

Heat Wave Safety

Keep your home cool without AC

When the sun is down,
let cool air in.

early morning is a
great time to let cool
air in.

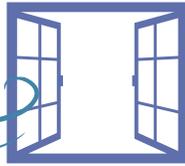

Pull in cool air:

Open 2 windows.

Turn on fan and
point it to blow
air out the
window

The fan will pull
cool outside air
from the other
window into your
home

When the sun is up,
keep warm air outside.

Close windows and
block out sunlight and
heat to help keep
your home cool.

Late afternoon is the
hottest time of day.
