records, the results are typically more difficult, but not impossible, for the defense to discover.

²⁴⁹ In some jurisdictions, examiners may be able to request testing for specific drugs used to facilitate sexual assault. In others, tests for specific drugs are not done, rather, toxicology samples are screened for all ingested drugs and alcohol.

²⁵⁰ For example, patients with health conditions that may be affected by drug or alcohol intake may need information on possible impact of involuntary drug/alcohol ingestion and what to do to identify, treat, or avoid potential problems.

- Test results showing voluntary use of drugs and/or alcohol may be discoverable by the defense and used to attempt to discredit patients or to question their ability to accurately perceive the events in question (however, these results could also help substantiate that voluntary drug and/or alcohol use sufficiently impaired patients' consent and prevented legal consent).²⁵¹
- Whether there is a local prosecution practice of charging sexual assault victims with a crime for illegal voluntary drug and/or alcohol use revealed through toxicology screening.
- Declining testing when indicated by circumstances as described above may negatively impact the investigation and/or prosecution.²⁵²
- When and how they can obtain information on the results from toxicology testing.
- Who will pay for toxicology testing.
- If toxicology testing can proceed without a report to law enforcement.

Care should be taken when providing the above information to patients. In particular, they may need to hear repeatedly from examiners that voluntary use of drugs and/or alcohol, if any, does not reduce the seriousness of the assault. Under no circumstances should the medical forensic exam and treatment be conditioned upon patient consent to toxicology testing. Victims should be given access to the results of any toxicology screening performed and should be given information on how to obtain a copy of the results.

Toxicology samples should be collected as soon as possible after a suspected drug-facilitated case is identified and informed consent is obtained, even if patients are undecided about reporting to law enforcement. The length of time that drugs used for drug-facilitated assault remain in urine or blood depends on a number of variables (e.g., the type and amount of drug ingested, patients' body size and rate of metabolism, whether patients had a full stomach, and whether they previously urinated).²⁵³ Urine allows for a longer window of detection of drugs commonly used in these cases than does blood.²⁵⁴ The sooner a urine specimen is obtained after the assault, the greater the chances of detecting substances that are quickly eliminated from the body.²⁵⁵

Immediately collect a urine sample when appropriate. If patients may have ingested a drug used for facilitating sexual assault within 96 hours prior to the exam, a urine specimen of at least 30 milliliters but preferably 100 milliliters (about 3 ounces) should be collected²⁵⁶ in a clean plastic or glass container (follow jurisdictional policy). The urine sample does not have to be a clean catch (e.g., bacteria in the urine will not compromise test results). If patients cannot wait to urinate until their arrival at the exam facility, first responders should ask them to provide a sample and bring it to the facility, documenting the chain of custody. It is suggested that law enforcement officers and emergency medical technicians keep specimen cups readily available, according to agency policy.

Ideally, patients should not urinate until after evidence is collected. However, the number of times that patients urinated prior to collection of the sample should be documented.

Collect a blood sample when appropriate. If ingestion of drugs used to facilitate sexual assault may have occurred within 24 hours prior to the exam, a blood sample of at least 20 milliliters should be collected in a gray-top tube (contains preservatives sodium fluoride and potassium oxalate²⁵⁷) according to jurisdictional policy. A blood sample taken within this time period may pinpoint the time when drugs were ingested.²⁵⁸ If a blood sample is collected for toxicology screening, it should be accompanied by a urine sample. If blood alcohol determination is needed, collect blood within 24 hours of alcohol ingestion, according to jurisdictional

²⁵¹ The prosecutor can work to minimize the possibility that information about voluntary alcohol and/or drug use will be used against patients, particularly if patients are truthful from the start about their preassault drug/alcohol use and consent to testing.

²⁵² For example, if there is a suspicion that the assault was drug-facilitated and there were no toxicology tests, investigators and prosecutors may lack critical evidence, making it difficult to prosecute the case. Prosecutors might choose not to go forward with such a case. Refusal to get tested may also be used by the defense to discredit the patient and question the validity of the charges.

policy. (If blood has already been taken due to suspected drug ingestion, that sample can be used to determine blood-alcohol level. An additional sample usually is not needed.)

Occasionally, patients of drug-facilitated sexual assault vomit. The analysis of the vomit may also be useful to an investigation.²⁵⁹ Collect and preserve according to jurisdictional policy.

Package samples as appropriate. Package each toxicology sample according to the policy of the lab doing the analysis, place in envelope, label, seal, and initial the seal.

Identify toxicology laboratories. Exam facility laboratories should not analyze toxicology samples in suspected drug-facilitated sexual assault cases. Instead, involved criminal justice agencies should identify forensic laboratories that can analyze these toxicology samples (they should have the capacity to detect drugs in very small quantities).²⁶⁰ Information about these labs (e.g., contact information, evidence collection and packaging procedures, and transfer procedures) should be provided to law enforcement representatives investigating these cases, exam facilities, and examiner programs.

If toxicology tests are needed purely for the medical evaluation of patients, the exam facility lab typically performs these tests. Lab results are recorded in patients' medical records, according to facility policy. If toxicology samples are needed for both clinical and forensic purposes, one sample can be collected for immediate evaluation by the exam facility lab and another for analysis by the identified forensic lab. Take samples at the same time to avoid more discomfort to patients than is necessary.

Preserve evidence and maintain the chain of custody. Involved health care personnel should be aware of the toxicology lab's requirements on collection, packaging, labeling, storage, handling, transportation, and delivery of specimens.²⁶¹ Policies should be in place for storage of these samples when patients are undecided about reporting. As with any forensic evidence, the chain of custody must be maintained.

Refer to the current *Forensic Toxicology Laboratory Guidelines* by the Society of Forensic Toxicologists, Inc., and the American Academy of Forensic Sciences for detailed guidance on proper collection, labeling, handling, submission, and analysis of toxicology samples.²⁶²

²⁵⁹ M. LeBeau, Toxicological Investigations of Drug-Facilitated Sexual Assaults, *Forensic Science Communications*, 1999, p. 3.

²⁶⁰ American Prosecutors Research Institute, Violence Against Women Program, 1999, Video supplement, *The Prosecution of Rohypnol and GHB Related Sexual Assaults*.

²⁶¹ Refrigerate toxicology samples according to jurisdictional policy. In general, drawn blood should be refrigerated when it is stored. Urine should be refrigerated or frozen when stored.

²⁶² These guidelines are available at <http://www.soft-tox.org>.

8. STI Evaluation and Care

Recommendations at a glance to facilitate evaluation and treatment of STIs:

- Offer patients information in a language they understand.
- Consider the need for STI testing on an individual basis.
- Encourage patients to accept prophylaxis against STIs if indicated.
- Encourage follow-up STI exams, testing, immunizations, counseling, and treatment as directed.
- Address concerns about HIV infection.

Contracting a sexually transmitted infection (STI), also commonly known as a sexually transmitted disease or STD, from assailants is typically a significant concern of sexual assault patients. Because of this concern, it should be addressed as part of the medical forensic exam. Mechanisms should be in place in any setting where these patients are examined for STIs to ensure continuity of care (including timely review of test results) and monitor compliance with and adverse reactions to any therapeutic or prophylactic regimens.²⁶³

Offer patients information in a language they understand. Include information about the risks of STIs, symptoms and the need for immediate examination if symptoms occur, testing and treatment options (and the need for abstinence from sexual intercourse until treatment is completed), follow-up care, and referrals as needed.²⁶⁴ Referrals should include free and low-cost testing, counseling, and treatment offered in various sections of the community. Patients should be aware of the scope of confidentiality related to information in their medical records related to STIs.²⁶⁵ The level of detail needed when providing this information verbally varies (e.g., some patients may be aware of risks and want treatment, while others may not be as knowledgeable of risks or their options).

Consider the need for STI testing on an individual basis. Testing at the time of the initial exam does not typically have forensic value if patients are sexually active and an STI could have been acquired prior to the assault. Also, despite rape shield laws, there may be a concern that positive test results could be used against patients (e.g., to suggest sexual promiscuity). There may, however, be situations in which testing has legal purposes, as in cases where the threat of transmission or actual transmission of an STI was an element of the crime. Or, for nonsexually active patients, a baseline negative test followed by an STI could be used as evidence, if the suspect also had an STI.

Trichomoniasis, bacterial vaginosis (BV), gonorrhea, and chlamydial infection are the most frequently diagnosed infections among sexually assaulted women.²⁶⁶ Their presence does not necessarily indicate acquisition during the assault, since these infections exist among some sexually active women.²⁶⁷ The medical forensic exam presents an opportunity to identify preexisting STIs, regardless of when they were acquired, and for examiners to make recommendations for specific treatment. Testing for STIs at the time of the exam also gives examiners and patients the option of deferring treatment until it is needed.

Seek the informed consent of patients for testing, if indicated, following CDC guidelines. (For more information on this topic, see A.3. *Informed Consent*.)

²⁶³ Sexually Transmitted Diseases Treatment Guidelines, *Morbidity and Mortality Weekly Report*, Centers for Disease Control and Prevention, December 17, 2010, 9(RR-12), p. 91. Available at <http://www.cdc.gov/STD/treatment/> (CDC general phone: 800-311-3435). Much of the information in this chapter was drawn from these guidelines. Note that the guidelines are updated periodically. In addition to the guidelines, the CDC Web site at <http://www.cdc.gov> offers information on related research, news, and Internet links.

²⁶⁴ Drawn partially from Sexually Transmitted Diseases Treatment Guidelines, 2010, p. 92.

²⁶⁵ Laws in all states limit the evidentiary use of a patient's prior sexual history, including evidence of previously acquired STIs, as part of an effort to undermine the credibility of a patient's testimony. Evidentiary privilege against revealing any aspect of the exam or treatment is enforced in most states. In unanticipated, exceptional situations, however, STI diagnoses may later be accessed. (Sexually Transmitted Diseases Treatment Guidelines, 2010, p. 90.)

²⁶⁶ Chlamydial and gonococcal infections in women are of particular concern due to the possibility of ascending infection. In addition, post-assault testing can detect hepatitis B virus (HBV) and human immunodeficiency virus (HIV) infection (Sexually Transmitted Diseases Treatment Guidelines, 2010, p. 91).

²⁶⁷ The prevalence and incidence of STIs vary across societies and subpopulations defined by age, gender, race and ethnicity, and socioeconomic status (Fenton, Johnson, and Nicoll 1997)

Encourage patients to accept prophylaxis against STIs if indicated. If prophylaxis is accepted at the time of the exam, testing is usually not indicated medically. Routine preventive therapy after a sexual assault is often recommended because follow-up with these patients can be difficult.²⁶⁸ It also may reduce the need for more expensive/extensive treatment if an STI is discovered at a later time. Meet or exceed current CDC guidelines for STI preventive therapy for your geographic area.²⁶⁹ (The CDC suggests a regimen to protect against chlamydia, gonorrhea, trichomonas, and BV, as well as the hepatitis B virus.) If prophylaxis is declined at the time of the initial exam, it is medically prudent to obtain cultures and arrange for a follow-up examination and testing (it is recommended that all patients are reexamined—see the section on follow-up activities). Document patients' decisions and rationales for declining prophylaxis in their medical records.²⁷⁰

If patients' clinical presentation suggests a preexisting ascending STI, such as fever, abdominal or pelvic pain, and/or vaginal discharge, they should be evaluated and treated for the ascending infection. This treatment should be based on specific treatment options for sexually transmitted infections in the local community.

Hepatitis B virus (HBV) and postexposure prophylaxis (PEP). See CDC recommendations related to HBV diagnosis, treatment, prevention, postexposure immunizations, prevaccination antibody screening, postexposure prophylaxis, and special considerations.²⁷¹ Patients who have completed a full hepatitis B vaccination regimen prior to the assault are protected from HBV infection and do not need further doses. (See the CDC recommended regimen for adolescents and adults.) For those who were not fully vaccinated prior to the assault, the vaccine should be completed as scheduled. Patients unvaccinated prior to the assault or unsure of whether they have been vaccinated should receive active postexposure prophylaxis (e.g., hepatitis B vaccine alone) upon the initial clinical evaluation. Follow-up doses should be given 1 to 2 and 4 to 6 months after the first dose. Unless suspects are known to have acute hepatitis B, HBIG (hepatitis B immune globulin) is not required. (When HBIG is needed, use CDC recommended doses.)

Examiners must stress to patients receiving the HBV vaccine the importance of following up for administration of doses as scheduled for full protection. Advocates should also be educated about the possibility of patients receiving prophylaxis against HBV and encourage those who start the vaccine regimen to follow up for required additional doses.

Obtain informed consent from patients for treatment. (For information on this topic, see A.3. *Informed Consent*.) Patients should be aware of the benefits and toxicity associated with recommended regimens.

Encourage follow-up STI exams, testing, immunizations, counseling, and treatment as directed.²⁷²

Although patients may be reluctant to go for follow-up exams for STIs, such exams are essential because they provide an opportunity to detect new infections acquired during or after the assault, complete hepatitis B immunization, if indicated, and complete counseling and treatment for other STIs. Examinations for STIs for all patients should be repeated according to exam facility policy—the CDC recommends a follow-up appointment within 1 to 2 weeks of the assault. If patients tested negative at the time of the medical forensic exam and chose not to receive prophylaxis, follow-up testing should be conducted.²⁷³ The CDC recommends that in this case the follow-up exam be done within a week to ensure that positive test results are discussed promptly with patients and treatment is offered. The CDC recommends follow-up testing for patients who received treatment only if they report having symptoms consistent with an STI. (However, patients who were treated should be informed of the option of follow-up testing to confirm the presence or lack of infection.) The CDC recommends that testing for syphilis and HIV infection should be repeated 6 weeks, 3 months, and 6 months after the assault if initial test results were negative and if these infections are likely to be present in assailants (see the upcoming section on evaluating risk for exposure to HIV).

²⁶⁸ Sexually Transmitted Diseases Treatment Guidelines, 2010, p. 91.

²⁶⁹ Antibiotic prophylaxes are updated periodically and are usually tailored to specific regions (because, for example, one part of the country may be resistant to a certain antibiotic).

²⁷⁰ Nonphysician examiners providing STI prophylaxis typically must operate within the boundaries of a protocol and have access to medical supervision, consultation, and review.

²⁷¹ Sexually Transmitted Diseases Treatment Guidelines, 2010, p. 91. This section was drawn from this document.

²⁷² This paragraph is drawn from Sexually Transmitted Diseases Treatment Guidelines, 2010, p. 91.

²⁷³ Infectious agents acquired through the assault may not have produced sufficient concentrations of organisms to result in positive test results at the medical forensic exam. (Sexually Transmitted Diseases Treatment Guidelines, 2010, p. 91.)

It is important that follow-up communication with patients (particularly by examiners and advocates) include a reminder to go to follow-up exams and receive STI-related testing, immunizations, and treatment as directed. Advocates and health care personnel may be able to assist patients in making follow-up appointments, obtaining transportation to and from appointments, and determining how to pay for expenses involved with follow-up testing and care. Some jurisdictions may cover follow-up treatment as part of initial care through funds such as crime victims' compensation. In such instances, patients may be more apt to seek follow-up treatment. Advocates may also be able to accompany patients to these follow-up appointments.

Address concerns about HIV infection. Although the risk of human immunodeficiency virus (HIV) infection²⁷⁴ from a sexual assault appears to be low,²⁷⁵ it is typically of grave concern for sexual assault patients.

Provide information and referrals.²⁷⁶ Examiners should talk with patients about their concerns regarding the possibility of contracting HIV.²⁷⁷ Although a definitive statement of benefit cannot be made regarding Post Exposure Prophylaxis (PEP) after sexual assault, the possibility of HIV exposure from the assault should be assessed at the time of the examination. The possible benefit of PEP in preventing HIV infection should also be discussed with the patient if the details of the assault pose an elevated risk for HIV exposure. These particular factors may include: the likelihood that the assailant has HIV, the time elapsed since the event, the exposure characteristics, and local epidemiology of HIV/AIDS. A specialist consultation on PEP regimens is recommended if HIV exposure during the assault was possible and PEP is being considered. The sooner PEP is initiated after exposure, the higher the likelihood it will prevent HIV transmission if exposure occurred. The CDC recommends offering the patient a 3-5 day supply of PEP if the medication is judged to be necessary and the patient decides to utilize the treatment.²⁷⁸

As with other STIs, offer patients information about HIV risks, symptoms and the need for immediate examination if symptoms occur, testing and treatment options, and the need for abstinence or barrier use (condoms) during sexual intercourse until any treatment received is completed. Include local referrals for testing/counseling and comprehensive HIV services in the community and region. This information can help patients make decisions about testing and treatment based on facts rather than fear.²⁷⁹

Discuss testing options. Baseline HIV testing is not typically an exam component. However, if the assault is considered a high risk for HIV exposure, patients should establish their baseline HIV status within 72 hours after the assault and then be tested periodically as directed by health care personnel. However, even if the assault is not considered a high risk for HIV exposure, some patients may still wish to be tested.

HIV testing should be done in settings where counseling can be offered to explain results and implications. When providing testing referrals, let patients know whether testing services are free, anonymous, and/or confidential.²⁸⁰ Confidential and anonymous testing is recommended.

Assess the need to offer HIV postexposure prophylaxis.²⁸¹ In certain circumstances, the likelihood of HIV transmission may be reduced by postexposure therapy for HIV with antiretroviral agents. Postexposure

²⁷⁴ HIV refers to any of a group of retroviruses that infect and destroy helper T-cells of the immune system. AIDS (acquired immunodeficiency syndrome) can be triggered by infection with HIV. (Drawn from Arkansas' *Sexual Assault: A Hospital/Community Protocol for Forensic and Medical Examination*, 2001, p. B2.)

²⁷⁵ Although HIV-antibody seroconversion has been reported among individuals whose only known risk factor was sexual assault or sexual abuse, the risk for acquiring HIV infection through a single episode of sexual assault is likely low. The overall probability of HIV transmission during a single act of intercourse from a suspect known to be HIV-infected depends on many factors. In specific circumstances, the probability of transmission could be high. These factors may include the type of sexual intercourse (oral, vaginal, or anal), presence of oral, vaginal, or anal trauma (including bleeding), site of exposure to ejaculate, viral load in ejaculate, and presence of a STI or genital lesions in assailants or patients. (Sexually Transmitted Diseases Treatment Guidelines, 2010, p. 92.)

²⁷⁶ A useful referral is the CDC's National HIV/AIDS Information Hotline at 800-342-AIDS. For Spanish speakers, call 800-344-SIDA. For Deaf and hearing-impaired persons, call the TTY/TDD Hotline at 800-AIDS-TTY. Also see the Revised Guidelines for HIV Counseling, Testing, and Referral, *Morbidity and Mortality Weekly Report*, CDC, September 22, 2006, 55(RR-14). This document is available through aidsinfo.nih.gov/guidelines/ or by calling the CDC's HIV/AIDS Information Hotline (see below footnote).

²⁷⁷ Some states statutes provide for mandatory HIV testing of suspected sex offenders upon arrest and/or conviction. Patients should be advised of the availability of such testing.

²⁷⁸ This paragraph is drawn from Sexually Transmitted Diseases Treatment Guidelines, 2010, p. 92.

²⁷⁹ L. Ledray, *SANE Development and Operations Guide*, 2000, p. 74.

²⁸⁰ Drawn from the American College of Emergency Physicians' *Evaluation and Management of the Sexually Assaulted or Abused Patient*, 1999, p. 126.

therapy with zidovudine has been associated with a reduced risk for HIV infection and has become the standard of care for health workers who have percutaneous (e.g., needle stick) exposure to HIV, but whether these findings can be extrapolated to other exposure situations, including sexual assault, is unknown.

The use of antiretroviral agents after possible exposure through sexual assault must balance potential benefits of treatment with its possible adverse side effects.²⁸² Health care personnel must evaluate patients' risk of exposure to HIV and consider whether to offer treatment based on their perceived risk. Examiners unfamiliar with known risks associated with exposure or side effects of postexposure therapeutic agents should consult with a specialist in HIV treatment. Numerous factors may influence the decision to offer treatment, such as the time since the exposure occurred; the probability that the assailant is infected with HIV; the likelihood that transmission could occur from the assault; and the prevalence of HIV in the geographic area or institutional setting (e.g., a prison) where the assault occurred.²⁸³

Offer postexposure prophylaxis for HIV to patients at high risk for exposure, particularly when it is known that suspects have HIV/AIDS. If offered, the following information should be discussed with patients:²⁸⁴

- The unknown efficacy of postexposure prophylaxis for HIV in cases of sexual assault.
- The known side effects and toxicity of antiretroviral medications.
- The need for frequent dosing of medication and the follow-up care necessary.
- The importance of compliance with the recommended therapy.
- The necessity for immediate initiation of treatment for maximum effectiveness.
- The estimated costs of the medication and monitoring.²⁸⁵

When given following a sexual assault, postexposure prophylaxis is the same as for occupational exposure to HIV. Refer to CDC recommendations for postexposure antiretroviral therapy²⁸⁶ and consult with an HIV specialist where possible. Careful monitoring and follow-up by a health care provider or agency experienced in HIV issues is required. Patients should be alerted to symptoms of primary HIV infection (e.g., fever, fatigue, sore throat, lymphadenopathy, and rash) and seek care if these symptoms arise.

Seek informed consent of patients to administer treatment. The decision to begin or withhold treatment should be made by patients and health care personnel after patients have been adequately informed of the risks and benefits of treatment options. (For information on this topic, see A.3. *Informed Consent*.)

²⁸¹ The following two paragraphs were drawn from Sexually Transmitted Diseases Treatment Guidelines, p. 70, L. Ledray, *SANE Development and Operations Guide*, 2000, p. 74, and the *California Medical Protocol for Examination of Sexual Assault and Child Sexual Abuse Victims*, 2001, pp. 93-4. See also Antiretroviral Postexposure Prophylaxis After Sexual, Injection Drug Use, or Other Non Occupational Exposure to HIV in the United States, *Morbidity and Mortality Weekly Report* 2005, 54 (RR-2).

²⁸² A table listing primary side effects associated with specific antiretroviral agents is provided in the CDC's Updated U.S. Public Health Service Guidelines for the Management of Occupational Exposures to HBV, HCV, and HIV and Recommendations for Postexposure Prophylaxis, *Morbidity and Mortality Weekly Report* 2001, 50 (RR-11), p. 13. Some examples of known shorter term adverse symptoms of antiretroviral medications include nausea, vomiting, diarrhea, and other gastrointestinal effects. Protease inhibitors may cause lipid abnormalities, diabetes mellitus, and hyperglycemia and lead to diabetic ketoacidosis in previously diagnosed diabetics. Combination therapy has led to some serious side effects, including hepatitis, nephrolithiasis, and pancytopenia. (The American College of Emergency Physicians' *Evaluation and Management of the Sexually Assaulted or Sexually Abused Patient*, 1999, p. 125.)

²⁸³ Paragraph drawn from the American College of Emergency Physicians' *Evaluation and Management of the Sexually Assaulted or Abused Patient*, 1999, p. 125.

²⁸⁴ Bullets drawn from the *California Medical Protocol for Examination of Sexual Assault and Child Sexual Abuse Victims*, 2001, p. 93.

²⁸⁵ Patients may be able to obtain reimbursement for some or all related costs through state crime victims' compensation programs. (L. Ledray, *SANE Development and Operation Guide*, 2000, p. 74.)

²⁸⁶ See aidsinfo.nih.gov/guidelines/ for the CDC's Guidelines for the following documents: *Use of Antiretroviral Agents in HIV-1-Infected Adults and Adolescents* (July 14, 2003); the Updated U.S. Public Health Service Guidelines for the Management of Occupational Exposures to HBV, HCV, and HIV and Recommendations for Postexposure Prophylaxis, *Morbidity and Mortality Weekly Report* 2001, 50(RR-11), and Management of Possible Sexual, Injecting-Drug-Use, or Other Nonoccupational Exposure to HIV, Including Considerations Related to Antiretroviral Therapy, Public Health Statement, *Morbidity and Mortality Weekly Report* 1998; 47(RR-17).

9. Pregnancy Risk Evaluation and Care

Recommendations at a glance to evaluate and treat pregnancy:

- Discuss the probability of pregnancy with patients with reproductive capability.
- Administer a pregnancy test for all patients with reproductive capability (with their consent).
- Discuss treatment options with patients in their preferred language.
- A victim of sexual assault should be offered prophylaxis for pregnancy, subject to informed consent and consistent with current treatment guidelines. Conscience statutes will continue to protect health care providers who have moral or religious objections to providing certain forms of contraception. In a case in which a provider refuses to offer certain forms of contraception for moral or religious reasons, victims of sexual assault must receive information on how to access these services in a timely fashion.

Becoming pregnant from a sexual assault is a significant concern of sexual assault patients, and patients of different ages, social, cultural, and religious/spiritual backgrounds may have varying feelings regarding acceptable treatment options. Most programs offer pregnancy prevention or interception for sexual assault patients if they are seen within 120 hours of the assault. Examiners and other involved health care personnel must be careful not to influence patients' choices of treatment.

Discuss the probability of pregnancy with patients with reproductive capability. The risk of pregnancy from sexual assault is estimated to be 2 to 5 percent, similar to the risk of pregnancy from a one-time sexual encounter. The 2005 National Crime Victimization Study²⁸⁷ reported 64,080 female victims of rape; therefore, statistically speaking, up to 3,204 pregnancies could have resulted from the rapes. Any female of reproductive capability (Tanner Stage 3 and above, irrespective of menarche) can potentially become pregnant from any single exposure. Determination of the probability of conception also depends upon other variables, for example, the use of contraceptives, regularity of the menstrual cycle, fertility of the victim and the perpetrator, time in the cycle of exposure, and whether the perpetrator ejaculated intravaginally. Pregnancy resulting from sexual assault often is a cause of great concern and significant additional trauma to the victim, so victims' fears should be taken seriously.²⁸⁸ Although many transgender male individuals believe they are infertile as a result of using testosterone, cases have been reported of unexpected pregnancies. Therefore, if a transgender male individual has not had a hysterectomy, is still within childbearing years, and the nature of the assault suggests it, the possibility of pregnancy should be discussed, even if he has not been menstruating.

Administer a pregnancy test for all patients with reproductive capability (with their consent).²⁸⁹ An exception is if a patient clearly is pregnant. If a patient is pregnant, the pregnancy may affect what medications can be administered or prescribed in the course of or after the exam. Follow policies of the medical facility for pregnancy testing. Sensitive beta-HCG pregnancy tests can be utilized. Most commercially available urine pregnancy tests are sensitive to about 50 milli-international units/ml and will detect pregnancy 8 to 9 days after conception, before a menstrual period is missed. Blood pregnancy tests will detect HCG at very low levels. If the pregnancy test is positive, emergency contraception is contraindicated and decisions about other medications (e.g., STI prophylaxis) must be made in consideration of the pregnancy. If the test is negative and the patient has had unprotected intercourse within the last 10 days and would continue that pregnancy if conception has occurred, then she may be considered to be pregnant and emergency contraception would not be administered.

Discuss treatment options with patients in their preferred language, including emergency contraception.²⁹⁰ In cases of sexual assault, pregnancy is often an overwhelming and genuine fear. Therefore, discuss treatment options with patients, including emergency contraception. An immediate option

²⁸⁷ Bureau of Justice Statistics Bulletin, 9/2005 NCJ 214644.

²⁸⁸ L. Ledray, *SANE Development and Operation Guide*, 2000, p. 75.

²⁸⁹ Preexisting pregnancy may raise patient privacy issues. If the case is prosecuted, the prosecutor should work to address concerns such as this one.

²⁹⁰ The National Sexual Violence Resource Center (877-739-3895 or 717-909-0710) offers more detailed information about sexual assault and pregnancy on their Web site at <http://www.nsvrc.org/>.

is to offer hormone therapy (emergency contraception pills or EC).²⁹¹ Another option is to forgo immediate treatment and have the patient follow-up with their primary care provider. Discuss options with the patient and information regarding the timeframe for emergency contraception provision, so she can make an informed decision. Inform the patient that the provision of any emergency contraception will not prevent sexually transmitted infections. The conversation with the patient should include a thorough discussion, including mechanism of action for each treatment option, side effects, dosing, and follow-up. This information should also be provided in writing in the preferred language of the patient, if possible.

A victim of sexual assault should be offered prophylaxis for pregnancy, subject to informed consent and consistent with current treatment guidelines. Conscience statutes will continue to protect health care providers who have moral or religious objections to providing certain forms of contraception. In a case in which a provider refuses to offer certain forms of contraception for moral or religious reasons, victims of sexual assault must receive information on how to access these services in a timely fashion.

Offer/provide the patient with emergency contraception pills and anti-nausea medication if they are at risk, according to facility policy.²⁹² Emergency contraception is a hormonal method of preventing pregnancy that can be used after sexual assault. There are multiple products available for EC. It is recommended, however, that levonorgestrel,²⁹³ a synthetic hormone,²⁹⁴ be used.²⁹⁵ This option is recommended for its higher efficacy rate and ease of dosing, and the fewest number of side effects, particularly nausea and vomiting.²⁹⁶ Levonorgestrel will not end a pregnancy that is already in progress and is considered a safe and easy treatment for victims of assault in preventing a pregnancy. Levonorgestrel is *most* effective if used within 120 hours and can reduce the risk of pregnancy by up to 89 percent.²⁹⁷ Traditional dosing of levonorgestrel includes administering two doses of 0.75 mg taken orally 12 hours apart. However, some studies indicate that single dosing with 1.5 mgs of levonorgestrel are just as effective and better tolerated by the patient.²⁹⁸

Follow-up Care: The patient should be informed that following the use of EC, there may be a heavier or lighter menses than usual and the menses onset may not occur at the expected time. If no bleeding has occurred within three weeks, the patient should be reevaluated and a repeat pregnancy test performed. The patient must be advised not to have unprotected intercourse until after the menses has occurred, or the repeat pregnancy test is negative.

If the facility chooses not to provide EC on site, the patient should be given prescriptions for EC and anti-nausea medications, with a list of pharmacies that stock the medication.²⁹⁹

If the facility is not willing to provide EC or write the needed prescriptions, it is recommended that the patient be given local referrals to medical facilities that can *immediately* assist with alternative treatment.

If no referral is available, provide the patient with the following phone numbers: 1-888-not2late or the online reference: <http://not-2-late.com>.³⁰⁰

²⁹¹ Copper Bearing Intra-Uterine Devices (IUDs) may also be an option, however, they are much less recommended because of the risk of infection in certain cases, the potentially painful insertion procedure, and the need for follow-up care.

²⁹² CA Protocol

²⁹³ Task Force on Postovulatory Methods of Fertility Regulation. Randomized controlled trial of levonorgestrel versus the Yuzpe regimen of combined oral contraceptives for emergency contraception. *Lancet*. 1998;352:428-433.

²⁹⁴ FDA website: <http://www.fda.gov/cder/drug/infopage/planB/planBQandA.htm>.

²⁹⁵ Relative contraindications for birth control, caution must be exercised when providing any EC with estrogen. Plan B does not contain estrogen, but contraindications should still be noted. The only absolute contraindication for the use of Plan B is preexisting pregnancy.

²⁹⁶ H.B. Croxatto, L. Devoto, M. Durand, E. Ezcurra, F. Larrea, C. Nagle, et al. Mechanism of Action of Hormonal Preparations Used for Emergency Contraception; a Review of the Literature. *Contraception*. 2001; 63:111-121

²⁹⁷ <http://www.planbonestep.com/plan-b-prescribers/index.aspx>

²⁹⁸ Alternative dosing for Plan B includes administering the tablets together in a one time dose. A study done by WHO found that the effectiveness of administering single doses of levonorgestrel was as effective as administering the doses 12 hours apart. Helena von Hertzen, Gilda Piaggio, Juhong Ding et al. Low dose mifepristone and two regimens of levonorgestrel for emergency contraception: a WHO multicentre randomized trial. *The Lancet*: December 7, 2002; Vol 360 (9348):1803-10.

10. Discharge and Follow-up

Recommendations at a glance to facilitate discharge planning and follow-up with patients:

- Address issues related to medical discharge and follow-up care.
- Advocates, law enforcement representatives, and other involved responders can coordinate with health care providers to discuss a range of other issues with patients prior to discharge.

Health care personnel have important tasks to accomplish prior to discharging patients, as do advocates and law enforcement representatives (if involved). These responders should coordinate their activities as much as possible to reduce repetition and avoid further overwhelming patients.

Address issues related to medical discharge and follow-up care. Health care personnel (preferably examiners) should address the following issues with patients prior to discharge:

Make sure patients' medical and mental health needs related to the assault have been addressed. Discuss with patients whether they have any other medical and/or mental health concerns related to the assault.³⁰¹ If injuries or trauma have not been treated yet, examiners should refer patients to exam facility clinicians (e.g., hospital emergency department staff) for care or provide the appropriate community referrals prior to discharge.

Provide patients with oral and written medical discharge instructions. Include a summary of the exam (e.g., evidence collected, tests conducted, medication prescribed or provided, information provided, and treatment received), medication doses to be taken, follow-up appointments needed or scheduled, and referrals. The discharge form could also include contact information and hours of operation for local advocacy programs.

Arrange follow-up appointments for patients. Follow-up may be indicated to document developing or healing injuries (for example, bruising) and complete resolution of healing. Forensic follow-up may also be indicated to further evaluate nonspecific findings (such as redness, swelling, or cervical abnormalities) that may be related to acute trauma or may be normal variants. (A jurisdictional policy describing the indications and procedures for follow-up for documentation purposes should be in place.) Appointments may also be needed to address ongoing medical concerns. If appointments are not scheduled, at least indicate to patients which appointments are needed and if sites are different than the initial exam. Make it clear that patients do not have to disclose the assault to receive follow-up medical care. Follow-up appointments may include:³⁰²

- For patients with evidence of acute trauma: A short-term follow-up appointment to reexamine and document the development of visible findings and photograph areas of injury; and an exam 2 to 4 weeks later to document resolution of findings or healing of injuries.
- For all patients: Repeat exams for STIs according to facility policy (see *C.8. STI Evaluation and Care*).
- Primary health care providers or other nonacute care providers can provide longer term care as needed (e.g., for HIV testing, STI testing, and administering doses of Hepatitis B vaccine).

Discuss follow-up medical contact procedures. Discuss with patients whether they would like health care providers to provide a follow-up call and, if so, the best method and time for this contact (maintaining patients' privacy and safety). The main purposes of such a call are to check on medical status and remind patients about the necessity of follow-up testing and care. An optimal time for a first medical follow-up contact is 24 to 48 hours following discharge. Personnel following up with patients should be familiar with the case, confidentiality issues, and potential medical needs.³⁰³

³⁰¹ Care should be taken to ensure that mental health professionals can appropriately and respectfully handle patients from minority and/or stigmatized groups such as specific cultural groups or transgender individuals.

³⁰² Bullets drawn partially from the *California Medical Protocol for Examination of Sexual Assault and Child Sexual Abuse Victims*, 2001, p. 98.

³⁰³ When appropriate, advocates may assist health care personnel in encouraging patients to seek the follow-up medical care they need. They also may encourage patients to discuss with health care providers their concerns about initial and follow-up medical care.

Advocates, law enforcement representatives, and other involved responders can coordinate with health care providers to discuss a range of other issues with patients prior to discharge. Involved responders should come to agreement about who is responsible for each step below and where coordination is necessary. For example, while advocates usually explain advocacy services and law enforcement representatives explain the investigative process, each responder may have a role in helping patients plan for their safety and well-being. If health care personnel are the only responders involved, however, they may need to provide patients with much of the information below.

After the exam is finished, address patients' physical comfort needs. (For a discussion of this topic, see A.2. *Victim-Centered Care*.)

Help patients plan for their safety and well-being. Jurisdictional and exam site policies should be in place to facilitate this process. Assist patients in developing a postexam plan that addresses their physical safety and emotional well-being. Screen for domestic and dating violence and others forms of abuse. Assist patients in considering things such as:

- Where are they going after being discharged? With whom? Will these individuals provide them with adequate support? Is there anyone else they would like to contact? (Provide information about available community resources for obtaining support and help in making the contact if needed.)
- Will their living arrangements expose them to the threat of continued violence or harassment? Is there a need for emergency shelter or alternative housing options? (Provide options and help obtain if needed.)
- Are they eligible for protection orders? (Provide information and help obtain if desired.)
- Is there a need for enhanced security measures? (Discuss options and help obtain if desired.)
- If they feel unsafe, what will they do to get help? (Discuss options and help them develop a plan.)

Planning must take into account the needs and concerns of specific populations. For example, if patients with physical disabilities require shelter, the shelter must be accessible and staff able to meet their needs for personal assistance with activities of daily living.³⁰⁴ If patients living in institutional settings have been assaulted by another resident, a staff person, or person who has easy access to residents, the institution should offer alternative living arrangements and reduce the likelihood that patients have to come into contact with the assailant again. It should also ensure them access to services designed to promote their recovery.

Explain follow-up contact procedures of all responders involved. Coordinate follow-up contact of involved agencies as much as possible, keeping the number of responders contacting patients to a minimum. Explain if contact procedures are different for patients with limited English proficiency or specific communities or institutions (e.g., schools, military bases, prisons, or residential programs may have their own procedures). Consider offering patients prepaid phone cards they can use to call a contact person with concerns or questions.

Explain advocacy and counseling services. Sexual assault advocacy programs typically offer a host of services for victims and their significant others, in addition to those provided during the exam process. (For more information on services, see A.2. *Victim-Centered Care*.) Advocates can describe and offer patients, their family members, and friends these services, as well as explain options for counseling in the jurisdiction and offer referrals. Some advocacy programs provide professional mental health counseling, but many refer patients to community or private agencies. Before being discharged, advocates should ask patients if they can follow up with them. If they agree, they can determine optimal methods and times for the contacts. During follow-up contacts, advocates can help patients reassess their safety; offer support and crisis counseling; answer their questions and provide additional referrals and information; and help coordinate other advocacy services and counseling based upon identified needs.

Explain the investigative process. If law enforcement is involved, inform patients that investigators will request an interview with them, if not already done, explain the criminal justice process and victims' rights, reassess their safety and provide assistance as warranted, and then recontact them as needed as their case

³⁰⁴ Drawn from M. Nosek and C. Howland, *Abuse and Women with Disabilities*, 1998, p. 3.

progresses.³⁰⁵ Explain if contact procedures are different for patients with limited English proficiency or for specific communities or institutions. Patients should receive contact information of involved law enforcement representatives and agencies and a case report number. They should feel free to call their investigator with any new relevant information, if new signs of injuries appear, about suspects' compliance with protection orders or bond conditions, if suspects try to contact them, or with other related questions or concerns. They should be aware that they will be contacted by the prosecution office if their case goes forward. (Patients should be aware that it is their decision whether to report their case and talk with law enforcement officials and prosecutors.)

If evidence has been gathered and law enforcement is involved, the law enforcement representative can discuss with patients the possibility of a match being found through DNA analysis or of other victims of the same assailant being identified. Ask patients if they want to be contacted by law enforcement in these situations and, if so, determine the best contact method.

For patients who have not made a report and when law enforcement is not involved, patients should be given information on who to contact and how if they decide that they do want to make a report. They should also be given information on where the kit will be stored and how it will be tracked (for example if there is a tracking number, it should be provided).

Provide information. Offer patients clear and concise information, both orally and in writing.³⁰⁶ Information should be tailored to patients' communication skill level/modality and language. (For more information on the types of information that patients might find useful, see *A.2. Victim-Centered Care*.)

³⁰⁵ Some patients may want information, either during the exam process or after, about the amount of time it takes to process cases in the criminal justice system. It can be helpful for them to know the range of time it typically takes in that jurisdiction for evidence to be analyzed and for cases to be forwarded to prosecution or tried in court. This information may help them prepare for their justice system involvement. At the same time, they must understand that every case is different and typical time estimates from the past may not apply.

³⁰⁶ Many local sexual assault advocacy programs and state coalitions of sexual assault programs offer publications that speak to victims' concerns in the aftermath of an assault. However, any involved agency, SART, or coordinating council could develop such literature.

11. Examiner Court Appearances

Recommendations at a glance for jurisdictions to maximize the usefulness of examiner testimony:

- Encourage broad education for examiners on testifying in court.
- Promote prompt notification of examiners if there is a need for them to testify in court.
- Encourage pretrial preparation of examiners.
- Encourage examiners to seek feedback on their testimony to improve effectiveness of future court appearances.

It should be expected that examiners will be called on to testify in court as either fact and/or expert witnesses,³⁰⁷ even though in some cases, a plea bargain may be agreed upon, or the prosecuting attorney may decide not to try the case. Examiners should always conduct and document each examination knowing that legal testimony may ultimately be required.

Encourage broad education for examiners on testifying in court:³⁰⁸

- Provide them with information about courtroom proceeding basics (e.g., criminal justice process and terms, who typically is present,³⁰⁹ and prosecution and defense strategies).
- Educate them about different types of testimony (including what can and cannot be said during testimony). This information should assist examiners in explaining to patients during the exam their potential role as a witness should the case be prosecuted.
- Help them understand that testifying in court can be a difficult experience. In almost every case that is litigated, cross-examination after initial testimony will occur. Cross-examination is a part of our constitutional framework, but as defense counsel represent alleged offenders, their questions may be perceived by examiners as intimidating and hostile. It is critical that examiners are prepared to effectively handle such situations and have a support system in place to help them prepare for and deal with related stress they may experience.
- Provide them with pretrial preparation (see the section below on this topic).

Involve trainers from health care, prosecution, and the judiciary in trainings on court testimony. Also, include defense attorneys who can educate examiners on defense perspectives. In addition to attending trainings, examiners should stay abreast of cutting-edge practices and related case law (e.g., rulings that impact the scope of issues they can testify on in court).³¹⁰

³⁰⁷ An expert witness is person who has training, education, and experience on a particular subject and who is formally found to be qualified as an expert by a judge. Expert witnesses may give opinions in court on matters in which their expertise is relevant. Nonexpert witnesses normally cannot give opinions in response to questions in court, but can only testify to the facts (what has been observed, collected, or heard). (Drawn from San Diego County's *SART Standards of Practice*, 2001, p. 40.)

³⁰⁸ This section is partially adapted from the International Association of Forensic Nurses, *SANE Education Guidelines*, 1999. One useful resource for SANEs and attorneys who utilize SANEs for testimony is L. Ledray and L. Barry, Sexual Assault Clinical Issues: SANE Expert and Factual Testimony, *Journal of Emergency Nursing*, 24(3), June 1998, pp. 284–287.

³⁰⁹ The following may be present in the courtroom: the judge, prosecutor, defense attorney, jury, bailiff, clerk, court reporter, law enforcement investigator, victim, defendant, and victim advocate.

³¹⁰ This section focuses on preparing examiners for court testimony. Beyond preparing examiners, it is critical to encourage training for attorneys who try these cases on how to properly interpret and use the medical forensic examination. In addition, they need an accurate understanding about the education and clinical preparation, roles, and responsibilities of the forensic examiner. Like examiners, they can benefit from participating in mock trials and need ongoing education to stay abreast of the latest best practices and related case law. Prosecutors should be aware of and share related case law and protocol guides with judges as references to qualify examiners as expert witnesses. They can also share questions they plan to ask to establish credentials of these witnesses. Additionally, prosecutors must understand how to educate the jury about evidence that will be presented (e.g., a lack of physical injury does not equal lack of sexual assault). Similarly, it is important to encourage judicial education on issues related to examiner testimony. Judges may not understand all that occurs during the exam process or the full extent of examiner expertise. *Understanding Sexual Violence: Prosecuting Adult Rape and Sexual Assault Cases, Video Library I: Presenting Medical Evidence in an Adult Rape Trial*, 2002, is a useful resource for prosecutors and judges (for more information, see <http://www.legalmomentum.org/our-work/njep/njep-sexual-assault.html>). The National Judicial Education Program (NJEPP) offers this resource. It also offers a judicial curriculum on sexual assault trials.

Promote prompt notification of examiners if there is a need for them to testify in court. Examiners should be informed well in advance of a trial if they are being called as witnesses. It may be helpful for attorneys calling them (both prosecutors and defense attorneys) to first develop relationships with coordinators of examiner programs, if they exist, or staff that oversee examiners at the exam site. In some facilities, they may need to reach out to risk management departments, which oversee all potential areas of liability for the facility. The first time an attorney contacts the witness should not be through a subpoena. Unexpected subpoenas can cause examiners a great deal of anxiety.³¹¹

Attorneys should regard examiners they call as witnesses with respect for the knowledge and expertise examiners offer to the court. They also should work to minimize the amount of time examiners wait to testify, allowing them to return to their work as quickly as possible. Judges also should be aware of the need to give examiners priority in the scheduling of testimony.

Encourage pretrial preparation of examiners.³¹² Examiners should be prepared for both direct examination and cross examination. When preparing to testify, the following suggestions may be useful to examiners:

- Although the criminal justice record includes the medical forensic report, photographs, and the results of evidence analysis, medical records are confidential in most jurisdictions. Before examiners or other involved health care providers can talk with an attorney about information in patients' medical records, those records must be successfully subpoenaed. Health care facilities and/or independent examiner programs typically have procedures in place for handling subpoenas.³¹³
- It is critical that examiners meet in advance with the attorney(s) calling them as witnesses, in order to prepare for testimony in individual cases. Not only should they review and discuss the initial examination of the patient, but also any subsequent contacts between the patient and the examiner.
- Prior to testifying, examiners should review records of the exam and keep a log of materials reviewed.
- Expert witnesses should be prepared to educate the court, particularly jurors. They should consider terminology and descriptions that will most clearly advise lay persons in the courtroom.
- Examiners should keep in mind that anything they write about the case is potentially discoverable.
- Examiners should be prepared to prove qualifications and ready to discuss educational background, clinical experience, and prior experience as expert witnesses. They may also need to explain qualifications if they are testifying to facts in a case. They should keep a portfolio that lists education, experience, and previous appearances as a witness.³¹⁴
- Examiners should understand that they may not testify as to whether patients consented to sexual contact; that is for the jury to decide. However, some jurisdictions allow expert testimony that speaks to the consistency between patients' statements and injuries rather than attempting to draw conclusions about how injuries were caused or whether a sexual assault occurred.³¹⁵

During testimony, examiners should consider the following:

- The role of the examiner in court is to educate judges and juries.
- Business attire is appropriate for court appearances. Limit excessive jewelry and other accessories which can be distracting.
- Be sincere, polite, and appear in control. Being nervous is normal, even for examiners who have testified previously. Make eye contact with those doing the questioning as well as with the jury.
- Listen to the questions carefully. Allow time to compose answers before speaking. Be concise and correct in responses. Avoid terms such as "I believe" or "I think."

³¹¹ This paragraph was drawn from the video reference guide for *Understanding Sexual Violence: Prosecuting Adult Rape and Sexual Assault Cases, Video Library I: Presenting Medical Evidence in an Adult Rape Trial*, 2002, pp. 17–18.

³¹² Section partially adapted from Arkansas's *Sexual Assault: A Hospital/Community Protocol for Forensic and Medical Examination*, 2001, pp. L1–3.

³¹³ This bullet was drawn from the video reference guide for *Understanding Sexual Violence: Prosecuting Adult Rape and Sexual Assault Cases, Video Library I: Presenting Medical Evidence in an Adult Rape Trial*, 2002, pp. 17–18.

³¹⁴ See L. Ledray and L. Barry, Sexual Assault Clinical Issues: SANE Expert and Factual Testimony, *Journal of Emergency Nursing*, 24(3), June 1998, pp. 284–87, for more discussion on qualifying as an expert witness.

³¹⁵ This bullet was drawn from the video reference guide for *Understanding Sexual Violence: Prosecuting Adult Rape and Sexual Assault Cases, Video Library I: Presenting Medical Evidence in an Adult Rape Trial*, 2002, pp. 19–20.

- Avoid medical jargon to the extent possible. If it is needed, define its usage.
- Answer only questions that are asked. Ask the questioning attorney for clarification or to restate the question if needed.
- If the answer to a question is not known, say so. There is no reason for examiners to explain why they do not know the answer. They can ask to refer to records if their memories need refreshing.
- Let the attorney guide the questioning. Answer only questions that are asked. Ask the questioning attorney for clarification or to restate the question if needed. Do not elaborate unless the attorney or judge asks for more information.
- If it is realized that an error or omission occurred in testimony, acknowledge it politely.

Although it is most likely that examiners will be called by the prosecution, they may also be called by the defense. In either case, examiners are expected to give objective testimony. In addition to the previous tips, examiners should consider the following:

- Seek guidance from the prosecutor regarding appropriate interaction with the defense attorney prior to testimony.
- When disagreeing with the questioning attorney, do so without argument or interruption.
- Be aware of the phrasing of questions by the cross-examining attorney that may be designed to place doubt on examiner testimony. For instance, if a compound question is asked, the answer to one part may be “yes” and to the other part may be “no.” Be sure to divide answers as appropriate.
- If the questions of the cross-examining attorney include incorrect interpretation of previous examiner testimony or documentation, the erroneous information should be corrected.
- Be careful to provide consistent answers, especially if cross-examining attorneys ask the same question several times, using different wording.

Encourage examiners to seek feedback on their courtroom testimony to improve the effectiveness of future court appearances. For example, after the legal proceedings have been completed, examiners may wish to meet with prosecutors for feedback and evaluation of their testimony. Examiners might also want to observe other experts testify in these cases.

Appendix A. Developing Customized Protocols: Considerations for Jurisdictions

Jurisdictions starting from scratch in developing their own exam protocols are encouraged to consider the recommendations in this national protocol in their entirety and tailor them to fit local needs, challenges, statutes, and policies. Jurisdictions that have existing protocols can consider whether any of the protocol recommendations or the tasks below could serve to improve their immediate response to sexual assault or address gaps in services or interventions.

Form a protocol planning team. At the least, this team should include those responders involved in the exam process, including health care personnel, exam facility administrators, law enforcement representatives, victim advocates, prosecutors, and forensic laboratory personnel. Organizations serving specific populations in the community should also be involved at some level to make sure the protocol speaks to the needs of victims of diverse backgrounds. Team participants should have authority to make policy decisions on behalf of their agencies. Bringing together such a team can be challenging, particularly in jurisdictions with multiple sexual assault victim advocacy programs, exam facilities, law enforcement agencies, prosecution offices, and court systems (or where several levels of government may be involved in investigation and prosecution of sexual assault cases). Although representation from all involved disciplines and agencies is encouraged, at some point the team assembled will have to move ahead with planning efforts. Try to keep those absent informed of team activities and offer them opportunities to provide feedback on protocol development and revision.

Assess needs.³¹⁶ Before initiating policy changes, it is important that the planning team assess the jurisdiction's current response to sexual assault, with a focus on the exam process. Some activities that may help:

- Compare statistics on sexual assault within the community as captured by represented agencies.
- Identify community demographics, including the various populations that make up the area.
- Review existing feedback from victims about their experiences and satisfaction with immediate response.
- Seek input from professionals involved in the exam process on current gaps, problems, and challenges.
- Evaluate the adequacy of policies pertaining to each aspect of immediate response.
- Review systemic breakdowns that have occurred in immediate response.
- Evaluate the capacity of each discipline to support a coordinated immediate response.
- Evaluate the effectiveness of response to victims from diverse backgrounds or in certain types of cases.
- Evaluate the adequacy of related trainings and resource materials.
- Identify related jurisdictional statutes and evaluate their adequacy in supporting effective response.

Devise an action plan. The protocol planning team can take what it learns through needs assessments and translate it into an action plan for improving the exam process and creating a protocol. The plan should clearly identify what needs to happen, who is responsible for coordinating or carrying out each action, possible resources,³¹⁷ desired outcomes, and how the effectiveness of the action will be evaluated. The plan can be revisited periodically to assess progress and evaluate outcomes.

³¹⁶ Section drawn from K. Littel, M. Malefyt, and A. Walker, *Promising Practices: Improving the Criminal Justice System's Response to Violence Against Women*, 1998, pp. 240 and 246, and American College of Emergency Physicians, *Evaluation and Management of the Sexually Assaulted or Sexually Abused Patient*, 1999, p. 21.

³¹⁷ Funding under the STOP Violence Against Women Formula Grant Program and the STOP Violence Against Indian Women Discretionary Grant Program may be used to cover costs related to protocol development and implementation. For more information, see <http://www.ovw.usdoj.gov/>.

Create a protocol. To promote an effective protocol development process, consider the following:³¹⁸

- Who should lead efforts to create and implement the protocol?
- What process will be used to facilitate decision making on protocol development or revision?
- What process will be used for facilitating adoption of the protocol by individual agencies or communities?
- How will protocol compliance be monitored and what mechanisms will be put into place to solve problems as they arise?

The planning team should review the national protocol to determine what it wants to cover in its customized protocol and the appropriateness of national recommendations for the jurisdiction. It must consider what jurisdictional statutes and policies need to be discussed and how to address community-specific needs and challenges. Once a draft has been developed, it should be made available to relevant professionals, agencies, survivor groups, and organizations serving specific populations across the jurisdiction. Their feedback should be solicited and then incorporated into the draft to the extent possible. Once a final protocol is created, the team should consider pilot testing and revising it based on feedback from the tests. Then the protocol should be implemented, as per recommendations of team members and others from whom input has been sought.

Distribute the protocol. The planning team should determine the most efficient method to disseminate the protocol to all professionals in the jurisdictions who are involved in the immediate response to sexual assault. The planning team needs an up-to-date contact list of these professionals, and it should agree upon a specific distribution plan (e.g., mailing or handing out hard copies and/or providing access to the protocol via the Internet). If the Internet is used to distribute the document, make sure that professionals who do not have Internet access get a hard copy.

Build the capacity of agencies to implement the protocol.³¹⁹ A protocol's effectiveness depends on individual agencies having adequate resources (e.g., funding, personnel, multilanguage capacity, equipment, supervision, training, professional development opportunities, and community partnerships) to carry out their responsibilities and coordinate efforts with other involved responders. Agencies can assist one another in building individual and collective capacity to respond to sexual assault and participate in coordinated interventions. For example, together they can seek opportunities for technical assistance, training, and grants and share costs, personnel, equipment, expertise, and information. Also, each jurisdiction most likely will encounter a variety of barriers and difficulties in protocol implementation. Overcoming such problems requires a willingness on the part of involved agencies to individually and collaboratively understand the unique needs of victims in their community and to think "outside the box" to identify solutions.

To help with implementation, consider asking responding agencies to supplement the protocol with interagency agreements or memorandums of understanding. Using the protocol as a basis, these agreements can outline roles and articulate how responders should work together to coordinate response. These documents should be jointly developed, agreed upon, and signed by agency policymakers. They can be revised and signed on a periodic basis to ensure all professionals involved in the response are aware of protocol changes and to reaffirm their commitment to carrying out agreements.

Promote training. Agency-specific and multidisciplinary trainings are crucial components of protocol implementation. Involved responders must be informed of any changes in how they carry out agency-specific responsibilities during the exam process and understand why these changes are needed. If they are being asked to coordinate their efforts formally with other agencies, they must understand their role in coordination, the benefits of a collaborative response, the challenges such an effort involves, and ways to overcome challenges.

³¹⁸ Bulleted section drawn from K. Littel, M. Malefyt, and A. Walker, *Promising Practices: Improving the Criminal Justice System's Response to Violence Against Women*, 1998, p. 242.

³¹⁹ Section drawn from K. Littel, M. Malefyt, and A. Walker, *Promising Practices: Improving the Criminal Justice System's Response to Violence Against Women*, 1998, p. 241.

Set up an evaluation system. The planning team should take the time to consider how to best compile data related to the exam process (while maintaining victims' anonymity) and how to use it to evaluate effectiveness of response and make improvements to the protocol as needed.

Revise the protocol periodically. Revisions may be based on feedback from responders and victims, evaluation recommendations, changes in laws, identification of new crime trends and prevention efforts, technology, research, and identification of new promising practices. The planning team should keep track of protocol areas needing improvement and meet periodically to discuss pertinent issues such as language to be used, how to resolve controversies, and, ultimately, to make needed changes.

Appendix B. Creation of Sexual Assault Response and Resource Teams

Create a SART/SARRT to facilitate coordination among involved disciplines.³²⁰ After identifying members and defining roles, members can plan how to operate their team to best serve community needs.

Determine how the SART/SARRT is activated. Activation procedures should take into account that victims enter the “system” at different points (e.g., through a call to 911 or a 24-hour advocacy hotline, arrival at an exam site, or disclosure to a community professional). The SART/SARRT must determine how to publicize its services to community professionals who may have frequent contact with individuals disclosing sexual assaults. These professionals might include, but are not limited to, private physicians, health clinic staff, mental health and social service program staff, personnel serving persons with disabilities, substance abuse treatment program staff, school personnel, personnel from faith-based communities, corrections and probation staff, and staff from residential living programs and emergency shelters. It also should publicize its services more broadly to the public, explain the dynamics of sexual assault, and encourage victims to seek help.

Plan SART/SARRT response to varying circumstances facing victims. The team should consider and plan for modifications to the exam process to address specific needs and concerns of victims. For example, in order to respond to non-English-speaking victims, team members must be able to speak their language or promptly arrange for certified interpretation. For victims thought to have cognitive disabilities, team members must know who to contact for assistance and ensure they receive the same access to services that other victims would obtain. Some victims may request advocates and other responders of a specific gender or from specific cultures. Procedures should be in place to ensure response to minors follows jurisdictional statutes. SART/SARRTs should be prepared to deal with multijurisdictional coordination issues that may arise when assaults occur on military sites or to soldiers in the field, school campuses, tribal lands, prisons, and residential programs. Involving relevant agencies as soon as possible according to agreed-upon procedures may help quickly determine who has jurisdiction over a case and how to best assist each victim.

Meet regularly. Outside of an immediate response, the SART/SARRT should meet regularly³²¹ for two distinct purposes. The first is to review immediate response in individual cases in order to improve overall team performance. These reviews allow team members the opportunity to give each other feedback on effectiveness of response during the exam process, problems needing resolution, and areas needing improvement. Cases are typically reviewed anonymously,³²² without using victims’ names or other identifying information.³²³ During these discussions, it is important that the team respect the confidentiality of information in patients’ medical records and shared with community-based advocates. Secondly, the SART/SARRT can utilize meetings of members to maintain and enhance the quality of the SART/SARRT. This task involves addressing system issues, such as creating and revising policies and procedures in response to local changes in governmental or community-based agencies, scientific or technological advances, and feedback

³²⁰ A more in depth discussion of SART development and maintenance than is provided is beyond the scope of this document. However, resources do exist on this topic. For example, numerous jurisdictions have published guidebooks on organizing a SART and/or protocols for SART response. Some sexual assault coalitions offer information, technical assistance, and training for communities interested in starting SARTs. Since 2001, a national SART training conference has been held biannually (see <http://www.sane-sart.com/> for information). More information, including a SART Toolkit, is available at <http://www.nsvrc.org>.

³²¹ “Regularly” is locally defined. Some teams meet monthly, while others meet every 6 weeks or quarterly. Teams might meet on a regular basis for case review and get together less frequently to discuss more systemic issues.

³²² In California, there is a law to protect discussions of individual cases during SART meetings. These discussions are technically characterized as medical quality-assurance activities.

³²³ Case reviews usually include only those SART members typically involved in immediate response. But, even if all or most SART members were involved in a particular case and were aware of victims’ identity, there is still no reason to reveal victims’ identity during SART case reviews. SARTs may choose not to take notes about cases reviewed to ensure that the case-related information is not shared with anyone outside of the meeting. In situations where victims’ identity might be easily deduced during a case review by members not involved in response (e.g., if there had only been one case handled during the time period being reviewed), comments should be kept as broad as possible and avoid case specifics. In communities where residents tend to know each other and news about crime travels quickly, it may be challenging to not inadvertently reveal victims’ identity during SART case reviews. SARTs in these jurisdictions should consider how to best approach case reviews in a way that reduces the likelihood of revealing victims’ identity.

from victims. It also involves sharing general information related to the SART/SARRT and facilitating the continuing education of the team.

Although it might be difficult to involve all relevant responders in SART/SARRT meetings (e.g., crime labs may be a considerable distance from the community and lack resources to respond to local inquiries), consider options such as teleconferencing to include their perspectives.

Encourage education for SART/SARRT members on coordinated response during the exam process.
For example:

- Discipline-specific training that advances responder skills and emphasizes a team approach is crucial.
- Multidisciplinary training sessions can describe the SART/SARRT process, stress the need for a prompt exam, explain the roles and challenges of each discipline, emphasize a victim-centered approach, and make clear where coordination among disciplines is needed and how it should occur. They can describe multidisciplinary policies, interagency agreements, standardized forms, and other related materials.
- Multidisciplinary training can also build members' understanding of needs, values/beliefs, and practices of specific populations in their community. They can raise awareness of how different populations respond to disclosures of sexual assault and work to build the capacity of involved professionals to be sensitive to the needs of victims from those populations.
- Cross-training sessions are useful to allow responders from one discipline to educate those from another discipline about the specifics of how they intervene in these cases and answer questions that may arise. For example, law enforcement investigators can educate examiners and advocates about what is involved in a thorough investigation, stressing that the forensic exam of the victim is but one part of the investigation. In jurisdictions that border Indian Country, federal prosecutors can educate other responders regarding federal Indian law and how it applies to sexual assault cases.
- Multidisciplinary trainings and cross-trainings can provide a forum for staff from different agencies to get to know and respect one another, build common goals, and increase their comfort in working together. Collaboration among agencies and individuals can provide responders with a broader network of support as they do this work. These trainings can also stress the difficulty of working on sexual assault cases and the secondary trauma that responders can experience. They can facilitate discussion among responders about self-care and preventing or coping with secondary trauma, so they in turn can provide optimal interventions and assistance to victims.
- There are more informal educational opportunities and tools that can foster coordination among SART/SARRT members. For example, all key responders, especially those newly involved in sexual assault cases, may find it useful to tour sites and offices involved in SART/SARRT response. Such tours and discussions with site/office staff can help build knowledge of what response by each discipline entails and the logistics of that response. Sharing related educational materials and literature is an easy way to continuously expand the base of common knowledge among SART/SARRT members. Tools such as flow charts and discipline-specific checklists that help SART/SARRT members understand the continuum of response and appropriately coordinate their interventions may also be useful.

Trainers. In addition to involving representatives from health care, advocacy, law enforcement, prosecution, the judiciary, and crime and toxicology laboratories as SART/SARRT trainers, include defense attorneys to educate participants on defense tactics. Utilize local agencies and leaders that serve specific populations to educate the SART/SARRT on the needs of residents and services they offer relevant to victims of sexual assault.

Outreach to rural, remote, and poor communities. It may be difficult for rural, remote, and poor communities to offer training for SART/SARRT members, due to lack of resources and/or expertise. States, Territories, and tribes may want to consider forming specialized teams that can offer multidisciplinary training consistent with cutting-edge practices across all of their jurisdictions. These teams can work with local responders to ensure that the training sessions they offer address unique community needs and challenges.

Appendix C. Impact of *Crawford v. Washington*, *Davis v. Washington* and *Giles v. California*

Crawford v. Washington and subsequent related court cases are only an issue when a victim is unavailable for cross-examination at trial, which occurs infrequently in sexual assault cases. A prosecutor will rarely be able to prosecute successfully a sexual assault of a competent adult victim without the victim's cooperation because of the difficulty in overcoming the consent defense. The term "competent adult" is used to describe an adult victim who is viewed by the legal system as able to understand and participate in the criminal proceedings, i.e., know the role of all the players. It is important to refer to state laws for definitions or interpretations of what constitutes a competent adult in a given jurisdiction.

In the rare instance in which a sexual assault of a competent adult is prosecuted without the victim's cooperation, examiners' testimony may be objected to as "testimonial" hearsay under *Crawford v. Washington*³²⁴ and *Davis v. Washington*³²⁵ under the theory that the examiner was acting as an arm of law enforcement. In *Crawford*, the Court held that testimonial statements of an unavailable witness could be admitted at trial only when the defendant has had a prior opportunity to cross-examine that witness. Although the *Crawford* holding offers examples of both testimonial and nontestimonial statements, it did not include a specific definition.

In *Davis*, the Court defined statements that are made to government agents for the primary purpose of receiving assistance in an ongoing emergency as nontestimonial. It defined as testimonial statements made under circumstances that objectively indicate there is no ongoing emergency and the primary purpose of the interrogation is to establish or prove past events potentially relevant to a later criminal prosecution. Forensic examiners who perceive their primary role as law enforcement and conduct their practice with law enforcement rather than medical goals risk having their statements excluded as testimonial under *Crawford* and *Davis*. Forensic examiners should be asked about and must be able to articulate a practice philosophy that is patient-centered and medically focused.

In cases in which it is established that the victim's lack of cooperation is the result of a defendant's actions that are designed to cause the unavailability of a victim in order to prevent that victim from testifying in a current or future prosecution, the prosecution may introduce a witness' hearsay statements in a prosecution based on the doctrine of forfeiture by wrongdoing.

For health-care providers, *Crawford* and its progeny do not change the priorities of the medical-forensic examination, which should continue to hold the health and well-being of patients of primary importance. The problem arises when clinicians are perceived to be investigators rather than health-care providers. Even in cases in which a victim is cooperating in the prosecution of the perpetrator, statements made to the examiner for the purpose of medical diagnosis and treatment may still be excluded as hearsay if it is established that the examiner is acting as an arm of law enforcement rather than acting primarily as a medical treatment provider.³²⁶

³²⁴ 541 U.S. 36, 124 S.Ct. 1354, 158 L.Ed.2d 177 (2004).

³²⁵ 126 S. Ct. 2266 (2006).

206 - Retiree Firearms Waiver (4).pdf

BERKELEY POLICE DEPARTMENT

RETIREE CONCEALED CARRY

QUALIFICATION AGREEMENT AND WAIVER OF LIABILITY

I am a retired peace officer of the Berkeley Police Department. I am eligible to attempt to qualify to carry a concealed firearm, pursuant to the Law Enforcement Officers Safety Act of 2004 and/or California Law (18 USC § 926C; Penal Code § 25455).

I understand that the Berkeley Police Department is not legally required to provide a firearms qualification course or provide me with firearms instruction.

I understand that to attempt to qualify to carry a concealed firearm, I may only fire my weapon under the direct supervision of a certified firearms instructor.

I agree to defend, indemnify, and hold harmless the City of Berkeley Police Department and/or its officers, agents and employees, for any injury caused by my participation in this qualification process. I further waive any claim for damages against the City of Berkeley Police Department and its officers, agents and employees, for any injury suffered by me while participating in this qualification process.

I agree to defend, indemnify, and hold harmless the City of Berkeley Police Department and/or its officer, agents and employees, from any and all liability resulting from my carrying and/or use of any weapon allowed under the Law Enforcement Officers Safety Act of 2004 or California Law, including, but not limited to, civil litigation.

Furthermore, I have read, understand, and agree to the following conditions under LEOSA or California Law.

BERKELEY POLICE DEPARTMENT

To the retiree - Choose either LEOSA or CALIFORNIA conditions below. LEOSA conditions require an annual qualification and allow for a nationwide CCW permit. CALIFORNIA conditions require a qualification every 5 years (Per Department Policy) and allow for a CCW permit within California. Please choose Option A or B.

OPTION A:

LEOSA CONDITIONS

I agree to qualify annually with the authorized firearm at a course approved by the Berkeley Police Department at my own expense. _____ (initial)

I understand that I am personally responsible for all acts taken related to carrying a concealed firearm and that these acts were not taken as an employee or former employee of the Berkeley Police Department. _____ (initial)

I understand that I remain subject to all applicable Berkeley Police Department policies and federal, state and local laws. _____ (initial)

I will demonstrate good judgment and character commensurate with carrying a loaded and concealed firearm. _____ (initial)

I understand that the Berkeley Police Department may run a criminal history background check to confirm my good character. _____ (initial)

OPTION B:

CALIFORNIA CCW CONDITIONS (Penal Code § 26305)

I agree to qualify at least every five years with the authorized firearm at a course approved by the Berkeley Police Department at my own expense. _____ (initial)

I understand that I remain subject to all applicable Berkeley Police Department policies and federal, state and local laws. _____ (initial)

I will not engage in conduct that compromises public safety. _____ (initial)

I understand that I am only authorized to carry a concealed firearm inspected and approved by a certified firearms instructor. _____ (initial)

DEPARTMENTAL ORDER

SPECIAL ORDER #2014-001

DATE ISSUED: 6/30/14

SUBJECT: HOUSE CAR ORDINANCE

Effective immediately, officers will utilize the following definition of “habitation” in reference to enforcement of BMC 12.76.010 regarding living in house cars:

Habitation is defined by sleeping inside overnight or daytime occupancy of more than 8 cumulative hours for three consecutive days. Cooking might also be indicia of habitation. Other possible indicia include recently used bedding, amounts of unpacked clothing, and toiletries consistent with lodging, etc.

This order is meant to clarify BMC section 12.76.010 in light of the recent Ninth Circuit Court decision (6-19-2014), and will be in effect until such time as the definition can be added to the BMC, or a General Order is issued to codify the definition.

Chief of Police

cc: All BPD Personnel

Disaster Response Manual 2008 - 2017.pdf

What to do first

What to do?	How to do it?
Determine if the PSB is safe to occupy	Evacuate the PSB if necessary. See Section 1. Evacuate the jail per the Jail Evacuation Plan.
Account for all on duty personnel.	Be sure to account for all prisoners. Account for all personnel in the field if radios are still operating.
Perform damage assessment of the PSB	See Section 2.
Conduct communications checks	See Section 3.
Initiate damage assessments citywide	See Section 4.
Make notifications	Notify the Chief, the DCO and other city personnel as required.

Berkeley Police Departmental Disaster Plan Purpose and Authority

<i>Introduction</i>	<p>This disaster plan outlines a broad police response with attachments showing more detailed information.</p> <p>This plan covers what to do immediately following a disaster. Examples of such disasters include: earthquakes, civil unrest, terrorist incident, fires, storms or other natural phenomenon.</p>
<i>Purpose</i>	<p>This plan exists to support police personnel in their disaster mission: Protection of life, and property, the maintenance of order and the restoration of essential city services.</p>
<i>Authority</i>	<p>It is the policy of the Berkeley Police Department to maintain the capability to plan for and respond to unusual occurrences so as to provide for the safety of the community.</p> <p style="text-align: right;">-General Order U-4</p>
<i>Relationship to Other Plans</i>	<p>This plan is solely for the City of Berkeley Police Department and its personnel. Information about other disaster related issues would not be found here.</p>
<i>Use of the Incident Command System</i>	<p>A cornerstone of this plan is the application of the Incident Command System. ICS, can be used to manage any disaster.</p>
<i>Activation</i>	<p>This plan is designed to be used immediately following the sudden onset of a disaster that impacts this department. Use this plan immediately following an earthquake, large-scale wildland fire or terrorist incident. This plan should not be used to respond to a planned demonstration or civic event.</p>

Berkeley Police Department
Disaster Response Manual
PSB Evacuation Procedures

1. Upon notification of an emergency in the PSB, determine if evacuation is warranted. Situations requiring a building evacuation would include, fire, building collapse, smoke, unusual odor or attack. In some cases, it may be safer to stay inside and shelter in place. Situations requiring a shelter in place include a hazardous materials incident outside the PSB, an active protest or attack
2. If an evacuation is warranted, follow these procedures:
3. **Make notifications** to your supervisor
4. **Notify the Communications Center** that an evacuation is under way.
5. **Sound the alarm** by:
 - a. Activating a local fire alarm pull station.
 - b. Word of mouth
 - c. Building overhead intercom

6. **Evacuate** out of the PSB through the nearest and safest exit. Do not use the elevator.
7. **Assemble** at Civic Center Park (Southeast Center Street and MLK)

Employees may be re-directed to an alternative gathering point as conditions dictate.

8. Anyone unaccounted for should be reported to a uniformed Police or Fire supervisor.
 - a. **All supervisors** should account for all of their employees. If possible, the daily attendance sheet should be taken so an accurate roll call may be done. In the absence of the supervisor, his or her designee should handle these tasks.
 - b. **Jail** should evacuate according to the Jail evacuation plan.
 - c. **Comm Center** staff should announce over both police and fire primary dispatch channels that the Comm Center is down. The 911-phone call transfer switch should be activated. This switch will transfer incoming phone calls to ALCO (Alameda County PSAP). Comm Center staff should take portable radios with them to facilitate dispatching duties at a later point. As soon as practical, the Comm Center supervisor or designee should notify ALCO (510-667-7777) that the Berkeley PSAP is closed and that ALCO is now the Berkeley PSAP. See Comm Center plan for details.

Berkeley Police Department
Disaster Response Manual

PSB Damage Assessment Procedures

These procedures are to be followed in the event of an earthquake, explosion or other incident, which may damage the PSB.

1. Evacuate the PSB, if needed. Ensure the safety of all employees.
2. Extinguish any fires. Notify the Fire Department.
3. Mark damaged or hazardous areas to warn others.
4. In the event of a large-scale disaster, it will be necessary to assess the PSB to locate and identify any hazards. A Police or Fire supervisor should appoint a team of no less than two (2) fire firefighters or police officers to walk around the PSB where safe and "size up the building. The Department of Public Works, Facilities Division should be contacted, if possible, to assist in this walk-through. Areas to note include:
 - a. Loss of electrical power
 - b. Broken plaster and windows
 - c. Cracks in walls or the ceilings.
 - d. Collapse
 - e. Liquefaction
 - f. Hazardous conditions (fires, electrical arcing, etc)
 - g. Damage to interior objects.
 - h. Functions of doors (ensure they open and close properly)
5. Once this survey is completed, the information should be turned over to the Building and Safety Division of the Planning Department and the Facilities Division of the Public Works Department. If the Facilities Division inspector has not participated in the walk-through noted in # 4 above, the city building inspector should be summoned to review the damage assessment information and evaluate the PSB.

In a disaster, the form to be used to evaluate the PSB will be the ATC-20 Rapid Evaluation Safety Assessment Form.

Berkeley Police Department
Disaster Response Manual
Communications Checks

1. Perform radio function checks of all police repeated radio channels (1, 2 and 4). This may be done by a patrol supervisor. A function check consists of selecting a radio channel, keying a radio mic for 2 seconds and releasing it. One should be able to hear the radio repeater chirp off at the end of the transmission. You may also ask someone else if they are able to hear the mic open and close.
 - If not all of the repeated channels are working (1, 2 or 4), determine which repeated is functioning and consider moving primary dispatching that channel.
 - If none of the repeated channels are working, consider moving everyone to channel 3 until the repeaters are functioning again.
 - Follow normal protocol in obtaining radio repair.
2. Determine if Communication Center telephones , 911 system, FAX, CAD and externals are operational
3. If the PSB is unsafe to occupy or needs to be evacuated, consider moving Comm Center operations to the Mobile Command Van.
4. Determine if cellular/Nextel service is still functioning.
 - If Nextel cellular service is down, consider using the Nextel direct talk function.

Berkeley Police Department
Disaster Response Manual
Field Damage Assessment

1. In the event of a major disaster, rapid damage assessment is essential in determining the extent of the disaster, the need for resources from outside the City, routes for response, and the development of a Declaration of Emergency.
2. After a disaster, field personnel (officers, CSO's, PEO's) should begin to assess their beats, and make note of damage and/or impact of the disaster. Personnel should specifically take note of power outages, damaged or impassable roadways, fires or other impacts that will either require city services or will hamper response. Particular attention should be paid to roadways that are no longer useable.
3. There are also specific locations that will require damage assessment. In this section are lists of specific sites, infrastructure and transportation routes. These areas should be checked by officers, CSO's or PEO's assigned to the appropriate beat.
4. It is important for supervisors to make these assignments and ensure that areas are being checked.
5. Personnel performing damage assessment should observe and note overall conditions of the locations, any hazards present and try to estimate whether or the location can continue to be used/function.
6. Field units should only report this information in after being asked to do so, unless there is a life threatening emergency. This practice will not tie up radio traffic needlessly.

Beat	Location	Time	Status/Note

Berkeley Police Department
Disaster Response Manual
Recall of Off Duty Personnel

1. Determine the need for personnel. Be sure to anticipate needs for the future, not just those that are immediate.
2. Appoint one person, sworn or non-sworn to track and log in every employee who reports for work. This is essential not only for keeping track of our personnel, but also for disaster cost reimbursement.
3. In any emergency or disaster in which the telephone network is still functioning, recall of off duty personnel will be by phone at the direction of the watch commander or other command officer.
4. In the event the phone network is not functioning, the following procedure will apply:
 - a. All on duty personnel will remain on duty until relieved by additional personnel and proper authorization.
 - b. Personnel off duty on a workday will report as soon as possible after taking care of their families.
 - c. Personnel off duty on their day off or who have completed their duty shift for that day will report twelve (12) hours after the disaster strikes.
5. Consider using local media, specifically KCBS-740AM and/or KGO-810AM to disseminate personnel recall messages.
6. Consider utilizing the Berkeley Emergency Notification System (BENS). This automated telephone notification system may be initiated by authorized BPD Command personnel. See T&I # 285 in the annex of this manual for complete procedures.

Updated: 6/22/09

* See Chapter 3 of the Event Management Manual

Berkeley Police Department
Disaster Response Manual
Initiation of 12-Hour Shifts.

In order to set up a 12 on/12 off shift schedule, consider the following:

1. Determine the need for personnel. Be sure to anticipate needs for the future, not just those that are immediate.
2. Estimate the duration of the event. If an event may go longer than 6 hours a 12-hour shift may be indicated.
3. A 12-hour shift may coincide with an "operational period". An operational period is that time scheduled for the completion of a given set of objectives. Operational periods can follow normal time patterns like 0600 hrs and 1800 hrs. (day shift, night shift.)
4. The size of each shift will also depend on the nature of the event. You may wish to consider a larger work force during the daylight hours and a smaller one at night since less work will be done due to darkness.
5. Shift schedules must be updated every 24 hours to keep an accurate count on personnel
6. Time sheets and time cards should be maintained. This will become very important in the reimbursement phase.

Berkeley Police Department
Disaster Response Manual

PSB Disaster Emergency Food Rations

These procedures are to be followed in the event food and water are needed for BPD employees during a disaster or other public safety emergency.

1. Water and Meals Ready to Eat (MRE's) are on the basement level of the PSB, located in room B124, across from the Men's Locker Room. A supervisor's key will open this door.
2. There are enough supplies to last 3 days.
3. These supplies should only be used when commercial food and water are unavailable, such as a major disaster or during a prolonged event where it is not practical to obtain food or water elsewhere.
4. Any command officer may authorize the use of these supplies.
5. Note the date and time of the supplies being used on the clipboard provided.
6. Field units that are mobile can be called into the PSB to obtain their food and water.
7. Fixed posts and operational sites, however, must have supplies delivered, and relief person assigned to those sites.

Disaster Annexes

Disaster Annex Table of Contents

Plan	Use
Citywide mass evacuation	In the event large portions of the city must be evacuated
Tsunami	Upon receipt of a Tsunami Watch or Warning
Homeland Security Advisory System: Law Enforcement Actions	When National Terrorism Threat code increases, this annex makes general recommendations about what to do.
Facilities of Concern citywide	Information only for hazmat or terrorism response.
Homeland Security Advisory System: Law Enforcement Actions	Actions to take when the national terrorism threat level increases; based on color codes (i.e. "yellow" or "red")
T&I 285: Berkeley Emergency Notification System	This training and information bulletin covers the purpose, use and activation of the BENS system. This system can make multiple phone calls to selected city neighborhoods or departmental staff, and play a recorded message created by the user.
Mass Disaster Fatality Management	Use this information when dealing with a mass fatality situation.

DEPARTMENTAL ORDER

SPECIAL ORDER

DATE ISSUED: 01/01/06

#06-DRAFT

SUBJECT: CITY OF BERKELEY MASS EVACUATION PLAN

1. The purpose of this Special Order is to describe procedures to follow in the event a mass evacuation of the City of Berkeley is necessary due to a natural disaster, disease outbreak, toxic chemical spill, terrorist attack, or any other emergency situation where there is extreme peril to the safety of persons and property. A mass evacuation is a mandatory, temporary relocation of occupants from a specific geographical area due to a public emergency. Penal code section 409.5 grants authority to close or restrict access to an area if there exists a threat to public health or safety.
2. In the event of a public emergency that requires a mass evacuation, the City Council or the Director of Emergency Services (City Manager or his or her designee) is empowered to proclaim a "State of local emergency." The Director of Emergency Services/Designee shall be responsible for authorizing a mass evacuation order.
3. In the event of a citywide state of emergency where a mass evacuation is necessary, all available departmental personnel shall report to the Tsukamoto Public Safety Building, 2100 Martin Luther King Way and all personnel will be placed on a 12-hour on and 12-hour off schedule. Other city personnel shall report to their designated work sites at the direction of their department head.
4. The City's primary Emergency Operations Center (EOC) located in the multi-purpose room of the Public Safety Building will be activated at the Director of Emergency Services' direction. In the event that the primary EOC is non-operational, the City's alternate EOC, The Berkeley Fire Department Training Center, located at 997 Cedar Street, will be activated.
5. The Emergency Operations Plan, which details emergency organization, job functions and descriptions, and action checklists, will be implemented. The City's emergency organization plan is based on the Standardized Emergency Management System (SEMS), which provides for clear authority, direction, and lines of communication during emergencies.
6. The majority of law enforcement personnel will fall under the Operations section under SEMS. Primary law enforcement duties will include disseminating evacuation orders, directing the evacuation of citizens, enforcing laws and temporary rules, and providing security for primary and

DEPARTMENTAL ORDER

SPECIAL ORDER

DATE ISSUED: 01/01/06

#06-DRAFT

SUBJECT: CITY OF BERKELEY MASS EVACUATION PLAN page 2

secondary shelter sites. Shelter sites will be identified by the Planning and Logistics section in conjunction with the American Red Cross and the Berkeley Unified School District.

7. Law Enforcement resources should be assessed and if needed, the Chief of Police or his or her designee shall request mutual aid via the Alameda County Law Enforcement Mutual Aid Coordinator. If mutual aid is requested, pre-designated staging area (s) should be established and Berkeley Police Department personnel should be deployed to the staging area (s) to brief the responding outside agencies.
8. In the event of a mass evacuation order, The Police Department, in consultation with the EOC Operations Section Chief/designee, will identify the area(s) to be evacuated, the evacuation routes to be used throughout the City, the location of neighborhood emergency shelter centers and mass care facilities, and the time parameters to start and finish the evacuation.
9. Information regarding evacuation area (s), routes, shelter sites, and time parameters will be made public when circumstances warrant their dissemination. The EOC Public Information Officer will alert the public through the Berkeley Emergency Notification System (BENS), Radio 1610 AM, MTC's 511 system, and the Emergency Alert System. Additional notification may be made through public announcements, City of Berkeley websites, and via public safety workers at the appropriate time.
10. In situations that require only a portion of the City to be evacuated, the location of the incident becomes the epicenter of the evacuation area, and all traffic is directed outbound from that point using as many pre-designated routes as possible. Whenever possible, evacuees will be routed away from the evacuation area using major city thoroughfares including but not limited to:
 - San Pablo Avenue
 - Sacramento Street
 - Martin Luther King Way
 - Shattuck Avenue
 - Telegraph Avenue
 - Ashby Avenue

DEPARTMENTAL ORDER

SPECIAL ORDER

DATE ISSUED: 01/01/06

#06-DRAFT

SUBJECT: CITY OF BERKELEY MASS EVACUATION PLAN page 3

- Gilman Street
- Arlington Avenue
- Dwight Way
- University Avenue
- Marin Avenue

Coordination with Public Works may be necessary to designate emergency traffic routes and to redirect traffic lanes or controls.

11. To minimize the anticipated traffic congestion, evacuees should be encouraged to utilize public transportation such as BART or AC transit. In addition, BUSD, Lawrence Berkeley National Laboratory, and Health & Human Services buses can be utilized to assist with the evacuation.
12. Whenever possible, priority in evacuation should be given to people who are confined to hospitals or nursing homes, the elderly, or who otherwise have disabilities that limit their ability to evacuate the area. Evacuees with chronic illnesses should consider bringing critical medications with them.
13. In the event of a mass evacuation order, law enforcement resources will likely be overwhelmed in managing the evacuees. As a result, only life-threatening or serious injury-type calls for service should be dispatched.
14. In general, reasonable accommodations should be made to allow evacuees to bring their pets or service animals with them. Pet owners must be able to control their pets with portable carriers if riding on a vehicle with other evacuees. However, under no circumstances shall the evacuation of any animal compromise the safety of any public safety worker or evacuee.
15. If a mass evacuation of a portion of the city includes the Public Safety Building, jail staff should consider transferring or citing prisoners from the jail.
16. Departmental translators should be enlisted to assist in communicating with non-English speaking evacuees.

DEPARTMENTAL ORDER

SPECIAL ORDER

DATE ISSUED: 01/01/06

#06-DRAFT

SUBJECT: CITY OF BERKELEY MASS EVACUATION PLAN page 4

17. The evacuation plan should be reviewed and updated periodically as conditions and circumstances change.

18. Once the emergency that prompted the evacuation has abated, the Director of Emergency Services will be the official responsible for making the decision to allow the residents to re-enter the evacuated area. If the emergency involved a hazardous material threat or disease outbreak, the Public Health Officer is responsible for determining if the area is safe to re-enter.

**Douglas N. Hambleton
Chief of Police**

Berkeley Police Department Tsunami Plan

<p>Introduction</p>	<p>This plan outlines a broad police response with attachments showing more detailed information.</p> <p>The phenomenon called "Tsunami" is a series of ocean waves of extremely long length generated by earthquakes, volcanic eruptions, or massive undersea landslides.</p> <p>As a tsunami crosses the deep ocean its length from crest to crest may be a hundred miles and its height from trough to crest only a few feet. Tsunamis may reach speeds of 600 miles per hour in deep water. When the tsunami enters shallow coastal waters, its speed decreases and the wave height increases. This creates the large wave that becomes a threat to life and property. Following the arrival of the first wave, subsequent waves may increase in height and arrive minutes to hours later.</p>
<p>Purpose</p>	<p>The overall purpose of this plan is to protect life and property of the citizens of the City of Berkeley. Specific purposes of the plan are:</p> <ul style="list-style-type: none"> • To establish a city-wide understanding of the special operational concepts, organization, tasks, and coordinated emergency actions of the city and state organizations and institutions which would be involved in a tsunami warning response. • To provide for mobilization and direction of county and various city emergency organizations in support of evacuation and security operations. • To provide for the rapid deployment of mutual aid.
<p>Authority</p>	<p>It is the policy of the Berkeley Police Department to maintain the capability to plan for and respond to unusual occurrences so as to provide for the safety of the community.</p> <p style="text-align: right;">-General Order U-4</p>
<p>Relationship to Other Plans</p>	<p>Other city agencies and organizations with assigned response tasks should develop specific response procedures and checklists to support this plan.</p>
<p>Use of the Incident Command System</p>	<p>A cornerstone of this plan is the application of the Incident Command System at the field level. Under ICS, a unified command must be used to manage the multiple agencies responding to a tsunami incident. The basic precept of unified command is that all agencies with jurisdictional responsibility for the incident will manage an incident by establish a common set of incident objectives and strategies. This is accomplished without losing or abdication agency authority, autonomy, responsibility or accountability. A unified command must include all the individual authorities with response jurisdiction over the incident.</p>
<p>Background</p>	<p>There are no known recorded deaths from tsunami action in the City of Berkeley. It is possible, however, that wave impact occurred in 1946, 1960, and 1964 as a result of pacific tsunami events. In 1946 an earthquake in the Aleutian Islands generated a tsunami that caused one death in Santa Clara County. The resultant tsunami from the Alaskan earthquake of 1964 caused eleven deaths in Crescent City just south of the Oregon border.</p>

Tsunami Response Plan and Checklist

<p>Coastal Impact</p>	<p>USGS research indicates a tsunami 20-foot run-up may occur along coastal areas and the Golden Gate. Run-ups are defined as a rush of water up a structure on the breaking of a wave. Such a run-up is estimated to occur an average of once every 200 years. The areas that would be most heavily damaged by a tsunami are those along the Northern San Mateo Pacific Coast; Sharp Park State Beach, Rockaway Beach, and the Linda Mar area. The degree of damage experienced by these areas would depend on the local sea bottom and coastal topography as well as the incoming direction of the tsunami.</p>
<p>Bay Impact</p>	<p>A tsunami wave impacting the Pacific Coast near the Golden Gate is anticipated to decrease in size if it were to enter the bay via the Golden Gate. USGS research indicates that a run-up would be decreased by half within a distance of 10 miles from the Golden Gate, and that the run up would be negligible by the time the wave reached points north and south bay. Areas most likely to be inundated are marshlands, tidal flats, and former bay margin lands that are not artificially filled but are still at or below sea level.</p>
<p>Impact on the City of Berkeley</p>	<p>Berkeley faces potential tsunami inundation in the areas that are exposed to the San Francisco Bay. This would include the entire west shoreline between the Emeryville city limits, all of the Berkeley Marina up to the Albany city line. Aquatic Park is also vulnerable to inundation. Although the race track is not within city limits, the Golden Gate race track is also at risk. Current research indicates no threat to residential areas, other than those found in the marina. It is important to consider sea depth, tidal flow and wave bounce may all have a magnifying effect on a tsunami. Predicted inundation should be used as a reference only. Greater amounts of inundation are possible.</p> <p>Berkeley shoreline exposed to the bay has the potential to experience tsunami inundation with a run-up of 20 feet.</p>
<p>Notification of a Tsunami</p>	<p>The agency responsible for issuing information and warnings on possible tsunamis is the National Oceanic and Atmospheric Administration (NOAA), through the Tsunami Warning System. California receives all information about a potential threat of tsunamis from the West Coast/Alaska Tsunami Warning Center (WC/ATWC) in Palmer, Alaska.</p> <p>A regional Tsunami Warning or Watch is issued based on earthquake location and magnitude. When an earthquake of 7.5 or larger occurs within the Pacific basin, the warning centers issue warnings and watches. Areas within a 3-hour tsunami travel time of the epicenter will be placed in a Tsunami Warning status, and areas within a 3-6 hour tsunami travel time will be placed in a Tsunami Watch status.</p> <p>The information is transmitted to the Governor's Office of Emergency Services Warning Control Center. All information received by the State Warning Center is passed directly to the Operational Areas via CLETS, California Alert and Warning System (CALWAS) and Emergency Alert System (EAS).</p>

Tsunami Response Plan and Checklist

<p>Definitions</p>	<p>WATCH A Tsunami Watch message is generated in one of two ways based on earthquake location:</p> <ul style="list-style-type: none"> • West Coast/Alaska Warning Center detects an earthquake with a magnitude of 6.5 or greater generated along the North American Continent with a possible seismic sea wave with an arrival time of greater than three hours • Pacific Tsunami Warning Center detects an earthquake of magnitude 6.5 or greater in the Pacific Basin with a possible seismic wave arrival time of greater than four hours <p>WARNING A Tsunami Warning message is generated in one of two ways based on earthquake location:</p> <ul style="list-style-type: none"> • West Coast/Alaska Warning Station detects an earthquake of magnitude 6.5 or greater along the North American Continent that may have generated a seismic sea wave with an arrival time of less than three hours • Pacific Tsunami Warning Center detects an earthquake of 6.5 magnitude or greater in the Pacific Basin and a tsunami has been generated with an arrival time to be reported. <p>CANCELLATION A cancellation message will be sent when all danger of seismic sea wave has passed.</p>
<p>Activation</p>	<p>This plan becomes effective upon notification of a Tsunami Watch or Warning issued by the National Weather Service, or on order of the County Operational Area.</p>
<p>Concept of Operation</p>	<p>In the event this plan is activated, the designated risk areas (see below under Risk Areas) will be warned and advised to move to safer ground. In the event of a tsunami warning or upon the decision to do so , street closures leading to the waterfront and marina might be considered. The public will be warned using the following methods:</p> <ul style="list-style-type: none"> • Emergency service vehicles using PA systems and sirens • Providing Leaflets door-to-door • Announcements on Radio 1610 and the Berkeley Cable TV Channel • Announcements via the Emergency Alert System • Broadcasts on Marine Channel 16 (marina officer or Coast Guard) <p>Public information will become a critical component of the warning process. Local and national media will have also received the tsunami warning and will be covering the event. Land based phone lines may become overloaded with callers to 911</p>

Tsunami Response Plan and Checklist

	<p>wanting information. Cellular phones may be clogged and impede first responders.</p> <p>See Tsunami Checklist for specific actions required in the event of a tsunami watch or warning.</p>																
<i>Area Security</i>	<p>After an area has been evacuated, police patrols should set up roadblocks, barricades, and/or a system of patrols to maintain cordon lines and prevent criminal opportunities. Traffic Control Points to restrict sightseer traffic to the coast may be put into place as required.</p>																
<i>Area Re-entry</i>	<p>Evacuated areas must remain closed to the public until after the threat of a Tsunami no longer exists. The decision to allow re-entry will be made by the city Emergency Service Director or a designated alternate in consultation with the appropriate public safety officials.</p>																
<i>Responsibilities</i>	<p>Each agency assigned Incident Command responsibilities will control operations within its area of responsibility.</p> <p>This plan establishes procedures for the evacuation and control of the following areas at risk from tsunami (seismic sea wave) action:</p> <table border="0"> <thead> <tr> <th><u>RISK AREA</u></th> <th><u>INCIDENT COMMAND</u></th> </tr> </thead> <tbody> <tr> <td>Golden Gate Fields: Grandstands</td> <td>City of Albany</td> </tr> <tr> <td>Golden Gate Field: Stables</td> <td>City of Berkeley</td> </tr> <tr> <td>I-80/Gilman Off-Ramp</td> <td>CHP</td> </tr> <tr> <td>East Shore Park</td> <td>E. Tsunami Response Checklist

When to use this Checklist:

- This plan becomes effective upon notification of a **Tsunami Watch or Warning** issued by the National Weather Service, or on order of the County Operational Area.

How will a Tsunami Watch or Warning be delivered:

- A **tsunami watch or warning** will be transmitted to Berkeley via the CLETS system, via phone or both.
- The Communications Center should immediately notify the watch commander or equivalent of the CLETS message. It should not be held.

What is a Tsunami Watch or Warning:

WATCH

A Tsunami Watch message is generated in one of two ways based on earthquake location:

- West Coast/Alaska Warning Center detects an earthquake with a magnitude of 6.5 or greater generated along the North American Continent with a possible seismic sea wave with an arrival time of **greater than three hours**
- Pacific Tsunami Warning Center detects an earthquake of magnitude 6.5 or greater in the Pacific Basin with a possible seismic wave arrival time of **greater than four hours**

WARNING

A Tsunami Warning message is generated in one of two ways based on earthquake location:

- West Coast/Alaska Warning Station detects an earthquake of magnitude 6.5 or greater along the North American Continent that may have generated a seismic sea wave with an arrival time of **less than three hours**
- Pacific Tsunami Warning Center detects an earthquake of 6.5 magnitude or greater in the Pacific Basin and a tsunami has been generated with an arrival time to be reported.

CANCELLATION

A cancellation message will be sent when all danger of seismic sea wave has passed.

Tsunami Response Plan and Checklist

Upon Receiving a **Tsunami Watch** notification:

- Contact the Alameda County Operational Area (OES) at (925) 803-7800. After hours, contact Alameda County Radio Dispatch at (510) 667-7721.
- Verify the tsunami watch information.

Upon verification of the **Tsunami Watch**:

- Notify the Watch Commander and DCO immediately. Do not hold watch notification.
- Notify the PIO. This is very important. Comm Center staff should also notify key City of Berkeley staff including Fire Department, OES, Parks and Waterfront, HHS and Public Works staff.
- Consider activating the DOC (Department Operations Center)
- Review tsunami plan.
- Anticipate media inquiries and heavy phone calls.
- Consider warning the following areas with an advisement (see attached) to move to safer ground (ie: voluntary evacuation):
 - ✓ Golden Gate Field: Stables (Berkeley jurisdiction)
 - ✓ East Shore Park (be sure to notify E. B. Parks District)
 - ✓ West Frontage Rd. between Gilman and Ashby
 - ✓ Berkeley Marina including all docks, businesses, restaurants and hotel.
 - ✓ Berkeley Pier
 - ✓ Aquatic Park visitors
- Warnings should be carried out via the following means:
 - ✓ Emergency service vehicles using PA systems and sirens
 - ✓ Providing Leaflets door-to-door
 - ✓ Announcements on Radio 1610 and the Berkeley Cable TV Channel
 - ✓ Announcements via the Emergency Alert System (via the Operational Area)
 - ✓ Broadcasts on Marine Channel 16 (BPD marina officer or Coast Guard)
- Consider preparing or deploying traffic control and street closures leading to and from the waterfront and marina. Sightseers may actually be headed toward the area to view a tsunami event.
- Monitor CLETS for additional warnings or cancellations.

Tsunami Response Plan and Checklist

Upon Receiving a **Tsunami Warning** notification:

- Contact the Alameda County Operational Area (OES) at (925) 803-7800. After hours, contact Alameda County Radio Dispatch at (510) 667-7721.
- Verify the tsunami watch information.

Upon verification of the **tsunami warning**:

- The Communications Center should immediately notify the watch commander or equivalent of the CLETS warning message. It should not be held.
- Notify the PIO. This is very important. Comm Center staff should also notify key City of Berkeley staff including Fire Department, OES, Parks and Waterfront, HHS and Public Works staff.
- Activate the DOC (Department Operations Center).
- Command staff should consider asking for a Local State of Emergency to be declared.
- Review tsunami plan.
- Anticipate media inquiries and heavy phone calls.
- Evacuations centers should be identified for people being evacuated. These areas should have shelter and restrooms.
- Initiate warnings and mandatory evacuations of the following areas with an advisement (see attached) to move to safer ground or the identified evacuation centers:
 - ✓ Golden Gate Field: Stables (Berkeley jurisdiction)
 - ✓ East Shore Park (be sure to notify E. B. Parks District)
 - ✓ West Frontage Rd. between Gilman and Ashby
 - ✓ Berkeley Marina including all docks, businesses, restaurants and hotel.
 - ✓ Aquatic Park visitors

Evacuations:

- Evacuations should be carried out via the following means:
 - ✓ Emergency service vehicles using PA systems and sirens
 - ✓ Providing Leaflets door-to-door
 - ✓ Announcements on Radio 1610 and the Berkeley Cable TV Channel
 - ✓ Announcements via the Emergency Alert System (via the Operational Area)

Tsunami Response Plan and Checklist

- ✓ Broadcasts on Marine Channel 16 (BPD marina officer or Coast Guard)
- Emergency traffic control should be deployed to maintain street closures leading to and from the waterfront and marina:
 - ✓ Golden Gate Fields: Stables
 - ✓ I-80/Gilman Off-Ramp (notify CHP for assistance)
 - ✓ East Shore Park (notify E.B. Parks for assistance)
 - ✓ West Frontage Rd (Gilman-Ashby)
 - ✓ Berkeley Marina
 - ✓ Aquatic Park
- Sightseers should be kept out of the area (PC 402).
- Citizens in the marina should be encourage to evacuate in their cars, if possible, taking only basic supplies, including special medications, important papers, water, snacks and some clothing.
- Citizens unable to evacuate on their own will be assisted by City of Berkeley staff. The citizen's location should be reported to the DOC, and arrangements made for their safe relocation. Consider using Public Works, HHS bus or BFD ambulance to evacuate infirmed or citizens unable to evacuate on their own.
- Citizens unwilling to evacuate should be advised to seek higher ground.
- Confirm opening of evacuation shelters with City Health and Human Services Staff.
- Move City vehicles and equipment out of the marina as time allows and away from threatened areas.
- Alert police units and other city staff in the evacuation area of anticipated time of tsunami arrival. Give them a cut-off time to get out of the area themselves. Consider the use of spotters, watching wave action on the bay side of the shoreline.
- Maintain contact with the Operational Area OES to provide situation updates and coordinate evacuation and road closures.
- Maintain evacuation for a minimum period of two hours after arrival of last wave or upon ALL CLEAR transmitted by Operational Area/County OES. Monitor CLETS for additional warnings or cancellations.

Tsunami Response Plan and Checklist

Specific Action to be taken if tsunami occurs and damage results:

- Maintain full evacuation until minimum of two hours after arrival of last wave or upon ALL CLEAR from Operational Area/County OES. Additional waves may occur.

- Maintain security of damaged areas from re-entry by non-residents and property owners and the media.

- Initiate "windshield" damage assessment by field patrol units. Damage should be reported to the DOC. DOC should compile damage assessment reports for dissemination to the City EOC and the Operational Area/County OES.

- Request City Environmental Health Department and Toxics inspect damaged areas to ensure areas are safe for residents. Consideration should be given to requesting BFD HazMat to inspect hazardous material areas in the marina for signs of leakage. Areas for inspection by the above services are:
 - ✓ Sewage pump station at University and Marina Blvd. (Contact City of Berkeley Electrical Depart for assistance.)
 - ✓ Fuel storage tanks on the point near OCSC Sailing (#1 Spinnaker Way)
 - ✓ Methane gas equipment in Cesar Chavez Park (Service Company is SCS Services, Modesto, CA)

- Upon approval by City Environmental Health, Toxics and Fire staff that areas are safe for resident re-entry, allow residents, property owners, the press, and other authorized individuals to enter area.
 - ✓ Establish response priorities and mutual aid requirements. Keep Operational Area/County OES up-to-date on events in damaged areas.

SAMPLE Public Information Format

We have been warned by the National Weather Service that a Tsunami, or seismic sea wave, (may have) (has been) generated in the Pacific and may strike our coast. If a wave was generated, it will arrive here at approximately _____.

Tsunamis have done great damage on the California coast. The most recent one in 1964 killed 12 people in Crescent City. They were not evacuated in time or were allowed to return to the evacuated area too soon. This tsunami also did damage in the Bay Area.

Our responsibility is to warn everyone within the inundation area. Temporary evacuation areas are being established at _____.
Information will be given to you at these locations as to when or if American Red Cross Shelters will be opened at these locations.

A tsunami is not a single wave, but a series of waves. It is important to stay out of the risk area until you are advised that re-entry may begin. Waves may be as far apart as one hour and may be as high as twenty feet.

Traffic Control Points may be set up at strategic locations to reduce traffic flow toward the shoreline.

Terminology

Arrival Time: Time of arrival, usually of the first wave of the tsunami, at a particular location.

ETA: Estimated Time of Arrival. Computed arrival time of the first tsunami wave at coastal communities after a specific earthquake has occurred.

Horizontal Inundation Distance: The distance that a tsunami wave penetrates onto the shore. Measured horizontally from the mean sea level position of the water's edge, it is usually measured as the maximum distance for a particular segment of the coast.

Inundation: The depth, relative to a stated reference level, to which a particular location is covered by water.

Inundation area: An area that is flooded with water.

Inundation Line (limit): The inland limit of wetting, measured horizontally from the edge of the coast, defined by mean sea level.

Local/Regional Tsunami: Source of the tsunami is within 1000 km of the area of interest. Local or near-field tsunami has a very short travel time (30 minutes or less), mid-field or regional tsunami waves have travel times on the order of 30 minutes to 2 hours.

Note: "Local" tsunami is sometimes used to refer to a tsunami of landslide origin.

Run-up: Maximum height of the water onshore observed above a reference sea level. Usually measured at the horizontal inundation limit.

Seiche: An oscillating wave (also referred to as a seismic seawave) in a partially or fully enclosed body of water. May be initiated by long period seismic waves, wind and water waves, or a tsunami.

Tidal Wave: Common term for tsunami used in older literature, historical descriptions, and popular accounts. Tides, caused by the gravitational attractions of the sun and moon, may increase or decrease the impact of a tsunami, but have nothing to do with their generation or propagation. However, most tsunamis (initially) give the appearance of a fast-rising or fast-ebbing tide as they approach shore, and only rarely appear as a near-vertical wall of water.

Travel Time: Time (usually measured in hours and tenths of hours) that it took the tsunami to travel from the source to a particular location.

Tsunami Response Plan and Checklist

Tsunami: A Japanese term derived from the characters "tsu" meaning harbor and "nami" meaning wave. Now generally accepted by the international scientific community to describe a series of traveling waves in water produced by the displacement of the sea floor associated with submarine earthquakes, volcanic eruptions, or landslides.

Threat is based on security or lack of, access to chemical storage, potential as a target and support functions should an attack occur.

Hazard is based on what is at the location and what impact it would have if attacked.

BERKELEY POLICE DEPARTMENT TRAINING AND INFORMATION BULLETIN

DATE: October 30, 2008

NUMBER: 285

SUBJECT: BERKELEY EMERGENCY NOTIFICATION SYSTEM

PURPOSE

The purpose of this Bulletin is to educate and guide employees in the use of the Berkeley Emergency Notification System (BENS), an emergency telephone notification system hosted by the FirstCall Interactive Network (FirstCall) of Baton Rouge, Louisiana. When activated, BENS dials telephone numbers from either preplanned fixed lists, or lists created on demand. BENS utilizes a computer mapping system with integrated residential and business telephone numbers and address information to deliver high speed emergency notifications to telephone (landline-cellular), e-mail, pager and SMS-PDA communication networks.

ACTIVATION AUTHORIZATION

BENS provides the ability to communicate critical public safety information and instructions to a large number of locations and people clearly and efficiently. As such, BENS will only be used in a public safety emergency.

BPD command staff members, Supervisory Public Safety Dispatchers, and the Public Information Officer are the only personnel trained and authorized to activate the Police Department's BENS account.

DEFINITIONS

Access Code: A personal password chosen by an authorized user. The code is a mandatory prerequisite for system activation.

Activation: The process through which the City of Berkeley identifies a group of telephone numbers to which an emergency telephone message is delivered.

Authorized User: A department member approved by the Chief to activate the FirstCall system, must be registered in the FirstCall system, and have an assigned personal user name and access code.

Check Number List: A list of telephone numbers that the FirstCall system will automatically dial and deliver the message to first. This list is intended to advise others within the City that a message is being sent. It also adds a layer of security by making staff aware of system activation and offering the opportunity to listen to the message.

Fixed Calling List: A predetermined list of telephone numbers. A fixed list might contain a special group to call (i.e., BSHNT, CMT), all sworn employees, or all employees.

***Entire text is revised.**

TIB #285 BERKELEY EMERGENCY NOTIFICATION SYSTEM (10/30/2008)

Fixed lists must be prepared and in place with FirstCall prior to activation.

Geographic Activation: An activation in which the set of numbers to be called represents a geographic area (i.e., ¼ mile around an address, 3 blocks north and 3 blocks west of an intersection, etc.)

Hot Spot: A predetermined point of risk (i.e., a hazardous material use or storage facility.)

Interactive Message: A message that requests or requires touch pad input from the recipient (i.e., "If you have understood this message please press 1 now.")

Message: The information delivered to the telephone. The system has the capability to deliver messages in over 140 different languages. All messages created in the field must contain, "*Please listen to this important emergency message from the Berkeley Police Department.*" Pre-scripted messages will be maintained in the attached appendix.

Previous Incident: A completed activation. Referencing previous incidents is important to deliver an "all clear" message or to update information delivered in the earlier message.

Sector: A predetermined area defined by a grid, shape or district (i.e., Thomas Brothers Map Page.)

User Name: A personal name chosen by an authorized user. The name is a mandatory prerequisite for system activation.

PROCEDURES

General Information

There are two ways to contact the FirstCall Response Center and initiate a notification:

- by telephone (800-928-5549), or
- via the Internet and Virtual Private Network (VPN) software.

Within the Public Safety Building, FirstCall's VPN software, titled "Go Global", is installed and available on Communications Center Console 3.

To initiate a BENS notification by telephone, authorized users must have three pieces of access information available:

- City of Berkeley's Account Number
- The individual's User Name
- The individual's Access Code.

To initiate a BENS notification by via the Go-Global VPN software, authorized users must have four pieces of access information available. In either case, the user should have a prerecorded message selected or have a custom message composed.

*Entire text is revised.

TIB #285 BERKELEY EMERGENCY NOTIFICATION SYSTEM (10/30/2008)

- City of Berkeley's Network User Name
- City of Berkeley's Network Password
- The individual's User Name
- The individual's Access Code.

As a security precaution, FirstCall personnel cannot access an individual's log-in information and, as such, will not allow a system notification without it.

There are three types of notification sequences available to authorized users: Geographic, Fixed Calling Lists, and Previous Incident. Definitions of each are offered above.

BENS always begins a call sequence by delivering the message to a list of check numbers. The check number list contains telephone contact numbers for:

City Manager
Deputy City Managers
City Public Information Officer
Police Chief
Police Captains
Police Public Information Officer
Communications Center
Fire Chief
Deputy Fire Chief
Office of Emergency Services Manager
Public Works Director
Deputy Public Works Director
Health and Human Services Director
Public Health Officer
UCPD Communications Center

After a complete activation FirstCall will email a detailed summary report, including a WAV file of the message, to the Office of Emergency Services Manager. This report contains the report number necessary to initiate a "previous incident" notification.

Activation (Geographic)

A BENS activation for a particular geographic area is accomplished in the following manner:

- 1) Contact the FirstCall Response Center.
- 2) Provide the Berkeley Police Department's BENS account number.
- 3) Provide your BENS user name.
- 4) Provide your BENS access code.
- 5) Select a message type:

*Entire text is revised.

TIB #285 BERKELEY EMERGENCY NOTIFICATION SYSTEM (10/30/2008)

- Prerecorded
 - Custom
 - Custom interactive message
- 6) Record your message, if necessary.
 - 7) Identify the start or focal point of your area:
 - Address (select an address or address-range).
 - Intersection (any two intersecting named roadways).
 - Hot Spot (a predetermined point of risk).
 - 8) Create the calling area:
 - Radius (specify a radius around a particular area/focal point).
 - Multiple Street (create an area defined by named roadways).
 - Sector (a predetermined area defined by a grid/shape).
 - 9) Confirm with the operator the details of the activation and your intent to initiate the notification.

Activation (Fixed List)

A BENS activation for a fixed call list(s) is accomplished in the following manner:

- 1) Contact the FirstCall Response Center.
- 2) Provide the Berkeley Police Department's BENS account number.
- 3) Provide your BENS user name.
- 4) Provide your BENS access code.
- 5) Choose the preplanned list(s) in your account group you want to notify. The Police Department has three preplanned lists:
 - HNT (all BSHNT members)
 - CMT (all CMT members)
 - COMMAND (Chief, Captains and Lieutenants)
- 6) Select a message type:
 - Prerecorded
 - Custom
 - Custom interactive message
- 7) Record your message if necessary.
- 8) Confirm with the operator the details of the activation and your intent to initiate the notification.

***Entire text is revised.**

TIB #285 BERKELEY EMERGENCY NOTIFICATION SYSTEM (10/30/2008)Activation (Previous Incident, "All Clear")

A BENS activation regarding an "All Clear" message associated with a previous notification is accomplished in the following manner:

- 1) Contact the FirstCall Response Center.
- 2) Provide the Berkeley Police Department's BENS account number.
- 3) Provide your BENS user name.
- 4) Provide your BENS access code.
- 5) Provide the previous incident report number.
- 6) Select a message type:
 - Prerecorded
 - Custom
 - Custom interactive message
- 7) Record your message if necessary.
- 8) Confirm with the operator the details of the activation and your intent to initiate the notification.

BENS MANAGEMENT

The City of Berkeley's Office of Emergency Services Manager is the administrative point of contact with FirstCall. The OES Manager has responsibility for overall management of the account and service. Participating City Departments have the responsibility to manage account details, such as the creation and maintenance of prerecorded messages or fixed calling lists.

Douglas N. Hambleton
Chief of Police

*Entire text is revised.

TIB #285 BERKELEY EMERGENCY NOTIFICATION SYSTEM (10/30/2008)

APPENDIX

SAMPLE EMERGENCY MESSAGES

The following sample messages can be used whenever appropriate. Any of these messages can be changed to suit the circumstances of an emergency. Any emergency message that is sent using this system should be followed with an 'all clear' message when the emergency situation no longer exists.

General 'Stay Inside' message (non-specific)

Please listen to this important message from the Berkeley Police Department and the Berkeley Emergency Notification System.

There is an emergency situation in your area. The police department is asking that you shelter-in-place by staying inside, closing all windows and doors, and shutting off all heat and air conditioning systems. Please do not use your telephone or cellular phone to call the police or fire departments unless you have a personal emergency. Please tune in to radio station 1610 AM for more information.

Once again, there is an emergency situation in your area. The police department is asking that you shelter-in-place by staying inside, closing all windows and doors, and shutting off all heat and air conditioning systems. Please do not use your telephone or cellular phone to call the police or fire departments unless you have a personal emergency. Please tune in to radio station 1610 AM for more information.

Thank you for your cooperation.

Haz-Mat Incident message

Note: This message is designed for situations where the public is asked to shelter in place inside their homes or businesses. Should a situation exist where a particular shelter location has been established and evacuations are occurring, the message should be revised to identify and provide direction to the shelter location.

Please listen to this important message from the Berkeley Police Department and the Berkeley Emergency Notification System.

There has been a chemical accident near your area. As a precautionary measure, you are asked to shelter in-place. Stay inside and shut all your doors and windows. Turn off your air conditioner or heating systems. Try to keep as much outside air from coming into your home or place of business as possible.

Do not use your telephone or cellular phone unless you have a personal emergency. Do not call 9-1-1 unless it is an emergency. You will be notified when the situation has returned to normal. Tune to local radio station 1610 AM for more information.

Repeat - there has been a chemical accident near your area. Please stay indoors until you are notified that it is safe to go outside.

*Entire text is revised.

TIB #285 BERKELEY EMERGENCY NOTIFICATION SYSTEM (10/30/2008)

Thank you for your cooperation.

Armed Subject message

Please listen to this important message from the Berkeley Police Department and the Berkeley Emergency Notification System.

Berkeley Police officers are searching for an armed subject in your area. Please stay indoors and lock your doors and windows. If you see or hear anything unusual, please call 9-1-1 immediately.

Once again, the Berkeley Police officers are searching for an armed subject in your area. Please stay indoors and lock your doors and windows. If you see or hear anything unusual, please call 9-1-1 immediately.

Thank you for your cooperation.

Serious Crime message

Please listen to this important message from the Berkeley Police Department and the Berkeley Emergency Notification System.

Berkeley Police officers are currently investigating a serious crime that has occurred in your area. Please stay indoors and lock your doors and windows. If you see or hear anything unusual, please call 9-1-1 immediately.

Once again, Berkeley Police officers are currently investigating a serious crime that has occurred in your area. Please stay indoors and lock your doors and windows. If you see or hear anything unusual, please call 9-1-1 immediately.

Thank you for your cooperation.

Missing Person message

Disaster Annex:

MASS DISASTER FATALITY MANAGEMENT

Mass Disaster:

A significant mass disaster will most likely result in a mass fatality event as well. Mass fatalities may occur as the result of different types of events:

- Natural disaster.
- Large-scale accident.
- Use of chemical, biological, radiological, nuclear or high explosive agent.

Government Code 27491 mandates that the coroner or the coroner's appointed deputy examine the body, make identification, determine the circumstances, manner and means of death, perform evidence collections, process personal effects, and as circumstances warrant, isolate or decontaminate, transport and store human remains.

The Code states that for purposes of inquiry, the body of one who is known to be dead from any of the causes, or under any of the circumstances that cause sudden and unexpected deaths, shall not be disturbed or moved from the position or place of death without permission of the coroner or the coroner's appointed deputy.

Public Health Concerns:

Epidemiological studies show that dead bodies present a small public health risk. Victims of natural disasters, accidents or WMD events usually die from trauma and are unlikely to have acute or "epidemic-causing" infections

WMD:

In the event of an international release of a biological agent resulting in mass casualties such as plague, cholera, typhoid, tuberculosis, anthrax or small pox, there is an increased risk of spreading disease primarily through water or vectors.

The microorganisms responsible for these diseases have a limited ability to survive in a body that is cooling after death. Generally, during a mass disaster/fatality event the public does not have close contact with the dead therefore, the risk that dead bodies pose for the public is extremely small.

Procedures:

In the event of a mass fatality incident or disaster, make notification to the Coroner's Office. Inquire as to how the incident should be handled. Proceed as specified.

**Alameda County Double Blind Sequential
Lineup Identification Form.pdf**

ALAMEDA COUNTY DOUBLE BLIND SEQUENTIAL LINEUP IDENTIFICATION FORM

Agency Name:	Case Number:
Date:	Time:
Investigator/Officer presenting lineup:	Location of lineup:
Others present during identification:	
Witness name:	DOB:

Select the appropriate witness admonition below. The admonition should be read verbatim prior to conducting the lineup.

USE FOR PHOTO LINEUP

In a moment, I am going to show you a series of six individual photos. The person who committed the crime may or may not be included. Even if you identify someone during this procedure, I will continue to show you all the photos in the series. The investigation will continue whether or not you make an identification.

Keep in mind that things like hair styles, beards, and mustaches can be easily changed and that complexion color may look slightly different in photographs. You should not feel you have to make an identification. It is just as important to exclude innocent persons as it is to identify the perpetrator.

Do not discuss your case with other witnesses.

The photos will be shown to you one at a time. Take as much time as you need to look at each one. If you wish to see a photo again, you will be shown all photos again.

Do you understand these instructions? _____
(WITNESS RESPONSE) (WITNESS INITIALS)

 Signature of Witness Viewing Lineup Date Time

USE FOR PHYSICAL LINEUP

In a moment, I am going to show you a series of six people. The person who committed the crime may or may not be included. Even if you identify someone during this procedure, I will continue to show you all the people in the lineup. The investigation will continue whether or not you make an identification.

Keep in mind that things like hair styles, beards, and mustaches can be easily changed and that complexion color may look slightly different. You should not feel you have to make an identification. It is just as important to exclude innocent persons as it is to identify the perpetrator.

Do not discuss your case with other witnesses.

The people will be shown to you one at a time. Take as much time as you need to look at each one. If you wish to see a person again, you will be shown all of the people.

The individuals you will be shown will not be named; they will be assigned numbers. If the suspect in your case is in the lineup, remember their number.

If you wish to have a certain person in the lineup speak, wear a hat, walk rapidly, etc., make this request to the investigator conducting the lineup, and all of the people in the lineup will be asked to do the same thing. No person in the lineup will be singled out to speak or perform.

Do you understand these instructions? _____
(WITNESS RESPONSE) (WITNESS INITIALS)

Post lineup identification procedure:

If the suspect is present, place an "X" in the box below that matches the number of the suspect. If the suspect is not present, do not mark any box. If you believe a person who was present is the suspect, but you are not sure, place a "?" in the box below that matches the number of that person.

Report Writing Manual Update 2019.pdf

BERKELEY POLICE DEPARTMENT

REPORT WRITING MANUAL

PURPOSE

Writing a good police report is a vital part of conducting a complete and comprehensive investigation. The purpose of this Manual is to update the report writing regulations for the Berkeley Police Department. This Manual is being issued to take the place of the 2003 Special Order #03-026 "Report Writing Regulations" which had previously taken the place of the 1991 General Order R-31 "Report Writing Rules".

To encourage crime reporting and cooperation in the investigation of criminal activity, all individuals, regardless of their immigration status, must feel secure that contacting or being addressed by members of law enforcement will not automatically lead to immigration inquiry and/ or deportation. While it may be necessary to determine the identity of a victim or witness, members shall treat all individuals equally and without regard to race, color or national origin in any way that would violate the United States or California Constitutions.

REPORT WRITING - DEFINED

Report writing is defined as the accurate recording of facts and other pertinent information, presented in a clear, complete, and logical manner, so that the information may be communicated to others.

REPORT WRITING - GOALS

The first goal of report writing is to present all relevant information with clarity, accuracy, completeness and objectivity. The second goal is to apply the basic principles of correct and appropriate written expression.

The two goals are not separate; they are integral parts of the process of written communication that constitute a police report.

DEFINITIONS

Listed below are definitions pertaining to this Policy:

- Initial Report: The Case Report written by the handling employee documenting the details of the preliminary investigation.
- Supplemental Report: A report that provides additional information about the case. This may include:
 - Reports prepared by employees designated to assist the employee who prepares the initial report.
 - Follow-up reports to an initial investigation.

BERKELEY POLICE DEPARTMENT

REPORT WRITING MANUAL

- Attachments: Documents that accompany reports (diagrams, statements, ID reports, etc.).
- Report Forms: Various forms the Department has developed and/or uses, to ensure that specific topic areas will be addressed during the-investigation and recording of an incident.

REPORT WRITING CHARACTERISTICS

Reports shall have the following characteristics:

- Accuracy: Employees are expected to make every effort to ensure that reports are accurate- (without error}, and factual (supported by evidence). Accurate names, addresses, dates and times, etc., are absolutely essential to a good report. When opinions and conclusions are necessary, they shall be labeled as
- Clarity: Employees shall take particular care to prepare reports that are clear and understandable. Reports shall not be written in such a way that they are likely to be misinterpreted by different readers. Employees shall avoid the use of vague or ambiguous words that are likely to mislead or confuse the reader of the report.
- Completeness: Reports shall fully document details of the investigation. A complete report will tell the reader everything known about the incident, and document the assigned and assisting officers' activities to the current stage of the investigation. Reports that require an oral explanation are not considered complete.
- Conciseness: A report is concise when the full message is provided in as few words as possible. When useless words are eliminated, the report will be shorter and more direct; essential words will stand out. Avoid repetition, but do not omit relevant information.
- Objectivity: Reports shall be written in an impartial, unbiased, and unemotional manner.
- Legibility: All hand-printed reports are required to neat and legible.

DEPARTMENT FORMAT

Department format refers to the way our Department requires information to be organized and presented in the narrative/supplemental portion of the report. This format excludes those reports qualified for handling via Mobile Data Terminals/Mobile Data Browsers.

Each format topic shall be written in capital letters and underlined. If the format category(s) is not applicable or pertinent, then it does not need to be included.

The format categories for Departmental narrative/supplemental reports are as follows:

BERKELEY POLICE DEPARTMENT

REPORT WRITING MANUAL

Case Report	Short Report	Supplemental Report	Narrative Report	Incident Report
SUMMARY: INVESTIGATIVE NARRATIVE: DISPOSITION:	INVESTIGATIVE NARRATIVE:	(adding person or property to report) ADDITIONAL:	(adding only narrative language) ADDITIONAL:	INCIDENT:

SUMMARY

Requires a brief synopsis to be provided detailing the basic facts and elements of the crime(s).

- Example: An unknown subject pointed a gun at Smith and demanded his wallet. Fearing for his life, Smith gave his wallet to the suspect.
- Example: An unknown subject(s) pried open the locked front door to the residence at 833 Gilman Street. The subject stole two laptops and remains outstanding.
- Example: Joe Johnson, the Tower Record security guard, saw Davis place a DVD inside her jacket and leave the store without paying for the merchandise. Johnson signed a Citizen's Arrest form. Davis was cited and released.

STATEMENTS

Written or recorded statements shall be taken for in-custody cases, including those cases involving private person arrests. (Note: In situations such as a petty theft from a business, the security guard's report can suffice as the statement, providing the elements of the crimes have clearly been articulated).

Written or recorded statements shall be taken in cases when the case is being sent to the District Attorney's Office for consideration of criminal charges.

A supervisor may also direct an officer to take a written or recorded statement regardless of the offense classification (e.g., complex investigations, civil matters, etc.).

If an officer is unable to take a written statement, the reason(s) should be indicated in the report (e.g., victim in the hospital, witness refusal to give a written statement, etc.).

WRITTEN STATEMENTS

A written statement is a first person, chronological narrative of the events of the crime. It should include the victim's or witness' description of the suspect(s) and a verbatim account of what the suspect said and did. Be sure to include as much other relevant detail (such as weapon description and use) as the person can remember. The individual's statement should always include a description of the actions that establish the elements of crime required.

The officer should write the statement for the victim or witness. This ensures the statement while being as complete and as accurate as possible, remains concise and focused. The statement should be in

BERKELEY POLICE DEPARTMENT REPORT WRITING MANUAL

the person's own words as much as possible. For example, the officer should not write a victim/witness statement using police "jargon" type terms or abbreviations.

PROCEDURES

Written statement: Initially ask the open ended question of "what happened?" and allow the victim to tell you about the incident in their own words. As they do this, write down notes, including questions you'd like to follow up on. Such as if the person says, "The guy ran away and I called the police", you may follow up with, "what did the man look like? Which way did he go? Where did you call the police from?" etc.

After you've asked your follow up questions, attempt to repeat the story from the beginning to the person. You may start writing the statement at this point. Write up to a point in the story and ask if they have anything to add to the statement so far, if not, continue writing a paragraph or page at a time and clarify, if needed, with the person as you go. Any corrected errors or added language should be initialed. Once finished writing the statement, always ask if they have anything else to add. Then have the person read and sign each statement page. If they are unable to sign the statement, or subsequently refuse, this should be written in the signature block and in the report.

LANGUAGE BARRIERS

In language barrier situations, the officer should attempt to find an appropriate bilingual officer/employee or translator to take a statement. There is a need for flexibility in situations involving language barriers. For example, a Spanish speaking victim might want to give their statement in Spanish. The bilingual employee should prepare a summary of the statement for inclusion in the investigation. It might also be necessary for the bilingual employee to later re- write the victim/witness statement in English.

SUMMARIZE / PARAPHRASE

Victim/Witness Summarized or Paraphrased Statements:

- Summarize (cover the main points briefly)
- Paraphrase (restate using different words without changing the meaning)

Summarize or paraphrase statements made by involved parties. Use separate paragraphs for each involved person. The statement should answer who, what, why, where, when, and how for each victim and witness. Do not blend statements.

Example: Smith told me he parked and locked his car in the parking space in front of the apartment building at 2112 Haste Street. Smith said his car is equipped with a factory alarm system, which is activated when a door is opened. Smith forgot to take his cellular telephone, leaving it in plain sight on the passenger seat when he parked the car. Smith said he did not give anyone permission to enter his car and take the cellular telephone.

BERKELEY POLICE DEPARTMENT REPORT WRITING MANUAL

RECORDED STATEMENTS

If a statement is tape recorded, the officer should provide a summary of the statement in his/her investigative report.

SUSPECT STATEMENTS

Statements denying the crime, giving an alibi or some other excuse concerning the crime are very important because recently arrested suspects will often have very little time to concoct convincing falsehoods.

While taking the suspect's statement, officers should ask questions related to the suspect's account of the incident. For example, if a suspect gives

Officers should make note of the time when advising the Suspect of his/her Miranda rights and the suspect's exact response to that warning, including any waiver of those rights. Even if a suspect does not waive his/her Miranda rights, officers should keep in mind that volunteered or spontaneous statements that are not the result of any questioning by the police, are still admissible, and accordingly, should be reported in detail.

Officers should refer to the Temporary Custody of Juveniles Policy for additional Miranda juvenile guidelines.

DISPOSITIONS:

Describe the disposition of property, evidence, vehicles, persons arrested, etc. This category also covers the investigation status or additional steps that are warranted.

Example: I booked the purse into BPD Property Room for safekeeping.

Example: I booked the stereo into the BPD Property Room. I entered the stereo into APS (Automated Property System) as 'evidence'

Example: Officer Perkins booked Brown into BPD jail for burglary and possession of stolen property.

Example: Freeman indicated she wanted to pursue battery charges against Waldman. Case forwarded to the DA for consideration of charging.

Example: Pauley is compiling a list of all the property stolen from her home. This case will be forwarded to Property Crimes for follow up.

INVESTIGATIVE CASE STATUS

- **Closed Status:** This status shall be used only when conditions meet the requirements of the Department's major disposition code that includes the Uniform Crime Reporting Regulations and supplements thereto. In most cases, "closed" will be used only when the responsible has been identified, arrested, and/or the investigation completed. The case may also be closed with the arrest of one suspect, even if more are outstanding or unknown.

BERKELEY POLICE DEPARTMENT REPORT WRITING MANUAL

- **Suspend Status:** This status shall apply in cases where the assigned employee has investigated all leads and is unable to accomplish more to close the case. Suspended means the investigation is inactive and no further reports will be submitted until additional information or evidence is developed to restore it to active status. To be suspended, the report must be reviewed and the suspension approved by a Supervisor.
- **Follow-up Status:** This status shall apply to a case under active investigation which needs additional investigation which the officer cannot complete. This may be due to time constraints or staffing. Follow up responsibilities for Patrol and the Investigations Division can be found in the Preliminary Investigations Policy.

ROUTING

Employees preparing reports shall ensure the report is submitted in AEGIS. If there is an in-custody arrest or a request for a complaint, the PC Dec needs to be added to the "In-Custody" box.

GENERAL REPORTWRITING REQUIREMENTS

Completed Preliminary Investigation

The activities of an employee assigned to investigate an incident shall be decisive and constitute a definite step toward the completion and disposition of the case. A completed preliminary investigation is one which, when reviewed, leaves no initial questions unanswered; the reviewer can recognize whether further investigation (follow-up) is warranted or whether the case should be suspended from further active investigation.

First Person

Reports shall be written in the "First Person" writing style. Employees shall not use terms such as, "this officer", "Reporting Officer" (or "R/O"), "the undersigned" etc., when referring to themselves in reports.

Active Voice

Reports shall be written in "Active Voice" writing style. In addition to making reports more concise, the active voice style clearly specifies who did what action, an essential element of law enforcement reports.

Example: In the *passive* voice sentence, "A gun was found to be under the bush" the reader does not know "who" found the gun. In the active voice, the sentence would read, "I found a gun under the bush."

Example: "The knife was collected and placed into evidence." This is *passive* voice and is not acceptable. In active voice, the sentence would be written as "Officer Johnson collected the knife and placed it into evidence."

BERKELEY POLICE DEPARTMENT REPORT WRITING MANUAL

Labeling

The practice of "labeling" (referring to persons as "Victim #1", "V#2", "Witness", "suspect" should be avoided in those cases where the person's name is known. If the person's last name is known, it should be used.

For example, if John Smith is a victim of burglary, he should be referred to as "Smith" throughout the narrative instead of "V#1" or Victim #1". Exceptions to this requirement are as follows:

- Cases where a subject's name is not known: In those situations, refer to persons as "Suspect #1", "S#1" etc. is allowed.
- Same surname: If two or more persons involved in an incident share the same last name, they shall be identified by use of their first initial and last name, or by an involvement code ("V", "W", "RP", etc.) preceding their last name. Example: J. Smith said his daughter, R. Smith, saw a suspicious-car driving around their neighborhood the day prior or (V) Jones said his son (RP) Jones was home asleep when their home was broken into.
- Penal Code 293: Victim Exceptions: Per California Penal Code Section 293, investigating officers shall notify victims of specific offenses that they have the option of requesting their name not be a matter of public record. The name and any identifying information of such a victim shall be listed only on the first page of the Case Report. All other references to the victim within the report shall use the term "victim" as required by Penal Code Section 293.

Confidentiality

Although Penal Code Section 11107 and Government Code Section 625.4 have been commonly construed as making police reports "confidential", recent court decisions have held that absent specified circumstances, the entire report must be made available to the public. Victims and witnesses, who request that their names remain "confidential" shall be told that their request will be noted. However, the Department cannot guarantee that any information contained in a report will not be provided to suspects, the public, or the press.

Abbreviations

Only common, widely accepted abbreviations shall be used. Race/Sex/Age Group abbreviations are specifically outlined in General Order R-27.

Jargon

Employees shall avoid the use of police jargon and phraseology when writing reports. Reports shall be written in a clear, natural writing style so that they will be understandable and of use to individuals outside the law enforcement environment.

Slang and Profanity

BERKELEY POLICE DEPARTMENT REPORT WRITING MANUAL

Slang or profanity shall not be used except as necessary to quote statements made by suspects (e.g., for modus operandi purposes). When reporting verbatim statements made by victims, witnesses or suspects, quotation marks shall be used as appropriate.

Opinions/Conclusions

Except when appropriate (e.g., a narrative summary for the purposes of establishing credentials, law enforcement expertise, articulation of probable cause, factors supporting a detention and/or arrest, etc.), opinions and conclusions should not be present in the report. An officer's report shall not include words or phrases that belittle, ridicule or humiliate persons, groups or institutions unless the words or phrases are material to the incident or complaint being investigated.

Information contained in police reports must be objective and relevant to the investigation.

WRITTEN REPORTS

Written reports should be written in block form (without indentation), single-spaced, with double-spacing between paragraphs. Hand written reports shall be written in all capital letters, and with a black ink pen. Paragraphs should contain details for one topic area. Every sentence in a paragraph must relate to the paragraph's main idea.

Case/Page Number(s)

Employees are to ensure that all documents filed have the report case number in the upper right corner on each page (including both sides of a document if writing appears on each side) i.e. a criminal arrest history printout shall have the case number written in the upper right hand corner.

FIELD NOTES

There will be situations where employees may find it useful or necessary to write notes prior to the preparation of the report. Current law does not require the retention of field notes once the report is written; however, notes may only be discarded if:

1. It is done in "good faith, and with no intent to hide or deceive.
2. The destruction of notes does not violate a Department regulation or policy.

It shall be Department policy that field notes may be discarded once the report has been written and the report accurately reflects the contents of the notes.

Exceptions: An exception are those cases where notes contain information not directly transferable to the police report; these notes should be retained and booked as evidence.

PERSONS - DESCRIPTIONS

Employees shall obtain complete identifying information, whenever possible, from all persons

BERKELEY POLICE DEPARTMENT REPORT WRITING MANUAL

contacted. Complete information shall include the last name, first name, and middle initial or middle name.

Telephone numbers shall include area codes. Officers should get alternative methods of contact whenever possible, such as email addresses, home phone, work phone, etc.

If the individual is temporarily staying elsewhere, include the temporary address in the report narrative.

- Exception: This requirement does not pertain to cases involving domestic violence. To ensure the safety of the victim(s), temporary addresses should never be included in police report. The assigned officer shall ensure this contact information gets conveyed to investigative personnel (e.g., via e mail, memorandum, voice mail message).

PROPERTY AND EVIDENCE

Many reports will involve property. Whether lost, found, stolen, recovered or taken for observation, there are specific guidelines established by the California Department of Justice (DOJ) for the reporting of property. BPD personnel must be familiar with and follow carefully the DOJ requirements.

Individual items of property shall be listed with the report and categorized as follows:

- Stolen
- Recovered
- Lost
- Evidence
- Safekeeping
- Recovered

Provide a physical description, model name or number, color, size and other condition or defect.

If the item is unusual or difficult to describe, supplement the report with a sketch or photograph, if available. The goal is to provide as much detail as possible in order to help identify the item later if needed.

Provide the serial number or other identifying number for the item.

Value: Known or estimated 100% value, rounded to the next whole dollar. Use exact values where necessary to establish crime class or in cases where exact value is essential to accuracy of the report (e.g., an in-custody shoplifting case).

In most other cases, the victim's evaluation can be accepted.

Use the retail value for articles subjected to depreciation because of use, etc., or other factors that cause the value to decrease with use. Insurance companies will determine fair market value.

Use the wholesale cost (cost to the merchant) of goods stolen-from inventory, warehouses, etc.

BERKELEY POLICE DEPARTMENT REPORT WRITING MANUAL

Use replacement cost for new or almost new items.

SUBMISSION OF REPORTS

Procedures for Uniform personnel: Uniformed personnel are defined as Patrol Team members, Special Enforcement Unit/Drug Task Force, Bike Officers, Reserve Officers and Community Service Officers. Uniformed personnel are expected to file each day, before closing their tour of duty, a full report of their activities in connection with the cases assigned to them.

When applicable, this includes offense forms, supplementals, diagrams, or other reports assigned by a supervisor.

Uniformed personnel shall submit all completed reports into AEGIS for review. Any additional documents which need to be attached to the case should be placed in the appropriate Patrol Team report tray.

LATE REPORTS - PATROL

The following list illustrates those types of reports and/or situations that could qualify for late submission of a police report providing the "Late Report" request has been approved by a supervisor.

- A protracted, in-progress case still requiring several hours of investigation and/or report writing. Example: An assault via deadly weapon with the assigned officer responsible, for compiling a comprehensive narrative, as well as coordinating the supplemental reports of all assisting officers.
- Completion of non-critical reports (e.g. cold burglaries, non-custodial theft reports, etc.) that would otherwise require expenditure of paid/compensatory overtime for the reports to be submitted during the same tour of duty. Example: An officer assigned to a non-injury collision involving multiple vehicles, driver statements, witnesses, etc.
- An officer's inability to get a mandated statement from a witness or victim during their tour of duty (e.g., victim in the emergency room, witness left Berkeley prior to police contact, etc.).

Unless there are mitigating circumstances, reports involving any in-custody arrests or missing adults/juveniles should not be approved for late submittal.

Supervisors need to keep in mind the officer's schedule. For example, reports should not be approved for late submittal if an officer is going on his/her days off.

LATE REPORTS - DD / SPECIAL ASSIGNMENTS

Report Submittal Procedures for Investigative personnel: Investigative personnel are defined as Traffic Officers, Detective Bureau, Special Investigations Bureau officers and Identification Technicians. Due to the nature of their assignment, the initial report and/or supplemental investigative reports they have

BERKELEY POLICE DEPARTMENT REPORT WRITING MANUAL

been assigned should be filed within a week.

Investigative personnel shall get supervisory approval for any exception to the above requirement.

A situation warranting an exception to the submission requirements might be an internal investigation.

Supervisory personnel assigned to various investigative units (e.g., Traffic Bureau, Detective Bureau, Special Investigation Bureau and Identification Technicians) are responsible for setting up procedures governing report submittal and review processes.

PATROL SERGEANT REPORT REVIEW AND ROUTING PROCEDURES

Sergeants shall ensure they review those reports submitted to AEGIS respective to their Patrol Team.

Sergeants, who supervised other uniformed personnel (e.g., Special Enforcement Unit/Drug Task Force, Community Service Officers, Community Services Bureau/Crime Analysis Unit, Bike Officers, Reserve Officers, etc.), shall ensure they review all reports submitted by their personnel during their work shifts.

A sergeant whose officer is staying late to work on an IN-CUSTODY case shall confer with another

GENERAL REPORT INFORMATION

INVESTIGATIVE NARRATIVE

- a. The Date and time of the incident (occurred/dispatched/on-scene)
- b. Who responded? (Units/Officers)
- c. Where did you respond from?
- d. The information you received from Dispatch at the time of the call (the information may be limited or even conflicting but it is good to have in the report). Dispatch may relay:
 1. What's happening, a particular crime, etc.
 2. Who is calling it in (Reporting party, both sides of an argument, multiple callers, etc.)
 3. What if anything the dispatcher hears, i.e. sounds of a struggle, crying, etc.
 4. Prior events (prior domestic violence incidents, flags on the residence)
 5. Suspect description, location or direction of travel
 6. Suspect vehicle information (if applicable)
- e. Your initial observations of the scene:
 1. What did you see as you approached?
 2. What did you see once you got there

BERKELEY POLICE DEPARTMENT REPORT WRITING MANUAL

3. Who did you see
 4. What was their reaction to seeing the police?
 5. What did you see/hear as you approached?
 6. What did you see/hear when you got there?
 7. Who did you speak to? (What was their emotional condition/Physical condition)
- f. Your initial actions:
1. Secured the scene, (handcuffed persons, separated parties, cleared residence, etc.)
 2. Requested additional resources, (more cops, medical, supervisor, etc.)
- g. Describe the scene
1. Injuries, people's demeanor, condition of the house
 2. Evidence located, by whom and where
- h. Your investigation
1. Identification of parties (identified as RP, victim or how determined to be victim, relationship between parties)
 2. Brief statements of involved parties
- i. Investigative actions
1. Crime determined or no crime determined
 2. Suspect arrested or identified
 3. Statement of involved parties (written or recorded)
 4. Transportation of suspect/victims/witnesses
 5. Evidence collection
 6. Records checks
 7. Booked evidence

SHORT REPORTS

“Short” reports consist only of an “Investigative Narrative”. Short reports are appropriate when there are no suspects or leads, such as a 459 auto or 10851. For example:

INVESTIGATIVE NARRATIVE:

BERKELEY POLICE DEPARTMENT REPORT WRITING MANUAL

On 2/23/13 at 1147 hrs I contacted Nead at her home regarding a stolen auto report. Nead advised she parked her vehicle last night at 1800 hrs on the west side of Ellis St. just north of Russell St. Nead advised she came out this morning and saw it was gone. Nead advised that she left the vehicle locked, all keys are accounted for and no one has permission to drive the vehicle.

I gave Nead advice and a report receipt. I conducted an area check for the vehicle with negative results. I entered the vehicle into SVS and had Dispatch broadcast a BOLO.

Nothing further.

DESCRIPTIVE WORDS

When describing a scene, it is often easy to use a basic description to get to the next portion of the report, i.e. "the apartment was in disarray". However, you aren't doing the scene justice, especially if details may become useful at a later time. So instead of, "the apartment was in disarray", you might say, "I observed dirty clothing on the floor and on the furniture. Dirty dishes in the sink, flies throughout the apartment, I could smell the strong odor of ammonia and observed a dirty litter box in the corner. Beer bottles and cigarette butts littered the coffee table.

You may think writing this is redundant when you have a body camera or there was video taken of the scene, but usually those looking at the case initially won't view the video until much later. It's imperative to convey situation to get the attention of the reader, to paint the picture and help them understand what happened.

CALL TAKING

SCOPE

The function of the Police Dispatcher working call taking is to provide 24 hour a day telephone service to the public for information as well as routine or emergency assistance. Dispatchers shall follow these standardized procedures and expectations for call processing.

CALL TAKER EXPECTATIONS

1. **CONTROLLING THE CALL: Where, What, When, Weapons, Who:** The call taker must maintain control of the call in order to receive the answers to the most important questions in the shortest period of time.
2. **VERIFICATION AND ACCURACY: Verify details that are received through the initial line of questioning:** The call taker will use active listening and repeat back to the caller the information he/she provided in order to confirm the documented details.
3. **COMPASSION AND PATIENCE**
 - a. **Help the caller understand what is happening:** The call taker will use a firm yet reassuring tone of voice with the caller, stating that you are going to help and will need to ask a number of questions in order to do so.
 - b. **Commit the caller to staying on the line and working with you as long as it is safe to do so:** The call taker will state that it is very important for the caller to remain on the line as long as it is safe to do so, and to provide the best information possible in response to the questions being asked. The call taker will emphasize to the caller that there will be some moments of silence or side conversations with other dispatchers as the details are entered, but that they not ignoring him/her nor ending the call and the caller should be advised not to hang up during these periods.
 - c. **Explain what will happen next:** The call taker will remain on the line with the caller as long as is possible to continue information gathering and to assure the caller that help will be sent. However, if it is necessary to end the initial call, assure the caller that units will respond as soon as possible. If the caller asks when officers might arrive, the call taker may state that they cannot estimate the time because there are too many variables. When appropriate, the call taker may add that there may be a delay due to higher-priority calls or high call volume.
4. **PROFESSIONALISM: Speak calmly and clearly and with enough volume for the caller to hear you.** The call taker should project authority, yet portray understanding and appropriate empathy through a steady and reassuring tone. Speak in clear and understandable terms; do not use departmental codes or jargon.
5. **RESPECT:**
 - a. **Do not demonstrate an argumentative demeanor,** and do not question the integrity or validity of the caller or the reported incident. What may appear improbable or unlikely upon first report may in fact be what has occurred.
 - b. **Do not use sarcasm or diminish the caller's perceived importance/urgency of the reported situation. Do not patronize the caller.** All callers should be treated with understanding and dignity, regardless of how well they can articulate or explain what has occurred and/or how well they are able to cooperate/comply with the call intake process the call taker is performing.

PROCEDURE FOR INFORMATION GATHERING

The call taker shall obtain the basic information from the caller using the **5 W's format (Where, What, When, Weapons, Who)**, as well as any secondary questioning necessary to provide pertinent information to Control and Field Units. When appropriate, the call taker may ask callers near the end of the call if there is anything they would like to add. All information must be documented in the narrative window of the CAD mask.

1. **WHERE (Location):** The call taker will make every attempt to enter an accurate location of **where** the Incident occurred into the CAD call mask.
2. The call taker shall request the exact location of the incident (structure addresses, street names, intersections, directional identifiers).
3. If specific location is unknown, the call taker shall request landmarks or estimated proximity to landmarks.
 - a. The call taker will tell the caller and any witnesses to remain at their current location (unless determined unsafe) until officers arrive.
 - b. **Address Verification.** The call taker shall verify all addresses reported. If the address
 - c. provided by the caller matches the ALI display, the address may be considered verified. In
 - d. the event there is a discrepancy, additional steps must be taken to verify the location of the
 - e. incident being reported, such as repeating the address twice and/or enunciating each digit of
 - f. the address if necessary to clarify.
4. **WHAT (Nature of the Incident):** The call taker shall interview the caller in order to ascertain **what** happened
5. Determine the appropriate call type
6. Ask the caller if there are there injuries or if anyone requires medical attention
 - a. If **medical attention is required, copy call to Fire, document the nature of the injuries and status of scene security in the call's narrative.**
 - b. If there are injuries and no police response is required, the call taker will then transfer the caller to ACCREC for pre-arrival instructions, per the EMD policy.
7. **WHEN (Time of Occurrence):** The call taker shall interview the caller to ascertain **when** the incident happened.
8. The call taker will determine if the incident is in-progress, just prior, or a cold report.
 - a. In Progress: Incidents occurring now or within past 2 minutes
 - b. Just Prior: Incidents occurring 2-10 minutes prior or incidents occurring more than 10 minutes prior but the current location of the responsible is known
 - c. Cold Reports: Incidents occurring more than 10 minutes prior where the current location of the responsible is not known
 - d. **3.2 If the call type is a priority 1 or 2 and the incident is in-progress, just prior (10 minutes or less), or if the suspect is still on scene, the call taker shall make the call "ready for service" immediately after the incident location is verified and the call type is determined.**
9. **WEAPONS (First Responder/Citizen Safety Hazards):** The call taker shall ascertain if there are any *weapons* involved or other potential on-scene *hazards*.
 - a. Weapons: The call taker shall ask the caller if any weapons were seen, simulated or verbally threatened.
 - b. Intoxicated or Mentally Disturbed Subjects: The call taker will conduct a secondary line of questioning when a caller reports erratic or unusual behavior or the belief that someone is intoxicated or mentally disturbed.

- c. The call taker shall ask the caller if there are any other on-scene **hazards** that could potentially harm responding units.

5. **WHO (Descriptions of Involved Subjects):** The call taker shall attempt to obtain full suspect descriptions using the following interview format:

- | | | |
|---------------------------|--------------------------------|--------------------------------|
| 1. Race and/or complexion | 6. Weight | 11. Shirt /Dress |
| 2. Gender | 7. Hair (color, length, style) | 12. Pants/Skirt/Shorts |
| 3. Juvenile or Adult | 8. Eyes (glasses) | 13. Shoes |
| 4. Age (or approximate) | 9. Headwear | 14. Other distinctive features |
| 5. Height | 10. Coat | |

For in-progress or just prior priority 1 and 2 calls, the call taker must ascertain whether the suspect is still in sight or if they have left the scene. **If the suspect has left the scene, the call taker shall first ask the caller for the direction of travel, time element and a description of the mode of transportation (i.e. foot, vehicle, bike). The call taker shall immediately enter this information into the narrative window of the CAD call mask before obtaining any suspect description(s).**

“Hot call” Abbreviated Description Format: When obtaining information for in-progress or just prior priority 1 and 2 calls, **the call taker shall update the call narrative with new information as it is available by pressing <ENTER>**. The following abbreviated interview format should be used in order to provide critical information as quickly as possible.

- | | | |
|----------------------------------|---|--------------------------------|
| 1. Race and/or complexion | 5. <ENTER> | 9. Height and weight |
| 2. Gender | 6. Head wear | 10. Hair (length and style) |
| 3. Juvenile or Adult | 7. Outermost layer of clothing, top and bottom. | 11. Eyes (eyewear) |
| 4. Age (Specific or approximate) | 8. <ENTER> | 11. Other distinctive features |

The following order should be used to document physical descriptions of **transportation modes**:

1. **Vehicles:** The call taker shall use the CYMBAL format (**Color, Year, Make, Body type, Additional Characteristics, License plate**) to ask the caller for a description of a vehicle. The call taker will also ask the number of occupants, position of suspect (i.e. Driver, front or back seat passenger) and direction of travel.
2. **Bus:** The call taker shall ask the caller the Bus Company, coach number, route number and direction of travel.
3. **BART:** The call taker shall ask the caller the BART station name, platform information and train information (i.e. Richmond, Fremont, San Francisco) and train Direction
4. **Bike:** The call taker ask the caller the bike color brand, and type (i.e. Black Diamondback Mountain Bike) and direction of travel.

911 EMERGENCY CALLS

STANDARDS AND DEFINITIONS

1. **Standard for Answering 9-1-1 Calls.** At all times, ninety five percent (95%) of all 9-1-1 calls in the communications Center should be answered within twenty (20) seconds (approximately 6 rings). During the hours of 1000-1900, ninety percent (90%) of all 9-1-1 calls shall be answered within ten (10) seconds (approximately 3 rings).
2. **Order of Answering Priority.** It is the responsibility of on duty call takers to answer all in-coming calls. All phone calls shall be answered in order of priority.
 - a. 1st priority will be 9-1-1 lines
 - b. 2nd priority will be emergency 7/10 digit phone lines
 - c. 3rd priority will be non-emergency lines
 - d. 4th priority will be fire, administrative and/or internal phone lines
3. **Standard Answering Protocols**
 - a. **9-1-1 lines.** All 9-1-1 lines shall be answered “**9-1-1, what is the address of the emergency?**”
 - b. **7 digit emergency and non-emergency lines:** the call taker shall clearly identify both the answering Agency and themselves.
 - c. **Fire, administrative and/or internal phone lines.** When answering in house and direct connect lines, the call taker shall clearly identify both the answering agency and themselves.
4. **WIRELESS 911 PHASES- Wireless 9-1-1 Call Routing**

All wireless and wireline 9-1-1 calls are received in the Communications Center on the same trunks. This system has been implemented to insure that wireless calls are handled in the same manner as wireline calls.

Phase 0 (Zero) Occurs when a wireless 9-1-1 call is delivered to the Communications Center with or without call-back or location information. In an Enhanced 9-1-1 environment the Communications Center may receive the following information: the tower-face or routing telephone number identifier, location of the tower that is handling the call and wireless service provider.

Phase I Occurs when a wireless 9-1-1 call is delivered to the Communications Center with the following information: wireless phone call back number, location of the tower that is handling the call and identification of the wireless service provider responsible for the tower that is handling the call.

Phase II Occurs when a wireless 9-1-1 call is delivered to the Communications Center with the approximate location of the wireless caller based on the X, Y (longitude and latitude) coordinates determined by the system. In the event Phase II information is not delivered with the initial call data, **the call taker should wait ten (10) seconds before initiating a re-transmittal.**

TRANSFERRING CALLS

1. **Non-Emergency Calls Received on Emergency Lines.** If a call is of a non-emergency nature and it is received on an emergency telephone line, the dispatcher will advise the caller that they have called on an emergency line and will direct the caller to a non-emergency line. It is not recommended that the call be transferred to an administrative line, since that may tie up the 9-1-1 trunks.
2. **Transferring Emergency Calls.** When emergency calls need to be transferred to another agency,

the dispatcher will transfer the call without delay. The dispatcher will advise the caller: "Please do not hang up; I am connecting you with (name of the agency)." The dispatcher should stay on the line until the connection is complete and all pertinent information has been relayed to the answering PSAP.

4. **Misrouted Calls/ Incorrect ANI/ALI Information.** Calls may be received by this Agency that are intended for another Agency or display incorrect location information on the ALI screen. The call taker should complete an Alameda County Report of Misroute or Incorrect ALI Information form and forward it to a Supervisor for processing.

PROCESSING CALLS (LANDLINE AND WIRELESS)

1. **Abandoned Calls/Disconnects.** The call taker will attempt a call back when a **landline or wireless** 9-1-1 call is received and the call disconnects before the dispatcher can determine if assistance is needed. The dispatcher will call the number back once to make this determination. If the phone is busy or there is no answer, additional attempts to contact the caller will not be made by the dispatcher. If the callback attempt goes to voicemail, no message will be left. **If the call taker is unable to make contact and verify that no assistance is needed, a call for service shall be created using the CFS type "A911 or W911".**
2. **Silent Calls.** In compliance with Public Law 101-336, also known as the *Americans with Disabilities Act*, all silent calls will be interrogated with a TTY/TDD to determine if the caller is attempting to report an emergency using a special communications device for hearing impaired individuals. **If the call taker is unable to verify that no assistance is needed, a call for service shall be created using the CFS type "A911 or W911" and attempt to communicate/contact shall be documented in the call narrative.**
3. **Contact.** If contact is made with the caller, the call taker shall interview the caller to determine whether a Police, Fire or Medical response is required.
 - **Indicated emergency.** Any evidence of an emergency situation requires that the call taker initiate efforts to re-contact the caller to determine the nature of the incident and an accurate location for appropriate public safety response. **If attempts to contact the caller are unsuccessful, a call for service shall be created based on the caller location provided by the ANI/ALI. Extraordinary attempts to locate a Phase I or II wireless 9-1-1 disconnect caller will only be made in the instance where an emergency is clearly indicated.**
 - **Discretion.** The call taker should pay close attention to background noise, tone and word choice of the caller as additional evidence to assist with determination of the status of the 9-1-1 call. The time of day and location of the caller may be additional clues to indicate whether a response is necessary. **In any situation where the call taker believes an emergency situation may exist, a call for service shall be created.**
 - **Foreign language calls.** The dispatcher will contact the language line for assistance in processing the call. The dispatcher will give the Agency's client ID 901104 and specify the language needing translation.
4. **Cancellation.** Communications personnel may disregard a wireless or landline 9-1-1 call if there is evidence that the call is one of the following situations:
 - **9-1-1 Misdial.** A call is classified as a 9-1-1 misdial when the caller stays on the line and admits to the misdial. **No call for service will be created.**

- **Unintentional 9-1-1 call.** A call is classified as unintentional when the call taker can hear conversation, radio, etc. in the background and have listened sufficiently and checked with a TTY/TDD to determine that there is no indication of an emergency situation. **No call for service will be created.**
- **Children playing on the phone/ Prank calls.** Call takers will call back a suspected prank caller. Children playing on the phone and prank calls should be treated as a real emergency until proven otherwise. The called party will be questioned to determine if further action is needed or a response is required.
- **Chronic prank calls.** At the call taker's discretion a call for service may be created using the CFS type "AID" and call nature of "to dispatch", to have field units issue an admonishment to the prank caller.

5. **Phase 0, 1 or 2 calls:**

When a wireless call is received and distance displayed on the ALI exceeds 50 meters (150 feet) the call taker shall create a call for service using the call type "W911" and enter the location information and document the distance in the call narrative. **If no sounds of distress or emergent circumstances are detected by the call taker, the call will be documented and closed without being dispatched.**

When a wireless call is received and distance displayed on the ALI is less than 50 meters (150 feet) a call for service shall be created using the CFS type "W911" and the call taker shall enter the location information and document the distance in the call narrative. **If the call taker is unable to make contact and verify that no assistance is needed, an officer shall be dispatched for an area check.**

6. **Documentation.** Call takers will document with whom they spoke, the reason 9-1-1 was dialed (e.g. nature of the call, or accidental, misdial) and any other explanatory or "intuitive" observations discerned from the call. A disposition should be added to the call record for statistical analysis and documentation.
7. **Redundant Calls.** Redundant calls occur when several calls have been received on the same incident. The call taker will make sure that the caller is reporting the same incident and not an unrelated one. Once the call taker is sure that the caller is reporting an incident that has already been received and any additional pertinent information is obtained, the caller will be advised that the call information has already been reported. These calls should be disconnected as soon as possible in order not to tie up any 9 -1-1 lines unnecessarily.

EMERGENCY MEDICAL DISPATCH (EMD)

1. **Purpose and Scope:** The purpose of this procedure is to provide members of the public, when calling for emergency medical assistance, with first aid pre-arrival instructions that will assist the victim while waiting for the arrival of emergency first responders. This procedure outlines how callers are to be connected to qualified dispatchers at the Alameda County Regional Emergency Call Center (ACRECC) to provide Emergency Medical Dispatch (EMD). Emergency Medical Dispatchers (EMD) do not diagnose medical conditions, nor do they give medical advice. They instead provide basic instructions over the telephone, following an established protocol, to assist in the care of the patient until fire and medical personnel arrive. ACRECC has adopted the National Academy of Emergency Medical Dispatch (NAEMD) as the EMD standard for our service area.
2. **Procedure:** EMD services are provided by ACRECC dispatchers. Berkeley Public Safety Dispatchers (PSD's) shall not give instructions intended to be covered by an EMD dispatcher. The transfer of an emergency call should be done in accordance with the State Mandatory Standard.
 - a. **State Mandatory Standard:** When transferring a 9-1-1 call, the transferring agency should advise the calling party that the call is being transferred. The transferring agency should remain on the line until the call has been successfully transitioned to the receiving call taker. 9-1-1 calls may only be transferred once. Should a 9-1-1 call be inadvertently transferred to the wrong agency, that agency will perform the interrogation and relay the information to the proper agency. (State of California 9-1-1 Operations Manual Fifth Edition).
3. **Call Processing:** All calls for medical assistance shall, whenever possible, be immediately transferred to ACRECC for EMD instructions once the nature and location of the emergency has been determined. The call taker will enter the appropriate call for service (Police, Fire or both) and advise the caller that they are being transferred to an Emergency Medical Dispatcher.
 - a. For in progress crimes the call taker should attempt to obtain nature of crime, suspect information and scene security information and remain on the line after transferring the call in order to provide updates as needed.
 - b. When transferring the call to ACRECC, the call taker will announce the call and if at all possible, remain on the line and monitor the information in order to update responding Police and/or Fire units.
 - a. The announcement should include the following:
 - o This is Berkeley; we are transferring a caller with a medical emergency.
 - o State the chief complaint (difficulty breathing, broken leg etc...)
 - o Provide the call back number of the caller.
 - c. Should the ACRECC dispatcher obtain relevant information after the call taker has terminated the call, it is the responsibility of that dispatcher to re-contact BPD and relay the information.
 - d. If the call is received via a transferable non-9-1-1 line, the call taker shall obtain the location of the incident and the call back number of the caller in case the transfer does not go through. The call taker shall transfer the caller to ACRECC using the appropriate emergency seven digit number, announce the call and follow the procedures as if the call was a 9-1-1 transfer.

INTERNET-BASED INCIDENT REPORTING (COPLOGIC) CRITERIA

General Order C-7 Internet-Based Incident Reporting establishes a policy and procedure for the Department's internet-based incident reporting system (CopLogic). A main tenement of that General Order is that our department will remain true to our established value of excellent customer service. This Captain's Instruction is effective immediately and is intended to provide further detail on how the availability of CopLogic will be shared by the Communications Center with community members who are making a crime or incident report.

The call taker shall use the following criteria to determine if it is appropriate to offer internet-based reporting:

1. The caller is reporting one or more of the following crimes:
 - a. Harassing phone calls (PC 653(m))
 - b. Vehicle tampering (VC 10852)
 - c. Identity theft (PC 530.5)
 - d. Theft, petty or grand (484 or 487(a))
NOTE: stolen license plates do not apply, due to the need for an SVS entry
 - e. Vandalism (PC 594)
2. **AND** the crime or incident lacks investigative leads and no detailed suspect information is available
3. **AND** the crime occurred in our jurisdiction (CopLogic reports cannot be entered for Out Aid type reports)

The call taker shall provide the caller the following information and may use the following script:

"Due to the type of crime and circumstances you are reporting, you may choose to file a report online. If you choose to file on line, I can email you instructions and a web link <https://www.cityofberkeley.info/onlinereport/> to make the report at your convenience. You will immediately receive a tracking number and once the report is approved, you will be emailed a digital copy (usually within 3-4 days).

You may also chose to file a report in person or by phone. If you chose to make the report in person or by phone, we will dispatch an officer as soon as one is available-- usually within 60 to 90 minutes. You will immediately receive a case number and may request a copy of the report from our Records department (usually available within 10-14 days of request). Which option would you prefer?

If the caller would like to make an online report and they meet the criteria above, the call taker can verbally provide the web link or email instructions as follows:

1. In Outlook, click New (new message)
2. In the From field, type **Communications Center** (If the From field is not visible, click on Options tab and click Show From)
3. Enter the recipients email address and then cut and paste the following text into the body of the email:

Thank you for your inquiry into online reporting. To make an online report:

- a. **Click on the hyperlink- [ci.berkeley.ca.us/onlinereport/](https://www.ci.berkeley.ca.us/onlinereport/)**
- b. **Follow the detailed instructions from there. Please do not respond to this email. This mailbox will not accept incoming messages. Please call 510-981-5900 with any questions.**

POLICE DESK/CHANNEL ONE

SCOPE

The function of the Police Dispatcher working the Police Desk (Control), is to provide dispatch services by analyzing, prioritizing, and processing calls, while maintaining radio contact with Field Units. Control's role in regards to officer and citizen safety is pivotal and should always be the highest priority when working this position.

1. Control shall analyze calls for service, determine the appropriate response action, and ensure proper documentation occurs.
 - a. Control shall update the CAD record or incident log, and maintain accurate call narrative or documentation.
 - b. Control shall assign and coordinate responders to incidents based on the nature of the incident, the priority of the incident, and available resources.
 - c. Control shall track and document incident and unit status, and radio activity.
2. Control shall maintain radio contact with Field Units to ensure safe, efficient and effective response to calls for service.
 - a. Control shall consistently identify, analyze, and relay pertinent incident information including call updates, BOLO (Be on the Look-Out) and attempt to locate information.
 - b. Control shall obtain acknowledgement of calls for service from responders, and monitor and acknowledge radio traffic.
 - c. When provided updates from field units, Control shall state the field unit's identifier and *only* repeat or "parrot" information that relates to unit safety, suspect information or changes in unit location when field units are actively assigned to a call.
 - d. Control shall analyze and evaluate all available information in order to identify the potential for escalation of the incident and perform status checks (Rings) to determine scene and responder safety.
 - a. Any want or warrant information documented in the narrative by a call taker shall immediately be relayed to responding units. When want or warrant information is discovered after a unit has arrived on scene shall be relayed using a confidential (10-36) format.
 - e. Control shall analyze and disseminate information to additional responders and resources including, but not limited to, Hazmat teams, Fire and EMS Unit and Mutual Aid Agencies.
 - f. Control shall comply with regulations of the Federal Communications Commission (FCC) that directly apply to public safety radio.
3. Control shall properly apply Agency notification guidelines to daily operations and special events.
4. Control shall coordinate resources with other entities where necessary.
 - a. Control shall properly apply Agency defined mutual or automatic aid procedures and coordinate with other entities as necessary.
 - b. Control shall fulfill their role in ICS, NIMS and state and local emergency operations plans.
5. Control shall identify and relay pertinent shift activities to a relief dispatcher at shift or position change.
6. Control shall coordinate assigned radio channels and/or talk groups.
7. Control shall participate in Agency defined post-incident activities.

FIELD UNIT STATUS/AVAILABILITY

1. Control shall ensure that the CAD status board accurately reflects the location and status of units in the field.
2. All field units shall advise of their status on Channel 1.
3. All field units assigned to calls must **verbally** acknowledge receiving the call. The primary officer will verbally acknowledge the assignment first, using their Unit ID and response status of either, "Copy, 10-4 or enroute or reassign." After the primary unit's acknowledgement, the cover unit(s) will acknowledge using their Unit ID and response status of either, "Copy, 10-4 or enroute or reassign"

ASSIGNING CALLS FOR SERVICE TO FIELD UNITS

1. **When a new Call for Service is received by Control, the location, narrative and CFS type shall be reviewed for accuracy and completeness prior to assignment.**
 - a. Confirm the location is verified or overwritten correctly.
 - b. Control shall relay to responding units any pertinent information that the call taker has received from the reporting party using the **5 W's format (Where, What, When, Weapons, Who)**
 - c. Review the narrative of the call and broadcast information that enhances the safety of responding units and assists in apprehending suspects.
 - d. Control shall begin an assignment by broadcasting the unit identifiers and call type only. After receiving verbal acknowledgment from the units assigned Control will then provide call type, location, and details.
2. **Dispatching Priority 1 & 2 in-progress and just prior calls without complete information:**
 - a. Once the location and the call type have been determined Control will:
 1. Begin assigning units to the call, broadcasting any information available.
 2. Advise responding units that the call taker is attempting to obtain additional information
Example: "1 Adam 4 with 1 Adam 12 and 1 Adam 22 to cover, 211 just prior, West Frontage and University. Still getting further"
 - b. Control shall promptly update responding units as additional information is entered into the call narrative by the call taker.
3. **Self-Dispatching:** Officers may MDT self-dispatch themselves to Priority Zero, Priority 2 cold reports, and any lower priority calls.
 - a. For the purpose of Officer Safety and board accuracy, **officers may not MDT self-dispatch themselves to Priority 1 or in-progress Priority 2 calls.**
 - b. Officers shall verbally inform control whenever MDT self-dispatching is done, for the purpose of providing required cover and maintaining board accuracy.
4. **Calls For Service - Not Ready for Dispatch:** There are several factors which may cause a delay in making a call ready (i.e. attempting to clarify the crime, time element, location or a language barrier). Until the "ready for dispatch" function is activated, Control will not see the call in their pending call for service window.
 - a. Officers seeing a pending call for service not yet broadcast may ask Control for information about the call on Channel 1.
 - b. For the purpose of officer safety, Officers shall not computer self-dispatch or be eb-route until a call is complete and ready for dispatch.

ASSIGNMENT OF CALLS FOR SERVICE

Control will make a reasonable effort to evenly assign calls for service so that the workload is distributed equally among the workforce. Control shall use the procedure outlined as follows:

1. Control will attempt to assign reports to the appropriate beat.
2. Control will use swing units according to their specific assignment. There are numerous options available to field supervisors regarding assignment of swing officers. The swing officer's call sign assigned will dictate assignment (specific geographical areas, citywide or special projects).
3. If the beat officer or a swing unit is not available, other officers from adjoining beats will be assigned, based on the Standard Order of Assignment.
4. Dispatching shall be done via CAD recommendation or Unit beat proximity.
5. A Field Supervisor may reassign a detail in order to best utilize patrol resources.
6. Assignment time limits shall be established by the priority of the Call For Service Type:
 - a. Priority 1 calls: Immediate
 - b. Priority 2 calls: Within 20 minutes
 - c. Priority 3 calls: Within 60 minutes
 - d. Priority 4 calls: Within 90 minutes

COVER ASSIGNMENTS

1. No officer shall knowingly be sent to any call without adequate cover. Control will dispatch the recommended number of units according to CAD recommendation, based on the CFS type and Alert Notifications.
2. When a detail requires a cover unit(s), Control shall assign the units simultaneously.
3. An assigned officer or supervisor may request that additional cover units be assigned.

STANDARD ORDER OF ASSIGNMENT

PRIORITY 1 CALLS

1. Beat officer (or Early Out, when appropriate)
2. Geographic or Citywide swing officer
3. Neighboring Beat Officer
4. Other geographical swing officer
5. Any available Officer
6. Flat broadcast
7. Break or divert officers from lower priority calls.

PRIORITY 2 CALLS –IN PROGRESS OR JUST PRIOR

1. Beat officer (or Early Out, when appropriate)
2. Geographic or Citywide swing officer
3. Neighboring Beat Officer
4. Other geographical swing officer
5. Any available Officer
6. Flat broadcast
7. Break or divert officers from lower priority calls

PRIORITY 2 CALLS- COLD REPORT

1. Beat Officer
 - a. If the beat officer is assigned to a priority 2, 3 or 4 cold report when a pending call's timer expires (20 minutes), attempt to contact the Beat Officer and inform them of a call holding in their beat. You may ask them for an estimated time of availability or if the call should be reassigned
2. Geographic or Citywide Swing Officer
3. Other geographical swing officer
4. Any available Officer

PRIORITY 3 CALLS

1. Beat Officer
 - a. After timer expires (60 minutes), attempt to contact the Beat Officer and inform them of a call holding in their beat. You may ask them for an estimated time of availability or if the call should be reassigned to another officer
2. Geographic or Citywide Swing Officer
3. Other geographic swing officer
4. Any available Officer

PRIORITY 4 CALLS

1. Beat Officer
 - a. After timer expires (90 minutes), attempt to contact the Beat Officer and inform them of a call holding in their beat. You may ask them for an estimated time of availability or if the call should be reassigned to another officer.
2. Other geographical swing officer
3. Any available Officer

EARLY-OUT OFFICERS

The early out officer will be available to respond to calls for service by 0500. The early-out officer will be dispatched to all calls for service as detailed below. At the direction of a field supervisor, Control may hold a call for service. Direction to do so shall be documented in the narrative of the call and shall include who and why the hold was authorized.

1. Early out officers will handle major calls for service that occur between 0500-0600 hours.
2. At the discretion of the Off-going team's Sergeant, the early-out officer may be assigned to take over or relieve off-going officers on major incidents occurring prior to 0500.
3. Early-out officers will be assigned as cover officers as needed.
4. Unless assigned to a Priority 1 or 2 call, early-out officers are expected to attend their team briefings.

HOLDING CALLS FOR SERVICE

All calls for service will be assigned according to the Standard Order of Assignment Policy and within the time limits established by the priority code of the call.

1. Calls for service will not be held for an oncoming team unless dispatch is directed to do so by a Watch Commander, senior sergeant or dispatch supervisor.
2. Holding/Handing calls off due to time of day:
 - a. **Weekend Shifts:** If a call assigned within the last two hours of the shift is complex or extensive in nature, Control will assign the call based the Standard Order of Assignment Policy and Priority code time limits if the oncoming team's early-out officer is not available. Once the early-out officer is available, a field sergeant will determine if the call will remain with the off-going officer as primary or be handed off to the next team.
 - b. **Weekday Shifts:** If a call assigned within the last hour of an off-going team's shift is complex or extensive in nature, Control will attempt to utilize off-going officers as cover units only. If a primary assignment must be made to an off-going officer, a field sergeants will determine if the call will remain with the off-going officer as primary or be handed off to either an oncoming team or overlapping team officer.
3. Any direction to hold or hand off a call for an early-out or oncoming beat officer shall be documented in the narrative of the call and shall include who and why the delay was authorized.
4. Preservation of Available Units: Control will not refrain from dispatching units to calls for service with the sole intention of retaining available units in the City.
 - a. Any direction from a field supervisor to hold calls for the purpose of keeping officers available shall be documented in the narrative of the call and shall include who and why the delay was authorized.

SITUATIONAL DENIAL/LIMITATION OF SERVICE

1. A Field Supervisor may direct the Communications Center not to take priority 2 cold and lower priority calls. Dispatchers will provide a brief explanation to reporting parties as to the reason for the denial or limited service and will advise citizens to call back at a later time to make their report.
 - a. Examples of when a denial of service may be necessary include: Major incidents, Protest/Demonstrations, Catastrophic events, Any event which severely impacts the availability of field units
2. **The Communications Center will not deny service for any Priority 1 or Priority 2 calls in progress or occurring just prior.**
3. Cop Logic will continue to be offered to citizens reporting Priority 2 cold reports that meet the criteria for online reporting.

"CODE 4" ASSIGNMENTS

1. In Progress/ Just Prior Priority 1 and 2 Assignments: Field units must be on scene before advising "Code 4" after which, any cover unit will be cancelled.
2. Priority 2 Cold calls and Lower calls: The primary officer may acknowledge with their designator (unit ID) and advise "Code 4", at which time control will cancel the cover unit(s).
3. Self Initiated Activity: When self-initiating activities (On-views) officers will either advise "code 4" or Control will dispatch the recommended number of units based on the CFS type of the self-initiated activity. The cover officer assigned will continue to respond unless the primary officer advises Code 4.
4. **"I'll advise" and "Code 4 for now" are not acceptable responses and should not be used.**

FLAT BROADCASTS/ BREAKING AND DIVERTING OFFICERS

The term “flat” refers to a situation where the status board shows there are no available units to assign to a call for service.

1. Flat Broadcasts are allowed for Priority 1 or Priority 2 in-progress or just prior calls only, for the purpose of alerting all units of the call.
2. At no time should a call be “flat broadcast” if any units show as available on the status board. If there are some, but not enough available units, Control will broadcast the call by assigning the available units and open dispatching for cover unit(s).
Example: “2a14, 2a16 with 1 unit to break and cover, 245 via knife, 2130 Martin Luther King”
3. If there is not a sufficient voluntary response to the flat broadcast, Control shall break or divert the sufficient number of units to respond to the call. This includes units 10-7, Code 7, 10-19 paper and those assigned to lower priority calls.
4. Field Supervisors may direct Control to reassign cover assignments to other units at their discretion. Any direction to do so shall be documented in the narrative and include who directed the reassignment.

CODE 33’S

1. A Code 33 (Emergency traffic only) may be initiated by field units or Control.
2. If additional information is received after officers arrive on scene that may jeopardize the safety of a first responder or citizen, Control will initiate a “Code 33” and take the appropriate action of relaying the additional information and/or getting a “ring” from officers.
3. Under normal circumstances, Control will dispatch all assignments on Channel 1 for the purpose of Officer Safety and accurate unit status monitoring. When a Code 33 is initiated, the event will remain on Channel 1.
 - a. Normal Channel 1 duties will move to Channel 2, until the event is called “Code 4, Code 34” by a unit on scene. Field units not assigned to the event shall switch to Channel 2 for assignments while monitoring Channel 1.
4. Field units have the option to ask for a Code 33 on Channel 2.
 - a. Control will continue normal operations on Channel 1 and a dispatcher assigned to Channel 2 will assume control of the incident on Channel 2.
 - b. Regular Channel 2 dispatch functions will then be moved to Channel 3 (RB1), until the event is called “Code 4, Code 34” by a unit on scene.
5. Once the incident is called “Code 4, Code 34” normal traffic will resume on all channels.

“THREE TONE ALERT” BROADCASTS

Control will alert all officers of an impending emergency, urgent broadcast, specific crime occurring or having occurred just prior by initiating the “three tone” alert.

1. Control will press and hold the Alert-3 button until 3 audible beeps are transmitted, then announce the following information: “Berkeley Units, a _____ (type of incident) via (if available) In-progress/just prior at _____ (location), still getting further...”
2. Control shall assign the recommended number of units to respond, based on the CFS type beginning with the Unit who will be assigned as primary, followed by the appropriate the cover units, if applicable.
 - a. If the CAD status board does not show enough available units, Control will make the following announcement: “Berkeley Units (# of units needed to meet recommendation) are needed to break and respond to the (type of incident) at (location)”.
 - b. If no unit volunteers to break, the Police Control Dispatcher will break the number of units required to meet the CFS response recommendation.
3. Non-urgent radio traffic shall cease on activation of a three tone alert, and shall not resume until the broadcast is complete.
4. Control will continually update responding officers with priority give to information relative to officer safety, such as weapons, involved vehicles, directions of flight, descriptions and location of involved parties, or changes to the CFS type and/or time element.
5. Officers should monitor radios at all times, at a volume allowing them to receive the three tone alert with the exception when doing so would jeopardize the officer’s personal safety or adversely affect an operational situation.
6. The following CFS types shall be broadcast immediately and shall receive a “three-tone” alert prior to broadcast if:
 - a. Based on the information given by the RP, the crime is in-progress or; occurred less than five minutes prior
 - b. *The Communications Center has received special instructions from a Sergeant or higher rank to do so due to special circumstances (crime series, intel, BOLO, etc.)

OFFICER NEEDS HELP 11-99

Occasionally, a citizen will call and say that an officer needs help or assistance. You should:

- Immediately determine the location of the officer
- Query the citizen on what is going on
- Enter a call for service (1198 code 3 or 1199) and call out to the Police Radio Dispatcher that an officer needs help
- Keep the caller on the phone until we get there, constantly updating all pertinent information
- Get suspect information
- Weapons involved, etc

Note: If the citizen initially tells you that the officer yelled out for the citizen to call the police, you should immediately determine the location of the officer

- Enter a call for service (1199) and call out to the Police Radio Dispatcher that an officer needs help
- Continue steps listed above

If another police agency calls asking for cover for one of their officers in our jurisdiction, you should:

- Immediately determine the location of the officer
- The code of response (1, 2, or 3)
- What's going on
- Enter a call for service via 1198 activity code
- Find out why the cover is needed
- If it's related to a car stop, get the vehicle description (CYMBL)
- If it's related to a pedestrian stop, get the suspect description (s)
- Keep the other agency on the phone until we arrive

If another agency calls in a car chase into our jurisdiction, you should:

- Get the location
- Direction of travel
- Immediately enter a call for service via "HOT" activity code
- Plug your phone into the jack
- Monitor channel 1 traffic for any questions from responding officers
- Vehicle description
- Speed
- Reason for the chase
- Get your map out
- Keep updating directions of travel until we arrive or the chase leaves our city

If another agency calls in a foot pursuit into our jurisdiction, you should:

- Get the location
- Direction of travel
- Immediately enter a call for service via "FOOT" activity code
- Plug your phone into the jack
- Monitor channel 1 traffic for any questions from responding officers

- Suspect description (s)
- Reason for the chase
- Get your map out
- Keep updating directions of travel until we arrive

FIELD UNIT NON-RESPONSE

If a field units cannot be raised on the air after two attempts on Channel 1, Dispatch shall make a reasonable attempt to locate the unit using the following methods:

1. Attempt to contact the field unit on all radio channels and via the PSB Voicemail
2. Dispatch officers to the last known location
3. Attempt to contact the unit by cell phone.

If these efforts are unsuccessful, the Watch Commander will be notified and will determine what further action will be taken to locate the field unit and ascertain their welfare.

HEIGHTENED OFFICER SAFETY DISPATCH PROTOCOL

At the direction of a Field Supervisor, heightened officer safety field operations may be implemented (i.e. 9 beat configuration, bravo units only, no cancelling of cover prior to arrival, holding of cold calls, etc.) The activation and de-activation of such operations will be made either verbally on Channel 1 or, by MDT or telephone, if necessary.

PATROL CODE 7'S

Every effort will be made to ensure that officers can take Code 7 and/or Sports care. All personnel should be aware that calls must be dispatched within the timeframe established by their priority.

1. Prior to granting Code 7 to an officer, Control will check the CAD status board for any unassigned calls holding in the Officer's beat and determine if the call needs to be dispatched to the Officer prior to Code 7. Priority 1 and 2 calls shall not be held in order to allow an Officer a Code 7.
2. Control will grant Code 7 or Sports Care to a maximum of two officers at a time, per team. A field supervisor has the ability to grant Code 7 to more than two officers after being apprised by Control of call volume, officer availability and any other pertinent information.

RADIO CHANNEL ASSIGNMENTS

To ensure that radio operation is effective and efficient while complying with the rules and regulations set down by the regulating agencies and to acquaint all Berkeley Police personnel with the use of police radios, radio channels and Federal regulations affecting their use these guidelines are established.

Personnel using any available radio channel will follow procedures as outlined:

1. **BPD Channel 1 (BPD 1)** is the primary talk group used by the Berkeley Police Department. The Communications Center will utilize channel 1 to dispatch calls for service to field units. Likewise, field units will broadcast all self-initiated activity on channel 1, except where doing so will hinder the safety of personnel.

- a. When it is determined that there is a need to change channels the selection of a secondary channel should be made after considering the type of incident involved and the constraints upon the secondary channel.
2. **BPD Channel 2 (BPD 2)** is another talk group option to BPD Channel 1, and should be utilized for non-priority radio traffic, such as non-emergency requests by Patrol (case numbers, tows, call backs to alarm companies etc...). BPD Channel 2 becomes the primary frequency during a Code 33 on Channel
3. **BPD Channel 3 (BPD RB1)** is another talk group that is used for non-emergency inquiries on subjects, vehicles and property. When Channel 2 is being used as the main talk group during a Code 33 on Channel 1, then Channel 3 will also be used for non-priority radio traffic, such as non-emergency requests by Patrol.
4. **Specialized Talk Groups:** There are other talk groups used for specialized events, SEU, DD, Parking Enforcement etc. These include **Channel 4 (TAC 1)**, **Channel 5 (TAC 2)**, **Channel 6 (BPD INV 1)**, **Channel 7 (BPD INV 2)**, and **Channel 8 (BPD PRKG)**. These channels are typically not monitored by the Communications Center.
5. **BFD Channel 1 (BER1)** is the primary talk group utilized by Berkeley Fire Department for calls for service. There are other talk groups used by BFD which include: **BFD Channel 2 (BER2)**, **BFD Command 11 & 12**, **BFD TAC 31 & TAC 32**
6. Advanced notification to the Communications Center Manager and Dispatch Supervisors should be made as soon as the scheduled date(s) of a special operation is confirmed. This will allow the opportunity to appropriately staff the Communications Center to best assist those radio users. Upon notification of a special operation, arrangements can be made with the Communications Center Manager to have those channels monitored during their special operation.

FIRE DESK OPERATIONS

SCOPE

The function of a Fire Desk Dispatcher is to provide dispatch services by analyzing, prioritizing, and processing calls while maintaining radio contact with responders to ensure safe, efficient, and effective responses to requests for fire services, in accordance with local, state, and national standards. A fire service dispatcher may receive calls for service by incoming telephone calls, CAD incidents, radio traffic, and other methods.

1. The Fire Desk dispatcher shall be able to analyze radio traffic and calls for service and determine the appropriate response action.
2. The Fire Desk dispatcher shall accurately create and update the CAD record or incident log, and maintain accurate call narrative or documentation.
3. The Fire Desk dispatcher shall determine the nature and priority of incidents and assign available resources accordingly.
4. The Fire Desk dispatcher shall consistently identify, analyze, and relay initial pertinent incident information to field units as appropriate.
 - a. The Fire Desk Dispatcher shall obtain verbal or electronic acknowledgement of calls
 - b. The Fire Desk Dispatcher shall evaluate information and relay updates as appropriate.
 - c. The Fire Desk Dispatcher shall analyze and disseminate information to additional responders and resources including, but not limited to: Hazmat teams, Forest Service, EMS, Law Enforcement, etc.
 - d. The Fire Desk Dispatcher shall monitor and acknowledge radio traffic on assigned channels.
 - e. The Fire Desk dispatcher shall track and document radio activity, incident, and unit status.
 - f. The Fire Desk dispatcher shall analyze and evaluate all available information in order identify the potential for escalation of the incident and perform status checks to determine scene and responder safety.
 - g. The Fire Desk dispatcher shall properly process alarm signal tracking notifications, updates on alarm activity and relay notifications and updates to responding units.
5. The Fire Desk dispatcher shall properly apply Agency notification guidelines to daily operations and special events.
6. The Fire Desk dispatcher shall cooperate with and coordinate resources as follows:
 - a. The Fire Desk dispatcher shall proper apply Agency defined mutual aid procedures.
 - i. The Fire Desk dispatcher shall coordinate assigned radio channels and/or talk groups,
 - ii. The Fire Desk dispatcher shall understand and fulfill their role in ICS, NIMS and state and local emergency operations plans.
 - b. The Fire Desk dispatcher shall participate in all Agency defined post-incident activities.
7. The Fire Desk dispatcher shall identify and relay pertinent shift activities to dispatchers relieving them for breaks, shift change or position change.

8. The Fire Desk Dispatcher shall comply with regulations of the Federal Communications Commission (FCC) that directly apply to public safety radio.

ADDRESSING UNITS ON THE RADIO

1. A standard method for addressing users on the radio shall be strictly adhered to. Communication will begin with the identifier of the unit being called, followed by the phrase “this is” and the identifier of your unit.
 - a. The radio identifier for the Fire Dispatcher shall be “Berkeley” followed by the channel number. On White Fire 1, the Fire Dispatcher shall be “Berkeley Fire White1”.
2. It is critical for units to use the proper identifier when addressing the Fire Dispatcher on the radio, especially when the dispatcher is working more than one channel. This permits the dispatcher to determine which channel the caller is on. Adherence to this procedure will assist the Fire Dispatcher with utilization of two channels simultaneously, such as the dispatch channel and a TAC channel for a multi-unit response.

UNIT TRANSMISSIONS TO THE FIRE DISPATCHER

1. **Unit messages** to the Fire Dispatcher which are of significant length shall be transmitted only after acknowledgement from the Fire Dispatcher.
 - a. When traffic is at a low level and the length of a transmission is short, mobile units may transmit without clearance from the Fire Dispatcher.
 - b. When transmitting without clearance, the officer must not only be conscious of on-going traffic but must also assume responsibility that the message was received by the Fire Dispatcher. If they do not acknowledge the transmission, it should be retransmitted.
 - c. Signing off is done by the unit which initiated the communication giving its unit identifier and the word “Clear”
2. Unit to Unit Transmissions may be utilized whenever it will contribute to increased field efficiency. Before starting transmissions, units shall be alert not to interfere with on-going radio traffic.
3. **Acknowledge Messages.** “Copy” followed by a repeat of (parroting) the message shall be used to confirm that a message was understood.

Example:

Medic 5 “Berkeley 1, M5 is third-up at the Drill Tower”

Fire Dispatcher “Copy, M5 third-up at the Drill Tower”

4. **Portable Radio Identifier—“X”**

To avoid confusion between the apparatus radios and portable radios, portable radio transmissions shall be followed by the identifier “X”.

Example:

E1 Officer: “Berkeley 1 this is E1-X”

FIRE DISPATCH PROCEDURE

1. **Channel Assignment.** Upon receipt of a pending call for service in CAD the Fire Dispatcher shall make a determination of what Command and Tactical Channels (if any) shall be assigned to the incident.
 - a. Three or more resources assigned to an incident shall receive a command and tactical channel.
2. **Pre-Alert.** The Fire Dispatcher shall issue a pre-alert broadcast for the incident on Berkeley Fire 1. The pre-alert is designed to be a rapid announcement to alert field companies of an incident, prior to initiation of paging tones and formal voice dispatch
 - a. All companies shall cease any radio transmissions until the call is dispatched, denoted by the phrase "time-out XX:XX"
 - b. The pre-alert shall consist of:
 - Single Company or Routine Emergency Dispatch**
 - Transmit of 3 tones
 - Announce event type, response district and address or location
 - Full Assignment Dispatch**
 - Single tone (approximately 3 seconds in length)
 - Announce event type, response district and address or location
3. **Recommendation, Ringtown, and Broadcast.** After completing the pre-alert broadcast, the Fire Dispatcher shall review the CAD company recommendation for the incident. The Communications Center may modify the company selection based on additional information or circumstantial factors.
 - a. Upon acceptance of the company selection for dispatch, the Fire Dispatcher shall initiate the dispatch through the CAD. CAD will alert the assigned companies by activating the Comtech ring down paging alert tones.
 - b. Upon completion of the alerting tone sequence, the Communications Center shall broadcast a voice dispatch over Berkeley Fire 1 by transmitting the following information:
 - Company assignment
 - Incident nature
 - Location
 - Cross-street
 - Command and tactical channel(s) assigned (if applicable)
 - Time out
4. **Relaying Information.** Any important information gained by the Communications Center shall be relayed to responding companies on the Command channel. Examples include special access information, life safety hazard, potential rescue, information and response by BPD, or multiple callers.
 - a. When dispatching non-Berkeley Fire resources assigned during the initial dispatch, the Communications Center shall use the terminology "_____ " on order" to indicate that resources from an agency are being requested as part of the assignment. Examples include: CalFIRE, PPlus, Oakland Fire.

- b. **When transmitting event types** during the initial dispatch, the Communications Center shall provide a brief description and essential safety information along with the basic event type, when additional information is known. Examples include, but are not limited to the following:
- "Structure Fire "Apartment on Fire"
 - "Investigation "Smell of Smoke"
 - Hazardous Condition "Wires down"
 - Medical Aid "Shooting"
5. **En Route Acknowledgement** Companies shall go enroute within 60 seconds or less (NFPA, 2016, pp. 11-12). If the Communications Center does not receive an "En Route" acknowledgement within the allotted time, Communications Center shall send the next closest appropriate company and notify the Battalion Chief.
6. **Unit Notifications** Companies dispatched as part of an additional alarm, special request or upgrade of the assignment shall be advised by the Communications Center.
- Examples:
- "Engine 2, Engine 4, Medic 2, Truck 2; 2nd Alarm, Structure Fire....."
- "Truck 5, Engine 5, Battalion 2; Upgrade for Extrication Assignment....."
7. **Descriptors:** When transmitting locations, the Communications Center will provide additional descriptors to the location if the incident involves a commercial occupancy or is in a rural area (Tilden Park). Descriptors for commercial occupancies should be the occupancy name, such as "Peet's Coffee". Descriptors for rural areas include picnic areas, access roads, and mile approximations.
8. **Dispatch Arrival Condition Reports** Initial condition radio reports are required to be immediately voice transmitted on the assigned Command Channel by the first unit arriving on all fires.
- a. Follow-up condition reports should be transmitted on the following types of incidents once information can be determined: Extrication vehicle accidents, rescues, multi-casualty incidents, hazardous materials incidents, BART incidents
- b. Condition reports on routine incidents which assigned companies can handle should be avoided
- c. The Communications Center shall acknowledge and parrot the transmitted size- up and condition reports on Command Channel. This is to insure that all responding companies and command officers hear the report.
9. **Assignment of Command and Tactical Channels to multi-company responses.** A command and tactical channel shall be assigned to the following Call For Service Types: Fire, Extrication Assignment, Freeway Response, Water Rescue, Rescue, Haz-Mat, BART, MRA, any incident involving three or more department resources, or at the request of a company or chief officer
10. **Monitoring.** The Communications Center shall monitor the assigned Command Channel and assumes the designator of the assigned Command Channel.
11. **Acknowledgement:** Responding companies shall acknowledge response on the assigned Command Channel, by transmitting "En Route". If the unit is equipped with an MDC, the response acknowledgement shall be made on the MDC.

- a. First company or chief officer at the scene shall:
 1. Transmit a "condition report"
 2. Establish Incident Command
 3. Announce that they are switching to the assigned tactical channel once Incident Command switches to the tactical channel, the responding resources shall switch to the assigned Tactical Channel.
 4. The Fire Dispatcher will monitor but generally not transmit on the assigned tactical channels.
 5. Once Incident Command has been established, all radio traffic between incident management personnel (IC, Divisions, Groups) and resources operating on the incident shall be conducted on the Tactical Channel.

COMMAND CHANNELS

Command channels shall be assigned by Communications Center for the purpose of communication between the scene Incident Commander and Communications Center. A command channel is assigned during any response that require three (3) or more resources. This channel serves as the unified ordering point and coordination point for the incident.

1. Upon assigning a command channel the Communications Center shall continually monitor the assigned command channel, until such time the incident is "under control" or the Incident Commander releases the assigned channels.
2. The assigned command channel shall serve as the travel channel on multi-company responses until the IC switches to a tactical channel.
3. Any important information gained by the fire dispatcher shall be relayed to responding companies or Incident Commander on the assigned command channel. Examples include: special access information, life safety hazard, victims trapped or any other mission critical information.

TACTICAL CHANNELS

Tactical channels are used for communication between incident command personnel and resources operating on the scene of incidents. They shall be used for the sole purpose of tactical radio traffic and are not intended to be used for IC to dispatch center communication.

1. A tactical channel shall be assigned by the Communications Center to any response that requires three or more resources.
2. On large or complex incidents it may be necessary to assign multiple tactical channels. This shall be requested by the IC to the Communications Center.
3. The assignment of a tactical channel is not necessary for routine incidents such as medical aids, fire alarms, or vehicle accidents without extrication. "Berkeley 2" may be used for routine unit to unit radio traffic.

COVER-IN

1. A unit, which has been moved-up to cover-in at a station, other than its own, shall retain its normal radio identifier. For example: If E7 were to cover-in at station 2 and E4 at Station 5 because of a 2nd alarm, they would maintain their normal identifiers, but they would be dispatched geographically as if they were E2 and E5.
 - a. Those engines covering other stations should be put out of service so they are not moved out of the downtown districts.
2. Request for cover-in by an outside agency shall be made as follows by the Communications Center:
 - a. To request Albany Fire, call Albany dispatch directly.
 - b. All other requests for cover-in shall be routed through Alameda County Regional Emergency Communications Center (ACRECC).

STATUS MODES

1. Companies with MDC's shall utilize the MDC to status themselves unless responding to outside agencies. Outside responses shall be updated via radio. MDC statuses for incident responses include: Enroute, Staging, On Scene, Transport, Arrival at hospital, Available
2. Medic Units shall be assumed to be transporting Code 2 unless the unit specifically advises the Fire Dispatcher that they are transporting Code 3.
3. Once a company is available from an incident, the company shall update their status with the Fire Dispatcher using the following MDC status: In Service, Out of Service, Out of Service Training

DISPATCH ORDER MODEL

The order model for radio communications provides a framework for radio traffic. It assures that messages are understood by providing confirmation. It also provides for effective two-way communication through the use of a standard radio contact format.

1. Communications shall be regulated by the following (order model) procedures. Sender transmits the receivers ID and then the senders ID ("hey you, it's me").

Example:

"Engine 4" (Receiver),
"Truck 2" (Sender)
2. Receiver transmits their ID to indicate that they are ready to receive the message. **"Go ahead" shall not be used.**

Example:

"Engine 4"
Sender re-transmits the receivers ID and then gives the message, in clear text terminology. "Engine 4, report to Division 2....."
3. Receiver will acknowledge receipt of the message by a brief restatement of the message (parroting).

4. The Fire Dispatcher shall acknowledge all communications directed to him/her by a brief restatement of the message. Particular attention shall be given to condition reports, updated condition reports, request for resources and any life safety hazard information.
5. "Copy" shall only be used to acknowledge long, non-emergent messages.

REQUEST CANCELATIONS

Companies ordering the cancelation of other responding companies shall advise the Fire Dispatcher to cancel a specific company or the balance of the assignment. Examples include, "Berkeley 1",

The Fire Dispatcher shall transmit companies to "cancel". When multiple companies are canceled the Fire Dispatcher shall perform a roll call. Example: "All companies responding to San Pablo can cancel, acknowledge on Berkeley 1."

INCIDENT CLOCK

The fire dispatcher shall start an Incident Clock upon the dispatch of structure fire, hazardous materials incident, or when other conditions appears to be time sensitive or dangerous.¹

1. Notification of incident length shall be transmitted to the IC via the Command Channel at 10-minute increments. No acknowledgement is needed, this communication is one-way. The time notification shall serve as notice to the IC of condition present and total length of time lapsed.²
2. It is at the discretion of the IC to transmit the incident length information over the assigned tactical channel.
3. The Incident Clock shall be terminated when incident is declared under control or when the IC requests the termination of the Incident Clock.

GREATER ALARMS

A greater alarm (2nd or /MASRL1-6) can be requested, by the Incident Commander, during the condition report or at any time subsequent to the initial condition report. The paramount objective is to efficiently dispatch and verify greater alarm responses without interfering with tactical communications at the incident. Greater alarm and full assignments dispatch procedures are identical. The verification of the units responding can be via MDT or Verbalized on Berkeley channel-1 to reduce the radio traffic on the tactical channel dedicated to the fire.

1. **Pre alert (notification of companies):** Select the **single tone** for three seconds on Channel 1 and say: **"Upgrading the full assignment at 923 Hilldale Ave to a second alarm."**
2. **Alert (dispatch of companies):** Select the companies due from the run card by clicking on the **Upgrade** button within the CFS located in the unit tab (Veh icon). Press "Dispatch" and units are attached to call. "OR"

¹ NFPA 8.2.4

² NFPA8.2.4.1

- On the Com-Tech FAC, select (All call), **Green Means Go, wait for it!**
- Dispatch the call (in this order) Example:
- Units (s) "E-7,E-4,E-1, T-2, M-1
- Call Type 2nd Alarm Structure Fire;
- Location/address 923 Hilldale Ave, 9-2-3-Hilldale Ave
- Cross Streets Cross Streets Billie Jean Path / Poppy LN
- Respond on **"Respond on Command (11/12) Tac Channel (31.51.32.52) assigned"**
- Time Out Time Out (current time) Hours"

The Fire Dispatcher will advise BC2 that the 2nd Alarm companies are responding only after companies response have been confirmed via CAD or the company (s) has given verbal notification. For that company (s) who status does not show enroute via CAD or has not given verbal notification the dispatcher will attempt verification via radio and/or by calling the station. If both attempts fail the dispatcher shall notify the BC2 and send the next due company

Example: Dispatcher advises BC2 that 2nd Alarm companies are responding on Berkeley Command (11/12)

Dispatcher: "BC2, all companies are responding to the 2nd Alarm at 923 Hilldale Ave"

Example: Dispatcher unable to verify Engine 7's response to the assignment

Dispatcher: "BC2, all companies are responding to the 2nd Alarm at 923 Hilldale Ave, less Engine 7. No response from Engine 7 via radio or landline. Sending next due engine."

3. **2nd alarm protocol.** When the fire desk dispatcher acknowledges a 2nd alarm request he/she shall assign another dispatcher to dispatch the 2nd alarm.
4. **Simultaneous full assignments.** When simultaneous full assignments are dispatched, each assignment shall respond on a separate tactical channel. The initial full assignment shall respond on initial Command Channel assigned and Tactical Channels assigned and subsequent full assignments shall respond on the next available Tactical Channel.

Example: Units are working a fire at 2110 Center St. on Berkeley 2. A second structure fire is reported at 2375 Telegraph Ave. You follow the same dispatch procedure for a full assignment, but you will announce that this is a second structure fire.
5. **Wildland fire plan mutual response agreement with neighboring agencies.** This plan addresses agreements with neighboring fire agencies to provide rapid and direct "Mutual Response" during the fire season or other periods of critical fire weather. The plan identifies seven (7) areas known as Mutual Response Areas (MRA). During the declared "Fire Season" or during periods of critical fire weather any report of a fire in the designated MRA Areas will receive a joint response. The 7 areas are identified as follows:
 1. NORTH BERKELEY MRA
 2. CENTRAL BERKELEY MRA
 3. SOUTH BERKELEY MRA
 4. PANORAMIC MRA
 5. OAKLAND MRA

6. EBRP MRA
7. SAN PABLO RIDGE MRA
8. MORAGA-ORINDA MRA

It is understood that all fire units responding to a MRA will follow the principles of the Incident Command System (ICS). The basic concept is for all responding units to operate under a single "Command" structure. The final supervision of the incident will be handled by the jurisdictional department, including investigation, reports, etc.

6. **MRA radio response.** EACH AGENCY WILL FIRST VERIFY THEIR RESPONSE ON THEIR OWN RADIO FREQUENCY PRIOR TO SWITCHING TO CDF-TAC2
 1. Berkeley units will verify response to Berkeley Fire Channel 1 then switch to CDF-TAC2
 2. The Communications Center will retain channel priority on Berkeley 1.
 3. Because the Communication Center does not have the ability to capability to monitor CDF-TAC2, the responding Battalion Chief (BC2) will monitor both CDF-TAC2 AND Berkeley Fire Channel 1 for the duration of the incident.
 4. When the incident is terminated the Battalion Chief will advise units to return in-service once their assignment is complete.
 5. Fire companies will return to Berkeley Channel 1 and advise the Communications Center of their in-service status on Berkeley Channel 1.

5150 TRANSPORT POLICY

BPD & Mental Health units must follow the BFD Guidelines and medical criteria attached for 5150 calls requiring a MED2/5150 transport.

BFD Must respond 1st for a 5150 call if the following applies:

1. Patient is 65yrs or older
2. Violent/Code 3 response needed for the 5150
3. Children 11yrs or younger—they have to be transported to Children’s Hospital
4. Medical Clearance is needed
5. Self-Committal (they are not on a 5150 hold/ they are going voluntarily)

To call PPLUS directly for a 5150/MED2 transport when requested, the incident must meet the following criteria (ex: when we called AMR directly)

1. Patient is 12-64yrs of age
2. No Medical treatment needed

ALSO NOTE: Calls for a 5150 transport from BART PD, UCPD, CHP ETC, shall follow the same guidelines as stated above. **DO NOT tell these agencies to call PPLUS themselves as BFD handles their EMS services.**

RESPONSIBILITIES

1. Query, Enter, Modify, Update, Cancel of records, as necessary
2. Fully complete Telecommunications Log on all inquiries
3. Monitor and respond to all radio transmissions on Channel 3
4. Filing/record keeping and validation of DOJ records for BPD
5. Knowledge of DOJ procedures, systems and reference materials.
6. Primarily responsible for answering and processing requests received on the Channel 3 or the RB1 telephone lines.
7. Answer and process requests received on other radio channels/phone lines as needed.

SECURITY

1. RB1 operators have a responsibility to maintain confidentiality at all times. Dissemination of information to officers is regulated by DOJ and defined by department policy. Misuse of confidential records not only violates department policy but also is against the law. The following are laws relating to CLETS files:
 - a) 502 PC; Theft, destruction, falsification, removal of in-house computer information
 - b) 11076 PC; Dissemination of authorized agencies
 - c) 11078 PC; Listing of agencies to whom information can be released or communicated
 - d) 11142 PC; Authorized person furnishing records or information to an unauthorized person
2. ***Any information accessed through the CLETS system is not for public release.***
3. We provide information for Berkeley Police officers; other agencies have their own access and should not be calling for our records. Note: UCPD will call on their direct line with questions, and this is acceptable - they have a different switch than we do and their down times are different than ours.

DEMONSTRATION OR DISPLAY OF RECORDS

1. Actual ("live") records are not to be used for training or demonstration purposes. Most of the systems in CJIS offer a Test Message Program. This program allows you to perform all of the functions of a system without jeopardizing "live" records. For information on how to use the Test Message Program, refer to the section on TEST MESSAGES FOR ON-LINE TRAINING where examples of test message formats are shown for each of the different systems.
2. **Note:** Access is defined as the ability to hear or view any information provided through the CLETS.
3. Once information from the CLETS is in the law enforcement or criminal justice agency's network, the agency is directly responsible for maintaining the security and integrity of the data. Any secondary dissemination of the data must be secure and available only to those who are authorized to receive the data. The law enforcement or criminal justice agency must comply with the policies and regulations associated with the release of that data.

CONFIDENTIALITY OF INFORMATION FROM THE CLETS DATABASE

1. Only authorized law enforcement, criminal justice personnel or their lawfully authorized designees may use a CLETS terminal. Any information from the CLETS is confidential and for official use only.
2. Information from the CLETS is on a "right-to-know" and "need-to-know" basis.
3. Authorized personnel shall not inquire into their own record or have someone inquire for them.
4. Accessing and/or releasing information from the CLETS for non-law enforcement purposes is prohibited, unless otherwise mandated, and is subject to administrative action and/or criminal prosecution.
5. The CLETS terminals and information from the CLETS must remain secure from unauthorized access.
6. Information from the CLETS may be faxed from one secure location to another secure location. Both the agency faxing the information and the agency receiving the information are responsible for its security.
7. All information from the CLETS must be stored in a secure and confidential file.
8. When an agency determines information from the CLETS is no longer needed, the data and/or systems records shall be securely disposed of to prevent access by unauthorized personnel. Such disposal shall include a method sufficient to preclude recognition or reconstruction of data and verification that the procedures were successfully completed. Disposal methods must meet the requirements stated in PPP (Policies, Practices and Procedures) Section 1.9.11.
9. Information received from a CLETS terminal must be maintained separately from non-law enforcement information.
10. Terminals must be away from public view with a log on/log off, password process in place.
11. A unique password must be assigned to each CLETS user and must meet the requirements stated in PPP section 1.9.8
12. Secondary dissemination and remote access to information from the CLETS using communications media (including the Internet) is allowed when a minimum set of administrative and technical requirements that include encryption and firewall requirements as specified in PPP sections 1.9.6 and 1.9.9 is met.

LAWS, POLICIES AND RAMIFICATIONS

The use of any CLETS provided information for other than official business may be a violation of Penal Code Sections 182.1, 502, 11140-11143, 13301-13304 and California Vehicle Code 1808.45

The use of CLETS for other than official law enforcement purposes may result with the employing agency seeking dismissal and/or prosecution of the employee.

1. In order to maintain the integrity of CLETS and to ensure the security of information received and transmitted by use of the system, the following policies shall be adhered to:
 - a. Reasonable measures shall be taken to locate equipment in a secure area to provide protection from vandalism or sabotage and to preclude access by other than authorized personnel.
 - b. Mobile digital terminals (MDTs), cellular phones, and/or radios may be allowed access to the DOJ criminal history information. Details of summary criminal history may be transmitted via MDT, cellular phones, and/or radio when a peace officer determines **there is reasonable cause to believe the immediate safety of the officer and/or the public is at significant risk.**
 - c. Each agency shall ensure the length of such transmissions from the agency to the officer does not create a potential safety hazard to the officer. **The use of such transmissions and the method of transmission shall be at the discretion of the local agency.** Agencies will be responsible for training officers using the MDT's when making requests for criminal history information. **Furthermore, the agency must keep an audit trail (RB1 Log) with justification of the need to know for each inquiry seeking summary criminal history information and any subsequent third party dissemination of that information.**
2. The Department of Justice conducts routine audits to ensure that criminal offender record information is used correctly. It obtains a computer printout of requests made at the agency during a specific time frame, obtains copies of the rap sheets, and verifies that the requests were made in connection with criminal investigations.
3. If misuse is discovered, it shall be brought to the administrator's attention. The Department of Justice requests that disciplinary action be taken and that DOJ be notified of the type of discipline. If the misuse is severe in nature, authorized persons or agencies may lose direct access to the criminal offender information maintained by the California Department of Justice.

DATABASE TRAINING

Training in message formats for access to information in the Criminal Justice Information System (CJIS) databases, National Crime Information Center (NCIC), National Law Enforcement Telecommunications System (NLETS), Department of Motor Vehicles (DMV), and Oregon Law Enforcement Data System (LEDS) is the responsibility of the Department of Justice. Training will be accomplished according to the following:

It is the responsibility of all city, county, state, and federal agencies that use information supplied via CLETS to participate in the Department of Justice's training programs to ensure that all personnel (i.e. terminal operators, peace officers, investigators, clerical, agency management/supervisors, etc.) are trained in the operation, policies, and procedures of each file that is accessed or updated. Training shall be provided only by the Department of Justice's Field Operations Program training staff or another certified CLETS/NCIC trainer.

Specifically, the training requirements are as follows:

1. The Telecomm Classroom Instructor will train, functionally test, and affirm the proficiency of all Dispatch Trainees in order to ensure compliance with CLETS/NCIC policies and regulations. This is accomplished by:
 - A. The trainee shall complete the CLETS/NCIC Telecommunications (Full Access) workbook.
 - B. The trainee must receive a passing score before being placed in the Telecomm floor training phase.
2. Biennially, the Communications Center Supervisor assigned oversight of Telecomm Operations shall provide functional retesting, and reaffirm the proficiency of all terminal (equipment) operators (full access/less than full access) in order to ensure compliance with CLETS/NCIC policies and regulations.
 - A. Every Department employee with either full, or less than full access shall complete the appropriate CLETS/NCIC Telecommunications. Proficiency will be determined by the trainee's ability to receive a passing score.

STANDARD OPERATING PROCEDURES

ABANDONED AUTOMOBILES (1124) WORK FLOW

ENTERING AN ABANDONED AUTO CALL FOR SERVICE

1. Create a NEW call for service (call type 1124)
2. Take info regarding the call as normal (location, RP info, details)
3. Add the auto to the vehicles tab as a Global Vehicle
 - a. VEHICLE ROLE= ABANDONED
 - b. Click the GLOBAL VEHICLE button. Enter the license plate number and search for the vehicle.
 - i. If it currently exists in Records, use that vehicle record (update any new info on the Global Vehicle record
 - ii. If not, click NEW and create a new vehicle (*must have either a FULL license plate or a VIN to create a new Global Vehicle*)
 - c. If the RP cannot provide either a full license plate or a VIN, note the info in the call Narrative.
 - d. Save the vehicle entry
4. Manually assign an incident number
 - a. ORI = CA0010300
 - b. INCIDENT TYPE= 1124
5. Clear the call

NOTE: do not enter a disposition. An 1124 call without a disposition is what triggers the vehicle to display on the daily report. Adding a disposition drops the vehicle from the list.

ORDERING A TOW FOR AN ABANDONED AUTO

1. Conduct a Cleared Call Search for the Incident Number
2. Reactivate the CFS (choose "Follow up" for the reason)
3. Open the CFS and order a tow using the SV Rotation
4. Clear the call and enter a disposition of "TOW"

POINTS OF EMPHASIS

- Always search for the Global Vehicle first and use it; we want to avoid creating duplicate jackets
- Update Global Vehicles records with new any new information whenever possible: make, model, model year, color, etc.
- Do your best to obtain a license plate (or VIN) from the reporting party. Entering vague vehicle info into the call narrative should be at last resort. The daily abandoned auto report displays global vehicle information. Without it, nothing will print on the report and the traffic staff must do additional research to locate the information.

ALARMS

General: There are two classifications of residential/commercial alarms, each requiring a different type of response: audible alarms (usually intrusion/burglar alarms) and silent alarms (usually panic, robbery, or duress alarms). Alarms are typically called in by private alarm monitoring companies on our 7 digit emergency lines. Citizens may also call reporting alarms that they can hear nearby.

Silent panic/robbery alarms (1033S) are Priority 1 calls, these include bank tracker alarms from Pronet (1033T) and ESP (1033G).

Audible intrusion alarms (1033A) are Priority 3 calls unless there is some kind of verification of the validity of the alarm. Verification can be done by either audio or video feedback from inside the premise that indicates some criminal activity, or on site by a responder, security or citizen that witnesses suspicious activity, i.e. broken glass, forced entry, or suspicious persons or vehicles in the area. A verified alarm would be upgraded to a higher priority activity code such as 459.

Vehicle alarms are classified as a 415e unless there are other factors that verify a crime has occurred. Once an officer has responded to a vehicle alarm and found it to be ringing continuously for 20 minutes, he/she can tow the vehicle per 22651.5(a) CVC.

Fire alarms are always audible and are Priority 1 calls. They are entered as residential (FA-RES) or commercial (FA-COM).

Call taker should obtain the following information and record it into the CAD call:

1. The type of alarm.
2. Address of the alarm; and Name of the business, if commercial;
3. Alarm company/RP name and call back number;
4. If the alarm is silent or audible;
5. What area the alarm covers or how it was activated;
6. The premise phone number and if residential last name of resident;
7. If an intrusion alarm, if there is any verification of the validity of the alarm.
8. If a vehicle alarm, description of the vehicle including license plate if possible.
9. Responder name, eta and vehicle description, if available.

Radio

Alarms are dispatched as a 2 unit response. When Officers respond to alarms from a financial institution that is open or during business hours they will ask for a call to be placed into the bank. The purpose of the call is to determine the validity of the alarm. If it was a false alarm, an employee will be asked to exit the building to speak with the officers and the clothing description of that employee should be broadcast.

A 1033T or 1033G activation occurs when money is taken in a bank robbery. The alarm activation is then tracked by radio frequency or gps. Dispatchers will receive updates on direction of flight via the Pronet monitor or the ESP link on the computer. This information should then be broadcast to the officers in the field.

If the alarm company receives verification (proper code) from the business or homeowner that the alarm is false, they will re-contact the dispatch center with this information. Document this information in the CAD call. If an officer has been dispatched advise the responding officer that he/she may cancel the response.

Fire Alarms are dispatched according to the protocols outlined in the Fire Training Manual. If the alarm company re-contacts the dispatcher to cancel a Fire Alarm, update the responding companies. The Engine Officer will make the decision to cancel or continue through to the call.

ASSAULT

General: An assault occurs when someone intentionally, knowingly or recklessly causes injury to another party. Ascertain quickly if an ambulance is needed. If an ambulance is needed create an additional medical call for Fire indicating that the scene is not secure and the nature of the injury.

Call taker should obtain the following information and record it into the CAD call:

- Address/location of occurrence
- Time element
- Weapon
- Suspect information and direction of flight
- Injuries
- Drugs or alcohol involved
- Children present or not
- RP information, contact or not
- If the call is in-progress and the caller is not in danger, keep them on the line. If this is not feasible, have the caller keep an open line as this may assist in getting further information.

Check alerts and prior calls for the address and the subjects involved

Classifications	Priority
245 (in progress)	1
245 (cold report)	2

Radio

In- progress is defined as: occurred within fifteen minutes of the call, or if it is possible the suspect(s) is still in the area.

In progress – required

- Dispatch the call in accordance with Lexipol policy 316.
- Tone alert the call
- Assign at least 2 units
- Update units with appropriate information in a timely manner

In progress – recommended

- Locate the incident on your map
 - Determine potential perimeter spots
 - Addresses that backup to the scene

DOMESTIC VIOLENCE CALLS

General: The safety of domestic violence victims, whether the threat of violence is immediate or remote, should be of primary concern, and calls reporting threatened, imminent, or ongoing domestic violence, and the violation of any protection order, including orders issued pursuant to Penal Code §136.2, and restraining orders, shall be ranked among the highest priority calls. Penal Code §13702 requires law enforcement agencies to implement written policies and standards for dispatchers.

Call taker should process calls for service as follows:

1. The dispatcher, when warranted, shall give a domestic violence incident call the same priority as any other life threatening calls and should, whenever possible, dispatch two officers to the scene.
2. While speaking with a victim of domestic violence the call taker shall not discuss the victim's desire to "press charges" or "prosecute." Any comment or statement which suggests placing responsibility for enforcement action with the victim is inappropriate.
3. During the initial call for assistance, the call taker should attempt to obtain the following information:
 - a. Is the suspect under the influence of drugs or alcohol? If yes, what substance?
 - b. Are children present?
 - c. Have the police been to this address before? If yes, how many times?
 - d. Does the victim have a current restraining order?
 - i. Call takers are not required to verify the validity of the protective order before responding to the request for assistance

CALLS FOR SERVICE RELATED TO ENCAMPMENTS

GENERAL

The presence of an established encampment should be treated differently than the report of a crime, as it requires broader resources across several departments, as opposed to a “simple” patrol response. It’s vitally important that we respond to these calls consistently, with respect and professionalism, from call intake at the Comm Center or Front Counter, all the way to engagement with community members in the field.

CALL TAKER

1. *If the call or comment is regarding the presence of and issues related to the existence of an established encampment BPD staff should:*
 - a. **Refer the reporting party to 3-1-1, Berkeley’s Customer Service Center, where the party may register their complaint or concern; and**
 - b. **Explain that:**
 - i. *The 3-1-1 Center gathers and reports encampment-related complaints to the City Manager’s Office, and*
 - ii. *Removal of established encampments requires significant resources from several departments, including a large number of police personnel, and is coordinated through the City Manager’s office.*

2. *If the report is regarding a crime, fire or medical issue regardless of whether the suspect appears to be homeless, or part of an established encampment, BPD staff shall take action as follows:*
 - a. *Officers in the field shall respond to reports as they would with any “flag-down” report of an in-progress/just prior crime.*
 - b. *Dispatchers shall enter calls for service as they would with any crime report, and dispatch accordingly.*
 - c. **As always, community members seeking guidance on when to call BPD should be advised to call 9-1-1 (for an emergency), or 981-5900 (non-emergency).**

3. Callers reporting resident(s) of Berkeley or Albany who appear to be experiencing homelessness, vulnerable or in need of services, or individuals who express a desire for services may be referred to the City’s HOTT team at 510-981-5273 or HOTT@cityofberkeley.info

GUN

General: Calls that shall be classified as a GUN:

- RP confirms seeing someone with a handgun or rifle and can give credible information
- 417 with a gun when suspect is still on scene

Call taker should obtain the following information and record it into the CAD call:

- Address/location of occurrence
- If known, name and DOB of person with the gun.
- Description of the person with the gun.
- Description of the gun.
- Description of the suspect vehicle.
- When the person with the gun was last seen.
- What the threat was.
- Any injuries.

Radio

Control shall immediately dispatch the GUN call by putting out a tone alert and assigning 3 units to the call. When units go 10-97 and make contact with the responsible, Control shall give the channel a code 33.

HIT AND RUN

General: Hit and run is defined as leaving the scene of a vehicle accident resulting in injury or property damage without exchanging or leaving the driver's information, VC 20001 and 20002 respectively. Drivers are required by law, to show drivers licenses, vehicle registration cards, evidence of financial responsibility, and current address to the other drivers or persons involved, or to any peace officer. Evidence of financial responsibility is usually an insurance company name and policy number.

Call taker should obtain the following information and record it into the CAD call:

1. Location of the accident and how long ago it occurred.
2. If there are any injuries;
3. RP's name, phone number, current location and vehicle description;
4. Suspect vehicle description, including any possible damage or other identifying characteristics;
5. Suspect vehicle direction of flight;
6. Suspect description.

Classifications	Priority
20001 In progress	1
20001 Cold report	3
20002 In progress	2
20002 Cold report	3

Note: The victim vehicle needs to remain in Berkeley so the damage can be verified by the responding officer. If the caller provides the license plate number of the suspect vehicle, run the plate and update the call for service.

Radio

In progress Dispatch 2 units.

IDENTITY THEFT

General: Identity theft is defined as a person who willfully obtains personal identifying information of another person, and uses that information for any unlawful purpose, including obtaining, or attempting to obtain, credit, goods, services, real property, or medical information without the consent of that person. Reports will be taken from any victim who resides in Berkeley when the crime occurred, regardless of where it occurred.

Call taker should obtain the following information and record it into the CAD call:

1. Address of occurrence (if occurred in Berkeley) or Victim's Berkeley address.
2. RP contact information
3. What happened
4. Suspect information?
 - Cold reports that occurred in Berkeley with suspect information will be entered for patrol response.
 - Online reporting should be offered to victims making cold reports with no suspect information.

MISSING PERSONS - 1057

General: Any person who is reported missing to law enforcement when the person's location is unknown. This includes a child who has been taken, detained, concealed, enticed away or kept by a parent in violation of the law. It also includes any child who is missing voluntarily, involuntarily or under circumstances that do not conform to his/her ordinary habits or behavior, and who may be in need of assistance. *All missing persons reports shall be accepted regardless of where the person was last seen, where the person resides or any other question of jurisdiction (Penal Code 14205)*

Call taker should obtain the following information and record it into the CAD call:

1. Address/location of occurrence
2. Time lapse
3. Missing person's name, dob and description
4. Does the missing person have any medical or psychological problems
5. Any associated vehicle
6. RP contact information

Radio

- Assign 2 units if the Missing Person is at risk and it is believed that they may be in the area.
- If the person reported missing is under 16 years of age, or if there is evidence that the missing person is at risk, a "Be On the Look-Out" (BOLO) bulletin shall be broadcast to on-duty personnel without delay.
- Any missing person investigation involving the following circumstances shall require the immediate notification of the on-duty **Watch Commander, or in his/her absence the Duty Command Officer.**
 - (a) The missing juvenile is under 12 years of age; or
 - (b) Where foul play is suspected, regardless of age.

Telecommunications/RB1

Entry

- Enter the missing person into the Automated Warrant System (AWS)/Missing Unidentified Persons System (MUPS)
- If applicable enter in any additional information that was provided by the officer for entry.

Removal

- When notified by teletype that missing person has been located by another agency, remove the person from AWS/MUPS (clear the entry) and route copies of the locate to Homicide and Records.
- When a Berkeley Officer receives notification that a missing person has been located, he/she may call dispatch and request that the missing person be removed from AWS/MUPS. In this event remove the person from AWS/MUPS and route copies of the locate to Homicide and Records.
- If a Reporting Party calls dispatch and reports that a missing person has returned, generate a new call for service, and reference the original case number in the call. Once an Officer has verified that the missing person has returned he/she will write a supplemental report and request that the missing person be removed from AWS/MUPS. Once this had been done remove the person from AWS/MUPS and route copies of the locate to Homicide and Records.
-

INCORRIGIBLE RUNAWAY JUVENILE - 601

General: *All missing persons reports shall be accepted regardless of where the person was last seen, where the person resides or any other question of jurisdiction (Penal Code 14205).*

Call taker should obtain the following information and record it into the CAD call:

1. Address/location of occurrence;
2. Time lapse
3. Runaway juvenile's name, dob, and description
4. Possible location the juvenile may go to
5. Does the runaway juvenile have any medical or psychological problems
6. Any associated vehicle
7. RP contact information

Radio and Procedure for entry and removal are the same as noted above for Missing Persons.

TRACKING OF STOLEN CELL PHONES & ELECTRONICS

General: Calls related to tracking lost or stolen items via GPS tracking.

Call taker should obtain the following information and record it into the CAD call:

- Location where electronic device was tracked to.
- RP contact information.
- Has a theft report already been made? Was the device taken in a robbery?
- Suspect information?

Original theft occurred in Berkeley:

If a report has already been made, enter the call as an in progress 484 and cross reference the original incident.

If a report has not been made, enter as an in progress 484 for an officer to take report and make contact to recover loss.

Original theft occurred outside Berkeley jurisdiction:

If a report has already been made, enter the call as an Outaid.

If a report has not been made, enter a 10-62b for units to standby while victim attempts to recover the loss.

If the device was taken in a robbery (regardless of jurisdiction) enter the call as an in progress 211 and immediately notify the Watch Commander or Patrol Sergeant

RADIO

Regardless of the call type, at least two units will be dispatched.

REASSIGNMENT CARD SYSTEM

SCOPE

The Reassignment Card System is the process by which the Communications Center will fill unexpected staffing vacancies as well as to provide dispatchers a means to change their shift after the timesheets are established when certain vacancies occur.

PROCEDURE

While the Reassignment Card System is based solely on seniority, in cases of extreme exigency, a non-seniority based reassignment may be considered after consultation with the Communications Center Manager, the affected employee's supervisor, and SEIU 1021 Union Representatives.

Immediately after the annual timesheets are posted, every dispatcher who has completed the training program will be afforded the opportunity to fill out two reassignment cards requesting transfer to other shifts as openings become available. Reassignment cards must be received no later than 6 weeks before the start of a timesheet. This timeline may be adjusted by the Communications Center Manager's provided that all dispatchers received ample notice of the date change.

From the time the annual shift signup is distributed, to the start of the first (March) timesheet, cards received will be ranked according to dispatcher's seniority. All cards received after the start of the timesheet (regardless of seniority ranking) shall be date and time stamped and shall be placed behind any cards received prior to the start of the timesheet.

Upon determining that openings need to be filled, the Communications Center Manager will utilize the card system to fill them. The decision as to whether a vacancy has, in fact, been created remains at the discretion of the Communications Manager, but will be based largely on:

1. The medical opinion of the dispatcher's treating physician, if applicable.
2. The amount of time remaining in the timesheet.
3. The needs of the Department and membership to maintain adequate staffing.

The following rules also apply:

1. Cards will remain in effect until the end of the third (November) timesheet, or until removed (by a completed transfer, or at the dispatcher's request).
2. Prior to the start of the timesheet, dispatcher's completing reassignment cards shall submit them (via e-mail) to the assigned Supervisor.
3. After the start of the timesheet of the calendar year, all new cards submitted must be submitted to the assigned Supervisor via email for date and time stamping.
4. Dispatchers may, at any time during the year, change their reassignment cards(s). The old card will be discarded. The new card, reflecting the change, will be date and time stamped and placed in the back of the stack. **No more than three active cards per dispatcher may be on file at any time.**

5. When a reassignment card is used to **fill** a vacancy, it is removed from the stack and filed. A dispatcher, who has made a card move, may not complete a new card for the duration of that timesheet.
6. A dispatcher will be asked if he/she wishes to move prior to honoring the card request if the dispatcher chooses not to move, the card request will be discarded.

Filling a vacancy may involve honoring several dispatcher's card requests. Once a permanent card move is made, it is final. (See exception for temporary card moves under #2 below).

1. In the event that more than one dispatcher's reassignment cards come up during the same adjustment, only one card can be used. This will allow more dispatchers an opportunity to move, utilizing the card system.

Example #1- Both a Mid shift and a night shift are available at the exact same time and one person was the senior person for both of those shifts, then the senior dispatcher would choose their shift and the second most senior dispatcher would get the second choice.

2. If there is a temporary vacancy, the Communications Center Manager may offer a temporary reassignment card move that would be reversed by the return of the employee that created the temporary vacancy. This situation could occur when an employee is placed on modified duty or off-duty status for an extended amount of time due to injury or illness, or administrative leave. The card of the dispatcher who accepted the temporary reassignment is not discarded and is returned to its previous position at the end of the temporary assignment.

3. Regardless of the type of card move an employee makes, efforts will be made to accommodate that employees pre-selected vacation choices. **There is no guarantee that these choices will be honored when moving from one team/shift to another.** The Communications Center Manager will determine whether the vacation choices will be honored before the move is finalized.

Example #2- Dispatcher A, who works day shift is injured and unable to perform their normal duties. Dispatcher B works nights but has a reassignment card on file to go to day shift. Dispatcher C works swing shift and also has a reassignment card on file to go to day shift. The Communications manager offers Dispatcher B a temporary reassignment card transfer to day shift because he is senior to Dispatcher C. Dispatcher B does not accept the temporary transfer, so Dispatcher C is asked. Dispatcher C also refuses, so the temporary vacancy would be filled by either a trainee recently or eminently completing training, or by posting of overtime.

Example #3- Dispatcher A is promoted to Supervisor from Day shift, creating an opening. The Communications Manager determines that a permanent vacancy has been created. Both Dispatcher B and C have reassignment cards on file for Day shift, and both are currently on Swing shift. Dispatcher B is senior to Dispatcher C, and is offered a reassignment to Day shift through the end of third timesheet, but chooses not to take the transfer, as all of his/her vacation selections will not be available. Dispatcher C is offered the reassignment to Day shift and accepts the offer. This creates a permanent vacancy on Swing shift. The reassignment cards will be utilized again. If no one accepts the reassignment transfer the vacancy would be filled by either a trainee recently or eminently completing the training program, or by the posting of overtime.

COMMUNICATIONS CENTER FLOOR RULES AND EXPECTATIONS

REPORTING FOR DUTY

All personnel will report for duty prior to the start time of their shift and be prepared to relieve off going personnel or attend their team briefing. Food/beverage preparation/pick-up, moving of vehicles, locker room or outside department activities are not permitted during the first 30 minutes of a shift.

RELEASE FROM DUTY

Off-going personnel will not leave the Communications Center prior to a Supervisor or Actor's verbal advisement that they are released from duty. The advisement shall not occur prior to the Supervisor or Actor confirming all personnel scheduled to work the on-coming shift are present or accounted for.

DRESS CODE

When "Free Dress" is granted to Communications Center personnel, employees are given the option to report for duty on a "free dress" day, in non-uniform attire. Whenever the free-dress option is utilized, employees must report for duty in attire that is suitable for a professional workplace (i.e. Business Casual), as defined below.

The following items shall be considered suitable attire:

- Sweaters/cardigans
- Button down shirts, polo shirts and blouses
- Slacks, Dockers (Khakis), Skirts/dresses-- no more than 1 inch above the knee, or longer
- Peep-toe shoes, Close toe shoes, loafers, boots
- Athletic/tennis shoes
- Denim clothing (no tears, rips, cuts, holes where skin is exposed beneath)
- Athletic wear: only Sweatshirts, Hoodies, T-shirts, sweat pants displaying Dispatcher or First Responder (POLICE/FIRE) Logos

The following items shall not be considered suitable attire:

- Spaghetti strap or Tank tops
- Undershirts
- Revealing or sheer clothing that exposes the bosom, back or midriff
- Flip-flops, thongs or open-toe sandals
- Shorts
- Tight fitting spandex or lycra (leggings, Jeggings, workout attire) unless covered by tunics, sweaters or dresses 2 inches above the knee or longer
- Athletic Wear/sweats (other than described above)
- Beach Wear
- Clothing bearing sexually suggestive or profane symbols

CONDUCT

1. Work together as one team. Offer support and assistance to your teammates whenever necessary.
2. Be respectful and professional at all times and refrain from the use of inappropriate tone of voice, volume or language
3. Be kind to one another and treat others as you wish to be treated.
4. Due to the critical mission of the Communications Center, the noise level on the floor must be kept to a minimum in order to foster concentration to duties and the ability to hear all radio and phone transmissions. Unless conveying mission critical information, refrain from yelling or conversing “across the floor” or directly behind a dispatcher not involved in the conversation.
5. Sleeping is never allowed on the Communications Center floor. Employees wishing to rest on their lunch or break shall do so only in areas where permitted.

PERSONAL MEDIA DEVICES ON THE FLOOR

Cellphones: Cellphones must be on silent or vibrate mode and out of sight. Personal cellphone conversations are not allowed on the floor. If you receive an urgent call that you must answer, notify the Supervisor or Actor and request permission to leave the floor.

Do not leave the floor without notifying someone and receiving acknowledgement. Unexpected absence from the floor negatively impacts your team. Keep your call brief and return to the floor as quickly as possible.

Texting: While on the floor, text notifications should be on vibrate and continual text conversations are not allowed.

Headphones: Headphones not used in the course of employment are not allowed on the floor. No exceptions.

Television: Whenever the television is on, the volume should be off and closed captioning should be used. The only exception would be television broadcast directly and currently affecting the City of Berkeley

Personal Media Devices: Electronic reading devices are permitted but may not be used to view streaming media.

CODE 7/BREAK SCHEDULE

At the beginning of each shift, the Supervisor or Actor shall distribute a break/lunch sign-up schedule. All personnel will adhere to their designated time, unless a major in-progress incident necessitates postponing breaks/lunches.

Please refrain from scheduling off-site appointments on your code 7 or breaks. A delay in return may negatively impact your team. Whenever an appointment is absolutely necessary, notify the Supervisor or Actor when signing up for your code 7/breaks.

FOOD PREPARATION/RETRIEVAL/PICK-UP (INCLUDING PSB KITCHEN, RESTAURANT)

1. Cannot negatively impact minimum floor staffing requirements or pre-established code 7/break schedule.
2. Supervisor/ Acting Supervisor permission required

10– 7B BREAKS

1. Allowable whenever necessary.
2. Any personnel assigned to the floor (including Supervisor's, Manager, part time, per diem, officers, etc.) are required to notify floor personnel prior to leaving the floor for 10-7B

PARKING MATTERS

3. Moving/checking of personal vehicles cannot negatively impact minimum floor staffing requirements or pre-established lunch/break schedule
4. Supervisor/ Actor *permission* required

OFF FLOOR MEETINGS/CONVERSATIONS WITH SUPERVISORY STAFF

1. Supervisory Staff:
2. Dispatchers should refrain from leaving the floor for extended conversations with supervisory staff unless specifically requested to do so.
3. Unless emergent, Supervisors, Training Coordinators and the Communications Manager will confirm that minimum staffing requirements are met and the lunch/break schedule will not be disrupted by meeting with personnel actively assigned to the floor.

DESK ROTATION

1. (Full time PSD's):
 - a. Daily: Dispatchers will not work more than 5 hours on any desk during their work day.
 - b. Weekly: Dispatchers will work a minimum of 10 hours on each desk weekly.
2. CTO's actively training personnel are excluded from rotation during their normal shift. When working overtime, CTO's should make an effort to work a position other than the one they are actively training.
3. Supervisors/Actors will complete a Daily Supervisor Log tracking daily desk assignments and ensure personnel are rotating desks as required. Supervisors /Actors will document if active training precluded rotation of any position.

PART TIME AND PER-DIEM DESK ROTATION

Part time and per diem personnel is to offer relief to full-time personnel working any position they are qualified to work, whenever necessary. Part time and per diem personnel are exempt from the weekly requirement to work all positions, but should offer relief to all positions.

ABSENCE NOTIFICATIONS

When receiving an absence notification from Communications Center personnel:

Immediately Complete an absence slip including employee's:

- Name
- Badge
- Team
- Contact phone number.
- Inquire if illness is family or personal
- DO NOT ask the nature of the illness
- Notify Supervisor or Actor
- Supervisor or Actor take appropriate action (See Supervisor's Manual)

When receiving an absence notification from a patrol officer:

Immediately: Complete an absence slip including employee's:

- Name
- Badge
- Team
- Contact phone number.
- Inquire if illness is family or personal
- DO NOT ask the nature of the illness
- Call Sergeant's office immediately. If no answer, leave a message. If no answer, make notification to on duty sergeant over radio.

As soon as possible: Deliver absence slip to Sergeant's office.

ACTING SUPERVISING PUBLIC SAFETY DISPATCHERS

SCOPE

To insure there is always someone in charge of the Communications Center; insuring the unit is run in accordance with its Mission Statement as well as the unit's Values and Expectations.

PROCEDURE

Whenever a Supervisory Public Safety Dispatcher (SPSD) is not assigned on duty, or when they are on duty, but unavailable due to ancillary duties, an Acting Supervising Public Safety Dispatcher will assume supervisory duties. These duties consist of assuming the role of the floor supervisor for the Communications Center; assuring a focus on the mission and adherence to our values and expectations.

When functioning in the capacity of Acting Supervisor, the Acting Supervisor will have the same authority as tenured supervisors and should be treated with the same level of respect, compliance and cooperation normally due a Supervising Public Safety Dispatcher.

The duties of the Acting Supervisor are as follows:

1. Provide leadership.
2. Ensure the Communications Center is operating under the guidelines set forth in our Mission Statement as well as the unit's Values and Expectations.
3. Complete timesheet.
4. Handle all matters concerning the operation of the Communications Center during his/her shift.
5. If the Communications Center is unexpectedly going to be understaffed (below minimum staffing) then the Acting Supervisor is to arrange for overtime to be sold or to order (hold over or call in) necessary persons to work.
6. Handle Tier 2 calls as needed.
7. Liaison with the Patrol Watch Commander or Acting Watch Commander as necessary.
8. Document and relay to the SPSPD and Communications Manager any problems with personnel and/or equipments, and contact the appropriate department to have the problem fixed.
9. In the event of an emergency, the Acting Supervisor will send email notifications and be the liaison between the Communications Center and Patrol/Fire.
10. Complete a daily supervisors log which will include the following:
 - a) Attendance: personnel on duty, any tardy personnel (including reason for tardiness), as well as personnel on vacation, sick, FMLA, worker's comp or Union related absence.
 - b) Staffing: documentation of any staffing orders (including any refusal of an order) as well as ride-along's or recovery time permitted due to overstaffing.
 - c) Critical incidents/pursuits/shootings/fires
 - d) Personnel and Equipment related issues: The Acting Supervisor shall be required to document any behavioral, performance or equipment related issues, as well as any conversations/interactions with patrol or fire personnel related to their duties as Acting Supervisor.
 - e) Give a brief summarization of the day (i.e. was it busy? Slow? Extreme weather conditions, special events or exercises)

In the event that an Acting Supervisor is required, they will be placed into the role for a minimum of five hours (even if this overlaps with the on-coming or returning SPSD). This shall be noted on the timesheet so that the Acting Supervisor will be appropriately compensated. It is completely acceptable and routine for there to be more than one Acting Supervisor on duty at a given time however, only one will be designated and compensated.. An Acting Supervisor can also be designated as an opportunity for an SPSD to address outstanding staff work or work associated with their ancillary duties, in which case an Acting Supervisor would be appointed to cover the floor supervisor responsibilities.

Whenever possible, the duty of an Acting Supervisor will be pre-assigned to a dispatcher who is currently designated as an Acting Supervising Public Safety Dispatcher. In the event that the pre-assigned Acting Supervisor is unavailable it will go to the most senior Acting Supervisor on duty. In the event there is no Acting SPSD on duty, the Senior Public Safety Dispatcher shall assume the duties until they notify the Watch Commander. The Watch Commander may assign an on-duty patrol sergeant to supervise the Communications Center until an Acting SPSD, SPSD, or the Communications Center Manager become available. If they do not, in line with the Incident Command System model, supervisory responsibility will fall to the Watch Commander, who shall have the option of ordering the senior PSD on duty to carry out any needs of the Communications Center which may include but will not be limited to ordering of on-coming or off-going personnel to fulfill minimum staffing requirements.

STAFFING

SCOPE

To meet the minimum staffing requirements of the Communications Center through the use of both voluntary and mandatory overtime and mandatory orders.

PROCEDURE

MINIMUM STAFFING REQUIREMENTS:

SUNDAY- WEDNESDAY:

22:00-10:00 5

10:00-22:00 6

THURSDAY-SATURDAY:

Midnight-10:00 5

10:00-Midnight 6

OVERTIME: After determining the overtime hours necessary to meet the minimum staffing requirements of the Communications Center, the Supervisor, Manager or Appointee will first offer, then assign overtime in the following order:

1. Per Diem Dispatchers
2. Voluntary Standing Overtime Requests (3.25-15 hours) using redline method (PSD's and SPSD's only)
3. Mandatory Standing 3.25-8 hour overtime using redline method (all PSD's and SPSD's)
4. Voluntary Non-Standing Overtime Sign-up (OPEN to all including Officers, PEOs)
5. Mandatory Orders and/or Supervisor On-duty floor fill in

VOLUNTARY STANDING OVERTIME-15 HOUR MAXIMUM Prior to the beginning of each timesheet, Dispatchers and Supervisors may submit up to four (4) Voluntary Standing Overtime Request for a minimum of four (4) and a maximum of fifteen (15) hours each.

Voluntary Standing Overtime requests may be denied or modified due to:

1. Prior disciplinary action resulting in overtime restriction
2. Duty modification due to medical condition or illness
3. Open/Active Worker's Compensation case with duty modification

OVERTIME ASSIGNMENT: The Scheduling Supervisor will assign available overtime based on standing requests received. **The "red line" method will be utilized when more than one Dispatcher or Supervisor have the same standing overtime request.**

MANDATORY STANDING OVERTIME: Effective January 8th, 2017 all Dispatchers and Supervisors who do not submit a voluntary standing overtime request are required to submit a minimum of 3 mandatory standing overtime preferences. Each preference will be between 3.25 and 8 hours, depending on the slot(s) chosen. The preferences will be honored whenever possible, however, dispatchers and

supervisors may be assigned non-preferential overtime whenever necessary. **The "red line" method will be utilized to ensure fair rotation.**

Any Dispatcher or Supervisor who has failed to submit a mandatory standard overtime preference will be assigned overtime solely based on the staffing needs of the Communication Center.

GIVING AWAY OR SWAPPING OF MANDATORY OVERTIME: Giving away or swapping mandatory overtime is allowed. The Supervisory team must be notified via email of the slot giveaway or swap prior to the Sunday of the week the overtime occurs in. The notification shall include the date and time period(s) of the giveaway or swap and include the name of both employees involved.

Employees giving away mandatory overtime hours that leave them below the weekly minimum overtime hours for each dispatcher will be the first to receive mandatory orders that coincide with their workday.

MANDATORY ORDER PROCEDURE FOR UNFORSEEN ABSENCE: When a call off is received for the team scheduled to relieve a team currently on duty:

1. Using the timesheet and overtime book, the supervisor or actor will immediately perform a staffing count to determine if the unforeseen absence will affect the minimum staffing requirement.
2. The supervisor or actor will also check the overtime book to determine if the absent employee is scheduled to work overtime during any period of their absence (i.e., if the employee calls off for three days, all three days must be reviewed).
3. If the absence effects the minimum staffing requirement the Supervisor or Actor shall:
 - a. Immediately notify all floor personnel of the call off and ask if anyone is willing to voluntarily cover all or part of the open shift.
 - b. If there are no volunteers, the Supervisor or Actor will review the overtime book to determine if all on-duty dispatchers have met their weekly mandatory overtime requirements.
 - c. Any dispatchers falling below the weekly mandatory overtime hours shall be ordered first by reverse seniority.
4. If the Supervisor determines that all on-duty dispatchers have met their week mandatory overtime requirement, the Supervisor will immediately evaluate their own workload, obligations and project deadlines to determine if they can fill any or all of the open shift by committing themselves to the floor.
5. If the Supervisor determines that their workload, supervisory duties or project deadlines will not allow them to commit to the floor for all or part of the open shift, the Supervisor or Actor will attempt to contact off-duty personnel and determine if they are willing/able to work the open shift.
6. If the Supervisor is unable to fill the open shift with off duty personnel, a Mandatory order will be issued. Consideration will be given to the amount of overtime each dispatcher has is scheduled to work during their current work week. Whenever possible, the employee with the least amount of overtime hours for their current work week will be ordered.
7. The order will be recorded on the order log sheet in the resource folder for record keeping purposes.

SCHEDULING OVERSIGHTS, OVERTIME NO SHOWS, LATE ARRIVALS

At the very beginning of each shift the supervisor or actor will utilize the timesheet and overtime book to perform a "roll-call" to confirm all scheduled personnel are present prior to releasing personnel going off duty. If all scheduled personnel are not present or minimum staffing levels are not met the supervisor or actor will:

1. The Supervisor or Actor will attempt to contact the scheduled employee.
 - a. If contact is made, the scheduled employee will give their estimated time of arrival.
 - b. If the scheduled employee advises they will not be reporting for regular duty, a reason must be given and an absence slip will be completed by the Supervisor or Actor.
 - c. If the scheduled employee advises they will not be reporting for overtime, a reason must be given and the Supervisor or Actor will complete an No Show for Duty Form and notify all Supervisors and the Communications Manager via email.
 - d. If the Supervisor or Actor is unable to contact the scheduled employee, they will follow the mandatory order procedure to fill the vacancy and complete a No Show for Duty form. The Supervisor or Actor will notify all supervisors and the Communications Manager via email as soon as possible.
 - e. **No employee going off duty will be released before the Supervisor or Actor attempts to contact the scheduled employee.**

TARDINESS Employees reporting for duty more than 1 hour late for regular duty or overtime during a calendar year will be subject to progressive discipline.

1st occurrence: verbal counseling

2nd occurrence: written reprimand

3rd occurrence: personnel complaint.

Consideration will be given to acts of nature, weather and traffic related delays or any circumstances outside of the employee's control.

CHRONIC TARDINESS: Employees who are chronically tardy (0-59 minutes) will be subject to progressive discipline. The Supervisor or Actor will document the event in their supervisor log.

NO SHOW FOR DUTY: Failure to report for regular duty or scheduled overtime will result in the issuance of a personnel complaint.

1. If an employee is a "no-show" for scheduled overtime, an employee going off duty will be held over until the scheduled employee arrives or the Supervisor or Actor is able to fill the vacancy via alternate means.
2. **The supervisor or actor will immediately attempt to contact the scheduled employee.** If contact is made, the supervisor or actor will determine if the employee being held over can be released or must stay until the scheduled employee arrives. If the supervisor or actor is unable to make contact with the scheduled employee then the Mandatory Order Procedure for Unforeseen Absence should be followed.

MANDATORY ORDERS: Due to the minimum staffing levels required to operate the Communications Center, mandatory orders are often necessary to address unforeseen absences and unfilled overtime slots.

1. **Mandatory Orders differ from standing or voluntary overtime in length of notice and options given to the ordered employee.**
2. **Mandatory Orders will be assigned based on the staffing needs of the department,** with consideration given to availability of staff and prior overtime and representation commitments. Available employees who have not met their Mandatory Standing Overtime requirement, or have given their slot away will be ordered first, whenever possible. Employees previously assigned both Mandatory Standing and Voluntary Overtime during their work week, will be last to be ordered, whenever possible.
3. **ISSUANCE:** Mandatory orders may be assigned by any Communications Center Supervisor, Acting Supervisor or Communications Manager. In their absence, mandatory orders may be assigned by the Watch Commander, Senior Sergeant or Operations Division Captain.

MANDATORY ORDER NOTIFICATION: Employees will be notified via City email whenever mandatory orders are issued.

1. Employees choosing not to check the City email from their personal devices should call the Communications Center prior to their scheduled return to ensure they have the most up to date staffing information.
2. Likewise, whenever an order is issued to an off duty employee and the order occurs on the day they are scheduled to return to duty, the ordering employee should whenever possible, attempt to contact the employee via phone or text to notify them of the upcoming order.

REFUSAL OF A MANDATORY ORDER: Employees are not allowed to refuse a mandatory order. Refusal of an order constitutes insubordination and will result in a personnel complaint. In lieu of refusal, an ordered employee has the following options:

1. Find another employee to take the order
2. Trade orders with another employee
3. Shift flexing may also be approved on a case by case basis and is contingent upon its impact on the Center's minimum staffing requirements.

ORDER REFUSAL FORM: When a mandatory order is refused, an Order Refusal Form must be completed by both the ordering and the refusing employee. When an Acting Supervisor issues an order that is refused an order refusal form will be completed and forwarded to the Supervisor's for filing.

COMMUNICATIONS CENTER EVACUATION PLAN

SCOPE

The evacuation of the Communications Center may become necessary if circumstances arise that affect the safety of Communications Center personnel or their ability to complete their core duties and responsibilities. The Public Safety Building (PSB) currently has a Berkeley Police Department Emergency Action Plan that is posted throughout the building. The following plan functions in conjunction with that plan and is referenced in Section II.

EVACUATION PROCEDURES

1. The decision to evacuate or shelter in place may be made by the on-duty Watch Commander (or senior sergeant in their absence) or the on-duty Supervising Public Safety Dispatcher.
 - a. Any disagreement regarding this decision shall be resolved via the Chain of Command, by notifying the Communications Center Manager or Support Services Division Captain and the Operations Division Captain.
2. The Supervising Public Safety Dispatcher shall ensure that the following **notifications** occur:
 - a. Coordinate with the Watch Commander to contact the Public Information Officer regarding Nixle, Twitter, AC Alert and other community notifications as necessary regarding the overall incident and affected 9-1-1 communications,
 - b. Contact ACSO to advise of the need to evacuate, and request the transfer of Berkeley 9-1-1 lines. ACSO controls the switch to be flipped and once the transfer occurs, ACSO will notify Communication Center personnel of calls for service via radio channel LAW1 or landlines if necessary,
 - c. Control shall broadcast the Communications Center evacuation notification over all radio channels and request officers respond code 3 for assistance. All field units should hold the air and not self-initiate any activities
 - i. In the event of a full building evacuation, Control shall broadcast on all channels as well as throughout the PSB via the Public Address System regarding the emergency (reference: BPD EAP Section II).
 - d. As soon as practical, notification of the evacuation should be made to the Support Services Captain via the Chain of Command.
3. The Supervising Public Safety Dispatcher shall ensure that the following **equipment** is evacuated with Communications Center personnel:
 - a. Police & Fire portable radios and headsets. Additional radios and headsets are located in the Watch Commanders office, if needed,
 - b. The 2 phone laptops and 2 radio suitcases,
 - c. The SRT Laptop and both training laptops (All are equipped with CAD)
 - d. Manual call taking cards
 - e. Emergency backpacks

4. Supervising Public Safety Dispatchers are responsible for coordinating with the Watch Commander or their designee to:
 - a. assist and direct Communications Center personnel to the appropriate evacuation route,
 - b. identify and assist any employees with a disability who would need additional consideration or assistance, and
 - c. Confirm and report to the Watch Commander that all Communications Center personnel have evacuated the building.

5. During an evacuation, Communications Center personnel shall:
 - a. Follow instructions from emergency personnel, keeping noise to a minimum so you can hear emergency instructions,
 - b. Safely exit the building to the predesignated assembly point (South Lot)
 - i. WALK -- do not run. Do not push or crowd.
 - ii. Check doors for heat before opening. (Do not open door if hot)
 - iii. Use handrails in stairwells; stay to the right,
 - iv. Assist people with disabilities or who need extra help.
 - c. Await transport to the Traffic Substation or other designated secondary dispatch location,
 - i. Stage in the Mobile Command Vehicle if so instructed.
 - d. Stay together with other Communications Center personnel at the assembly point,
 - e. Move quickly away from the building and watch for falling glass and other hazards,
 - f. Once personnel have exited, they should NOT RETURN until notified that it is safe to do so.
 - g. If the situation goes beyond the end of Communications Center personnel normal shift, personnel should consult with the Supervising Public Safety Dispatcher and not leave without specific permission to do so (reference: BPD EAP Section II),
 - h. If time and conditions permit, secure your workplace and take with you important personal items such as car keys, purse, medication, and glasses.

6. Communication Center personnel should also take time prepare in advance for a possible evacuation:
 - a. Know your building's floor plan. Know where the stairs and fire extinguishers are located.
 - b. Determine in advance the nearest exit from your work location and the route you will follow to reach that exit in an emergency. Know the locations of alternate exits from your area.

SHELTER IN PLACE PROCEDURES

During certain emergency situations, particularly chemical, biological or radioactive material releases and some weather emergencies, Communications Center personnel may be advised to shelter in place rather than evacuate the building.

1. The Supervising Public Safety Dispatcher shall ensure that as soon as practical notification is made to the Support Services Captain via the Chain of Command
2. The Supervising Public Safety Dispatcher shall ensure that the following occurs:
 - a. Notify the Watch Commander of what specific personnel are sheltering in place, and where they will be located. Personnel should stay inside the Communications Center unless otherwise approved or instructed by the Supervising Public Safety Dispatcher.
 - b. Personnel should not use elevators.

- c. Quickly gather supplies you may need such as food, water, radio batteries, etc.
 - d. If possible, personnel should drink bottled, stored water, not water from the tap.
3. In the event of a suspected chemical, biological or radioactive material release, the following measures may also be taken:
- a. Shut and lock all doors. (Locking them may provide a tighter seal against chemicals).
 - b. If there is time push a wet towel up against the crack between the door and the floor to seal it.

RETURN TO NORMAL OPERATIONS

The decision that the incident is “all clear” and it is safe to return to normal operations should be made by made by the Watch Commander or Incident Commander in consultation with the Supervising Public Safety Dispatcher.

1. Supervising Public Safety Dispatcher will begin facilitating a return to normal operations and shall ensure that:
 - a. Request assistance from Watch Commander or their designee for the transport of Communications Center personnel and equipment back to the Communications Center,
 - b. Confirm that all personnel are accounted for, and that there are no injuries or needs for medical attention. Complete any necessary injury paperwork
 - c. Notification of the all clear is made to the PIO, ensuring that necessary community messaging will occur,
 - d. Notification of the return to normal operations to the Communications Center chain of command,
 - e. Notification to ACSO that 9-1-1 lines can be restored to the Communications Center
 - f. All evacuated equipment should be inspected and returned to their normal locations
 - i. Document any damage to issues with equipment
 - ii. Make note of any equipment that needs to be restocked/repared
 - iii. Charge or change batteries on any items that need to be stored with a full charge
2. Communications Center personnel should:
 - a. Immediately report any injuries to the Supervising Public Safety Dispatcher
 - b. Provide feedback and participate in debriefs or post-incident activities as requested.

MANUAL DISPATCHING

SCOPE

When the Computer Aided Dispatching System fails, dispatching will be done manually, as outlined in this section. It is designed to provide a uniform procedure for dispatching during computer aided dispatch failures.

PROCEDURE

When the CAD System fails the procedures listed below for implementation of the manual dispatching system will be put into effect:

1. Communications Center will advise all police units of the failure and have them hold all but emergency traffic until advised. The Watch Commander will be notified as soon as possible and then determine the need to implement service reductions.
2. The Dispatch Supervisor or Acting Dispatch Supervisor on duty will contact Information Technology (IT) Department. A callout during non-regular hours is authorized if necessary to repair the system.
3. Communications Center staff will take the manual status boards and radio control cards from the storage location behind console #4. Distribute radio control cards to the consoles.
4. A supervisor may assign one of the backup dispatchers to assist the Control Dispatcher with the status board and unit status recording. If the CAD screen is still up, attempt to photograph or take a screen shot to memorialize the units' activity and location. If the screen is blank attempt to recreate as closely as possible. Immediately begin a welfare check (rings) of every unit on the street and record each units activity and location.
5. Once the unit status board is set up and all unit statuses recorded, clear all units for normal traffic, unless the Watch Commander has deemed it necessary to implement service reductions.
6. When operating on the manual system, the radio cards will be used in the below listed manner:
 - a. Use white cards for all Police assignments, blue cards for Fire and EMS assignments.
 - b. Beat- enter the number of the beat where the call for service occurred.
 - c. Unit Assigned- enter the call sign of the field unit assigned.
 - d. Location- enter the address or cross streets of the call for service.
 - e. Incident- enter the appropriate code as specified in the CAD process.
 - f. Reporting Person- enter the name of the person reporting the incident.
 - g. Address- enter the address of the reporting person.
 - h. Telephone- enter the telephone number of the reporting person.
 - i. Received by- enter the employee number of the person receiving the call.
 - j. Dispatched by- enter the employee number of the person dispatching the call.
 - k. Remarks- enter information necessary to ensure safe and proper response to the call for service
 - l. Document the time on the card for each action taken during the dispatch of the detail.
R- Time received
D- Time dispatched
A- Time arrived
C- Time completed

CAD CATCH-UP

Once the Computer System returns to normal service, the following procedures shall take place (CAD catch-up procedures).

Step one: TO BE COMPLETED PRIOR TO ANYONE LOGGING BACK INTO CAD.

1. Log in to Aegis Maintenance.
2. Go to CAD, General, CAD catch up maintenance.
3. Select "New", then complete the fields highlighted in yellow (Confirm ORI (PD), number of incidents that were generated while CAD was down, catch up reason (use maintenance)), then select save & save incident data. Repeat process for Fire ORI.
4. Log out of maintenance.

Step two: All users can log into CAD.

1. Go back in to Aegis CAD.
2. Select the CAD catch up icon (between notepad & call control panel) from the tool bar

COMMUNICATION CENTER TRAINING PROGRAM

SCOPE

Implement standards of Communications training and evaluation of Public Safety Dispatcher Trainees, and set forth the selection of members of the Communications Training Team including Communications Training Officers and Training Supervisors, a formalized Communications Training and Evaluation Program is established. The purpose of the program is to produce well-qualified Public Safety Dispatchers, to assign the duties and responsibilities of a Public Safety Dispatcher, and to establish and define the selection, duties, and responsibilities of Communications Training personnel.

ADMINISTRATION

The program will be administered on a day-to-day basis by members of the Communications Training Team including all floor Trainers, Supervisors and the Communications Center Manager. Classroom and floor training will be provided by any member of the Training Team designated to instruct or train a certain phase or portion. To assist trainee's in gaining a comprehensive understanding of the importance of the role of Public Safety Dispatcher's with regard to the various stakeholders outside of the Communications Center,

Classroom phases will also include presentations from various departments, including sworn police and fire personnel, whenever possible.

INSTRUCTION

All instruction will be consistent with and based solely upon the information provided in the Communications Center Training Manual and Policy & Procedure Manual. Trainers are required to remain knowledgeable of the content of the both manuals and provide classroom and floor instruction that is consistent with the standards set forth in both manuals.

A curriculum committee composed of Communications Training Officers and the Communications Training Supervisor and Communications Center Manager, will be established to ensure the ongoing validity and relevance of the training materials and formats used in this program.

INSTRUCTIONAL PHASES

Trainees will receive instruction in the five phases: Orientation, Call-taking, RB1, Fire Desk and Police Desk. A trainee's performance during this instruction phase will be documented using the following methods: Daily Training Evaluations (DTE), Coaching Training Report (CTR), Weekly Training Goals.

DAILY TRAINING EVALUATIONS (DTE)

Daily Training Evaluations provide standardized guidelines and should be utilized by trainers to document a trainee's performance. During each phase the trainee and trainer should complete daily journals. Based on the Daily Training Evaluations and journal notes, the trainer will complete a weekly Coaching Training Report.

COACHING TRAINING REPORT (CTR)

An accumulation of a trainee's progress over a two-week period. This evaluation ties together the daily evaluations of the trainee for the previous two weeks and documents if the trainee is meeting performance expectations. CTR's are to be completed bi-weekly by both the trainer and trainee.

The trainer's completion of a CTR should be based on the compilation of the following information:

1. Journal notes
2. Daily Training Evaluation
3. Weekly Goals Assessment (met/unmet)
4. Observation of / interaction with the trainer

The trainee's completion of a CTR should be based on the compilation of the following information:

1. Journal notes
2. Daily Training Evaluation Review
3. Weekly Goals Assessment (met/unmet)
4. Self-Assessment

WEEKLY TRAINING GOALS

Weekly training goals will provide the trainer a clear outline of the teaching topics to cover, as well as providing performance expectations and focused-based study guidelines to the trainee. At the beginning of each week, the trainer and trainee will meet and the trainer will explain the weekly training goals to the trainee, after which both the trainer and trainee will sign the form. The signed form will be given to the Training Supervisor for placement in the trainee's file.

EVALUATION / RELEASE FROM TRAINING

Communications Training Officers from the shifts to which trainees are assigned will attend evaluation sessions as needed to discuss progress and specific problems with the Training Team

While in the evaluation phase the trainee will continue to receive daily and bi-weekly evaluations. It is imperative to document any areas of weakness, along with the trainees overall performance, on these evaluations. The Training Officer must take a hard look at the trainee to determine if they can operate as a viable dispatcher for the department. It is crucial to provide accurate documentation of the trainee's progress before releasing them from the training program.

Under normal circumstances, Trainees will not be included in staffing or allowed to work independently until they successfully complete the training program, including Phase 4, as well as the three-week POST Certified Dispatcher Academy.

Communications Training Officers and trainees will follow the standardized training guidelines outlined in the Training Program Manual and Testing Material. Training Officers and Trainees will complete their Daily Evaluations and Bi-weekly CTR's.

Training Officers will update the Trainee's Competency Verification checklist with the date and CTO's initials, whenever a new training component is:

1. Explained
2. Demonstrated
3. Performed
4. How competency was determined
 - (a) Observation
 - (b) Role Play
 - (c) Written Exam
 - (d) Verbal Assessment

The responsibility for recommending a trainee's termination rests with the Communications Team.

Recommendations for release should be substantiated by documentation including Daily Training Evaluations, Bi-weekly CTRs, and Weekly Training Goals

ASSIGNED TRAINER

If the assigned Communications Training Officer is unavailable to train the trainee due to illness or any other reason, the Communications Training Supervisor or Communications Manager will assign the trainee to another trainer. Consideration will be given to the trainee's current shift and an effort will be made to place the trainee with another Training Officer on the same shift. If there is not an available Communications Training Officer on the same shift the trainee will be assigned to an available Training Officer on a different shift.

COMPLETION OF TRAINING PROGRAM

Successful completion of the training program is defined by the trainee's ability to successfully demonstrate proficiency in all phases, including the final evaluation phase. Proficiency must be documented in Daily Training Evaluations, Coaching Training Reports and Weekly Goal Assessments.

Upon completion of Phase 3 of the training program, a training officer will evaluate the trainee's ability to work as an independent dispatcher within the communications team. The Training Officer will be in the role of an observer/evaluator. During this time the Training Officer will not step in unless there is a liability or first responder safety issue involved. They will be there to answer questions and continue the training process, but not to do the work for the trainee. The Training Officer must assess how effectively, safely, and thoroughly the trainee performs their duties. They must determine if the trainee has retained the information afforded them during their training, and note any weak areas in their performance. The Training Officer must develop specific tasks to overcome any areas of deficiency noted, utilizing a worksheet if necessary. If the trainee cannot perform at a competent level, a decision will be made whether to re-phase the trainee or terminate them from the program.

COMMUNICATIONS TRAINING OFFICER

The Communications Training Officer directs trainees assigned to Communications Training Program and performs the duties and responsibilities of the Public Safety Dispatcher position. Duties and Responsibilities of the Communications Training Officer:

1. The Communications Training Officer has three roles to fulfill:
 - a. That of a Public Safety Dispatcher with full responsibilities.
 - b. That of a trainer demonstrating the necessary skills.
 - c. And, that of an objective evaluator of the standards of performance.
2. The Communications Training Officer must have the requisite skills necessary to become a reliable evaluator of the trainee's performance and to submit additional documentation as required.
 - a. The Communications Training Officer leads and directs trainees toward the attainment of the responsibilities and duties associated with the position of Public Safety Dispatcher.
 - b. The Communications Training Officer explains and demonstrates proper Communications procedures and departmental procedures.
 - c. The Communications Training Officer explains and complies with Departmental goals and objectives while maintaining and fostering a positive relationship with the trainee.
3. The Communications Training Officer establishes a business-like, yet friendly relationship with the trainees. The Communications Training Officer observes and evaluates the trainee's behavior, in accordance with prescribed departmental procedures.
 - a. The Communications Training Officer provides on-going instruction, utilizing innovative and practical techniques. The trainer has a responsibility to formulate, with the trainee, remedial training when necessary due to performance deficiencies. The trainer is further charged with the responsibility of recommending termination of the trainee when objective evaluation and documentation indicates that reasonable remedial training has not been successful.
 - b. On a regular basis, the Communications Training Officer prepares a verbal/written report on the relative progress of the trainee, presenting the report to the Communications Shift Supervisor, training team, Communications Training Supervisor, and the Communications Center Manager.
 - c. When the Communications Training Officer believes the trainee has gained sufficient skill and knowledge to operate as a solo Public Safety Dispatcher at the end of Phase 4-Evaluation, the Communications Training Officer or Communications Training Supervisor shall make such a recommendation to the Communications Center Manager
4. With the concurrence of the Training Supervisor and the Communications Manager, the trainee will be released from training and assigned as a independent Public Safety Dispatcher.
5. A curriculum committee composed of Communications Training Officers and the Communications Training Supervisor will be established to ensure the ongoing validity and relevance of the training materials and formats used in this program.

COMMUNICATIONS TRAINING SUPERVISOR

The Communications Training Supervisor will have the responsibility for the Communications Training Program. Duties and Responsibilities of the Communications Training Supervisor are:

1. The Communications Training Supervisor has two roles to fulfill;
 - a. that of a Communications Supervisor with full supervisory responsibilities,
 - b. and the Coordinator of the Communications Training Program.
2. As trainees are assigned to the Communications Training Program, the Communications Training Supervisor will ensure that the training and evaluation process are carried out.
3. The Communications Training Supervisor will draft schedules of Training Officer assignments for each trainee. He/She will also coordinate the materials needed for the training program.
4. The Communications Training Supervisor will set dates/locations for Training Officer Evaluation meetings and will chair the meeting.
5. The Communications Training Supervisor will be responsible for calling general staff meetings of the Communications Training Team, including one to be conducted prior to each group of trainees entering the program. (this will help ensure that trainers are up to date on training matters, have received all necessary training materials for their review and provide an opportunity for any questions or concerns to be addressed).
6. The Communications Training Supervisor will maintain the training lesson plans and training aids.
 - a. The Communications Training Supervisor will be responsible for the weekly review of the trainee's training guide and evaluation. Open, ongoing verbal communication and appropriate feedback to both trainees and trainers are essential for positive motivation and to ensure proper employee development.
 - b. The Communications Training Supervisor will ensure that accurate, detailed documentation of the Trainees training is maintained, addressing both satisfactory and deficient performance. This will provide a reference base regarding the substance of the program and/or the trainee's performance. Various methods and resources should be utilized to accomplish this task; review of the evaluation reports, oral communications with the trainer, the trainee, the patrol sergeants, and watch commanders and other dispatchers are recommended. Verbal tests, personal observation of performance, review of CAD incident histories and monitoring pre-selected telephone and radio traffic from the 24-hour tape are also suggested methods to aid in this evaluation.
 - c. The Communications Shift Supervisors will monitor the training and evaluation of trainees to ensure that personality conflicts between a trainee and a Communications Training Officer are identified and corrected as needed.

COMMUNICATIONS CENTER MANAGER

Duties of the Communications Center Manager:

1. The Communications Center Manager will have responsibility for the maintenance and security of all records relating to the trainee's development. All evaluations and memoranda concerning the trainee's performance will be kept electronically.
2. The Communications Center Manager will be responsible for informing the Support Services Captain of the status of all recruits. All recommendations for termination or serious remedial training will be forwarded with a detailed explanation of the reasons for the recommendation.
3. The Communications Center Manager will be responsible to oversee a review and evaluation of the program, and to implement needed organizational changes when no recruits are in training.

SELECTION OF COMMUNICATIONS TRAINING OFFICERS

The selection process consists of two components: Communications Supervisors' staff evaluation and an interview with the Communications Center Manager.

Periodic recruitment announcements for CTO's will be posted. Dispatchers will submit a memo of interest to be considered for the position.

1. The trainer must possess a concern and the courage to objectively evaluate the performance of the developing trainee.
2. The trainer must subscribe to the ethic of promoting a professional image through the adherence to standards of conduct and performance.

Selection of Supervisory Personnel: Communication Training Supervisor will be selected from the supervisors expressing a desire to participate in the Communications Training Program. The selection will be made by the Communications Manager.

COMMUNICATIONS CENTER QUALITY ASSURANCE PROGRAM

SCOPE

The Quality Assurance Program is a standardized form of evaluating employee's adherence to established Communications Center operational directives and procedures. The goal of the program is to provide a system of measurement that both acknowledges exceptional performance as well as capturing areas needing improvement or remediation. The Quality Assurance Program provides a method to continuously evaluate the level of service we are providing our customers.

The application for these standards is designed to enhance the quality of each employee's performance and improve the procedures used within the daily operations of the Communications Center. The result will be a team of highly skilled team of professionals that provide excellent customer service to the internal and external communities we serve.

PROCEDURE

Focused evaluations will be used to routinely examine practices, procedures and operational standards utilized in the Communication Center. The standards utilized in the Quality Assurance Program will be based on:

- a. NENA Call Taking Standards
 - b. Departmental Mission, Vision and Values
 - c. City of Berkeley Customer Service Principals
 - d. Departmental Policy and Procedures
 - e. Training Program Instruction
 - f. Standard Operational Procedures
 - g. General Orders
 - h. Police and Administrative Regulations
1. Quality Assurance reviews will be done on a regular basis. These reviews will be used to evaluate the performance of each employee. In addition to measuring individual performance, focused reviews will be used to continually evaluate the efficiency of departmental procedures, practices and training methods.
 2. A Random Selection of calls taken by each employee will be reviewed on a regular basis to ensure compliance with department policies, procedures and standards.
 - a. Each employee will receive a minimum of two call-taking evaluations, one police radio evaluation and one fire radio evaluation each month.
 - b. Evaluations will be performed by the Dispatch Supervisors and Communications Manager In their capacity as Quality Assurance Evaluators (QAEs).
 - c. QAEs will utilize pre-established guidelines for evaluations and objectively evaluate each employee under their direct command.

- d. All employees assigned to the Communications Floor will be subject to the same quality assurance review process, regardless of employment status or job classification.
- e. Any Berkeley Police Department employee temporarily re-assigned to, or working overtime on the Communications Center floor is subject to this quality assurance review process.
- f. All telephone calls and radio segments will be reviewed using the QA Evaluation templates.
- g. An evaluation form will be completed for each review.
- h. Randomly selected telephone calls may be incoming or outgoing, and include high priority (1 and 2) calls, business calls, referrals, transfers or out-going calls
- i. Randomly selected radio transmissions may include high priority incidents, routine calls for service and officer initiated activity.
- j. The selected calls should be long enough to make a fair assessment of the criteria on the evaluation form.
- k. QA Evaluations must be reviewed with the dispatcher(s) after the evaluation has been completed. Because timely and beneficial feedback is important, evaluators will meet with the employee no later than 5 days after completion.
- l. All reviews will be stored manually and/or electronically and retained for 2 years.
- m. Any dispatcher obtaining a single view score below 80%, may receive additional reviews, performance goals or improvement plans. QAEs will meet and discuss the area of deficiency and determine the training necessary to support the employee in attaining proficiency. Any actions initiated in response to the results will be documented and included as part of the review
- n. These reviews can be used to support the development and assessment of goals and expectations on the dispatcher's yearly performance appraisals.

CALIBRATION PROCESS

It is important for the success of a QA/QI Program to confirm that QAE's are consistent, accurate and fair when evaluating employees. To ensure this, every quarter, the Communications Manager will assign a single incident to all QAE's to evaluate independently, to ensure QAE's are using equal standards of measurement when performing evaluations.

QUALITY ASSURANCE EVALUATORS (QAE)

The Quality Assurance Team shall be comprised of the Communications Center Manager and Dispatch Supervisors. Dispatch Supervisors will be the Quality Assurance Evaluators (QAEs) and they will be trained in the area(s) in which they are conducting the review.

The following are the duties and responsibilities of the Quality Assurance Evaluators (QAEs):

- The QAE will be responsible for the evaluating dispatchers assigned to them.

- The QAE shall consistently evaluate calls for service processed by department employees in a manner that is objective, fair and accurate.
- The QAE will gather the available records (CAD incidents, call notes, recordings etc.) needed to evaluate all pertinent information and data related to the random sampling of calls for service being reviewed
- The QAE shall objectively evaluate the information and data, measuring it against the policies and procedures adopted or defined by the agency
- QAE shall provide timely, accurate and objective feedback
- The QAE will be responsible to generate and disseminate reports as defined by the agency directive.

FOCUSED EVALUATIONS

Focused Evaluations may be used for the following purposes:

1. Evaluate specific departmental policies, procedures and practices.
2. Evaluate the efficiency of technology or equipment utilized by the Department which may affect a dispatchers' performance. An individual dispatcher's performance is not a consideration in this type of focused evaluation.
3. Evaluate incidents involving catastrophic loss shall be included in the quality assurance review process to determine if additional training or changes to procedure are necessary.
4. Identify areas which may require additional or supplemental training and aid in determining whether certain procedures require modification or change.
5. Any City employee may request a focused review for a specific purpose. Requests must be submitted via proper chain of command, to the Communications Manager stated below:
 - a. BPD employees via the Support Services Captain
 - b. BFD employees via the Battalion Chief
 - c. Any City Staff directly involved with the incident in review via the Support Service Captain

AREAS REQUIRING QUALITY ASSURANCE REVIEW

1. Call Taking (Telephone Performance).
2. Police Radio Performance
3. Fire Radio Performance
4. Focused (Research and Procedure Review)

Forms:

- a. See Evaluation Forms for specific criterion for 1-3 above
- b. Focused/ Research Evaluation Form currently in development

QAE GUIDELINES FOR DATA REVIEW

METHOD FOR GATHERING CALL-TAKER DATA FOR REVIEW

The QAE will use the following method to gather data to evaluate:

1. Each month, the QAE will randomly select two Priority 1 and 2 emergency calls Emergency calls and non-emergency calls for service for each employee under their direct supervision.
2. The selected calls should be no less than 15 seconds long.
 - a. NOTE: 911 or W911 hang-up calls or calls not requiring CFS be generated **should not** be used for the evaluation process.
3. Once the calls for review have been selected, the evaluator will extract the corresponding Detailed Call for Service from CAD to review simultaneously.

METHOD FOR GATHERING RADIO DATA FOR REVIEW

The QAE will use the following method to gather data to evaluate:

1. Each month, the QAE will randomly select a portion of each dispatcher's police and fire radio transmissions for review, using the Department's current telephone/ radio recording system.
2. Once transmissions for review have been selected, the evaluator will extract the corresponding Detailed Call for Service from CAD to review simultaneously.

QAE EVALUATION PROCEDURE: CALL TAKER

The QAE will review all data related to the incident (Incident History and /or Telephone/Radio recordings) to determine if performance standards were met by noting **YES** or **NO** in each rating field.

1. Play the audio recording
2. Review the CAD report
3. Complete the appropriate evaluation form. (Call Taker/Police Radio/Fire Radio)
4. An explanation should be provided for each **NO** rating
5. Document exceptional performance in the comments section of the review form.
6. Document any areas of deficiency and suggested areas of the remediation in the comments section of the review form.
7. Document any areas of improvement in the comments section of the review form.
8. An overall summarization of the incident should be noted in the additional comment section.

EMPLOYEE EVALUATION REVIEW

After the evaluations are complete the QAE will meet with the employee within five working days (on shift) to go over the review findings:

1. Discuss the review with the dispatcher. The dispatcher may note any comments they have on the review form
2. If a pattern of non-compliant performance is detected in the QAE process, the Shift Supervisor and the employee will formulate an action plan to improve performance. An action plan is a form of documented remedial training.
3. If non-compliant performance persists, the area of poor performance may be handled as a disciplinary issue.
4. Disagreement on reviews will follow the chain of command.
5. A copy of completed and signed forms will be placed in the dispatchers file

COMPLIANT AND NON-COMPLIANT EVALUATIONS

Evaluated employees will be considered either “compliant” or “non-compliant” based on the total evaluation score:

Compliant: 80% or above

Non-Compliant: 79% or below

If an employee’s performance receives a non-compliant score the QAE will discuss the deficient area(s) with the dispatcher and provide corrective measures (training, policy or other instructional material) designed to assist the employee in the deficient area(s).

REMEDATION AND PERFORMANCE IMPROVEMENT PLANS

Any employee receiving non-compliant scores for 3 consecutive months will be placed on a remediation plan.

Any employee receiving non-compliant scores after a remediation plan is in place will be placed on a Performance Improvement Plan (PIP).

This policy does not exclude disciplinary action when considering individual cases of gross negligence and/or gross improper behavior or cases of persistent failure to apply corrected policy and procedures; nor does it exclude any existing disciplinary process.

PREFACE

As you read this; somewhere in California, a law enforcement agency is providing mutual aid to another. Mutual aid is an everyday occurrence in a state as large and diverse as California. This is the continuation of a Cal OES decades-long process of “neighbor helping neighbor.” The law enforcement mutual aid system is an ongoing cooperative effort among law enforcement agencies to ensure an effective and organized response to a wide range of emergencies. There may be a misconception that mutual aid is used only during a civil unrest and/or natural disaster; however, this system has been used successfully for many other situations, including large criminal investigations, deployment of special teams such as Special Weapons and Tactics Teams, Bomb Squads, etc.

How will your agency use the mutual aid system? Planning, preparation and operational activities of law enforcement agencies in support of the mutual aid system must be consistent with each department’s policies and procedures and must also comply with the Standardized Emergency Management System (SEMS) and the National Incident Management System (NIMS).

All law enforcement executives, administrators, managers, and field supervisors should familiarize themselves with this plan and its application. The personnel of the Cal OES Law Enforcement Branch are available to assist you with planning, training and when necessary, emergency response coordination. It is important to note that Cal OES does not “own” the mutual aid system. It is a part of California law enforcement; and those that participate benefit and share in the concept of “neighbor helping neighbor.”

Mark N. Pazin, Chief
Law Enforcement Branch

INTRODUCTION

The Law Enforcement Mutual Aid Plan

This document delineates the current state policy concerning law enforcement mutual aid. It is consistent with, and describes state law concerning application of the Standardized Emergency Management System (SEMS) in law enforcement mutual aid situations.

It describes the standard procedures used to acquire law enforcement mutual aid resources and the method to ensure coordination of law enforcement mutual aid planning and readiness at the local, state and federal levels.

The law enforcement mutual aid system works best when there is expeditious receipt and dissemination of law enforcement incident information and situational intelligence related to unusual occurrences.

This document includes information regarding the statutory protections afforded responders under the Emergency Services Act, and provides legal background for law enforcement mutual aid.

New in this Revision

This edition takes the basic information included in prior versions and formats it in a more complete and usable manner. No changes have been made to the system, organizational relationships or the process. What follows is perhaps a more useful explanation of the process.

Updated information on the Law Enforcement Branch and its resources is included; as is updated information on state agencies that routinely provide law enforcement mutual aid. Lastly, a compendium of legal sections has been added. While this is not meant to be exhaustive, it will provide easy access to key sections of law dealing with these issues.

Cal OES Law Enforcement Branch

The Cal OES Law Enforcement Branch functions behind the scenes to maintain the Law Enforcement Mutual Aid System in California. Our peace officers can assist any California law enforcement organization in developing related plans, training, and exercises for their agency. The Branch welcomes input on the Mutual Aid System and suggestions for improvement of this plan, or emergency operations in general.

HISTORY AND AUTHORITY

The Law Enforcement Mutual Aid system has been used successfully for many years. Notable events involving use of this system include:

- Northern California Floods
- Firestorms of 2003, 2007
- Transportation accidents, air crashes
- Watts Riots
- People's Park – Berkeley Civil Unrest
- Huntington Beach "Surf" Riot
- Loma Prieta Earthquake
- East Bay Hills (Oakland) Fire
- Several Environmental Protests
- Los Angeles Civil Unrest
- Polly Klaas and other large searches
- Elem Indian Reservation SWAT Incident
- Hollister "Wild Bunch" Motorcycle Events
- Sund-Peloso Yosemite Murders
- Regional SWAT Mutual Aid Callout for Fresno Deputy's Killer
- Mehserle Shooting Protests
- 2011/2012 Occupy Demonstrations
- Bassler Manhunt - Mendocino County
- Dorner Manhunt – Southern California
- Rim/Clover Fires
- Miller Manhunt-Triple Homicide
- Roseville Mall Fire/Barricaded Subject
- LAX Active Shooter
- Montecito Mudslides
- Woolsley Fire
- Camp Fire

The statewide mutual aid system today is an outgrowth of the California Disaster and Civil Defense and the Master Mutual Aid Agreement (1950), the Emergency Services Act, Chapter 7 of Division 1 of Title 2 of the Government Code (GC), Governor's Executive Order W-9-91, is supported by the California Emergency Plan and by extension, the Law Enforcement Mutual Aid Plan.

The State of California Law Enforcement Mutual Aid Plan is issued and revised under the authority of Sections 8550, 8569, 8615 through 8619, and 8668 of the California Government Code, the California Emergency Plan, and the Master Mutual Aid Agreement.

LIABILITY ISSUES

The Emergency Services Act (the Act) provides law enforcement agencies limited immunity from liability when responding in support of a mutual aid request.¹ Albeit “limited,” when interpreting the immunity protections provided by the Act, the courts have regularly found that if the “state must take the steps necessary to quell an emergency, it must be able to act with speed and confidence without fear of incurring tort liability.”²

Therefore; the Act’s immunities are broader than the general immunities provided for discretionary governmental actions, i.e., for decisions made by the high ranking officers, the City Council, or Board of Supervisors regarding policy matters.³ Also, the protections afforded by the Act generally supplement the other statutory liability protections that may apply to the routine law enforcement role, such as immunities for failure to enforce the law.^{4,5} The liability protections of the Act extend to mutual aid provided during a declared state of emergency⁶ and non-emergency periods.⁷

The best way that a law enforcement agency can assure that its actions are protected by the Act is to:

- Act in accordance with this plan,
- Respond based upon a request by the Operational Area, Regional, or State Law Enforcement Mutual Aid Coordinator,
- Act in accordance with your local emergency plan approved by the local disaster council in accordance with local ordinance, and
- Verify that your department’s plans and procedures are consistent with this plan.⁸

4 California Government Code § 8656.

5 California Penal Code §§ 818.2, 821.

6 California Government Code § 8616

7 California Government Code § 8617 also see *Soto v. State of California* (App. 2 Dist. 1997) 65 Cal.Rptr.2d 11,56 Cal.App.4th 196

8 California Government Code §§ 8560, 8568, 8569

DEFINITIONS AND CONCEPTS

Note: Some definitions are not verbatim text from related codes and regulations, but are paraphrased for clear understanding of the concepts involved.

Operational Area

A county, along with all the political subdivisions within that county constitutes an Operational Area.

Operational Area Law Enforcement Coordinator

The county sheriff is the Operational Area law enforcement coordinator, with the exception of the City and County of San Francisco, where the chief of police is the Operational Area Law Enforcement Coordinator.

Mutual Aid Region

A Mutual Aid Region is a geographic area comprised of multiple operational areas. A Mutual Aid Region manages and coordinates information and resources among operational areas within the mutual aid region and between the Operational Areas and the state level.

Regional Law Enforcement Mutual Aid Coordinator

A Regional Law Enforcement Mutual Aid Coordinator is an Operational Area Law Enforcement Coordinator elected by peers from within the mutual aid Region, to coordinate the collective law enforcement mutual aid response of agencies within the Region.

State Law Enforcement Mutual Aid Coordinator

The State Law Enforcement Mutual Aid Coordinator is the Chief of the Law Enforcement Branch of the California Governor's Office of Emergency Services (Cal OES). The state coordinator is responsible for mutual aid response coordination and administrative interaction between state and local law enforcement agencies during emergency and non-emergency situations, where the mutual aid system is, or could be, involved.

State of War Emergency

"State of War Emergency" means the condition which exists immediately, with or without a proclamation thereof by the Governor, whenever this state or nation is attacked by an enemy of the United States, or upon receipt by the state of a warning from the federal government indicating that such an enemy attack is probable or imminent. (Section 8558 (a) GC)

During a state of war emergency, the Governor has complete authority over all agencies of state government and the right to exercise within the area or regions designated, all police power vested in the state by the Constitution and laws of the State of California (GC, Article 12, Section 8620 and Article 13, Section 8627, "California Emergency Services Act"). During a state of war emergency, mutual aid is mandatory. (Discussed later in the Plan.)

State of Emergency

"State of Emergency" means the duly proclaimed existence of conditions of disaster or of extreme peril to the safety of persons and property within the state caused by such conditions as air pollution, fire, flood, storm, epidemic, riot, drought, sudden and severe energy shortage, plant or animal infestation or disease, the Governor's warning of an earthquake or volcanic prediction, or an earthquake, complications resulting from the Year 2000 Problem, or other conditions, other than conditions resulting from a labor controversy or conditions causing a "state of war emergency," which, by reason of their magnitude, are or are likely to be beyond the control of the services, personnel, equipment, and facilities of any single county, city and county, or city and require the combined forces of a mutual aid region or regions to combat, or with respect to regulated energy utilities, a sudden and severe energy shortage requires extraordinary measures beyond the authority vested in the California Public Utilities Commission. (Section 8558 (b)(GC))

During a state of emergency, the Governor has complete authority over all agencies of state government and the right to exercise within the area or regions designated, all police power vested in the state by the Constitution and laws of the State of California (GC, Article 12, Section 8620 and Article 13, Section 8627, "California Emergency Services Act"). During a state of emergency, mutual aid is mandatory. (Discussed later in the Plan)

Local Emergency

"Local Emergency" means the duly proclaimed existence of conditions of disaster or of extreme peril to the safety of persons and property within the territorial limits of a county, city and county, or city, caused by such conditions as air pollution, fire, flood, storm, epidemic, riot, drought, sudden and severe energy shortage, plant or animal infestation or disease, the Governor's warning of an earthquake or volcanic prediction, or an earthquake, complications resulting from the Year 2000 Problem, or other conditions, other than conditions resulting from a labor controversy, which are or are likely to be beyond the control of the services, personnel, equipment, and facilities of that political subdivision and require the combined forces of other political subdivisions to combat, or with respect to regulated energy utilities, a sudden and severe energy shortage requires extraordinary measures beyond the authority vested in the California Public Utilities Commission. (Section 8558(c), GC).

In periods of local emergency, political subdivisions (cities or counties) have the power to provide mutual aid to any affected area in accordance with local ordinances, resolutions, plans, or agreements. (It could be argued that having signed the Master Mutual Aid Agreement, the entity is bound to provide resources, if requested in accordance with the Mutual Aid Plan.)

During a local emergency, state agencies may provide mutual aid; including personnel, equipment, and other available resources, to assist local jurisdictions in accordance with mutual aid plans or at the direction of the Governor.

By proclaiming a local emergency, the governing body of a city or county expands its regulatory enforcement subject to constitutional constraints, increases its police power and may promulgate temporary emergency orders and regulations necessary to provide for the protection of life and property.

Response costs are absorbed by the responding agency notwithstanding any other agreements to the contrary, or availability of disaster reimbursement funds from another source.

A Proclamation of Local Emergency is not required before requesting law enforcement mutual aid.

Unusual Occurrence

An unusual occurrence is an event involving potential or actual personal injury or property damage arising from incidents such as natural and manmade disasters, acts of terrorism, and civil unrest.

Fifty Percent Guideline

No jurisdiction is required to unnecessarily deplete its own personnel, equipment and service capabilities in order to furnish mutual aid resources. When requested to provide mutual aid, it is generally accepted that a reasonable response will consist of up to 50% of available on-duty uniformed personnel.

Law Enforcement Branch

The California Governor's Office of Emergency Services Law Enforcement Branch (Cal OES LEB) is the state facilitator of inter-regional law enforcement mutual aid response resources to operational areas. The Law Enforcement Branch also provides ongoing liaison with operational areas, municipalities, and state and federal agencies during non-emergency periods to facilitate emergency preparedness planning and mutual aid awareness training. The branch also coordinates the state's search and rescue and coroner/medical examiner mutual aid programs, as well as other activities in support of local law enforcement mutual aid response. Additional information follows later in this plan.

Mission Numbers

The California Governor's Office of Emergency Services, Law Enforcement Branch, assigns Cal OES law enforcement mission numbers to track law enforcement mutual aid resources responding from outside the requesting Operational or Regional Area jurisdiction.

This most frequently occurs during searches and rescues involving registered Disaster Service Workers (volunteers) to ensure workers compensation coverage.

Search and Rescue incidents are recognized as an emergency, often requiring specialized resources from various parts of the state. A majority of SAR responders are volunteer professionals. It is recommended that any out-of-county SAR mutual aid mission requests be routed directly to Cal OES LEB for the assigning of a state mission number. This facilitates immediate Statewide SAR Mutual Aid (as defined in the SAR Annex), and identifies the existence of an authorized state mutual aid mission providing Disaster Service Worker (DSW) coverage for properly registered volunteer personnel.

Normal Law Enforcement Mutual Aid within a Region does not require a Cal OES Mission number although; mission numbers may also be issued at the request of the Regional Law Coordinator. If law enforcement resources (in the form of mutual aid) respond outside of their Region (SWAT from a county in Region 4 being requested by a County in Region 3) the Law Branch will issue a mission number and track those responding resources until the operation has concluded.

Mission Numbers (Cont.)

If a county within a region desires to have a Cal OES Law Mission number issued for county-to-county mutual aid requests, the request must be directed to the Regional Mutual Aid Coordinator (RMAC) for approval. Upon approval, the RMAC coordinator will contact the Cal OES Law Enforcement Branch Duty Officer and request that a mission number be issued. Any request for law enforcement mutual aid outside of the originating region must have the approval of and be coordinated by the Regional Mutual Aid Coordinator.

The existence of a law enforcement mission number also implies that the law enforcement duty officer queried the requestor to insure that mutual aid criteria were met prior to tasking an out-of-county mutual aid response.

It is suggested that any county routinely providing law enforcement mutual aid (typically a specialized resource, i.e. Bomb squad, SWAT) to another county within its region develop an internal "unusual occurrence" numbering system to document each deployment.

Mission numbers are not a mechanism to assure reimbursement of response costs, they are a database tracking tool to memorialize a mutual aid incident and its disposition.

A CalOES law enforcement mission number consists of three parts: the year (e.g. 2009), the letters "LAW" followed by a four digit sequential number, e.g. 2009-LAW0123.

Day-to-Day Mutual Aid

During the course of normal law enforcement smaller incidents occur that may require immediate assistance, such as: back-up on a traffic stop, perimeter control for a fleeing suspect or crowd control at a barricaded suspect location pending the arrival of additional local resources. Officers from nearby jurisdictions may respond to these emergency broadcasts on their own initiative (department policy permitting) without a formal mutual aid request.

LEVELS OF MUTUAL AID

Mutual aid response within the State of California is based on four governmental levels of increasingly justifiable mutual aid support. These levels are cities (or other similar local jurisdictions), operational areas, mutual aid regions, and the state.

Note: Throughout this segment of the Mutual Aid Plan, the terms chief of police/sheriff are used as the initiators of a mutual aid request. The volatility of some incidents necessitates immediate support. In fact, any designated command, management or supervisory-level officer/ deputy has the ability to request, or provide, law enforcement mutual aid on behalf of the chief/ sheriff, if so authorized by agency policy.

City

City police departments are charged with responsibility for the maintenance of law and order and protection of life and property within the municipal geographic boundaries.

The chief of police is the official responsible for determining the magnitude of a law enforcement emergency within the jurisdiction, the extent of locally committed resources and the necessity for requesting law enforcement mutual aid. In a contract city, the command-level manager from the contracted agency functions much as does a local chief.

Operational Area

The Operational Area (county sheriff) is the next level of law enforcement mutual aid responsibility (See Operational Area map). The Operational Area is a composite of its political subdivisions, i.e., municipalities, contract cities, special districts and county agencies. The county sheriff is the Operational Area Law Enforcement Mutual Aid Coordinator (or, in the case of San Francisco, the chief of police of the city and county of San Francisco).

Region

To facilitate coordination of mutual aid, the State of California is geographically divided into seven law enforcement mutual aid Regions (See Mutual Aid Regional map). Each mutual aid Region is comprised of multiple Operational Areas and has a Regional Law Enforcement Mutual Aid Coordinator.

The Regional Law Enforcement Mutual Aid Coordinator is granted the authority to coordinate the mutual aid response of law enforcement resources within the Region to support a mutual aid request from a jurisdiction within the Region. Requests for mutual aid resources between Regions are coordinated by the Chief of the California Governor's Office of Emergency Services, Law Enforcement Branch.

The Regional Law Enforcement Mutual Aid Coordinator is a sheriff from within the Region who is elected to the position by majority vote of the other Sheriff's of that Region. [See the appendix that describes this process.]

Note: Coroner's mutual aid is coordinated in the same manner as law enforcement mutual aid beginning at the Operational Area level. See the Cal OES companion document that describes Coroner/Medical Examiner Mutual Aid for further detail.

State

On behalf of the Governor, the Director of the California Governor's Office of Emergency Services, through the Chief of the Law Enforcement Branch, has the responsibility for coordination of state law enforcement mutual aid resources in support of local jurisdictions during times of emergency. Information on the resources available from state agencies appears later in this plan.

A number of state law enforcement agencies offer assistance on an "immediate need" basis – much as exists in "day-to-day" mutual aid response situations. Nothing in this plan should be construed to limit this process. Indeed, it is consistent with this plan. Use of state law enforcement resources for mutual aid beyond that level should, however, be coordinated through the Cal OES Law Enforcement Branch.

Federal

The Cal OES Law Enforcement Branch can also assist a local agency in seeking the assistance of federal law enforcement agencies or resources. Our peace officers can assist local law enforcement organizations with requests to the Federal Emergency Management Agency, the US Department of Justice, or other agencies. In some cases, federal reimbursement for response costs is available through these agencies – again accessed through Cal OES Law Enforcement Branch.

Law Enforcement Mutual Aid Plan

MUTUAL AID PROCEDURES

Note: Throughout this segment of the Mutual Aid Plan, the terms chief of police/sheriff are used as the initiators of a mutual aid request. The volatility of some police incidents necessitates immediate support. In fact, any designated command, management or supervisory-level officer/deputy has the ability to request, or provide, law enforcement mutual aid on behalf of the chief/sheriff, if so authorized by agency policy.

Local Request for Mutual Aid

When a chief of police of a local jurisdiction (or the sheriff, acting as chief law enforcement officer for the unincorporated or a contract area) determines that an unusual occurrence may become or is already beyond the control of local law enforcement resources, it is the chief's (or duly authorized representative's) responsibility to request mutual aid from the Operational Area Law Enforcement Mutual Aid Coordinator.

A declaration of local emergency may or may not be appropriate for the circumstances; however the chief of police may request mutual aid prior to the activation of an EOC or formal declaration of local emergency. Mutual aid request and response is not dependent on a declaration of local emergency.

Operational Area Mutual Aid

When an emergency develops or appears to be developing which cannot be resolved by a law enforcement agency within an Operational Area, it is the responsibility of the Operational Area Mutual Aid Coordinator to provide assistance and coordination to control the problem. (Section 26602 GC)

In response to a request for law enforcement mutual aid by a chief of police within the Operational Area, the sheriff will initiate procedures to activate the mutual aid. The sheriff will coordinate the Operational Area response of law enforcement resources including those of unaffected operational area municipalities, the local CHP, and other law enforcement agencies within the Operational Area, as well as the sheriff's resources in order to assist the affected local chief of police.

If it appears likely that the resources of an Operational Area will become depleted, the Regional Coordinator should be advised in advance.

Regional Mutual Aid

Should an existing or anticipated emergency be of such magnitude as to require the commitment of the resources of one or more Operational Areas, it is the responsibility of the Regional Law Enforcement Mutual Aid Coordinator to organize the notification and response of resources within that region.

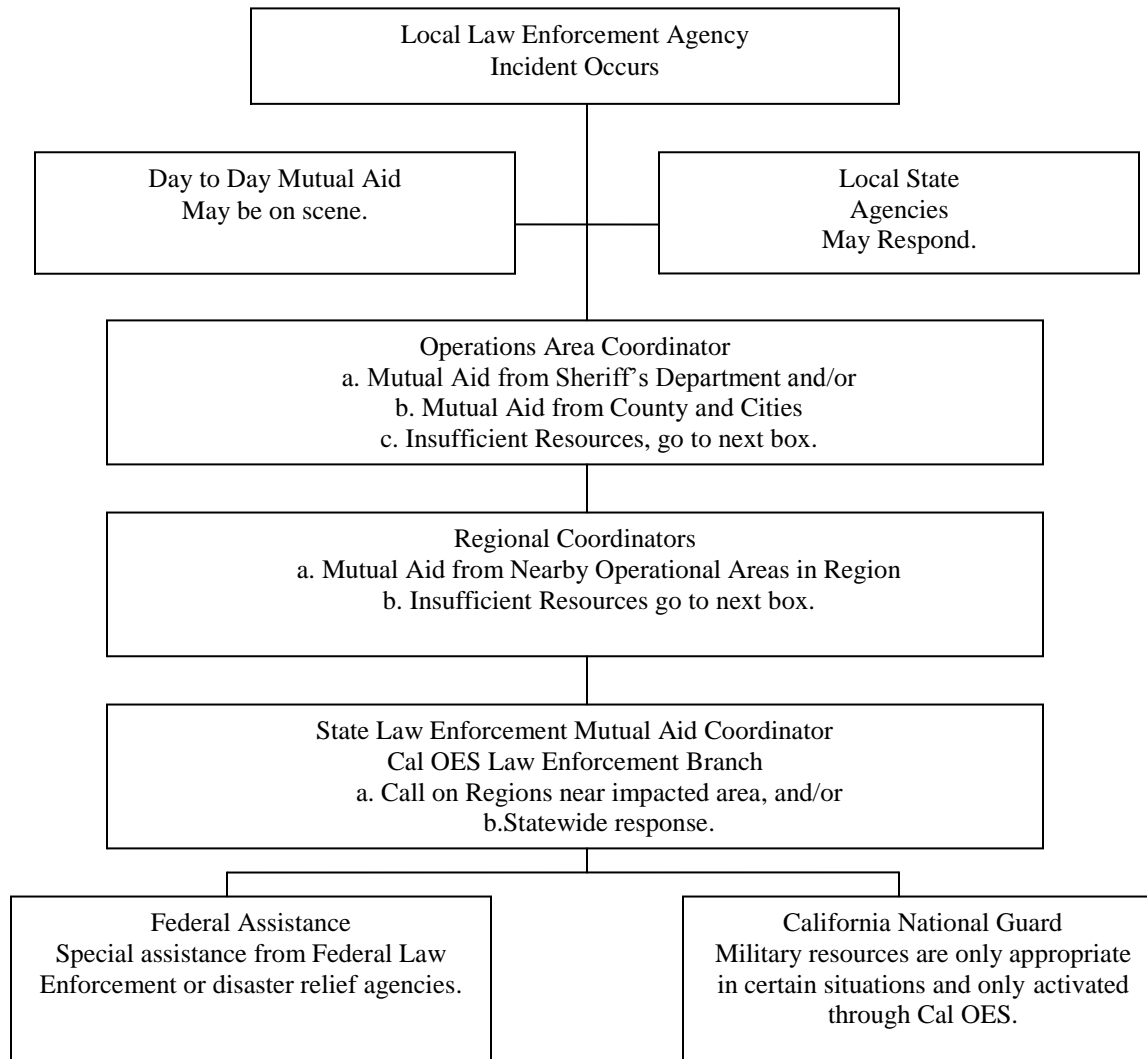

The Regional Coordinator will keep the State Law Enforcement Mutual Aid Coordinator, who is the Chief of the California Governor's Office of Emergency Services, Law Enforcement Branch, advised of the situation status. The State Law Enforcement Mutual Aid Coordinator may support the regional response by issuing mission numbers (see glossary, Mission Numbers) and tasking state agencies within the region. An unusual occurrence necessitating regional law enforcement mutual aid does not require a proclamation of a state of emergency.

Statewide Mutual Aid

If the combined resources of a region are not sufficient to cope with an emergency situation, the Regional Coordinator may request additional assistance through the State Law Enforcement Mutual Aid Coordinator. The State Law Enforcement Mutual Aid Coordinator may then task law enforcement resources from Regions statewide, via the Regional Law Enforcement Mutual Aid Coordinators, to assist.

Law Enforcement Mutual Aid Requests

PRACTICAL ISSUES

Mutual Aid Essentials

Reasonable commitment of local law enforcement resources prior to the initiation of a mutual aid request is a fundamental component of mutual aid operations. This does not require the jurisdiction to have expended all personnel resources, but does assume that the agency has reasonably committed the majority of available, on-duty personnel or resources to the incident.

A request for law enforcement mutual aid requires the approval of the chief law enforcement officer of the requesting jurisdiction. A duly authorized sworn staff or command officer acting on behalf of the chief/sheriff may make the request.

Unless otherwise expressly provided, or later agreed upon, the responsible local law enforcement official of the jurisdiction requesting mutual aid shall remain in charge. It is operationally essential that the local law enforcement official coordinate all actions with responding law enforcement agencies to ensure an effective application of forces (8618 GC).

The integrity of responding forces and the policies and procedures of their departments must be maintained. Exceptions will require approval of the concerned department. Refer to the Law Enforcement Guide for Emergency Operations for further policy guidance.

Situation reports should be shared with all interested parties and agencies, including the Regional Coordinator and the Cal OES Law Enforcement Branch on a timely and frequent basis.

The agency *requesting* mutual aid is responsible for the following:

1. Identifying numbers and types of mutual aid resources requested.
2. Identifying specific missions for mutual aid responder tasking.
3. Advising responders what equipment they should bring.
4. Establishing an assembly area for responding resources.
5. Identifying communications channels compatible with command and control of field resources.
6. Designating a liaison officer to facilitate a coordinated assimilation of responding mutual aid resources.
7. Preparing a situation briefing including local maps for responders.
8. Providing logistical support such as food, lodging, rest intervals and equipment maintenance as appropriate, for mutual aid personnel. (Cont)

PRACTICAL ISSUES (Cont):

The responding agency is responsible for the following:

1. Properly equipping its personnel.
2. When possible, assigning a supervisor to maintain unit integrity.
3. Completing response rosters.
4. Dispatching personnel to the staging area.
5. Providing relief for assigned personnel at protracted events.
6. Record keeping as to dates and times of arrival and departure, rank, timekeeping, mileage, damage and expended resources.

Mutual Aid within SEMS

Mutual Aid is intended to augment local resources that have become overwhelmed as a result of unplanned circumstances requiring an emergency response. In California the organizational structure adopted to manage responding resources for all disciplines is the Standardized Emergency Management System (SEMS). SEMS includes the field level Incident Command System (ICS). (8607 GC)

Incident Command

For a detailed description of the Law Enforcement Incident Command System (LEICS) including mutual aid operational procedures, it is recommended that the Law Enforcement Guide for Emergency Operations be reviewed. The five command staff functions of Incident Commander, Operations, Planning/Intelligence, Logistics, Finance/Administration and their subordinate components are discussed in detail.

Planned Events

Planned events are not mutual aid incidents for planning purposes. Scheduled events that by their nature are potentially beyond the ability of local control require the affected jurisdiction, as a matter of responsible planning, to meet with the promoters, the sheriff and any other appropriate government entity to ensure that the law enforcement presence is adequate and that public safety is protected. Such planning may result in a Memorandum of Understanding [MOU] or contract between the local government hosting the event, specific law enforcement agencies involved and the event promoter.

The mutual aid system is not intended to prevent MOU agreements between concerned parties to ensure an adequate law enforcement presence. Policing costs are frequently recovered through event revenues and this should be considered during the planning process. (Cont)

PRACTICAL ISSUES (Cont):

Even with adequate planning, some events are inherently more likely than others to develop into an unusual occurrence. During the planning process, it is not only appropriate but recommended that the mutual aid organization be alerted to this potential. By doing so, those agencies which can be expected to provide support in such an eventuality will be afforded the opportunity to plan and deploy accordingly during the dates of the event. Proper planning will ensure an optimum mutual aid response should it become necessary.

It is recommended that the pre-event planning participants be organized according to the SEMS organization structure. By doing so, each entity can see exactly where it fits in a well defined organizational relationship. At multi-agency events, all levels of event staffing must be knowledgeable of the command hierarchy. If addressed prior to the event, it minimizes confusion and creates a seamless transition from planning to operations.

These things having been said, an unforeseen emergency may occur at a planned event that results in a mutual aid response. Mutual aid does not occur until the local law enforcement authority with jurisdiction determines that an emergency is in progress, that local resources have been reasonably committed or are unavailable and mutual aid assistance is required to restore the peace.

Cal OES Law Enforcement Branch personnel are available for event planning consultation and will staff appropriate positions during the event to facilitate mutual aid response and ensure that the Governor's office is appraised of situational developments. Some events will be of a nature that the federal government will declare them National Security Special Events [NSSE]. In these cases, the US Secret Service will convene a multi-agency planning team, to include local law enforcement. The Federal Bureau of Investigation also assigns Special Event Response Levels [SERL] to certain events. Cal OES Law Enforcement Branch staff can describe the NSSE and SERL processes, and put local law enforcement officials in touch with appropriate officials for further information.

Reserve Officers

Mutual Aid normally consists of sworn officers, technical personnel (sworn and non-sworn) and other resources. Many agencies use reserve officers to augment local field policing. In a law enforcement mutual aid response, reserve officers may best be utilized within their own jurisdiction to backfill vacant positions created by regular officers who have been deployed to the emergency jurisdiction.

Those concerns notwithstanding, reserve officers, as defined by California Penal Code 830.6 (a) 1 & 2 and 836.2, as employed by a law enforcement agency authorized to field reserve officers, may be utilized to enforce the law anywhere in the State of California.

Communications

An essential need during any emergency is the ability of an agency to communicate both internally and with other agencies. With this requirement in mind, the problem of communications should be a priority in mutual aid planning before an incident occurs.

The State of California has established the California Law Enforcement Mutual Aid Radio System (CLEMARS) with special frequencies for emergency law enforcement mutual aid purposes. For a detailed description of the California Law Enforcement Mutual Aid Radio System, it is recommended that the CLEMARS Plan be reviewed. This system is intended for command and control purposes among agencies taking part in emergency operations. It is not to be used as a primary local channel. Local departments may be allowed to use these channels in their day-to-day operations as an auxiliary to their primary frequency upon approved request.

In addition to CLEMARS, Cal OES Telecommunications is able to deploy interoperability communications vehicles to incident command posts. These vehicles are capable of coordinating dissimilar radio frequencies to facilitate communications among responding agencies.

Cal OES Telecommunications is also able to deploy satellite trailers to an Incident Command Post that will permit a combination of up to ten satellite data and telephone links, even in remote areas.

The Cal OES Law Enforcement Branch maintains a cache of handheld radios that are available to law enforcement agencies for emergency deployment. These radios are programmable in the UHF and VHF frequency ranges. Caches of encrypted radios for sensitive situations, investigations or incidents are also available.

Financial Assistance

Law enforcement agencies may be eligible for disaster related financial reimbursement from the state and/or federal government. State financial assistance may occur through the California Disaster Assistance Act (8680 through 8692 GC) when the Governor proclaims a state of emergency. Federal financial assistance may occur under Public Law 93-288 as amended by the Stafford Act. This requires a Presidential declaration of major disaster.

The Fire Management Assistance Grant (FMAG) program was enacted to ensure that adequate resources are available to control a fire incident *before a major disaster occurs*. FMAG assistance must be requested by the local fire agency, through Cal EMA, and approved by FEMA while the fire is burning uncontrolled and threatens such destruction as would constitute a major disaster. If an FMAG is approved by FEMA, seventy five percent of direct emergency response costs, including local law enforcement, may be eligible for federal reimbursement. Authority for this program can be found in *44 CFR Parts 2, 9, 10, 204, and 206*, The Fire Management Assistance Grant Program, and in *Public Law 106-390, the Disaster Mitigation Act of 2000*. Cal OES Law Enforcement Branch staff can advise and assist if a local agency wishes to file a claim for these funds.

Should these proclamations occur, local agencies may be eligible for financial assistance to reimburse a percentage of response costs (i.e., overtime, mileage, etc.), and restoration and reconstruction costs for damage to agency facilities.

The California Governor's Office of Emergency Services Recovery Branch administers both state and federal claims for disaster assistance as a part of the state's disaster recovery program. Briefings on program eligibility are conducted periodically and immediately following disaster proclamations or declarations. Auditors from the State Controller's Office are also available at those briefings to assist agency personnel in documenting costs and identifying necessary records.

Claims for reimbursement must withstand future state/federal audits, or funds advanced as part of the initial assessment must be returned. Therefore, all responding law enforcement agencies should keep accurate and complete records concerning personnel timekeeping, mission tasking and resource expenditures during the period of any incident that may become eligible for future reimbursement. (Cont)

Financial Assistance (Cont)

An additional federal program, the Emergency Federal Law Enforcement Assistance Act (EFLEA) administered through the Department of Justice, Bureau of Justice Assistance (BJA) can assist state and local law enforcement agencies with funding, equipment, training, intelligence information, and personnel to help alleviate emergency situations. The program is not intended to be a routine source of federal financial assistance for criminal justice activities. Detailed information about EFLEA may be found at Title 28, CFR, Chapter 1, Part 65. It is codified at Title 42, USC, Section 10501. For details contact the Cal OES Law Enforcement Branch.

This document does not discuss other grant programs for preparedness activities such as those involving funds for terrorism equipment, training, and exercises. Contact the Cal OES Law Enforcement Branch for information about these programs.

Interstate Assistance

In accordance with the Interstate Civil Defense and Disaster Compact as the basis for mutual aid between states; the California Governor's Office of Emergency Services entered into a Memoranda of Agreement with the neighboring states of Oregon, Nevada and Arizona for law enforcement mutual aid under certain conditions. Most frequently, this form of mutual aid is exercised during Searches and Rescues (see the Search and Rescue Annex to this plan). When necessary, the chief of the Cal OES Law Enforcement Branch coordinates requests for out of state law enforcement mutual aid through the governor's office of the concerned neighboring state.

In 2005, Governor Schwarzenegger signed legislation adopting the Emergency Management Assistance Compact (EMAC) as the primary guidance for the exchange of resources between States. This document allows for the prompt responses of necessary resources to other States upon emergency declaration by the affected State's Governor.

These provisions are in addition to the authorities and procedures in place within the California Vehicle Code and California Penal Code for investigations, pursuits and other criminal matters near state boundaries.

Federal Resources

Acquisition of federal resources in support of local law enforcement emergency operations can be coordinated through the Cal OES Law Enforcement Branch. While day-to-day cooperation from federal law enforcement agencies need not involve this office, during emergencies or major unusual occurrences it is important to ensure that federal assistance is provided in a coordinated, equitable basis – often to multiple locations.

STATE AGENCY ROLES AND RESOURCES

Actions of State Agencies – In General

State law enforcement agency peace officers may be used at any level of law enforcement mutual aid – locally, as part of an operational area or regional response or when coordinated by the Cal OES Law Enforcement Branch as part of a statewide response.

Specific State Agencies

Agency	California Department of Consumer Affairs-Division of Investigations
Authority	California Penal Code, California Business and Professions Code
Roles	<p>The Division of Investigation provides centralized law enforcement investigative services for the various regulatory boards, bureaus, programs, committees and commissions within the Department of Consumer Affairs. All investigators employed by the Division of Investigation are P.O.S.T. certified sworn peace officers who are authorized to conduct criminal and administrative investigations, obtain and execute search warrants, serve legal processes and make arrests anywhere within the State of California.</p> <p>The goal is to protect the health, safety and welfare of California consumers by conducting investigations and by filing criminal, administrative and civil actions against licensees on behalf of the client agencies with the Department of Consumer Affairs. Examples of such investigations include fraud, unlicensed activities, assault and battery, narcotics and drug violations, sexual misconduct, patient abuse, wrongful death, workplace violence, threat assessment, enforcement of restraining orders, and theft. Investigators are also detailed for dignitary protection, peacekeeping, security services at hearings, and public meetings held by the client agencies.</p>
Resources	Approximately 58 peace officers assigned to Division of Investigation offices statewide.
Procedures	Request for staff or resources should be directed through the office of the Chief Investigator or the Deputy Chief Investigator. The contact telephone numbers are: (916) 324-1534 or (916) 445-2537.

Agency	California Department of Corrections and Rehabilitation
Authority	8598, 8628 Government Code
Roles	<p>Department of Corrections and Rehabilitation employees of the correctional series, responding under formal mutual aid, have the full powers of peace officers as defined under Section 830.2 of the California Penal Code. Therefore; when mutual aid response is authorized, missions accepted will not be limited to operation of detention facilities.</p> <p>Ensure that the mission tasking requested is consistent with the level of training and experience of the responders by consulting with the Department of Corrections and Rehabilitation Emergency Operations staff.</p>
Resources	Approximately 19,000 correctional peace officers at 92 facilities and institutions throughout the state. Additional support may be available from 1,600 parole agent personnel also stationed throughout the state. The Department of Corrections and Rehabilitation also maintains and operates a large fleet of prisoner transportation vehicles which may also be made available on official request.
Policy	It is the policy of the Department of Corrections and Rehabilitation to assist local law enforcement in a manner consistent with the California Mutual Aid Plan when sufficient resources are available.
Procedures	Contact the California Governor's Office of Emergency Services Law Enforcement Branch to request assistance from CDCR personnel during emergency or mutual aid conditions.

Agency	California Highway Patrol
Authority	California Penal Code, California Vehicle Code, Executive Orders
Roles	The California Highway Patrol's primary role is to ensure safety and provide service to the public as they use the state's highway transportation system, and to provide safety and security to state employees and state property. Additionally, its role is to assist local governments during emergencies or situations beyond their capabilities.
Resources	Approximately 8,000 peace officers assigned in eight geographic divisions throughout the state.
Policy	<p>Emergency traffic and officer-safety assistance can be requested at any time. This should be considered day-to-day mutual aid.</p> <p>Formal mutual aid will be granted on approval from the Commissioner of the California Highway Patrol. Division Chiefs and Area Commanders have authority to mobilize as many of their personnel as necessary for effective response prior to obtaining headquarters' approval.</p>
Procedures	Contact the closest CHP Area Office or Communications Center to initiate a request for assistance.

Agency	State Military Forces (California National Guard)
Authority	California Military and Veteran's Code
Roles	<p>To assist civil authority in the discharge of lawful responsibilities by performing tasks which include but are not limited to; restoration and maintenance of law and order, protection of life and property, limited removal of debris, medical evacuation and limited medical treatment, search and rescue, emergency communications, and general logistics support.</p> <p>Normally, the CNG will be placed in support of law enforcement agencies and will not usurp or accept the responsibility or authority of civil authorities. Military assistance once provided will be terminated at the earliest practical time at the restoration of law and order, or the resumption of control of local law enforcement.</p> <p>In order for the Adjutant General, CNG, to properly evaluate the emergency and the need to implement certain procedures that will reduce the reaction time of CNG forces upon call-up, it is essential that early and frequent evaluations of the disturbance or condition and its potential be made by senior law enforcement officials and forwarded through the normal Cal OES communication channels, or directly to the liaison detachment of the Military Department when on the scene.</p>
Resources	Resource availability is dependent on federal deployments and other commitments; numbers vary accordingly.
Policy	<p>The Governor may order the CNG to perform military duty of every description. The Governor will normally commit the CNG resources in support of civil authority, but only upon determination that emergency conditions exist or are imminent, that all civil resources reasonably available have been or will be committed, that civil authority cannot or will not be able to control the situation, and that military assistance is required and has been requested as provided in law. CNG resources cannot be used in violation of the Economy Act, which requires civilian or commercial resources to be sought before considering use of the Guard.</p> <p>Under the provisions of Section 143 of the California Military and Veterans Code, the Governor may commit CNG resources without a request from civil authority only under highly perilous conditions where local civil authority no longer exists or is unable or unwilling to employ available civil resources to control or mitigate a situation. (Cont)</p>

State Military Forces (California National Guard) (Cont)

CNG in support of local law enforcement will receive and execute broad mission-type orders of the civil officer in charge, but will at all times remain under the military chain of command. The provisions of Section 365 of the Military and Veterans Code assign all decisions as to tactical direction of troops, type and extent of force to be used, and particular means to be employed to accomplish the objective or goal specified by the civil officer in charge directly to the military commander.

Procedures **Any request for National Guard resources must be forwarded to the Governor through the Cal OES.**

Note: Under the stress of emergency conditions, local officials occasionally disregard the mutual aid system in requesting CNG assistance. This results in unnecessary delays in providing a response. Requests must be directed through the Law Enforcement Regional Coordinator to the Cal OES Law Enforcement Coordinator to ensure that all available manpower has been reasonably committed. If at that time it is determined that activation of CNG forces is the most appropriate and expedient means of meeting the requirement, a Cal OES mission number will be issued and military support rendered.

Response The CNG will make every effort to respond to the scene of an unusual occurrence in the most expeditious manner. Some responses may require the mobilization of additional personnel that are not on active duty at the time of the request. In such cases the CNG will respond initially with liaison personnel and upon gubernatorial approval, will expand deployment based on their assessment of the situation and its potential to worsen. Depending upon global and statewide commitments, additional CNG field resources can be expected to arrive on-scene no later than 24 hours after approval of the initial request.

Agency	California Department of Justice
Authority	California Constitution Article 5 (13), 12510 et seq. Government Code; California Penal Code
Roles	<p>Provide legal advice to State and local agencies involved in mutual aid situations.</p> <p>Assist city and county law enforcement jurisdictions by making sworn law enforcement personnel available for mutual aid and emergency assistance, i.e. civil unrest, major disasters (earthquakes and flooding).</p> <p>Activate the Department of Justice Emergency Operations Center to assist local law enforcement agencies with regional or statewide response for mutual aid requests, disasters or major emergencies</p> <p>During normal and emergency circumstances, the Command Center and Telecommunications Units operate 24 hours a day, seven days a week to provide expedited Criminal Offender Record Information (CORI), Criminal Justice Information System (CJIS) i.e., wanted persons, stolen vehicles, stolen property, missing and unidentified persons and other automated file information to law enforcement agencies. Assist in the gathering, analyzing and dissemination of criminal intelligence and terrorism information through the State Terrorism Threat Assessment Center.</p> <p>Make DOJ aviation resources available for local, regional or statewide mutual aid requests. These resources will be used for the transportation of emergency personnel and materials, aerial observation and damage assessment, and evacuation of persons from imminent danger or for medical purposes.</p> <p>During mass casualty/mass fatality incidents, provide identification services for living or deceased persons in support of local law enforcement or at the request of the California Governor's Office of Emergency Services, Law Enforcement Branch.</p>
Resources	Approximately 250 peace officers statewide.
Policy	The Attorney General's Policy is to assist law enforcement and local units of government during emergencies in accordance with the Emergency Services Act and the California Mutual Aid Plan.
Procedures	M-F: Chief, Bureau of Criminal Information and Analysis, DOJ's EOC Commander, at 916-227-3519. EOC Coordinator contact 24 hrs 916-227-3244.

Agency	California Department of Forestry and Fire Protection - CAL FIRE
Authority	California Penal Code, Public Resources Code, Health and Safety Code, Government Code, State Administrative Orders, State Administrative Order, and California Emergency Services Act.
Roles	<p>The primary responsibility of CAL FIRE is to provide fire and life safety services, emergency response to disasters, forest and fire law enforcement and protection to the natural resources in the areas of the state designated as State Responsibility Areas (SRA), and to Local Responsibility Areas (LRA) or federal lands where the federal or local governmental agency has requested the state to provide these services through an agreement or contract.</p> <p>CAL FIRE also has the responsibility to protect state employees and state property from fire, explosion, and related perils, to investigate all fires and explosions occurring in or on state property or building that is determined to be "state occupied." Explosives and fireworks are under the primary jurisdiction of CAL FIRE through the Office of the State Fire Marshal. CAL FIRE may assist in the disposal and/or rendering safe fireworks and explosives</p> <p>CAL FIRE provides mutual aid to local fire and law enforcement agencies in the investigation of fires, arson, bombings, fireworks or ordinance disposal and rendering safe procedures and other requests for law enforcement assistance. The Governor's Special Arson Task Force is chaired by the State Fire Marshal and provides arson investigative assistance to local governmental agencies, upon request.</p>
Resources	There are approximately 180 peace officer personnel throughout CAL FIRE, most are assigned suppression duties. There are approximately 60 dedicated CAL FIRE peace officers, 1 K9 team, and 5 bomb technicians assigned at various locations statewide performing general fire prevention patrol and fire/arson investigation duties.
Policy	The assignment of CAL FIRE peace officers and the degree of their commitment will be decided by the CAL FIRE Unit, Region, or Sacramento Headquarters Duty Chief and will be based on the capability and availability of resources. All requests will be handled through existing dispatch procedures and notification policies. Formal requests for activation of CAL FIRE law enforcement mutual aid from outside the affected operational area will conform to the mutual aid activation policy for state agency contributors found at the beginning of this chapter. Mission Tasking through Cal OES is another method of requesting CAL FIRE law enforcement personnel when there is a disaster. (Cont)

California Department of Forestry and Fire Protection-CAL FIRE (Cont)

Procedures Informal requests for local level law enforcement, investigative assistance, fireworks, ordinance requests, and Governor's Special Arson Task Force assistance will be made to the local CAL FIRE Unit Emergency Command Center (ECC) or the Region Emergency Operations Command Center (EOCC), or Sacramento Headquarters' Duty Chief:

Sacramento Duty Chief: (916) 327-3063
No California Duty Chief: (530) 224-4944
So California Duty Chief: (951) 782-4236

Agency **California Department of Parks and Recreation**

Roles The primary responsibility of the California Department of Parks and Recreation (CDPR) is to acquire, develop, operate, protect and maintain the peace in the State Park System.

The secondary responsibilities include: assisting local government agencies in reacting to emergencies by performing tasks which include, but are not limited to, the restoration and maintenance of law and order, protection of life and property, first aid treatment, search and rescue, emergency communication and logistics support and where possible, provide displaced residents within the affected area with temporary camping locations with potable water and sanitation facilities.

Resources Approximately 725 peace officer [ranger/lifeguard] personnel are assigned to various state parks, recreational areas and other facilities throughout the state. Each reports to a District Superintendent.

Policy Requests for mutual aid support will only be acted upon when received from properly constituted local authorities as identified in the Law Enforcement Mutual Aid Plan.

Prior to Division approval to commit resources, District Superintendents have the authority to mobilize as many of their existing personnel and resources as necessary. Resources that require additional budgetary support or future reimbursement will not be committed without Division approval.

For incidents which occur within their Division, Division Chiefs are authorized to mobilize as many existing personnel and resources within the Division as they deem appropriate prior to receiving approval from the Deputy Director for Operations. Resources that require additional budgetary support or future reimbursement will not be committed without approval from the Chief Deputy Director for Operations or designee.

Procedures Contact the closest Parks and Recreation regional dispatch center:

NORCOM (Northern California) (916) 358-1300
CENCOM (Central California) (831) 649-2810
SURCOM (Southern California) (951) 443-2964/65

Agency	California Department of Insurance
Authority	California Penal Code, Master Mutual Aid Agreement
Roles	The primary responsibility of the Fraud Division is to protect the public from economic loss and distress by actively investigating and arresting those who commit insurance fraud. An additional Fraud Division role is to reduce the overall incidence of insurance fraud through anti-fraud outreach to the public, private and government sectors.
Resources	Approximately 205 sworn peace officers assigned to Department of Insurance offices statewide.
Policy	Upon notification by the Cal OES Law Enforcement Branch and issuance of a mission number, the Chief Deputy and/or CIB Fraud Division chain of command will make internal notifications and fill resource requests.
Procedures	Primary contact is the Chief Deputy Commissioner; backup is the Criminal Investigation Branch Deputy Commissioner.

Agency	California Department of Alcoholic Beverage Control
Authority	California Penal Code, California Business and Professions Code
Roles	<p>The mission of the Department is to administer the provisions of the Alcoholic Beverage Control Act in a manner that fosters and protects the health, safety, welfare, and economic well being of the people of the state.</p> <p>Investigators are available to assist local law enforcement as needed, consistent with the mission of the department, and the Master Mutual Aid Agreement.</p>
Resources	<p>Approximately 239 peace officer investigators statewide. Additionally, the SOU (Special Operations Unit) is available upon request. The primary function of SOU is to provide an effective enforcement strike force to address the following problems and activities: disorderly premises investigations; underage drinking; major narcotics investigations; field enforcement; interagency law enforcement task force operations; special events and training.</p> <p>The Department is in partnership with law enforcement agencies which have formed task forces with full time staffing to address such problems as drug trafficking (INCA, Riverside, IRNET, So. Calif.), money laundering (U.S. Customs TF, San Francisco) and intelligence gathering for anti-terrorism (CATIC, Sacramento).</p>
Policy	Upon determination that Mutual Aid is requested from the Department, the Assistant Director of either Northern Division (From: Oregon Border To: Kern County line) or Southern Division (From: Kings County Line To: Mexico Border) will be contacted for staff dispatch.
Procedures	Dependent upon geographic location, a requesting agency will notify Cal OES of the request for Mutual Aid. Once Cal OES issues a mission number, Cal OES or the requesting agency will notify the appropriate Assistant Director. The Assistant Director will notify and deploy personnel as needed, and will advise the Department's Director of the request. The Assistant Director will remain the contact person throughout the request period. *NOTE: If the Assistant Directors cannot be contacted, the Director will become the contact person for the Department.

California Department of Alcoholic Beverage Control (Cont)

Southern Division Assistant Director:
Business # 562-860-4150

*Director:
Business # 916-263-6889

After hours, contact the Cal OES Law Enforcement Branch to request mutual aid resources from the Department of Alcoholic Beverage Control.

Agency	California Department of Fish and Wildlife – Law Enforcement Division
Authority	California Fish and Wildlife Code, California Penal Code, California Government Code, and Administrative Orders
Roles	<p>The mission of the DFW Law Enforcement Division is to protect California’s natural resources and provide public safety through effective and responsive law enforcement.</p> <p>Secondary responsibilities include: assisting local government agencies in reacting to emergencies by performing tasks which include, but are not limited to the restoration and maintenance of law and order, protection of life, property and the environment, search and rescue operations, air operations, emergency communications, and logistics support.</p>
Resources	Approximately 325 peace officers assigned in one of four geographic districts or special units within the state. Department of Fish and Wildlife Wardens are equipped for off-road, off-shore, and inland water responses.
Policy	<p>Emergency and officer safety assistance can be requested at any time.</p> <p>Requests for mutual aid support will be acted upon per the guidelines of the California Governor’s Office of Emergency Services Law Enforcement Mutual Aid Plan.</p> <p>Formal mutual aid will be granted on approval from the Chief of the Law Enforcement Branch or designee. Prior to headquarters approval, Assistant Chiefs and District Captains have authority to mobilize as many of their personnel as deemed necessary for effective response</p> <p>Contact the Department of Fish and Wildlife Northern Communications Center to initiate a mutual aid request for assistance.</p>

Agency	California Department of Motor Vehicles
Authority	California Penal Code, California Vehicle Code
Roles	<p>The California Department of Motor Vehicles (DMV) Investigations Division protects and serves the public interest and maintains the integrity, security, and reliability of the Department's data, services, and products by providing consumer protection through the enforcement of laws, rules, and regulations applicable to licensees, business partners, the public, and employees of the Department.</p> <p>DMV Investigators improve public safety through protection of the programs and interests of the Department and through active prevention/detection of fraud and counterfeit of the Department's indicia.</p> <p>The Investigations Division enforces laws, rules, and regulations that apply to new and used vehicle dealers, brokers, dismantlers, registration services, vehicle verifiers, driving schools, traffic violator schools, and other vehicle-related businesses.</p> <p>DMV is a participant in the State's Emergency Preparedness Alert System and has a fully equipped Department Emergency Operation Center (DEOC) available for State or National emergencies. The primary function of the DEOC is to coordinate Department resources for the protection of agency personnel, customers, facilities, information depositories, and to assist local, State and Federal authorities. Investigators are sworn peace officers under California Penal Code section 830.3 (c) and are available to assist local law enforcement when needed, consistent with the mission of the department and the Master Mutual Aid Agreement.</p>
Resources	DMV's Investigation Division is staffed with 240 sworn peace officers assigned to three geographic Regions within the State.
Policy	<p>Requests for mutual aid will only be acted upon when received from local authorities as identified in the Law Enforcement Mutual Aid Plan.</p> <p>The Chief has the authority to mobilize personnel and resources as necessary. Area Commanders must receive approval prior to committing resources. Resources that require additional budgetary support or future reimbursement will not be committed without approval.</p>
Procedures	24 hr Contact-Incident Response Hot Line (916) 657-8100

The California Governor's Office of Emergency Services Law Enforcement Branch

Since 1960, the California Governor's Office of Emergency Services, Law Enforcement Branch has provided valuable services to California's law enforcement agencies. Staffed with experienced peace officers, the Cal OES Law Enforcement Branch works directly with California's Sheriffs and Police Departments. Additionally, division personnel maintain liaison with all federal agencies including the FBI, ATF, Secret Service, State Department, and all the state law enforcement agencies.

Law Enforcement Branch Programs

Within the Response Operations, the California Governor's Office of Emergency Services Law Enforcement Branch is responsible for several key programs:

- Law Enforcement Mutual Aid System
- Search and Rescue Mutual Aid
- Coroner/Medical Examiner Mutual Aid
- Special Resources for Mutual Aid

California Governor's Office of Emergency Services Law Enforcement Branch coordinator/peace officers meet with local law enforcement executives, managers, supervisors and others to ensure that the system is ready at any time to serve California law enforcement. Staff works alongside local counterparts to develop operational plans, design, and present training and exercises; and when appropriate, coordinate mutual aid services during actual events.

Each of our staff members has years of experience in emergency management as it relates specifically to law enforcement agencies and their personnel. There is always a staff member on call to assist local law enforcement. Immediate assistance can be sought from the Cal OES Law Enforcement Branch by calling (916) 845-8700.

Mutual Aid Manuals/Training

The Cal OES Law Enforcement Branch produces several manuals designed to assist law enforcement agencies in correctly applying law enforcement mutual aid. In addition to the Law Enforcement Mutual Aid Plan, the Law Enforcement Guide for Emergency Operations helps law enforcement agencies better understand the State's Emergency Management System, the Incident Command System and how to plan for law enforcement response to major emergencies. The Law Enforcement Mutual Aid Training Course is a P.O.S.T. certified modular course in the concepts and principles of Law Enforcement Mutual Aid which can include a tabletop exercise to assist students in integrating concepts into practical skills. The Coroner Mutual Aid Plan is also available, providing detailed information on concepts in the context of mass fatality operations. As an adjunct to effective mutual aid, the branch shares management of the California Law Enforcement Mutual Aid Radio System [CLEMARS]. The CLEMARS Plan documents application for, and use of, the system.

Search and Rescue

The Law Enforcement Branch is charged with the responsibility for coordinating state mutual aid for search and rescue in California. In addition, it receives and coordinates interstate requests under the auspices of the National Search and Rescue Plan. The branch also coordinates local requests for State and Federal Agency search and rescue assistance. Because Search and Rescue missions are often life threatening, requests for out-of-county, State or Federal resources can be made directly to Cal OES by calling (916) 845-8700, 24 hours a day.

Search and Rescue - Related Products

The Search and Rescue Annex to the Law Enforcement Mutual Aid Plan is a document that explains in detail, the organizations involved in search and rescue, their roles and capabilities, and the process for obtaining their assistance. The branch also offers a P.O.S.T. certified class for those persons responsible for search and rescue management: "Direction and Control of the Search Function" has been offered to law enforcement Search and Rescue Incident Commanders for more than 17 years. More than 2,500 students have completed this 40-hour supervisory course that provides valuable information on the management of wilderness search operations.

Equipment Loan

To assist California law enforcement, the Cal OES Law Enforcement Branch has developed an inventory of special resources. This equipment is available for short-term loan to local and state law enforcement agencies. Hand-held radios, portable radio base stations, mobile communications vehicles and other law enforcement items are available upon request.

THE ROLE OF THE OPERATIONAL AREA LAW ENFORCEMENT MUTUAL AID COORDINATOR

Background

The Operational Area Law Enforcement Mutual Aid Coordinator plays a critical role in California's Law Enforcement Mutual Aid System. It is a dual role, wherein the mutual aid activities of an individual's own department and those of all other law enforcement agencies within the operational area are coordinated.

Duties and Responsibilities

- ❑ The Coordinator must have a working knowledge of the Law Enforcement Mutual Aid System and the procedures that enable it to operate efficiently.
- ❑ One or more points-of-contact should be identified at the coordinator's employing agency. This individual should serve as the Coordinator's "subject matter expert" and should assist in the actual development and maintenance of the Operational Area's Law Enforcement Mutual Aid capability.
- ❑ The Coordinator should assess the mutual aid resources in the operational area, as well as the level of training related to mutual aid.
- ❑ The Coordinator should serve as a relay point for communication of threat, warning and preparedness information to all law enforcement agencies in the operational area.
- ❑ The Coordinator should ensure that links exist to share appropriate threat, warning and preparedness information with fire and emergency medical services agencies in the operational area as well.
- ❑ The Coordinator should organize and chair an operational area law enforcement coordinating group, composed of the police chiefs and law enforcement executives within the operational area. The group may include others as deemed necessary by the chair. This committee should meet at least once each year and hold additional meetings as necessary.
- ❑ This group should:
 - Aid and encourage the development of mutual aid protocols and uniform law enforcement response plans within the Area.

-
- Aid and encourage the development of countywide law enforcement communications networks. The communication nets should tie each law enforcement communications facility to the Operational Area Law Enforcement Dispatch Center, alternate dispatch centers, and allied agency centers, such as those for fire and EMS.
 - Develop a dispatching procedure for mutual aid use of law enforcement resources, both for in-county and out-of-county response.
- The Coordinator is responsible for coordinating response of all law enforcement resources within the operational area on major mutual aid operations.
 - The Coordinator also evaluates requests for assistance from local agencies; determines the resources within the operational area that can provide timely assistance, and initiates their response. This may consist of a response by any combination of Sheriff's personnel or local police from within the operational area. When resources within the operational area are insufficient, either for lack of timely response or the resource order is beyond operational area capability to fill, the request must be forwarded to the Region.
 - Justifies the need for ordered resources and monitors the length of time the resources will be deployed. Periodically evaluates the justification and commitment to the local agency of these resources, and keeps the Region informed.
 - The Operational Area Law Enforcement Mutual Aid Coordinator will advise the requesting jurisdiction of the origin of resources responding to the request for assistance.
 - The Coordinator must keep the Regional Law Enforcement Mutual Aid Coordinator informed of all operations.

The Operational Area Law Enforcement Coordinator is not responsible for direction of emergency operations except those that occur within the coordinator's employing agency jurisdiction. The local official in whose jurisdiction the emergency exists shall remain in full charge of all resources, staffing, and equipment furnished for mutual aid operations.

THE ROLE OF THE REGIONAL LAW ENFORCEMENT MUTUAL AID COORDINATOR

Background

The Regional Law Enforcement Mutual Aid Coordinator is *de facto* a member of the California's Law Enforcement Mutual Aid System's "board of directors." Even more complex than the role of an Operational Area Law Enforcement Mutual Aid Coordinator, the Regional Coordinator's role balances the needs and resources of the employing agency, but also those of the Operational Area and the other Operational Areas in the Region. The coordinator is also asked to provide guidance to other agencies in the system when appropriate.

Duties and Responsibilities

- ❑ The Regional Coordinator has all the duties of an Operational Area Law Enforcement Mutual Aid Coordinator, as well as the following:
- ❑ One or more points-of-contact should be identified at the Coordinators employing agency in order to assist with coordination of the mutual aid activities of the region. The Coordinator should assess the region's law enforcement mutual aid capabilities, and communicate this information to the State Law Enforcement Mutual Aid Coordinator.
- ❑ The Regional Coordinator should serve as a relay point for communication of threat, warning and preparedness information to all law enforcement agencies in the region, and to the operational area.
- ❑ The Regional Coordinator should meet periodically with the Operational Area Law Enforcement Mutual Aid Coordinators in the Region, to exchange information that would enhance the efficiency and effectiveness of mutual aid operations.
- ❑ The Coordinator is responsible for coordinating response of all law enforcement resources within the region, with the assistance of operational area coordinators, on major mutual aid operations.
- ❑ The Coordinator evaluates requests for assistance from an operational area; determines the resources from that operational area(s) within the region that can provide assistance, and initiates an appropriate response. When resources within the region are insufficient, either for lack of timely response or when the resource order is beyond regional capability, the request must be made to the state.
- ❑ The Regional Coordinator must keep the State Law Enforcement Mutual Aid Coordinator informed regarding all region-level operations.

REGIONAL LAW ENFORCEMENT MUTUAL AID COORDINATOR ELECTION PROCESS

Background

Consistent with the Standardized Emergency Management System, California's Law Enforcement Mutual Aid System consists of inter-related layers, from field operations through state coordination. Key in this process are the roles of the Operational Area Law Enforcement Mutual Aid Coordinator and the Regional Law Enforcement Mutual Aid Coordinator.

The responsibility for monitoring law enforcement activities within each Operational Area is vested in an Operational Area Law Enforcement Mutual Aid Coordinator. Similarly, the Regional Law Enforcement Mutual Aid Coordinator has the responsibility to monitor events and incidents in the region's operational areas, and to ensure timely coordination and provision of law enforcement mutual aid resources in the region.

Much of the success of any system depends upon the capabilities of the individuals serving at the various levels in the chain of command, and acceptance of their expertise by their peers. This document outlines the process for the election of Regional Law Enforcement Mutual Aid Coordinators.

Term

Elections for Regional Law Enforcement Mutual Aid Coordinators should be conducted at least once every four years, to coincide with the Regional Law Enforcement Mutual Aid Coordinator's term of office as Sheriff. If a Regional Law Enforcement Mutual Aid Coordinator leaves office as Sheriff during an un-expired term, notification must be made to the State Law Enforcement Mutual Aid Coordinator so that a special election may be held. When such a vacancy occurs, the State Law Enforcement Mutual Aid Coordinator will appoint an "Acting" Regional Law Enforcement Coordinator to serve until the formal election process is completed.

Election Process

Regional Law Enforcement Coordinator elections will be conducted by mail ballot, or at a special regional law enforcement mutual aid meeting called by the State Law Enforcement Mutual Aid Coordinator. Nominations will be sought from the Operational Area Law Enforcement Mutual Aid Coordinators. If the majority of nominations are for the same individual, that person shall be declared elected. If there is no clear winner, a written or voice vote will take place. In the event of a tie the State Law Enforcement Mutual Aid Coordinator will cast the deciding vote. Note that elections will be documented with written records of the proceedings.

SELECTED LEGAL SECTIONS

8550 GC (Government Code) The state has long recognized its responsibility to mitigate the effects of natural, manmade, or war-caused emergencies which result in conditions of disaster or in extreme peril to life, property, and the resources of the state, and generally to protect the health and safety and preserve the lives and property of the people of the state. To insure that preparations within the state will be adequate to deal with such emergencies, it is hereby found and declared to be necessary:

(a) To confer upon the Governor and upon the chief executives and governing bodies of political subdivisions of this state the emergency powers provided herein; and to provide for state assistance in the organization and maintenance of the emergency programs of such political subdivisions;

(b) To provide for a state agency to be known and referred to as the California Office of Emergency Services, within the Governor's Office; and to prescribe the powers and duties of the director of that office;

(c) To provide for the assignment of functions to state agencies to be performed during an emergency and for the coordination and direction of the emergency actions of such agencies;

(d) To provide for the rendering of mutual aid by the state government and all its departments and agencies and by the political subdivisions of this state in carrying out the purposes of this chapter;

(e) To authorize the establishment of such organizations and the taking of such actions as are necessary and proper to carry out the provisions of this chapter.

It is further declared to be the purpose of this chapter and the policy of this state that all emergency services functions of this state be coordinated as far as possible with the comparable functions of its political subdivisions, of the federal government including its various departments and agencies, of other states, and of private agencies of every type, to the end that the most effective use may be made of all manpower, resources, and facilities for dealing with any emergency that may occur.

8558. Three conditions or degrees of emergency are established by this chapter:

(a) "State of War Emergency" means the condition which exists immediately, with or without a proclamation thereof by the Governor, whenever this state or nation is attacked by an enemy of the United States, or upon receipt by the state of a warning from the federal government indicating that such an enemy attack is probable or imminent.

(b) "State of Emergency" means the duly proclaimed existence of conditions of disaster or of extreme peril to the safety of persons and property within the state caused by such conditions as air pollution, fire, flood, storm, epidemic, riot, drought, sudden and severe energy shortage, plant or animal infestation or disease, the Governor's warning of an earthquake or volcanic prediction, or an earthquake, complications resulting from the Year 2000 Problem, or other conditions, other than conditions resulting from a labor controversy or conditions causing a "state of war emergency," which, by reason of their magnitude, are or are likely to be beyond the control of the services, personnel, equipment, and facilities of any single county, city and county, or city

and require the combined forces of a mutual aid region or regions to combat, or with respect to regulated energy utilities, a sudden and severe energy shortage requires extraordinary measures beyond the authority vested in the California Public Utilities Commission.

(c) "Local Emergency" means the duly proclaimed existence of conditions of disaster or of extreme peril to the safety of persons and property within the territorial limits of a county, city and county, or city, caused by such conditions as air pollution, fire, flood, storm, epidemic, riot, drought, sudden and severe energy shortage, plant or animal infestation or disease, the Governor's warning of an earthquake or volcanic prediction, or an earthquake, complications resulting from the Year 2000 Problem, or other conditions, other than conditions resulting from a labor controversy, which are or are likely to be beyond the control of the services, personnel, equipment, and facilities of that political subdivision and require the combined forces of other political subdivisions to combat, or with respect to regulated energy utilities, a sudden and severe energy shortage requires extraordinary measures beyond the authority vested in the California Public Utilities Commission.

8560. (A) "Emergency Plans" means those official and approved documents which describe the principles and methods to be applied in carrying out emergency operations or rendering mutual aid during emergencies. These plans include such elements as continuity of government, the emergency services of governmental agencies, mobilization of resources, mutual aid, and public information.

(b) "State Emergency Plan" means the State of California Emergency Plan as approved by the Governor.

8568. The State Emergency Plan shall be in effect in each political subdivision of the state, and the governing body of each political subdivision shall take such action as may be necessary to carry out the provisions thereof.

8569. The Governor shall coordinate the State Emergency Plan and those programs necessary for the mitigation of the effects of an emergency in this state; and he shall coordinate the preparation of plans and programs for the mitigation of the effects of an emergency by the political subdivisions of this state, such plans and programs to be integrated into and coordinated with the State Emergency Plan and the plans and programs of the federal government and of other states to the fullest possible extent.

8607. (a) By December 1, 1993, the California Office of Emergency Services, in coordination with all interested state agencies with designated response roles in the state emergency plan and interested local emergency management agencies shall jointly establish by regulation a standardized emergency management system for use by all emergency response agencies. The public water systems identified in Section 8607.2 may review and comment on these regulations prior to adoption.

This system shall be applicable, but not limited to, those emergencies or disasters referenced in the state emergency plan. The standardized emergency management system shall include all of

the following systems as a framework for responding to and managing emergencies and disasters involving multiple jurisdictions or multiple agency responses:

(1) The Incident Command Systems adapted from the systems originally developed by the FIRESCOPE Program, including those currently in use by state agencies.

(2) The multi-agency coordination system as developed by the FIRESCOPE Program.

(3) The mutual aid agreement, as defined in Section 8561, and related mutual aid systems such as those used in law enforcement, fire service, and coroners operations.

(4) The operational area concept, as defined in Section 8559.

(b) Individual agencies' roles and responsibilities agreed upon and contained in existing laws or the state emergency plan are not superseded by this article.

(c) By December 1, 1994, the California Governor's Office of Emergency Services, in coordination with the State Fire Marshal's Office, the Department of the California Highway Patrol, the Commission on Peace Officer Standards and Training, the Emergency Medical Services Authority, and all other interested state agencies with designated response roles in the state emergency plan, shall jointly develop an approved course of instruction for use in training all emergency response personnel, consisting of the concepts and procedures associated with the standardized emergency management system described in subdivision (a).

(d) By December 1, 1996, all state agencies shall use the standardized emergency management system as adopted pursuant to subdivision (a), to coordinate multiple jurisdictions or multiple agency emergency and disaster operations.

(e) (1) By December 1, 1996, each local agency, in order to be eligible for any funding of response-related costs under disaster assistance programs, shall use the standardized emergency management system as adopted pursuant to subdivision (a) to coordinate multiple jurisdiction or multiple agency operations.

(2) Notwithstanding paragraph (1), local agencies shall be eligible for repair, renovation, or any other non-personnel costs resulting from an emergency.

(f) The office shall, in cooperation with involved state and local agencies, complete an after-action report within 120 days after each declared disaster. This report shall review public safety response and disaster recovery activities and shall be made available to all interested public safety and emergency management organizations.

8615. It is the purpose of the Legislature in enacting this article to facilitate the rendering of aid to areas stricken by an emergency and to make unnecessary the execution of written agreements customarily entered into by public agencies exercising joint powers. Emergency plans duly adopted and approved as provided by the Governor shall be effective as satisfying the requirement for mutual aid operational plans provided in the Master Mutual Aid Agreement.

8616. During any state of war emergency or state of emergency when the need arises for outside aid in any county, city and county, or city, such aid shall be rendered in accordance with approved emergency plans. It shall be the duty of public officials to cooperate to the fullest possible extent in carrying out such plans.

8617. In periods other than a state of war emergency, a state of emergency, or a local emergency, state agencies and political subdivisions have authority to exercise mutual aid powers in accordance with the Master Mutual Aid Agreement and local ordinances, resolutions, agreements, or plans therefore.

8618. Unless otherwise expressly provided by the parties, the responsible local official in whose jurisdiction an incident requiring mutual aid has occurred shall remain in charge at such incident, including the direction of personnel and equipment provided him through mutual aid.

8619. The Governor may on behalf of this state enter into reciprocal aid agreements or compacts, mutual aid plans, or other interstate arrangements for the protection of life and property with other states and the federal government, either on a statewide basis or a political subdivision basis. Prior to committing the personnel, equipment, or facilities of any political subdivision of this state, the Governor shall consult with the chief executive or governing body of such political subdivision. Such mutual aid arrangements may include the furnishing or exchange, on such terms and conditions as are deemed necessary, of supplies, equipment, facilities, personnel, and services.

8620. During a state of war emergency the Governor shall have complete authority over all agencies of the state government and the right to exercise within the area or regions designated all police power vested in the state by the Constitution and laws of the State of California in order to effectuate the purposes of this chapter. In exercise thereof he shall promulgate, issue, and enforce such orders and regulations as he deems necessary for the protection of life and property, in accordance with the provisions of Section 8567.

8627. During a state of emergency the Governor shall, to the extent he deems necessary, have complete authority over all agencies of the state government and the right to exercise within the area designated all police power vested in the state by the Constitution and laws of the State of California in order to effectuate the purposes of this chapter. In exercise thereof, he shall promulgate, issue, and enforce such orders and regulations as he deems necessary, in accordance with the provisions of Section 8567.

8655. The state or its political subdivisions shall not be liable for any claim based upon the exercise or performance, or the failure to exercise or perform a discretionary function or duty on the part of a state or local agency or any employee of the state or its political subdivisions in carrying out the provisions of this chapter.

8656. All of the privileges and immunities from liability; exemptions from laws, ordinances, and rules; all pension, relief, disability, workers' compensation, and other benefits which apply to the activity of officers, agents, or employees of any political subdivision when performing their respective functions within the territorial limits of their respective political subdivisions, shall

apply to them to the same degree and extent while engaged in the performance of any of their functions and duties extraterritorially under this chapter.

8657. (a) Volunteers duly enrolled or registered with the California Governor's Office of Emergency Services or any disaster council of any political subdivision, or unregistered persons duly impressed into service during a state of war emergency, a state of emergency, or a local emergency, in carrying out, complying with, or attempting to comply with, any order or regulation issued or promulgated pursuant to the provisions of this chapter or any local ordinance, or performing any of their authorized functions or duties or training for the performance of their authorized functions or duties, shall have the same degree of responsibility for their actions and enjoy the same immunities as officers and employees of the state and its political subdivisions performing similar work for their respective entities.

(b) No political subdivision or other public agency under any circumstances, nor the officers, employees, agents, or duly enrolled or registered volunteers thereof, or unregistered persons duly impressed into service during a state of war emergency, a state of emergency, or a local emergency, acting within the scope of their official duties under this chapter or any local ordinance shall be liable for personal injury or property damage sustained by any duly enrolled or registered volunteer engaged in or training for emergency preparedness or relief activity, or by any unregistered person duly impressed into service during a state of war emergency, a state of emergency, or a local emergency and engaged in such service. The foregoing shall not affect the right of any such person to receive benefits or compensation which may be specifically provided by the provisions of any federal or state statute nor shall it affect the right of any person to recover under the terms of any policy of insurance.

(c) The California Earthquake Prediction Evaluation Council, an advisory committee established pursuant to Section 8590 of this chapter, may advise the Governor of the existence of an earthquake or volcanic prediction having scientific validity. In its review, hearings, deliberations, or other validation procedures, members of the council, jointly and severally, shall have the same degree of responsibility for their actions and enjoy the same immunities as officers and employees of the state and its political subdivisions engaged in similar work in their respective entities. Any person making a presentation to the council as part of the council's validation process, including presentation of a prediction for validation shall be deemed a member of the council until the council has found the prediction to have or not have scientific validity.

8658. In any case in which an emergency endangering the lives of inmates of a state, county, or city penal or correctional institution has occurred or is imminent, the person in charge of the institution may remove the inmates from the institution. He shall, if possible, remove them to a safe and convenient place and there confine them as long as may be necessary to avoid the danger, or, if that is not possible, may release them. Such person shall not be held liable, civilly or criminally, for acts performed pursuant to this section.

8660. No other state or its officers or employees rendering aid in this state pursuant to any interstate arrangement, agreement, or compact shall be liable on account of any act or omission in good faith on the part of such state or its officers or employees while so engaged, or on account of the maintenance or use of any equipment or supplies in connection with an emergency.

8668. (a) Any disaster council previously accredited, the State Civil Defense and Disaster Plan, the State Emergency Resources Management Plan, the State Fire Disaster Plan, the State Law Enforcement Mutual Aid Plan, all previously approved civil defense and disaster plans, all mutual aid agreements, and all other documents and agreements existing as of the effective date of this chapter, shall remain in full force and effect until revised, amended, or revoked in accordance with the provisions of this chapter.

(b) Nothing in this chapter shall be construed to diminish or remove any authority of any city, county, or city and county granted by Section 7 of Article XI of the California Constitution.

26602. The sheriff shall prevent and suppress any affrays, breaches of the peace, riots, and insurrections which come to his knowledge, and investigate public offenses which have been committed.

19 CCR 2401 (California Code of Regulations) These regulations establish the Standardized Emergency Management System (SEMS) based upon the Incident Command System (ICS) adapted from the system originally developed by the Firefighting Resources of California Organized for Potential Emergencies (FIRESCOPE) program including those currently in use by state agencies, the Multi-Agency Coordination System (MACS) as developed by FIRESCOPE program, the operational area concept, and the Master Mutual Aid Agreement and related mutual aid systems.

SEMS is intended to standardize response to emergencies involving multiple jurisdictions or multiple agencies. SEMS is intended to be flexible and adaptable to the needs of all emergency responders in California. SEMS requires emergency response agencies use basic principles and components of emergency management including ICS, multi-agency or inter-agency coordination, the operational area concept, and established mutual aid systems. State agencies must use SEMS. Local government must use SEMS by December 1, 1996 in order to be eligible for state funding of response-related personnel costs pursuant to activities identified in California Code of Regulations, Title 19, §2920, §2925, and §2930. Individual agencies' roles and responsibilities contained in existing laws or the state emergency plan are not superseded by these regulations.

**CALIFORNIA DISASTER AND CIVIL DEFENSE
MASTER MUTUAL AID AGREEMENT**

This agreement made and entered into by and between the STATE OF CALIFORNIA, its various departments and agencies, and the various political subdivisions, municipal corporations, and other public agencies of the State of California;

WITNESSETH:

WHEREAS, it is necessary that all of the resources and facilities of the State, its various departments and agencies, and all its political subdivisions, municipal corporations, and other public agencies be made available to prevent and combat the effect of disasters which may result from such calamities as flood, fire, earthquake, pestilence, war, sabotage, and riot; and

WHEREAS, it is desirable that each of the parties hereto should voluntarily aid and assist each other in the event that a disaster should occur, by the interchange of services and facilities, including, but not limited to, fire, police, medical and health, communication, and transportation services and facilities, to cope with the problems of rescue, relief, evacuation, rehabilitation, and reconstruction which would arise in the event of a disaster; and

WHEREAS, it is necessary and desirable that a cooperative agreement be executed for the interchange of such mutual aid on a local, countywide, regional, statewide, and interstate basis;

NOW, THEREFORE, IT IS HEREBY AGREED by and between each and all of the parties hereto as follows:

1. Each party shall develop a plan providing for the effective mobilization of all its resources and facilities, both public and private, to cope with any type of disaster.
2. Each party agrees to furnish resources and facilities and to render services to each and every other party to this agreement to prevent and combat any type of disaster in accordance with duly adopted mutual aid operational plans, whether heretofore or hereafter adopted, detailing the method and manner by which such resources, facilities, and services are to be made available and furnished, which operational plans may include provisions for training and testing to make such mutual aid effective; provided, however, that no party shall be required to deplete unreasonably its own resources, facilities, and services in furnishing such mutual aid.

3. It is expressly understood that this agreement and the operational plans adopted pursuant thereto shall not supplant existing agreements between some of the parties hereto providing for the exchange or furnishing of certain types of facilities and services on a reimbursable, exchange, or other basis, but that the mutual aid extended under this agreement and the operational plans adopted pursuant thereto, shall be without reimbursement unless otherwise expressly provided for by the parties to this agreement or as provided in Sections 1541, 1586, and 1587, California Military and Veterans Code; and that such mutual aid is intended to be available in the event of a disaster of such magnitude that it is, or is likely to be, beyond the control of a single party and requires the combined forces of several or all of the parties to this agreement to combat.
4. It is expressly understood that the mutual aid extended under this agreement and the operational plans adopted pursuant thereto shall be available and furnished in all cases of local peril or emergency and in all cases in which a *STATE OF EXTREME EMERGENCY* has been proclaimed.
5. It is expressly understood that any mutual aid extended under this agreement and the operational plans adopted pursuant thereto, is furnished in accordance with the "California Disaster Act" and other applicable provisions of law, and except as otherwise provided by law that: "The responsible local official in whose jurisdiction an incident requiring mutual aid has occurred shall remain in charge at such incident including the direction of such personnel and equipment provided him through the operation of such mutual aid plans." (Section 1564, CA Military and Veterans Code.)
6. It is expressly understood that when and as the State of California enters into mutual aid agreements with other states and the Federal Government, the parties to this agreement shall abide by such mutual aid agreements in accordance with the law.
7. Upon approval or execution of this agreement by the parties hereto all mutual aid operational plans heretofore approved by the State Disaster Council, or its predecessors, and in effect as to some of the parties hereto, shall remain in full force and effect as to them until the same may be amended, revised, or modified. Additional mutual aid operational plans and amendments, revisions, or modifications of existing or hereafter adopted mutual aid operational plans, shall be adopted as follows:

-
- a. Countywide and local mutual aid operational plans shall be developed by the parties thereto and are operative as between the parties thereto in accordance with the provisions of such operational plans. Such operational plans shall be submitted to the State Disaster Council for approval. The State Disaster Council shall notify each party to such operational plans of its approval, and shall also send copies of such operational plans to other parties to this agreement who did not participate in such operational plans and who are in the same area and affected by such operational plans. Such operational plans shall be operative as to such other parties 20 days after receipt thereof unless within that time the party by resolution or notice given to the State Disaster Council, in the same manner as notice of termination of participation in this agreement, declines to participate in the particular operational plan.
 - b. Statewide and regional mutual aid operational plans shall be approved by the State Disaster Council and copies thereof shall forthwith be sent to each and every party affected by such operational plans. Such operational plans shall be operative as to the parties affected thereby 20 days after receipt thereof unless within that time the party by resolution or notice given to the State Disaster Council, in the same manner as notice of termination of participation in this agreement, declines to participate in the particular operational plan.
 - c. The declination of one or more of the parties to participate in a particular operational plan or any amendment, revision or modification thereof, shall not affect the operation of this agreement and the other operational plans adopted pursuant thereto.
 - d. Any party may at any time by resolution or notice given to the State Disaster Council, in the same manner as notice of termination of participation in this agreement, decline to participate in any particular operational plan, which declination shall become effective 20 days after filing with the State Disaster Council.
 - e. The State Disaster Council shall send copies of all operational plans to those state departments and agencies designated by the Governor. The Governor may, upon behalf of any department or agency, give notice that such department or agency declines to participate in a particular operational plan.

-
- f. The State Disaster Council, in sending copies of operational plans and other notices and information to the parties to this agreement, shall send copies to the Governor and any department or agency head designated by him; the chairman of the board of supervisors, the clerk of the board of supervisors, the County Disaster Council, and any other officer designated by a county; the mayor, the clerk of the city council, the City Disaster Council, and any other officer designated by a city; the executive head, the clerk of the governing body, or other officer of other political subdivisions and public agencies as designated by such parties.
 8. This agreement shall become effective as to each party when approved or executed by the party, and shall remain operative and effective as between each and every party that has heretofore or hereafter approved or executed this agreement, until participation in this agreement is terminated by the party. The termination by one or more of the parties of its participation in this agreement shall not affect the operation of this agreement as between the other parties thereto. Upon approval or execution of this agreement the State Disaster Council shall send copies of all approved and existing mutual aid operational plans affecting such party which shall become operative as to such party 20 days after receipt thereof unless within that time the party by resolution or notice given to the State Disaster Council, in the same manner as notice of termination of participation in this agreement, declines to participate in any particular operational plan. The State Disaster Council shall keep every party currently advised of who the other parties to this agreement are and whether any of them has declined to participate in any particular operational plan.
 9. Approval or execution of this agreement shall be as follows:
 - a. The Governor shall execute a copy of this agreement on behalf of the State of California and the various departments and agencies thereof. Upon execution by the Governor a signed copy shall forthwith be filed with the State Disaster Council.
 - b. Counties, cities, and other political subdivisions and public agencies having a legislative or governing body shall by resolution approve and agree to abide by this agreement, which may be designated as "*CALIFORNIA DISASTER AND CIVIL DEFENSE MASTER MUTUAL AID AGREEMENT.*" Upon adoption of such a resolution, a certified copy thereof shall forthwith be filed with the State Disaster Council.

- c. The executive head of those political subdivisions and public agencies having no legislative or governing body shall execute a copy of this agreement and forthwith file a signed copy with the State Disaster Council.

10. Termination of participation in this agreement may be effected by any party as follows:

- a. The Governor on behalf of the State and its various departments and agencies, and the executive head of those political subdivisions and public agencies having no legislative or governing body, shall file a written notice of termination of participation in this agreement with the State Disaster Council and this agreement is terminated as to such party 20 days after the filing of such notice.
- b. Counties, cities, and other political subdivisions and public agencies having a legislative or governing body shall by resolution give notice of termination of participation in this agreement and file a certified copy of such resolution with the State Disaster Council, and this agreement is terminated as to such party 20 days after the filing of such resolution.

IN WITNESS WHEREOF this agreement has been executed and approved and is effective and operative as to each of the parties as herein provided.

Signed by: EARL WARREN
GOVERNOR
On behalf of the State of California and all its
Departments and Agencies

ATTEST:

November 15, 1950

Signed by: FRANK M. JORDAN
SECRETARY OF STATE

Note:

There are references in the foregoing agreement to the California Disaster Act, State Disaster Council, and various sections of the CA MILITARY and Veterans Code. Effective November 23, 1970, by enactment of Chapter 1454, Statutes 1970, the California Disaster Act (Sections 1500 ff., Military and Veterans Code) was superseded by the California Emergency Services Act (Sections 8550 ff., Government Code), and the State Disaster Council was superseded by the California Emergency Council.

Section 8668 of the California Emergency Services Act provides:

- (a) Any disaster council previously accredited, the State Civil Defense and Disaster Plan, the State Emergency Resources Management Plan, the State Fire Disaster Plan, the State Law Enforcement Mutual Aid Plan, all previously approved civil defense and disaster plans, all mutual aid agreements, and all documents and agreements existing as of the effective date of this chapter, shall remain in full force and effect until revised, amended, or revoked in accordance with the provisions of this chapter.*
- (b) In addition, Section 8561 of the new act specifically provides: "Master Mutual Aid Agreement" means the California Disaster and Civil Defense Master Mutual Aid Agreement, made and entered into by and between the State of California, its various departments and agencies, and the various political subdivisions of the state, to facilitate implementation of the purposes of this chapter.*

Substantially the same provisions as previously contained in Section 1541, 1564, 1586 and 1587 of the CA Military and Veterans Code, referred to in the foregoing agreement, are now contained in Sections 8633, 8618, 8652 and 8643, respectively, of the Government Code.

Police Aide Manual Draft 2018.pdf

BERKELEY POLICE DEPARTMENT
POLICE AIDE PROGRAM MANUAL

ISSUED: TBD

**BERKELEY POLICE DEPARTMENT
POLICE AIDE MANUAL
Issued: TBD**

INTRODUCTION

The Police Trainee Program was established in 1963, and the Police Aide Program was added in 1967. In 1989, the Program was revised and is now called the Police Aide Program.

The Police Aide position is designed for college students interested in a career in law enforcement. A Police Aide will obtain part-time work experience, resulting from rotating assignments in the various divisions of the Berkeley Police Department, including ride-alongs with uniformed patrol officers. A Police Aide is required to wear a uniform, but not authorized to carry a firearm, handcuffs or OC spray.

To participate in the Program, a Police Aide must maintain a minimum grade point average of 2.0 ("C" grade) for all courses taken. Police Aides shall complete at least six semester units (or the equivalent) of college course work per semester. A Police Aide will work a maximum of 19 hours per week scheduled around their academic program. A police Aide will work a maximum of [REDACTED] hours per year. Employment as a Police Aide is limited to a maximum of four years.

A Police Aide will receive relevant work experience, which will be valuable for any future employment elsewhere or towards a law enforcement career.

POLICE AIDE COORDINATOR

The Personnel and Training Sergeant will serve as the Police Aide Coordinator. The Police Aide Coordinator shall supervise all Police Aide employees and their activities. The Police Aide Coordinator's responsibilities include:

1. Recruitment of Police Aides at various colleges.
2. Conduct pre-employment examinations and coordinate background investigations.
3. Primary supervision of all Police Aides.
4. Determine staffing needs in various divisions and schedule Police Aides for all shifts.
5. Closely monitor timesheet, absence/sick cards and representation requests.
6. Sign time sheets for Police Aides and forward to Payroll
7. Collect school schedules and grades
8. Schedule ride-alongs.
9. Schedule meetings (monthly or every two months).
10. Complete evaluations as primary supervisor, distribute and review evaluations with employee.
11. Conduct preliminary examination, interview, and investigation of policy and procedural violations.
12. Determine training needs (e.g., training videos, etc.).

CHAIN OF COMMAND

All Police Aides shall follow the established chain of command. The chain of command is designed to facilitate the transmittal of orders and instructions from the highest to the lowest level of command in a minimum of time with the least chance of misinterpretation. Police Aides shall communicate all matters

**BERKELEY POLICE DEPARTMENT
POLICE AIDE MANUAL
Issued: TBD**

to the Police Aide Coordinator. The Police Aide Coordinator has the specific responsibility to resolve the issue, or to forward to the next highest level those issues which are beyond his/her ability to resolve.

POLICIES

Policies provide a necessary basis for the orderly and disciplined performance of duty. You are required to read all BPD policies upon your appointment.

PERFORMANCE EVALUATIONS

Performance evaluations for all Police Aides shall be completed bi-monthly during their first six months on probation. Upon successful completion of probation, Police Aides will be evaluated on a yearly basis to assess their current job performance and their potential as police officers. The Police Aide Coordinator will review the performance evaluation with the Police Aide and file it appropriately.

UNIFORMS AND EQUIPMENT

The Uniform and Equipment Specifications Manual outlines the specifications for all uniforms and equipment. It is the responsibility of the Police Aide to take care of their issued equipment. The equipment must be returned to the Department upon termination of service.

If equipment is lost or damaged, a report must be written.

The Police Aide will be issued a Department locker and combination lock. No other lock may be used on the locker. All issued equipment is to be kept in the locker when not in use. Nothing shall be stored outside or on top of the locker. The Police Aide is responsible for securing all belongings appropriately.

SCHOOL SCHEDULES AND EDUCATION REQUIREMENTS

All school schedules shall be submitted to the Police Aide Coordinator prior to the start of the new school semester, or quarter and/or upon request. All classes must be currently attended. If there is a change in your schedule, or a class has been dropped or added, you must notify the Police Aide Coordinator immediately in a written memo. A copy of school grades must also be submitted to the Police Aide Coordinator upon completion of the school semester or quarter.

TRAINING

A Police Aide will be given a short orientation before their initial assignment. Training may include, but is not limited to exposure to patrol operations, the Traffic or Detective Bureau, the Property Room and/or any other detail or assignment deemed appropriate by the Program Coordinator.

Assignments should rotate on a regular basis. The supervisor of the unit the Police Aide is temporarily assigned to should arrange for training so they may effectively perform any given assignment. In some cases, another Police Aide familiar with a particular assignment may be tasked to assist with training.

**BERKELEY POLICE DEPARTMENT
POLICE AIDE MANUAL
Issued: TBD**

SENIORITY

Because it is a part-time position, Police Aides do not receive seniority privileges except as it applies to their overall time as a City of Berkeley employee.

Seniority is the relative position in the Department with respect to all other employees. It is determined by the hiring date and length of service; however, it is secondary to the efficient operation of the Department.

A Police Aide may be rotated through various shifts and assignments by the Police Aide Coordinator to provide the employee exposure and training in a wider variety of working conditions.

RIDE-ALONG PROGRAM / GUIDELINES

A Police Aide shall participate in the Ride-Along Program with a uniformed Field Training Officer. As a Police Aide, you must be in uniform to ride on patrol. Ride-Alongs shall be scheduled through the Police Aide Coordinator. All rules listed on the "Ride-Along Guidelines for Police Aides and Field Training Officers" shall be followed.

TIMESHEET SIGN IN/OUT

A Police Aide shall report for duty at the time, place and in uniform, as scheduled. The Police Aide must sign in at the beginning of his/her shift and sign out at the end of the shift on the date worked. All hours must be signed in and out in order to receive proper pay.

If a Police Aide is not present at reporting time, but is present within 15 minutes, he/she shall be marked "tardy" and required to make a verbal explanation to the immediate supervisor or Police Aide Coordinator. If the tardiness exceeds 15 minutes, he/she shall be marked "late" and will be required to file an explanatory report which shall be placed in the personnel folder maintained by the Police Aide Coordinator.

DUTIES / RESPONSIBILITIES

The duties of the Police Aide may include, but are not limited to:

1. Producing and distributing background mailers
2. Conducting law-enforcement related record checks
3. Coordinating the distribution of officer commendations
4. Maintaining the equipment room
5. Assisting with police applicant physical agility testing
6. Any other administrative duties.

**BERKELEY POLICE DEPARTMENT
POLICE AIDE MANUAL
Issued: TBD**

BREAKS/LUNCH BREAK

Permission for all breaks or a lunch break must be granted by your immediate Supervisor in the detail you are assigned. The City of Berkeley permits a 15-minute break for every 4 hours worked. If you are scheduled to work 8 hours, you may take an unpaid 30-minute lunch, or work the entire 8 hours. If you take a lunch, it must be written on the timesheet, so you will be paid for 7-1/2 hours instead of straight 8 hours.

MEETINGS

Police Aides will attend periodic meetings scheduled by the Police Aide Coordinator every 1-2 months. You shall report to the designated place of assembly, properly attired, and prepared to begin the meeting on time. If you are unable to participate in the meeting, you must notify the Police Aide Coordinator and make arrangements to reschedule in order to obtain the information discussed/presented. Failure to notify the Police Aide Coordinator of your inability to attend may result in disciplinary action.

DISCIPLINARY ACTION/SUSPENSION/TERMINATION

All complaints received regarding the work performance or conduct of a Police Aide will be initially investigated by the Police Aide Coordinator. Inappropriate conduct may result in disciplinary action, suspension or termination. Failure to maintain the education requirements will result in suspension from the program.

IDENTIFICATION CARD

The Department will issue each Police Aide an identification card.

CHANGE OF ADDRESS OR TELEPHONE NUMBER

Police Aides must notify the Department within three days of a change of address or telephone number. Forms for this purpose are located in the Professional Standards Division office. Changes should be forwarded to the Police Aide Coordinator to ensure proper contact information is available.

RESIDENCY REQUIREMENT

The State Constitution prohibits public entities from requiring employees to reside within the City; however, you must live within a reasonable distance.

OUTSIDE EMPLOYMENT

A Police Aide shall not engage in any employment outside the Department without the written approval of the Chief of Police. The approval process is located in the Outside Employment policy.

**BERKELEY POLICE DEPARTMENT
POLICE AIDE MANUAL
Issued: TBD**

RIDE-ALONG PROGRAM GUIDELINES

Police Aides will ride a minimum of 4 hours every other month with a Berkeley Police Officer. The aides are expected to make their own ride-along arrangements, obtaining approval from the Personnel and Training Bureau Sergeant no less than 3 days in advance of the selected ride-along date.

1. Police Aides may ride a maximum, not to exceed 30 hours each month. Any exception to this procedure must be approved by the Administrative Division Captain.
2. Pay will be given for the first 10 hours of each month. Additional hours will not be paid. However, all hours will be logged in the file folder.
3. Paid Ride-Along hours will not exceed the maximum 19-hour work week.
4. All Ride-Alongs will be scheduled through the Aide Coordinator. Requests for Ride-Alongs must be submitted no less than 3 days in advance and are subject to approval.
5. Police Aides will rotate their Ride-Alongs with various officers.

DURING RIDE-ALONG

1. Police Aides must remain with Field Training Officer at all times unless otherwise instructed.
2. Police Aides will notify Dispatch of the officer they are riding with.
3. Police Aides will remain in patrol vehicle on all assignments unless otherwise instructed by the Field Training Officer.
4. Police Aides will not participate in any arrest of a suspect, person or vehicle searches, interrogation of suspects, or any street activity which could place the Police Aide in possible danger.
5. Police Aides may assist in report writing, or use of a police radio only at direct supervision of Field Training Officer.

Outside Employment AR2-10.pdf

CITY OF BERKELEY ADMINISTRATIVE REGULATIONS

A.R. NUMBER:	2.10
ORIGINAL DATE:	1/1/95
POSTING DATE:	11/17/05
PAGE	1 OF 6 PAGES

SUBJECT: Outside Employment – All Employees Except the Deputy City Manager, Assistant City Managers and Department Directors

PURPOSE

The purpose of this policy is to:

1. Define outside employment; and
2. Identify who is affected by the policy; and
3. Outline the procedure to follow when a City of Berkeley employee seeks approval for outside employment.

POLICY

City Manager approval is required for all outside employment. Full-time City employees may not carry on, concurrently with their public service, any private business or undertaking, attention to which affects the time or quality of their work, or which casts discredit upon or creates embarrassment for the City government, including causing a perceived or real violation of internal controls. Written authorization to engage in any outside employment or gainful occupation must be approved, in advance, by the department director and City Manager, based upon written request of the employee.

Employees who engage in outside employment in violation of this administrative regulation may be disciplined, up to and including termination. This same standard also applies to other public service. Note: Policies affecting Department directors are to be found in Resolution Nos. 47,567, and 47,761 and A.R. 2.9.

DEFINITION OF OUTSIDE EMPLOYMENT

Outside employment includes self-employment and employment by others.

- a. **Self Employment**
Includes the offering for sale of goods or services on a regular or periodic basis or by contract as an independent contractor. Self-employment does not include the management of one's own investments.
- b. **Employment by Others**
Means the creation of an employer-employee relationship between the employee and an employer other than the City of Berkeley. An employer-employee relationship is considered to be established when the employee does not have individual control over

when, where, or how he/she works.

c. Exclusions from Outside Employment

Outside employment as defined above does not include those periodic services such as making speeches, which an employee may be called upon to perform by various outside groups for which an honorarium or expense is paid. Under normal circumstances, non-paid, voluntary involvement would not constitute employment under this policy. However, the City is under no obligation to honor volunteer commitments an employee may make prior to or during employment with the City.

d. Disclosure

Each City employee in the regular career service must, within 30 days of the effective date of this regulation, disclose to his or her supervisor whether he or she is employed outside of their City employment and seek approval by the City Manager, pursuant to this regulation. Any City employee hired after the effective date of this A.R. must disclose at the time of hire if he or she is, or expects to be, otherwise employed. Approval is required and employees may be directed to cease his or her outside employment, as a condition of continued employment with the City of Berkeley. Any City employee hired after the effective date of this A.R. must obtain written approval prior to engaging in any outside employment or gainful occupation by the department director and City Manager. Except that for the purpose of this A.R. an employee is not considered to be "otherwise employed" when hired, if he/she will cease the other employment within 30 days of beginning to work for the City.

e. Prohibited Outside Employment

The City will consider the following factors to determine whether an employee's proposed outside employment will be prohibited:

- 1) The employment involves the use for private gain or advantage of his/her City of Berkeley time, facilities, equipment and supplies, or badge, uniform, prestige, or influence of his or her position with the City; or
- 2) The employment involves receipt or acceptance by the employee of money or consideration from an employer, other than the City of Berkeley, for the performance of duties, which fall within the normal course of his/her assignment with the City; or
- 3) The employment involves the performance of an act in other than his/her capacity as a City of Berkeley employee, which act may later be subject directly or indirectly to the control, inspection, review, audit or enforcement by a representative of the City of Berkeley; or
- 4) The employment involves the time or other demands as would render performance of his/her duties as a City of Berkeley employee less efficient; or
- 5) The employment creates any real or perceived conflict of interest with his/her duties as a City of Berkeley employee, or in any way violates the internal controls of the

City government.

PROCEDURE

City employees engaged in outside employment, as defined above, are required to seek approval. Attachment 1 to this regulation is provided for that purpose.

- Step 1. Complete the attached form and submit to your department director.
- Step 2. Department director sends form to General Services Manager for determination of whether outside employer has business relationship with the City. General Services Manager signs and returns form to department director (should be completed within five (5) days).
- Step 3. Upon receipt from General Services, the department director completes the Recommendation section and sends form to Human Resources Department for review. Human Resources forwards form to City Manager for approval or disapproval. (Should be completed by department head within five (5) days and by Human Resources/City Manager within five days)
- Step 4. If approved or disapproved by City Manager, Human Resources Department files original copy of request form in the employee's personnel file.
- Step 5. Employee is required to submit a revised request form if there are any changes in the conditions of the approved outside employment; or to notify the department director if the outside employment has been terminated.

Outside Employment for Sworn Police Personnel

In addition to the policies and procedures described above for all City employees, sworn police employees must obtain written permission of the Police Chief to work in any outside employment that makes use of the skills and knowledge accrued to the employee by benefit of being employed as a sworn police officer. Because of the potential liability exposure that may accrue to the City, the Police Chief, or its officers and employees, the Police Chief has the right to refuse/deny/revoke applications for employment by sworn police officers working in an extra-duty capacity.

Sworn Police employees interested in working in outside employment are required to submit a written memorandum, directed to the Police Chief via the Administrative Division Captain describing the following:

- a. Full description of the outside employment, including terms and conditions of employment,
- b. Expected duration of the outside employment,
- c. The name, address and telephone number of the employer.

The Police Chief may deny any employment that may cause a conflict of interest for the City or the

Police Department, embarrassment to the City or the Police Department or conflict with the policy of the City for outside employment, as described above.

City Charter Provisions which bear upon outside employment:

Section 32 Compensation of officers and employees.

The Council shall fix the compensation of all officers and employees on recommendation of the City Manager, except as in this Charter otherwise provided. No officer or employee shall be allowed any fees, prerequisites, emoluments, rewards or compensation, aside from the salary or compensation as fixed by the Council, but all fees received by him or her in connection with his or her official duties shall be paid into the City Treasury.

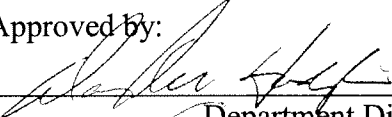

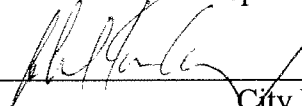

Section 36 Officers not to be interested in contracts or franchises.

No officer or employee shall be directly or indirectly interested in any contract, work or business of the City or in the sale of any article, the expense, price or consideration of which is paid for from the treasury or by assessment levied by any act or ordinance; nor in the purchase or lease of any real estate or other property belonging to the City or which shall be sold for taxes or assessments or by virtue of legal process at the suit of the City. No officer shall be in the employ of any public service corporation in the City or of any person having any contract with the City or of any grantee of a franchise granted by the City.

Any contract or agreement made in contravention of this Section shall be void.

Any violation of the provisions of this Section shall be deemed a misdemeanor.

The Council shall enforce the provisions of this Section by appropriate legislation.

BPD Narcan Signed Medical Standing Order.pdf

NARCAN NASAL SPRAY 4mg Physician/Medical Director Standing Order

NARCAN is indicated for the reversal of opioid overdose induced by natural or synthetic opioids and exhibited by respiratory depression or unresponsiveness. NARCAN is delivered by intranasal administration as indicated.

This standing order covers the possession and distribution of NARCAN Nasal Spray 4mg.

Trained staff of the Berkeley Police Department may possess and distribute NARCAN Nasal Spray 4mg to 1) a person at risk of experiencing an opioid-related overdose or 2) a family member, friend, or other person(s) in a position to assist a person at risk of experiencing an opioid-related overdose.

Administration of NARCAN Nasal Spray 4mg to a person suspected of an opioid overdose with respiratory depression or unresponsiveness as follows:

Use NARCAN Nasal Spray for known or suspected opioid overdose in adults and children. Important: For use in the nose only.

- Do not remove or test the NARCAN Nasal Spray until ready to use.
- Each NARCAN Nasal Spray has 1 dose and cannot be reused.
- You do not need to prime NARCAN Nasal Spray.

How to use NARCAN nasal spray:

Step 1. Lay the person on their back to receive a dose of NARCAN Nasal Spray.

Step 2. Remove NARCAN Nasal Spray from the box. Peel back the tab with the circle to open the NARCAN Nasal Spray.

Step 3. Hold the NARCAN Nasal Spray with your thumb on the bottom of the plunger and your first and middle fingers on either side of the nozzle.

Step 4. Tilt the person's head back and provide support under the neck with your hand. Gently insert the tip of the nozzle into one nostril until your fingers on either side of the nozzle are against the bottom of the person's nose.

Step 5. Press the plunger firmly to give the dose of NARCAN Nasal Spray.

Step 6. Remove the NARCAN Nasal Spray from the nostril after giving the dose.

Step 7. Get emergency medical help right away. • Move the person on their side (recovery position) after giving NARCAN Nasal Spray. • Watch the person closely. • If the person does not respond by waking up, to voice or touch, or breathing normally another dose may be given. NARCAN Nasal Spray may be dosed every 2 to 3 minutes, if available. • Repeat Steps 2 through 6 using a new NARCAN Nasal Spray to give another dose in the other nostril. If additional NARCAN Nasal Sprays are available, Steps 2 through 6 may be repeated every 2 to 3 minutes until the person responds or emergency medical help is received.

Step 8. Put the used NARCAN Nasal Spray back into its box.

Step 9. Throw away (dispose of) the used NARCAN Nasal Spray in a place that is away from children.

DEPARTMENTAL ORDER

ADMINISTRATIVE ORDER #2010-001

DATE ISSUED: 2/4/2010

SUBJECT: ANNUAL PHYSICAL EXAMINATIONS

PURPOSE

The purpose of this Department Order is to direct the attendance and participation of specified employees in annual physical health examinations.

POLICY

Department employees shall attend and participate in work-related physical health examinations announced in this Order.

EFFECTIVE TERM

This Department Order shall remain in effect until this Order is rendered inoperative by the issuance of another order by the Chief of Police or, one year from the date of issuance.

PROCEDURES

Specified personnel are assigned to be present for and participate in an annual physical health examination at the medical facility designated by the Department.

Individual appointments have been made for assigned personnel based on work schedules and employee input. An employee who, for good reason, cannot participate as scheduled shall contact the Personnel and Training Bureau no later than 72 hours prior the appointment date to request rescheduling of the examination. An examination may be rescheduled only upon the approval of the Personnel and Training Bureau Lieutenant. Any employee not complying with this Administrative Order may be subject to discipline.

INCIDENT REPORT

Employee Incident Report

Itemized instructions and additional information:

1	Enter today's date.
2	Enter the date of the incident.
3	Enter the time of the incident, check a.m. or p.m.
4	Enter the exact location of the incident.
5	Enter your first name, middle initial and last name.
6	Enter your Employee Number.
7	Enter your Department and Division.
8	Enter your job classification title.
9	Enter your home address, include city and zip code.
10	Enter your home phone number, include area code.
11	Please PRINT or TYPE the specific description of what you were doing immediately prior to the incident. Describe the exact work task(s) and movements you were performing immediately prior to the incident. For example: <i>I was climbing up an A-frame ladder and my left foot slipped off the 3rd step causing me to fall approx. three feet to the ground, where a sprained my right ankle.</i>
12	Enter the full names of any witnesses, and provide a phone number for each witness.
13	Identify any other factors which may have contributed to the incident.
14	Identify any actions which may minimize the potential for similar incidents in the future.
15	Enter the date and time you first reported the incident to you supervisor.
16	Enter the name of the person to whom you reported the incident.
17	Indicate if you did seek medical treatment at this time for an injury sustained from this incident. If you did seek medical treatment, enter the name of the medical provider. Enter your signature if you did not require medical treatment.
18	Indicate if you were supplied with a DWC-1 form. Indicate if you completed the form and the date you completed it.
19	Print your name, sign your name and enter the date.
20	Name of the person to whom the incident was reported.
21	Signature of the person to whom the incident was reported.
22	Title of the person to whom the incident was reported.
23	Indicate the body part injured; check as many as applicable.
