Ohlone Greenway Safety Improvements Project

Public Input Survey

Thank you for participating in the survey for the Ohlone Greenway Safety Improvements Project!

It should take about 10-30 minutes to complete this survey depending upon the number of areas you comment on. Your responses will help the City of Berkeley in providing a safer experience for users of the Ohlone Greenway. **Please complete this survey by March 1, 2023.**

The City is planning improvements along the part of the Ohlone Greenway multi-use pathway from **Virginia Gardens** to the south to the **Santa Fe Avenue** intersection to the north to better accommodate the needs of users and improve safety, especially at roadway intersections and during non-daylight hours. The project will include widening of the pathway where feasible; improving crossings, lighting, and landscaping; and completing the Greenway section on Peralta Avenue.

The southern Project limit, at Virginia Gardens, coincides with the northern limit of Bay Area Rapid Transit's (BART's) upcoming work to improve the Ohlone Greenway southward to the North Berkeley BART station.

The survey has 3 sections that will ask you:

- 1. **How you use** this part of Ohlone Greenway pathway.
- 2. **What your experiences** are at different locations along the Greenway, and **what you think** about design concepts and design options for improvements along the Greenway.
- 3. Finally, we would like to know a bit **more about you**.

If you have any questions regarding this survey, please email ohlonegreenway@cityofberkeley.info.

1. How do you use this Part of the Ohlone Greenway?

These questions pertain to your use of this part of the Ohlone Greenway (between Virginia Gardens and Santa Fe Avenue).

times per day times per week times per month
That time of day do you use the Greenway? (Select all that apply) Morning Afternoon Evening
That activities do you use the Greenway for? (Select all that apply) Recreation/Exercise Commute - work Commute - school Shopping/errands Other (please describe):
w do you get to the Greenway? (Select all that apply) Walk Run/jog Bike Drive Transit Other (please describe):
w far do you live from the Greenway? (select only one) <1/4 mile (about 8-10 min. walking distance) 1/4 – ½ mile (about 10-15 min. walk) ½ - ¾ mile (about 15-22 min. walk) ¾ - 1 mile (about 20-30 min. walk) > 1 mile

2. What do you think about specific locations along the Greenway?

This section is organized by segments and street crossings along **this part** of the Ohlone Greenway (Virginia Gardens to Santa Fe Avenue).

Skip over questions about the parts of the Greenway you do not use or do not have comments about.

Upgrades are planned to focus on:

- Improving safety of pathway/roadway intersections, including more clear lines of sight.
- Widening the pathway to a minimum of 12 feet where feasible to better separate users of different speeds (e.g., pedestrians and bikes).
- Completing the pathway gap on Peralta Avenue to improve safety.
- Enhancing pathway lighting to improve safety and security.

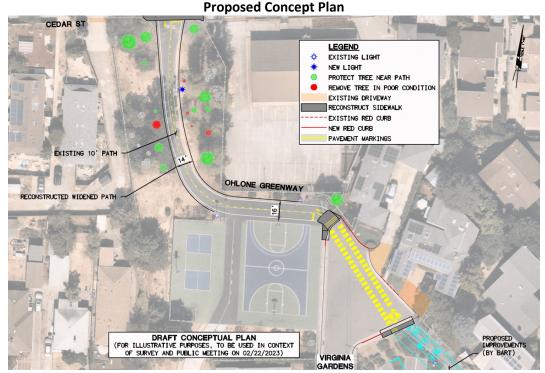

2.1 Virginia Gardens to Cedar Street Segment

Existing conditions at Virginia Gardens

Existing conditions along pathway leading to Cedar Street crossing

New pavement markings would delineate the pathway as it crosses the street, Virginia Gardens. A wider entry ramp would connect to the pathway near the basketball court. The pathway would be repaved and widened to about 14 to 16 feet, which is constrained by the presence of nearby trees. Some trees that are small and/or in poor condition poor condition would be removed to allow for a wider pathway and to improve lines of sight around the bend. Replacement trees would be planted nearby.

8. Generally, what is your experience along this segment? (Select all that apply)

- I don't have issues or concerns with this area (**Turn the page** for the next Concept Plan)
- ☐ No opinion (**Turn the page** for the next Concept Plan)
- ☐ Inadequate lines of sight between you and other pathway users
- ☐ Bottlenecks or crowding
- ☐ Inadequate pedestrian and bike separation
- ☐ Not enough lighting at night
- Other input about this area along the Greenway (please describe):

9. What do you think about the proposed work in this segment?

2.2 Cedar Street Crossing

Existing conditions at Cedar Street crossing

Proposed Concept Plan LEGEND EXISTING LIGHT NEW LIGHT RE-PAVE EXISTING 8' PATH FLASHING BEACONS (NO CHANGE TO LAYOUT OR WIDTH) PROTECT TREE NEAR PATH REMOVE TREE IN POOR CONDITION EXISTING DRIVEWAY RECONSTRUCT SIDEWALK RAISED CONCRETE MEDIAN FXISTING RED CURB POTENTIAL NATIVE PLANT GARDEN, POLLINATOR GARDEN OR OTHER USE NEW RED CURB PAVEMENT MARKINGS NEW PATH CONNECTION RAISED CEDAR ST EXISTING 10' PATH DRAFT CONCEPTUAL PLAN (FOR ILLUSTRATIVE PURPOSES, TO BE USED IN CONTEXT OF SURVEY AND PUBLIC MEETING ON 02/22/2023) RECONSTRUCTED WIDENED PATH

A new raised crosswalk would be installed, along with an 8-foot-wide concrete median and flashing beacons, which are designed to slow vehicles on Cedar St. The crosswalk would be wider and oriented perpendicular to the street, which would aid pathway users' visibility of the entire street. The pathway entering Cedar Rose Park would be shifted to the west to line up with the new crosswalk, creating an open space where that part of the pathway is currently located. Lights would be relocated to illuminate both ends of the crossing.

10. Generally, what is your experience at this crossing? (Select all that apply)

- □ I don't have issues or concerns with this area (**Turn the page** for the next Concept Plan)
 □ No opinion (**Turn the page** for the next Concept Plan)
 □ Inadequate lines of sight between pathway users and drivers on Cedar St.
 □ Drivers don't stop for pathway users to cross Cedar St.
 □ Drivers on the street drive too fast
 □ Pathway users don't give drivers on Cedar St. enough time to stop
 □ Bottlenecks or crowding
- Inadequate pedestrian and bike separation
- ☐ Not enough lighting at night
- Other input about this area along the Greenway (please describe):

11.	spa kno	fting part of the pathway to the west as it enters Cedar Rose Park would create a new open ace, about 800 square feet in size, where that part of the pathway currently exists. Please let us now your preference for the use of this area. plant garden is selected, it would need to be planted and maintained by the community; the
	req	uest for contact information is to establish a list of interested community members to
	par	ticipate in this role.
		Native plant garden (If selected, please provide your contact information at the end of the
		survey)
		Pollinator plant garden (If selected, please provide your contact information at the end of the
		survey)
		Benches
		Bike parking
		Other (Please describe):
12.	Wh	at do you think about the proposed work at this crossing?

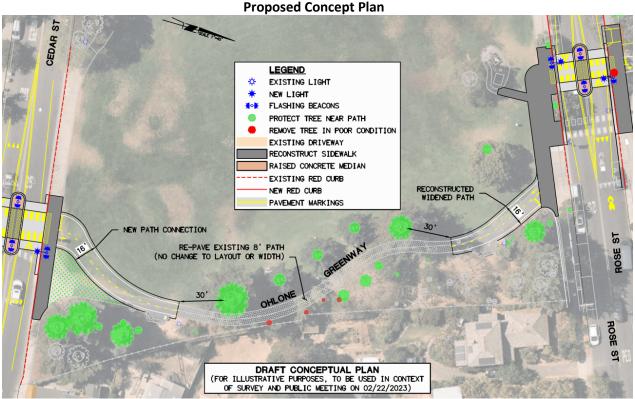

2.3 Cedar Rose Park Segment

Existing conditions at the entrance to Cedar Rose Park

Existing conditions along pathway leading to Rose Street crossing

The plan for the segment through Cedar Rose Park seeks to balance the use of the park and preservation of significant mature trees with improving the pathway quality. Within the central grove of trees, the path would be repaved within its existing footprint, as widening would not be possible due to the presence of trees and property boundaries. A few trees would be removed due to poor condition, and replacement trees would be planted nearby. Outside of the central grove of trees, the pathway would be repaved and widened to about 16 feet. New lights would be installed at selected locations to supplement existing lights outside of the tree grove.

13. Generally, what is your experience along this segment? (Select all that apply)

- I don't have issues or concerns with this area (**Turn the page** for the next Concept Plan)
- ☐ No opinion (**Turn the page** for the next Concept Plan)
- Bottlenecks or crowding
- ☐ Inadequate pedestrian and bike separation
- ☐ Not enough lighting at night
- Other input about this area along the Greenway (please describe):

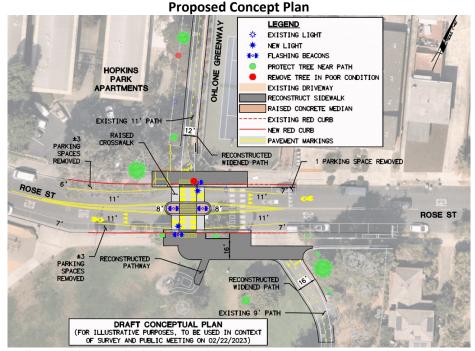

14. What do you think about the proposed work in this segment?

2.4 Rose Street Crossing

Existing conditions at Rose Street crossing

A raised crosswalk would be installed, along with an 8-foot-wide concrete median and flashing beacons, which are designed to slow vehicles on Rose St. The crosswalk would be shifted to the west to line up with the next segment of the pathway alongside the tennis courts; this would remove a street tree in poor health and a new tree would be planted nearby. The sidewalk along Cedar Rose Park would be widened to provide more space for pathway and sidewalk users. To create space for the median and to improve lines of sight, 7 parking spaces would be removed on Rose Street. Lights would be relocated to illuminate both ends of the intersection.

15. Generally, what is your experience at this crossing? (Select all that apply)

- ☐ I don't have issues or concerns with this area (**Turn the page** for the next Concept Plan)
- ☐ No opinion (**Turn the page** for the next Concept Plan)
- ☐ Inadequate lines of sight between pathway users and drivers on Rose St.
- ☐ Drivers don't stop for pathway users to cross Rose St.
- ☐ Drivers on the street drive too fast
- ☐ Pathway users don't give drivers on Rose St. enough time to stop
- ☐ Bottlenecks or crowding
- ☐ Inadequate pedestrian and bike separation
- □ Not enough lighting at night
- Other input about this area along the Greenway (please describe):

16. What do you think about the proposed work at this crossing?

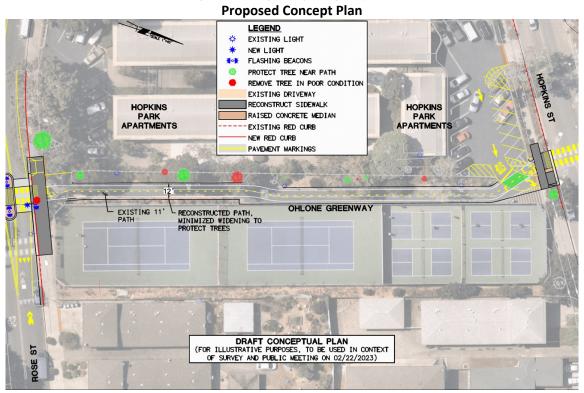

Page 9 of

2.5 Rose Street to Hopkins Street Segment

Existing conditions along pathway leading to Hopkins Street

The pathway is constrained by existing significant trees and the tennis and pickleball courts. As a result, the pathway would be repaved and widened only from 11 feet to 12 feet. Several trees in poor condition would be removed, and replacement trees would be planted nearby. The Hopkins Park Apartments' parking lot would be revised to one-way in and out circulation such that only exiting vehicles would need to cross the pathway, which would be painted to highlight this potential conflict.

17.	Generall	y, what is	your expe	rience alon	g this se	gment? (Select all	that appl	V)

I don't have issues or concerns with this area (Turn the page for the next Concept Plan)
No opinion (Turn the page for the next Concept Plan)
Inadequate pedestrian and bike separation
Inadequate separation of pathway users and people using the courts
Bottlenecks or crowding
Not enough lighting at night
Other input about this area along the Greenway (please describe):

18. What do you think about the proposed work in this segment?

2.6 Hopkins Street and Peralta Avenue Crossings and Segment Options

Existing conditions at Hopkins Street and Peralta Avenue crossing

This section includes the pathway gap on Peralta Ave. and pedestrian and bicycle crossings of Hopkins St. and Peralta Ave.

19.	General	y, w	hat is	s your	exper	ience	in t	his	area?	,
-----	---------	------	--------	--------	-------	-------	------	-----	-------	---

I do not have significant issues or concerns (Go to page 15 for the next Concept Plan)
No opinion (Go to page 15 for the next Concept Plan)
Inadequate sightlines between pathway users and drivers
Bottlenecks or crowding
Inadequate separation or conflicts between pedestrians, bikes, and cars
Lack of signs to indicate the pathway
Not enough lighting at night
Other input about this area along the Greenway (please describe):

☐ Yes☐ No 24. Per □	If YES, how concerned are you about the potential reduction in on-street parking on alta Avenue? (select one) Extremely concerned Very concerned

The City has prepared 3 proposed design options - Options 1A, 1B, and 2. All options would be coordinated with the City's ongoing Hopkins Street Corridor project, which is currently under review and is scheduled for City Council action in the coming months.

All 3 options include:

- A concrete median on Hopkins Street, which may or may not be feasible depending on whether a bikeway would be installed on Hopkins Street as part of the Hopkins Street Corridor project.
- A mid-block crosswalk on Peralta Ave., which could be at street level or raised to sidewalk height. This would require removal of existing trees in poor condition; replacement trees would be planted.
- Some on-street parking spaces, either on one side of Peralta Ave. or on both sides would be removed, to varying degrees, depending on the option.

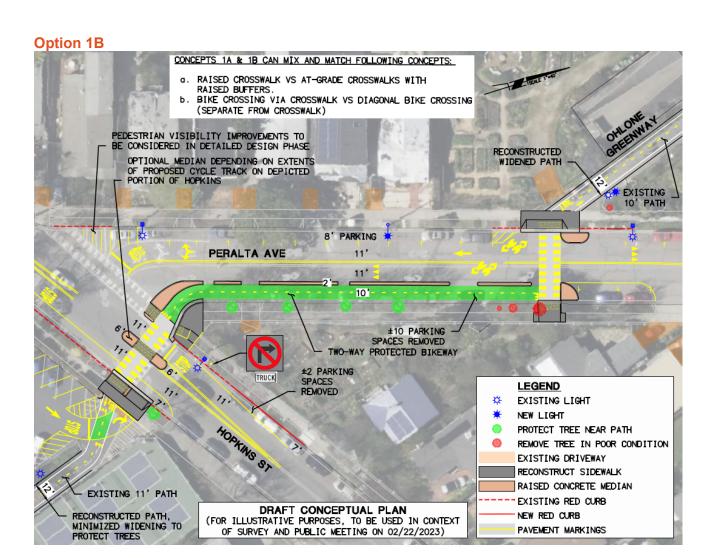

Option 1A includes an on-street protected bikeway along the east side of Peralta Ave. The idea of a protected bikeway at this location is part of the City-Council-approved 2017 Bicycle Plan. Raised concrete islands would serve as buffers around the protected bikeway. 7 on-street parking spaces would be provided on the east side of Peralta and parking on the west side would be removed, with a net removal of 12 parking spaces on Peralta. A raised mid-block crosswalk on Peralta would connect the Greenway to the north to the sidewalk on the east side of Peralta and would be designed to slow vehicles. If a dedicated bikeway is not installed on this part of Hopkins St. as part of the Hopkins St. Corridor project, the Ohlone Greenway project would construct a median on Hopkins, which would necessitate the removal of 2 parking spaces.

25. Do you generally like or dislike Option 1A?

- ☐ I like the changes
- ☐ I dislike the changes
- No opinion

26. Do you have anything specific to tell us about why you like or dislike Option 1A?

Option 1B is similar to 1A in that it includes a protected bikeway along the east side of Peralta Ave. but differs in that 1B would provide parking on the west side of Peralta instead of the east side. 10 on-street parking spaces would be removed on Peralta, all on the east side. A mid-block crosswalk on Peralta would connect the Greenway to the north to the sidewalk on the east side of Peralta. Raised concrete islands would narrow the roadway width at the crosswalk, which are designed to slow vehicles. Bikes would have the option to enter/exit the protected bikeway at an angle that aligns with the Greenway. This option could also include a raised crosswalk similar to Option 1A. If a dedicated bikeway is not installed on this part of Hopkins St. as part of the Hopkins St. Corridor project, the Ohlone Greenway project would construct a median on Hopkins, which would necessitate removing 2 parking spaces.

27. Do you generally like or dislike Option 1B?

- ☐ I like the changes
- ☐ I dislike the changes
- No opinion

28. Do you have anything specific to tell us about why you like or dislike Option 18?

Option 2 PEDESTRIAN VISIBILITY IMPROVEMENTS TO BE CONSIDERED IN DETAILED DESIGN PHASE RECONSTRUCTED WIDENED PATH OPTIONAL MEDIAN DEPENDING ON EXTENTS OF PROPOSED CYCLE TRACK ON DEPICTED PORTION OF HOPKINS PERALTA AVE 13' 8' PARKING 2 PARKING SPACES REMOVED 1 PARKING SPACE LEGEND HOPKINS ST EXISTING LIGHT NEW LIGHT PROTECT TREE NEAR PATH REMOVE TREE IN POOR CONDITION EXISTING DRIVEWAY PARKING

Option 2 would maintain shared lanes for bikes and cars. This option generally complies with design practices for low-stress bikeways based on traffic speed and volume data on Peralta Ave. A raised midblock crosswalk (with a concrete median) on Peralta would connect the Greenway to the north to the sidewalk on the east side of Peralta and would be designed to slow vehicles. 2 on-street parking spaces would be removed from the east side of Peralta at the new crosswalk. New pavement markings would emphasize the shared lanes. If a dedicated bikeway is not installed on this part of Hopkins St. as part of the Hopkins St. Corridor project, the Ohlone Greenway project would construct a median on Hopkins, which would necessitate the removal of 2 parking spaces.

Existing conditions along pathway leading to Gilman Street

LEGEND. ** EXISTING LIGHT PROTECT TREE NEAR PATH PAYENDIN MARKINGS CHILDUSTRATIVE PURPOSES, TO BE USED IN CONTEXT OF SURVEY AND PUBLIC MEETING ON 02/22/2023)

Due to the existing native plant garden and locations of drain inlets and light poles, the pathway would be repaved and widened about two feet, to a total of 12 feet. Efforts would be made to minimize impacts to mature landscaping and no trees are expected to be removed. New lights would be installed at selected locations to supplement existing lights.

33.	Gei	nerally, what is your experience along this segment? (Select all that apply)
		I don't have issues or concerns with this area (Turn the page for the next Concept Plan)
		No opinion (Turn the page for the next Concept Plan)
		Bottlenecks or crowding
		Inadequate pedestrian and bike separation
		Other input about this area along the Greenway (please describe):
34.	Wh	at do you think about the proposed work in this segment?

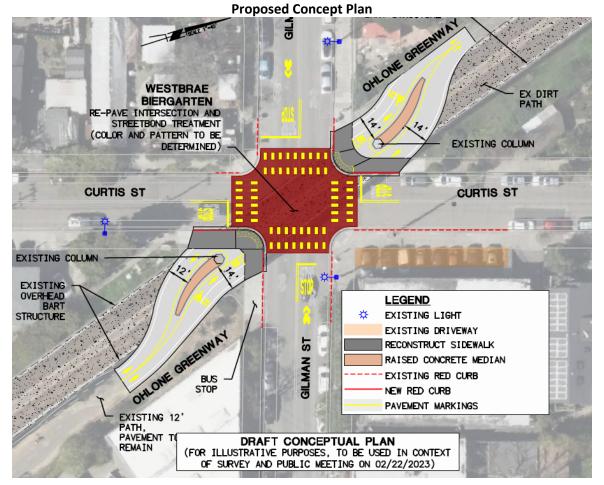

2.8 Gilman Street Crossing

Existing conditions at Gilman Street crossing

The proposed work is intended to improve visibility of Greenway users at this intersection and to provide a more **predictable** and orderly flow for bikes, pedestrians, and cars by establishing a 6-way intersection (4 legs of the streets and 2 legs of the Greenway). The intersection would be repaved and a graphic design would be applied to highlight the unique use of this intersection. The Greenway approaches to this intersection would be split into one-way lanes to create space to bring approaching pathway users closer to the intersection and to create a straighter path of travel.

35. G	Senerally, what is your experience at this crossing? (Select all that apply) I don't have issues or concerns with this area (Turn the page for the next Concept Plan)
	No opinion (Turn the page for the next Concept Plan)
	Inadequate lines of sight between pathway users and drivers on Gilman and Curtis streets at the
	crossing
	Drivers on the street don't stop for bikes on the Greenway
	Bikes on the Greenway don't wait for their turn to go
	Inadequate pedestrian and bike separation
	Not enough lighting at night
	Other input about this area along the Greenway (please describe):
36. V	Vhat do you think about the proposed work at this crossing?

2.9 Santa Fe Avenue Crossing Options

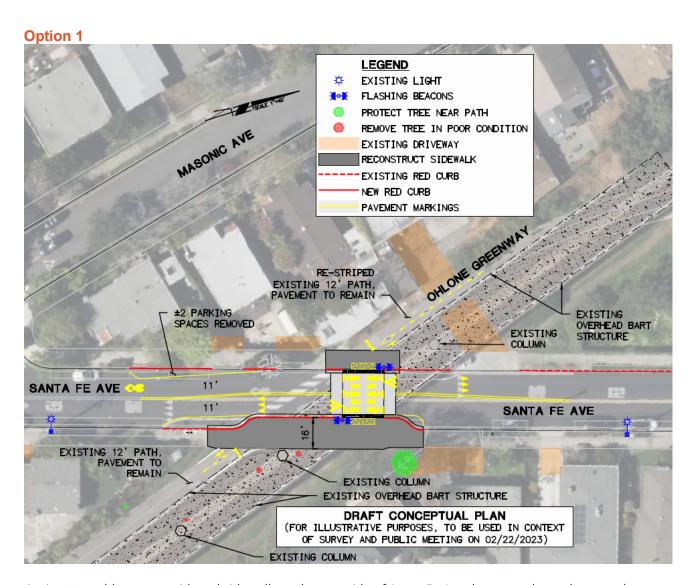

Existing conditions at Santa Fe Avenue crossing

Due to the skewed angle between the Greenway and Santa Fe Ave., clear lines of sight are lacking between pathway users and drivers on Santa Fe Ave. Two options are proposed for this location.

37.	General	ly, w	hat is	your	exper	ience a	t this	crossing) (Se	lect all	that	appl	y)
-----	---------	-------	--------	------	-------	---------	--------	----------	-------	----------	------	------	----

□ I do not have significant concerns or issues (**Go to page 22** for the next section of the survey)
□ No opinion (**Go to page 22** for the next section of the survey)
□ Inadequate sightlines between you and other users of Santa Fe Ave. at the crossing
□ Drivers don't stop for pathway users to cross Santa Fe Ave.
□ Pathway users don't give drivers on Santa Fe Ave. enough time to stop
□ Drivers on the street drive too fast
□ Bottlenecks or crowding
□ Not enough lighting at night
□ Other input about this area along the Greenway (please describe):

Page 19 of 23

Option 1 would create a widened sidewalk on the east side of Santa Fe Ave. between the pathway and crosswalk. Bikes on the Greenway would need to slow and turn within the widened sidewalk to transition to/from the crosswalk to the pathway. Three trees under the BART tracks would be removed, because they grow too tall. These would be replaced in another location. This option would remove 2 on-street parking spaces from the west side of Santa Fe Ave. to provide space for the bulb-out on the east side of the crosswalk.

38. Do you generally like or dislike Option 1?

4. Contact Information & Project Updates

Thank you again for participating in the Ohlone Greenway Safety Improvements Project Survey!

Your feedback will be used to finalize improvements and changes along the Ohlone Greenway. An online public meeting for the project will be held on Wednesday, February 22 from 6 to 8 pm. A link to the meeting will be provided on the project website below.

For more information on this project, please visit **fehrandpeers.mysocialpinpoint.com/ohlonegreenway**.

If you indicated a preference for a Native Plant Garden or Pollinator Plant Garden in Cedar Rose Park (Question 11), please provide your contact information below:
